About Courses of Instruction
A semester course that carries one unit of credit requires approximately 11 hours of work each week spent partly in class and partly in preparation. The amount of time scheduled for classes varies with the subject from two periods each week in many courses in the humanities and social sciences to three, four, or five scheduled periods in certain courses in foreign languages, in art and music, and in the sciences. A 0.5 unit course requires approximately 5.5 hours of work each week, including scheduled class time and preparation. A semester course that carries 1.25 units of credit includes at least 300 minutes per week of scheduled class time as well as significant work outside of class. Classes are scheduled from Monday morning through late Friday afternoon.

Academic Distinction
Honors in the Major Field
Students who have shown marked excellence in their major field may earn honors in the major. The usual route to honors, offered by all departments and programs, involves writing an honors thesis and successfully passing an oral examination by a thesis committee. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level. Some departments and programs require a higher average. Departments may petition on behalf of exceptional students whose averages fall between 3.0 and 3.5. Students enroll in Senior thesis research (360) in the first semester and carry out independent work under the supervision of a faculty member if sufficient progress is made, students continue with Senior Thesis (370) in the second semester. Specific requirements vary with department and programs; see the relevant sections of the catalog for details. Some departments and programs offer other routes to honors in the major; these are described in their Directions for Elections.

Catalog Archive
Previous course catalogs (1903-1904 to 2013-2014) are available from the Internet Archive or the Wellesley College Digital Scholarship and Archive.

Africana Studies is the critical, intellectual, and representational expression of the history, culture, and ideas of people of Africa and the African Diaspora, past and present. Founded in 1969, it is an interdisciplinary and transnational program of study that includes theoretical and methodological approaches reflective of the experience and intellectual traditions of Black people. It also includes studies of political and social movements, such as Nègritude, Garveyism, Pan-Africanism, the Civil Rights Movement, Decolonization, Black Consciousness, Black Identities, and Black Feminism. Zora Neale Hurston, Frantz Fanon, Walter Rodney, C.L.R. James, W.E.B. Du Bois, Kwame Nkrumah, Patricia Hill Collins, Angela Davis, Audre Lorde, Ama Ata Aidoo, Buchi Emecheta, Samir Amin, and Oyeronke Oyewumi are among the writers and intellectuals studied. Through the disciplines of history, literature, psychology, sociology, anthropology, political science, economics, religion, the cinema, and the creative arts, students examine the African world and the relationship between African people and the larger world system. Students obtain a wide range of knowledge and analytical tools as well as intellectual grounding, coherence, and integrity of the major. Each student will be assigned a faculty advisor, and be required to take the introductory course and attend a colloquium titled: "Africana Colloquium: The Common Intellectual Experience," offered each semester.

As an intellectual expression of African peoples, Africana Studies is designed to acquaint students with a critical perspective on the African world that is found primarily in Africa, the United States, the Caribbean/Latin America, but also among peoples of African descent in Asia and Europe. Grounded in the history, culture, and philosophy of African peoples, Africana Studies promotes knowledge of the contributions of African people to the world, develops a critical perspective to examine the Africana experience, and cultivates a respect for the multicultural and multicultural character of our common world humanity. Although Africana Studies emphasizes an interdisciplinary and multicultural approach to scholarship and learning, it also seeks to ground its students in a specific discipline and an understanding of the breadth of the Africana experience. As a result, the Africana Studies Department expects its students to develop a critical and analytical apparatus to examine knowledge, seeks to contribute to a student’s self-awareness, and attempts to broaden her perspective in ways that allow her to understand the world in its diversity and complexity.

**Goals for the Africana Studies Major**

- To understand the concepts, theories, knowledge, research methodologies, and skills in Africana Studies from a multidisciplinary perspective, through a series of required, core, elective, and experiential courses and mandatory colloquia
- To develop the ability to understand and communicate specialized and general knowledge in the field of Africana Studies that includes Africa and the African Diaspora in the United States, the Caribbean, Latin America, Europe, and Asia

**Requirements for the Africana Studies Major**

A major in Africana Studies requires nine units. A student can choose one of three possible concentrations: Africa, the Caribbean, or the United States, each of which encompasses an interdisciplinary approach while allowing a student to focus on a particular area of study and gain expertise in a discipline.

- By the end of the junior year, each major must take AFR 105, which introduces her to the content and methodology of Africana Studies. She also must attend the "Africana Studies Colloquium: The Common Intellectual Experience" that is offered each semester. Of the nine units required for an Africana Studies major, at least two must be at the 300 level. Ordinarily, not more than two units may be taken outside the department.

For all concentrations, students are encouraged to gain firsthand experiential insights in the Africana world. Students in the Africa and Caribbean concentrations are encouraged to consider the Wintersession courses in Ghana and Jamaica, respectively. They are also strongly encouraged to consider international study programs in these geographic areas. Those focusing on the United States should consider spending a semester or year at a historically Black college or in a relevant U.S. internship. Credit toward the major may be given for such experiences when appropriate.

**Courses for Credit in the Major**

**Africa**

This program of study is designed to provide students with an interdisciplinary and integrated understanding of the peoples of the African continent, from its ancient foundation through its current geopolitical situation. However, to ensure students' breadth of knowledge of the Africana world, two courses that focus on a geographic area other than Africa are required. Six courses that focus on Africa are the foundation of this concentration: one course must be in history; one must be in a social science (economics, political science, sociology, anthropology, or psychology); one must be chosen from the humanities (literature, language, art, music, philosophy, and religion); and two should be chosen from a specific discipline. The following courses are appropriate for the Africa concentration:

- History: AFR 105, AFR 340, HIST 265
- Social Sciences: AFR 204, AFR 235, AFR 236/POL 203 [2010-11], AFR 255, AFR 280, AFR 297, AFR 301, AFR 306, AFR 318, AFR 341
- Humanities: SWA 101-SWA 102, AFR 202/PHIL 202, AFR 207, AFR 211, AFR 222, AFR 251, AFR 316, FREN 218 [2007-08], FREN 330, MUS 209

**The United States**

As with the other concentrations, students who choose the United States should approach their study of African America through many disciplines. The concentration requires five courses focusing on the United States: one in history, one in the humanities, one in social science, and two in the discipline in which the student chooses to concentrate. (See the Africana concentration for the specific disciplines considered “humanities” and “social sciences.”) To ensure students' breadth of knowledge of the Africana world, however, this track also requires two courses focused on one or more geographic areas other than the United States. The following courses are appropriate for the United States concentration:

