Wellesley College

Courses
The information contained in this catalog is accurate as of July 2006. However, Wellesley College reserves the right to make changes at its discretion affecting policies, fees, curricula or other matters announced in this catalog.

In accordance with the Student Right-to-Know and Campus Security Act (Public Law 101-542), the graduation rate for students who entered Wellesley College as first-year students in September 1999 on a full-time basis was 93%. (The period covered is equal to 150% of the normal time for graduation.)

Wellesley College admits students without regard to race, color, religion, or national origin, to all the rights, privileges, programs, and activities generally accorded or made available to students at the College. The College does not discriminate on the basis of race, color, religion, national origin or sexual orientation, in administration of its educational policies, scholarship or loan programs, athletic and other college-administered programs or in its employment policies.

Wellesley College, as an independent, undergraduate educational institution for women, does not discriminate on the basis of sex against its students in the educational programs or activities in which it operates, and does not discriminate on the basis of sex in its employment policies, in compliance with the regulations of Title IX of the Education Amendments of 1972, nor does the College discriminate on the basis of handicap in violation of Section 504 of the Rehabilitation Act of 1973.

Academic Calendar 2006–07

Fall Semester

AUGUST

New students arrive 28, Mon.

SEPTEMBER

First day of classes 5, Tues.

OCTOBER

Fall break (no classes) 9, Mon. to 10, Tues.
Family and Friends Weekend 27, Fri. to 29, Sun.

NOVEMBER

Thanksgiving recess begins (after classes) 21, Tues.
Classes resume 27, Mon.

DECEMBER

Last day of classes 12, Tues.
Reading period begins 13, Wed.
Examinations begin 15, Fri.
Examinations end 21, Thurs.
Holiday vacation begins (after examinations) 21, Thurs.

JANUARY

Wintersession begins 3, Wed.
Wintersession ends 24, Wed.

Spring Semester

JANUARY

First day of classes 29, Mon.

FEBRUARY

Presidents’ Day (no classes) 19, Mon.

MARCH

Spring vacation begins (after classes) 16, Fri.
Classes resume 26, Mon.

APRIL

Patriots’ Day (no classes) 16, Mon.

MAY

Classes end 9, Wed.
Reading period begins 10, Thurs.
Examinations begin 15, Tues.
Examinations end 21, Mon.

JUNE

Commencement 1, Fri.
Inquiries, Visits, and Correspondence

Wellesley welcomes inquiries and visits to the College from prospective students, their parents, and other interested individuals. For those who would like more detailed information on many of the programs and opportunities described in this catalog, the College publishes a number of brochures and booklets. These publications, as well as answers to any specific questions, may be obtained by writing to the appropriate office as listed.

For those who would like to visit the College, the administrative offices in Green Hall and the Admission Office in Weaver House are open Monday through Friday, 8:30 a.m. to 4:30 p.m. The Board of Admissions is open on most Saturday mornings during the academic term. With the exception of a few holidays, arrangements can usually be made for prospective students to meet with Wellesley students during the College’s vacation periods. Student guides provide scheduled tours for visitors without appointments. However, visitors should check the schedule online at www.wellesley.edu/admission/admission/visitus.html or call the Office of Admission to reserve a tour. A prospective student who wishes to arrange an interview with a member of the Board of Admission should make an appointment at least two weeks in advance.

Accommodations for alumnae and for parents of students or prospective students are available on the campus in the Wellesley College Club and may be reserved by calling the College Club at 781-283-2700.

Please visit our Web site: www.wellesley.edu/admission to learn more about Wellesley before you arrive on campus. For directions, go to www.wellesley.edu/admission/directions.html.

President
General interests of the College

Dean of the College
Academic policies and programs, study abroad

Dean of Students

The College

The mission of Wellesley College is to provide an excellent liberal arts education for women who will make a difference in the world.

Wellesley is a college for the student who has high personal, intellectual, and professional expectations. Beyond this common ground, there is no typical Wellesley student. Students come from all over the world, from different cultures and backgrounds, and they have prepared for Wellesley at hundreds of different secondary schools. Through the Davis Degree Program, women beyond the traditional college age, many with families, are part of the student body working toward a Wellesley degree. Women and men from other colleges and universities study at Wellesley through various exchange programs.

This diversity is made possible, in large part, by the College’s need-blind admission policy. Students are accepted without consideration of their ability to pay. Once admitted, those with demonstrated need receive financial aid through a variety of services.

Henry Fowle Durant, Wellesley’s founder, was an impassioned believer in educational opportunity for women. His strong philosophy carries over to the present day. Throughout its 130-year history Wellesley has been one of the country’s preeminent liberal arts colleges, and a distinguished leader in the education of women.

In some respects, the liberal arts curriculum at Wellesley has not changed significantly since the College was founded. Though the structure of distribution requirements has evolved, the requirement that each student be acquainted with the main fields of human interest has remained a constant. The concept of the major—the opportunity for each student to establish mastery in a single area through concentrated study during her junior and senior years—has remained consistent as well. The College is committed to this framework because it emphasizes the essence of education: the ability to speak and write clearly, the knowledge to manage quantitative data with ease, the confidence to approach new material, and the capacity to make critical judgments. These skills are essential—whatever the student chooses to do with her life.
Within this traditional liberal arts framework, the Wellesley curriculum is dynamic and responsive to social change and new fields of study. The dramatic expansion of information of the last decades has led to an increasingly interdisciplinary course of study. Single majors in traditional disciplines have been joined by double majors and specially designed interdisciplinary and interdepartmental majors. Some departments also offer minors.

One of the first liberal arts colleges to establish a separate computer science department and computer science major, Wellesley remains at the forefront of technological development. Students and faculty in all disciplines use the College’s academic computing facilities in their courses and research. The Knapp Media and Technology Center provides state-of-the-art technology for students in courses ranging from multimedia language instruction to graphic arts.

The well-known Wellesley Centers for Women, composed of the Center for Research on Women and the Stone Center for Developmental Services and Studies, produce work of national importance about issues facing women in contemporary society.

The Wellesley-MIT cross-registration program allows students to combine the strengths of both institutions while remaining in residence on their own campuses. Students can complement their Wellesley majors with additional MIT courses in a variety of subjects including architectural design, urban planning, linguistics, financial accounting, computer science, engineering, mathematics, and the sciences.

The Twelve College Exchange Program brings women and men from member colleges to Wellesley for a semester or a year, and enables Wellesley students to live and study on another campus. The College also offers exchanges with nearby Brandeis University, Babson College, and Olin College of Engineering; and out of state, Spelman College, a Black liberal arts college in Atlanta, Georgia, and Mills College in Oakland, California. In addition, Wellesley students are encouraged to spend a semester or a year abroad on programs at many institutions. Approximately 45% of Wellesley College students elect to spend a semester or year abroad.

The Wellesley faculty is a community of recognized scholars. They include scientists, artists, and political and economic analysts. Dedicated to teaching, they bring a vast range of academic and professional interests to the College. Many members of the faculty live on or near the campus. They are committed to all aspects of life in the Wellesley community and are available to students outside of the classroom.

There is one faculty member for every nine students. The average class size ranges from 17 to 20 students. A few popular introductory courses enroll more than 100, but these classes routinely break into small discussion groups under the direction of a faculty member. Seminars typically bring together 15 to 18 students and a professor to investigate clearly defined areas of interest. The low student-faculty ratio offers an opportunity for students to undertake individual work with faculty or honors projects and research.

Excellent academic facilities support learning at Wellesley. Students have access to virtually all the collections on campus through a computerized library system totaling over 1.5 million items. The holdings include more than 400 electronic databases; 13,000 electronic journals; 22,000 electronic books; 10,000 films on VHS and DVD; and 8,000 music CDs. Among the special holdings are a world-renowned Browning Collection, a Book Arts Collection, and a Rare Book Collection. Interlibrary loans through the Boston Library Consortium augment the College’s own holdings.

Wellesley’s strength in the sciences dates to the nineteenth century, when the College’s physics laboratory was the second in the country (the first being MIT). The Science Center brings together all the science departments, including mathematics and computer science, in a contemporary setting that fosters interdisciplinary discussion and study. Laboratories are completely equipped for a wide variety of fields. The Center also includes an observatory and an extensive complex of greenhouses.

Students in the arts find excellent facilities in the Jewett Arts Center and the Davis Museum and Cultural Center.

Wellesley recognizes that classroom activities and studying are only part of a college education. The residence hall system not only provides a pleasant and comfortable place to live but seeks to integrate academic and extracurricular life through educational programs. Residence life is administered in several ways, ranging from residence halls staffed by professional resident directors to student-run cooperatives.

For many students, the lessons learned competing on the athletic field, publishing the Wellesley News, or participating in a Wellesley-sponsored summer internship in Washington, D.C. have lifelong impact. The College encourages self-expression through over 170 established student organizations, as well as any interest that a student may choose to pursue alone or with a group of friends. Wellesley also supports those students who investigate religious issues and thought. The Office of Religious and Spiritual Life offers religious programs in many faiths, including denominational services for those who wish to participate.

As a small community, Wellesley’s quality of life depends upon the involvement and commitment of each of its constituents. For this reason, students participate in decision making in nearly every aspect of College life. They serve, frequently as voting members, on almost every major committee of the Board of Trustees, including the Investment Committee, as well as the Academic Council, the Board of Admission, and the Committee on Curriculum and Instruction. In academic departments, they frequently participate in the curriculum and faculty search committees. They also serve on committees that set policy for residential life.

Established in 1901 by student and faculty agreement, the Wellesley College Government Association is the official organization of all Wellesley students. Through Senate, its elected representative body, College Government officers are elected each spring on a campus-wide basis; Senate representatives are elected from each residence hall and from the Davis Scholars and Wellesley off-campus students.

Each student who comes to Wellesley College joins an extended community of alumnae. Some of them have been outstanding scholars and researchers, others have been businesswomen and leaders in politics and social issues, still others have made important contributions to their communities through volunteer work. No matter how they have chosen to make their mark in the world, these women have proven that four years at Wellesley College is just a beginning.
The Campus

Located just 12 miles west of Boston, Wellesley’s 500-acre campus of woodlands, hills, meadows, an arboretum, ponds, miles of footpaths, fitness trails, and athletic fields and facilities borders scenic Lake Waban. The 65 buildings on campus range in architectural style from Gothic to contemporary.

Facilities and Resources

State-of-the-art academic facilities, ranging from creative arts media to advanced scientific research equipment support Wellesley’s curriculum. These facilities are available to all students.

Classrooms

The three primary classroom buildings on campus are Founders Hall for the humanities, Pendleton Hall for the social sciences and arts, and the Science Center.

Science Center

The Science Center houses the Departments of Astronomy, Biological Sciences, Chemistry, Computer Science, Geosciences, Mathematics, Physics, and Psychology, as well as several interdepartmental programs. The Center includes up-to-date teaching and research laboratories, extensive computer facilities, and modern classrooms. The Science Library contains more than 120,000 volumes, maintains subscriptions to a wide array of print and electronic journals, and provides access to online databases.

Sage Hall, the College’s original science building, dates to 1927. The Science Center, encompassing Sage Hall and new construction, was built in 1977 and won the Halston Parker Prize for architecture in 1987. Renovations and additions to the Science Center were done in 1991. The Center contains a variety of state-of-the-art instrumentation including: a confocal microscope, two NMR spectrometers (one with a micro-MRI accessory), a MALDI-TOF mass spectrometer, energy dispersive X-ray fluorescence spectrometers, microcalorimeters, an automated capillary DNA sequencer, a high-power pulsed tunable laser, and a 16-node supercomputer equipped with state-of-the-art bioinformatics tools. For more information, visit our Web site: www.wellesley.edu/ScienceCenter/mainpage1.html.

Botanic Gardens

The Botanic Gardens represent a historically significant component of the College’s campus. Dating from 1922, the Margaret C. Ferguson Greenhouses contain a diverse array of exotic plants representing various climatic regions from around the world. The 22 acres of the Hunnewell Arboretum and the Alexandra Botanic Garden showcase an extensive collection of hardy trees and shrubs for New England, many having been planted in the early twentieth century. The botanical collections support courses and research in the biological and environmental sciences. The Gardens are an outstanding teaching facility and community resource visited by thousands each year. For more information visit the Friends of Horticulture Web site: www.wellesley.edu/FOH/home.html.

Observatory

The Whitin Observatory contains laboratories, classrooms, a darkroom, and the Astronomy Library. Its research equipment includes 6-, 12-, and 24-inch telescopes, state-of-the-art electronics, and computers. The observatory was a gift of Mrs. John C. Whitin, a former trustee of the College. Built in 1900, and enlarged in 1906 and 1966, it is considered an unusually fine facility for undergraduate training in astronomy.

Computer Facilities

Students have access to hundreds of computers in computing labs, classrooms, and residence hall computing rooms. Advanced computing and multimedia equipment and software are available in the Knapp Media and Technology Center, located in the Margaret Clapp Library. Wellesley’s ResNet provides support to students who use the high-speed, campus-wide network from their own rooms to access electronic resources both on campus and around the world. These resources include: the College Web site; the library online catalog and full-text electronic resources; centralized e-mail and conferencing provided via FirstClass®; Element K® online courses for desktop applications, and an array of instructional software. For more information visit our Web site: www.wellesley.edu/Computing/computing.html.

Knapp Media and Technology Center

The Knapp Media and Technology Center, located in the Margaret Clapp Library, contains 43 computer workstations capable of viewing and digitizing audio and video, scanning printed images, slides, film and negatives and creating digital images and animations; audio and video-production studios; a video-conferencing site; three computer and media-equipped project rooms; two video-editing rooms; a large format printer; and other multimedia equipment and software.

Information Services staff assist faculty, students, and staff in the use of these resources and collaborate in the development of multimedia projects.

The Knapp Center also provides support for course reserves, laptops, cameras, and other equipment for check-out.

For more information see www.wellesley.edu/Knapp.

Jewett Arts Center and Pendleton West

The Jewett Arts Center consists of the Mary Cooper Jewett art wing and the Margaret Weyerhaeuser Jewett music wing. The art wing consists of classrooms, studios, photography darkrooms, video and computer facilities, art gallery, art library, and visual resources collection. The newly renovated Jewett sculpture court is used for exhibiting, gathering, and as a student workspace and lounge (enhanced by its wireless accessible capabilities). The music wing holds the music library, listening rooms, practice studios, classrooms, and a collection of musical instruments from various periods available for the student’s use. Music performances, theatre events, lectures, and symposia can be held in the Jewett Auditorium, a 320-seat theatre. The arts facilities of Pendleton West include drawing and painting studios, a sculpture foundry, a printmaking facility, and a concert salon. A bridge links the Jewett Arts Center to the Davis Museum and Cultural Center.

The Knapp Social Science Center

The Knapp Social Science Center at Pendleton Hall East integrates the social sciences and provides instructional space that is varied in design and layout. The physical space includes case-study classrooms, computer classrooms with individual student workstations, seminar rooms, and a video-conferencing facility. In addition to research facilities for faculty and students, an archaeology laboratory and a media laboratory function as extended teaching areas. Public spaces include a viewing room equipped with a large TV/VCR/DVD set-up, wireless computing capability and a two-story atrium with
bleachers and informal seating. The Center was given by Betsy Wood Knapp '64 and her husband Cleon Knapp.

The Susan and Donald Newhouse Center for the Humanities
The Susan and Donald Newhouse Center for the Humanities at Wellesley College was established by a generous gift from Susan and Donald Newhouse in 2004. The Newhouse Center aims to enrich the intellectual life of the Wellesley College community and, in particular, to promote excellence and innovation in humanistic studies. The Newhouse Center occupies a freshly renovated space on the second floor of Green Hall, including office space for a collaborative research community of resident scholars, and small and large seminar rooms that are the site of faculty seminars and reading groups as well as a variety of activities for the benefit of the community at large. In addition, the Newhouse Center sponsors and coordinates many other programs and activities on campus, including the Mary I. Cornille Distinguished Visiting Professorship in the Humanities, the Common Text Project, the Dorothy H. Magee Colloquium series, and more.

The Davis Museum and Cultural Center
The Davis Museum and Cultural Center is the art museum of Wellesley College. As a vital force in the intellectual and pedagogical life of the College, the museum collects, preserves, exhibits, and interprets art in the belief that contact with original works of art is an essential component of a liberal arts education and a key factor for understanding the world in which we live.

Located in the center of the campus, the museum offers innovative exhibitions, technology-based installations, lectures, symposia, films, concerts, performances, publications as well as interdisciplinary projects that are developed in collaboration with faculty. In addition, the museum provides a range of internships in the arts on campus, throughout the country and in Europe.

The four-story facility includes spacious galleries for the museum’s permanent collection that spans the 3,000 years of art history, temporary exhibition galleries, cinema, and café.

The Davis Museum and Cultural Center at Wellesley College is temporarily closed for repairs to the building’s roof and windows. The museum is slated to reopen in the spring. Please go to our Web site www.davismuseum.wellesley.edu for events and programs during the museum closing.

Margaret Clapp Library
Wellesley College Library received the first nation-wide “Excellence in Academic Libraries” award. The combined Clapp, Art, Astronomy, Music, and Science collections number over 1.5 million. The library’s physical holdings are supplemented by a wealth of online materials and through resource-sharing with the Boston Library Consortium.

Among the Library’s notable features are the College Archives, the Book Arts Lab, where typography and letterpress printing are taught, and the Special Collections, which contain rare books and manuscripts that support student research.

Research and Instruction specialists staff service desks, help with in-depth research, and schedule hands-on sessions for professors and their classes.

All of the libraries offer workstations with quiet and comfortable study space, help from knowledgeable staff, and information to enhance life and learning. Visit our Web site: www.wellesley.edu/Library for details.

Lulu Chow Wang Campus Center
The mission of the Wellesley College Campus Center is to enable faculty, students and staff as well as their friends and associates to play and work together in common space; to give student organizations flexible meeting space; to allow small and large groups of students to gather spontaneously and for planned events. It is the gathering space for all members of the campus community.

The Center provides flexible space for members of the college community to eat together or have informal gatherings. It offers services that are necessary and appealing for all members of the community, including a bookstore that offers a variety of products and an information center where the master events calendar is kept and displayed. The Campus Center welcomes and encourages both planned and spontaneous events all day and far into the evening hours. It is a place for fun and relaxation, and also a space where students, faculty and staff can get something done: have a meeting, mail a letter, consult with a professor, purchase sundries, check email, or make photocopies. The Center provides space and food offerings that demonstrate its purpose as a multi-constituency gathering place for coffee and meals, on weekdays, weekends, and late into the night.

The Campus Center fulfills the College community’s need to be with the smaller groups with which people identify, while never far from the larger community. After students, faculty, and staff leave their small group, they can immediately connect to the larger community in open, flexible-use space. The Center reinforces the strongly held Wellesley value of small group experiences, while underscoring that those groups are part of the larger whole that is the College.

Residence Halls
Residence halls are grouped in three areas of the campus: Bates, Freeman, McAfee, Simpson West, Cedar Lodge, Dower, French House, Homestead, Instead, and Stone-Davis are near the Route 16 entrance to the campus; Tower Court, Severance, Cervantes, Lake, and Claffin are situated off College Road in the center of the campus; and Shafer, Pomeroy, Cazenove, Beebe, and Munger are located by the Route 135 entrance to the College. For more information visit our Web site: www.wellesley.edu/ResLife/.

Continuing Education House
A “home on campus” for Elisabeth Kaiser Davis Scholars and Postbaccalaureate students, as well as for nonresident students of traditional age, the CE House is a place where students gather for programs, meetings, group study, or simply conversation. The Office of Continuing Education is located here. For more information visit our Web site: www.wellesley.edu/NSP.

Child Study Center
The Child Study Center, a laboratory preschool under the direction of the psychology department, was originally designed in 1913 as a school for young children. Students and faculty from any discipline can study, observe, conduct approved research, volunteer, or assist teach in classes with children ages two to five. In addition to the observation and testing booths in the historic Anne Page Building, there is a Developmental Laboratory at the Science Center.
Nannen Overholser Keohane Sports Center
Classes for all indoor sports, aquatics, fitness, and dance are conducted in the Nannen Overholser Keohane Sports Center, which includes an eight-lane competition swimming pool; badminton, squash, and racquetball courts; two weight rooms; exercise/dance/yoga studios; volleyball courts; and an athletic training area. The Field House has a basketball/volleyball arena, two cardiovascular machine areas, indoor tennis courts, and a 200-meter track. Outdoor water sports focus around the boathouse on Lake Waban, where the canoes, sailboats, and crew shells are kept. Wellesley maintains a nine-hole golf course; eight tennis courts; soccer fields; an artificial-turf field hockey/lacrosse field; a recreation field; an 8-lane track and a softball field. For more information visit our Web site: www.wellesley.edu/Athletics/main.html.

Alumnae Hall
The largest auditorium on the campus, Alumnae Hall seats more than 1,300 people and contains a large ballroom as well as the Ruth Nagel Jones Theatre. Wellesley alumnae gave this building to the College in 1923.

Chapel
Presented to Wellesley in 1897 by the son and daughter of William S. Houghton, a former College trustee, the Houghton Memorial Chapel hosts weekly religious and spiritual services, musical performances, lectures, and other College community gatherings. Stained glass windows commemorate the founders and a tablet by Daniel Chester French honors Alice Freeman Palmer, Wellesley’s second president. A smaller multi-faith Chapel, Muslim prayer room, Christian Common Room, and Buddhist/Hindu meditation room are located on the ground floor level.

Schneider Center
Schneider Center houses the following student offices: College Government; the Schneider Board of Governors (SBOG); the Student Bursar; Wellesley News; Legenda, the college yearbook; WZLY; Spectrum; Mezcla and Wellesley Asian Alliance (WAA). Other facilities and offices in Schneider include a lounge and kosher kitchen for Hillel; Office of Religious and Spiritual Life; the Offices of the Asian Advisor and the Latina Advisor; the Advisor to Lesbian, Transsexual and Transgender Students; the Office of Residential Life; and the Office of Summer Programs.

Harambee House
The cultural and social center for Wellesley students of African descent, Harambee House offers programs to the entire College community that highlight various aspects of African, African American, and African Caribbean culture. Harambee has a growing library dedicated to the history and culture of African and African American peoples and a library of classical jazz by Black artists, which is located in the Jewett Music Library. Harambee House also houses various organizations for students of African descent, and Ethos Woman (a literary magazine), as well as meeting and function rooms. For more information, visit our Web site: www.wellesley.edu/Harambee/index.html.

Slater International Center
Headquarters for international activities, Slater International Center is dedicated to encouraging greater understanding among all cultures through personal association and cooperative endeavor. The Center serves campus organizations, academic and administrative departments that have an interest in international issues and helps sponsor seminars and speakers. The Office of the Advisor to International Students and Scholars is located in the Center. The advisor counsels international students, advises international organizations, and handles immigration matters for students and faculty. The Center also coordinates a peer advising group of international students to help newcomers adjust to the United States. International students can also use the Center to study and meet informally. For more information visit our Web site: www.wellesley.edu/SICISS/sic/sic.html.

Society Houses
Wellesley has three society houses: Shakespeare House, for students interested in Shakespearean drama; Tau Zeta Epsilon House, for students interested in art and music; and Zeta Alpha House, for students interested in literature. Each has kitchen and dining facilities, a living room, and other gathering areas. Phi Sigma is a society that promotes intelligent interest in cultural and public affairs.

Green Hall
The offices of the president, the deans, and others directly affecting the academic and business management of the College are located in Green Hall. In the spring of 2006, the new Susan and Donald Newhouse Center for the Humanities was established on the second floor of Green Hall. Named for Hetty H.R. Green, the building was erected in 1931. The hall’s Galen Stone Tower, a focal point of the campus, rises to 182 feet and houses the carillon which is played for major College events.

Infirmary
Simpson Infirmary, a licensed outpatient clinic and infirmary, is an institutional member of the American College Health Association.

President’s House
Formerly the country estate of Mr. and Mrs. Henry Fowle Durant, Wellesley’s founders, the President’s House is located on a hill bordering Lake Waban just south of the main campus. It is frequently the site of alumnae and trustee gatherings, and events for faculty, staff, and students throughout the year.

Wellesley College Club
A center for faculty, staff, and alumnae, the Wellesley College Club’s reception and dining rooms are open for lunch and dinner to members, their guests, and parents of students. Overnight accommodations are available for all members, alumnae, and parents of current and prospective students. For more information visit our Web site: www.wellesley.edu/Collegeclub.

Wellesley Centers for Women
For more than 30 years, the Wellesley Centers for Women (WCW) has been a driving force – both behind the scenes and in the spotlight – promoting positive change for women and men, girls and boys. WCW brings together an interdisciplinary community of scholars engaged in research, training, analysis, and action. Its leading-edge work is dedicated to looking at the world through the eyes of women with the goal of shaping a better world for all. Sustained by private and public funding, WCW work focuses on critical social issues including: education, employment, family life, gender violence, and rights of women and children from all walks of life. WCW has also published The Women’s Review of Books.
The WCW was instituted in 1974 under the name Center for Research on Women by a grant from the Carnegie Corporation. The Stone Center for Developmental Services and Studies, founded in 1981 with a gift from Grace W. and Robert S. Stone, is dedicated to the prevention of psychological problems, the enhancement of psychological well-being, and the search for a better understanding of human development. The Stone Center at WCW fulfills this mission through education, research, community outreach, and counseling with a particular focus on culturally diverse populations. For more information, visit our Web site: www.wellesley.edu/WCW.

Student Life

Educating the whole person is key to the Wellesley experience. The College offers many opportunities for a student to develop socially, culturally, personally, and intellectually. Learning and living in a diverse community fosters self-confidence, communication and leadership skills, and a sense of social responsibility that extends beyond the classroom. Participation in student organizations, volunteer programs, and college governance creates solid friendships that support Wellesley students during their college years and throughout their lives.

Wellesley sponsors 160 student organizations that reflect many interests including ethnic, social, political, service, and religious interests. More than 20 multicultural organizations include the Slater International Association; Mzacha, an association for Latina students; Ethos, an organization of Black students; the Asian Student Union, composed of Asian and Asian American students; and the Korean American Student Association. Religious groups such as the Newman Club, the Wellesley Christian Fellowship, Hillel, Al-Muslimat, and Ministry to Black Women offer many programs throughout the year. Students produce a number of publications, including: Wellesley News, the weekly student newspaper; Counterpoint, a monthly publication produced by students from Wellesley College and MIT; Ethos Woman, a literary magazine that represents women of African descent; GenerAsians, a magazine by and about the Asian/Asian American community; and Legenda, the College yearbook. An all-student staff operates WZLY, the campus radio station.

Students are encouraged to reach beyond the Wellesley community. The Center for Work and Service Internship Office lists many opportunities for public and community service in government agencies and nonprofit organizations in the greater Boston area. In addition, the Community Service Center coordinates student groups that work with youth services, the elderly, the Easter Seal Swim Program, the Boston Food Bank, Habitat for Humanity, and Rosie’s Place, a shelter for homeless women.

Athletics has become a significant part of life at Wellesley. Students are frequent trophy winners in NCAA, Division III, and other intercollegiate events in the College’s 11 programs including basketball, softball, cross-country running, fencing, field and water sports. For students interested in sports for recreation, there are opportunities in club sports such as softball, sailing, table tennis, skiing, and rugby as well as nontraditional athletics including yoga, dance, and scuba diving. The Nannerl Overholser Keohane Sports Center provides state-of-the-art facilities for competition sports (see The Campus for details). Lake Waban is used for water sports and Paramecium Pond for ice skating.

Traditionally the arts are an essential part of the Wellesley experience. Students with musical interests can explore the Wellesley College Orchestra, the Prism Jazz Ensemble, Yanvalou Dance and Drum Ensemble, the Tupelos, the Blue Notes, the Toons, the Widows, Graceful Harmony, the Guild of Carillonneurs, and the MIT Orchestra. Those with theatrical interests can choose from the Wellesley College Theatre and the Shakespeare Society. At the Jewett Arts Center’s Student Gallery, students can exhibit their work or organize and curate shows. To take advantage of the extensive opportunities offered by the Boston Museum of Fine Arts whose collections accord it a world ranking, free entry has been purchased for all students thanks to the generosity of Marion Burr Sober ’30.

An important extension of both social and academic life, technology is integral to the Wellesley experience. The entire College community exchanges ideas and information on Wellesley’s electronic bulletin boards. Every student has access to the Internet, the e-mail system, and the campus-wide network from most buildings across campus, including her residence hall room. Wireless access is also available in many spaces across campus. In addition, clusters of PCs and Macintoshes are located in every residence hall and the Knapp Media and Technology Center in the main library. All students also have voicemail boxes from which they can receive telephone messages.

A number of traditional social events have become part of life at Wellesley: Junior Show, Family and Friends Weekend, Spring Weekend, and International Week are supplemented by frequent informal parties.
There are a variety of social centers on campus. The new Lulu Wang Campus Center serves as the focal point of community activities. Slater International Center is the frequent setting for international and multicultural events and celebrations. Harambee House, the social and cultural center of Wellesley’s African American community, sponsors lectures and music and dance performances. Lectures and cultural programs are also presented by many other student organizations. The Davis Museum and Cultural Center, with its Collins Cinema and Café, is a place to relax with friends, view domestic and international films, and listen to lectures and live performances.

Residential Life Philosophy

The philosophy of the Office of Residential Life at Wellesley College closely follows the mission of the College.

Our mission is to share and model a commitment to the education of women through our various roles on campus. In these roles we:

1. Foster inclusive learning communities where each member contributes her own unique history, culture, perspective, talents and creativity, and where each member appreciates the contributions of other community members.
2. Challenge each other to think critically and reflect upon the many aspects of life as we move from one stage to another.
3. Model all of the above in our own lives and in our work with each other.

The operations of the Residential Life team are grounded in two related theoretical assertions: that individuals grow and change over time, and that healthy growth is fostered by supportive community. Our professional team utilizes theories of student development to form the basis of the Residential Life department mission. We support, encourage and serve as non-peer resources so that students may safely challenge their own limitations and fears.

Eighty-eight student staff members, who are the Resident Assistants, Residence Managers and House Presidents, assist the professional staff. Our role is crucial to providing the comfort and structure, which permits and allows residential life to flourish.

The Residential Life team also works to build strong communities within each residence hall. A strong community is a place that practices hospitality, holds all members to the same standard of accountability, and develops a trusting and respectful space that celebrates its members. Living in a community establishes a model of civic responsibility within the Wellesley Community. The staff and students work together to create an environment where learning can occur.

Residence Halls

Each residence hall has a distinctive character and structure. Resident Directors, professionals trained in working with young women and issues that arise from living in a small community, staff 15 of the larger halls (most housing 120–140 students). Each Resident Director is a liaison to the College community, and supervises a residence staff that includes a Resident Assistant on each floor of the building and a House President. The Resident Assistants and House Presidents are trained in community programming and act as resources and referral agents for all students. The smaller halls each house fewer than 20 upperclass students and are staffed by student Resident Assistants and offer more independent government.

Many opportunities exist for students to assume leadership positions. Students in the larger residence halls elect a House Council that administers the hall government. The Vice President of Programming and her committee in each hall plan a variety of social, cultural, and educational events throughout the year. Each residence hall also elects representatives to the College Government Senate. These students consult with members of the residence hall on campuswide issues and convey opinions of their constituencies to the student government.

Most of the residence halls contain single, double, and triple rooms, and some suites. All incoming first-year students and sophomores are placed in double or triple rooms. The cost of all rooms is the same, regardless of whether they are shared, and students are required to sign a residence hall agreement. Each large hall has a spacious living room, smaller common rooms, and a study room. All but three of the large halls have dining facilities open on a five- or seven-day basis. All dining rooms offer vegetarian entrees; Pomeroy serves kosher/vegetarian food at all meals, and Cazenove is a peanut-free dining area. There are kitchenette facilities in the halls for preparing snacks. Each building is equipped with coin-operated washers and dryers.

The College supplies a bed, a desk, a chair, a lamp (halogen lamps are not allowed), a bookcase, and a dresser for each resident student. Students furnish their own linen, blankets, quilts, curtains, pictures, rugs, and posters.

Student Parking and Transportation

Because of limited parking on campus, resident first-year students are not permitted to have cars on campus. The Chief of Campus Police, or designated representative, must approve any exemptions to this policy. The Director of Disability Services must approve any temporary or permanent exemptions to this policy due to medical or accessibility circumstances. The parking fee for sophomores, juniors, and seniors is currently $75 per semester or $135 per year, and for off-campus students $60 per semester or $100 per year. The College may further restrict normal parking procedures to accommodate campus construction projects, or other special events as needed.

There is hourly bus service from the campus to MIT in Cambridge (7:00 a.m. to 12:00 a.m. Monday–Friday) with subway connections to the Greater Boston area. On weekends the College provides bus service to Boston and Cambridge on an expanded schedule tailored to students’ needs.

On Saturdays a shuttle transports students to the Natick Mall and nearby movie theatres.

There are two Zipcars parked on campus and students may join Zipcar by going to www.zipcar.com/wellesley.

Services for Students with Disabilities

Wellesley College is committed to providing students with disabilities the access and support they need to achieve their academic potential and to participate fully in Wellesley’s activities.

Each student is viewed as an individual with a unique set of strengths and abilities. Disability Services professionals, who report to the Dean of Students, are available to provide individualized assistance and information to students. The Director of Disability Services provides assistance to students with physical disabilities; the Director of Programs of the Pforzheimer Learning and Teaching Center works with students with learning disabilities and...
attention disorders; the Director of the Stone Center Counseling Services assists students with psychological and emotional disabilities; and the Directors of the Health Service help students who identify as having medical disabilities. These staff members work collaboratively with faculty and other campus members to coordinate services for students with disabilities.

Students with disabilities are encouraged to explore more information about services confidentially in-person or at www.wellesley.edu/DisabilityServices/DShome.html.

**Stone Center Counseling Service**

Many students benefit from talking with a professional about personal matters affecting their daily life or their basic sense of purpose and direction. Members of the College Counseling Service, part of the Stone Center for Developmental Services and Studies, provide short-term individual and group counseling for Wellesley College students who need or desire this support. The Center also provides preventive programs that address mental health and developmental issues.

Clinical staff members are trained in the disciplines of psychiatry, psychology, and social work. Long-term treatment is not provided, but students are referred to appropriate private clinical professionals and sliding-scale agencies. There is no fee for any counseling services provided to students by Stone Center staff and professional confidentiality is maintained at all times in accordance with the law.

The counseling division collaborates with the training and research branches of the Stone Center via the Clinical Training Program which includes advanced practicum training for social work and psychology students and a postdoctoral fellowship. The theoretical models developed by the Jean Baker Miller Training Institute are incorporated into the work of the Counseling Service. For more information, please visit us: www.wellesley.edu/Counseling.

**Religious and Spiritual Life**

Wellesley’s Office of Religious and Spiritual Life fosters a sense of community by supporting the diverse religious traditions and spiritual perspectives represented in the Wellesley community.

The Religious Life Team includes a Buddhist Advisor, a Hindu Advisor, a Hillel Director, a Muslim Advisor, a Director of Newman Ministry, a Protestant Christian Chaplain, and a Unitarian Universalist Chaplain. The program also includes advisors and student groups for the Bahá'í, Jain, Native African, Native American, Pagan, Sikh, and Zoroastrian communities.

Chaplains and Advisors are available for religious and pastoral counseling. Students, faculty, and staff are invited to take part in one or more of these faith communities, for worship, meditation, practice, and discussion on a weekly basis and educational and social activities throughout the academic year. In addition, the Dean of Religious and Spiritual Life coordinates a program that examines the role of spirituality in the educational process at Wellesley and officiates at multi-faith community worship.

Many outlets are available for students to express their spirituality. Flower Sunday, one of Wellesley’s oldest surviving traditions, is a multi-faith celebration held at the beginning of each academic year. Jewish students celebrate High Holiday services and have access to a kosher kitchen in Schneider Center. The Muslim Prayer Room, located in the lower level of the Chapel, is open for students to gather for daily prayers, and students may join Al-Muslimat, an organization for Muslim women at Wellesley, which meets for weekly Qur’anic study and discussion. A Buddhist/Hindu Meditation Room is available in the lower level of the Chapel. These are just a few of the observances and facilities available to Wellesley students.

For more information about religious and spiritual life at Wellesley, visit our Web site: www.wellesley.edu/RelLife.

**College Health Service**

The Health Service includes both an outpatient clinic and a state-licensed infirmary that is staffed 24 hours per day by registered nurses and on-call physicians while College is in session. During clinic hours, physicians, nurse practitioners, and nurses provide primary medical and gynecological care to all students. There is a small on-site laboratory. When required, consultation with specialists is available both locally and in Boston.

Emphasis on education and preventive measures to promote healthful lifestyles are integral to the Health Service philosophy. The Health Service collaborates with other College services such as Counseling Service, Residential Life, and Physical Education.

The confidentiality of the clinician-patient relationship is carefully maintained; medical information is not shared with College authorities or parents without the student’s specific consent. When there is concern about a student’s safety, however, that concern takes precedence over issues of confidentiality. Information may also be disclosed to meet insurance claims or legal requirements.

There is no charge for outpatient visits to a nurse, nurse practitioner, or physician at the Health Service. There are charges for laboratory tests, immunizations, some procedures, and inpatient care. A College-sponsored Student Accident and Sickness Insurance Program is available to cover most of these charges. Please see that section for further details or visit us at www.wellesley.edu/Health/healthservice.html.

**The Ruhlman Conference**

Founded in 1997 as a forum for students to present their work in public, the Ruhlman Conference provides an opportunity for students, faculty, staff, friends, family, and alumnae to gather and celebrate student achievement.

Students submit presentation proposals for consideration at the end of the fall semester. Sensitive to the diversity of student interest and accomplishment, the conference allows a variety of presentation formats: talks, colloquia, panels, poster sessions, exhibitions, musical and theatrical performances, and readings of original work. By providing an opportunity for public presentation of what is often a private, isolated activity, the Ruhlman Conference underscores the idea that research can be part of an ongoing conversation in a community of scholars.

Held each spring, the conference has been made possible by the Barbara Peterson Ruhlman Fund for Interdisciplinary Study. To see photos and programs from past conferences, please visit: www.wellesley.edu/DeanCollege/Ruhlman/.

**The Tanner Conference**

Established through the generosity of alumna Estelle “Nicki” Newman Tanner, the Tanner Conference celebrates the relationship between the liberal arts classroom and student participation in an increasingly diverse and interdependent world. The Tanner Conference provides a venue for students and alumnae to analyze and share their off-campus experiences with others in the College community.
Encompassing the diversity of off-campus experiences of students, the conference explores the learning that occurs through internships, service learning experiences, student teaching, study abroad, international Wintersession programs, experiential learning in courses, and independent study and research conducted away from Wellesley. Held each fall, the conference also presents an opportunity for alumni to return to campus to discuss how their participation in these experiences as Wellesley students has enriched their lives. For highlights of the 2005 conference please visit: www.wellesley.edu/CWS/Tanner2005/tanner_home.html.

Student Government

Honor Code

Inherent in Wellesley’s democratic system of governance and its accompanying law is the Honor Code. As the vital foundation of government, the Honor Code rests on the assumption that individual integrity is of fundamental value to each member of the community. Within the philosophy of self-government, the personal honor and responsibility of each individual as she or he approaches both the regulated and nonregulated areas of academic, social, and residence hall life in the Wellesley community are of central importance.

The Honor Code covers all duly adopted rules of the College for the governance of academic work, for the use of College resources, and for the conduct of its members. Each student – degree candidate, exchange student, and postbaccalaureate student – is bound by all the rules.

Each student is expected to live up to the Honor Code, as a member of the student body of Wellesley College both on and off the campus. She/he should also remember that she/he is subject to federal, state, and local laws that are beyond the jurisdiction of Wellesley College.

The Honor Code can work only with full support of the entire College community. In addition to upholding the regulations and spirit of the Honor Code personally, both students and faculty are responsible for the success of the system. This includes guarding against and, if necessary, reporting any inadvertent or intentional abuses of the Honor Code by any member of the community.

College Government

Responsibilities of College Government include governance of all student organizations, appointment of students to College committees, and allocation of the student activity fund. Many of these responsibilities are assumed by Senate, the elected legislative body of College Government, which also provides the official representative voice of the student body. Violations of the Honor Code are adjudicated through General Judiciary.

Confidentiality of Student Records

Maintenance of the confidentiality of individual student educational records has always been important at Wellesley, as is a concern for the accuracy of each record. Under the provisions of the federal Family Educational Rights and Privacy Act of 1974, every Wellesley student is assured the right to inspect and review all college records, files, and data directly related to her, with certain exceptions such as medical and psychiatric records, confidential recommendations submitted before January 1, 1975, records to which the student has waived her right of access, and financial records of the student’s parents. The student may also seek a correction or deletion where a record is felt to be inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student. The Privacy Act also protects the privacy of personally identifiable information maintained in student records by prohibiting the release of such information (other than those facts defined below as “Directory Information”) without the written consent of the student, except to persons such as officials or teachers within the College who have a legitimate educational interest in seeing the information, officials of other institutions in which the student seeks to enroll, the student’s parents if the student is a dependent for tax purposes, and certain other persons and organizations.

The final regulations for the Act make clear that, in the case of students who are dependents of their parents for Internal Revenue Service purposes, information from the education records of the student may be disclosed to the parents without the student’s prior consent. It will be assumed that every student is a dependent of her parents, as defined by the Internal Revenue Code, unless notification to the contrary with supporting evidence satisfactory to the College is filed in writing with the Registrar by October 1 of each academic year. All correspondence relating to a student’s undergraduate performance is removed from a student’s file and destroyed one year after graduation. All disciplinary records are destroyed when a student graduates from the College. Disciplinary records are never a part of a student’s permanent file while she is at Wellesley.

Copies of the Privacy Act, the regulations therein, and the “Wellesley College Guidelines on Student Records” are available on request from the Office of the Registrar. Students wishing to inspect a record should apply directly to the office involved. Complaints concerning alleged noncompliance with the Privacy Act by the College, which are not satisfactorily resolved by the College itself, may be addressed in writing to the Family Policy Compliance Office, Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202-4605.

Directory Information

The Privacy Act gives Wellesley the right to make public at its discretion, without prior authorization from the individual student, the following personally identifiable information: name; class year; home address and telephone number; college address and telephone number; college e-mail address; schedule of classes; major and minor field(s); date and place of birth; dates of attendance at Wellesley College; degrees, honors, and awards received; weight and height of student athletes; participation in officially recognized sports and activities; and previous educational institution most recently attended. In addition, student photographs are part of a College photograph directory that resides on the Campus-Wide Information System. It is accessible only on campus.

The Privacy Act also allows individual students to place limitations on the release of any of the above information. A student who wishes to do this must inform the Registrar, Green Hall, in writing each year by July 15 for the following academic year.

In practice, College policies discourage the indiscriminate release of any information about individual students. College directories and lists are for use within the College community.
Center for Work and Service

The Center for Work and Service offers comprehensive career preparation and resources for students and alumnae. A wide range of information and services to help students explore the world of work, participate in community service, and prepare for their futures is available. A staff of experienced professionals counsels students and alumnae at all stages of career exploration.

Students can explore various professions, educational options, and community service opportunities using the resources of the Center for Work and Service. Among the offerings are:

- career counseling and inventories
- internship search and funding resources
- community service events
- week-long service trips
- fellowship and graduate school advising
- administration of Wellesley College Graduate Fellowships and other fellowship programs
- prelaw and prehealth advising
- job and internship recruiting programs
- not-for-profit and public service job search track
- alumnae panel presentations
- workshops
- the Shadow Program (students spend a day with alumnae at their workplaces)
- online W Network (over 20,000 Wellesley graduates who have volunteered to serve as contacts for career exploration)
- online job, internship, and community service databases and directories
- an extensive career library
- an interactive Web site: www.wellesley.edu/CWS

In recent years, the Center for Work and Service has undertaken programs that have aligned the Center more closely with the educational core of the College. Faculty and Center staff collaborate to help integrate the student’s overall career decision-making process and to amplify the connection between her academic experience and life outside the classroom.

After graduation, the Center remains a resource for alumnae by offering career counseling, job listings, regional career programs, alumnae career Web pages, use of the Center for Work and Service library, and a reference file service.

For more information, please visit: www.wellesley.edu/CWS.

Admission

The Board of Admission admits students who will benefit from the education Wellesley offers and who will be able to meet the graduation requirements. Consideration is given to creativity, high motivation, and strong academic potential.

Each application is evaluated on its own merits, without regard to race, religion, color, creed, national origin, or sexual orientation. Wellesley College encourages qualified applicants from a wide variety of cultural, economic, and ethnic backgrounds to join its diverse multicultural student population.

The Board of Admission includes faculty, administration, and students. In selecting candidates for admission, the Board considers several factors: high school records; rank in class; standardized test scores; letters of recommendation from teachers, guidance counselors, or principals; the student’s own statements about herself and her activities; and interview reports when available from the staff or alumnae. The Board values evidence of unusual talent and involvement in all areas of academic and social concern. The admission decision is never based on a single factor. Each part of the application contributes to a well-rounded appraisal of a student’s strengths and helps determine whether Wellesley would be the right place for her to continue her education.

Criteria for Admission

General Requirements for First-Year Student Applicants

Wellesley College does not require a fixed plan of secondary school course preparation. Entering students normally have completed four years of college preparatory studies in secondary school that includes training in clear and coherent writing and in interpreting literature; history; training in the principles of mathematics (typically four years); competence in at least one foreign language, ancient or modern (usually four years of study); and experience in at least two laboratory sciences.

Students planning to concentrate in mathematics, premedical studies, or natural sciences are urged to elect additional courses in mathematics and science in secondary school. Students planning to concentrate in language or literature are urged to study a modern foreign language and Latin or Greek.

There are often exceptions to the above, and the Board will consider an applicant whose educational background varies from this description. Wellesley’s applicant pool has been consistently strong. As a result, not all applicants who are qualified are admitted. Visit our Web site: www.wellesley.edu/admission for more details about the admission process.

The Application

The Wellesley Application consists of the Common Application plus the Wellesley supplement. You may apply online at the Common Application Web site at www.commonapp.org or you may download the application from the Board of Admission Web site at www.wellesley.edu/admission/application.html.

The Interview

While Wellesley does not require a personal interview for the first-year application, prospective students are strongly recommended to arrange one. An interview is required of transfer applicants, Accelerating Candidates and Davis Degree Candidates (see related sections). If a candidate cannot come to the College, and would like to request an off-campus interview with an alumna in her area, she should complete the off-campus interview request form at www.wellesley.edu/Admission/form6.

Campus Visit

Students who are seriously considering Wellesley will have a better understanding of student life here if they can arrange to spend a day on campus. Candidates are welcome to attend classes, have meals in the residence halls, and talk informally with Wellesley students. Prospective students who plan to visit are urged to notify the Board of Admission at least two weeks in advance so that tours, interviews, meals, and class attendance can be arranged.

Standard Tests

Applicants must take either the College Board Scholastic Assessment Tests (SATs) or the ACT Assessment. If an applicant is
taking the SATs, she must take the SAT Reasoning Test and two SAT Subject Tests. Wellesley recommends one Subject Test to be quantitative (math or science). If she is taking the ACT, she must take the ACT with Writing Test.

The applicant may register online or obtain the registration form at school. Each applicant is responsible for arranging to take the tests and having the test results sent to Wellesley College. The College Board and ACT send the publications and the registration forms for the tests to all American secondary schools and many centers abroad.

Students should register six weeks before the College Board test dates. Limited walk-in registration may be available at some centers. For the ACT, students should register four to six weeks prior to the test date. No walk-in registration is available.

The latest test date from which scores can be used for September 2007 admission is December 2006.

The College Board Code Number for Wellesley College is 3957. The ACT Code Number for Wellesley College is 1926.

Admission Plans

Regular Decision
Candidates applying under the Regular Decision plan must file an application by January 15 of the year for which they are applying. Applicants will be notified of the Board of Admissions' decisions in April. Applicants for Regular Decision may take SATs or the ACT any time through December of the senior year. Results of tests taken after December arrive too late for consideration.

Early Decision
Students with strong high school records who have selected Wellesley as their first-choice college by the fall of senior year should consider the Early Decision plan. Candidates may initiate applications at other colleges, but they agree to make only one Early Decision application. Once admitted under Early Decision, all other applications must be withdrawn.

Applications must be submitted by November 1 and indicate that they are intended for the Early Decision plan. Although College Board tests taken through the November test date or ACT tests taken through the October test date may be used, it is preferred that students complete the tests by the end of their junior year. Decisions on admission and financial aid will be mailed no later than mid-December.

Early Evaluation
Candidates whose credentials are complete by January 1, and who select this plan on the Wellesley Supplement form, will receive an Early Evaluation of their chances for admission. These evaluations will be sent by the end of February. Candidates will receive the final decision from the Board of Admission in April.

Accelerating Candidates
Candidates who have demonstrated academic strength and personal/social maturity may apply to enter college after completing their junior year of high school. These candidates are considered with other applicants in the Regular Decision plan, but are requested to identify themselves as Accelerating Candidates in their correspondence with the Board of Admission. An interview is required, preferably at the College. Accelerating candidates are not eligible for Early Decision or Early Evaluation. In all other respects they follow the same procedures as the Regular Decision plan.

Deferred Entrance
Some students who apply successfully to Wellesley may then desire to defer their entrance to the first-year class for one year. If so, they should accept the offer of admission by May 1, and submit their deposit at that point. The request for deferral should be made to the Dean of Admission in writing. Students who attend another American college full-time during the year between high school and their entrance to Wellesley are not considered deferred students but must reapply for entrance as transfers. Ordinarily, transfer students may not defer entrance to the following semester or year. This also applies to international students.

International and Transfer Students

Through the years Wellesley has attracted a large international student population. The resulting cosmopolitan atmosphere has benefited the entire campus. The College also seeks highly qualified transfer students who believe that Wellesley's special opportunities will help them achieve specific goals. For international and transfer students there are some additional and different application procedures and deadlines.

International Students
All non-U.S. citizens attending secondary schools or universities outside of the United States should complete the Form for Applicants Currently Studying Overseas. U.S. citizens who have been educated in a school system abroad should also complete this form.

Admission is considered for September entrance only. The application and all required credentials must be received by January 15 in the year in which the student plans to enter. The application form should be returned with a nonrefundable $50 application fee drawn on a U.S. bank, or a fee waiver request from the secondary school.

Financial aid is available for only a limited number of non-U.S. citizens. Therefore, admission is highly competitive for students who apply for financial assistance. Wellesley's established policy is to accept only those international students for whom we can provide the necessary financial support.

The SAT Reasoning and Subject Tests or the ACT with Writing Test are required of all international students in addition to predicted or, if completed, final results of their own national examinations. The TOEFL (Test of English as a Foreign Language) is strongly recommended for all students for whom English is not their first language and who have been studying in English for less than five years. The TOEFL is not required if English is the candidate's first language. The official ACT or the official SAT Reasoning Test and SAT Subject Tests score reports must be forwarded directly to Wellesley College by the College Board, using Wellesley's Code Number 3957 on the College Board registration
for. If the ACT or the SAT Reasoning and Subject Tests are not administered in an applicant's country, they may take only the TOEFL.

Interested students are encouraged to initiate the admission process one full year in advance of the planned entrance date. Please contact the Board of Admission or complete the online form: www.wellesley.edu/admission/contactus.html to obtain the International Students information brochure and the application form. Students may also apply electronically at at www.commonapp.org. Inquiries should include the student's country of citizenship, present school, academic level, and the year of planned college entrance. Our fax number is 781-283-3678.

International Students Applying from U.S. High Schools
Citizens of other countries who are currently in secondary school in the United States before entering college apply through the regular admission program. International citizens applying through the regular admission program who also wish to apply for the limited financial aid funds available are eligible to apply only under the Regular Decision plan (January 15 deadline).

Admission of Transfer Students
Wellesley College accepts transfer students from accredited four- and two-year colleges. They must offer an excellent academic record at the college level and strong recommendations from their dean and college instructors. Students wishing to transfer to Wellesley should apply by March 1 for entrance in the fall semester, and by November 1 for the spring semester. Notification is in mid-May and December, respectively. The application forms should be returned with a nonrefundable $50 application fee or a fee waiver request authorized by a financial aid officer or college dean.

The College will accept for transfer credit only those courses that are comparable to those offered in the liberal arts curriculum at Wellesley. Candidates accepted for transfer will be given a tentative evaluation of their credit status at the time of admission. Transfer credit for studies completed outside of the United States will be granted only when the Registrar's Office has given specific approval of the courses taken, as well as the institutions granting the credit. To receive a Wellesley degree, a transfer student must complete a minimum of 16 units of work and two academic years at the College, so ordinarily only incoming sophomores and juniors are eligible to apply. A Wellesley unit is equivalent to four semester hours. Some transfer students may need to carry more than the usual four courses per semester in order to complete their degree requirements within four years. Incoming juniors, in particular, should be aware that Wellesley requires evidence of proficiency in one foreign language before the beginning of the senior year. In addition, all transfer students should note Wellesley's course distribution, quantitative reasoning and writing requirements, which must be fulfilled for graduation (see The Curriculum). Incoming junior transfer students may not take part in the Twelve College Exchange Program or Junior Year Abroad. All transfer students may elect to take courses through the cross-registration program with MIT.

For international transfer applicants
If you are a non-U.S. citizen attending a college or university outside the United States and you wish to transfer to Wellesley, you must apply for admission as a first-year student and for fall entrance only. The application deadline is January 15. After successfully completing one year of study at Wellesley, you may be eligible for transfer credit for courses from your previous institution. Please note that financial aid funding is available for a very limited number of international students studying outside the United States.

If you are a non-U.S. citizen attending a college within the United States, you may apply as a transfer candidate for entrance in the fall or spring. The deadline for fall entrance is March 1, and the deadline for spring entrance is November 1. Please note that because of limited financial aid, funding for international students is competitive.

Nontraditional Students
Wellesley College offers two programs for students beyond traditional college age. They are the Elisabeth Kaiser Davis Degree Program and the Postbaccalaureate Study Program. The Davis Degree Program is designed for women who seek the Bachelor of Arts degree. The Postbaccalaureate Study Program is available for men and women who already have a bachelor's degree and seek nondegree coursework. Students enroll in the same courses as the traditional-age undergraduates and may enroll on a part-time or full-time basis.

Elisabeth Kaiser Davis Degree Program
Candidates for the Davis Degree Program are women, usually over the age of 24, whose education has been interrupted for at least two years or whose life experience makes enrollment through the Davis Degree Program the logical avenue of admission. These students, known as Davis Scholars, meet all degree requirements of the College, but the flexibility of the Davis Degree Program allows a woman to combine school with work and family responsibilities. Some Davis Scholars live on campus, usually in small residence halls especially reserved for Davis Scholars. Davis Scholars in residence must carry a full academic course load of at least three courses a semester and should consult with their Class Deans to determine how many semesters they will have to complete their degrees. Nonresident Davis Scholars, other than international students, have no time limitation for completing their degrees and may choose whether to be full- or part-time students. International Davis Scholars must be full-time students whether or not they are in residence.

Many applicants to the Davis Degree Program have not experienced a traditional college-preparatory secondary school program, or their transcripts from the past are not an accurate reflection of current abilities. Such applicants are urged to complete at least four college-level courses for credit to strengthen their academic skills and credentials before applying to the program.

An applicant needs to show training in the principles of mathematics, including algebra and trigonometry, and she must
demonstrate strong writing skills and the ability to think coherently and analytically. Students who have never pursued a foreign language should complete some coursework for credit in a foreign language prior to applying.

The College will accept courses for transfer credit only if they are comparable to ones offered in the liberal arts curriculum at Wellesley, and if a grade of C or better was earned. Course work presented for transfer credit must be accompanied by an official transcript from an accredited college, descriptions of courses at the time they were taken, and the degree requirements of the institution. All information should be sent with the application for admission. Please visit our Web site at www.wellesley.edu/admission/admission/davis.html for more information about the program.

**Postbaccalaureate Study Program**
Candidates for the Postbaccalaureate Study Program are men and women who already have a bachelor’s degree and wish to do further undergraduate work for a specific purpose. Students take courses to prepare for graduate school, enrich their personal lives, or make a career change. The Premedical Study program is a popular choice. A degree is not offered. For more information on the Postbaccalaureate Study Program, please contact the Board of Admission or visit the Web site at: www.wellesley.edu/admission.

**Admission**
Application forms for the Elisabeth Kaiser Davis Degree Program and Postbaccalaureate Study Program may be obtained from the Board of Admission. Official transcripts, essays, and letters of recommendation must be submitted before a candidate is considered. A personal interview is also required. The Board of Admission looks for evidence such as work, volunteer experience, and especially recent course work that demonstrates a candidate’s intellectual ability and initiative.

Applications for the Elisabeth Kaiser Davis Degree Program are considered once a year for fall semester entrance only. The application deadline is February 15 for admission in the fall. The deadline for international applicants for this program is January 15. Candidates for the Davis Degree program may apply online at www.wellesley.edu/admission/application.

The application deadlines for postbaccalaureate applicants are November 15 for spring semester admission and March 1 for fall semester admission.

You are welcome to view or download our brochures at www.wellesley.edu/admission for more information about any of the programs described in this section.

**Costs**

Wellesley offers a variety of payment plans and financing options to assist all students and their families in meeting the costs of a Wellesley education. In addition, through financial aid, the College is able to offer its education to all students regardless of their financial circumstances (see the Financial Aid section for more information). For more information visit the Student Financial Services Web site: www.wellesley.edu/SFS.

The financial responsibilities to Wellesley College include meeting payment deadlines, meeting loan or grant requirements, and addressing outstanding balances.

It is important to understand that information and communications will be directed to the student, rather than a parent or guardian. If a parent or other individual handles the educational finances, it is the student’s responsibility to make the information contained in this catalog available to the person who is responsible.

**Family Educational Rights and Privacy Act (FERPA)**

The Family Educational Rights and Privacy Act (FERPA) of 1974, commonly known as the “Buckley Amendment,” helps protect the privacy of student education records. Among other provisions, FERPA protects the privacy of educational records, including the student account at Wellesley College. Students interested in placing limitations on the release of information should contact Student Financial Services.

**Comprehensive Fees**

As a part of the registration process, all students will be required to acknowledge the cost of tuition and relevant fees prior to online registration for each term.
Fees and Expenses

The Comprehensive Fee for 2006–07 resident students is $43,288. All fees are subject to change without prior notice. The breakdown is as follows:

<table>
<thead>
<tr>
<th>Traditional Students &amp; Resident Davis Scholars</th>
<th>Resident Students</th>
<th>Off-Campus Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition</td>
<td>$32,384</td>
<td>$32,384</td>
</tr>

</tr>
</tbody>
</table>

All resident students must have a meal plan. Students who live in cooperative housing and choose a Co-op Meal Plan pay the College a kitchen usage fee of $806 instead of the board charge.

Students may be exempt from purchasing the food portion of the board charge only upon approval by the Dean of Students. Approved exemptions are required to pay the indirect costs of food service. This cost is determined by the Dean of Students.

Wintersession (January)

<table>

</tbody>
</table>

Student Activity Fee

The student activity fee is administered by the Student College Government. It provides resources from which student organizations can plan and implement extracurricular activities.

Facilities Fee

The Facilities Fee supports the infrastructure of the College’s facilities.

General Deposit

The General Deposit of $300, paid by each entering student, will be credited to the student’s account. The general deposit is nonrefundable.

Refund Policy

To be eligible for a refund the student must notify her Class Dean in writing that she is leaving Wellesley. The date the written notice is received by the Dean, or the date the College determines that she has gone on leave or withdrawn will be the effective date of leave or withdrawal.

Refunds are made for withdrawal or leave of absence prior to the ninth week of the semester. The comprehensive fee is prorated on a calendar week basis. No refund is made after the eighth week.

Refunds are prorated among the sources of original payment. Scholarships, grants, and educational loans are refunded to the grantor or lender.

Wellesley College maintains credit balances for returning students and applies the credit to future charges. A student may request a refund of a credit balance by submitting a written request to Student Financial Services.

A student who leaves Wellesley during her first semester at the College has her charges prorated based on the number of weeks in attendance until the tenth week. Students who complete ten weeks but do not complete the first full semester are not eligible for a refund.

A nonresident Davis Scholar or Postbaccalaureate student who drops a course during the add/drop period receives a full refund. Charges are prorated on a calendar basis thereafter until the eighth week.

All other students have charges refunded as follows:

<table>
<thead>
<tr>
<th>If student leaves</th>
<th>Refund %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to the first day of class</td>

</tbody>
</table>

Please contact the appropriate department for the withdrawal/refund schedules for off-campus, summer, or Wintersession programs: www.wellesley.edu/SFS.

Tuition Refund Plan

The Tuition Refund Plan, sponsored by A.W.G. Dewar, Inc., is designed to protect the family from the loss of funds paid for
tuition, fees, room and board should the student find it necessary to withdraw due to medical reasons. The Plan complements the Wellesley College refund policy and covers not only payments made by the student or parent, but also any loans and grants received.

The cost of the Plan is based on the amount of tuition and fees or tuition, fees, room and board.

Resident Student Option $303
Off-Campus Option $232

You must enroll in the plan before the first day of classes for the semester. For more information see A.W.G. Dewar’s Web site: www.tuitionrefundplan.com.

Student Accident and Insurance Program

Students enrolled at least ¾ time are required by Massachusetts State law to be enrolled in an insurance program. All students enrolled in courses at Wellesley College may see a physician, nurse practitioner, or nurse at the Health Services office without charge; however, charges are incurred for certain procedures, treatments, and laboratory tests. The Student Accident and Sickness Insurance Program covers most of these charges and all inpatient charges in the College infirmary. Insurance coverage is effective from August 15, 2006 to August 14, 2007. Please refer to the online insurance brochure for additional information at the Student Financial Services Web site: www.wellesley.edu/SFS.

The premium for 2006–2007 is $1,155. The fee for insurance appears on the first bill of the fall semester. There is no separate plan for the fall semester.

All students are assessed insurance, however if a student is covered by other comparable insurance and does not wish to participate in the College plan, she may waive the coverage. A waiver form must be completed online. All fields of the form must be completed and submitted by the end of the first week of classes to waive the College plan.

Financial responsibility for all medical and dental expenses rests with the student and her family. Wellesley College does not assume financial responsibility for injuries incurred in instructional, intercollegiate, intramural, or recreational programs. The College carries an NCAA policy to provide limited supplemental coverage for students injured while participating in intercollegiate athletics under the auspices of the Department of Physical Education, Recreation, and Athletics.

Please visit the Student Financial Services Web site for billing and waiver information: www.wellesley.edu/SFS.

Billing and Payment

Fall semester billing statements will be mailed in early July. Wellesley College must receive payment by August 1.

Spring semester billing statements will be mailed in early December. Wellesley College must receive payment by January 2. Charges incurred after the payment deadline, including those as a result of add/drop, music charges, parking and library fines, etc., are due immediately and subject to late payment fees.

Bills are mailed in the student’s name to the student’s home address when classes are not in session or to her on-campus address during the school year. Students should retain the statements for their records.

Beginning fall 2006 billing statements will only be mailed in July and August for the fall term, and December and January for the spring term. In any month there is an outstanding balance on the student account, an email will be sent to the student’s Wellesley College email address informing them of the balance due and providing a link to view their account detail online. Current students may visit the Student Financial Service Web site to view their account detail online, 24 hours a day.

Payment Procedures

Full payment and/or acceptable documentation demonstrating that the balance will be fully paid must be received prior to the published deadline. Acceptable documentation includes enrollment in the Tuition Management Systems (TMS) monthly payment plan, a copy of an award letter for an outside scholarship, or a copy of a billing authorization or sponsorship letter. Loans based on the credit worthiness of the borrower may not be deducted without approval from the lender. A copy of an approval notice or signed promissory note will be accepted as documentation for this type of loan.

The student’s name and Wellesley College ID or social security number must be included on all payments and correspondence.

The student is responsible for monitoring her account balance and for keeping track of payment due dates even if someone else is handling the finances. It is the student’s responsibility to ensure that loans, grants, and other payments are sent to the College by the payment due dates. As the student will be the only recipient of monthly statements, she needs to communicate her account status to anyone paying her charges.

Inquiries regarding late payment fees may be resolved after the account has been settled if a written petition has been received. The petition should include the student’s name and ID number, the term the late fee was charged, and the circumstances to be reviewed.

There are potential consequences if payment responsibilities are not met. Monthly late fees may be assessed on any balance remaining unpaid after the payment deadline. Wellesley College also reserves the right to withhold services if the student has not fulfilled her financial obligation. The student may be prevented from participating in the housing process, registering, accepting a place in an associated leave program (i.e., Junior Year Abroad program), receiving transcripts, or receiving her diploma. In addition, the College reserves the right to place a student on leave and withdraw her if a balance continues to remain unpaid.

If any overdue obligation is referred to either the College Collection Department or to an outside agency or attorney for collection efforts and/or legal suit, the debt is increased to cover all reasonable costs of collection, including collection agency fees and court costs. By registering for any class in the College, each student accepts and agrees to be bound by the foregoing College policy as applied to any preexisting or future obligation to the College.

Outside Scholarships or Grants

If a student receives a scholarship or other outside award not previously considered in the determination of her financial aid award, federal regulations require her to notify Student Financial Services. These awards will not be reflected on a student’s account or billing statement until the College has received the funds. Please note, unless specifically stated in the sponsorship letter, all outside scholarships will be evenly applied to the fall and spring semesters.
Cash, Check, or Money Order
By Mail (Do Not Mail Cash):
Cashier’s Office
Wellesley College
139 Green Hall
106 Central Street
Wellesley, MA 02481-8203

In Person:
Cashier’s Office
139 Green Hall
10:00 a.m. to 2:00 p.m.
Monday–Friday

For security reasons, we urge students not to carry large sums of cash.

Wellesley College does not accept credit card payments; however, you may charge your semester bill on VISA, MasterCard, or Discover by visiting the Tuition Management Systems Web site at www.afford.com or by phone at 800-722-4867. Please note that a teleprocessing fee is assessed.

Wire Transfer
Wire transfer of funds electronically from a U.S. or international bank to Wellesley College’s bank involve bank fees which are deducted from the funds wired to Wellesley College. The net amount applied to the student account will be the amount of the wire transfer less the bank fees. Please remember to reference the student’s name and Wellesley College identification number. Please refer to our Web site for specific information on wire transfers.

Monthly Payment Plan
If you plan to use your savings and/or current income to cover all or part of your educational expenses, the Interest-Free Monthly Payment option offered through Tuition Management Systems (TMS) helps by providing more manageable cash flow and greater budgeting flexibility. Instead of lump-sum payments, the TMS plan allows you to pay all or part of your educational expenses in manageable monthly installments. You may use the TMS plan to pay your balance after financial aid or in combination with other loans. By enrolling in the TMS Monthly Payment Plan, your student account will receive a credit each semester representing ⅓ of the full amount of your contract. We will credit your student account in advance of your making all of your payments to TMS. Although Student Financial Services can provide assistance, you are responsible for determining the contract amount. TMS is not responsible for this decision and will make changes only upon your request.

The toll free number is 800-722-4867 (if calling from outside of the United States, please use 401-849-1550) or you may visit their Web site at www.afford.com.

Tuition Stabilization Plan
This program provides a written contract guaranteeing that the cost of tuition will remain the same for each of four consecutive years at Wellesley College, provided the student pays by June 30 of the entering year an amount equal to four times the first year’s tuition cost. Provisions are made for leaves of absence (up to two semesters), refunds, and withdrawals. This program only stabilizes the cost of tuition at Wellesley College; all other charges such as room and board will be billed at the rate for the applicable year, as will tuition for any exchange program or other college at which the student enrolls.

Please contact Student Financial Services for enrollment information.

High School Student Fees and Refunds
High school students taking courses at Wellesley pay the per course semester fees; for refunds, charges are prorated on a calendar week basis until the eighth week. High school students also pay the General Deposit, but are not eligible for Student Insurance.

Financing Options
To finance your Wellesley education, several options are available whether or not a student has been awarded financial aid, other scholarships, or loans. Detailed information can be obtained from the Office of Student Financial Services or by visiting www.wellesley.edu/SFS/EducationalFinancing.html.

Federal Parent Loan for Undergraduate Students (PLUS)
Under this federally guaranteed loan program, parents may borrow the cost of education, less financial aid and other education grants or loans, from participating banks and other lenders. The applicant and student must be U.S. citizens or U.S. permanent residents.

Monthly repayment begins 30 days after the 2nd disbursement; however, repayment of the loan principal and, under certain circumstances, interest, may be deferred while the borrower is a full-time student or experiencing economic hardship.

MEFA
This joint loan program of the Massachusetts Educational Financing Authority and Wellesley College provides fixed or variable low interest rate loans and convenient repayment terms. The full cost of education or tuition stabilization may be borrowed and a home equity option is available in most states.

Federal Unsubsidized Stafford Loan
Under this federally guaranteed loan program, a student with attendance costs not met by financial aid who is not eligible (based on federal rules for determining financial need) to borrow up to federal maximums under the Federal Subsidized Stafford Loan Program, may borrow the difference between her subsidized Stafford Loan (if any) and the Unsubsidized Stafford program limits.

An independent student or a dependent student whose parent does not qualify for a Federal PLUS Loan may also borrow up to additional federal maximums if she has costs of attendance not met by financial aid and she has already borrowed her basic Federal Stafford Loan maximum.

Interest starts to accrue immediately, but repayment may be deferred while the student is enrolled at least half-time or is experiencing economic hardship.

First-time Federal Stafford borrowers must complete an online entrance interview and sign a promissory note before funds may be disbursed to her student account.

Alternative Educational Loans
Please visit www.wellesley.edu/SFS/EducationalFinancing.html to view borrower benefits, preferred lenders and loan application links or contact the Educational Financing Office for assistance.
Financial Aid

The Wellesley College financial aid program opens educational opportunities to able students of diverse backgrounds, regardless of their financial resources. Admission is need blind for U.S. citizens and permanent residents. Financial aid is also available for many international students. Over 50 percent of all Wellesley students receive financial aid, based on need, from the College.

At Wellesley College financial aid is based on demonstrated need as defined through the College’s financial aid policies. Amounts vary in size according to the resources of the individual and her family and may equal or exceed the comprehensive College fee. Although aid is granted for one year at a time, the College expects to continue aid as needed throughout the student’s four years, and the student continues to have need as defined by Wellesley’s policies. Applicants to the College and continuing students must file the aid application on time to receive full consideration for grant aid.

Determining the amount of aid begins with the examination of family financial resources. Using both federal and institutional methodologies, the Financial Aid staff establishes the amount the parents can reasonably be expected to contribute. The staff also looks at the amount that the student can contribute from her earnings, assets, and benefits. Each year, the Financial Aid Committee determines a standard amount expected from the student’s summer and vacation earnings. For 2006–2007 the summer/vacation amounts are: $1,250 for first year students, $1,900 for sophomores, $1,950 for juniors and seniors. The total of the parents’ and the student’s contributions is then subtracted from the student’s cost of attendance. For the typical dependent student residing on campus, the cost of attendance is composed of the College fees, a standard amount for books and personal expenses, and a standard amount for travel based on the student’s home state. The remainder equals the financial need of the student and is offered in aid. The financial aid is packaged in a combination of three types of aid: work, loan, and grant. The Financial Aid Committee sets yearly amounts of academic year work and loan.

Work

Generally, a portion of a student’s financial aid is met through a job on or off campus, usually as part of the Federal Work Study Program. Students are expected to work up to ten hours a week. For 2006–2007, first-year students and sophomores are expected to earn $2,000; juniors and seniors, $2,200. The Student Employment Office maintains listings of on- and off-campus part-time job opportunities.

Financial aid students receive priority for on-campus jobs. Students can work in academic and administrative offices, museums, libraries, and in a variety of off-campus nonprofit and community service agencies. Some off-campus jobs are restricted to students with federal Work-Study.

Loans

The next portion of a student’s financial aid is met through low-interest educational loans. The 2005–2006 amounts are $2,625 for first-year students, $3,000 for sophomores, $3,500 for juniors, and $3,700 for seniors. There are several kinds of loans available with different interest rates and terms of repayment. The suggested loan amount and loan program are specified in the aid offer. Higher loan amounts are packaged in special circumstances, such as late filing of aid applications.

First-time borrowers must complete an entrance interview online and sign a promissory note before funds may be disbursed to her student account.

Repayment of Loans from the College

A student who has received a loan enters repayment if she enrolls less than half time, withdraws, graduates, or takes a leave of absence. Before she leaves the College she should make arrangements for an online exit interview by emailing edfiance@wellesley.edu or by visiting the Office of Student Financial Services. At that time she will be notified of her rights and responsibilities regarding the loan and will be given a repayment schedule.

Students with Students’ Aid loans conduct entrance and exit interviews with the Students’ Aid Society.

In order to be eligible for financial aid from the College, transfer students and Davis Scholars who have been enrolled elsewhere cannot be in default on prior educational loans. The College will not offer any federal, state, or institutional aid to students in default on prior educational loans.

Grants

The remaining portion of the student need is awarded in grants by the College from its own resources, from the federal government through the Federal Supplemental Educational Opportunity Grant and Pell Grant Programs, along with two new federal programs that might be in effect for 2006–2007, or from outside agencies.

Students who apply for aid from Wellesley College are required to apply for state and federal grants. If the student does not apply or fails to apply on time, the College will not replace the amount she would have received. In addition, whenever possible, students should seek grants from local programs, from educational foundations, and from other private sources. Students who qualify for nongovernmental outside scholarships usually benefit from loan and work reductions.

Applying for Financial Aid

Applicants for admission who intend to apply for financial aid must file five forms: the Wellesley College Application for Financial Aid, the Financial Aid Profile of the College Scholarship Service (CSS), the Free Application for Federal Student Assistance (FAFSA), and signed copies of all pages and schedules of both the parents’ and the student’s most recent federal income tax returns and W2s. Applicants may also be asked to have the IRS send a tax transcript directly to Student Financial Services. Additional documents are required if parents are separated/divorced or self-employed.

The College considers information from both parents regardless of their marital status. Students are expected to furnish information from parents in their initial year and all remaining years. Students in the Davis Degree Program who satisfy federal guidelines for self-supporting students and are not dependent upon their parents for support are exempt from this requirement. Davis Scholars who are supported by their parents file the aid application with parental information.
Application Form
The Wellesley College Application for Financial Aid should be returned to the Director of Student Financial Services, Wellesley College, 106 Central Street, Wellesley, MA 02481-8203, by November 1 for Early Decision applicants, January 15 for Regular Decision applicants and fall semester Transfer applicants, and November 15 for spring semester Transfer applicants.

Academic Requirements for Financial Aid
Evaluations of all students’ academic records are made at the end of each semester by the Academic Review Board. Eligibility for financial aid is reviewed on a semester basis. Students must make satisfactory progress toward the degree and maintain a C average. No credit is associated with course completion, course withdrawal, noncredit remedial courses or course repetition; therefore, these courses do not count in establishing satisfactory progress.

Ordinarily, a full-time undergraduate student completes the requirements for the B.A. degree in eight semesters. The Academic Review Board will consider special circumstances and may permit a student to have additional time to complete the degree. A student may request financial aid for additional semesters if the Academic Review Board has approved the extension. In matters concerning satisfactory progress, Students Financial Services works with the Class Deans.

Verification of Data in the Aid Application
Student Financial Services is required by federal law and Wellesley College policy to verify data on the financial aid application. Students must respond within 30 days of the request for information in order to ensure that aid will be available and student accounts credited in time for registration and other College services.

Town Tuition Grants
Wellesley College funds ten Town Tuition Grants to residents of the town of Wellesley who qualify for admission and who meet the town’s residency requirements. Application is made to the Board of Selectman. Recipients may live at home or on campus. Those who choose to live on campus may apply to the College for additional financial aid, and their applications will be reviewed in relation to the same financial aid policies applicable to all Wellesley students.

ROTC Scholarships
ROTC admission criteria conflict with the non-discrimination policy of Wellesley College (see inside back cover). Students, however, may enroll in ROTC programs offered at MIT through the College’s cross-registration program. Wellesley students may apply for scholarship aid from the Air Force and Army. Interested students should contact the appropriate service office at Massachusetts Institute of Technology, Cambridge, MA 02139, or call: Air Force, (617) 253-4475; Army, (617) 253-4471.

Financial Aid for International Students
Aid is available to international students, but its amount is limited. If an international student enters without aid, she will not be eligible for it in future years.

Financial Aid for Davis Scholars
Students in the Elisabeth Kaiser Davis Degree Program are admitted on a need-blind basis. They receive work and loans as the first components of the aid package, with a grant meeting the remaining need. The cost of education will vary for Davis Scholars living off campus in accordance with the number of courses for which they are enrolled during first and second semesters and during Winter Session. In order to be eligible for aid during a semester, students must take at least two units. Financial aid is not available to meet the full costs of living off campus, but staff will work with students to see if financing plans are applicable.

Wellesley Students’ Aid Society
The Wellesley Students’ Aid Society, Inc. is an organization of Wellesley College alumnae. In addition to providing funds for grants and long-term tuition loans, the organization also serves as a resource for short-term emergency loans and other student services.

Assistance for Families Not Eligible for Aid
Wellesley has special concern for middle- and upper-income families who find it difficult to finance the cost of education through current income. The Office of Student Financial Services is available to assist all families, including families not qualifying for financial aid.

The College assists non-aided students and parents in several ways. Jobs on campus may be available to non-aided students. Student Financial Services will furnish information and advice on obtaining student and parent loans. Three payment programs are offered by the College: a Semester Plan, a Monthly Plan, and a Prepaid Tuition Stabilization Plan. Please visit the Student Financial Services Web site: www.wellesley.edu/SFS.

FAFSA/CSS Profile
The FAFSA and information about registration for the CSS Financial Aid Profile will be available from high school guidance offices for new students and from Wellesley College for returning students. Applicants should plan to register two weeks before the form is due to allow sufficient time for CSS to process the registration and for families to complete the Profile.

The Profile must be filed by January 15 for Regular Decision applicants and fall semester Transfer applicants, and by November 15 for spring semester Transfer applicants. Early Decision applicants must file the CSS Profile by November 15. All applicants, Regular Decision and Early Decision, should file for the FAFSA by January 15.

For Further Information
Please consult our Web site: www.wellesley.edu/SFS.
Graduate Fellowships

Wellesley College offers a number of fellowships for graduate study, independent research, and work that are open to graduating seniors and graduates of Wellesley. Two of these fellowships are open to women graduates of any American institution. Awards are usually made to applicants who plan full-time graduate study for the coming year. Please note that these fellowships are for study at institutions other than Wellesley College. Preference in all cases, except for the Peggy Howard Fellowship, will be given to applicants who have not held one of these awards previously. Decisions are based on merit and need, with the exception of the Knafel and Trustee awards, which are determined on merit alone. For more information about graduate fellowships and graduate school, visit our Web site: www.wellesley.edu/CWS.

For Wellesley College Graduating Seniors
Jacqueline Krieger Klein ’53 Fellowship in Jewish studies to encourage all seniors to pursue further education in the field of Jewish studies. Award: Up to $4,000

Susan Rappaport Knafel ’52 Scholarship for Foreign Study awarded to a member of the graduating class who displays a desire to learn and an ability to impart knowledge and judgment to others. The scholarship will fund a year of study in a foreign institution to pursue a specific subject that requires contact with foreign scholars, libraries, or other resources. Award: $25,000

Susan Rappaport Knafel ’52 Traveling Fellowship awarded to a member of the graduating class who displays an interest in and an acceptance of others, and who displays the ethos of a Wellesley education. The fellowship will fund a year of travel abroad, with the requirement that the recipient not remain in the same area for more than two months. Award: $25,000

Trustee Scholarships are awarded on a competitive basis to graduating seniors who are currently applying to graduate school. To be considered a candidate, a senior must apply for a Trustee Scholarship or for any of the Wellesley College Fellowships for Graduate Study. The title Trustee Scholar is honorary; in cases of financial need, awards of up to $3,000 may be given.

For Wellesley College Graduates
Anne Louise Barrett Fellowship for graduate study or research, preferably in music, with emphasis on study or research in musical theory, composition, or the history of music abroad or in the United States. Award: Up to $15,000

Margaret Freeman Bowers Fellowship for the first year of study in the fields of social work, law, or public policy/public administration, including MBA candidates with plans for a career in the field of social services. Preference will be given to candidates demonstrating financial need. Award: Up to $9,000

Eugene L. Cox Fellowship for graduate study or research in medieval or renaissance history and culture, abroad or in the U.S. Award: Up to $9,500

Professor Elizabeth F. Fisher Fellowship for research or further study in geology or geography, including urban, environmental, or ecological studies. Preference given to geology and geography. Award: Up to $2,600

Ruth Ingersoll Goldmark Fellowship for study in English literature, English composition, or the Classics. Award: Up to $2,600

Horton-Hallowell Fellowship for graduate study in any field, preferably in the last two years of candidacy for the Ph.D. degree or its equivalent, or for private research of equivalent standard. Award: Up to $10,500

Peggy Howard Fellowship in Economics to provide financial aid for graduate study in economics. Award: Up to $8,000

Edna V. Moffett Fellowship for a young alumna, preferably for the first year of graduate study in history. Award: Up to $13,000

Alice Freeman Palmer Fellowship for study or research abroad or in the United States. The holder must be no more than 26 years of age at the time of her appointment and unmarried throughout the whole of her tenure. Award: Up to $26,000

Kathryn Conway Preyer Fellowship, formerly Thomas Jefferson Fellowship, for advanced study in history. Award: Up to $11,000

Vida Dutton Scudder Fellowship for study or research in the field of social science, political science, or literature. Award: Up to $11,000

Harriet A. Shaw Fellowship for study or research in music, art, or allied subjects, abroad or in the United States. Preference given to music candidates; undergraduate work in history of art required of other candidates. Award: Up to $11,000

Mary Elvira Stevens Traveling Fellowship for a full year of travel or study outside the United States. Any scholarly, artistic, or cultural purpose may be considered. Candidates must be at least 25 years of age in the year of application, 2006. Applications for the Mary Elvira Stevens may be obtained from the Center for Work and Service, Wellesley College, 106 Central Street, Wellesley, MA 02481-8203. The application and supporting material should be returned to the same address by December 1, 2006. Award: Up to $20,000

Sarah Perry Wood Medical Fellowship for the study of medicine. Nonrenewable. Award: Up to $71,000

Fanny Bullock Workman Fellowship for graduate study in any field. Award: Up to $16,000

For Women Graduates of Any American Institution
Mary McEwen Schimke Scholarship, a supplemental award to provide relief from household and child care expenses while pursuing graduate study. The award is made on the basis of scholarly expectation and identified need. The candidate must be over 30 years of age, currently engaged in graduate study in literature and/or history. Preference given to American Studies. Award: Up to $1,500

M.A. Cartland Shackford Medical Fellowship for the study of medicine with a view to general practice, not psychiatry. Award: Minimum of $10,500

Instructions for Applying
Applications for the Peggy Howard Fellowship may be obtained by contacting the Economics Department, Wellesley College, or online at www.wellesley.edu/Economics/Beyond/peggy.html. Applications and supporting materials are due by April 1.

Applicants for the Jacqueline Krieger Klein ’53 Fellowship may contact the Department of History, Wellesley College for deadline and application.

Applications for the Mary Elvira Stevens Fellowship may be obtained from the Center for Work and Service, Wellesley College, or online at www.wellesley.edu/CWS. The applications and supporting materials should be returned to the same address and received no later than December 1, 2006.
Applications for the Knafel awards and all other fellowships may be obtained from the Secretary to the Committee on Graduate Fellowships, Center for Work and Service, Wellesley College, 106 Central Street, Wellesley, MA 02481, or they can be found online at www.wellesley.edu/CWS. Applications and supporting material for the Knafel awards must be received by February 5, 2007. Applications and supporting material for all other fellowships must be postmarked no later than January 5, 2007. If hand-delivered, the application must be received in the Center for Work and Service no later than January 5, 2007.

For Wellesley College Graduates: Opportunities in Asia
Elisabeth Luce Moore '24 Wellesley-Yenching Program. The Wellesley-Yenching Program is a lasting example of Wellesley College’s long tradition of interest and involvement in China, dating from 1906. In 1999, Wellesley received a generous grant from the Henry Luce Foundation to honor Elisabeth Luce Moore '24 who was born in China and has been a strong supporter of the College’s ties to Asia. Part of this grant was used to endow the Wellesley-Yenching Program and to strengthen these three opportunities to work in Asia:

Wellesley-Yenching Graduate Fellowship at Chung Chi College in Hong Kong. The fellow’s time may be divided between helping to organize and promote English language activities at Chung Chi College as a whole, and serving as a teaching or research assistant for an academic department.

Wellesley-Yenching Graduate Fellowship at Ginling College in Nanjing, China. The fellows teach English in the classroom for approximately 12 to 14 hours each week with office hours three to four times a week.

Wellesley-Yenching Graduate Fellowship at the National Palace Museum in Taipei, Taiwan. Approximately one-half of the fellow’s work will be with the NPM Secretariat where she will write, translate, and revise English documents for various departments. The other half of the fellow’s work will be with one of the Museum’s other departments.

Application information is available in the Center for Work and Service, 106 Central Street, Wellesley, MA 02481 or it can be found online at www.wellesley.edu/CWS. The deadline is February 26, 2007.

The Academic Program

The process of learning begins with the mind and motivation of the student herself. The most tempting array of courses and the most carefully planned requirements alone will not guarantee the growth of an educated mind. The academic experience is designed for the student who seeks a broad acquaintance with the many and diverse fields of human inquiry as well as the opportunity to explore her personal intellectual interests in depth. It provides for the acquisition of knowledge and the skills appropriate to the liberal arts but above all it is responsive to the student who genuinely wishes to acquire the habit of learning. It seeks to stimulate the mind, refine the eye, and enlarge the capacity for free, independent, and discriminating choice.

Online Course Information

Students may access Wellesley College course information and class schedules through the Internet via the Campus-Wide Information System: www.wellesley.edu.

The Curriculum

The curriculum at Wellesley is structured to provide strong guidance and to allow, at the same time, great personal choice. By the time a Wellesley student has earned the Bachelor of Arts degree, she should be acquainted with the main fields of human inquiry, capable of integrating knowledge from various fields, and prepared for continuous scholarly and personal growth. In her major field, the student is expected to demonstrate maturity of thought, acquaintance with recognized authorities in the field, and general competence in dealing with sources of research or analysis.

Requirements for Degree of Bachelor of Arts

Each student is responsible for meeting all degree requirements and for ensuring that the Registrar’s Office has received all credentials. Each candidate for the degree of Bachelor of Arts is required to complete 32 units of academic work with a C average or better. With some exceptions, described below, each semester course is assigned one unit of credit. Specific courses, designated by their departments and approved by the Committee on Curriculum and Instruction, are assigned 1.25 units of credit. To be eligible for 1.25 units of credit, a course must meet for 300 minutes or more per week and involve, in addition, substantial time spent on course-related work outside scheduled class meetings. Departments may also request permission from the Committee on Curriculum and Instruction to offer courses for 0.5 units of credit.

A student may earn no more than 2 units toward the degree as the result of the accumulation of fractional units through 1.25 unit courses taken at Wellesley; the same 2-unit limit applies to the accumulation of fractional units through 0.5 unit courses. A unit of credit is equivalent to four semester-hours or six quarter-hours. The normal period of time in which to earn the degree is four years and the average course load is four courses per semester. First-year students are encouraged to carry a maximum of four courses each semester, but upper-class students may take five. A minimum of three courses is required of all students in residence.

Courses are classified as Grade I, II, or III. Introductory courses are numbered 100–199 (Grade I); intermediate courses, 200–299 (Grade II); advanced courses, 300–399 (Grade III). Each student must include in her program at least four units of Grade III work, at least two of which shall be in the major. At least two units of Grade III work must be taken in a student’s last two years. Directions for election of the major vary with the department or program. Please see departmental or program listings for specific major requirements.

Distribution Requirements

In order to provide students with as much flexibility as possible, Wellesley requires no specific courses except Writing 125. However, to ensure that students gain insight and awareness in areas outside their major fields, the College requires that they elect nine units drawn from eight substantive and skill-based categories as part of the 32 units required for graduation. (Courses numbered 250/350, Research or Individual Study, or 360/370, Honors Research, do not satisfy this requirement.) Students who enter as first-year students must take six of these nine units at Wellesley, two units in...
each of the three groups of distribution areas described below. Transfer students and Davis Scholars who enter with eight units prior to Wellesley must take at least three units at Wellesley, one in each of the three areas, and students entering with 16 prior units may take the distribution requirements at Wellesley or use their prior units.

Courses assigned to two distribution areas may not be used to fulfill two distribution requirements. This limitation does not apply to overlay requirements (the writing requirement, the multicultural requirement, and the quantitative reasoning requirement, described below).

Students must complete three units drawn from the following two distribution areas. At least one unit must come from each of these two areas:

**Language and Literature**
Courses in this group focus on: (1) the history, critical analysis, theory, and/or creation of literature, and (2) increasing mastery of the grammar, usage, and cultural context of languages studied beyond the elementary level. Courses in creative writing also fulfill this requirement.

Normally, only one course fulfilling the language requirement in a given department will be designated as satisfying the distribution requirement in Language and Literature. Courses in language instruction at the Grade One level may not be used to satisfy this distribution requirement.

**Visual Arts, Music, Theatre, Film, and Video**
Courses in this area focus on: (1) the history, critical analysis, and/or theory of the visual and performing arts, and (2) practice in the creation and performance of these arts.

Students must complete three units drawn from the following four distribution areas. One unit must come from the Social and Behavioral Analysis category; the two additional units must come from two of the three other categories:

**Social and Behavioral Analysis**
Courses fulfilling this requirement introduce students to different theoretical and methodological approaches to the study of human societies and behaviors. These courses examine how individuals interact with and are influenced by social groups and institutions, including those associated with politics, economics, religion, family, health, education, and the arts; how and why particular forms of social organization emerge within groups or societies; and the nature of social change and conflict.

**Epistemology and Cognition**
Courses in this area examine the nature, sources, and limits of human knowledge. Some of these courses consider the standards for justifying knowledge about human beings and the world in which they live, as well as philosophical debates, both contemporary and historical, about the nature of such standards. Other courses explore aspects of intelligence, among them language, memory, perception, and learning and the cognitive, computational, and neural processes that underlie them.

**Religion, Ethics, and Moral Philosophy**
Courses meeting this requirement engage students in disciplined reflection on human conduct, the nature of values, the traditions of thought that have informed these values, and the religious traditions of the world. These courses will help students understand moral and political theory, ethical issues, and the role of religion in human life and society.

**Historical Studies**
Courses in this area develop students' understanding of history in one, or both, of two ways: (1) by illuminating the distinctiveness of one or another part of the past, with the goal of bringing students to an appreciation of political, social, economic, or cultural configurations different from their own, and (2) by exploring the processes of historical change, through which one configuration of institutions, ideas, and behaviors is replaced by another.

Students must complete three units from the following two distribution areas. At least one unit must come from each of these two areas, and at least one unit must be a laboratory course:

**Natural and Physical Science**
This requirement is designed to give students a basic knowledge of the capabilities and limitations of the scientific method of inquiry. Courses in this area focus on understanding scientific concepts and emphasize the methods used to gather, interpret, and evaluate scientific data.

Mathematical Modeling and Problem Solving in the Natural Sciences, Mathematics, and Computer Science
Courses in this group help students develop skills needed: (1) to formulate, understand, and analyze mathematical models of natural phenomena, and/or (2) to formulate and solve complex problems requiring a logical progression through multiple mathematical or computational steps.

**Foreign Language Requirement**
Students must exhibit a degree of proficiency in the use of one foreign language, either ancient or modern. Many students fulfill this requirement by passing one of the language tests offered by the College Board. Wellesley requires a score of 690 or better on the SAT II: Subject Test, or a score of at least 4 on the Advanced Placement Examination (AP) to fulfill the foreign language requirement for the classes of 2007, 2008, and 2009. Beginning with the class of 2010, a score of 690 on the SAT II subject test or a score of 5 on the AP exam is required. This requirement can also be met by the completion of two units of language study at the second-year college level or one unit of language study above the second-year college level.

Second-Year College Level Courses (numbered in the 200–299 range) are offered in the following languages:

<table>
<thead>
<tr>
<th>Language</th>
<th>Additional Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arabic</td>
<td>See Middle Eastern Studies.</td>
</tr>
<tr>
<td>Chinese</td>
<td>See East Asian Languages and Literatures</td>
</tr>
<tr>
<td>French</td>
<td>See Classical Studies.</td>
</tr>
<tr>
<td>German</td>
<td>(Greek 201 may be followed by either Greek 202 or Religion 298)</td>
</tr>
<tr>
<td>Greek</td>
<td>See Jewish Studies.</td>
</tr>
<tr>
<td>Hebrew</td>
<td>See East Asian Languages and Literatures</td>
</tr>
<tr>
<td>Italian</td>
<td>See Classical Studies.</td>
</tr>
<tr>
<td>Japanese</td>
<td>See East Asian Languages and Literatures</td>
</tr>
<tr>
<td>Korean</td>
<td>See Classical Studies.</td>
</tr>
<tr>
<td>Latin</td>
<td>See East Asian Languages and Literatures</td>
</tr>
<tr>
<td>Russian</td>
<td>Spanish</td>
</tr>
</tbody>
</table>

Students may earn credit for introductory courses in no more than two modern foreign languages. Fulfillment of the foreign language requirement through work done at another institution must be approved by the appropriate department. A student whose native language is not English and who has studied that language and its liter-
ature through high school will be exempted from this requirement, subject to approval of the Class Dean and the Academic Review Board.

Writing Requirement
Each entering student is required to complete one semester of expository writing in her first year. Courses (numbered 125) are offered in the Writing Program. Transfer students and Davis Scholars who have not fulfilled a similar requirement must also complete one semester of expository writing, either a Writing 125 course or Writing 225. Students are expected to use acceptable standards of spoken and written English in their college work.

Multicultural Requirement
All students must complete one unit of course work that focuses on (1) African, Asian, Middle Eastern, Caribbean, Latin American, Native American, or Pacific Island peoples, cultures, or societies; and/or (2) a minority American culture, such as those defined by race, religion, ethnicity, sexual orientation, or physical ability; and/or (3) the processes of racism, social or ethnic bias, or cross-cultural interaction. Each student, in consultation with her first-year advisor, her major or minor advisor, or her Class Dean, will choose a course to meet this requirement. She will explain her choice in a written statement to be submitted to and signed by the advisor or dean with whom she has consulted.

The multicultural requirement may be satisfied with a course that also satisfies a distribution requirement. Writing 125 may not be used to satisfy the multicultural requirement.

Quantitative Reasoning Requirement
The ability to think clearly and critically about quantitative issues is imperative in contemporary society. Today, quantitative reasoning is required in virtually all academic fields, is used in almost every profession, and is necessary for decision-making in everyday life. The quantitative reasoning requirement is designed to ensure that all Wellesley College students are proficient in the use of mathematical, logical, and statistical problem-solving tools needed in today's increasingly quantitative world.

The quantitative reasoning requirement consists of two parts: (1) the basic skills component and (2) the overlay course component. The basic skills component is satisfied either by passing the Quantitative Reasoning Assessment given to all entering students or by passing QR 140, the basic skills course that builds mathematical skills in the context of real-world applications. Students are required to satisfy the basic skills component in their first year so that they may enroll in the many courses for which basic quantitative skills (including algebra, geometry, basic probability and statistics, graph theory, estimation, and combinatorics) are a prerequisite.

The overlay component is satisfied by passing a QR overlay course. Such courses emphasize statistical analysis and interpretation of data in a specific discipline. The Committee on Curriculum and Instruction has designated specific courses in fields from across the curriculum as ones that satisfy the QR overlay requirement. A QR overlay class may satisfy another distribution requirement as well. For more information about the Quantitative Reasoning Program, see Courses of Instruction.

The Major
Students may choose from over 50 departmental, interdepartmental, and structured individual majors or they may design an individual major. Of the 32 units required for graduation, at least eight are to be elected in the major. Many departments and programs require more than eight units, and Directions for Election of the major vary. (See departmental listings for specific requirements.) While a student must complete one major, she may choose to complete two majors or a major and a minor. No single course may be counted toward two majors or toward both a major and a minor.

The Individual Majors Program allows a student to design a course of study which is not represented in one of the more than 50 departmental and interdepartmental majors currently offered. A student interested in designing an individual major should submit a plan of study to two faculty members from different departments. The proposed individual major must represent and be described as a meaningful program of interdepartmental coursework built around a specific departmental concentration. The major should lead to the cumulative development of knowledge and expertise in a student's field of interest, and should include both theoretical and methodological work at an advanced level. Normally, the plan should include eight units above the introductory level, four of which should be in one department. The program for the individual major is subject to the approval of the Committee on Curriculum and Instruction.

By the second semester of the sophomore year each student elects a major field and submits to the Registrar a declaration form listing the courses to be included in the major and signed by the major advisor. Later revisions may be made with the approval of the chair of the major department, the director of the interdepartmental major, or in the case of the individual major, with the consent of the student's advisors and the Committee on Curriculum and Instruction.

Other Requirements
In order to ensure a broad exposure to the liberal arts curriculum and to avoid premature specialization, of the 32 units required for graduation, students must elect 18 units outside any one department. Of the last four semesters completed for the degree, a normal course load must be taken at Wellesley in two consecutive semesters.

In addition, all students must complete the physical education requirement described in the Courses of Instruction (see Department of Physical Education, Recreation, and Athletics) for which no academic credit is given.

Additional Academic Programs
Research or Individual Study
Each academic department provides the opportunity for qualified students to undertake a program of individual study directed by a member of the faculty. Under this program, an eligible student may undertake a research project or a program of reading in a particular field. The results of this work normally are presented in a final report or in a series of short essays. Further conditions for such work are described (in departmental listings) under the courses 250, 250H, 350, and 350H. Students may do no more than two units of 350 work in any one department. Individual study courses may not be used to satisfy distribution requirements. For further opportunities for research and individual study see the Honors section under Academic Distinctions.
The Minor
Some departments and programs at Wellesley offer a minor. Normally, a minor consists of at least five units, with one of them at the Grade III level. Directions for Election of the minor are included in the departmental and program listings. Interested students should consult the chair of the department. A minor form must be filed in the Office of the Registrar. No student is required to complete a minor.

Preparation for Law School
The prelaw student should develop three basic competencies: skill in analysis and reasoning, effective writing and speaking, and breadth of understanding of the diverse factors that make up the community in which the legal system functions (see Legal Studies courses). These competencies can be developed in any field in which the student chooses to major, whether in the social sciences, the humanities, or the natural sciences. Law schools do not specify particular major fields or particular courses of study for admission. Law schools require applicants to submit transcripts from all institutions at which they have completed courses, including summer school and study abroad programs.

Preparation for Medical School and Other Health Professions
Medical, dental, and veterinary medical schools require special undergraduate preparation. Students should consult as early as possible with the Health Professions Advisory Committee to plan their academic preparation to meet their individual needs and interests. Appointments can be made with the Health Professions secretary in the Science Center.

In general, most health profession schools require two units of English and two units of each of the following science courses (with lab): Introductory Biology, Introductory Chemistry, Organic Chemistry, and Physics. Many schools also require mathematics, in some cases two units of calculus, and additional science courses. Veterinary schools frequently require courses such as speech, technical writing, animal nutrition, genetics, biochemistry, etc. Requirements vary and catalogues of individual schools should be consulted.

All science requirements should be completed before taking the Medical College Admission Test (MCAT) or the Dental Admission Test (DAT), which are taken approximately 16 months before entering medical or dental school. In order to receive the full support of the Health Professions Advisory Committee, undergraduate students should plan to complete at least six of the science and math course requirements at Wellesley and/or its exchange colleges.

Preparation for Engineering
Wellesley students interested in engineering can take advantage of the exchanges with MIT and Olin College. Those who would like to go on to graduate study in engineering can combine a set of engineering courses with a science major at Wellesley in a four-year program. They should consult with the relevant Wellesley advisor to develop a curricular plan. Students interested in an undergraduate engineering degree can apply to the Wellesley/MIT Double Degree Program (see Special Academic Programs).

Students interested in engineering should take mathematics and physics at Wellesley in preparation for courses at MIT and Olin. The Wellesley faculty advisors can provide information concerning engineering fields, prerequisites and contact persons at MIT and Olin.

Academic Advising
At Wellesley, academic advising is provided by the Class Deans and the faculty. The Class Dean is a central source of information about degree requirements, academic legislation, and resources available at the College to help students achieve their academic goals. She advises students about course selections and sequences, and she is available throughout a student's years at Wellesley for consultation about matters of more general intellectual and personal concern.

Starting during Orientation, the faculty serve as mentors about the liberal arts experience, helping first-year students discuss their academic interests, goals, and experiences during their first year at Wellesley and introducing them to areas of the curriculum about which they may lack knowledge. In addition, each first-year student is asked to select a faculty advisor, based on her first semester course choices, to ensure that she has an opportunity to explore her individual interests and concerns about the degree.

The advising of juniors and seniors is also shared by the faculty and the Class Deans. This arrangement provides for systematic and equitable supervision of each student's progress toward the B.A. degree. In addition, it has the double benefit of specialized advice from faculty in the major field and detailed examination of the student's overall program.

The Pforzheimer Learning & Teaching Center
The Pforzheimer Learning & Teaching Center, located in the Margaret Clapp Library, plays a significant role in supporting the intellectual life of both students and faculty on the Wellesley campus. The mission of the Center is twofold: (1) to help students realize their academic potential and (2) to provide opportunities for faculty members to explore different methods of teaching. Peer tutors are at the heart of the Center's academic services for students. Tutors support students as they build on their academic strengths, overcome difficulties, and develop effective strategies for reading, writing, and thinking. Faculty members participate in programs that enable them to share insights, refine teaching skills, and implement pedagogical innovations.

Academic Policies and Procedures
The academic policies and procedures of the College have been subject to continuous change and examination throughout the College's history, responding to changes in student lifestyles and innovations in the curriculum. The policies and procedures that govern most routine aspects of academic life are described below.

Academic Standards
Academic standards at Wellesley are high, and students take full responsibility for attending classes, submitting required work on time, and appearing for examinations. If students have difficulties with course work, become ill, or have other problems that interfere with their academic work, they should consult with their Class Deans for assistance in making special arrangements for their studies. Tutoring and programs in study skills are offered through the Pforzheimer Learning and Teaching Center.

Students are expected to maintain at least a C average throughout their college career. At the end of each semester the records of those students who are not in
good academic standing are examined by the Academic Review Board. The Board will recommend sources of help and may impose conditions for continuing at the College. The College tries to provide the appropriate support services to students in difficulty. Students who show consistent effort are rarely asked to leave the College.

Academic Review Board
The Academic Review Board is the principal body for overseeing each student’s academic progress and for granting exceptions to degree requirements and academic policies. The Board researches and recommends changes in academic policy. Dates of Academic Review Board meetings are posted on the Campus-Wide Information System. A student who wishes to submit a petition to the Academic Review Board should do so in consultation with her Class Dean. She should deliver her petition, in writing, at least one week before the petition is to be considered by the Board.

Credit for Advanced Placement Examinations
Students matriculating prior to the fall of 2006 should consult the registrar or class deans about the number of units allowed and score required for credit.

Students matriculating in the fall of 2006 or later who have taken Advanced Placement Examinations and who make the scores specified by Wellesley College may receive up to four units of credit toward the B.A. degree. Eligible students will be awarded credit upon application in the spring of the sophomore year, provided they do not register in college for courses that cover substantially the same material as those for which they have received Advanced Placement credit. One unit of credit will be given for each AP examination to students who have received a grade of 5 with the following exceptions: one unit will be given for a score of either 4 or 5 on the Mathematics AB (AP) examination or for an AB-subscore of 4 or 5 on the Mathematics BC (AP) exam. No more than two units will be granted for credit in any one department. AP units may not be used to satisfy distribution requirements. Some departments or interdepartmental programs restrict the use of AP credits toward the major; consult the department or program or see Directions for Election under the departmental or program listings. The taking of a course deemed equivalent to one for which AP credit has been granted will nullify the AP credit.

Up to four units of credit toward the degree will also be awarded for International Baccalaureate (Higher Level) scores of 5, 6, or 7. Wellesley College may grant credit for thirteenth-year programs outside the U.S. (e.g., A-levels). For more information, contact the Registrar’s Office.

Students in the class of 2010 and later may bring in a maximum of four units from a combination of AP, IB, and college units earned prior to matriculation.

Summer School and Transfer Course Credit after Matriculation
Students who wish to take courses during the summer or while on a leave of absence must get their courses approved for credit toward the Wellesley degree. An approval form, available in the Registrar’s Office, must be completed for each course taken outside the Twelve College Exchange Program or outside an approved foreign study program. On this form the Registrar’s Office will evaluate the course for the amount of credit, and the department chair for course content. Certain academic departments will not approve outside credit from two-year colleges after a student has matriculated (see departmental Directions for Election). Students should have their courses evaluated and approved prior to enrolling, otherwise credit is not guaranteed. (A course must be equivalent to four semester-hours or six quarter-hours in order to earn one full unit of Wellesley credit.) Credit will be granted only for liberal arts courses taken at an accredited institution. Courses must be taken for a letter grade, and credit will be given only for an approved course in which a grade of C or better is earned. Students must request that an official transcript be sent to the Wellesley College Registrar’s Office. Transcripts should be received by October 1 for summer and previous year course work and by March 1 for fall semester work. See the section below, “Special Academic Programs,” for information on credit for exchange programs.

Approved courses may be used toward the distribution requirement within the limitations outlined above. Students must earn the equivalent of three full Wellesley units (12 semester-hours or 18 quarter-hours) in each distribution group. First-year students must fulfill the writing requirement by completing Writing 125.

Limitations on the Amount of Outside Credit Used Toward the Degree
Of the 32 units required for the B.A. degree, a student may earn a maximum of 16 units through a combination of the following: AP examinations (no more than eight for students matriculating prior to fall of 2006, no more than four for students matriculating in fall 2006 or later), courses taken at another institution during the summer (no more than four), courses at another institution not taken during the summer (no more than eight), college and university credit earned prior to graduation from secondary school and not included in the units of secondary school work presented for admission (no more than two for students matriculating prior to fall 2006, no more than four for students matriculating in fall 2006 or later). All students, including transfer students and Davis Scholars, must complete 16 units at Wellesley. There are limits on the number of outside credits that can be used to fulfill the distribution requirement. See the sections above on degree requirements.

Students in the class of 2010 and later may bring in a maximum of four units from a combination of AP, IB, and college units earned prior to matriculation.

Exemption from Required Studies
Students may be exempted from any of the studies required for the degree, except Writing 125, provided they can demonstrate to the department concerned a reasonable competence in the elements of the course. Exemption from any of the studies required does not affect the general requirement for completion of 32 units of credit. It does, however, make it possible for some students to select more advanced courses earlier in their college careers.

Arrangements for exemption must be made with the chair of the department concerned. In addition to the examination, some departments may require the student to present a paper or an acceptable laboratory notebook. See department listing for specific policies.

Grading System
Wellesley uses the following letter grade system:

Grade A (4.00) is given to students who meet with conspicuous excellence every demand that can fairly be made by the course.
Grade A– (3.67)
Grade B+ (3.33)

Grade B (3.00) is given to those students who add to the minimum of satisfactory attainment excellence in not all, but some, of the following: organization, accuracy, originality, understanding, and insight.

Grade B– (2.67)
Grade C+ (2.33)

Grade C (2.00) is given to those students who have attained a satisfactory familiarity with the content of a course and who have demonstrated ability to use this knowledge in a satisfactory manner.

Grade C– (1.67)
Grade D (1.00) is a passing grade. There is no grade of D+ or D–.
Grade F (0.00)

In April 2004, the members of the faculty approved a resolution on grading standards and policy. The policy went into effect in the fall of 2004. It stipulates that the average grade in 100- and 200-level courses should be no higher than B+ (3.33) The ultimate purpose of these measures is to insure Wellesley’s commitment to excellence.

Students also have the option of electing courses on a credit/noncredit basis. By the end of the third week of a semester, students declare their decision to take a course credit/noncredit using the online registration system. Credit (CR) is given to students who have earned a grade of C or better in the work of the course, thereby indicating satisfactory familiarity with the content of the course. If a grade lower than C is earned, the course will appear on the permanent record with the notation (NCR), meaning no credit is earned.

Students may take an unlimited number of courses on a credit/noncredit basis. In order to remain eligible for Academic Distinction at Commencement, however, a student may not exceed certain limits in the number of credit/noncredit courses she takes. Students who begin their degrees as first-year students at Wellesley may take no more than one-quarter of their Wellesley and MIT courses after the first year on a credit/noncredit basis. For students who begin their degrees somewhere other than at Wellesley (that is, for transfer students and Davis Scholars), the number of credit/noncredit courses is prorated in proportion to the number of Wellesley courses taken after the equivalent of the first year of college. Students can consult their Class Deans for further clarification.

Incomplete Work
If work for a course is not completed by the end of a semester, a student may ask her instructor for an incomplete. The instructor may decide not to grant an incomplete but rather to assign a grade, taking into account that not all requirements for the course have been met. If the instructor does agree to give the student an incomplete, the student must submit any missing written work to the Registrar’s Office by a date determined by the instructor but no later than the first day of the succeeding semester. Make-up exams are arranged by the Registrar’s Office, generally during the first week of classes. Once all work has been completed and graded, a final grade preceded by “I” will be recorded on the transcript. If a student does not finish her incomplete work by the deadline, the instructor may either submit a grade or ask the Registrar’s Office to record a grade of permanent “INC.”

Excused Incomplete Work
If illness or personal emergency prevents a student from completing her course work by the end of the semester, she may petition the Academic Review Board through her Class Dean to have an incomplete excused. If her petition is granted, the incomplete notation will be removed from her record once the work is completed and a final grade is submitted.

Examinations
An examination period occurs at the end of each semester. Within this period, students determine which of the ten exam periods they intend to use for courses with self-scheduled exams. Examinations are scheduled for some courses that require audiovisual equipment. Make-up and special examinations are offered at the beginning of each semester for admission to advanced courses without the stated prerequisites and for exemption from required studies.

Transcripts and Grade Reports
Official transcripts may be ordered in writing from the Registrar’s Office. The request for a transcript should include the name and address of the person to whom the transcript is to be sent, the name by which the person was known as a student at Wellesley, and the years of attendance at the College. There is a charge of $3 for each transcript, and this fee should accompany the request. Transcripts may not be issued if the student has an outstanding bill. Current students may view their grades online at the end of each semester.

Registration for Courses
All returning students must register in April for the courses they select for the fall semester and in November for the spring semester. The registration system remains open to accommodate changes, and students’ schedules are available online. A student will not receive credit for a course unless she has registered for it, and a student who has registered for a course will remain registered unless she takes formal action to drop it. Each student is responsible for maintaining the accuracy of her registration.

Any conflicts in scheduling must be reported to the Registrar’s Office immediately. A student is not permitted to take a course if it conflicts with any other course on her schedule.

Adding or Dropping Courses
Students may add classes during the first two weeks of classes only. A course may be dropped at any time through the last day of classes. If a course is dropped before the beginning of the fifth week of classes, it will not appear on a student’s record. Students are advised to consult their Class Dean when making any changes in their program.

Auditing Courses
A student who wishes to attend a class as a regular visitor must have the permission of the instructor. Auditors may not submit work to the instructor for criticism, and audited courses will not be considered for credit. An audited course does not appear on the transcript.

Acceleration
Some students complete all the requirements for the degree in less than the usual eight semesters. After one semester at Wellesley, students who wish to accelerate should consult their Class Deans about petitioning to fulfill the requirements in less than the normal period of time.

The petition should include the month and year in which the degree requirements will be fulfilled, and all units that will be counted toward the degree.

An accelerating student must maintain at least a C average at all times.
Voluntary Departures from the College (Leave of Absence and Withdrawal)

Recognizing that students may benefit from interrupting the ordinary sequence of four continuous years at Wellesley, the College allows students to take leaves of absence for a variety of reasons that may include study at another institution, work, travel, health or family problems, or other personal needs. Application for a leave of absence may be made to the Class Dean after a student has completed at least one semester at Wellesley. The leave may be for as short a period as one semester or as long as four semesters. A student who goes on a leave of absence cannot remain in residence on campus more than 48 hours after the effective date of the leave. If a student’s leave exceeds four semesters, she will be withdrawn from the College but will be welcome to apply for readmission if she so chooses.

Application for a voluntary leave of absence is due by December 1 for spring semester and by April 15 for fall semester. To obtain permission to attend another institution with the intention of transferring credit back to her Wellesley degree, a student must also submit a detailed plan to her major advisor and her Class Dean. A student on leave may transfer to her Wellesley degree up to eight units of credit taken during an academic year at another institution, four units per semester.

A student who plans to return to the College should take a leave of absence; a student who wishes to leave the College permanently should notify her Class Dean that she is withdrawing. A student who withdraws cannot remain in residence on campus more than 48 hours after the effective date of the withdrawal. If, after withdrawing, a student decides she does after all wish to rematriculate at Wellesley, she must apply for readmission.

Required Departures from the College (Conditional Leaves of Absence, Withdrawal, Suspension, and Expulsion)

The College reserves the right to require a student to leave. She may be suspended if she violates College rules and regulations or the rights of others, or she may be required to take a leave of absence for various reasons: if she is not making adequate progress toward the degree; if she fails to meet financial obligations to the College; or if her continuing presence constitutes a risk to her health, safety or general well-being or to those of the College community. If a student is suspended or required to go on leave, she will not be allowed to return to the College until she has met conditions set by the appropriate College official or board. These conditions will be related to the cause of the suspension or leave. A student on an academic conditional leave, for example, would be required to meet conditions set by the Academic Review Board; a student on a financial conditional leave would be required to clear her balance; a student on a medical conditional leave would be required to provide documentation of appropriate medical treatment. Other restrictions may also apply. Once she has been cleared from a medical leave, a student will ordinarily be required to complete a full semester at Wellesley before she is allowed to be at the College for either Wintersession or summer school. Also, depending on the kind of leave, there may be a deadline by which the student must be cleared in order to return for the following semester. If the student does not meet the conditions of her leave within four semesters, she will be withdrawn from the College. If she later decides to apply for readmission, she must fulfill the conditions of the original leave.

The College also reserves the right to withdraw or expel a student who has egregiously or repeatedly failed to maintain academic or behavioral standards. A student who has been withdrawn may apply for readmission at some later date, whereas a student who has been expelled will not be considered for readmission.

Readmission

A student who has withdrawn from the College and wishes to return should contact her Class Dean for the appropriate forms. Readmission will be considered in light of the reasons for withdrawal. A non-refundable fee of $30 must accompany the application for readmission.

Special Academic Programs

The traditional four-year curriculum offered at Wellesley is enriched by many special academic programs. Some are administered by the College and some are programs run by other institutions in which Wellesley students may participate. Students may participate in some while in residence at the College; others involve living at other colleges or abroad for a semester or a year.

