President Pendleton announces faculty additions for next year

To: University community

From: President Pendleton

Date: July 31, 1934

The Board of Trustees, after careful consideration, has approved the following faculty additions for the College for the year 1934-1935.

At the recommendation of the Education Committee of the Alumni Association, the general plan of the session will be presented at the Eleventh Annual meeting.

New facultry for the fall will be Ms. Dieґen, Chairman, Associate Professor of Philosophy; Mr. R. L. Morgan, Assistant Professor of English; Mr. J. H. Johnson, Assistant Professor of History; Mr. A. R. Anderson, Assistant Professor of Chemistry; and Mr. H. W. Brown, Assistant Professor of Economics.

The new faculty will be responsible for the following courses: Philosophy, English, History, Economics, and Chemistry.

Further information on these new faculty members will be available in forthcoming announcements.

Respectfully,

President Pendleton

--

Architect's drawing of new science building

In their last meeting of the summer, the Board of Trustees, last week, put their seal of approval on the plans for the new science building, which is to be dedicated in the fall. The building will be the largest and most modern in the world, and will be a great addition to the facilities of the College.

The new building will be equipped with the latest scientific apparatus and will provide ample space for all departments of study.

In addition to the scientific departments, the building will also include a lecture hall, a library, and a cafeteria.

The opening of the new building will take place on the first day of the fall semester.

If she were looking through me to discover that even I did not know my- self, I’d have no difficulty in finding myself, a tall woman, but to my surprise I discovered that she was looking down at me. It was not long, however, for I realized that intellectually Miss Viva Scudder had the right to look down on the rest of the world.

We talked easily for a while. "I’d rather have you do it [Wellesley] than to tell you about myself," she said. But I knew that I’d come on bullish and was kind enough to give the biographical facts I was seeking. Miss Scudder pored over these, expressed some surprise. She could see in such a way as to make it extremely funny and amusing. When she had finished her sentences with something of a chuckle—"it really is a chuckle!" At times, however, when she was telling me of her childhood pranks, her eyes twinkled and her head bobbed up and down in smiling amusement over her reminiscences.

As she talked, Miss Scudder moved towards a huge bookcase, and, opening the glass doors, pointed to a special group of books. "These are the books I have written," she said; "there are a lot of them, aren’t there? I don’t mind showing them to you." Cordially she invited me to browse among them. Presently, I found that Miss Scudder had had her connection with Utopia. There stood an essay on Sir Thomas More, and his ideas of "Lao-tze forward." In the meantime, I could hear Miss Scudder talking busily at her desk. No doubt she was adding to the memoirs she is now writing and hopes to complete within five years.

Having bowed to my host’s request, I wandered about the study. The roof, coming in a polka overhand, made the room look snug and a feel of burning on the hearth added to the comfort. In the center of the room stood a broad, flat desk holding a typewriter at which Miss Scudder had been working when our interview began. The furniture and lights were arranged for convenience rather than for beauty. As I stood near a framed manuscript on the wall, Miss Scudder drew near with the project. "One of my students gives this to me," I’m a letter from ‘Windsor,’” she then pointed out an etching hanging on the jalousie. “This,” she said, “is my uncle.” I saw that it was a portrait of her publisher. E. P. Dutton.

So thoroughly was I enjoying myself that I had completely lost track of the time until Miss Scudder said, “Cvoe here again. If I’m busy, I’ll send you away.”

Editor’s Note: From the forward-looking movement of the Victorian Purple Coat class and valuable statistics have been gathered. There were many加载，some Companions, two orbitals, and two x-axis in the class. Revolution and signal occupied a small planet in the original Ugtopia, and the professor found that the three things which Wellesley girls seemed to have absorbed from this original class—this is, from a period of those Ugtopia—were a love of the music of Bach, and of Shakespeare’s Macbeth, and a strong emphasis on birth control. Wellesley girls do strive inwards towards Ugtopia, but their means of serving these, whether through the educational process or by revolution, is uncertain.

THE PERRINGRATESIS

The Review of the World

INTO the News desk walked a student, and in her hand she held a piece of paper. She spoke up to Perry. "Where shall I put this free press?" Perry received her list and indicated her to the editor's desk, "There, there, that's good." "Oh, I see," she said, "right here at the end of the paper, therefore." Perry had been wondering, since, why, if the writer herself thought the free press should go at the end of the paper, she should have come all the way to the News office to discuss it.

THE Rotary Department is truly starved and the Hill student-gardens are even more so. Before their very eyes, tulips—thus the joy and pride of everyone who has had a dog—lie blooming and they've planted a Tulip-pit. Perry, repeat, have been growing. This whitened alignment is not due to size, it cannot be attributed to empty spaces, it has just asisted the plants. The cause is invariably to be found. A certain white and brown dog who appears to me gone, but, apparently in an effort to return, becomes a devoted vegetarian and finds truly hips a delicacy.