- History: AFR 105, AFR 206, AFR 208, AFR 214 [2010-11], AFR 239, AFR 340
- Social Sciences: AFR 214 [2010-11], AFR 217, AFR 225, AFR 255, AFR 306, POL 337
Humanities: AFR 201, AFR 212, AFR 222, ARTH 322 [2009-10], MUS 209, MUS 300

AFR 105 Introduction to the Black Experience
AFR 206 Introduction to African American History (from 1500)
AFR 208 Women in the Civil Rights Movement
AFR 239 Islam in Black America: From Slavery to the Present
AFR 255 The Black Woman Cross-Culturally: Gender Dynamics in the Africana World
AFR 340 Seminar. Topics in African American History
AFR 217 The Black Family
AFR 225 Introduction to Black Psychology
AFR 306 Urban Development and the Underclass: Comparative Case Studies

POLI 337 The Politics of Minority Groups in the United States
AFR 201 The African American Literary Tradition
AFR 212 Black Women Writers
AFR 222 Blacks and Women in American Cinema
MUS 209 A History of Jazz
MUS 300 Seminar. Studies in History, Theory, Analysis, Ethnomusicology

AFR - Africana Studies Courses

AFR 207 Studies Images of Africana People Through the Cinema
AFR 234 Introduction to West Indian Literature
AFR 310 Seminar. Reading Du Bois
FREN 330 French and Francophone Studies
SPAN 269 Caribbean Literature and Culture

Honors in Africana Studies
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level. The department may petition on her behalf if her GPA in the major is between 3.3 and 3.5. See Academic Distinctions.

African Studies Minor
Requirements for the Africana Studies Minor
A minor in Africana Studies will consist of five units, including one 300-level course. A student who minors in Africana Studies is required to take AFR 105 and must attend the "Africana Studies Colloquium: The Common Experience" that is offered each semester. Minors are strongly encouraged to take courses in at least two geographic areas (e.g., the United States and the Caribbean) and in two or more disciplines. Minors are also encouraged to attend departmentally sponsored extracurricular lectures, especially those (required of majors) that focus on methodology.

AFR 105 - Introduction to the Black Experience
This course serves as the introductory offering in Africana Studies. It explores, in an interdisciplinary fashion, salient aspects of the Black experience, both ancient and modern, at home and abroad. This course provides an overview of many related themes, including slavery, Africanisms, gender, colonialism, civil rights, and pan-African exchange. Instructor: Patterson Prerequisite: None Distribution: SBA; HS Term(s): Not Offered

AFR 201 - The African American Literary Tradition
AFR 206 - Introduction to African American History (from 1500)

AFR 207 - Images of Africana People Through the Cinema
An investigation of the social, political, and cultural aspects of development of African American people through the viewing and analysis of films from Africa, Afro-America, Brazil, and the Caribbean. The course covers pre-colonial, colonial, and postcolonial experiences and responses of Africana people. Films shown will include Sugar Cane Alley, Zan Boko, and Sankofa.

AFR 208 - Women in the Civil Rights Movement
A social and historical examination of the role of women in the Civil Rights Movement in the United States. Particular attention will be paid to the interplay between historical and social factors. Women's impact on the Civil Rights Movement and the effects of the movement on the women involved are the focus of this course.

AFR 211 - Introduction to African Literature
The development of African literature in English and in translation. Although special attention will be paid to the novels of Chimam Adichie, writers such as Ngugi wa Thiong'o, Camara Laye, Wole Soyinka, Miriama
The objective of this course is to provide students with an introduction to the richness, diversity, and complexity of African societies and cultures while appreciating their unifying features. Topics to be discussed include forms of social organization; the importance of kinship and marriage systems; the centrality of religion; the position of women; urbanization and problems of development, democratization, and political transformation; political instability; and armed conflicts. In order to understand a people’s view of themselves and of their relationship to the outside world, an in-depth case study will be made of one ethnic group: the Yoruba of southwestern Nigeria.

AFR 222 - Blacks and Women in American Cinema (1.0)
A study of the creation of images and their power to influence the reality of race and gender in the American experience. Viewing and analysis of American cinema as an artistic genre and as a vehicle through which cultural and social history are depicted.

AFR 226 - Environmental Justice, "Race," and Sustainable Development (1.0)
An investigation of the extent to which the causes and consequences of environmental degradation are influenced by social inequality and the devaluation of indigenous peoples. The course will examine how the poor, indigenous peoples and people of color are subjected to environmental hazards. Topics include the link between negative environmental trends and social inequality; the social ecology of slums, ghettos, and shanty towns; the disproportionate exposure of some groups to pollutants, toxic chemicals, and carcinogens; dumping of hazardous waste in Africa and other Third World countries; and industrial threats to the ecology of small island states in the Caribbean. The course will evaluate Agenda 21, the international program of action from the Earth Summit designed to halt environmental degradation and promote sustainable development.

AFR 242 - New World Afro-Atlantic Religions (1.0)
With readings, documentary films, discussions, and lectures, this course will examine the complex spiritual beliefs and expressions of peoples of African descent in Brazil, Cuba, Haiti, Jamaica, and North America. The course surveys African diasporic religions such as Candomble, Santeria, Voodoo, Shango, and African American religions. Attention will be paid to how diasporic Africans practice religion for self-definition, community building, and socio-cultural critique, and for reshaping the religious and cultural landscapes of the Americas.

AFR 251 - Religion in Africa (1.0)
An examination of the experience and expression of religion, the course surveys African religions among the Akan of Ghana, Yoruba of Nigeria, Nuer of the Sudan, the Zulu of South Africa, and the Bemazava-Sakalava of Madagascar. The course will focus on how gender, age, status, and cultural competence influence African attitudes toward architecture, ritual, myth, dance, and music to communicate, elaborate on the cosmos, and organize their lives. Special attention will be paid to the resiliency of African deities and indigenous cultural media during their encounter with Christianity and Islam.

AFR 254 - History of West Africa (1.0)
This course introduces students to the history of West Africa. Bordered by the Sahara desert and the Atlantic ocean, this region had two fronts to the world. The course begins by examining the political organizations, social structures, and economic systems in existence before colonization, moves to the transformations that followed, and ends with a historical understanding of the myths and realities of the subregion’s postcolonial states. Taking the perspective that West Africa has long been a part of global systems, it will particularly investigate the connections with Northern Africa and Western Europe.