Wintersession

Wintersession is a time in January when students may choose to remain on campus to pursue internships or independent study, noncredit courses, or courses offered for academic credit. Wellesley offers a number of Wintersession courses for credit, including introductory and intermediate language courses, interdisciplinary courses not offered during the fall and spring terms, and immersion experiences involving travel abroad. Several credit-bearing courses are also available at MIT during Wintersession. Students taking Wintersession courses are subject to academic regulations as if they were taking the course during a regular semester.

Wellesley College Summer School

This program is open to undergraduates, postgraduates, and high school juniors and seniors in good academic standing. It offers a range of courses drawn from the Wellesley College curriculum and taught by Wellesley faculty. College students and college graduates may opt to live in the Summer School residence hall or off campus. Housing is not available for high school students or 2006 high school graduates. Tuition and other fees for summer school are not included in the regular-year tuition. Wellesley students may apply for limited financial aid from the Summer School Office; no financial aid is available to non-Wellesley students.

Wellesley Summer School courses carry full academic course credit; they count as regular units for Wellesley students and are included on the student’s transcript and in the calculation of her grade point average; they do not count toward the limit of four Summer School units that Wellesley stu-
students can apply to their degrees. For more information, please contact the Summer School Office or consult your Class Dean.

Cross-Registration Program with the Massachusetts Institute of Technology
Wellesley operates a program of cross-registration with Massachusetts Institute of Technology. A Wellesley student interested in taking specific classes at MIT should consult with the faculty advisor for the relevant MIT department. Registration in MIT courses takes place each semester in both the Wellesley Registrar’s Office and in the Exchange Office at MIT. Students electing to take courses at MIT must register at both institutions during an extended add/drop period of one week each semester. A student will not receive credit for an MIT course unless she has registered properly for it at both MIT and Wellesley. First-year students in their first semester may not take courses at MIT. The amount of Wellesley credit is determined by the total number of hours listed for a course in the MIT catalog as follows:

<table>
<thead>
<tr>
<th>Total MIT Hours</th>
<th>Wellesley Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;6</td>
<td>no Wellesley credit</td>
</tr>
<tr>
<td>6 to 8.99</td>
<td>.50 units</td>
</tr>
<tr>
<td>9 to 14.99</td>
<td>1.00 unit</td>
</tr>
<tr>
<td>15 to 17.99</td>
<td>1.25 units</td>
</tr>
<tr>
<td>18 to 24</td>
<td>2.00 units</td>

</tbody>
</table>

Wellesley Double Degree Program
Wellesley offers a Double Degree Program that enables Wellesley students who are accepted to MIT as transfer students to earn a B.A. degree from Wellesley and an S.B. degree from MIT over the course of five years. Students fulfill degree and major requirements at both institutions. Interested Wellesley students apply for transfer admission to MIT during the spring semester of their sophomore year. Students may only consider the MIT departments listed on the Double Degree Web site: http://www.wellesley.edu/USStudy/midoubledegree.html. Students should also be aware that access to a given department could at times be limited for transfer students. Wellesley applicants are subject to the same admissions criteria and financial aid policies used by MIT for all other college transfer applicants.

Accepted students do not enroll at MIT until they have completed their junior year at Wellesley. During this “bridge year” students are assigned major advisors at both institutions so that they can plan a program which will advance their work toward both degrees. During the fourth and fifth years students enroll at MIT. Our existing Wellesley/MIT Exchange permits cross-registration throughout the five-year period; this enables students to integrate their two courses of study more completely.

Wellesley/Brandeis BA/MAief 5-year Program
Brandeis University’s Master of Arts in International Economics and Finance (MAief) is a two-year graduate program in its International Business School. This program prepares students for careers in international finance, business, policymaking and other fields that require strong analytical skills in international economics and finance. Qualified Wellesley undergraduate economics majors who wish to earn the MAief may apply in their junior year to pursue a special track, the BA/MAief, beginning in the senior undergraduate year. The BA/MAief program allows a student to complete a Wellesley BA and then the MAief with only one year of post-BA study. Additional information on the BA/MAief program can be obtained from the Department of Economics.

Cooperative Programs with Babson College, Brandeis University, and Olin College of Engineering
Wellesley has established cooperative programs with Babson College, Brandeis University, and Olin College of Engineering. All courses must be approved individually for transfer credit and for the major by the relevant Wellesley department. Students interested in taking specific courses at Olin should consult with the Wellesley faculty advisor for the relevant Olin department.

The Twelve College Exchange Program
Wellesley belongs to a consortium that includes Amherst, Bowdoin, Connecticut College, Dartmouth, Mount Holyoke, Smith, Trinity, Vassar, Wesleyan, and Wheaton. Two one-semester programs associated with the Twelve College Exchange are the National Theater Institute in Waterford, Connecticut, and the Williams Mystic Seaport Program in American Maritime Studies. Students in good standing may apply for a semester or full academic year in residence at any of the member institutions. Preference is given to students planning to participate in their junior year.

Students must request that transcripts be sent to the Registrar’s Office to receive credit for work done away from Wellesley.

The Wellesley-Spelman Exchange Program
Wellesley maintains a student exchange program with Spelman College in Atlanta, Georgia, a historically black college for women. The program is open to students in their junior or senior year.

The Wellesley-Mills Exchange Program
Wellesley maintains an exchange program with Mills College, a women’s college in Oakland, California, which has a cross-registration program with the University of California at Berkeley.

Semester in Environmental Science at Woods Hole
Qualified Wellesley students may apply for the Semester in Environmental Science Program held each fall at the Marine Biological Laboratory in Woods Hole, Massachusetts. This 14-week program emphasizes the measurement and understanding of biogeochemical cycles and processes in terrestrial, freshwater, and marine ecosystems. Intended primarily for juniors, participation is limited to approximately two students per year. Interested students should contact the Department of Biological Sciences for additional information.

International Study
Well over half of students elect to spend a semester or year abroad, normally during the junior year, in order to gain language proficiency, develop a new perspective on their majors, or to take courses that are not available on campus. Wellesley sponsors study abroad programs and exchanges in Argentina, Austria, England, France, Italy, Japan, Korea, Mexico and Spain. In addition, students may choose from a list of more than 100 approved externally administered programs worldwide. For more information on the available study abroad programs, please visit the Office of International Study.

Students who enroll in any approved study abroad program pay regular Wellesley tuition and fees and remain eligible for Wellesley financial aid.

Students considering study abroad should consult their Class Dean and the Director of International Studies in the
fall of their sophomore year in order to determine eligibility and application requirements. Upon successful completion of an approved program of study abroad, students may earn up to four Wellesley units per semester. All courses must be approved in advance by the Office of International Study, and official transcripts must be sent from the program provider to the Registrar's Office.

More information on the available study abroad programs and application procedures can be found at www.wellesley.edu/ois/.

Summer International Study
In lieu of or in addition to a semester or year abroad, many students participate in international summer programs, either for academic credit or personal enrichment. The Office of International Study can assist students in locating and applying to appropriate summer programs. Students wishing to earn credit for a summer program must have courses approved in advance both by the relevant academic department chair and by the Director of International Studies.

Academic Distinctions
To give recognition for superior or advanced work, either upon graduation or during the student's career, the College confers a number of academic distinctions.

Honors in the Major Field
Students who have shown marked excellence in their major field may earn honors in the major. The usual route to honors, offered by all departments and programs, involves writing an honors thesis and successfully passing an oral examination by a thesis committee. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level. Some departments and programs require a higher average. Departments may petition on behalf of exceptional students whose averages fall between 3.0 and 3.5. Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students continue with Senior Thesis (370) in the second semester. Specific requirements vary with departments and programs; see the relevant sections of the bulletin for details. Some departments and programs offer other routes to honors in the major; these are described in their Directions for Election.

Other Academic Distinctions
The College names to First-Year Distinction those students who maintain high academic standing during the first year. Wellesley College Scholars and Durant Scholars are named at Commencement, based on academic records after the first year. Students with an average of 3.60 or higher will be Wellesley College Scholars cum laude; those with an average of 3.75 or higher will be Durant Scholars magna cum laude; students with a 3.90 or higher average will be Durant Scholars summa cum laude. For purposes of establishing honors, grade point averages are truncated to two decimal places. Students whose records contain more than three incompletes within the last 24 units or who have taken more than a stipulated number of credit/non-credit courses (see Grading System) shall not be eligible for these honors.

Juniors and seniors are elected to membership in the Eta of Massachusetts chapter of Phi Beta Kappa on the basis of their total academic achievement in college. Seniors who have done research in the sciences may be elected to associate membership in the Wellesley chapter of Sigma Xi.

Two types of fellowships are available to seniors carrying out independent or honors work: Jerome A. Schiff Fellowships are merit awards intended to support the scholarly work of students enrolled in the senior honors program and are made possible through a generous gift from the Jerome A. Schiff Charitable Trust. The Pamela Daniels Fellowship is a merit award, meant to provide an opportunity for a senior to envision and carry out a piece of work that she would love to do before she graduates. It was endowed by friends and former students of Pamela Daniels '59, Class Dean from 1981 to 2000.

On recommendation of the faculty, the trustees award the title of Trustee Scholar to four seniors who intend to pursue graduate studies. The awards are made on a competitive basis; the title is honorary. Certain prizes have been established at the College for the recognition of excellence in a particular field. The selection of the recipient is made by the appropriate academic department; each award carries a small stipend or gift and usually bears the name of the donor or the person honored.
Courses of Instruction

A semester course that carries one unit of credit requires approximately eleven hours of work each week spent partly in class and partly in preparation. The amount of time scheduled for classes varies with the subject from two periods each week in many courses in the humanities and social sciences to three, four, or five scheduled periods in certain courses in foreign languages, in art and music, and in the sciences. A semester course which carries 1.25 units of credit ordinarily includes at least 300 minutes per week of scheduled class time as well as significant work outside of class. Classes are scheduled from Monday morning through late Friday afternoon.

TBA To be announced
TBD To be determined
AFR 201 The African American Literary Tradition
Cudjoe
NOT OFFERED IN 2006-07. A survey of the Afro-American experience as depicted in literature from the eighteenth century through the present. Study of various forms of literary expression including the short story, autobiography, literary criticism, poetry, drama, and essays as they have been used as vehicles of expression for Black writers during and since the slave experience.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O. Offered in 2007-08. Unit: 1.0

AFR 202/PHIL 202 Introduction to African Philosophy
Mekiti (Philosophy)
Initiation into basic African philosophical concepts and principles. The first part of the course deals with a systematic interpretation of such questions as the Bantu African philosophical concept of Muntu and related beliefs, as well as Bantu ontology, metaphysics, and ethics. The second part centers on the relationship between philosophy and ideologies and their implications in Black African social, political, religious, and economic institutions. The approach will be comparative. Students may register for either AFR 202 or PHIL 202 and credit will be granted accordingly.
Prerequisite: Open to seniors, juniors, and sophomores without prerequisite and to first-year students who have taken one other course in philosophy.
Distribution: Religion, Ethics, and Moral Philosophy or Epistemology and Cognition
Semester: Spring Unit: 1.0

AFR 204 “Third World” Urbanization
Steady
Beginning with the origins and characteristics of cities in selected “Third World” countries, the course then focuses on the socioeconomic structure of preindustrial cities and the later impact of colonialism, corporate globalization, international migration, trafficking, and concluding with an examination of contemporary issues of “Third World” cities, sometimes referred to as cities of the Global South.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

AFR 206 Introduction to African-American History, 1500 to Present
Martin
NOT OFFERED IN 2006-07. An introductory survey of the political, social, economic, and cultural development of African-Americans from their African origins to the present.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O Unit: 1.0

AFR 208/SOC 206 Women in the Civil Rights Movement
Rollins
NOT OFFERED IN 2006-07. An examination of the role of women in the classical Civil Rights Movement. Particular attention will be paid to the interplay between the social factors of the women (e.g., their class, religiosity, race, regional background, age) and their perspectives/behavior within the movement. Essentially, women’s impact on the Civil Rights Movement and the effects of the Movement on the women involved are the foci of this course. Students may register for either AFR 208 or SOC 206 and credit will be granted accordingly.
Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O Unit: 1.0

AFR 209/ARTH 209 Topics in West African Art: Yoruba in Art
Topic for 2006-07: West African Photography. This course will look at the emergence of West African photography in the mid-nineteenth century initially as a medium used by Europeans during the colonialist era and subsequently employed by West Africans themselves as a medium of self-definition and liberation. A wide range of examples will be examined including nineteenth-century African studio photography in Sierra Leone, the mid-twentieth-century work of Malian, Seydou Keita, photographs in important visual cultural outlets like the Nigerian Drum Magazine, and works by contemporary African photographers such as Ousmane Ndiaye Dago of Senegal. The political and stylistic aspects of portraiture, documentary, ethnography, pop and abstraction will be important to our discussion of the medium. Students may register for either AFR 209 or ARTH 209 and credit will be granted accordingly.
Prerequisite: ARTH 101 or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

AFR 210 Introduction to African Literature
Cudjoe
The development of African literature in English and in translation. Although special attention will be paid to the novels of Chinua Achebe, writers such as Ngugi Wa Thiongo, Camara Laye, Wole Soyinka, Mirriama Ba, Nawal El Saadawi and Buchi Amameta will also be considered. The influence of oral tradition on these writers’ styles as well as the thematic links between them and writers of the Black awakening in America and the West Indies will be discussed.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring Unit: 1.0

AFR 211 Introduction to African Literature
Cudjoe
The development of African literature in English and in translation. Although special attention will be paid to the novels of Chinua Achebe, writers such as Ngugi Wa Thiongo, Camara Laye, Wole Soyinka, Mirriama Ba, Nawal El Saadawi and Buchi Amameta will also be considered. The influence of oral tradition on these writers’ styles as well as the thematic links between them and writers of the Black awakening in America and the West Indies will be discussed.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring Unit: 1.0

AFR 212 Black Women Writers
Cudjoe
NOT OFFERED IN 2006-07. The Black woman writer’s efforts to shape images of herself as Black, woman, and as artist. The problem of literary authority for the Black woman writer, criteria for a Black woman’s literary tradition, and the relation of Black feminism or “womanism” to the articulation of a distinctively Black and female literary aesthetic.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O Unit: 1.0

AFR 214 Internationalization of Black Power
Martin
This course will revisit the Civil Rights and Black Power eras of the 1960s through 1970s, with the emphasis on the more militant Black Power phase of the struggle. We will rely mostly on the writings of the actual leaders of these struggles. Personalities/topics include Malcolm X, Elijah Muhammad, Martin Luther King, Jr., Assata Shakur, the Black Liberation Army, Black Panther Party, the Republic of New Africa, Kwame Toure (Stokely Carmichael), Black Arts Movement, Cointelpro, Kwanzaa, and the rise of Black Studies.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring Unit: 1.0

AFR 215 History of the Caribbean
Martin
NOT OFFERED IN 2006-07. A survey of political, economic, and ideological factors shaping Caribbean society. Topics covered include Africans in the New World before Columbus, genocides against the indigenous peoples, slavery and slave revolts, immigration and emigration, the Caribbean and Africa, the Caribbean and African America, the struggle for majority rule, the spread of United States influence, independence, and its challenges.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O Unit: 1.0

AFR 217 The Black Family
NOT OFFERED IN 2006-07. This course is an overview of the African American family in economic, sociological, psychological, economic, anthropological, and historical perspectives. It is an examination of the complex interplay of self-definings, societal, and community definitions among African American women, men, and children within the context of their families. The course is also an exploration of changing gender roles among African American women and men.
AFR 222 Images of Women and Blacks in American Cinema
Obeng
A study of the creation of images and their power to influence the reality of race and gender in the American experience. Viewing and analysis of American cinema as an artistic genre and as a vehicle through which cultural and social history are depicted.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

AFR 224/MUS 209 A History of Jazz
Barzel (Music)
A listener’s introduction to jazz. Early jazz drew from several vibrant streams of indigenous musical art (including ragtime and blues); subsequent stylistic phases have corresponded closely to significant developments in social history. Knowledge of jazz is thus highly relevant to an understanding of American culture since 1900. Through a selection of recordings and readings, we will follow the progression of jazz styles and address the interplay of African, Latin, European, and American influences. Students will learn how to distinguish between basic styles (New Orleans, swing, bebop) and will become familiar with specialized terms and concepts (stop time; blue note, rhythm changes, improvisation) that are central to understanding the music. Students may register for either AFR 224 or MUS 209 and credit will be granted accordingly.
Prerequisite: None. Not open to students who have taken [AFR 233]/[MUS 233].
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: Fall
Unit: 1.0

AFR 225 Introduction to Black Psychology
Davis
Issues and perspectives in the study of the psychological development of Black people in America, past and present. Special consideration is given to such issues as the Afrocentric and Eurocentric ethos, the nature of Black personality as affected by slavery and racism, psychological assessment, treatment and counseling techniques, and the relationships between psychological research and social policy in American research.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

AFR 226 Environmental Justice, Race, and Sustainable Development
Steady
An investigation of the extent to which the causes and consequences of environmental degradation are influenced by social inequality and the devaluation of indigenous peoples. The course will examine how the poor, indigenous peoples and people of color are subjected to environmental hazards. Topics include the link between negative environmental trends and social inequality; the social ecology of slums, ghettos and shanty towns; the disproportionate exposure of some groups to pollutants, toxic chemicals, and carcinogens; dumping of hazardous waste in Africa and other Third World countries; and industrial threats to the ecology of small island states in the Caribbean. The course will evaluate Agenda 21, the international program of action from the Earth Summit designed to halt environmental degradation and promote sustainable development.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

AFR 229 Rap Music and the African American Poetical Tradition
Cudje
This course examines the African American poetical tradition from its roots in African oral literature to its contemporaneous manifestation in rapping, a showcase for African American bragadocio, and the art of verbal dexterity, and storytelling. The connection of this literary tradition with American cultural values will also be explored. The course will examine the works of Phyllis Wheatley, Langston Hughes, James Weldon Johnson, Melvin Tolson, Gwendolyn Brooks, Robert Hayden, Derek Walcott, Gil Scott-Heron, the Last Poets, Nikki Giovanni, Public Enemy, Run-D.M.C., Tupac, and other artists.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

AFR 234 Introduction to West Indian Literature
Cudje
NOT OFFERED IN 2006-2007. A survey of contemporary prose and poetry from the English-speaking West Indies. Special attention is paid to the development of this literary tradition in a historical-cultural context and in light of the perspectives recent literary theories offer. Authors to include: V. S. Naipaul, Derek Walcott, Wilson Harris, Jean Rhys, and others.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

AFR 235 Societies and Cultures of Africa
Steady
The objective of this course is to provide students with an introduction to the richness, diversity, and complexity of African societies and cultures while appreciating their unifying features. Topics to be discussed include forms of social organization, the importance to kinship and marriage systems, the centrality of religion, the position of women, urbanization and problems of development, democratization, and political transformation, political instability, and armed conflicts. In order to understand a people’s view of themselves and of their relationship to the outside world, an in-depth case study will be made of one ethnic group - the Yoruba of southwestern Nigeria.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

AFR 236/POL 203 African Politics
Murphy (Political Science)
An investigation of politics across Sub-Saharan Africa since the defeat of Portuguese colonialism in the mid-1970s. The economic stagnation of the 1980s, the impact of structural adjustment programs, the end of the Cold War, the genocide in Rwanda and the resulting wars will be discussed along with the liberation of Southern Africa and the recent wave of democratization. Emphasis on developing the method of empathetic understanding to become knowledgeable about the opportunities and constraints faced by African citizens and governments. Students may register for either AFR 236 or POL 203 and credit will be granted accordingly.
Prerequisite: One unit in political science, economics, history, or Africana studies. Open to juniors and seniors without prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

AFR 242 New World Afro-Atlantic Religions
Obeng
With readings, documentary films, discussions, and lectures, this course will examine the complex spiritual beliefs and expressions of peoples of African descent in Brazil, Cuba, Haiti, Jamaica, and North America. The course surveys African diasporic religions such as Candomble, Santeria, Voodoo, Shango, and African American religions. Attention will be paid to how diasporic Africans practice religion for self-definition, community building, sociocultural critique, and for reshaping the religious and cultural landscapes of the Americas.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

AFR 251 Religion in Africa
Obeng
An examination of African experience and expression of religion. The course surveys African religions among the Alaka of Ghana, Yoruba of Nigeria, Nuer of the Sudan, the Zulu of South Africa, and the Bemazava-Sakalava of Madagascar. The course will focus on how gender, age, status, and cultural competence influence Africans’ use of architecture, ritual, myth, dance, and music to communicate, elaborate on the cosmos, and organize their lives. Special attention will be paid to the resiliency of African deities and indigenous cultural media during the encounter between African religions, Christianity, and Islam.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

AFR 266 Black Drama
Cudje
NOT OFFERED IN 2006-07. This course will examine twentieth-century Black drama, with a special emphasis on the period of its efflorescence during the Black Arts Movement of the 1960s and 1970s. We will also explore the Black theatre as a medium of aesthetic expression and communal ritual as well as an instrument of political consciousness and social change. Playwrights will include Douglass Turner Ward, Alice Childress, Ossie Davis, Lorraine Hansberry, James Baldwin, Ed Bullins, Adrienne Kennedy, LeRoi Jones (Amiri Baraka), Ntozake Shange, and others.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0
AFR 280 Wintersession in Ghana
Rollins, Obeng
NOT OFFERED IN 2006-07. This course is an introduction to Ghanaian history and society, with two foci: spirituality (Christianity, Santonofa, and Islam, etc.) and women. Based at the University of Ghana in Legon, students will attend lectures by university professors, will visit sites related to those lectures around Accra, and will travel to the coast (Cape Coast and Elmina) and inland (to Kumasi and parts of the Ashanti region) to visit historic sites as well as to study village and rural life. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: By permission of the department. Application required.
Distribution: Epistemology and Cognition
Semester: Winter Session Unit: 0.5

AFR 297 Medical Anthropology:
A Comparative Study of Healing Systems
Steady
This course examines alternative healing systems that attempt to treat the whole person as a physical, social, and spiritual being and to promote community participation and healing. It offers new perspectives on the biomedical model as it examines the sociocultural context of the causation, diagnosis, prevention, and cure of disease. Examples of healing systems will be from Third World countries, particularly in Africa, the Caribbean, and Latin America, and from industrialized societies, particularly from African American and indigenous communities in the United States. Examination will be made of healing systems which include divination, herbal medicine, folk medicine, and faith healing.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

AFR 299 Women in the Caribbean
Rollins
NOT OFFERED IN 2006-07. This course is a sociological exploration of the lives of women in Caribbean societies. While the emphasis is on contemporary English-Speaking Caribbean (Barbados, Jamaica, Trinidad and Tobago, St. Lucia, Nevis, etc.), attention will be given to the historical background of the current situation and to the French-Speaking (Martinique, Guadeloupe, Haiti, etc.) and Spanish-Speaking (Cuba, the Dominican Republic and Puerto Rico) Caribbean. Women’s work in the formal and informal sectors, activism, roles in development and familial relationships are some of the topics to be explored.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

AFR 300 Heritage and Culture in Jamaica:
A Wintersession Experience
Steady
Jamaica is a country that provides a unique opportunity for the study of multiculturalism in action. Its national motto is “Out of many, one people.” The study abroad wintersession course in Jamaica will explore the history, culture, and political economy of the country and promote an understanding of the Caribbean as a whole through seminars, participatory field research, and internships. The program will give students an opportunity for total immersion in the Jamaican environment and for participation in several community-based projects that will add experiential value to their classroom-based education. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: By permission of the department. Application required.
Distribution: Social and Behavioral Analysis
Semester: Wintersession Unit: 0.5

AFR 301 Seminar. South Africa
Steady
NOT OFFERED IN 2006-07. An examination of the degree of success or failure in social transformation from a racist, centralized, and oppressive apartheid system to a non-racial, democratic and participatory system which seeks to promote social and economic justice for all its citizens. Topics include the structural challenges to social transformation, socioeconomic development and resource distribution, the persistence of de facto apartheid, the Truth and Reconciliation Commission, increasing poverty among the African population, the HIV/AIDS epidemic, the impact of globalization, and South Africa’s place in Africa and the world at large.
Prerequisite: A 200-level course of relevance to Africana studies and permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

AFR 307 Modern African Political Thought
Steady
NOT OFFERED IN 2006-07. This seminar course will examine the political ideas of major figures who have shaped African history in the last hundred years. It will explore the intellectual means they employed in grappling with European imperialism and the post-colonial period. It will look more specifically at the premises and implications of Nkrumah, Pan-Africanism, African Socialism, and new trends towards democratization. It will do so through an in-depth investigation of the works of such political thinkers as Frantz Fanon, W.E.B. DuBois, Marcus Garvey, Nkrumah, Kenya, Nyerere, Senghor, Cabral, and Mandela.
Prerequisite: A course of relevance to Africana studies.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

AFR 310 Seminar. Black Literature
Topic A: Three Writers of the Harlem Renaissance
Cudjoe
The Harlem Renaissance is a period associated with the rebirth of African American literature and culture. Langston Hughes, Claude McKay, and Zora Neale Hurston are three important novelists and poets of this period. This course examines selected works from their prose and poetry. Selected works will be examined against the background of the Harlem Renaissance.
Prerequisite: Permission of instructor and a course of relevance to Africana studies.
Distribution: Language and Literature
Semester: Fall Unit: 1.0

Topic B: Rhetoric and Revolution
Cudjoe
NOT OFFERED IN 2006-07. This course examines the rhetoric and writing of African freedom fighters and the role prison plays as a weapon in the freedom struggle. Texts include Nelson Mandela, Long Walk to Freedom; Martin Luther King, Why We Can’t Wait; Frantz Fanon, Wretched of the Earth; The Autobiography of Malcolm X; and selections from Jack Mapanje’s Gathering Seaweeds: African Prison Writings.
Prerequisite: Permission of instructor and a course of relevance to Africana Studies.
Distribution: Language and Literature
Semester: N/O Unit: 1.0

Topic C: Writers from the Diaspora
Cudjoe
NOT OFFERED IN 2006-07. This course examines six selected novelists from the African Diaspora and the continent. They include Frederick Douglass, The Narrative of Frederick Douglass; Booker T. Washington, Up From Slavery; Sembene Ousmane, God’s Bits of Wood; Michel Marshall Philip, Emmanuel Appadocca; Stephen Nathaniel Cobham, Rupert Gray; Ralph DeBosiere, Crown Jewel; Selwyn R. Cudjoe, Beyond Boundaries; Bernard Bell, The Afro-American Novel and Its Tradition; and Gregory Wilson, Between Piracy and Justice: Nineteenth-Century Literature.
The course concentrates on the commonality of themes and approaches to the explanation of similar phenomenon. The selected texts draw on and reflect the slave and colonial experiences.
Prerequisite: Permission of instructor and a course of relevance to Africana Studies.
Distribution: Language and Literature
Semester: N/O Unit: 1.0

AFR 315/EDUC 315 History of African American Education
Venzant (Education)
An examination of the history of African American education through the lens of school desegregation, placing issues within the larger framework of access and opposition. We will study the context of the landmark Brown v. Board of Education U.S. Supreme Court case, the conditions and actions that led to the ruling, the ensuing era of contested implementation, and the legacy of Brown in contemporary education policies. Legal, sociological, and policy perspectives will be used to examine how African American communities persevered through the complex era of school desegregation, and how the struggle for integration shifted but did not cease with desegregation. Students may register for either EDUC 315 or AFR 315 and credit will be granted accordingly.
Prerequisite: One 100- or 200-level education course
Distribution: Historical Studies
Semester: Fall Unit: 1.0

AFR 316/ARTH 316 Contemporary African Art Exhibitions
Hyacinthe (Art)
The ground-breaking Short Century: Independence and Liberation Movements in Africa 1945-1994, curated by Okwui Enwezor and his team of African scholars, was influential in framing how modern/postmodem African art would be contextualized in museums and galleries in the new millennium. How might we view this exhibition in relation to preceding, contemporaneous and subsequent large-scale African exhibitions? Students will critique the important exhibits of the era, develop a familiarity with the primary artists on display, and formulate a curatorial strategy for their own contemporary African art show. Students may register for either AFR 316 or ARTH 316 and credit will be granted accordingly.
Each selected text allows us to understand the discipline in a more critical manner. This seminar will be placed within the polycultural, multiracial and religiously plural landscapes of African people. Authors to be studied include Eric Williams, C.L.R. James, Zora Neale Hurston, Walter Rodney, Cheikh Anta Diop, Patricia Hill Collins, Arna Ata Aidoo, Jamaica Kincaid, Ralph Ellison, Frantz Fanon, John Mbiti, V.Y. Mudimbe, and Marcus Garvey.

**AFR 350 Research or Individual Study**
Pre-requisite: Open by permission to juniors and seniors.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

**AFR 350H Research or Individual Study**
Pre-requisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

**AFR 360 Senior Thesis Research**
Pre-requisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**AFR 370 Senior Thesis**
Pre-requisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**Related Courses**
The following courses are offered as related work by other departments where they are described. Courses from this list may be counted toward the major, provided that a minimum of six courses is elected from the Africana Studies department offerings.

**ARTH 241 Egyptian Art**

**FREN 218 Négritude, Independences, Women's Issues: Francophone Literature in Context**

**FREN 331 Desire, Sexuality, and Love in African Francophone Cinema**

**MUS 300 Seminar: Studies in History, Theory, Analysis, Special Topics (Topic must be approved by Africana Studies department advisor)**

**POLI 269 African Politics**

**POLI 375 Seminar: The Politics of Minority Groups in the United States**

**SOC 109 Race and Ethnicity: An Introduction to Sociology**

**SOC 209 Social Inequality**

**Directions for Election**
A major in Africana studies requires nine units. An Africana studies major will choose one of four possible concentrations: Africa, the Caribbean, the United States, or a general Africana studies concentration. All of the four concentrations encompass the interdisciplinary approach of the department, while allowing students to focus on a particular area and gain expertise in one discipline. The first three courses of study focus on geographic areas; the fourth, designed in consultation with the student's advisor, allows the student to create a concentration on a particular salient aspect (e.g., Africana women or Africana arts) or issue (e.g., comparative race relations) in the Africana world.

It is strongly recommended that majors and minors take 105 before undertaking specialized courses of study. This course provides an overview of the discipline of Africana studies, including its philosophical and historical foundations, and introduces students to its major fields of inquiry. Of the nine units required for an Africana studies major, at least two must be at the 300 level and 344 is strongly recommended. Ordinarily, not more than two may be taken outside the department. The department will not accept credit/non-credit units toward the major. Each student must choose an advisor from among the Africana studies department faculty, is required to attend one or two mandatory department meetings per semester, and must be acquainted with an Africana studies reading list that is available from the department.

**Africa: This program of study is designed to provide students with an interdisciplinary and integrated understanding of the peoples of the African continent, from its ancient foundation through its current geopolitical situation. However, to ensure students' breadth of knowledge of the Africa world, two courses that focus on a geographic area other than Africa are required. Six courses that focus on Africa are the foundation of this concentration: one course must be in history; one must be in a social science (economics, political science, sociology, anthropology, or psychology); one must be chosen from the humanities (literature, art, music, philosophy, and religion); and two should be chosen from a specific discipline. The following courses are appropriate for the Africa concentration:**

**History: AFR 105, [200], [319], 340**

Social sciences: AFR 204, [205], [213], [223], 235, [245], 280, 297, 301, [306], [318], 341.

**Humanities: AFR 202, 207, 209, 211, 222, [231], [232], 251, 316, ARTH 209, 241, 316, FREN 218, 330, HIST [319]**

**The Caribbean: This program of study also provides students with an interdisciplinary knowledge of a particular geographic area: the Caribbean – its history, peoples, culture, and significance in the world system. As with the other concentrations, students focusing on the Caribbean are expected also to acquire some breadth of knowledge about the African world; thus, two courses focused on other areas are required. Of the five courses on the Caribbean, one must be a humanities course; one must be a social science; one must be a history course; and two must be chosen from one discipline. (See the African track for the specific disciplines considered “humanities” and “social sciences.”) The following courses are appropriate for the Caribbean concentration:**

**History: AFR 216, [319], 340**

Social Sciences: AFR [245], [275], 299, 300, [306], 341

**Humanities: AFR 207, [210], [232], 234, 310, [335], FREN 218, 330, SPAN 269**

**The United States: As with the other concentrations, students who choose the United States should approach their study of Africana America through many disciplines. The concentration requires five courses focusing on the United**

---

**AFR 344 Advanced Africana Seminar**
*Cudjo*
This course examines through interdisciplinary approaches key texts, ideas and issues that shape our understanding of Africana studies.

Consideration will be given to current and evolving theoretical and methodological developments, including concepts of Afrocentricism.
American Studies

AN INTERDEPARTMENTAL MAJOR

Director: Cref (Women's Studies)
Advisory Committee: TBA

The American Studies major seeks to understand the American experience through a multidisciplinary program of study. The requirements for the major are as follows. Nine units of course work are required for the major, at least six of which should be taken at Wellesley College.

These courses include AMST 101, which should be completed before the end of the junior year; at least two courses in historical studies; one course in literature; one course in the arts; and one course from any one of the following three areas: social and behavioral analysis; or epistemology and cognition; or religion, ethics, and moral philosophy. Students are also expected to take at least two 300-level courses, one of which should be AMST 317, taken in the junior or senior year. AMST 350, 360 and 370 do not count towards this requirement. To ensure some concentration in a field of American culture and society, at least three courses should be elected in one department.

In consultation with the department, a student may choose to focus her concentration in an area or field, such as law, women, or Asian America, assembling her group of three or more courses in this topic from two or more departments. American Studies majors with an Asian American concentration are encouraged to take courses that specifically address Asian American issues, such as AMST 151, ENG 269, [HIST 267], WOST 248, WOST 249.

Within this structure, students are encouraged to explore the diversity of American culture and the many ways to interpret it. Most courses at the College that are primarily American in content may be applied to the American Studies major. American Studies majors are encouraged to take part of, or in addition to, their major courses, surveys of American history, literature, and art (for example, HIST 203/204, ENG 262/266, ARTH 231/232) and a course on the American Constitution and political thought (for example, POL 340). In addition, students are urged to take one or more courses outside the major that explore the theory and methods of knowledge creation and production (for example, ECON 103/SOC 190, PHIL 345, POL 199, QR 180, SOC 301).

HONORS

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

AMST 101 Introduction to American Studies

Rosenwald (English)

An interdisciplinary examination of some of the varieties of American experience, aimed at developing a functional vocabulary for further work in American Studies or related fields. After a brief, intense review of American history, the course will direct its focus towards important moments in that history, investigating each of them in relation to selected cultural, historical, artistic, and political events, figures, institutions, and texts.

Prerequisite: This course is required of American Studies majors and should be completed before the end of the junior year.

Distribution: Historical Studies
Semester: Spring

Unit: 1.0

AMST 125/WRIT 125 Defining Asian American Literature

Iwasawa (The Writing Program)

The question we will pose at the outset, and which we will revisit frequently, is "What defines Asian American literature?" The writer's ethnicity? The topic? The intended audience? Authors studied may include Maxine Hong Kingston, Patti Kim, Jaypha Lahiri, R.O. Butler, Peter Ho Davies, Sandra Tsing Loh, Monique T.D. Trought. Students will also read essays on the power of creativity and the imagination. As students refine their definitions of Asian American literature, spurred on by texts that challenge their initial ideas, they will work toward defining an American identity itself. This course satisfies the Writing 125 requirement and counts as a unit towards the Asian American studies concentration within the American studies major. Includes a third session each week. Mandatory credit/non-credit.

Prerequisite: None. Open only to first-year students.
Distribution: Language and Literature
Semester: Spring

Unit: 1.0

AMST 151 The Asian American Experience

Kosera (Religion)

An interdisciplinary introduction to the study of Asian Americans, the fastest-growing ethnic group in North America. Critical examination of different stages of their experience from the "coolie labor" and "yellow peril" to the "model minority" and struggles for identity; roots of Asian stereotypes; myth and reality of Asian women; prejudice against, among, and by Asians; and Asian contribution to a more pluralistic, tolerant, and just American society.

Readings, films, lectures, and discussions.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall

Unit: 1.0

AMST 317 Seminar. Advanced Topics in American Studies

Kosera (Religion)

Topic A for 2006-07: Interning the "Enemy Race". Japanese Americans in World War II.

A close examination of the rationale and the aftermath of internment after Japan's attack on Pearl Harbor of American citizens of Japanese ancestry, together with Japanese nationals, living on the West Coast of the United States. The topic is to be considered include: Japan's rise as a colonial power, starting in the late nineteenth century; the place of Asian migrant workers and the "Yellow Peril"; life in the camps; the formation of the Japanese American Citizens League; how the United States has since responded to its "enemies"; changing immigration laws; and race and politics in America.

Prerequisite: Permission of instructor. Enrollment is limited and preference is given to American studies majors.
Distribution: Social and Behavioral Analysis or Historical Studies
Semester: Spring

Unit: 1.0
Bedell (Art History)

**Topic B for 2006-07: Disneyland and American Culture.** One of the most visited tourist attractions in the world, subject of thousands of books and articles, adored by millions yet reviled by many intellectuals, Disneyland has occupied a prominent place in American culture since it opened in 1955. This seminar will examine Disneyland as an expression of middle class American values, as a locus of corporatism and consumerism, as a postmodern venue, as a utopia, and as an influence upon architecture and urban design. In a broader sense, we will use Disney to explore the ideals, the desires, and the anxieties that have shaped post-World War II American culture.

Prerequisite: Permission of instructor. Enrollment is limited and preference is given to American studies majors.
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: Spring  
Unit: 1.0

**In 2007-08:**

Rosenwald (English)

**Topic C for 2007-08: American Utopias.** A study of the utopian impulse in American life, as manifested in fictions, paintings, intentional communities, and political doctrines. Preliminary study of the history and theory of utopia generally, and of particular importance of utopianism in American life, then close study of particular communities and texts. From Edward Bellamy's *Looking Backward* to contemporary science fiction, from Brook Farm to Disneyland and the Valley Community Land Trust.

Prerequisite: Permission of instructor. Enrollment is limited and preference is given to American Studies majors.
Distribution: Language and Literature
Semester: N/O  
Unit: 1.0

Reverby (Women's Studies)

**Topic D for 2007-08: Coalitions, Institutions and Individual Identities.** This seminar will consider how individuals and groups, who differ by gender, class, religion, sexuality and/or race, formed coalitions of various kinds to achieve social transformations. Critical moments in differing institutional struggles in American history will be examined. Questions will cover; under what conditions are coalitions formed, what holds them together, how successful have they been in transforming institutions and individual identities. Political movements and institutions to be explored will include abolitionism, suffrage, trade unions, schools, civil rights, antiracism movements, and student activism.

Students may register for either AMST 318 or WOST 315 and credit will be granted accordingly.

Prerequisite: Permission of instructor. Enrollment is limited and preference is given to American studies majors.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: N/O  
Unit: 1.0

**AMST 370 Senior Thesis**
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring  
Unit: 1.0

**Related Courses**

The following is a list of courses that may be included in an American studies major. If a student has a question about whether a course not listed here can count toward the major, or if she would like permission to focus her concentration on a topic studied in more than one department, she should consult the director.

**AMST 201 The African American Literary Tradition**
**AMST 206 Introduction to African-American History, 1500-Present**
**AMST 207 Images of Africana People through the Cinema**
**AMST 208/SOC 206 Women in the Civil Rights Movement**
**AMST 212 Black Women Writers**
**AMST 217 The Black Family**
**AMST 222 Images of Women and Blacks in American Cinema**
**AMST 224/MUS 209 A History of Jazz**
**AMST 225 Introduction to Black Psychology**
**AMST 229 Rap Music and the African American Poetical Tradition**
**AMST 266 Black Drama**
**AMST 310 Seminar. Black Literature. Topic A: Three Writers of the Harlem Renaissance; Topic C: Writers from the Diaspora**
**AMST 340 Seminar. Topics in African American History**
**AMST 341 Topics in Africana Social Science. Topic B: Race Relations**
**ANTH 220 Race/Ethnicity in the United States: Asian American Identities and Communities in Comparative Perspective**
**ARTH 205 Breaking Boundaries: The Arts of Mexico and the United States**
**ARTH 225 Modern Art Since 1945**
**ARTH 226 History of Photography: From Invention to Advertising Age**

ANTH 104 Introduction to Cultural and Social Anthropology

Chu, Karakasidou

A comparative approach to the concept of culture and an analysis of how culture structures the worlds we live in. The course examines human societies from their tribal beginnings to the postindustrial age. We will consider the development of various types of social organization and their significance based on family and kinship, economics, politics, and religion.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ANTH 208 Archaeological Science

Lechtman (at MIT)

An introduction to scientific techniques used in contemporary archaeology. Using a case study format, faculty from the Boston-wide Center for Materials Research Archaeology and Ethnology (CMRAE) present different methods for studying such topics as reconstruction of ancient environments; dating techniques; assessing the diets of ancient populations; and sourcing artifacts through chemical and physical analyses.

Prerequisite: One year college-level physics or chemistry (or equivalent, by permission of instructor).
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

ANTH 209 Forensic Anthropology

Gibbons

The identification of human remains for criminalological and political purposes is widespread. This course explores issues in the identification and interpretation of human bones including methods for determining sex, age, stature, and ancestry as well as for identifying pathologies and anomalies. The course will pay particular attention to those anatomical elements, both soft tissue and bones, that aid in the reconstruction of individuals and their lifestyles. In addition, the course explores search and recovery techniques, crime scene analysis, the use of DNA in solving crimes, and the role of forensic anthropology in the investigation of mass fatalities from both accidents and human rights violations. It also addresses ballistics and the use of photography in forensic investigation.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ANTH 211/RAST 211 Wintersession Program in the Republic of Georgia

Kohl

NOT OFFERED IN 2006-07. Students travel to Tbilisi, Georgia for Wintersession. They attend lectures in English at Tbilisi State University on Georgian history, language and culture and on contemporary political developments there and visit sites of historical interest in and around Tbilisi. They live with Georgian families and spend three weeks completing a self-designed internship with a local organization. Students may register for either ANTH 211 or RAST 211 and credit will be granted accordingly. Not offered every year. Subject to Dean’s Office approval.

Prerequisite: One course in anthropology or Russian area studies. Application required.
Distribution: Social and Behavioral Analysis or Historical Studies
Semester: N/O
Offered in 2007-08.
Unit: 0.5

ANTH 213 Racial and Ethnic Conflict

NOT OFFERED IN 2006-07. This course has three goals. The first is to address the history of the concept of race and its presumed biological underpinnings. We will examine the history of evolutionary and population biology and trace the development of modern notions of racial difference. Secondly, we will apply a critical anthropological lens to various conceptions of difference associated with race – notions of ethnicity, caste, nation, culture, and identity – and address their contemporary scholarly and political implications. Finally, we will compare systems of ethnoracial classification and social stratification in diverse societies of the Americas (U.S., Canada, Latin America, and the Caribbean) and examine patterns of conflict and social inequality.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 217 Peoples, Histories, and Cultures of the Balkans

Karakasidou

The Balkan region has been a major trade and cultural crossroads for millennia and encompasses a variety of landscapes, peoples, and cultures. We will read authoritative historical studies and ethnographies as well as short stories, poetry, books of travel and fiction. We will consider the legacy of the classical world, the impact of Islam, the emergence of European commercial empires, the impact of the European Enlightenment in national movements, the emergence of modernization, and the socialist experiments in the hinterlands. The course offers a critical overview of the politics of historical continuity and the resurgence of Balkan nationalisms during the last decade of the twentieth century.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ANTH 218 Everyday Life in South Asia

Lynch (Olin)

NOT OFFERED IN 2006-07. This course is an anthropological introduction to South Asia, with an emphasis on India and Sri Lanka. It focuses on the daily lives and experiences of real people as portrayed in ethnographies, novels, and films. The emphasis will be on the dynamics of power in which everyday lives are embedded. Topics include labor, gender, modernity, ethnicity, development, and globalization. Specific cases include practices of childbirth in South India, masculinities and ethnic identity in Sri Lanka, damming and displacement along the Narmada River, global garment production in Sri Lanka, and the Bhopal chemical disaster.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 220 Race/Ethnicity in the United States: Asian American Identities and Communities in Comparative Perspective

Chu

This course offers analytic tools for grappling with the historical and contemporary complexities of Asian American identification and community formation. Each section of this course introduces students to different theoretical frames for exploring the meaningful contours of the term “Asian American” in relation to other racialized and ethnic groups in the U.S. We will pay particular attention to the historical conditions and ongoing processes for the social formation of persons and collectivities under the rubric of “Asian American” as well as examine multiplicities, contradictions, and gaps of Asian American identifications and politics. Students
will learn to critically think about Asian
American identification in the wider contexts of
orientalism, U.S. imperialism and nationalism,
racialization and racism, state governmentality,
and political ecology. The course will focus on
shaping ecological relationships as well as eco-
nomic behavior. Students may register for either
ANTH 234 or ES 234 and credit will be granted
accordingly.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ANTH 238 The Vulnerable Body:
Anthropological Understandings
Karakasidou
NOT OFFERED IN 2006-07. This course begins
with the assumption that the human body is a
unit upon which collective categories are
engraved. These categories can vary from social
values, to religious beliefs, to feelings of national
belonging, to standards of sexuality and beauty.
Readings in this course will concentrate around
the classic and recent attempts in the social and
temporal history to develop ways of under-
standing this phenomenon of "embodiment.
We will begin with an overview of what is con-
sidered to be the "construction" of the human
body in various societies and investigate how the
body has been observed, experienced, classified,
modified, and sacralized in different social
forms.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 242 "Civilization" and "Barbarism"
during the Bronze Age, 3500-2000 B.C.
Kohl
NOT OFFERED IN 2006-07. A review of the
earliest emergence of state-stratified societies in
the Old World (Pharaonic Egypt, Mesopotamia,
the Indus Valley, and China) and their
integration through trade, conflict, migrations,
and diffusion of technologies, particularly met-
allurgy, with neighboring itinerate societies on
their peripheries. The course concludes with a
comparison of core-periphery relations in
pre-Columbian Mesoamerica and Peru.
Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 278 Cultures of Capitalism
Chu
What is "capitalism"? Is it a penetrating force? A
social process? A world system? Or a narrative
people tell about themselves and Others? Is there
only one kind of capitalism? Are there alterna-
tives to it? This course will examine the above
questions by drawing centrally on 1) anthropo-
logical theories of value and knowledge produc-
tion; and 2) ethnographic studies of exchange,
money, neoliberalism, post-socialism, corporate
and consumer cultures, transnational migration,
racial economies and globalization. The course
will also familiarize students with key social the-
ories of capitalism which have been influential
in anthropology (e.g. Marxism, feminist theory,
post-structuralism). Ultimately, students will
learn to critically think about "capitalism" by
exploring how it is imagined, lived, contested
and repackaged in divergent and often intercon-
ected cultural settings.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0
ANTH 300 Ethnographic Methods and Ethnographic Writing
Mega
An exploration of anthropological research and writing through the analytical and practical study of "fieldwork" and "ethnography." Examines a variety of anthropological research methods and genres of representation paying particular attention to questions of knowledge, location, evidence, ethics, power, translation, experience, and the way theoretical problems can be framed in terms of ethnographic research. Students will be asked to apply critical knowledge in a fieldwork project of their own design.
Prerequisite: 301 or two 200-level units in anthropology, economics, history, political science, or sociology, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring  Unit: 1.0

ANTH 301 History and Theory in Anthropology
Karakasidou
This course introduces students to contemporary anthropology by tracing its historical development and its specific application in ethnographic writing. It examines the social context in which each selected model or "paradigm" took hold and the extent of cognitive sharing, by either intellectual borrowing or breakthrough. The development of contemporary theory will be examined both as internal to the discipline and as a response to changing intellectual climates and social milieu. The course will focus on each theory in action, as the theoretical principles and methods apply to ethnographic case studies.
Prerequisite: Two 200-level units in anthropology, economics, history, political science, or sociology, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall  Unit: 1.0

ANTH 308 Seminar for Materials Research in Archaeology and Ethnology
Lechman (at MIT)
Seminar laboratory subject offered at MIT by the Center for Materials Research in Archaeology and Ethnology. Role of materials and technologies in the development of ancient societies; major focus on scientific analysis of archaeological artifacts and eclectics.
Prerequisite: Permission of instructor.
Distribution: Natural and Physical Science
Semester: Fall, Spring  Unit: 1.0

ANTH 319 Nationalism, Politics, and the Use of the Remote Past
Kohl
NOT OFFERED IN 2006-07. This seminar critically examines the use of prehistory and antiquity for the construction of accounts of national origins, historical claims to specific territories, or the biased assessment of specific peoples. The course begins with an examination of the phenomenon of nationalism and the historically recent emergence of contemporary nation-states. It then proceeds comparatively, selectively examining politically motivated appropriations of the remote past that either were popular earlier in this century or have ongoing relevance for some of the ethnic conflicts raging throughout the world today. The course will attempt to develop criteria for distinguishing credible and acceptable reconstructions of the past from those that are unbelievable and/or dangerous.
Prerequisite: One 200-level unit in anthropology, economics, political science, sociology, or permission of instructor.
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O  Unit: 1.0

ANTH 340 Gendered Violations
Merry, Stein (Center for Research on Women)
NOT OFFERED IN 2006-07. This course joins an anthropological perspective on the construction of gender with an analysis of the forms of intervention which have developed to confront and change gendered violations of women. The course will focus on domestic violence, sexual assault, and sexual harassment and their relationship to the cultural construction of masculinity and femininity in various cultural contexts. The course is experimental in combining social science research and analysis with questions about policy making and intervention into this problem, focusing particularly on the use of law and education.
Prerequisite: Two 200-level units in anthropology, economics, history, political science, or sociology, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O  Unit: 1.0

ANTH 344 The Middle East: Anthropological Perspectives
Kohl
This course discusses traditional subsistence economies (e.g., irrigation agriculture, pastoral nomadism) and tribal forms of social organization and analyzes their transform with the emergence of independent territorial nation-states and the advent of oil wealth during the twentieth century. The course considers different sects and expressions of Islam in specific countries and discusses kinship structures and family relations including the varying roles of women in specific societies. Contemporary political and economic issues and conflicts in Afghanistan, Iran, Turkey, Iraq, and Israel/Palestine will be studied from an anthropologically informed perspective of cultural continuity and change and the continuous refashioning of religious, ethnic, and national identities over time.
Prerequisite: Normally open to students who have taken a grade II unit in anthropology and/or a grade II unit in a relevant area/subject matter. Not open to students who have taken [ANTH 244].
Distribution: Social and Behavioral Analysis
Semester: Spring  Unit: 1.0

ANTH 350 Research or Individual Study
Prerequisite: Open by permission of instructor to juniors and seniors.
Distribution: None
Semester: Fall, Spring  Unit: 1.0

ANTH 350H Research or Individual Study
Prerequisite: Open by permission of instructor to juniors and seniors.
Distribution: None
Semester: Fall, Spring  Unit: 0.5

ANTH 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring  Unit: 1.0

ANTH 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring  Unit: 1.0

Directions for Election
A major in anthropology consists of a minimum of eight units (which may include courses from MIT's anthropology offerings), of which 104, 300 and 301 are required. Students may also elect other relevant statistics or calculus courses, depending on the particular need and interest of the student. Majors are encouraged to take other courses that have a cultural or multicultural focus.

A minor in anthropology consists of five units: 104, two 200-level courses, and two 300-level courses. Students minoring in anthropology are encouraged to choose at least one ethnographic area course and at least one course which focuses on a particular theoretical problem.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.
Architecture

AN INTERDEPARTMENTAL MAJOR

Director: McGibbon (Studio Art), Tohme (Art History)

A major in architecture offers the opportunity for study of architectural history and practice through an interdisciplinary program. Following the ancient Roman architect Vitruvius' advice on the education of the architect, the program encourages students to familiarize themselves with a broad range of subjects in the humanities, sciences, and social sciences. Students may also elect courses in studio art, mathematics, and physics which lead to appreciation of the principles of design and the fundamental techniques of architecture.

Although courses at MIT are not required for the major, the MIT-Wellesley exchange provides a unique opportunity for students to elect advanced courses in design and construction. Students are also encouraged to consider travel or study abroad as important aspects of their education in architecture, and to take advantage of the wide resources of the College and the Department of Art in pursuing their projects.

Each student designs her program of study individually in consultation with the directors. Majors are required to take ARTH 100-101 and ARTS 105. In addition, four units of course work above the 100 level and two 300-level units of course work must be taken in the Department of Art. At least three of these art units (including one at the 300 level) must be taken at Wellesley College. In extraordinary circumstances, students who meet the college's eligibility requirements for honors may, with the permission of the co-directors, elect 360/370 independent work as a path to honors. This is the program's only path to honors.

Students may include selections from the list below in their core programs.

ARCH 301 Introduction to AutoCAD 2006
Loruss (Physical Plant Administration)

This is an introductory course in the use of computer aided design and drafting techniques. The focus will be to provide students with a basic knowledge of AutoCAD 2006 and its applications in architecture and design.

Prerequisite: ARTS 105, plus two 200 level courses in either architectural history, drawing, or design, or MIT studio (at least one of these must be a studio art course). Preference to architecture majors.

Distribution: None
Semester: Winter/session
Unit: 0.5

The Department of Art offers majors in the history of art and studio art as well as minors in the history of art and studio art. It is also possible to double major in studio art and the history of art.

The art department encourages students to explore opportunities for study abroad. For further information on study abroad programs, please see your advisor as well as the Office for International Studies.

Students with disabilities who will be taking art courses and need disability-related classroom or testing accommodations are encouraged to meet with the department chair to make arrangements.

History of Art

ARTH 100 Introduction to the History of Art Part I: Ancient and Medieval Art

Staff
A broad multicultural survey of the art of the Ancient and Medieval worlds. The course focuses upon major monuments and masterpieces, including the Egyptian pyramids, the temples and sculptures of Greece and Rome, the Buddhist shrines of India, the painted scrolls of China and Japan, the mosques of the Islamic Near East, and the Gothic cathedrals of Europe. Two lectures and one conference per week.

Conferences emphasize the interpretation of original works of art, and offer hands-on sampling of historical materials and techniques.

Required course for all art history, architecture, and studio art majors, who should plan to elect both ARTH 100 and 101 in their first or second year at Wellesley.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 100/WRIT 125 Introduction to the History of Art Part I: Ancient and Medieval Art Bedell, Rhodes

See description for ARTH 100 above. Students in this section of ARTH 100 will attend the same twice-weekly lectures as the other ARTH 100 students, but their assignments will be different, and they will attend two special WRIT 125 conferences each week instead of the regular ARTH 100 conferences. Through writing about art, students in 100/125 will develop skills in visual and critical analysis. Enrolling in this course automatically enrolls one in ARTH 100. There is no need to register separately for either ARTH 100 or an ARTH 100 conference. This course satisfies the WRIT 125 requirement and counts as a unit towards a major in art history, architecture, or studio art.

Prerequisite: None. Open only to first-year students.
Distribution: Arts, Music, Theatre, Film and Video
Semester: Fall
Unit: 1.0

ARTH 101 Introduction to the History of Art Part II: Renaissance to the Present

Staff
A foundation course in the history of art from Michelangelo to media culture. This course introduces the visual cultures of Europe, Africa, and the Americas beginning with the Renaissance, using key issues and monuments as the focus of discussion. Two lectures and one conference per week. Weekly conferences emphasize observational and analytical skills and are normally given in the Davis Museum and Cultural Center. Required course for all art history, architecture, studio art, and media arts and sciences majors, who should plan to elect both ARTH 100 and 101 in their first or second year at Wellesley.

Prerequisite: ARTH 100 and 101 can be selected separately, but students are advised to elect 100 before 101.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 101/WRIT 125 Introduction to the History of Art Part II: Renaissance to the Present Rhodes

See description for ARTH 101 above. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 101 students, but their assignments will be different, and they will attend two special WRIT 125 conferences each week. Through writing about art, students in 101/125 will develop skills in visual and critical analysis. This course satisfies the WRIT 125 requirement and counts as a unit towards a major in art history, architecture, studio art, and media arts and sciences.

Prerequisite: None. Open only to first-year students.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring

Unit: 1.0

ARTH 201 The Art and Architecture of the High Middle Ages in Europe

Tohme

This course presents a selective survey of art and architecture in Western Europe from the second half of the eleventh to the middle of the fourteenth century. Focusing on France, Northern Spain, and Italy, it examines how both architecture and the figurals arts functioned in the religious, political, and domestic life of the High Middle Ages. Topics such as monasticism, pilgrimage, monstrosity, portraiture, the relationship between art and liturgy, dynastic
politics, as well as female mysticism, will be considered. In addition, particular emphasis will be placed on Christian Europe's interaction with other cultures including Byzantium and Islam. Normally offered in alternate years.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

**ARTH 205 Breaking Boundaries: The Arts of Mexico and the United States**

*Bedell, Oles*

An artificial boundary has long divided the art histories of Mexico and the United States, placing them in separate textbooks, classes, and exhibits. This lecture course breaks that model. We will compare and contrast the arts of these two nations, beginning with the independence movements of the eighteenth century and ending with the rise of modernism in the 1950s. Topics include representations of native peoples, responses to the machine age, and the battle of women artists like Frida Kahlo and Georgia O'Keeffe for a respected place in the art world.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

**ARTH 209/AFR 209 Topics in West African Art**

*Hycalthe*

**Topic for 2006-07: West African Photography**

This course will look at the emergence of West African photography in the mid-nineteenth century initially as a medium used by Europeans during the colonialist era and subsequently employed by West Africans themselves as a medium of self-definition and liberation. A wide range of examples will be examined, including: nineteenth-century African studio photography in Sierra Leone; the mid-twentieth-century work of Malian, Seydou Keita; photographs in important visual cultural outlets like the *Nigerian Drum Magazine*; and works by contemporary African photographers such as Ousmane Ndiaye Dago of Senegal. The political and stylistic aspects of portraiture, documentary, ethnography, pop and abstraction will be important to our discussion of the medium. Students may register for either ARTH 209 or AFR 209 and credit will be granted accordingly.

Prerequisite: ARTH 101 or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

**ARTH 219 Nineteenth-Century Arts from the French Revolution to Impressionism**

*Ganz, Blythe*

A lecture course on art in France from the upheavals of the 1789 Revolution and the legacy of the Enlightenment, through Impressionism's challenge to canonical art practices, concluding with the radical *fin-de-siècle* movements and their implications for the development of modern art. This course will consider painting, sculpture, prints and photography in relation to notions of nationalism and history, the avant-garde and revolutionary politics, popular and elite culture, women painters and gendering of representation, as well as how French painting's indebtedness to international cultural traditions and its engagement with colonial discourse.

Prerequisite: None. ARTH 100 and 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

**ARTH 221 Seventeenth-Century Dutch and Flemish Painting**

*Carroll*

**NOT OFFERED IN 2006-07. The course focuses on Flemish artists painting for the Baroque courts of Europe (Rubens and Van Dyck) and on Dutch artists painting during the Golden Age of the Dutch Republic (Rembrandt, Vermeer, Ruisdael). Normally offered in alternate years.**

Prerequisite: ARTH 101 or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**ARTH 223 Arts of France: The Age of Marie Antoinette**

*Delorne*

**NOT OFFERED IN 2006-07. See EXP 235 for fall 2006.**

Prerequisite: ARTH 100 and 101 recommended. No knowledge of French is required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**ARTH 224 Modern Art to 1945**

*Berman*

**NOT OFFERED IN 2006-07. A survey of modern art from the 1880s to World War II, examining the major movements of the historical avant-garde (such as cubism, expressionism, dada, and surrealism) as well as alternate practices. Painting, sculpture, photography, cinema, and the functional arts will be discussed, and critical issues, including the art market, and gender, national, and cultural identities, will be examined. Normally offered in alternate years.**

Prerequisite: None. ARTH 100 and 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**ARTH 225 Modern Art Since 1945**

*Hycalthe*

A survey of art since World War II, examining painting, sculpture, photography, performance, video, film, conceptual practices, and the mass media. Critical issues to be examined include the art market, feminist art practices, the politics of identity, and artistic freedom and censorship. Normally offered in alternate years.

Prerequisite: None. ARTH 100 and 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

**ARTH 226 History of Photography: From Invention to Advertising Age**

*Berman*

**NOT OFFERED IN 2006-07. Photography is so much a part of our private and public lives, and it plays such an influential role in our environment, that we often forget to examine its aesthetics, meanings, and histories. This course provides an introduction to these analyses by examining the history of photography from the 1830s to the present. Considering fine arts and mass media practices, the class will examine the works of individual practitioners as well as the emergence of technologies, aesthetic directions, markets, and meanings. Normally offered in alternate years.**

Prerequisite: None. ARTH 100 and 101 strongly recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**ARTH 228 Nineteenth- and Twentieth-Century Architecture**

*Friedman*

**NOT OFFERED IN 2006-07. OFFERED IN 2007-08. A survey of the major movements in architecture in Europe and the United States from neoclassicism to the present.**

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O. Offered in 2007-08.
Unit: 1.0

**ARTH 230 Frank Lloyd Wright and the American Home**

*Friedman*

An investigation of Wright's domestic architecture in its cultural and historical context. Normally offered in alternate years.

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

**ARTH 231 Architecture in North America**

**NOT OFFERED IN 2006-07. A survey of American architecture and urbanism from the colonial period to the 1960s.**

Prerequisite: ARTH 101 or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**ARTH 232 American Painting**

*Bedell*

**NOT OFFERED IN 2006-07. OFFERED IN 2007-08. A survey of American art from the Colonial period to World War II.**

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O. Offered in 2007-08.
Unit: 1.0

**ARTH 233 Domestic Architecture and Daily Life**

*Friedman*

**NOT OFFERED IN 2006-07. A survey of European and American houses, their design and use from the late Middle Ages to the present. Economic and social conditions will be stressed, with particular attention to changes in family structure and the role of women. The use of rooms and furnishings will also be discussed.**

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0
ARTh 235 Landscape and Garden Architecture
Ferguson
A study of the major formal and ideological developments in landscape and garden architecture from the Renaissance to the present day, with particular emphasis on the nineteenth and twentieth centuries. Visits to local landscapes and gardens.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTh 236 Art, Architecture, and Culture in the Ancient Americas
Oles
NOT OFFERED IN 2006-07. Before the arrival of the Europeans in the late fifteenth century, several brilliant civilizations emerged in North and South America, including the Maya, Aztec, Moche, and Inca. Incorporating the tools of art history, cultural studies, and archaeology, this course explores the visual culture of these pre-Conquest peoples. Lectures that introduce the broader aspects of each civilization will be accompanied by workshops that explore cutting-edge issues. We will also work extensively with objects on display in the Davis Museum. Normally offered in alternate years.
Prerequisite: None. Not open to students who have taken this course as ARTh 238.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 237 Art, Architecture, and Culture in Post-Conquest Mexico
Oles
NOT OFFERED IN 2006-07. A survey of visual culture in Mexico from the Spanish conquest in the 1520s to current developments in contemporary art. Against a rich spectrum of historical events, we will examine key works of art and architecture, from colonial manuscripts to Frida Kahlo's self-portraits to recent videos, focusing on how art has served to build a sense of cultural or national identity. Specific topics to be addressed include the construction of race and gender, official patronage of public art, and the myths that have shaped, and continue to shape, what it means to be "Mexican." Normally offered in alternate years.
Prerequisite: None. Not open to students who have taken this course as ARTh 238.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 240 Asian Art
Liu
NOT OFFERED IN 2006-07. This course surveys the major artistic traditions of Asia from prehistory to the turn of the twentieth century in India, Southeast Asia, Tibet, China, Korea and Japan. It will study monuments with emphasis on the way in which artistic creativity and style are tied to religion, philosophy, social and political change, and other historical contexts. Trips to the Boston Museum of Fine Arts and the Harvard Sachsler Museum. Normally offered in alternate years.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 241 Egyptian Art
Freel
NOT OFFERED IN 2006-07. The greater Nile Valley has yielded some of the world's most ancient and compelling monuments. In this course we will survey the art and architecture of ancient Egypt and Nubia from Neolithic times (c. 6000 B.C.) through the Roman period (c. second century A.D.). Emphasis will be placed on objects in the Egyptian collection of the Museum of Fine Arts, Boston, and one class session per month will meet in the Museum. Normally offered in alternate years.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 242 Life, Love, and Art in Ancient Greece
Marvin
NOT OFFERED IN 2006-07. Greek art did more than just initiate the Western artistic tradition. It reflects a paradoxical society that prized freedom, inspired western democracy, invented philosophy, held slaves, degraded women, and institutionalized pedophilia. We will look at the historical development of Greek sculpture and painting - what they meant to the people who made them, and to the later centuries that prized them. Repeated trips to the Boston Museum of Fine Arts. Normally offered in alternate years.
Prerequisite: One unit of ARTh or CLCV
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 243 Roman Art and the Roman Empire
Marvin
Although created by force, and composed of peoples sharing neither language, culture, nor religion, the Roman Empire remained stable for centuries. One of the tools Rome used to bind her subjects together was an official art, a language of power. Standard architecture, sculpture, painting, luxury arts, even fine tableware, united every city in the Empire. We will examine the development of that visual language and how it was deployed as an agent of imperial power. Repeated visits to the Museum of Fine Arts. Normally offered in alternate years
Prerequisite: Open to sophomores, juniors, and seniors by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTh 247 Islamic Art and Architecture
Tate
NOT OFFERED IN 2006-07. This course offers an introduction to the history of Islamic art and architecture from the seventh century to the nineteenth century. The course will address such themes as stylistic change, figural representation, sacred space, and ornament within contemporary political, religious, and social context. Normally offered in alternate years.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 248 Chinese Painting
Liu
NOT OFFERED IN 2006-07. Chinese painting is the only tradition in world art that can rival the European painting tradition in the quantity and diversity of its output, the number of recorded artists of note, the complexity of aesthetic issues attached to it, and the sophistication of the written literature that accompanies it through the centuries. This course will examine Chinese painting from early times to the turn of the twentieth century with an introduction to traditional connoisseurship. Issues to be considered include major themes, styles, and functions of Chinese painting. Special attention will be given to: imperial patronage; the relationship between painting, calligraphy, and poetry; amateurism versus professionalism; gender in painting; and the tension between tradition and creativity. Trip to the Boston Museum of Fine Arts. Normally offered in alternate years.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 249 Arts of Japan
Maeda
A survey course of arts of Japan, from the prehistoric period to the present. The course will focus on selected artworks from wide range of media, including painting, calligraphy, sculpture, architecture, prints, ceramics, and photography. Issues will include Buddhism, tea aesthetics, urbanism and popular culture, war experience, and cultural otherness. We will visit the Museum of Fine Arts, Boston, and Wellesley's Japanese print collection at Davis Museum and Cultural Center.
Prerequisite: None. ARTh 100 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTh 250H Research or Individual Study
Prerequisite: ARTh 100 or ARTh 101 or permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ARTh 251 Italian Renaissance Art and Architecture, 1400-1520
Knaap
The course will consider the painting, sculpture, and architecture produced in Italy from ca. 1350 to 1550. Works of art will be considered in the context of painting theory, studies of antiquity and classical texts, and the gradual articulation of the painter as an intellectual rather than a craftsman. Humanist courts -- in Urbino, Mantua, Milan, etc., -- and ecclesiastical concerns -- the papacy in Rome -- will offer the opportunity to study the patronage of the arts and the art itself as an expression of political identities and ideologies.
Prerequisite: ARTh 100 or 101 or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTh 252 Painting for Princes(se): Late Medieval Painting and Manuscript Illumination in France and Italy
Armstrong
NOT OFFERED IN 2006-07.
Prerequisite: None. ARTh 100 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTh 253 The Beautiful Book: Medieval and Renaissance Book Illumination
Armstrong
NOT OFFERED IN 2006-07.
Prerequisite: None. ARTh 100 or 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0
ARTH 255 Twentieth-Century Chinese Art
Lyu
NOT OFFERED IN 2006-07.
Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTH 257 Modern American Architecture and Urbanism after World War II
Goldhagen
This course analyzes developments in post-World War II American architecture and urbanism. We will examine topics such as the transformation of prewar modernism, the emerging Bay Region style, experiments in mass production inspired by technologies and products developed by the military during World War II, and critiques of modernist architecture and urbanism in the work of Louis Kahn, Paul Rudolph, Robert Venturi and Denise Scott Brown, and others. Students will visit and study Boston area buildings that offer major examples of postwar architecture and urban thought.
Prerequisite: ARTH 100 or 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 267 Cross-Cultural Encounters in the Early Medieval Mediterranean
Tobin
This course focuses on the visual and material culture (architecture, art, everyday objects) of the various cultures of the Mediterranean and explores specific sites of interaction around the Mediterranean, such as the Early Islamic Levant, Norman Sicily, Byzantine North Africa, Islamic Spain, and Crusader Palestine. Normally offered in alternate years.
Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 291 Persuasive Images
Berman
NOT OFFERED IN 2006-07. OFFERED IN 2005-06.
Visual images have always been enlisted to influence individual and collective decision-making, action, and identity. However, the rise of the mass media in the nineteenth century, and the multiplication of visual technologies in the twentieth century, have created unprecedented opportunities for the diffusion of persuasive images. This course examines the uses and functions of visual images in advertising and propaganda and considers, in particular, graphic arts, photography, film, and other reproductive media. It also considers the interplay between elite and popular arts. The goal of the course is to refine our critical understanding and reception of the visual world.
Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O. Offered in 2005-06.
Unit: 1.0

ARTH 304 Seminar. Leonardo da Vinci, Michelangelo Buonarroti, and Raphael Sanzio
Armstrong
Leonardo da Vinci, Michelangelo, and Raphael were critical in defining the style known as the “High Renaissance” in Italy, 1490 to 1520. Leonardo created supremely beautiful paintings (Virgin of the Rocks; Mona Lisa), and fascinating drawings of anatomy, architecture, and horses. Michelangelo was a sculptor (David; Pietà) and painter (Sistine Ceiling), and also an architect (Medici Chapel; St. Peter’s) and poet, writing deeply moving poems. Raphael executed ambitious murals for the Popes (School of Athens) and many portraits and devotional panels (Madonna of the Goldfinch; Sistine Madonna). The seminar will investigate multiple facets of these geniuses’ creations and some of the myths about their lives.
Prerequisites: Open to students who have taken one unit in Medieval, Renaissance, or Baroque art, history, or literature; or who have taken two units of art history at the 200-level. Medieval/Renaissance studies majors and architecture majors are encouraged to enroll. Permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 309 Seminar. Problems in Architectural History
Friedman
Topic for 2006-07, “The Villa.” This seminar will examine the architecture, history, and literature of the villa, country house, and vacation home from antiquity to the present. European and American examples will be studied through in-depth case histories, with an emphasis on the social and cultural history of the type in various historical contexts.
Prerequisites: ARTH 228, or ARTH 229, or ARTH 231, or by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 310 Renaissance Architecture, Material Culture, and Urban Form
Friedman
NOT OFFERED IN 2006-07. Architecture, Cities, and Daily Life in Renaissance Italy. This seminar will examine architecture, urban form, and material culture in fifteenth and sixteenth century Italy, with particular attention to the design and use of palaces, city squares, villas, and gardens. Ceremonies and ritual associated with the daily lives of women and men of various classes will be studied, using original texts, pictorial evidence, materials culture, and detailed analysis of built form.
Prerequisite: ARTH 229 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTH 316/AFR 316 Contemporary African Exibitions
Hyacinth
The ground-breaking Short Century: Independence and Liberation Movements in African 1945-1994, curated by Okwui Enwezor and his team of African scholars, was influential in framing how modern/postmodern African art would be contextualized in museums and galleries in the new millennium. How might we view this exhibition in relation to preceding, contemporaneous and subsequent large-scale African exhibitions? Students will critique the important exhibitions of the era, develop a familiarity with the primary artists on display, and formulate a curatorial strategy for their own contemporary African art show. Students may register for either ARTH 316 or AFR 316 and credit will be granted accordingly.
Prerequisite: ARTH 101, 209, or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 320 Seminar: American Architecture
Goldhagen
Topic for 2006-07: The Architecture and Urbanism of Louis Kahn. A large number of contemporary architects name Louis Kahn as the postwar practitioner whose work they most admire yet outside the profession, Kahn’s architecture and urbanism is not well known. This seminar offers an in-depth, chronological introduction to Kahn’s built and unbuilt projects and to his architectural and urban theories, beginning with his Depression-era work in public housing to his late civic projects such as the Library at the Phillips Exeter Academy and the British Art Museum in New Haven.
Prerequisite: ARTH 100 or 101 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 330 Seminar. Venetian Renaissance Art
Armstrong
NOT OFFERED IN 2006-07.
Prerequisites: Open to students who have taken one unit in Medieval or Renaissance art, architecture, history or literature, or who have completed two units of art history at the 200-level; or permission of instructor required. Architecture, Medieval and Renaissance studies majors must be major in the department.
Prerequisite: ARTH 101 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTH 331 Seminar. The Art of Early Modern Europe
Carroll
Topic for 2006-07: Virtue, Vice and Violence: Erotic Themes in Early Modern Art. Love, marriage, prostitution, rape, sodomy, incest; these were themes addressed by some of the most ambitious artists in the fifteenth through seventeenth centuries. The class will examine how, in registering a burgeoning sense of erotic possibility (and anxiety) these artists challenged and transformed the realist tradition in western art. Special attention will be paid to Botticelli, Titian, Caravaggio and Artemisia Gentileschi in Italy; to Bosch, Düer, Rubens, and Rembrandt in northern Europe.
Prerequisite: ARTH 101 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 332 Topics in Medieval Art
Tobin
Topic for 2006-07: Toledo: The Convergence of Medieval Cultures. Toledo is arguably one of the most important cities in the medieval world. Between the fifth and the sixteenth centuries it was the capital of the Visigoths, the intellectual center of the Islamic Caliphate, and the capital of Christian Spain. This seminar examines the medieval heritage of Toledo by focusing on its Visigothic, Islamic, Mudejar as well as Gothic architecture, and how this architecture has shaped the modern city.
Prerequisite: At least one of the following: ARTH 100, 201, 247, 267, or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 335 Seminar. Topics in Modern Art
Rhodes
Topic for 2006-07: Picasso, Stein and Company. Pablo Picasso and Gertrude Stein as foci for an examination of the arts in Paris, circa 1900-
1920: painting, sculpture, literature, music, and dance. Other major figures include Léger, the Delaunays, Brancusi, Apollinaire, Debussy, Satie, Stravinsky, Diaghilev, and Nijinsky. Difficulty is a hallmark of modernity in the arts. This course seeks to develop skills and pleasures in the interpretation and evaluation of notoriously difficult works such as Stein's Tender Buttons, Stravinsky's Rite of Spring, and Picasso's Analytical Cubist oeuvre.

Prerequisite: ARTH 101 or other art history course covering the period; permission of the instructor is also required. Preference will be given to seniors; non-majors are welcome.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTH 336 Seminar. Museum Issues Mickenberg
Topic for 2006-07: Museums: Power, Politics and Ethics. If museums were once considered cultural oases, their recent history indicates a very different identity. Changes in the history of art, redefinitions of community, new technologies, ethical controversies, a restructuring of global wealth, and a new generation of scholars, patrons, collectors, and directors have presented museums with exceptional challenges. In turn, the changing identities of museums have helped to shape these issues. This course will examine the history of museums in the light of these concerns, focusing on museum ethics, changing modes of interpreting the object, funding, and issues of political and personal identity and memory, all seen through an examination of case studies and a final project involving the acquisition of a work for the Davis Museum and Cultural Center collection.
Prerequisite: ARTH 100 or 101 or permission of instructor required. Preference given to junior and senior art majors.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 337 Seminar. Northern Song Imperial Patronage and Painting Academy Liu
NOT OFFERED IN 2006-07. Northern Song Painting Academy as an imperial institution was the first of its kind in the history of world art. This seminar investigates the nature of imperial patronage of painting and the achievements of the Painting Academy. It explores the relationship between emperors and academy painters through close reading of the painters' biographies written by Song contemporaries (in translation), examines the mobility of academy painters, and attempts to identify how exactly imperial commissions were initiated and carried out. Special attention is given to various interpretative modes of primary sources.
Prerequisite: ARTH 100 or 240 or 248 or permission of instructor required. Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTH 338 Seminar. Topics in Latin American Art Oles
Topic for 2006-07: Imagining Mexico and the Border in the Twentieth Century. This seminar explores how Mexico and the U.S.-Mexican border have been represented in films made in the US as well as in Mexico. From the earliest mov- ing pictures of Mexico (produced by Thomas Alva Edison in 1898) to recent Hollywood productions, certain themes are repeated and transformed: idealized images of the peasant and traditional culture; revolution, bandits, and violence; and the moral and social complexity of the border region. Though the course covers the entire century, we will focus on films from the 1930s through the 1950s including Bordertown (1934) starring Paul Muni and Bette Davis; Maria Caudelaria (1944) with Dolores del Rio; and Zapata (1950) with Marlon Brando, often comparing a U.S. and Mexican film in the same week. We will also consider how positions on race, gender, and national identity are negotiated in the movies.
Prerequisite: Permission of instructor required
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 342 Seminar. Domesticity and Its Discontents Carroll
NOT OFFERED IN 2006-07. This class will study changing representations of the family and the home from the late Middle Ages through the present. The first part of the course will focus on paintings of family life and domestic interiors from the fifteenth through the eighteenth centuries. The second part will focus on the analysis of films that take up domestic themes. Normally offered in alternate years.
Prerequisite: ARTH 101 or permission of instructor required. Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTH 345 Seminar. Methods of Art History Knapp
What are the ways in which art has been defined, evaluated, theorized, and researched? What assumptions underlie the discipline of art history? This seminar provides a survey of all major approaches to the critical understanding of visual art. These include connoisseurship, iconography, Marxism, psychoanalysis, semiotics, gender and ethnicity studies, and cultural studies. Critical reading and intensive class discussion will be emphasized.
Prerequisite: Permission of instructor required
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 348 Seminar. Topics in Architecture Geldhagen
Topic for 2006-07: Approaches to Architecture and Planning. This seminar analyzes theories of architecture and urban design from 1900 to the present.
Prerequisite: ARTH 100 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 349 Seminar. Visual Culture of Modern Japan (1850-1950) Maea
This course examines the visual culture of modern Japan and its relationship with other Asian, European, and American cultures from 1850 to 1890. Japanese artists and architects increasingly adopted the visual cultures of other nations, as in nihonbana (literally "Japanese painting") and yozu (literally "Western painting"). In turn, artists and architects of other nations drew from Japanese visual culture, as in Japonisme in France, the Lingnan School of painting in China, Victorian decorative design, and Frank Lloyd Wright's architecture. By investigating art movements within and beyond Japan, this course will consider the notion of national, regional and global art, vis-a-vis Japanese visual culture. We will also explore the means of interchange of visual culture, such as world expositions, tourism, art market, and the presence of foreign employees.
Prerequisite: ARTH 100, 240, 249 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 350 Research or Individual Study
Prerequisite: ARTH 100 and ARTH 101 or permission of instructor required.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTH 350H Research or Individual Study
Prerequisite: ARTH 100 and ARTH 101 or permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ARTH 360 Senior Thesis Research
Prerequisite: By permission of the department. See Academic Distinctions. Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTH 364 Women Filmmakers: History and Theory of Subversion Mekuria
A survey of the history of women making films and an exploration of the issues of representation using films directed by women from around the world. We will review the history and emergence of women/feminist filmmakers and examine the impact of feminism and feminist film theory on women filmmakers in particular, and the film industry in general. Required activities include weekly screenings of films, written analytical reports, and classroom presentations.
Prerequisite: One of the following courses: ARTH 224, 225, 226, or WGST 120 or 222; or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0
Studio Art

A student registered for a studio art course must attend the first class meeting in order to retain her spot in the course. Due to the hands-on nature of studio-based instruction, enrollments must be limited. Note that some courses require students to file an application with the art department before preregistration.

**ARTS 105 Drawing I**

*Staff*

An introduction to the fundamentals of drawing with attention to the articulation of line, shape, form, gesture, perspective, and value. Studio work introduces a range of traditional drawing tools and observational methods while exploring a variety of approaches to image making and visual expression. In-class drawing exercises and weekly homework assignments address a range of subjects with brief attention given to the human figure.

Prerequisite: None. Open to all nonseniors. Seniors must obtain permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring

**ARTS 106 Introduction to Chinese Painting**

*Meng*

**NOT OFFERED IN 2006-07.** This course introduces the basic concepts and techniques of traditional Chinese painting. Class activities will emphasize the theoretical and aesthetic principles associated with the use of brushstroke, composition, ink, and color. Subjects include Chinese calligraphy as well as the three major categories of traditional Chinese painting: flower and bird, mountain and river, and figure painting. Weekly studio assignments introduce a range of techniques, and by the end of the term students compose their own paintings in a traditional Chinese manner.

Prerequisite: None. Open to all nonseniors. Seniors must obtain permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**ARTS 107 Book Arts Studio**

*Rogers and Ruffin (Clapp Library)*

In an interactive setting, students will gain hands-on experience in bookmaking, with emphasis on the creative possibilities of ancient craft and contemporary art. Class sessions will frequently draw on examples from Wellesley's Special Collections, providing a historical context. In the Library's Book Arts Lab, students will learn to set type by hand and print on hand presses. Students will create limited edition broadsides and artists' books that may involve use of the Knapp Media and Technology Center. Mandatory credit/no credit only.

Prerequisite: None. Permission of instructors required. File application in the department before preregistration.
Distribution: None
Semester: Spring

**ARTS 108 Photography I**

*Mandel, Black*

This introductory course explores photography as a means of visual communication by producing and analyzing photographic images. Emphasis is on acquiring basic black-and-white technical skills with 35mm cameras and traditional darkroom practices. Class discussions and studio projects address a range of technical, compositional, and aesthetic issues fundamental to imagemaking. Strong emphasis is on the development of both a technical grasp of the tools and a critical awareness of the medium through assignments and critiques.

Prerequisite: None. Permission of instructor required. File application in the department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring, Summer
Unit: 1.0

**ARTS 109 Basic Two-Dimensional Design**

*Spatz-Rabinowitz, Slavick*

This studio course focuses on the issue of composition in two-dimensional imagery. It introduces the fundamental elements of design (e.g., line, shape, value, space, color) and their function in the process of composition. Studio projects emphasize formal problem-solving skills as a means of achieving more effective visual communication. Weekly assignments given in a variety of media. This course is not digitally based, but students will have the opportunity to use digital media to solve certain problems. Recommended for those interested in pursuing any type of two-dimensional work, including painting, or photography, or Web design.

Prerequisite: None. Open to all nonseniors. Seniors must obtain permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring, Summer
Unit: 1.0

**ARTS 113 Basic Three-Dimensional Design**

*Mowbray, Dorrien*

This introductory course explores the basic formal and spatial considerations when working with three-dimensional structure and form. Studio projects incorporate a range of materials and methods of visualization. Outside assignments and class discussions are aimed towards helping students enhance their creativity and spatial awareness while acquiring sensitivity for placement, process, and materials. Strongly recommended for those interested in sculpture, architecture, installation art, and/or product design.

Prerequisite: None. Open to all nonseniors. Seniors must obtain permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

**ARTS 165 Introduction to Video Production**

*TBA*

This course introduces the students to the principles of video production with emphasis on developing basic skills of recording with a video camera, scripting, directing, and editing short videos.

Prerequisite: None. Permission of instructor required. File application in the department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

**ARTS 204 Painting Techniques**

*Spatz-Rabinowitz*

**NOT OFFERED IN 2006-07.** A survey of significant techniques and materials related to the history of Western painting. Students will do projects in gold leaf, egg tempera, Venetian oil technique (the indirect method), and the direct oil technique. They will also experiment with acrylic, encaustic, and pastel. This course gives a broad overview of the technical aspects of these media and their role in stylistic changes throughout the course of Western painting. Studio art majors are encouraged to enroll; art history and architecture majors are also welcome. Most materials provided. Studio fee $50.
ARTS 206 Chinese Painting II
Meng

NOT OFFERED IN 2006-07. This course offers students advanced training in traditional and nontraditional methods of Chinese painting. Students may choose to focus on a specific area of subject matter, such as landscape, flowers and birds, or figurative studies, and students will be encouraged to develop a personal vision using the media of Chinese painting techniques. In addition to field trips to museums and galleries, there will be lectures and demonstrations by visiting artists.
Prerequisites: ARTS 106 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 208 Photography II
Black

This course builds upon technical and aesthetic background acquired in Photography I. Students explore the medium format camera while expanding their use of the 35mm camera. Other topics include lighting equipment, advanced developing and printing processes, and initial digital photographic work. Continued strong emphasis is on the development of a personal photographic vision and a critical awareness of the medium and its history through assignments and critiques.
Prerequisite: ARTS 108 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 216 Spatial Investigations
Mckibbon

A mixed media course designed for architecture and studio art majors wishing to strengthen their visual, creative and spatial responsiveness.
Class work explores various forms of drawing in two and three dimensions, including architectural drafting, fixed viewpoint perspective, mapping, modeling, some digital work, and temporary site-built installations. Following a series of studio projects and discussions considering issues of space and place, each student produces a self-directed final project.
Prerequisite: ARTS 105
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 217 Life Drawing
Harvey

Understanding the human figure by direct observation of and drawing from the model. A highly structured approach with emphasis on finding a balance between gestural response and careful measurement. Rigorous in-class drawings as well as homework assignments. Dry and wet media as well as work on a variety of scales. Recommended for architecture majors as well as studio art students who intend to do further work from the figure.
Prerequisite: ARTS 105
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 218 Introductory Painting
Harvey, Janowitz

An introduction to the fundamental issues of painting, emphasizing color, composition, and paint manipulation through direct observation. Outside assignments, slide presentations, and class discussions aimed towards helping students gain technical skills, visual sophistication, and critical awareness. Students paint from a variety of subjects, including the self-portrait and still life.
Prerequisite: ARTS 105 or 109 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

ARTS 219 Introductory Print Methods: Lithography/Monotype
Mckibbon

An introduction to the central concepts of printmaking, using planographic printing methods such as stone and plate lithography, image transfer, and monotype. Students develop visual and creative flexibility through hands-on work with image sequences, text, and multiples. Several assignments explore color layering and some incorporate digital methods. Students participate in a collaborative print exchange in addition to completing individual projects. Normally offered in alternate years.

ARTS 219 and 220 are complementary courses addressing similar concepts but different printing techniques and may be elected in either order. Studio fee of $35.
Prerequisite: ARTS 105 or 109 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 220 Introductory Print Methods: Intaglio/Relief
Mckibbon

NOT OFFERED IN 2006-07. An introduction to the central concepts of printmaking using intaglio and relief methods such as copper-plate etching and woodcut. Students develop visual and creative flexibility through hands-on work with image sequences, text, and multiples. Several projects explore color layering and some incorporate digital methods. Students participate in a collaborative print exchange in addition to completing individual projects. Normally offered in alternate years.

ARTS 219 and 220 are complementary courses addressing similar concepts but different printing techniques and may be elected in either order. Studio fee of $35.
Prerequisite: ARTS 105 or 109 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 221 Digital Imaging
Olsen

Introduction to artistic production through electronic imaging, manipulation and output. Emphasis on expression, continuity, and sequential structuring of visuals through the integration of image, type and motion. Image output for print, screen, and adaptive surfaces are explored in conjunction with production techniques of image capture, lighting and processing. Lectures and screenings of historic and contemporary uses of technology for artistic and social application of electronic imaging.
Prerequisite: ARTS 108 or 109
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 250 Research or Individual Study
Prerequisite: Open to qualified students by permission of instructor and department chair.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTS 259H Research or Individual Study
Prerequisite: Open to qualified students by permission of instructor and department chair.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ARTS 255 Dynamic Interface Design
Olsen

Critical examination of the expanding field of information and interface design for interactive media. Emphasis will be on effective visual communication, information design and creative content within online media. Hands-on production will focus on design methods, multimedia, web, vector-based media, and dynamic audio. Screenings and discussions on contemporary practices, theoretical, artistic and cultural issues.
Prerequisite: ARTS 108 or 109, and CS 110 or 111
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 260 Moving Image Studio
Irish

NOT OFFERED IN 2006-07. Creative exploration of the moving image as it relates to digital methods of animation, video, and motion graphics. Hands-on production of audio, image, text, and time-based media synthesis, with a conceptual emphasis on nonlinear narrative, communication design and visual expression. Screenings and lectures on historical and contemporary practices, coupled with readings and discussions of the theoretical, artistic, and cultural issues in the moving image. Normally offered in alternate years.
Prerequisite: ARTS 108 or 165 or 221
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 265 Intermediate Video Production
Mekuria

NOT OFFERED IN 2006-07. An exploration of the techniques and styles of producing documentary videos. We will survey current issues surrounding objectivity and representation as it concerns the documentary form. Strong emphasis on storytelling. Special focus on lighting, sound recording, and editing. We will screen and analyze various styles of documentary films. Final projects will be short documentaries.
ARTS 307 Sculpture II

Dorrien

Continuation on a more advanced level of sculptural issues raised in ARTS 207. Projects include working from the figure, metal welding or wood construction, and metal casting in the foundry as well as stone carving. Studio fee of $50.

Prerequisite: ARTS 207 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 308 Photography III

Black

Advanced explorations of aesthetic and content issues through the use of the camera and light sensitive materials are the focus of this course. More advanced photographic techniques and equipment will be presented to solve visual problems arising from each student's work. Both traditional darkroom practices and digital printing solutions will be taught. Continued emphasis on research into the content and context of the photographic image in contemporary practice through gallery visits, guest lecturers, and library work.

Prerequisite: ARTS 108, 208, and either 109 or another 200-level studio course, or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 313 Virtual Form

Olson

Introduction to the design and production of three-dimensional objects and spaces using industry-standard modeling software. Overview of basic modeling, surface design and camera techniques. Emphasis on creative application of the media, in relation to architectural, experimental and time-based forms. Screenings and lectures on traditional and contemporary practices, coupled with readings and discussions of the theoretical, artistic and cultural issues in the virtual world. Normally offered in alternate years.

Prerequisites: ARTS 113 or MIT 4.101. Strong computer familiarity needed. Not open to students who have taken ARTS 206.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 314 Advanced Drawing

McGibbon

Aimed towards studio art and architecture majors wishing to strengthen their visual, conceptual and spatial flexibility in drawing. Building upon methods introduced in previous courses, this studio room considers drawing as a process of visual thinking as well as an art form. Class work includes observational exercises (including various systems of visual perspective), technical experimentation (including work in color), sketchbooks, critiques, and field trips. Following a period of interactive studio research, exploration and dialogue, each student completes a body of self-directed work. ARTS 314 may be repeated, ordinarily for a maximum of two semesters.

Prerequisite: ARTS 105 and either 109, 217 or MIT 4.101 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 315 Advanced Painting

Spitz-Rabinowitz

Each student will spend time exploring further the issues of color, composition, paint handling, and subject matter. In addition, students will be required to establish and develop personal imagery and an individual vocabulary. ARTS 315 may be repeated, ordinarily for a maximum of two semesters.

Prerequisite: ARTS 218 or permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 317 Seminar, Topics in the Visual Arts

Dorrien

Topic for 2006-07. Art in Space. This seminar course is designed to study and experience art in space. From Plast to site-specific to installation, or plainly as we encounter it in the streets or in unlikely spaces whether by design or intervention. Public art will be a major component in this seminar, from administration of a program, to final implementation. The leit-motif of this course is space and the way art intervenes within it and the wide spectrum of social structures. This seminar addresses all disciplines in the art department: art history, architecture, studio.

Prerequisite: All art majors may apply. By permission of instructor: please express why you wish to participate in this seminar and list courses taken in art and architecture.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 320 Architectonics and Installation

Irish

NOT OFFERED IN 2006-07. Creative intermedia collaboration within the practice in architecture, art, and design. Studio projects will emphasize the synthesis and interrelation of imaging and time-based media to spatial art forms and structures. Materials, techniques, and issues in the creation of hybrid forms, architectonics and the solution of problems. Lectures on the historic and contemporary practices of intermedia artists, designers, thinkers and scientists, coupled with readings and discussions. Normally offered in alternate years.

Prerequisite: Two 200-level courses in studio art.
Permission of instructor required. File application in department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 322 Advanced Print Concepts

McGibbon

Experimentation with mixed media uses of the graphic image, including handmade books, installed site works and collaborative print exchanges. Selected readings and discussions explore the use of multiplicity and sequence in contemporary art. Some studio projects combine digital photo processes with traditional hand print methods. Students in this course will participate in a national printmaking conference in October. Emphasis placed towards developing an individual body of work.

Prerequisite: One or more of the following: ARTS 219, 220, 221, 222, or by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 350 Research or Individual Study

Comprehensive study of an area of the student's choice. The results of this study may be presented in the form of a major project or in the form of a written thesis. The student is required to meet with an instructor for the purpose of planning the course of study.

Prerequisite: 200-level work in the field and permission of instructor required.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTS 350H Research or Individual Study

Comprehensive study of an area of the student's choice. The results of this study may be presented in the form of a major project or in the form of a written thesis. The student is required to meet with an instructor for the purpose of planning the course of study.

Prerequisite: 200-level work in the field and permission of instructor required.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ARTS 360 Senior Thesis Research

Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTS 365 Advanced Video Production

Mekuria

An intensive course in story development, writing screenplay, directing actors and technical crew, and producing short, dramatic or mixed-genre videos. Rigorous work on advanced camera operation, lighting, sound recording, and editing techniques. We will screen and analyze short films and sample screenplays. Course requires strong organizational and directorial aptitude. The final projects will be short narrative, or mixed-genre videos.

Prerequisite: ARTS 165, 265, and permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTH 369 Seminar, Materials and Techniques of Painting and Sculpture

Newman (Boston Museum of Fine Arts)

This seminar will provide an introduction to the materials and techniques used by painters and sculptors. Units on painting will focus on: ancient painting (from the earliest cave paintings through ancient Egypt and classical antiquity); wall paintings from various parts of the world, with a focus on the fresco painting technique; Western easel painting of the medieval, Renaissance, and later periods; traditional Asian paintings on silk and paper supports; and modern painting. Units on sculpture will focus on: metal and ceramics, using artifacts from many cultures and periods of time, ranging from ancient China to the Italian Renaissance and later. Modern sculptural materials, including plastics, will also be introduced.

Prerequisite: ARTH 100 or 101 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 370 Senior Thesis

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Applied Arts Program

In addition to the regular studio art curriculum, a separately funded program allows the art department to offer a series of short, noncredit workshops with visiting artist instructors. These workshops vary throughout the year but address a variety of studio topics, which have included ceramics, book arts, woodworking, pinhole photography and graphic design. These workshops are noncredit and open to all students without prerequisite. Upcoming workshops are announced throughout the year through art department electronic distribution lists and by posting on "Community," "Art" and other FirstClass® conferences. Sign-up sheets are posted in the art department.
Directions for Election

Note: For the purposes of meeting the “18 units” requirement (See Academic Program, Other Requirements or Articles of Legislation, Book I, Article I, Section 8, A), art history and studio art are considered separate departments. Courses in studio art are counted as units “outside the department” for art history majors. Courses in art history are counted as courses “outside the department” for studio art majors.

History of Art

A major in the history of art must elect:

A. ARTH 100 and 101. AP credit will not be accepted in fulfillment of this requirement.

B. One of the following courses in studio art: ARTS 105, 106, 108, 109, 113, 165, 204, 206.

C. A minimum of six further units in history of art to make a total of nine units, which must include distribution requirements. At least two of these must be 300-level courses.

For distribution, a student must elect at least one unit in four of the following six areas of specialization: Ancient, Medieval, Renaissance, Baroque (seventeenth and eighteenth centuries), Modern (nineteenth and twentieth centuries), non-Western. Among the four areas elected, one must be either before 1400 AD/CE or outside the tradition of Western art. ARTH 229 may count as Renaissance or Baroque. Normally, ARTH 233, 235, and 345 may not be used to meet this distribution requirement.

If approved by the department chair, courses elected at other institutions may be used to meet the distribution requirement. Courses from two-year colleges will not be credited to the major.

Although the department does not encourage over-specialization, by careful choice of related courses a student may plan a field of concentration emphasizing one period or area. Students interested in such a plan should consult the department as early as possible. Art majors are also encouraged to take courses in the language, culture, and history of the areas associated with their specific fields of interest.

Graduate Study

For students considering graduate study in the history of art, ARTH 345 is strongly recommended. Graduate programs in the history of Western art require students to pass exams in French and German. Graduate programs in the history of Asian art require Chinese and/or Japanese.

Art Conservation

Students interested in graduate study in the field of art conservation should consult with the department chair regarding requirements for entrance into conservation programs. Ordinarily college-level chemistry through organic should be elected, and a strong studio art background is required.

360/370 Honors Thesis

The only path towards departmental honors is the 360/370 Honors Thesis. Art history majors who meet the following requirements are encouraged to apply to the department to do an honors thesis: 3.6 GPA in the major; at least five art history units above the 100 level, four of which must be taken at Wellesley and one of which must be at the 300 level. Contact the department in the spring semester prior to the proposed honors year for information about deadlines, honors eligibility, and the selection of a thesis advisor. For further information, please consult the art department’s FirstClass® “Art” conference.

History of Art Minimum Major

Only one cross-listed course may be counted toward the minimum major. No more than one unit of 350 credit may be counted toward the minimum major. Ordinarily, no more than three units of transfer credit (one studio, two art history) may be counted toward the minimum major.

History of Art Minor

A history of art minor must elect a minimum of six units:

A. ARTH 100 and 101

B. Four additional units above the 100 level with at least two at the 300 level; maximum one unit of 350. Of the four units above the 100 level, three shall, in the opinion of the student’s faculty advisor, represent a coherent and integrated field of interest. The fourth unit shall, in the case of students whose primary field is Western European or American art, be a course in non-Western or ancient art. In the case of students whose primary field of interest is ancient or non-Western art, the fourth unit shall be Western European or American art.

Four units for credit in art history must be taken in the art department, and only one cross-listed course may be counted towards the minor.

Interdepartmental Majors

The attention of students is called to the interdepartmental majors in architecture, classical and Near Eastern archaeology, Medieval/Renaissance studies, and American studies.

Studio Art

A studio art major must elect a minimum of eleven units:

A. ARTH 100 and 101. There is no exemption from this requirement by Advanced Placement, or by IB, or by an exemption examination.

B. One additional art history course in Twentieth Century or Contemporary art

C. ARTS 105.

D. Any two of the following: ARTS 106, 108, 109, 113, or 165.

E. Five additional studio courses must be taken above the 100 level. At least two of these studio courses must be at the 300 level.

Some 300-level studio art courses may be repeated for credit in the major.

A studio art minor must elect a minimum of six units consisting of ARTS 105, one unit of either 106, 108, 109, 113, 165, plus four additional units in studio art, one of which is at the 300 level (250s and 350s excluded).

Prospective studio art majors and minors are strongly encouraged to elect 100-level art courses (including ARTH 100 and 101) during their first two years at Wellesley in order to establish a solid visual foundation and a broad understanding of the field. Studio art majors intending to study abroad should make a special effort to complete all 100-level requirements for the major prior to leaving campus during the junior year. Normally, no more than three units of transfer credit (two in studio art, one in art history) may be applied towards the minimum requirements of the major or minor. Students interested in pursuing graduate or professional work in the studio arts should elect additional course work in art history and cultural studies as well as studio art whenever possible, especially in courses that address twentieth-century art and visual culture. Since contemporary art often addresses interdisciplinary issues, students are encouraged to discuss the breadth of their overall course selections (including non-art courses) with their studio art advisor. All prospective majors and minors should obtain a copy of the art department course guide from the art office for a more comprehensive discussion of the major as well as special opportunities within the arts at Wellesley.

In tandem with the Davis Museum and Cultural Center, the art department offers numerous opportunities for students to deepen their experiential knowledge of the arts though special exhibitions, visiting artist lectures and projects, work-study positions and internships. Studio art majors and minors are strongly encouraged to exhibit their work, and to gain practical experience organizing exhibitions and installing art, in the J ewett Arts Center student galleries, Collins Café, and other venues on campus. Each year a number of professional artists visit the campus and studio art students are encouraged to take advantage of these opportunities for interaction.

360/370 Honors Thesis Project. Seniors who qualify for honors and have completed all 100-level requirements in the major may propose a senior thesis project for honors. If approved by the studio faculty as a whole, this year-long project culminates in a spring exhibition. A student interested in thesis work should discuss her ideas with a potential thesis advisor and take at least some advanced work in her proposed media concentration before the senior year.

A list of requirements for honors eligibility is available from the director of studio art. A proposal must be written and accepted. Contact the department in the spring semester prior to the proposed honors year for deadlines and information. Information is also available on the department Web page.

To waive prerequisites for such courses as ARTS 105, 108, or 109, students may present a portfolio of work to the director of studio art for assessment and placement.

History of art/studio art double major. In the case of a double major in art history and studio art, ARTH 100-101 will count in the art history major. Students must also elect additional courses at the 200 or 300 level in both art history and studio art for a total of eight (8) units of art history and eight (8) units of studio art.

Teacher Certification. Students interested in obtaining certification to teach art in the Commonwealth of Massachusetts should consult the director of studio art and the chair of the Department of Education.
Department of Astronomy

Professor: Bauer, French (Chair)
Associate Professor: McLeod
Instructor in Astronomy Laboratory: Curran, Slivan

The astronomy department offers two introductory survey courses geared to nonscience majors: 100 and 101WL. These courses are taught at a similar level and both fulfill the mathematical modeling distribution requirement. Students who elect to take both may do so in either order. Students who have a strong background in science and/or are considering a major in astronomy or astrophysics should elect ASTR 110. ASTR 109 and 206 fulfill the Quantitative Reasoning overlay course requirement.

ASTR 100 Life in the Universe
Bauer
This course investigates the origin of life on the earth and the prospects for finding life elsewhere in the cosmos, and begins with an overview of earth's place in the solar system and the universe. The course examines the early history of the earth and the development of life, changes in the sun that affect the earth, characteristics of the other objects in our solar system and their potential for supporting life, the detection of planets around stars other than the sun, and the search for extraterrestrial life. Some nighttime observing will be required. This course does not count toward a major in astronomy or astrophysics.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring
Unit: 1.0

ASTR 101WL Introduction to Stars, Galaxies, and Cosmology with Laboratory
French, McLeod
This course examines the life stories of stars, from birth in clouds of gas and dust, through placid middle age, to violent explosive demise, leaving white dwarfs, neutron stars, or black holes. It also explores the makeup and structure of galaxies, which contain billions of stars and are racing away from each other as part of the overall expansion of the universe. Finally, it presents modern cosmological models for the origin and ultimate fate of the universe. The course emphasizes the interaction of observations and the mathematical models developed from these data. Evening laboratory at the observatory.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have already taken 110.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring
Unit: 1.25

ASTR 109 Our Place in Space and Time
Slivan
This course traces the story of the quest to determine our place in space and time. Using hands-on experiments and key astronomical observations, we will measure the size and age of the earth, its distance from the sun and other stars, the location of our solar system within our galaxy, the distance to far-away galaxies, and the age and eventual fate of the expanding universe. The emphasis will be on applying quantitative reasoning skills to measure both what we know and how well we know it. Some nighttime observing will be required. This course does not count toward a major in astronomy or astrophysics. Recommended for students who have not taken ASTR 100, 101, or 110.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Spring
Unit: 1.0

ASTR 110WL Fundamentals of Astronomy with Laboratory
French
This course serves as an introduction to astronomy for students with a strong science background. The emphasis is on the physical principles that shape the universe and on the tools we exploit to learn about stars, galaxies, and cosmology. Laboratory one evening per week offers hands-on access to the telescopes. Some assignments require daytime observing outside of class.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have already taken 110.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.25

ASTR 201 Motions in the Sky: Archaeoastronomy and the Copernican Revolution
Bauer
This course examines the motions of the sun, moon, and planets in the sky and how humans have interpreted them through time. Archaeoastronomy is the study of astronomical knowledge in a culture as revealed through the archaeological record, written records, and ethnography. We will discuss the archaeoastronomy of several cultures, including the Mayans, native North Americans, and the Chinese. We will follow the beginnings of modern astronomy from the ancient Greeks through the Copernican revolution and Newton's formulation of the laws of motion. Normally offered in alternate years.
Prerequisite: Any 100-level astronomy course, and familiarity with trigonometric functions.
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.0

ASTR 203/GEOS 213 Planetary Geology
NOT OFFERED IN 2006-07 OR 2007-08. OFFERED IN 2008-09. Spacecraft observations have revealed a breathtaking diversity of geologic features in the solar system, from ancient river valleys on Mars and violent volcanic eruptions on Io to ice fountains on Enceladus and the complex surfaces of comets. From a comparative point of view, this course examines the formation and evolution of the planets and small bodies in the solar system. Topics will include: volcanism, tectonic activity, impacts, and tides. Students may register for either ASTR 203 or GEOS 213 and credit will be granted accordingly.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement and any 100-level ASTR or GEOS course.
Distribution: Natural and Physical Science
Semester: N/Cl. Offered in 2008-09.

ASTR 205 Relativity and Cosmology
Bauer
Einstein's theories of space and time have brought about a fundamental change in our conceptual understanding of the universe. Using trigonometry and algebra, this course explores special and general relativity, space travel, black holes, gravitational lensing, galaxy evolution, dark matter, and the expanding universe. Normally offered in alternate years.
Prerequisite: 101 or 110
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Spring
Unit: 1.0

ASTR 206WL Basic Astronomical Techniques with Laboratory
Slivan
This course provides an introduction to modern methods of astronomical observation. Students will learn to use the Whitin Observatory 24-inch research telescope. Topics include: planning observations, modern instrumentation, and the acquisition and quantitative analysis of astronomical images. This course requires substantial nighttime telescope use and culminates with an independent observing project.
Prerequisite: 101 or 110, and familiarity with trigonometric functions and logarithms.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.25

ASTR 301 Seminar. Topics in Multiwavelength Astronomy
Bauer
Topic for 2006-07: Stars and Binary Systems. Much of our knowledge of the universe comes from radiation outside of the visible spectrum, from low-energy radio waves that enable us to probe stellar nurseries to high-energy gamma rays that reveal the death throes of exploding stars. In between, microwaves provide decisive evidence for the Big Bang, infrared light enables us to take the temperature of distant comets, and X-rays map out seething hot gas in clusters of galaxies. This course examines current research in fields of astronomy that rely heavily on wave-lengths outside of the visible range. We will survey what has been learned about stars and binary systems from observations over the full range of the electromagnetic spectrum.
Prerequisite: Any 200-level astronomy course.
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

ASTR 311 Elements of Astrophysics
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Astrophysics is the application of physics to the study of the universe. We will use elements of mechanics, thermodynamics, electromagnetism, quantum mechanics, special relativity, and nuclear physics to investigate selected
ASTR 315 Seminar, Topics in Astrophysics
French

Topic for 2006-07: Cosmology and General Relativity
Cosmology explores the origin and fate of the universe as a whole, from the tiniest fraction of a second after the Big Bang to the unimaginably distant future. Modern observations and new physical theories reveal that our universe is accelerating as it is expanding, that space is permeated with a bizarre dark energy, and that we may live in a world of eleven dimensions. This course examines these and other cosmological contentions from a physical point of view, with an emphasis on the connections between observations and the models of the universe they inspire. The theory of General Relativity lies at the heart of modern cosmology, and the course will include an introduction to Einstein's famous Field Equation. Normally offered in alternate years.

Prerequisite: PHYS 202 and 203 (or permission of instructor for students who are taking this as a corequisite with PHYS 202).
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.0

ASTR 350 Research or Individual Study

Prerequisite: By permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ASTR 360 Senior Thesis Research

Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ASTR 370 Senior Thesis

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Related Courses

For Credit Toward the Major

MATH 216/PHYS 216 Mathematics for the Sciences II
PHYS 202 Introduction to Quantum Mechanics and Thermodynamics with Laboratory
PHYS 203 Vibrations, Waves, and Special Relativity with Laboratory

Directions for Election

The astronomy major consists of a minimum of nine courses: ASTR 101WL or 110WL; 206WL; 311; at least one of 301 or 315; PHYS 202; PHYS 203; MATH 216/PHYS 216; any additional two courses in astronomy above the 100 level. Students intending to major in astronomy are encouraged to begin physics as soon as possible, and to take ASTR 110WL rather than 101WL. PHYS 219 is strongly recommended. In planning a major program, students should note that some of these courses have prerequisites in mathematics and/or physics.

A substantial background in physics and mathematics is required for graduate study in astronomy. Students planning graduate work in astronomy should elect the astronomy major.

A minor in astronomy (five units) consists of: 101 or 110, 301, and three additional units in astronomy.

Honors
To earn honors in the major, students must have a minimum grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. The student must complete a significant research project culminating in a paper and an oral examination. The research component might be satisfied by a thesis, a summer internship, or a 350 project. See Academic Distinctions.

See description of Whitin Observatory and its equipment.

Astrophysics

AN INTERDEPARTMENTAL MAJOR

Director: French (Astronomy)
Advisory Committee: Bauer (Astronomy), French (Astronomy), McLeod (Astronomy), Stark (Physics)

The Departments of Astronomy and Physics offer an interdepartmental major in astrophysics, which combines the physics major with a foundation of course work in astronomy. This major should be considered by students interested in graduate study in astronomy or astrophysics, and by those who would like a coordinated astronomy extension to the physics major.

In addition to the nine courses required for the physics major, the student takes four astronomy courses. An astrophysics major consists of: PHYS 107, 108, 202, 203, 302, 305, 306, 314; and MATH 216/PHYS 216 as well as ASTR 101WL or 110WL, 206WL, 311, and either 315 or 350 in either astronomy or astrophysics, or ASPH 370. PHYS 219 is strongly recommended. In planning the major, students should note that some of the courses have prerequisites in mathematics.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

ASPH 350 Research or Individual Study

Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ASPH 360 Senior Thesis Research

Prerequisite: By permission of director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ASPH 370 Senior Thesis

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0
Biological Chemistry

AN INTERDEPARTMENTAL MAJOR

Director: Allen (Biological Sciences)

Biological Chemistry Advisory Committee: Allen (Biological Sciences), Elmore (Chemistry), Peterman (Biological Sciences), Wolfson (Chemistry)

The Departments of Biological Sciences and Chemistry offer an interdepartmental major in biological chemistry which provides opportunities for advanced study of the chemistry of biological systems.

In addition to two courses in biochemistry (CHEM 221 and 328), the area of concentration must include the following courses: CHEM (a) both 105 [110] and 205 [111], or 120; (b) 211; (c) 232; BISC (a) 110 or [110X]; (b) 219; (c) 220; (d) two 300-level courses from among the following: 303, 310, 313, 316, 319, 320 or a seminar course if relevant to the major and approved by the director, excluding 350, 360, 370. At least one of these two courses must be a laboratory course; PHYS 104 or 107; MATH 116, 116Z, 120 or equivalent. Senior majors are encouraged to take BIOC 340 as a capstone experience.

Students should be sure to satisfy the prerequisites for the 300-level courses in biological sciences and chemistry. Students planning graduate work in biochemistry should consider taking additional courses in chemistry, such as analytical, inorganic, and the second semesters of organic and physical chemistry. Students planning graduate work in molecular or cell biology should consider taking additional advanced biological sciences courses in those areas. Independent research (350 and/or 360/370) is highly recommended, especially for those considering graduate study.

A recommended sequence of required courses would be:

Year I, CHEM 105 and math or physics; either CHEM 205 or 211, and BISC 110

Year II, either CHEM 211 or 205, and BISC 219; BISC 220 and math or physics

Year III, CHEM 221 and math, CHEM 328 and 232

Year IV, 300-level biological sciences courses and independent study

Please discuss your program with the director as soon as possible.

BIOC 250, 250H, 350, 360 and 370 work can be advised by any faculty member of the Departments of Biological Sciences or Chemistry. Advisors for honors work can be members of either department and students should enroll in BIOC 360/370. The honors program will follow the guidelines of the appropriate department.

BIOC 250 Research or Individual Study
Prerequisite: By permission of instructor. Distribution: None Semester: Fall, Spring Unit: 1.0

BIOC 250H Research or Individual Study
Prerequisite: By permission of instructor. Distribution: None Semester: Fall, Spring Unit: 0.5

BIOC 340 Capstone Seminar in Biological Chemistry
Allen (Biological Sciences), Wolfson (Chemistry)
A capstone seminar for senior biological chemistry majors. Students will read papers related to the research of prominent scientists, who will be invited to present their work at Wellesley. Ethical issues in research will be discussed in the context of these presentations. Students engaged in research will also present and discuss their own results. Mandatory credit/noncredit.
Prerequisite: Limited to senior Biological Chemistry majors. Distribution: Natural and Physical Science Semester: Spring

BIOC 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None Semester: Fall, Spring Unit: 1.0

BIOC 360 Senior Thesis Research
Prerequisite: By permission of the department. See Academic Distinctions. Distribution: None Semester: Fall, Spring Unit: 1.0

BIOC 370 Senior Thesis
Prerequisite: 360 and permission of department. Semester: Fall, Spring Unit: 1.0

Department of Biological Sciences

Professor: Allen, Belitz, Berger-Sweeney, Buchholtz (Chair), Cameron, Harris, Peterman, Smith, Webb

Associate Professor: Moore, Rodenhouse
Assistant Professor: Ellerby, Hood-DeGrenier, Jones, Koniger, O'Donnell, Sequeira, Tetel

Visiting Assistant Professor: Chang, Demary
Lecturer: Hughes

CSMP Postdoctoral Fellow: Nguyen

Senior Instructor in Biological Sciences Laboratory: Hellyn, Leavitt, Paul, Thomas

Instructor in Biological Sciences Laboratory: Cruin, Hatopian, McDonough

Unless otherwise noted, all courses meet for two periods of lecture each week. If indicated, there will also be one three-and-one-half hour laboratory session weekly. Seminars normally meet for one double period each week.

Note: For any course that stipulates 110 and/or 111 as a prerequisite, the following courses may be used: 110, [110X], 110DL, 111, [111X], 111DL, 111T.

BISC 107 Biotechnology
Chang

This course focuses on applications of recently developed biological techniques, including recombinant DNA, antibody techniques and reproductive technology. The social and ethical issues surrounding these techniques are also discussed. No prior knowledge of biology is expected, as all necessary background information will be discussed. Two lectures weekly. Not to be counted toward the minimum major in biological sciences.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: Natural and Physical Science Semester: Fall, Summer Unit: 1.0

BISC 108 Environmental Horticulture with Laboratory
Jones, McDonough, Thomas

This course will examine how plants function, both as individual organisms and as critical members of ecological communities, with special emphasis on human uses of plants. Topics will include plant adaptations, reproduction, environmentally sound landscape practices, urban horticulture, and the use of medicinal plants. The laboratory involves extensive use of the greenhouses, experimental design, data collection and analysis, and field trips. Not to be counted towards the minimum major in biological sciences.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: Natural and Physical Science Semester: Spring Unit: 1.25

BISC 109 Human Biology with Laboratory
Ellerby, McDonough

In this class, we will explore human biology through case studies, lectures, and laboratories. Lecture topics will include: the structure and function of the major physiological systems; recent developments in healthcare; human
Laboratory

Introduction to eukaryotic and prokaryotic cell structure, chemistry and function. Topics include: cell metabolism, genetics, cellular interactions and mechanisms of growth and differentiation. Laboratories focus on experimental approaches to these topics. Either 110 or 111 may be taken first.

