A REMEMBRANCE

IN MONTREAL. By HENRY F. DURANT.

For the Pennsylvania Journal of Education at Hotel York, June 28, 1882.

MRS. HARLEY, 79.

There is no one more sincere than a member of the Harvard class of 1882. There are hundreds of students, but MRS. HARLEY is one of the few who are truly devoted to the cause of education. Her name is etched in the memory of every student who ever passed through those hallowed halls. She was one of the first to recognize the importance of physical education, and for many years she has been a tireless worker in behalf of the cause. Her influence has been felt in every corner of the country, and her contributions to the advancement of education are truly remarkable.

IN MONTREAL.

There is no one more sincere than a member of the Harvard class of 1882. There are hundreds of students, but MRS. HARLEY is one of the few who are truly devoted to the cause of education. Her name is etched in the memory of every student who ever passed through those hallowed halls. She was one of the first to recognize the importance of physical education, and for many years she has been a tireless worker in behalf of the cause. Her influence has been felt in every corner of the country, and her contributions to the advancement of education are truly remarkable.

A photograph published by a happy few of us was a magical power of memory. The photograph was taken at the turn of the century, and its influence has been felt in every corner of the country. It is the only picture of its kind in the world, and it is a treasure that we shall always treasure. It is the only picture of its kind in the world, and it is a treasure that we shall always treasure.
February

Stay away from those who can t live up to the true meaning of life. They are only doing it for the sake of doing so. It is not healthy to live in an environment where people only put on a facade to impress others. It is better to be honest and true to oneself. Always strive to achieve a balance between work and play, as this will lead to a fulfilling and satisfying life.

A BIRD CALENDAR

February

The months of February and March are the best times to observe birds. Many species can be seen during these months, as they are migrating or preparing to nest. Some popular species to look for include the American robin, the cardinal, and the flicker. These birds are often found in parks, gardens, and along the coast. The best way to observe birds is to spend time outside, listen for their songs, and observe their behavior.

February 17

Happy Valentines Day! This day is celebrated all over the world and is a great opportunity to show love and appreciation to those we care about. Whether it's a romantic dinner, a heartfelt card, or just a simple gesture, take the time to connect with your loved ones and spread some joy. Remember, love is the most important thing in life, so cherish it and share it with others.

February 21

National Astronomy Day. This day is dedicated to celebrating the beauty and wonder of our universe. It is a great opportunity to explore the night sky, learn about the history and science of astronomy, and connect with others who share a passion for space exploration. Whether you are a student, a teacher, or simply a curious observer, there is something for everyone on this day. So grab your telescope, grab a friend, and go out and explore the magic of the cosmos!

Liberal University in New York and Philadelphia are working clo-

sely for the University College.

to that date, the number of

passes of benefit has increased from 100 to 150.

An exhibition of the latest in

Chestnut was held in the afternoon.

Mrs. H. L. Knowlton was present and received many friends.

March 3rd, will begin a series of music and recitals in the

junior's room.

The symphony orchestra will give a concert in the evening.

Mrs. Conard's room, where the Math

Caucus, Miss Hopper, Miss C. A. Moss, Mrs. Husted, Mrs. Woodford, and Miss Conard, were present.

Prof. Whiting, an hospitality interest even on an alien shore, made

a reception recently in Berlin for resident Wellesley girls and their

friends from the class of 1898. Among them were Miss Conard, Miss

Hopper, Miss C. A. Moss, Mrs. Husted, Mrs. Woodford, and Miss

Conard. Prof. Conard was present and assisted in receiving this

American-Francophile society.

Mrs. E. M. Lottner, who has just completed a laboratory course on

the chemistry of the row of the sun, and a course in botany, she

expressed the opinion that the two latter courses is appropriate to the

work of students in this line of study. One of the students in the class

is a girl who is now working on a thesis for the degree of M. L. L. in

Biology.

The Slapper Concert was given Friday evening with marked

success.

The Wind, Wide World.

Feb. 16—Large number of benefactors discharged in Boston. The

opposition to the Canadian Parliament as its policy was

announced in commercial prosperity with the United

States is now causing much anxiety in periods of recession. Two

new reports were presented in Congress.

Feb. 17—A radical senator, nominating General Bennington issued

his own letter from the Senate chamber. Mr. Cotton, a member for

public schools. Reports of recent terrible earthquakes in

France were also of great interest.

Feb. 18—Another report of Sandy's death. Colonel of a large

body at Hartford received a letter from Mrs. Sandy, asking for

the return of his effects.

Mrs. Conard, who has been living in Paris for some time, is

returning to her home in New York, where she will give another

series of music and recitals in the junior's room.

The most recent reports indicate that the

a few weeks earlier, and that the

trend is now in the direction of cheaper

art in the South.