AFR 255 - The Black Woman Cross-Culturally: Gender Dynamics in the Africana World (1.0)
This course uses a multidisciplinary approach to examine theories and sources of the lives, experiences, challenges and contributions of Black women from a cross-cultural perspective. Case studies will examine gender theories and gender dynamics in North and South America, the Caribbean, Europe, Asia and Africa. The course will interrogate women’s evolving positions and gender relations and analyze the legacies of slavery, colonialism, nationalism and liberation struggles.
within a post-slavery, post-colonial and post-modern context.

Instructor: Steady
Prerequisite: None
Distribution: SBA
Term(s): Fall

AFR 261 - History of Black American Cinema (1.0)
This course examines the historical development of filmic representations of African Americans from The Birth of a Nation by Griffith; the first generation of Black American filmmakers such as Micheaux through the Civil Rights Movement and the Black Power Era; the new black culture of the 1970s and “blaxploitation” films; the Roots phenomenon; and the Black film renaissance of the 1980s including Spike Lee, Gordon Parks, and Julie Dash to the present. We explore changing and interlocking relationships of race and representation, class and color, gender and sexuality, and the media. We investigate 1) how media institutions shape and shift notions of race as a social construct and a lived reality, and 2) theorize the future of black American cinema as “post-racial” or otherwise.

Instructor: Obeng
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

AFR 264 - African Art: Powers, Passages, Performances (1.0)
As an introduction to the arts and architecture of Africa, this course explores the meaning and the contexts of production within a variety of religious and political systems found throughout the continent; from Ethiopia, the Democratic Republic of Congo, and Mali, to name a few. We will consider important aspects such as the ancient art in the Nile Valley sphere, symbols of the power of royalty, and the aesthetic and spiritual differences in masquerade traditions. We will pay special attention to traditional visual representations in relation to contemporary African artists and art institutions.

Instructor: Greene (Art)
Prerequisite: None
Cross Listed as: ARTH 264
Distribution: ARS
Term(s): Spring

AFR 265 - African American Autobiographies (1.0)
This course traces the life stories of prominent African Americans, which, in their telling, have led to dramatic changes in the lives of African American people. Some were slaves; some were investigative journalists; some were novelists; and one is the president of the United States. We will examine the complex relationship between the community and the individual, the personal and the political and how these elements interact to form a unique African American person. The course also draws on related video presentations to dramatize these life stories. Authors include Linda Brent, Frederick Douglass, Ida B. Wells, Richard Wright, Maya Angelou, Malcolm X, and Barack Obama.

Instructor: Cudjoe
Prerequisite: None
Distribution: LI
Term(s): Not Offered

AFR 266 - Black Drama (1.0)
This course will examine twentieth-century Black drama, with a special emphasis on the period of its efflorescence during the Black Arts Movement of the 1960s and 1970s. We will also explore the Black theatre as a medium of aesthetic expression and communal ritual as well as an instrument of political consciousness and social change. Playwrights will include Douglas Turner Ward, Alice Childress, Ossie Davis, Lorraine Hansberry, James Baldwin, Ed Bullins, Adrienne Kennedy, LeRoi Jones (Amiri Baraka), Ntozake Shange, and others.

Instructor: Cudjoe
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

AFR 280 - Wintersession in Ghana (0.5)
This course is an introduction to Ghanaian history and society, with two foci: spirituality (Christianity, Santonofa, Islam, etc.) and women. Based at the University of Ghana in Legon, students will attend lectures by university professors, visit historic sites around Accra, and travel to the coast (Cape Coast and Elmina) and inland (to Kumasi and parts of the historic Ashanti region) to visit other historic sites as well as to study village and rural life.

Instructor: Obeng, Cudjoe
Prerequisite: By permission of the department.
Application required.
Distribution: SBA
Term(s): Not Offered
Not offered every year. Subject to Provost’s Office approval.

AFR 292 - African Art and the Diaspora: From Ancient Concepts to Postmodern Identities (1.0)
We will investigate the transmission and transformation of African art and culture and their ongoing significant impact on the continent, in Europe, and in the Americas. This course explores the arts of primarily western and central Africa, including the communities of the Bakongo, Yoruba, and Mande, among many others. The influences of early European contact, the Middle Passage, colonialism, and postcolonialism have affected art production and modes of representation in Africa and the African Diaspora for centuries. Documentary and commercial films will assist in framing these representations. The study of contemporary art and artists throughout the African Diaspora will allow for a particularly intriguing examination of postmodern constructions of African identity.

Instructor: Greene (Art)
Prerequisite: None
Cross Listed as: ARTH 292
Distribution: ARS
Term(s): Fall

AFR 297 - Medical Anthropology: A Comparative Study of Healing Systems (1.0)
This course examines alternative healing systems that attempt to treat the whole person as a physical, social, and spiritual being and to promote community participation and healing. It offers new perspectives on the biomedical model as it examines the sociocultural context of the causes, diagnosis, prevention, and cure of disease. Examples of healing systems will be taken from Third World countries, particularly in Africa, the Caribbean, and Latin America, and from industrialized societies, particularly from African American and indigenous communities in the United States. Examination will be made of healing systems that include divination, herbal medicine, folk medicine, and faith healing.

Instructor: Steady
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

AFR 299 - Wintersession Experience (0.5)
The international study Wintersession program allows students to travel to a specific location in order to learn about and engage with the local culture. This course focuses on the development, with special focus on the most disadvantaged cities. The course will draw on examples from the United States, the Caribbean, South America, and Africa.

Instructor: Cudjoe
Prerequisite: By permission of the department.
Application required.
Distribution: SBA
Term(s): Not Offered
Not offered every year. Subject to Provost’s Office approval.

AFR 301 - Seminar. South Africa (1.0)
An examination of the degree of success or failure in social transformation from a racist, centralized, and oppressive apartheid system to a nonracial, democratic, and participatory system that seeks to promote social and economic justice for all its citizens. Topics include the structural challenges to social transformation; socioeconomic development and resource distribution; the persistence of de facto apartheid; the Truth and Reconciliation Commission; increasing poverty among the African population; the HIV/AIDS epidemic; the impact of globalization; and South Africa’s place in Africa and the world at large.