**Prerequisite:** Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
**Distribution:** Natural and Physical Science
**Semester:** Fall, Spring

---

**BISC 110 graduates to: 110D**

**Quantitative Reasoning:**

Introduction to eukaryotic and prokaryotic cell structure, chemistry, and function with an emphasis on laboratory methods, data analysis, and science writing. Topics include: cell metabolism, genetics, cellular interactions, and mechanisms of growth and differentiation. This course requires previous preparation in cell biology and meets for one discussion and one lab session per week. Not open to students who have taken BISC 110 or 110X.

**Prerequisite:** A score of 5 on the Biology AP test or 6 or 7 on the IB, and completion of at least one semester of college laboratory science with a grade of B+ or better.
**Distribution:** Natural and Physical Science

---

**BISC 111 Introductory Organismic Biology with Laboratory**

**Staff**

Introduction to the central questions, concepts, and methods of experimental analysis in selected areas of organismal biology. Topics include: evolution, ecology, and plant and animal structure and physiology. Either 110 or 111 may be taken first.

**Prerequisite:** Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
**Distribution:** Natural and Physical Science

---

**BISC 201 Ecology with Laboratory**

**Rodenhouse, Thomas**

An introduction to the scientific study of interactions between organisms and their environments. Topics include evolutionary adaptations to environmental constraints, foraging behavior, sexual reproduction and mate selection, population growth and regulation, species interactions, and the structure and function of biological communities and ecosystems. Emphasis is placed on experimental ecology and its uses in addressing environmental issues such as biological control of pests, conservation of endangered species and global climate change. Laboratories occur primarily in the field where exercise students to local habitats including meadows, forests, alpine tundra, bogs, dunlops, marshes, lakes, and streams.

**Prerequisite:** 108 or 111 or ES 100, or by permission of the instructor.
**Distribution:** Natural and Physical Science

---

**BISC 202 Evolution with Laboratory**

**Buchholz**

Examination of evolution, the central paradigm of biology, at the level of populations, species, and lineages. Topics include the genetics of populations, the definition of species, the roles of natural selection and chance in evolution, the reconstruction of phylogeny using molecular and morphological evidence, and patterns in the origin, diversity, and extinction of species over time.

**Prerequisites:** 110 and 111
**Distribution:** Natural and Physical Science

---

**BISC 203 Comparative Physiology and Anatomy of Vertebrates with Laboratory**

**Cameron, Buchholz**

The physiology and functional anatomy of vertebrate animals, with an emphasis on comparisons among representative groups. The course covers topics in thermoregulatory, osmoregulatory, reproductive, cardiovascular, respiratory, digestive, neural, and ecological physiology. The laboratories incorporate the study of preserved materials and physiological experiments.

**Prerequisite:** 109 or 111, or permission of instructor.
**Distribution:** Natural and Physical Science

---

**BISC 204 Ecology of New England Seascapes with Laboratory**

**Hughes**

**NOT OFFERED IN 2006-07.** We will explore several intertidal and nearshore habitats of the New England shoreline and investigate environmental influences on the abundance and distribution of their biota. Habitats we’ll visit include the oligohaline zone of a northern Massachusetts tidal river, the sandy intertidal and shallow subtidal flats of Cape Cod Bay, the surf-swept rocky outcrops of Nahant, and the salt marshes of Plum Island Sound. The course will be strongly field and lab oriented, and will focus on the sources of production that fuel the food webs in these diverse habitats.

**Prerequisite:** One course in ecology or environmental biology, or permission of instructor.
**Distribution:** Natural and Physical Science

---

**BISC 206 Histology I: Human Microscopic Anatomy with Laboratory**

**Smith, Hacopian**

The structure and function of human tissues, and their cells, using light microscopic, histochemical and electron microscopic techniques. Topics covered include the connective tissues, epithelial, nervous tissue, blood, lymphoid tissue and immunity, as well as others. Laboratory study includes direct experience with selected techniques.

**Prerequisite:** 110
**Distribution:** Natural and Physical Science

---

**BISC 207 The Biology of Plants with Laboratory**

**NOT OFFERED IN 2006-07.** An introduction to experimental plant biology. Topics will include growth and development, stress physiology, plant defense, applications of genetic engineering to the study and improvement of plants and the properties of medicinal plants. The project-oriented laboratory sessions will provide an introduction to some of the techniques currently employed in answering research questions ranging from the organismal to the cellular level.

**Prerequisite:** 110 or 111
**Distribution:** Natural and Physical Science

---

**BISC 208 Ethnobotany**

**Nguyen**

Plant biodiversity and the ethnobotany of major plant groups. The value of plant biodiversity to humans and its influence on cultural development is emphasized through lectures analyzing important plant families, anatomy and morphology of useful plant parts, and medicinal and food uses of plants. Laboratories will include recognition of the major plant families, field trips to local ethnic markets, and analysis of student-gathered data relative to plant use and diversity.

**Prerequisite:** 111 or 108
**Distribution:** Natural and Physical Science

---

**BISC 209 Microbiology with Laboratory**

**Allen, Leavitt**

Introduction to the microbial world, with emphasis on bacteria and viruses and their activities in nature, using examples of how these microbes influence human activity. Both medical and nonmedical applications, and useful (food production, genetic engineering) as well as harmful (disease, bioterrorism) consequences of microbes will be discussed along with consideration of biological principles and techniques characterizing the organisms.

**Prerequisite:** 110 and one unit of college chemistry
**Distribution:** Natural and Physical Science

---

**BISC 210 Marine Biology with Laboratory**

**Moore, Hughes**

Oceans cover more than 70% of the earth’s surface and are our planet’s primary life support system. This course examines adaptations and
interactions of plants, animals and their environments in marine habitats. Focal habitats include the photic zone of the open ocean, the deep sea, subtidal and intertidal zones, estuaries, and coral reefs. Emphasis is placed on the dominant organisms, food webs, and experimental studies conducted within each habitat. Laboratories will emphasize primarily field work outdoors in marine habitats where students will gather data for the testing of student-originated hypotheses.

Prerequisite: 111, or ES 100, or by permission of the instructor.
Distribution: Natural and Physical Science Semester: Fall
Unit: 1.25

BISC 213/NEUR 213 The Biology of Brain and Behavior Laboratory Beltz, Teted, Helluy, Paul
An introduction to the study of the nervous system and behavior with particular emphasis on the structure and function of the nervous system. In the first half of the semester, basic neuroanatomy, neurophysiology and neurochemistry are covered. In the second half, brain mechanisms involved in sensation, language, addiction, memory, and cognition are emphasized. The laboratory is designed to expose the student to basic neuroanatomy, neurochemistry, physiology and behavior. Students may register for either BISC 213 or NEUR 213 and credit will be granted accordingly.
Prerequisite: 110 and either 111 or 109
Distribution: Epistemology and Cognition or Natural and Physical Science Semester: Fall, Spring
Unit: 1.25

BISC 216 Mechanisms of Animal Development with Laboratory O'Donnell
In this course, we will explore animal development beginning with the process of fertilization. We will consider how a single cell gives rise to the many specialized cell types of the adult. The mechanisms that determine cell fate as the multicellular embryo differentiates will be discussed. Topics will include: embryonic induction, pattern formation, organogenesis, axon development, regeneration, and stem cell. Laboratories will focus on experimental approaches to development.
Prerequisite: 110 and 111 or permission of instructor
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 219 Genetics with Laboratory Webb, König, Cuen, Leavit
The goal of the course is to develop an understanding of the fundamental principles of genetics at the molecular, cellular and organismal levels. First, the mechanisms that regulate the control of gene expression leading to alternation in phenotype during cellular differentiation will be studied. Then a link will be established between the generation of genetic variants through mutation and recombination, their patterns of inheritance, interactions between genes to produce complex phenotypes and the maintenance of such genetic variation in natural populations. Topics will include: organization of the eukaryotic genome, gene structure and function, multilevel gene control, genetics of pattern formation, inheritance of gene differences, gene and allele interactions and aspects of population and evolutionary genetics. Laboratory experiments will expose students to the fundamentals of genetics including modern molecular techniques for genetic analysis.
Prerequisite: 110 and one unit of college chemistry. Not open to first-year students.
Distribution: Natural and Physical Science Semester: Fall
Unit: 1.25

BISC 220 Cellular Physiology with Laboratory Harris, Hood-DeGrenier, Crum
This course will focus on structure/function relationships in eukaryotic cells. Topics will include: dynamic imaging of living cells, an introduction to protein structure and enzyme kinetics, membrane and membrane-bound organelle structure and function, cytoskeleton, transport mechanisms, cell communication, and signaling. The laboratory consists of three projects: enzyme purification and characterization, investigation of cellular transport pathways in yeast, and an analysis of the cytoskeleton in cultured mammalian cells using fluorescence microscopy.
Prerequisite: 110 and two units of college chemistry. One semester of organic chemistry is recommended. Not open to first-year students.
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 250 Research or Individual Study
Prerequisite: By permission of instructor.
Distribution: None Semester: Fall, Spring
Unit: 1.0

BISC 250H Research or Individual Study
Prerequisite: By permission of instructor.
Distribution: None Semester: Fall, Spring
Unit: 0.5

BISC 302 Animal Physiology with Laboratory Cameron, Paul
This course takes an integrated approach to the study of organ system function in animals, with an emphasis on human physiology. We will examine control mechanisms that allow the human body to maintain a constant balance in the face of environmental challenges such as exercise, temperature change and high altitude. Our particular focus will be recent findings in the areas of neural, cardiovascular, respiratory, renal and muscle physiology. In the laboratory, students gain experience with tools of modern physiological research at both the cellular and organismal levels.
Prerequisite: 111 and one of the following – 203, 206, 213, 220, [222]
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 303/CS 303 Bioinformatics NOT OFFERED IN 2006-07, OFFERED IN 2007-08. A multidisciplinary seminar exploring the origins, present and future applications and challenges of the intersection of biological and computer sciences. The field of bioinformatics, generated in response to the era of genomics, encompasses all aspects of biological data acquisition, storage, processing, analysis and interpretation with a view to generating in silico models of cellular function. Students may register for either BISC 303 or CS 303 and credit will be granted accordingly.
Prerequisite: 219 or 220 or CS 331
Distribution: Natural and Physical Science Semester: N/O. Offered in 2007-08.
Unit: 1.0

BISC 304 Histology II: Microscopic Anatomy of Human Systems with Laboratory Smith, Hacopin
Analysis of structure-function relationships of human systems, based principally on microscopic techniques. Examination of selected pathologic states in each system, as well as discussion of recent literature. Laboratory study includes tissue preparation for microscopy, as well as hands-on experience at the transmission electron microscope and participation in a group research project.
Prerequisite: 206
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 305 Seminar, Evolution
Bachholtz
Prerequisite: Two units in Biological Sciences at the 200 level or permission of instructor.
Distribution: Natural and Physical Science Semester: N/O
Unit: 1.0

BISC 306 Principles of Neural Development with Laboratory O'Donnell
Aspects of nervous system development and how they relate to the development of the organism as a whole. Topics such as neural induction, neurogenesis, programmed cell death, axon guidance, synaptogenesis and the development of behavior are discussed. Laboratory sessions focus on a variety of methods used to define developing neural systems.
Prerequisite: 213 or 216, or permission of instructor
Distribution: Epistemology and Cognition or Natural and Physical Science Semester: Fall
Unit: 1.25

BISC 307/ES 307 Advanced Topics in Ecology with Laboratory Hughes
Topic for 2006-07: Conservation Biology with Lab. We live on an increasingly human-dominated planet. We must now take responsibility for and stewardship of Earth's resources, both living and non-living, which we are changing at unprecedented rates. Our course covers terrestrial, fresh and saltwater habitats - their diversity and ecology, current status and sustainability, and the role of humanity in both their endangerment and salvation. We will examine the sources and importance of species diversity, and explore the often contentious issues of species and ecosystem preservation and conservation, the design of natural sanctuaries, and whether altered ecosystems can be managed and restored. Laboratory activities will include measurement of species diversity in soil and aquatic samples, successional dynamics, ephemeral habitat biology and ecology, geographic informational analysis, and an independent project. Students may register for either BISC 307 or ES 307 and credit will be granted accordingly.
Prerequisite: 201, 210, or permission of instructor
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

58 Biological Sciences
BISC 308 Tropical Ecology with Winter Session Laboratory
Königer, Helloy
The ecology of coral reefs and rain forests is the focus of the course. Lectures and discussions during the fall prepare students for the field portion in Belize and Costa Rica. The first half of the laboratory takes place on an island bordering the world's second longest barrier reef; the second half is spent in an intact lowland rain forest. Laboratory work is carried out primarily in the field and includes introductions to the flora and fauna, as well as testing of student-generated hypotheses. Not offered every year. Subject to Dean's Office approval.
Prerequisite: 201, 207, or 210, and permission of instructor.
Distribution: Natural and Physical Science
Semester: Fall and Winter Session
Unit: 1.25

BISC 310 Advanced Topics in Cellular Regulation with Laboratory
Hood-DeGrenier
NOT OFFERED IN 2006-07. Eukaryotic cells possess a diverse array of molecular circuits that regulate their normal activities and respond to external signals. Common modes of regulation include modulation of protein expression or localization, covalent protein modifications, and protein-protein interactions. This course will examine the molecular mechanisms that regulate these processes such as cell division, cell differentiation, stress responses, and others, in a format that combines lectures and student presentations of current literature articles. A seminar-long laboratory project will investigate a particular regulatory pathway using the budding yeast Saccharomyces cerevisiae as a model organism.
Prerequisite: 219 or 220 (both recommended).
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.25

BISC 313 Seminar, Microbial Physiology and Biochemistry
Allen
Topic for 2006-07: Microbial Communication and Development. Many bacteria are social creatures, interacting and communicating with each other. Quorum sensing, where population density alters gene expression, controls a diverse range of behaviors such as virulence factor production, genetic competence, sporulation, biofilm production, and programmed cell death. Signaling pathways and the molecules that regulate them will be studied, as well as the molecular mechanisms that regulate and produce developmental change in prokaryotes. Student participation and discussion of original literature will be emphasized.
Prerequisite: 309 or 219 or 220, and CHEM 211, or permission of instructor.
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

BISC 315/NEUR 315 Advanced Topics in Neurobiology with Laboratory
Tetel
Topic for 2006-07: Neuroendocrinology. Hormones act throughout the body to coordinate basic biological functions such as development, differentiation, and homeostasis. This course will investigate how hormones act in the brain to regulate physiology and behavior. We will study how the major neuroendocrine axes regulate a variety of functions, including brain development, reproductive physiology and behavior, homeostasis and stress. The regulation of these functions by hormones will be investigated at the molecular, cellular and systems levels. Laboratory experiments will explore various approaches to neuroendocrine research, including the detection of hormone receptors in the brain and analysis of behavior. Students may register for either BISC 315 or NEUR 315 and credit will be granted accordingly.
Prerequisite: BISC 213/NEUR 213
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.25

BISC 316 Molecular Biology with Laboratory
Petroian
Molecular techniques, which allow us to isolate, analyze and manipulate genes, have revolutionized our understanding of living things as well as our ability to alter them genetically. This course focuses on the use of molecular methods to dissect and manipulate complex biological systems. A case study approach will be used to analyze the application of molecular biology to genetic diseases (e.g. cystic fibrosis and muscular dystrophy), genetically modified organisms, cancer, stem cells, human cloning, aging and environmental protection. Student participation and critical analysis of the primary literature will be emphasized. In the laboratory students will pursue an original research project using current molecular techniques (e.g. molecular cloning, PCR, DNA sequencing, mutagenesis, protein expression, bioinformatics). Emphasis will be on experimental design and data analysis and interpretation.
Prerequisite: 219 or permission of the instructor
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.25

BISC 318 From Genes to Populations: Evolution on Islands
Sequeira
NOT OFFERED IN 2006-07. In this course we will focus on patterns of formation of species with emphasis on the particular and fascinating case of differentiation of populations on oceanic archipelagos (Hawaii, Canaries, and Galapagos). Literature is known about the ecological and historical forces responsible for the formation and extinction of species, although these are key for the generation of biodiversity. By looking at genealogical relationships among organisms, populations, and species, we can interpret how historical processes can leave evolutionary footprints on the geographic distribution of traits. We will explore computational tools for analysis of DNA sequences, and discuss methods of phylogeny, phylogeography reconstruction and population demographics. The course includes student presentations and discussions of the primary literature.
Prerequisite: 201 or 202 or 219 or by permission of the instructor.
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

BISC 319 Population Genetics and Systematics with Laboratory
Sequeira
NOT OFFERED IN 2006-07. In this course we will focus on patterns of population differentiation and speciation in oceanic islands. Little is known about the ecological and historical forces responsible for speciation although these are key for the generation of biological diversity. By looking at relationships between organisms, populations and species, we can interpret how historical processes can leave evolutionary footprints on the geographic distribution of traits. After a series of introductory lectures, the course will involve student presentations and discussion of primary literature examining cases in archipelagos (Hawaii, Canaries and Galapagos). In the laboratory we will explore computational biology tools for analysis of DNA sequences, and apply methods of phylogenetics, phylogeography reconstruction and population demographics. We will also explore the growing field of molecular dating of evolutionary events.
Prerequisite: 202 or 219 or by permission of the instructor.
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.25

BISC 320 Proteomics with Laboratory
Harris
The Human Genome Project and the sequencing of the genomes of several other organisms has provided biologists with vast stores of information. However, it is important to remember that DNA sequences only provide a recipe for life. To a great extent the living condition arises from the complex interactions of thousands of cellular proteins. Research that focuses on the large-scale study of proteins is called proteomics. This course introduces students to the techniques utilized and the scientific questions being addressed in this newly emerging discipline. Student participation and the use of original literature will be emphasized. In the laboratory students will perform two-dimensional gel electrophoresis, peptide mass fingerprinting using MALDI-TOF mass spectrometry, DNA microarrays, and confocal microscopy.
Prerequisite: 219, 220 and CHEM 211, or by permission of the instructor.
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.25

BISC 321 Designs for Life: The Biomechanics of Animals and Plants
Ellery
This course will focus on how organisms cope with a complex physical world. Their sophisticated designs withstand large environmental forces, caused by gravity, wind, and water flow. Animals, as well as confronting the problems of not falling over or apart, must overcome additional challenges associated with locomotion. Biomatereals, including spider silk that's stronger than steel and springy tendons that power prodigious jumps, help make this possible. Topics for discussion will include how biomaterials give organisms structure and strength, how muscle acts as a biological motor driving locomotion, how animals swim and fly, and how they run, walk and jump effectively on land. Class discussion and student presentation of recent primary literature will be an integral part of the course.
Prerequisite: Two units in Biological Sciences at the 200 level or permission of instructor.
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

BISC 331 Seminar
Webb
Topic for 2006-07: Cancer Genomics. Cancer can be attributed to disruption of genes structure and function. Functional genomics has contributed more to the understanding and treatment of cancer in the last five years than the previous half century of oncology research. This
course will provide a comprehensive study of the biological basis of malignancy from pathophysiology to the genetics of the transformed phenotype by examining the use of genomics in diagnosis, prognosis and treatment directed at specific molecular targets. Topics to be discussed include pharmacogenomics, RNAi, biomarkers, oncolytic viruses and the role of bioinformatics in analysis of SNPs, transcriptional profiling, proteomics, and rational drug design. Class discussion and student presentation of recent original literature will be an integral part of the course.

Prerequisites: 219 or 220 or permission of the instructor
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

BISC 332/NEUR 332 Advanced Topics in Neuroscience

NOT OFFERED IN 2006-07.
Prerequisite: BISC/NEUR 213
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

BISC 334 Seminar

O’Donnell

Topic for 2006-07: The Biology of Stem Cells. In this course, we will study stem cells in terms of molecular, cellular and developmental biology. We will focus on different types of stem cells, particularly embryonic stem cells, adult bone marrow stem cells, and adult neural stem cells. More specifically, we will explore how stem cells develop, the criteria by which stem cells are currently defined, and stem cell characteristics under investigation. Current research in the area of therapeutic cloning (somatic cell nuclear transfer) and potential stem cell therapies for the treatment of degenerative diseases will also be discussed. Bioethical issues related to stem cell biology will be described. Students will present and discuss original literature throughout the course.

Prerequisites: 216 or 219 or 220
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.0

BISC 335/NEUR 335/PHYS 335 Computational Neuroscience with Laboratory

Goldman (Physics)

NOT OFFERED IN 2006-07. Computations by networks of neurons in the brain underlie all of our thoughts, perceptions, and memories. However, direct experimental observation of neuronal computations is extremely difficult. Mathematical models are increasingly used to bridge the gap between experimental measurements and hypothesized network functions. This course will focus on the use of mathematical models to describe computations performed in the nervous systems of a variety of animals. Topics will range from single neuron biophysics to the analysis of circuits thought to underlie sensory perception and memory. Each topic will be introduced by background lectures, followed by student-led presentations of primary literature and construction of a computer model of the system studied. I lab will introduce students to computer programming of mathematical models in MATLAB and the neuron-simulator NEURON. Students may register for either BISC 335, NEUR 335, or PHYS 335 and credit will be granted accordingly.

Prerequisites: PHYS 104/107 and either PHYS 105/106X/105 or NEUR/BISC 213; or by permission of instructor. No programming experience is required. Not open to first-year students.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: N/O
Unit: 1.25

BISC 350 Research or Individual Study

Prerequisite: Open by permission of instructor, ordinarily to students who have taken at least four units in biology.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

BISC 360 Senior Thesis Research

Prerequisite: By permission of the department. Occasional group meetings and one oral presentation will be required. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

BISC 370 Senior Thesis

Prerequisite: 360 and permission of department. Occasional group meetings and one oral presentation will be required.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election

A major in biological sciences includes: eight biological sciences courses, at least six of which must be taken at Wellesley, plus two units of college chemistry (CHEM 105 or higher). BISC 110 and 111 or their equivalent are required for the major. Four 200-level courses are required, with at least one course from each of the following three groups: cell biology – 206, 216, 219, 220; systems biology – 203, 207, 213, [223]; and community biology – 201, 202, 208, 209, 210. A minimum of two 300-level courses are also required for the major. One of these courses, exclusive of 350, 360, or 370, must include laboratory and must be taken at Wellesley. Additional chemistry beyond the two required units is strongly recommended or required for certain 300-level courses. CHEM 221 and 328, and BISC 350, 360, and 370 do not count toward the minimum major. BISC 107, 108, and 109, which do not count toward the minimum major in biological sciences, do fulfill the College distribution require-

ments; 108 and 109 as laboratory sciences; 107 as a nonlaboratory science course. BISC 109, 111, and 201 fulfill the Quantitative Reasoning overlay course requirement.

A minor in biological sciences (five units) consists of: (A) BISC 110 and 111 (B) two 200-level units, each of which must be in a different group as described in the first paragraph above under major requirements, and (C) one 300-level unit, excluding 350, which must be taken at Wellesley. Four of the five courses for a minor must be taken at Wellesley. Chemistry is recommended. Students planning a minor should consult the chair.

Interdepartmental majors: Students interested in the interdepartmental major in biological chemistry are referred to that section of the catalog where the program is described. They should consult with the director of the biological chemistry program.

Students interested in the interdepartmental major in neuroscience are referred to the section of the catalog where this program is described. They should consult with the director of the neuroscience program.

Students interested in the interdepartmental major in environmental studies are referred to the section of the catalog where this program is described. They should consult with the co-directors of this program. Students interested in concentrating in community biology may wish to supplement and enrich their work at Wellesley by taking extradepartmental courses offered through the Marine Studies Consortium or the Semester in Environmental Science (SES) offered each fall at the Ecosystems Center of the Marine Biological Laboratory, Woods Hole, Mass. Students are referred to the sections of the catalog titled Extradepartmental and Special Academic Programs where these opportunities are described.

AP credit does not replace any course offered in the Department of Biological Sciences and does not count toward a major or a minor in biological sciences, biological chemistry, or neuroscience. Students with very strong classroom experience in either cell or organismal biology (AP score of 5 or above; IB score of 6 or 7) and at least one semester of college laboratory science completed with a grade of B+ or above may elect to satisfy these requirements with the Intensive Cell Biology Laboratory (110DL) or Intensive Organismal Biology Laboratory (111DL) courses. DL courses are offered in the spring only. DL courses meet for one discussion and one laboratory each week. No exemption exams will be given for BISC 110 or 111. All biology courses require the fulfillment of the Quantitative Reasoning basic skills requirement as a prerequisite.

In order to obtain Wellesley credit for any biology course taken at another institution during the summer or the academic year, preliminary approval must be obtained from the chair of the department prior to enrolling in the course. Once the student has enrolled at Wellesley, courses from two-year colleges will not be accepted at any level. Transfer students wishing to obtain credit for biology courses taken prior to enrollment at Wellesley should consult the chair of the department.
Honors in biological sciences is earned by the demonstration of excellence in both coursework and a thesis research project. All junior majors are invited to apply for the honors program. Final acceptance into the program is contingent on a vote of the department faculty and, typically, a grade point of 3.5 or higher in courses in the major above the 100 level. The primary goal of the thesis project is the development of independent research capabilities, culminating in the writing of a research paper. Honors candidates present the results of their thesis research to an examination committee in the thesis oral discussion, which takes place during reading period. After the oral examination, the thesis committee evaluates the candidate's performance and may recommend approval of the degree with honors. For more information, please see the bulletin "Guidelines for Research Students and Advisors" and the biological sciences department Web site for honors and theses: www.wellesley.edu/Biology/honors_theses.html.

Students planning graduate work are advised to take calculus, statistics, organic chemistry, two units of physics, and to have a reading knowledge of a second language. They should consult the catalogs of the schools of their choice for specific requirements. Premedical students are referred to the requirements given in the Academic Program section.

### Department of Chemistry

**Professor:** Kolodny, Coleman (Chair), Hearn, Wolfson, Ariainayagam

**Visiting Professor:** Gunnawardene

**Associate Professor:** Hattees, Mina

**Assistant Professor:** Reisberg, Verschoor, Flynn, Elmore, Vardar Ulu

**Visiting Assistant Professor:** Tavernier, Snyder

**Senior Instructor in Chemistry Laboratory:** Turnbull, Doe, Hall, McCarthy

**Instructor in Chemistry Laboratory:** Vasudevan

Chemistry has often been referred to as “The Central Science.” Knowledge of the properties and behavior of atoms and molecules is crucial to our understanding of medicine, biological systems, neuroscience, nanotechnology, environmental science and a myriad of other areas. All of the traditional divisions of chemistry—analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry—are represented on the faculty, in the course offerings and in opportunities for student-faculty collaborative research.

Unless otherwise noted, all courses meet for three periods of lecture/discussion and one 3.5 hour laboratory appointment weekly. CHEM 101, 306, and the selected topics courses will generally be taught without laboratory, but may include laboratory for some topics.

The chemistry department reviews elections of introductory chemistry students and places them in 105, 205, or 120 according to their previous preparation, and Advanced Placement (AP) scores, International Baccalaureate (IB) scores and department placement exams.

Students with a 5 on the Chemistry AP exam (or the equivalent on the IB exam) typically elect CHEM 120. They may elect CHEM 211 if they demonstrate sufficient mastery of material from CHEM 105 and CHEM 205 on the department's placement exam. All other students wishing to elect a first course other than CHEM 105 must demonstrate proficiency in the relevant material on the placement exam. Details of the AP/IB policy and the placement exam are on the department's Web site, www.wellesley.edu/Chemistry/chem.html. Students who have taken one year of high school chemistry, and those with an AP score of 4 or less, should elect CHEM 105 followed by either CHEM 205 or 211.

**CHEM 101 Contemporary Problems in Chemistry**

**Reisberg**

**Topic for 2006-07: Understanding Drugs.** A study of a wide variety of drugs, both legal and illegal. The focus will be on how these molecules affect our minds and bodies based on an understanding of their biochemistry. Topics will include antibiotics, steroids, stimulants, intoxicants, narcotics, and hallucinogens. The history, discovery, development, testing, regulation and prohibition of these substances will also be considered.

**Prerequisite:** Open to all students except those who have taken any other chemistry course.

**Distribution:** Natural and Physical Science

**Semester:** Spring

**Unit:** 1.0

**CHEM 102 Contemporary Problems in Chemistry with Laboratory**

**Reisberg**

**Topic for 2006-07: Understanding Drugs.** A study of a wide variety of drugs, both legal and illegal. The focus will be on how these molecules affect our minds and bodies based on an understanding of their biochemistry. Topics will include antibiotics, steroids, stimulants, intoxicants, narcotics, and hallucinogens. The history, discovery, development, testing, regulation and prohibition of these substances will also be considered. The laboratory will include synthesis and analysis of an anesthetic and an intoxicant, plus the detection of drugs in our bodies and on currency.

**Prerequisite:** Open to all students except those who have taken any other chemistry course.

**Distribution:** Natural and Physical Science

**Semester:** Spring

**Unit:** 1.25

**CHEM 105 Fundamentals of Chemistry with Laboratory**

**Staff**

This course is designed for students majoring in the physical and biological sciences as well as those wishing an introduction to modern molecular science. Core principles and interesting applications of chemistry will be combined to provide students with a conceptual understanding of chemistry that will help them in both their professional and everyday lives. Topics will include principles of atomic and molecular structure including nuclear chemistry, molecular energetics, and an introduction to chemical equilibrium, chemical kinetics and classes of chemical reactions. The laboratory work introduces students to synthesis and structural determination by IR and other spectroscopic techniques, molecular modeling, periodic properties, statistical analysis and various quantitative methods of analysis.

**Prerequisite:** 105 is designed for students who have completed one year of high school chemistry and mathematics equivalent to two years of algebra. Students who do not meet these prerequisites and who wish to take 105 should contact the department chair. The department offers a Winsession review of important topics from high school chemistry for students with minimal background in chemistry. Students must have fulfilled the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken 110.

**Distribution:** Natural and Physical Science or Mathematical Modeling

**Semester:** Fall, Spring

**Unit:** 1.25

**CHEM 120 Intensive Introductory Chemistry with Laboratory**

**Kolodny**

A one-semester course for students who have completed more than one year of high school chemistry, replacing CHEM [110] 105 and [111] 205 as a prerequisite for more advanced chemistry courses. It presents the topics of nuclear chemistry, atomic structure and bonding, periodicity, kinetics, thermodynamics, electrochemistry, equilibrium, acid/base chemistry, solubility and transition metal chemistry. All of these topics are presented in the context of both historical and contemporary applications. The laboratory includes experiments directly related to topics covered in lecture, an introduction of statistical analysis of data, molecular modeling and computational chemistry, instrumental and classical methods of analysis, thermochromy and solution equilibria.

61 Chemistry
Prerequisite: Open only to students who have taken more than one year of high school chemistry and have fulfilled the basic skills component of the Quantitative Reasoning requirement. Not open to students who have completed [110] 105 and/or [111] 205. Students who have AP or IB credit in Chemistry, and who elect CHEM 120, forfeit the AP or IB credit.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall
Unit: 1.25

**CHEM 205 Chemical Analysis and Equilibrium with Laboratory**

**Staff**

This course builds on the principles introduced in CHEM 105, with an emphasis on chemical equilibrium and analysis, and their role in the chemistry of the environment. Topics will include chemical reactions in aqueous solution with particular emphasis on acids and bases, solubility and complexation, spectroscopy, atmospheric chemistry, photochemistry and smog, global warming and acid deposition, sampling and separations, modeling of complex equilibrium and kinetic systems, statistical analysis of data, and solid state chemistry of ceramics, zeolites and new novel materials. The laboratory work includes additional experience with instrumental and noninstrumental methods of analysis, sampling, computational chemistry and solution equilibria.

Prerequisites: 105 and fulfillment of the basic skills component of the Quantitative Reasoning requirement or permission of the department. Not open to students who have taken [111] or 120.

Distribution: Mathematical Modeling or Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall, Spring
Unit: 1.25

**CHEM 211 Organic Chemistry I with Laboratory**

**Staff**

Topics covered include: stereochemistry, synthesis and reactions of alkanes, alkenes, alkynes, alkyl halides, alcohols and ethers, nomenclature of organic functional groups, IR, and GC/MS.

Prerequisites: 105 or [111], or 120 or permission of the department.

Distribution: Natural and Physical Science

Semester: Fall, Spring
Unit: 1.25

**CHEM 212 Organic Chemistry II with Laboratory**

**Staff**

A continuation of CHEM 211. Includes NMR spectroscopy, synthesis, reactions of aromatic and carbonyl compounds, amines, and carbohydrates. In addition, students are expected to study the chemical literature and write a short chemistry review paper.

Prerequisite: 211. Not open to students who have taken [313].

Distribution: Natural and Physical Science

Semester: Fall, Spring
Unit: 1.25

**CHEM 221 Biochemistry I: Structure and Function of Macromolecules with Laboratory Elmore**

A study of the chemistry of macromolecules, especially nucleic acids and proteins, with emphasis on structure-function relationships and methodology; an introduction to enzyme kinetics and mechanisms.

Prerequisite: 205, 211 and BISC 220; or 120, 211 and BISC 220

Distribution: Natural and Physical Science

Semester: Fall
Unit: 1.25

**CHEM 222 Introduction to Biochemistry with Laboratory Varadar**

A study of the chemistry of macromolecules with emphasis on structure-function relationships; an introduction to bioenergetics, enzyme kinetics, and metabolism.

Prerequisite: 205, 211 and 212 [313]; or 120, 211 and 212 [313]

Distribution: Natural and Physical Science

Semester: Fall, Spring
Unit: 1.25

**CHEM 231 Physical Chemistry I with Laboratory Coleman**

This course establishes and develops the principles that are used to explain and interpret the observations made in other branches of chemistry. Two major topics, chemical thermodynamics and kinetics, are introduced. Properties of solutions and gases are examined using these principles. Applications to other areas of chemistry will be discussed. The laboratory segment of the course incorporates statistical analysis of measured data.

Prerequisite: [111], 205 or 120, or by permission of the department; and MATH 116, 116Z, or 120 and PHYS 104 or 107.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall
Unit: 1.25

**CHEM 232 Physical Chemistry for the Life Sciences with Laboratory Kolody**

An examination of several topics in physical chemistry, with an emphasis on their applications to the life sciences. Topics include quantum chemistry and spectroscopy, electrochemistry, chemical thermodynamics and kinetics.

Prerequisite: [111], 205 or 120, or permission of the department; and MATH 116, 116Z, or 120 and PHYS 104 or 107.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Spring
Unit: 1.25

**CHEM 250 Research or Individual Study**

Prerequisite: Open by permission to students who have taken [111] 205 or 120. This course cannot be counted toward a minimum major in Chemistry. Students seeking to fulfill the chemistry major research requirement with a 200-level research course should enroll in CHEM 251.

Distribution: None

Semester: Fall, Spring
Unit: 1.0

**CHEM 251 Research or Individual Study**

This course may count toward the research requirement for the chemistry major if the following criteria are met: the student registers for 251, writes an 8-10 page (minimum) paper on the research and gives a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrating a familiarity with searching the chemical literature.

Prerequisite: Open by permission to students who have taken [111] 205 or 120. This course cannot be counted toward a minimum major in chemistry.

Distribution: None

Semester: Fall, Spring
Unit: 1.0

**CHEM 306 Seminar**

**Kolody**

Topic for 2006-07: Medical and Biological Applications of Magnetic Resonance.

Applications of magnetic resonance in chemistry, biology and medicine include both nuclear magnetic resonance (NMR) spectroscopy and magnetic resonance imaging (MRI). Uses of NMR and MRI range from the determination of structures of macromolecules using multidimensional NMR spectroscopy to the observation of brain activation using functional MRI. The theoretical and instrumental basis of these techniques will be discussed. Examples of their applications will be taken from the current scientific literature. The seminar will be participatory, with each student making formal oral presentations.

Prerequisite: 212 and PHYS 106 or 108

Distribution: Natural and Physical Science

Semester: Fall
Unit: 1.0

**CHEM 308/ES 308 Green Chemistry**

**NOT OFFERED IN 2006-07.** Green chemistry can be defined as the design of chemicals, chemical syntheses, and chemical processes that are environmentally benign and economically feasible. This course will serve to introduce students to the 12 Principles of Green Chemistry and explore how these principles are put into use through real-world examples. The subject matter to be discussed will include aspects of analytical, biological, inorganic, organic, and polymer chemistry from an environmental or green perspective. This course is designed for students interested in chemistry, biochemistry, engineering, environmental studies, materials science and related fields. Students may register for either CHEM 308 or ES 308 and credit will be granted accordingly.

Prerequisite: 211

Distribution: Natural and Physical Science

Semester: N/O
Unit: 0.5

**CHEM 319 Seminar. Selected Topics in Organic Chemistry Snyder**

**Topic for 2006-07: Carbohydrate Chemistry.** Recent advances in carbohydrate chemistry have provided researchers with a number of important tools to manipulate and study biological systems. This course will focus on the importance of these advances, highlighting the importance that carbohydrates and carbohydrate containing compounds play in our everyday lives. Significant emphasis will be placed on nomenclature, stereochemistry, and current techniques used to manipulate natural (and unnatural) carbohydrate systems. Protein-carbohydrate interactions will also be discussed as they relate to the roles that carbohydrates play in a number of important recognition events including cell trafficking, growth factor recognition, immunological recognition, and metastasis.

Prerequisite: 212

Distribution: Natural and Physical Science

Semester: Spring
Unit: 1.0

**CHEM 328 Biochemistry II: Chemical Aspects of Metabolism with Laboratory Elmore**

An examination of reaction mechanisms, mechanisms of enzyme and coenzyme action; structures and metabolism of carbohydrates and lipids.
CHEM 329 Seminar. Selected Topics in Biochemistry

NOT OFFERED IN 2006-07.

Prerequisite: TBA
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

CHEM 332 Physical Chemistry II without Laboratory

Arumainayagam
Quantum chemistry and spectroscopy; structure of solids. Introduction to computational chemistry.
Prerequisite: 231, PHYS 106 or 108; and MATH 215/PHYS 215 or MATH 205.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: Spring
Unit: 1.0

CHEM 333 Physical Chemistry II with Laboratory

Arumainayagam
Quantum chemistry and spectroscopy; structure of solids. Introduction to computational chemistry.
Prerequisite: 231, PHYS 106 or 108 and MATH 215/PHYS 215 or MATH 205.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: Spring
Unit: 1.25

CHEM 341 Inorganic Chemistry with Laboratory

Arumainayagam
Review of atomic structure, multi-electron atoms, the periodic table and periodicity, chemical applications of group theory, molecular orbital theory, the chemistry of ionic compounds, generalized acid/base theories, transition metal complexes, organometallic chemistry, catalysis, and bioinorganic chemistry. The laboratory introduces a variety of experimental methods used in inorganic synthesis including nonaqueous solvent, high temperature, inert atmosphere and vacuum techniques as well as techniques in computational chemistry and spectroscopic methods of characterization.
Prerequisites: 205 and 212 [313], or 120 and 212 [313]
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.25

CHEM 349 Topics in Inorganic Chemistry

NOT OFFERED IN 2006-07.

Prerequisite: TBA
Distribution: Natural and Physical Sciences
Semester: N/O
Unit: 1.0

CHEM 350 Research or Individual Study

Prerequisite: Open by permission to students who have taken at least three units in chemistry above the introductory level. Students seeking to fulfill the chemistry major research requirement with a 300-level research course should enroll in CHEM 351.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHEM 350H Research or Individual Study

Prerequisite: Open by permission to students who have taken at least two units in chemistry above the introductory level.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CHEM 351 Research or Individual Study

This course may count toward the research requirement for the chemistry major if the following criteria are met: the student registers for 351, writes an 8-10 page (minimum) paper on the research and gives a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrating a familiarity with searching the chemical literature.
Prerequisite: Open by permission to students who have taken at least three units in chemistry above the introductory level.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHEM 355 Chemistry Thesis Research

The first course in a two-semester investigation of a significant research problem, culminating in the preparation of a thesis and defense of that thesis before a committee of faculty from the chemistry department. Students will participate in a regular weekly seminar program, in which they will discuss their research progress informally with faculty and student colleagues and gain familiarity with contemporary research through presentations by outside seminar speakers. This route does not lead to Departmental Honors.
Prerequisite: 355
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHEM 370 Senior Thesis

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election

Any student who plans to take chemistry beyond [111], 205, or 120 should consult one or more members of the chemistry department faculty. The department handbook, available at the department office, Science Center 147, and on the department Web site (http://www.wellesley.edu/Chemistry/chem.html), contains specific suggestions about programs and deals with a variety of topics including preparation in mathematics and physics, graduate programs, and careers of former majors.

The chemistry major consists of two different paths. The first path (recommended for students who are considering attending graduate school in chemistry) includes: 105 and 205, or 120; 211 and 212; 231 and 333; two from among: 221 or 222, 341, 361; and two additional chemistry courses at the 300 or 300 level, at least one of which must include laboratory; MATH 215; and PHYS 108 or PHYS 106. The other path includes: 105 and 205, or 120; 211 and 212; 232; 341; 361; either 221 or 222; and two additional chemistry courses at the 200 or 300 level, at least one of which must include laboratory; MATH 116 or MATH 120; and PHYS 106 or PHYS 108. For both paths a lab-based 350 or 351 can count as one of the additional courses. All chemistry majors must also complete a minimum of one unit of research/independent study. The research requirement may be fulfilled during the academic year by completing a 251, 351, 355, or 360 or by participating in a summer research program. To obtain research credit toward the major, the project must culminate in the writing of a substantive paper and a presentation in the department. Students must arrange to have the summer research project approved by a faculty member in the chemistry department before starting the program. The research may be conducted off campus and must be for a minimum of 8 weeks.

The mathematics and physics courses may be counted toward a major or a minor in those departments. Early completion of the mathematics and physics requirements is strongly encouraged.

Normally no more than three units of chemistry taken at another institution may be counted towards the major.

Students interested in the interdepartmental minor in biological chemistry are referred to the section of the catalog where that major is described. They should also consult with the director of the biological chemistry program.
A minor in chemistry includes: 105 and 205 or 120; 211; 232; a choice of 221 or 222 or 341 or 361; one additional 200- or 300 level unit, excluding 350/351. The mathematics and physics prerequisites for 232 must also be satisfied. Normally no more than one unit in chemistry from another institution may be counted toward the minor.

Chemist Accreditation
The American Chemical Society has established a set of requirements in various areas which it considers essential for the training of chemists. Students wishing to meet the standard of an accredited chemist as defined by this society should consult the chair of the chemistry department.

Teacher Certification
Students interested in obtaining certification to teach chemistry in the Commonwealth of Massachusetts should consult the chair of the education department.

Engineering
Students interested in engineering should consult the course listings in Extradepartmental.

Placement and Exemption Examinations
The department conducts a placement exam at the beginning of the fall semester. Students with an AP score of 4 or 5 or the equivalent IB score) who wish to elect a course other than CHEM 105 must take this exam and consult with the chair of the department.

Credit for Courses Taken at Other Institutions
In order to obtain Wellesley credit for any chemistry course taken at another institution, during the summer or the academic year, approval must be obtained from the chair of the department prior to enrolling in the course. In general, courses from two-year colleges will not be accepted at any level. These restrictions normally apply only to courses taken after enrollment at Wellesley. Transfer students wishing to obtain credit for chemistry courses taken prior to enrollment at Wellesley should consult the chair of the department.

Withdrawal from Courses with Laboratory
Students who withdraw from a course which includes laboratory, and then elect that course in another semester, must complete both the lecture and laboratory portions of the course the second time.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Cinema and Media Studies
AN INTERDEPARTMENTAL MAJOR
Director: Shetley (English)
Advisory Committee: Okpong (African Studies), Chu (Anthropology), Melzicke (Art), Zimmerman (East Asian Languages and Literatures), Ford (English), Gill (German), Nolde (German), Viano (Italian Studies), Bishop (Russian), Cashman (Sociology), Gonzalez-Vera (Spanish), Creef (Women's Studies), Wood (The Writing Program)

The cinema and media studies program is multicultural in scope and interdisciplinary in method. Its chief objectives are: (a) to provide students with the skills to understand and interpret the various forms of the moving image. Audio-visual media have played a dominant role in the cultural life of the twentieth century, and promise to figure even more prominently in the current one. The cinema and media studies program equips students to reflect critically on the prevalence and power of audio-visual media. It aims to promote active viewing instead of passive absorption, offering students a context and a set of tools with which to assess the media texts that may shape the world we all inhabit. (b) to analyze, in an informed and judicious way, specific audio-visual texts, and to appreciate the power of outstanding works of cinematic art. Whether fiction or documentary, art or entertainment, cinematography has, since its humble beginnings in 1895, propelled the creation of a vast legacy of inspiring and significant films. Students wishing to undertake a career in film will undoubtedly benefit from the extensive exposure to key cinematic works from across the world. In addition, the cinema and media studies program includes courses in video production and screenwriting, which familiarize students with the most elementary aspects of filmmaking.

The cinema and media studies program offers both a major and a minor.

The major in cinema and media studies consists of a minimum of nine units. CAMS 175, CAMS 231, and CAMS 233 are required of all majors. One unit must be taken in the art department, and one unit in either anthropology or sociology, chosen from among the courses listed below. Two units must be at the 300 level, and one of them can be a 350. Students primarily interested in the computing aspects of arts and multimedia should consider the interdepartmental media arts and sciences program.

The minor in cinema and media studies consists of a minimum of five units. In addition to CAMS 175, students must take either CAMS 231 or CAMS 233, and one unit in either anthropology or sociology, chosen from among the courses listed below. One unit must be at the 300 level, and cannot be a 350.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the
CAMS 120/WRIT 125 Women in Film
Wood (The Writing Program)
To a large extent, film is about watching, and much film is about watching women. This course provides basic instruction in film analysis, and then makes a foray into theories of cinema. How does the camera work, not only to display its characters, but also to direct the gaze upon them? What are the relationships between the visual spectacle and the progress of the film's story? Writing assignments ask students to observe, analyze, interpret, and explain. This course satisfies the Writing 125 requirement and counts as a unit toward a major in cinema and media studies. Includes a third session each week.
Prerequisite: None. Open only to first-year students.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

CAMS 175 Introduction to Cinema and Media Studies
Viano (Italian Studies)
An introduction to media analysis with strong emphasis on the critical study of motion pictures. Through repeated viewings of a successful mainstream film, and a selection of audio-visual and written texts, the course aims to impart a methodology for textual and contextual criticism. While exploring key terms such as modernity, intertextuality, and ideology, the readings will also expose students to different theories of culture.
Prerequisite: Preference given to CAMS majors, first-year students, and sophomores.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

CAMS 210 Cinema in the 1960s
Viano (Italian Studies)
Film historians unanimously regard the 1960s as the most important decade in the growth of the so-called seventh art. While ubiquitous New Waves were changing filmic conventions across the globe, cinematic Modernism peaked with the works of such filmmakers as Antonioni, Bergman, and Teshigahara. At the same time, political and avant-garde films were pushing representation’s boundaries and mirroring the times’ turbulent creativity. Through an exemplary selection of films from different countries, this course aims to expose students to the works, directors, and movements of “the decisive decade.”
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

CAMS 231 Film as Art
Ford (English)
Study of the aesthetic aspect of film through the critical viewing of classic films. Screenings and discussion of outstanding works of cinematic art drawn from various styles and traditions of filmmaking, including the Hollywood studio system, independent film, the French New wave, neorealism, surrealism, and the avant-garde. Readings from prominent filmmakers and critics chosen to offer a sense of the development of film aesthetics and of the range of critical opinion on the artistic potential of the medium.
Prerequisite: None. Preference given to CAMS majors.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

CAMS 233 History of Motion Pictures
Viano (Italian Studies)
The study of film history is perhaps the best gateway to a critical investigation of modernity and globalization. After an examination of film’s roots in the nineteenth century, the course offers a panoramic, chronological overview of world cinema’s development, from Lumière to the so-called “death of cinema.” Students will learn about the various film movements in the context of the other arts. By means of socio-historical analysis, we will investigate the links between cinema, technology, and power.
Prerequisite: CAMS 175, or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

CAMS 250H Research or Individual Study
Prerequisite: Open by permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CAMS 313 Seminar. Who’s Afraid of Film Theory?
Viano (Italian Studies)
Only twenty years after Louise Lumière ironically said of his technical marvel Le Cinématographe (1895), that “cinematography is an invention without a future” his quip had already become a laughing matter. Not only had cinema spawned a global business and an art, but had also begun to attract thinkers from various disciplines. The American Hugo Münsterberg’s 1916 psychological study of how this “invention without a future” affected people’s perceptions, feelings, and cognitive patterns was just the beginning of an international debate that would evolve into an academic discipline with a strong future. Through a balanced selection of (mostly written) materials, this seminar retraces film theory trajectory and significance.
Prerequisite: Senior CAMS majors or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

CAMS 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CAMS 360 Senior Thesis Research
Prerequisite: By permission of director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CAMS 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Related Courses
The list below includes only those courses most obviously related to cinema and media studies; it is not exhaustive. If a student has a question about whether a course not listed here can count toward the major, she should consult with her advisor and the director of the program.

AFR 207 Images of Aficana People through the Cinema
AFR 222 Images of Women and Blacks in American Cinema

WOST 281 Gender and South Asian Cinema
Department of Classical Studies

Professor: Marvin, Starr, Rogers, Dougherty (Chair)
Assistant Professor: Reay, Gilhuhy

The Department of Classical Studies offers three closely related major programs: Greek, Latin, and classical civilization. Majors in Greek and Latin are based entirely on courses in the original languages while the classical civilization major combines work in the original languages with courses taught in English on the history, literature, society, and material culture of the ancient world. A related, interdisciplinary major, classical and Near Eastern archaeology, brings together courses in classical studies with course work in other departments. Classes in Greek and Latin are conducted in English and encourage close analysis of the ancient texts, with emphasis on their literary and historical values.

The department reserves the right to place a new student in the course for which she seems best prepared regardless of the number of units she has offered for admission. The department requires its own placement test for students interested in enrolling in Latin courses other than LAT 101/102.

Qualified students are encouraged to spend a semester, usually in the junior year, on study abroad. Limited departmental funds are available for foreign study. Excellent programs are available in Rome and Athens.

Classical Civilization

AN INTERDEPARTMENTAL MAJOR

The major in classical civilization offers the opportunity to explore the ancient world through an integrated, cohesive program of courses worked out by the student and her advisor. Individual programs are tailored to meet students' specific interests, such as classical literature, ancient theater, ancient philosophy and political theory, ancient religion, and the classical tradition. A brochure listing of suggested courses for these and other options is available in the Department of Classical Studies and on the Web site, www.wellesley.edu/ClassicalStudies/CLSTWWW/CLSTHome.html.

Pre requisite: None

Distribution: Historical Studies or Language and Literature
Semester: Spring, Summer
Unit: 1.0

CLCV 104 Classical Mythology
Dougherty

Achilles' heel, the Trojan Horse, Pandora's Box, an Oedipal complex, a Herculean task—themes and figures from Classical mythology continue to play an important role in our everyday life. We will read the original tales of Classical heroes and heroines together with more modern treatments in film and literature. Why do these stories continue to engage, entertain, and even shock us? What is the nature and power of myth? Readings from ancient sources in English translation.

Pre requisite: None

Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: Fall, Summer
Unit: 1.0

CLCV 210/310 Greek Tragedy: Plays, Politics, Performance
Dougherty

NOT OFFERED IN 2006-07. The fifth-century Athenian playwrights, Aeschylus, Sophocles, and Euripides, produced brilliant tragedies that continue to haunt us today and to define our notion of drama. At the same time, the Athenian people forged the democratic principles that form the basis for our own political institutions. The element of performance, common to both drama and democracy, provides an important key to understanding this interesting confluence of theater and politics, and this class will combine the close reading (in English) of ancient Greek tragedies with the viewing of a selection of contemporary dramatic performances such as modern Italian cinema, Black Gospel traditions, and contemporary productions of Greek drama. This course may be taken as either 210 or, with additional assignments, 310.

Pre requisite: 210 open to all students; 310 by permission of instructor.

Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: N/O
Unit: 1.0

CLCV 211/311 Epic and Empire
Reay

Alexander the Great is said to have slept with two things under his pillow: a dagger and a copy of Homer's Iliad. Julius Caesar and Augustus traced their lineage back to Aeneas, the hero of Vergil's Aeneid. Epic poetry and empire: coincidence or collusion? This course will investigate the relationship of epic poetry and empire, focusing especially on Vergil's Aeneid and Lucretius' Civil War within their historical contexts. How is poetry imbued with political meaning? Is epic a prop of imperial ideology or is it a site of resistance? Consideration of the post-classical adaptation of classical paradigms in works such as Milton's Paradise Lost, Barlow's The Columbian, and Whitman's Leaves of Grass. All works read in translation. This course may be taken as either 211 or, with additional assignments, 311.

Pre requisite: 211 open to all students; 311 by permission of instructor.

Distribution: Historical Studies or Language and Literature
Semester: Fall
Unit: 1.0

CLCV 212/312 On the Road: Travel in Literature and Film from Homer's Odyssey to Thelma and Louise
Dougherty

NOT OFFERED IN 2006-07. If you can't travel yourself, you can always read about it. This course will focus on the lure of travel, the companionship of the road, and the complicated issues of return. We will also consider the impact of genre on the construction of travel, the connection between travel and romance, and the association of travel and knowledge. How do these (and other) themes laid out so forcefully in the Odyssey continue to dominate works of literature and film? Readings will include Homer's Odyssey, Twain's The Adventures of Huckleberry Finn, and Kerouac's On the Road; films will include The Return of Martin Guerre, and Thelma and Louise. This course may be taken as either 212 or, with additional assignments, 312.

Pre requisite: 212 open to all students; 312 by permission of instructor.

Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: N/O
Unit: 1.0

CLCV 213/313 Gender in Antiquity
Gihuly

Do notions of gender change over time? In this course, we will explore how gender was constructed in antiquity and how it functioned as an organizational principle. Through close readings of selections from Greek and Roman epic, lyric poetry and drama, as well as philosophical and historical texts, we will analyze ancient gender norms, exploring how they were bent, dressed up, and used. This course may be taken as either 213 or, with additional assignments, 313.

Pre requisite: 213 open to all students; 313 by permission of instructor.

Distribution: Historical Studies
Semester: Spring
Unit: 1.0

CLCV 230/330 War: From Troy to Baghdad
Rogers

NOT OFFERED IN 2006-07. War is undoubtedly bad. But human beings have always practiced war. Indeed war preceded history itself by tens of thousands of years—if by history we mean the written inquiry into the past. But what causes wars? How have wars been justified historically? How are wars won and lost? What are their effects? In this class we examine a series of case studies in warfare, including the Trojan War, the Peloponnesian War, and the Roman Punic Wars. We will read classic accounts of warfare, theoretical literature about tactics, strategy and logistics, and also will analyze how war is represented in other media, such as art and film. This course may be taken as either 230 or, with additional assignments, 330.

Pre requisite: 230 open to all students; 330 by permission of instructor.

Distribution: Historical Studies or Language and Literature
Semester: N/O
Unit: 1.0

CLCV 236/336 Greek and Roman Religion
Rogers

The founders of Western civilization were not monotheists. Rather, from 1750 BC until 500 AD the ancient Greeks and Romans sacrificed daily to a pantheon of immortal gods and goddesses who were expected to help mortals to achieve their earthly goals. How did this system of belief develop? Why did it capture the imaginations of
so many millions for over 2000 years? What impact did the religion of the Greeks and Romans have upon the other religions of the Mediterranean, including Judaism and Christianity? Why did the religion of the Greeks and Romans ultimately disappear? This course may be taken as either 236 or, with additional assignments, 336.

Prerequisite: 236 open to all students; 336 by permission of instructor. Not open to students who have taken REL 236.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

CLCV 240/REL 240 Romans, Jews, and Christians in the Roman Empire
Rogers and Geller (Religion)
At the birth of the Roman Empire virtually all of its inhabitants were practicing polytheists. Three centuries later, the Roman Emperor Constantine was baptised as a Christian and his successors eventually banned public sacrifices to the gods and goddesses who had been traditionally worshipped around the Mediterranean. This course will examine Roman era Judaism, Graeco-Roman polytheism, and the growth of the Jesus movement into the dominant religion of the late antique world. Students may register for either CLCV 240 or REL 240 and credit will be granted accordingly.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

CLCV 243 Roman Law
Starr
Ancient Roman civil law; its early development, codification, and continuing alteration; its historical and social context (property, family, slavery); its influence on other legal systems. Extensive use of actual cases from antiquity.

Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

CLCV 245/345 Slavery and Society in the Graeco-Roman World
Rogers
NOT OFFERED IN 2006-07. Some historians have argued that the development of democracy in ancient Athens depended upon the existence of slave labor in Athens. In Republican Rome, where the children of freed slaves could become Roman citizens, scholars have claimed that the majority of Roman citizens were the descendants of slaves by the end of the first century B.C.E. How was slavery defined in the ancient Near East and the Graeco-Roman world? What were the political, social, and economic effects of slavery upon the Greek city-states and Rome? How did the Romans incorporate ex-slaves into Roman society? Was there any opposition to slavery? In this seminar we will briefly examine slavery in the ancient Near East and then trace the development of slavery in Greece and Rome from the middle of the second millennium B.C.E. until the fourth century C.E. This course may be taken as either 245 or, with additional assignments, 345.

Prerequisite: 245 open to all students; 345 by permission of instructor.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

CLCV 250 Research or Individual Study
Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CLCV 250H Research or Individual Study
Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CLCV 350 Research or Individual Study
Prerequisite: Open to juniors and seniors by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CLCV 350H Research or Individual Study
Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CLCV 360 Senior Thesis Research
Prerequisite: By permission of the department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CLCV 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Classical and Near Eastern Archaeology

AN INTERDEPARTMENTAL MAJOR

Director: Marvin

The purpose of a major in classical and Near Eastern archaeology is to acquaint the student with the complex societies of the Old World in antiquity. The program for each student will be planned individually from courses in the Departments of Anthropology, Art, Classical Studies, History, Philosophy, and Religion as well as from the architecture and anthropology programs at MIT. The introductory course in archaeology (ANTH 206) or its equivalent is required for all archaeology majors.

Students who concentrate in classical archaeology must normally have at least an elementary knowledge of both Greek and Latin, and take both Greek and Roman history as well as Greek and Roman art. Students who concentrate on the ancient Near East must have at least an elementary knowledge of one ancient Near Eastern language. Attention is called to Hebrew 101-102 and 201-202 and to the Brandeis exchange program.

Students should plan for at least one summer of excavation and/or travel.

CNEA 350 Research or Individual Study
Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CNEA 360 Senior Research Thesis
Prerequisite: By permission of Director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CNEA 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Required for the Major in Classical and Near Eastern Archaeology

ANTH 206 Archaeology
ANTH 208 Archaeological Science
ANTH 308 Seminar for Materials Research in Archaeology and Ethnology

Major in Greek

GRK 101 Beginning Greek I
Gihlady
An introduction to ancient Greek language. Development of Greek reading skills.
Prerequisite: Open to students who do not present Greek for admission.
Distribution: None
Semester: Fall
Unit: 1.0

GRK 102 Beginning Greek II
Mueller
Further development of language skills and reading from Greek authors.
Prerequisite: 101 or equivalent
Distribution: None
Semester: Spring
Unit: 1.0

GRK 201 Plato
Gihlady
Study of selected dialogues of Plato. Socrates in Plato and in other ancient sources; Socrates and Plato in the development of Greek thought; the dialogue form, the historical context. Selected readings in translation from Plato, Xenophon, the comic poets, and other ancient authors.
Prerequisite: 101 and 102 or two admission units in Greek or permission of instructor.
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

GRK 202 Homer
Mueller
Study of selected books in Greek from Homer's Iliad or Odyssey with emphasis on the oral style of early epic; further reading in Homer in translation; the archaeological background of the period.
Prerequisite: 201
Distribution: Historical Studies or Language and Literature
Semester: Spring
Unit: 1.0

Semester: Fall, Spring
Unit: 0.5

GRK 301 Selected Readings I
Dougherty
Topic for 2006-07: Archaic Lyric Poetry. In Greece down through the fifth century everyone
sang and knew songs, and there was a highly elaborate system of songs for different occasions—marriage, athletic victory, a farewell to a friend. We will read the lyric poetry of Sappho, Alcaeus, and Pindar together with the elegies of Archilochus, Solon, and Theognis in an effort to appreciate the "song culture" of the archaic period. What are the generic characteristics of different kinds of song? At what kinds of occasions were they performed?

Prerequisite: 201 or 202 or permission of instructor.
Distribution: Language and Literature
Semester: Fall

**GRK 302 Selected Readings II**

**Gihuly**

**Topic for 2006-07: Greek Prose Authors.**

Readings include many Greek prose authors including but not limited to Herodotus, Thucydides, Aristotle, Plato, Xenophon, and the orators. Close reading combined with analysis of both primary and secondary sources. Texts will be considered in their broader social, political, and literary contexts.

Prerequisite: 202 or permission of instructor.
Distribution: Language and Literature
Semester: Spring

Unit: 1.0

**GRK 350 Research or Individual Study**

Semester: Fall, Spring

Unit: 1.0

A major in Greek provides an opportunity to learn about the ancient Hellenic world directly through the study of ancient language and to examine the authors' original idioms and expressions in historical context.

**Major in Latin**

**LAT 101 Beginning Latin I**

**Reay**

Introduction to the Latin language; development of Latin reading skills.

Prerequisite: Open to students who do not present Latin for admission or permission of instructor.
Distribution: None
Semester: Fall

Unit: 1.0

**LAT 102 Beginning Latin II**

**Starr**

Further development of Latin reading and language skills.

Prerequisite: 101
Distribution: None
Semester: Spring

Unit: 1.0

**LAT 200 Intermediate Latin I: Introduction to Roman Literature and Culture**

**Starr**

After reviewing Latin grammar in as much detail as necessary, we'll start to make the transition from Latin grammar to Latin literature and Roman culture. Selections in Latin from such authors as Catullus (poetry), the emperor Augustus (The Deeds of the Divine Augustus), and Perpetua (one of the earliest known women Latin authors). Topics to be studied might include social status and identity (what defined you? might your status/identity change, whether for better or worse?) and Rome’s relation to Greece, which Rome conquered but which long dominated Roman culture, or the nature and function of literature in Roman life.

Prerequisite: 102 or three admission units in Latin or permission of instructor.
Distribution: Language and Literature
Semester: Fall

Unit: 1.0

**LAT 201 Intermediate Latin II: Vergil and Augustus**

**Reay**

Vergil’s Aeneid, Georgics, and Eclogues in their literary context of both Greek poetry (Homer, Apollonius of Rhodes, Euripides) and Latin poetry (Ennius, Lucretius, Catullus, Horace) and in their historical context in the reign of Augustus, the first Roman emperor. Readings in Latin from Vergil and in translation from other ancient works. Use of Internet resources on Vergil and Rome.

Prerequisite: 200 or four admission units in Latin by permission of instructor with three admission units in Latin.
Distribution: Language and Literature
Semester: Spring

Unit: 1.0

**LAT 250 Research or Individual Study**

Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring

Unit: 1.0

**LAT 250H Research or Individual Study**

Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring

Unit: 0.5

**LAT 304 Cicero**

**Reay**

NOT OFFERED IN 2006-07. Rome’s ruling elite defined itself relationally: male, not female; Roman, not Greek; free, not slave; present embodiments of a peculiarly Roman past. This course will look to the diverse works of Cicero to investigate elite identity and its uses during the late Republic. We’ll explore various categories by which identity was constructed and contested, their various textual expressions, their cultural, political, and social value for both the elite in general, and Cicero individually.

Prerequisite: 201 or permission of instructor.
Distribution: Language and Literature or Historical Studies
Semester: N/O

Unit: 1.0

**LAT 307 Catullus**

**Reay**

NOT OFFERED IN 2006-07. Tormented lover, urbane jester, obscene abuser, political subversive, poetic revolutionary—the personae of Catullus are as varied as the poems that produce them. This course is a topical investigation of Catullus’ poetry and its Roman contexts. Topics will include: poetry and biography; allusion, aesthetics and the ‘New Poetry’; social performance and self-representation; Roman masculinity and femininity; obscenity and invective; sex, poetry and power. Readings will draw on a variety of theoretical orientations that inform Catullan criticism: biography, psychoanalysis, intertextuality, feminism, New Historicism.

Prerequisite: 201 or permission of instructor.
Distribution: Language and Literature
Semester: N/O

Unit: 1.0

**LAT 308 Imperial Latin Literature**

**Starr**

NOT OFFERED IN 2006-07. Latin literature flourished in the Imperial period, even though it is referred to as “Silver” instead of “Golden” Latin literature. We’ll explore various authors and genres, including such authors as Seneca (philosophy and drama), Lucan (epic), Tacitus (history), Pliny (letters), Juvenal (satire), and Martial (epigrams). We’ll also examine the impact of rhetoric on the writing of Latin prose and poetry.

Prerequisite: 201 or permission of instructor.
Distribution: Language and Literature
Semester: N/O

Unit: 1.0

**LAT 309 Roman Elegy**

**Mueller**

Indebted to their Greek predecessors in so many genres, the Romans nevertheless claimed the erotic elegy as their own innovation. Catullus, Gallus, Tibullus, Propertius, and Ovid developed the form which became the predecessor of the love language and literature of Europe.

Prerequisite: 201 or permission of instructor.
Distribution: Language and Literature
Semester: Spring

Unit: 1.0

**LAT 310 Roman Historical Myths**

**Starr**

NOT OFFERED IN 2006-07. Romans based their history in myth and made their history into myths. This course includes reading from major authors such as Livy, Vergil, Horace, Ovid, Propertius, and Tacitus, focusing on historical myths such as "Romulus and Remus" or "Euryalus" or "Tarquinius Superbus, " and "Hercules and Cacus." We'll then examine how later Romans reworked those myths to serve current political purposes, and how they transformed historical events into powerful myths.

Prerequisite: 201 or permission of instructor.
Distribution: Language and Literature or Historical Studies
Semester: N/O

Unit: 1.0

**LAT 319 Selected Topics**

**Reay**

**Topic for 2006-07: Tacitus.** Intensive study of selected works of Tacitus, Rome’s greatest historian. Topics will include Tacitus’ inflection of traditions of Greco-Roman historiography, relations of biography and history, morality and politics, tyranny and freedom, imperial intrigue, exemplarity and cyclicity.

Prerequisite: 201 or a 300-level Latin course or by permission of instructor.
Distribution: Language and Literature
Semester: Spring

Unit: 1.0

**LAT 350 Research or Individual Study**

Prerequisite: Open to juniors and seniors by permission.
Distribution: None
Semester: Fall, Spring

Unit: 1.0
Cognitive and Linguistic Sciences

AN INTERDEPARTMENTAL MAJOR

Director: Levitt (Linguistics and French)

Cognitive and Linguistic Sciences Advisory Committee: Keene (Psychology), McIntyre (Philosophy), Hildreth (Computer Science)

Administrative Teaching Staff: Carpenter

A major in cognitive and linguistic sciences is designed to provide students with the breadth necessary for an interdisciplinary approach to the study of language and mind, as well as with substantive training in one of the component disciplines (linguistics, psychology, philosophy, or computer science).

Students majoring in cognitive and linguistic sciences must take a minimum of nine units for the major, including four core units, one from each of the categories below, and a minimum of four electives in a concentration. It is recommended but not required that the ninth course be in a different concentration. Courses eligible for the major are listed below. Students are encouraged to consult the MIT catalog for additional offerings in the major.

Core Courses

Students must fulfill the following four core requirements:

1) Linguistics*: LING 114, MIT 24.9, or PSYC 216

2) Formal Systems Requirement*: CS 111; LING 240 or LING 224; MIT 24.902, or PHIL 216

3) PHIL 215

4) CLSC 300

*Where there is a choice, students should choose the course that fits most clearly with their chosen concentration. For example, students concentrating in linguistics should choose LING 114 or MIT 24.9 rather than PSYC 216 and students concentrating in psychology should choose PSYC 216 rather than LING 114. Where a choice is not clear, the student should consult with her major advisor.

Concentrations

In designing a concentration, students need to demonstrate the intellectual coherence of their choices. Therefore, concentrations must be designed in close collaboration with the director. Students must take at least one 300-level course in their concentration.

Linguistics

Students concentrating in linguistics must elect at least four courses from the following list. Three of these courses must be linguistics courses, including one 300-level course: LING 238, 240, 244, or 312; CS 235; EDUC 308 or 310; FREN 211 or 308; PHIL 207, 216, or 349; PSYC 216 or 316. ENG 363, SOC 216 and RUSS 301 may be taken after consultation with the student's advisor. Students will also be expected to demonstrate proficiency in a foreign language above the College's foreign language requirement (at an intermediate level or above).

Psychology

Students concentrating in psychology must take PSYC 205 and 314. In addition students must elect at least two courses from the following list:
PSYC 215, 217, 218, 219 or NEUR 213, NEUR 300, NEUR 315, PSYC 305, 316, 318, 319, 336, 345.

**Philosophy**
Students concentrating in philosophy must elect at least four of any of the following courses: PHIL 207, 208, 209, 216, 217, 221, 313, 340, or 349. PHIL 345 may be taken after consultation with the student's advisor.

**Computer Science**
Students concentrating in computer science must take CS 230 and 232. In addition, students must elect at least two courses from the following list: CS 231, 235, 251, 303, 310, 331, 332, or 349 (when the topic for CS 349 is approved by the director).

**Honors**
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

**CLSC 250 Research or Individual Study**
Prerequisite: Open by permission of the instructor to first-year students and sophomores.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**CLSC 300 Seminar: Topics in Cognitive and Linguistic Sciences**
*Levitt*
**Topic for 2006-07: The Spoken and Written Word: Effects on Cognition and Culture.** For thousands of years, humans communicated via the ephemeral spoken word, and then writing was invented. How has the advent of writing affected us, both as individuals and members of cultural groups? In order to answer this question, we will explore the linguistic, cognitive, and cultural implications of spoken and written forms of communication. We start with a linguistic analysis of their structural characteristics, with a focus on how writing attempts to convey speech. We then move to an analysis of how the brain processes the spoken and written word and how these modes of communication affect memory and reasoning. From a cultural perspective, we examine the ways in which societies differ as a function of their dependence on oral versus written forms of communication.
Prerequisite: Open to juniors and seniors who have taken one of PSYC 215-219, LING 114, PHIL 215, CS 111 or permission of the instructor.
Distribution: Social and Behavioral Analysis or Epistemology and Cognition
Semester: Spring
Unit: 1.0

Students in any concentration may also elect independent studies and honors projects:

**CLSC 350 Research or Individual Study**
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**CLSC 360 Senior Thesis Research**
Prerequisite: By permission of the director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**CLSC 370 Senior Thesis**
Prerequisite: 360 and permission of department.
Distribution: None
Unit: 1.0

**LING 114 Introduction to Linguistics**
*Carpernter*
Prerequisite: None
Distribution: Epistemology and Cognition
Semester: Fall, Spring
Unit: 1.0

**LING 238 Sociolinguistics**
*Levitt*
The application of linguistics to the analysis of sociocultural variation in language. We will examine the way information about age, gender, social class, region, and ethnicity is conveyed by variations in the structural and semantic organization of language. We will also examine language attitude and language planning in multilingual societies.
Prerequisite: LING 114, PSYC 216, or by permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**LING 240 The Sounds of Language**
*Levitt*
What are all the possible linguistically-relevant sounds of the human vocal tract? How does each language organize a subset of those sounds into a coherent system? Examination of the sounds of language from the perspective of phonetics and phonology. Each student will choose a foreign language for intensive study of its phonetic and phonological characteristics. Includes extensive use of speech analysis and software.
Prerequisite: LING 114, PSYC 216, or by permission of the instructor.
Distribution: Epistemology and Cognition
Semester: Spring
Unit: 1.0

**LING 244 Language: Form and Meaning**
**NOT OFFERED IN 2006-07.** This course will consider some basic questions about language: What do we actually know when we know a language? How is the structure of language best described? Are there properties which all languages share, and what do those properties tell us about language itself? We will look at a number of specific problems in morphology, syntax, and semantics, and the strengths and weaknesses of a number of different linguistic theories will be considered. While many of the problems considered in this class will involve English, we will also be looking at a number of other languages, both European and nonEuropean.
Prerequisite: LING 114
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

**LING 312 Bilingualism: An Exploration of Language, Mind, and Culture**
**NOT OFFERED IN 2006-07.** Exploration of the relationship of language to mind and culture through the study of bilingualism. The bilingual individual will be the focus for questions concerning language and mind: The detection of "foreign" accent, the relationship of words to concepts, the organization of the mental lexicon, language specialization of the brain, and the effects of early bilingualism on cognitive functioning. The bilingual nation will be the focus for questions dealing with language and culture; societal conventions governing use of one language over another, effects of extended bilingualism on language development and change, and political and educational impact of a government's establishing official bilingualism.
Prerequisite: Related 200-level course in linguistics, psychology, anthropology, philosophy, or permission of the instructor.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

**LING 350 Research or Individual Study**
Prerequisite: Two 200-level units.
Distribution: None
Semester: Fall, Spring
Unit: 1.0
Comparative Literature

A STRUCTURED INDIVIDUAL MAJOR

Director: Nolden (German)
Advisory Board: Respaut (French), Rosenwald (English), deWarren (Philosophy), Cref (Women’s Studies), Roses (ex officio: Language Chairs)

The comparative literature major is a structured individual major for students seeking to study literature across departmental, national, and linguistic boundaries. Students in comparative literature devise their own programs in careful consultation with two advisors, one in each of two departments, and with the director of the program.

Students who major in comparative literature should, in designing their major, be aware of the many and diverse courses that pertain to the study of literature.

These include, but are not limited to:
1) courses in literary history;
2) courses in particular literary genres;
3) courses in the theory of literature;
4) courses in linguistics;
5) courses on the theory and practice of translation.

Many courses combine or fall between these categories. Students should also consult the Courses in Literature in Translation section at the back of the catalog.

Directions for Election

1. Ten units. Majors in comparative literature shall complete a minimum of ten units. All courses must count towards the major in the departments in which they are offered.
2. Introduction to Comparative Literature (CPLT 120). This course is strongly recommend and should be taken early on.
3. Comparative Literature Seminar. All majors shall take CPLT 330, the comparative literature seminar.
4. Advanced literature courses. In addition to CPLT 330, majors shall take at least two more literature courses at the 300 level. These two advanced literature courses shall be in at least two languages, of which English may be one, and in at least two departments, and majors shall meet departmental prerequisites for these courses.
5. Premodern literature. Majors shall take at least one course outside of the modern period in at least one of the literatures they are studying; what “the modern period” means for a particular literature will depend on the literature, and will be determined by the major’s advisors.
6. Theory of literature. Majors shall take at least one course offering a theoretical perspective helpful to their particular course of study. Sometimes this will be CPLT 120 or ENG 382 (Criticism), but other courses, too, can meet this requirement.
7. Independent research. Majors shall do a substantial piece of independent work in comparative literature. They may supplement CPLT 330 or a course in a pertinent department with extra independent work or enroll in CPLT 350, CPLT 360, and/or CPLT 370. They may also enroll in a 350 in a pertinent department chosen by the student in consultation with her advisors.

In general, programs will be worked out in relation to the major’s particular languages and interests. Examples of possible interests would include poetry, the novel, women’s writing, and the relations between politics and literature.

Honors

There are two routes to honors in the major:
Plan A entails writing a thesis and passing an oral examination. Plan B entails a dossier of essays written for several courses with a statement of connections among them and critical questions raised by them. Both plan A and plan B require a student to pass an oral exam.

To be admitted to the honors program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

CPLT 120 Literary Border Crossings: Introduction to Comparative Literature
Nolden (German)
This course will introduce students to milestones in world literary history and to different approaches to literature. We will be discussing texts which all address notions of cross-cultural encounters and thus serve as an exemplary foundation for comparative literary studies. Readings are drawn from a variety of different cultural, national, and linguistic traditions and will allow us to discuss what it means to “read another culture” from a variety of different perspectives. We will cover works by Euripides, writers of the Tang dynasty, C. Columbus, Dante, J. Swift, J.W. von Goethe, J. Martt, V. Wofull, J. Baldwin, A. Rich, A. Memmi, and others. Guest lecturers from several Wellesley College literature departments.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

CPLT 254 Imaginary Crimes and Courts: The Law in Literature
Kreise (German)
NOT OFFERED IN 2006-07. Both in literature and in law, language shapes rhetorical worlds which seek to represent, constitute, interpret, and criticize the world created and inhabited by human beings. Since its beginnings through the twentieth century, imaginative literature, in turn, has embodied critical depictions of the law in the lives of individuals and societies. This course will examine texts from Sophocles to Doctorow and include works by Shakespeare, Kleist, Dickens, Melville, and Kafka.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

CPLT 284 Magical Realism: Russia and Beyond
Wenner (Russian)
This course examines fictions whose basic reality would be familiar if not for the introduction of a magical element that undermines commonplace notions about what constitutes reality in the first place. The magical element can be a demon, talisman, physical transformation, miraculous transition in space or time, appearance of a second plane of existence, revelation of the unreality of the primary plane of existence, etc. Students will read Soloviev’s The Petty Demon, Bely’s Petersburgh, Bulgakov’s The Master and Margarita, Kafka’s Metamorphosis, Queneau’s The Blue Flowers, Marquez’s One Hundred Years of Solitude, Pynchon’s The Crying of Lot 49, Sokolov’s School for Fools, Marakami’s Wild Sheep Chase, and short stories by Borges, Cortazar, and Nabokov.
Prerequisite: None. Not open to students who have taken [RUSS 284].
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

CPLT 330 Seminar. Comparative Literature
Dougherty (Classical Studies)
Topic for 2006-07: Reading Travel. This seminar focuses on the theme of travel as it appears both literally and figuratively in works of fiction. How does travel influence issues of (personal and cultural) identity? What is the relationship between travel and fiction, between travel and literary genre? How do gender and family operate together with travel to structure relationships between home and away, men and women? We will begin with Homer’s Odyssey, which sets the stage for many of the themes and tropes to be interrogated in a broad range of texts, both western and non-western, both ancient and modern. We will include Euripides’ Helen, Twain’s The Adventures of Huckleberry Finn, Conrad’s Heart of Darkness, Mââzou’ Journey of Ilan Fattouma, Kincaid’s Lucy, Robinson’s Housekeeping, and Hosseini’s Kite runner.
Prerequisite: One 200-level course in literature or by permission of the instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

CPLT 334 Literature and Medicine
Respaut (French)
NOT OFFERED IN 2006-07. Drawing on texts from different countries, this interdisciplinary course will investigate literature’s obsession with medicine. Literary representations of doctors and patients, disability, insanity, AIDS, birth, death and grief, the search for healing and the redemptive power of art. Attention will be given to the links between medical diagnosis and literary interpretation. Differences between the treatment of medical issues in fiction and in autobiographies will be explored. Selected visual representations, in film and photography, will also be introduced.
Prerequisite: One 200-level course in literature or by permission of the instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

CPLT 350 Research or Individual Study
Prerequisite: By permission of the Director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CPLT 360 Senior Thesis Research
Prerequisite: By permission of the Director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CPLT 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Department of Computer Science

Professor: Hildreth, Shull
Assistant Professor: Metaxas (Chair), Turbak
Lecturer: Anderson
Laboratory Instructor: Herbst, Kakavoulis, Lee

The Computer Science Department offers four introductory computer science courses; CS 110, 111, 112, and 199. For advice in making a choice consult "Choosing an Introductory CS Course" at http://cs.wellesley.edu/~cs/Curriculum/whichCS1xx.html.

CS 100 Introduction to Internet Research and Resources

Orr (Office for Information Services)
OFFERED IN 2006-07 only as part of the Pathways program. CS 100 is a half-credit course designed for students with limited computing experience. Students learn to search, access, and critically evaluate information available on the Internet. Topics include copyright, privacy, and security issues of digital data and electronic communications, together with the basic computer science underpinning of these issues. Students learn to use many different search engines and full-text databases to do complex searches. Students will also use HTML and other authoring tools, such as Dreamweaver and Fireworks, to maintain a Web-published portfolio of their Internet research. Students who have already designed a basic Web site might find it more useful to take CS 110 or CS 111. Students must take CS 100 as credit/noncredit.

Prerequisite: None. No prior background with computers is expected.
Distribution: None
Semester: Offered only as part of the Pathways program. Unit: 0.5

CS 110 Computer Science and the Internet

Anderson, Sheldon, Stephen

This course explains the basics of how the Internet works and how to build a Web site. Topics include client-server architecture, structuring Web pages with HTML, CSS, and JavaScript, the representation of colors, images, and sound on the computer, encryption, cookies, and CGI forms. We also discuss accessibility, copyright, intellectual property, and critical thinking in the context of the Internet. The required project models most phases of the standard software lifecycle. Students are introduced to programming by building an interactive Web site using JavaScript. Students are required to attend an additional discussion section each week. Students considering additional computer science courses should take 111, not 110. Students can receive Mathematical Modeling distribution credit for only one of 110, 111, 112, and 199.

Prerequisite: None. No prior background with computers is expected.
Distribution: Mathematical Modeling
Semester: Fall, Spring Unit: 1.0

CS 111 Computer Programming and Problem Solving

Sheldon, Turbak

An introduction to problem solving through computer programming. Using the Java programming language, students learn how to read, modify, design, debug, and test algorithms that solve problems. Programming concepts include control structures, data structures, abstraction, recursion, modularity, and object-oriented design. Students explore these concepts in the context of interactive programs involving graphics and user interfaces. Students are required to attend an additional two-hour laboratory section each week. Required for students who wish to major or minor in computer science or elect more advanced courses in the field. Students can receive Mathematical Modeling distribution credit for only one of 110, 111, 112, and 199.

Prerequisite: None. No prior background with computers is expected.
Distribution: Mathematical Modeling. Does not satisfy the laboratory requirement.
Semester: Fall, Spring Unit: 1.0

CS 112 Computation for the Sciences

Hildreth, Shull

An introduction to computer programming that provides the tools necessary for students to use computers effectively in scientific work, physical sciences, biological sciences, medicine, mathematics, psychology, and economics. Students learn to write software to solve problems, visualize and analyze data, perform computer simulations, and implement and test computational models that arise in a wide range of scientific disciplines. The course introduces MATLAB, an extensive and widely used technical computing environment with advanced graphics, visualization and analysis tools, and a rich high-level programming language. Students are required to attend an additional two-hour laboratory section each week. Students can receive Mathematical Modeling distribution credit for only one of 110, 111, 112, and 199.

Prerequisite: None. No prior background with computers is expected.
Distribution: Mathematical Modeling
Semester: Fall, Spring Unit: 1.0

CS 115/PHYS 115 Robotic Design Studio (Wintersession)

Turbak and Anderson

In this intensive course, students are introduced to engineering principles while designing and assembling robots out of LEGO® parts, sensors, motors, and tiny computers. Fundamental robotics skills are learned in the context of studying and modifying a simple robot known as SciBorg. Then, working in small teams, students design and build their own robots for display at a robot exhibition. These projects tie together aspects of a surprisingly wide range of disciplines, including computer science, physics, math, biology, psychology, engineering, and art. Students may register for either CS 115 or PHYS 115 and credit will be granted accordingly. Not offered every year. Subject to Dean's Office approval.

Prerequisite: None
Distribution: Natural and Physical Science
Semester: Wintersession Unit: 0.5
CS 199 Simulation: An Interdisciplinary Tool  
Anderson  
NOT OFFERED IN 2006-07. Computer simulation plays an increasingly important role in decision-making and public policy. In this course, we learn to use a commercial simulation package that allows us to build simulation models via a convenient graphical interface where we place and connect blocks that process information. We also learn to use important tools of probability and statistics in the implementation and evaluation of simulations. Students are required to attend an additional laboratory section each week. This course is open to all students, including those who have taken upper-level CS courses. Students who take CS 199 as their first CS class must still take CS 111 before taking upper-level CS classes. Students can receive mathematical modeling distribution credit for only one of 110, 111, and 199.  
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking ECON 103/104, ECON 103/104, PSYC 205, POL 199 or QM 180.  
Distribution: Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement. Does not satisfy the laboratory requirement.  
Semester: N/O  
Unit: 1.0

CS 210 The Dynamic Web  
Anderson, Metaxas  
This course expands on the issues covered in CS 110 and focuses on what makes the web dynamic: the ability of organizing information inside databases and to access text, pictures, video or audio with a few user clicks. It also discusses design principles for effective human-computer interaction and representing information in a personalized, user-friendly and useful way. We will be using javascript, PHP, a simple programming language embedded in web pages, and SQL, the standard database language. A project will include creating a personalized database of images accessible over the web.  
Prerequisite: At least a B in CS 110 or CS 111 or permission of the instructor.  
Distribution: Mathematical Modeling.  
Semester: Spring  
Unit: 1.0

CS 215 Multimedia Design and Programming  
Metaxas  
The purpose of this course is to give students a broad foundation in issues related to creating multimedia and hypermedia applications. Topics to be covered include history and philosophy of hypermedia; principles of human-computer interaction; multimedia programming; optimizing for CD-ROMs and the World Wide Web; digital representation and editing of media (audio, graphics, video); media compression and transmission; and delivery of multimedia applications.  
Prerequisite: Permission of the instructor. File application online before pre-registration. At least 111 (preferred) or 110 is required. At least one of ARTS 105, ARTS 106 or ARTS 109 is recommended.  
Distribution: Mathematical Modeling.  
Semester: Fall  
Unit: 1.0

CS 231 Fundamental Algorithms  
Shull  
An introduction to the design and analysis of fundamental algorithms. General techniques covered: divide-and-conquer algorithms, dynamic programming, greedy, probabilistic algorithms. Topics include: sorting, searching, graph algorithms, compression, cryptography, computational geometry, and NP-completeness.  
Prerequisite: 111 or permission of the instructor.  
Distribution: Mathematical Modeling.  
Semester: Fall, Spring  
Unit: 1.0

CS 232 Artificial Intelligence  
Hildreth  
An introduction to artificial intelligence (AI), the design of computer systems that possess and acquire knowledge and can reason with that knowledge. Topics include knowledge representation, problem solving and search, planning, vision, language comprehension and production, learning, common sense reasoning, and expert systems. To attain a realistic and concrete understanding of these problems, CommonLisp, an AI programming language, will be taught and used to implement the algorithms of the course.  
Alternate year course.  
Prerequisite: 230 or permission of the instructor.  
Distribution: Mathematical Modeling.  
Semester: Fall  
Unit: 1.0

CS 235 Languages and Automata  
Shull  
An introduction to the concepts of languages and automata. Topics include languages, regular expressions, finite automata, grammars, pushdown automata, and Turing machines. The first half of the semester covers the Chomsky hierarchy of languages and their associated computational models. The second half of the semester focuses on decidability issues and unsolvable problems and the course closes with a brief introduction to complexity theory. Topic includes: a programming component investigating the application of automata theory to the scanning and parsing of programming languages.  
Prerequisite: 230 and either MATH 225 or permission of the instructor.  
Distribution: Mathematical Modeling.  
Semester: Fall  
Unit: 1.0

CS 240 Introduction to Machine Organization with Laboratory  
Stephan  
Most students' experience with computers is limited to the highest level of the computer. This course is intended to demystify the computer (open up the "black box") and teach how information at the highest level is processed and ultimately executed by the underlying circuitry. To this end, the course provides an introduction to machine organization and assembly language programming. Specific topics include the fundamentals of computer organization (introduction to numeric representation, boolean logic, digital logic and all associated technology), a basic data path implementation, assembly language programming, how to assess and understand the performance of a computer, and brief overviews of assemblers, compilers and operating systems. Students are required to attend one three-hour laboratory weekly.  
Prerequisite: 111  
Distribution: Mathematical Modeling. This course satisfies the laboratory requirement.  
Semester: Fall  
Unit: 1.25

CS 242 Computer Networks  
Shull  
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. A systems-oriented approach to data networks, including a theoretical discussion of common networking problems and an examination of modern protocols and the network measurement tools. Alternate year course.  
Prerequisite: 230 or permission of the instructor.  
Distribution: Mathematical Modeling.  
Semester: Fall, Spring  
Unit: 1.0

CS 249 Topics in Computer Science  
NOT OFFERED IN 2006-07.  
Prerequisite: 230  
Distribution: TBD  
Semester: N/O  
Unit: 1.0

CS 250 Research or Individual Study  
Prerequisite: 230 or permission of the instructor.  
Distribution: None  
Semester: Fall, Spring  
Unit: 1.0

CS 250H Research or Individual Study  
Prerequisite: 230 or permission of the instructor.  
Distribution: None  
Semester: Fall, Spring  
Unit: 0.5

CS 251 Theory of Programming Languages  
Turbak  
An introduction to the dimensions of modern programming languages. Covers major programming paradigms: function-oriented, imperative, object-oriented, and logic-oriented. Dimensions include syntax, naming, state, data, control, concurrency, nondeterminism, and types. These dimensions are explored via mini-language interpreters written in OCaml, Scheme, and Haskell that students experiment with and extend.  
Prerequisite: 230 and either 225 or permission of the instructor.  
Distribution: Mathematical Modeling.  
Semester: Spring  
Unit: 1.0

CS 301 Compiler Design and Implementation  
Turbak  
NOT OFFERED IN 2006-07. A survey of the techniques used in the implementation of programming language translators. Topics include lexical analysis, the theory of parsing and automatic parser generators, semantic analysis, code generation, and optimization techniques. These topics are explored in the context of implementing a working compiler.  
Prerequisite: 240, 251  
Distribution: Mathematical Modeling.  
Semester: N/O  
Unit: 1.0

73 Computer Science
CS 303/BISC 303 Bioinformatics
Sequeira, Tijaden
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. A multidisciplinary course exploring the origins, present and future applications, and challenges of the intersection of biological and computer sciences. The field of bioinformatics, generated in response to the era of genomics, encompasses all aspects of biological data acquisition, storage, processing, analysis and interpretation with a view to generating in silico models of cellular function. Students may register for either CS 303 or BISC 303 and credit will be granted accordingly.
Prerequisite: CSCI 219 or BISC 220
Distribution: Natural and Physical Science
Semester: N/O. Offered in 2007-08.
Unit: 1.0

CS 304 Databases with Web Interfaces
Anderson
A study of the 3-layer architecture commonly used for web-based applications such as e-commerce sites. We will learn to model and design databases uses entity-relationship diagrams, and the Standard Query Language (SQL) for managing databases. We will learn PHP, CGI/Perl, and Java Servlets, which are three important technologies for web-based architectures. We will also discuss performance, reliability and security issues. Finally, we will create dynamic Web sites driven by database entries. Alternate year course.
Prerequisite: 230. Not open to students who have taken this course in 349 in spring 2003.
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

CS 307 Computer Graphics
Anderson
A survey of topics in computer graphics with an emphasis on fundamental techniques. Topics include: graphics hardware, fundamentals of three-dimensional graphics including modeling, projection, coordinate transformation, synthetic camera specification, color, lighting, shading, hidden surface removal, animation, and texture-mapping. We also cover the mathematical representation and programming specification of lines, planes, curves, and surfaces.
Prerequisite: 230
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

CS 310 Theoretical Foundations of Cryptology
Shull
When is a cryptographic system secure and how will we know? This course introduces the computational models and theory computer scientists use to address these issues. Topics include one-way functions, trapdoor functions, probabilistic complexity classes, pseudorandom generators, interactive proof systems, zero-knowledge proofs, and the application of these theories to modern cryptography.
Prerequisite: 231 or 235 or permission of the instructor.
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

CS 331 Parallel Machines and Their Algorithms
Metaxas
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. This course is a broad introduction to parallelism: that studies problem solving using a large number of cooperating processing elements. It is divided into three parts. First, it introduces the need for parallel computation and describes some of the fundamental algorithmic techniques. The second part surveys some of the more popular interconnection networks employed in today’s parallel computers. In the third part, several parallel algorithms are designed and implemented on a cluster of communicating computers. Alternate year course.
Prerequisite: 231 or permission of the instructor.
Distribution: Mathematical Modeling
Semester: N/O. Offered in 2007-08.
Unit: 1.0

CS 332 Visual Processing by Computer and Biological Vision Systems
Hildreth
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. An introduction to algorithms for deriving symbolic information about the three-dimensional environment from visual images. Aspects of models for computer vision systems will be related to perceptual and physiological observations on biological vision systems. Computer vision software will be used to implement test models. Topics include: edge detection, stereopsis, motion analysis, shape from shading, color, visual reasoning, object recognition. Alternate year course.
Prerequisite: 230 or permission of the instructor.
Distribution: Mathematical Modeling
Semester: N/O. Offered in 2007-08.
Unit: 1.0

CS 341 Operating Systems
Stephan
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. This course is designed to provide a solid understanding of the key mechanisms of modern operating systems, the types of design trade-offs and decisions involved in operating system design, and the context within which the operating system functions (hardware, other system programs, application programs, interactive users). The key concepts of study are: introduction to operating systems, the operating system from the programmer’s point of view, review of computer organization, process management, scheduling, process synchronization, deadlock, and device and memory management. Alternate year course.
Prerequisite: 230 or permission of the instructor.
Distribution: Mathematical Modeling
Semester: N/O. Offered in 2007-08.
Unit: 1.0

CS 342 Computer Security
Bilar, Tierbak
An introduction to computer security. Topics include ethics, privacy, authentication, access control, information flow, operating system security (with a focus on Linux), cryptography, security protocols, Intrusion prevention and detection, firewalls, viruses, network security, Web security, programming language security. Assignments include hands-on exercises with security exploits and tools in a Linux environment. Participants will independently research, present, and lead discussions on security-related topics. Alternate year course.

Prerequisite: 242 or permission of the instructor. Not open to students who have taken this topic as CS 349.
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

CS 343 Advanced Computer Organization and Design with Laboratory
Stephan
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. This course explores advanced computer organization and design. The interaction of hardware and software at a variety of levels is studied to provide a framework for how to design a computer. These ideas are also applied to understand how a computer system works and why it performs as it does. Examples and measurements based on commercial systems are used to create realistic design experiences. In addition, RISC architectures for current desktop, server, and embedded computers will also be surveyed. This course is a three-hour required weekly laboratory. In the laboratory, students write behavioral models of computer components using VHDL, a commercial computer design language. Most significantly, students will engage in an intensive, semester-long project in which they design a simple 16-bit RISC-style microprocessor. This includes the design of an instruction interpreter, a register file, a single-cycle, and a multicyle CPU. The lectures complement the labs. Alternate year course.
Prerequisite: 240. Not open to students who have this course as a topic of CS 349.
Distribution: Mathematical Modeling. This course satisfies the laboratory requirement.
Semester: N/O. Offered in 2007-08.
Unit: 1.25

CS 349 Advanced Topics in Computer Science
NOT OFFERED IN 2006-07.
Prerequisite: Permission of instructor.
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

CS 350 Research or Individual Study

Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CS 350H Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CS 360 Senior Thesis Research
Prerequisite: By permission of the department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CS 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election
Students majoring in computer science must complete CS 111, 230, 231, 235, 240, 251, two 300-level courses other than 350, 360 or 370, and at least one additional computer science course at the 200 or 300 level. Students who do not take CS 111 must replace this requirement with one additional one-unit computer science course except 110. Computer science courses at MIT or other institutions used to meet the nine-course requirement must be approved in advance by the
department chair on an individual basis. In addition, all majors in computer science are expected to complete (1) MATH 225 (Combinatorics and Graph Theory) and (2) at least one additional course in mathematics at the 200 or 300 level. Particularly, mathematics courses are MATH 206 (Linear Algebra), MATH 220 (Probability and Elementary Statistics), MATH 222 (Number Theory), MATH 305 (Abstract Algebra), MATH 309 (Foundations of Mathematics), and MATH 349 (Graph Theory). Students should consult a CS faculty member for advice in choosing mathematics courses best suited to their interests. Students are strongly encouraged to complete the 200-level CS and mathematics requirements, especially CS 230, 240, and MATH 225, as early in the major as possible. Students are encouraged to consult the computer science student handbook (cs.wellesley.edu/~cs/handbook-06.pdf) for suggestions of possible course schedules for completing the major. Students considering a junior year abroad should consult a faculty member in the department as soon as possible in their sophomore year to plan a schedule of courses to complete the major.

All computer science majors are required to participate in computer science student seminars held throughout the academic year. In this seminar, students have the opportunity to explore topics of interest through reading and discussion, field trips, invited speakers, independent research projects, or software development projects.

The computer science five-course minimum minor is recommended for students whose primary interests lie elsewhere, but who wish to obtain a fundamental understanding of computer science. The minor consists of CS 111, 230, 240, either 231 or 235, and at least one 300-level computer science course other than 350. Note that since MATH 225 is a prerequisite for 231 and 235, students considering minoring in computer science are encouraged to complete MATH 225 as soon as possible. Students who do not take CS 111 must replace this requirement with one additional one-unit computer science course except 110.

Students may receive a maximum of one unit of college credit for a score of 3 on the Computer Science A or AB Advanced Placement exam. This unit does not count towards the computer science major or minor. Students receiving AP credit for computer science should consult with the department regarding enrollment in 230 or 240. CS majors and minors should consult with a CS faculty advisor before electing to take a CS course as credit/non.

Students can earn honors in computer science by successfully completing an honors-quality senior thesis. A detailed description of the senior thesis project in computer science can be found in the document Independent Studies in Computer Science (cs.wellesley.edu/~cs/Research/independent.pdf). Majors who are interested in undertaking a senior thesis project are urged to discuss their plans with either their advisor or the department chair as early as possible in their junior year.

Students who plan to pursue graduate work in computer science are strongly encouraged to develop their background in mathematics, particularly in the areas of linear algebra, probability and statistics, and graph theory. Such students should elect one or more of 310 or MATH 305. In addition, students who are planning either graduate work or advanced technical research or development work are strongly encouraged to (1) obtain laboratory experience by electing one or more of 301, 343, or appropriate courses at MIT and (2) pursue at least one independent study or research project before graduating, in the form of a Wellesley course (250/350/360), an MIT UROP, or a summer internship; consult cs.wellesley.edu/~cs/Research for more details.

Students interested in an interdepartmental major (or minor, if applicable) in cognitive and linguistic sciences, media arts and sciences, or neuroscience are referred to these listings in the catalog.

Students interested in engineering should consult the course listings in Extradepartmental.

Department of East Asian Languages and Literatures

Professor: Lam, Ma, Morley
Associate Professor: Zimmerman
Assistant Professor: Lee
Visiting Assistant Professor: S. Wang
Visiting Instructor: X. Wang
Lecturer: Maeno, Torii
Lecturer in Chinese Language: D. Chen, Zhao
Lecturer in Japanese Language: Ozawa
Visiting Lecturer in Japanese Language: Takahara

The Department of East Asian Languages and Literatures offers two distinct programs: Chinese language and literature and Japanese language and literature. The goal of each major is to provide students with a solid foundation in the disciplines of language and literature through intensive language training and broad exposure to the literary and cultural traditions of the culture under study.

The department also offers Korean language and culture courses.

The department reserves the right to place a new student in the language course for which she seems best prepared regardless of the number of units she has offered for admission.

Korean Language and Culture

KOR 101-102 Beginning Korean
Lee
An introductory course on standard conversational Korean for students who have little or no knowledge of Korean. The course will provide basic skills in speaking, listening, reading, and writing, with a focus on spoken language proficiency. The course will emphasize the development of communication skills in given situations and tasks, and provide an introduction to sociocultural interests and daily life in Korea. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: None
Distribution: None
Semester: Fall, Spring
Unit: 1.0

KOR 201-202 Intermediate Korean
Lee
A course for advanced beginners who have some experience in speaking Korean without formal instruction and who intend to build a solid foundation in the Korean language. This course covers the basic areas of speaking, listening, reading, and writing, and provides intensive exercises for spelling, basic grammar, and vocabulary. The course will focus on developing coherent language skills with respect to both spoken and written language proficiency, and on understanding the cultural aspects of daily life in Korea. Each semester earns 1.0 unit of credit.
Students who are placed into 201 must complete
both semesters satisfactorily to receive credit for either course; those who are placed into 202 may earn credit for this course alone.

Prerequisite: KOR 101-102, 201 for 202, or permission of instructor.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

KOR 256 Gender and Language in Modern Korean Culture
Lee
Postwar modernization and industrialization have wrought dramatic changes in Korean society. In spite of remarkable economic growth and rapid social progress, however, Korean women still grapple with gender inequality. This course explores the relationship between language use and cultural views of womanhood in modern Korea, using phonetics, semantics, discourse analysis, and sociolinguistics. By examining actual language use in myths, movies, ads, and popular culture, we explore how sociolinguistic factors shape gender dichotomies, notions of individual identity, and ethnicity. Substantial evidence of linguistic data will be used to clarify the connection between language and gender as we address the challenges faced by women of East Asia. Taught in English.

Prerequisite: None
Distribution: Epistemology and Cognition
Semester: Spring
Unit: 1.0

Major in Chinese Language and Literature

CHIN 101-102 Beginning Chinese
D. Chen, Zhao
An introductory course that teaches the skills of listening comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on pronunciation, vocabulary, grammar, and communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Four 70-minute classes plus one 30-minute small group session. Each semester earns 1.25 units of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None. Open only to students with no Chinese language background.
Distribution: None
Semester: Fall, Spring
Unit: 1.25

CHIN 103-104 Advanced Beginning Chinese
Lam
An introductory course that teaches the skills of listening comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on pronunciation, vocabulary, grammar, and communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Three 70-minute classes. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: Open to students who can speak some Chinese (Mandarin or other Chinese dialect), or who have some knowledge about reading and writing Chinese characters. Department placement test is required.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHIN 110 Introduction to Cultural Traditions of China (in English)
TBA
China is one of the world's most enduring civilizations, with a history that spans over three thousand years. This course will provide a broad introduction to much of this tradition from its archaic beginnings to the twentieth century. Through careful readings of primary texts (translated into English), we will explore the development and interactions of diverse aspects of Chinese culture, including language and script, literature and the arts, philosophy and religion, politics, history and technology. No prior background in Chinese language or Chinese culture is assumed.

Prerequisite: None
Distribution: Historical Studies or Language and Literature
Semester: Fall
Unit: 1.0

CHIN 201-202 Intermediate Chinese
D. Chen, Zhao
Further training in listening comprehension, oral expression, reading and writing. Four 70-minute classes plus one 30-minute small group session. Each semester earns 1.25 units of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: 101-102 or permission of instructor
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.25

CHIN 203-204 Advanced Intermediate Chinese
TBA
Further training in listening comprehension, oral expression, reading and writing. Three 70-minute classes. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: 103-104 or permission of instructor
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

CHIN 206 The Chinese Literary Imagination I: Beginnings to the Northern Song Dynasty (in English)
NOT OFFERED IN 2006-07. This is a thematic introduction to Chinese literature in translation, tracing the development of poetry, narrative, and criticism up through the Northern Song dynasty (960-1127). We will focus on the representation of the self in literary texts – its authenticity and/or theatricality – with particular attention to historical contexts, issues of genre and gender, and the pressures exerted by political and religious ideologies. Where it is relevant, we will also take up some concerns of recent theoretical approaches to literary and cultural studies.

Prerequisite: None
Distribution: Historical Studies or Language and Literature
Semester: N/O
Unit: 1.0

CHIN 207 The Chinese Literary Imagination II: The Song Dynasty to the Fall of Imperial
TBA
This is the second half of a thematic introduction to Chinese literature in translation, focusing on the vernacular genres of the Song, Yuan, Ming, and Qing dynasties. We will explore the ways in which the self is constructed in the late imperial period, across genres such as diaries and informal prose, drama, short fiction and novels, and poetry. Questions of gender and sexuality, urban culture, and historical context will also be addressed.

Prerequisite: Open by permission of instructor.
Distribution: None
Semester: Fall
Unit: 1.0

CHIN 230/330 Writing Women in Traditional China (in English)
X. Wang
Who were the major women writers in traditional China? How did they represent themselves and how were they represented in literature, historical, religious, and philosophical texts? This course will serve as an introduction to women's writing over the last two thousand years in China. We will examine the construction of gender, voice, and identity through close readings of poetry, fiction, essays, letters and biographical texts. We will also discuss the historical and social contexts so that we may better understand the conditions under which female authors lived and wrote. This course may be taken as 230 or with additional assignments, as 330.

Prerequisites: 230 open to all students; for 330, one of the following: 116, 206, 207, or 208, or permission of the instructor.
Distribution: Historical Studies or Language and Literature
Semester: Fall
Unit: 1.0

CHIN 243 Chinese Cinema (in English)
X. Wang
Contemporary film from Hong Kong, Taiwan, and the People’s Republic of China. This course investigates the history of the Chinese film industry, the issue of cultural hegemony (the power Hollywood is thought to exert over film industries of the "Third World"); cinematic constructions of Chinese gender, family, nationhood, and individuality; and applications of contemporary Western film theory.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Fall
Unit: 1.0

CHIN 250 Research or Individual Study
Prerequisite: Open by permission of instructor.
Distribution: None
Semester: Fall
Unit: 1.0

CHIN 250H Research or Individual Study
Prerequisite: Open by permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CHIN 301 Advanced Chinese I
Lam
This course is designed to further expand students' comprehension, speaking, reading, and writing skills. Reading materials will be selected from newspapers, short stories, essays, and films. Three 70-minute classes conducted in Chinese.
CHIN 302 Advanced Chinese II
TBA
Advanced language skills are further developed through reading, writing, and discussions. Reading materials will be selected from a variety of authentic Chinese texts. Audio and video tapes will be used as study aids. Three 70-minute classes conducted in Chinese.
Prerequisite: 301, 302, 306, or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

CHIN 306 Advanced Reading in Twentieth-Century Literature and Culture
TBA
This course is designed to further expand and refine grammatical proficiency and communicative skills through intensive reading of authentic Chinese materials, such as short stories, newspapers, and essays and viewing of films and television broadcasts. Particular emphasis is also given to increasing level of literary appreciation and critical awareness of the sociocultural contexts that shape readings. Three 70-minute classes conducted in Chinese.
Prerequisite: 203-204
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

CHIN 307 Advanced Readings in Contemporary Issues
Lam
A variety of authentic materials including literary essays and documentary films, will be selected to cover the study period from 1949 to the beginning of the twenty-first century. Three 70-minute classes.
Prerequisite: 306 or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

CHIN 308 Advanced Chinese Language and Cultural Studies in Beijing
Lam
This course enrolls students who want to go abroad in January to have a total immersion learning experience on the campus of Tsinghua University in Beijing. Written material, documentary films and site-visits chosen for study in this three-week program will all be centered on the history and culture unique to the city of Beijing. Students are required to attend and prepare for daily classes and quizzes, and to join the study tour scheduled on the weekends. In addition, participation in extracurricular events organized by students from the host institutes is requested to fulfill part of the course work. Program activities will be conducted exclusively in Chinese.
Prerequisite: 301, 302, 306, 307, 317 or permission of instructor.
Distribution: Language and Literature
Semester: Winter/Sessison
Unit: 0.5

CHIN 310 Introduction to Classical Chinese
TBA
Basic grammar and vocabulary of Classical Chinese, explored through readings selected from canonical sources in literature, philosophy, history and law. Special attention will be paid to grammatical differences between classical and modern Chinese. Students with an interest in art

CHIN 317 The Art of Translation
X. Wang
The art of translation and its techniques are studied through analysis of the major linguistic and cultural differences between Chinese and English. Students will work on guided translations of contemporary literary, cinematic, and press texts. Additional readings in English on techniques and theories of translation will be discussed. Students must have strong Chinese and English skills. Two 70-minute classes conducted in Chinese.
Prerequisite: 302, 306, 307, 310 or permission of instructor
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

CHIN 325 Philosophical Approaches to Chinese Literature
NOT OFFERED IN 2006-07. This course will examine the complicated relationship between philosophy and literature in China, as well as explore the possibility of cross-cultural interpretation and understanding. Our discussions will draw upon a wide range of topics, including the ethical character of literature, the problem of rhetoric, the relationship of writing to the state, the idea of aesthetic autonomy, metaphysics and language, commentary as philosophical critique, the imagination of China by Western philosophers and theorists, and Marxist and postmodern critiques of tradition. Readings will be drawn from philosophical texts (Analects, Zhuangzi), literary and historical works (Sima Qian’s Historical Records, Du Fu’s poetry), selected Western thinkers (Plato, Hegel, Stanley Cavell), as well as contemporary philosophers and critics (Li Zehou, Jacques Derrida, Fredric Jameson).
Prerequisites: Appropriate prior coursework at the 200-level in East Asian Languages and Literature, East Asian studies, philosophy, or religion.
Distribution: Language and Literature or Epistemology and Cognition
Semester: N/O
Unit: 1.0

CHIN 340 Literature of the Chinese Diaspora
(©) NOT OFFERED IN 2006-07. The idea of Zigu/woguo, the motherland, has been central to Chinese literary writing throughout the past century. Novelists and poets in China are politicians by default and bear witness, in their lives and deaths, to the tremendous economic, political and cultural transformation that has occurred in twentieth-century mainland China. But what does China mean to writers of the Chinese diaspora? Writers in Taiwan, Hong Kong, Japan, North America, Europe? We will probe representations of the self, the martial hero, exile, gender, sexuality, colonialism, nation and how all of these are (or are not) tied to the concept of a motherland. All of the novels read for this course were written in Chinese outside of mainland China and are available in English translation.
Prerequisite: 207, 208 or permission of the instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

CHIN 349 Mind, Place, and Landscape in Traditional China (in English)
NOT OFFERED IN 2006-07. What is a place? How do writers and painters depict places? What does it mean to describe places one has never visited, or to create places that do not actually exist? In this course, we will examine the representation of places and landscapes across a variety of traditional Chinese media, including historical texts, poetry, fiction, drama, tomb art, paintings, literary and art criticism, travel diaries, and pilgrimage accounts. Topics will include spiritual and mental journeys, the imagination of the afterworld, landscapes as portraiture, the mapping of empire, and dream narratives.
Prerequisite: 206, 207 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

CHIN 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHIN 350H Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CHIN 360 Senior Thesis Research
Prerequisites: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHIN 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election
Chinese language and literature: The goal of this major is to provide students with a solid foundation in the disciplines of Chinese language and literature through intensive language training and broad exposure to Chinese literary and cultural traditions through literature/culture courses taught in both English and Chinese. Students are strongly encouraged to begin their Chinese language study during their first year at Wellesley. Students with a Chinese language background must take a placement test to determine their proper courses. In addition, the EALL department strongly recommends that all majors spend a summer and/or a semester of their junior year studying Mandarin at an approved program in China, Taiwan, or Hong Kong.

The Chinese language and literature major consists of a minimum of ten courses. The following three sets of guidelines for the Chinese language and literature major have been devised to meet the needs of students who come to Wellesley with differing Chinese language backgrounds.

77 East Asian Languages and Literature/Chinese
A. Students beginning their Chinese language study at Wellesley in CHIN 101-102, 103-104 or 201-202 shall complete the ten-course Chinese major as follows: (1) Five language courses from among CHIN 101-102* or 103-104*; 201-202* or 203-204*; 301, 302, or 306, 307; (2) 310 or 317; (3) two literary courses from 206, 207, 208; (4) two additional literature/culture courses taught in English from among 110, 230, 243, 325, 330, 340, 349. At least one of these courses must be at the 300 level.

B. Students beginning their Chinese language study at Wellesley in CHIN 203-204 shall complete the ten-course Chinese major as follows: (1) Three language courses consisting of CHIN 203-204*; 306 or 307; (2) 310 or 317; (3) two literary courses from 206, 207, 208; (4) four additional literature/culture courses taught in English from among 110, 230, 243, 325, 330, 340, 349.

C. Majors beginning their Chinese language study at Wellesley in third-year Chinese shall complete the ten-course Chinese major as follows: (1) Two language courses from among CHIN 301, 302, 306, 307; (2) 310 or 317; (3) two literary courses from 206, 207, 208; (4) five additional literature/culture courses taught in English from among 110, 230, 243, 325, 330, 340, 349.

*Both semesters must be completed satisfactorily to receive credit for either course.

### Major in Japanese Language and Literature

**JPN 101-102 Beginning Japanese**

Maeno, Morley, Ozawa

Introduction to the modern standard Japanese language. Emphasis on developing proficiency in listening, speaking, reading, and writing, using basic expressions and sentence patterns. Five periods. Each semester earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**JPN 111 Gender and Popular Culture of Japan (in English)**

Zimmerman

Our study of Japanese popular culture focuses on gender issues, particularly on how girls are represented in Japanese comic books, magazines, fiction, television, animation, and film. We ask why the girl sparks such intense interest in Japan and explore how the tension challenges and reframe existing gender norms. A lightening rod for social change in Japan, even for modernity itself, representations of the girl illuminate the status of women, the changing role of the family, issues of ethnic and national identity, sexual orientation, and even Japan’s relation to the outside world. No previous knowledge of Japanese language is required.

**JPN 130 Japanese Animation (in English)**

Morley

**NOT OFFERED IN 2006-07.** What makes Japan tick? New visitors to Japan are always struck by the persistence of traditional esthetics, arts, and values in a highly industrialized society entrenched by novelty. Through animation films (English subtitles) and readings on animation we will explore this phenomenon from the inside. Focus is on the works of Tezuka Osamu, Hayao Miyazaki, and others. No Japanese language required.

**JPN 201-202 Intermediate Japanese**

Torii

Continuation of 101-102. The first semester will emphasize further development of listening and speaking skills with more complex language structures as well as proficiency in reading and writing. The second semester will emphasize reading and writing skills. Five periods. Each semester earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**JPN 231 Selected Readings in Advanced Japanese I**

Ozawa

This course is designed for students who have completed two years of Japanese study (JPN 201-202). The course provides practice of reading authentic texts in different topics and genres. Films and listening materials will also be used. Throughout the course, the development of a more fluent speech and stronger literacy will be emphasized by studying complex and idiomatic expressions. Acquisition of an additional few hundred kanji characters will be part of the course. Students will be expected to write weekly Japanese journal entries and complete semester projects. Students will be able to access the course website to practice. The class will be conducted entirely in Japanese. Three meetings a week.

<table>

**JPN 251 Japanese Writers and Their Worlds (in English)**

Morley

A study of the emerging voice of the writer in Japan from the tenth through the eighteenth centuries. Texts will include the early poetic diaries of the Heian Court ladies, The Tale of Genji, the Noh plays, puppet plays and the haiku poetry of Manzou Basho. Emphasis is on the changing world of the Japanese writer, the influence of Buddhism and Confucianism, and the role of the texts in shaping Japanese aesthetic principles. Selected films shown throughout course.

