Sunday afternoon I was at the office with Mr. McCumber, who mentioned that he was going to New York on Monday night. He was going to stay there a few days and then return. I asked him if he had any plans for the weekend, and he said he was going to spend some time at his country home. He mentioned that his family would be joining him later in the week.

He also mentioned that he had some business to attend to in New York, and that he would be in touch with me once he arrived. I wished him a safe journey and hoped to see him soon.

The weather was very pleasant that afternoon, and I took a walk through the park. The trees were starting to change colors, and the leaves were falling from the trees. I enjoyed the calm and peaceful atmosphere, and it was a good way to clear my mind.

As I walked, I thought about the changes that were happening around me. The city was always in a constant state of flux, and it was interesting to observe how it evolved and transformed over time. I wondered what the future held for the city and its inhabitants.

I reached home around sunset, and the sun was setting behind the buildings. I took a short rest and then got ready for dinner. My cousin was coming over for dinner, and I prepared a delicious meal for her. We had a pleasant conversation over dinner, and I enjoyed her company.

After dinner, we adjourned to the living room to read and chat. We talked about various topics, including current events, literature, and travel. It was a rewarding evening, and I felt grateful for the opportunity to spend time with my cousin.

I retired early that night, feeling content and satisfied. I closed my eyes and drifted into a peaceful sleep, looking forward to a new day and the adventures that awaited me.