Instructor: Steady
Prerequisite: A 200-level course of relevance to African studies or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

AFR 302 - Caribbean Intellectual Thought in the Twentieth Century (1.0)
During the twentieth century the Anglophone Caribbean produced a rich body of ideas that had an enormous impact upon the colonial and postcolonial world. These ideas cover fields such as history, politics, economics, and culture. This course traces the development of these ideas, examines their applicability to the specific circumstances in the Caribbean, and analyzes how they resonated in the larger world of ideas. We will look at the works of writers and thinkers that could include: A.R. Gurney, Marcus Garvey, Arthur Lewis, Eric Williams, CL R James, Amy Ashwood Garvey, Jamaica Kincaid, Patricia Mohammed, Erna Brodber, Chezzi Jagan, Walter Rodney, Maurice Bishop, and Michael Manley.

Instructor: Cudjoe
Prerequisite: One 200-level course of relevance to African studies or permission of the instructor.
Distribution: HS
Term(s): Fall

AFR 306 - Urban Development and the Underclass: Comparative Case Studies (1.0)
Throughout the African Diaspora, economic change has resulted in the migration of large numbers of people to urban centers. This course explores the causes and consequences of urban growth and development, with special focus on the most disadvantaged cities. The course will draw on examples from the United States, the Caribbean, South America, and Africa.

Instructor: Cudjoe
Prerequisite: None
Distribution: SBA
Term(s): Not Offered
Not offered every year. Subject to Provost’s Office approval.
AFR 310 - Seminar. Reading Du Bois (1.0)
This seminar examines various works of W.E.B. Du Bois within their historical, social, and cultural contexts. Although this course will pay special attention to Du Bois's literary endeavors, it will also examine his concept of race and color and his approaches to colonialism, civil rights, and politics. This seminar will examine The Souls of Black Folk, Darkwater, John Brown, The Autobiography of W.E.B. Du Bois, and The Suppression of the African Slave-Trade as well as some of his poems and other fiction.

Instructor: Cudjoe
Prerequisite: One 200-level course of relevance to Africana Studies or permission of the instructor.
Distribution: LL
Term(s): Not Offered

AFR 314 - Reading C.L.R. James (1.0)
C.L.R. James is an outstanding intellectual/activist of the 20th century. He has also been described as one of the seminal thinkers of the anti-colonialist struggles in the Third World and is seen as a profound thinker of Marxism. Although James has written on history, politics, culture, philosophy and sports this seminar will examine four areas of his theorising: history (The Black Jacobins); cultural theory (Beyond a Boundary); literary theory (Mariners, Renegades and Castaways); and his novel (Minty Alley). The seminar will also look at his thoughts on other subjects such as Black Studies, Athenian democracy and feminist writings.

Instructor: Cudjoe
Prerequisite: Open to students who have taken one 200-level literature course in any department, or by permission of the instructor.
Cross-Listed as: ENG 314
Distribution: LL
Term(s): Not Offered

AFR 316-01-F - Topics in African/African American Art (1.0)
Topic for 2014-15: The Body: Race and Gender in Modern and Contemporary Art
This course charts past and present artistic mediations of racial, ethnic and gendered experiences throughout the world, using the rubric of the body. In the struggle to understand the relation between self and other, artists have critically engaged with the images that define our common sense of belonging, ranging from a rejection of stereotypes to their appropriations, from the discovery of alternative histories to the rewriting of dominant narratives, from the concepts of difference to theories of diversity. The ultimate goal of the course is to find ways of adequately imagining and imaging various identities today. We will discuss socio-political discourses, including essentialism, structuralism, postmodernism, and post-colonialism and we will question the validity of such concepts as diaspora, nationalism, transnationalism and identity in an era of global politics that celebrates the hybrid self.

Instructor: Greene (Art)
Prerequisite: Open to juniors and seniors with permission of the instructor.
Cross-Listed as: ARTH 316-01-F
Distribution: ARS
Term(s): Fall

AFR 318 - Seminar. African Women, Social Transformation, and Empowerment (1.0)
A comparative analysis of the role of women in development with emphasis on the struggle within struggle—the movement to achieve political and economic progress for Africa and its people and the struggle within that movement to address problems and issues that directly affect women. We will explore women's participation in social and political movements and ways to improve the status of women.

Instructor: Steady
Prerequisite: One 200-level course of relevance to Africana studies or permission of the instructor.
Distribution: SBA
Term(s): Spring

AFR 320 - Seminar. Blackness in the American Literary Imagination (1.0)
An examination of how blackness has been represented in the American and Caribbean imagination and how it shaped some of the seminal texts in American and Caribbean literature. Implicitly, the course will also examine the obverse of the question posed by Toni Morrison: "What parts do the invention and development of whiteness play in the construction of what is loosely described as 'American literature'?

Instructor: Cudjoe
Prerequisite: Permission of the instructor.
Cross-Listed as: AMST 320
Distribution: LL
Term(s): Not Offered

AFR 340 - Seminar. Topics in African American History (1.0)
Prerequisite: One 200-level course of relevance to Africana studies or permission of the instructor.
Distribution: SBA; HS
Term(s): Not Offered

AFR 341 - Neglected Africans of the Diaspora (1.0)
This course explores the nature and composition of the African Diaspora and its changing meanings. We will examine the sociocultural connections among diasporic Africans such as the forced migrations of enslaved Africans and voluntary emigration of Africans out of continental Africa. The seminar also explores the historical, religious, and cultural factors that foster distinctive diasporic African identities and how these people constitute and contribute to global citizenship.

Instructor: Obeng
Prerequisite: One 200-level course of relevance to Africana studies or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

AFR 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

AFR 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

AFR 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

AFR 370 - Senior Thesis (1.0)
Prerequisite: AFR 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

SWA - Swahili Courses

SWA 101 - Elementary Swahili (1.0)
The primary focus of Elementary Swahili is to develop listening, speaking, reading, and writing skills. Aspects of Swahili/African culture will be introduced and highlighted as necessary components toward achieving communicative competence.

Instructor: Osoro
Prerequisite: None
Distribution: None
Term(s): Fall
Each semester of SWA 101 and SWA 102 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SWA 102 - Elementary Swahili (1.0)
The primary focus of Elementary Swahili is to develop listening, speaking, reading, and writing skills. Aspects of Swahili/African culture will be introduced and highlighted as necessary components toward achieving communicative competence.