**JPN 256 Modern Japan through Cinema (in English)**

Zimmerman

From portraits of defiant children and ambitious geisha to runaway lovers and star-crossed gangsters, we trace the intertwined strands of modern Japanese identity in cinema. Moving decade by decade from the 1930s to the present, we view films that speak to the concerns of each generation. Because Japanese directors have created a unique visual language that counters the conventions of Hollywood, we devote class time to learning to read film. Literary and historical readings enhance study. Directors include Kenji Mizoguchi, Yasujiro Ozu, Akira Kurosawa, Nagisa Oshima, Hayao Miyazaki and Hirokazu Koreeda. No previous knowledge of Japan or film studies is required.

**JPN 310 Directed Readings in Modern Japanese Prose**

Morley

**NOT OFFERED IN 2006-07.** Students will select independent projects to pursue throughout the semester. In addition to independent work, students will read together as a class twice a week from a variety of postwar literary texts. Independent readings will be presented to the class to form part of the class assignments. Focus is on reading comprehension and translation skills. Writing skills will be addressed through short weekly writing assignments. Two periods with one independent tutorial weekly.

78 East Asian Languages and Literature/Japanese
### JPN 312 Readings in Classical Japanese Prose (in Japanese)
Morley

**NOT OFFERED IN 2006-07.** Reading and discussion in Japanese of selections from classical Japanese literature: focus on translation skills. Students will have the opportunity to sample *The Tale of Genji* and *The Pillow Book*, among others in the original and to familiarize themselves with the classical language. *Two periods with discussion section.*

**Prerequisite:** 232 or permission of instructor.
**Distribution:** Language and Literature
**Semester:** N/O
**Unit:** 1.0

### JPN 314 Contemporary Japanese Narrative (in Japanese)
Zimmerman

We read and discuss Japanese fiction in the original, focusing on a generation of contemporary female writers who are currently transforming the literary landscape of Japan. Through a fresh use of language and challenging themes, writers such as Yoko Ogawa, Risa Wataya and Hitomi Kanekane draw sharp portraits of urban life in Japan. Weekly translation exercises develop literary reading skills and improve comprehension. For the final project, students will translate a contemporary short story in collaboration with the instructor. *Two class meetings with individual meetings.*

**Prerequisite:** 232 or permission of instructor.
**Distribution:** Language and Literature
**Semester:** Fall
**Unit:** 1.0

### JPN 350 Research or Individual Study

**Prerequisite:** Open by permission of department to juniors and seniors. Signature of instructor required.
**Distribution:** None
**Semester:** Fall, Spring
**Unit:** 1.0

### JPN 350H Research or Individual Study

**Prerequisite:** Open by permission of department to juniors and seniors. Signature of instructor required.
**Distribution:** None
**Semester:** Fall, Spring
**Unit:** 0.5

### JPN 351 Seminar, Theaters of Japan (in English)
Morley

This course provides an in-depth study of Japanese traditional theater forms and performance theories. Students will be reading plays from the *Noh, Kyogen comedies, Kabuki, and Bunraku* (puppet theater) traditions. Videos of the plays for study will be viewed by the class. Comparisons will be made with Western and other Eastern theater forms where appropriate. The influence of classical theater on contemporary Japanese drama will also be examined.

**Prerequisite:** One unit on Japan or by permission of instructor.
**Distribution:** Language and Literature or Arts, Music, Theatre, Film, Video
**Semester:** Fall
**Unit:** 1.0

### JPN 352 Seminar, Postwar Japanese Fiction (in English)

**NOT OFFERED IN 2006-07.** With the lifting of state censorship in the late 1940s, Japanese writers began to explore themes of romantic love and sexual liberation, changing views on gender, and a new philosophy of "decadence." Japanese writers also wrestled with questions of war responsibility and the role of the writer in a changing Japan. In recent years, Japanese writers have courted a global audience, moving towards fantasy and magic realism while depicting the proliferation of isolated subcultures in Japan. We embed literary texts in their social and historical contexts as we listen for the "hum of the times." We also practice close reading of individual texts as we assess the aesthetic, social and political accomplishments of nine Japanese writers from 1945–2006.

**Prerequisite:** One unit on Japan or by permission of instructor.
**Distribution:** Language and Literature
**Semester:** N/O
**Unit:** 1.0

### JPN 353 Lady Murasaki and *The Tale of Genji* (in English)
Morley

**NOT OFFERED IN 2006-07.** Shortly after 1000 AD in the imperial court of Japan, Murasaki Shikibu, a court lady of middle rank, completed what is arguably the first novel in the history of world literature, *The Tale of Genji*. Who was she? How did she come to write a novel of such surprising psychological subtlety? Who is the hero? Why is he still appealing a millennium later? Focusing on *The Genji* and Murasaki's diary, we examine the culture of the Heian court, Buddhist beliefs, the esthetic of *mono no aware* (a beauty evocative of longing), and the literature (poetry, prose, and ladies' diaries) of the court salons. Films, plays, animation, and modern novels modeled on *The Genji* will also be discussed in class. No Japanese language required.

**Prerequisite:** One course on Japan or by permission of the instructor.
**Distribution:** Language and Literature
**Semester:** N/O
**Unit:** 1.0

### JPN 360 Senior Thesis Research

**Prerequisite:** By permission of instructor. See Academic Distinctions.
**Distribution:** None
**Semester:** Fall
**Unit:** 1.0

### JPN 370 Senior Thesis

**Prerequisite:** 360 and permission of Program Director.
**Distribution:** None
**Semester:** Spring
**Unit:** 1.0

### Related Courses

**For Credit Towards the Major**

**EAS 300 Contemporary East Asian Cinemas (in English)**

**Directions for Election**

**Japanese language and literature:** The Japanese program trains students to achieve fluency in the Japanese language and to think critically about Japanese literature and culture. Japanese majors follow a parallel track, taking language courses and literature/culture courses in translation, which culminates in advanced work on literature in Japanese at the 300-level. To this end, students are strongly encouraged to begin their study of the language in the first-year and to study premodern Japanese literature (JPN 251) to lay the foundation for advanced study. A junior year or summer of intensive language study in Japan is encouraged. The major consists of a minimum of eight units and normally includes JPN 202, 231, 232, and five additional units. At least two must be nonlanguage units, and at least two must come from the 300 level (to be taken with in the department). Students entering with advanced language preparation may substitute alternate language units as necessary with departmental permission. JPN 101-102 and 201 may be counted toward the degree but not toward the major. Students who have completed 310, 314, or the equivalent may request to do an independent study using the Japanese language (350). Those who wish to do an independent study that does not require the Japanese language should register for 250. An advisor should be chosen from within the department.

**Note:** All EALL students:

**Teacher Certification**

Students interested in seeking certification in teaching Chinese or Japanese should speak with the chairs of the EALL department and education department early in their college career.

**Study Abroad**

A maximum of three courses taken abroad may be counted toward the Chinese language and literature major; and a maximum of four courses toward the Japanese language and literature major. Students should note that more credit may be counted toward the Wellesley degree. In order to obtain credit for study abroad, students must obtain prior consent from the International Study Office and the EALL department chair and must pass a placement test administered by the EALL department upon return to Wellesley. In addition, it is essential that proof of course content and performance in the form of syllabi, written work, examinations, and grades be presented to the EALL department chair.

**Advanced Placement Policies and Language Requirement**

A student entering Wellesley must pass the Chinese exemption examination or the Japanese exemption examination to satisfy the foreign language requirement.

**Transfer Credits**

The transfer of credit (either from another American institution or from a language program abroad) is not automatic. A maximum of three units may be transferred toward the major in Chinese language and literature and a maximum of four toward the major in Japanese language and literature. Work at the 300-level must be taken within the department for credit towards the majors in Chinese and Japanese. Students wishing to transfer credit should be advised that a minimum of six units of course work must be completed in the EALL department at Wellesley. Transfer students from other institutions are required to take a placement test administered by the EALL department. It is essential that proof of course content and performance in the form of syllabi, written work, examinations, and grades be presented to the EALL department chair.

**Honors**

The only route to honors in the Chinese language and literature and Japanese language and literature major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

---

79 East Asian Languages and Literature / Japanese
East Asian Studies

AN INTERDEPARTMENTAL MAJOR

Director: Kodera (Religion), Zimmerman (East Asian Languages and Literatures)

Affiliated Faculty: D. Chen (EALL-Chinese), Cheng (Women's Studies), Chu (Anthropology), Giersch (History), Kodera (Religion), Lan (EALL-Chinese), Lee (EALL-Korean), Liu (Art History), Maeno (EALL-Japanese), Matsusaka (History), Meng (Studio Art), Moon (Political Science), Morley (EALL-Japanese), Otsuna (EALL-Japanese), Torii-Williams (EALL-Japanese), Zhao (EALL-Chinese), Zimmerman (EALL-Japanese).

East Asian studies is an interdisciplinary major offered jointly by the East Asian languages and literatures department (EALL) and faculty from other departments at the College whose research and teaching interests include East Asia. The major is designed for students with a broad interest in East Asia. Students interested primarily in the language and literature of a single East Asian culture should consider the EALL language and literature major. While the department encourages students to familiarize themselves with several East Asian cultures, all students must have an area of concentration. This area of concentration may be geographic or disciplinary.

Prospective majors should consult with a member of East Asian studies faculty as early as possible to discuss their academic plans. Majors devise their own programs of study in consultation with an advisor from the student's area of concentration. Both the major advisor and the EALL chair must approve proposals for the major. Transfer credits to be counted towards the major must be approved by one of the program directors.

Ten units are required for the major, consisting of the following:

Language courses: four units. Students must complete at least four language courses above the 100-level in the language most appropriate to their area of concentration. No credit towards the major is given for the first year of language study. Those who begin their language study at Wellesley in a 300-level language class must still complete four full-language courses. Students with native or near-native fluency in an East Asian language must also complete at least ten units for the major.

Language study beyond that required for the major is strongly recommended. All majors are also encouraged to spend at least a summer or a semester studying abroad in China, Taiwan, Japan, or Korea. The EALL chair must approve plans for language study taken away from Wellesley and to be applied towards the major.

Non-language courses: six units. Of the six non-language units required for the major, a minimum of three must constitute the concentration (see below) and two must be at the 300 level. A minimum of three of the non-language courses must be taken at Wellesley, including both of the 300-level courses. Only one of the two required 300-level courses may be fulfilled by a 350, 360, or 370.

In order to gain a comparative perspective, majors must take at least one non-language course that deals primarily with an East Asian culture or society other than the one where the language she is using to fulfill the major is spoken.

All majors also take at least one non-language course on East Asia in each of the following two categories: (1) humanities, including art, history, literature, cinema, music, philosophy, religion; and (2) social sciences, including anthropology, history, economics, political science, sociology, women's studies.

MIT has strong offerings in East Asian studies, and Wellesley students should consider taking at least one course there.

One course in Asian American studies may be counted toward the major, provided that the course addresses a significant aspect of East Asian traditions, culture, or society in its global, cross-cultural contexts.

Concentrations. At least three of the non-language courses to be counted toward the major must constitute either a geographic or a disciplinary concentration in East Asian studies. Majors will normally declare their concentration no later than the spring semester of the junior year when preparing to undertake advanced work in East Asian studies.

Geographic concentrations may focus on China, Japan, or Korea. Disciplinary concentrations include: arts and visual studies, culture and society; gender studies; historical studies; international relations; literary studies; political economy; and religion. Under unusual circumstances, and with the approval of her advisor and a program director, a student may design her own disciplinary concentration.

Honors. The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

EAS 300 Contemporary East Asian Cinemas (in English)
Zimmerman (EALL-Japanese)

NOT OFFERED IN 2006-07. East Asian societies underwent massive transformation during the second half of the twentieth century. The film industries in these nations changed dramatically in response. This course analyzes contemporary East Asian films of the last decade (the urban-rural divide, nationalism, military service, class, domestic abuse, gender and sexuality, ethnic identity) transcend geographic boundaries and illustrate how transnational East Asian cinemas are. As Hollywood once dictated how film was to be made, East Asian cinemas are now making their mark on Hollywood. Discussed together, Chinese, Japanese, and Korean cinema provide a fascinating, cohesive illustration of contemporary East Asian societies in flux.

Prerequisite: CHIN 243, IPN 256, or permission of instructor
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: N/O

EAS 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors
Distribution: None
Semester: Fall, Spring
Unit: 1.0

EAS 360 Senior Thesis Research
Prerequisite: By permission of the directors. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

EAS 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WOST 206 Women on the Move: Transnationalism, Migration, and Gender
ECON 101 Intermediate Microeconomic Analysis
Skeath, Clashing
Intermediate microeconomic theory: analysis of the individual household, firm, industry, and market, and the social implications of resource allocation choices. Emphasis on application of theoretical methodology.
Prerequisite: 101, 102 and MATH 115
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

ECON 203 Econometrics
Butcher, Colle, Lucas, Sneeringer
Application of statistical methods to economic problems. Emphasis will be placed on regression analysis that can be used to examine the relationship between two or more variables. Issues involved in estimation, including goodness-of-fit, statistical inference, dummy variables, heteroskedasticity, serial correlation, and others will be considered. Emphasis will be placed on real-world applications.
Prerequisite: 101, 102, MATH 115, and 103 [QR 199] or MATH 220 or PSYC 205. Not open to students who have taken [200].
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

ECON 204 U.S. Economic History
NOT OFFERED IN 2006-07. This course traces the structure and development of the U.S. economy from colonial times to World War II; highlights historical episodes including the start of the nation, slavery, the westward movement, the Civil War, and the Great Depression. Specific topics include agriculture, trade, technology, finance, and labor. Emphasis on relating U.S. historical experience to current economic problems.
Prerequisite: 101 and 103 [QR 199].
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 210 Financial Markets
NOT OFFERED IN 2006-07. Overview of financial markets and institutions, including stock and bond markets, money markets, derivatives, financial intermediaries, monetary policy, and international currency markets.
Prerequisite: 101, 102, and 103 [QR 199].
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 213 International Finance and Macroeconomic Policy
Weerapana
This course introduces the study of macroeconomics in an open economy. Topics include basic features of foreign exchange markets, the structure of the balance of payments account, and the effectiveness of macroeconomic policy under fixed and flexible exchange rates and varying degrees of capital mobility. The course also examines the evolution of the international financial system, the role of the IMF, the creation of the European Monetary Union and the recent financial crises in East Asia, Russia, and Brazil.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 215 Federal Tax Policy
Clausung
An introduction to federal tax theory and practice. Emphasis on the application of microeconomic principles in international economics. Topics to be covered include the debate over free versus fair trade; trade and the welfare of workers in developed and developing nations; the use of tariffs, quotas, and other instruments of protection; trade deficits; and the costs and benefits of international migration.
Prerequisite: 101 and 102. Not open to students who have taken [212].
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 222 Games of Strategy
Skeath
Should you sell your house at an auction where the highest bidder gets the house, but only pays the second-highest bid? Should the U.S. government institute a policy of never negotiating with terrorists? The effects of decisions in such situations often depend on how others react to them. This course introduces some basic concepts and insights from the theory of games that can be used to understand any situation in which strategic decisions are made. The course will emphasize applications rather than formal theory. Extensive use is made of in-class experiments, examples, and cases drawn from business, economics, politics, movies, and current events.
Prerequisite: 101. Permission of instructor required.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0
ECON 223 Personal Finance
Witte
What should you study? How should you invest? These questions require knowledge of both the law and economics of personal finance. The course offers a hands-on approach that uses real world prototypes. The earning, spending, investing and insuring decisions of the prototypes over the course of their lives provides the framework for class discussions. The course incorporates many of the latest developments in finance. It provides a way of thinking about personal finance that will be relevant even as the law and financial markets change.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 225 Urban Economics
Sneeringer
Case Analysis of the location decisions of households and firms. Topics include real estate development and finance, housing markets and housing finance, real estate cycles, regional economics, problems of the inner city, discrimination in housing and credit markets, homelessness, and alternative public policy responses to urban problems. The course requires several projects involving fieldwork.
Prerequisite: 101
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 228 Environmental and Resource Economics
Sneeringer
This course considers the economic aspects of resource and environmental issues. After examining the concepts of externalities, public goods, and common property resources, we will discuss how to measure the cost and benefits of environmental policy, in order to estimate the socially optimal level of the environmental good. Applications of these tools will be made to air and water pollution, renewable and nonrenewable resources, and global climate. In addressing each of these problems we will compare various public policy responses such as regulation, marketable permits and tax incentives.
Prerequisite: 101
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 232 Health Economics
Sneeringer
An economic analysis of the health care system and its players: government, insurers, health care providers, patients. Issues to be studied include demand for medical care, health insurance markets, cost controlling insurance plans (HMOs, PPOs, IPAs), government health care programs (Medicare and Medicaid), variations in medical practice, medical malpractice, competition versus regulation, and national health care reform.
Prerequisite: 101
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 233 Economics and Politics
NOT OFFERED IN 2006-07. This course provides an introduction to the study of the interaction between economics and the political process from both international and domestic perspectives. Topics include voting theories, public good provision, taxes and subsidies, and the effects of market power and rent-seeking behavior on the political system. Emphasis throughout will be on the application of economic theories to current events.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 241 Poverty and Inequality in Latin America
McEwan
Survey of economic development in the Latin American region, focusing upon poverty and inequality and the data used to measure them. Topics to be covered include regional and national trends in poverty and inequality and the formulation and evaluation of social policies, especially in the areas of education and health. Work in the course will emphasize the interpretation and use of data.
Prerequisite: 101 and 103
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 243 The Political Economy of Gender, Race, and Class
Matthaei
An introduction to radical economic analysis of contemporary, globalizing capitalism. Analysis of race, class, and gender, and of their interconnections. Radical economic critiques of current neo-liberal economic policies. Study and critique of contemporary radical economic movements, including the environmental movement; the movements for socially responsible consumption, investment, business, and work; and the antiglobalization or globalization from below movement.
Prerequisite: 101 or 102 or permission of instructor
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 250 Research or Individual Study
Prerequisite: Open by permission to students who have taken 101 and 102.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ECON 250H Research or Individual Study
Prerequisite: Open by permission to students who have taken 101 and 102
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ECON 266 Long Run Economic Change in Africa
NOT OFFERED IN 2006-07. This course traces the development of African economies from before colonialization to the present day. The course considers why economic development in Africa has been so slow compared to other regions of the world, how European intervention on the continent affected economic dynamics in the twentieth century, and how HIV/AIDS is affecting labor markets and economic performance in the twenty-first century. Throughout the course we will try to understand the economic and social factors behind Africa's perennial economic malaise and why there are seemingly constant impediments to successful economic growth on the continent.
Prerequisite: 101 and 103 (or 199)
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 300 Mathematics for Economics
NOT OFFERED IN 2006-07. In this course, students will apply mathematical techniques in economic analysis. Students are expected to have a good knowledge of calculus and will be introduced to topics in linear algebra, differential equations, and static and dynamic optimization. Emphasis will be placed on economic applications including maximization decisions of consumers and producers, comparative statistics, phase diagram analysis of dynamic systems, and basic features of dynamic optimization.
Prerequisite: 201 and 202, MATH 205, MATH 206 recommended. Not open to students who have taken ECON 303.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 303 Advanced Econometrics
NOT OFFERED IN 2006-07. This course builds upon 203 (Econometrics) by allowing students to examine more advanced topics, including techniques of model specification, estimation, and evaluation. Both cross-sectional and time series models are considered.
Prerequisite: 201, 202, and 203 (or [200]). Open to students who have taken ECON 303.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 304 Seminar. New Institutional Economic History
Kaufman
This course will investigate the evolution of economic institutions throughout the world over the past 1,000 years. We will consider a broad range of institutional questions and use evidence from historical episodes in their analysis. How are effective trading rules created (evidence from the eleventh-century Maghribi traders)? How does a government become "credible" (evidence from seventeenth-century England)? Why have Blacks consistently earned less than Whites (evidence from nineteenth- and twentieth-century America)? What are the effects of governmental tampering with housing prices (evidence from early twentieth-century Hong Kong)?
Prerequisite: 201 and 203 (or [201])
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 310 Public Economics
Cottle
This course explores the reasons for government intervention in the economy and the responses of households and firms to the government's actions. Economic models and empirical research are used to analyze tax policies and spending programs. Topics include the effect of taxes on savings and labor supply, externalities and public goods, and social insurance programs such as social security and unemployment insurance.
Prerequisite: 201 and 203 (or [200])
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 311 Economics of Immigration
Butcher
This course examines the economic causes and consequences of international migration, both historically and in the present, with a focus on the U.S. experience. We explore changes in immigration laws over time and the political debates surrounding immigration in the past
and present. Topics include: the effect of immigrants on the wages of the native born, immigrants' use of welfare and other social services and immigrants' involvement in crime and their treatment in the criminal justice system. In each case, students will discuss the popular perception, the theory, and the empirical evidence, with a focus on the public policy alternatives for dealing with each issue.

Prerequisite: 201 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 312 Economics of Globalization
Joyce
The process of globalization has aroused great controversy. This course examines the reasons for the integration across borders of the markets in goods and the factors of production, and the consequences of these trends. In the first part of the course we discuss the meanings, measurement and history of globalization. We then investigate the rationale and record of international trade, the immigration of labor and global financial flows. We examine issues related to international public goods, and the need for collective solutions to such global problems as pandemics and pollution. We also investigate the records of international governmental organizations.

Prerequisite: 201 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 313 Seminar, International Macroeconomics
Joyce
Theory and policy of macroeconomic adjustment in the open economy. Topics to be covered include models of exchange rate determination, the choice between fixed and floating exchange rates, monetary union, policy effectiveness in open economies under different exchange rate regimes, and adjustment to balance of payments disequilibria.

Prerequisite: 202 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 314 International Trade Theory
Clasung
Theoretical analysis of international trade. Emphasis on models of comparative advantage, determination of gains from trade and the effects of trade restrictions such as tariffs and quotas. Further topics include the role of scale economies, the political economy of protectionism, and strategic trade policy.

Prerequisite: 201
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 318 Economic Analysis of Social Policy
NOT OFFERED IN 2006-07. This course uses economic analysis to evaluate important social policy issues in the U.S., focusing on the role of government in shaping social policy and its impact on individuals. Does welfare make people work less or have more children? Why is the teenage birthrate so high and how might it be lowered? How do fertility patterns respond to changes in abortion policy? Theoretical models and econometric evidence will be used to investigate these and other issues.

Prerequisite: 201 and 203 (or [200])
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 320 Economic Development
Velechov
This course uses the United Nations' Millennium Development Goals as an organizing structure for its exploration of the determinants of living standards in the developing world. We will be looking at the achievement of these goals at the level of the region, nation, village, household and individual. Our study will be based in the recent empirical literature in the field, and will include both written work and oral presentations.

Prerequisite: 201 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 323 Finance Theory and Applications
Hill
This course provides a rigorous treatment of financing and capital budgeting decisions within firms. Topics include: financial statement analysis; strategies and analytical methods for the evaluation of investment projects; capital structure and dividend policy decisions; risk, return, and the valuation of financial instruments; and management incentive structures. Risk management and the use of derivatives will also be considered.

Prerequisite: 201 and 203 [200], Not open to students who have taken 330 Topic A.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 325 Law and Economics
Witte
Economic analysis of legal rules and institutions. Application of economic theory and empirical methods to the central institutions of the legal system including the common law doctrines of negligence, contract, and property as well as civil, criminal, administrative procedure and family law. The course will contrast economic and noneconomic theories of law and will address the strengths and limitations of the economic approach to law.

Prerequisite: 201 and 202 [200]
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 326 Seminar, Methods of Education Policy Analysis
McEwan
This course applies modern econometric methods and evaluation design to the analysis of contemporary issues in education policy. Methods include randomized experiments, regression-discontinuity analysis, and the use of panel data. Issues include school accountability, private school vouchers, and policies toward teacher labor markets. Students will conduct extensive empirical analysis of education data.

Prerequisite: 201 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 331 Seminar, Monetary Theory and Policy
NOT OFFERED IN 2006-07. The formulation of monetary policy and its theoretical foundations. This includes discussion of the latest developments in monetary theory, the money supply process, monetary autonomy in an open economy, and current procedures in the U.S. and other nations.

Prerequisite: 202 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 333 Economic Growth
Nabar
This course studies differences in living standards and economic growth across countries. It focuses on both the historical experience of countries that are currently rich and the process of catch-up among poor countries. Topics include the accumulation of physical and human capital, population growth, technological change, trade, geography, institutions, and inequality. Theoretical models and econometric evidence will be used to study these issues.

Prerequisite: 202 and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 335 Seminar, Economic Journalism
Lindauer
NOT OFFERED IN 2006-07. Students will combine their knowledge of economics, including macro, micro and econometrics, with their skills at exposition, in order to address current economic issues in a journalistic format. Students will conduct independent research to produce weekly articles. Assignments may include coverage of economic addresses, book reviews, recent journal articles, and interviews with academic economists. Class sessions will be organized as workshops devoted to critiquing the economic content of student work. Enrollment limited to 10.

Prerequisite: 201, 202, and 203 [200]
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 343 Seminar, Feminist Economics
Matthai
An exploration of the diverse field of feminist economics, which critically analyzes both economic theory and economic life through the lens of gender and advocates various forms of feminist economic transformation. Areas of focus include economic analysis of gender differences and inequality in the family and in the labor market; feminist critiques of current economic institutions and policies, and suggested alternatives; and feminist critiques of economic theory and methodology.

Prerequisite: 201, 202, or permission of instructor
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors who have taken 201 and 202; 203 strongly recommended; one 300-level elective recommended. 350 students will be expected to attend a weekly research seminar.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ECON 360 Senior Thesis Research
Students writing a senior honors thesis will be expected to attend a weekly research seminar.
Prerequisite: One 300-level course strongly recommended.
By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0
ECON 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Attention Called

MATH 115 Calculus I
MATH 203 Mathematical Tools for Economics and Finance (Summer School only)

Directions for Election
Economics is the study of the universal problems of scarcity, choice, and human behavior. It contains elements of formal theory, history, philosophy, and mathematics. Unlike business administration, which deals with specific procedures by which business enterprises are managed, economics examines a broad range of institutions and focuses on their interactions within a structured analytical framework. The complete survey of economics consists of both 101 and 102. Any student who plans to take economics after 101 and 102 should consult a department advisor.

The Major in Economics
The economics major consists of a minimum of nine units. The major must include core coursework in microeconomics (ECON 101 and 201), macroeconomics (102 and 202), and statistics (103 and 203), as well as at least two 300-level units (ordinarily not counting 350, 360 or 370). A minimum of two 300-level courses must be taken at Wellesley unless a student has completed 300-level work in economics at MIT; in such a case, only one 300-level course need to be taken at Wellesley.

Students who have completed MATH 220 or PSYC 205 need not complete ECON 103 but must take an additional economics elective to complete the major.

Choosing courses to complete the major requires careful thought. All majors should choose an advisor and consult him/her regularly. Students are also advised to consult the department handbook, which deals with a variety of topics including preparation in mathematics, desirable courses for those interested in graduate study in economics, and complementary courses outside economics. Calculus, along with several other mathematical tools, is central to the discipline. MATH 115 or its equivalent is required for all ECON 201, 202 and 203 sections. We encourage students to consult a department advisor about whether additional mathematics courses might be desirable.

Students interested in economics and its applications in international relations might want to consider the interdepartmental major in International Relations-Economics listed under International Relations in this Bulletin.

Honors in the Major
The department offers majors two programs for pursuing departmental honors. Under program I, students complete two semesters of independent research (360 and 370) culminating in an honors thesis. Under program II, a student completes one semester of independent research (350) related to previous 300-level coursework, and then submits to an examination in economics that includes the topic covered in her research project. Ordinarily, a student is expected to complete all of the core coursework and one 300-level course before enrolling in the honors program. Admission to the honors program requires students to have a GPA of 3.5 or higher in their economics courses above the 100 level. All honors candidates are expected to participate in the economics research seminar.

The Minor in Economics
The economics minor is recommended for students wishing to develop competence in economics in preparation for work or graduate study in area studies, business, international relations, law, public administration, public health, or other such professions. The minor consists of 101, 102 and 103, plus two additional 200-level units, ordinarily excluding 201, 202 and 203. A student wishing to add the economics minor to the major in another field should consult a faculty advisor in economics. Students who have completed MATH 220 or PSYC 205 need not complete ECON 103 but must take an additional economics elective to complete the minor.

Students are urged to supplement their major or minor program in economics with related courses from other disciplines in the liberal arts, such as history, mathematics, philosophy, political science, and sociology.

Credit for Other Courses
In order to obtain credit for any economics course taken at another institution during the summer or academic year, approval must be obtained in advance from the department's transfer credit advisor. In general, courses from two-year colleges will not be accepted at any level. Courses taken elsewhere normally will not be transferred at the 300 level. ECON 201, 202, and 203 ordinarily should be taken at Wellesley. Transfer students wishing to obtain transfer credit for economics courses taken prior to enrollment at Wellesley should contact the department's transfer credit advisor.

Advanced Placement and Exemption Examinations
Students who enter with Advanced Placement credit in microeconomics or macroeconomics may choose to repeat the courses covered by the AP credit (in which case the credit is forfeited) or proceed to the remaining half of the introductory sequence (for those with one unit of AP credit) or to a 200-level elective (for those with two units of AP credit). Students who have AP or IB credit in statistics should consult the department chair regarding enrollment in 103. We recommend seeking advice from the department on how to proceed, particularly for students contemplating a 200-level course in their first semester. AP credits do not count toward the minimum major or minor in economics.

Department of Education
Associate Professor: Beauty (Chair)
Assistant Professor: Hawes, Venanz
Instructor: Speiser
Visiting Instructor: Tutin
Associate in Education: Denis Cleary (History Teacher, Concord Carlisle High School); Ellen Conroy (Principal, Sprague School, Wellesley); Jennifer Friedman (Coordinator for Curriculum and Instruction, Kindergarten Teacher, Lee Academy Pilot School, Boston); Lynne Buchalter (Math Teacher, Wellesley Middle School); Reen Gibb (Science Teacher, Brookline High School); David Gotthelf (Newton Public Schools); Jennifer MacPherson, (Elementary Math Curriculum Coordinator, Wellesley Public Schools); Bethany Nichols, (Staff Development Coordinator and Mentor Leadership Team Coordinator, Needham Public Schools); Marsha Orent (Project Administrator, Office of the Provost, MIT)

EDUC 102/WRIT 125 Education in Philosophical Perspective
Hawes
This course is guided by questions such as: What is education? How do an individual's own efforts to make sense of the world and to guide her life, relate to schools and academic work? To the diversity of experiences and cultures? What should the aims of education be? The focus will be on perspectives and processes of learning and teaching. We will use the works of earlier writers (for example, Confucius, Plato, and Dewey) and contemporary writers as starting points in our investigations. This course satisfies the Writing 125 requirement and counts as a unit toward the teacher education or education studies minor. Includes a third session each week.
Prerequisite: None. Open only to first-year students.
Distribution: Epistemology and Cognition
Semester: Spring

EDUC 117 Diversity in Education
Venanz
An introduction to issues in diversity and multicultural education. We will examine rationales for diversity and multicultural education and some of the effects of these policies. We will analyze implications of diversity for teaching and learning, and study the influences of race, ethnicity, gender, language, socioeconomic status, and religion on schools and school curricula, with a focus on tensions surrounding increasing diversity in American education.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring

EDUC 212 Seminar. History of American Education
Beauty
An intensive study of the role that education has played in American society and the evolution of support and expectations for public schools. We will examine how schools have served the needs of girls, immigrants, and students from different racial, ethnic, social class, and religious backgrounds. We will focus on the education of teachers, the organization of urban school systems, the growth of high schools and preschools, and attempts to reform schools and the curriculum.
EDUC 215 Understanding and Improving Schools
Hawes
Study of what goes into the making of good schools in a variety of settings, including urban public schools. Examination of what we mean by “a good school,” in terms of both aims and practices, of how a school and its curriculum are experienced by its students, and of how a school’s culture and social relationships are created. We will use case studies of different kinds of people working to improve schools, including teachers, principals, education advocates, and researchers. Fieldwork will be an integral part of the course.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

EDUC 216 Education and Social Policy
Venzant
An examination of education policy and of how it is formulated, implemented, and evaluated. We will study the development and interaction of policies at the federal, state, and local level, and trace the trend from law-driven to accountability-based school reforms. We will discuss major topics of debate in American education, including equal educational opportunity, school desegregation, school choice, bilingual education, special education, preschool education, and education standards and testing. Relevant field placement may be arranged as part of this course, especially for students wishing to fulfill requirements for teacher certification.
Prerequisite: Open to sophomores, juniors, and seniors
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

EDUC 218 Race and Education
NOT OFFERED IN 2006-07. An historical and contemporary examination of how race affects the educational opportunities, experiences, and outcomes of African American, Latino, Native American, and Asian American students in elementary, secondary, and postsecondary institutions. We will explore the challenges these groups confront in the pursuit of quality education and the conditions necessary to foster their success. We will focus on the structural, cultural, and psychological factors that affect the responses of students of color in schools.
Prerequisite: Open to sophomores, juniors and seniors
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

EDUC 250 Research or Individual Study
Prerequisite: Permission of the department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

EDUC 250H Research or Individual Study
Prerequisite: Permission of the department.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

EDUC 300 Teaching and Curriculum in Classroom Settings
Hawes, Speiser
An intensive study of the knowledge and skills required in classroom teaching, including curriculum development, planning, instruction, testing, and assessment. We will focus especially on classrooms as learning environments and on teacher understanding of student academic development. Additional laboratory periods for teaching presentations and an accompanying field placement are required.
Prerequisite: One of 102, 117, 212, 215, 216, 218, PSYC 248, or MAT 11, 12, or other approved course, by permission only; students must apply for admission.
Distribution: Epistemology and Cognition
Semester: Fall
Unit: 1.25

EDUC 301 Theory and Practice of Early Childhood Care and Education
NOT OFFERED IN 2006-07. An examination of rationales for different approaches to early child care and education and exploration of current teaching methods. Emphasis will be on understanding and providing for the diverse needs of young children in group settings. We will study critical issues in learning, with particular attention to cognitive, developmental, and other curriculum topics. Relevant observations and fieldwork will be required.
Prerequisite: PSYC 267 or PSYC 248 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

EDUC 302 Seminar. Methods and Materials of Teaching
Speiser, Hawes
Selection and observation of teaching techniques, the role of the teacher, classroom interaction, and individual and group learning. Examination of curriculum materials and classroom practice in specific teaching fields.
Prerequisite: 300 and by permission of Department. Open only to students doing student teaching.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

EDUC 303 Practicum. Curriculum and Supervised Teaching
Speiser, Hawes
Observation, supervised teaching, and curriculum development in students’ teaching fields throughout the semester. Attendance at an appropriate school placement required full-time, five days a week. Mandatory credit/noncredit.
Prerequisite: Students must apply to the Department for admission to this course in the semester before it is taken.
Corequisite: 302
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

EDUC 304 Curriculum and Instruction in Elementary Education
Speiser, Cuoniff, Friedman, MacPherson, Tutin
A seminar taught by a team of experienced teachers. This course focuses on curriculum and instructional materials used in elementary school classrooms, and on the teaching of social studies, writing, the arts, health, and physical education. The teaching of mathematics and science are also introduced. Note: Mandatory only for those seeking elementary education certification.
Prerequisite: 300, by permission of Department.
Distribution: Epistemology and Cognition
Semester: Fall
Unit: 1.0

EDUC 305 Curriculum, Instruction, Assessment, and Special Needs in Elementary Education
Speiser, Cuoniff, Friedman, MacPherson, Tutin
A seminar taught by a team of experienced teachers. A continuation of EDUC 304, this course focuses on curriculum materials and instructional methods in mathematics and science used in elementary school classrooms, and on various methods for assessing elementary school students’ performance and achievement. Strategies for behavior management for dealing with students with disabilities and special needs, and for working with parents and the community will also be addressed, along with other classroom issues.
Prerequisite: 300, 304.
Distribution: Epistemology and Cognition
Semester: Spring
Unit: 1.0

EDUC 307 Classroom Ethnography and Discourse Analysis
Dare (Spanish)
NOT OFFERED IN 2006-07. Classroom culture is made up of interactions among teachers and students. These interactions can be analyzed through data collection and coding of different types of incidents and behaviors. In this course, students will learn ethnographic methods, including the use of video and audio recording, transcription, domain analysis, and other research techniques to construct and present a portrait of the teaching and learning opportunities in individual classrooms. We will take a close look at how ethnicity, gender, and socioeconomic status are reflected in patterns of classroom talk and how these variables influence student learning.
Prerequisite: One course in education, PSYC 248, or by permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

EDUC 308 Seminar. World Languages Methodology
Renjilian-Burgy (Spanish)
NOT OFFERED IN 2006-07. A course in the pedagogical methods of foreign languages intended to apply to any foreign language and to teaching English as a second language; emphasizes the interdependence of the four language skills—listening, speaking, reading, writing—and introduces students to a theoretical study of linguistic and psychological issues necessary to evaluate new ways of presenting language material. This seminar will focus on selected texts and readings on the methodology of world-language teaching.
Prerequisite: Open to sophomores, juniors and seniors.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

EDUC 310 Seminar. Child Literacy and the Teaching of Reading
Tutin, Speiser
An examination of how children learn to read, acquire reading, writing, and oral language skills, and how this relates to cognition. We will focus on current research and practice in literacy development for elementary-aged children. Oral language, reading processes, assessment using a variety of techniques, phonemic awareness, phonics, and comprehension strategies will be addressed through lectures, readings, study of literacy materials, and a weekly field placement...
experience. We will study reading instruction across content areas and the transition from learning to read to reading to learn. Emphasis will be placed on understanding the application of this information for developing teaching strategies that address the needs of a diverse population of learners, including students at-risk, second-language learners, and students with special needs. This course is structured to support students pursuing elementary student teaching licensure.

Prerequisite: Open to sophomores, juniors, and seniors with permission of the instructor.
Distribution: Epistemology and Cognition
Semester: Fall  Unit: 1.0

EDUC 312 Seminar: History of Childhood and Child Welfare
Beatty
An examination of changes in concepts of childhood in America, of the family, and of the emerging role of the state in assuming responsibilities for child rearing, education, and child welfare. We will study the history of how institutions and social policies have attempted to shape the lives of children of differing genders, economic, racial, cultural, and ethnic backgrounds, and of the development of children's material culture.
Prerequisite: Open to sophomores, juniors, and seniors.
Distribution: Historical Studies
Semester: Spring  Unit: 1.0

EDUC 315/AFR 315 History of African American Education
Venzant
An examination of the history of African American education through the lens of school desegregation, placing issues within the larger framework of access and opposition. We will study the context of the landmark Brown v. Board of Education U.S. Supreme Court case, the conditions and actions that led to the ruling, the ensuing era of contested implementation, and the legacy of Brown in contemporary education policies. Legal, sociological, and policy perspectives will be used to examine how African American communities persevered through the complex era of school desegregation, and how the struggle for integration shifted but did not cease with desegregation. Students may register for either EDUC 315 or AFR 315 and credit will be granted accordingly.
Prerequisite: One 100- or 200-level Education course
Distribution: Historical Studies
Semester: Fall  Unit: 1.0

EDUC 319 Seminar: Reforming Public Schools
NOT OFFERED IN 2006-07:
An examination of federal, state, and local policies to reform American public schools. We will evaluate past and current large-scale strategies to transform the organizational, curricular, and instructional capacity of schools. We will focus on whether such changes have improved student access, engagement, and outcomes. The influence of race, class, and gender will be considered. Topics to be covered include models of comprehensive school reform, detracking, standards-based education, high-stakes testing, and the small schools movement.
Prerequisite: One 200-level Education course, or by permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/A  Unit: 1.0

EDUC 320 Observation and Fieldwork
Hawes, Speiser
Observation and fieldwork in educational settings. This course may serve to complete the requirement of documented introductory field experiences of satisfactory quality and duration necessary for teacher certification. Arrangements may be made for observation and tutoring in various types of educational programs at least one urban field experience is required. Mandatory credit/ noncredit.
Prerequisite: Permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring  Unit: 1.0

EDUC 339/PSYC 339S Seminar: The Politics of Urban Public Schools
Rich
This seminar examines recurrent issues in public school management and governance. Critical questions include the changing demographics of inner city schools, the evolving role of school boards, big city mayors, urban superintendents, teachers' unions, and school finance. We will also discuss alternatives to public schools (parochial, private, and charter schools), high-stakes testing, and district-state relations. The seminar will also analyze the increasing intervention of state and federal governments in local school administration and the role of the courts in curricular controversies, student life, and security. Students may register for either EDUC 339 or PSYC 339S and credit will be granted accordingly.
Prerequisite: One 100-level Education course or one 200-level American politics course
Distribution: Social and Behavioral Analysis
Semester: Spring  Unit: 1.0

EDUC 350 Research or Individual Study
Prerequisite: Open to seniors by permission.
Distribution: None
Semester: Fall, Spring  Unit: 1.0

EDUC 350H Research or Individual Study
Prerequisite: By permission of the department.
Distribution: None
Semester: Fall, Spring  Unit: 0.5

QR 180 Statistical Analysis of Education Issues

Directions for Election
The education department offers two minors (but no major), one in teacher education and one in education studies. Both minors offer opportunities to explore teaching and education, from the perspective of a classroom teacher or as a field of study.

Teacher Education
We prepare teachers to teach in a variety of schools with diverse students. Grounded in the liberal arts, each Wellesley or MIT student in our program receives careful individual attention in the process of discovering how her/his own special gifts can be used in the challenging work of teaching. Our students take introductory courses in educational philosophy, history, of policy, and then do coursework in curriculum, instruction, and assessment, and specific methods for teaching reading and elementary school subjects or middle and high school subjects, along with doing fieldwork and student teaching.

The Teacher Education minor consists of:
(A) 102 or 117 or 212 or 215 or 216 or 218, or 301 or 315 or PSYC 248, or MIT 1124 or other approved course;
(B) PSYC 207 or 208, and (C) 300, 302, and 303. For students seeking elementary certification, 304, 305, and 310 or Brandeis Education 107A (spring only), are also required. Students are strongly encouraged to take at least one 200-level course.

Students who wish to be certified as high school (grades 8-12), middle school (grades 5-8), or elementary (grades 1-6) teachers should obtain the department's description of the requirements. Generally, the program requires students to take specific subject-matter courses within their teaching fields along with four to seven education and psychology courses, two of which are the student teaching practicum (303) and accompanying seminar, (302). If students are not able to register for required introductory courses, they should consult with the Department about alternatives.

In addition, teacher certification requires fieldwork prior to student teaching. Students enrolled in EDUC 303 (Practicum) may register for EDUC 320, but are not required to do so. Students are encouraged to apply by April 1st or at least a week before pre-registration but may apply any time up to the beginning of classes in the fall. Applications are available in the Education Department. Students should plan their program of studies to fulfill the requirements and are encouraged to consult with a member of the Department as early as possible, but are welcome to do so at any point. Students may register for a minor beginning in the spring of the sophomore year, but a minor is not required for teacher licensure. With the exception of 300, 302, 303, 304, 305, and 320 the Department's courses are designed for all students, not simply those planning a career in public or private school teaching.

Education Studies
We also offer courses that extend students' general knowledge of education as a field of study. Students may focus on the origins of education and child rearing practices, on urban education and the role of schools in society; on race and education, on multicultural education, on school reform, and on the various ways that ideas and policies in education have been applied to social problems.
The Education Studies minor consists of five courses chosen from: EDUC 102, [115], 117, 212, 215, 216, 218, 301, 307, 312, EDUC 315/AFR 315, 319, and EDUC 339/PSY 339S. However, AMST 101, PSYC 248, ECON 326, or QR 180 may be substituted for two of these courses. At least one 300-level education course must be included.

**Title II Information**
As required by Title II of the Higher Education Act of the United States, we provide the following information. The number of students enrolled in our state-approved teacher education programs during academic year 2004-2005 was 34. The number of these students who continued into student teaching was 31. The number who completed all requirements of the program was 23. The student/faculty ratio for supervised student teaching was 5:2. The average number of required hours of student teaching is 360 (12 weeks of at least 30 hours per week). The minimum required is 300.

The pass rates for our students on the Massachusetts Tests for Education Licensure are: 1.) Basic skills: a.) Reading 100% (compared to a statewide average of 100%) b.) Writing 100% (state average 99%); Basic skills aggregate (a & b combined) 100% (state average 99%); 2.) Academic content areas: Aggregate 100% (compared to state average of 98%). Summary (1. & 2. Combined) pass rate 100% (compared to state average of 96%). Please note that these tests are not required for completion of our program, because many candidates seek licensure only in other states.

### Department of English

**Professor:** Bidart, Sabin, Cain (Chair), Peltsou, Rosenwald, Lynch, Shirley, Meyer

**Associate Professor:** Tyler, Brogan, Hickey, Ko, Lee, N. Noggle

**Assistant Professor:** Rodensky, Ford, Wall-Randall, Fisher

**Visiting Assistant Professor:** Erian, Chiassou

**Senior Lecturer:** Sides, Cezair-Thompson

**Visiting Writer:** Misha

**ENG 112 Introduction to Shakespeare**

**KO**

Study of a number of representative plays with emphasis on both their poetic and theatrical aspects. Literary analysis will thus be accompanied by viewing and thinking about the plays in performance.

**Prerequisite:** None. Especially recommended to non-majors.

**Distribution:** Arts, Music, Theatre, Film, Video or Language and Literature

**Semester:** Spring

**Unit:** 1.0

**ENG 113 Studies in Fiction**

**Topic A: The World of Fiction**

A reading of some of the most deeply valued, highly unsettling, and scandalously entertaining works of English and world literature, such as: Rabelais' *Gargantua and Pantagruel*, Bronte's *Jane Eyre*, Bram Stoker's *Dracula*, Dostoyevsky's *Brothers Karamazov*, and Chinua Achebe's *Things Fall Apart*. This course is designed for both English and non-English majors; the writing component will thus be intensive.

**Prerequisite:** None. Especially recommended to non-majors.

**Distribution:** Language and Literature

**Semester:** Fall

**Unit:** 1.0

**Topic B: Fantastic Fictions**

**Sides**

When fiction blurs or crosses the line between our "real" world and "other worlds," the reader (as well as the narrator or main character) has entered the realm of "the fantastic," a genre (which broadly interpreted) contains "the uncanny," "the supernatural or ghost story," and "science fiction." We will read "fantastic" novels and short fiction by nineteenth-century, twentieth-century, and twenty-first century masters from Europe, Japan, North and South America. Taught primarily in lecture, this course will not be writing-intensive.

**Prerequisite:** None. Especially recommended to non-majors.

**Distribution:** Language and Literature

**Semester:** Spring

**Unit:** 1.0

**ENG 114 Masterworks of American Literature**

**Ford**

American literature contains an astonishing myriad of voices and forms. This course introduces students to highlights and counter-currents of the American tradition. Featuring guest lectures from faculty members in the English Department, the course will span the colonial period to the present. We will read fiction, essays, drama, poetry, and autobiography, devoting time to the "greats" whom students may have already encountered, and to lesser known and more recent authors. The reading list likely will include: Rowlandson, Native American stories and myths, Emerson, Melville, Douglass, Whitman, Dickinson, Twain, Fitzgerald, Hughes, Hurston, Wharton, Faulkner, Williams, Ginsberg and the Beats, Plath, contemporary Asian-American and Hispanic poets, and Morrison — and creative writers on Wellesley's own faculty. Films, music, and visual arts will also figure prominently in the course.

**Prerequisite:** None. Especially recommended to non-majors.

**Distribution:** Language and Literature

**Semester:** Spring

**Unit:** 1.0

**ENG 120 Critical Interpretation**

**Peltsou, Bidart**

A course designed to increase power and skill in critical interpretation by the detailed reading of poems and the writing of interpretive essays.

**Prerequisite:** None. Primarily designed for, and required of, English majors. Ordinarily taken in first or sophomore year.

**Distribution:** Language and Literature

**Semester:** Fall, Spring

**Unit:** 1.0

**ENG 120/WRIT 125 Critical Interpretation**

**Hickey, Rodensky, Wall-Randall, Chiassou, Sabin, Shirley**

A course designed to increase power and skill in critical interpretation by the detailed reading of poems and the writing of interpretive essays. This course satisfies the WRIT 125 requirement and the critical interpretation requirement of the English major. Includes a third session each week.

**Prerequisite:** None. Open only to first-year students.

**Distribution:** Language and Literature

**Semester:** Fall, Spring

**Unit:** 1.0

**ENG 202 Poetry**

**Bidart**

A workshop in the writing of short lyrics and the study of the art and craft of poetry. **Enrollment limited to 15 students.**

**Prerequisite:** None

**Distribution:** Language and Literature

**Semester:** Fall

**Unit:** 1.0

**ENG 203 Short Narrative**

**Cezair-Thompson, Erian, Sides**

A workshop in the writing of the short story; frequent class discussion of student writing, with some reference to established examples of the genre. **Enrollment limited to 15 students. Mandatory credit/noncredit. Students who have taken this course once may register for it one additional time.**

**Prerequisite:** None

**Distribution:** Language and Literature

**Semester:** Fall, Spring

**Unit:** 1.0

**ENG 204 The Art of Screenwriting**

**Erian, Cezair-Thompson**

A creative writing course in a workshop setting for those interested in the theory and practice of writing for film. Ms. Cezair-Thompson's course focuses on the full length feature film, both original screenplays and screen adaptations of literary work, while Ms. Erian's course focuses on the short film. Work includes writing scripts, analyzing films, and comparative study of literary works and their film adaptations. **Enrollment limited to 15 students. Mandatory credit/noncredit. Students who have taken this course once may register for it one additional time.**

**Prerequisite:** None

**Distribution:** Language and Literature

**Semester:** Fall, Spring

**Unit:** 1.0
ENG 205 Writing for Children
Meyer
What makes for excellence in writing for children? When Margaret Wise Brown repeats the word "moon" in two subsequent pages—"Goodnight moon, Goodnight cow jumping over the moon"—is this effective or clunky? What makes rhyme and repetition funny and compelling in one picture book (such as Rosemary Wells's *Noisy Nena*) but vapid in another? How does E.B. White establish Fern's character in the opening chapter of *Charlotte's Web*? What makes Cynthia Kadotah's *Kira-Kira* novel for children rather than adults—or is it one? In this course, students will study many examples of children's literature from the point of view of writers and will write their own short stories. Prerequisite: None
Distribution: Language and Literature Semester: Fall, Spring

ENG 213 Chaucer
Lynch
When we look back on the Middle Ages, we are faced with two equally alluring but mutually exclusive temptations: to see medieval people as being very much like us, or to see them as radically different. We will keep these temptations (and pleasures) in mind as we read the works of Geoffrey Chaucer, focusing on texts representing romantic and carnal love across genres: the dream vision, the fabliau, the laty, and, of course, the romance itself. Our task will be to work out an understanding of Chaucer's works within their late medieval setting and against our contemporary experiences. Critical issues include the relationship of author to text; the self-conscious and self-reflective narrator; problems of influence and genre; and medieval constructions of race, class, and gender.
Prerequisite: None
Distribution: Language and Literature Semester: Spring

ENG 222 Renaissance Literature
Wall-Randell
A survey of sixteenth-century literature with an emphasis on poetry. In addition to lyric poems spanning the century, epic poetry by Spenser (*Book 3 of *The Faerie Queene*) and Marlowe, and a play, the course will include early prose fiction about continental travel and London's criminal underworld.
Prerequisite: None
Distribution: Language and Literature Semester: Fall

ENG 223 Shakespeare Part I: The Elizabethan Period
Cain, Shelley
The formative period of Shakespeare's genius: comedies such as *A Midsummer Night's Dream*, *As You Like It*, *Merchant of Venice*, and *Twelfth Night*; histories such as *Richard III*, *Richard II*, *Henry IV* (Parts 1 and 2); tragedies such as *Romeo and Juliet*, *Julius Caesar*, *Titus Andronicus*, and *Hamlet*. Discussion of thematic concerns (ranging from gender relations and identities to national self-consciousness) will proceed from detailed analysis of not only the poetic language but also the dramatic form of the plays and the performance practices of Shakespeare's time. The viewing and analysis of contemporary performances will be integrated into the work of the course.
Prerequisite: 120
Distribution: Language and Literature Semester: Fall

ENG 224 Shakespeare Part II: The Jacobean Period
Ko, Wall-Randell
The great tragedies and the redemptive romances from the end of Shakespeare's career, chosen from among *Troilus and Cressida*, *Measure for Measure*, *Othello*, *King Lear*, *Macbeth*, *Coriolanus*, *Antony and Cleopatra*, *Cymbeline*, *The Winter's Tale*, and *The Tempest*. While considering thematic concerns ranging from gender relations to the meaning of heroism, particular focus will fall on tragic form and its transformation in the romances. Extensive attention will be paid to theatrical practices, Shakespearean and contemporary, aided by the viewing of stage performances and film adaptations.
Prerequisite: 120
Distribution: Language and Literature Semester: Spring

ENG 225 Seventeenth-Century Literature
NOT OFFERED IN 2006-07
Authors of the seventeenth century, one of the most inventive periods of English literature, are known for their ability to link the religious and the erotic, the speculative and the political, the stately and the passionate in exhilarating, complex, and innovative works of poetry and prose. Authors will include John Donne, Ben Jonson, Amelia Lanyer, George Herbert, Francis Bacon, Robert Herrick, Andrew Marvell, Katherine Philips, and Margaret Cavendish. Close reading of their texts will produce understanding of them and of the early modern period in which they were written and will raise questions that continue to haunt us today about our relation to the divine, to our bodies, to our past (personal and cultural), to the natural world, to the state, and to each other.
Prerequisite: None
Distribution: Language and Literature Semester: Spring

ENG 227 Milton
Wall-Randell
At the heart of this course will be a study of Milton's great epic poem, *Paradise Lost*, and some of its encyclopedic concerns: the place of humankind in the universe, the idea of obedience, the subjectivity of women, even the issue of literary adaptation itself. But Milton was a keen student of the whole spectrum of Renaissance forms, mastering and redefining them in virtuosic turns: as we'll see, his work includes religious psalms. Lyric poetry, elegy, courtly entertainment, tragedy, and polemic. We'll also consider Milton's "afterlives," as an inspiration to the American Puritans and revolutionaries, as an influence on the Romantic poets, and as a continuing presence for modern writers such as the fantasy novelist Philip Pullman.
Prerequisite: None
Distribution: Language and Literature Semester: N/O

ENG 234 Restoration and Eighteenth-Century British Literature
Noggle
The Enlightenment has been understood as the effort by Europeans in the eighteenth century to establish definitions of reason, progress, and human nature applicable to everybody, every culture, universally. It also corresponds with the great expansion of European imperialism, the rise of capitalism, and the fraught increased participation of women in social and intellectual life. Such actualities challenge Enlightenment ideals in ways dramatized in the most vibrant British writing of the period. This course presents major authors, including Jonathan Swift, Alexander Pope, and Samuel Johnson, as well as lesser known ones such as Aphra Behn, Mary Wrothley Montagu, and Mary Leapor, to reveal the madness shadowing the Enlightenment's rationality, the contradictions in its revision of gender roles, and the violence at times attending its universalism.
Prerequisite: None
Distribution: Language and Literature Semester: Spring

ENG 241 Romantic Poetry
Hickey
Emphasis on the great poems of six fascinating and influential poets: Blake, Wordsworth, Coleridge, Shelley, Byron, and Keats. As time allows, we'll read women poets of the period: Anna Barbauld, Mary Robinson, Dorothy Wordsworth, and Felicia Hemans. We'll consider such Romantic ideas and themes as imagination, feeling, originality, the process of cognition and creativity, the correspondence between self and nature, the dark passages of the psyche, encounters with otherness, altered states of being, morality and immortality, poetry and revolution, Romanticism as revolt, the exiled hero, love, sexuality, gender, the meaning of art, and the importance of history. Open to students at all levels of familiarity with poetry.
Prerequisite: None
Distribution: Language and Literature Semester: Fall

ENG 245 Victorian Poetry: Eminence and Decadence
Hickey
Victorian poets stand among the most memorable and best-loved in all of English verse: they're evocative, emotionally powerful, idiosyncratic, psychologically loaded, intellectually engaged, daring, inspiring, and bizarre. We'll study Tennyson, the Brownings, Emily Brontë, the Rossettis, Arnold, Hopkins, and Hardy, with attention to their technique and place in literary history. Themes will include the power and limits of language, tradition and originality, love and sexuality, gender roles, the literary expression of personal crisis, religious faith and doubt, evolution, industrialism, and the role of art. Supplementary prose readings and forays into art history will illuminate literary, aesthetic, and social contexts, particularly those surrounding the Woman Question, female authorship, and representations of female figures. Pre-Raphaelite slides, Special Collections visits, viewing of Wilde's *Importance of Being Earnest*.
ENG 251 Modern Poetry
Brogan
A study of the modernist revolution and its aftermath, emphasizing its stunning achievements and deep divisions. Examination of the different versions of modernism that emerged in the beginning of the twentieth century, exploration of lines of influence that link poets, and consideration of the trajectories of individual careers. Close attention to how the work of the period's leading poets – William Butler Yeats, T.S. Eliot, Wallace Stevens, William Carlos Williams, Marianne Moore, Langston Hughes, among others – reflects and responds to a period of extraordinary political and social turbulence.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 253 Contemporary American Poetry
Bidart
We will explore recent American poetry through close study of a number of outstanding individual volumes – Elizabeth Bishop's Geography III, Robert Lowell's Life Studies, Allen Ginsberg's Howl, Frank O'Hara's Lunch Poems, Sylvia Plath's Ariel, Adrienne Rich's Diving into the Wreck, John Ashbery's Self-Portrait in a Convex Mirror, Louise Glück's Meadowlands, Robert Pinsky's The Figured Wheel, Rita Dove's Thomas and Beulah, Iorcí Graham's The Dream of the Unified Field, Yusef Komunyaka's Dien Cai Dau, among others – as well as discussion of radical challenges to mainstream conceptions of the nature of poetry (e.g., "language poetry"). The aim is not a survey, but an exploration of the achievement of individual authors and volumes in the context of aesthetic innovation.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ENG 262 American Literature to 1865
Fisher
A study of American fiction, poetry, and autobiography from the early nineteenth century to the Civil War, focusing on the diverse and original voices that emerged during the period in New England and elsewhere. The course will explore the first major flowering of American literary art, focusing on such themes as constructions of the self, gendered domesticity, literary visions of nature, and the abolition of slavery. Authors will include Frederick Douglass, Ralph Waldo Emerson, Henry David Thoreau, Nathaniel Hawthorne, Harriet Jacobs, Harriet Beecher Stowe, Emily Dickinson, Walt Whitman, and Herman Melville.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 263 American Literature and Social Justice
NOT OFFERED IN 2006-07. A study of some American literature dealing with questions of justice and injustice in the relations between races, ethnic groups, genders, and classes. Among the possible authors and works: Harriet Beecher Stowe, Uncle Tom's Cabin; Edward Bellamy, Looking Backward; Charlotte Perkins Gilman, Herland; Upton Sinclair, The Jungle; Jane Addams's autobiography; Marc Blitzstein, The Cradle Will Rock; poems by the Sacco and Vanzetti case; poems by Sterling Brown, Langston Hughes, and Gwendolyn Brooks; John Steinbeck, The Grapes of Wrath; works from the Japanese internment camps; plays by the Teatro Campesino; essays by James Baldwin; Arthur Miller, The Crucible; poems and essays by Adrienne Rich; Lorraine Hansberry, Raisin in the Sun; Anna Deveare Smith, Twilight; Spike Lee, Do The Right Thing; current science fiction and utopian writing.
Prerequisite: None
Distribution: Language and Literature or Religion, Ethics and Moral Philosophy
Semester: N/O
Unit: 1.0

ENG 264 Hispanic Literature in the United States
NOT OFFERED IN 2006-07. This course will highlight the tendency, diversity, and growing prominence of Latina/o literature in the United States, concentrating especially on the twentieth century. Organizing our readings by genre, we will study Latina/o/o texts written in English, using Latina/o/o cultural identity as the context for the literary works. Theoretical readings will help to locate the writings within the historical, philosophical, artistic, and performative traditions of this literature. All readings and discussion in English.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ENG 266 American Literature from the Civil War to the 1930s
Fay, Catin
A selection of literature from the period between the Civil War and the Great Depression, tracing the trajectory of American fiction from realism to high modernism. Emphasis on the ways that these texts invite and respond to questions about economics, social justice, sexual politics, and the role of literature in society. Attending closely to nuances of authorial style, classroom discussion will also consider each work in light of the ongoing debate between realism and formalism in art. Authors to be read will likely be drawn from the following: Twain, James, Crane, Roth, Chesnutt, Chopin, Dreiser, Wharton, Gilman, Stein, Anderson, Toomer, Yeizerska, Fitzgerald, Hemingway, Faulkner, Wright, and Hurston.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

ENG 267 American Literature from the 1940s to the Present
Chasson, Pelton
American literature from World War II to the present. Consideration of fiction, poetry, memoirs, essays, and films that reflect and inspire the cultural upheavals of the period. Possible writers to be studied include: Mailer, Morrison, Pynchon, Lowell, Bishop, Ginsberg, Burroughs, Nabokov, Ellison, Carver, Kingston, Roth, O'Connor, DeLillo, Salinger, Morrison, Schwartz, DeRosa, Smiley, Keller, McDermott, Lahiri, and Spark.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

ENG 269 Asian American Literature
NOT OFFERED IN 2006-07. We will be reading novels and short stories by Asian American writers, including Maxine Hong Kingston, Joy Kogawa, Ha Jin, Susan Choi, Wang Ping, Fa Ng, and Jhumpa Lahiri. Looking at works from the 1930s to the present moment, we will focus on themes of travel, mobility, arrivals and departures. What defines homelessness? What constitutes a home? When and where does a feeling of ordinariness or the everyday arise? And how do the experiences of male and female immigrants compare with each other? These are only some of the questions that we will consider as we explore this rich and exciting body of literature.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ENG 270 Experiencing London Then and Now
NOT OFFERED IN 2006-07. This Wintersession course examines how people self-consciously experienced the city of London in the eighteenth century, and how we experience it today. Walking, watching, getting lost in crowds and experimenting with identity were crucial then, as we see in writers ranging from James Boswell to Frances Burney, and remain important today, despite obvious changes in London's scale and organization. We will read works by Addison, Boswell, Gay, Burney, and others, and then spend around 12 days in London, visiting some of the same sites (theaters, parks, churches) and following some of the same itineraries. What continuities and discontinuities are there between eighteenth-century and post-modern urban experiences? Not offered every year. Subject to Dean's Office approval.
Prerequisite: None. Application required.
Distribution: Language and Literature
Semester: N/O
Unit: 0.5

ENG 271 The Rise of the Novel Sides
A study of how the genre of the novel begins in forgeries, poses as real documents and letters, and eventually evolves itself as a kind of literature uniquely suited to modern society. There will be a particular emphasis on the novel's enduring fascination with outcasts, women, and criminals, the choices they make and the rewards and punishments they receive. Authors include Behn, Defoe, Richardson, Godwin, and Austen.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ENG 272 The Victorian Novel
Meyer
An exploration of the changing relationships of persons to social worlds in some of the great novels of the Victorian period. The impact on the novel of industrialization, the debate about women's roles, the disfranchisement of the middle and the working classes, the effect on ordinary persons of life in the city, the commodification of culture – these and other themes will be traced in the works of some of the following: Charlotte Brontë, Emily Brontë, Charles Dickens, George Eliot, Elizabeth Gaskell, George Gissing, Thomas Hardy.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0
ENG 273 The Modern British Novel
Rodents
A consideration of the ways in which modernist writers reimagine the interests of the novel as they experiment with and reshape its traditional subjects and forms. From the frank exploration of sexuality in Lawrence, to the radical subordination of plot in Woolf, modernist writers reframe our notion of the writer, of story, of the very content of what can be said. A selection of works by E.M. Forster, D.H. Lawrence, James Joyce, Virginia Woolf, Jean Rhys, and Joseph Conrad.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ENG 277 Modern Indian Literature
Subin
Focus on novels, memoirs, and nonfiction writing—mostly contemporary, with some earlier examples of what now begins to make up a tradition of modern Indian literature in English. Controversial questions to be addressed include: what is “authentically” Indian? What is the writer’s responsibility to solve social and political problems? What roles do women play in this literature? Introduction to important religious and political contexts will be provided, but primary attention will go to the literature itself, with some attention to films. Authors will likely include Gandhi, R.K. Narayan, Raja Rao, Anita Desai, Salman Rushdie, Bapsi Sidhwa, Rohinton Mistry, Jhumpa Lahiri, plus films directed by Satyajit Ray and Deepa Mehta.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ENG 281 American Drama and Musical Theater
Rosenwald
Study of some distinguished twentieth-century American plays, theater pieces, and musicals. Possible musicals: The Cradle Will Rock, Showboat, West Side Story, Chorus Line, Into the Woods, Chicago. Possible playwrights and ensembles: Eugene O'Neill, Arthur Miller, Tennessee Williams, Lorraine Hansberry, the Bread and Puppet Theater, the Teatro Campesino, Maria Irene Fornes, August Wilson, David Henry Hwang, Tony Kushner, Anna Deavere Smith. Focus on close reading, on historical and social context, on realism and the alternatives to realism, on the relations between text and performance. Opportunities both for performance and for critical writing. Students who have taken ENG [127] are eligible to take this course also.
Prerequisite: None
Distribution: Arts, Music, Theater, Film, Video or Language and Literature
Semester: Spring
Unit: 1.0

ENG 283 Southern Literature
Tyler
A study of the literature of the American South, with special focus on the region’s unique cultural traditions, the development of a distinctive body of stylistic and thematic characteristics, and the complex intersections of region, gender, ethnicity, and sexuality in Southern literary expression.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ENG 286 New Literatures I
Fisher
Topic for 2006-07: Lesbian and Gay Writing from Sappho to Stonewall. This course will explore significant lesbian and gay literature from classical times to the present, including contemporary transformations of society, politics, and consciousness. The course will introduce elements of “queer theory” and gender theory; it will address issues of sexual orientation and sexual identification in works of poetry, autobiography, and fiction. Readings will include such writers as Sappho, Plato, William Shakespeare, Thomas Mann, Virginia Woolf, James Baldwin, Andre Lorde, Adrienne Rich, David Leavitt, Leslie Feinberg, Shyam Selvadurai, and Jeanette Winterson.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ENG 301 Advanced Writing/Fiction
Erian
A workshop in the techniques of fiction writing together with practice in critical evaluation of student work. Students who have taken this course once may register for it one additional time. Mandatory credit/noncredit.
Prerequisite: 203 or permission of instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 302 Advanced Writing/Poetry
Biddart
A workshop in intensive practice in the writing of poetry.
Prerequisite: 202 or permission of instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 315 Advanced Studies in Medieval Literature
Lynch
Topic for 2006-07: Dream Visions and Other Poems. Study of Chaucer’s early poetry, especially his dream visions. We will balance attention to the exquisite pathos of the dream poems with consideration of their deepening irony and humor, looking at how Chaucer mixes styles and plays fast and loose with his sources. Chaucer could be alternately coy, stern, tender, bawdy, or droll as he recorded the world he saw in lyric and visionary form. This sophisticated mixture of tones presented a particular challenge to writers in the generations that directly succeeded the “father of English poetry,” when most of his “sons” were near to being paralyzed in their genial “master’s” shadow. We will trace the poet’s influence in his own time and in the two hundred years that followed.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 320 Literary Cross Currents
Topic A for 2006-07: Gotham: New York City in Literature and Art
Brogan
This course examines that icon of modernity, New York City, as it appears in American literature from the 1850’s to the present. In our readings of novels, short stories, poetry, and essays, we’ll consider how depictions of urban life express the city’s social geography and help to shape the cultural meaning of the metropolis. We will consider how richly varied interpretations of New York contribute to a national discussion about American identity, modernity, immigration, and the commercial. Authors will
ENG 325 Advanced Studies in Sixteenth- and Seventeenth-Century Literature

NOT OFFERED IN 2006-07.
Prerequisite: Open to students who have taken two literature courses in the department, at least one of which must be 200 level, or permission of instructor to other qualified students.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ENG 335 Advanced Studies in Restoration and Eighteenth-Century Literature

Tyler

Topic for 2006-07: Boswell, Johnson, Sterne, Burke. Three vital, preposterous books, with three personages—and one scurrilous sidekick—to match: a wild novel, *Tristram Shandy* (1760-67), influential on Joyce’s *Ulysses* and Rushdie’s *Midnight Children*, written by the naughty but sentimental clergyman Laurence Sterne; a furious prophecy, *Reflections on the Revolution in France* (1790), written by England’s greatest arguer Edmund Burke; and a biography of the century’s main genius, *Life of [Samuel] Johnson* (1791), written by James Boswell, a compulsive sensualist and self-chronicler by night and Dr. Johnson’s loyal protégé by day. The course will, among other tasks, test the notion that the late-eighteenth century is home to the most intense compound of learned seriousness and hysterical eccentricity that English has to offer.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 345 Advanced Studies in Nineteenth-Century Literature

Hickey

Topic for 2006-07: Keats and Shelley. Intensive study of the writings of these two great Romantic poets, from juvenilia to the famous odes, from sonnets and brief lyrics to dramas, poetic romances, epics, elegies, fragments, essays, letters, and more. Close attention to language, style, relations between poetic form and meaning, the notion of a poetic career, the place of biography, the role of politics, issues of gender and sexuality, and historical and literary contexts. Keats and Shelley as readers of each other and of literary precursors, as theorists of poetry, and as an influence on subsequent poets. We’ll also read Mary Shelley’s *Frankenstein*, other pertinent works by Keats’s and Shelley’s contemporaries, and some recent criticism.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 350 Research or Individual Study

Prerequisite: Open to qualified students by permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ENG 350H Research or Individual Study

Prerequisite: Open to qualified students by permission of instructor. Two or more 200- or 300-level units in the department are ordinarily a prerequisite. Students with a GPA of 3.33 or higher in the major shall have first consideration.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ENG 351 Literary Reportage

Mishra

An advanced, intensive writing workshop in nonfiction writing. "Literary Reportage" refers to the spacious genre in which the special skills—technical precision, ability for physical description, and psychological insight—necessary for writing fiction are applied to real-life events and personalities. Some distinguished examples of literary reporters are George Orwell, Mary McCarthy, Elizabeth Hardwick, James Baldwin, Joan Didion, and V.S. Naipaul. Students are expected to work on a project of their choice over the summer. Subjects could range from the recent US Presidential election to the local beauty pageant. Internships and jobs might also provide interesting subjects and material.
Prerequisite: Open to qualified students by permission of instructor.
Distribution: None
Semester: Fall
Unit: 0.5

ENG 355 Advanced Studies in Twentieth-Century Literature

Sabin

Topic for 2006-07: *Ulysses*. Close reading of *Ulysses*, after preliminary engagement with *Dubliners* and *A Portrait of the Artist As A Young Man*. Aided by supplementary biographical and critical readings, attention will be paid to the complex effects of Joyce’s Irishness on his relation to modern English literature and language.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ENG 360 Senior Thesis Research

Prerequisite: By permission of the chair. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ENG 363 Advanced Studies in American Literature

Rosenwald

Topic for 2006-07: Multilingual America. A study of how American writers, in English but also in other languages, have represented the turbulently multilingual American scene. Focus on both the linguistic history and the literary representation of these crucial sorts of language encounter: between European Americans and Native Americans, between slaveholders and slaves, between immigrants and residents. For the first set of encounters, literary writers will include Roger Williams, James Fenimore Cooper, Leslie Marmon Silko, and Frances Karrtunen; for the second, Mark Twain, George Washington Cable, Alfred Mercier, and Zora Neale Hurston; for the third, Anzia Yezierska, Sholem Aleichem, Henry Roth, Jeanette Lander, Luis Valdez, and Dolores Prada.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0
ENG 364 Race and Ethnicity in American Literature
Ford
Topic for 2006-07: Black Writers, City Spaces. While American literature has long mythologized frontier and open space, African American literature from the Harlem Renaissance on has largely been defined by the cities it inhabits. This course will examine the portrayal of urban space in African American writing and visual art; from narratives of northward migration to contemporary films about inner city stagnation, we will trace the ways in which urban spaces have been gendered and classed, demonized or idealized by these texts and their readers. Substantial critical readings will provide additional context for our exploration of writers such as Paul Laurence Dunbar, Langston Hughes, Claude McKay, Nella Larsen, Richard Wright, Ann Petry, James Baldwin, Gwendolyne Brooks, Ralph Ellison, Chester Himes, Lorraine Hansberry, Nikki Giovanni, Toni Morrison, and Colson Whitehead.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students. Not open to students who have taken this course as ENG 320 in 2004-05.
Distribution: Language and Literature Semester: Fall Unit: 1.0

ENG 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None Semester: Fall, Spring Unit: 1.0

ENG 384 Outside England
Ceasar-Thompson
Topic for 2006-07: Heart of Darkness. An examination of written texts, news coverage, films, photography, and museum pieces that have shaped Western perceptions of Africa throughout the century. The central text will be Conrad's Heart of Darkness, written a hundred years ago and based on the atrocities witnessed by the author in the Congo. We will also examine works by Gordimer, and the writings of prominent Western journalists. Among the questions to be discussed are: How did the myth of "the dark continent" originate, and does that view of Africa persist today? How does contemporary journalism's images of genocide and other crises in Africa reconfigure earlier images of African "darkness" and "horror"? How do African writers and filmmakers influence Western perceptions of Africa and perhaps subvert the old myths and stereotypes? There will be close analysis of the language, structure, and style of these written and visual "texts," and of the historical background of colonialist and postcolonial literatures.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature Semester: Fall Unit: 1.0

ENG 385 Advanced Studies in a Genre
Shelley
Topic for 2006-07: Film Noir. Examination in depth of this genre of Hollywood filmmaking, characterized by pessimism, moral ambiguity, expressionist style. We will trace the evolution of noir cinema from its literary antecedents, through the "classic" period (1944-1955), into "New Hollywood" revisions of noir paradigms. Extensive readings in film history and theory to place the films within the cultural context of their period. Particular focus on the ways that noir negotiates between American and European cinematic styles, and on its representations of masculinity and femininity.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, and by permission of instructor to other qualified students.
Distribution: Arts, Music, Theatre, Film, Video Semester: Spring Unit: 1.0

ENG 387 Authors
Topic A for 2006-07: The Poetics of Gender in Whitman and Dickinson
Fisher
Both poetics and historical context will provide an in-depth exploration of the two most compelling poets of the nineteenth century in America. Though not limited to a single theme, the course will investigate the inventive articulations of gender in the poetry of Whitman and Dickinson, with attention to issues of transcendental selfhood, sexuality (including homosexuality), and gender definition in nineteenth-century America. Questions of gender will also illuminate innovations of poetic form, structure, and style in these writers' vibrant and unusual poems. Although the course will introduce critical and theoretical perspectives, it will center on careful readings of Dickinson's poems and letters and Whitman's Leaves of Grass and Democratic Vistas.
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of instructor to other qualified students.
Distribution: Language and Literature Semester: Fall Unit: 1.0

Directions for Election
Courses at the 100 level are open to all students and presume no previous college experience in the literary study. They provide good introductions to such study because of their subject matter or their focus on the skills of critical reading. ENG 120 (Critical Interpretation) is open to all students, but is primarily designed for prospective English majors. The course trains students in the skills of critical reading and writing. 200-level literature courses, with the exception of Shakespeare (223 and 224), are open to all students without prerequisite. They treat major writers and historical periods, and provide training in making comparisons and connections among different works, writers, and ideas. 300-
level literature courses encourage both students and instructors to pursue their special interests. They presume a greater overall competence, together with some previous experience in the study of major writers, periods, and ideas in English or American literature. They are open to all those who have taken two literature courses in the department, at least one of which must be 200 level, and by permission of the instructor or chair to other qualified students. For independent work (350), students with at least a 3.33 GPA in courses in the department will have first consideration. Students are encouraged to confer with the instructors of courses in which they are interested. Students should consult the more complete descriptions of all courses, composed by their instructors, posted on bulletin boards in Founders Hall, and available from the department administrative assistant.

Advanced Placement. Students may receive credits toward their Wellesley degree for their performance on AP or IB examinations. However, because no course in the English department is considered the equivalent of a high school course, the English department does not grant credit toward the major for AP or IB courses. First-year students and other undeclared majors contemplating further study in English are encouraged to consult the department chair or the department pre-major advisor in relation to their course selection. Students majoring in English should discuss their programs with their major advisors, and should consult with them about any changes they wish to make in the course of their junior and senior years.

The English major consists of a minimum of ten units, at least eight of which must be in areas other than creative writing. At least seven units must be above 100 level, and of these at least two units must be earned in 300-level literature, film, or literary theory courses. At least six of the units for the major must be taken in the department, including the two required units in 300-level courses.

WRIT 125 does not count toward the major. Courses designated 125/120 satisfy both the ENG 120 requirement and the WRIT 125 requirement, and count as a unit toward the fulfillment of the major. Other combined sections, such as WRIT 125/ENG 127, count toward the major as well. Independent work (350, 360, or 370) does not count toward the minimum requirement of two 300-level courses for the major.

All students majoring in English must take ENG 120 (Critical Interpretation), at least one course in Shakespeare (200 level), and two courses focused on literature written before 1900, of which at least one must focus on writing before 1800.

Courses taken in other departments at Wellesley College may not be used to satisfy any of the above distribution requirements, with the exception of ME/R 246, which satisfies the pre-1800 distribution requirement. With the Chair's permission, courses taken abroad during junior year or on twelve-college exchange may satisfy certain distribution requirements. ENG 112, ENG 223, and 224 do not satisfy the pre-1800 distribution requirement. Transfer students or Davis Scholars who have had work equivalent to 120 at another institution may apply to the chair for exemption from the critical interpretation requirement.

The English minor consists of five units: (A) 120 and (B) at least one unit on literature written before 1900 and (C) at least one 300-level unit, excluding 350 and (D) at least four units, including the 300-level course, taken in the department; a maximum of two creative writing units may be included.

Honors. The department offers a choice of two programs for honors. Under program I the honors candidate does two units of independent research culminating in a thesis or a project in creative writing. Program II offers an opportunity to receive honors on the basis of work done in regular courses but carries no additional course credit. A candidate electing program II presents a dossier of essays written for several courses with a statement of connections among them and critical questions raised by them. Applicants for honors should have a minimum 3.5 GPA in the major (in courses above 100 level) and must apply to the chair for admission to the program. A more detailed description of the department's application procedure is available from the department's administrative assistant.

Creative writing. The English department offers beginning and advanced courses in poetry (ENG 201 and 302), in fiction (ENG 203 and 301), children's literature (ENG 205) and in screenwriting (ENG 204). A literary non-fiction writing course (WRIT 225) that covers different genres (for example, travel writing, personal essay, and memoir) is offered through the Writing Program and counts toward the English major. The Theatre Studies Department offers an introductory playwriting course, (THIST 221) which may also count toward the major in English. These courses are open to all Wellesley College students.

The creative writing concentration in the English major. The creative writing concentration within the English major is designed for majors with a strong commitment to developing their own creative work. Students electing the creative writing concentration take a series of workshops in one or more creative genres (fiction, poetry, children's literature, playwriting, screenwriting, and creative non-fiction) and select, in consultation with their advisor, courses in literary study that provide the background in and knowledge of literary tradition necessary to make a contribution to that tradition.

Students interested in the creative writing concentration are urged to begin planning their programs early in their careers at Wellesley. It is expected that they will have taken at least one writing workshop by the time for election of the English major (spring semester sophomore year or fall semester sophomore year, for students going abroad), and have been in touch with a member of the creative writing faculty to plan the major. English majors electing the creative writing concentration must choose a member of the creative writing faculty as their advisor. Students who are interested in the creative writing concentration but who do not feel confident that they have had sufficient experience in writing to choose the concentration at the time of the election of the major should elect the English major; they may add the creative writing concentration later.

Students electing the creative writing concentration must fulfill all the requirements of the English major, including ENG 120, a course on Shakespeare, the period distribution requirements, and two 300-level literature courses. It is expected that creative writing students will take a focused program of critical study in the genre or genres in which they specialize.

In addition to eight courses in the critical study of literature, majors in the creative writing concentration take a minimum of four units of creative writing work. Creative writing courses may be repeated for additional credit. A student who is extremely motivated and capable of independent work and who has the permission of a faculty advisor may take an independent study (ENG 350); however, it is recommended that students take full advantage of the workshop experience provided by the creative writing courses. A student qualifying for honors in English and whose proposal has been approved by the Creative Writing Committee may pursue a creative writing thesis; the thesis option, although it includes two course units (ENG 360 and ENG 370), can only count as one of the four creative writing courses required by the concentration. Creative writing faculty generally direct creative theses; however, other English department faculty may direct creative theses.

Graduate study in English. Students expecting to do graduate work in English should ordinarily plan to acquire a reading knowledge of two foreign languages. They should take ENG 382 (Criticism) or an equivalent course in literary theory. They should also consult with the department's graduate school advisor, and with their departmental advisor, about courses that are appropriate for those considering graduate work in English.

Teacher certification. Students interested in obtaining certification to teach English in the Commonwealth of Massachusetts should consult with the chair of the education department and the English department liaison to the education department.
Environmental Studies

AN INTERDEPARTMENTAL MAJOR WITH CONCENTRATIONS IN ENVIRONMENTAL JUSTICE AND PHILOSOPHY, ENVIRONMENTAL POLICY AND ECONOMICS, AND ENVIRONMENTAL SCIENCE

Director: DeSombre (Political Science)
Assistant Professor: Turner
Mellon Postdoctoral Fellow: Finney
Advisory Faculty: Karakashian, Steady, Winkler (Environmental Justice and Philosophy); DeSombre, Paarberg, Turner, (Environmental Policy and Economics); Andrews, Beaucan, Brabander,2 Coleman, Moore, Rodenhouse, Sequeira, Thomas, Thompson, Stark (Environmental Science).

Environmental issues are complex and involve disciplines across the sciences, social sciences, and humanities. The environmental studies major provides students with the knowledge and skills needed to study, understand, and address these pressing issues, which range from biological diversity and natural resource use; to energy use, industrial waste, and other concerns of industrial societies; to the relationship between the environment and economic development. Because of the interdisciplinary nature of environmental issues, the major draws upon courses from multiple departments; however, each student will focus her studies within one area of concentration in order to obtain the depth of knowledge needed for advanced study and critical analyses.

Students will choose an advisor from among the advisory faculty in her area of concentration. A minor is not offered in any area of concentration.

There are three components to the 11-course major:
1. Two core courses (ES 100 and ES 300)
2. Five courses in an area of concentration (at least one of which must be at the 300 level)
3. Four complementary elective courses from outside the area of concentration

Students may count no more than three courses taken away from Wellesley towards the environmental studies major. These courses should be approved by the director prior to enrollment.

1. Core courses (two courses required)

ES 100 Humans and Nature
Turker, Rodenhouse (Biological Sciences), and Thomas (Biological Sciences) An introduction to social, political, economic, and scientific aspects of various environmental issues including acid deposition, stratospheric ozone depletion, global warming, energy resource management, soil depletion and population dynamics. Emphasis will be placed on the interrelatedness of these issues and on the interdisciplinary nature of the approaches that must be taken to deal with them. Laboratories will explore computer modeling as a tool for understanding environmental questions and monitoring of various environmental markers on the Wellesley campus and will make use of other resources in the Boston area. Because this course is an interdisciplinary introduction to environmental studies, AP credit in Environmental Science cannot be used to replace ES 100.
Prerequisite: None
Distribution: Fulfils the Quantitative Reasoning overlay course requirement. Does not satisfy the laboratory requirement. Semester: Fall
ES 300 Environmental Issues
DeSombre (Political Science)
An interdisciplinary seminar in which students work together in small groups to understand and develop solutions for current environmental problems. Each year, we focus on a given environmental issue of concern to our community, e.g. climate change, water pollution. In particular, we work to understand its scientific background, the political processes that lead to potential solutions, and the ethical and environmental justice implications. Student-led research provides the bulk of the information about the issue and its role in our local environment; lectures and readings provide supplementary information about the local situation and the global context.
Prerequisite: A declared major in environmental studies, ES 100 and at least four other courses in the student’s area of concentration, or permission of the instructor
Distribution: None
Semester: Spring Unit: 1.0
Additional environmental studies courses that may count (as indicated) towards areas of concentration or towards electives:

ES 201/GEOS 201 Methods and Problems in Environmental Science with Laboratory
NOT OFFERED IN 2006-07, OFFERED IN 2007-08. Problems in environmental science are inherently multidisciplinary and often require a diverse skill set to analyze and solve. This course will focus on developing a toolbox of skills including field methods, geochemical analysis (natural waters, soils and other environmental materials), and modeling with a goal of being able to frame and solve environmental problems. Students will conduct semester-long research projects and will present their results in a final poster session. Laboratory. Students may register for either ES 201 or GEOS 201 and credit will be granted accordingly.
Prerequisite: One of the following – ES 100, GEOS 100, [GEOL 100], 101, 102 [GEOL 102] or permission of the instructor
Distribution: Natural and Physical Science Semester: N/O, Offered in 2007-08. Unit: 1.25

ES 212/RAST 212 Lake Baikal: The Soul of Siberia (Offered in 2006-07)
Hodge (Russian) and Moore (Biological Sciences) The ecological and cultural values of Lake Baikal – the oldest, deepest, and most biotically rich lake on the planet – are examined. Lectures and discussion in spring prepare students for the three-week field laboratory taught at Lake Baikal in eastern Siberia in August. Lectures address the fundamentals of aquatic ecology and the role of Lake Baikal in Russian literature, history, art, music, and the country’s environmental movement. Laboratory work is conducted primarily out-of-doors and includes introductions to the flora and fauna, field tests of student-generated hypotheses, meetings with the lake’s stakeholders, and tours of ecological and cultural sites surrounding the lake. Students may register for either ES 212 or RAST 212 and credit will be granted accordingly. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: BISC 111, RUSS 101, and permission of the instructors. Preference will be given to students who have also taken HIST 211. Application required.
Distribution: Natural and Physical Science Semester: Spring and Summer Unit: 1.25

ES 221 Dynamic Modeling of Environmental Issues
Coleman (Chemistry) A hands-on introduction to the application of systems dynamics to developing computer-based models for complex problems, with an emphasis on the environment. Starting with simple closed systems, students will develop models of increasing sophistication and complexity for issues such as population dynamics, air and water pollution, energy production and usage, waste management and sustainable development. Emphasis will be placed on the principles of problem solving and systems dynamics and on developing models that reflect, as closely as possible, real-world situations and the interrelatedness of various environmental concerns
Prerequisite: ES 100 and successful completion of the Quantitative Reasoning requirement, or permission of the instructor.
Distribution: Natural and Physical Science or Mathematical Modeling Semester: Fall Unit: 1.0

ES 234/ANTH 234 Cultural Ecology
Ruf (Anthropology) This course explores theoretical and methodological issues in the study of human culture and social activity in relation to ecological systems and the environment. Readings include both classic studies as well as contemporary research, with particular emphasis placed on the various dimensions and scales of social organization and activity, and on the role of cultural, religious, and political institutions in shaping ecological relationships as well as economic behavior. Students may register for either ES 234 or ANTH 234 and credit will be granted accordingly.
ES 307/BISC 307 Advanced Topics in Ecology with Laboratory
Hughes (Biological Sciences)

Topic for 2006-07: Conservation Biology with Lab. We live on an increasingly human-dominated planet. We must now take responsibility for and stewardship of Earth’s resources, both living and non-living, which we are changing at unprecedented rates. Our course covers terrestrial, fresh and saltwater habitats - their diversity and ecology, current status and sustainability, and the role of humanity in both their endangerment and salvation. We will examine the sources and importance of species diversity, and explore the often contentious issues of species and ecosystem preservation and conservation, the design of natural sanctuaries, and whether altered ecosystems can be managed and restored. Laboratory activities will include measurement of species diversity in soil and aquatic samples, successional dynamics, ephemeral habitat biology and ecology, geographic information analysis, and an independent project. Students may register for either ES 307 or BISC 307 and credit will be granted accordingly.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ES 308/Chem 308 Green Chemistry
NOT OFFERED IN 2006-07. Green chemistry can be defined as the design of chemicals, chemical syntheses, and chemical processes that are environmentally benign and economically feasible. This course will serve to introduce students to the 12 Principles of Green Chemistry and explore how these principles are put into use through real world examples. The subject matter to be discussed will include aspects of analytical, biological, inorganic, organic, and polymer chemistry from an environmental or green perspective. This course is designed for students interested in chemistry, biochemistry, engineering, environmental studies, materials science and related fields. Students may register for either ES 308 or CHEM 308 and credit will be granted accordingly.

Prerequisite: CHEM 211
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.25

ES 315/GEOS 315 Environmental Geochemistry with Laboratory
Braunauer (Geosciences)

NOT OFFERED IN 2006-07. Offered in 2007-08. Accurately predicting the fate and transport of naturally occurring toxic elements and anthropogenic compounds in the environment requires a broad set of multidisciplinary skills. This course introduces geochanical approaches including mass balance, residence time, isotope fractionation, and thermodynamic and kinetic modeling necessary to fingerprint sources of pollutants and track them in water, soil, and plants. These fundamentals will be explored in several classic case studies and in semester-long geochanical research projects conducted by small groups. Laboratory.

Normaly offered in alternate years. Students may register for either ES 315 or GEOS 315 and credit will be granted accordingly.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

II. Areas of concentration (five courses required from one of the following areas)
(Not that most 200- and 300-level courses have one or more 100-level prerequisites)

A. Environmental justice and philosophy provides students with the background needed to understand and address the philosophical and ethical issues raised by human activity in the natural world, including the causes and consequences of environmental degradation as they are influenced by social inequality. A student choosing to concentrate in this area would, with the approval of their advisor, choose five from among the following courses:

AER 226 Seminar. Environmental Justice, Race, and Sustainable Development
PEAC 259 Peace and Conflict Resolution
PHIL 206 Normative Ethics
PHIL 217 Philosophy of Science: Traditional and Feminist Perspectives
PHIL 233 Environmental Philosophy
POL 212 Seminar: Environmental Policy
POL 338 Seminar, Problems in North-South Relations

Alternative courses in this area of concentration can be chosen from the following list; however, students should do so only after a conversation with their faculty advisor.

ANTH 238 The Vulnerable Body: Anthropological Understandings
ANTH 251 Cultures of Cancer
PHIL 213 Social and Political Philosophy
PHIL 340 Seminar. Contemporary Ethical Theory
POL 302 Globalization and the Nation-State
POL 325 International Environmental Law
REL 230 Ethics
REL 257 Contemplation and Action
REL 326 Seminar. Liberation Theology
SOC 209 Social Inequality
SOC 221 Globalization

B. Environmental Policy and Economics provides students with the background to understand how policy is developed, how specific policy decisions affect environmental quality, and how economic factors structure the opportunities and constraints of environmental policy and the use of natural resources. A student choosing to concentrate in this area would, with the approval of their advisor, choose five from among the following courses:

ECON 228 Environmental and Resource Economics
EXTD 123 Water Resources Planning and Management
EXTD 128 Coastal Zone Management
POL 204 Political Economy of Development and Underdevelopment
POL 312 Seminar. Environmental Policy
POL 323 International Economic Policy

95 Environmental Studies
Alternative courses in this area of concentration can be chosen from the following list; however, students should do so only after a conversation with their faculty advisor.

AFR 226 Environmental Justice, Race, and Sustainable Development
ECON 214 Trade and Immigration
ECON 220 Development Economics
ECON 222 Games of Strategy
ECON 320 Economic Development
POL 202 Comparative Politics
POL 302 Globalization and the Nation-State
POL 327 International Organization
POL 339 International Law
SOC 221 Globalization

C. Environmental Science offers an interdisciplinary approach for viewing the Earth and its inhabitants from more than one scientific perspective. Courses that are strongly recommended to strengthen the quantitative skills of all students concentrating in environmental science include introductory calculus (e.g., MATH 116 or 116Z) or statistics (e.g., MATH 101, ECON 103/SOC 190, and POL 199).

A student choosing to concentrate in this area would, with the approval of her advisor, choose five of the following courses, not all from the same department.

Biological Sciences
BISC 201 Ecology with Laboratory
BISC 202 Evolution with Laboratory
BISC 203 Comparative Physiology and Anatomy of Vertebrates with Laboratory
BISC 207 The Biology of Plants with Laboratory
BISC 209 Microbiology with Laboratory
BISC 210 Marine Biology with Laboratory
BISC 302 Animal Physiology with Laboratory
BISC 307/ES 307 Advanced Topics in Ecology with Laboratory
BISC 308 Tropical Ecology with Wintersession Laboratory
EXTD 225 Biology of Fishes
EXTD 226 Biology of Whales
EXTD 227 Wetlands: Ecology, Hydrology, Restoration

Chemistry
CHEM 205 Chemical Analysis and Equilibrium with Laboratory
CHEM 211 Organic Chemistry I with Laboratory
CHEM 221 Biochemistry I: Structure and Function of Macromolecules with Laboratory
CHEM 222 Introduction to Biochemistry with Laboratory
CHEM 231 Physical Chemistry I with Laboratory
CHEM 232 Physical Chemistry for the Life Sciences with Laboratory
CHEM 308/ES 308 Green Chemistry

Environmental Studies
ES 212/RAST 212 Lake Baikal: The Soul of Siberia
ES 222 Dynamic Modeling of Environmental Issues

Geosciences
GEOS 201/ES 201 Methods and Problems in Environmental Science with Laboratory
GEOS 203 Earth Materials with Laboratory
GEOS 211 Geology and Human Affairs
GEOS 220 Volcanoes: Agents of Global and Regional Change with Wintersession Laboratory
GEOS 230 Earth from Above: Maps, Remote Sensing, and GIS
GEOS 240 Climate Past and Future
GEOS 304 Sedimentary Rocks and Sequences with Laboratory
GEOS 311 Hydrogeology with Laboratory
GEOS 315/ES 315 Environmental Geochemistry with Laboratory

Physics
PHYS 202 Introduction to Quantum Mechanics and Thermodynamics with Laboratory
PHYS 203 Vibrations, Waves, and Special Relativity with Laboratory
PHYS 215/MATH 215 Mathematics for the Sciences I
PHYS 216/MATH 216 Mathematics for the Sciences II
PHYS 302 Quantum Mechanics
PHYS 305 Statistical Mechanics and Thermodynamics
PHYS 306 Advanced Classical Mechanics

III. Electives complementing the area of concentration (four courses required, at least two above the 100 level)

For those concentrating in environmental justice and philosophy or environmental policy and economics, complementary electives should be selected in consultation with their advisors, to enhance quantitative reasoning (skills or breadth of knowledge in the sciences. These should primarily be chosen from courses listed for the environmental science concentration.

For those concentrating in environmental science, complementary electives should be selected in consultation with their advisors, to enhance understanding of how political processes, economic considerations and ethical choices compose and constrain understanding and action on environmental issues. These should primarily be chosen from courses listed for the concentrations in environmental justice and philosophy and environmental policy and economics.

Off-Campus Programs

By special arrangement with the Ecosystems Center of the Marine Biological Laboratory and the Marine Studies Consortium (EXTD courses in concentration listings), Wellesley College students in good standing may apply for courses in these off-campus programs. The number of participants in each program is limited (see Special Academic Programs). Students should also consider courses at MIT. Both MIT and EXT D courses count as Wellesley courses, rather than as courses taken off campus, for the purposes of the environmental studies major.

For courses offered during the Semester in Environmental Studies, Ecosystems Center of the Marine Biological Laboratory, Woods Hole, Mass., see www.mbl.edu/SES.
Experimental

According to College Legislation, the student-faculty Committee on Educational Research and Development has the authority to recommend experimental courses and programs to Academic Council. Faculty members and students are invited to submit their ideas to the Committee. In 2006-07 the following experimental courses will be offered:

CLPT 120 Literary Border Crossings: Introduction to Comparative Literature Nolden (German) This course will introduce students to milestones in world literary history and to different approaches to literature. We will be discussing texts which all address notions of cross-cultural encounters and thus serve as an exemplary foundation for comparative literary studies. Readings are drawn from a variety of different cultural, national, and linguistic traditions and will allow us to discuss what it means to "read another culture" from a variety of different perspectives. We will cover works by Euripides, writers of the Tang dynasty, C. Columbus, Dante, J. Swift, J.W. von Goethe, J. Marti, V. Woolf, J. Baldwin, A. Rich, A. Memmi, and others. Guest lecturers from several Wellesley College literature departments.

Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

EXP 235 Marvels of Paris and Versailles under Louis XIV DeLorme (Art), Fontijn (Music), Gréléd (French) The reign of King Louis XIV spanned most of his life (1638-1715) during a period that saw remarkable developments throughout France and abroad. This course will examine court style, etiquette, politics, visual arts, music, theatre, literature, and the legacy of the "Sun King" through lectures offered by professors in the French, art, and music departments, as well as through student discussion and group presentation. The goal of the course is to provide a key to understanding French culture and identity today.

Prerequisite: None
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MATH 251 Topics in Applied Math Bu Topic for 2006-07: Introduction to Mathematical Biology. This course provides an introduction to mathematical tools for biologists, and is intended for students who are interested in mathematics and its applications in life sciences. The following topics will be covered: first order differential equations, equilibrium and stability, system of autonomous equations, densities and histograms, normal distribution and age-structured populations, linear maps, eigenvectors and eigenvalues, partial derivatives, linear systems and applications, nonlinear systems and application for neuron activity, reaction-diffusion equation and biological waves.

Prerequisite: Math 110 or the equivalent; or with permission of instructor
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

Extradepartmental

The following section includes courses of interest to students in various disciplines.

EXTD 115 Introduction to Botanical Art Roche and Govan (Friends of Horticulture) "If you can paint a leaf, you can paint the world." (Ruskin). This course will focus on the roles of botanical art in fine art and science, both historically and in the present day. Students will study the exacting skills demanded of the artist, through study of examples in Wellesley College special collections and in practical applications. In the Wellesley College Ferguson Greenhouses, students will learn grounding in botanical knowledge, basic instruction in representational drawing and color study, as well as an appreciation of the knowledge of the botanical illustrator, as scientist and artist. Mandatory credit/ noncredit.

Prerequisite: None
Distribution: None
Semester: Winter Session
Unit: 0.5

EXTD 160 Introduction to Engineering Science Pratt and Story (Olin), Ducos (Physics) (Course taught on Wellesley campus) Introduction to Engineering Science is offered to students who are intrigued by engineering as a philosophy or a career. It is meant to help students get a taste of engineering. The course is project-based and hands-on and will also have a design and prototyping component. Students will explore four concepts central to engineering: effort and flow, which describes how power flows between interacting objects, regardless of their domain; transduction - the bidirectional transformation of effort and flow from one domain to another; stability, which is how systems remember the past; and the powerful idea of feedback, which is used in almost all engineered devices to bring about desired behavior despite undesired disturbances.

Prerequisite: PHYS 107 or the equivalent or by permission of the instructors.
Distribution: None
Semester: Spring
Unit: 1.0

EXTD 288 Hitler: the Man in History, Literature and Film Hansen (German) The figure of Adolf Hitler continues to horrify and fascinate those who have inherited the world he changed forever. This course will explore the historical figure of Hitler and subsequent responses to him by contemporaries, historians, writers, and filmmakers. After reading Hitler's own words and the biographers' accounts, we shall focus on representations not only from the German context (Bertolt Brecht, Thomas Mann, Hans-Jürgen Syberberg) but also from other cultures (Charlie Chaplin, George Steiner, Mel Brooks). Three class meetings per week. The third meeting will be for film screenings and therefore not used every week.

Prerequisite: None
Distribution: Language and Literature or Historical Studies
Semester: Spring
Unit: 1.0

EXTD 350 Research or Individual Study Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Marine Studies Consortium Courses

The Marine Studies Consortium offers courses focusing on a variety of marine topics. These courses are taught at neighboring institutions and are open to a limited number of Wellesley students by permission of the consortium representative, Marianne Moore, Biological Sciences Department.

EXTD 123 Water Resources Planning and Management A comprehensive introduction to the economics and ecology of water supply and water pollution control. Topics include watershed management, groundwater and wetlands protection, and wastewater treatment. The inherent difficulty in applying static laws and regulations to a dynamic natural resource such as water is a recurring theme. Offered by the Marine Studies Consortium.

Prerequisite: None. Open to students by permission of the consortium representative, Marianne Moore, Biological Sciences Department.
Distribution: None
Semester: Fall
Unit: 1.0

EXTD 126 Maritime History This course is an introduction to New England's maritime history, with secondary emphasis on its relationship to the coastal ecosystem. The course will survey the sea's legacy from the earliest seventeenth-century fishing settlements to the shipbuilding and commerce of today. Course themes will include historical, political, and economic developments. Field trips will explore the rich resources of the Peabody Museum, Salem, Mass.; the USS Constitution, Boston, Mass.; and Mystic Seaport, Conn. Offered by the Marine Studies Consortium.

Prerequisite: None. Open to students by permission of the consortium representative, Marianne Moore, Biological Sciences Department.
Distribution: None
Semester: Spring
Unit: 1.0

EXTD 128 Coastal Zone Management This course presents a survey of the coastal environment, its physical characteristics, natural systems, economic uses, and development pressures. Lectures examine strategies formulated in the U.S. for land and water resource management in the coastal zone. The roles of federal, state, and local government, environmental groups, and resource users are also explored. Finally, by comparing coastal zone management problems in the U.S. to those elsewhere in the world, students gain a global perspective. Offered by the Marine Studies Consortium.

Prerequisite: None. Open to students by permission of the consortium representative, Marianne Moore, Biological Sciences Department.
Distribution: None
Semester: Spring
Unit: 1.0

EXTD 225 Biology of Fishes This upper-level survey course covers the evolution, systematics, anatomy, physiology, and behavior of freshwater, marine, and anadromous fishes from temperate to tropical environments. The course also examines the diversity of fish interactions in aquatic communities: predator/prey relationships, host/symbiont interactions,
and the various roles of fishes as herbivores. Study of inter- and intra-specific predator-prey relationships among fish populations in aquatic communities integrates principles of ecology. Offered by the Marine Studies Consortium.

Prequisite: One year of general biology and two upper-level biology courses. Open to students by permission of the consortium representative, Marianne Moore, Biological Sciences Department.

Distribution: None
Semester: Spring
Unit: 1.0

FREN 201-202 French Language, Literatures, and Cultures

Datta, Gréle, Masson
Reading, writing, and speaking skills are developed through analysis and discussions of short stories, plays, poems, films, and newspaper articles from France and the Francophone world. Three periods. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course. Students beginning with 202 must take one of the following courses: 205, 206, 207, 208 or 209, in order to complete the requirement. The 201-202 sequence should be completed within three consecutive semesters.

Prequisite: 102 or 103, SAT II score of 500-590, or an equivalent departmental placement score, or an AP score of 1 or 2 or permission of instructor.

Distribution: Language and Literature
Semester: Fall, Spring, Wintersession (202 only)
Unit: 1.0

FREN 203 Intensive French I

Tranvouez
The continuation of French 103. Systematic training in all the language skills. Five class periods. The course is equivalent to French 201-202, and is designed to prepare students to qualify for study abroad after two further courses in French: a unit of French 205-206, 209-209 and a unit of French 210 or 211.

Prequisite: Open only to students who have completed French 103 or 102 by permission of instructor.

Distribution: Language and Literature
Semester: Spring
Unit: 1.25

FREN 205 Literature and Film in Cultural Contexts

Monaco
Discussion of modern literature and film in their cultural contexts. Training in techniques of literary and cultural analysis. Materials include novels, short stories, poetry, films, screenplays, and videos from France and the Francophone world. Vocabulary building and review of key points of grammar. Frequent written practice. Attention to oral skills and listening comprehension as needed.

Prequisite: 202 or 203, an SAT II score of 600-640, an equivalent departmental placement score, or an AP score of 3.

Distribution: Language and Literature
Semester: Fall
Unit: 1.0

FREN 206 Intermediate Spoken French

Respaut, Tranvouez, Egron-Sparrow
Practice in conversation, using a variety of materials including newspaper articles, radio and television broadcasts, advertisements, and films. This course is designed to develop oral proficiency with necessary attention to the other skills - listening comprehension, reading, and writing. Regular use of the language laboratory.

Prequisite: 202 or 203, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.

Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

FREN 207 Perspectives on French Culture and Society: French Identity in the Age of Globalization

Datta
In this introduction to French society and culture, we will examine France's identity crisis around the turn of the new century. From its historical position of political, economic, and intellectual leadership in Europe and the world,
France is searching to maintain its difference as a defender of quality over mass appeal and the proud values of its national tradition in the face of increasing globalization. Topics covered include Franco-American relations, the European Union, immigration, the family, and the role of women in French society. Readings are drawn from a variety of sources: historical, sociological, and ethnographic. Magazine and newspaper articles, along with television programs and films, will provide supplementary information.

Prerequisite: 202 or 203, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.
Distribution: Language and Literature or Social and Behavioral Analysis

FREN 208 Women and Literary Tradition

Mustaco

An introduction to women's writing from Marie de France to Marguerite Duras, from the Middle Ages to the twentieth century. The course is designed to develop an appreciation of women's place in French literary history. Special attention is given to the continuities among women writers and to the impact of their minority status upon their writing.

Prerequisite: 202 or 203, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

FREN 209 Studies in Literature

Musto

Topic for 2006-07: Contemporary Theater and Contemporary Issues. Reading and analysis of plays performed in France at the end of the twentieth or beginning of the twenty-first century. Introduction to the techniques of reading dramatic works. Emphasis on oral discussion of the representation of contemporary issues in various plays.

Prerequisite: 202 or 203, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

FREN 210 French Literature and Culture through the Centuries: From Classicism to the Present

Traversay

A study of major authors in their cultural contexts from the seventeenth century to the twentieth with emphasis on textual analysis and essay writing in French. Readings will be drawn from the following authors: Corneille, Molière, Montesquieu, Voltaire, Diderot, Beaumarchais, Balzac, Flaubert, Gide, Sartre, Camus, Duras, and Bâ.

Prerequisite: At least one unit of 206, 207, 208, or 209, or an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

FREN 211 Studies in Language

Mustaco, Pratul

Comprehensive review of French grammar, enrichment of vocabulary, and introduction to French techniques of literary analysis, composition, and the organization of ideas.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, an equivalent departmental placement score.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

After 210, the numbering of 200-level courses does not denote increasing levels of difficulty; 200-level courses above 210 may be taken in any sequence.

FREN 213 From Myth to the Absurd: French Drama in the Twentieth Century

Maison

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

FREN 214 Desire, Power, and Language in the Nineteenth-Century Novel

Ritchey

NOT OFFERED IN 2006-07. Ambition, passion, and transgression in major works by Balzac, Sand, Flaubert, and Zola. Analysis of narrative techniques that organize the interplay of desire and power against which individual destinies are played out in post-Revolutionary France. Realism and the representation of reality in the context of a society in turmoil.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

FREN 215 Baudelaire, Verlaine, Rimbaud

Rupsaet

This course emphasizes close study of a body of poetry which ranks among the most influential in Western literature, and which initiates modern poetics. Baudelaire will be treated in relation to romanticism and concepts of the modern. In Verlaine, we will study the development of free verse and the liberation of poetic form. The course will conclude by confronting Rimbaud's effort to "changer la vie" through his visionary and surreal writing. Analysis of texts and their historical context, through a variety of theoretical approaches.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

FREN 217 Books of the Self

Lyndgate

This course focuses on texts that seek to reveal the reality of the self in the space of a book, including readings of confessional and autobiographical works by the twentieth-century writers Camus, Annie Ernaux, Roland Barthes, and Maryse Condé, and by their literary ancestors Augustine, Abelard, Montaigne, and Rousseau. Themes examined include: the compulsion to confess; secret sharing vs. public self-disclosure; love, desire, and language; the search for authenticity; dominant discourse and minority voices; the role of the reader as accomplice, witness, judge, and confessor.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature or Religion, Ethics and Moral Philosophy
Semester: Fall
Unit: 1.0

FREN 218 Negritude, Independences, Women's Issues: Francophone Literature in Context

Pratul

This course seeks to understand the key concerns of writers during the Negritude movement in order to address important questions that became crucial during the ensuing period of the various independence movements. We will discuss issues which arose at this time and continue to be of interest concerning the role of women in these movements and thereafter in the newly independent nation. The impact of colonialism and independence on different indigenous societal institutions, polygamy in particular, will be central to the later readings.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

FREN 219 Love/Death

Rupsaet

NOT OFFERED IN 2006-07. This course investigates the connection between fiction and film and our fundamental preoccupation with the issues of love and death. Texts ranging from the Middle Ages to the twentieth century are studied, with an eye toward understanding how the thematic of love and death are related to story structure, narration, and the dynamics of reading.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

FREN 220 Voices of French Poetry from Marie de France to Surrealism

Petterson

NOT OFFERED IN 2006-07. The voices, forms, and innovations of the French poetic tradition. The goals of this course are to examine and appreciate the place of song, love, laughter, and madness in the best works of French poets, from the twelfth-century poems of Marie de France to Baudelaire's poèmes en prose, Rimbaud's délires, and surrealism's explosive écriture automatique.

Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

FREN 222 French Cinema

Gillain

A survey of French cinema with a focus on three key periods: the 30s, the 60s and the 90s. Starting with classics by Jean Renoir, Marcel Carne, and Julien Duvivier, the course will study the stylistic revolution brought about by the New Wave and the mark it has left on recent French cinema. The films will be analyzed from a variety of perspectives: political and socio-economic contexts, gender representations, narrative patterns, and visual metaphors of subjectivity.
FREN 224 Versailles and the Age of Louis XIV
Grele
Versailles will be used as a focal point for the study of the aesthetic and literary trends prevalent in seventeenth-century France as well as the social and historical trends that accompanied them. Works from a wide range of genres (including films, plays, and memoirs) will be chosen to examine the state of the arts in France under the Sun King.
Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

FREN 225 The French Press
Gunter
NOT OFFERED IN 2006-07. This course is designed for students who want to become more familiar with the French media, to keep up with current events and to know more about the differences between the perspectives of French and American news sources with regard to current issues. The course is also intended to improve students' reading, writing, and speaking skills in French.
Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score.
Distribution: Language and Literature or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

FREN 226 Speaking through Acting
Masson
Improvement of French oral skills and public speaking skills through the use of acting techniques. Intensive analysis of short literary texts and excerpts from several plays with emphasis on pronunciation, diction, elocution, acting and staging.
Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

FREN 228 Wintersession in Paris
NOT OFFERED IN 2006-07. OFFERED IN 2007-08.
Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score. Application required.
Distribution: Language and Literature
Semester: N/O. Offered in 2007-08
Unit: 1.0

FREN 229 America through French Eyes: Perceptions and Realities
Datta
NOT OFFERED IN 2006-07. The French have long been fascinated by the United States, especially since the end of the Second World War. At times, the U.S. has been seen as a model to be emulated in France; more often, it has stood out as the antithesis of French culture and values. This course examines French representations of the United States and of Americans through an examination of key historical and literary texts - essays, autobiographies, and fiction - as well as films. Topics to be explored include: representations of African-Americans in French films (Josephine Baker), French views of Taylorization, the Coca-Cola wars of the 1950s, French-American tensions during the Cold War, especially under de Gaulle, as well as more recent debates about Eurodisney, McDonald's, Hollywood, globalization, and multiculturalism.
Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score.
Distribution: Language and Literature or Historical Studies
Semester: N/O
Unit: 1.0

FREN 237 Saint-Germain-des-Prés: Lydgate
The legendary sixth arrondissement neighborhood as a cultural crucible in post-Liberation Paris. Saint-Germain-des-Prés as the locus of an unprecedented concentration of literary and artistic talent after 1945: existentialists, writers, artists, café intelligents, and nonconformists, the discovery of jazz and American popular culture. Saint-Germain and the myth of the Left Bank. Study of texts by Sartre, Camus, Simone de Beauvoir, Boris Vian, Raymond Queneau; songs by Juliette Gréco and others; newsreel, film and audio documents of the period.
Prerequisite: At least one unit of 206, 207, 208 or 209, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score. Open to students who have taken 228 in Wintersession 2006.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

FREN 301 Books and Voices in Renaissance France: Lydgate
NOT OFFERED IN 2006-07. Innovative writers in sixteenth-century France and the ideas and forms of expression they explored in the early decades of printing. The persistence of oral culture and the search for a voice in print; the triumph of French over Latin as a literary language of subtlety and power; the collisions of propaganda and censorship in a century torn by religious strife; the emergence of new audiences and new strategies of narration and reading. Readings in prose works by Rabelais, Montaigne, Calvin, Marguerite de Navarre; poetry by du Bellay, Ronsard, and Louise Labé. Periodic reference to resources of The Rare Books Collection in the Wellesley library.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

FREN 303 Advanced Studies in the Seventeenth and Eighteenth Centuries
Topic A: Honor, Passion, and the Social Order in Seventeenth-Century Theater: Corneille, Molière, Racine
Grelé
NOT OFFERED IN 2006-07. Love and duty, appearance and reality, freedom and destiny: seventeenth-century theater expresses major oppositional themes that both shaped and undermined the political order of the time. Corneille, Molière and Racine, the leading playwrights from the Golden Age of French literature, articulate the causes of economic crisis, social unrest and religious conflict that plagued the reign of Louis XIV and too often led to bloody consequences. The course will concentrate on the tragedies and comedies of these writers as keys to understanding the forces at work in a changing society, as outstanding achievements in theatrical art, and as illustrations of critical developments in theatrical style.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

FREN 304 Male and Female Perspectives in the Eighteenth-Century Novel
Mistacco
Drawing from feminist inquiries into the politics of exclusion and inclusion in literary history, the course examines, in dialogue with masterpieces authored by men, novels by major women writers of the period. Though much admired in their time, these novels were subsequently erased from the pages of literary history and rediscovered only in the late twentieth century. In this course we will reconsider this particular literature of female dissent along with key novels by men as part of a crisis in legitimacy that led to the French Revolution. Works by Prévost, Claude-Alexandrine de Tencin, Françoise de Graffigny, Marie-Jeanne Riccoboni, Rousseau, Diderot, Laclos, and Isabelle de Charrière.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

FREN 306 Literature and Inhumanity: Novel, Poetry, and Film in Interwar France
Pettersen
NOT OFFERED IN 2006-07. This course will examine the confrontation between literature and inhumanity through the French literature, poetry, and film of the early twentieth century. Poetry by Guillaume Apollinaire, Robert Desnos, André Breton, Francis Ponge, and René Char, films by Luis Buñuel, and novels by André Gide, Jean-Paul Sartre, and André Malraux all serve to illustrate the profound crisis in human values that defined and shaped the twentieth century.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

FREN 307 The Contemporary French Novel and the Pleasure of the Text
Pettersen
NOT OFFERED IN 2006-07. In mental landscapes ranging from the excruciatingly personal to the desperately impersonal, and in geographical settings that vary from high-paced urbanism to plodding ruralism, the contemporary French novel invites us to reassess the formal, political, cultural and historical stakes of writing and reading fiction in the twenty-first century. This course explores in depth the subtle pleasure of the text in works by some of France’s more brilliant and intriguing contemporary authors: Jean-Philippe Toussaint, Daniele Sallenave, Jean Echenoz, Lydia Solway, Marie Redonnet, François Bon, Patrick Modiano, Legor Granz.
FREN 308 Advanced Studies in Language
Ritchie
The art of translation and its techniques are studied through analysis of the major linguistic and cultural differences between French and English. Translations from both languages will serve to explore past and present-day practices and theories of translation.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Open to juniors and seniors only or by permission of instructor. Distribution: Language and Literature Semester: Fall Unit: 1.0

FREN 313 George Sand and the Romantic Theater
Massou
George Sand, multifaceted woman and influential writer, allows us to explore the romantic theater as well as the overall theater production of the nineteenth century. The fact that Sand’s theater was overlooked in her time and subsequently forgotten raises important questions of public recognition and literary posterity that we will examine.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature or Arts, Music, Theatre, Film, Video Semester: Spring Unit: 1.0

FREN 314 Cinema
Gillian
François Truffaut: An in-depth review of Truffaut’s overall contribution to cinema. Includes readings from his articles as a film critic, a study of influences on his directorial work (Renoir, Hitchcock) and a close analysis of twelve of his films using a variety of critical approaches: biographical, historical, formal, and psychoanalytical.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature or Arts, Music, Theatre, Film, Video Semester: Fall Unit: 1.0

FREN 318 Narrative in the Twentieth Century
Mistacco
NOT OFFERED IN 2006-07. This course explores innovative fiction by major novelists spanning the twentieth century, from André Gide at the threshold of “the age of suspicion” (Sarratea) on. Challenges to canonical narratives, discourses of mastery and authoritative modes of storytelling in a wide variety of revolutionary works, including absurdist, avant-garde, and feminist texts are examined. Literary, historical, and cultural perspectives will be brought to bear on these narratives which chart vital developments in the twentieth-century novel. Authors include André Gide, Marcel Proust, Nathalie Sarratea, Albert Camus, Samuel Beckett, Marguerite Duras, and Alain Robbe-Grillet.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature Semester: N/O Unit: 1.0

FREN 319 Women, Language, and Literary Expression
Mistacco
NOT OFFERED IN 2006-07. Fiction by twentieth-century women writers in France. Challenges to literary conventions, patriarchal thinking and dominant discourse by Beauvoir, Colette, Chawaf, Wittig, Duras, and Djiebar. Attention to gender as a site of disidence and to the creative possibilities as well as the risks involved in equating the feminine with difference. Perspectives on women, writing, and difference in colonial and postcolonial contexts. Readings from foundational and recent works by feminist theoreticians including Cixous, Kristeva, and Irigary.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature Semester: N/O Unit: 1.0

FREN 321 Selected Topics
Topic A: Women of Ill Repute: Prostitution in Nineteenth-Century France
Ritchie
Women of loose morals in French fiction from the Revolution to the end of the nineteenth century. This course will trace the figure of the prostitute—from the innocent fallen woman with a heart of gold to the threatening incarnation of feminine perversity—in literary texts and in the paintings of prominent artists of the period. Readings in contemporary treatises on hygiene, public policy, and the legal status of prostitutes will situate the theme in the socio-cultural context of the time. Fiction by Balzac, Dumas, Hugo, Baudelaire, Maupassant, Barbe y Aurevilly, Zola. Paintings by Degas, Manet, Toulouse-Lautrec.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature Semester: Spring Unit: 1.0

FREN 327 A Fascination with Bodies: The Doctor’s Malady
Respati
NOT OFFERED IN 2006-07. The addictive interplay between doctors and patients as reflected in a variety of nineteenth- and twentieth-century writings, and in photography and film. The course will investigate the effect of sickness on family structure and the struggle with illness as a desperate “dancing with the beast”; touching on mental and physical suffering of various kinds—hysteria and alcoholism, childbirth and abortion, tuberculosis, cancer, AIDS—represented in novels and short stories from Barbey d’Aurevilly to Gide, in the reflections of historians and psychologists (Michelet, Charcot), and in biographies, personal accounts and autofictions by Duras, Guibert and Ernaux.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature Semester: N/O Unit: 1.0

FREN 329 Colette/Duras: A Pleasure unto Death
Respati
Two prolific authors whose works embrace the span of women’s writing in the twentieth century and who correspondingly illustrate the essential features of modern expression by women. Attention to the phases of a woman’s life, sexuality, the figure of the mother, eroticism and race, and the relation between fiction and autobiography.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature Semester: Fall Unit: 1.0

FREN 330 French and Francophone Studies
Prabhu
NOT OFFERED IN 2006-07. The course examines various texts from the post-independent Francophone world to understand pressing concerns in different postcolonial regions. Close attention will be paid to narrative techniques while studying questions concerning the relationship with the metropolis and the functioning of language(s). Includes a brief introduction to the history of Francophone literature. Texts by Driss Chraibi, Maryse Condé, Axel Gauvin, Assia Djiebar.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature Semester: N/O Unit: 1.0

FREN 331 Desire, Sexuality, and Love in African Francophone Cinema
Prabhu
NOT OFFERED IN 2006-07. An exploration of interpersonal relationships within traditional or transgressive couples in African Francophone Cinema. Consideration of various cultural and social backgrounds will frame our discussion of such controversial issues as the intertext, polygamy, homosexuality, and incest.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004), or 211 or above. Distribution: Language and Literature or Arts, Music, Theatre, Film, Video Semester: N/O Unit: 1.0

FREN 332 Myth and Memory in Modern France: From the French Revolution to May 1968
Datta
This course explores the way in which the French view their past as well as the myths they have created to subscribe that past into national memory. Through an approach simultaneously thematic and chronological, modern French history and culture will be examined from the perspective of “les lieux de mémoire,” that is, symbolic events (Bastille Day), institutions (the Napoleonic Code), people (Joan of Arc), and places (Mont St. Michel) that have shaped French national identity. The course begins by analyzing such concepts as the nation and the hexagon, and proceeds to the legacy of key moments in French history, among them the French Revolution and the Napoleonic era, the establishment of the Third Republic, the two World Wars, the Algerian conflict, and the events of May 1968.
Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above. Distribution: Language and Literature or Historical Studies Semester: Fall Unit: 1.0

FREN 339 Studies in Culture and Criticism
Datta
NOT OFFERED IN 2006-07. In the aftermath of World War I, French men and women viewed the preceding years as a tranquil and stable period in French history. Yet during the era, subsequently known as la belle époque, the French experienced changes of enormous magnitude: the emergence of both consumer culture and a working class, the development of a national press, and the expansion of an overseas colonial empire. Such change was reflected in the emergence of Paris as the capital of the Euro-
pean avant-garde. Drawing on literary texts and historical documents, as well as on films, posters, and songs, this interdisciplinary course examines French society, politics, and culture during the era which ushered France into the modern age.

Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above.

Distribution: Language and Literature or Historical Studies
Semester: N/O
Unit: 1.0

**Topic C: France and Europe: Ambiguities, Obstacles, and Triumphs**

*Gauthier*

**NOT OFFERED IN 2006-07.** After an introduction to various social, cultural and political aspects of contemporary France and the French, we will turn our attention to issues surrounding France's role in the project to unify Europe. We will examine how France's anxieties and hopes for the Union are shared by other European nations, and how France is experiencing membership in the European Union differently from its neighbors, in ways that reflect its unique history and culture. Readings will be drawn from a variety of disciplines, including texts by historians, political scientists, sociologists and economists.

Prerequisite: Two 200-level units, one of which must be 210 (if taken Fall 2004 or later), or 211 or above.
Distribution: Language and Literature or Historical Studies
Semester: N/O
Unit: 1.0

**FREN 350 Research or Individual Study**
Prerequisite: Two 200-level units above 206.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**FREN 360 Senior Thesis Research**
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**FREN 370 Senior Thesis**
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**Directions for Election**

One hundred level courses, FREN 101-102 and 103 count toward the degree but not toward the major. Students who begin with 101-102 in college and who plan to study abroad should consult the chair of the department during the second semester of their first year.

**Majors**

Majors are required to complete a minimum of eight units, including the following courses or their equivalents: FREN 210 (if taken Fall 2004 or later) or 211 and 308. The goals of a coherent program are: (a) oral and written linguistic competence; (b) acquisition of basic techniques of reading and interpreting texts; and (c) a general understanding of the history of French literature and culture. All majors must take two 300-level French courses at Wellesley College. FREN 350, 360 and 370 do not count toward the minimum requirement of two 300-level courses for the major. No more than two courses taken credit/noncredit at Wellesley College may be applied to the French major. Students planning to major in French should consult with the chair of the French department.

**Honors**

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 300-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students must complete a 300-level course or its equivalent before the fall of senior year. In addition, a 300-level course is to be taken concurrently with 360-370. See Academic Distinctions.

Students interested in an interdisciplinary major in French cultural studies are referred to the listing for this interdepartmental program.

**Graduate Studies**

Students planning graduate work in French or comparative literature are encouraged to write an honors thesis and study a second modern language and/or Latin.

**Advanced Placement Policies and Language Requirement**

A student entering Wellesley must have an Advanced Placement score of 5 or an SAT II score of 690 to satisfy the foreign language requirement. All incoming students are required to take the departmental placement test. Any discrepancy between a student's AP score and her score on the departmental placement test will be resolved by the placement committee. Any student who intends to fulfill her language requirement by taking a course at another institution must upon her return take the French placement test and attain the required level.

**Teacher Certification**

Students interested in obtaining certification to teach French in the Commonwealth of Massachusetts should consult the chair of the education department.

---

**French Cultural Studies**

AN INTERDEPARTMENTAL MAJOR

Director: Datta (French)

Wellesley offers an interdepartmental major in French cultural studies which combines courses from the Department of French with those in Africana studies, art, history, music, political science, or any other department offering courses on France or Francophone countries. French cultural studies majors ordinarily work closely with two advisors, one from the French department and one from the other area of concentration.

The major in French cultural studies consists of a minimum of eight units. At least four units in the French department above the 100 level are required including 207 and 210 (if Fall 2004 or later) and 211. In special cases, an upper-level culture course in French approved by the program director may be substituted for FREN 207. At least one unit in French at the 300 (advanced) level is required. All majors must take two 300-level courses at Wellesley College. FRST 350, 360 and 370 do not count towards the minimum requirement of two 300-level courses for the major. No more than two courses taken credit/noncredit at Wellesley College may be applied to the French cultural studies major.

Honors. The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students must complete a 300-level course or its equivalent before the fall of senior year. In addition, a 300-level course is to be taken concurrently with 360-370. See Academic Distinctions.

---

**FRST 350 Research or Individual Study**
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**FRST 360 Senior Thesis Research**
Prerequisite: By permission of director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**FRST 370 Senior Thesis**
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

For courses not exclusively on France or a Francophone topic, students are expected to write their main paper(s) on a French theme. In addition, and in consultation with the director, research and individual study (350) may be approved. The procedure to be followed for Honors is identical to that for the French major.

**Teacher Certification**

Students interested in obtaining certification to teach French in the Commonwealth of Massachusetts should consult the chair of the education department.

HIST 367 Seminar. Jewish Identity in the Modern World

MUS 235/335 Music in Historical/Critical Context. Topic for 2006–07: The Femme and Her Song

PHIL 224 Existentialism

POL 328S Seminar. Selected Topics in World Politics: Anti-Americanism as Politics and Performance

POL 421 Modern Political Theory

Department of Geosciences

Professor: Thompson (Chair–Fall)
Associate Professor: Besançon (Chair–Spring)
Assistant Professor: Argow

Instructor: Argow

Instructor in Geosciences Laboratory: Gilbert, Mattison

The geosciences department offers courses that can lead to either a more traditional geology major that emphasizes earth materials and history or an environmental geoscience major that emphasizes an understanding of and solution to environmental problems. A student will consult with her department advisor to design a major that best meets her interests and goals.

All courses with laboratory meet for two periods of lecture and one three-hour laboratory session weekly.

GEOS 100 Oceanography
Argow

Covering over 70% of the Earth’s surface, the oceans are one of the most distinctive features of our planet. Oceans evolve through time, control our climate, are home to a myriad of marine life forms and are flooded by distinctive geologic features including huge volcanoes and giant rift valleys. We will explore such topics as ocean basin sediments, submarine volcanism, shoreline processes, tsunamis, ocean currents, el niño events, coral reefs, deep-sea life and marine food, and mineral resources.

Prerequisite: None. Not open to students who have taken [GEOL 100].

Distribution: Natural and Physical Science
Semester: Fall

Unit: 1.0

GEOS 101 Earth Processes and the Environment with Laboratory
Brabander

NOT OFFERED IN 2006–07. OFFERED IN 2007–08. The Earth is home to more than six billion people and millions of kinds of animals and plants. Geologic processes both rapid (earthquakes and landslides) and slow (mountain building and sea level rise) are intimately linked with sustaining this diversity of life. This course will examine many of the physical processes that are responsible for shaping our environment and will introduce skills essential for detailed observation of these processes. Laboratory and field trips.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken [GEOL 102] or GEOS 102.

Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: N/O. Offered in 2007–08.

Unit: 1.25

GEOS 102 The Dynamic Earth with Laboratory
Besançon, Mattison

Introduction to geologic processes ranging from microscopic growth of mineral crystals to regional erosion and deposition by water, wind, and ice to vulcanism and earthquakes associated with global plate motions. A particular focus of the course will be to better understand the interactions between human activities and the geologic environment. Laboratory and field trips.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken GEOS 101 or [GEOL 102].

Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall. Spring

Unit: 1.25

GEOS 200 The Earth and Life through Time with Laboratory
Argow

The Earth and life have been continually changing throughout the 4.6 billion years of Earth history. We will explore these changes, including the tectonic evolution of mountain ranges, the changing landscapes and environments across the North American continent, and the origin, evolution, and extinction of the various life forms that have inhabited our planet. Laboratory will provide the students with the opportunity to examine Wellesley’s extensive fossil collection and visit local field sites.

Prerequisite: GEOS 100 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100. Not open to students who have taken [GEOL 200].

Distribution: Natural and Physical Science
Semester: Spring.

Unit: 1.25

GEOS 201/ES 201 Methods and Problems in Environmental Science with Laboratory
Brabander

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Problems in environmental science are inherently multidisciplinary and often require a diverse skill set to analyze and solve. This course will focus on developing a toolbox of skills including field methods, geochemical analysis (natural waters, soils, and other environmental materials), and modeling with a goal of being able to frame and solve environmental problems. Students will conduct semester-long research projects and will present their results in a final poster session. Laboratory. Students may register for either GEOS 201 or ES 201 and credit will be granted accordingly.

Prerequisite: One of the following: GEOS 101 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102], ES 100 or permission of the instructor.

Distribution: Natural and Physical Science
Semester: N/O. Offered in 2007-08.

Unit: 1.25

GEOS 203 Earth Materials with Laboratory

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. The solid Earth is composed of a wide range of materials including minerals, rocks and soils. Some of these are as familiar as building stone or bathroom cleanser in everyday life, while others must be sought in natural settings like mountain ranges or flood plains. This course will examine both the physical and chemical properties of earth materials and the processes that lead to their formation. Identification and interpretation of earth materials in the field and in the laboratory (via X-ray and microscopic analysis) will also be emphasized. Laboratory and field trips.

Prerequisite: GEOS 100 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100

Distribution: Natural and Physical Science
Semester: N/O. Offered in 2007-08.

Unit: 1.25

GEOS 204 Catastrophes and Extinctions

NOT OFFERED IN 2006-07. The Earth has not always been a safe place on which to live, as mass extinctions have punctuated the history of life and dramatically altered the course of evolution. Among the topics we will explore are the process of evolution and the nature of the fossil record.
gradual change versus catastrophic events, dinosaurs and their extinction, periodicity of mass extinctions, the prospect of future extinctions, and an evaluation of the possible causes of extinctions, including sea-level changes, climate changes, volcanism, and meteorite impacts.

Prerequisite: GEOS 100 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100. Not open to students who have taken [GEOL 204]

Distribution: Natural and Physical Science Semester: N/O Unit: 1.0

GEOS 211 Geology and Human Affairs

Thompson

Meeting challenges like groundwater protection, nuclear waste disposal and future petroleum production must start with an understanding of the characteristics and history of a variety of geologic settings. This course will illustrate this approach through case studies highlighting Cape Cod glacial deposits contaminated by chemical spills from the Massachusetts Military Reservation, volcanic geology of the proposed nuclear waste repository at Yucca Mountain, Nevada and sedimentary rocks hosting oil resources in the Alaskan National Wildlife Refuge. There will be emphasis on reading and interpreting topographic and geologic maps as well as one required field trip. Normally offered in alternate years.

Prerequisite: GEOS 100 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100. Not open to students who have taken [GEOL 211].

Distribution: Natural and Physical Science Semester: Fall Unit: 1.0

GEOS 213/ASTR 203 Planetary Geology

NOT OFFERED IN 2006-07 OR 2007-08. OFFERED IN 2008-09. Spacecraft observations have revealed a breathtaking diversity of geologic features in our own solar system, from ancient river valleys on Mars and violent volcanic eruptions on Io to ice mountains on Enceladus and the complex surfaces of comets. From a comparative point of view, this course examines the formation and evolution of the planets and small bodies in the solar system. Topics will include: volcanism, tectonic activity, impacts, and tides. Students may register for either GEOS 213 or ASTR 203 and credit will be granted accordingly.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement and any 100-level geosciences or astronomy course.

Distribution: Natural and Physical Science Semester: N/O. Offered in 2008-09. Unit: 1.0

GEOS 220 Volcanoes: Agents of Global and Regional Change with Wintersession Laboratory

Besancon

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. From Mount Saint Helens to Vesuvius to Krakatau, volcanoes affect global climate, change landscape evolution, and are sometimes the cause of tremendous disasters. Understanding the wide variety of phenomena associated with volcanoes provides a broad perspective on how science can be used to protect lives and further human needs and interests. Using geologic literature, Internet search, and a general text, we will study case histories of volcanoes on earth and through the solar system. Written papers and oral presentations will be important parts of the course. Required laboratory will be two weeks in and near Hawaii Volcanoes National Park during Wintersession, with a final project due after return. Normally offered in alternate years. Subject to Dean's Office Approval.

Prerequisite: GEOS 100 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100 and permission of the instructor. Not open to students who have taken [GEOL 220].

Distribution: Natural and Physical Science Semester: N/O. Offered in 2007-08. Unit: 1.25

GEOS 230 Earth from Above: Maps, Remote Sensing, and GIS

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Paper maps and photographs are moving into digital form. Governments, consulting firms, and scientists use geographic information systems (GIS) and image analysis to manage natural resources, administer city infrastructure, search for water supplies, analyze land use, investigate relationships between environmental factors, and prepare maps of all types. Assignments examine a variety of problems in natural science and geography using ArcGIS software. Normally offered in alternate years.

Prerequisite: GEOS 109 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100. Not open to students who have taken [GEOL 230].

Distribution: Natural and Physical Science Semester: N/O. Offered in 2007-08. Unit: 1.0

GEOS 240 Climate Past and Future

Thompson

The documented phenomenon of global warming raises pressing questions about future climate trends and what the world's population might expect if temperatures continue to rise. The science of this problem spans many spheres of Earth activity from present-day oceanic and atmospheric circulation to the geologic record of Pleistocene ice sheets and more extreme climatic events in the far distant past. Even plate motions have climatic importance. Increased volcanism associated with rapid sea floor spreading increases atmospheric carbon dioxide. This course will explore the dynamics of the modern climate system as well as multiple factors influencing climate history. All of these approaches are important for geoscientists and nonscientists alike who must promote intelligent action on global initiatives addressing problems such as anthropogenic carbon dioxide emissions. Normally offered in alternate years.

Prerequisite: GEOS 100 [GEOL 100], GEOS 101, GEOS 102 [GEOL 102] or ES 100. Not open to students who have taken [GEOL 240].

Distribution: Natural and Physical Science Semester: Spring. Unit: 1.0

GEOS 304 Sedimentary Rocks and Sequences with Laboratory

Argow

Sedimentary rocks cover most of the Earth's present surface and contain evidence for past environments throughout billions of years of geologic time. Studying sequences of such rocks is important both for understanding recurrent environmental fluctuations like sea level change and for maximizing resources from coal and petroleum to salt and aluminum ore. Sedimentary processes take on further significance because they take place in popular human habitats including coastlines and flood plains. Lectures will cover production of sediment via weathering, principles of sediment transport, characteristics of sedimentary environments, and interpretation of sedimentary sequences. Laboratory will emphasize identification of sedimentary rocks and minerals based on hand specimens, microscope and x-ray methods, and include field trips in the Boston area. Normally offered in alternate years.

Prerequisite: GEOS 203 or permission of the instructor. Not open to students who have taken [GEOL 301].

Distribution: Natural and Physical Science Semester: Fall Unit: 1.25

GEOS 305 Paleontology with Laboratory

NOT OFFERED IN 2006-07. Over 99.9% of the animal species that have inhabited our Earth are now extinct, and these ancient life forms, such as trilobites and ammonites, are now only known through their fossil remains. We will investigate the origin, evolution, and extinction of these fossil organisms, many of which have no close living relatives. Students will have the opportunity to study Wellesley's extensive fossil collections in their laboratory work.

Prerequisite: A 200-level course in Geosciences or permission of the instructor. Not open to students who have taken [GEOL 301].

Distribution: Natural and Physical Science Semester: N/O Unit: 1.25

GEOS 306 Structural Geology with Laboratory

Thompson

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Introduction to geometry and origin of rock structure ranging from microtextures and fabrics to large-scale folding and faulting. Emphasis on processes of rock deformation in terms of theoretical prediction and experimental findings. Laboratory will include field trips in the Boston area. Normally offered in alternate years.

Prerequisite: GEOS 203 or permission of instructor. Not open to students who have taken [GEOL 306].

Distribution: Natural and Physical Science Semester: N/O. Offered in 2007-08. Unit: 1.25

GEOS 309 Petrology with Laboratory

NOT OFFERED IN 2006-07. Study of the origin and occurrence of igneous and metamorphic rocks which make up most of the earth's crust. The earth generates magmas, primarily along plate boundaries, and they can heat upward as they rise into the crust or onto the surface, forming igneous rocks. Heat, pressure, and deformation generate new minerals and textures in rocks. Students will decipher the sources and history of rocks using chemical and physical models and tools. Laboratory includes study of rocks in thin section and a project study of rocks collected on Boston area field trips.

Prerequisite: GEOS 203 or permission of the instructor. Not open to students who have taken [GEOL 309].

Distribution: Natural and Physical Science or Mathematical Modeling Semester: N/O Unit: 1.25

GEOS 311 Hydrogeology with Laboratory

Besancon

Investigation of water supply and use. Principles of surface and groundwater movement and water chemistry are applied to the hydrologic cycle in order to understand sources of water for human use. Quantity and quality of water and the limitations they impose are considered. Laboratory. Normally offered in alternate years.

Prerequisite: A 200-level course in Geosciences or permission of instructor. Not open to students who have taken [GEOL 311].

Distribution: Natural and Physical Science or Mathematical Modeling Semester: Spring Unit: 1.25
Department of German

Professor: Hansen, Kruse (Chair), Nolden, Ward

Instructor: Meder

Director of Study Abroad Program: Nolden

Resident Director of Wellesley-in-Vienna: Hartnack

The language of instruction above the 100 level is almost exclusively German unless otherwise noted. Students thus have constant practice in hearing, reading, speaking, and writing the language.

The department reserves the right to place a new student in the course for which she seems best prepared, regardless of background and number of units she offers for admission.

Students in GER 201 who wish to accelerate at the intermediate level may apply to the January-in-Vienna program. Participants travel to Vienna for three weeks in January where they study with a professor from the German department. During their stay they complete GER 202W and receive credit as they would for a course taken on campus. (Subject to Dean’s office approval.) Upon returning for the second semester at Wellesley, students are encouraged to continue with GER 231.

Qualified students are encouraged to spend the junior year in Austria in the Wellesley-in-Vienna program or another program approved by the College.

GER 101-102 Beginning German

Hansen, Staff

An introduction to contemporary German with emphasis on communicative fluency. Extensive practice in all four skills: listening, speaking, reading, and writing. Videos and Web-based activities introduce the student to topics from contemporary culture in German-speaking countries. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course. Three meetings per week.

Prerequisite: None

Distribution: None

Semester: Fall, Spring

Unit: 1.0

GER 201-202 Intermediate German

Nolden, Staff

Strengthening and expanding of all language skills with special emphasis on idiomatic usage. Thorough grammar review, oral and aural practice in classroom and language laboratory, readings on contemporary cultural topics, extensive practice in composition. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course. Meets three times a week.

Prerequisite: One to two admission units and placement exam, or 101-102

Distribution: Language and Literature

Semester: Fall, Spring

Unit: 1.0

GER 202W Intermediate German in Vienna

Nolden

Like 202 on campus, this course strengthens and expands all language skills including idiomatic grammar review, oral and listening practice, readings on contemporary and historical topics, and practice in composition. This course is offered as an immersion experience and will feature an important cultural component. Not offered every year. Subject to Dean’s Office approval.

Prerequisite: 201 or permission of instructor. Application required.

Distribution: Language and Literature

Semester: Winter

Unit: 1.0

GER 231 Advanced Studies in Language and Culture

Ward, Kruse

Development of communicative skills necessary to negotiate complex meaning in reading, speaking, and writing. We will study facets of contemporary culture in German-speaking countries. Review of selected grammar topics. A variety of texts will be considered, including poetry, a novel, films, and Web site materials. Designed for students with four quarters of language training or equivalent. Required for the majors in German language and literature and in German studies unless exempted by the department by virtue of linguistic proficiency. Three meetings per week.

Prerequisite: 201-202 or placement examination.

Distribution: Language and Literature

Semester: Fall, Spring

Unit: 1.0

GER 236 Vienna Imagined: The Urban Experience in Literature and Film

NOT OFFERED IN 2006-07. This course will explore the fascination of the city of Vienna has exerted on the imagination. We shall read texts of various genres: history, travel literature, autobiography, poetry, and literature. Texts by authors like Arthur Schnitzler, Stefan Zweig, Ingeborg Bachmann, the classic film The Third Man (1949), as well as a modern Austrian film. The course is designed to develop the skills of reading and writing. Written work will increase in sophistication from summarizing to analyzing texts and formulating original arguments. Taught in German, two periods.

Prerequisite: 231/239 or permission of instructor.

Distribution: Language and Literature

Semester: N/O

Unit: 1.0

GER 239 Germany and Austria Today: Advanced Conversation and Composition

NOT OFFERED IN 2006-07. Intensive practice in oral and written communication and presentation; introduction to rhetorical strategies of conversation and discussion; introduction to elements of German prose style; practice of various forms of writing. On the basis of newspaper and magazine articles, essays and stories, television news, film clips, and Web site materials, we will discuss and write about current events and issues in Germany and Austria.

Prerequisite: 201-202 or permission of instructor. Not open to students who have taken GER [235].

Distribution: Language and Literature

Semester: N/O

Unit: 1.0

GER 248 The Fantastic in German Literature

NOT OFFERED IN 2006-07. The course will explore short fiction of the fantastic and the uncanny that emerges after the eighteenth century. These works, which employ allegories of escapist fantasy, horror and supernatural terror, delusion, and abnormal psychic states, are chosen for their literary treatment of fears that prey on the human imagination. We will begin with tales from the Grimms’ collection of fairy tales and explore themes of the Doppelganger, shapeshift-

105 German
GER 250 Research or Individual Study
Prerequisite: Open by permission.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

GER 250H Research or Individual Study
Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

GER 252 Drama as Text and Performance
NOT OFFERED IN 2006-07. Focusing on one period of German theatre, we will examine main features of the genre of drama as exemplified by plays and critical texts by major authors. A substantial part of the course will be devoted to performance issues, resulting in performance projects at the end of the semester. Taught in German, One seminar period with additional rehearsal time.
Prerequisite: 201-202 or permission of instructor.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

GER 255 The Woman Question
NOT OFFERED IN 2006-07. We will trace the way the "Frauenfrage" was posed by three generations of women and men in German-speaking countries—the role of women in Romantic thought and their activity in Romantic circles and salons; the way in which the debate was changed by the revolutionary convulsions of 1848; the development of an organized women's movement in the 1870s and 1880s. We will read essays, letters, and autobiographical works, poetry, and one novel that reflect a range of attitudes toward woman's societal role. Taught in German.
Prerequisite: 231 or permission of instructor.
Distribution: Historical Studies or Language and Literature
Semester: N/O
Unit: 1.0

GER 268 Richard Wagner, Nietzsche, Mann: The Composer and His Critics (in English)
NOT OFFERED IN 2006-07. Richard Wagner—composer, poet, critic—is a controversial figure in German culture. This course will examine in depth the four operas that make up the great mythical tale of lust and power, The Ring of the Nibelung. Beginning with Norse sagas, we shall read Wagner's sources, the major responses to Wagner, concentrating on his contemporaries, the philosophers Friedrich Nietzsche, and short works by Thomas Mann. We shall also read Wagner's own essays to understand his subsequent use by National Socialism. Two periods with additional listening sessions.
Prerequisite: None
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

GER 274 Postwar German Culture
NOT OFFERED IN 2006-07. A survey of cultural, social, and political developments in Germany since 1945. Texts will be drawn from literature, historical studies, and autobiography.

GER 275 World War II and Its Aftermath in German Literature
Kriege
Sixty years after the end of World War II, Germans have begun the problematic task of remembering their recent history not only as perpetrators of the war and the Holocaust but also as the war's eventual victims. This course will examine representative examples of the literature memorializing World War II and its aftermath in their historical and cultural context. Texts read will include novels and novellas, essays, historical accounts, and memoirs.
Prerequisite: 231 or permission of instructor.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

GER 276 Franz Kafka (in English)
Krise
All aspects of Kafka's works and life will be explored in the historical and social context of early twentieth-century Central Europe. We will read a wide selection from his novels, e.g. The Trial, short stories, The Metamorphosis, In the Penal Colony; parables and aphorisms; diaries and letters, such as his Letters to Felice. We will discuss the delight and difficulty of reading Kafka, his posthumous reception as a world author, and his importance as a cultural icon in the late twentieth- and early twenty-first centuries. Taught in English, two periods.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

GER 325 Goethe
NOT OFFERED IN 2006-07. Texts from all phases of Goethe's literary career will be studied in their socio-historical context. Readings will include; poetry, dramatic works including Faust, and narrative works. Taught in German, two periods.
Prerequisite: One 200-level unit, 231 or above, taught in German, or by permission of the instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

GER 329 Readings in Enlightenment and Romanticism
Nolden
This course introduces students to the main authors, genres, and issues of the literature of Enlightenment, Storm and Stress, and Romanticism. Special focus on literary images of the family, the outsider, women, and power relationships. Texts by Gellert, Lessing, Goethe, Schlegel, Kleist, and Tieck. Taught in German, two periods.
Prerequisite: One 200-level unit, 231 or above, taught in German, or permission of the instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

GER 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

GER 350H Research or Individual Study
Prerequisite: Open by permission.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

GER 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

GER 368 Richard Wagner, Nietzsche, Mann: The Composer and His Critics
NOT OFFERED IN 2006-07. Same course as GER 268 above, with additional readings in German and an additional weekly class meeting taught in German with discussions and oral reports in German.
Prerequisite: One 200-level unit, 231 or above, or permission of instructor.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

GER 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

GER 389 Seminar
Ward
Topic for 2006-07: Latin America and the Caribbean in the German Imagination. From the travel accounts of the German conquistador Nikolas Federman in the sixteenth and those of Alexander von Humboldt in the eighteenth to the novels of Heinrich von Kleist in the nineteenth and the films of Werner Herzog in the twentieth, the Caribbean basin and Latin America have been a source of fascination for many representatives of German culture. We will consider a wide range of authors and genres, exploring the impact of Latin America and the Caribbean on the German imagination, with special emphasis on the travel literature of explorers, the fiction and poetry of writers in exile during the Third Reich, and dramas of the 70s and 80s concerning Latin American revolutions.
Prerequisite: 231 or above.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

EXTD 288 Hitler: The Man in History, Literature, and Film (in English)

Directions for Election
The department offers a major in language and literature as well as a minor in German. GER 101-102 is counted toward the degree but not toward the major or minor. Students who begin German at Wellesley and wish to major will be encouraged to advance as quickly as possible to upper-level work by doing intermediate lan-
Students interested in an interdepartmental major in German studies are referred to the listing for this interdepartmental program.

The major in German language and literature
The major in language and literature develops advanced language skills with emphasis on the critical reading of texts while also stressing a deeper acquaintance with the literary and cultural traditions of German-speaking countries. GER 202 may count toward the eight-unit minimum major. GER 231 or 239 and two 300-level units are required, either 325 or 329 (offered in alternate years) and one seminar (389). Of the remaining minimum four elective units, one unit can be a 200-level course offered by the department in English, but if a 300-level of the same course is offered with an extra session taught in German, this is highly recommended. With approval of the department, certain courses taken abroad may count toward the major at the 200 level. Courses on the German studies related courses list are also recommended as complements to the language and literature major. Each student should consult her departmental advisor about the best sequence of courses for her major program.

The minor in German
The minor offers an opportunity to acquire advanced skills in the language with emphasis on communicative strategies and cross-cultural understanding. GER 202 may count toward the five-unit minimum minor. GER 231 or 239 is required. One 300-level unit is highly recommended. One unit can be a 200-level course offered by the department in English, but if a 300-level of the same course is offered with an extra session taught in German, this is highly recommended. With approval of the department, certain courses taken abroad may count toward the minor. Students are encouraged to supplement the minor with any of the related courses listed under German studies. Each student should consult her departmental advisor about the best sequence of courses in her case.

Honors Program
The department offers two plans for the honors program. Plan A (See Senior Thesis Research, 360 and 370) offers the opportunity for original work in language and literature (for honors work in German Studies, please see German Studies), culminating in the writing of a longer paper or papers with an oral defense. See Academic Distinctions. Plan B, honors by examination, is open to candidates in language and literature only. Written and oral examinations are based on a reading list devised by the student under the guidance of an advisor. Plan B carries no course credit, but where appropriate, students may elect a unit of 350 to prepare a special author or project that would be included in the honors examination.

German Studies

AN INTERDEPARTMENTAL MAJOR

Director: Kruse (German)

This interdisciplinary and interdepartmental major is designed to provide the student with a broader understanding of the cultures of Germany, Austria, and Switzerland by achieving an advanced level of language proficiency and by studying the art, history, literature, philosophy, and politics of these countries in depth. GER 202 may count toward the eight-unit minimum major. GER 231 and two 300-level units are required. It is recommended that one of these units be a seminar. A minimum of five units should be completed in the German department, one of them at the 300 level. The elective units taken in the German department may be drawn from courses taught in German or English, including [GER 121, WRIT 125].

The remaining minimum of three elective units may be drawn from any of the related courses listed below. A student who enrolls in these courses is expected to do a project or paper on a German, Austrian, or Swiss topic in order to count the course toward her German studies major. She may also do an interdisciplinary 360-370 project that is supervised by an interdepartmental committee. With approval of the relevant department, courses taken abroad may count at the 200 level toward the major. A course in German history is highly recommended, as are two units from a single allied field. While it is helpful to have an advisor in the allied field, a student must have a major advisor in the German department, who must approve all German studies programs.

Honors

The route to honors in the major is writing a thesis. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level. See Academic Distinctions.

**HIST 200 Roots of the Western Tradition**

Rogers  
In this introductory survey we will examine how the religious, political, and scientific traditions of western civilization originated in Mesopotamia and Egypt from c. 3500 B.C.E. and were developed by Greeks and Romans until the Islamic invasions of the seventh century C.E. The course will help students to understand the emergence of polytheism and the great monotheistic religions, the development of democracy and Republicanism, and the birth of western science and the scientific method.  
Prerequisite: None  
Distribution: Historical Studies or Religion, Ethics and Moral Philosophy  
Semester: Fall  
Unit: 1.0

**HIST 201 The European Phoenix: Modern Europe’s Changeful History, 1815–1991**  
Wiecki  
This course surveys the history of Europe from the Congress of Vienna in 1815 to the collapse of the Soviet Union in 1991. Students will learn about the rise of liberal and socialist movements and the revolutions they inspired, the transformation of the continent through industry, urbanization, and nationalism, and the European penetration of the world through imperialism. World War I hurled the continent into an era of turmoil when it brought about the collapse of great empires, economic depression, and the rise of fascism. World War II and the Holocaust marked Europe’s darkest hour. Students will investigate the connection between both World Wars and the consequences of “total war.” Finally, the course will examine how a new Europe emerged from the ruins after 1945 and how Eastern Europe became part of the new “European Community” after the fall of Communism in 1991.  
Prerequisite: None  
Distribution: Historical Studies  
Semester: Spring  
Unit: 1.0

**HIST 203 History of the United States, 1607 to 1877**  
Sheidley  
A survey of the social, cultural, and institutional dimensions of American history from the colonial period through the Civil War and Reconstruction. Special attention to recurrent themes in the pattern of America’s past: immigration, racial and cultural conflict, urbanization, reform.  
Prerequisite: None  
Distribution: Historical Studies  
Semester: Fall  
Unit: 1.0

**HIST 204 History of the United States in the Twentieth Century**  
Auerbach  
The emergence of an urban industrial society; social change amid tension between traditional and modern cultures; development of the welfare state; issues of war and peace; the shifting boundaries of conservative reaction, liberal reform, and radical protest, from the 1890s to 2001.  
Prerequisite: None  
Distribution: Historical Studies  
Semester: Spring  
Unit: 1.0

**HIST 205 The Making of the Modern World Order**  
Giersch, Rao  
A foundational course in international history. Explores the evolution of trade, competition, and cultural interaction among the world’s diverse communities, from the Mongol conquests of the late thirteenth century through the end of the twentieth century. Themes include the growing divergence in trajectories of the Western and non-Western worlds evident by the fifteenth century, the rise of European wealth and power in the seventeenth and eighteenth centuries, imperialism and its impact, the evolution of the nation-state, scientific and industrial revolutions, and “modernization” and the non-Western world in the twentieth century. Attention to agents of global integration, including trade, technology, migration, dissemination of ideas, conquest, war, and disease.  
Prerequisite: None  
Distribution: Historical Studies  
Semester: Fall  
Unit: 1.0

**HIST 206 From Conquest to Revolution: A History of Colonial Latin America**  
Osorio  
The “discovery” by Christopher Columbus in 1492 of the “New World” unleashed a process of dramatic changes in what we now call Latin America. Spanning roughly from the fifteenth through the mid-eighteenth centuries, this course examines the ideological underpinnings of the Spanish Conquest, the place of the Americas in a universal Spanish empire, and the role of urban centers in the consolidation of Spanish rule. Emphasis is placed on Indigenous societies and the transformation and interactions with Africans and Europeans under colonial rule; the role of Indian labor and African slavery in the colonial economy; the creation, consolidation, and decline of colonial political institutions; and, finally, the role of religion and baroque ritual in the creation of new hybrid colonial cultures and identities.  
Prerequisite: None  
Distribution: Historical Studies  
Semester: Fall  
Unit: 1.0

**HIST 207 Contemporary Problems in Latin American History**  
Osorio  
In this problem-centered survey of the contemporary history of Latin America we will critique and go beyond the many stereotypes which have inhibited understanding between Anglo and Latin America, cultivating instead a healthy respect for complexity and contradiction. Over the course of the semester we will examine key themes in current history, including the dilemmas of uneven national development in depend-
ent economies; the emergence of anti-imperialism and various forms of political and cultural nationalism; the richness and variety of revolution; ethnic, religious, feminist, literary, artistic, and social movements; the imposing social problems of the sprawling Latin American megalopolis; the political heterodoxies of leftist, populist, authoritarianism, and neoliberalism; the patterns of peace, violence, and the drug trade; the considerable U.S. influence in the region, and finally, transnational migration and globalization.

Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 208 Society and Culture in Medieval Europe
This course examines life in medieval Europe c. 750–1250 in all its manifestations: political, religious, social, cultural, and economic. Topics to be studied include the papacy, the political structures of France, Germany and Italy, monks and monastic culture, religion and spirituality, feudalism, chivalry, courtly love and literature, the crusading movement, intellectual life and theological debates, economic structures and their transformations, and the varied roles of women in medieval life. Students will learn to analyze and interpret primary sources from the period, as well as to evaluate critically historiographical debates related to medieval history.

Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 210 The British Isles: From Glorious Revolution to Global Empire

Frace
Between the seventeenth century and Queen Victoria's reign, Britain transformed itself from a relatively minor European kingdom into the wealthiest and most powerful nation in the world, ruling over a quarter of the earth's population. This course will explore Britain's often tumultuous history while addressing several major themes, such as: the creation of a modern consumer society; secularization; the radical mobilization of the working class; abolitionism; questions of social and sexual hierarchies raised at home by an expanding empire abroad; and the birth of liberal, conservative, and socialist ideologies. This course will center on England, but will also look at Scotland and Ireland's particular histories of resistance, conquest, and integration.

Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 211 Bread and Salt: Introduction to Russian Civilization

Tumarkin
For centuries Russians have welcomed visitors with offerings of bread and salt. This introductory course is an earthy immersion in Russian life and culture from the age of Tolstoy to Putin's dissonant new Russia. Black bread, dense and pungent, is central to our exploration of food, feast, fasting, and famine in the Russian experience. We will weave in both related and counterpuntal themes, such as: religious practice, folk beliefs and peasant life; surviving Stalinism in the age of terror; making do in the surreal "era of stagnation" under Brezhnev; and the splendor and agony of Russian high culture. Guest lectures by Russians in disciplines other than history.

Prerequisite: None. Not open to students who have taken HIST [105].
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 213 Conquest and Crusade in the Medieval Mediterranean
Ramseyer
NOT OFFERED IN 2006-07. This course examines life in the Mediterranean from the disintegration of the Roman empire in the fourth and fifth centuries through the Holy Land in the eleventh and twelfth centuries. Readings will focus on the various wars and conflicts in the region as well as the political, religious, and social structures of the great Christian and Muslim kingdoms, including the Byzantine empire, the Islamic caliphs of the Fertile Crescent and North Africa, the Turkish emirates of Egypt and the Near East, and the Latin Crusader States. Attention will also be paid to the cultural and religious diversity of the medieval Mediterranean and the intellectual, literary, and artistic achievements of Christian, Muslim, and Jewish communities.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 214 Medieval Italy
Ramseyer
NOT OFFERED IN 2006-07. This course provides an overview of Italian history from the disintegration of the Roman empire in the fifth century through the rise of urban communes in the thirteenth century. Topics of discussion include the birth and development of the Catholic Church and the volatile relationship between popes and emperors; the history of monasticism and various other forms of popular piety as well as the role of heresy and dissent, the diverging histories of the north and the south and the emergence of a multi-cultural society in southern Italy, and the development and transformation of cities and commerce that made Italy one of the most economically advanced states in Europe in the later medieval period.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 216 Revolution in Latin America
Osorio
In Latin America, the twentieth century was indelibly marked by revolution and counter-revolution. Any analysis of the recent history of the peoples and states of Latin America must focus on the conditions, desires, and perils that have shaped the revolutionary experience. We will examine the main historical currents of armed revolution in Latin America, including instances of successful armed revolution, post-revolutionary state-making and nation-building, and the many guerrilla movements. Revolution in the Americas was not only about seizing state power, but about making "the new man" and reinventing society. We will consider the past, present, and possible future of revolution in the Americas.

Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 217 The Making of European Jewry, 1085 to 1815
Malino
NOT OFFERED IN 2006-07. A study of the Jewish communities of Western and Eastern Europe from the reconquest of Toledo to the end of the Napoleonic era. Topics include medieval Jewish communities, their dispersion, the differentiation of Eastern and Western Jewry, persecution and toleration, secularism, religious revivalism and mysticism, and the emancipation of the Jews during the French Revolution.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 218 From Ghettos to Nation-States: Jews in the Modern World
Malino
NOT OFFERED IN 2006-07. This course explores the revolutionary social, economic, and cultural transformation of Jews living in Europe and America. Topics include struggles for emancipation, enlightenment and mysticism, immigration, acculturation and economic diversification; also the emergence of anti-Semitism in the West and East, Zionism, the Holocaust and the creation of the state of Israel.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 219 The Jews of Spain and the Lands of Islam
Malino
The history of the Jews in Muslim lands from the seventh to the twentieth century. Topics include Muhammad's relations with the Jews of Medina, poets, princes and philosophers in Abbasid Iraq and Muslim Spain, scientists, scholars and translators in Christian Spain, the Inquisition and emergence of a Sephardic diaspora. Twentieth-century focus on the Jewish community of Morocco.

Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 221/321 A Global Empire: The Rise and Fall of Spanish World Power
Osorio
NOT OFFERED IN 2006-07. Whether the term "globalization" is defined as the global imposition of a hegemonic culture or as the dynamic of global interaction, it is nothing new – it can be traced as far back as the Spanish Empire of the sixteenth and seventeenth centuries. This course examines the two and a half centuries (late fifteenth to mid-eighteenth) in which Spain established the most extensive empire the world had ever known, ranging from Naples and the Netherlands to the Philippines, a global enterprise in which non-Spaniards played essential roles in its daily functioning. Beyond examining the vast diversity of resources, peoples, and ideas behind Spain's overwhelming powers, we will explore the role played by the rise of the British Empire and France in the decline of Spanish world power. This course may be taken as 221 or, with additional assignments, as 321.

Prerequisite: 221: None; 321: Permission of instructor.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0
HIST 222 The Barbarian Kingdoms of Early Medieval Europe
Ramsayer
NOT OFFERED IN 2006-07. This course examines the barbarian successor states established in the fifth and sixth centuries after the disintegration of the Roman empire in the west. It will focus primarily on the Frankish kingdom of Gaul, but will also make forays into Lombard Italy, Visigothic Spain, and Vandal North Africa. In particular, the course will look in-depth at the Carolingian empire established c. 800 by Charlemagne, who is often seen as the founder of Europe, and whose empire is often regarded as the precursor of today’s European Union. Political, cultural, religious, and economic developments will be given equal time.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 227 The Renaissance in Italy and Northern Europe
Rogers
The legendary rebirth of classical learning coincided with an era of global expansion, the religious Reformation, and civil unrest. While placing Renaissance Europe into its wider historical context, this course will emphasize cultural developments and intellectual innovations. While ranging between London, Oxford, Rotterdam, Paris, Florence, and Venice, we will interrogate the minds and worlds of distinguished scholars and the common crowd. How did they define what it meant to be human, or a member of society? What were the heated debates over the roles of women or sexuality, or over the nature of God and religious heresy? How did the accumulation of wealth and the exploration of "new worlds" affect society?
Prerequisite: Not open to students who have taken HIST 228
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 229/329 Alexander the Great: Psychopath or Philosopher King
Rogers
NOT OFFERED IN 2006-07. Alexander the Great murdered his best friend, married a Bactrian princess, and dressed like Dionysus. He also conquered the known world by the age of 33, fused the eastern and western populations of his empire, and became a god. This course will examine the personality, career, and achievements of the greatest conqueror in Western history against the background of the Hellenistic World. This course may be taken as either 229 or, with additional assignments, as 329.
Prerequisite: 229: None; 329: Permission of instructor
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 230 Greek History from the Bronze Age to the Death of Philip II of Macedon
Rogers
The origins, development, and geographical spread of Greek culture from the Bronze Age to the death of Philip II of Macedon. Greek colonization, the Persian Wars, the Athenian democracy, and the rise of Macedon will be examined in relation to the social, economic, and religious history of the Greek polis.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 231 History of Rome
Rogers
NOT OFFERED IN 2006-07. Rome’s cultural development from its origins as a small city state in the eighth century B.C.E. to its rule over a vast empire extending from Scotland to Iraq, Topics include the Etruscan influence on the formation of early Rome, the causes of Roman expansion throughout the Mediterranean during the Republic, the Hellenization of Roman society, the urbanization and Romanization of Western Europe, the spread of "mystery" religions, the persecution and expansion of Christianity, and the economy and society of the Empire.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 232 The Transformation of the Western World: Europe from 1300–1815
Rogers
This course will provide a dynamic overview of the intellectual, socio-political, and cultural movements and events that defined Europe during its turbulent shift into modernity. From the Black Plague to the French Revolution, we will focus on: the secular humanism of the Renaissance; the Reformation and the resulting Wars of Religion; the emergence of absolutist autocracies and modern liberal states; the radical Enlightenment; feminism, and the dawning ideologies of embryonic capitalism and socialism. By including documents ranging from private diaries and letters to political treatises and popular publications, this course will bring to vivid life a world that is at once foreign and familiar.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 236 The Bridge to Modernity? The European Enlightenment
Rogers
NOT OFFERED IN 2006-07. The Enlightenment has been alternately demonized and revered for its prominent role in forging Western modernity. Was it the harbinger of modern democracy, secularism, and feminism? Or of ethnocentric racism, sexism, and fascism? This course will examine the works of the most innovative and controversial writers in the canon, including Mary Wollstonecraft, Kant, Catherine Macaulay, Montesquieu, Voltaire, Rousseau, Locke, and Diderot. We will also address the forgotten legions of men and women who comprised the international republic of letters, and who frequented the (sometimes respectable, often scandalous) coffeehouses, salons, and secret societies of the eighteenth century. Our discursive focus will be on political hegemony, civil liberties, religious toleration, gender, social development, sexuality, and race.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 238 A Nation Transformed: Germany from Nazism to Reunification 1945–1990
Wieck
This course explores the drastic transformation of Germany from Nazi dictatorship into a stable democracy. Students will learn about the interactions between society, politics, and culture that have shaped West and East Germany from 1945 to 1990. Using a variety of sources, such as histori-
HIST 250 Research or Individual Study
Prerequisite: Open to first-year students and sophomores.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

HIST 250H Research or Individual Study
Prerequisite: Open to first-year students and sophomores.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

HIST 251 Continent in Crisis: North America During the Age of Revolution
Sheidley NOT OFFERED IN 2006-07. An examination of the forces that shattered British colonial society during the eighteenth century and gave rise to a new nation in North America. We will investigate the causes of the American Revolution from a continental perspective, paying careful attention to the experiences of Native Americans as well as colonists having European and African roots, and explore the consequences of this transformative event for all inhabitants of the new Republic.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 252 Race, Ethnicity, and Difference in Early America
Sheidley An examination of the multiracial, multiethnic societies which took shape in North America during the colonial period. We will explore the causes of voluntary and involuntary migration from Europe and Africa, the pattern of colonial settlement, concepts of family and community, strategies of cultural adaptation and resistance, the emergence of racial and ethnic consciousness, and the development of British and American identities.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 253 First Peoples: An Introduction to Native American History
Sheidley A survey of the social, cultural, and political history of North America's native peoples from 1200 through the present. Case studies of particular nations will be used to explore a wide range of issues, including the politics of treaty making, the economic and environmental consequences of the fur trade, "removal" and reservation life, pan-Indianism, and the "Red Power" movement of the 1970s. In addition to historical scholarship, sources will include autobiography, fiction, and several cinematic depictions of Native American life.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 255 American Cultural History
McCarthy This course is designed to introduce students to the interdisciplinary study of American culture from the founding of the nation to the beginnings of a mass culture in the early twentieth century. Exploring both the methods and various themes of cultural history, we will examine a variety of primary materials including the productions of artists, poets, novelists, statesmen, and common folk. Students will be exposed to the ways in which historians "read" culture as they investigate major developments in the ideas, beliefs, and values that make up American culture. Among the themes we will investigate are the role of race and ethnicity in constructing a national identity, the growth and diversity of nineteenth-century print culture, the rise of a mass consumer culture, and the emergence of a modern American self.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 257 History of Women and Gender in America
McCarthy The history of American women, from the colonial period to the 1960s, with a focus on women's involvement in politics and on the changing nature of women's work. Topics include colonization and the Revolution; the construction of the private and public "spheres"; slavery and antislavery; immigration and ethnicity; women and war; the battle for suffrage; women's health and sexuality; and the civil rights and feminism.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 258 Freedom and Dissent in American History
Auerbach Freedom of speech since the founding of the nation, with special attention to the Constitutional boundaries of permissible dissent and the enduring tension between individual rights and state power in American society. Among the issues considered are radical protest; wartime censorship; forms of symbolic expression; obscenity and pornography; campus hate speech; political and sexual correctness.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 259 The History of Popular Culture in the United States
NOT OFFERED IN 2006-07. This course surveys major developments in the history of popular culture in the United States, stretching from the eighteenth century to the present. It explores topics such as literature, drama/theater, dance halls, movies, radio, advertising, television, music and the internet; it covers different types of popular culture such as printing, performance, image, and audio; it looks at how popular culture has been depicted in terms of icons, myths, stereotypes, heroes, celebrities, and rituals; it addresses the rise of mass production and consumption; it examines the ways in which race, class, gender, ethnicity and sexuality have been perceived and are portrayed in popular culture; and it illustrates how the content of popular culture shapes and reflects our personal, social, political and intellectual beliefs and values.
Prerequisite: Not open to students who have taken [357].
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 261 World War I in Europe: History, Experience, and Memory
NOT OFFERED IN 2006-07. The Second World War was a defining event in the history of the twentieth century. An estimated 50 million men, women and children died in a war that engulfed the globe and profoundly shaped the world in which we live. This course will focus on the military, political, social and cultural dimensions of the war in Europe and the USSR. Topics and themes include: Hitler’s war aim, the uses of propaganda, civilian mobilization and “total” war, the Grand Alliance, racial policies and genocide, and the collaboration and resistance of civilians under Nazi occupation. The course will conclude with a survey of the ways in which the war has been, and continues to be, commemorated and debated in Britain, Russia, Germany, France and Austria.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 263/PEACE 259 South Africa in Historical Perspective
Kapteijns An analysis of the historical background and lasting consequences of Apartheid, focusing on the transformation of the African communities in the period of commercial capitalist expansion (1652-1885) and in the industrial era (1885-present). Important themes are the struggle for land and labor; the fate of African peasants, labor migrants, miners and domestic servants; the undermining of the African family; the diverse expressions of African resistance; and the processes which are creating a new, post-apartheid South Africa. The enormous challenges of reversing inequality and resolving conflicts will receive special attention. Students may register for either HIST 263 or PEAC 259 and credit will be granted accordingly.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 264 The History of Precolonial Africa
Kapteijns NOT OFFERED IN 2006-07. Precolonial Africa encompasses ancient agrarian kingdoms (such as Egypt and Merowe), city-states on the shores of the sea and desert, and “nations without kings,” with their own, unique social and political institutions. Students will learn about the material bases of these societies, as well as their social relations and cultural production, all the while familiarizing themselves with the rich array of written, oral, linguistic, and archeological sources available to the historian of Africa. After 1500, in the era of the European expansion, large parts of Africa were incorporated into the Atlantic tropical plantation complex through the Slave Trade. The enormous impact on Africa of this unprecedented forced migration of Africans to the Americas from c. 1500 to the 1880s will constitute the concluding theme.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 265 History of Modern Africa
Kapteijns Many of Africa's current characteristics are the legacy of colonial domination. We will therefore study different kinds of colonies, from those settled by White planters to the "Cinderellas," in which colonial economic intervention was (by comparison) minimal and the struggle for independence less bloody. For the post-independence period, we will focus on the historical roots of such major themes as neo-colonialism, economic underdevelopment, ethnic conflict and genocide,
HIV-AIDS, and the problems of the African state. However, Africa's enormous natural and human resources, its resilient and youthful population, and its vibrant popular culture—a strong antidote against Afro-pessimism—will help us reflect on the future of this vast continent.

Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 266 The Struggle Over North Africa, 1800 to the Present

Staff
NOT OFFERED IN 2006-07. Themes in the social, economic, political and cultural history of North Africa (the Maghreb and Mauretania, Libya, Egypt and Sudan) from 1800 to the present: major features of precolonial society and history in three regions, the transformations brought about by French, British and Italian colonial rule, North African resistance and wars for independence, and the contradictions of the era of formal political independence, including the emergence of Islamist movements and the literary and political debate about postcolonial identities in the area. Students will draw on analyses by historians and social scientists, on novels, short stories, autobiographies, poetry by North Africans, and on music and film from and about North Africa.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 269 Japan, the Great Powers and East Asia, 1853–1993

Matsuzaka
The history of Japan's international relations from the age of empire through the end of the Cold War. Topics include: imperialism and nationalism in East Asia, diplomacy and military strategy, international economic competition, cultural and "civilizational" conflicts, World War II in East Asia, the US-Japan alliance, and the politics of war memory. Special emphasis on Japan's relations with the United States, China, Russia, and Korea.

Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 272 Political Economy of Development in Colonial and Postcolonial South Asia

Rao
In 1947 India was partitioned into India and Pakistan. Since then, these countries have wrestled with issues of governance and development, but colonial rule casts a long shadow over their efforts. This course introduces students to the complex politico-economic landscape of the subcontinent by examining how the idea of development changes in modern South Asian history. How are developmental efforts embedded in contexts of politics, society, and culture? How do political systems affect decisions? This course considers these questions by examining themes such as: the colonial state's construction of railway and irrigation networks; Gandhi's critique of industrialization; Nehru's vision of an industrial economy; the challenges posed by Partition and militarization of Pakistan; the Green Revolution; the onset of economic deregulation.

Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 273 South Asian Civilizations

Rao
NOT OFFERED IN 2006-07. This course introduces the history of the south Asian subcontinent from antiquity to modern times. Following a broadly chronological trajectory, we consider the classical antiquity of the Mauryas and Guptas, the Muslim empires of the Delhi Sultanate and the Mughals, and the period of European colonialism until independence. Themes include: the emergence of states, the arrival of Islam, the rise of cities, the contradictions of colonial rule, and the struggle for independence. A range of primary materials will present the perspectives of diverse actors such as rulers, merchants, women, reformers, workers, colonial officials and nationalists.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 275 The Emergence of Ethnic Identities in Modern South Asia

Rao
NOT OFFERED IN 2006-07. South Asian society has long been represented by rigid systems of hierarchy. Caste, most famously, has been represented as an inexorable determinant of social possibility. Yet, what are the ways in which people actually identify themselves, and to what extent is hierarchical identification a product of South Asia's modern history? This course explores the problems of social and cultural difference in South Asia. How do modern institutions such as the census and electoral politics shape the way in which these problems are perceived today? What are the effects of the introduction of English education? Caste will be the primary form of identity that we explore, but we also consider class, religion and gender in seeking to unravel the complex notion of ethnicity.

Prerequisite: None
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 276 The City in South Asia

Rao
South Asian cities are currently undergoing massive demographic and spatial transformations. These cannot be understood without a consideration of both the specific history of south Asia and a broader account of urban change. This course examines these changes in historical perspective and situates urban south Asia within a global context. How did colonial rule transform old cities such as Delhi and Lahore? How were the differing ideologies of India and Pakistan mapped onto new capitals such as Chandigarh and Islamabad? How are ethnic pasts and techno futures reconciled in booming cities such as Bangalore and Mumbai? What are the connections between the urban environment and political mobilization? We consider a range of sources, including scholarly literature, films and short stories.

Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 277 China and America: Evolution of a Troubled Relationship

Giersch
A survey of China's economic, cultural, and political interactions with the United States from 1784 to present with a focus on developments ca. 1940-present. Principal themes include: post-imperial China's pursuit of wealth and power, changing international conditions, military strategy, the influence of domestic politics and ideology, and the basic misunderstandings and prejudices that have long plagued this critical relationship. Topics include: trade throughout the centuries; American treatment of Chinese immigrants; World War II and the Chinese Revolution; the Cold War; Taiwan, and the ongoing instability of relations since 1979. Sources include the ever-increasing number of declassified U.S. documents as well as critical materials translated from the Chinese.

Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 278 Reform and Revolution in China, 1860–Present

Giersch
From shattering nineteenth-century rebellions that fragmented the old empire to its emergence as a twenty-first-century superpower, few places have experienced tumult and triumph in the same massive measures as modern China. To understand China today, one must come to terms with this turbulent history. This course surveys China's major cultural, political, social, and economic transformations, including failed reforms under the last dynasty; the revolutions of 1911 and 1949; the rise of the Communist Party and Mao's transformation of society and politics; the remarkable market reforms of recent decades; the contentious issue of Taiwan's democratic transition; and China's ongoing effort to define its position within East Asia and the world.

Prerequisite: None
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 279/379 Heresy and Popular Religion in the Middle Ages

Ramseyer
NOT OFFERED IN 2006-07. This course looks at popular religious beliefs and practices in medieval Europe, including miracles, martyrdom and asceticism, saints and their shrines, pilgrimages, relics, curses, witchcraft, and images of heaven and hell. It seeks to understand popular religion both on its own terms, as well as in relationship to the Church hierarchy. It also examines the basis for religious dissent in the form of both intellectual and social heresies, which led to religious repression and the establishment of the Inquisition in the later Middle Ages. This course may be taken as 279 or, with additional assignments, as 379.

Prerequisite: 379: None; 379: Permission of the instructor.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 281/381 Dream of the Red Chamber: An Introduction to Chinese Society, ca 1650–1800

Giersch
NOT OFFERED IN 2006-07. We will read one of China's great novels, Dream of the Red Chamber, and use it as an entrée into the social, political and economic history of the early and high Qing periods. Cao Xueqin's engaging tale describes in rich detail the fictional Jia family, a wealthy, powerful clan whose political connections and social status closely resembled those of Cao's own family. While reading about the lies, we will simultaneously use historical studies to deepen
our understanding of family life, gender relations, religious devotion, sexuality, education, commerce, and political power during one of China's most dynamic periods. This course may be taken as either 281 or, with additional assignments, as 381.

Prerequisite: 281: None; 381: Permission of the instructor. Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 284 The Middle East in Modern History

Kapteijns

Themes in the history of the Modern Middle East from 1914 to the present. After World War I, European powers dominated the area and carved it up into the modern nation states that we know today. We will study the political history of these states up to the present, but will focus especially on the historical roots and causes of crucial social developments and conflicts. Thus we will study the impact of the oil boom, labor migration, urbanization, the changing roles of women, and the emergence of politicized fundamentalist Islam, as well as aspects of the Palestinian-Israeli conflict, the Iranian Revolution, the Lebanese Civil War, and the Gulf War. Our emphasis will be on the Arab Middle East.

Prerequisite: None Distribution: Historical Studies Semester: Fall Unit: 1.0

HIST 286 History of the Middle East, c. 600–1918

Kapteijns

NOT OFFERED IN 2006–07. Introduction to the political, religious, cultural and social history of the Middle East from the emergence of Islam to the disintegration of the Ottoman Empire in World War I. Themes include: Pre-Islamic Arabia, the life of the Prophet, the expansion of Islam, the Umayyad Empire, Shi'ism and other movements of political and religious dissent, the Abbasid Empire and its successor states, and the expansion of Europe into the Middle East.

Prerequisite: None Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 287 History of Everyday Life in the Modern Middle East and North Africa

Kapteijns

NOT OFFERED IN 2006–07. Using sources such as legal documents, memoirs, chronicles, literature and monographs from several disciplines, the course will explore in depth the quality and rhythms of life in a variety of urban and rural settings through an investigation of specific institutions, patterns of behavior, modes of work and residence, popular entertainment and popular culture. Students will study specific cases to develop an appreciation of how people of all classes experienced and responded to critical issues in modern history, such as the growing power of the centralizing state, urbanization, economic scarcity and opportunity, changing patterns of religious practice, gender relations, identity, the challenge of western secular values, the impact of national and regional politics, and the uneven but inexorable integration of the region into the global economy.

Prerequisite: None Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 290 Morocco: History and Culture (Winter session in Morocco)

Rollman

NOT OFFERED IN 2006–07. An introduction to Moroccan culture, history, and society through experiential and classroom learning. Students will participate in seminars and attend lectures given by Moroccan faculty at the Center for Crosscultural Learning in Rabat. Program themes include: women in private and public life, Berber culture, Islam, Arabic, Morocco's Jewish heritage and history, and the legacy of European cultural rule. Students will travel as a group to the central and southern regions of the country to study historic sites and contemporary life and culture in a variety of rural and urban settings. Not offered every year. Subject to Dean's Office approval.

Prerequisite: None Application required. Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 291 Marching Toward 1968:
The Pivotal Year

Auerbach

Within a single year the Tet offensive in Vietnam, the assassinations of Martin Luther King, Jr. and Robert F. Kennedy, and the election of Richard M. Nixon transformed American foreign and domestic policy, ending an era of liberal internationalism, domestic reform, and generational protest. Exploration of how, and why, "The Sixties" happened. Consideration of recent political and intellectual trends that reflect the continuing impact of the 1960s on American public life.

Prerequisite: 204 or an AP score of 5. Distribution: Historical Studies Semester: Fall Unit: 1.0

HIST 292 Sectionalism, the Civil War, and Reconstruction

McCarthy

An examination of the political and social history of America from 1830 to 1877, with an emphasis on the rise of the "free labor" and "states' rights" ideologies; the changing nature and aims of war; developments on the home front; and the transition from slavery to freedom. Sources include diaries, letters, and reminiscences by soldiers and noncombatants, and fiction and film depicting the Civil War era.

Prerequisite: None Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 294 Europe in the Age of Revolution, 1789–1900

Staff

NOT OFFERED IN 2006–07. Beginning with the French and Industrial Revolutions, this course explores the history of Europe during a period of catalytic political, economic, social, and cultural change. We will examine the evolution of liberal and nationalist ideas in the early nineteenth century; trace the growth of and interaction among European nation-states in the mid-nineteenth century; and assess the impact of economic and technological change on society, culture and politics at the turn of the century. Finally, we will explore how Europeans thought of themselves and related to non-Europeans. Major topics include Napoleon, the revolutions of 1848, imperialism and German and Italian unification. In addition to traditional historical accounts, the course incorporates a variety of primary sources, including novels, memoirs and visual art.

Prerequisite: None Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 301 Seminar: Women of Russia: A Portrait Gallery

Tumarkin

An exploration of the tragic, complex, inspiring fate of Russian women in the nineteenth and twentieth centuries, a period that spans the Russian Empire at its height, the Russian Revolution of 1917, and the Soviet experiment. We will read about Russian peasants, princes, feminists, workers, revolutionaries, poets, partisans, and prostitutes, among others in our stellar cast of characters. Sources include memoirs, biographies, great works of literature, and the visual arts.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History or a grade III unit in a relevant area/subject matter. Distribution: Historical Studies Semester: Fall Unit: 1.0

HIST 306 Seminar: Buying the American Dream: Consumer Culture in the United States

McCarthy

This course will examine the history of consumer culture in the United States from the colonial period to the late twentieth century. Paying special attention to the rise of the marketplace and the emergence of a culture of mass consumption, we will consider the development of American consumer behavior, such as shopping, saving, and working, and the values that reinforced those social practices. We will also explore the positive and negative implications of consumer culture including increased individuality and freedom of choice versus rampant materialism and greater inequality. Other topics include the rise of advertising, the advent of department stores, and the twentieth-century credit revolution.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter. Distribution: Historical Studies Semester: Spring Unit: 1.0

HIST 307 Religious Change and the Emergence of Modernity in Early Modern Europe, 1600–1800

Franz

During the seventeenth and eighteenth centuries, important religious, social, and intellectual transformations in Western Europe created two distinctly new and competing visions of modernity: an empirically-based rational religion and a faith-based evangelicalism. The legacy of their creation and conflict, both between one another and with the established traditionists and insurgent atheists, reverberate to this day. In this seminar, we will explore the relationship between science and religion; the effects of rising pluralism at home and global exploration overseas; witchcraft; the secularization and commercialization of daily life; the separation of church and state; and the formation of the first supra-national identities that transcended traditional religious boundaries. These issues raise broader questions about the origins of cultural change, as well as the nature of modernity itself.
HIST 316 Seminar. Authority and Authenticity in Native American History

Sheidley

NOT OFFERED IN 2006-07. An in-depth exploration of diversity and difference as factors which shaped the history of North America's native peoples from the sixteenth century through the era of "removal." Particular attention will be paid to gender, class, ethnicity, and belief as modes of organizing power within American Indian societies east of the Mississippi River. We will consider how these elements have influenced relations with non-Indians and determined the very nature of the sources historians use to interpret the Native American past.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 317 Seminar. The Historical Construction of American Manhood, 1600-1900

Sheidley

From Nat Turner to Frederick Douglass, Thomas Jefferson to Teddy Roosevelt, the history of American men is well known. But does manhood itself have a history? Drawing on autobiography, fiction, personal correspondence and visual evidence, we will explore the diverse and changing meanings attached to masculinity in America from the seventeenth through the nineteenth centuries. What forces have shaped male identities in colonial America and the United States and what impact have those identities had on men's lives and actions? Topics include: fatherhood and family life, violence and war, male sexuality, religious belief, work, and the myth of the self-made man. Special attention will be paid to race, class, and region as sources of variation and conflict in the historical construction of American manhood.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 326 Seminar. American Jewish History Auerbach

The development of American Jewish life and institutions, from European immigration to the present. Particular attention to the pressures, pleasures, and perils of assimilation. Historical and literary evidence will guide explorations into the social and political implications of Jewish minority status in the United States, the impact of Israel on the consciousness of American Jews, and the tension between traditional Judaism and modern feminism.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 327 Zionism and Irish Nationalism: A Comparative Perspective Malina

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 328 Seminar. Antisemitism in Historical Perspective Malina

NOT OFFERED IN 2006-07. Historians often refer to antisemitism as the "Longest Hatred." What accounts for this obsession? Is the antisemitism of medieval Europe that of Nazi Germany? These questions will inform our examination of pre-Christian antisemitism, the evolving attitudes of Christianity and Islam, the ambiguous legacy of the Enlightenment and the impact of revolution, modernization and nationalism. Sources include Church documents, medieval accounts, nineteenth- and twentieth-century memoirs and contemporary films.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 330 Seminar. Revolution and Rebellion in Twentieth-Century European Society Ranen

NOT OFFERED IN 2006-07. This course will examine the revolutionary changes that occurred in all facets of life in twelfth-century Europe. The twelfth century represents one of the most important eras of European history, characterized by many historians as the period that gave birth to Europe as both idea and place. It was a time of economic growth, religious reformation, political and legal reorganization, cultural flourishing, intellectual innovation, and outward expansion. Yet the twelfth century had a dark side, too. Crusades and colonization, heresy and religious disputes, town uprisings and mob violence also marked the century. Students will study the internal changes to European society as well as the expansion of Europe into the Mediterranean and beyond, paying close attention to the key people behind the transformations.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 333 Seminar. Dangerous Relations: USSR and the World, From Stalin to Gorbachev Tumarkin

NOT OFFERED IN 2006-07. The USSR was America's superpower rival in a prolonged and deadly nuclear arms race. Beginning with the Nazi-Soviet Pact of 1939, and ending with the spectacular demise of east European communism and the collapse of the USSR in 1991, this seminar on the Soviet Union in world politics spans the entire Cold War. What accounts for the USSR's extraordinary success in Sovietizing eastern Europe just when the US had a monopoly on the atomic bomb? Was ideology or national interest the driving force of Soviet foreign policy? What role did the character of Soviet leaders play in determining the USSR's international affairs? The seminar will conclude by exploring the ways in which the imperatives of a global communist empire both empowered and ultimately destroyed the USSR.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit. International Relations course.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 335 The Many Faces of Fascism: Authoritarianism in the World of the Twentieth Century Weicki

The seminar compares the origins as well as the character of fascist movements and regimes in Europe, Japan, and America during the twentieth century. We will look at the structural and contingent factors that helped bring the different right-wing authoritarian political movements to prominence and, in some places, to power. On the surface many forms of fascism may appear similar, in their nationalism, for example, and in their use of propaganda. However, there are also traits that are unique to each movement, such as the racism of German Nazism. The class will explore these similarities and differences by comparing the social origins, political organization, and ideological goals of the different fascist movements.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 343 Seminar. History of Israel Auerbach

NOT OFFERED IN 2006-07. This course explores the historical development of Jewish national identity, from biblical promise through Zionist advocacy to contemporary political reality in the State of Israel. We will consider the continuing debate within Israel, ever since its founding, over national identity: traditional or modern; Jewish or democratic; religious or secular. Close attention will be paid to such formative national experiences as the Holocaust; the struggle for independence; the social and political consequences of mass immigration; the 1967, 1973, and Lebanon wars; the Palestinian intifadas; Israel's relations with its Arab citizens and neighbors; Jewish settlements; and the "post-Zionist" revision of Israeli national history.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 350 Research or Individual Study

Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

HIST 350H Research or Individual Study

Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 0.5
HIST 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

HIST 364 Seminar, Women in Islamic Society: Historical Perspectives
Kapitán
In the last decade, Muslim scholars and writers have become major contributors to the study (and history) of women in Islamic societies. They have undertaken a critique of older (including Western feminist) scholarship and proposed new theoretical approaches and methods. This seminar will focus on this new historiography and the insights it provides into the history of women and gender issues from the time of the Prophet to the present. Student research papers will focus on concrete case studies of women in specific Islamic societies and time periods, from North Africa and Western Europe to South Africa, Afghanistan and China.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 367 Seminar, Jewish Identity in the Modern World
Melissa
An exploration through contemporary memoirs and films of the construction and dynamics of Jewish identity in Europe, America, the Middle East and South Asia. Topics include the struggle for political equality and the challenges of nationalism, feminism, colonialism and political antisemitism. Comparisons to other ethnic and religious groups.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

HIST 371 Seminar, Chinese Frontier Experience, 1600–1990
Giersch
NOT OFFERED IN 2006-07. Much of China's vast and ethnically diverse territory was conquered after 1644. Nationalistic histories describe conquest in rosy terms in order to legitimize rule over Tibetans and other minorities. This course explores the social, military, economic and ideological realities – and legacies – of conquest. Readings from U.S. history provide a comparative perspective.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 372 Seminar, Chinese Nationalism and Identity in the Modern World
Giersch
China's emergence as a great power is a vital contemporary issue. Disputes over Taiwan and tensions over China's strategic agenda raise questions about how Chinese envison their nation and its global role. This course places these questions in historical context by examining the evolution of modern China's national identity. Topics include: the emergence of modern nationalism in the 1890s; the growth of revolutionary nationalism under the Communists; struggles over women's place in the nation; schooling and propaganda in teaching nationalism; the relationship between popular culture and nationalism; and the challenge of alternative visions, including Taiwanese identity. We conclude with current debates such as China's rise peaceful or is there currently a "China Threat" to global stability? Materials include position pieces, documentaries, and translated fiction and essays.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 377 Seminar, The City in Latin America
Osorio
NOT OFFERED IN 2006-07. Urbanity has long been central to Latin American cultures. This seminar examines the historical development of Latin American cities from the Roman principles governing the grid pattern imposed by the Spanish in the sixteenth century, through the development of the seventeenth-century, post-modern megalopolis. The seminar's three main objectives are: (1) to develop a theoretical framework within which to analyze and interpret the history, and historical study of Latin American cities; (2) to provide a basic overview of the historical development of cities in the context of Latin American law, society, and culture; and (3) to subject to critical analysis some of the theoretical "models" (i.e. Baroque, Classical, Dependency, Modernism and so on) developed to interpret the evolution and workings of Latin American cities.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 378 Seminar, Women and Social Movements in Latin America
Osorio
This seminar examines the historical development of women's movements in Latin America from the nineteenth century through the twentieth century. We will examine the local political and ideological events that shaped women's movements and feminism(s) in the region. Topics include women's early claims to equal education and the development of the ideologies of 'women's rights' and social motherhood around 1900; women in democracy and the search for social justice from the 1930s-1950s; women's role in revolutions and counterrevolutions from the late 1950s through the 1970s; the advent of international feminism in the context of national liberation and redevelopment after 1974, and neoliberalism and globalization.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 382 Seminar, Gandhi, Nehru, and Ambedkar: The Making of Modern India
Rao
The creation of the world's largest democracy brought powerful ideas into contact and conflict: the overthrow of colonial rule through a philosophy of non-violence; the desire to industrialize rapidly; and the quest to end centuries of caste discrimination. This seminar explores the key ideas that shaped modern India through the lives of three extraordinary individuals. How did Gandhi's experiments with food and sex affect his vision of India? How did Nehru's understanding of world history shape his program of industrialization? How did Ambedkar's untouchable upbringing shape his agenda? Could Gandhi's non-violent agenda be sustained? Could an India based on individual transformation also annihiltate caste? We engage extensively with primary sources such as autobiographies, writings, and speeches, as well as scholarly accounts and films.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

HIST 395 Seminar, Global Divergence in Historical Perspective
Matisaka
The unequal distribution of wealth and power in the world today is a fundamental reality of international relations and among our most pressing problems. Seminar explores historical origins of global inequality through selected readings from traditional and more recent scholarship. Among questions to be explored: How long have large disparities in different parts of world been with us? Are there any junctures in world history when divergence begins or accelerates? What were the causes of divergence? What role did geography, culture, climate, natural resources, and historical accident play? Have there also been forces pushing the world toward convergence? Have trade, technology transfer, and international investment contributed more to convergence or divergence? Seminar is designed primarily, although not exclusively, as capstone for R-History majors.
Prerequisite: 395 and permission of instructor.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

Related Courses
For Credit Towards the Major
A student nearing the completion of her major requirements may, with approval of her advisor, petition the chair of the history department to receive credit toward the major for one related course outside the department's offerings taken at Wellesley or an institution at which a Wellesley student may cross-register.

Directions for Election
Most 200-level courses in the department are open to first-year students. Seminars are ordi- narily limited to 15 students, non-majors as well as majors, who meet the prerequisite. Majors in history are allowed great latitude in designing a program of study, but it is important for a program to have breadth, depth and historical perspective. To ensure breadth, the program
International Relations

INTERDEPARTMENTAL MAJORS IN INTERNATIONAL RELATIONS – ECONOMICS, INTERNATIONAL RELATIONS – HISTORY, INTERNATIONAL RELATIONS – POLITICAL SCIENCE

Available to members of the classes of 2007 and beyond. Members of the class of 2007 may choose between these majors and the interdisciplinary major in international relations described below.

Director: Velenchik (Economics)
Steering Committee: Kapetanis (History), Moon (Political Science), Velenchik (Economics)

These majors in international relations (IR) are designed to provide students with the breadth necessary for an interdisciplinary approach to the study of international relations, as well as with substantive training in one of three component disciplines (economics, history, and political science). Students elect one of three majors: IR-economics (IREC), IR-history (IRHI), or IR-political science (IRPS). Students may select their major advisor from among the faculty in their departmental major.

Students who elect one of these IR majors may not combine it with a second major in the same department – e.g. students may not double major in IR-economics and economics. Other double majors are permissible.

IR majors consist of 14 units of course work – five core courses plus nine courses in one of the three tracks. In addition to this course work, all IR students are required to demonstrate advanced proficiency in a modern language, normally defined as two units of language study beyond the minimum required by the College. Language courses do not count towards the minimum 14 courses.

Five core courses: All students majoring in IR must take the following courses:
- ECON 101, ECON 102, ECON 213, 214, or 220, HIST 205, and POL3 221.

It is strongly recommended that students complete all core courses by the end of the sophomore year.

Nine courses in one of the following majors:

Economics
Students who elect the IR-Economics major take the following courses in addition to the IR core:

a) ECON 103/SOC 190, ECON 201, ECON 202, and ECON 203.

b) At least two of the following electives:
- ECON 313 (International Macroeconomics),
- ECON 314 (International Trade Theory), or
- ECON 320 (Economic Development).

c) One intermediate or advanced history course dealing with a country or region outside the United States or with international or diplomatic history.

One 300-level political science course in an area related to economic issues or policies
One additional course in Africana studies, anthropology, history, political science, sociology or women's studies, dealing with a particular country or region, or with relations among nations, or with transnational institutions or phenomena.

History

Students who elect the IR-history major take the following courses in addition to the IR core:

- Two history courses dealing with the period before 1800
- Three history courses dealing with the modern history of countries or regions
- Two courses dealing with modern international history to be selected in consultation with advisor

One international history seminar
(Three of these eight history courses, including one pre-1800 course, must focus on one region of the world; at least three courses must deal with the non-Western world; and at least two must be at the 300 level)

One additional 200- or 300-level course in Africana studies, anthropology, economics, political science, sociology or women's studies

Political Science

Students who elect the IR-political science major take the following courses in addition to the IR core:

- Five political science courses in international relations (i.e. POL3 courses or POL2 courses that may count as POL3), at least two of which must be at the 300 level and one of which must be a seminar
- Two political science courses in comparative politics:
  - Either POL2 202 or POL2 204
  - One of the following area studies courses:
    - POL2 205, 206, 207, 208, 209, or 211
  - One political science course in American politics or in political theory or statistics and data analysis
- One additional 200- or 300-level course in Africana studies, anthropology, economics, history, sociology, or women's studies

With the approval of the IR director and the chair of the department in which she is majoring, a student may count up to two Wellesley courses taken outside the departments of economics, history, or political science towards the nine courses in her major. Attention is particularly drawn to IR-related courses offered in the departments of Africana studies, anthropology, sociology, and women's studies.

IR majors are strongly encouraged to spend at least one semester in a study abroad program. Transfer credits from study abroad programs must be approved by the appropriate department chair. (If the transfer credits come from an international relations department, however, they may be approved by the IR director.) Students are strongly encouraged to seek the relevant approval before studying abroad. At least two 300-level units must be completed at Wellesley.

HONORS IN IR-ECONOMICS, IR-HISTORY AND IR-POLITICAL SCIENCE

The policies governing eligibility for honors work in IR-Economics, IR-History, or IR-Political Science are set by the individual departments. Students interested in pursuing honors should consult the relevant departmental entry in the Bulletin.
The international relations major consists of ten units, which must include the following:

I. Core Courses: The IR major requires core courses in economics, history, and political science. Students must take a minimum of three of the following courses; at least one core course must be taken in each department:

a. ECON 213 (International Finance and Macroeconomic Policy); ECON 214 (formerly ECON 212) (Trade and Migration)

b. HIST 103 (History in Global Perspective); HIST 205 (Making of the Modern World Order); HIST 244 (Cold War in Europe); HIST 269 (Japan, the Great Powers and East Asia); HIST 294 (Europe in the Age of Revolution, 1789-1900); HIST 295 (Strategy and Diplomacy of the Great Powers since 1789); HIST 296 ('The Cold War, 1945-1991'); HIST 299 (The American Century: The United States in the World Since 1900).

c. POL3 221 (World Politics); POL3 222 (Comparative Foreign Policies)

Because these courses lay the foundation for more advanced work in the subject, all three should normally be completed by the end of the fifth semester. Students planning to study abroad should, if possible, complete these courses before leaving Wellesley.

II. Language Proficiency: The international relations major requires a level of proficiency in a modern language beyond that required by the College's foreign language requirement. Students may indicate their attainment of this enhanced proficiency in one of three ways:

1. Language Track: A student may take two foreign language courses beyond the College's foreign language requirement in the same language used to fulfill the requirement (above the intermediate level) to be counted as two units toward the major in international relations. This requirement will usually be met by the completion of two units of language study at the third-year college level. Students who elect this option may take literature or culture courses (e.g. GER 274 (Postwar German Culture)) that require, at a minimum, completion of the second-year level in the language for enrollment and are taught in the foreign language.

2. Nonlanguage Track I: A student who has fulfilled the College language requirement by virtue of being educated in a native language that is not English has the following option. She may choose, with the approval of her advisor, to use her native language to fulfill the language proficiency requirement of the major. This student will not be counting any language courses toward the ten units required for the major.

3. Nonlanguage Track II: A student completing a second major in a language department or area studies program may choose, with the approval of her advisor, to indicate her enhanced proficiency through the completion of the second major, without counting her advanced language courses toward the ten units required for her international relations major.

III. Electives: Students presenting language courses as units toward the major must select five units as electives, while students fulfilling the language proficiency requirement without presenting languages courses as units must select seven units as electives. The elective courses must include:

1. Two 300-level units, which must be completed at Wellesley, and only one of which may be a 350, 360, or 370

2. At least one but not more than two units that focus on a specific country or countries within a region, normally a country or region where the student's second language is used. Courses that deal with the international relations of a country or region (e.g. HIST 269: Japan, the Great Powers, and East Asia) do not count towards this area studies requirement and limitation.

3. At least three units taken at Wellesley. [Students presenting five elective units can thus expect to transfer only 2 units taken abroad as electives to their major.]

There are many courses throughout the curriculum that may be counted as electives in the international relations major. In addition to courses in economics, history, and political science, students are encouraged to explore courses offered in Africana studies, anthropology, peace and justice studies, sociology, and women's studies. If a student has a question about whether a particular course in these or other departments may count for the major, she should consult with the program director.

IV. Concentration: In order to give the major a focus, students will designate, in consultation with their advisors, a concentration on a specific theme or issue within international relations. Examples of such concentrations include international security, international political economy, international law and organization, global development, gender in world politics, human rights, international environmental studies, foreign policy analysis, and the international politics of a particular region (e.g. the European Community). The concentration may consist of a group of courses that relate to the theme and/or papers or other substantive work completed in any courses counted for the major. Normally, students will plan a concentration in their junior and senior years when preparing to undertake advanced work in international relations.

Honors in International Relations

A student whose GPA in courses in her international relations major is 3.5 or higher may apply to write an honors thesis. The application, which is available from the director, should be submitted in April of the student's junior year. Students should have identified a topic and an advisor before applying. The applications are evaluated by the IR steering committee. Students planning to study abroad should discuss their interest in honors with the director and with potential advisors during their sophomore year, and plan to submit their application in April of their junior year abroad.
Department of Italian Studies

Professor: Jacoff, Director; Kruse (Acting Chair), Viano, Ward (Director, ECCO Program, Bologna, Italy)

Assistant Professor: Pasini

Visiting Assistant Professor: Laviosa

Visiting Instructor: Po

Senior Lecturer: Laviosa

All courses, unless otherwise listed, are conducted in Italian. In all courses given in Italian, except seminars, some work may be required in the language laboratory.

Qualified students are encouraged to spend their junior year in Italy on the Wellesley-Bologna program. See Special Academic Programs, Study Abroad.

The Department of Italian Studies offers both a major and a minor. See Directions for Election.

ITAS 101-102 Elementary Italian

Laviosa, Pasini

These courses focus on the development of basic language skills. Viewing of language video programs, TV programs and films, listening to traditional and modern songs, and reading of passages and short stories offer an introduction to Italy and its culture. Three periods. Each semester earns one unit of credit. However, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None

Distribution: None

Semester: Fall, Spring

Unit: 1.0

ITAS 103 Intensive Elementary Italian

Pasini

This course is for students with little or no previous knowledge of Italian. It covers the same material as ITAS 101 and 102 over five class periods per week. The course aims to develop skills in speaking, oral, and reading comprehension, writing, and the fundamentals of grammar. This is a demanding course developed especially for students with a strong interest in Italian Studies and who intend to spend a semester or year abroad.

Prerequisite: None

Distribution: None

Semester: Fall

Unit: 1.25

ITAS 202 Intermediate Italian in Rome

Laviosa

Held over Winter Session in Rome, the aim of this intensive course is to develop students' fluency in spoken and written Italian. The reading of short stories, articles from Italian newspapers, and selected texts on Italian culture are used to promote critical and analytical skills. Listening is practiced through the viewing of Italian films. Both reading and listening activities are followed by in-class discussions. Students must have received credit for ITAS 201 in order to receive credit for ITAS 202. Not offered every year. Subject to Dean's Office approval.

Prerequisite: 101, 102, 301, or permission of instructor. Application required.

Distribution: Language and Literature

Semester: Winter Session

Unit: 1.0

ITAS 203 Intensive Intermediate Italian

Pasini

This course is for students who have taken 101 or 102. The course covers the same material as 201 and 202 over five class periods per week. The aim of the course is to improve and strengthen the skills acquired in Elementary Italian through reading authentic literary and journalistic texts, viewing of contemporary films, writing compositions, and grammar review. This is a demanding course developed especially for students with a strong interest in Italian Studies and who intend to spend a semester or year abroad.

Prerequisite: 103 or both 101 and 102

Distribution: Language and Literature

Semester: Spring

Unit: 1.25

ITAS 209 Italian-Jewish Identity (In English)

Pasini

In the light of events like the high-profile trial of a Nazi war criminal and Pope John Paul II's encyclical letter on the responsibilities of Christians in the Holocaust, this course aims to discuss the question of Jewish identity in contemporary Italian culture. Students will read prose and poetry, essays and articles, as well as watch films that address issues such as religious and national identity in a culturally, racially, and linguistically homogeneous country like Italy.

The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Bassani, students will read pertinent works by non-Jewish writers like Loy.

Prerequisite: None

Distribution: Language and Literature

Semester: Fall

Unit: 1.0

ITAS 211 Introduction to Italian Cultural Studies

Laviosa

Topic for 2006-07: Women in Italy. This course explores the works of women writers, philosophers, sociologists, educators, political activists, legislators, film directors, and singers from the 1920s up to today. Feminist issues are discussed through selected literary texts, historical readings, essays on Italian legislation, films/documentaries, lullabies, feminist rock and pop songs. Women's art and roles, rights and work, health and reproduction, prostitution and crime, fashion and beauty myths, tarantula, tarantism and tarantella, careerism and (le)maleism, nomadism and migration are presented through various media in a broad socio-political-historical context following a cross-disciplinary cultural studies approach.

Prerequisite: 202 or permission of instructor.

Distribution: Language and Literature

Semester: Fall

Unit: 1.0

ITAS 212 Italian Women Directors: The Female Authorial Voice in Italian Cinema (in English)

Laviosa

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. This course examines the films of five major Italian women directors across two artistic generations: Cavani and Wertmüller from the 1960s to the 1990s; Archibugi, Infascelli and Torre in the 1990s. Both feminist cinema and neo-realism fostered female talents, so it was only with the emergence of feminism and the women's movement of the 1960s and 1970s that a space for female voices in Italian cinema was created. The course will explore how women directors give form to their directorial signatures in film, focusing on their films' formal features and narrative themes in the light of their socio-historical context.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Semester: N/O. Offered in 2007-08

Unit: 1.0

ITAS 261 Italian Cinema (in English)

Viano

A survey of the directors (e.g. Fellini), films (e.g. Bicycle Thief) and movements (e.g. neo-realism) that made Italian cinema one of the key players in film history. We will start with the films that were made in the aftermath of WWII and that inspired filmmakers worldwide in their struggle against Hollywood escapism. We will then proceed to examine Modernist and New Wave films of the 1960s and 1970s, discussing their socio-historical as well as aesthetic significance. After a brief exploration of the cinema of the 1980s and 1990s in the context of the political changes taking place in Italy and of the global transformation in film production and distribution, we will conclude with an examination of recent film production.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Semester: Spring

Unit: 1.0

ITAS 263 Dante (in English)

Jacoff

The course offers students an introduction to Dante and his culture. The centrality and encyclopedic nature of Dante's Divine Comedy make it a paradigmatic work for students of the Middle Ages. Since Dante has profoundly influenced several writers of the nineteenth and twentieth centuries, knowledge of the Comedy illuminates modern literature as well. This course presumes no special background and attempts to create a context in which Dante's poetry can be carefully explored.

Prerequisite: None

Distribution: Language and Literature

Semester: Fall

Unit: 1.0

ITAS 271 The Construction of Italy as a Nation

Ward

NOT OFFERED IN 2006-07. The course aims, first, to give students who wish to continue their study of Italian the chance to practice and refine their skills; and second, to introduce students to

118 Italian Studies
one of the major themes of Italian culture: namely, the role played by Italian intellectuals in the construction of Italy as a nation. We will read how Dante, Petrarch, and Machiavelli imagined Italy as a nation before it came into existence in 1860; how the nation came to be unified; and how the experience of unification has come to represent a controversial point of reference for twentieth-century Italy. Other figures to be studied will include Benso Castiglione, Foscolo, Gramsci, Tomasi di Lampedusa, D’Annunzio, Pascoli, Croce, Gobetti, Rosselli, Bassani, Ginzburg, Carlo and Primo Levi, and Silone.

Prerequisite: 202 or permission of instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ITAS 320 The Landscape of Italian Poetry

Parussa

The course is dedicated to the representation and exploration of landscape in the Italian poetic tradition. By studying how the varied and beautiful Italian landscape found expression in the literary works of major poets, students will be exposed to a rich body of work and the tradition it both follows and renews. In particular, the course will focus on a series of specific themes, giving special attention to language and style: these will include the opposition between rural and urban landscapes; the tension between dialects and the national language; the complex dynamics of tradition and innovation. Through initial exposure to selected classical poets, including Dante and Petrarch, students will gain in-depth knowledge of the main formal structures of Italian poetry, from the classical sonnet, going on to free verse. In addition, we will read poems by the Italian greats of the twentieth century, namely Ungaretti, Saba and Montale; as well as works by contemporary poets such as Caproni, Sereni and Valduga.

Prerequisite: 211, 271, 272, 273, or permission of instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ITAS 322 Italian Identity in the 1960s

Ward

NOT OFFERED IN 2006-07. The 1960s were a period of great change in Italy. The major consequence of the economic boom of the late 1950s was to transform Italy from a predominantly agricultural to an industrialized nation. Through a study of literary and cinematic texts, the course will examine this process in detail. Time will also be given to the consequences of the radical changes that took place: namely, internal immigration, consumerism, new roles of intellectuals, resistance to modernity, neo-fascism, student protest. Authors to be studied include Moravia, Calvino, Ortese, and others.

Prerequisite: 201 as a prerequisite and 202 or 203 as a corequisite or permission of instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

ITAS 321 The Other Half: History and Culture of the Italian South

Ward

NOT OFFERED IN 2006-07. This course aims to introduce advanced level students to the rich and varied cultural and historical landscape of the Italian South, the mezzogiorno. Taking as its starting point the medieval court of Frederick II and the deep-seated repercussions its influence had on Italian cultural life, the course goes on to examine the works of southern thinkers and writers like Bruno, Campanella, and Vico, as well as the Neapolitan Enlightenment and the Southern question. In addition, we will examine the lives and works of twentieth-century writers like Carlo Levi, Tomasi di Lampedusa, Varga, Sciascia and Consolo, who were either born in southern Italy or have written about it.

Prerequisite: 211, 271, 272, 273, or permission of instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ITAS 331 Theatre, Politics, and the Arts in Renaissance Italy

Parussa

The flourishing Italian theatre in the fifteenth and sixteenth centuries is an extraordinary and unmatched phenomenon in the history of Italian culture. In Italian courts and city squares, theatre became the center of a dynamic relationship between power and culture. Under the aegis of princes and popes, artists of all kinds worked for the stage to celebrate and criticize the same power that both fostered and limited their intellectual freedom. The stage became a mirror in which Renaissance Italy, while attempting to admire its beauty, came face to face with its distorted image. The course will include readings of major plays by Bibiena, Machiavelli, and Ariosto. Attention will also be given to the paintings, drawings, and sketches used in the staging of these plays.

Prerequisite: 211, 271, 272, 273, or permission of instructor.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

ITAS 312 Rinascimento e Rinascimento: Cultural Identities in Fifteenth- and Sixteenth-Century Italy

Parussa

NOT OFFERED IN 2006-07. The Renaissance witnessed deep cultural transformations that have influenced contemporary ways of thinking. Cultural notions of class, gender, and religion find their roots in the cultural debate that animated Italian courts during the fifteenth and sixteenth centuries. Exploring how these notions have been both shaped and challenged, the course will suggest that it is more appropriate to think of the Renaissance as a plural rather than a single entity. In particular, attention will be given to themes such as the donna angelica and the poet, the cortegiano and the peasant, the principe and the artist. The course will give students a solid introduction to the literature of the period and provide them with a theoretical framework for a thorough discussion of the material at hand.

Prerequisite: 211, 271, 272, 273, or permission of instructor.
Distribution: Language and Literature
Semester: N/O
Offered in 2007-08
Unit: 1.0

ITAS 310 Fascism and Resistance in Italy

Ward

NOT OFFERED IN 2006-07. This course examines the two fundamental political and cultural experiences of twentieth-century Italy: the twenty-year fascist regime and the resistance to it. We will study the origins of fascism in Italy’s participation in World War I and its colonial ambitions; we will follow the development of fascism over the two decades of its existence and ask to what extent it received the consensus of the Italian people. We will go on to examine the various ways in which Italians resisted fascism and the role the ideals that animated anti-fascist thinking had in the postwar period. Authors to be studied include: Marinetti, D’Annunzio, Pascoli, Croce, Gobetti, Rosselli, Bassani, Ginzburg, Carlo and Primo Levi, and Silone.

Prerequisite: 211, 271, 272, 273, or permission of instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ITAS 349 The Function of Narrative

Ward

NOT OFFERED IN 2006-07. Beginning with Boccaccio and going on to Manzoni and Verga, the course introduces students to the major figures of the Italian narrative tradition. We then go on to study twentieth-century narrative texts, all the time seeking answers to the question of why narrative is such a fundamental human need. Why, for example, do we narrate our experience of life and the sense we have of ourselves, even in the form of diaries? Do the stories we tell faithfully reflect reality or do they create it? The course concludes with a reflection on narrative technique in cinema illustrated by the films of Antonioni. Other authors to be studied may include: Faa Gonzaga, Calvino, Ceresa, Rasy, Pasolini, Celati, and Benni.

Prerequisite: 211, 271, 272, 273, or permission of instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

ITAS 350 Research or Individual Study

Prerequisite: Open by permission to students who have completed two units in literature in the department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ITAS 360 Senior Thesis Research

Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ITAS 370 Senior Thesis

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0
Directions for Election
The Department of Italian Studies offers both a major and a minor.
The major in Italian studies offers students the opportunity to acquire fluency in the language and knowledge of the culture of Italy in a historical perspective. Students are strongly urged to begin Italian in their first year. ITAS 101-102 count toward the degree, but not the major. Students majoring in Italian are required to take nine units above the 100 level. One of such courses must be either 211, 271, 272 or 273. In addition, one course must be taken outside the department, on a related topic to be decided by the student and her major advisor. Furthermore, two of the nine courses must be at the 300 level and be taken in the department. The requirement to take two courses at the 300 level may not be met by taking 350 (Research or Individual Study), 360 (Senior Thesis Research) or 370 (Senior Thesis). Students are encouraged to consult with the chair about the sequence of courses they will take. Courses given in translation count toward the major. Qualified students are encouraged to spend their junior year abroad in Italy on the Eastern Consortium program in Bologna (of which the Department of Italian Studies is a participant) or on another approved program.

The minor in Italian studies requires five units above the 100 level. Courses offered in translation count towards the minor.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Japanese Studies
See East Asian Studies

Jewish Studies
AN INTERDEPARTMENTAL MAJOR AND MINOR
Director: Geller (Religion), Malino (History)
Visiting Assistant Professor: Rowell
Advisory Board: Bernat (Religion), Geller (Religion), Malino (History), Rowell (Jewish Studies)
The major in Jewish studies is designed to acquaint students with the many facets of Jewish civilization through an interdisciplinary study of Jewish religion, history, philosophy, art, literature, social and political institutions, and cultural patterns.
For the eight-unit major in Jewish studies, students must take courses pertaining both to the ancient and modern worlds and show proficiency in Hebrew (equivalent to at least two semesters at the second-year level). In certain cases, where students whose area of concentration necessitates another language (such as Arabic, French, Spanish, Yiddish, or Ladino), that language may be substituted for Hebrew in consultation with the student's major advisor. In addition, students are expected to concentrate in some area or aspect of Jewish studies (such as religion, history, or Hebrew language and literature) by taking four courses above the 100 level, including at least two at the 300 level.
Advanced study of Hebrew may be pursued as a 350 course, and this may be used to fulfill the Language and Literature distribution requirement.

A minor in Jewish studies consists of five units from the following courses (of which at least one must be at the 300 level and no more than one at the 100 level): ANTH 242, 247; CLCV 240; HIST 217, 218, 219, 326, 327, 328, 343, 367; ITAS [309]; REL 104, 105, [140], 202, 207, 240, 241, 242, 243, 244, 245, [247], 260, [302], 303, 305, 342; SPAN 252, 267, and 279. Units must be taken in at least two departments; in consultation with the director of the program in Jewish studies, a student can also arrange to take courses for inclusion in the Jewish studies minor in Brandeis University's Department of Near Eastern and Judaic Studies.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all
work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

The following courses are available in Jewish studies:

**HEBR 101-102 Elementary Hebrew**
*Ronell*
Introduction to Hebrew with emphasis on its contemporary spoken and written form. Practice in the skills of listening and speaking as well as reading and writing, together with systematic study of Hebrew grammar. Students will master a basic vocabulary of approximately 1,000 words, and become comfortable in the use of the present, past and future tenses, as well as basic verb patterns. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None  
Distribution: None  
Semester: Fall, Spring  
Unit: 1.0

**HEBR 201-202 Intermediate Hebrew**
*Ronell*
Building on the foundations of 101-102, the third semester will continue to develop skills in modern Hebrew. Students will broaden their knowledge of verb patterns, compound sentence structures and mixed tenses. Special emphasis will be placed on composition and oral reports. The fourth semester will focus on literature through reading and discussion of selected short pieces of prose and poetry. Some examples of classical, rabbinic, and liturgical Hebrew will also be analyzed. Students will be required to write short compositions inspired by their readings. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: 101-102  
Distribution: Language and Literature  
Semester: Fall, Spring  
Unit: 1.0

**HEBR 210 Jewish Fiction Around the Globe: Homeland and the Diaspora (in English)**
*Ronell*
An exploration of contemporary Jewish fiction from diverse Jewish communities around the world including Israel, the US, Latin America, Germany, Eastern Europe, and South Africa. An examination of ideas of Homeland and the Diaspora, immigration and exile. Focus on the challenges of representing post-Holocaust Jewish identity in a global context. The authors to be read include Philip Roth, Shai Agnon, Aharon Appelfeld, Eva Hoffman, Roni Matalon. The course is designed to provide students with an opportunity to develop a deeper understanding of global Jewish fiction today and its foundation in Hebraic literary tradition. All texts are in English translation.

Prerequisite: None  
Distribution: Language and Literature or Religion, Ethics and Moral Philosophy  
Semester: Spring  
Unit: 1.0

**HEBR 350 Research or Individual Study**
Prerequisite: Three years of Hebrew or permission of instructor.  
Distribution: None  
Semester: Fall, Spring  
Unit: 1.0

Latin American Studies

AN INTERDEPARTMENTAL MAJOR

Directors: Vega (Spanish), Wasserspring (Political Science)

Advisory Committee: Agosin (Spanish), Elkins (Religion), Guanzkyte (Spanish), Levitt (Sociology), McEwan (Economics), Oles (Art), Oorio (History), Renjilian-Burg (Spanish), Roses (Spanish), Rubio (Spanish), Vega (Spanish), Wasserspring (Political Science)

The Latin American studies major seeks to understand the Latin American experience through an interdisciplinary program of study. Students must submit a plan of study following the requirements listed below for approval by the directors. The Latin American studies major normally consists of 11 courses: 2 Spanish language courses at the level of 241 or above and 9 courses from the list that appears below. (In the case of bilingual speakers or students with advanced Spanish proficiency, the 2 language course requirement may be replaced by an oral and written exemption exam.) In fulfilling the requirement of 9 courses, students must select a concentration of 4 courses in one of the following disciplines: Art history, History, Political Science, Sociology or Spanish. (In special circumstances, students may petition the directors for an alternative field of concentration.) Of these 9 units, at least 2 must be taken at the 300 level. It is recommended that one of these 300-level courses be a seminar.

Students should note that several of the courses listed below have an asterisk (*), which signifies that upon enrollment, the student must notify the instructor that the course is to be counted for Latin American studies and that, as such, the student will be required to do a research paper which focuses on Latin America.

Qualified juniors are encouraged to spend a semester or a year in Latin America. Both the directors and the Study Abroad Office have information to help students select appropriate sites for study in Latin America. Wellesley offers several opportunities, including its own program in Puebla, Mexico as well as exchange opportunities in Argentina. Additionally, the Wellesley Internship Program in Costa Rica (WICR) offers funded summer internships to qualified students. To be eligible for study in Latin America, a student should normally be enrolled in SPAN 241 or a higher level language or literature course the previous semester.

Honors

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students who are interested in writing an honors thesis in Latin American Studies should submit a proposal to the directors by the end of their junior year. The proposal should include a description of the thesis project, a sample bibliography and a copy of the student's transcript. It is required that the student has already completed fundamental coursework in the area in which she proposes to do her honors work. See Academic Distinctions.

Majors may also apply to the Five-Year Cooperative M.A. Program at Georgetown University in Latin American Studies. This program enables the student to apply upper-level Latin American studies courses taken at Wellesley toward the Master's Degree at Georgetown. A summer of study at the Universidad Catolica in Santiago, Chile, taken during an undergraduate summer, and a year of academic work at Georgetown are required to earn the Master's Degree at Georgetown in one year. Interested students should contact the directors of Latin American Studies or the Center for Work and Service.

* Upon enrollment, the student must notify the instructor that the course is to be counted for Latin American studies and that, as such, the student will be required to do a research paper which focuses on Latin America.
**Mathematics**

**Department of Mathematics**

Professor: Bu (Chair), Hirschhorn, Magid, Shuchat, Shultz, Sontag, Trenk, Wang, Wilcox

Associate Professor: Kerr

Assistant Professor: Bernstein, Chang, Volic

Postdoctoral Fellow: Horton

Most courses meet for three periods weekly or for two periods weekly with a third period approximately every other week.

The mathematics department Web page (www.wellesley.edu/Math/mathhome.html) has more detailed course descriptions and information for majors and minors.

**MATH 101 Reasoning with Data: Elementary Applied Statistics**

Bernstein, Magid, Shuchat

An introduction to the fundamental ideas and methods of statistics for analyzing data. Topics include descriptive statistics, basic probability, inference and hypothesis testing. Emphasis on understanding the use and misuse of statistics in a variety of fields, including medicine and both the physical and social sciences. This course is intended to be accessible to those students who have not yet had calculus.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have completed 116, 116Z, 120, or 205, except by permission of the instructor; such students should consider taking 220 instead. Not open to students who have taken or are taking MATH 101Z, POL 199, QR 180, ECON 103/SOC 190, or PSYC 205.

Distribution: Mathematical Modeling.

Semester: Fall, Spring

**Unit: 1.0**

**MATH 101Z Reasoning with Data: Elementary Applied Statistics with Health Applications**

Peltie (Quantitative Reasoning)

In this course, students use probability and statistics to examine the risks that we encounter every day. The focus is on personal medical decision-making and the impact of our environment on our health. Students will address questions such as: How concerned should we be about pesticide use? How can we make informed decisions about women’s health issues, including contraception and sexually transmitted diseases? How much of an impact does diet have on health? Why did different studies of hormone replacement therapy come to contradictory conclusions, and how can we read reports on such studies intelligently and skeptically? Topics include descriptive statistics, basic probability, inference and hypothesis testing.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking MATH 101, POL 199, QR 180, ECON 103/SOC 190, or PSYC 205. Not open to students who have completed MATH 116, 116Z, 120, or 205, except by permission of the instructor; such students should consider taking 220 instead.

Distribution: Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Spring

**Unit: 1.0**

**MATH 102 Applications of Mathematics without Calculus**

Sontag, Wilcox

This course explores several areas of mathematics which have application in the physical and social sciences, yet which require only high-school mathematics as a prerequisite. The areas covered will be chosen from systems of linear equations, linear programming, probability, game theory, and stochastic processes. Students will solve problems on topics ranging from medical testing to economics with the results demonstrating the value of mathematical reasoning. May not be counted toward the major.

Prerequisite: None

Distribution: Mathematical Modeling

Semester: Spring

**Unit: 1.0**

**MATH 115 Calculus I**

Staff

Introduction to differential and integral calculus for functions of one variable. The heart of calculus is the study of rates of change. Differential calculus concerns the process of finding the rate at which a quantity is changing (the derivative). Integral calculus reverses this process. Information is given about the derivative, and the process of integration finds the “integral” which measures accumulated change. This course aims to develop a thorough understanding of the concepts of differentiation and integration, and covers techniques and applications of differentiation and integration of algebraic, trigonometric, logarithmic, and exponential functions.

**MATH 115 is an introductory course designed for students who have not seen calculus before.**

Prerequisite: Open by permission of the department, based on the results of the departmental placement exam.

Distribution: Mathematical Modeling

Semester: Fall, Spring

**Unit: 1.0**

**MATH 116 Calculus II**

Staff

The course begins with applications and techniques of integration. It probes notions of limit and convergence and adds techniques for finding limits. Half of the course covers infinite sequences and series, where the basic question is: What meaning can we attach to a sum with infinitely many terms and why might we care? The course can help students improve their ability to reason abstractly and also teaches important computational techniques. Topics include integration techniques, l'Hôpital’s rule, improper integrals, geometric and other applications of integration, theoretical basis of limits and continuity, infinite series, power series, and Taylor series. MATH 116 is the appropriate first course for many students who have had AB calculus in high school.

Prerequisite: 115 or the equivalent

Distribution: Mathematical Modeling

Semester: Fall, Spring

**Unit: 1.0**

**MATH 120 Calculus III**

Staff

This course is a variant of 116 for students who have a thorough knowledge of the techniques of differentiation and integration, and familiarity with inverse trigonometric functions and the logarithmic and exponential functions. It includes a rigorous and careful treatment of limits, sequences and series, Taylor’s theorem, approximations and numerical methods,
Riemann sums, improper integrals, l'Hospital's rule, and applications of integration.

Prerequisite: Open by permission of the department to students who have completed a year of high school calculus. Students who have studied Taylor series should elect 205. Not open to students who have completed 115, 116 or the equivalent.

Distribution: Mathematical Modeling
Semester: Fall

Unit: 1.0

MATH 205 Multivariable Calculus

Staff
Most real-world systems that one may want to model, whether in the natural or in the social sciences, have many interdependent parameters. To apply calculus to these systems, we need to extend the ideas and techniques of MATH 115 and MATH 116 to functions of more than one variable. Topics include vectors, matrices, determinants, polar, cylindrical, and spherical coordinates, curves, functions of several variables, partial and directional derivatives, gradients, Lagrange multipliers, multiple integrals, line integrals, and Green's Theorem.

Prerequisite: 116, 120, or the equivalent. Not open to students who have completed MATH 216/PHYS 216.
Distribution: Mathematical Modeling
Semester: Fall, Spring

Unit: 1.0

MATH 206 Linear Algebra

Trenk, Wilcox
Linear algebra is one of the most beautiful subjects in the undergraduate mathematics curriculum. It is also one of the most important with many possible applications. In this course, students learn computational techniques that have widespread applications in the natural and social sciences as well as in industry, finance, and management. There is also a focus on learning how to understand and write mathematical proofs and an emphasis on improving mathematical style and sophistication. Topics include vector spaces, subspaces, linear independence, bases, dimension, inner products, linear transformations, matrix representations, range and null spaces, inverses, eigenvalues.

Prerequisite: 205 or MATH 215/PHYS 215
Distribution: Mathematical Modeling
Semester: Fall, Spring

Unit: 1.0

MATH 208 Functions of a Complex Variable

NOT OFFERED IN 2006-07. Complex numbers and the complex plane. Definitions and mapping properties of elementary complex functions. Analyticity and the Cauchy-Riemann equations. Complex-integration theory including the Cauchy-Goursat Theorem; Taylor and Laurent series; Maximum Modulus Principle; residue theory and singularities. Additional topics such as conformal mapping and Riemann surfaces as time permits.

Prerequisite: 205 Distribution: Mathematical Modeling Semester: N/O

Unit: 1.0

MATH 210 Differential Equations

Stulchat
Introduction to theory and solution of ordinary differential equations, with applications to such areas as physics, ecology, and economics. Includes linear and nonlinear differential equations and equation systems, existence and uniqueness theorems, and such solution methods as power series, Laplace transform, and graphical and numerical methods.

Prerequisite: 205
Distribution: Mathematical Modeling Semester: Spring

Unit: 1.0

MATH 212 Differential Geometry

Kerr
An introduction to the differential geometry of curves and surfaces. Topics include curvature of curves and surfaces, first and second fundamental forms, equations of Gauss and Codazzi, the fundamental theorem of surfaces, geodesics, and surfaces of constant curvature. Normally offered in alternate years.

Prerequisite: 205 or permission of instructor
Distribution: Mathematical Modeling Semester: Spring

Unit: 1.0

MATH 214 Euclidean and Non-Euclidean Geometry

NOT OFFERED IN 2006-07. A rigorous treatment of the fundamentals of two-dimensional geometry: Euclidean, spherical, elliptic and hyperbolic. The course will present the basic classical results of plane geometry: congruence theorems, congruence theorems, classification of isometries, etc. and their analogues in the non-Euclidean settings. The course will provide a link between classical geometry and modern geometry, preparing for study in group theory, differential geometry, topology, and mathematical physics. The approach will be analytical, providing practice in proof techniques. This course is strongly recommended for prospective teachers of mathematics.

Prerequisite: 205 or permission of instructor
Distribution: Mathematical Modeling Semester: N/O

Unit: 1.0

MATH 215/PHYS 215 Mathematics for the Sciences I

Shultz
This course is the first in a two-course sequence tailored to the needs and preparations of students considering majors in the sciences. It presents techniques of applied mathematics relevant to a broad range of scientific studies, from the life sciences to physics and astronomy. The topics of study include complex numbers, ordinary differential equations, an introduction to partial differential equations, linear algebra (matrices, systems of linear equations, vector spaces, eigenvalue problems), and Fourier series. The course emphasizes mathematical techniques and presents applications from all the sciences. Some familiarity with vectors (e.g., dot products) is assumed. Students may register for either MATH 215 or PHYS 215 and credit will be granted accordingly.

Prerequisite: MATH 116, 120 or the equivalent
Distribution: Mathematical Modeling Semester: Fall

Unit: 1.0

MATH 216/PHYS 216 Mathematics for the Sciences II

Hir (Physics)
When laws of nature are written in advanced mathematical forms, gradient, divergence, and curl are frequently encountered. In this course, we study these mathematical operations in the broader context of differential and integral vector calculus, with an emphasis on their physical meanings. Fourier transform and partial differential equations, which are used throughout the physical sciences, are also discussed. The course ends with an introduction to numerical methods, which is widely used in most modern scientific and engineering fields when analytical solutions to algebraic or differential equations do not exist. We use MATLAB®, a popular high-level programming language. Part of the course is similar to MATH 205, but topics closely related to physics—Gauss' and Stokes' theorems, spherical and cylindrical coordinates—is discussed in depth. Students may register for either MATH 216 or PHYS 216 and credit will be granted accordingly.