NOT as long ago, several Werehillians went running, in that, they sat and watched their elders wandering the paddles. They passed near the shore where two boys were fishing in their own. In very what happened, Perry feels that this was the psychological process of the little boys. There are two boys and an Academy school and soldiers, and they look for the poor people, and, as you'll do to both of them, and we're also bored. Why not stir up some excitement? Here are the apples we brought along. We aren't really hungry anyway.

Plop went one apple; plop went another; these there was a third apple; and plop went the list.

"Remarkably good size," was the verdict of the young ladlings, and they had the proper verdict—four apples.

PERRY, confident that the re-learned clock would serve justification to his wanderings in that vicinity, was strolling on the waterfront one rainy afternoon when he saw a young fellow run out from under a small tree and rearrange the eyes of the world.

"Let's go," he suggested, "it's time we finished the day off."

PERRY, confident that the re-learned clock would serve justification to his wanderings in that vicinity, was strolling on the waterfront one rainy afternoon when he saw a young fellow run out from under a small tree and rearrange the eyes of the world.

The young fellow had started off from a home-run, mowed with the great and police of piloting a manual...

A SAY THE GENERAL

To the Wellesley College News:

I give next to a niece—a number of my old friends who are smokers of cigars with a sense of humor and innocents years. But since this is a matter of current use, I must say that I am glad to hear that the law as it stands, gives them a real choice. Instead of being forced to choose between the use of cigarettes and the use of cigars, they can now have the choice of both. This is a real step forward in the conservation of health and is a victory for those who have been fighting for the prohibition of harmful and injurious habits.

Sincerely yours,

Dr. C. E. W. (M.A.)

Mr. J. M. (M.A.)

TRANSMISSION

We feel that in the interests of good sportsmanship and good manners, all students should be made aware of the rules which govern the use of false cigarettes and the use of false tobacco. We believe that this will help to eliminate the practice of using false cigarettes and will contribute to the maintenance of a clean and healthy campus.

Sincerely yours,

Mr. J. M. (M.A.)

SUGGESTIONS NOTED

The following suggestions have been noted by the faculty and administration:

1. The use of false cigarettes should be prohibited.

2. Smoking should be limited to the smoking rooms.

3. The use of false tobacco should be prohibited.

Sincerely yours,

Mr. J. M. (M.A.)

ADVERTISING MANAGERS

To the Wellesley College News:

We have received a number of requests for advertisements in the next issue of the newspaper. We are happy to oblige and will be glad to accept the following:

1. A advertisement for a new product.

2. A advertisement for a new service.

3. A advertisement for a new club.

Sincerely yours,

Mr. J. M. (M.A.)

Dear Sir,

I wish to register my complaint regarding the manner in which the students are using the smoking rooms. The rooms are being used for social purposes, and not for the purpose for which they were designed.

Sincerely yours,

Mr. J. M. (M.A.)

THE EDITOR

Science reveals important new Facts for Smokers!

Camel Smokers can verify these facts!

A famous New York research laboratory announces a basic discovery that proves一行 new light on our past knowledge of Camels. It establishes an "exaggerated" awareness of the flow of "good body energy," an experience well known to Camel smokers. When you smoke a Camel you feel an almost immediate relief from fatigue. You have stored and made available the latent energy in your body. You've helped your body to help itself. During the day your energy curve is a certain low point. Camel smokes your flow of energy—quickly, consistently, and without fatigue, your way.

Copyright, 1936, by R. J. Reynolds Tobacco Company

Too tired for fun... and then she smoked a Camel!
BARRE IS SUBJECT OF BARN'S LECTURE

(Continued from Page 2, Col. 1)

RELIEF for victims of the tragedy of old age, poverty, and failure—
Barre knows everything in the portrait of a woman, but of the eternal woman, not of the all-modern woman. In his pictures, we can see that in Barre there is a concept of the beauty and the spirit, something more than the mere likeness. His plays are remarkable for their purity, and the real fact is that "Virginia is just as interesting as ever." His plays have the odor of lavender instead of the sock of the sewer.

His stage tactics, such as entrances and exits, and the ends of acts, are handled well, and he can use stage tricks very skillfully. He knows all the visual and auditory possibilities of the stage.

Miss Alexander spoke in particular of two of his plays, "The Admiral's Croquet and "Deer Street." The former of these plays is an example of a good liquor of society. Although it is called a comedy, the serious idea underlying the play is the mistake in the social system that places easy access to charms.

The other drama, "Deer Street," in its weird plot pulls into the Railway-band group. It is a fine piece of artistic work, and has an abstract, powerful and stirring effect. It is a fine piece of artistic work, and has an abstract, powerful and stirring effect.