Instructor: Osoro
Distribution: None
Term(s): Spring
Each semester of SWA 101 and SWA 102 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SWA 120 - Swahili Language and Cultures in East Africa (Winter Session in East Africa) (1.0)
This course is offered as an immersion experience designed to provide students with the unique opportunity to study Swahili language, community service leadership, and the diverse cultures of East Africa. The course blends regular classroom activities with daily immersion in the cultures of the Swahili speaking communities. Students will learn through intensive coursework and community engagement to expand their Swahili language skills, gain better understanding of the social, cultural, political, and economic context in Tanzania in particular and East Africa in general. The students will have the opportunity to explore the intersection of language and culture with contemporary issues in leadership and development.

Instructor: Osoro
Prerequisite: SWA 101
Distribution: LL
Term(s): Winter
This course does not satisfy the language requirement. Not offered every year. Subject to Provost's Office approval. This course may be taken
as SWA 120 or with additional assignments, SWA 220.

**SWA 201 - Intermediate Swahili (1.0)**

Intermediate Swahili builds on Elementary Swahili to enhance listening, speaking, reading, and writing skills at a higher level. Aspects of Swahili/African culture will be expanded upon and highlighted as necessary components toward increasing communicative competence.

Instructor: Osoro
Prerequisite: SWA 102
Distribution: None
Term(s): Fall

Each semester of SWA 201 and SWA 202 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**SWA 202 - Intermediate Swahili (1.0)**

Intermediate Swahili builds on Elementary Swahili to enhance listening, speaking, reading, and writing skills at a higher level. Aspects of Swahili/African culture will be expanded upon and highlighted as necessary components toward increasing communicative competence.

Instructor: Osoro
Prerequisite: SWA 201
Distribution: LL
Term(s): Spring

Each semester of SWA 201 and SWA 202 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**SWA 203 - Intermediate Swahili (Intensive) (1.0)**

Intermediate Swahili builds on Elementary Swahili to enhance listening, speaking, reading, and writing skills at a higher level. Aspects of Swahili/African culture will be expanded upon and highlighted as necessary components toward increasing communicative competence.

Instructor: Osoro
Prerequisite: SWA 102
Distribution: LL
Term(s): Not Offered

**SWA 220 - Swahili Language and Cultures in East Africa (Wintersession in East Africa) (1.0)**

This course is offered as an immersion experience designed to provide students with the unique opportunity to study Swahili language, community service leadership, and the diverse cultures of East Africa. The course blends regular classroom activities with daily immersion in the cultures of the Swahili speaking communities. Students will learn through intensive coursework and community engagement to expand their Swahili language skills, gain better understanding of the social, cultural, political, and economic context in Tanzania in particular and East Africa in general. The students will have the opportunity to explore the intersection of language and culture with contemporary issues in leadership and development.

Instructor: Osoro
Prerequisite: SWA 201 or by permission of the instructor.
Distribution: LL
Term(s): Winter

This course does not satisfy the language requirement. Not offered every year. Subject to Provost's Office approval.
AN INTERDEPARTMENTAL MAJOR

Director: Lee (English)
Associate Professor: Fisher, Jeffries
Visiting Lecturer: Blanton

Goals for the American Studies Major

- To expose students to exemplary models of interdisciplinary learning and critical inquiry in the arts, humanities, and social sciences
- To provide a broad understanding of American culture and society and their complex interrelationships
- To delineate the influence and impact of America beyond its borders and the transnational, racial, ethnic, and religious interactions that, in turn, define its own identity
- To introduce students to the many innovations within disciplines that attend to changes in historical understanding, literary and artistic sensibilities, and social life
- To enable students to make connections among disciplines in sharp and critical ways
- To offer students the opportunity to become critical thinkers, cogent writers, and skillful researchers on a broad range of topics in American life through their course work, individual study, and honors work

Requirements for the American Studies Major

The American Studies major seeks to understand the American experience through a multidisciplinary program of study. The requirements for the major are as follows: Nine units of course work are required for the major, at least six of which should be taken at Wellesley College. These courses include AMST 101, which should be completed before the end of the junior year; at least two courses in historical studies; one course in literature; one course in the arts; and one course from any of the following three areas: social and behavioral analysis; or epistemology and cog-nition; or religion, ethics, and moral philosophy. Students are also expected to take at least two 300-level courses, one of which should be AMST 300-399, taken in the junior or senior year. AMST 350, AMST 360, and AMST 370 do not count toward this requirement.

Within this structure, students should focus on an area or field of American society, such as law or gender. The focus, chosen in consultation with the major advisor, should consist of three or more courses in this topic from two or more departments.

Students are encouraged to explore the diversity of American culture and the many ways to interpret it. Most courses at the College that are primarily American in content may be applied to the American Studies major. American Studies majors are encouraged to take as part of, or in addition to, their major courses surveys of American history, literature, and art (for example, HIST 203/HIST 204, ENG 262/ENG 266, ARTH 231/ARTH 232) and a course on the U.S. Constitution and political thought (for example, POL 434). In addition, students are urged to take one or more courses outside the major that explore the theory and methods of knowledge creation and production (for example, ECON 103/SOC 190, PHIL 345, POL 199, QR 180).

Honors in American Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Interested students should apply to the director in the spring of the junior year.

Courses for Credit Toward the American Studies Major

The following is a list of courses that may be applied to the major. A student who wishes to include a course not listed here can petition on her behalf if her GPA in the major is between 3.0 and 3.5. Interested students should consult the director.