Prerequisite: MATH 215/PHYS 215
Distribution: Mathematical Modeling Semester: Spring

Unit: 1.0

MATH 223 Number Theory

Chang
Number theory is the study of the most basic mathematical objects: the natural numbers (1, 2, 3, etc.). It begins by investigating simple patterns: for instance, which numbers can be written as sums of two squares? Do the primes go on forever? How can we be sure? The patterns and structures that emerge from studying the properties of numbers are so elegant, complex, and important that number theory has been called "the Queen of Mathematics." Once studied only for its intrinsic beauty, number theory has practical applications in cryptography and computer science. Topics include the Euclidean algorithm, modular arithmetic, Fermat's and Euler's Theorems, public-key cryptography, and quadratic reciprocity. MATH 223 has a focus on learning to understand and write mathematical proofs; it can serve as valuable preparation for 305. Majors can fulfill the major presentation requirement in this course in 2006-07.

Prerequisite: 116, 120 or the equivalent; or CS 230 together with permission of instructor
Distribution: Mathematical Modeling Semester: Spring

Unit: 1.0

MATH 225 Combinatorics and Graph Theory

Bernstein, Koo
Combinatorics is the art of counting possibilities: for instance, how many different ways are there to distribute 20 apples to 10 kids? Graph theory is the study of connected networks of objects. Both have important applications in many areas of mathematics and computer science. The course will be taught emphasizing creative problem-solving, as well as methods of proof, such as proof by contradiction and induction. Topics include: selections and arrange-
mments; generating functions, recurrence relations, graph coloring, Hamiltonian and Eulerian circuits, trees.

Prerequisite: 116, 120, or the equivalent; or CS 230 together with permission of instructor.

Distribution: Mathematical Modeling

Semester: Fall, Spring

Unit: 1.0

MATH 251 Topics in Applied Math

Bu

Topic for 2006-07: Introduction to Mathematical Biology. This course provides an introduction to mathematical tools for biologists, and is intended for students who are interested in mathematics and its applications in life sciences. The following topics will be covered: first order differential equations, equilibrium and stability, system of autonomous equations, densities and histograms, normal distribution and age-structured populations, linear maps, eigenvectors and eigenvalues, partial derivatives, linear systems and applications, nonlinear systems and application for neuron activity, reaction-diffusion equation and biological waves.

Prerequisite: 116 or the equivalent; or with permission of instructor.

Distribution: Mathematical Modeling

Semester: Fall

Unit: 1.0

MATH 302 Elements of Analysis I

Wang

Real analysis is the study of the rigorous theory of the real numbers, Euclidean space, and calculus. The goal is to thoroughly understand the familiar concepts of continuity, limits and sequences. We also study compactness, connectedness and metric spaces, which are generalizations of familiar notions. For example, in calculus the definition of continuity contains the expression \( \lim_{x \to c} f(x) = L \). How can we define continuity for higher-dimensional spaces, such as \( \mathbb{R}^2 \) or any \( \mathbb{R}^n \), where there is no notion of absolute value? The key is the fact that \( \lim_{x \to c} f(x) = L \) can be understood as distance. Viewed from this perspective, continuity makes sense in any setting in which we have a notion of distance.

A set with a suitable notion of distance is called a metric space; this is the primary context for real analysis. Topics include metric spaces; compact, complete, and connected spaces; continuous functions; differentiation and integration; limits and sequences; and interchange of limit operations as time permits.

Prerequisite: 205, and at least one of 206, 208, 212, 214, 223, 225

Distribution: Mathematical Modeling

Semester: Spring

Unit: 1.0

MATH 303 Elements of Analysis II

NOT OFFERED IN 2006-07. A continuation of MATH 302. Topics chosen from the theory of Riemann integration, measure theory, Lebesgue integration, Fourier series, and calculus on manifolds. Offered in alternate years.

Prerequisite: 302

Distribution: Mathematical Modeling

Semester: N/O

Unit: 1.0

MATH 305 Abstract Algebra

Chang

In this course, students examine the structural similarities between familiar mathematical objects such as number systems, matrix sets, function spaces, general vector spaces and modules in arithmetic. Topics include groups, rings, fields, homomorphisms, normal subgroups, quotient spaces, isomorphism theorems, divisibility and factorization. Many concepts generalize number theoretic notions such as Fermat’s little theorem and the Euclidean algorithm. Optional subjects include group actions and applications to combinatorics.

Prerequisite: 206

Distribution: Mathematical Modeling

Semester: Fall

Unit: 1.0

MATH 306 Topics in Abstract Algebra

Bernstein

For 2006-07: Galois Theory. This course offers a continued study of the algebraic structures introduced in MATH 305, culminating in the Fundamental Theorem of Galois Theory, a beautiful result that depicts the circle of ideas surrounding field extensions, polynomial rings and automorphism groups. Applications of Galois theory include the unsolvability of the quintic by radicals and geometric impossibility proofs, such as the trisection of angles and duplication of cubes. Cyclotomic extensions and Sylow theory may be included in the syllabus. Majors can fulfill the major presentation requirement in this course in 2006-07.

Prerequisite: 305

Distribution: Mathematical Modeling

Semester: Spring

Unit: 1.0

MATH 307 Topology

Chang

The course introduces some of the basic topological notions further developed in most first-year graduate programs in pure mathematics. Topics include the Axiom of Choice, topological spaces, continuous functions, connectedness and compactness, countability and separation axioms, and the Tychonoff theorem. Additional subjects may include fundamental notions in algebraic topology: homotopy of paths, the fundamental group, and the Seifert-van Kampen theorem.

Prerequisite: 302

Distribution: Mathematical Modeling

Semester: Spring

Unit: 1.0

MATH 309 Foundations of Mathematics

NOT OFFERED IN 2006-07. This course studies the subject matter – set theory – that inspired David Hilbert’s remark “no one will drive us from the paradise that Cantor has created”. This set-theory paradise includes infinitely many infinities. We also study the proof of Gödel’s undecidability theorem, which asserts that any consistent system containing arithmetic has questions that cannot be answered within the system. Topics include: axioms for set theory; construction of the natural numbers, the integers, and the rational and real numbers; induction and transfinite induction; cardinal numbers and ordinal numbers; the axiom of choice and its equivalents; consistency; Gödel’s undecidability proof. Offered in alternate years.

Prerequisite: 302; or 305; or at least two from 206, 214, 223, 225

Distribution: Mathematical Modeling

Semester: N/O

Unit: 1.0

MATH 310 Complex Analysis

Chang

This course offers a rigorous treatment of complex analysis of one variable. Topics include complex numbers and functions, analyticity, Cauchy’s integral formula and its consequences, Taylor and Laurent series, the residue theorem, the principle of the argument and Rouche’s theorem. Other subjects may include conformal mappings, asymptotic series and infinite products. The course will be conducted at the level of both theory and computation.

Prerequisite: 302

Distribution: Mathematical Modeling

Semester: Fall

Unit: 1.0

MATH 345 Selected Topics in Real Analysis

Trenk

Topic for 2006-07: Graph Theory. Graph Theory has origins both in recreational mathematics problems (i.e., puzzles and games) and as a tool to solve practical problems in many areas of society. Topics include: connectivity, trees, independent sets and cliques, coloring problems, matching theory, and directed graphs. Students will be expected to experiment and formulate conjectures. Majors can fulfill the major presentation requirement in this course in 2006-07.

Prerequisite: 225 and either 305 or 302

Distribution: Mathematical Modeling

Semester: Spring

Unit: 1.0

MATH 350 Research or Individual Study

Prerequisite: Open to juniors and seniors by permission.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

MATH 360 Senior Thesis Research

Prerequisite: By permission of department. See Academic Distinctions.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

MATH 370 Senior Thesis

Prerequisite: 360 and permission of department.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

Directions for Election

Placement in courses and exemption examinations

The mathematics department reviews elections of calculus students and places them in MATH 115, 116, 120, or 205 according to their previous courses and summer placement results. See the descriptions for these courses. If there is a question about placement, the student should attend the course in which he or she is placed and contact the sectioning coordinator (contact information in Science Center 361) to discuss her placement.

No special examination is necessary for placement in an advanced course.

Students may receive course credit towards graduation through the CEEB Advanced Placement tests in mathematics and the IB Higher Level mathematics exam. See the department web page for more information, www.wellesley.edu/Math/Pages/prospectives.html. Students with scores of 4 or 5 on the AB Examination or an AB-subscore of 4 or 5 on the BC Examination, or a score of 5, 6, or 7 on the IB Higher Level mathematics exam receive one unit of credit (equivalent to 115) and are eligible for 116 or 120. Those entering with scores of 4 or 5 on the BC Examination receive two units (equivalent to 115 and 116 or 115 and 120) and are eligible for 205. Students with a 5 on the AP examination in statistics receive one unit of credit (equivalent to 101). Neither Advanced Placement credits nor IB credits may count toward the major or minor.

125 Mathematics
Students majoring in mathematics must complete MATH 115 and one of 116/120 (or the equivalent) and at least seven units of 200-level and 300-level courses, including 205, 206, 302, 305, and one other 300-level course. MATH 215/PHYS 215 can be counted towards the mathematics major. For students entering in the fall of 2006 and later, at most two of 206, 210, 215 may be counted towards a mathematics major. Credit for MATH 216/PHYS 216 satisfies the requirement that a math major take 205, but does not count as one of the seven units of 200-level and 300-level courses. Students entering with AP credits must complete eight units after entering college, where MATH 216/PHYS 216 does not count as one of these eight units.

Students expecting to major in mathematics should complete the prerequisites for 302 and 305 before the junior year. Students may wish to consult the chair of the Department of Mathematics or their current mathematics instructor in deciding when to take 302 and 305. Independent study units (MATH 350, 360, 370) may not count as the third 300-level course required for the major.

 Majors are also required to present one classroom talk in either their junior or senior year, usually in one of the courses specially designated as fulfilling this requirement. (See course listings with "Majors can fulfill the major presentation requirement in this course.") Usually two such courses are designated each semester. In addition, a limited number of students may be able to fulfill the presentation requirement in other courses. Students need to speak with individual instructors to find out what is possible in a given course.

Students expecting to do graduate work in mathematics should elect 302, 305, and at least four other 300-level courses, possibly including a graduate course at MIT. They are also advised to acquire a reading knowledge of one or more of the following languages: French, German, or Russian.

The mathematics minor is recommended for students whose primary interests lie elsewhere but who wish to take a substantial amount of mathematics beyond calculus. Option I (five units) consists of: (A) 205, 206 and (B) 302 or 305 and (C) two additional units, at least one of which must be at the 200 or 300 level. Option II (five units) consists of: (A) 205, 206 and (B) three additional 200- or 300-level units. MATH 215/PHYS 215 can be counted as one of these five units. MATH 216/PHYS 216 satisfies the requirement that a math minor take 205, but does not count as one of the five units. For students entering in the fall of 2006 and later, at most two of 206, 210, 215 may be counted towards a mathematics minor. A student who plans to add the mathematics minor to a major in another field should consult a faculty advisor in mathematics.

Teacher certification

Students interested in teaching mathematics at the secondary-school level should consult the chair of the mathematics department and the chair of the education department. Students interested in taking the actuarial science examinations should consult the chair of the mathematics department.

MIT courses

Students are encouraged to elect MIT courses that are not offered by the Wellesley College mathematics department.

Honors

The department offers the following options for earning honors in the major field: (1) completion of 302, 305, and four other 300-level courses, and two written comprehensive examinations or (2) two semesters of thesis work (360 and 370). An oral examination is required for both programs. To be admitted to the honors program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Media Arts and Sciences

AN INTERDEPARTMENTAL MAJOR

Co-Directors: Irish, Metaxas

The Departments of Art and Computer Science offer an interdepartmental major in media arts and sciences that explores the artistic, cultural and scientific applications within the context of new media technologies. The program focuses on media production that balances artistic sensibility with analytical reasoning within the rich tradition of the liberal arts environment. Areas of study include digital imaging and design; web-connected database architecture; three-dimensional visualization and modeling; digital composition in audio/video; analog print and photographic processes; computer graphics and animation; human-computer interaction; programming for networked environments.

A major in media arts and sciences requires 12 units of coursework, at least eight of which must be above the 100-level and two of which must be at the 300-level other than 350 or 360. Flexibility has been built into the major to allow students the ability to adapt their course of study in relation to their interests, by choosing an emphasis either in media sciences or in media arts. The major starts with three introductory courses, at least five courses in the area of concentration and at least two courses outside the area of concentration. In addition to other courses at Wellesley, students can take courses from MIT's media lab or comparative media studies.

Requirements for the major are listed below. A Frequently Asked Questions (FAQ) section can be found at the program's Web site: www.wellesley.edu/MAS/ along with a spreadsheet to help students plan their major.

1. Three required introductory courses, one each from studio art, art history and computer science: ARTH 101 (Introduction to the History of Art Part II: Renaissance to the Present), ARTS 109 (Basic Two-Dimensional Design) or ARTS 108 (Photography I), and CS 110 (Computer Science and the Internet).

2. At least two required art courses (at least five required for emphasis in media arts) from the following: ARTS 165 (Introduction to Video Production), ARTS 219 (Introductory Print Methods: Lithography/Monotype) or ARTS 220 (Introductory Print Methods: Intaglio/Relief), ARTS 221 (Digital Imaging), ARTS 255 (Dynamic Interface Design), ARTS 260 (Moving Image Studio), ARTS 265 (Intermediate Video Production) or ARTS 208 (Photography II), ARTS 313 (Virtual Form), ARTS 317 (Seminar: Topics in the Visual Arts), ARTS 320 (Architectonics and Installation), MUS 275 Computer Music: Synthesis Techniques and Compositional Practice.

3. At least two required computer science courses (at least five required for concentration in media sciences) from the following: CS 111 (Computer Programming and Problem Solving), CS 215 (Multimedia Design and Programming), CS 230 (Data Structures), CS 231 (Fundamental Algorithms), CS 242 (Computer Networks), CS 304 (Databases with Web Interfaces), CS 307 (Computer Graphics)
4. At least one media culture course is recommended from the following: ARTH 225 (Modern Art Since 1945), ARTH 226 (History of Photography: From Invention to Advertising Age), ARTH 291 (Persuasive Images), CAMS 175 (Introduction to Cinema and Media Studies), SOC 216 (Sociology of Mass Media and Communications).

Majors are also encouraged to take an advanced media production course (e.g. an individual study).

Students may receive a maximum of one unit of college credit for a score of 5 on the Computer Science A or AB Advanced Placement Exam. This unit can count towards the media arts and sciences major.

**Honors:** The MAS thesis offers a year-long opportunity to develop independent research and production with honors. Students interested in proposing a thesis must have a minimum 3.5 GPA in the major, and the support of a faculty advisor in the Art or CS departments. An interdepartmental review will occur at the end of the fall semester, to determine whether the student should continue her project as a 370 in the Spring and convey its decision to the student by December 20th. In a case where it is recommended that the Senior Thesis not be continued into the second semester, a student would receive credit for 360 work on the completion of a schedule of work previously agreed to between the thesis advisor and the student.

The thesis proposal should be discussed with the primary faculty advisor during the spring prior to senior year. Proposals for thesis projects must be submitted in writing, detailing the scope for the project, research methodology, project timeline, and must be accompanied by an electronic portfolio of at least 4 MAS projects. Proposals are due on August 25 before the beginning of the student’s senior year.

**Related Courses**

**For Credit Toward the Major**

The courses listed below are representative of Wellesley and MIT courses that emphasize topics related to the media arts and sciences major. Students may include courses not listed below in their major with permission of their program directors.

- **ANTH 232** Anthropology of the Media
- **CAMS 231** Film as Art
- **CS 115/PHYS 115** Robotic Design Studio
- **CS 210** The Dynamic Web
- **CS 342** Computer Security
- **ENG 204** The Art of Screenwriting
- **PHIL 203** Philosophy of Art
- **PHYS 115/CS 115** Robotic Design Studio
- **PSYC 337** Seminar, The Psychology of Creativity
- **SOC 215** Sociology of Popular Culture

**MIT Courses**

The MIT Media Lab and the MIT Comparative Media Studies Program offer a large variety of courses that may be appropriate for a media arts and sciences major. These offerings vary per semester; please consult the MIT catalog at student.mit.edu/catalog/mMASa.html and student.mit.edu/catalog/mCMSa.html. Below are sample Media Lab courses offered regularly.

- **MAS.110** Fundamentals of Computational Media Design
- **MAS.111** Introduction to Doing Research in Media Arts and Sciences
- **MAS.160** Signals, Systems and Information for Media Technology
- **MAS.642J** Writing for Computer Performance
- **CMS.790** Media Theories and Methods I
- **CMS.801** Media in Transition
- **CMS.880** Erasmus to E-mail: Technologies of the Word
- **SP.747** Creative Imaging

**Olin Courses**

The Olin College of Engineering offers the following courses that may be appropriate for a media arts and sciences major.

- **ENGR 2250** User Oriented Collaborative Design
- **ENGR 3220** Human Factors and Interaction Design

**Medieval/Renaissance Studies**

**AN INTERDEPARTMENTAL MAJOR**

**Directors:** TBA

**Advisory Committee:** Carroll (Art), Elkins (Religion), Vega (Spanish)

The major in Medieval/Renaissance studies enables students to explore the richness and variety of European and Mediterranean civilization from later Greco-Roman times through the Renaissance and Reformation, as reflected in art, history, literature, music, and religion. It has a strong interdisciplinary emphasis; we encourage students to make connections between the approaches and subject matters in the different fields that make up the major. At the same time, the requirements for the major encourage special competence in at least one field.

For a Medieval/Renaissance studies major, students must take at least eight (8) units of course work from the list that follows. Of these, at least four must be above the 100-level in an area of concentration—a single department, a geographical location, a topic or theme. Two units of course work must be at the 300-level. Each year at least one 200-level course and one seminar are offered which are especially designed to accommodate the needs and interests of majors. The majors’ seminars for 2006-07 are (1) **ENG 324** (Advanced Studies in Shakespeare; Shakespeare in Performance) (for details, see the listing under English) and (2) **ARTH 332** (Seminar, Toledo, the Convergence of Medieval Cultures) (for details, see the listing under Art History). Normally, credit/non courses do not count for the major. The Medieval/Renaissance studies program does not accept AP credits to replace course work in the major.

Majors who are contemplating postgraduate academic or professional careers in this or related fields should consult faculty advisors to plan a sequence of courses that will provide them with a sound background in the language and critical techniques essential to further work in their chosen fields. We make every effort to accommodate individual interests and needs through independent study projects (350s and senior theses) carried out under the supervision of one or more faculty members and designed to supplement, or substitute for, advanced seminar-level work.

**Honors**

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA on the major is between 3.0 and 3.5. See Academic Distinctions.

There are numerous opportunities for study abroad for those who wish to broaden their experience and supplement their research skills through direct contact with European and Mediterranean culture. Up to three courses in accredited programs abroad may be counted toward the major. By participating in the Collegium Musicum, students can learn to perform Medieval and Renaissance music; see the departmental entry for music.
ME/R 246 Monsters, Villains, and Wives
Lynch (Med/Reu and English)
This course will select its monsters, villains, and wives from early English, French, and Anglo-
Norman literature, ranging from the giant
Grendel (and his mother) in Beowulf to the
arch-villain Ganelon in The Song of Roland, from
Guinevere to the wife of the enigmatic Green
Man in Sir Gawain and the Green Knight. We will
finish by considering the survival of the magical
villain in a modern-day fantasy classic like the
medievalist J.R.R. Tolkien's Hobbit, or a volume in
his Lord of the Rings trilogy, and in John
Gardner's recasting of the Beowulf-story, Grendel.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring Unit: 1.0

ME/R 247 Arthurian Legends
NOT OFFERED IN 2006-2007. A survey of leg-
ends connected with King Arthur, and their lit-
erary context in medieval and Renaissance
romance, from the sixth century through the six-
teenth, with some attention to new interpreta-
tions of the Arthurian tradition and of the
romance mode in the nineteenth and twentieth
centuries.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O Unit: 1.0

ME/R 248 Medieval Women Writers
Jacoff (Med/Reu and Italian)
This course explores a variety of texts by medieval
women writers and the contexts in which and
against which they were written. These texts raise
questions about the role of the female body and
about strategies of self-authentication which
remain important today. The writers we will con-
sider in depth are Marie de France, Heloise (and
Abelard), selected medieval mystics, Margery
Kempe, Ilian of Norwich, and Christine de
Pizan.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall Unit: 1.0

ME/R 344 Tales of Love
NOT OFFERED IN 2006-2007. Love becomes a
central subject of literature in the Middle Ages
and remains so in our own time. This course will
explore some canonic medieval tales of love
(Tristan y Isolda, Paolo and Francesca, Dante
and Beatrice, Petrarch and Laura) and selected
Renaissance dramatizations of the power of pas-
sion (Shakespearean sonnets and plays). We will
conclude by reading one modern novel in which
many of the themes and issues of the earlier
periods remain alive and powerful.
Prerequisite: Open to juniors and seniors or by permission of instr. Preference given to medieval/renaissance
majors.
Distribution: Language and Literature
Semester: N/O Unit: 1.0

ME/R 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring Unit: 1.0

ME/R 360 Senior Thesis Research
Prerequisite: By permission of the directors of the
medieval/renaissance studies program. See Directions for
Elective and Academic Distinctions.
Distribution: None
Semester: Fall, Spring Unit: 1.0

ME/R 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring Unit: 1.0

128 Medieval/Renaissance Studies
The major in Middle Eastern studies is designed to acquaint students with the many facets of Middle Eastern civilizations through an interdisciplinary study of the languages, literatures, histories, religions, arts, social and political institutions, and cultural patterns of the region known as the Middle East. Study of Middle Eastern communities living in diaspora may also be counted towards the major.

The major in Middle Eastern studies requires nine units. Students must demonstrate proficiency in Arabic (equivalent to at least two semesters at the second-year level). In certain cases, another Middle Eastern language (for example, Persian, Turkish, Hebrew) may be substituted for Arabic; a student whose area of concentration may render such a substitution appropriate should consult her advisor. No credit towards the major is given for the first year of language study. For students who are exempt from the language requirement, nine units are still necessary for the completion of the major. Students are required to concentrate in some area or aspect of Middle Eastern studies (for example, Arabic language and literature; religion; the medieval Middle East; the modern Middle East; religion and politics in the Middle East) by taking four courses above the 100 level, including at least two at the 300 level, one of which must be a seminar. At least two courses should be taken in each of the Departments of History and Religion.

 Majors devise their own programs of study in consultation with an appropriate faculty member from the student’s area of concentration. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for Middle Eastern studies.

In addition to Wellesley courses, students are encouraged to take relevant courses at Brandeis University and at MIT. These courses must be approved toward the major, in advance, by the corresponding department at Wellesley.

A minor in Middle Eastern studies consists of five units, of which at least one should be at the 300 level (excluding 350). Units must be taken in at least two departments; only one course at the 100 level can be counted towards the minor.

Second-year Arabic may be counted towards the minor.

Honors

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the Advisory Committee may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

The following courses are available in Middle Eastern studies:

**ARAB 101-102 Elementary Arabic**

Aadnani, Davidson

An introduction to the Arabic language. The course takes a comprehensive approach to language learning and emphasizes the four skills of listening, speaking, reading, and writing. Students are introduced to the principles of grammar, taught how to read and write in the Arabic alphabet, and trained in the basics of everyday conversation. Through the use of a variety of written, video and audio materials, as well as other resources made available through the World Wide Web, the course emphasizes authentic materials and stresses the active participation of students in the learning process. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None

Distribution: None

Semester: Fall, Spring

Unit: 1.0

**ARAB 201-202 Intermediate Arabic**

Aadnani

A continuation of ARAB 101-102. The course takes students to a deeper and more complex level in the study of the Arabic language. While continuing to emphasize the organizing principles of the language, the course also introduces students to a variety of challenging texts, including extracts from newspaper articles, as well as literary and religious materials. Students will be trained to work with longer texts to gain the necessary communicative skills to prepare them for advanced-level Arabic. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: ARAB 101-102 or equivalent

Distribution: Language and Literature

Semester: Fall, Spring

Unit: 1.0

**ARAB 210 Arabic Literature in Translation**

Aadnani

NOT OFFERED IN 2006-07. Exploration of some highly influential works of literature translated from Arabic. Students will have a chance to delve into literary works composed by authors from a large geographical area, extending from Morocco to the Middle East, from the turn of the nineteenth century to the present day. Our study of modern and contemporary Arabic literature will focus on a number of recurring themes, such as cultural and national identity, colonialism, religion, gender relations, and class conflict. Authors to be discussed include Naguib Mahfouz, Abd alrahman Munif, Shafik Musteghanemi, Leila Abouzeid, Tahir Wattar, Mohammed Zafar, and Yusuf Idris. Taught in English.

Prerequisite: None

Distribution: Language and Literature

Semester: N/D

Unit: 1.0

**ARAB 250 Research or Individual Study**

Prerequisite: Two years of Arabic or permission of instructor.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

**ARAB 250H Research or Individual Study**

Prerequisite: Two years of Arabic or permission of instructor.

Distribution: None

Semester: Fall, Spring

Unit: 0.5

**ARAB 350 Research or Individual Study**

Prerequisite: Open to juniors and seniors only.

Unit: 1.0

**ARAB 350H Research or Individual Study**

Prerequisite: Open to first-year students and sophomores only.

Distribution: None

Semester: Fall, Spring

Unit: 0.5

**MES 250 Research or Individual Study**

Prerequisite: Open to first-year students and sophomores only.

Distribution: None

Semester: Fall, Spring

Unit: 0.5

**MES 310 Resistance and Dissent in North Africa and the Middle East (in English)**

Aadnani

An exploration of themes of resistance and dissent in the literatures and cultures of North Africa and the Middle East since the early 1980s. Topics include the rise of democratic movements, such as political parties, associations and NGOs; the role and importance of Islam to the identity of contemporary nation states in the region; the status of women and minorities in the ideologies of the movements under study; and the status and implications of dissent. Materials studied include works of fiction and nonfiction, films, speeches, song lyrics, and online publications. Taught in English.

Prerequisite: Open to students who have taken at least one course in Middle Eastern studies, and to juniors and seniors by permission of the instructor.

Distribution: Social and Behavioral Analysis or Language and Literature

Semester: Spring

Unit: 1.0

**MES 350 Research or Individual Study**

Prerequisite: Open to juniors and seniors only.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

**MES 350H Research or Individual Study**

Prerequisite: Open to juniors and seniors only.

Distribution: None

Semester: Fall, Spring

Unit: 0.5

**MES 360 Senior Thesis Research**

Prerequisite: By permission of department. See Academic Distinctions.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

**MES 370 Senior Thesis**

Prerequisite: 360 and permission of department.

Distribution: None

MUS 99 Performing Music (without academic credit)

Staff
One-half hour private lesson per week. Students may register for 45-minute or hour-long lessons for an additional fee. May be repeated without limit. For further information, including fees, see Performing Music: Private Instruction. See also MUS 199, 299, and 344.

Prerequisite: 111, 111X, or exemption by music theory placement test; audition required.
Distribution: None
Semester: Fall, Spring
Unit: None

MUS 100 The Culture of Classical Music

Fisk
Until the late twentieth century, the only music usually deemed worthy of serious study was so-called "classical music," a written repertory originating in Western Europe but eventually gaining apparent pre-eminence in many other regions as well. Today that pre-eminence is being challenged, and many musics are given serious curricular attention, both for their own substantial musical interest and as expressions of different cultures and ways of being. Recognizing that classical music is not the "universal language" it was once thought to be, this course will explore it as a cultural phenomenon, tracing the evolution some of its many forms and meanings, social contexts, composers, performers and audiences, and its resonances with different world music traditions. May not be counted toward the major.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 105 Introduction to Musics of the World
Barzel
When it comes to music, humans are boundlessly creative. This course will investigate a variety of incredible musical expressions from around the globe, with attention to the cultural differences that uniquely shape each one. Using a case-study approach, we will focus on Indonesian, Indian, and Eastern European musics, also addressing Africa and the Americas. Throughout, we will take an ethnomusicological perspective: learning how music and culture interact to yield diverse artistic expressions that can be best appreciated if we take the time to understand them on their own terms.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 111 Introduction to the Language of Music
Samuel, Bhogal

This course is designed to enhance your understanding of how music works and to improve your listening, reading, and general comprehension skills. While the focus is on fundamentals of Western music (notation, rhythm, melody, scales, chords, formal plans), listening examples will be drawn from a variety of genres, including jazz, pop, and music from around the world. Performance on the music theory placement test will determine placement in MUS 111 or 111X. May not be counted toward the major.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 111X Introduction to the Language of Music
Barzel

A more in-depth and extensive study of music fundamentals than that offered in MUS 111, students will be placed into this course based on their performance on the music theory placement test. Like MUS 111 but more extensive, this course is designed to enhance understanding of how music works and to improve listening, reading, and general comprehension skills. While the focus is on fundamentals of Western music (notation, rhythm, melody, scales, chords, formal plans), listening examples will be drawn from a variety of genres, including jazz, pop, and music from around the world. May not be counted toward the major.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 120 Jazz Theory

NOT OFFERED IN 2006-07. This class covers the basics of jazz music theory; intervals, chords, scales, and simple harmonic analysis. It offers a
hands-on experience that focuses on the vocabulary of jazz, including issues of style, form, rhythm, and improvisation.

Prerequisite: 111 or 111X
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/D
Unit: 1.0

MUS 122 Harmonic Concepts in Tonal Music Brody
Beginning with a comprehensive review of musical terminology and basic materials, MUS 122 explores the fundamentals of tonal harmony, voice-leading, and analysis. Written exercises are complemented by regular ear-training practice. Normally followed by 244.
Prerequisite: Open to all students who have completed or exempted 111 or 111X. Students who meet this requirement are advised to take 122 or 220 in the fall semester, if they are interested in pursuing a major in music.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 199 Performing Music (for academic credit)
Staff
One 45-minute lesson per week. Students may take an hour-long lesson for an additional fee. A minimum of six hours of practice per week is expected. One credit is given for a full year of study, which must begin in the first semester. Not to be counted toward the major in music. MUS 199 may be repeated without limit. For further information, including fees, see Performing Music: Private Instruction and Academic Credit. See also MUS 99, 299, and 344. Except by special permission, no credit will be given unless both semesters are completed satisfactorily. Mandatory credit/non-credit.
Prerequisite/Corequisite: By election and permission. One 111 or 111X must be completed, as determined by a mandatory music theory placement test.
Completion of a music course in addition to performing music is required before credit is given for each year of 199. Students should consult the department website for details regarding the entrance audition for 199.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 200 History of Western Music I Bhogal
The first half of a year-long comprehensive survey of Western music history, MUS 200 considers significant forms and styles of earlier eras, from the liturgical and vernacular repertories of the Middle Ages to the music of the mid-eighteenth century. The course offers a strong historical component, and also encourages the development of analytical skills. As we examine compositions in many genres, we will pursue numerous avenues of inquiry, including close readings of verbal texts, evaluation of formal structures, harmonic analysis, assessment of melodic and rhythmic features, and investigation of the broader circumstances that surround and inform musical creation.
Prerequisite/Corequisite: 122/244
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 201 History of Western Music II Bhogal
A continuation of the survey of Western music history begun in MUS 200, MUS 201 examines the pre-Classical, Classical, and Romantic periods, as well as the music of the past one hundred years. The course places special emphasis on the acquisition of analytical skills, and students are encouraged to devise and support interpretive hypotheses in written essays. Students may enroll in MUS 201 without having taken MUS 200.
Prerequisite/Corequisite: 122/244
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 209/AFR 224 A History of Jazz Barzel
A listener's introduction to jazz: early jazz drew from several vibrant streams of indigenous musical art (including ragtime and blues); subsequent stylistic phases have corresponded closely to significant developments in social history. Knowledge of jazz is thus highly relevant to an understanding of American culture since 1900. Through a selection of recordings and readings, we will follow the progression of jazz styles and address the interplay of African, Latin, European, and American influences. Students will learn how to distinguish between basic styles (New Orleans, swing, bebop) and will become familiar with specialized terms and concepts (stop time, blue notes, form changes, improvisation) that are central to understanding the music. Students may register for either MUS 209 or AFR 224 and credit will be granted accordingly.
Prerequisite: None. Not open to students who have taken MUS 233/AFR 233.
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: Fall
Unit: 1.0

MUS 213/313 Twentieth-Century Techniques Zallman
Studies in the language and techniques of twentieth-century concert music through analysis of representative compositions by major composers of the era. Short exercises in composition are designed to familiarize students with a variety of styles and structural approaches that typify "modern music" of the 1900's. This course may be taken as either 213 or, with additional assignments, 313. Students registered for 313 will focus on the composition of at least two expanded, completed, and performable pieces.
Prerequisite: 122, 220, or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 220 Theory, Analysis, and Performance Zallman
This course is appropriate for students who already have a solid background in basic theory, and also possess advanced performing skills. The principal goal of the course is to encourage an understanding of practical analytical methods and their value in musical performance. Musical examples to be studied are selected from the standard tonal repertory. Included are in-depth studies of melodic phrasing, harmonic functionality, and their interaction with the meter and rhythm of tonal music. Practice in basic writing and listening skills will be regularly incorporated into class work and written assignments. MUS 220 is intended for students who have completed MUS 122, and may serve as a prerequisite for MUS 244.
Prerequisite: Open to students who have completed 122.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 222/322 Music, Gender, and Sexuality Fontijn
From music to diva, patron to composer, and abbe to countess, women have always been creators of musical culture around the world. Music, Gender, and Sexuality offers the tool with which to understand the roles women play in a wide variety of musical endeavors and considers them as creators of classical, folk, children's, jazz, rock, electronic, film, and popular music. We will examine constructions of gender and ethnicity; queer theory; and several global musical traditions. Selected artists include Riot Grrrl, Rokia, Traoré, Zama, Norah Jones, Madonna, Lili Boulanger, Fanny Hensel, and Hildegard of Bingen. This course may be taken as either 222 or, with additional assignments, 322.
Prerequisite: 222: open to all students. 322: 200 or 201 required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 223/323 Topics in Vocal Music: Medieval Cantores and Their Craft Bagby, Livjancic
Concentrating on medieval European liturgical chant, monophonic vocal music and early polyphony (tenth–thirteenth centuries), we will attempt to recapture the process of learning and performing music that have been known to medieval cantores. Students will gain access to the music and the Latin texts by learning to read the original medieval manuscripts. Each session will include theoretical and historical presentations as well as the practical work of learning to perform a particular chant or song (in small ensembles or as soloists). Topics will include the study of medieval musical notations, the musical modes, and techniques of improvisation and memorization. Although principally intended for vocalists interested in gaining knowledge and performing experience in medieval music, this course will also accomodate a limited number of interested medievalists (e.g., historians, Latinists, art historians) who are not musicians but who would benefit from a working collaboration with performers. This course may be taken as either 223 or, with additional assignments, 323.
Prerequisite: Permission of the instructors
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 225/325 Topics in Ethnomusicology: Barzel
Topic for 2006-07: TBD
This course may be taken as either 225 or, with additional assignments, 325.
Prerequisite: 100, 111, 111X, 122, or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 230 Opera: Its History, Music, and Drama NOT OFFERED IN 2006-07
This course offers a comprehensive chronological survey of the history and evolution of opera, from 1600 to the present time. Lectures will examine historical background, the sub-genres of operatic literature (opera seria, opera buffa, music drama), and complete operas by major composers representing a number of periods and styles (including Monteverdi, Mozart, Verdi, and Alban Berg). We will also study libretti, relevant novels, and other source materials in order to establish
connections between musical structure and dramatic expression. Two class meetings, with additional sessions required for viewing operas in their entirety.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

MUS 235/335 Music in Historical/Critical Context

Bhagat

Topic for 2006–07: The Femme and Her Song. This course examines nineteenth-century representations of women on the French operatic stage. From nuns to prostitutes, mothers to mistresses, we will consider how these characterizations reflected an authorial viewpoint that commented on prevailing social norms and political ideals. We will examine historical sources including music written for women and by women; musical performances by celebrated singers of the time; concert reviews and criticism; and novel extracts by such writers as Balzac, Flaubert, and Zola. This immersion in French culture will be enriched through an engagement with new scholarship on French opera as well as recent dramatizations in film (Paul Mills-Carmen, Robert Carson Tales of Hoffmann, Francois Roussillon Manon, Graham Vick Pelleas). This course may be taken as either 235 or, with additional assignments, 335.

Prerequisite: 100, 111, 111X, 122, or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 240 Opera Workshop

Matthews

This course is appropriate for singers currently enrolled in voice lessons who wish to gain expertise in dramatic musical performance—that is, the techniques that aid singing actors in the presentation of operatic repertory. All students will receive extensive musical and dramatic coaching, and will have the opportunity to perform a scene or aria in an informal presentation at the conclusion of Winter Session. Emphasis will be placed on researching of roles, character development, actions appropriate to musical style, and the interaction of text, music, and movement. The class meets daily, and students are expected to study and rehearse individually and with other participants outside of class sessions. Note: Students may take this course more than four times. Not offered every year. Subject to Dean’s Office approval.

Prerequisite or Corequisite: 199 in voice, with permission of 199 instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Winter
Unit: 0.5

MUS 244 Tonal Counterpoint and Harmony Zallman

A continuation of MUS 122 and MUS 220, this course offers a basic study of twelfth and thirteenth-century counterpoint, with emphasis on its relationship to the harmony and melodic figuration of the late Renaissance and Counter-Reformation eras. Students will have completed the study of the major forms of late medieval music theory presented in MUS 122 and MUS 220. A prerequisite of two- and three-part exercises in counterpoint and a number of harmonizations, both with and without figured-bass, as Bach chorale melodies in keyboard style.

Prerequisite: 122 or 220
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 250 Research or Individual Study

Prerequisite: Open to qualified students by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

MUS 250H Performing Ensembles for Credit

MUS 250H is open to qualified students by permission of the individual ensemble director. One-half unit of credit is granted for a full year (two consecutive semesters) of participation in any one of the department-sponsored ensembles. A maximum of two units of credit toward the degree can be accumulated through 0.5 courses. Of the 32 units required for graduation, no more than four units in performing music may be counted toward the degree, thus students taking music lessons for credit during all four years at Wellesley cannot also receive degree credit via MUS 250H. No credit will be given for this course unless both semesters are completed satisfactorily. MUS 250H is graded on a credit/non-credit basis.

Corequisite: One academic music course per 1.0 credit earned.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

MUS 275 Computer Music: Synthesis Techniques and Compositional Practice

Brady

An overview of the fundamental concepts, techniques, and literature of electronic and computer music. Topics include the technology of acoustic and digital musical instruments, MIDI programming, sound synthesis techniques (frequency modulation, sampling, linear synthesis, waveshaping, etc.), and the history of electronic music. Students will undertake basic compositional exercises, and learn basic programming and related technical skills.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 299 Performing Music (advanced, with academic credit)

Staff

A one-hour private lesson per week. Students who have completed at least one year of MUS 199 are eligible for promotion to 299. A student wishing to enroll in MUS 299 is expected to demonstrate accomplishment distinctly beyond that of the MUS 199 student. Students are recommended for promotion by their instructors. A minimum of ten hours of practice per week is expected. Mandatory credit/non-credit.

MUS 299 may be repeated without limit. One 200- or 300-level music course must be completed for each unit of credit granted for MUS 299. A music course already used to fulfill the requirement for MUS 199 may not be counted again for 299. One unit of credit is given for a full year of study. Not to be counted toward the major in music. For further information, including fees, see Performing Music: Private Instruction and Academic Credit. See also MUS 99, 199, and 344. Except by special permission, no credit will be given for this course unless both semesters are completed satisfactorily. Mandatory credit/non-credit.

Prerequisite: 199 and recommendation of instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 300 Seminar: Studies in History, Theory, Analysis, Special Topics

Offered in both semesters, with two topics presented consecutively in each semester. Students may select any number or combination of the four topics offered each year. Open to music majors, minors, and other students with appropriate background.

Topic A: TBD

Graham

Prerequisite: 200, 201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 0.5

Topic B: TBD

Barzel

Prerequisite: 200, 201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 0.5

Topic C: Treasures of Seicento Venice Fontijn

In such public venues as the basilica of San Marco and the opera house of San Cassiano, the great maritime republic of Venice regaled its inhabitants with splendid music-making during the sixteenth century. More intimate spaces in the city, such as the gatherings of Strozzi’s Academy of the Incogniti or the Pietar orphanage, produced first-rate music on a smaller scale. This course will begin with the study and analysis of polychoral sacred works (Gabrielli’s In ecclesias, Monteverdi’s Vespers, Cavalli’s Misa concertata), consider Cavalli’s early operatic repertory, and conclude with works by Cavalli’s students, singer-composers Barbara Strozzi and Antonia Bembo.

Prerequisite: 200, 201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 0.5

Topic D: J.S. Bach and the Piano Fisk

J.S. Bach wrote nothing for the piano; the instrument was not yet in use. Yet virtually every piano student is soon engaged, and later repeatedly re-engaged with his keyboard music. This course will consider the aspects of this music and its reception that have made the inventions, dance suites, preludes, fugues, toccatas, partitas, concertos, and the “Goldberg” Variations so central to the pianist’s repertoire: their technical and stylistic variety and their exploration of the full expressive range of Bach’s compositional idiom. It will also consider performances of this repertoire on both period and modern instruments, and the variety of approaches that these performances may suggest or require.

Prerequisite: 200, 201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 0.5
MUS 308 Conducting
NOT OFFERED in 2006-07. Techniques of score preparation, score reading, baton technique, and rehearsal methods. The course will stress the development of aural and interpretive skills through class exercises, rehearsals, demonstrations of instruments, tutorials, and individual projects designed according to each student’s level and interests.
Prerequisite: One from: 200, 201, 220, or 315, or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring Unit: 1.0

MUS 315 Advanced Harmony
Zalmun
A study of chromatic harmony; including modulation, mode mixture, procedures for variation and development such as harmonic and chromatic sequences, and the relationship between harmony and total form. Students will be introduced to basic Schenkerian terminology and modes of analysis. As a final project, students will present a notebook of excerpts, compiled from the classical literature, exemplifying each of the topics presented in class.
Prerequisite: 244 and either 313 or 201
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall Unit: 1.0

MUS 344 Performance Workshop
Ting
Intensive study of advanced interpretation and performance, as an adjunct to lessons at the 299 level with a member of the College performance faculty. The program offers students an opportunity to perform frequently in an informal setting before fellow students and faculty, to discuss repertoire and interpretation, and to receive constructive comment. This is the only credit course in performance that can be counted toward the music major.
Prerequisite: Honors-level work in all music courses, averaging a GPA of 3.5 or higher; a written recommendation from her instructor in performing music. Corequisite: Students must complete both 200 and 201 by the end of the first year of 344. If enrolled in the course for a second year, an additional 200- or 300-level course must be completed. Permission to elect subsequent units is granted only to a student who has fulfilled all corequisite requirements and whose progress in 344 is judged excellent; a maximum of four units of MUS 344 may be counted toward the degree.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring Unit: 1.0

MUS 350 Research or Individual Study
Directed study in analysis, composition, orchestration, theory, ethnomusicology, or the history of music.
Prerequisite: Open to qualified juniors and seniors by permission.
Distribution: None
Semester: Fall, Spring Unit: 1.0

MUS 350H Research or Individual Study
Prerequisite: Open to qualified students by permission.
Distribution: None
Semester: Fall, Spring Unit: 0.5

MUS 360 Senior Thesis Research
Prerequisite: By permission of the department. See Directions for Election and Academic Distinctions.
Distribution: None
Semester: Fall, Spring Unit: 1.0

MUS 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring Unit: 1.0

Related Courses
For Credit Toward the Major
EXP 235 Marvels of Paris and Versailles under Louis XIV

Directions for Election
The music major is a program of at least ten units. The normal sequence of courses for the major is: MUS 122 or 220, 244, 200 and 201 (history and analysis), 315, and a total of two semesters of 300 (offered in theory and harmony, four autonomous modular units per year, from which students may select any combination). Also required are three additional elected units of 200- or 300-level work. Students who declare a music major in 2006-07 and after will also be required to participate in their choice of the Department performing music ensembles for at least two academic years (i.e., four semesters). The study of composition (213/313) is highly recommended for majors.
The music minor is a program of at least five units. It consists of MUS 122 or 220, 244, 200 and 201 or one of these plus another history or literature course, and one additional unit of 300-level work.
The music department does not ordinarily allow courses taken credit/non to count toward the major or minor.
Students interested in majoring or minoring in music are strongly encouraged to begin the theory sequence with 122 or 220 in the fall semester of the first year. This allows them to enroll in the spring-term offering of 244, which is the prerequisite for 200 and the courses that follow sequentially. Starting on this sequence immediately affords the option of taking a wider variety of elective music courses in the junior and senior years, and also makes it easier for those spending the junior year abroad to complete the major comfortably. Students who plan to undertake graduate study in western music history or theory are advised that knowledge of both German and French (beyond the introductory level) is essential, and proficiency in Italian highly desirable. Also of value are studies in European history, literature, and art.
Music majors are especially encouraged to develop musicianship through the acquisition of basic keyboard skills, and through ear training, private instruction in practical music, and involvement in the music department's various performing organizations.
Group instruction in basic keyboard skills, including keyboard harmony, sight reading, ear training, and score reading, is provided for all students enrolled in any music course (including 100 with the instructor's permission and if space is available), and to MUS 99 students with the written recommendation of their private instructor. Ensemble sight-reading instruction on a more advanced level is also available for pianists.
The department offers a choice of three programs for honors, all under the catalog numbers 360/370: honors students normally elect the two units in succession during the senior year. Under Program I, the honors candidate carries out independent research leading to a written thesis and an oral examination. Under Program II, honors in composition, the 360 and 370 units culminate in a composition of substance and an oral examination on the honors work. Prerequisites for this program are 315 and distinguished work in 313. Program III, honors in performance, culminates in a recital, a lecture-demonstration, and an essay on some aspect of performance. The prerequisite for Program III is 344 in the junior year and one of the units (200 or 300) in the senior year, through public performance, of exceptional talent and accomplishment; 344 must then be continued in the senior year (though as an adjunct to the 360/370 sequence, and not for separate course credit).
Performing Music Instrument Collection
The music department owns 40 pianos (which include 28 Steinway grands, two Mason and Hamlin grands, and numerous Steinway uprights), a Fisk practice organ, a harp, a marimba, a jazz drum kit, and a wide assortment of modern orchestral instruments. In addition, an unusually fine collection of instruments appropriate to early music performance is available for use by students. These include a Dolmetsch clavicord, a virginal, two harpsichords, a positive organ, a fortepiano, a newly restored 1823 Clementi grand piano, eight violas da gamba, a Baroque violin, and an assortment of Renaissance and Baroque wind instruments. Of particular interest is the Charles Fisk mean-tone organ (completed 1981) in Houghton Memorial Chapel, which is America's first major instrument constructed after seventeenth-century German prototypes. The chapel also houses a three-manual Aeolian-Skinner pipe organ. Galen Stone Tower contains a 32-bell carillon.
Performance Workshop (MUS 344)
The performance workshop is directed by a member or members of the performing music faculty. It offers advanced students an opportunity to perform frequently in an informal setting before fellow students and faculty, to discuss repertoire and interpretation, and to receive constructive comments.
Private Instruction
The music department offers private instruction in voice, piano, fortepiano, organ, harpsichord, harp, violin, Baroque violin, fiddle, viola, violoncello, double bass, viola da gamba, flute (Baroque and modern), oboe, clarinet, bassoon, trumpet, French horn, trombone, tuba, recorder, lute, classical guitar, saxophone, and marimba; and private jazz instruction in piano, violin, bass, saxophone, flute, percussion, and voice. We will make every attempt to accommodate students wishing private instruction in instruments not currently taught.
All students planning to enroll for music lessons must take the basic skills placement test. Information concerning auditions and course requirements for noncredit and credit study is given above under listings for MUS 99, 199, 299, and 344. Except for 344, auditions and the basic skills placement test are ordinarily given at the start of the first semester.
There is no charge for performing music to students enrolled in 199, 299, or 344 who: 1) have demonstrated financial need as determined by the Wellesley College Financial Aid Office; 2) are receiving financial aid from Wellesley College; and 3) are taking the normal length of lesson (45 minutes at the 199 level, one hour at the 299 level). All other (199 and 299) students, while still given the full length lesson, are charged an annual fee of $988 (calculated as the rate for one half-hour lesson per week of the academic year). Students who contract for performing music instruction under MUS 99 are charged $988 for one half-hour lesson per week through both semesters, and may register for 45-minute or hour lessons for an additional charge. A fee of $25 per year is charged to performing music students for the use of a practice studio. The fee for the use of a practice studio for fortpiano, harpsichord, and organ is $45.

Music lessons at Wellesley involve a full-year commitment: lesson contracts are binding for the entire school year. Performing music fees are payable by September 30; no refunds will be made thereafter.

For purposes of placement, a basic skills placement test is given before classes start in the fall semester. All students registered for MUS 111, 122, 220, or private instruction in 99 or 199 are required to take the examination.

Arrangements for lessons are made at the music department office during orientation of the first week of the semester. Students may begin private study in 99 (but not 199 or 299) at the start of the second semester, if space permits.

Academic Credit and Corequisites for MUS 199 and 299
Credit for performing music at the 199 and 299 levels is granted only for study with the department’s performance faculty, not with outside instructors; the final decision for acceptance is based on the student's audition. One unit of credit is granted for a full year (two semesters) of study in either 199 or 299; except by special permission, both semesters must be satisfactorily completed before credit can be counted toward the degree. While music performance courses (99, 199, 299, 344) may be repeated without limit, no more than four units of credit in these courses may be counted toward the Wellesley degree. More than one course in performing music for credit can be taken simultaneously only by special permission of the department.

An additional music course must be elected as a corequisite for each unit of credit in performing music.

The music department’s MUS 199 and 299 offerings are made possible by the estate of Elsa Graefe Whitney ‘18.

Group Instruction
Group instruction in classical guitar, percussion, and voice is available for a fee of $300 per year. Group instruction in the Alexander Technique is offered at a fee of $150 for a semester.

Performing Organizations
The following organizations, all directed by faculty members, are vital extensions of the Wellesley music department’s academic program.

The Wellesley College Choir
The College Choir, consisting of approximately 50 singers, is devoted to the performance of choral music from the Medieval era through the present day. Endowed funds provide for collaborative concerts with men's choirs from such institutions as the U.S. Naval Academy, Harvard, and Cornell; the choir has also commissioned new compositions in recent years. In addition to staging local performances of works for choir and orchestra (including a recent performance of the Brahms Requiem), the choir tours both nationally and internationally. Auditions are held during Orientation.

The Wellesley College Glee Club
The Glee Club performs a range of choral literature from many periods. In addition to presenting concerts, the Glee Club provides music at various chapel services, and collaborates with the College Choir in concerts and at the annual Vespers service. Auditions are held at the beginning of each semester.

The Wellesley College Chamber Singers
The Chamber Singers is an ensemble of 12 to 16 vocalists selected from the College Choir’s finest singers. The group specializes in music for women’s voices with and without instruments, and presents concerts in conjunction with other College music organizations during the academic year.

The Collegium Musicum
The Wellesley College Collegium Musicum specializes in the performance of Western music from the Middle Ages to the early nineteenth century. This ensemble of singers and instrumentalists is open to Wellesley College students, faculty, staff, and members of the local community. The Collegium is also frequently joined by guest artists, who enrich the ensemble for special projects. Members of the Collegium enjoy the use of an extensive collection of historical instruments. Separate consort instruction is available in viola da gamba, renaissance winds, and recorder for both beginning and advanced players on a fee basis ($300 for the 2006-07 academic year).

The Wellesley-Brandeis Orchestra
The College Orchestra consists of approximately 40 musicians. Selection for membership is based on auditions at the start of each semester. The group is directed by a faculty conductor, but is run by students; a student assistant conductor is chosen by audition. The Orchestra performs compositions from the standard symphonic repertoire once or twice each semester, and periodically engages in collaborations with other institutions to perform such large-scale works as Mahler’s Second Symphony and Beethoven’s Symphony No. 9.

The Chamber Music Society
The Chamber Music Society offers an opportunity for small ensembles to explore the chamber music repertoire of the last three centuries. A number of groups, which include singers and players of strings, winds, and keyboards, rehearse independently and also meet weekly with a faculty coach at no cost. Throughout the year, players present formal and informal recitals. Entrance is by audition.

Prism Jazz
Prism Jazz is a faculty-directed jazz ensemble of six to ten students. Rehearsals encourage the development of fluency in jazz improvisation; previous jazz experience is not required. The ensemble performs several times each year, and presents joint concerts with ensembles from Wellesley and other area colleges. Workshops on jazz improvisation with visiting guest artists are also offered. Auditions are held at the beginning of each year.

Body and Soul
Body and Soul is a faculty-directed vocal jazz ensemble of six to eight singers that performs several times each academic year. The ensemble focuses on developing improvisational skills through individual and group repertoire; previous jazz experience is not required. Auditions are held at the beginning of each year.

Fiddleheads
This group studies and performs the fiddle tunes and styles of Scotland, Ireland, Cape Breton, Quebec, and New England. The class is taught entirely by ear, and all instruments are welcome. No prior experience playing in a traditional style is necessary.

Yanvalou Drumming and Dance Ensemble
Yanvalou, an ensemble that explores the traditional music of Africa and the Caribbean, offers participants the opportunity to perform with authentic instruments, and to experience a variety of cultures through their music. In collaboration with their dance troupe, Yanvalou presents several concerts during each academic year.
Neuroscience

AN INTERDEPARTMENTAL MAJOR

Director: Belz (Biological Sciences)

Neuroscience Advisory Committee: Berger-Sweeney (Biological Sciences), Ducas (Physics), Goldman (Physics), Koldony (Chemistry), Hildreth (Computer Science), Keane (Psychology), Koff (Psychology), Paul (Biological Sciences), Tettel (Biological Sciences)

Hughes Postdoctoral Fellow: Ward

The Departments of Biological Sciences, Chemistry, Computer Science, Physics, and Psychology offer an interdepartmental major in neuroscience that provides an interdisciplinary study of the nervous system and mechanisms underlying behavior.

A major in neuroscience must include the following core courses: BISC 110*, 111*; CHEM 105 (or 120), and 211; PSYC 205, and NEUR 213/BISC 213, which should be completed by the end of junior year. For students who enter the College in fall 2004 or later, PSYC 101 is a required course for the major. Majors must elect two 200-level courses from among the following: one from BISC 219, 220, CHEM 221, 222; and one from PSYC 215, 216, 217, 218. Additionally, majors must elect two 300-level courses, at least one of which must be a laboratory course. Acceptable 300-level courses are BISC 302, 306; CHEM 306 (in 06-07); CS 332; NEUR 300; NEUR 315/BISC 315, NEUR 332/BISC 332, NEUR 335/BISC 335/PHYS 335; PSYC 315, 316, 318, 319. Any other 300-level courses must be approved specifically by the director. A minimum of 6 courses (a minimum of 6.75 units) towards the major requirements must be taken at Wellesley.

Honors (senior thesis) projects may be supervised by members of the various departments associated with the major, in accordance with the requirements of the host department. Students are advised to check with the chair of the host department in their sophomore or junior year to clarify details of the honors program (see honors requirements for individual host department).

Students wishing to attend graduate school in neuroscience also should take CHEM 212 and physics through PHY 106 or PHY 108. Note: The following courses may be used: 110, 110X, 110DL, 111, 111X, 111DL, 111T.

NEUR 250 Research or Individual Study
Prerequisite: By permission of instructor. Distribution: None Semester: Fall, Spring Unit: 1.0

NEUR 250H Research or Individual Study
Prerequisite: By permission of instructor. Distribution: None Semester: Fall, Spring Unit: 0.5

NEUR 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors. Distribution: None Semester: Fall, Spring Unit: 1.0

NEUR 360 Senior Thesis Research
Prerequisite: By permission of director. See Academic Distinctions. Distribution: None Semester: Fall, Spring Unit: 1.0

NEUR 370 Senior Thesis
Prerequisite: 360 and permission of department. Distribution: None Semester: Fall, Spring Unit: 1.0

NEUR 213/ BISC 213 The Biology of Brain and Behavior with Laboratory
Belz, Tettel, Helluy, Paul (Biological Sciences) An introduction to the study of the nervous system and behavior with particular emphasis on the structure and function of the nervous system. In the first half of the semester, basic neuroanatomy, neurochemistry and neurophysiology are covered. In the second half brain mechanisms involved in sensation, language, addiction, memory and cognition are emphasized. The laboratory is designed to expose the student to basic neuroanatomy, neurochemistry, physiology and behavior. Students may register for either NEUR 213 or BISC 213 and credit will be granted accordingly. Prerequisite: BISC 110 and either BISC 111 or BISC 109 Distribution: Epistemology and Cognition or Natural and Physical Sciences Semester: Fall, Spring Unit: 1.25

NEUR 300 Seminar in Neuroscience
Ward (HHIMI)
Topic for 2006-07: The Neurobiology of Learning and Memory: How We Know What We Know. The study of learning and memory is one of the most active and exciting fields in neuroscience today. In this seminar, we will explore where, when and how the brain is thought to change as learning takes place. Through both lectures and student presentations, we will discuss topics ranging from classic behavioral experiments to cutting edge research on the neuroplasticity thought to underlie memory formation. By focusing on primary literature, students will also gain critical skills in reading and evaluating research papers. Prerequisite: NEUR/BISC 213, or permission of the instructor. Distribution: Natural and Physical Sciences Semester: Spring Unit: 1.0

NEUR 315/ BISC 315 Advanced Topics in Neurobiology with Laboratory
Tettel (Biological Sciences)
Hormones act throughout the body to coordinate basic biological functions such as development, differentiation and reproduction. This course will investigate how hormones act in the brain to regulate physiology and behavior. We will study how the major neuroendocriine axes regulate a variety of functions, including brain development, reproductive physiology and behavior, homeostasis and stress. The regulation of these functions by hormones will be investigated at the molecular, cellular and systems levels. Laboratory experiments will explore various approaches to neuroendocrine research, including the detection of hormone receptors in the brain and analysis of behavior. Students may register for either BISC 315 or NEUR 315 and credit will be granted accordingly. Prerequisite: PHY 104/107 and either PHYS 106/106X/108 or NEUR/BISC 213; or by permission of instructor. No programming experience is required. Not open to first-year students. Distribution: Natural and Physical Science or Mathematical Modeling Semester: Spring Unit: 1.25

Prerequisite: NEUR 213/ BISC 213 Distribution: Natural and Physical Science Semester: Spring Unit: 1.25

NEUR 332/ BISC 332 Advanced Topics in Neuroscience
NOT OFFERED IN 2006-07.
Prerequisite: NEUR/BISC 213 Distribution: Natural and Physical Science Semester: S/N Unit: 1.0

NEUR 335/ BISC 335/PHYS 335
Computational Neuroscience with Laboratory
Goldman (Physics)
NOT OFFERED IN 2006-07. Computation by networks of neurons in the brain underlie all of our thoughts, perceptions, and memories. However, direct experimental observation of neural computations is extremely difficult. Mathematical models are increasingly used to bridge the gap between experimental measurements and hypothesized network functions. This course will focus on the use of mathematical models to describe computations performed in the nervous systems of a variety of animals. Topics will range from single neuron biophysics to the analysis of circuits thought to underlie sensory perception and memory. Each topic will be introduced by background lectures, followed by student-led presentations of primary literature and construction of a computer model of the system studied. Lab will introduce students to computer programming of mathematical models in MATLAB and the neuron-simulator NEURON. Students may register for either NEUR 335, BISC 335, or PHYS 335 and credit will be granted accordingly. Prerequisite: PHYS 104/107 and either PHYS 106/106X/108 or NEUR/BISC 213; or by permission of instructor. No programming experience is required. Not open to first-year students. Distribution: Natural and Physical Science or Mathematical Modeling Semester: S/N Unit: 1.25

135 Neuroscience
Peace and Justice Studies

A STRUCTURED INDIVIDUAL MAJOR

Faculty Director: Rosenwald (English)
Co-Director for Experiential Education: Kazanjian

Lecturer: Kazanjian

Peace and Justice Studies Advisory Board:
Aguirre (Spanish), Lam (East Asian Languages and Literatures), Levitt (Sociology), de Warren (Philosophy), Genero (Psychology), Kaptejns (History), Kazanjian (Religious and Spiritual Life), Murphy (Political Science), Rosenwald (English), Velenchik (Economics), Wasserspring (Political Science)

The peace and justice studies program provides a program of study which integrates the many areas of intellectual inquiry relating to the historical and contemporary search for a peaceful and just society and world.

A major (eight units) in peace and justice studies should be designed in consultation with the program directors. Majors must elect a concentration of at least four units above 100 level. Concentrations will normally be in one department, but may be constructed across departments. In either case, the major must demonstrate the intellectual coherence of the concentration. The major must include two 300-level courses. The major consists of:

1. Two required courses: PEAC 104 (Introduction to the Study of Conflict, Justice, and Peace) and PEAC 259 (Peace and Conflict Resolution)

2. Six courses through which students are expected to develop proficiency in two areas:
   a) the social, political, historical, and cultural factors that lead to conflict, violence, and injustice;
   b) the various strategies and techniques of peacemaking and justice-seeking at the level of nation states, social groups and communities within nation states, and interpersonal and individual relationships;
   Students are expected to develop expertise in a particular national, regional, or local conflict situation.

3. Students majoring in peace and justice studies are usually expected to include an experiential education component in their course of study. This component should be discussed with the program directors and may include: Winter session, summer or year-long internships, course-related experiential education programs, or community service projects.

Honors
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

PEAC 104 Introduction to the Study of Conflict, Justice, and Peace
Rosenwald (English)
An interdisciplinary introduction to the study of conflict, justice, and peace. The course engages students in developing an analytical and theoretical framework for examining the dynamics of conflict, violence, and injustice and the strategies that have been employed to attain peace and justice, including: balance of power, cooperation, diplomacy and conflict resolution, law, human rights, social movements, social justice (economic, environmental, and race/class/gender), interpersonal communication, and religiously-inspired social transformation.
Prerequisite: None
Distribution: Social and Behavioral Analysis or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PEAC 250 Research or Individual Study
Prerequisite: 104 and one 200-level course in the general field of Peace and Justice Studies or permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PEAC 250H Research or Individual Study
Prerequisite: 104 and one 200-level course in the general field of Peace and Justice Studies or permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

PEAC 259/HIST 263 Peace and Conflict Resolution
Kaptejns (History)
Topic for 2006-07: South Africa in Historical Perspective. An analysis of the historical background and lasting consequences of Apartheid, focusing on the transformation of the African communities in the period of commercial capitalist expansion (1652-1885) and in the industrial era (1885-present). Important themes are the struggle for land and labor; the fate of African peasants, labor migrants, miners and domestic servants; the undermining of the African family; the diverse expressions of African resistance; and the processes which are creating a new, post-apartheid South Africa. The enormous challenges of reversing equality and resolving conflicts will receive special attention.
Students may register for either PEAC 259 or HIST 263 and credit will be granted accordingly.
Prerequisite: None. Not open to students who have previously taken HIST 263.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

PEAC 324 Grassroots Development, Conflict Resolution, and the Gandhian Legacy in India
Kazanjian (Religious and Spiritual Life) and Rosenwald (English)
This three and a half week winter session course in India focuses on understanding the historical development of the Gandhian philosophy of nonviolence and on how Gandhian strategies have been adapted by grassroots community-based organizations to address the challenges facing India and the world today. The course involves both experiential and classroom learning. During this course we will meet with women's organizations, peace organizations, environmental action groups, and community health activists in rural and urban communities in the North of India. In addition we will take part in a seminar series on intercultural and interreligious conflict resolution at the Malviya Centre for Peace Research at Banaras Hindu University. Not offered every year. Subject to Dean's office approval.
Prerequisite: Two 200-level courses in related fields. Application required.
Distribution: Social and Behavioral Analysis or Religion, Ethics, and Moral Philosophy
Semester: Wintersession
Unit: 0.5

PEAC 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PEAC 350H Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

PEAC 360 Senior Thesis Research
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PEAC 370 Senior Thesis
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Department of Philosophy

Professor: Chaplin, Congleton, McIntyre, Menkiti, Piper, Winkler

Visiting Professor: DeCew
Associate Professor: McGowan

Visiting Assistant Professor: Bitner, Huss

PHIL 103 Self and World: Introduction to Metaphysics and Epistemology
Wearing, McGowan

This course introduces basic philosophical methods and concepts by exploring a variety of approaches to some central philosophical problems. Topics covered include the existence of God, the relation between reason and faith, skepticism and certainty, theories of knowledge, the relation between mind and body, and the compatibility of free will and causal determination. Readings are drawn from historical and contemporary texts. Discussions and assignments encourage the development of the student's own critical perspective on the problems discussed.

Prerequisite: None
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PHIL 104 Introduction to Moral Philosophy
DeCew, Bitner, Chaplin

A study of central issues in moral philosophy from ancient Greece to the present day. Topics include the nature of morality, conceptions of justice, views of human nature and their bearing on questions of value, and competing tests of right and wrong.

Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall, Spring
Unit: 1.0

PHIL 105 Ancient Greek Philosophy
Chaplin

An introduction to philosophy through study of the dialogues of Plato and the treatises of Aristotle. Emphasis will be on topics in Plato and Aristotle that are especially important today, such as the foundations of "stereotyping," whether scientific and ethical reasoning are fundamentally the same or different, whether there are rational emotions, whether women and men are or are not essentially different, and what role political rhetoric plays in a democracy.

Prerequisite: Not open to first-year students in the first semester, and not open to students who have taken PHIL 104/WRIT 125.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PHIL 202/AFR 202 African Philosophy
Menkiti

Initiation into basic African philosophical concepts and principles. The first part of the course deals with a systematic interpretation of such questions as the Bantu philosophical concept of Muntu and related beliefs, as well as Bantu ontology, metaphysics, and ethics. The second part centers on the relationship between philosophy and ideologies and its implications in Black African social, political, religious, and economic institutions. The approach will be comparative. Students must register for either PHIL 202 or AFR 202 and credit will be granted accordingly.

Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 203 Philosophy of Art
De Warren

What makes an object an art object? How does art reflect on the human condition? Why is there art rather than not, expression rather than silence, a gesture rather than stillness? A philosophical approach to art is primarily interested in clarifying the problem of aesthetic value, the special activities that produce art, and the claim to truth which finds expression through artistic creation. The aim of this course is to explore these questions, among others, by examining the positions of major philosophers and twentieth-century artists.

Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PHIL 204 Philosophy and Literature
Menkiti

NOT OFFERED IN 2006-07. This course considers the questions; what sort of object is the literary text and what are the ontological issues raised by acts of literary interpretation? It also examines the complex relationship between fiction and fact, and between fiction and morality. The treatment of commitment to self and others, of self-knowledge and self-identity, and of individual and social ideals will also be explored. We end the course by looking at poetry -- how it has meaning despite an inbuilt element of ambiguity and how it succeeds not only in shaping, but also healing the world.

Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 206 Normative Ethics
Bitner

Can philosophers help us to think about moral issues, such as what to do about poverty and hunger, or racism and sexism: what is the good life and how could we know that it is good? We shall look at the attempts of some contemporary
PHIL 207 Philosophy of Language
McGowan
This course will explore a variety of philosophical issues concerning language: the different ways in which spoken language functions and conveys information, the alleged difference between speech and action and how it relates to freedom of speech issues (e.g., pornography and hate speech), the general problem of how words get attached to their referents, and criticisms of traditional conceptions of meaning and reference.
Prerequisite: Open to first-year students who have taken one course in philosophy, and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition
Semester: Fall
Unit: 1.0

PHIL 211 Philosophy of Religion
Winkler
NOT OFFERED IN 2006-07. A philosophical examination of the nature and significance of religious belief and religious life. Topics include the nature of faith, the role of reason in religion, the ethical import of religious belief, and toleration and religious diversity.
Prerequisite: None
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 213 Social and Political Philosophy
DeCew
Introduction to major views in social and political philosophy, both historical and contemporary, as well as applications of these views to ethical problems facing policy-makers. We will be concerned with such questions as: What is the best form of government? What gives a government authority? How extensive should that authority be? How ought the state to treat individuals? What justifies state infringements of individual liberty? We will explore alternative accounts of justice, equality and liberty, and also examine alternative solutions to specific problems of social policy including capital punishment, affirmative action, and pornography and censorship.
Prerequisite: Open to first-year students who have taken one course in philosophy, and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PHIL 214 Foundations of Ethics
Piper
NOT OFFERED IN 2006-07. Can we all get along? In a multicultural society in which we share a common language but often differ in our basic values and cultural practices, is there anything on which we can all agree? If so, what are the ground rules for reasoned dialogue? For social cooperation? In order to formulate viable answers to these questions that provide real-life resolutions to our real-life conflicts, we will examine and critique the answers offered by the leading contemporary moral theorists, John Rawls and Jürgen Habermas.
Prerequisite: 106 or another course in ethical theory.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 215 Philosophy of Mind
Wearing
How are thoughts and sensations related to neurological processes? Could mental states be identical to brain states? What is free will? Could we have free will if we live in a determinist universe? After examining a variety of answers to these traditional questions in the philosophy of mind, we will expand our inquiry to include recent work in philosophy and cognitive science that examines the nature of consciousness, animal intelligence, and the role of emotion in thought and action.
Prerequisite: One course in philosophy, psychology, or cognitive science or permission of instructor.
Distribution: Epistemology and Cognition
Semester: Fall
Unit: 1.0

PHIL 216 Logic
McGowan, Bitzer
An introduction to formal logic. Students will learn a variety of formal methods—methods sensitive only to the form of the arguments, as opposed to their content—to determine whether the conclusions of the arguments follow from their premises. Discussion of the philosophical problems that arise in logic, and of the application of formal logic to problems in philosophy and other disciplines. Some consideration of issues in the philosophy of language.
Prerequisite: None
Distribution: Epistemology and Cognition
Semester: Fall, Spring
Unit: 1.0

PHIL 217 Philosophy of Science: Traditional and Feminist Perspectives
Staff
This course will survey various issues in the philosophy of science surrounding the debate over scientific realism. Issues include: What constitutes adequate evidence? Exactly what does accepting a scientific theory involve? Does science discover the sole objective way that the world is or does it partially construct the world around us? How do cultural attitudes (e.g., gender) affect scientific practice?
Prerequisite: Open to sophomores, juniors, and seniors.
Distribution: Epistemology and Cognition
Semester: Fall
Unit: 1.0

PHIL 221 History of Modern Philosophy
de Warren
A study of central themes in seventeenth- and eighteenth-century philosophy, concentrating on Descartes, Hume, and Kant. More limited readings of such figures as Spinoza, Locke, Ann Conway, Leibniz, and Berkeley. Among the topics: the relationship between mind and body; the limits of reason; determinism and freedom; the bearing of science on religion.
Prerequisite: Open to first-year students in their second semester and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Historical Studies
Semester: Spring
Unit: 1.0

PHIL 222 American Philosophy
Winkler
NOT OFFERED IN 2006-07. The development of American philosophy from colonial times to the present. Among the topics: Native American world-views; European justifications of colonization and conquest; the spiritualist metaphysics of Berkeley and Jonathan Edwards;
PHIL 224 Existentialism de Warren
This course will study basic themes in existentialism by focusing on the theoretical and theatrical works of key existentialist writers such as Jean-Paul Sartre, Simone de Beauvoir, Antonin Artaud, Samuel Beckett, Albert Camus, and Eugene Ionesco. In taking the human condition as its primary question, existentialism redifines the meaning of "human" as a philosophical reflection of "being" or "sensing" of the human condition, as well as the philosophical meaning of the concept of the self. Special emphasis will be placed on the themes of boredom, death, bad faith, anxiety, suffering, freedom, and inter-subjective relationships.
Prerequisite: One philosophy course or permission of instructor.
Distribution: Epistemology and Cognition or Historical Studies
Semester: Spring
Unit: 1.0

PHIL 225 Phenomenology and Hermeneutics de Warren
NOT OFFERED IN 2006-07. Phenomenology attempts to reclaim the richness of human experience for philosophical analysis. An important movement of twentieth-century philosophy, phenomenology represents an original approach to traditional philosophical questions based on the investigation of how "lived experience" animates the various ways in which the world is meaningful for human beings. As an introduction to the phenomenological movement, including the hermeneutic turn of phenomenological philosophy, this course will focus on the work of Husserl, Heidegger, Lévinas, and Merleau-Ponty.
Prerequisite: One philosophy course or permission of instructor.
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

PHIL 226 Human Nature in Three Medieval Philosophers Congleton
What is it to be a human being? This course will examine the responses of two twelfth-century writers — the Jewish thinker Moses ben Maimon (Maimonides) and the Islamic thinker Ibn Rushd (Averroes) — and a thirteenth-century Christian thinker who built on their work, Thomas Aquinas. Primary focus will be the question of whether each human being is essentially unique or simply an example of a species. Other questions will include whether the most educated people should control what texts and debates are available to the less educated, and what is involved in arguing that God is "transcendent." The course will begin with an introduction to central concepts of Plato and Aristotle used by these medieval thinkers. Also considered will be the "neo-Platonism" of Plotinus and that of Ficino, as found in his discussion of "Platonic love."
Prerequisite: Open to first-year students who have taken one course in philosophy or medieval studies and sophomores, juniors and seniors without prerequisite.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 230 Nineteenth-Century Philosophy de Warren
NOT OFFERED IN 2006-07. This course will study selected themes in nineteenth-century philosophy, Readings from Kant, Hegel, Marx, Kierkegaard, Schopenhauer, and Nietzsche will address central issues such as the status of reason, the irrational and the unconscious, modernization and the meaning of history, and the significance of religion and art for human existence. Other important figures of nineteenth-century thought such as Darwin, Comte, Mill, and Schleiermacher may also be addressed.
Prerequisite: One course in philosophy or permission of instructor.
Distribution: Epistemology and Cognition or Historical Studies
Semester: N/O
Unit: 1.0

PHIL 232 Vedanta Ethics and Epistemology Piper
NOT OFFERED IN 2006-07. Whereas Western ethics is dominated by the obsession with reconciling self-interest with altruism and passion with reason, the Vedanta ethics and epistemology of ancient India regards the distinction among them as the product of egocentric delusion and ignorance of the true nature of the self. Vedanta confidently prescribes very specific actions and personal practices as time-tested means for achieving insight into the true nature of the self and union with ultimate metaphysical reality. We will study the basic texts in order to evaluate ourselves, our practices, our values as products of an increasingly ubiquitous Western culture.
Prerequisite: Open to all students.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 233 Environmental Philosophy Staff
A study of conceptions of the natural world and our place in it, from the pre-Socratics and the Book of Genesis to the deep ecologists and ecofeminists of the present day. Readings in the history of philosophy (Aristotle, Descartes, Spinoza, Newton, Rousseau, and Hume, among others), in Emerson and Thoreau, and in contemporary nature writers and natural scientists. Discussion of ethical issues and of Third-World critiques of Western environmentalism.
Prerequisite: None
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 234 Philosophy of Yoga Piper
NOT OFFERED IN 2006-07. Yoga, one of the six orthodox systems of Indian philosophy, includes philosophies of ethics and action, mind and spirit, knowledge, love, and the body. The word "yoga" means union — of individual ego and ultimate reality. We will study classical texts and commentaries and evaluate yoga's applications to a global Westernized culture that fragments relationships, identity, bodies, minds, and spirit in zero-sum relations of competition, distrust, and mutual antagonism.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 249 Medical Ethics Menkiti
A philosophical examination of some central problems at the interface of medicine and ethics. Exploration of the social and ethical implications of current advances in biomedical research and technology. Topics discussed will include psychosurgery, gender surgery, genetic screening, amniocentesis, and euthanasia.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 300 Seminar in Modern Philosophy Winkler
NOT OFFERED IN 2006-07.
Prerequisite: 221
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

PHIL 302 Kant's Solution to Skepticism and Solipsism Piper
NOT OFFERED IN 2006-07. Kant thinks that we can't know what anything is really like, including us. We can only know appearances we construct. So it seems we're permanently trapped in subjective illusions and biases. But Kant also thinks we have objective knowledge and that he can prove it. How can he reconcile these seemingly contradictory claims? Kant's Critique of Pure Reason has set the agenda for nineteenth- and twentieth-century philosophy, and influenced psychology, physics, history, geography, political science, and law.
Prerequisite: 221
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

PHIL 303 Kant's Metaphysics Piper
NOT OFFERED IN 2006-07. Kant thinks human beings are free, rational, and autonomous; and therefore have moral responsibilities that are universally and cross-culturally valid. This is a controversial view that has influenced international conceptions of human rights, justice, legal liability, and personal convictions about freedom and self-determination. Its metaphysical justification begins in Kant's conception of freedom, reason, and the self in the Critique of Pure Reason, and extends all the way through to his normative moral theory in the late Metaphysics of Morals.
**PHIL 311 Plato**  
*Conjoined*  
Intensive reading of some of the middle and late Platonic dialogues. Alternates with 312.  
Prerequisite: 201 or permission of instructor.  
Distribution: Epistemology and Cognition  
Semester: Spring  
Unit: 1.0

**PHIL 312 Aristotle**  
*Chaplin*  
NOT OFFERED IN 2006-07. An inquiry into some of Aristotle's ethical ideas, including but not limited to, the notion of human flourishing as an ethical concept, virtue as an activity of the soul, why we sometimes act against our own best interests, the difference between justice and equity, and friendship as an ethical category.  
Some contemporary views of virtue ethics will also be discussed. Alternates with 311.  
Prerequisite: 201 or permission of instructor.  
Distribution: Epistemology and Cognition or Religion, Ethics and Moral Philosophy  
Semester: N/O  
Unit: 1.0

**PHIL 313 Seminar in Metaphysics**  
*McGowan*  
NOT OFFERED IN 2006-07.  
Prerequisite: Open to students who have taken two courses in philosophy.  
Distribution: Epistemology and Cognition  
Semester: N/O  
Unit: 1.0

**PHIL 323 Seminar. Continental Philosophy**  
*de Warren*  
**Topic for 2006-07: The Superior Fiend: Freedom and the Problem of Evil.** The presence of evil has never ceased to haunt the human condition. In the twentieth-century, the proliferation of evil and the poverty of our philosophical resources to grasp its significance moved Hannah Arendt to claim that, "the problem of evil will be the fundamental question of postwar intellectual life." Can philosophy speak to the problem of evil? The aim of this seminar is to explore various efforts to understand the nature of evil. What is the relationship between evil and human freedom? Does evil emerge from a weakness of the will, wickedness or ignorance? Can a person knowingly commit evil? Is there such a thing as the banality of evil? Against the backdrop of theodicy debates in the eighteenth-century, we will begin with Kant's *Religion Within the Bounds of Reason* and continue with readings from Schelling, Kierkegaard, Nietzsche and Freud. We will examine Arendt's controversial "banality of evil" thesis and other recent interpretations of evil in Hans Jonas, Emmanuel Levinas and Primo Levi.  
Prerequisite: One of the following: 106, 206, 211, 214, 221, 230, 249, 340, 341, 343 or permission of instructor.  
Distribution: Religion, Ethics and Moral Philosophy or Historical Studies  
Semester: Fall  
Unit: 1.0

**PHIL 326 Philosophy of Law**  
*DeCew*  
A systematic consideration of fundamental issues in the conception and practice of law such as the nature and function of law, the limits of law, the nature of judicial reasoning, and the relationship of law to morality. We will assess how alternative theories of law explain rights, duties, liability and responsibility. We will also focus on philosophical issues raised in court cases associated with liberty, privacy, justice, responsibility, causation and punishment. Readings include selections from legal theory and a variety of contemporary court decisions.  
Prerequisite: Open to juniors and seniors without prerequisite and to sophomores who have taken one course in philosophy.  
Distribution: Religion, Ethics, and Moral Philosophy  
Semester: Fall  
Unit: 1.0

**PHIL 340 Seminar. Contemporary Ethical Theory**  
*DeCew*  
**Topic for 2006-2007: Privacy.** We will first review the history of privacy protection in American tort and constitutional law and its current features. We will then analyze alternative philosophical characterizations of privacy, focusing on information, autonomy, property, access and intimacy. We will assess various reasons for valuing privacy, including assigning various versions of the feminist critique of privacy as a tool for shielding abuse. Throughout the course we will study landmark legal cases invoking privacy from the early 1900's to the present, and we will consider numerous applications of privacy to ethical issues including the legislation of morals, the morality of drug testing, privacy and information technologies, and the balance between privacy and public safety in an age of terrorism.  
Prerequisite: One course in philosophy, political theory or legal studies, or permission of the instructor.  
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis  
Semester: Spring  
Unit: 1.0

**PHIL 345 Seminar. Advanced Topics in Philosophy of Psychology and Social Science**  
*Weng*  
**Topic for 2006-07: Language and Thought.** This seminar will investigate three ways in which language and thought might be related. (1) The 'language of thought' hypothesis, that thought itself may take place in a language. (2) The Sapir-Whorf hypothesis, that speaking a particular language, be it Chinese, Hungarian, or Swahili, affects how you perceive and think about the world. (3) The hypothesis that language 'sets us apart' from other creatures by making possible thoughts that could not be entertained unless we spoke a language. We will examine arguments and evidence for and against each of these proposals, with an goal of understanding the role(s) of language in our mental lives.  
Prerequisite: Any of PHIL 103, 207, 208, 215, 216, 217, PSYC 216, CS 232, LING 114, CLS/C 300, or permission of the instructor.  
Distribution: Epistemology and Cognition  
Semester: Spring  
Unit: 1.0

**PHIL 349 Seminar. Speech Acts**  
*McGowan*  
This seminar will survey various philosophical issues and applications of speech act theory. Particular attention will be paid to utterances that enact facts about what is permissible for others, the role of authority in this, and indirect speech acts. Recent applications of speech act theory to free speech (e.g. hate speech and pornography) will also be discussed.  
Prerequisite: 207 or permission of instructor.  
Distribution: Epistemology and Cognition  
Semester: Fall  
Unit: 1.0

**PHIL 350 Research or Individual Study**  
Prerequisite: Open to juniors and seniors by permission.  
Distribution: None  
Semester: Fall, Spring  
Unit: 1.0

**PHIL 350H Research or Individual Study**  
Prerequisite: Open to juniors and seniors by permission.  
Distribution: None  
Semester: Fall, Spring  
Unit: 0.5

**PHIL 360 Senior Thesis Research**  
Prerequisite: 360 and permission of department.  
Distribution: None  
Semester: Fall, Spring  
Unit: 1.0

**PHIL 370 Senior Thesis**  
Prerequisite: 360 and permission of department.  
Distribution: None  
Semester: Fall, Spring  
Unit: 1.0

**Related Courses**

*For Credit Toward the Major*

**EDUC 102/WRIT 125 Education in Philosophical Perspective**

**Directions for Election**

The philosophy department divides its courses and seminars into three subfields: (A) the history of philosophy: 201, 220, 222, 223, 224, 225, 226, 230, 300, 302, 311, 312, 319, 323 (when the topic is appropriate); 349 (when the topic is appropriate); (B) value theory: 106, 202, 203, 204, 206, 208, 210, 211, 213, 214, 227, 232, 233, 234, 249, 303, 312 (when the topic is appropriate), 323 (when the topic is appropriate), 326, 332), 340, 349 (when the topic is appropriate); (C) metaphysics and theory of knowledge: 103, 202, 207, 209, 211, 215, 216, 217, 218, 232, 233, 234, 300, 302, 304, 313, 314, 323 (when the topic is appropriate), 327, 345, 349 (when the topic is appropriate).

The major in philosophy consists of at least nine units. PHIL 201 and 221 are required of all majors. In order to assure that all majors are familiar with the breadth of the field, every major must take two units in each of subfields B and C. Majors are strongly encouraged to take a third unit in subfield A. Students planning graduate work in philosophy should take PHIL 216 and acquire a reading knowledge of Latin, Greek, French, or German. In order to assure that students have acquired some depth in philosophy, the department requires that each major complete at least two 300-level units; these units must be in different subfields of philosophy.

The minor in philosophy consists of five units. No more than one of these units may be at the 100 level; PHIL 201 or 221 is required of all minors; at least one of the five units must be at the 300 level.

**Honors**

The department offers the following options for earning honors in the major field: (1) writing a thesis or a set of related essays and passing an oral examination; (2) a program designed particularly for students who have a general competence and who wish to improve their grasp of their major field by independent study in various sectors of the field. To be admitted to the...
thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Option (2) involves selecting at least two related areas and one special topic for independent study. When the student is ready, she will take written examinations in her two areas and, at the end of the second term, an oral examination focusing on her special topic. See Academic Distinctions.

Exchange

The department participates in exchange programs with Brandeis and MIT. Both schools have excellent philosophy departments, and students are encouraged to consult the respective catalogs for offerings.

Department of Physical Education and Athletics

Professor: TBD (Chair/Athletic Director), Batchelder
Associate Professor: Bauman, Dix, Hagerstrom, Webb
Assistant Professor: Bergofsky, Bruce, Franek, O’Meara, Spillane
Instructor: Babington, Cameron, Chin, Chirico, Colby, Cox, Gifford, Hayden-Bukert, Jacobs, Kalilouby, Kerr, Living, McInerney, Magill, Motley, Owen, Pujol-Jeisen, Rahko, Sieck, Spencer, Tevans, Ulissey, Weaver, Wilson

PE 121 (Fall and Spring) Physical Education Activities and Athletics Requirements

Physical Education and Athletics Requirement
To complete the College degree requirement in physical education and athletics, a student must earn eight credit points. Students are strongly urged to earn the eight credit points by the end of the sophomore year. These credit points do not count as academic units toward the degree, but are required for graduation. There are no exceptions for the degree requirement in physical education and athletics.

Directions for Election

The requirement can be completed through:
1. completion of sufficient number of physical education instructional classes to earn eight credits; or
2. sufficient length of participation in one or more of Wellesley’s 12 varsity athletic teams to earn eight credits; or
3. a combination of sufficient completion of instructional classes and participation on varsity athletic teams to earn eight credits, including credits earned at other colleges.

Students can receive partial credit towards the eight credit points through:
Independent pursuit either on or off campus (max. four points). Students must satisfactorily complete this preapproved independent study as specified in the physical education and athletics curriculum handbook.
Sufficient length of participation in Wellesley’s physical activity clubs (max. two points). Students must satisfactorily complete this preapproved participation as specified in the physical education and athletics curriculum handbook.

Transfer students will be given partial credit toward the physical education requirement dependent upon year and semester of admission. Usually, students admitted in the sophomore year will be expected to complete four credit points at Wellesley. Students admitted in the junior year or as a Davis Scholar will be considered as having completed the degree requirement.

A student’s choice of activity is subject to the approval of the physical education and athletics department and the College health services. If a student has a temporary or permanent medical restriction, she, the physical education and athletics department and the College health services will arrange an activity program to serve her individual needs.

No student is exempt from the physical education and athletics requirement.

Students may take a specific physical education activity only once for credit. Students may continue to enroll in physical education instructional classes after the PE 121 requirement is completed provided space is available in the class.

A. Physical Education Instructional Classes
The instructional program in physical education is divided into four terms, two each semester. Some physical education activity classes are scheduled for a term (six weeks) and give two credit points toward completing the requirement. Other physical education activity classes are offered for a semester (12 weeks) and count four credit points toward completing the requirement. All classes are graded on a credit-no credit basis.

CR - Credit for course completed satisfactorily.
NC - No credit for course not completed satisfactorily. Inadequate familiarity with the content of the course or excessive absence may result in an NC grade.
INC - Incomplete is assigned to a student who has completed the course with the exception of a test or assignment which was missed near the end of the course because of reasons not willfully negligent.

Activity classes scheduled for a semester (12 weeks):
Both Semesters: African Dance, Jazz, Badminton, Self-defense, Yoga, Strength Training, Tai-chi, Elementary Tennis, Squash, Pilates, Fusion Fitness
First Semester only: Ballet, Modern Dance, Archery, Raquetball, Latino Salsa Dance, Indian Dance-Kathak Style, Kung Fu
Second Semester only: Golf, Latino Combination Dances, Intermediate Tennis

Activity classes scheduled for a term (six weeks):
Activity Aerobics Term
Aerobics 1, 2, 3, 4
CPR/First Aid Wintersession
Fencing 3
Golf 2, 3
Horseback Riding 1, 4
Sailing 1, 2, 3, 4
Swim – Elementary 1
Swim – Stroke Development Winter
Skiing Downhill/Snowboarding 2
Table Tennis 3

B. Athletics Teams

The intercollegiate program offers 12 sports through which a student may earn credit points towards the completion of the degree requirement. The athletics program is divided into three seasons: fall, winter, and spring with several sports offered each season.

Athletic Team Basketball Season
Basketball Winter
Crew (varsity and novice) Fall, Spring
Cross-country Running Fall
Fencing Winter
Field Hockey Fall
Golf Fall/Spring
Lacrosse Spring
Soccer Fall
Softball Spring
Department of Physics

Professor: Ducas, Berg\textsuperscript{A}, Stark
Associate Professor: Quiers, Hu (Chair)
Assistant Professor: Lamert, Goldman\textsuperscript{A}
Senior Instructor in Physics Laboratory: Bauer, Wardell
Instructor in Physics Laboratory: Caplan

Most courses meet three times weekly. If indicated, there is an additional three hour laboratory session weekly.

PHYS 101 Einstein’s Century: Physics in the Last 100 Years
Stark
In 1905, Albert Einstein published three seminal papers in the history of modern science, introducing the theory of special relativity, launching the field of quantum mechanics, and helping establish the atomic nature of matter. We will use Einstein’s contributions as a springboard for an introductory exploration of the nature of light, matter, space, and time. PHYS 101 is designed for the student who may not have a strong science background but would like an introduction to the major themes of physics in the last one hundred years. In addition to lectures and demonstrations we will have readings that draw from the biographical and historical contexts in which these ideas developed. We will make use of basic high school algebra, and some trigonometry, in our work. Not to be counted toward minimum major or to fulfill entrance requirement for medical school.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.0

PHYS 103 The Physics of Marine Mammals with Laboratory
NOT OFFERED IN 2006-07. Sperm whales can swim thousands of feet, stay submerged for over an hour, and resurface rapidly; no other mammal can do that or survive. Many marine mammals thrive in arctic waters, sense the world around them using sound, and move with phenomenal efficiency. In this course we will learn the physics underlying the remarkable abilities of these aquatic mammals. Marine mammal characteristics and the associated scientific topics include: diving and swimming (ideal gas law, fluids, and forces); metabolism (energy, thermodynamics, and scaling); and senses (waves, acoustics, and optics). This course represents a naturally interdisciplinary approach in connecting biology, chemistry and engineering principles to the physics we will study as we learn about these animals. The course also emphasizes the development of modeling and problem-solving techniques. Whale watch. Not to be counted toward the minimum major or to fulfill entrance requirement for medical school.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: N/O
Unit: 1.0

PHYS 104 Fundamentals of Mechanics with Laboratory
Hu, Quiers
This course is a systematic introduction to Newtonian mechanics, which governs the motion of objects ranging from biological cells to galaxies. Primary concepts such as mass, force, energy, and momentum are introduced and discussed in depth. We will place emphasis on the conceptual framework and on using fundamental principles to analyze the everyday world. Topics include: Newton’s Laws, conservation of energy, conservation of momentum, rotations, waves, and fluids. Concepts from calculus will be developed and used as needed. Laboratories introduce experimental approaches to these topics. Students with a strong background in math or previous experience in physics should consider PHYS 107. May not be taken in addition to 107. Not to be counted toward the minimum major.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement; Corequisite: calculus at the level of MATH 115.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring
Unit: 1.25

PHYS 106 Fundamentals of Electricity, Magnetism, and Optics with Laboratory
Stark (Fall), Staff (Spring)
This second semester of classical physics concentrates on the fundamental forces of electricity and magnetism. The electric and magnetic forces are entirely responsible for the structures and interactions of atoms and molecules, the properties of all solids, and the structure and function of biological material. Our technologically oriented society is largely dependent on the myriad applications of the physics of electricity and magnetism, e.g., motors and generators, communications systems, and the architecture of computers. After developing quantitative descriptions of electricity and magnetism, we explore the relations between them, leading us to an understanding of light as an electromagnetic phenomenon. The course will consider both ray optics and wave-optics descriptions of light. Laboratory exercises will emphasize electrical circuits, electronic measuring instruments, optics, and optical experiments. PHYS 106 does not normally satisfy the prerequisites for 202 or 203 and does not count toward the minimum major.

Prerequisite: 104 and calculus at the level of MATH 115.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring
Unit: 1.25

PHYS 106X Fundamentals of Electricity, Magnetism, and Optics with Laboratory
Stark
See PHYS 106 for a description of the topics in this course. Students who have completed PHYS 107 and the equivalent of MATH 115 may enroll for 106X in the fall of 2006. 106X and 106 will share common lectures and laboratories. Credit for 106X may be received through alternative assignments and exams which will be at a somewhat more advanced level than the corresponding course work in 106. PHYS 106X does satisfy the prerequisites for 202 or 203 and does count toward the minimum major.

142 Physics
Prerequisite: PHYS 107, MATH 166 or equivalent, or permission of instructor. Not open to students who have taken 108.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.25

PHYS 108 Principles and Applications of Electricity, Magnetism, and Optics with Laboratory
Stark
The electromagnetic force, one of the fundamental interactions in nature, is responsible for a remarkably wide range of phenomena and technologies, from the structures of atoms and molecules to the transmission of nerve impulses and the characteristics of integrated circuits. This introductory course begins with the study of Coulomb’s Law of electrostatics and progresses through investigations of electric fields, electric potential energy, magnetic fields, and Faraday’s Law of magnetic induction. The course culminates in the study of light, where the deep connections between electricity and magnetism are highlighted. Geometrical optics and an introduction to interference effects caused by the electromagnetic wave nature of light are covered. Laboratories, a central part of the course, provide students with hands-on experiences with electronics and electronic and optical instruments.
Prerequisite: 107 (or 104 and permission of instructor), and MATH 116 or 120. Not open to students who have taken 106X.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Spring
Unit: 1.25

PHYS 115/CS 115 Robotic Design Studio (Winter Session)
Turakh and Anderson (Computer Science)
In this intensive course, students are introduced to engineering principles while designing and assembling robots out of LEGO® parts, sensors, motors, and tiny computers. Fundamental robotics skills are learned in the context of studying and modifying a simple robot known as Sclborg. Then, working in small teams, students design and build their own robots for display at a robot exhibition. These projects tie together aspects of a surprisingly wide range of disciplines, including computer science, physics, math, biology, psychology, engineering, and art. Students may register for either PHYS 115 or CS 115 and credit will be granted accordingly. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: None
Distribution: Natural and Physical Science
Semester: Winter Session
Unit: 0.5

PHYS 201/MATH 215 Mathematics for the Sciences I
Shuttle (Mathematics)
This course is the first in a two-course sequence tailored to the needs and preparations of students considering majors in the sciences. It presents techniques of applied mathematics relevant to a broad range of scientific studies, from the life sciences to physics and astronomy. The topics of study include complex numbers, ordinary differential equations, an introduction to partial differential equations, linear algebra (matrices, systems of linear equations, vector spaces, eigenvalue problems), and Fourier series. The course emphasizes mathematical techniques and presents applications from all the sciences. Some familiarity with vectors (e.g., dot products) is assumed. Students may register for either PHYS 201 or MATH 215 and credit will be granted accordingly.
Prerequisite: MATH 116 or 120 or the equivalent.
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

PHYS 216/MATH 216 Mathematics for the Sciences II
Hu
When laws of nature are written in advanced mathematical forms, gradient, divergence, and curl are frequently encountered. In this course, we study these mathematical operations in the broader context of differential and integral vector calculus, with an emphasis on their physical meanings. Fourier transform and partial differential equations, which are used throughout the physical sciences, are also discussed. The course ends with an introduction to numerical methods, which is widely used in modern scientific and engineering fields when analytical solutions to algebraic or differential equations do not exist. We use MATLAB®, a popular high-level programming language. Part of the course is similar to MATH 205, but topics closely related to physics – Gauss’ and Stokes’ theorems, spherical and cylindrical coordinates – is discussed in depth. Students may register for either PHYS 216 or MATH 216 and credit will be granted accordingly.
Prerequisite: PHYS 215/MATH 215
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

PHYS 219 The Art of Electronics
NOT OFFERED IN 2006-07. We are increasingly surrounded in our lives by boxes filled with electronics, but for most people (including many scientists) the inner workings of these boxes remain obscure and mysterious. This course is intended to remove much of this mystery. The approach is practical, aimed at allowing experimental scientists to understand the electronics encountered in their research. The emphasis is on designing and building circuits. Topics include diodes, transistor amplifiers, op amps, and digital electronics including microprocessors and microcontrollers. Applications to robotics will be explored. Two laboratories per week and no formal lectures.
Prerequisite: 106 or 108 or permission of instructor.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: N/O
Unit: 1.25

PHYS 222 Medical Physics
NOT OFFERED IN 2006-07. This course covers applications of physics to two important areas of medical science: the mechanisms of the human body and the design of modern diagnostic and treatment techniques. We will use principles of physics from mechanics, fluids, electricity and magnetism, thermodynamics, acoustics and optics to model aspects of human structural design and performance such as respiration, circulation, muscle and nerve operation, heat regulation, hearing and vision. We will also study the principles underlying modern medical technology such as ultrasound imaging, computer aided
tomography (CT scans), magnetic resonance imaging (MRI), positron emission tomography (PET scans) and applications of lasers in diagnostics and surgery.

Prerequisite: 106 or 108. Mathematics at the level of MATH 115 or higher, or by permission of the instructor.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: N/O
Unit: 1.0

PHYS 250 Individual Study
Prerequisite: Open by permission to students who have taken 107.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PHYS 250H Individual Study
Prerequisite: Open by permission to students who have taken 107.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

PHYS 265 Thinking Physics: Developing a Physicist's Habits of Mind
NOT OFFERED IN 2006-07. This seminar will emphasize the development of a repertoire of critical skills necessary for understanding and doing physics. These skills include conceptual problem-solving, making connections across fields, testing mathematical models, asking and answering analytical questions and making effective presentations of results.
Corequisite: 202
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: N/O
Unit: 1.0

PHYS 302 Quantum Mechanics
Quivers
This course provides a comprehensive development of the principles of non-relativistic quantum mechanics, the fundamental theory of electrons, atoms, and molecules. Quantum mechanics governs the building blocks of all matter, and yet fundamentally challenges our physical intuition, which is based on the behavior of everyday macroscopic objects. Topics include the postulates of quantum mechanics, the Schrödinger equation, operator theory, the Heisenberg uncertainty principle, the hydrogen atom, and spin.
Prerequisite: 202, 203, and MATH 216/PHYS 216.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.0

PHYS 305 Statistical Mechanics and Thermodynamics
Stark
Modern statistical mechanics builds from the quantum nature of individual particles to describe the behavior of large and small systems of such particles. In this course we will derive the fundamental laws of thermodynamics using basic principles of statistics and investigate applications to such systems as ideal and real atomic and molecular gases, radiating bodies, magnetic spins, and solids. We will study Bose-Einstein and Fermi-Dirac statistics and learn about exciting new developments such as Bose-Einstein condensation and ultra cold Fermi gases. We will cover additional applications of statistical mechanics in the fields of biology, chemistry, and astrophysics.
Prerequisite: 202 and MATH 216/PHYS 216.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Spring
Unit: 1.0

PHYS 306 Advanced Classical Mechanics
Lannert
The basic laws of Newtonian mechanics are revisited in this course using advanced mathematical tools such as differential equations and linear algebra. Special attention is paid to central forces, planetary orbits, oscillations, and rigid body dynamics. In addition, Hamilton-Lagrange mechanics, an alternative to Newtonian mechanics, nonlinear dynamics, and chaos are introduced.
Prerequisite: 203 and MATH 216/PHYS 216.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall
Unit: 1.0

PHYS 314 Electromagnetic Theory
Lannert
Richard Feynman once said, "From a long view of the history of mankind – seen from, say, ten thousand years from now – there can be little doubt that the most significant event of the nineteenth century will be judged as Maxwell's discovery of the laws of electrodynamics. The American Civil War will pale into provincial insignificance in comparison with this important scientific event of the same decade." In this course we will study the classical theory of electromagnetic fields and waves as developed by Maxwell. Topics include boundary value problems, electromagnetic radiation and its interaction with matter, and the connection between electrodynamics and relativity.
Prerequisite: 108, 306, and MATH 216/PHYS 216.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Spring
Unit: 1.0

PHYS 335/BISC 335/NEUR 335 Computational Neuroscience with Laboratory
NOT OFFERED IN 2006-07. Computations by networks of neurons in the brain underlie all of our thoughts, perceptions, and memories. However, direct experimental observation of neural computations is extremely difficult. Mathematical models are increasingly used to bridge the gap between experimental measurements and hypothesized network functions. This course will focus on the use of mathematical models to describe computations performed in the nervous systems of a variety of animals. Topics will range from single neuron biophysics to the analysis of circuits thought to underlie sensory perception and memory. Each topic will be introduced by background lectures, followed by student-led presentations of primary literature and construction of a computer model of the system studied. Lab will introduce students to computer programming of mathematical models in MATLAB® and the neuron-simulator NEURON. Students may register for either PHYS 335, BISC 335, or NEUR 335 and credit will be granted accordingly.
Prerequisite: 104/107 and either 106/106X/108 or NEUR/BISC 213; or permission of instructor. No programming experience is required. Not open to first-year students.
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: N/O
Unit: 1.25

PHYS 349 Applications of Quantum Mechanics
Quivers
Quantum mechanical techniques such as perturbation theory and the numerical solutions to the Schrödinger equation will be developed. Applications to problems in atomic, molecular, and condensed matter physics will be studied both theoretically and experimentally. Two lectures and one laboratory per week.
Prerequisite: 302 or CHEM 333
Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Spring
Unit: 1.25

PHYS 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PHYS 350H Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

PHYS 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PHYS 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ASTR 110W Fundamentals of Astronomy with Laboratory
ASTR 311 Elements of Astrophysics
ASTR 315 Seminar. Topics in Astrophysics
EXTD 160 Introduction to Engineering Science

Directions for Election

A major in physics should ordinarily include: 107, 108, 202, 302, 305, 306, and 314. MATH 216/PHYS 216 is an additional requirement. 219 and 349 are strongly recommended. One unit of another laboratory science is recommended.

A minor in physics (six units) should ordinarily include: 104 or 107, 108, 202, 302, 303 and one other unit at the 300 level (350 cannot be counted as the other 300-level unit). MATH 216/PHYS 216 is also required.

All students who wish to consider a major in physics or a related field are urged to complete the introductory sequence (107 and 108) as soon as possible, preferably in the first year. A strong mathematics background is necessary for advanced courses. It is suggested that students complete MATH 315 and 116 or 120 in their first year and the MATH 215/PHYS 215 and 216 sequence no later than their second year. All students majoring in physics are urged to develop proficiency in the use of one or more computer languages.
Department of Political Science

Visiting Assistant Professor: Arreguin-Toft, Candrev
Senior Lecturer: Waterspring

Introductory Courses

**POL 100 Introduction to Political Science**
Staff
Politics is a struggle for power – and questions about power are at the heart of political science. How is power gained? How is it lost? How is it organized? How is it used? How is it abused? This course introduces students to the concepts and methods of political scientists and to the major subfields of the discipline: American politics, comparative politics, international relations, and political theory. The course is centered on several major books in the field, some describing important political events, such as the rise of the Nazi party in Germany and the collapse of apartheid in South Africa, and some illustrating how political scientists analyze and evaluate the world of politics.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

**POL 199 Introduction to Research Methods in Political Science**
Han
An introduction to the collection, analysis, interpretation, and presentation of data. Using examples drawn from the subfields of political science, the course provides the skills needed to understand, interpret, and critically assess empirical data presented by the news media and in academic journals. Topics include research design, hypothesis-building, measurement, data gathering, hypothesis-testing and a wide range of methods appropriate for analyzing and interpreting data. The course provides a solid foundation for conducting empirical analysis and is strongly recommended for students interested in independent research, particularly the senior honors thesis.
Prerequisite: Two courses in political science. Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking MATH 101, MATH 101Z, ECON 103/SOC 190, Q 180 (OR 199), or PSVC 205.
Distribution: Social and Behavioral Analysis. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Spring
Unit: 1.25

American Politics and Law

**POL 200 American Politics**
Burke, Han, Scherer
The institutions, processes, and values that shape American politics. The origins and evolution of the U.S. Constitution, and the institutions it created: Congress, the executive branch, the presidency, the federal court system and federalism. Analysis of intermediary institutions including political parties, interest groups, elections, and the media. Study of enduring debates over values in American politics, with particular attention to conflicts over civil rights and civil liberties.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

**POL 210 Political Participation and Influence**
Just
NOT OFFERED IN 2006-07. How do citizens express their interests, concerns, and preferences in politics? Why and how do some groups achieve political influence? Why are some issues taken up and others ignored? The roles played by public opinion polls, interest groups, political parties, PACs, elections, the mass media, protests, riots, and demonstrations in articulating citizen concerns to government. Special attention to problems of money in politics, low voter participation, and inequality of race, class, and gender. Course work includes reading, discussion, and direct political participation in an interest group or election campaign.
Prerequisite: One unit in political science.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

**POL 212 Urban Politics**
Rich
Introduction to contemporary urban politics. Study of policy-making and political leadership in the areas of public education, city bureaucracies, housing, welfare, fiscal management, and economic redevelopment. Consideration of population shifts, racial and ethnic conflicts, and the impact of federal policy on urban planning.
Prerequisite: One unit in political science, economics, or American studies.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**POL 213 Washington Decision-Making**
Schechter
Intensive Winter session course on American politics. Analysis of the political process based on readings and discussions of contemporary political and legal issues and interaction with members of Congress, congressional staff, executive department officials, activists in nonprofit organizations, Supreme Court law clerks, political campaign professionals, and reporters. This course will meet for the first week of Winter session in Wellesley and then will move to Washington for two weeks of briefings, seminar, and policy research. Mandatory credit/No Credit. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: Permission of instructor required. Enrollment limited to juniors and seniors. One unit in American politics or law strongly recommended. Interested students must fill out a course application available in the political science office.
Distribution: Social and Behavioral Analysis
Semester: Winter session
Unit: 0.5

**POL 215 Courts, Law, and Politics**
Burke, Schechter
Fundamentals of the American legal system, including the sources of law, the nature of legal process, the role of courts and judges, and legal reasoning and advocacy. Examination of the interaction of law and politics, and the role and limits of law as an agent for social change.
POL 311 The Supreme Court in American Politics
Scherer
Analysis of major developments in constitutional interpretation, the conflict over judicial activism, and current problems facing the Supreme Court. Emphasis will be placed on judicial review, the powers of the president and of Congress, federal-state relations, and individual rights and liberties.
Prerequisite: 215 or one other unit in American legal studies, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL 313 American Presidential Politics
Rich
Analysis of the central role of the president in American politics and the development and operation of the institutions of the modern presidency. The course will focus on sources of presidential power and limitations on the chief executive, with particular emphasis on relations with the other branches of government and the making of domestic and foreign policy.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL 314 Congress and the Legislative Process
Han
NOT OFFERED IN 2006-07. Analysis of the representative and lawmaking capabilities of the contemporary United States Congress. Examination of how candidates for Congress run for office, with an emphasis on the use of the mass media and campaign finance. Exploration of the roles of Congress members as representatives and lawmakers; the structures and dynamics of legislator-constituent relations; the influence of the public, political parties and interest groups in the policymaking process; the institutional arrangements of Congress and its relations with other branches of government. Discussion about how internal and external opportunities and constraints affect the public policy-making process of the Congress.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL 315 Public Policy and Analysis
Rich
The first part of the course will examine how domestic public policy is formulated, decided, implemented, and evaluated, at both the federal and local levels. Both moral and political standards for making policy will be examined. Factors that promote or impede the development and realization of rational, effective, and responsive public policy will be reviewed. The second part of the course will be devoted to student research and presentations on selected policy topics, including public schools, public transportation, homelessness, the environment, and drug enforcement.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL 316 Mass Media in American Democracy
Just
Focus on the mass media in the American democratic process, including the effect of the news media on the information, opinions, and beliefs of the public, the electoral strategy of candidates, and the decisions of public officials. Discussion of news values, journalists' norms and behaviors, and the production of print and broadcast news. Evaluation of news sources, priorities, bias, and accessibility. Attention to coverage of national and international affairs, as well as issues of race and gender. Questions of press freedom and journalistic ethics are explored.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL 317 Health Politics and Policy
Burke
NOT OFFERED IN 2006-07. The American system of health care is distinctive. Financing is provided through voluntary employer contributions, tax subsidies, individual payments and an array of public programs, principally Medicare and Medicaid - but despite the variety of funding sources, Americans, unlike citizens of other affluent democracies, are not guaranteed health care coverage. How did the American approach to health care develop? How is it different from that of other affluent nations? What explains the differences? What are the strengths and weaknesses of the American health care system? Issues of cost containment, technological innovation, quality of care, and disparities in health outcomes are explored.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL 318 Religion and Politics in Contemporary America
NOT OFFERED IN 2006-07. This course examines the relationship between religion and politics. From the founding of the United States to President Bush's faith-based initiative, the role of religion in American political behavior has been the subject of great debate. Special attention will be paid to how religion serves as a form of political socialization, often informing political participation, voting behavior and political attitudes. Relevant policy and legal decisions will be reviewed. First Amendment topics such as the separation between church and state, religious freedom and the Establishment Clause will also be addressed.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL 319S Seminar. Campaigns and Elections
Just
Exploration of the issues in campaigns and elections: Who runs and why? Do elections matter? The impact of party decline and the rise of campaign consultants, polls, advertising, and the press. Candidate strategies and what they tell us about the political process. How voters decide. The "meaning" of elections. Attention to the rules of the game (the primaries, debates, the Electoral College), recent campaign innovations (talk shows, town meetings, infomercials), third party candidacies, and prospects for political reform. Course work includes campaign participation.
Prerequisite: 200 or 210 or by permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL 320S Seminar. Inequality and the Law
Burke
NOT OFFERED IN 2006-07. Analysis of statutory and Constitutional law regarding inequalities based on gender, race, class, sexual orientation, and disability, and the effect of this law on society. Do anti-discrimination laws reduce social inequality? To what extent have the legal rights won by groups such as African Americans, women, and disabled people been translated into social practices? Focus on the equal protection and due process clauses of the Fourteenth Amendment, statutes such as the 1964 Civil Rights Act and the Americans with Disabilities Act, and recent Supreme Court decisions. Examination of the role of law and litigation in public policies regarding affirmative action, school desegregation, employment discrimination, housing, and welfare.
Prerequisite: 215, 311, or another unit in American legal studies and permission of instructor. Not open to students who have taken 320S.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL 324S Seminar. Gender and Law
Scherrer
Analysis of how law in the United States is used to confer rights, create obligations and define the identities of women. The course explores the historical and modern approaches used by the Supreme Court to address gender disparity in society, including labor law, reproductive rights, family law, and discrimination in the workplace and in the political arena. The course also analyzes the relationship between the feminist movement, social policy-making, and the Supreme Court. The last part of the class will examine whether the gender of legal actors (litigants, lawyers, judges) makes a difference in their reasoning or decision-making.
Prerequisite: 215 and by permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL 330S Seminar. African Americans and the U.S. Political System
NOT OFFERED IN 2006-07. This course examines the nature of political ideology, public opinion, and political participation within the African American community. In addition to these topics, current developments in electoral politics, public policy, political representation, government responsiveness, and coalition-building will also be examined. Various theoretical approaches to the study of participation and identity - such as rational choice and political psychology - will be applied. Exploration of these behavioral and policy-related topics will provide a broader perspective on the current and future political strategies of African Americans in contemporary politics, and more broadly, the future of democracy and pluralism and the United States.
POL 333S Seminar, Political Organizing: People, Power and Change

Hon

Fullfilling the democratic promise of equity, inclusion and accountability requires an “organized” citizenry with the power to articulate and assert its interests effectively. Organizing is about identifying, recruiting, and developing leadership; building community around leadership; and building power from community. Students will engage with social, economic, and political problems as participants in political organizing by mapping power interests, developing leadership, building relationships, motivating participation, devising strategy, and mobilizing resources to create organizations and promote political change. Community, electoral, union, and social movement organizing will be explored.

Prerequisite: 200 or equivalent; permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: Fall

Unit: 1.0

POL 333S Seminar, Ethics and Politics

Just

NOT OFFERED IN 2006-07. An exploration of ethical issues in politics, public policy, and the press. Critical questions include: Just what are ethics? What is the basis of ethical beliefs? What are our ethical responsibilities? What are ethical implications of the modern world? What are the ethical implications of modern social institutions? What are the ethical implications of modern technology?

Prerequisite: One 200 level unit in American politics.

Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

POL 334S Seminar, Disability in American Society: Politics, Policy, and Law

Burke

The preamble of the Americans with Disabilities Act declares that 13 million Americans are disabled, but some believe the number is a ridiculous overestimate while others consider it a vast understatement. What exactly is "disability"? How is this concept used in American public policy and law? What is life like for Americans with disabilities? This seminar examines the politics of disability in the United States, paying particular attention to the perspectives of people with disabilities and to the history of the disability rights movement.

Prerequisite: Open to juniors and seniors by permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: Spring

Unit: 1.0

POL 335S Seminar, The First Amendment

Burke

NOT OFFERED IN 2006-07. A study of some of the classic legal cases and continuing controversies that have arisen out of the First Amendment to the U.S. Constitution. Examination of contemporary First Amendment issues such as flag burning, hate speech, pornography, libel, invasion of privacy, school prayer, creationism, and government aid to religious institutions. Comparisons with the legal doctrines of other nations regarding freedom of speech and religion.

Prerequisite: 215, 311, or another unit in American legal studies and permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

POL 336S Seminar, Judicial Politics

NOT OFFERED IN 2006-07. An examination of judges as political actors in a democratic system, with a focus on judicial selection, judicial behavior, and theories of judicial appointment. Comparison of popular election of judges with political appointment; consideration of recent issues such as campaign contributions to judicial candidates and the role of interest groups in the confirmation process. Analysis of various theories of judicial behavior, such as attitudinal, strategic, psychological and institutional approaches, as explanations of judicial decision-making. Study of interpretive theories in constitutional and statutory lawmaking as a means of discussing the appropriate role of judges in the broader democratic policymaking process.

Prerequisite: 215, 311, or another unit in American legal studies and permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

POL 337S Seminar, The Politics of Minority Groups in the United States

Rich

NOT OFFERED IN 2006-07. An examination of office-holding, voting patterns, coalition formation, and political activities among various racial, ethnic, and religious minority groups in the United States, including Black Americans, Mexican Americans, Native Americans, Puerto Ricans, Jews, Arabs, Asians, Central and South Americans.

Prerequisite: Open to juniors and seniors by permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

POL 338S Seminar, Representation

NOT OFFERED IN 2006-07. Analysis of the theory and practice of political representation. Examination of what constitutes "good" representation, how much control the people have over their elected leaders and the public policymaking process, and what factors (i.e., public opinion, political parties, interest groups, the media, the common good, etc.) influence legislators’ policy and legislative decisions. Exploration of how the possibilities for making our representative institutions more participatory are related to our notions of human nature, citizenship, and community.