- AFR 201 The African American Literary Tradition
- AFR 206 Introduction to African American History (from 1500)
- AFR 207 Images of Africa: People Through the Cinema
- AFR 208 Women in the Civil Rights Movement
- AFR 212 Black Women Writers
- AFR 222 Blacks and Women in American Cinema
- AFR 242 New World Afro-Atlantic Religions
- AFR 243 The Black Church
- AFR 261 History of Black American Cinema
- AFR 265 African American Autobiographies
- AFR 266 Black Drama
- AFR 310 Seminar: Reading Du Bois
- AFR 316-01/F/ARTH 316-01-F Topics in African/African American Art
- AFR 320/AMST 320 Seminar: Blackness in the American Literary Imagination
- AFR 340 Seminar: Topics in African American History
- AMST 249/ENG 266-02-S The Rise of an American Empire: Wealth and Conflict in the Gilded Age
- ANTH 214 Race and Human Variation
- ANTH 225 The Power of Words: Language and Social Inequality in the Americas
- ARTH 205/AMST 205 Breaking Boundaries: The Arts of Mexico and the United States
- ARTH 225 Modern Art Since 1945
- ARTH 226/CAMS 207 History of Photography: From Invention to Media Age
- ARTH 228 Modern Architecture
- ARTH 230 Frank Lloyd Wright and the American Home
- ARTH 231 Architecture and Urbanism in North America
- ARTH 232 American Art
- ARTH 236 Art, Architecture, and Culture in the Ancient Americas
- ARTH 245 House and Home: Domestic Architecture, Interiors, and Material Life in North America, 1600-1900
- ARTH 262 African American Art
- ARTH 316-01-F/AFR 316-01-F Topics in African/African American Art
- ARTH 318 Seminar. New England Arts and Architecture
- ARTH 319 Seminar. American Art
- ARTH 320 Seminar. Topics in American Architecture
- ARTH 380 Seminar. American Women Artists in Italy: Art, Tourism, and Gender
- CAMS 207/ARTH 226 History of Photography: From Invention to Media Age
- CAMS 209 Desiring Difference: Gender and Sexuality in Cinema
- CAMS 213/GER 288 From Berlin and London to Hollywood (in English)
- CAMS 222 "Being There": Documentary Film and Media
- CAMS 227 Television
- CAMS 232/ANTH 232 Anthropology of Media
- CAMS 240/WGST 223 Gendering the Bronze Screen: Representations of Chicanas/Latinas in Film
- CAMS 241/WGST 249 Asian American Women in Film
- CAMS 270 The Light and the Dark of the Net: Histories and Theories of the Internet
- CAMS 272 The Ludic Imagination: Histories and Theories of Games and Play
- ECON 222 Games of Strategy
- ECON 223 Personal Finance
- ECON 226 Economics of Education Policy
- ECON 228/ES 228 Environmental and Resource Economics
- ECON 232 Health Economics
- ECON 238 Economics and Politics

Asian American Studies Minor

The interdisciplinary field of Asian American Studies examines the lives, cultures, and histories of Asian Americans. Emerging from the ethnic identity movements of the late 1960s, it has become an established academic field that encompasses history, sociology, psychology, literary criticism, political science, and women's and gender studies. It intersects significantly with the study of other minority groups in the United States and the study of the Asia-Pacific region.

**Goals for the Asian American Studies Minor**

- To be introduced to the interdisciplinary study of the fastest-growing racial group in the United States
- To understand how history has shaped the lives and experiences of Asian Americans
- To examine the relationships between this group and other minority groups within the United States
- To illuminate the transnational ties and global contexts of Asian Americans

**Requirements for the Asian American Studies Minor**

The Asian American Studies minor consists of five units:

1. **AMST 151, The Asian American Experience**

**AMST - American Studies Courses**

**AMST 101 - Introduction to American Studies (1.0)**

An interdisciplinary examination of some of the varieties of American experience, aimed at developing a functional vocabulary for further work in American Studies or related fields. After a brief review of American history, the course will direct its focus toward important moments in that history, investigating each of them in relation to selected cultural, historical, artistic, and political events, figures, institutions, and texts. Core courses include ethnic and gender studies, consumption and popular culture, urban and suburban life, and contemporary American literature.

Instructor: Fisher

Prerequisite: This course is required of American Studies majors and should be completed before the end of the junior year.

Distribution: HS

Term(s): Fall

**AMST 151 - The Asian American Experience (1.0)**

An interdisciplinary introduction to the study of Asian Americans, the fastest-growing ethnic group in North America. Critical examination of different stages of their experience from the "coolie labor" and the "yellow peril" to the "model minority" and struggles for identity: roots of Asian stereotypes; myth and reality of Asian women; prejudice against, among, and by Asians; and Asian contributions to a more pluralistic, tolerant, and just American society.

Readings, films, lectures, and discussions.

Instructor: Kodera (Religion)

Prerequisite: None

Distribution: REP; HS

Term(s): Spring

**AMST 152 - Race, Ethnicity, and Politics in America (1.0)**

The politics of race and ethnicity in America are constantly shifting, due to demographic, political, and economic transformations. However, fundamental questions about the nature of racial and ethnic divisions in America help frame the investigation of race and ethnicity across historical contexts. Some of the questions that will guide our discussions are: Are racial and ethnic hierarchies built into American political life? Are episodes and regimes of racial injustice the result of economic structure or a shameful absence of political will? How do gender and class influence our understandings of racial and ethnic categorization and inequality? To what extent is racial and ethnic identification a matter of personal choice?

Instructor: Jeffries

Prerequisite: None

Distribution: SBA

Term(s): Fall

**AMST 211 - Contemporary Asian American Immigration and Food (1.0)**

Chinese explorers traveled to North America before Christopher Columbus landed in the Caribbean. American merchants traded in Japan and China before the American Civil War. South Asians, Koreans, and Filipinos created their own immigrant communities in the US before World War II. Yet many scholars of Asian American studies simply focus on Asian American immigration after World War II. More dangerously, they present Asian American immigration as exceptional and fail to compare the American immigrant experience to immigration in South America, Europe, and Africa. This class uses food to compare Asian immigration experiences in different times and continents. We will use the adaptation of recipes and culinary techniques by Asian immigrants in different parts of the world to place the Asian immigrant experience in the context of historical local economies, nineteenth-century empire, world politics, and the transnational modern world.

Instructor: Orquiza

Prerequisite: None

Distribution: SBA

Term(s): Summer
question by taking up a range of fictional and dramatic writings, almost all of which were turned out between 1995 and 2012. Many writings not on the syllabus will also be introduced, in order to convey a broader picture. Films on Korean Americans help us look beyond literature per se to a wider cultural perspective. As the semester evolves we will continue to keep an eye on the range of styles, issues, and silences that characterize this field. We will also consider how Korean American literature relates to other literary traditions, such as modern Korean literature and Asian American literature. Finally, we will take up the problem of modern Korean literature and Asian American styles, issues, and silences that characterize this field.

initially perceived the United States as a rustic backwater, by the dawn of the twentieth century it had emerged as a symbol of the future and as the vehicle of a worldwide mass culture epitomized by Hollywood, Coca-Cola, McDonald's, and Disney. This course traces the evolving relationship between France and the United States in the nineteenth and twentieth centuries. Drawing on a variety of historical and literary documents, among them novels and essays as well as films, we will investigate the ways in which each country served as a mirror for the other's culture and experience.