Prerequisite: Open to juniors and seniors by permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

POL 339S/EDUC 339 Seminar, The Politics of Urban Public Schools

Rich

This seminar examines recurrent issues in public school management and governance. Critical questions include the changing demographics of inner city schools, the evolving role of school boards, big city mayors, urban superintendents, teachers unions, and school finance. We will also discuss alternatives to public schools (parochial, private, and charter schools), high-stakes testing, and district-state relations. The seminar will also analyze the increasing intervention of state and federal governments in local school administration and the role of the courts in curriculum controversies, student life, and security. Students may register for either POLI 339S or EDUC 339 and credit will be granted accordingly.

Prerequisite: One unit in political science or education.

Distribution: Social and Behavioral Analysis

Semester: Spring

Unit: 1.0

Comparative Politics

POL 202 Comparative Politics

Krieger, Wasserspring, Camdall

A comparative study of contemporary politics and political systems and the exploration of various approaches to comparative political analysis. Emphasis on the interactive effects of global forces and domestic politics. Issues to be discussed include authoritarianism, revolutions, nationalism, social movements, and political culture. Country studies will be used to illuminate themes such as the role of the state in governing the economy, the challenges of democracy, and the politics of collective identities (attachments such as religion, ethnicity, race, gender, and nationality). Guest lectures and active participation by the entire comparative politics faculty. This course is strongly recommended for political science majors for all further work in comparative politics.

Prerequisite: None

Distribution: Social and Behavioral Science

Semester: Fall, Spring

Unit: 1.0

POL 203/AFR 236 African Politics

Murphy

An investigation of politics across Sub-Saharan Africa since the defeat of Portuguese colonialism in the mid-1970s. The economic stagnation of the 1980s, the impact of structural adjustment programs, the end of the Cold War, the genocide in Rwanda and the resulting wars will be discussed along with the liberation of Southern Africa and the recent wave of democratization. Emphasis on developing the method of empathetic understanding to become knowledgeable about the opportunities and constraints faced by African citizens and governments. Students may register for either POLI 203 or AFR 236 and credit will be granted accordingly.
POL2 204 Political Economy of Development and Underdevelopment

Candland
Overview of development studies with attention to major schools of political economy; their intellectual origins and centrality to contemporary debates about economic development. Topics include colonialism, nationalism, and independence; post-colonial economic development models, policies, and strategies; perspectives on gender and development; changing conceptions and measures of poverty, development, and underdevelopment; contemporary debates in development studies.
Prerequisite: One unit in political science, open to juniors and seniors with permission of instructor; to other qualified students.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL2 208 Politics of China

Joseph
NOT OFFERED IN 2006-07. An introduction to the modern political history and contemporary political system of China. Topics include the origins and victory of the Chinese Communist revolution, the rule and legacy of Chairman Mao Zedong, economic reform and political repression in the era of Deng Xiaoping, and recent developments in Chinese politics. Politics in Tibet, Hong Kong, and Taiwan will also be considered.
Prerequisite: One unit in political science, economics, history, or Asian Studies recommended, but not required.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL2 209 Politics of Japan and Korea

NOT OFFERED IN 2006-07. The first half of the course will focus on Japan and consider the core political institutions of the postwar era and the politics of rapid industrialization. Issues to be discussed include: the shift from one-party dominance to coalition government, the new electoral system, and the effects of economic stagnation. The second half of the course looks at Korean politics (South and North) and inter-Korean relations and considers the effects of Japanese colonialism and the Korean War. For South Korea, we will look at authoritarianism, democratization, economic development, nationalism, regionalism, and minority rights; for North Korea, the leadership and its ideology, economic conditions, and nuclear diplomacy.
Prerequisite: One unit in political science, economics, history, or Asian studies; open to juniors and seniors without prerequisite.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL2 211 Politics of South Asia

Candland
An introduction to the politics of South Asia (India, Pakistan, Bangladesh, Sri Lanka, Afghanistan, Nepal, Bhutan and the Maldives) from historical and contemporary comparative perspectives. Examines the relationship of political institutions to patterns of development. Comparative themes include colonial experiences and nationalist ideologies; politicization of religions and rise of religious conflict; government and political processes; recent economic reforms; initiative for conflict transformation; women's empowerment; obstacles to and prospects for human development.
Prerequisite: One unit in political science; open to juniors and seniors without prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL2 214/ES 214 Social Causes and Consequences of Environmental Problems

DeSombre
This course focuses on the social science explanations for why environmental problems are created, the impacts they have, the difficulties of addressing them, and the regulatory and other actions that succeed in mitigating them. Topics include: externalities and the politics of unexpected costs and benefits, collective action problems and interest group theory, time horizons in decision-making, the politics of science, risk and uncertainty, comparative political structures, and cooperation theory. Also addressed are different strategies for changing environmental behavior, including command and control measures, taxes, fees, and other market instruments, and voluntary approaches. These will all be examined in a number of different countries and levels of government. Students may register for either POL2 214 or ES 214 and credit will be granted accordingly.
Prerequisite: ES 100 or one course in political science, or by permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL2 302 Globalization and the Nation-State

Krieger
An assessment of globalization and the challenges it poses for the exercise of state power before and after September 11, 2001. Topics to be considered include: economic competitiveness, alternative geopolitical strategies, and international terrorism. The course will consider alternative interpretations of globalization and weigh the explanatory value of a set of theses that are intended to explain the interactive effects of globalization and state power in an era of unrivaled American hegemony. Case studies will look in depth at the United States, E.U., Europe, and East Asia.
Prerequisite: One 200-level unit in comparative politics or international relations or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL2 304 State and Society in East Asia

Moon
NOT OFFERED IN 2006-07. An examination of the relationships between governments and social forces in Northeast and Southeast Asia. Countries to be considered include: Japan, Korea, Taiwan, Singapore, the Philippines, Malaysia, Thailand, and Indonesia. The course takes a thematic approach to analyzing the political development and changing international roles of these countries in the second half of the twentieth century. Among the issues to be considered are: authoritarianism, military rule, democratization, labor movements, gender politics, nationalism, and relations with the West.
Prerequisite: One 200-level unit in comparative politics or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL2 305S Seminar. The Military in Politics

Wasserspring

NOT OFFERED IN 2006-07. Focus on relations between the military and politics. Emphasis on the varieties of military involvement in politics, the causes of direct military intervention in political systems, and the consequences of military influence over political decisions. Themes include the evolution of the professional soldier, military influence in contemporary industrial society, and the prevalence of military regimes in Third World nations. Case studies include the United States, Brazil, Peru, Nigeria, Ghana, and Egypt.
Prerequisite: Open to juniors and seniors by permission of instructor. Enrollment limited: interested students must fill out a seminar application available in the political science department office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0
POL2 307S Seminar. Women and Development
Wasserspring
A comparative analysis of the impact of change on gender in the Third World. The status of
women in traditional societies, the impact of
"development" upon peasant women, female
urban migration experiences, and the impact of
the urban environment on women's lives in the
Third World are themes to be considered.
Special emphasis will be placed on the role
of the state in altering or reinforcing gender stereotypes. Comparing cultural conceptions of
gender and the factors which enhance or hinder the
transformation of these views will also be
emphasized. Examples will be drawn from all
regions of the Third World.
Prerequisite: Open to juniors or seniors who have taken at
least one 200 level course in comparative politics; or
permission of instructor. Enrollment limited; interested
students must fill out a seminar application available in
the political science department office or on the department
Web site. Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

POL2 308S Seminar. Advanced Topics in
Chinese Politics
Joseph
This seminar will explore in depth a topic of
central importance in the analysis of politics in
temporary China. The focus of the seminar
for each year will be announced prior to pre-
registration. Among the topics that may be con-
sidered are: the political and social impact of
economic change in China; revolution and
reform in the Chinese countryside; ideology and
political development in modern China; democ-
rcy and human rights in China; the political
economy of "Greater China."
Prerequisite: POL2 204, HIST 278, or permission
of instructor. Enrollment limited; interested students must fill
out a seminar application available in the political
science department office or on the department
Web site. Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

POL2 309S Seminar. Ethnicity, Nationalism,
Religion, and Violence
Candiland
NOT OFFERED IN 2006-07. Investigates the
causes of modern conflicts over religious,
national, and ethnic identity. Introduces meth-
ods for studying nationalism, ethnic groups in
conflict, and religious violence. Considers the
construction of ethnicity and nation, the politi-
cal uses of ethnicity, nationalism, and religion;
the relationship between gender, class, ethnicity,
and nationalism; various sources of inter-ethnic,
international, and inter-religious conflict; and
the psychology of group violence and warfare.
This course may count as either a comparative politics or an international relations unit for the
political science major, depending upon the stu-
dent's choice of research paper topic.
Prerequisite: Permission of instructor. Enrollment limited;
interested students must fill out a seminar application
available in the political science department office or on the
department Web site. Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

POL2 310S Seminar. Politics of Community Development
Candiland
Focuses on strategies for poverty alleviation,
employment generation, promotion of social
opportunity, and empowerment. Emphasis is on
development in Asian, especially South
and Southeast Asia, Africa, and Latin America.
Considers women's leadership in social change,
local control of resources, faith-based activism,
and collaboration between activists and
researchers. Examines activities of non-governmental organizations (NGOs) and their relations
with funders, governments, and other NGOs.
Specific NGOs and development programs
will be closely examined.
Prerequisite: 204 and permission of instructor. Enrollment
limited; interested students must fill out a seminar application
available in the political science department office or on the
department Web site. Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

POL2 312S Seminar. Environmental Policy
DeSombe
Focuses both on how to make and how to study
environmental policy. Examines issues essential
in understanding how environmental policy
works and explores these topics in depth
through case studies of current environmental
policy issues. Students will also undertake
an original research project and work in groups on
influencing or creating local environmental policy.
Prerequisite: One 200 level unit in political science and
politics. Enrollment limited; interested students must fill out a seminar application available in the
current political science department office or on the department
Web site. Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

POL2 333S Seminar. The Politics of
Contemporary Cuba
Wasserspring
An analysis and assessment of the politics of the
Cuban Revolution. Examination of the pre-
Revolutionary Cuban society, significant trans-
formatory phases of Cuban policy, the impact of
United States and Soviet foreign policy objectives
on Cuba, and the contemporary dilemma of
maintaining socialist institutions in the post-
cold war era. Special emphasis on political cul-
ture and its transformation, the role of political
leadership, and the international constraints
upon domestic policy formulation. Topics include
the government's impact on education, health
care and women's lives, the effects of the
reintroduction of tourism as a developmental
strategy, and the influence of Cuban-American
politics in Miami. In addition to social science
sources, we will use Cuban film, art, and litera-
ture as vehicles of understanding this complex
cultural experience.
Prerequisite: Any 200 level unit in comparative politics or
permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the
political science department office or on the department
Web site. Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

POL2 380 Science and Politics in
Environmental Policymaking
NOT OFFERED IN 2006-07. This course
explores the role of science in environmental
copolymaking, focusing on the United States at
the federal level. It includes an examination of
how science is brought to bear in legislative,
administrative, and judicial decision-making;
the interplay of science and policy in problem
identification, solution, and prescription; specific
science-based decision-making tools such as
risk assessment and cost-benefit analysis. We will
question the notion of science as "speaking truth
to power" and assess how outside pressures on
both the science and policy communities affect
environmental decision-making. The course
will consider potential benefits and drawbacks of
new emerging models in the United States and other
countries. It is designed for majors in political
science and environmental studies.
Prerequisite: One course in American politics or compara-
tive politics or environmental studies.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

POL2 383S Politics of Migration
Moon
NOT OFFERED IN 2006-07. A comparative study of the politics of mass population move-
ments across state borders, including forced
colonization under colonialism, refugees of war,
food migration, labor migration, and different
forms of legal and illegal immigration, including
the international trafficking of persons. Analyzes
migration and immigration policies in sending
and receiving countries, U.N. conventions on the
movement of persons, and social movements
against and on behalf of migrant peoples.
Country cases to be examined include Algeria
and France, Brazil and Japan, Canada and Hong
Kong, China and North Korea, Germany and
Turkey, and the Philippines and the United
States.
Prerequisite: One 200 level course in comparative politics or
international relations or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

International Relations

POL3 221 World Politics
Argueth-Tofig, Goddard, Murphy
An introduction to the international system with
emphasis on contemporary theory and practice.
Analysis of the bases of power and influence,
the sources of tension and conflict, and the modes
of accommodation and conflict resolution. This
course serves as an introduction to the interna-
tional relations subfield in the political science
department, and also as a means of fulfilling
the political science core requirement of the interna-
tional relations major.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring Unit: 1.0

POL3 224 International Security
Goddard
An examination of warfare as a central problem
of international politics. The shifting causes
and escalating consequences of the
Industrial Revolution. The post cold war danger
of a clash of civilizations versus prospects for a
"democratic peace." The multiple causes and
consequences of modern internal warfare, and
prospects for international peacekeeping.
The spread of nuclear weapons, the negotiation of
arms control agreements, the revolution in mili-
tary affairs (RMA), and the threat of terrorism
and asymmetric war.
Prerequisite: One unit in international relations or permis-
sion of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

149 Political Science
POL 326 International Relations in East Asia
NOT OFFERED IN 2006-07. This course examines political and economic relations in East Asia, with the aim of understanding the determinants of conflict and cooperation in the region and providing a framework for analyzing the foreign policies of East Asian states. Among the questions considered: Is the East Asian economic miracle indeed a miracle? Is the rise of China dangerous to its neighbors? Can Japan be a leader in the region? What is South Korea's choice between security and reunification? Whether North Korea survives or implodes, what would be the consequences for East Asia? How do states respond to growing economic interdependence and to security multilateralism in the region?
Prerequisite: One unit in international relations or comparative politics or permission of instructor. Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

POL 327 The Vietnam War
Joseph
An examination of the origins, development, and consequences of the Vietnam War. Topics to be considered include: the impact of French colonialism on traditional Vietnamese society; the role of World War II in shaping nationalism and communism in Vietnam; the motives, stages, and strategies of American intervention in Vietnam; leadership, organization, and tactics of the Vietnamese revolutionary movement; the expansion of the conflict to Cambodia and Laos; the antirwar movement in the United States; lessons and legacies of the Vietnam War; and political and economic development in Vietnam since the end of the war in 1975.
Prerequisite: One unit in social sciences or permission of instructor. Not open to students who have taken [POL 306]. Distribution: Social and Behavioral Analysis Semester: Fall Unit: 1.0

POL 228 The Arab-Israeli Conflict
NOT OFFERED IN 2006-07. This course examines the political dimensions of the Arab-Israeli conflict and analyzes the interests and objectives of the major parties, including Israeli society, Palestinian communities, and other regional and superpower actors. The course also covers the emergence of the Zionist movement, the development of Palestinian nationalism, the determinants of U.S. foreign policy towards this conflict, and efforts at conflict resolution. This course may count as either a Comparative Politics or an International Relations unit for the Political Science major, depending upon the student's choice of paper topics.
Prerequisite: None Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

POL 321 The United States in World Politics
Paarlberg
NOT OFFERED IN 2006-07. An examination of American foreign policy, understood as the current and recent behavior of the United States Government abroad. The pre-eminent role of American military power in the post cold war era makes understanding United States policy essential to the larger study of international relations. Emphasis will be placed on different theoretical approaches to explaining United States behavior, including approaches based on structures of the international system versus explanations that are particular to American geography, history, culture, or institutions.
Prerequisite: One unit in international relations. Not open to students who have taken [POL 3215]. Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

POL 3225 Seminar. Gender in World Politics
Arreguin-Toft
The course will examine gender constructions in world politics, with a focus on the biological and social determinants of aggression, violence, and war. Some topics include gender biases in international relations theories, women in combat; male and female roles in the conduct of war; gender and attitudes toward war; women's relationship to the state; gays in the military; rape and the military; feminist analysis of war and peace.
Prerequisite: 221 and permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Social and Behavioral Analysis Semester: Spring Unit: 1.0

POL 332 International Economic Policy
Paarlberg
NOT OFFERED IN 2006-07. A review of the politics of international economic relations, including trade, money, and multinational investment within the industrial world and also among rich and poor countries. Political explanations for the differing economic performance of states in Asia, Africa, and Latin America. Consideration of the respective roles of intergovernmental organizations, nongovernmental organizations, and multinational corporations. Discussion of global governance issues including food, population, migration, energy, and environment.
Prerequisite: One unit in international relations or comparative politics. Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

POL 332 International Environmental Law
DeSombre
Examines the basic legal instruments and their historical development in addressing international environmental issues. Under what conditions have states been able to cooperate to improve the global environment? Negotiation of, compliance with, and effectiveness of international environmental law, and specific environmental issue areas in which international environmental law operates will be addressed.
Prerequisite: One unit in international relations or legal studies, or permission of instructor. Distribution: Social and Behavioral Analysis Semester: Spring Unit: 1.0

POL 332 Seminar. Small Wars in Theory and Practice
Arreguin-Toft
This course introduces advanced students to an important and understudied category of conflict: small wars. This survey of important small wars from the nineteenth and twentieth centuries traces their impact on both grand-strategic planning and international relations theory; and is grounded in major themes ranging from the Hobson-Lenin thesis of imperialism to Kenneth Waltz's realism. The interplay of theory and cases will highlight the strengths and weaknesses of contemporary approaches to this old yet ever-present category of conflict. Case studies include the South African War (1899-1902), Italy's invasion of Ethiopia (1935-36), U.S. military intervention in Vietnam (1965-1973), Operation Allied Force in Kosovo (1999), the Russian Federation's twin campaigns in Chechnya (1994 and 1999), and the Second Gulf War in Iraq (2003-present).
Prerequisite: 221. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Social and Behavioral Analysis Semester: Fall Unit: 1.0

POL 3327 International Organization
Murphy
NOT OFFERED IN 2006-07. The politics of global governance. Emphasis on the U.N., plus examination of specialized agencies, multilateral conferences, and regional or functional economic and security organizations. The theory and practice of integration beyond the nation-state, as well as the creation and destruction of international regimes.
Prerequisite: One unit in international relations or comparative politics. Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

POL 3328 Seminar. Selected Topics in World Politics: Anti-Americanism as Politics and Performance
Moon
Seminar exploring the causes, characteristics, and political implications of the recent resurgence of "anti-Americanism" in international politics. Political actors engaged in anti-American activities and activism include civic organizations, intellectual and cultural elites, politicians, media, terrorists, peace activists, and others in democratic and authoritarian countries alike. Differing political motivations and public expressions, as well as national and regional variations of anti-Americanism will be examined. The seminar will engage a range of sources, such as survey data, religious rhetoric, nationalist platforms, protest literature, official policy statements, court cases, and pop music. Country cases include but are not limited to France, Germany, Iraq, Iran, Mexico, South Korea, Philippines, United Kingdom, and the United States.
Prerequisite: One 200 level course or higher in both international relations and comparitive politics. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Social and Behavioral Analysis Semester: Fall Unit: 1.0

POL 3329 International Law
Hotchkiss (at Babson)
An exploration of the meaning of the "rule of law" in a global context. The course focuses on three themes. First, the classic form of international law, including the concepts of statehood and sovereignty, the relationship of nations to each other, and the growth of international organizations. Second, the role and responsibility of individuals in international law, especially in the area of human rights. Third, the development of international law of the earth's common areas, specifically the oceans, space, and the environment.
POL3 322 People, Agriculture, and the Environment
Fuhrberg

NOT OFFERED IN 2006-07. An examination of linkages between agricultural production, population growth, and environmental degradation, especially in the countries of the developing world. Political explanations will be sought for deforestation, desertification, habitat destruction, species loss, water pollution, flooding, salinization, chemical poisoning, and soil erosion—all of which are products of agriculture. These political explanations will include past and present interactions with rich countries, as well as factors currently internal to poor countries. Attention will be paid to the local, national, and international options currently available to remedy the destruction of rural environments in the developing world. This course may qualify as either a comparative politics or an international relations unit for the political science major, depending upon the student's choice of research paper topic.
Prerequisite: 204 or 323. Not open to students who have taken [POL3 332S].
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POL3 348S Seminar, Problems in North-South Relations
Murphy

An exploration of historical and contemporary relations between advanced industrial countries and less developed countries, with emphasis on imperialism, decolonization, interdependence, and superpower competition as key variables. Consideration of systemic, regional, and domestic political perspectives. Stress on the uses of trade, aid, investment, and military intervention as foreign policy instruments. This course may qualify as either a comparative politics or an international relations unit for the political science major, depending upon the student's choice of research paper topic.
Prerequisite: One unit in international relations or permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL3 351 Global Governance
Murphy

Explores the challenge of global institutions in the new century within a larger historical context. Considers the function and role of the League of Nations, the International Labor Organization, the United Nations, the Bretton Woods institutions, the GATT and the World Trade Organization. Special emphasis on comparing and contrasting international organizations in the three main periods of international building: post-World War I, post-World War II, and post-cold war. Discusses radical, liberal internationalist and realist approaches.
Prerequisite: One unit in international relations. Not open to students who have taken [POL3 351S].
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL3 379 Weapons, Strategy, and War
Goddard

This course examines the interrelationships among military technology, strategy, politics, and war. How have these forces shaped warfare from the introduction of gunpowder to the present? How, in turn, have developments in warfare influenced societies and politics? The course emphasizes select cases from World Wars I and II and the development of nuclear weapons strategy. How, for example, did the development of chemical weapons affect the battlefield? What ethical choices, if any, guided the strategic bombing of civilians in World War II? How did nuclear weapons not only change warfare, but states' societies? The course concludes with an examination of the "war on terror" and its implications for strategy and politics.
Prerequisite: 221; recommended: 224
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL3 3845 Seminar, Power, Conflict, and Diplomacy
Goddard

International politics is mostly talk. Diplomats cooperate, coerce, and deter, all under the shadow of power and war. This course examines the role of diplomacy and negotiations in international politics. We explore whether actors behave rationally in crisis situations, such as in the Cuban Missile and Berlin Crises. The course analyzes the role of rhetoric and identity in negotiations. How is it that actors might use rhetoric to persuade or coerce at the bargaining table? In examining cases, the course will use primary materials, such as transcripts of the Cuban Missile Crisis, in addition to interpretive texts, to examine negotiations over issues of alliance politics, conflict resolution, and crises on the brink of war.
Prerequisite: One unit in international relations. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

Political Theory

POL4 201 Issues in Political Theory
Candreva

An introduction to the study of political theory, and specifically to the problems of political action. Exploration of questions about civil disobedience, legitimate authority, ethics and politics, and the challenge of creating a just order in a world characterized by multiple beliefs and identities. Discussion of the social contract, democracy, liberal and communitarian, liberal and social theories, and humanism and social relativism. Emphasis of race, class, and gender. Authors include Plato, Machiavelli, Rousseau, Locke, and Martin Luther King, Jr., Malcolm X, and Gandhi.
Prerequisite: None
Distribution: Religion, Ethics, and Political Science
Semester: Fall, Spring
Unit: 1.0

POL4 240 Classical and Medieval Political Theory
Euben

Study of selected Classical, Medieval, and early modern writers, including Plato, Aristotle, Cicero, St. Augustine, St. Thomas Aquinas, Machiavelli, Luther, and Calvin. Emphasis on the logic of each theorist's argument, including such questions as the nature of human sociability, possible - and best - forms of government, and the question why we should obey government and the limits to that obedience. Exploration of diverse understandings of the concepts of justice, freedom, and equality. Attention is paid to the historical context within which a political theory is written.
Prerequisite: None
Distribution: Religion, Ethics, and Political Science
Semester: Fall
Unit: 1.0

POL4 241 Modern Political Theory
Setten

Study of the development of modern political thought from the eighteenth to nineteenth centuries. Among the theorists read are Hobbes, Locke, Hume, Rousseau, Burke, Wollstonecraft, Mill, Hegel, and Marx. Emphasis on the logic of each theorist's argument, including such questions as the nature of human sociability, possible - and best - forms of government, and the question why we should obey government and the limits to that obedience. Exploration of diverse understandings of the concepts of justice, freedom, and equality. Attention is paid to the historical context within which a political theory is written.
Prerequisite: None
Distribution: Religion, Ethics, and Political Science
Semester: Spring
Unit: 1.0

POL4 242 Contemporary Political Theory
Krieger

NOT OFFERED IN 2006-07. Study of several twentieth-century traditions that raise fundamental questions about the human condition, processes of historical and personal transformation, and our capacity to understand them. Exploration of contemporary political and social theories, including existentialism, contemporary variants of Marxism, postmodern theory, alternative theories of power, and the ethics of war.
Prerequisite: One unit in political theory, social theory, or political philosophy, or permission of instructor.
Distribution: Religion, Ethics, and Political Science
Semester: N/O
Unit: 1.0

POL4 248 Power and Politics
Euben

NOT OFFERED IN 2006-07. An examination of the nature and functioning of power in politics, with an emphasis on the following questions: What is the nature of power and how has it been exercised in political life both past and present? Who has power and who should have it? Is power primarily wielded by political leaders and bureaucrats, or has the development of new technologies decentralized power, making each of us its instrument? Do the powerless—for example, miners in Appalachia, Polish solidarity activists, Indian anti-colonialists—understand and exercise power differently from those who traditionally hold it? Are power and violence inextricably intertwined or are they opposites? Readings will be drawn from several disciplines, and authors include Thucydides, bell hooks, Hannah Arendt, Marx, Nietzsche, Foucault, Dahl, Michnik, and Valey Havel.
Prerequisite: One unit in political science, philosophy, or history, or permission of instructor.
Distribution: Religion, Ethics, and Political Science
Semester: N/O
Unit: 1.0
POL 340 American Political Thought
Stetter
Examination of American political writing, with emphasis given to the Constitutional period, progressive era, and contemporary sources. Questions raised include orients of American institutions, including the rationale for federalism and separation of powers, the roles of president and Congress, judicial review; American interpretations of democracy, equality, freedom and justice; legitimate powers of central and local governments. Attention paid to historical context and to importance for modern political analysis.
Prerequisite: One 200 level unit in political theory. American politics, or American history, or permission of instructor.
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

POL 342S Seminar, Marxist Political Theory
Krieger
Study of the fundamental concepts of Marxist theory, including alienation, the materialist conception of history, class formation, and class struggle. Particular attention will be paid to Marx’s theory of politics. The applicability of Marxist theory to contemporary political developments will be assessed. Study of contemporary Marxist theory will emphasize issues of class, race, and gender.
Prerequisite: Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POL 343S Seminar, Democracy and Difference
Krieger
An examination of liberal democracy and contemporary theoretical challenges introduced by diversity and difference. Does liberal democracy, with its emphasis on individual rights, separation of powers, representative assemblies, and the principle of a limited state, remain a durable model? How does the consideration of cultural diversity and difference, understood by reference to gender, race, ethnicity, language, religion, nationality, and sexual orientation, affect our understanding of citizenship, equality, representation, recognition, and community? Study of communitarian thought, multiculturalism, and feminist critiques of democracy.
Prerequisite: One 200 level unit in political theory, or permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

POL 344S Seminar, Feminist Political Theory
Enzen
An examination of feminist theory, beginning with early liberal and socialist feminisms and continuing on to radical, post-structuralist and postcolonial feminist theories, among others. Particular attention to the complexity of theorizing about “women are and need” in the context of a multicultural society and a postcolonial world. Consideration of feminist perspectives on rights and the law, pornography, racial and sexual differences, methodology, and non-Western cultural practices such as veiling. Authors include Lorde, Mohanty, hooks, Mackinnon, Rich, and Butler.
Prerequisite: One 200 level unit in political theory, philosophy, or women’s studies; interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

POL 346 Comparative Political Thought: Modern Western and Islamic Theories of Politics
Evans
An examination of Western and Islamic theories about the nature and dilemmas of modern politics with a special emphasis on the following questions: Does modern politics require secularization or a return to the “fundamentals” of tradition, religion, and community? Which fundamentals and by whose authority? What is the relationship, if any, among democracy, Islam and the West? How and should these terms be defined? Is there such a thing as a distinctive Western or Islamic perspective in a world shaped by colonialism, imperialism, and globalization? Authors include Machiavelli, Ibn Khaldun, Al-Afghani, Kant, Condorcet, Riffat Hassan, and Sayyid Qutb.
Prerequisite: One 200 level unit in political theory or philosophy or permission of instructor.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

POL 347S Seminar, Politics, Literature, and the Concept of Empire
Candreva
NOT OFFERED IN 2006-07. What does it mean to be an “empire”? In this seminar, we will explore this question through specific historical examples (including Greece, Rome, Britain and France), using a variety of literary and philosophical texts (Herodotus, Virgil, Machiavelli, Conrad, Kipling, Fanon, Said). Particular attention will be given to questions about freedom, power, rights and obligations. In conclusion, we will examine contemporary sources to assess whether or not the term “empire” may be applied to the United States today.
Prerequisite: Permission of instructor. Interested students must fill out a seminar application available in the political science department office or on the department Web site. Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/A
Unit: 1.0

Research or Individual Study
Individual or group research of an exploratory or specialized nature. Students interested in independent research should request the assistance of a faculty sponsor and plan the project, readings, conferences, and method of evaluation with the faculty sponsor. These courses are offered at the 250 (intermediate) and 350 (advanced) levels and for one or 0.5 unit of credit.

POLS 250 Research or Individual Study
Prerequisite: Open to all students by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

POLS 250H Research or Individual Study
Prerequisite: Open to all students by permission.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

POLS 350 Research or Individual Study
Prerequisite: Open to juniors and seniors by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

POLS 350H Research or Individual Study
Prerequisite: Open to juniors and seniors by permission.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

Senior Thesis

POLS 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

POLS 370 Senior Thesis
Prerequisite: 360
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Related Courses
For Credit Towards the Major

Directions for Election
POL 100 is recommended for all further work in political science.
A major in political science consists of at least nine units. Courses at the 100-level may be counted toward the major, but not toward a subfield distribution requirement (see below).
The Department of Political Science divides its courses beyond the introductory level into four subfields: American politics and law (POLS1), comparative politics (POLS2), international relations (POLS3), and political theory (POLS4). In order to ensure that political science majors familiarize themselves with the substantive concerns and methodologies employed throughout the discipline, all majors must take one 200-level or 300-level unit in each of the four subfields offered by the department. Recommended first courses in the four subfields are: in American politics and law: POLI 200; in comparative politics: POLI 202, in international relations: POLI 321; in political theory: POLI 401, 240, 241.
In addition to the subfield distribution requirement, all majors must take advanced work (300-level) in at least two of the four subfields; a minimum of one of these units must be a seminar, which normally requires a major research paper. (Courses fulfilling the seminar requirement are denoted by an “S” after the course number.) Admission to department seminars is by permission of the instructor only. Interested students must fill out a seminar application, which is available in the political science office and on the department web site prior to preregistration for each term. Majors should begin applying for seminars during their junior year in order to be certain of fulfilling this requirement. Majors are encouraged to take more than the minimum number of required 300-level courses.
Department of Psychology

Professor: Zimmerman, Schiavo 43; Koff, Cheek, Akert 4, Hennessy, Lucas 4, Noren (Chair), Wisl 42
Associate Professor: Genero, Keene, Gleason
Visiting Associate Professor: Carth, Berman
Assistant Professor: Theran 44, Pyers
Visiting Assistant Professor: Cleveland, Tincoff
Senior Lecturer: Beachfield-Child, Kulik-Johnson

PSYC 101 Introduction to Psychology

Staff
An introduction to some of the major subfields of psychology, such as developmental, personality, abnormal, clinical, physiological, cognitive, cultural, and social psychology. Students will explore various theoretical perspectives and research methods used by psychologists to study the origins and variations in human behavior.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

PSYC 205 Statistics
Hennessy, Genero
The application of statistical techniques to the analysis of psychological data. Major emphasis on the understanding of statistics found in published research and as preparation for the student’s own research in more advanced courses.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite. Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking ECON 103/SOC 190, MATH 101, MATH 101Z, POLI 199, QR 180, or QR 199, except for psychology and neuroscience majors, with permission of the instructor.
Distribution: Social and Behavioral Analysis. Fulfills the Quantitative Reasoning overlay course requirement. Does not satisfy the laboratory requirement.
Semester: Fall, Spring
Unit: 1.0

PSYC 207 Developmental Psychology
Gleason, Pyers
Behavior and psychological development in infancy, childhood, and adolescence. An examination of theory and research pertaining to personality, social, and cognitive development. Lecture, discussion, demonstration, and observation of children. Observations at the Child Study Center required.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

PSYC 208 Adolescence
Brachfeld-Child
Survey of contemporary theories and research in the psychology of adolescents. Topics will include the physical, cognitive, social, and personality development of adolescents.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 210 Social Psychology
Carth
The individual’s behavior as it is influenced by other people and the social situation. Study of social influence, interpersonal perception, social evaluation, and various forms of social interaction.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 211 Group Psychology
NOT OFFERED IN 2006-07. Study of everyday interaction of individuals in groups. Introduction to theory and research on the psychological processes related to group structure and formation, leadership, communication patterns, etc.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 212 Personality
Cheek, Kulik-Johnson
A comparison of major ways of conceiving and studying personality, including the work of Freud, Jung, behaviorists, humanists, and social learning theorists. Introduction to major debates and research findings in contemporary personality psychology.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

PSYC 215 Memory
Keene
Introduction to the study of human memory. Examines processes underlying encoding, storage, and retrieval of information. Will review theoretical models focusing on distinctions between different forms of memory including short-term and long-term memory, implicit and explicit memory, episodic and semantic memory. Factors contributing to forgetting and distortion of memory will also be discussed.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 216 Psychology of Language
Tincoff
Introduction to the study of the psychological processes underlying language. An evaluation of theory, methods, and current research in language abilities, including speech perception, word and sentence comprehension, and language acquisition in children. Examination of the relationship between language and thought and the evolutionary and biological bases of language behavior.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0
PSYC 217 Cognition

Tinoff
Cognitive psychology is the study of the capabilities and limitations of the human mind when viewed as a system for processing information. An examination of basic issues and research in cognition focusing on attention, pattern recognition, memory, language, and decision-making.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 218 Sensation and Perception

Kowal
A survey of the human senses from stimuli to perception. Topics include basic features in vision: color, form, orientation, and size; perception of the third dimension; illusions; attention; limits on perception; and the effects of experience and development. Relevant neurophysiological and clinical examples will be reviewed as well as laboratory demonstrations.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 219 Biological Psychology

Koff
Introduction to the biological bases of behavior. Topics include structure and function of the nervous system, sensory processing, sleep, reproductive behavior, language, and mental disorders.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP credit or permission of instructor. For students entering the College prior to fall 2004: no prerequisite. Not open to students who have taken BISC 213/NEUR 213.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 224 Abnormal Psychology

Theran, Berman
An examination of major psychological disorders with special emphasis on phenomenology. Behavioral treatment of anxiety based disorders, cognitive treatment of depression, psychoanalytic therapy of personality disorders, and biochemical treatment of schizophrenia will receive special attention. Other models of psychopathology will also be discussed.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

PSYC 230 Psychology of Law

NOT OFFERED IN 2006-07. Do biases affect the decisions of juries? Do guilty defendants escape punishment by faking insanity? Does the death penalty reduce crime? This course focuses on the application of psychology to legal questions such as these. Other possible topics include: jury selection, the reliability of eyewitness testimony, factors affecting the perceived innocence or guilt of defendants, the use of hypnosis and lie detector tests, blaming victims of crime, methods of interrogation, and issues surrounding testimony from children in abuse cases. This course will explore both theory and research on the psychology of law and will include case analyses.
Prerequisite: For students entering the College in fall 2004 or later: PSYC 101, AP score of 5 or permission of instructor. For students entering the College prior to fall 2004: no prerequisite.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 248 Psychology of Teaching, Learning, and Motivation

NOT OFFERED IN 2006-07. The psychology of preschool, primary, secondary, and college education. Investigation of the many contributions of psychology to both educational theory and practice. Topics include student development in the cognitive, social, and emotional realms; assessment of student variability and performance; interpretation and evaluation of standardized tests and measurements; classroom management; teaching style; tracking and ability grouping; motivation; and teacher effectiveness.
Prerequisite: One 200-level unit, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 299 Practicum in Psychology

Staff
Participation in a structured learning experience in an approved field setting under faculty supervision. Does not count toward the minimum major in psychology. Mandatory credit/ non-credit, except by permission of instructor.
Prerequisite: Open by permission to junior and senior PSYC majors. Two units above the 100-level that are most appropriate to the field setting as determined by the faculty supervisor (excluding 205).
Distribution: None
Semester: Fall, Spring
Unit: 1.0

PSYC 300/CISC 300 Topics in Cognitive and Linguistic Sciences

NOT OFFERED IN 2006-07. Topics: Cooperation and Competition. According to traditional models of rationality, rational agents should act in ways that will maximize their self-interest. And the study of evolution teaches us that individuals are in competition for survival. Nonetheless, we have all experienced acts of apparent selflessness and societies could not function without cooperation among their members. How, then, can cooperative and selfless behaviors be explained? In this course, an interdisciplinary approach to the problem will be taken. Evidence and theories from the psychological, economic, and neurobiological literatures will be examined. Cross-cultural, developmental, and cross-species differences will be explored as will the evolutionary origins of cooperation and competition and the role of cooperation in language.
Prerequisite: Open to juniors and seniors who have taken one of PSYC 215-219, [LANG] LING 114, PHIL 215, CS 111 or permission of instructor.
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

PSYC 303 Psychology of Gender

Cleveland
An examination of different theoretical approaches to the study of sex and gender, the social construction and maintenance of gender, and current research on gender differences. Topics will include review of arguments about appropriate methods for studying sex and gender and its "legitimacy" as a research focus, gender roles and gender socialization, potential biological bases of gender differences, and the potential for change in different sex-typical behaviors.
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 305 Seminar. Advanced Statistical Methods and SPSS

Genco
Building on introductory statistical concepts and data analysis applications, this course provides an in-depth understanding of hypothesis testing and probability for use in psychological quantitative research. Topics include factorial analysis of variance, correlation, regression, and basic psychometric techniques.
Prerequisite: PSYC 205
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 306R Research Methods in Developmental Psychology and the School Experience

Hennessey
An introduction to research methods appropriate to the study of human development in teaching and learning settings: preschool through college. Individual and group projects. Laboratory. Each section typically limited to 12 students. Observations at the Child Study Center and other classroom locations required.
Prerequisite: 205 and 207 or 248. Not open to students who have taken [206R].
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.25

PSYC 307R Research Methods in Developmental Psychology

Gleason
An introduction to research methods appropriate to the study of human development. Individual and group projects. Laboratory. Each section typically limited to 12 students. Observations at the Child Study Center required.
Prerequisite: 205 and 207. Not open to students who have taken [207R].
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.25

PSYC 308 Systems of Psychotherapy

NOT OFFERED IN 2006-07. This course examines theory, research, and practice in three schools of psychotherapy: psychodynamic, cognitive-behavioral, and humanistic. Topics to be covered include underlying assumptions of normalcy/pathology, theories of change, methods/techniques, and relationship between therapist and client.
Prerequisite: Open to juniors and seniors who have taken two 200-level units including 224 and excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 310R Research Methods in Social Psychology

Schiavo
An introduction to research methods appropriate to the study of social psychology. Individual and group projects on selected topics. Laboratory. Each section typically limited to 12 students.
PSYC 311 Seminar. Environmental Psychology

**NOT OFFERED IN 2006-07.** Exploration of the interaction between the physical environment and an individual's behavior and feelings. Emphasis on relevant topics such as territoriality, personal space, and crowding. Some attention to children and to environmental issues, such as conservation and psychological consequences of natural disasters. Specific settings, such as urban environments, playgrounds, and homes, are studied. Small groups of students will use observation, interview or questionnaire techniques to pursue small-scale research topics. There will be individual oral reports.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 312 Seminar. Applied Psychology

Schane

Analysis of psychologically-based programs and interventions in applied settings such as organizations, social service agencies, health-care facilities, social support groups, environmental and community change agencies, etc. Consideration of the psychological theories, methods, and research findings which provide the foundation for these programs. Students will participate in relevant settings or activities.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 312R Research Methods in Personality Psychology

Norem

An introduction to research methods appropriate to the study of personality psychology. Student projects investigate individual and group differences in personality traits, values, goals, and dimensions of self-concept. Laboratory. Each section typically limited to 12 students.

Prerequisite: 205 and 212. Not open to students who have taken [212R].
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.25

PSYC 314R Research Methods in Cognitive Psychology

Keane

Introduction to research methods appropriate to the study of human cognition (i.e., how people take in, interpret, organize, remember, and use information in their daily lives). Individual and group projects. Laboratory. Each section typically limited to 12 students.

Prerequisite: 205 and one of the following, 215, 216, 217, 218, 219, BISC 213/NEUR 213. Not open to students who have taken [214R].
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.25

PSYC 315 Seminar: Animal Cognition

Tincoff

An exploration of how animals think. We will examine a range of comparative, neuroscience, developmental, and ethological evidence that reveals the rich variety of natural cognitive systems. Students will collaborate in selecting seminar topics and in facilitating discussions. Topics include learning, concepts and categories, memory, social relationships, theory of mind, communication and language, play, morality, tools, teaching and culture.

Prerequisite: 200-level units, excluding 205 and including PSYC 219 or BISC 213/NEUR 215.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 316 Seminar. Psycholinguistics

Tincoff

**Topic for 2006-07: Language Acquisition.** This course will examine how children acquire their native language. Topics will include how children find words in the first place and how they assign meanings to them, how children learn rules and build syntactic structures, the role of input in acquiring a language, and the relationship between language and thought in development. Readings will address the course of acquisition in normally developing children as well as in special populations (e.g., children with Autism, Williams Syndrome and Special Language Impairment).

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding one of the following: PSYC 213, 216, 217, 218, 219 or BISC 213, and excluding 205, or permission of instructor. LING 114 may be substituted for either 200-level unit.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 318 Seminar. Brain and Behavior

Koff

Selected topics in brain-behavior relationships. Emphasis on psychopharmacology. Topics include principles and mechanisms underlying action of drugs, major neurotransmitter systems, major classes of psychoactive drugs, and psychological disorders and medications.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding one of the following: 219 or BISC 213/NEUR 213, and excluding 205.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 319 Neuropsychology

Keane

An exploration of the neural underpinnings of higher cognitive function based on evidence from individuals with brain damage. Major neuroanatomical systems will be reviewed. Topics include motor and sensory function, attention, memory, language, and hemispheric specialization.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, including either 219 or BISC 213/NEUR 213, and excluding 205.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 320R Research Methods in Applied Psychology

Carlil

An introduction to research methods appropriate to studying applied topics in psychology. Possible topics include the psychology of organizations, the law, or health. Group projects with some individual exercises. Laboratory. Each section typically limited to 12 students.

Prerequisite: 205 and one other 200-level psychology course. Not open to students who have taken [220R].
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.25

PSYC 324R Research Methods in Abnormal Psychology

Wink

An introduction to research methods appropriate to the study of abnormal psychology. Topics will include affective and personality disorders, substance abuse, and stressful life events. Individual and group projects. Laboratory. Each section typically limited to 12 students.

Prerequisite: 205 and 224. Not open to students who have taken [224R].
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.25

PSYC 326 Seminar. Child and Adolescent Psychopathology

Tharan

Description, etiology, and developmental patterns of behavior problems of children, adolescents, and their families. Topics include theories of child and adolescent psychopathology, externalizing problems such as conduct disorder and attention-deficit/hyperactivity disorder, internalizing problems such as depression, anxiety, and children's experiences of trauma, and developmental disorders such as mental retardation, risk and protective factors for child psychopathology, and child and family interventions.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 329 Seminar. Psychology of Adulthood and Aging

**NOT OFFERED IN 2006-07.** An examination of how people cope with changes in their adult lives. Particular emphasis on aging as an example of life stage. Topics include: personality and cognitive change in later life; development of wisdom and integrity; retirement and bereavement; coping with death; intergenerational transmission of values; social support and coping with change. Models of life stages in adulthood will also be discussed.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 333 Clinical and Educational Assessment

Wink

Current approaches to the psychological appraisal of individual differences in personality intelligence, and special abilities will be investigated through the use of cases. Tests included in the survey are: MMPI®, CPI®, WAIS®, Rorschach®, and the TAT®. Special emphasis will be placed on test interpretation, report writing, and an understanding of basic psychometric concepts such as validity, reliability, and norms. Useful for students intending to pursue graduate study in clinical, personality, occupational, or school psychology.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0
PSYC 336S Seminar. Autobiographical Memory: A Window to the Self
Cleveland
Memory helps define who we are over time and, paradoxically, who we are helps define our memories. We will explore the connections between memory and a sense of self, starting with an examination of the forms and functions of autobiographical memory, and the development of memory and an understanding of self. Topics to be considered include: adults’ inability to remember early childhood experiences; implications of gender and culture for personality memory; the role of imagery in memory; and the personal memory deficit in amnesia. We will also investigate the important forensic questions of how accurate our personal memories are and whether a memory that was long forgotten can suddenly be recalled.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 337 Seminar. The Psychology of Creativity
NOT OFFERED IN 2006-07. An explanation of the foundations of modern theory and research on creativity. An examination of methods designed to stimulate creative thought and expression. Topics include: psychoanalytic, behavioristic, humanistic, and social-psychological theories of creativity; studies of creative environments; personality studies of creative individuals; methods of defining and assessing creativity; and programs designed to increase both verbal and nonverbal creativity.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 338 Social Influence
NOT OFFERED IN 2006-07. This course focuses on a major topic in social psychology: attitude formation and change. Techniques of social influence that we encounter in everyday life will be explored, with a particular emphasis on advertising. The findings of empirical research and theory will be used to understand persuasive messages. Topics include how emotion, gender and culture are used to maximize the effectiveness of advertisements, and how stereotypes are both perpetuated and refuted in advertising.
Prerequisite: Open to juniors and seniors who have taken 210 and one other 200-level unit, excluding 205, or permission of instructor. Not open to students who have taken 240.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 339 Seminar. Narrative Identity
Check
Narrative psychology explores the human propensity to create and use stories about significant figures and events in the process of identity formation. Topics will include an exploration of mermaids and related figures as cultural images, metaphors for personal transformation, and archetypal symbols of the collective unconscious. The Little Mermaid and La Sirene of Haitian Vodou will be examined as representations of men’s fear of, and attempts to control, women's spirituality and sexuality. The personality theories of Jung and Reich provide the framework for the seminar.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 340 Organizational Psychology
Carli
An examination of key topics such as: social environment of the workplace, motivation and morale, change and conflict, quality of work life, group dynamics, leadership, culture, and the impact of workforce demographics (gender, race, socioeconomic status). Experiential activities, cases, theory, and research.
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 342 Seminar. Psychology of Optimism and Pessimism
NOT OFFERED IN 2006-07. An examination of the ways in which expectations influence and are influenced by thoughts, feelings, motivation, and behavior. There are a variety of psychological constructs that fall under the general rubric of optimism and pessimism, and research has shown that they relate to physical and mental health, achievement, personal relationships, and even longevity. This seminar will explore those relationships, with an emphasis on understanding both the costs and the benefits of personal and cultural optimism and pessimism.
Prerequisite: Open to juniors and seniors with 212 or 210 and one other 200-level course, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 343 Motivation and Self-Determination: Autonomy, Competence and Relatedness
Cleveland
This course will seek to explore the factors that direct human behavior and the connections among motivation, behavior, and the self in social context. For example, we will investigate the mechanisms that energize and motivate us to act and behave as we do, and the effect of the social setting and other people on the motivational bases of our behavior. In doing so, we will focus on the psychological needs and propensities of active people, working primarily through the lens of Self-Determination Theory. We will also examine the connections between motivation and creativity.
Prerequisite: Two Grade II units, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 344 Seminar. Social Imagination
Glennon
An examination of the uses and types of imagination in both childhood and adulthood. This course will touch on the mechanics of mental imagery and discuss the ways in which imagery is manifest in cognition and particularly in management of social relationships. Emphasis will be placed on the connections between imagination and emotion, such as in children's enactment of scary or morbid pretend play. How imagination affects interpersonal interactions will be considered, as will other topics such as children's creation of imaginary companions, imagination as pathology, and individual differences in imagination, imagery of individuals deprived of particular senses, and the influence of imagination on memory.
Prerequisite: Open to juniors and seniors who have taken two 200-level courses, excluding 205.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 345 Seminar. Selected Topics in Developmental Psychology
Pyers
Topic for 2006-07: “Mind-reading” in Children. This course will trace the development of our understanding of what’s going on in other people’s minds— their beliefs, goals, and intentions — and how we learn to use this information to guide our own actions. Topics include infants’ abilities to point in light of eye-gaze and to engage in imitation and understand goal-directed actions; preschoolers’ knowledge of false belief, deception, and accidents; the role that language and social interaction play in developing our knowledge of other minds; and the effects of lacking this knowledge, as may be the case for children and adults with autism. Observations at the Child Study Center (outside of class time) will be required.
Prerequisite: Open to juniors and seniors who have taken 207 and one other 200-level course, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 347 Seminar. Culture and Social Identity
Genaro
Examines the social and developmental aspects of identity with a special focus on ethnicity. The social construction of culture, interpersonal functioning, ethnic group differences, and expectations will be explored as they relate to identity development. The course includes a field research component.
Prerequisite: Open to juniors and seniors who have taken two 200-level units-excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 348 Advanced Topics in Personality and Social Psychology
Check
An exploration of the interface between personality and social psychology. Areas of research that are best understood by considering both personal dispositions and social situations will be examined. Topics include: conformity, romantic relationships, and social anxiety.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 349 Seminar. Nonverbal Communication
NOT OFFERED IN 2006-07. An examination of the use of nonverbal communication in social interactions. Systematic observation of nonverbal behavior, especially facial expression, tone of voice, gestures, personal space, and body movement. Readings include scientific studies and descriptive accounts. Issues include: the communication of emotion; cultural and gender differences; the detection of deception; the impact of nonverbal cues on impression formation;
nonverbal communication in specific settings (e.g., counseling, education, interpersonal relationships).
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

**PSYC 350 Research or Individual Study**
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**PSYC 351 Internship in Psychology**
Staff
Participation in a structured learning experience in an approved field setting under faculty supervision. Analytical readings and paper(s) required.
Prerequisite: Open by permission to junior and senior majors. Two units above the 100-level that are most appropriate to the field setting as determined by the faculty supervisor (excluding 205).
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**PSYC 360 Senior Thesis Research**
Prerequisite: Completion of a research methods course by the end of the junior year, and by permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**PSYC 370 Senior Thesis**
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**Related Courses**
*For Credit Towards the Major*

**CLSC 300 Topics in Cognitive and Linguistic Sciences**

**Directions for Election**

**Psychology major:** Consists of at least 9.25 units, including 205, one research methods course, three 200-level courses (at least one course numbered 207-212 and at least one course numbered 215-219 and excluding any research methods courses), and two 300-level courses (at least one of which must be numbered 302-349 and excluding any research methods courses). For students who entered the college in Fall 2004 or later, 101 is also a required course for the major. PSYC 299 does not count as one of the nine courses for the major. At least five of the courses for the major must be taken in the department.

**Statistics:** 205 is the only Wellesley statistics course that will count toward the fulfillment of the major. In order to obtain Wellesley credit for a statistics course taken at another institution during the summer or academic year, approval must be obtained from the department prior to enrolling in the course. Transfer students wishing to obtain credit for statistics courses taken prior to enrollment at Wellesley should consult the chair of the department.

**Research Methods Requirement:** The department offers seven research methods courses: PSYC 306R, 307R, 310R, 312R, 314R, 320R and 324R. In order to be eligible for Senior Thesis Research (PSYC 360), students must complete the research methods course by the end of the junior year.

**Psychology minor:** Consists of five units, including one course at the 300 level and including 101 for students who enter the college in Fall 2004 or later. PSYC 299, 350, and 351 do not count as one of the five courses for the minor. At least three of the courses for the minor must be taken in the department.

**Related Interdepartmental Majors:** Students interested in an interdepartmental major in neuroscience or cognitive and linguistic sciences are referred to the catalog where these programs are described. They should consult with the directors of the neuroscience or cognitive and linguistic sciences programs.

**Advanced Placement Credit:** The unit given to students for advanced placement in psychology does not count towards the minimum psychology major or minor at Wellesley but it does fulfill the PSYC 101 requirement. If an AP student with a score of 5 completes PSYC 101, she will receive the appropriate psychology credit but will receive no AP credit.

Advanced placement credit for statistics does not exempt students from or fulfill the PSYC 205 requirement. An AP student with a score of 5 in statistics must still take 205 but can receive AP credit.

**Honors**
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

**Quantitative Reasoning Program**

**Director:** Taylor

**Lecturer:** Polito

**Advisory Committee:** Brubander (Geosciences), Ducas (Physics), Flynn (Chemistry), Genov (Psychology), Hawes (Education), Keene (Psychology), McGowan (Philosophy), Shuchat (Mathematics), Stark (Physics), Swingle (Sociology), Wolfson (Chemistry)

The ability to think clearly and critically about quantitative issues is imperative in contemporary society. Today, quantitative reasoning is required in virtually all academic fields, is used in most every profession, and is necessary for decision-making in everyday life. The Quantitative Reasoning Program is designed to ensure that Wellesley College students are proficient in the use of mathematical, logical, and statistical problem-solving tools needed in today's increasingly quantitative world.

The Quantitative Reasoning Program provides a number of services to the academic community. It oversees the administration of the Quantitative Reasoning Assessment (described below) and staffs QR 140, the basic skill QR course, and some QR overlay courses. The Program also provides tutorial support to students and instructors of quantitative reasoning overlay courses. Finally, the Quantitative Reasoning Program provides curricular support to faculty interested in modifying existing courses or designing new ones so that these courses will satisfy the overlay component of the quantitative reasoning requirement.

**The Quantitative Reasoning Requirement**

All students must satisfy both components of the quantitative reasoning requirement: (1) the basic skills component and (2) the overlay course component. The basic skills component is satisfied either by passing the quantitative reasoning assessment given during Orientation or by passing QR 140, the basic skills course that builds mathematical skills in the context of real-world applications. Students are required to satisfy the basic skills component in their first year so that they may enroll in the many courses for which basic quantitative skills (including algebra, geometry, basic probability and statistics, graph theory, estimation, and mathematical modeling) are a prerequisite.

The overlay component is satisfied by passing a QR overlay course or by scoring a 5 on the AP Statistics exam. QR overlay courses emphasize statistical analysis and interpretation of data in a specific discipline. The Committee on Curriculum and Instruction has designated specific courses in fields from across the curriculum as ones that satisfy the QR overlay requirement. These courses (listed below) may also be used to satisfy a distribution requirement. See the Statistics section of the catalog for more information about some of these QR overlay courses.
QR 140 Introduction to Quantitative Reasoning
Polito, Taylor
In this course, students develop and apply mathematical, logical, and statistical skills to solve problems in authentic contexts. The quantitative skills emphasized include algebra, geometry, probability, statistics, estimation, and mathematical modeling. Throughout the course, these skills are used to solve real world problems, from personal finance to medical decision-making. A student passing this course satisfies the basic skills component of the quantitative reasoning requirement. This course is required for students who do not pass the quantitative reasoning assessment. Those who pass the assessment but still want to enroll in this course must receive permission of the instructor.
Prerequisite: Permission of the instructor required for students with a score of 9.5 or above on the QR assessment.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

QR 180 Statistical Analysis of Education Issues
Taylor
What factors explain individual and group differences in student achievement test scores and educational attainment? Do inequities in financing public elementary and secondary schools matter in terms of student achievement and future employment? This course explores the theories and statistical methods used by social scientists and education researchers in examining these and other education issues. Analyzing data from the National Center for Education Statistics and other data sources, students evaluate issues including the importance of family and school resources, the effects of school tracking, and the returns to private versus public schools. In doing so, students learn to use a variety of statistical tools including regression analysis, and learn to use statistical software.
Prerequisites: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking ECON 103/SOC 190, MATH 101, MATH 101Z, POL 199, PSYC 205, or [QR 199].
Distribution: Social and Behavioral Analysis. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Spring
Unit: 1.0

Overlay Course Component
The following courses satisfy the overlay course component of the quantitative reasoning requirement. In order to register for a course on this list, a student must first satisfy the basic skills component of the quantitative reasoning requirement by passing either the quantitative reasoning assessment or QR 140.

Note that this list is subject to change. Check individual department listings for information about when each course is offered.

ASTR 109 Our Place in Space and Time
ASTR 206 Basic Astronomical Techniques with Laboratory
BISC 109 Human Biology with Laboratory
BISC 111 Introductory Organismal Biology with Laboratory
BISC 111DL Intensive Organismal Biology Laboratory
BISC 201 Ecology with Laboratory

Department of Religion
Professor: Elkins*, Geller (Chair), Hobbs, Kodera, Marini, Marlow
Visiting Associate Professor: Rollman
Assistant Professor: Bernat

REL 104 Study of the Hebrew Bible/Old Testament
Bernat
Critical introduction to the Hebrew Bible/Old Testament, studying its role in the history and culture of ancient Israel and its relationship to ancient Near Eastern cultures. Special focus on the fundamental techniques of literary, historical, and source criticism in modern scholarship, with emphasis on the Bible's literary structure and compositional evolution.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 105 Study of the New Testament
Hobbs
The writings of the New Testament as diverse expressions of early Christianity. Close reading of the texts, with particular emphasis upon the Gospels and the letters of Paul. Treatment of the literary, theological, and historical dimensions of the Christian scriptures, as well as methods of interpretation. The beginnings of the break between the Jesus movement and Judaism will be specially considered.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall, Spring
Unit: 1.0

REL 108 Introduction to Asian Religions
Marlow, Kodera
An introduction to the major religions of India, Tibet, China, and Japan with particular attention to universal questions such as how to overcome the human predicament, how to perceive ultimate reality, and what is the meaning of death and the end of the world. Materials taken from Islam, Hinduism, Buddhism, Confucianism, Taoism, and Shinto. Comparisons made, when appropriate, with Hebrew and Christian Scriptures.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall, Summer
Unit: 1.0

REL 200 Theories of Religion
Marini
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0
REL 211 Jesus of Nazareth
Hobbs
Historical study of Jesus, first as he is presented in the Gospels, followed by interpretations of him at several subsequent stages of Christian history. In addition to the basic literary materials, examples from the visual arts and music will be considered, such as works by Michelangelo, Grünewald, J. S. Bach, Beethoven, and Rouault, as well as a film by Pasolini. The study will conclude with the modern “quest for the historical Jesus.” Normally alternates with REL 209.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 215 Christian Spirituality
Elkins
NOT OFFERED IN 2006-07. A study of historical and contemporary texts that exemplify varieties of Christian spirituality. Historical works read include Augustine’s Confessions, Thomas à Kempis’ The Imitation of Christ, Teresa of Avila’s Autobiography, Banyak’s The Pilgrim’s Progress, and The Way of the Pilgrim. Contemporary authors include Martin Luther King, Jr., Thomas Merton, and Kathleen Norris. Normally alternates with REL 216.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 216 Christian Thought: 100-1600
Elkins
NOT OFFERED IN 2006-07. A study of major issues and influential thinkers in the Christian religious tradition from the post-Biblical period through the Reformation. Good and evil, free will and determinism, orthodoxy and heresy, scripture and tradition, faith and reason, and love of God and love of neighbor examined through primary source readings. Special attention to the diversity of traditions and religious practices, including the cult of saints, the veneration of icons, and the use of scripture. Normally alternates with REL 215.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 217 Christian Thought from the Reformation to the Present
Marini
A study of defining issues and essential thinkers in the Christian religious tradition from the sixteenth century to the present. Faith and grace, free will and determinism, mysticism and rationalism, reason and emotion, secularization and existentialism, orthodoxy and doubt, religious morality and social action examined through primary source readings. Readings include works by Luther, Calvin, Pascal, Locke, Wesley, Newman, Kierkegaard, Bonhoeffer, and TULLIC.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 218 Religion in America
Marini
A study of the religions of Americans from the colonial period to the present. Special attention to the impact of religious beliefs and practices in the shaping of American culture and society. Representative readings from the spectrum of American religions including Aztecs and Conquistadors in New Spain, the Puritans, Jonathan Edwards and John Wesley, Ralph Waldo Emerson, Isaac Mayer Wise, Mary Baker Eddy, Dorothy Day, Black Elk, Martin Luther King, Jr., and contemporary fundamentalists. Normally alternates with REL 220.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 220 Religious Themes in American Fiction
Marini
NOT OFFERED IN 2006-07. Human nature and destiny, good and evil, love and hate, loyalty and betrayal, tradition and assimilation, salvation and damnation, God and fate in the writings of Hawthorne, Thoreau, Melville, Harriet Beecher Stowe, Leslie Marmon Silko, Rudolfo Anaya, Alice Walker, and Allega Goodman. Reading and discussion of these texts as expressions of the diverse religious cultures of nineteenth- and twentieth-century America, with a postscript on the popular contemporary Protestant fundamentalist fiction of Tim LaHaye. Normally alternates with REL 218.
Prerequisite: None
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 221 Catholic Studies
Elkins
NOT OFFERED IN 2006-07. Contemporary issues in the Roman Catholic Church, with particular attention to the American situation. Topics include sexual morality, social ethics, spirituality, women’s issues, dogma, liberation theology, ecumenism, and inter-religious dialogue. Readings represent a spectrum of positions. Normally alternates with REL 226.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 225 Women in Christianity
Elkins
NOT OFFERED IN 2006-07. Martyrs, mystics, witches, wives, virgins, reformers, and ministers: a survey of women in Christianity from its origins until today. Focus on women’s writings, both historical and contemporary. Special attention to modern interpreters—feminists, Third-World women, and women of color.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 226 The Virgin Mary
Elkins
NOT OFFERED IN 2006-07. The role of the Virgin Mary in historical and contemporary Christianity. Topics include Mary in the Bible and Apocryphal writings, her cult in the Middle Ages, artistic productions in her honor, theological debates about her, and her appearances at Guadalupe, Lourdes, and Fatima. Attention also to the relation between concepts of Mary and attitudes toward virginity, the roles of women, and the “feminization of the deity.” Normally alternates with REL 223.
Prerequisite: None. Not open to students who have taken REL 316.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 230 Ethics
Marini
NOT OFFERED IN 2006-07. An inquiry into the nature of values and the methods of moral decision-making. Examination of selected ethical issues including self-interest, freedom, collective good, capitalism, just war, racism, environmental pollution, globalism, and religious morality. Introduction to case study and ethical theory as tools for determining moral choices. Normally alternates with REL 200.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 240/CLCV 240 Romans, Jews, and Christians in the Roman Empire
Geller and Rogers (History, Classical Studies)
At the birth of the Roman Empire virtually all of its inhabitants were practicing polytheists. Three centuries later, the Roman Emperor Constantine
REL 245 The Holocaust and the Nazi State

Geller

An examination of the origins, character, course, and consequences of Nazi anti-Semitism during the Third Reich. Special attention to Nazi racialist ideology, and how it shaped policies which affected such groups as the Jews, the disabled, the Roma and the Sinti, Poles and Russians, Afro-Germans, homosexuals, and women. Consideration also of the impact of Nazism on the German medical and teaching professions.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 248 The Dead Sea Scrolls

Bernat

A study of the documents and archaeology of the Dead Sea Scrolls. Survey of major text genres, such as law, community organization, scriptural interpretation, prayer, amulets and coded treasure maps. Focus upon key archaeological matters, including the physical geography of the Dead Sea region, the "Essene" settlement structure, art and architecture, ritual baths, religious artifacts, and objects of daily use — weaponry, cosmetics and writing tools. The scrolls and material culture will be examined in their own right and in terms of their relationship to the broader history of Judaism in the Roman Era, Rabbinic Literature, and the New Testament.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 250 Research or Individual Study

Prerequisite: Open to first-year students and sophomores only.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

REL 250R Research or Individual Study

Prerequisite: Open to first-year students and sophomores only.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

REL 251 Religion in South Asia

Marlow

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 253 Buddhist Thought and Practice

Kodera

NOT OFFERED IN 2006-07. A study of Buddhist views of the human predicament and its solution, using different teachings and forms of practice from India, Southeast Asia, Tibet, China, and Japan. Topics including the historic Buddha’s sermons, Buddhist psychology and cosmology, meditation, bodhisattva career, Tibetan Tantrism, Pure Land, Zen, and dialogues with and influence on the West. Normally alternates with REL 257.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 254 Chinese Thought and Religion

Kodera

NOT OFFERED IN 2006-07. Continuity and diversity in the history of Chinese thought and religion from the ancient sage-kings of the third millennium B.C.E. to the present. Topics include: Confucianism, Taoism, Chinese Buddhism, folk religion, and their further developments and interaction. Materials drawn from philosophical and religious and literary works. Normally alternates with REL 255.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 255 Japanese Religion and Culture

Kodera

Constancy and change in the history of Japanese religious thought and its cultural and literary expression from the prehistoric "age of the gods" to contemporary Japan. An examination of Japanese indebtedness to, and independence from, Korea and China, assimilation and rejection of the West, and preservation of indigenous tradition. Topics include: Shinto, distinctively Japanese interpretations of Buddhism, neo-Confucianism, their role in modernization and nationalism, Western colonialism, and modern Japanese thought as a crossroad of East and West. Normally alternates with REL 254.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 256 Islamic Civilization

Marlow

NOT OFFERED IN 2006-07. Historical survey of Muslim societies and Islamic cultural forms from the seventh century till the beginnings of the modern period. Topics include literary and artistic expression, architecture, institutions, philosophical and political thought, religious thought and practice. Readings from Arabic, Persian, Turkish, and Urdu literature in English translation. Normally alternates with REL 262.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 257 Contemplation and Action

Kodera

An exploration of the relationship between the two polar aspects of being religious. Materials drawn from across the globe, both culturally and historically. Topics include: self-cultivation and social responsibility, solitude and compassion, human frailty as a basis for courage, anger as an expression of love, non-violence, western adaptations of eastern spirituality, meditation and the environmental crisis. Readings selected from Confucius, Gautama Buddha, Ryokan, Mahatma Gandhi, Abraham Heschel, Dag Hammarskjöld, Simone Weil, Thomas Merton, Thich Nhat Hau, Henri Nouwen, Beverly Harrison, Benjamin Hoff, Reuben Habito, and others. Normally alternates with REL 253.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 260 Islamic Civilization

Marlow

NOT OFFERED IN 2006-07. Historical survey of Muslim societies and Islamic cultural forms from the seventh century till the beginnings of the modern period. Topics include literary and artistic expression, architecture, institutions, philosophical and political thought, religious thought and practice. Readings from Arabic, Persian, Turkish, and Urdu literature in English translation. Normally alternates with REL 262.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0
REL 261 Cities of the Islamic World
Minor/Minor
An exploration of the religious and cultural history of selected cities across the Islamic world from late antiquity to the present. The course will examine and critique the concept of 'the Islamic city' while focusing on the study of particular cities, including Damascus, Baghdad, Cairo, Istanbul, Isfahan, Samarqand, Lucknow and Lahore. Topics include migration, settlement, and the construction of new cities; conversion; the emergence of 'holy cities' as centres for pilgrimage, religious education and Islamic legal scholarship; sacred space and architecture; religious diversity in urban environments; and the impact of colonialism on urban life. Normally alternates with REL 269.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 298 New Testament Greek
Hobbs
Reading and discussion of many characteristic New Testament texts, with attention to aspects of Koine Greek which differ from the classical Attic dialect.
Prerequisite: Year one of Greek, or exemption examination or permission of instructor.
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 303 Seminar. The Sacrifice of the Beloved Child in the Bible and Its Interpretations
Bertini
The biblical tale of the near sacrifice of Isaac (Genesis 22) and its ongoing historical and cultural significance. Focus on this core narrative, and human sacrifice more broadly, in its biblical, ancient Near Eastern, and Mediterranean contexts. Examination of the Genesis narrative in Jewish, Christian, and Islamic traditions. Exploration of the relevant motifs in the literature and art of the West from the Middle Ages to the present. Normally alternates with REL 305.
Prerequisite: At least one course on the Bible or permission of instructor.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 305 Seminar. The Book of Genesis
Bertini
NOT OFFERED IN 2006-07. The Book of Genesis contains the foundational biblical narratives: creation of the world, flood, growth of humanity and Israel's ancestral accounts. The work will be approached from a literary and historical-critical point of view, with reference to relevant Ancient Near Eastern mythology. Normally alternates with REL 303.
Prerequisite: At least one course on the Bible or permission of instructor. Not open to students who have taken [305].
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 308 Seminar. Paul's Letter to the Romans
Hobbs
An exegetical examination of the 'Last Will and Testament' of the Apostle Paul, concentrating especially on his theological construction of the Gospel, on his stance vis-à-vis Judaism and its place in salvation-history, and on the theology of his opponents as revealed in his letters. Normally alternates with REL 310.
Prerequisite: At least one course on the Bible.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 310 Seminar. Mark, the Earliest Gospel
Hobbs
NOT OFFERED IN 2006-07. An exegetical examination of the Gospel of Mark, with special emphasis on its character as a literary, historical, and theological construct, presenting the proclamation of the Gospel in narrative form. The Gospel's relationships to the Jesus tradition, to the Old Testament/Septuagint, and to the Christological struggles in the early church will be focal points of study. Normally alternates with REL 308.
Prerequisite: At least one course on the Bible.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 317 Seminar. Christian Ritual
Marini
NOT OFFERED IN 2006-07. An intensive study of selected Christian ritual practices from the apostolic period to the present. Topics include the origins of Christian liturgy; the doctrines of baptism and eucharist; the development of the Roman Mass and the Orthodox Divine Liturgy; Protestant worship reforms in the Reformation; Evangelical revivalism; Pentecostal charismatic expression; and liturgical innovation in Third World Christianity. Particular attention to musical and architectural settings, liturgical and hymnic language, and ritual theory. Normally alternates with REL 319.
Prerequisite: 216, 217, or 218, or MUS 200 or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 319 Seminar. Religion, Law, and Politics in America
Marini
A study of the relationships among religion, fundamental law, and political culture in the American experience. Topics include established religion in the British colonies, religious ideologies in the American Revolution, religion and rebellion in the Civil War crisis, American civil religion, and the New Religious Right. Special attention to the separation of church and state and selected Supreme Court cases on the religious clauses of the First Amendment. Normally alternates with REL 317.
Prerequisite: 200, 217, or at least one 200-level course in American religion, history, sociology, or politics.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 323 Seminar. Feminist Theologies
Elkins
NOT OFFERED IN 2006-07. Feminist reassessments of traditional images of God in Christianity. Consideration also of alternative concepts of divinity coming from ecofeminists, lesbians, and the goddess movement. Special attention to womanist and mujerista theologies, and to the contributions of African American, Asian American, and Latina authors. Normally alternates with REL 326.
Prerequisite: One course in Hebrew Bible, New Testament, or Christianity or permission of instructor.
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

REL 326 Seminar. Liberation Theology
Elkins
NOT OFFERED IN 2006-07. A close reading of recent works by major Latin American and Hispanic liberation theologians. Some attention also to Asian, African, and African American authors. Normally alternates with REL 323.
Prerequisite: One course in Hebrew Bible, New Testament, or Christianity or permission of instructor.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0
REL 342 Seminar. Archaeology of the Biblical World
Geller
NOT OFFERED IN 2006-07. An examination of the ways in which archaeological data contribute to the understanding of the history of ancient Israel, and the Jewish and Christian communities of the Roman Empire.
Prerequisite: At least one course in archaeology, biblical studies, classical civilization, early Christianity, or early Judaism.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

REL 350 Research or Individual Study
Prerequisite: Open to juniors and seniors only.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

REL 350H Research or Individual Study
Prerequisite: Open to juniors and seniors only.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

REL 353 Seminar. Zen Buddhism
Kodera
NOT OFFERED IN 2006-07. Zen, the long known yet little understood tradition, studied with particular attention to its historical and ideological development, meditative practice, and expressions in poetry, painting, and martial arts. Normally alternates with REL 354.
Prerequisite: At least one course in Asian religions.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 354 Seminar. Tibetan Buddhism
Kodera
NOT OFFERED IN 2006-07. A critical, historical and comparative study of Buddhism that unfolded in the unique geographical, historical, cultural and religious climate of Tibet, and of the Tibetan communities in diaspora after the Communist Chinese takeover. Topics include: pre-Buddhist religions of Tibet; development of the Vajrayana teaching and the Tantric practice; the cult of Tārā; Avalokitesvara Bodhisattva and the Dalai Lama; the plight of the Tibetan lamas and refugees in India and in the West; continuing controversy in China; the appeal and misunderstanding of Tibetan and Tibetan Buddhism in the West; the future of Tibet and Tibetan Buddhism. Normally alternates with REL 353.
Prerequisite: At least one course in Asian religions. Not open to students who took this course as REL 353 in 2005-06.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 357 Seminar. Issues in Comparative Religion
Kodera
Promises and challenges in the evolving debate over how different truth claims and faith communities might seek tolerance, respect, and coexistence. How to reconcile tradition with innovation, doctrine with practice, contemplation with action, globalization with tribalism. Impediments of monotheism and "revealed scripture." The role of religion in prejudice and discrimination. The rise of Buddhism in the West and of Christianity in the East. Readings include works by Wilfred Cantwell Smith, John Hick, Uchimura Kanzo, Endo Shusako, Raimundo Panikkar, Thich Nhat Hanh, the Dalai Lama, and Diana Eck.
Prerequisite: At least one course in religion.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

REL 361 Seminar. Studying Islam and the Middle East
Marlow
NOT OFFERED IN 2006-07. An exploration of the study and representation of Islam and West Asia/the Middle East in European and American scholarship and journalism, from the earliest translations of the Qur'an to contemporary issues and debates. Topics include medieval European images of Islam, Orientalism, colonialism, and also the modern press and popular culture.
Prerequisite: Open to juniors and seniors, and sophomores who have taken at least one unit in Middle Eastern Studies. Distribution: Historical Studies
Semester: N/O
Unit: 1.0

REL 362 Seminar. Religion and State in the Islamic World
Marlow
NOT OFFERED IN 2006-07. The relationship between religious authority and political legitimacy in the Islamic world from the seventh century to the present. Issues in the more modern period include the problem of justice and the emergence of distinct Sunni and Shi'i ideas of religio-political authority. Issues in the modern period include modernist, secularist, and "fundamentalist" conceptions of religion's role in the nation state. Normally alternates with REL 263.
Prerequisite: Open to juniors and seniors.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 364 Seminar. Sufism: Islamic Mysticism
Marlow
An interdisciplinary exploration of the diverse manifestations of mysticism in Islamic contexts. Topics include the experiences and writings of individual Sufis, including Rabi'a, al-Junayd, Hujwiri, Ibn al-'Arabi, Jalal al-Din Rumi, 'Abd al-Qadir Gilani, Ruzbihan Baqli; the formation of Sufi organizations and development of mystical paths; the place of Sufism in Islamic legal, theological and philosophical traditions as well as in Muslim religious practice; Sufism in local contexts; both urban and rural; holy men and women; Sufism's permeation of artistic and aesthetic traditions, especially poetry and music; the reception, interpretations and practices of Sufism in Western countries. Normally alternates with REL 367.
Prerequisite: Open to juniors and seniors, students who have taken at least one unit in Middle Eastern Studies or Religion, and by permission of the instructor.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 367 Seminar. Muslim Travellers
Marlow
NOT OFFERED IN 2006-07. An exploration of the experiences and writings of Muslim travelers from the Middle Ages to the present in West, South, East and Central Asia, North Africa, Europe and America. Focus on the wide range of cultural encounters facilitated by journeys for purposes of pilgrimage, study, diplomacy, exploration, migration and tourism, and on the varied descriptions of such encounters in forms of literary expression associated with travel, including poetry, pilgrimage manuals, narrative accounts, letters, memoirs, and graffiti. Authors include Biruni, Ibn Jubyaj, Ibn Battuta, Euliya Celebi, al-Tahtawi, Farahani, Abu Talib Khan, Asayesh. Normally alternates with REL 364.
Prerequisite: Open to juniors and seniors, students who have taken at least one unit in Middle Eastern Studies, and by permission of the instructor.
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

REL 399 Religion Department Colloquium
Geller
Monthly meeting of religion department faculty, majors, and minors throughout the academic year for presentation and discussion of student research. Strongly recommended for departmental majors and minors. Students must complete both semesters to receive 0.5 units of credit. Mandatory credit/non credit.
Prerequisite: Open to senior religion majors and minors. See Directions for Election.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall, Spring
Unit: 0.5

Related Courses
For Credit Towards the Major
Students wishing to take related courses for their major or minor outside the department must obtain approval of their advisor in advance.

Directions for Election
In a liberal arts college, the study of religion constitutes an integral part of the humanities and social sciences. Recognizing religion as an essential expression of human life and culture, past and present, the department offers courses in the major religious traditions of the world. These courses examine both the individual and the collective dimensions of religion and approach their subject from a variety of perspectives including historical, textual, theological, and social scientific.

The major consists of a minimum of nine units, at least two of which must be at the 300-level, including a seminar, and no more than two 100-level courses. A maximum of three courses taken outside the Department may be counted toward the major, no more than two of which may be taken at an institution other than Wellesley.

The major requires both a concentration in a specific field of study and adequate exposure to the diversity of the world's religions and cultures. To ensure depth, a major must present a
Department of Russian

Associate Professor: Hodge (Chair), Weiner
Lecturer: Bishop
Instructor in Russian Language: Epstein

RUSS 101 Elementary Russian I
Hodge
Introduction to Russian grammar through oral, written, and reading exercises; special emphasis on oral expression. Four periods.
Prerequisite: None
Distribution: None
Semester: Fall, Wintersession, Summer
Unit: 1.0

RUSS 102 Elementary Russian II
Hodge
Continued studies in Russian grammar through oral, written, and reading exercises; special emphasis on oral expression; multimedia computer exercises. Four periods.
Prerequisite: RUSS 101 or equivalent
Distribution: None
Semester: Spring, Summer
Unit: 1.0

RUSS 125 WRIT 115 Great Short Stories from Russia (in English)
Weiner
Russian literature has given the world some of the best stories ever told, and this course surveys two centuries’ worth of them. Someone once quipped that all of twentieth-century Russian literature came out of Nikolai Gogol’s “Nose.” And so we begin with “The Nose” and other ridiculous stories by Gogol. We will go on to read some of the finest short stories of Chekhov, and the Nobel Prize winner Ivan Bunin. The grotesque realism of Isaac Babel’s stories and the magical realism of Vladimir Nabokov’s also lie within the scope of this course. We will conclude with the late- and post-Soviet stories of Tatiana Tolstaya and Liudmila Petrushevskaya. No prior knowledge of Russian language or literature is required. This course satisfies the requirements for Writing 125. Three periods.
Prerequisite: None, Open only to first-year students.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

RUSS 201 Intermediate Russian I
Bishop
Conversation, composition, reading, music, comprehensive review of grammar; special emphasis on speaking and writing idiomatic Russian. Students learn and perform a play in Russian in the course of the semester. Four periods.
Prerequisite: RUSS 201 or equivalent
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

RUSS 202 Intermediate Russian II
Bishop
Conversation, composition, reading, popular music, continuation of grammar review; special emphasis on speaking and writing idiomatic Russian. Students read unadapted short stories by Pushkin and Zamyatin and view classic films such as Briliantovaiata ruka. Four periods.
Prerequisite: RUSS 201 or equivalent
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

RUSS 250 Research or Individual Study
Prerequisite: Open by permission to qualified students.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

RUSS 250H Research or Individual Study
Prerequisite: Open by permission to qualified students.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

RUSS 251 The Nineteenth-Century Russian Classics: Passion, Pain, Perfection (in English)
Hodge
Survey of Russian fiction from the Age of Pushkin (1820s–1830s) to Tolstoy’s mature work (1870s) focusing on the role of fiction in Russian history, contemporaneous critical reaction, literary movements in Russia, and echoes of Russian literary masterpieces in the other arts, especially film and music. Major works by Pushkin (Eugene Onegin, “The Queen of Spades”), Lermontov (A Hero of Our Time), Gogol (Dead Souls, “The Overcoat”), Pavlova (A Double Life), Turgenev (Friends and Sons), Tolstoy (Anna Karenina), and Dostoevsky (Crime and Punishment) will be read. Taught in English. Two periods.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

RUSS 255 Soviet and Russian Film (in English)
Bishop
The masterpieces of Russian film from the 1920s to the present day will be screened, analyzed, and discussed. Students will explore the famous techniques and themes developed by legendary Russian/Soviet filmmakers, including Eisenstein, Vertov, Tarkovsky, and Mikhailov. We will treat these films as works of art, examining the ways in which directors, like authors of novels and other literary genres, create a fictional world. Guest lecturers will comment on specific issues. Taught in English. Two periods.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

RUSS 272 Politically Correct: Ideology and the Nineteenth-Century Russian Novel (in English)
Hodge
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Is there a “politically correct” set of responses for artists active under a repressive regime? We examine various Russian answers to this question through an intensive analysis of the great ideological novels at the center of Russia’s historic social debates from the 1840s through the 1860s. The tension between literary Realism and political exigency will be explored in the fictional and critical works of Herzen, Turgenev, Chernyshevsky, Goncharov, Dobroliubov, Dostoevsky, and Pisarev. Representative works from the nonliterary arts will supplement reading and class discussion. Taught in English. Two periods.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O. Offered in 2007-08.
Unit: 1.0

RUSS 276 Fedor Dostoevsky: The Seer of Spirit (in English)
Weiner
Probably no writer has been so detested and adored, so demonized and deified, as Dostoevsky. This artist was such a visionary that he had to
reinvent the novel in order to create a form suitable for his insights into the inner life and his prophecies about the outer. To this day readers are mystified, outraged, enchanted, but never unmoved, by Dostoevsky’s fiction, which some have tried to brand as “novel-tragedies,” “romantic realism,” “polyphonic novels,” and more. This course challenges students to enter the fray and explore the mysteries of Dostoevsky himself through study of his major writings. Taught in English. Two periods.

Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

RUSS 277 Lev Tolstoy: Russia’s Ecclesiast (in English)
Hodge
An odyssey through the fiction of the great Russian novelist and thinker, beginning with his early works (Sevastopol Stories) and focusing on War and Peace and Anna Karenina, though the major achievements of Tolstoy’s later period will also be included (A Confession, The Death of Ivan Ilych). Lectures and discussion will examine the masterful techniques Tolstoy employs in his epic explorations of human existence, from mundane detail to life-shattering cataclysm. Important film adaptations of Tolstoy’s works, including Bondarchuk’s monumental War and Peace (1967), will be screened. Students are encouraged to have read the Maude translation of War and Peace (Norton Critical Edition) before the semester begins. Taught in English. Two periods.

Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

RUSS 282 From Russia With Love: Family and Sexuality in Twentieth-Century Russian Literature (in English)
Bishop
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Tolstoy famously wrote, “All happy families are alike; each unhappy family is unhappy in its own way.” Beginning with his controversial novel, The Kreutzer Sonata, we will discuss love and family in Russian literature, a problem which becomes particularly complicated in the twentieth century. We will explore issues of androgyny in the writings of the symbolists, the regimentation of sex in Zamiatin’s anti-utopian novel We, questions of disease and sterility in Solzhenitsyn’s Cancer Ward, and adultery in Pasternak’s Dr. Zhivago. We will revisit the eternal literary theme of generational conflict, specifically in the form of mothers and daughters in the writings of Tsvetaeva and Petrushevskaya. We will also view and analyze films such as Bed and Soft and Commissar. Taught in English. Two periods.

Prerequisite: None
Distribution: Language and Literature
Semester: N/O. Offered in 2007-08
Unit: 1.0

RUSS 286 Vladimir Nabokov (in English) Weiner
An examination of the artistic legacy of the great novelist, critic, lepidopterist, and founder of the Wellesley College Russian department. Nabokov’s works have joined the canon of twentieth-century classics in both Russian and English literature. Students will explore Nabokov’s English-language novels (Lolita, Pnin, Pale Fire) and the authorized English translations of his Russian

works (The Defense, Despair, Invitation to a Beheading). Taught in English. Two periods.

Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

RUSS 301 Advanced Russian: Moscow Epstein
Students will become experts in one of the great overarching themes of Russian culture: Moscow. We will read and discuss texts, view films, listen to music, and compose essays on the theme of Russia’s historic capital. The course includes study of grammar, vocabulary expansion with strong emphasis on oral proficiency and comprehension. At the end of the semester each student will write a final paper and present to the class her own special research interest within the general investigation of Moscow’s history, traditions, culture, and art. Taught in Russian. Three periods.

Prerequisite: 201-202 or the equivalent
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

RUSS 302 Advanced Russian: St. Petersburg Weiner
An inquiry into the unique history, traditions, and myth of St. Petersburg. Students will explore Russia’s second capital through readings, films, and song. Special emphasis will be placed on oral proficiency. Each student will pursue her special research interest throughout the course and give an oral presentation on it at the end of the semester. Taught in Russian. Three periods.

Prerequisite: 301 or the equivalent
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

RUSS 320 Children and Laughter in Russia (in Russian) Epstein
Students will enter the world of Russian children’s folklore, literature, songs, film, and animation. We will start with lullabies and verbal games and tales by Pushkin and Tolstoy. We will then examine the contribution of Soviet authors from the early 1920s to the late 1980s such as V. Maikovsky, K. Chukovsky, S. Marshak, D. Kharmas, M. Zoshchenko, A. Gaidar, N. Nosov, and E. Uspensky and their effect on the aesthetic development and ethical upbringing of Soviet children. The course emphasizes oral proficiency, extensive reading and weekly writing assignments. Students will write and present a final paper on their own special research interest. Taught in Russian. Two periods.

Prerequisite: 301 or the equivalent
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

RUSS 333 Nineteenth-Century Russian Narrative Poetry: Tales of Mystery and Adventure (in Russian) Hodge
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Students will immerse themselves in the famous poetry of Derzhavin, Zhukovskii, Pushkin, Batarynski, Kozlov, Lermontov, and Nekrasov, analyzing ballads and verse tales devoted to the natural and the supernatural. Exotic “Oriental” cultures as well as high and low Russian culture serve as the backdrop for these dramatic verse narratives. Russian painting, music, and history will enrich our discussions of Russian Romanticism in the poetry.

Prerequisite: 301 or 302 as prerequisite or corequisite
Distribution: Language and Literature
Semester: N/O. Offered in 2007-08
Unit: 0.5

RUSS 350 Research or Individual Study
Prerequisite: Open by permission to qualified students. Distribution: None
Semester: Fall, Spring
Unit: 1.0

RUSS 350H Research or Individual Study
Prerequisite: Open by permission to qualified students. Distribution: None
Semester: Fall, Spring
Unit: 0.5

RUSS 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions. Distribution: None
Semester: Fall, Spring
Unit: 1.0

RUSS 370 Senior Thesis
Prerequisite: 360 and permission of department. Distribution: None
Semester: Fall, Spring
Unit: 1.0

RUSS 376 Fedor Dostoevsky’s Short Stories (in Russian) Weiner
NOT OFFERED IN 2006-07. OFFERED IN 2008-09. A Russian-language course designed to supplement 276 above, though 376 may be taken independently. Students will read and discuss in Russian, major short works by Dostoevsky. One period.

Prerequisite: 301 or 302 as prerequisite or corequisite. Distribution: Language and Literature
Semester: N/O. Offered in 2008-09
Unit: 0.5

RUSS 382 The Silver Age of Russian Poetry (in Russian) Bishop
NOT OFFERED IN 2006-07. OFFERED IN 2007-08. A Russian-language course designed to supplement 282 above, though 382 may be taken independently. Students will read and discuss in Russian, poetry of the symbolists, acmeists, futurists, Pasternak and Tsvetaeva. Taught in Russian. One period.

Prerequisite: 301 or 302 as prerequisite or corequisite. Distribution: Language and Literature
Semester: N/O. Offered in 2007-08
Unit: 0.5

RUSS 386 Vladimir Nabokov’s Short Stories (in Russian) Weiner
A Russian-language course designed to supplement 286 above, though 386 may be taken independently. Students will read and discuss in Russian, major short works by Nabokov. One period.

Prerequisite: 301 or 302 as prerequisite or corequisite. Distribution: Language and Literature
Semester: Fall
Unit: 0.5

Related Courses
For Credit Towards the Major

CPLT 284 Magical Realism: Russia and Beyond

Directions for Election
Students majoring in Russian should consult the chair of the department early in their college careers. For information on all facets of the Russian department, please visit www.wellesley.edu/Russian/rusdept.html.
Students who cannot take RUSS 101 during the fall semester are strongly encouraged to take 101 during Wintersession or Summer School; those interested in doing so should consult the chair early in the fall term.

Advanced courses on Russian literature and culture are given in English translation at the 200 level; corresponding 300-level courses offer supplemental reading and discussion in Russian. Please refer to the descriptions for 376, 382, and 386 above.

The Major in Russian Language and Literature
A student majoring in Russian Language and Literature must take at least eight units in the department above RUSS 102, including:

1. language courses through 302;
2. RUSS 251;
3. two 200-level courses above 251; and
4. one unit of 300-level coursework above 302 other than 350, 360, and 370.

RUSS 101 and 102 are counted toward the degree but not toward the Russian major.

Thus, a student who begins with no knowledge of Russian would typically complete the following courses to major in Russian: 101 and 102, 201 and 202, 301 and 302; 251; two 200-level literature courses above 252; and one unit from 300-level literature courses, including 320.

The Minor in Russian Language
A student minor in Russian must take at least five units in the department above RUSS 102, at least one of which must be at the 300 level.

Honors, Study Abroad
Students may graduate with honors in Russian either by writing a thesis or by taking comprehensive examinations. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students electing to take comprehensive examinations have a series of non-credit-bearing weekly tutorials on four special topics in Russian literature or culture (or both) over the entire course of their senior year; these topics must be chosen under the guidance of the chair and will normally be related to the coursework the student has completed; at the end of the student's final semester at Wellesley, she takes six written examinations over the course of one week: four on her special topics, and two language examinations. Students who wish to attempt the honors exercise should consult the chair early in the second semester of their junior year. See Academic Distinctions.

Majors are encouraged to enroll in summer language programs to accelerate their progress in the language. Credit toward the major is normally given for approved summer or academic-year study at selected institutions in the U.S. and Russia. Major credit is also given for approved junior year abroad programs.

Russian Area Studies
Students interested in an interdepartmental major in Russian area studies are referred to the following and should visit the Russian area studies Web pages at www.wellesley.edu/Russian/RAS/rashome.html. Attention is called to Russian area studies courses in history, economics, political science, anthropology, and sociology.

Russian Area Studies

AN INTERDEPARTMENTAL MAJOR

Director: Tunmarkin (History)
Advisory Committee: Hodge (Russian), Kohl (Anthropology), Tunmarkin (History), Wener (Russian)

Russian Area Studies majors are invited to explore Russia and the lands and peoples of the former Soviet Union through an interdisciplinary study program.

A major in Russian Area Studies consists of a minimum of eight units. Majors are normally required to take four units of the Russian language above the 100 level: RUSS 201-202 and RUSS 301-302. In addition, a major's program should consist of at least four non-language units drawn from Russian history, literature, and politics, as well as relevant courses in anthropology and comparative literature (see listings below). At least three of a major's units should come from outside the Russian department. Prospective majors are strongly encouraged to take HIST 211 (Bread and Salt: Introduction to Russian Civilization) as a basic introduction to Russian Area Studies.

Majors are encouraged to take advantage of various programs of study in the former Soviet Union, including the opportunity to spend a semester or year on exchange at a university in Russia or one of the other former Soviet republics. Majors who are contemplating postgraduate academic or professional careers in Russian Area Studies are encouraged to consult with faculty advisors, who will assist them in planning an appropriate sequence of courses. For more information on the Russian Area Studies program, students may consult the Wellesley College Russian Area Studies Web pages: www.wellesley.edu/Russian/RAS/rashome.html.

Honors
Seniors who wish to graduate with Honors in the major must write an Honors thesis. Applicants for Honors must have minimum 3.5 GPA in the major (in courses above the 100 level). Interested students should discuss their ideas and plans with their advisor, the program chair, or a member of the advisory committee as early as possible in their junior year.

The following courses are available for majors in Russian Area Studies:

RAST 211/ANTH 211 Wintersession Program in the Republic of Georgia
Kohl (Anthropology)

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Students travel to Tbilisi, Georgia for Wintersession. They attend lectures in English at Tbilisi State University on Georgian history, language and culture and on contemporary political developments there and visit sites of historical interest in and around Tbilisi. They live with Georgian families and spend three weeks completing a self-designed internship with a local organization. Students may register for either RAST 211 or ANTH 211 and credit will be granted accordingly. Not offered every year. Subject to Dean's office approval.

Prerequisite: One course in Russian area studies or anthropology. Application required.
Distribution: Social and Behavioral Analysis or Historical Studies
Semester: N/A. Offered in 2007-08. Unit: 0.5

RAST 212/ES 212 Lake Baikal: The Soul of Siberia (Offered in 2006-07)
Moore (Biology) and Hodge (Russian)

The ecological and cultural values of Lake Baikal -- the oldest, deepest, and most biotically rich lake on the planet -- are examined. Lectures and discussion in spring prepare students for the three-week field laboratory taught at Lake Baikal in eastern Siberia in August. Lectures address the fundamentals of aquatic ecology and the role of Lake Baikal in Russian literature, history, art, music, and the country's environmental movement. Laboratory work is conducted primarily out-of-doors and includes introductions to the flora and fauna, field tests of student-generated hypotheses, meetings with the lake's stakeholders, and tours of ecological and cultural sites surrounding the lake. This course does not count toward the minimum major in biological sciences. This course can count toward a concentration in environmental science or as an elective for the other concentrations. Students may register for either RAST 212 or ES 212 and credit will be granted accordingly. Not offered every year. Subject to Dean's office approval.

Prerequisite: BISC 111, RUSS 101, and permission of the instructors. Preference will be given to students who have also taken HIST 211. Application required.
Distribution: Natural and Physical Science
Semester: Spring and Summer
Unit: 1.25

RAST 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

RAST 360 Senior Thesis Research
Prerequisite: By permission of director. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

RAST 370 Senior Thesis
Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

SOC 102 The Sociological Perspective: An Introduction to Sociology
Cuba, Rutherford
Thinking sociologically enables us to understand the intersection of our individual lives with larger social issues and to grasp how the social world works. Students in this course will become familiar with the background of sociology and the core analytical concepts employed by sociologists. Students will also gain familiarity with the major substantive topics explored by sociology, with focused attention given to the study of cultural formation, social identities, social control, social inequality, and globalization.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 103 Social Problems of Youth: An Introduction to Sociology
Imber
Perspectives on the creation of and response to the problems of young people. The problem of generations and relations between young and old. Perceptions of personal freedom and social responsibility with respect to public issues that directly affect youth including alcohol, tobacco, drugs, gambling, guns, and sexuality.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 105 Doing Sociology – Applying Sociological Concepts to the Real World
Levitt
The goal of this course is to learn to analyze real life situations using sociological tools. The course is organized around a series of exercises that will teach students different analytical techniques and explore sociological theories and concepts. Projects may include reading novels, analyzing films, working with census data, interviewing, conducting surveys, participant observation, debating, and a small independent research project. Each project will focus on a sub-field in the discipline and will serve as a platform from which students can explore basic theories, analytic categories, and methods. Students will work individually, in pairs, and in small groups.
Prerequisite: Open to first-year students only.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 108 A Global Perspective: An Introduction to Sociology
NOT OFFERED IN 2006-07. How are your personal problems related to larger issues in society and the world? In what ways do global economic and political shifts affect your personal trajectory as a college student in the US? In this course, you will come to understand sociology as a unique set of tools with which to interpret your relationship to a broader socio-political landscape. By integrating classic readings in the discipline of sociology with the principles of global political economy, we will analyze and contextualize a range of social, economic, and political phenomena at the scales of the global, the national, the local, and the individual.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 109 Race and Ethnicity: An Introduction to Sociology
Srivats
NOT OFFERED IN 2006-07. Introduction to sociology with special attention to issues of race and ethnicity. Overview of the key concepts, theoretical frameworks, and methods in the field and exploration of major questions in the sociological study of race and ethnicity. One major course goal is to heighten awareness of the social patterns, institutions, and structures that are an integral, unquestioned part of everyday life and to provide tools to analyze and critique them. Examination of the ways in which groups in multiethnic societies around the globe come together and interact over time.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 138 Deviance and Conformity: An Introduction to Sociology
Cuba
Why are some behaviors, differences, and people considered deviant or stigmatized while others are not? This introductory sociology course examines several theories of social deviance that offer different answers to this question. We will focus on the creation of deviant categories and persons as interactive processes involving how behaviors are labeled as deviant, how people enter deviant roles, how others respond to deviance, and how those labeled as deviant cope with these responses.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 190/ECON 103 Introduction to Probability and Statistical Methods
Levine (Economics), Swingle
An introduction to the collection, analysis, interpretation, and presentation of quantitative data as used to understand problems in economics and sociology. Using examples drawn from these fields, this course focuses on basic concepts in probability and statistics, such as measures of central tendency and dispersion, hypothesis testing, and parameter estimation. Data analysis exercises are drawn from both academic and everyday applications. Students must register for a laboratory section which meets an additional 70 minutes each week. Students may register for either SOC 101 or ECON 103 and credit will be granted accordingly.
Prerequisite: One course in sociology or ECON 101 or 102 and fulfillment of the basic skills component of the quantitative reasoning requirement. Not open to students who have taken QR 199. Not open to students who have taken or are taking MAT 120, PSYC 205 or PSYC 199.
Distribution: Social and Behavioral Analysis
Semester: Fall, Summer
Unit: 1.0
SOC 200 Classical Sociological Theory
Imber, Cushman
Origins of modern sociology, beginning with nineteenth-century founders, Comte, Spencer, and Marx. Examination of specific sociological ideas and theories, considering such questions as: How is society possible? What are the non-contractual aspects of contract? Who commands authority and how does it change? Exploration of the canon of classical sociological theory with special emphasis on the place of women and African Americans in the history of that canon.
Prerequisite: One 100-level unit. Required of all majors.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 201 Contemporary Social Theory
Cushman, Rutherford
An overview of important twentieth-century social and cultural theories. Special emphasis on critical theories of modernity and postmodernity and on application of theories to empirical case studies.
Prerequisite: 200. Required of all majors.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 202 Introduction to Human Rights
Cushman
Human rights is one of the most powerful approaches to social justice in the contemporary world, yet it is a rapidly developing and changing system. This course offers a critical analysis of human rights as a social, cultural, and legal system. It explores the historical and philosophical origins of the contemporary human rights system and its growth and development as a global social movement over the last few decades. This includes the diversification of rights to include social, economic and cultural rights and the collective rights of indigenous peoples. The course examines the ongoing controversy between human rights’ claims to universalism in contrast to assertions of cultural difference. Special topics include the rise of non-governmental human rights organizations, humanitarianism as an ideology, debates on military humanitarian interventions, the emergence of violence against women as a human rights issue, and the forms and types of justice in societies that have experienced large-scale violence.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 205/WOST 211 American Families and Social Equality
Hertz
American families are undergoing dramatic changes in social, political, and economic arenas: the rise of the dual-worker family, the increasing number of single mothers, the demands of family rights by gay and lesbian families, and the growing numbers of couples having children at older ages. The new economy poses real challenges for American parents as the social and economic gaps between families continue. As women dedicate a greater proportion of their time to the workplace, more children are cared for outside the home. How do children view parents’ employment? How do families function when they have only limited hours together? What does fatherhood mean in these families? Using a provocative blend of social science, novels, and memoirs, we will examine how gender, race, ethnicity, and social class shape the experiences of family life in the contemporary United States. Students may register for either SOC 205 or WOST 211 and credit will be granted accordingly.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 206/AFR 208 Women in the Civil Rights Movement
Rollins
NOT OFFERED IN 2006-07. An examination of the role of women in the Civil Rights movement. Particular attention will be paid to the interplay between the social factors of the women (e.g., their class, religiosity, race, regional background, age) and their perspectives/behavior within the movement. Essentially, women’s impact on the Civil Rights movement and the effects of the movement on the women involved are the foci of this course. Students may register for either SOC 206 or AFR 208 and credit will be granted accordingly.
Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 209 Social Inequality
Rutherford, Silver
NOT OFFERED IN 2006-07. This course examines the dynamics of social inequality including class, gender, race, and ethnicity. Students will explore how social inequality is produced, maintained, and challenged. In addition to understanding and analyzing inequality, students will learn to distinguish between social inequality and social inequality. Students will have the opportunity for service learning in a social service organization in the metropolitan Boston area.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 211 Society and Culture in Latin America
Levit
Broad overview of Latin American cultures and societies and of the Latino experience in the U.S. Focus on the history of Latin America and the Caribbean; its political, religious, social, and cultural institutions; and on how social life in the region varies by race, class, and gender. Social and economic incorporation of Latinos in the U.S. Regional integration and the ways in which economic and political life in North and South America mutually influence one another.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 212 Comparative Sociology and Demography of the Family
Swingle
An examination of the forces that shape contemporary living arrangements in American society and others. This course will cover a wide expanse of recent demographic research, including explanations for the variety of family forms based on kinship and non-kinship; changes in the meaning of marriage as well as the opportunities for marriage in Western countries; the increasing prevalence of single living in the U.S.A.; the meaning and function of friendship in different societies; the links between living arrangements and other institutions such as school and work; and the economic, social and psychological effects of living arrangements on women, men, and children. Cross-national comparisons will be used in the course to highlight similarities and differences to American living arrangements.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 215 Sociology of Popular Culture
NOT OFFERED IN 2006-07. An examination of the expression, production, and consequences of various forms of popular culture in comparative-historical and contemporary social contexts. Analysis of the relation between social class and popular culture in history, the production, meaning, and consumption of popular culture in contemporary societies, and the global diffusion of American popular culture in the modern world-system.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 216 Sociology of Mass Media and Communications
Srinivas
Analysis of the interplay between social forces, media, and communication processes in contemporary society. Significance of historical changes from oral to written communication, development and structure of modern forms of mass media such as radio, television, and film; political economy of the mass media, rise of advertising and development of consumer culture; mass media in the formation of cultural representations of others and cultures, role of the media in the process of identity formation, and in the democratic process. Discussions of the rise and social implications of the Internet. Students will use computer technologies to analyze mass media.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 217 Power, Personal, Social, and Institutional Dimensions
Cuba
NOT OFFERED IN 2006-07. The study of power extends far beyond formal politics or the use of overt force into the operation of every institution and every level: how we are influenced in subtle ways by the people around us, who makes controlling decisions in the family, how people get ahead at work, whether democratic governments, in fact, reflect the “will of the people.” This course explores some of the major theoretical issues involving power (including the nature of dominant and subordinate relationships and types of legitimate authority) and examines how power operates in a variety of social settings: relations among men and women, professions, corporations, cooperatives, communities, nations and the global economy.

167 Sociology
SOC 218 Religion in Contemporary Society
Levitt
NOT OFFERED IN 2006-07. This course explores the relationship between society and religious institutions, beliefs, and practices. Some of the topics we will cover include whether or not modern society is becoming more secular, the place of religion in politics, religious fundamentalism, new religious movements, the globalization of religion, and religiously-motivated terrorism. These themes will be explored using classical and contemporary sociological theories and empirical data.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 221 Globalization
Levitt
McDonald’s®, Starbucks®, and the Gap® are now common features on the street corners of Europe, South America, and Asia. Arnold Schwarzenegger enjoys unprecedented popularity in the Far East while Americans are fascinated by karaoke and Indian films. Does this globalization of production and consumption mean that people all over the globe are becoming the same? In this course, we will explore the globalization of social organization. We will examine the different ways in which economic, political, and cultural institutions are organized in the increasingly interdependent world in which we live, compare them to those in the past, and explore their consequences.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 223 Gender and Power in South Asia
NOT OFFERED IN 2006-07. How do issues of gender continue to figure into the political agendas of contemporary South Asia? In this course, we will address the gendered dimensions of contemporary social, political, and economic debates in South Asia, while coming to grips with changing roles and representations of South Asian women. Topics to be covered will include women’s movements, the legal system, contemporary regional politics, the new economy, and popular culture.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 224 Sociology of Gender: A Global Perspective
NOT OFFERED IN 2006-07. This course will offer a transnational perspective on the sociology of gender, paying close attention to the links between theory and practice in historical context. We will study the key theoretical debates in the sociology of gender, and will constantly link theoretical readings to relevant case studies. We will address such questions as: how did Marxist feminism influence women’s movements in the global South? How do gendered constructions of work affect wages for women globally? How does transnational feminist theorizing help us understand women in fundamentalist movements?

SOC 246 Immigration
NOT OFFERED IN 2006-07. This course takes a comparative, historical look at the immigrant experience. We explore theories of migration and differences between voluntary and involuntary population movements. We examine immigrants’ political, economic, religious, and social integration into their host countries and their contributions to their homelands over time. The experiences of second generation immigrants will also be covered. The course is designed around a series of fieldwork exercises to be carried out in Framingham, Mass. Students will be asked to complete at least three small projects, involving data collection and analysis, on the history of immigration to the city and immigrants’ social and economic incorporation.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 249 Celebrity, Fame and Fortune
Imber
A critical examination of the concept of status in sociological and social-scientific thinking. Focus on the historical rise of fame and its transformation into celebrity in the modern era. The relationship of status and violence. The meaning of sudden changes in good and bad fortune as attributes of status, including contemporary examples such as lottery winners, disgraced politicians, and media-driven attention to the powerful and pathetic. Fame and celebrity among women and minorities. The psychosocial pathways of leadership and conformity in political, religious, and educational institutions.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 250 Research or Individual Study
Prerequisite: Permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

SOC 250H Research or Individual Study
Prerequisite: Permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

SOC 259 The Sociology of International Justice
Cushman
NOT OFFERED IN 2006-07. Examination of the formal and informal strategies used by societies to achieve justice in the face of human rights violations, political crimes, and war. Focus on just war theory, war crimes tribunals, truth and reconciliation commissions, armaments, apologies, and forgiveness as modes of justice in a variety of settings in the modern world. Analysis of the globalization of human rights and international justice through case study of the International Criminal Court. Students will participate in moot court exercises which simulate legal reasoning and formal legal procedures in international settings.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 301 Methods of Social Research
Swingle
Focus on quantitative methods of data collection and analysis. Beginning with modes of data presentation, students will practice with existing data sets to describe and explain social variation in different populations. Building on this extension of basic statistics (SOC 190/ECON 103 or [QR 199]), this course will be devoted primarily to an examination of the logic of survey analysis from the development of hypotheses and construction of a survey instrument to the analysis and reporting of results. Discussion sessions and exercises will address issues of sampling, validity, and reliability; models of causation and elaboration; data coding, cleaning, and analysis. The course will also review multiple methods of research, content analysis, triangulation, and case studies.
Prerequisite: [190/ECON 103, [QR 199] or permission of instructor. Required of all sociology majors.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 302 Seminar. Advanced Topics in Human Rights
Cashman
Topic for 2006-07: Humanitarianism and Humanitarian Intervention. An overview of the history and sociology of humanitarianism as an ideology and of humanitarian organizations. The seminar will provide a critical examination of a number of organized social practices of rescue, including emergency relief to victims of natural and man-made disasters, social and economic sanctions, negotiation, and military responses to gross violation of human rights abuses. The seminar presents case studies of humanitarianism and humanitarian intervention in the nineteenth and twentieth centuries in relation to sociological theories and concepts. Enrollment limited to 15 students.
Prerequisite: 202 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 303 Comparative Perspectives on Religion and Politics
Levitt
NOT OFFERED IN 2006-07. This course examines the relationship between religion and politics in the United States and around the world. How does religiosity shape political participation in different contexts? How do different countries manage religious pluralism and the relationship between church and state? How do global religious movements influence religious life in local contexts? The course will be organized around case studies from around the world chosen to highlight the effect of history, demography, and economic development on religious and political life. At the end of the semester, we will compare what we have learned to the U.S. context.
Prerequisite: One 100-level course in a social science discipline or permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 306/WOST 306 Women and Work
Hertz
The biggest force for change in the U.S. economy has been the growing diversity of the American labor force. The first half of the course emphasizes the impact of gender and racial diversity on the nature of work in America. We will discuss four key aspects: (1) the dynamics of gender and
race in the workplace; (2) the tensions between work/family and gender equity; (3) the struggle to integrate women into male-dominated occupations and professions; and (4) the challenges for women in leadership roles. The second half of the course will focus on women as critical to the "new" global workforce in selected regions. We will discuss: (1) women's migration and domestic work; (2) the paradox of caring for others while leaving one's children behind; (3) women in global factories; and (4) women's activism in their home communities. Students may register for either SOC 306 or WOST 306 and credit will be granted accordingly.

Prerequisite: One course in ANTH, SOC, ECON, or WOST at the 200-level or permission of the instructor.

Distribution: Social and Behavioral Analysis

Semester: Spring

Unit: 1.0

SOC 309 Seminar: Topics in Inequality Radhakrishnan

NOT OFFERED IN 2006-07. OFFERED IN 2007-08. Topic for 2007-08: Critical Intersections: Race, Class, Gender and Nation. In an increasingly borderless world, does the nation still inspire a sense of community and belonging? How are nations built and sustained? In this course, we tackle these questions through the vocabularies of feminism, critical race theory, and postcolonial critique. By focusing on the mutual constitution of race, class, and gender, we will think about the nation as a tenuous patchwork of meanings that work together in different ways across various historical and spatial contexts, such as the US, India, and South Africa.

Prerequisite: At least one course in the social sciences or permission of instructor.

Distribution: Social and Behavioral Analysis

Semester: N/O. Offered in 2007-08.

Unit: 1.0

SOC 311/WOST 311 Seminar, Family and Gender Studies: The Family, the State, and Social Policy Herr

Analysis of problems facing the contemporary U.S. family and potential policy directions for the new millennium. Discussion of the transformation of the American family including changing economic and social roles for women and expanding varieties of family types (such as single mothers by choice and lesbian/gay families). Sexuality, teen pregnancy, reproductive issues, day care, the elderly, divorce, welfare, the impact of work on the family, equality between spouses, choices women make about children and employment, and the new American dreams will be explored. Comparisons to other contemporary societies will serve as a foil for particular analyses. Students are expected to work in groups to analyze the media's portrayal of family/gender stories and selected legal cases.

Students may register for either SOC 311 or WOST 311 and credit will be granted accordingly.

Prerequisite: One 200-level course in family or gender in sociology, anthropology, history, political science, psychology or women's studies, or by permission of instructor.

Distribution: Social and Behavioral Analysis

Semester: Fall

Unit: 1.0

SOC 313 Indian Cinema – Image, Text, and Context Srinivas

The Indian film industry produces the largest number and variety of feature films in the world: commercial cinema, regional cinema, art films, and "middle cinema" that transcends the popular culture-high culture divide. The course will examine the complex social world of cinema in urban India. Further we will explore Indian society and culture using the films as our text. What do they say about gender and identity, about emotions and the family, and politics and nationalism?

Prerequisite: One 100-level course in sociology or permission of the instructor.

Distribution: Social and Behavioral Analysis

Semester: Fall

Unit: 1.0

SOC 314 Medical Sociology and Social Epidemiology Imber

Definition, incidence, and treatment of health disorders. Topics include: differential availability of health care; social organization of health delivery systems; role behavior of patients, professional staff, and others; attitudes toward terminally ill and dying; movements for alternative health care.

Prerequisite: One 200-level unit or permission of instructor.

Distribution: Social and Behavioral Analysis

Semester: Spring

Unit: 1.0

SOC 320 Technology, Society, and the Future Silver

This course explores the powerful roles that technology plays in contemporary social life and suggests some of the impacts that our ever-greater reliance on, and faith in, technology might have upon our lives. The course begins with a critical overview of the heralded promises that technology often carries here; we explore some of the underside of so-called "technological progress." The remainder of the course examines a series of debates about the impacts of particular technologies on social life. Our aim in looking at these debates is to get a handle on the implications that these technologies may have in the foreseeable future.

Prerequisite: One 200-level course or permission of instructor.

Distribution: Social and Behavioral Analysis

Semester: Fall

Unit: 1.0

SOC 321 Globalization: A Research Seminar Levitt

NOT OFFERED IN 2006-07. This course uses the topic of globalization to teach students to carry out research. Following a basic introduction to the topic, each student will design and carry out a project research of her own. She will learn how to define research questions, identify and carry out appropriate methodologies, use various types of data sources, collect and analyze data, and write a final report. Course readings are tailored to students' particular question. Interview and field-work based projects are strongly encouraged. Enrollment limited to 15 students.

Prerequisite: A background in social science. Not open to first-year students.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

SOC 332 Sociology of Film

NOT OFFERED IN 2006-07. How does our experience of movie-going in the contemporary United States compare with the experience across space and time and what can such comparison tell us about cinema as a mass medium? In this course we will address these and other related questions with a view to understanding cinema through its experience rather than through textual analysis of the films themselves. This course will adopt an evolutionary and comparative approach to the study of popular cinema and its consumption. Field assignments will involve going to the movies.

Prerequisite: One 100-level unit or permission of instructor.

Distribution: Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

SOC 333 Seminar, Special Topics in Popular Culture Srinivas

Comparative and interdisciplinary approach to the study of "popular culture" which is cross-cultural and historical. Review of the major theoretical debates and significant empirical works that have informed the field. Particular focus on the social creation of cultural products and the production-consumption dialectic. Examination of agency and institutions involved in the construction of popular culture, the culture wars, and symbolic struggles that have shaped it, as well as attention to the consumption of such products and the expressive culture attendant to such consumption.

Prerequisite: Permission of instructor.

Distribution: Social and Behavioral Analysis

Semester: Spring

Unit: 1.0

SOC 348 The Sociology of Conservatism Imber

An examination of conservative movements and ideas in terms of class, gender, and race. Historical survey and social analysis of such major conservative movements and ideas as so-called "populism," neo-conservatism, and labor politics. The emergence of conservative stances among women, minorities, and media figures. The conservative critique of American life and its shaping of contemporary nationalism on morality, politics, and culture.

Prerequisite: A 100-level course in sociology or permission of the instructor. Open to juniors and seniors only.

Distribution: Social and Behavioral Analysis

Semester: Fall

Unit: 1.0

SOC 350 Research or Individual Study

Prerequisite: Open by permission to juniors and seniors.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

SOC 350H Research or Individual Study

Prerequisite: Open by permission to juniors and seniors.

Distribution: None

Semester: Fall, Spring

Unit: 0.5

SOC 360 Senior Thesis Research

Students must complete all major requirements prior to enrolling. Students are encouraged to take SOC 350 (Research or Individual Study) and SOC 301 (Methods of Research) with an instructor of their choice in preparation for thesis work.

Prerequisite: By permission of department. See Academic Distinctions.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

SOC 370 Senior Thesis

Prerequisite: 360 and permission of department.

Distribution: None

Semester: Fall, Spring

Unit: 1.0
Directions for Election

Sociology is the systematic and scientific study of social life, including informal and formal organization and the multiple ways that people collectively give meaning to their behavior and lives. The scope of sociology ranges from the analysis of passing encounters between individuals in the street to the investigation of broad-scale social change. Sociology brings a unique perspective to the study of institutional and collective forms of social life, including the family, mass media and popular culture, social movements, migration, the professions, and global systems and processes. Research is conducted across many cultures and historical periods in order to illuminate how social forces such as social class, gender, race, and ethnicity, age, group membership, and culture shape human experience.

A major in sociology consists of at least nine units. The core of the major consists of four required courses (SOC 190, 200, 201, and 301), plus an additional unit of 200-level work, excluding 330, 360, and 370) which emphasize basic concepts, theory, and research methods that are the foundation of the discipline, but are also useful in a range of social sciences and professions. Permission to take a required unit elsewhere for the major must be obtained from the department chair in advance. Students must take at least five additional units exploring the range of substantive topics in sociology (for example social problems, deviance, immigration, social change and development, race and ethnicity, medicine and epidemiology, mass media, and popular culture).

Choosing courses to complete the degree and the major requires careful thought and planning. Sociology majors are encouraged to explore the full range of disciplines and subjects in the liberal arts, and they should consult a faculty member to select courses each term and to plan a course of study over several years. It is recommended that students complete the sequence of theory and methods courses by the end of their junior year if they want to conduct independent research or honors projects during their senior year. If a major anticipates being away during all or part of the junior year, the theory (SOC 200 and 201) and research methods course (SOC 301) should be taken during the sophomore year, or an alternative plan should be arranged with her advisor.

A minor in sociology (six units) consists of any 100-level unit, SOC 200, and four additional units, one of which must be a 300-level unit, excluding 350. The plan for this option should be carefully prepared; a student wishing to add the sociology minor to the major in another field should consult a faculty advisor in sociology.

Honors

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

South Asia Studies

AN INTERDEPARTMENTAL MAJOR
AND MINOR

Directors: Sabin (English), Patel (Women's Studies)
Affiliated Faculty: Cavalland (Political Science), Kodera (Religion), Lynch (Anthropology) (Olin), Marlow (Religion), Patel (Women's Studies), Rao (History), Sabin (English).

Visiting Assistant Professor: Shukla-Bhatt

The major in South Asia Studies is designed to acquaint students with the many facets of South Asian civilizations through an interdisciplinary study of the languages, literatures, histories, religions, arts, social and political institutions, and cultural patterns of South Asia, the region defined as including India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the South Asian diaspora.

The major in South Asia Studies requires 9 units, including 2 units of elementary Hindi/Urdu (or demonstration of its equivalent), SAS 210 (or its equivalent), at least 4 additional units above the 100-level, and 2 units at the 300 level. Students are expected to concentrate in one area of South Asia Studies, defined either in relation to a discipline such as history; religion; or in relation to a theme: such as international development; cultural expression; gender; ethnicity and identity. The major requires four courses in the area of concentration above the 100 level, including at least one of the required 300-level courses. At least one course must be taken in an area other than the concentration. Advanced study of Hindi/Urdu (or of another Indian language) may be substituted for the Hindi/Urdu requirement and may be pursued as either a 350 course, or an approved course at another institution.

Students devise their own programs in consultation with an advisor from the affiliated faculty, and with the approval of the program director. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for South Asia Studies.

To supplement Wellesley's course offerings, students are encouraged to take courses for the major at neighboring institutions such as M.I.T., Olin, and Brandeis. Majors are also encouraged to spend at least one semester at an approved academic program in South Asia. Courses taken at other institutions for credit in the major must be approved, in advance, by the student's advisor and the program director.

A minor in South Asia Studies consists of 5 units, of which at least one should be at the 300-level (excluding 350). A program for the minor must include SAS 210; only one course at the 100 level can be counted towards the minor. Elementary Hindi/Urdu does not count toward the minor.

Honors

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

An introduction to the most widely spoken language in the South Asian sub-continent, which is also used extensively for inter-regional and international communications. Learning this language provides a linguistic passport to things South Asian. The language—often referred to as “Hindustani” is written in two different scripts: the Perso-Arabic based Urdu, and the Sanskrit based Devanagari (Hindi). Students will learn to converse in the language and also to read and write in both scripts. Conventional teaching materials will be supplemented by popular songs and clips from contemporary Indian cinema and television, the two internationally popular media that use this language. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None
Distribution: None
Semester: Fall, Spring
Unit: 1.0

SAS 210 Introduction to South Asia Shukla-Bhatt

South Asia, home to one-fifth of humanity, is a vast region of varied landscapes, long history, tremendous cultural and religious diversity, with varied political systems and rapidly growing economies. This introductory course will focus on intellectual, cultural, political, economic, and social developments at four important moments in its history: sixth century BCE, sixteenth century CE, early twentieth century, and our contemporary era. Guest speakers will bring their special expertise to broaden perspective on these complex subjects.

Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Historical Studies
Semester: Fall
Unit: 1.0

SAS 211 Aesthetic Expressions of Religion in South Asia Shukla-Bhatt

Cultural life in South Asia is vibrant with aesthetic expressions of religion in its diverse traditions—Hindu, Muslim, Buddhist, Jain, Sikh, and Christian. This course introduces students to one of the most powerful avenues for transmission of religious knowledge in the traditions of South Asia—the aesthetic experience derived through a variety of forms. In addition to visual messages sent through architectural motifs and paintings, teaching of religious doctrines through narratives in drama, dance, and musical performance is common across religious boundaries. This course will introduce theories of aesthetic experience and religious knowledge from the sub-continent and relate them to contemporary theories of performance.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

SAS 301 Seminar Shukla-Bhatt

Topic for 2006-07: Religion in Modern South Asia. In many parts of South Asia, the encounter with modernity coincided with colonial rule. This complex history added to the tension between modernity and religious traditions. This seminar will examine the texts, intellectual dis-
courses, political movements, and social changes emerging from religious phenomena in South Asia from 1800 to the present day. Students will not only examine specific historical events, but also reflect on how this historical knowledge can be applied in the areas of development, international relations, and human rights movements.

Prerequisite: Two units at the 200-level in SAS, or by permission of the instructor.

**Distribution:** Religion, Ethics, and Moral Philosophy or Historical Studies

### Department of Spanish

**Professor:** Agosín, Gasión-Vera, Rose

**Associate Professor:** Ramón, Renjilian-Burgy (Chair)

**Assistant Professor:** Gualensky, Rubio

**Senior Lecturer:** Hall, Syverson-Stork

**Lecturer:** Dancer

Courses are normally conducted in Spanish; oral expression is stressed.

The department reserves the right to place new students in the courses for which they seem best prepared regardless of the number of units they have offered for admission.

**SPAN 101-102** and **201-202** are counted toward the degree but not toward the major.

Qualified juniors are encouraged to spend a semester or a year in a Spanish-speaking country, either with Wellesley's consortium programs in Córdoba, Spain, and in Puebla, Mexico, or another approved program. To be eligible for study in Córdoba for one or two semesters in Wellesley's Programa de Estudios Hispanicos en Córdoba (PRESHCO), Program for Mexican Culture and Society in Puebla (PMICSP) a student should ordinarily be enrolled in 241 or a higher-level language or literature course the previous semester.

### SPAN 101-102 Elementary Spanish

**Staff**

Introduction to spoken and written Spanish: stress on interactive approach. Extensive and varied activities. Oral presentations. Cultural readings and recordings. Video program. Three periods. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**Prerequisite:** Open to all students who do not present Spanish for admission. See Academic Distinctions.

### SPAN 241 Oral and Written Communication

**Renjilian-Burgy**

Practice in oral and written expression at the advanced level. Through frequent presentations, film viewing, and creative exercises, students will develop the ability to use idiomatic Spanish comfortably in various situations. Students will thoroughly review grammar and self-test through a series of linguistic exercises. The course also features the reading and interpreting of literature in Spanish.

**Prerequisite:** 201-202, 242, or four admission units

SPAN 242 Literary Genres of Spain and Latin America
Gascon-Vera, Renjiilan-Burgy, Rosas, Rubio, Vega
A course to serve as a transition between language study and literary analysis; speaking and writing organized around interpretations of different genres by Hispanic authors; creative writing; oral presentations on current events relating to Spain and Latin America; a review, at the advanced level, of selected problems in Spanish structure.
Prerequisite: 201-202, 242, or four admission units
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

SPAN 244 Seventy Years Later: The Spanish Civil War Revisited
Gascon-Vera
A review of the literary, cinematic and artistic approaches to the Spanish Civil War on its 70th anniversary. This course will examine literary texts which have also been rendered as movies, such as: Las largas vacaciones del '76 (1976); Las bicicletas son para el verano (1983); Ay, Carmela (1990); Los alas de la mariposa (1997); La niña de tus ojos (1998) Soldados de Salamina (2003). We will also review documentaries, such as España 1936 - España Leal en Armas (1936) and Los Niños de Rusia (2001), and examine political art, such as Picasso's Guernica and propaganda posters issued during the war.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

SPAN 245 Ethnic Passions
Vega
A close reading and viewing of selected written and performance texts by Latino/a artists, with particular focus on the intersection of categories of race/ethnicity and sexuality. Selected artists - all writing or performing in the last two decades (Francisco S. Alarcon, Luis Alfaro, Gloria Anzaldua, Ana Castillo, Sandra Cisneros, Juan Genzaizun, Cherrie Moraga, Ela Troyano and others) - will be examined in light of their role within (or rejection by) the Latino literary "canon." Topics for analysis include contemporary debates regarding the nature and construction of Latino identity; the relationship between ethnic and sexual categories; and Latino nuances within essentialist/social constructionist debates regarding gender, sexual and ethnic identities.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

SPAN 247 The Multiple Meanings of Family in Spain and Latin America
Rosas
NOT OFFERED IN 2006-07. The institution of the family is among the most enduring and cohesive of social associations in the Spanish-speaking world, and at the same time it is among the most vulnerable. This course will explore and challenge the traditional notion of family as "sacred" by examining varying cross-cultural ideas and perspectives about family loyalties, continuities, crises, and modifications on both literal and symbolic levels. We will also consider the creation of family-like bonds in the context of race, class, gender, religion, and nation. Readings will include novels as well as short stories and memoir. Authors to be studied: Gabriel Garcia Marquez, Clarice Lispector, Juan Rufio,
Jorge Luis Borges, Silvina Bullrich, Camilo Jose Cela, Victor Perera, Maria Amparo Escandón. Film showings of "El Cachorro," "Como agua para chocolate" and "Mi Familia"; artists we will study: Goya, Charlot, Botero, Orozco, and Kahlo.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 248 Spain and the United States: Five Hundred Years of Close Encounters
Ramos
An exploration of the historical, intellectual, creative and artistic connections between Spain and the US from Columbus' diaries to the present. The United States and Spain, so far apart geographically, have intersected at decisive moments in history for more than five hundred years. Despite the relatively high level of familiarity each society has with the other, mutual misunderstandings have been frequent. This course explores the roots of this dissonance by looking closely at a few specific episodes in history and culture that have shaped reciprocal perceptions. The class offers readings and materials drawn from history, architecture and literature and concludes with an analysis of the role of Wellesley College in the long-running intercultural dialogue.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

SPAN 250 Research or Individual Study
Prerequisite: Open by permission to qualified students
Distribution: None
Semester: Fall, Spring
Unit: 1.0

SPAN 250H Research or Individual Study
Prerequisite: Open by permission to qualified students
Distribution: None
Semester: Fall, Spring
Unit: 0.5

SPAN 252 Christians, Jews, and Moslems: The Spirit of Spain in Its Literature
Gascon-Vera, Vega
NOT OFFERED IN 2006-07. An intensive study of writers and masterpieces that establish Spanish identity and create the traditions that Spain has given to the world: Poema de mi Cid, Maimónides, Ben Sahl de Sevilla, La Celestina, Lazarillo de Tormes, Garcilaso de la Vega, Fray Luis de León, Cervantes, Lope de Vega, San Juan de la Cruz, Calderón de la Barca.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 253 The Latin American Short Story
Roses, Hall
NOT OFFERED IN 2006-07. A survey of contemporary works with in-depth analysis of realistic and fantastic short stories from contemporary Latin America, including short stories by Horacio Quiroga, Jorge Luis Borges, Julio Cortázar, Manuel Rojas, Maria Luisa Bombal, Juan Rufio, Gabriel Garcia Marquez, and Elena Poniatowska. These readings deal with issues of identity, memory, class, freedom, violence, mass media, education, women and children, urban and rural life. Special attention to voices that have emerged since the 1980s, including Alberto Fuguet (Chile), Rita Hernandez (Dominican Republic), and Jorge Volpi (Mexico), among others.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 254 Alienation and Desire in the City: Spanish Literature Since 1936
Ramos
NOT OFFERED IN 2006-07. A study of the struggle for self-expression in Franco's Spain and the transition from dictatorship to democracy. Special attention will be devoted to the literature of the Civil War and exile. Authors include Mercè Rodoreda, Camilo J. Cela, and Eduardo Mendoza.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 255 Chicano Literature: From the Chronicles to the Present
Renjilian-Burgy
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 256 The Novel and Society in Nineteenth-Century Spain
Ramos
NOT OFFERED IN 2006-07. The masters of nineteenth-century peninsular prose studied through such classic novels as Pepita Jiménez by Juan Valera, Minau by Pérez Galdós, Los pazos de Ulloa by Countess Emilia Pardo Bazán, and La barraca by Blasco Ibáñez.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 257 The Word and the Song: Contemporary Latin American Poetry
Agosín
A study of the major twentieth-century poets of Latin America, focusing on literary movements and aesthetic representation. Poets to be examined include Vicente Huidobro, Gabriela Mistral, Octavio Paz, and César Vallejo.
Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

Ramos
NOT OFFERED IN 2006-07. The city of Barcelona offers a unique site to study the twentieth century, in both the Spanish and the global context. In the historical arena, the city has gone from political upheaval and anarchistic rebellions early in the century, to the fight against fascism in the middle years, and finally to the struggle for national unity and democracy at the end of the century. Students will learn about modernity and modernization in Spain in general and Barcelona in particular with special atten-
SPAN 259 Inhabiting Memory
Agosín

During the years of post-dictatorial regimes in Latin America writers, poets, historians and filmmakers have become deeply involved in the ways in which literature and the arts can explore the representation of memory and oblivion and collective remembrance as well as forgetting. Among the cultural historians and writers we will read are: Damiela Elit, Carlos Cerda and Raúl Zurita. Among the filmmakers, the works of Patricio Guzman and his series on memory will be explored.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

SPAN 260 Women Writers of Spain, 1980 to the Present
Gascon-Vera

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 262 Death, Love, and Revolt: An Introduction to Spanish Poetry
Ramos

NOT OFFERED IN 2006-07. This course presents an introductory overview of poetry written in Spain, across regions and aesthetic periods. Our study will be anchored in poets representative of important poetic movements, including Romanticism, Modernism, and Modernity. Texts will also cover Medieval, Renaissance and Baroque periods, Basque, Catalan and Galician poetry will also be analyzed. Poets to be examined are Garcilaso de la Vega, San Juan de la Cruz, Francisco de Quevedo, Federico García Lorca, Concha Méndez, Luis Cernuda, Pedro Salinas, Gloria Fuertes and Jaime Gil de Biedma.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 263 Latin American Literature: Fantasy and Revolution
Rosés

NOT OFFERED IN 2006-07. The interrelation between sociopolitical and aesthetic issues in the discourse of contemporary Latin American writers, including Carlos Fuentes, Manuel Puig, Octavio Paz, Isabel Allende, and Juan Rulfo. Special attention will be given to the imaginative vision of Gabriel García Márquez.

Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 265 Introduction to Latin American Cinema
Renzilau-Burgy

This course will explore the history of Latin American cinema, from the early 1960s to the present. Different forms of cinematic expression will be explored: narrative film, the documentary, the cinema of exile, and others. Issues of national culture and identity, as well as cultural exchanges of films between Latin America and abroad will be addressed. In addition to the films themselves, students will be required to read selected works on film criticism and several texts which have been made into films. Directors whose films will be analyzed include María Luisa Benberg, Fernando Solanas, Jorge Silva, and Raúl Ruiz.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Fall
Unit: 1.0

SPAN 267 The Writer and Human Rights in Latin America
Agosín

NOT OFFERED IN 2006-07. The role of the Latin American writer as witness and voice for the persecuted. Through key works of poetry and prose from the 1970s to the present, we will explore the ways in which literature depicts issues such as: censorship and self-censorship; the writer as journalist; disappearances; exile; testimonial writing; gender and human rights; and testimonial narratives. The works of Benedetti, Timmerman, Alegria, and others will be studied.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

SPAN 268 Contemporary Spanish Cinema
Gascon-Vera

NOT OFFERED IN 2006-07. A survey of Spanish cinema. Themes of history and society as depicted by major directors since the Spanish Civil War of 1936. We will analyze films of important directors such as Pedro Almodovar, Luis García Berlanga, Víctor Erice, Bigas Luna, Pilar Miró and Iziar Bollain.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: N/O
Unit: 1.0

SPAN 269 Caribbean Literature and Culture
Rosés, Rubio

An introduction to the major literary, historical, and artistic traditions of the Caribbean. Attention will focus on the Spanish-speaking island countries: Cuba, Dominican Republic, Puerto Rico. Authors will include Juan Bosch, Lydia Cabrera, Guillermo Cabrera Infante, Julia de Burgos, Alejandro Carpenter, Nicola Guiller, René Marqués, Luis Pales Matos, and Pedro Juan Soto.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

SPAN 271 Intersecting Currents: Afro Hispanic and Indigenous Writers in Contemporary Latin American Literature
Rosses

NOT OFFERED IN 2006-07. A close reading of selected texts that illustrate the intersection of African, Spanish, and indigenous oral and literary traditions. Readings include autobiographies, novels, and poetry. Individual authors to be studied include Rigoberta Menchú, Esteban Montejo, Luis Pales Matos, Nicolas Guillen, Nancy Morejon, and Daisy Rubyria Castillo. Topics include the emergence of non-elite voices, the relationship between identities and aesthetics, the marginal and the canonical, literature and the affirmation of the nation-state, and the uses of contemporary race and gender theory in literary analysis.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 272 Civilizations and Cultures of Spain
Rosés, Gascon-Vera

An examination of Spain’s multicultural civilization and history, from the prehistoric cave paintings of Altamira to the artistic movida of post-Franco Spain. Literary, historical, artistic, and anthropological readings will inform our understanding of recurrent themes in Spanish national ideology and culture: Spain as a nexus between Christian, Jewish, and Islamic thought; regionalism, nationalism, and internationalism; religion and class; long-term economic consequences of global empire; dictatorship and democracy; and the creation and questioning of national identity.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

SPAN 273 Latin American Civilization
Guzausyte

NOT OFFERED IN 2006-07. An introduction to the multiple elements constituting Latin American culture. An examination of the principal characteristics of Spanish colonialism and Creole nationalism will inform our general understanding of Latin America culture today. Readings and class discussions will cover such topics as the military and spiritual conquest, the Indian and African contributions, the emergence of criollo and mestizo discourses, and gender and race relations. Readings will include the works of contemporary Latin American writers, filmmakers, and historians.

Prerequisite: 241 or 242 or permission of instructor
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 275 The Making of Modern Latin American Culture
Staff

NOT OFFERED IN 2006-07. An examination of the principal characteristics of the search for identity and independence of the emerging Latin American nations as expressed in literary, historical, and anthropological writing. We will examine the experience of each of four distinct regions: Mexico and Central America, the Caribbean, the Andean countries, and the Southern Cone. Readings will include the works of contemporary Latin American writers, filmmakers, and historians. Special attention will be given to the relationship between social issues and the evolution of literary form.
SPAN 320 Seminar. Topics in Cross-Cultural Hispanic Studies
Vega

NOT OFFERED IN 2006-07. An analysis of the study abroad experience in a Spanish-speaking country, framed within the student's academic trajectory. Based upon personal observations, shared readings, and selected films, students will weigh the validity of concepts that promote a unified identity for Spanish-speaking peoples ("Hispanicidad," "Hispanidad," "Latino," and La Raza), and will examine the cultural, historical, and intellectual evolution of these notions. Students will carry out individual research projects focusing on a cultural issue or creative current experience firsthand abroad.
Prerequisite: Study abroad experience in a Spanish-speaking country, open to seniors only
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 324 Seminar. Topics in Spanish Modernity
Ramón

Topic for 2006-07: Avant-Garde and Modernity in Spain. Using a wide variety of literary texts, paintings, movies, and references to architecture, this course will explore various forms of modernity in Spain. Emphasis will be placed on the connections between Spanish and mainstream European Avant-Garde, as well as the marginalization of women's contributions. Main figures will include Federico Garcia Lorca, Gómez de la Serna, Vicente Huidobro, Rafael Alberti, Luis Buñuel, Concha Méndez, Ortega y Gasset, Salvador Dalí, and Pablo Picasso. The connections between modernity and post-modernity will also be explored, Normally alternates with topic: A Path to Modernity: Literature and Architecture in Madrid, 1899-1936.
Prerequisite: Open to senior and junior majors
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Spring
Unit: 1.0

SPAN 327 Seminar. Latin American Women Writers: Identity, Marginality, and the Literary Canon
Aguin

NOT OFFERED IN 2006-07. An examination of twentieth-century women writers from Latin America. Perspectives for analyses will include questions of identity (national, ethnic/racial, religious, sexual, gender), the extent to which Afro-Hispanic, Indigenous and non-Christian writers constitute distinct, marginalized groups in Latin American literature, and a comparison of issues regarding identity in selected canonical and non-canonical works by Gabriela Mistral, Remedios Varo, Elena Poniatowska, Nancy Morsjón, Rosario Aguilar, Gioconda Belli and Victoria Ocampo.
Prerequisite: Open to senior and junior majors
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 329 Seminar, Chile: Literature and the Arts
Aguin

From 1971 to 2003, Chile, one of South America's largest democracies, has experienced traumatic cultural, political, and social change. From the election of Salvador Allende (1971-1973) through the Pinochet dictatorship, during these turbulent times an unprecedented cultural life was manifested in literature, theatre, and the visual arts. In this seminar, we will explore the cultural changes experienced in Chile during three decades, the ways in which writers understood the complex web of creativity, as well as the specter of censorship. We will analyze how historical figures were revived through writers such as Gabriela Mistral, Rosamel del Valle, Pablo Neruda, and Salvador Allende. Narratives, journalistic essays, theatrical and visual productions will be examined via the social and political history in which the topics were created.
Prerequisite: Open to senior and junior majors
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Fall
Unit: 1.0

SPAN 350 Research or Individual Study

Prerequisite: Open by permission of the instructor to seniors who have taken two 300-level units in the department
Distribution: None
Semester: Fall, Spring
Unit: 1.0

SPAN 350H Research or Individual Study

Prerequisite: Open by permission of the instructor to seniors who have taken two 200-level units in the department
Distribution: None
Semester: Fall, Spring
Unit: 0.5

SPAN 360 Senior Thesis Research

Prerequisite: By permission of department. See Academic Distinctions
Distribution: None
Semester: Fall, Spring
Unit: 1.0

SPAN 370 Senior Thesis

Prerequisite: 360 and permission of department

EDUC 308 Seminar. World Languages Methodology

Directions for Election

A minimum of eight units exclusive of 101-102 and 201-202 must be presented for the Spanish major. Also required are at least two 300-level units, including a seminar during the senior year. Both of the 300-level courses counted towards the major must be taken at Wellesley. SPAN 350, 360, and 370 do not count towards the minimum requirement of two 300-level courses for the major.

The major in Spanish incorporates considerable flexibility in designing a program of study, but must include the following elements: foundational work, breadth, depth and historical perspective. To ensure oral and linguistic competence, as well as a basic understanding of how to approach and interpret texts, the major normally includes one of the following two units: SPAN 241 (Oral and Written Communication) or SPAN 242 (Literary Genres of Spain and Latin America). Qualified students may begin the major at a level higher than 241 or 242. To attain breadth, majors must take at least one literature and/or culture course in each of the following areas: (1) Spain (244, 248, 252, 254, 256, 258, 260, 262, 272, 300, 302, 304, 306, 318, 320, 324) and (2) the Americas (245, 247, 253, 255, 257, 259, 263, 265, 267, 269, 271, 273, 275, 277, 279, 301, 305, 307, 311, 313, 320, 327, 329). In order to achieve depth, Spanish majors must take two units in a special field of study of their choice, such as a particular genre, cultural movement or theme (252, 253, 256, 257, 265, 301, 302, 304). We also require Spanish majors to achieve historical perspective by taking a minimum of one unit in Medieval, Renaissance, Golden Age, or Latin American Colonial literature and culture (244, 248, 252, 254, 258, 272, 273, 275, 300, 302, 306). One of the two 300-level units required for the B.A. degree must be a seminar. All majors must take a minimum of two 300-level Spanish courses at Wellesley College.

Upon approval from the department, up to four courses taken during a semester of study in Spain or Latin America and up to five during a full academic year abroad may be counted toward the major.

For students interested in an interdisciplinary approach to the study of Latin America, also available is the interdepartmental major in Latin American Studies, which allows students to choose from a list of courses in different departments, including Spanish. Majors devise their own programs in consultation with the directors of Latin American Studies. Students are referred to the Latin American studies interdepartmental program listing for further information.

Advanced Placement

A student may receive one unit of credit and satisfy the foreign language requirement with a grade of 5 on either of the AP Spanish exams. She will lose the AP credit(s) if she takes SPAN 202 or a lower-numbered course. AP credit does not count toward the major in Spanish.

Honors

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Teacher Certification

Students interested in obtaining certification to teach Spanish in the Commonwealth of Massachusetts should consult Prof. Renjilian-Burgy, Department of Spanish, and Prof. Beatty of the Department of Education.
Theatre Studies

AN INTERDEPARTMENTAL MAJOR
Program Director: Hussey
Instructor: Arciniegas, Hussey, Loewit
Lecturer: Lopez, Roach
Director of Theatre: Hussey
Production Manager: Loewit

Advisory Committee: Ko (English), Mason (French), Ward (German), Genuso (Psychology), Renjilal-Burgy (Spanish), Rosenwald (English)

The theatre studies major is both an academic field of study and a practical application of that study. The purpose of the major is to provide students with a theoretical knowledge and appreciation of the history and literature of the theatre. Additionally, students are instructed and given "hands on" experience in production and promotion of theatrical events. The theatre is one of the oldest art forms in existence, and students learn valuable information about the way various disparate societies have evolved throughout the ages. Students are expected to work on productions as performers and technicians. The theatre department actively tries to cultivate well-rounded theatre students who are knowledgeable in all areas of theatre.

Early consultation with the director is essential, because some of the relevant courses are not offered every year and careful planning is necessary. In addition to working with the director of the theatre program, students will be encouraged to consult with other members of the faculty familiar with the interdepartmental theatre major.

Students majoring in theatre studies must take a minimum of nine units. For students entering in the fall of 2004 and earlier these must include THST 203 and either ENG 127 or ENG 281. For students entering in the fall of 2005 or later these must include THST 203 and either THST 220 or ENG 281. Two of the nine must be at the 300 level. At least five of the nine must come from within the theatre studies department. The remaining four may be drawn from any related department (see list below).

Developments in the theatre arts are a result of stage experiments, and because the theatre performance is an expression of theatre scholarship, it is expected that students planning a major in theatre will elect to complement formal study of theatre with practical experience in the extracurricular production program of the College Theatre and related on-campus producing organizations. Students may also remain on campus over the summer or Winter Session to gain experience with Wellesley Summer Theatre (the professional wing of the academic department) for credit. All students are encouraged to participate in 250 and 350 individual study offerings in order to pursue their particular area of theatrical interest.

Students majoring in theatre studies may elect to take at least one resident semester of concentrated work in the discipline to supplement and enrich their work at Wellesley. They may attend the National Theatre Institute at the Eugene O'Neill Theatre Center, another institution in the Twelve College Exchange Program, or one of the many London programs offering intensive study in their discipline. On occasion a student may elect to take a relevant course in the program at MIT.

Honors
The theatre program offers a variety of opportunities for honors. After consultation with the director, the candidate will devise a proposal that incorporates both the academic and the practical aspects of the thesis. Normally the candidate completes the research and writing segment of the thesis in the first semester. In the second semester the candidate produces the practical/theatrical component for public performance. Recent thesis projects have included a musical to educate elementary school students about black holes, a solo performance piece on racial identity at Wellesley, and the oral tradition in Early America. Applicant for honors should have a minimum 3.5 GPA in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students must apply in their junior year for approval of their proposal.

THST 203 Plays, Production, and Performance
Hussey
This course studies the principles and practice of the related arts that make up the production of a play in the theatre. Students will analyze the dramatic script in terms of the actor, the director, the scenic, costume, and lighting designers, and the technicians. Practical applications of acquired skills integrate the content of the course. Each student participates in the creation of a fully realized "miniproduction" which is presented for a public performance at the end of the term. Emphasis is placed on artistic and interpersonal collaboration within the companies.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.25

THST 204 Introduction to Acting
Arciniegas
This course is intended for any and all levels of experience. Students are introduced to the fundamentals of contemporary stage performance, as devised by such stage theoreticians as Constantine Stanislavsky, Lee Strasburg and Sanford Meisner. Instruction focuses on the proper methods for breaking scenes down into their component units or "beats," staging them for clarity of purpose, and performing them truthfully in the immediate present before a live audience. Students perform in every class with a rotating roster of partners, emphasizing group learning and mutual support in the pursuit of an individual acting aesthetic. Performance material is drawn from the work of contemporary playwrights researched by the students or recommended by the instructor.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

THST 205 Advanced Scene Study (Historic Periods)
Arciniegas
This course is intended to give the advanced theatre student experience in the performance styles of other periods. Focusing on Classical, Elizabethan, Restoration, and Victorian dramatic literature, students retrace the development of the Western European theatrical tradition in practical terms. Particular emphasis is placed upon developing the performance skills necessary for remaining faithful to the acting style of the period while ensuring relevance and accessibility to a contemporary audience.
Prerequisite: 204
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

THST 206 Directing and Dramaturgy
Hussey
This course studies the creative skills of the director in conjunction with the analytical skills of the dramaturge. Particular emphasis will be placed on communicating on a "moment-to-moment" basis with an actor. Students will be encouraged to develop their own unique "directorial vision." Students will be expected to provide probing intellectual questions to each other while collaborating. Dramatic material will be drawn from a variety of world literatures with emphasis placed on women playwrights. Students will be given opportunities to work each week with professional actors in a guest artist "lab" format.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

THST 207 Stagecraft for Performance
Loewit
This course studies the craft and theory of the production arts in the theatre. The course will cover the process and will analyze the designers' function in the production: creating working drawings, problem-solving, and use of theatrical equipment and alternative media for the realization of sound, set, and lighting designs. There will be additional time outside of class scheduled for production apprenticeships.
Prerequisite: 203 or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

THST 208 Introduction to Stage Management
Loewit
NOT OFFERED IN 2006-07. This course examines the role and duties of a stage manager in the collaborative process and the stage manager's relationship to the director, designers, and actors. Students will learn to write rehearsal reports, call cues, assemble rehearsal schedules, call scripts, etc. Students will also be taught the importance of technical script analysis. Emphasis will also be placed on a number of transferable skills, including leadership, organization, delegation, effective communication, and attention to detail. In addition, students are strongly encouraged to complete a THST 250H by stage managing either a Wellesley College Theatre or an Upstage production during the academic year in order to complement the material learned in class.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 0.5

THST 209 Introduction to the Art of Scenic Design
TBA
The course will develop overall design skills for designing sets for the theatre. After reading assigned plays, students will learn how to develop their concepts through analysis of the action of the play. Visual research, sketches and basic drafting skills will be developed in addition to the idea of a basic "concept" for each script. In addition to teaching artistic and technical skills,
this course will emphasize the importance of collaboration with the director and fellow designers.
Prerequisite: 203 or 206
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

**THST 210 Echoes of the Homeland**

*Hussey, Lopez, Roach*

Have you ever wondered what is lost in the process of assimilation into American culture? In this interpretation class, students are introduced to the literature of Hispanic, Celtic, and African American cultures. Through prose, poetry, and drama, stories and characters are brought to vivid life. Students will hone their interpretive skills while exploring issues of identity, immigration, and the female experience. Material will be taken from folklore, mainstream literature, and emerging writers of today. Students will also have the opportunity to write about their “homeland” as part of a final exercise.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

**THST 211 Introduction to Playwriting**

*Roach, Lopez*

This course will teach basic playwriting skills implemented through in-class exercises and at-home writing assignments. This hands-on, practical approach will require writing one short play each week. Emphasis is on experimentation, innovation, risk taking, and process. A spirit of fun, innovation, and creativity will dominate this workshop format. Each class meeting will incorporate reading student work aloud with commentary from the instructor and the class. Students will listen, critique, and develop the vocabulary to discuss plays, structure, story, and content. Each student will begin to connect her dramatic voice and theatrical passion. Students will ultimately write a one act play as the capstone experience for this class. Mandatory credit/noncredit.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

**THST 212 Representations of Women on Stage**

*Lopez*

NOT OFFERED IN 2006-07. This course looks at specific examples of the representation of women on the dramatic stage during various eras in a variety of cultures, focusing primarily on what a public and popular art says and implies about women’s “nature,” their role, their place in society. Consideration is given to the male dominance in both playwriting and performance in historic cultures. Texts will be chosen from a broad spectrum of dramatic world literature.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**THST 214 Inside Out: A Study of Character Through Voice and Movement**

*Kahn*

This course will give students the tools and skills to develop a character either from the outside in, using movement, or from the inside out, using the voice. Utilizing the techniques of Kristin Linklater, students will move towards “freeing their natural voice” and developing range, color, and texture for effective stage use. Concurrently, students will work on “freeing their bodies” and using physicality to flesh out a character. Class work will focus on both individual and group work with particular attention given to layering voice and movement with text to create vivid, fully developed characters. Not offered every year. Subject to Dean’s office approval.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Winter
Unit: 0.5

**THST 220 Classic Plays and Players**

*Lopez*

This course, taught by playwright Melinda Lopez, surveys dramatic texts as realized in performance (including the plays of Shakespeare). Films and video recordings of live performances approximating the original production style will be utilized along with modern interpretations. Class discussion will also incorporate analysis and comparison of women and minorities who have shaped and created the theatre as actors, directors, designers, and producers. Analytical and critical writing skills are emphasized in the development of written critiques. Students will contrast and compare contemporary events with the events in dramatic texts and will incorporate that knowledge into class projects such as adaptations, research papers, or original plays. Guest artists from the theatre world occasionally visit to illuminate other perspectives.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

**THST 250 Research, Independent Study, or Apprenticeship**

Prerequisite: Permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**THST 250H Research, Individual Study, or Apprenticeship**

Prerequisite: Permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

**THST 306 The Directors Art**

*Hussey*

NOT OFFERED IN 2006-07. Intended for the serious directing student, this course will focus on seeing, analyzing and critiquing the work of the director. Significant attention will be paid to the collaboration between directors, designers, and actors. The pragmatic aspects of mounting a production will be analyzed using the performances attended by the class as raw material for discussions. Students will attend five productions paid for by a theatre. One in New York and four in Boston. Particular emphasis will be placed on the students determining how successful the productions are in engaging the audience and fulfilling the intention of the playwright. As a final presentation students will produce and direct their own ten-minute play presented at a festival for the Wellesley community.
Prerequisite: 203 or 206
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**THST 315 Acting Shakespeare**

*Arciniegas*

NOT OFFERED IN 2006-07. This course focuses on the study and practice of skills and techniques for the performance of scenes and monologues and the realization of theatrical characters from Shakespeare’s texts. Speeches and scenes will be performed for class criticism. The class will be subdivided by instructor according to skill levels. Students are expected to rehearse and prepare scenes outside of class time.
Prerequisite: 203, 204, and 205 or permission of instructor after audition.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

**THST 350 Research or Individual Study**

Prerequisite: Open by permission to qualified students.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**THST 350H Research or Individual Study**

Prerequisite: Open by permission to qualified students.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

**THST 360 Senior Thesis Research**

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**THST 370 Senior Thesis**

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WOST 108 The Social Construction of Gender
Marshall
This course discusses the ways in which gender is socially constructed through social interactions and within social institutions. The relationship among gender, race, ethnicity, and social class will be stressed. The processes and mechanisms that construct and institutionalize gender will be considered in a variety of contexts: political, economic, religious, educational, and familial.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

WOST 120 Introduction to Women’s Studies
Cheng, Creco, Patel
Introduction to the interdisciplinary field of women’s studies with an emphasis on an understanding of the “common differences” that both unite and divide women. Beginning with an examination of how womanhood has been represented in myths, ads, and popular culture, the course explores how gender inequalities have been both explained and critiqued. The cultural meaning given to gender as it intersects with race, class, ethnicity, and sexuality will be studied. This course also exposes some of the critiques made by women’s studies’ scholars of the traditional academic disciplines and the new intellectual terrain currently being mapped.
Prerequisite: None
Distribution: Language and Literature or Social and Behavioral Analysis
Semester: Fall, Spring, Summer
Unit: 1.0

WOST 200 Introduction to Reproductive Issues
NOT OFFERED IN 2006-07. This course explores reproduction in contemporary U.S. society, attending to psychological, social, ethical, and policy implications of pregnancy, childbirth, and parenthood. Reproductive health, technology, and practices are considered in light of the significance of children in different eras and cultures, and in light of policies concerning children, families and the status of women. This course draws from the biological sciences, the social sciences, and the humanities, and students will gain practice in conducting interviews, analyzing data, and writing about controversial issues in bioethics and social policies.
Prerequisite: None. Not open to students who have taken [EXTD 103].
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

WOST 202 Multidisciplinary Approaches to Abortion
NOT OFFERED IN 2006-07. Why is abortion an emotionally-charged, intellectually troubling, and nationally divisive issue? There is more to the topic of abortion than the conflict between “pro-choice” and “pro-life” positions. We can achieve better understanding of the problem by examining the biological and medical aspects of abortion as well as its religious, social, psychological, and philosophical implications. The class will explore a range of views on such topics as prenatal screening, the moral and legal significance of fathers’ claims, and the possible impact of medical and technological advances (such as RU-486) on the issue of abortion.
Prerequisite: Open to sophomores, juniors, and seniors who have taken one introductory course in a social science, biology, philosophy, or women’s studies.
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

WOST 203 Ethical and Social Issues in Genetics
NOT OFFERED IN 2006-07. New genetic technologies confront us with complex questions. Should we use prenatal tests to select children’s characteristics? Should genetic information be private and confidential? How should knowledge of the genetic origins of certain conditions affect health policy? If some personality and behavioral characteristics have genetic components, should this change our views about personal responsibility?
Prerequisite: One course in any of the following: biology, philosophy, psychology, sociology or women’s studies.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

WOST 204 Women and Motherhood
NOT OFFERED IN 2006-07. As poet and feminist Adrienne Rich points out, motherhood is both an “experience and institution.” This course highlights how social institutions and cultural beliefs shape the experience and meaning of motherhood. We will contrast motherhood today with motherhood in other cultures and periods, and we will examine how contemporary medical practice and social policy have created new options and new problems for women. Topics will include the experience of pregnancy and childbirth, contemporary family policy, reproductive technologies, and what have become known as “maternal/fetal conflicts.”
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

WOST 205 Love and Intimacy: A Cross-Cultural Perspective
Cheng
This course examines the system of meanings and practices that evolved around notions of love and intimacy as well as their political significance. The course seeks to demonstrate how these “private” emotions and desires are embedded in social structures such as gender, networks of kinship, class, race, ethnicity, and religion. How do intimate relations challenge patriarchy and heteronormativity? The course invites students to interrogate the public/private divide, examine both the reproductive role in ideologies of love and intimacy, as well as their transforma-
WOST 206 Women on the Move: Transnationalism, Migration, and Gender
Cheng
This course examines the experiences of Asian women in the globalization process, with an emphasis on transnational migration. We will explore the paradoxical position of women who violate conventional domestic roles, contestations within the political-economy of the Asia-Pacific, and the reconfiguration of gender, class and ethnic identities in transnational movements. The goal is to understand the historical complexity of migration, the institutional and cultural controls on women's mobility, and their cultural and social agency.

Prerequisites: 120 or 108, or a course on gender, migration, or globalization in anthropology, history, sociology, political science, or women's studies.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

WOST 209 Framing the Body through Feminist Theory
Creef
This course will examine feminist theories and narratives of the body and its representation in visual culture, literature, and history. Our readings will include both theoretical works (on the colonial and ethnographic gaze and cyborg studies) as well as primary materials that include photography, film, and science fiction.

Prerequisite: Open to juniors and seniors only. Not open to students who took this course as WOST 312 in 2004-05 and 2005-06.
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Spring
Unit: 1.0

WOST 211/SOC 205 American Families and Social Equality
Hertz
American families are undergoing dramatic changes in social, political, and economic arenas: the rise of the dual-worker family, the increasing number of single mothers, the demands of family rights by gay and lesbian families, and the growing numbers of couples having children at older ages. The new economy poses real challenges for American parents as the social and economic gaps between families continue. As women dedicate a greater proportion of their time to the workplace, more children are cared for outside the home. How do children view parents' employment? How do families function when they have only limited hours together? What does fatherhood mean in these families? Using a provocative blend of social science, novels, and memoirs, we will examine how gender, race, ethnicity, and social class shape the experience of family life in the contemporary United States. Students may register for either WOST 211 or SOC 205 and credit will be granted accordingly.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

WOST 212 Feminist Bioethics
Galarneau
How would bioethics differ if it took seriously the experiences and needs of women and other marginalized social groups? This course engages the works of feminist theorists and practitioners in philosophy, religion, law, medicine, public health, and the social and biological sciences — works that develop more inclusive bioethical theories and practices in the service of the health and well-being of all persons and communities. Feminist bioethics is both critical and constructive in its attention to moral frameworks, principles, norms, and values related to the concerns for human health including health care's professions, practices, and institutions. Also addressed are gender, race, and class disparities in health status, clinical care, and biomedical research.

Prerequisite: WOST 108, 120 or PHIL 249 or permission of instructor
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

WOST 214 Women, Reproduction and Health
Galarneau
This multi-disciplinary course introduces a broad range of concepts and issues related to contemporary women, health, and health care in the United States. Conventional indicators of women's health, recent research in economic inequity and poverty, and the women's health movement help us understand women's health status beyond simple morbidity and mortality. The course incorporates foci on reproductive health (including midwifery and new technologies), relational violence (with attention to historical responses and prevention efforts), and HIV/AIDS (including global inequities in risk, incidence, and treatment).

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

WOST 216 Women and Popular Culture

NOT OFFERED IN 2006-07. This course examines women's representation, production, and participation in U.S. popular culture from the late nineteenth century to the present. Through the use of historical studies, film, television, music, and literature, we will discuss how race, gender, ethnicity, class, and region have impacted women's encounters with popular and mass culture. We will ask why the cultural industry has viewed women as critical to the consumption and dissemination of popular culture. We will discuss popular culture's impact on challenging and/or reinforcing gender differences. Topics include women and modernity, cities and leisure, the rise of a consumer culture, women and technology, sexuality, and feminism, and performance practices.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

WOST 217 Growing UpGendered
Marshall
This course focuses on childhood and the teen years in the United States. How do we become gendered? What are the experiences of children and teens in families, schools, and peer groups that contribute to that process? What is the relationship between pop culture and the gendered lives of children and teens? How does gendering vary by race/ethnicity and social class? We will explore the core issues in the field, including the importance of including the voices of children and teens, the ways in which gender is constructed in social interactions, the intersections of gender, sexuality and peer status, and the importance of collective and individual agency.

Prerequisite: 108 or 120
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

WOST 219 Gender in the Workplace
Marshall
Women now make up almost half of the U.S. workforce; 75% of employed women work full-time and 62% of mothers of infants are employed. This course explores the experiences of women and men in the changing U.S. workplace. The course will address key issues related to gender, race and class in the workplace, with a focus on (1) the social organization of work — the nature of work, division of labor, social inequality, and its consequences for women and men; and (2) gendered organizations and processes of gender discrimination, including sexual harassment.

Prerequisite: 108 or 120 or SOC 102
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

WOST 220 American Health Care History in Gender, Race, and Class Perspective
Reverby
Traditional American medical history has emphasized the march of science and the ideas of the “great doctors” in the progressive improvement in American medical care. In this course we will look beyond just medical care to the social and economic factors that have shaped the development of the priorities, institutions, and personnel in the health care system in the United States. We will ask how do gender, race, and class affect the kind of care developed, its differential delivery, and the problems and issues addressed.

Prerequisite: 108 or 120 or 222 or permission from instructor.
Distribution: Historical Studies
Semester: Spring
Unit: 1.0

WOST 222 Women in Contemporary American Society
Reverby
This course examines the transformations and continuities in the lives of women in the United States since World War II. We will look critically at the so-called "happy families" of the 1950s, the cultural and political "revolutions" of the 1960s and early 1970s, and the shifts in consciousness over the last five decades. The rise and changes in feminism and the women's movement will receive special attention. Emphasis will be placed on the differing communities of women and how they have balanced the so-called "private," "public," and "civic" spheres of their lives.

Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

WOST 235 Cross Cultural Sexuality
Patel

NOT OFFERED IN 2006-07. This course will examine and explore sexuality from cross-cultural perspectives, focusing on the production of sexuality in the context of different discourses — literature, anthropology, history, and
WOST 280 Gender and Writing in South Asia Panel
Beginning with proto-nationalism (1780s) and closing with the late nation-state (2000), this course explores the ways in which gender and writing come together in South Asia. Questions include: Under what circumstances did different genres of writing evolve? How did different genres of early nationalist writing engage with masculinity or femininity? How was the home, house, or the private configured in writing around the 1900s? How was gender articulated in relation to tradition and modernity? How were “feminist” issues addressed in different genres of writing? Writers whose works might be read in this class include Sakawat Hussain, Premchand, Saadat Hasan Manto, Ismat Chughtai, Q. Hyder, Kiran Nagarkar, and Mahasweta Devi. Movies might include Bandini, Pysa, Unrao Jan Ada, Mother India, and Fire.

Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

WOST 281 Gender and South Asian Cinema
NOT OFFERED IN 2006-07. South Asia has the largest multilingual film industry in the world. Since the inception of film-making in South Asia, gender has been a preeminent theme through which films have derived their emotional force. Women are either protagonists or integral to the plot movements of most South Asian movies – as mothers, widows, virgins, courtesans, queens, bad girls and terrorists. In this course students will investigate the emergence of these gendered figures in Indian cinema from the long suffering mother (who also represented the nation) through the seductive courtesan (staple of most films) to the women whose form of identification is a large weapon. Students will be expected to watch films, and read primary as well as secondary materials. We will discuss films such as Mother India, Zakhmi Aurat (Women and Blood), Sati, Macchis (Match), Dil Se (From the Heart), Paromita, Godmother, Razia Sultan, Charulata, Zubeida and Chaudhni Bar.

Prerequisite: One course in women’s studies, history of art, film, visual or media studies, or South Asia.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

WOST 305 Seminar. Representations of Women of Color
Croef
A feminist cultural studies approach to the theories and methodologies of the representation of women of color in literature, film, art, and photography. This course surveys the development of contemporary U.S./third world feminism and employs multiple readings in Asian American, Pacific Island, African American, Latina/Chicana, and Native American cultural criticism that position the body as an historical category.

Prerequisite: Open to juniors and seniors only.
Distribution: Art, Music, Theatre, Film, Video
Unit: 1.0

WOST 306/SOC 306 Women and Work
Hertz
The biggest force for change in the U.S. economy has been the growing diversity of the American labor force. The first half of the course emphasizes the impact of gender and racial diversity on the nature of work in America. We will discuss four key aspects: (1) the dynamics of gender and race in the workplace, (2) the tensions between work/family and gender equity; (3) the struggle to integrate women into male-dominated occupations and professions; and (4) the challenges for women in leadership roles. The second half of the course will focus on women as critical to the “new” global workforce in selected regions. We will discuss: (1) women’s migration and domestic work; (2) the paradox of caring for others while leaving one’s children behind; (3) women in global factories; and (4) women’s activism in their home communities. Students may register for either WOST 306 or SOC 206 and credit will be granted accordingly.

Prerequisite: One course in anthropology, sociology, economics, or women’s studies at the 200-level or permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

WOST 307 Imaging Asian/Asian American Women
NOT OFFERED IN 2006-07. This course will look at Orientalism as a historical discourse as a way of framing the representation of Asian/Asian American women in American culture. We will look at the historical representations of Asian American women in the U.S. beginning with the turn of the century world’s fairs and the immigration of “picture brides,” warfare and postwar incarnations of the “dragon lady” in popular culture (in cartoons and through the figures of “Tokyo Rose” and Yoko Ono), and the work of contemporary Asian American feminist performance, installation, and spoken word artists who engage in self-reflexive critiques of Asian American Orientalism in their creative work.

Prerequisite: At least one course in women’s studies or in an Asian American studies related course. Open to juniors and seniors only.
Distribution: Art, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

WOST 308 The Changing Law, the New Family, and the State
Citron
This course examines the legal standing of family membership. As families have become more diverse, the law becomes an arena of political challenge. These new realities—domestic partnerships, reproductive technologies, and the rise of single mothers—have created a contested terrain. For example, what legal formalities do same-sex partners use to mimic the legal protections automatically afforded to their married counterparts? How do committed partners dissolve a marriage-like relationship outside of divorce proceedings? Using legal cases, media portrayals, and public policy statements we will examine how U.S. states are differentially responding to new family forms.

Prerequisite: Juniors and seniors only. One 200-level course in family or gender in anthropology, history, psychology, political science, sociology, or women’s studies.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0
WOST 311/SOC 311 Seminar. Family and Gender Studies: The Family, the State, and Social Policy

Hertz
Analysis of problems facing the contemporary U.S. family and potential policy directions for the new millennium. Discussion of the transformation of the American family including changing economic and social roles for women and expanding varieties of family types (such as single mothers by choice and lesbian/gay families). Sexuality, teen pregnancy, reproductive issues, day care, the elderly, divorce, welfare, the impact of work on the family, equality between spouses, choices women make about children and employment, and the new American dreams will be explored. Comparisons to other contemporary societies will serve as a foil for particular analyses. Students are expected to work in groups to analyze the media's portrayal of family/gender stories and selected legal cases. 
Students may register for either WOST 311 or SOC 311 and credit will be granted accordingly.
Prerequisite: One 200-level course in family or gender in sociology, anthropology, history, political science, psychology or women's studies, or by permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

WOST 312 Capstone Seminar. Feminist Inquiry
Cheng
Topic for 2006-07: Global Feminism. This seminar is structured as a critical engagement with the notion of "global feminism" with particular focus on the subject of "sex trafficking." It starts with an examination of some key feminist concerns and debates -- feminist epistemology, issues of representation, agency and subjectivity, capitalism and patriarchal/postcolonialism and nationalism, globalization, development, and migration. With a grasp of these analytical tools and issues, we move on to examine the formation of transnational women's movements that has mobilized around women's human rights. In the last part, we will see why and how "sex trafficking" has become the convergent point of feminist debates, and the policy implications these differences and politics are having on the lives of women around the world.
Prerequisite: WOST 120 or WOST 108, or a course in gender in anthropology, history, sociology, political science or women's studies, or by instructor's permission. Not open to students who have taken WOST 314 in the past.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

WOST 313 Fieldwork in Women's Studies

This is a supervised, independent fieldwork project resulting in a research paper, documentary policy initiative, creative arts presentation, or other research product approved by the student's advisor. This project, developed in conjunction with the student's advisor, will have a significant experiential component focusing on women's lives. Students are required to spend either the summer before their senior year or the first semester of their senior year gathering data on a topic of their choice. Topics should be part of the student's area of concentration. Students may (1) work in an organization, (2) work with activists or policy makers on social change issues or social policy issues, (3) design their own fieldwork experience.

Prerequisite: Open to majors and minors only.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

WOST 315 Seminar. Coalitions, Institutions, and Individual Identities

NOT OFFERED IN 2006-07. This seminar will consider how individuals and groups, who differ by gender, class, religion, sexuality, and/or race, form coalitions to achieve social transformation. Critical moments in larger institutional struggles in American history will be examined. Questions to be covered: Under what conditions are coalitions formed, what holds them together, and how successful have they been in transforming institutions and individual identities? Political movements and institutions to be explored include abolitionism, suffrage, trade unions, schools, civil rights, anti-racism movements, and student activism.
Prerequisite: Open to seniors and minors only.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

WOST 317 Seminar. History of Sexuality: Queer Theory

NOT OFFERED IN 2006-07. This seminar will introduce the concepts central to queer theory, starting with Foucault and Laqueur and discussions of bodies, sodomy and the law. It will examine queerness in its various manifestations and practices: butch-femme, transgenering, cross-dressing, bisexuality, and third gender. The conflicts and continuities between identity politics and queer identities will be explored in the contexts of racialization, class, and different models of nationhood and subalternity. Finally, what impact do the debates on the production of sexuality in different sites (African American, Native American, Latino, Asian American, and non-U.S.) and historical periods have on theories of queerness?
Prerequisite: Open to seniors and minors who have taken any course on gender, race, or sexuality.
Distribution: Epistemology and Cognition or Language and Literature
Semester: N/O
Unit: 1.0

WOST 321 Gender Justice and Health Policy

Galaceau
Various understandings of justice vie for dominance in contemporary health policy debates, especially debates about health care reform and universal access to health care. Yet "just" health care is not limited to reform discussions or to distributive notions of justice which typically ignore social structures (gender, race, class, culture, citizenship), social processes (decisions making, division of labor) and social contexts (poverty, unequal risk for poor health). This seminar explores multiple conceptions of justice drawn from moral and political philosophy, religious social ethics, and Catholic social thought (feminist and otherwise). Social, participatory, and distributive justices are examined as normative guides for health and health care policies intended to meet the health care needs of all persons.
Prerequisite: Open to seniors or minors with 108, 120 or 212, or a course in social ethics or permission of instructor.
Distribution: Religion, Ethics and Moral Philosophy
Semester: Spring
Unit: 1.0

WOST 324 Seminar. History, Memory, and Women's Lives

NOT OFFERED IN 2006-07. If a woman speaks of her experiences, do we get closer to the "truth" of that experience? How can oral history provide a window into the lives of women in the past and what does it close off? Analysis of methodological and theoretical implications of studying women's lives through oral histories as a way to end the silences in other historical forms. Special attention to be paid to other genres -- history, fiction, ethnographies -- as a foil to explore the strengths, and limitations, of the oral history approach.
Prerequisite: 108 or 122 or 222 or HIST 257
Distribution: Epistemology and Cognition or Historical Studies
Semester: N/O
Unit: 1.0

WOST 350 Research or Individual Study

Prerequisite: Open to seniors by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WOST 350H Research or Individual Study

Prerequisite: Open to seniors by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WOST 360 Senior Thesis Research

Prerequisite: By permission of the department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WOST 370 Senior Thesis

Prerequisite: 360 and permission of department.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election

A major in women's studies offers an opportunity for the interdisciplinary study of women from the perspectives of the humanities, sciences, and social sciences. Women's studies majors seek an understanding of the new intellectual frameworks that are reshaping thought about the meaning and role of gender in human life. Majors pursue knowledge of gendered experiences in diverse cultures and across time, examining the ways in which race, social class, sexuality, and ethnicity are constitutive of that experience.

A major in women's studies requires nine units taken both within the department and through the related courses taught in other departments. Of these, two units must be 300-level courses (not counting 350, 350H, 360, or 370). Not more than two units can be 100-level courses.

Students are encouraged to enter the department through one of the three core units: WOST 108 (The Social Construction of Gender), WOST 120 (Introduction to Women's Studies), or WOST 222 (Women in Contemporary American Society). Majors must take one of these units as a required course. Apart from this one required unit (108, 120 or 222), majors must elect at least three other units offered within the women's studies department, of which one should be a seminar. Courses at the 100 level are introductions to topics in women's studies. They are taught from the perspective of each faculty member's specialty. Courses at the 200 level are overview courses to substantive areas. Courses at the 300 level provide in-depth examination of material covered in 200-level courses. Students majoring in women's studies must elect four of the nine units in such a way that they form a "concentration," i.e., have a focus or central theme in common. Such concentration should include relevant method and theory units in the area of concentration, and must be discussed with and approved by a women's studies faculty advisor. Priority in all courses above the 100 level will go to majors and minors. Students selecting 300-level courses must have one course listed in the department.

The Capstone Experience in Women's Studies

All majors will be required to select a capstone experience, with the guidance of their advisor, from the following three options offered in 2006-07. Students should begin to think about which option would best fit their concentration when they declare the major. They must declare their option by the end of their junior year.

Option 1: WOST 312 (Seminar. Feminist Inquiry). Each year the seminar will be a different special topic. For 2006-07, the topic is "Global Feminisms" taught by Professor Cheng.

Option 2: WOST 313 (Fieldwork in Women's Studies).

Option 3: WOST 360/370 (Senior Thesis).

Option three is the traditional senior honors thesis which requires two units during the senior year. See Academic Distinctions in this catalog for requirements. A thesis does not need to have an experiential component but typically it is based on some original research. Option 2 must involve an experiential component.

A minor in women's studies consists of five courses, of which one must be chosen from among 108, 120, or 222, and of which one must be a 300-level course (not 350 or 350H) offered within the department. A total of at least three courses must be taken within the women's studies department. Minors must devise a three-course "concentration" (see above) in consultation with a women's studies faculty advisor (the chair or any of the four women's studies faculty members). Not more than one unit can be a 100-level course.

Women's Studies Advanced Placement Policy

Women's studies does not allow students to count AP credits towards the fulfillment of the major or minor.

Honors

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.
The Writing Program

Director: Wood
Assistant Professor: Schwartz
Visiting Assistant Professor: Lackey
Senior Lecturer: Johnson, Viti, Wood
Lecturer: Iwano

Writing is central to academic life at Wellesley and will continue to play an important role in most students’ lives after they graduate, whether they choose majors in the sciences, the social sciences, or the humanities. WRIT 125 provides a common introductory experience in college-level thinking and writing for all students at Wellesley and is also assumed to provide the base for writing assigned in later courses. WRIT 125 courses are taught by faculty from many departments as well as by a team of writing professionals; all WRIT 125 faculty view writing as an important part of their own professional lives and are committed to helping Wellesley students learn to use writing as a powerful tool of thought and expression, a way to gain entrance to public discourse.

All WRIT 125 courses have the primary goal of helping students establish a useful writing process, from developing ideas through revision. All sections provide instruction in analysis and interpretation, in argument and the use of evidence, in the development of voice, and in the conventions of academic writing, including writing from sources. Students may choose to take a standard WRIT 125 course (meeting two periods a week and addressing a small, well-defined topic related to the instructor’s expertise), or to study writing as part of an introductory course in another department (these “combined courses” are designated with a slash in the course title; all carry one unit of credit, fulfill distribution and/or major requirements, and meet for at least three periods each week).

All students are required to take WRIT 125 in either the fall or spring semester of their first year at Wellesley. Students who lack confidence in their writing are advised to take WRIT 125 in the fall and to select one of the sections designated for underconfident writers (10, 11, 12, 13, 14, in semester 1). Students who begin study at Wellesley with the summer ‘06 Pathways Program will automatically be enrolled in one of two sections of WRIT 125 reserved for Pathways students.

Students who wish to pursue the study of writing beyond WRIT 125 may select independent study in writing (WRIT 250 for a full unit or WRIT 250H for a half unit of credit) with a member of the writing program staff, but they should also be aware that many courses at Wellesley are taught writing intensively, offering the opportunity to study writing as part of their disciplinary study. Students wishing to pursue course work in creative writing should consult the English department course listings.

PLEASE NOTE: Students may not take a second semester of WRIT 125 unless they have the written consent of the Director of the Writing Program.

Semester I

WRIT 125 01, 02, 03/ENG 120 Critical Interpretation
Hickey, Rodentsky, Wall-Randell (English)
A course designed to increase power and skill in critical interpretation by the detailed reading of poems and the writing of interpretive essays. This course satisfies both the WRIT 125 requirement and the critical interpretation requirement of the English major. Includes a third session each week.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

WRIT 125 04, 05/ARTH 100 Introduction to the History of Art Part I: Ancient and Medieval Art
Bedell, Rhodes (Art)
A foundation course in the history of art, part 1. From the ancient Egyptian pyramids to the Buddhist temples of India, from the mosques of Arabia to the Gothic cathedrals of Europe, the course introduces the visual cultures of the Ancient and Medieval worlds. Students in this section of ARTH 100 will attend the same twice-weekly lectures as the other ARTH 100 students, but their assignments will be different, and they will attend two special WRIT 125/ARTH 100 courses each week. Through writing about art, students in 100/125 will develop skills in visual and critical analysis. This course satisfies the WRIT 125 requirement and counts as a unit towards a major in art history, architecture, or studio art.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

WRIT 125 06/RUSS 125 Great Short Stories from Russia
Weiner (Russian)
Russian literature has given the world some of the best stories ever told, and this course surveys two centuries’ worth of them. Someone once quipped that all of twentieth century Russian literature came out of Nikolai Gogol’s “ Nose.” And so we begin with “The Nose” and other ridiculous stories by Gogol. We will go on to read some of the finest short stories of Chekhov and the Nobel Prize winner Ivan Bunin. The grotesque realism of Isaac Babel’s stories and the magical realism of Vladimir Nabokov’s also lie within the scope of this course. We will conclude with the late and post-Soviet stories of Tatiana Tolstaja and Ludmilla Petrushevskaya. No prior knowledge of Russian language or literature is required. This course satisfies the requirements for WRIT 125. Includes a third session each week.
Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

WRIT 125 07/PHIL 101 Ancient Greek Philosophy
Conklin (Philosophy)
Study of selected dialogues of Plato and treatises of Aristotle. Plato topics to be discussed and written about include his account of the human "psyche," his theory of Forms, and his portrait of Socrates. Studies of Plato's student, Aristotle, will include learning to speak, write and analyze the philosophical vocabulary which Aristotle developed and which became standard for subsequent Western philosophy. This course satisfies the WRIT 125 requirement and counts as a unit towards the major in philosophy. Includes a third session each week. Mandatory credit/noncredit.
Prerequisite: None
Distribution: Epistemology and Cognition or Religion, Ethics and Moral Philosophy
Semester: Fall
Unit: 1.0

WRIT 125 08 A Brief History of Public Speech-Making
Wood (The Writing Program)
This course drives toward a single question: what role does the speech play in contemporary American public life? To answer that question, we critically examine speeches—ancient, recent past, and present—with an eye toward their form, context, and impact. Methods of analysis will be primarily rhetorical; assignments will ask students to analyze speeches but also to practice some of the methods of rhetoric to develop their own speaking and writing styles. Our exploration will take us from Thucydides and Cicero through the women's and civil rights movements up to the Reagan/Clinton/Bush era. We’ll conclude with a look at this year’s mid-term elections and blogging. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 09 The Living City on Page and Screen
Ford (English)
The city is not just a setting but a character in its own right in the American literary and cinematic traditions. In this course we'll read and watch selected works of literature and film that tell stories in and about American cities; we’ll examine the ways in which these urban myths define particular ideas about gender, race, and identity in contemporary narrative. Characters like the hardboiled detective hero and the femme fatale, urban experiences like race riots and existential angst, and images of fairytale and futuristic cities will all figure into our exploration of the role of the city in defining contemporary American culture. We'll use writing assignments to make connections between the city’s varied characters while developing rich and layered readings of individual texts. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 10, 11 The Role of Stories
Schwartz (The Writing Program)
This course looks at the rich and various roles stories play. We look at the short story as a literary form, examining the techniques by which writers reveal their visions. These two sections are appropriate for students who have not done much writing in high school or who perhaps lack confidence in writing (but who love to read stories). Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 12 Women and Memoir:
Shaping a Life
Johnson (The Writing Program)
This course explores how writers select and fashion events from their own lives to provide context for their ideas. For women writers especially, this "revision" of personal experience has proved a powerful forum for addressing artistic, social,
WRIT 125 16 Watching the Supreme Court
Viti (The Writing Program)
In this course, students will read and write about landmark United States Supreme Court opinions, and in doing so, locate important themes and trends in the Court's decisions, beginning with the power of judicial review in Marbury v. Madison, and jumping ahead to more recent decisions about the Fourteenth Amendment and equal educational opportunity (Brown v. Board of Education), privacy rights (Griswold v. Connecticut and Roe v. Wade), executive privilege (U.S. v. Nixon), and federalism (Bush v. Gore). We will also read and analyze essays and reports by journalists and legal scholars who comment on the Supreme Court, including Laurence Tribe, Bob Woodward, Nina Totenberg, Jeffrey Rosen, and Jeffrey Toobin. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 17 The Novels of Jane Austen
Meyer (English)
Students will read a selection of the great novels of Jane Austen and use her work to learn skills for the close reading of fiction in general. We will study the details of Austen's fictional technique. From what perspective are the novels told? How does the author reveal her attitudes toward her characters? At the same time we will consider the broader questions raised by the novels. What values motivate Austen's fiction? How does she comment on the larger social and historical scene? What are her views on such issues as slavery or the proper role of women? Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 18 Wealth and Poverty in America: An Economist's Perspective
Velenchik (Economics)
America has become increasingly unequal over the past 30 years. Corporate executives' earnings are hundreds of times those of their blue collar employees. The middle class is "on the precipice," according to Harvard Magazine. More Americans are millionaires than ever before, but more of us are poor as well. What is happening? Why? What does this change mean for our economy and society? This course will use primary data, government publications, and articles in both the popular and scholarly press as a basis for writing about the causes and consequences of these trends. We will pay particular attention to learning to write about quantitative phenomena using numbers, charts, and graphs. No previous knowledge of economics is required. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 19 The Image of Islam in Western Literature, Media, and the Arts
Rollman (History)
Through critical evaluation of selected texts and images produced by European and American travelers, academics, journalists, and artists during the nineteenth and twentieth centuries, the course will explore how cultural stereotypes have had, and continue to have, a formative impact on the way Islam, Muslims, and the Middle East are understood in the West. Students will analyze the processes by which these representations and assumptions are created and perpetuated, their impact in specific historical contexts, and their relevance to broader issues of intercultural communication and understanding.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 20 The Places of Nature
Turner (Environmental Studies)
What is "green" about a metropolis like Boston? What do we mean by "organic" in the supermarket? Is wilderness as "natural" as seems? In this course, we focus our writing on three places of particular environmental significance: the city, the farm, and the wilderness. Drawing on the interdisciplinary tools of environmental studies, we consider the ways society has altered nature; how science, literature, and history can guide our understanding of the environment; and how a sense of place and justice can inform environmental ethics and advocacy. Course includes field trips to the city, a nearby farm, and the wilderness. As we examine the environment in our writing and survey it in the field, we will consider the contested place of nature in modern America. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 21 Race, Identity, and Ideology
Lackey (The Writing Program)
What role does ideology play in the construction of an individual's identity? Who controls a culture's ideology? Who benefits from the culture's ideology? Who suffers? Such are the questions at the heart of the provocative literary texts that we will examine in this course. During the semester, students will complete a variety of writing assignments on the topics of race, identity, and ideology. The assignments are designed to hone the students' reading, writing, and thinking skills. We will read texts from Joseph Conrad, Nella Larsen, Alice Walker, and others.
Prerequisite: None
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WRIT 125 22 Spike Lee and Woody Allen: New York City in Black and White
Lackey (The Writing Program)
In this course, we will struggle, in class discussions and in writing, to formulate strategies for analyzing and interpreting films based in New York City. By Spike Lee and Woody Allen. Students will learn how to use film theory, write about film, and interact with film criticism. To that end, we will look at some crucial texts and films. Films will include: Bamboozled, Annie Hall, Sunner of Sam, Crimes and Misdemeanors, She's Gotta Have It, Manhattan, Mo' Better Blues, and Deconstructing Harry.
Prerequisite: None
Distribution: None
Semester: Fall
Unit: 1.0

WRIT 125 23 Beowulf: The Man, the Hero, the Monster
Lynch (English)
We will spend most of our time reading the longest and most magnificent of Old English poems, Beowulf. In this medieval masterpiece, a

Unit: 1.0

WRIT 125 04/ARTH 101 Introduction to the History of Art Part II: Renaissance to the Present

Rhodes (Art)
A foundation course in the history of art. From Michelangelo to media culture, this course introduces the visual cultures of Europe, Africa, and the Americas, beginning with the Renaissance, using key issues and monuments as the focus of discussion. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 101 students, but their assignments will be different, and they will attend two special WRIT 125 conferences each week. Through writing about art, students in 101/125 will develop skills in visual and critical analysis. This course satisfies the WRIT 125 requirement and counts as a unit towards a major in art history, architecture, or studio art.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

WRIT 125 05/EDUC 102 Education in Philosophical Perspective

Hawes (Education)
This course is guided by questions such as: What is education? How do an individual's own efforts to make sense of the world and to guide her life relate to schools and academic work? To the diversity of experiences and cultures? What should the aims of education be? The focus will be on perspectives and processes of learning and teaching. We will use the works of earlier writers (for example, Confucius, Plato, and Dewey) and contemporary writers as starting points in our investigations. This course satisfies the WRIT 125 requirement and counts as a unit toward the education minor. Includes a third session each week.
Prerequisite: None
Distribution: Epistemology and Cognition
Semester: Spring
Unit: 1.0

WRIT 125 06/AMST 150 Defining Asian American Literature

Iwamura (The Writing Program)
The question we will pose at the outset, and which we will revisit frequently, is: "What defines Asian American literature?" The writer's ethnicity? The topic? The intended audience? Authors studied will likely include Maxine Hong Kingston, Patti Kim, Jhumpa Lahiri, R.O. Butler, Peter Ho Davies, Sandra Tsing Loh, Monique T.D. Truong. Students will also read essays on the power of creativity and the imagination. As students refine their definitions of Asian American literature, spurred on by texts that challenge their initial ideas, they will work toward defining American identity itself. This course satisfies the WRIT 125 requirement and counts as a unit toward the Asian American Studies concentration within the Asian American Studies Major. Includes a third session each week.
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

WRIT 125 07/CAMS 120 Women in Film

Wood (The Writing Program)
To a large extent, film is about watching, and much film is about watching women. This course provides basic instruction in film analysis, and then makes a foray into theories of cinema. How does the camera work, not only to display its characters, but also to direct the gaze upon them? What are the relationships between the visual spectacle and the progress of the film's story? Writing assignments ask students to observe, analyze, interpret, and explain. This course satisfies the WRIT 125 requirement and counts as a unit towards a major in cinema and media studies. Includes a third session each week.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

WRIT 125 08 Retelling Stories: The Art and the Ethics

Schwartz (The Writing Program)
In this course we explore the moral and artistic implications of retelling stories and myths. We'll read stories from the Old Testament, Native American legends, and Chinese myths, and then examine how these stories have been radically re-told by contemporary writers such as Cynthia Ozick, Louise Erdrich, and Maxine Hong Kingston. The course will culminate in a unit on Anne Frank's The Diary of a Young Girl and the intense controversies generated by the way Anne Frank's story has been re-told and popularized for stage and screen. Students will also have the opportunity to creatively retell a story or two of their own.
Prerequisite: None
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 125 09 Convention and Creativity: Four Contemporary African American Short Story Writers

Schwartz, The Writing Program
"...if a person is really good at what he does, if he is really creative, he masters the basics and then begins to play with the conventions of the thing." So James Alan McPherson characterizes the genius of both the writers we'll study and the characters they write about. This course explores the tensions between convention and creativity -- evident in both form and content -- in the short fiction of four African American writers: Elbow Room by James Alan McPherson; All Stories Are True by John Edgar Wideman; Lost in the City by Edward P. Jones; and Drinking Coffee Elsewhere by ZZ Packer. This course is not a comprehensive study of African American literature but a focused examination of four contemporary masters of the short story.
Prerequisite: None
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 125 10 Muckrakers: From The Jungle to Abu Ghraib

Viti (The Writing Program)
In this course we will read the work of investigative journalists whose writing exposed social and political ills in American society and eventually brought about positive changes in the culture. Among the writers whose work we will study are Ida Tarbell, Upton Sinclair, Lincoln Steffens, Woodward and Bernstein, Frances FitzGerald and Seymour Hersh. This course focuses on the development of critical analysis skills and argument. In addition to writing essays about the readings, students will design and carry out an investigative project, writing a sustained essay based on their findings and on traditional research into their subject matter. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 125 11 Law, Literature, and Film

Viti (The Writing Program)
We will read and write about short works of fiction and nonfiction, as well as popular films that reflect society's values concerning law and justice. Readings will be selected from works of Elie Wiesel, Franz Kafka, and Jeanne Houston, and popular and classic films such as Inherit the Wind, To Kill a Mockingbird, The Verdict, Dead Man Walking, and The Firm. Students will be required to attend evening screenings of five films. Each film will be shown on a weekend and again on a Sunday night, to accommodate varying student schedules. Mandatory credit/noncredit.
Prerequisite: None
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 125 12 Five American Women Fiction Writers

Fisher (English)
Through in-depth reading of the novels and short stories of five significant writers, this course will explore the rich ways in which twentieth-century American women from different cultural backgrounds have understood and written about women's experience. Students will critically evaluate a range of fiction by Willa

185 The Writing Program
WRIT 125 17 Race, Identity, and Ideology
Lackey (The Writing Program)
What role does race play in the construction of an individual’s identity? Who controls a culture’s ideology? Who benefits from the culture’s ideology? Who suffers? Such are the questions at the heart of the provocative literary texts that we will examine in this course. During the semester, students will complete a variety of writing assignments on the topics of race, identity, and ideology. The assignments are designed to hone the students’ reading, writing, and thinking skills. We will read texts from Joseph Conrad, Nella Larsen, Alice Walker, and others.
Prerequisite: None
Distribution: None
Semester: Fall, Spring
Unit: 1.0

WRIT 125 18 The Latest Fin de Siècle
Chiasson (English)
Works of literature, visual art, film, and music of the last twenty years will be discussed in terms of their consciousness of the end of the twentieth century and their self-consciousness as “turn of the century” art-works. Particular attention will be paid to lyric poetry, which (for reasons to be explored during the semester) seems specially equipped to mark the passing of time. Likely works include Tony Kushner’s Angels in America; Matthew Barney’s The Cremaster Cycle; the film Magnolia; poems by John Ashbery, Anne Carson, and Frank Bidart; the paintings of Gerhard Richter; the video art of Bill Viola; and the Bright Eyes album Digital Ash in a Digital Urn.
Prerequisite: None
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 125 19 TBA
Prerequisite: None
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 125 20 Writing Tutorial
Schwartz (The Writing Program)
An individual tutorial in expository writing, taught by juniors and seniors from a variety of academic departments. An opportunity to tailor reading and writing assignments to the student’s particular needs and interests. Tutorial meetings are individually arranged by students with their tutors. Mandatory credit/noncredit.
Prerequisite: Open to students from all classes by permission of the instructor.
Distribution: None
Semester: Spring
Unit: 1.0

WRIT 225 Nonfiction Writing
WRIT 225 is a changing topics writing workshop that will each year take up a particular nonfiction writing genre. Open to all students who have fulfilled the WRIT 125 requirement; please note that this course is not intended as a substitute for WRIT 125.
Topic A for 2006-07: Writing the Personal Essay
Erian (English)
In this class, you will write four personal essays. As well, we will read and discuss two nonfiction books: Dispatches from a Not-So-Perfect Life, by Faulkner Fox, and Summers With Juliet, by Bill Roarbach. Both works mix the personal with other outside elements: in Fox’s book, it’s the writer’s own experience with motherhood combined with the larger issue of feminism; in Roarbach’s book, it’s romance combined with nature. After finishing each text, the respective author will visit our class to discuss their process, and nonfiction writing in general. Come prepared to let it all hang out!
Prerequisite: None
Distribution: Language and Literature
Semester: Spring
Unit: 1.0
Courses in Health and Society

The anthropologist Mary Douglas observed that "the human body is always treated as an image of society and there can be no natural way of considering the body that does not involve at the same time a social dimension." Similarly, how we perceive our bodies, how they are treated by the health care system, how medicine and health care shape how we see ourselves are critical questions we must all face. Courses in health and society include ones that examine the workings of the human body and mind and ones that take a broad look at the relationship between health and larger cultural and societal issues. These courses encourage students to confront the ethical, social, and political issues in the creation of health and science, and they allow students to consider the broad issues that link the body to the body politic. They offer valuable perspectives to students planning careers in the health field and benefit anyone confronting health care in today's complex world.

Although there is no departmental or interdepartmental major in health studies, these courses enrich and enlarge concentrations in a variety of disciplines. They also demonstrate how different disciplines contribute to understanding a topic (health) and an institution (the health care system) that affect all our lives. Students who plan to apply for admission to medical school should consult the section on Preparation for Medical School in this catalog.

AFR 297 Medical Anthropology: A Comparative Study of Healing Systems

Courses in Legal Studies

Law plays a central role in social organization, and legal and political institutions use law, doctrines, and procedures to establish collective values, mediate conflicts between individuals and groups, and resolve questions of state power. Legal materials provide a rich ground for developing reading and interpretive skills, and for promoting serious inquiry into visions of the good and the just, the dimensions and limits of private and public decision-making, and conflicts between consent and coercion. Finally, cross-cultural and historical analyses offer students opportunities to explore the ways in which legal institutions and practices help create diverse social identities and communities.

Students wishing to explore a range of legal materials, analytical frameworks, and institutions are encouraged to select courses from several perspectives and disciplines.

There is no departmental or interdepartmental major in legal studies; however, coursework in this area can enrich and enlarge concentrations in a variety of disciplines. Students who plan to apply for admission to law school should consult the section on Preparation for Law School in this catalog.

Courses in Statistics

Wellesley College offers statistics courses in a variety of disciplines. Some introductory statistics courses are intended as terminal courses (e.g., MATH 101) while others are prerequisites for more advanced research methods courses in the major (e.g., PSYC 205). The courses listed below focus on descriptive and inferential statistics but differ in their specific applications and use of statistical software. Students who wish to take one of the following statistics courses to satisfy the QR overlay requirement are advised to select the most appropriate course, given their intended major(s) and minor. Students who scored a 5 on the AP Statistics exam have satisfied the QR overlay requirement but may be required to forgo that AP credit if a specific statistics course is required for their major. Please refer to the Quantitative Reasoning Program section for a complete list of QR overlay courses and see the full course descriptions under each department or program for details on the applications emphasized in each course.

Attention Called

The following rules apply to these statistics courses: MATH 101 and MATH 101Z are not open to students who have taken or are taking CS 199, ECON 103/SOC 190, POL 199, QR 180, or PSYC 205. In addition, MATH 101 and MATH 101Z are not open to students who have completed MATH 116, MATH 116Z, MATH 120, MATH 205 or the equivalent, except by permission of the instructor; such students should consider taking MATH 220 instead. MATH 101 and MATH 101Z are intended for students who do not anticipate taking further statistics courses in college. Students considering a major in economics, political science, sociology, or psychology are advised not to take MATH 101 and MATH 101Z; other courses are more appropriate for those majors.

CS 199 is intended for computer science majors and minors. The course is open to students who have taken or are taking ECON 103/SOC 190, MATH 101, MATH 220, POL 199, PSYC 205, or QR 180.

ECON 103/SOC 190 (formerly QR 199) is a prerequisite for ECON 203 (Econometrics) which is required of economics majors, and for SOC 301 (Methods of Social Research) which is required of sociology majors. Economists or sociology majors or minors who have completed MATH 220 or PSYC 205 may not also take ECON 103/SOC 190, but must take an additional elective in economics or sociology to complete their major or minor. Students who have taken CS 199, MATH 101, MATH 101Z, POL 199 or QR 180 may only take ECON 103/SOC 190 if they are majoring or minoring in economics or sociology, and should consult the appropriate department chair.

POL 199 is not open to students who have taken or are taking CS 199, ECON 103/SOC 190, MATH 101, MATH 101Z, MATH 220, PSYC 205, or QR 180, except with permission of the instructor.

PSYC 205 is required of all psychology and neuroscience majors. Students who have not declared a psychology or neuroscience major may not enroll in PSYC 205 if they have taken or are taking CS 199, ECON/103/SOC 190, MATH 101, MATH 101Z, MATH 220, POL 199, or QR 180, students who have declared a psychology or neuroscience major must take PSYC 205 even if they have already taken one of these statistics courses.

QR 180 is an elective statistics course for students interested in education policy issues. The course is not open to students who have taken or are taking CS 199, ECON 103/SOC 190, MATH 101, MATH 220, POL 199 or PSYC 205.

Courses in Urban Studies

The city as a unique social, cultural, political, economic, educational, environmental, and geographic locus has been one of the main themes of nineteenth- and twentieth-century thought. As we move into the twenty-first century, the problems and promises of urban life remain an enormous intellectual challenge for researchers and policy makers in many fields, and of great import to the health of our society and to that of other countries. These courses examine the city from many perspectives and allow students to use the city as a focus for interdisciplinary study. While there is no departmental or interdepartmental minor or major in urban studies, these courses complement and enrich concentrations in other fields, and may be useful for students interested in anthropology, architecture, economics, education, environment, history, literature, politics, policy analysis, medicine, sociology, or other subjects. Students interested are strongly encouraged to take at least one course in the Department of Urban Studies and Planning at MIT. A special guide to MIT courses in Urban Studies and Planning is available in the Wellesley College urban studies conference. Students are also encouraged to engage in urban fieldwork and internships, opportunities for which are available through the Center for Work and Service.

A Absent on leave
A1 Absent on leave during the first semester
A2 Absent on leave during the second semester
Accurate as of June 1, 2006

Rachid Aadaa
Assistant Professor of Middle Eastern Studies
B.A., University of Moulay Ismail (Morocco); M.A., Dartmouth College; Ph.D., Binghamton University

Kris Adams
Instructor in Vocal Jazz
B.M., Berklee College of Music; M.M., New England Conservatory of Music

Marjorie Agosin
Luella LaMer Sloner Professor in Latin American Studies
Professor of Spanish
B.A., University of Georgia; M.A., Ph.D., Indiana University

Robin M. Akert
Professor of Psychology
B.A., University of California (Santa Cruz); M.A., Ph.D., Princeton University

Mary Mennes Allen
Jean Glasscock Professor of Biological Sciences
B.S., M.S., University of Wisconsin; Ph.D., University of California (Berkeley)

Scott D. Anderson
Lecturer in Computer Science
B.S., Yale University; M.S., Ph.D., University of Massachusetts (Amherst)

Diego Arciniegas
Instructor in Theatre Studies
B.A., Williams College

Brittina Argow
Instructor in Geosciences
B.A., College of William and Mary; M.S., Stanford University

Lilian Armstrong
Mildred Lane Kemper Professor Emerita of Art
B.A., Wellesley College; M.A., Harvard University; Ph.D., Columbia University

Ivan Arreguin-Toft
Visiting Assistant Professor of Political Science
B.A., University of California (Santa Barbara); M.A., Ph.D., University of Chicago

Chris R. Arumainayagam
Professor of Chemistry
A.B., Harvard University; Ph.D., Stanford University

Jerold S. Aeberbach
Professor of History
B.A., Oberlin College; M.A., Ph.D., Columbia University

John Babington
Instructor in Physical Education and Athletics
B.A., Williams College; J.D., Harvard University

Benjamin Bagby
Mary L. Coryell Distinguished Visiting Professor in the Humanities
B.A., B.M., Oberlin College

Susan M. Bailey
Professor of Education and Women's Studies
Executive Director, Wellesley Centers for Women
B.A., Wellesley College; M.A., Ph.D., University of Michigan

Tamar Barzel
Assistant Professor of Music
B.M., Oberlin Conservatory of Music; M.A., Ph.D., University of Michigan

Ann Streeter Batchelder
Professor of Physical Education and Athletics
B.A., Wheaton College; M.Ed., Framingham State College; Ed.D., Boston University

Senior Instructor in Physics Laboratory
B.A., Wabash College; M.A., University of Idaho

Wendy Hagen Bauer
Professor of Astronomy
B.A., Mount Holyoke College; M.S., Ph.D., University of Hawaii

Connie Lynn Bauman
Associate Professor of Physical Education and Athletics
B.S., Illinois State University; M.S., Arizona State University; Certificate, Indiana State University

Barbara R. Beatty
Associate Professor of Education
A.B., Radcliffe College; Ed.M., Ed.D., Harvard University

Rebecca Bedell
Assistant Professor of Art
B.A., Wellesley College; M.A., Ph.D., Yale University

Barbara S. Beltz
Susan M. Hallowell and Ruby Frances Howe Farwell Professor of Biological Sciences
B.A., Mount Holyoke College; M.S., Ph.D., Princeton University

Robert S. Berg
Professor of Physics
A.B., Princeton University; M.A., Ph.D., University of California (Berkeley)

Joanne Berger-Sweeney
Allene Lunniss Russell '46 Professor of Neuroscience
Professor of Biological Sciences
Associate Dean of the College
B.A., Wellesley College; M.P.H., University of California (Berkeley); Ph.D., Johns Hopkins University

Julia Bergofsky
Assistant Professor of Physical Education and Athletics
B.A., Middlebury College; M.A., Trinity College

Patricia Gray Berman
Professor of Art
B.A., Hampshire College; M.A., Ph.D., New York University

Stanley Berman
Visiting Associate Professor of Psychology
B.A., University of Rochester; M.Ed., M.A., Ph.D., Temple University

David A. Bernat
Assistant Professor of Religion
B.A., Jewish Theological Seminary; Ph.D., Brandeis University

Mira Bernstein
Assistant Professor of Mathematics
B.A., Yale University; Ph.D., Harvard University

James R. Resancon
Associate Professor of Geosciences
B.S., Yale University; Ph.D., Massachusetts Institute of Technology

Gurminder Kaur Bhogal
Assistant Professor of Music
B.Mus., Royal College; M.Mus., King's College; Ph.D., University of Chicago

Frank L. Bidart
Andrew W. Mellon Professor in the Humanities
Professor of English
B.A., University of California (Riverside); A.M., Harvard University

Daniel Bilar
Norma Wilentz Hess Fellow
Visiting Assistant Professor of Computer Science
B.A., Brown University; M.Eng., Cornell University; Ph.D., Dartmouth College

Sarah Clovis Bishop
Lecturer in Russian
B.A., Williams College; Ph.D., Princeton University

Thomas J. Bittner
Visiting Assistant Professor of Philosophy
B.A., University of California; M.A., Ph.D., University of Washington

Judith B. Black
Associate Professor of Art
B.A., Quincy College; M.A., M.S., Massachusetts Institute of Technology

Laura Bossert-King
Instructor in Viola and Violin
B.M., M.M., Eastman School of Music

Kathleen Boyd
Instructor in Flute
B.M., M.M., New England Conservatory of Music

Daniel J. Brabander
Assistant Professor of Geosciences
B.S., M.A., Binghamton University; Ph.D., Brown University

Sheila P. Brachfeld-Child
Senior Lecturer in Psychology
Director, Medical Professions Advising
B.A., Tufts University; M.A., Boston University; Ph.D., Brandeis University

Martin Alan Brody
Catherine Mills Davis Professor of Music
B.A., Amherst College; M.M., D.M.A., Yale University School of Music

Kathleen Brogan
Professor of English
B.A., Queens College; M.A., M.Phil., Ph.D., Yale University

Rebecca Bruce
Assistant Professor of Physical Education and Athletics
B.A., Colby College; M.A., Connecticut College

Charles Bu
Professor of Mathematics
B.S., M.S., Shanghai Jiao Tong University; M.S., Michigan State University; Ph.D., University of Illinois

Emily A. Buchholz
Gordon P. Lang and Althea P. Lang '26 Professor of Biological Sciences
B.A., College of Wooster; M.A., University of Wisconsin; Ph.D., George Washington University

Tom Burke
Associate Professor of Political Science
B.A., University of Minnesota (Minneapolis); M.A., Ph.D., University of California (Berkeley)

Kristin Butler
Associate Professor of Economics
B.A., Wellesley College; M.S., London School of Economics; M.A., Ph.D., Princeton University

William E. Cain
Mary Jewett Gaiser Professor of English
B.A., Tufts University; M.A., Ph.D., Johns Hopkins University

John S. Cameron
Professor of Biological Sciences
B.S., College of William and Mary; M.S., Ph.D., University of Massachusetts (Amherst)

Samantha Cameron
Instructor in Physical Education and Athletics
B.A., San Jose State University; M.A., University of California (Los Angeles)

Christopher Candland
Assistant Professor of Political Science
B.A., Haverford College; M.A., M.Phil., Ph.D., Columbia University

Debra Candrea
Visiting Assistant Professor of Political Science
B.A., Tufts University; Ph.D., Johns Hopkins University

George M. Caplan
Instructor in Physics Laboratory
B.A., Swarthmore College; S.M., Harvard University

Linda Carfi
Visiting Associate Professor of Psychology
B.A., University of Connecticut; Ph.D., University of Massachusetts (Amherst)

Margaret Deutsch Carroll
Professor of Art
B.A., Barnard College; A.M., Ph.D., Harvard University

189 Faculty
Karl E. Case
Katharine Conan and A. Barton Hepburn Professor of Economics
B.A., Miami University; A.M., Ph.D., Harvard University

Margaret Cezair-Thompson
Senior Lecturer in English
A.B., Barnard College; M.A., New York University; Ph.D., City University of New York

Dennis C. Chang
Visiting Assistant Professor of Biological Sciences
B.S., Queen’s University; Ph.D., Harvard Medical School

Stanley S. Chang
Assistant Professor of Mathematics
B.A., University of California (Berkeley); M.A., Cambridge University (England), Ph.D., University of Chicago

Jonathan M. Cheek
Professor of Psychology
B.A., George Washington University; M.A., University of Texas (Austin); Ph.D., Johns Hopkins University

Dai Chen
Lecturer in Chinese Language
B.A., Shanghai Teachers’ University; M.A., University of Iowa

A.B., Harvard College; Ph.D., Massachusetts Institute of Technology

Louise E. Colby
Instructor in Physical Education and Athletics
Dipl., Jyegang Yoga Institute of San Francisco

William F. Coleman
Professor of Chemistry
B.S., Eckerd College; Ph.D., Indiana University (Bloomington)

Glorianne Colliver-Jacobson
Instructor in Guitar and Uke
B.A., University of California (Berkeley)

Ann Congleton
Professor of Philosophy
B.A., Wellesley College; M.A., Ph.D., Yale University

Kendall Cox
Instructor in Physical Education and Athletics
B.A., Bowdoin College

Elena Tajima Cref
Associate Professor of Women’s Studies
B.A., University of California (Riverside); M.A., University of California (Santa Barbara); Ph.D., University of California (Santa Cruz)

Tucker R. Crum
Instructor in Biological Sciences Laboratory
B.S., Mary Washington College of the University of Virginia; M.S., Long Island University

Lee Cuba
William R. Kenan, Jr. Professor of Sociology
B.S., Southern Methodist University; M.A., M.Phil., Ph.D., Yale University

Selwyn R. Cudjoe
Professor of African Studies
B.A., M.A., Fordham University; Ph.D., Cornell University

Gillian Curran
Instructor in Astronomy Laboratory
B.A., Wellesley College

Thomas Orton Cushman
Professor of Sociology
B.A., Saint Michael’s College; M.A., Ph.D., University of Virginia

Veronica Darer
Lecturer in Spanish
M.A.T. School for International Training/World Learning; Ph.D., University of Florida

Emily Cleveland
Visiting Assistant Professor of Psychology
B.A., Sarah Lawrence College; M.A., Ph.D., Clark University

Suzanne Cleveland
Instructor in Harpsichord
B.M., M.M., New England Conservatory of Music

Courtney C. Colle
Assistant Professor of Economics
A.B., Harvard College; Ph.D., Massachusetts Institute of Technology

Louise E. Colby
Instructor in Physical Education and Athletics
Dipl., Jyegang Yoga Institute of San Francisco

William F. Coleman
Professor of Chemistry
B.S., Eckerd College; Ph.D., Indiana University (Bloomington)

Glorianne Colliver-Jacobson
Instructor in Guitar and Uke
B.A., University of California (Berkeley)

Ann Congleton
Professor of Philosophy
B.A., Wellesley College; M.A., Ph.D., Yale University

Kendall Cox
Instructor in Physical Education and Athletics
B.A., Bowdoin College

Elena Tajima Cref
Associate Professor of Women’s Studies
B.A., University of California (Riverside); M.A., University of California (Santa Barbara); Ph.D., University of California (Santa Cruz)

Tucker R. Crum
Instructor in Biological Sciences Laboratory
B.S., Mary Washington College of the University of Virginia; M.S., Long Island University

Lee Cuba
William R. Kenan, Jr. Professor of Sociology
B.S., Southern Methodist University; M.A., M.Phil., Ph.D., Yale University

Selwyn R. Cudjoe
Professor of African Studies
B.A., M.A., Fordham University; Ph.D., Cornell University

Gillian Curran
Instructor in Astronomy Laboratory
B.A., Wellesley College

Thomas Orton Cushman
Professor of Sociology
B.A., Saint Michael’s College; M.A., Ph.D., University of Virginia

Veronica Darer
Lecturer in Spanish
M.A.T. School for International Training/World Learning; Ph.D., University of Florida

Emilie Datta
Associate Professor of French
A.B., Bryn Mawr College; M.A., Ph.D., New York University

Venita Datta
Associate Professor of French
A.B., Bryn Mawr College; M.A., Ph.D., New York University

Olga M. Davidson
Visiting Associate Professor of Middle Eastern Studies
A.B., Boston University; Ph.D., Princeton University

Jennifer R. Davis
Visiting Instructor in History
B.A., Harvard University; M.Litt., University of Cambridge (UK)

Ophra Davis
Visiting Assistant Professor of African Studies
B.S., M.S., Jackson State University; Ph.D., Saint Louis University

Judith W. DeCew
Visiting Professor of Philosophy
B.A., University of Rochester; M.A., Ph.D., University of Massachusetts

Eleanor P. Delorme
Senior Lecturer in Art
Adjunct Curator, Davis Museum and Cultural Center
B.A., Wellesley College; M.A., Harvard University

Kristian Demary
Visiting Assistant Professor of Biological Sciences
A.B., Mount Holyoke College; M.A., Boston University; Ph.D., Tufts University

Elizabeth R. DeSombre
Canalla Chandler Frost Associate Professor of Environmental Studies
B.A., Oberlin College; Ph.D., Harvard University

Nicolas de Warren
Assistant Professor of Philosophy
B.A., Ph.D., Boston University

Bonnie M. Dux
Associate Professor of Physical Education and Athletics
B.S., University of Vermont; M.S., University of Tennessee (Knoxville)

Nicholas K. Doe
Senior Instructor in Chemistry Laboratory
B.A., M.S., University of California (Santa Cruz); M.A., Stanford University

Charles G. Dorrien
Professor of Art
Montserrat School of Visual Art, Diploma in Sculpture

Carol Dougherty
Professor of Classical Studies
B.A., Stanford University; M.A., University of California (Santa Barbara); M.A., Ph.D., Princeton University

Marion Dry
Instructor in Voice
Director, Music Performance Program
A.B., Harvard University; M.M., Northwestern University

Theodore W. Ducas
Professor of Physics
B.A., Yale University; Ph.D., Massachusetts Institute of Technology

Sylvaine V. Egger-Sparrow
Senior Lecturer in French
Director, French House
Licence de Lettres Modernes, Université de Haute Bretagne; Maîtrise de Français et de Linguistique, Université de Vincennes

Sharon K. Elkins
Professor of Religion
B.A., Stetson University; M.T.S., Harvard Divinity School; Ph.D., Harvard University

David Ellerby
Assistant Professor of Biological Sciences
B.S., University of Manchester, UK; Ph.D., University of Leeds, UK

Donald E. Elmore
Assistant Professor of Chemistry
B.A., Grinnell College; Ph.D., California Institute of Technology

Alla L. Epstein
Lecturer in Russian Language
M.A., Moscow University; Ph.D., Academy of Sciences Institute of World History (Russia)

Alicia F. Erian
Susan and Donald Newhouse Visiting Assistant Professor in Creative Writing
B.A., Binghamton University; M.F.A., Vermont College

Roxanne Euben
Jane Bishop ’51 Associate Professor of Political Science
B.A., Wesleyan University; M.A., Ph.D., Princeton University

Peter J. Ferguson
Theodora L. and Stanley H. Feldberg Professor of Art
B.A., Michigan State University; A.M., Ph.D., Harvard University

Carolyn Finney
Mellon Postdoctoral Fellow in Environmental Studies
B.A., Western Washington University; M.S.S., Utah State University

Paul Fisher
Assistant Professor of English
A.B., Harvard College; B.A., Trinity College (Cambridge); M.A., M.Phil., Ph.D., Yale University

Charles B. Fisk
Phyllis Henderson Carey Professor of Music and Continued
B.A., Harvard College; M.M.A., D.M.A., Yale University School of Music

Nolan T. Flynn
Assistant Professor of Chemistry
B.A., St. Olaf College; Ph.D., University of Illinois

Claire Fontijn
Associate Professor of Music
B.A., Oberlin College; Certificate, The Royal Conservatory of The Hague; M.A., Ph.D., Duke University
Anna Jacobs
Instructor in Physical Education and Athletics

Rachel Jacoff
Margaret E. Deffenbaugh and LeRoy T. Carlton Professor in Comparative Literature

Joel Janowitz
Visiting Assistant Professor of Art

Laura Jeppesen
Instructor in Viola da Gamba

Alexandra M. Johnson
Senior Lecturer in the Writing Program

Doug Johnson
Instructor in Jazz Piano

Kristina Niow Jones
Assistant Professor of Biological Sciences

Reid Jorgensen
Instructor in Percussion

William A. Joseph
Professor of Political Science

Joseph P. Joyce
Professor of Economics

Marion R. Just
Professor of Political Science

Stella Kakavoulou
Instructor in Computer Science Laboratory

Gamil Kalioby
Instructor in Physical Education and Athletics

B.A., Ain Shams University (Egypt); M.A., Military Academy (Egypt)

Lidwien Kaptijn
Elizabeth Kimball Kendall and Elisabeth Hedder Professor of History

B.A., Amsterdam University; M.A., University of London; Ph.D., Amsterdam University

Anastasia Karakasidou
Associate Professor of Anthropology

B.A., College of Wooster; M.A., Brandeis University; M.A., Bryn Mawr College; M.Phil., Ph.D., Columbia University

Margaret Keane
Class of 1966 Associate Professor of Psychology

B.A., Harvard College; Ph.D., Massachusetts Institute of Technology

Megan Kerr
Associate Professor of Mathematics

B.A., Wellesley College; Ph.D., University of Pennsylvania

Sandra J. Kerr
Instructor in Physical Education and Athletics

Yu Jin Ko
Associate Professor of English

B.A., Columbia University; M.A., Cambridge University (Clare College); Ph.D., Yale University

T. James Kodera
Professor of Religion

B.A., Carleton College; M.A., M.Phil., Ph.D., Columbia University

Eliisa Koff
Margaret Haun Professor of Psychology

B.S., Queens College; M.S., Ph.D., Tufts University

Philip L. Kohl
Kathryn Wassermann Davis Professor of Slavic Studies

Professor of Anthropology

B.A., Columbia University; A.M., Ph.D., Harvard University

Nancy Harrison Kolody
Nellie Zuckerman Cohen and Anne Cohen Heller Professor of Health Sciences

Professor of Chemistry

B.A., Wellesley College; Ph.D., Massachusetts Institute of Technology

Marina Koniger
Assistant Professor of Biological Sciences

Diploma, Ph.D., University of Würzburg (Germany)

Joel Krieger
Norma Wilentz Hess Professor of Political Science

B.A., Yale College; Ph.D., Harvard University

Jens Kruse
Professor of German

Statesexamen, Universität Hamburg; M.A., Indiana University; Ph.D., University of California (Los Angeles)

Kyra Kulik-Johnson
Senior Lecturer in Psychology

B.A., Boston College; Ed.M., Harvard University; Ph.D., Boston College

Michael Lackey
Visiting Assistant Professor in the Writing Program

B.A., University of St. Thomas (St. Paul, MN); M.A., Ph.D., University of Kentucky

Barbara E. LaFitte
Instructor in Oboe

B.M., Arizona State University; M.M., Temple University

Yuan-Chu Ruby Lam
Professor of Chinese

B.A., M.A., Ph.D., Harvard University

Courtney Lannert
Assistant Professor of Physics

B.S., Brown University; M.A., Ph.D., University of California (Santa Barbara)

Flavia Laviosa
Senior Lecturer in Italian Studies

B.A., University of Bari (Italy); M.A., Ph.D., State University of New York (Buffalo)

Sharon L. Leavitt
Senior Instructor in Biological Sciences Laboratory

B.S., Drexel College; M.S., State University of New York (Buffalo)

Sohie Moody Lee
Instructor in Computer Science Laboratory

B.S., Cornell University; M.S., Stanford University; Ph.D., University of California (San Diego)

Sun-Hee Lee
Assistant Professor of Korean

B.A., M.A., Ph.D., Yonsei University; Ph.D., Ohio State University

Yoon Sun Lee
Barbara Morris Gaspern Associate Professor of English

A.B., Harvard College; Ph.D., Yale University

Philip Levine
William R. Kenan, Jr. Professor of Economics

B.S., M.S., Cornell University; Ph.D., Princeton University

Andrea Gayle Levitt
Margaret Clapp ’30 Distinguished Alumni Professor of French and Linguistics

B.A., Wellesley College; M.A., M.Phil., Ph.D., Yale University

Peggy Levitt
Associate Professor of Sociology

B.A., Brandeis University; M.S., Columbia University; Ph.D., Massachusetts Institute of Technology

Elizabeth C. Lieberman
Instructor in Chemistry Laboratory

B.A., Wellesley College; M.A., Brandeis University

David Lindauer
Stanford Calderwood Professor of Economics

Faculty Director, Internships and Service Learning

B.A., Wellesley College; City of New York; A.M., Ph.D., Harvard University

Heping Liu
Associate Professor of Art

B.A., Guangzhou Institute of Foreign Languages (China); M.A., Southern Methodist University; M.A., M.Phil., Ph.D., Yale University

Liang Kok Liung
Instructor in Physical Education and Athletics

Katarina Livijancic
Mary L. Carnelle Distinguished Visiting Professor in the Humanities

B.M., M.M., University of Zagreb; Ph.D., Ecole Pratique des Hautes Etudes

Kenneth Loewit
Instructor in Theatre Studies

Theatre Production Manager

Melinda Lopez
Lecturer in Theatre Studies

B.A., Dartmouth College; M.A., Boston University

Adrienne Lucas
Assistant Professor of Economics

B.A., Wesleyan University; M.A., Ph.D., Brown University

Margery Lucas
Professor of Psychology

B.S., Pennsylvania State University; M.S., Ph.D., University of Rochester

Barry Lydgate
Professor of French

Associate Director, Wellesley-in-Aix (sen. II)

B.A., M.Phil., Ph.D., Yale University

Kathryn L. Lynch
Katharine Lee Bates and Sophie Chantall Hart Professor of English

B.A., Stanford University; M.A., Ph.D., University of Virginia

Jing-Heng Sheng Ma
Mayling Soong Professor of Chinese Studies

Professor of Chinese

B.Ed., Taiwan Normal University; M.A., Philip women’s University (Philippine); M.A., Ph.D., University of Michigan

Tamaki Maeda
Freeman Postdoctoral Fellow in Art

B.A., M.A., Ph.D., University of Washington
Sarah Rahko
Instructor in Physical Education and Athletics
B.A., Boston College

Carlos Ramos
Associate Professor of Spanish
Licenciatura, Universidad Central de Barcelona; M.A., Emerson College; Ph.D., Boston University

Valerie Ramseyer
Associate Professor of History
A.B., Smith College; M.A., Ph.D., University of Chicago

Brendon Reay
Assistant Professor of Classical Studies
B.A., Reed College; M.A., Bryn Mawr College; Ph.D., Stanford University

Paul I. Reisberg
Assistant Professor of Chemistry
B.S., Rensselaer Polytechnic Institute; Ph.D., Rice University

Joy Renjilian-Burgy
Associate Professor of Spanish
B.A., Mount Holyoke College; A.M., Harvard University

Michele M. Respaut
Professor of French
Faculté des Lettres, Université de Montpellier; M.A., Assumption College; Ph.D., Brown University

Susan M. Reverby
Professor of Women's Studies
B.S., Cornell University; M.A., New York University; Ph.D., Boston University

John G. Rhodes
Assistant Professor of Art
A.B., A.M., Ph.D., Harvard University

Wilbur C. Rich
Professor of Political Science
B.S., Tuskegee Institute; Ed.M., Ph.D., University of Illinois

Nathalie Bachet Ritchey
Associate Professor of French
Licence, Maîtrise, Agrégation, École Normale Supérieure de Fontenay aux Roses and Université de la Sorbonne Nouvelle (Paris); M.A., Ph.D., Brown University

Lois P. Roach
Lecturer in Theatre Studies
B.S., Emerson College; M.A., Lesley College

Nicholas L. Rodenhouse
Associate Professor of Biological Sciences
A.B., Hope College; M.S., Iowa State University; Ph.D., Dartmouth College

Lisa Rodensky
Assistant Professor of English
B.A., Wellesley College; J.D., Harvard Law School; Ph.D., Boston University

Guy M. Rogers
Professor of Classical Studies and History
B.A., University of Pennsylvania; B.A., University of London; M.A., Ph.D., Princeton University

Judith Rollins
Professor of Africana Studies
B.A., M.A., Howard University; Ph.D., Brandeis University

Wilfrid J. Rollman
Visiting Associate Professor of History
B.A., Creighton University; M.A., Ph.D., University of Michigan

Anna P. Bonell
Visiting Assistant Professor of Jewish Studies
B.A., Tel-Aviv University; M.A., Pennsylvania State University; M.A., Ph.D., Brandeis University

Lawrence A. Rosenwald
Anne Pierce Rogers Professor of American Literature
Professor of English
B.A., M.A., Ph.D., Columbia University

Lorraine Elena Roses
Professor of Spanish
B.A., Mount Holyoke College; A.M., Ph.D., Harvard University

Raul Rubio
Assistant Professor of Spanish
B.A., Barry University; M.A., Middlebury College; Ph.D., Tulane University

Gregory A. Ruf
Visiting Associate Professor of Anthropology
B.A., State University of New York (Courtland); M.A., P.Phil., Ph.D., Columbia University

Mary Jane Rupert
Instructor in Harp
B.A., Oberlin College; M.A., Ph.D., Indiana University (Bloomington)

David Russell
Instructor in Cello
B.M., Eastman School; M.M., University of Akron; D.M.A., SUNY (Stony Brook)

Markella B. Rusherford
Assistant Professor of Sociology
B.A., Mississippi College; M.A., University of Memphis; Ph.D., University of Virginia

Margery M. Sabin
Lorraine C. Wang Professor of English
B.A., Radcliffe College; M.A., Ph.D., Harvard University

Jamuna Samuel
Visiting Assistant Professor of Music
B.A., Yale College; M.A., Yale University; Ph.D., City University of New York

Karen Sauer
Accompanist and Coach
B.A., Humboldt State University; M.M., New England Conservatory of Music

Nancy Scherer
Assistant Professor of Political Science
B.A., Lafayette College; J.D., Emory University; Ph.D., The University of Chicago

R. Steven Schiavo
Professor of Psychology
B.A., Lehigh University; Ph.D., Columbia University

Adam Schwartz
Assistant Professor in the Writing Program
B.A., Macalester College; M.A., University of Chicago; M.F.A., Ph.D., University of Iowa

Andrea S. Sequeira
Assistant Professor of Biological Sciences
M.S., Ph.D., University of Buenos Aires (Argentina)

Lois Shapiro
Instructor in Piano
B.Mus., Peabody Institute of Music; M.Mus., Yale University School of Music; D.Mus., Indiana University School of Music (Bloomington)

Aaron Sheehan
Instructor in Voice
B.A., Luther College; M.M., Indiana University (Bloomington)

Nathaniel J. Sheidley
Assistant Professor of History
B.A., Stanford University; M.A., Ph.D., Princeton University

Mark A. Sheldon
Visiting Assistant Professor of Computer Science
B.S., Duke University; S.M., Ph.D., Massachusetts Institute of Technology

Andrew Shennan
Professor of History
Dean of the College
B.A., M.A., Ph.D., Cambridge University (Corpus Christi College)

Vernon L. Shetley
Professor of English
A.B., Princeton University; M.A., M.Phil., Ph.D., Columbia University

Alan Shuchat
Professor of Mathematics
B.S., Massachusetts Institute of Technology; M.S., Ph.D., University of Michigan (Ann Arbor)

Neelima Shukla-Bhatt
Visiting Assistant Professor in the South Asia Studies Program
B.A., M.A., Maharaaja Sayajirao University of Baroda (India); M.Div., Ph.D., Harvard University

Randall Shull
Professor of Computer Science
B.A., Humboldt State University; M.S., University of New Hampshire; M.A., Ph.D., Dartmouth College

Frederic W. Shultz
Professor of Mathematics
B.S., California Institute of Technology; Ph.D., University of Wisconsin (Madison)

Marilyn Sides
Senior Lecturer in English
B.A., M.A., University of Utah; Ph.D., Johns Hopkins University

Linda M. Sieck
Instructor in Physical Education and Athletics
B.A., William Paterson College
Lauri L. Wardell
Senior Instructor in Physics Laboratory
B.S., Fort Lewis College; M.S., University of Kentucky
Kera M. Washington
Instructor in African Diaspora Drumming
Director, Yamalou
B.A., Wellesley College; M.A., Wesleyan University
Lois Wasserspring
Senior Lecturer in Political Science
B.A., Cornell University; M.A., Princeton University
Bruce Watson
Visiting Instructor in Economics
B.A., University of Denver; M.A., University of Colorado
Catherine Wearing
Assistant Professor of Philosophy
B.A., McGill University; Ph.D., Harvard University
Deborah Weaver
Instructor in Physical Education and Athletics
Certificate, London School of Contemporary Dance
Andrew C. Webb
Professor of Biological Sciences
B.S., Ph.D., University of Southhampton (England)
Dorothy Webb
Associate Professor of Physical Education and Athletics
B.A., University of the Pacific; M.A., Brown University
Akila Weerapana
Associate Professor of Economics
B.A., Oberlin College; A.M., Ph.D., Stanford University
Adam Weiner
Associate Professor of Russian
B.A., M.A., Ph.D., University of Wisconsin (Madison)
Stefan W. Wiecki
Visiting Instructor in History
B.A., Free University Berlin; M.A., Brandeis University
Howard J. Wilcox
Professor of Mathematics
B.A., Hamilton College; Ph.D., University of Rochester
Patrice Williamson
Instructor in Rhythm and Blues Director, Body and Soul
B.M., University of Tennessee (Knoxville); M.M., New England Conservatory of Music
Tom Wilson
Instructor in Physical Education and Athletics
B.S.Ed., M.A., Central Missouri State University
Paul M. Wink
Professor of Psychology
B.A., M.A., University of Melbourne; Ph.D., University of California (Berkeley)
Kenneth P. Winkler
Class of 1919 – 50th Reunion Professor of Philosophy
B.A., Trinity College; Ph.D., University of Texas (Austin)
Ann D. Witte
Professor of Economics
B.A., University of Florida; M.A., Columbia University; Ph.D., North Carolina State University
Adèle Wolfson
Nan Walsh Schow '54 and Howard B. Schow Professor in the Physical and Natural Sciences
Professor of Chemistry
Associate Dean of the College
B.A., Brandeis University; Ph.D., Columbia University
Winifred Jane Wood
Senior Lecturer in the Writing Program
Director of the Writing Program
B.A., University of Illinois (Urbana); M.A., University of Iowa
Tom Zajac
Instructor in Recorder and Early Winds Director, Collegium Musica
B.A., Northern Illinois University; M.F.A., Sarah Lawrence College
Arlene Zallman
Professor of Music
Diploma, Juilliard School of Music; M.A., University of Pennsylvania
Paula Zeitlin
Instructor in Jazz Violin
B.A., Earlham College; M.A., University of Chicago
Weina Zhao
Lecturer in Chinese Language
B.A., Nanjing University; M.A., Clark University
Claire Zimmerman
Professor of Psychology
B.A., Wellesley College; Ph.D., Radcliffe College
Eve Zimmerman
Associate Professor of Japanese
B.A., University of Pennsylvania; Ph.D., Columbia University

Professors and Administrators Emeriti

Alice T. Schafer Ph.D.
Helen Day Gould Professor of Mathematics
Helen Storm Corsa Ph.D.
Martha Hale Stackford Professor of English
Beverly J. Layman Ph.D.
Professor of English
Eleanor R. Webster Ph.D.

Travel Directions

By Car
- From the West: Take the Massachusetts Turnpike (I-90) to Exit 14 (Weston). Go south on Interstate 95 (Route 128) for 1/2 mile to Route 16, Exit 21B. Follow Route 16 West for 2.9 miles to a stoplight (five-way intersection) in the town of Wellesley; go straight on Route 135 (West). At the third traffic light, take a left into the main entrance of the College. Take your first right to the new Davis Parking Facility.

- From the East: Take the Massachusetts Turnpike (I-90) west to Exit 16 (West Newton). Follow Route 16 West for 4.7 miles, using directions above.

- From the North: Take Interstate 95 South (Route 128) to Exit 21B (Route 16 West). Follow Route 16 West for 2.9 miles, using directions above.

- From the South: Take Interstate 95 North (Route 128) to Exit 21B (Route 16 West). Follow Route 16 West for 2.9 miles, using directions above.

By Airplane
Options from Logan International Airport:
- By car: From the airport, take the Ted Williams Tunnel to the Massachusetts Turnpike (I-90) West. Then follow directions from the East.

By Train
Options from the Amtrak terminal at South Station:
- From South Station, take the Framingham/Worcester Commuter Rail to the Wellesley Square stop.

The commute is approximately half an hour. One-way fare is $3.00 and is paid on the train. Exact change is not required.

Go up the stairs and turn left onto Crest Road; follow Crest a short distance. Take a right onto Central Street. Walk five minutes to the second set of lights. Cross the street to the entrance of the College. From there, allow 20 minutes to walk to your destination on campus.

Note: The Commuter Rail runs on a schedule that can be accessed by calling 800-392-6100 or 617-222-3200 or by visiting www.mdta.com. Please call ahead when making travel plans; the schedule varies on weekends and holidays. You may also take the Commuter Rail to Wellesley from Back Bay Station.

If you prefer, call a taxi from the Wellesley Square Commuter Rail stop. See Area Taxis. Fare will be approximately $4.

By Bus
- From Peter Pan and Greyhound terminals at South Station, use Commuter Rail directions above.

- Take a Non-Express Greyhound or Peter Pan bus to the Riverside terminal. From there, take a taxi to the College. See Area Taxis. Commute from Riverside will be about 30 minutes, although it may be longer during rush hour. Fare will be approximately $15.

Note: Express buses DO NOT stop at Riverside.