Instructor: Datta (French)
Prerequisite: None
Cross-Listed as: FREN 230
Distribution: LL, HS
Term(s): Not Offered

AMST 240 - The Rise of an American Empire: Wealth and Conflict in the Gilded Age (1.0)

An interdisciplinary exploration of the so-called Gilded Age and the Progressive era in the United States between the Civil War and World War I, emphasizing both the conflicts and achievements of the period. Topics will include Reconstruction and African American experience in the South; technological development and industrial expansion; the exploitation of the West and resistance by Native Americans and Latinos; feminism, "New Women," and divorce; tycoon capitalism, worker cooperatives, and the robber baron divide; immigration from Europe, Asia, and new American overseas possessions; as well as a vibrant period of American art, architecture, literature, music, and material culture, to be studied by means of the rich cultural resources of the Boston area.

Instructor: Fisher
Prerequisite: None
Cross-Listed as: ENG 266-02-S
Distribution: LL, HS
Term(s): Spring

AMST 241 - A Nation in Therapy (1.0)

What is therapy? Although historically tied to the values and goals of medicine, the roles that therapy and therapeutic culture play in defining life, liberty, and the pursuit of happiness are now ubiquitous. The impact of therapeutic culture on every major social institution, including the family, education, and the law, has created a steady stream of controversy about the ways in which Americans in particular make judgements about right and wrong, about others, and about themselves. Are Americans obsessed with their well being? Is there a type of humor specific to therapeutic culture? This course provides a broad survey of the triumph of the therapeutic and the insights into the character and culture that triumph reveals.

Instructor: Imber (Sociology)
Prerequisite: None
Cross-Listed as: SOC 241
Distribution: SBA
Term(s): Spring

AMST 246 - Salsa and Ketchup: How Immigration is Changing the U.S. (1.0)

We live in a world on the move. There are an estimated 214 million international migrants worldwide. One out of every 33 persons in the world today is a migrant. In the United States, immigrants and their children make up nearly 25 percent of the population. This course is about the changing face of the United States. We use the Greater Boston Metropolitan area is a lab in which to explore race and ethnicity, immigration incorporation, and transnationalism. Fieldwork projects will examine how immigrants affect the economy, politics, and religion. We will also track contemporary debates around immigration policy.

Instructor: Levitt (Sociology)
Prerequisite: None
Cross-Listed as: SOC 246
Distribution: SBA
Term(s): Fall

AMST 268 - American Literature Now: The Twenty-First Century (1.0)

An exploration of the richness and diversity of American writing since 2000. We'll focus primarily on literary fiction, reading novels and short stories by both established authors, such as Claire Messud and Jennifer Egan, and rising talents like Ben Lerner and Teju Cole. We'll also look at the work of some experimental writers, like Lydia Davis and Percival Everett, and some examples of the genre fiction against which literary writing has defined itself, such as Stephenie Meyer's Twilight or Walter Mosley's detective novels, to think about the ways that literary and cultural prestige are established in contemporary America.

Instructor: Shetley (English)
Prerequisite: None
Cross-Listed as: ENG 268
Distribution: LL
Term(s): Fall

AMST 269 - Asian American Literature (1.0)

A survey course of the history of Asian American writing. Beginning with the 1920s novella And China Has Hands, by the Marxist writer HT. Tsiang, we will look at fiction by early Asian American writers. Next, we examine Asian American writing from the World War II period; we end by considering some of the literature that emerged from the Asian American identity movement, and more recent works that seem less preoccupied with questions of identity. How did these writers understand history? How important is the idea of the nation? Is there a movement toward a global perspective? Attention is given to writers' formal choices as well. Why, for example, is the interlinked short-story collection such a common form? Why is it so rare to find continuous, lengthy narratives?

Prerequisite: None
Cross-Listed as: ENG 269
Distribution: LL
Term(s): Not Offered

AMST 274 - Rainbow Cowboys (and Girls): Gender, Race, Class, and Sexuality in Westerns (1.0)

Westerns, a complex category that includes not only films but also novels, photographs, paintings, and many forms of popular culture, have articulated crucial mythologies of American culture from the nineteenth century to the present. From Theodore Roosevelt to the Lone Ranger, myths of the trans-Mississippi West have asserted iconic definitions of American masculinity and rugged individualism. Yet as a flexible, ever-changing genre, Westerns have challenged, revised, and subverted American concepts of gender and sexuality. Westerns have also struggled to explain a dynamic and conflictive "borderlands" among Native Americans, Anglos, Latinos, Blacks, and Asians. This team-taught, interdisciplinary course will investigate Westerns in multiple forms, studying their representations of the diverse spaces and places of the American West and its rich, complicated, and debated history.

Instructor: Cref (Women's and Gender Studies), Fisher
Prerequisite: None
Cross-Listed as: WGST 274
Distribution: LL, ARS
Term(s): Not Offered
AMST 275 - Baseball and the American West (1.0)
The major leagues and their Northeastern focus have dominated the nation's historical relationship with baseball. Its story in the West, however, is equally complex. The participation of ethnic minorities in the game has featured African-Americans, Mexican-Americans, Asian-Americans, and Latino-Americans for over a century. Gold miners and land prospectors played the game in camps and settlements alongside railroad tracks financed by the federal government. Religious missionaries and Progressive reformers promoted the game to develop strong bodies and diligent American minds at home and abroad. Expansion targeted a booming Southwestern population after World War II. Ballpark construction reflected the change from a suburban to urban focus in city planning in the last twenty years. This course explores the American West through the national past time.
Instructor: Orquiza
Prerequisite: None
Distribution: HS
Term(s): Summer II

AMST 281 - Rainbow Republic: American Queer Culture from Walt Whitman to Lady Gaga (1.0)
Transgender rights, gay marriage, and Hollywood and sports figures' media advocacy are only the latest manifestations of the rich queer history of the United States. This course will explore American LGBTQ history and culture from the late nineteenth century to the present, with an emphasis on consequential developments in society, politics, and consciousness since Stonewall in 1969. The course will introduce some elements of gender and queer theory; it will address historical and present-day constructions of sexuality through selected historical readings but primarily through the vibrant cultural forms produced by queer artists and communities. The course will survey significant queer literature, art, film, and popular culture, with an emphasis on the inventive new forms of recent decades. It will also emphasize the rich diversity of queer culture especially through the intersectionality of sexuality with race, ethnicity, class, and gender.
Instructor: Fisher
Prerequisite: None
Distribution: HS
Term(s): Spring

AMST 283-01-S - Southern Literature (1.0)
A study of the literature of the American South, with special focus on the region's unique cultural traditions, the development of a distinctive body of stylistic and thematic characteristics, and the complex intersections of region, gender, ethnicity, and sexuality in Southern literary expression.

**Topic for 2014-15: New Orleans In and Against America**
Anchoring the course will be literature haunted by New Orleans, including novels (part of Faulkner's *Absalom, Absalom!*, Don DeLillo's *Libra*, Walker Percy's *The Moviegoer*, J.K. Toole's *A Confederacy of Dunces*) and other readings (the autobiography of Louis Armstrong, and shorter pieces by Welty, Hurston and others). Besides the literary works, we will study: the music of Jelly Roll Morton, Louis Armstrong and many other artists; cooking, with hands-on experience to see how European recipes were transmuted into the city's African-American cooks; architecture and other visual arts; the peculiar history and cultural practices (Voodoo, sexual tolerance, apartheid [failed], miscegenation, Mardi Gras and other maskings) of this improvisational anomaly in America; the pre- and post-Katrina mythologies of water and weather.
Instructor: Tyler (English)
Prerequisite: None
Cross-Listed as: ENG 283-01-S
Distribution: LL
Term(s): Spring

AMST 292 - Racism and Sexism in Theory and Practice (1.0)
Racism and sexism are alive and well in the United States, but there is little agreement when it comes to defining these forms of oppression. Perhaps more troubling, there is even less of a consensus about how these social plagues do their work and what we can and should do to combat them. This course investigates a range of theories of racism and sexism across the political spectrum. We will engage scholarship in critical race studies, feminism(s) and queer theory, Marxism, conservatism, pragmatism, and liberalism, cataloging multiple approaches to these problems and learning how to evaluate theoretical work. We will also study empirical examples of racism and sexism at work, with a keen eye on anti-racist and anti-sexist practice and activism by scholars, legislators, and everyday people. Topics include media studies and consumer culture, criminal punishment and social control, environmental violence, public health, and labor politics.
Instructor: Jeffries
Prerequisite: None
Distribution: SBA
Term(s): Spring

AMST 315 - Beats, Rhymes, and Life: Hip-Hop Studies (1.0)
This course offers an intensive exploration of hip-hop cultures where students learn about the history of hip-hop as a social movement and art form composed of the following four elements: DJing, MCing, break dancing, and graffiti art. Once a common understanding of hip-hop's genesis and history is established, attention is turned to how hip-hop is studied in the academy. This section of the course features a wide range of interdisciplinary studies of hip-hop music and culture in order to demonstrate the different methodological and theoretical frames used in hip-hop scholarship. In the final section of the course, we focus on hip-hop-related debates and discussions in popular culture, such as racial authenticity, global consumption of hip-hop, sampling and musical technologies, and sexism and gender scripts within hip-hop culture.
Instructor: Jeffries
Prerequisite: Permission of the instructor. Preference given to American Studies majors and juniors and seniors.
Distribution: SBA
Term(s): Spring

AMST 317-01-F - Seminar. Advanced Topics in American Studies (1.0)
**Topic for 2014-15: The Real Barack Obama**
This course examines Barack Obama, first, as a viable public intellectual who intervenes on discussions of race, religion, and other hot-button topics, and second, as a cultural phenomenon and symbol of significant social import. Students will critically engage Obama's writings and speaking, including his biography, sense of identity, and political philosophy. We will move to the events of his presidential campaign to understand his electoral victory, examining representations of Obama during and after the 2008 and 2012 elections. Instead of only situating President Obama in American history, or giving his supporters a platform to celebrate his ascendance, this seminar will ask students to unpack that ascendance over the past six years and to engage the broader discourses that make him a political and cultural lightning rod.
Instructor: Jeffries
Distribution: SBA; HS
Term(s): Fall

AMST 318 - Seminar. Interning the "Enemy Race": Japanese Americans in World War II (1.0)
A close examination of the rationale by the U.S. government for the incarceration of American citizens of Japanese ancestry, and Japanese nationals living in the United States and Latin America, after Japan's attack in December 1941 at Pearl Harbor. The course also examines the dynamics of overwhelming popular support for the incarceration, as well as the aftermath of the internment. The topics include Japan's rise as a colonial power, starting in the late nineteenth century; the place of Asian migrant workers and the "yellow peril"; life in the camps; the formation of the Japanese American Citizens League; the valor of the Japanese American soldiers in Europe during World War II; how the United States has since responded to its "enemies," especially after 9/11; changing immigration laws; race and politics in America.
Instructor: Kodera
Prerequisite: Permission of the instructor. Enrollment is limited and preference is given to American Studies majors and Asian American Studies minors.
Distribution: SBA; HS
Term(s): Not Offered

AMST 320 - Seminar. Blackness in the American Literary Imagination (1.0)
An examination of how blackness has been represented in the American and Caribbean imagination and how it shaped some of the seminal texts in American and Caribbean literature. Implicitly, the course will also examine the conscience of the question posed by Toni Morrison: "What parts do the invention and development of whiteness play in the construction of what is loosely described as 'American' literature?"
Instructor: Cudjoe (Africana Studies)
Prerequisite: Permission of the instructor.
Cross-Listed as: AFR 320
Distribution: LL
Term(s): Not Offered

AMST 340 - Seminar. Disneyland and American Culture (1.0)
One of the most-visited tourist attractions in the world, subject of thousands of books and articles, adored by millions, yet reviled by many intellectuals, Disneyland has occupied a prominent place in American culture since it opened in 1955. This seminar will examine Disneyland as an expression of middle-class American values, as a locus of corporatism and consumerism, as a postmodern venue, as a utopia, and as an influence upon architecture and urban design. In a broader sense, we will use Disney to explore the ideals, the desires, and the anxieties that have shaped post-World War II American culture.
Instructor: Bedell (Art)
Prerequisite: AMST 101 or ARTH 101 and a 200-level course in American or modern culture (history, art, literature, economics, etc.). Permission of the instructor required.
Cross-Listed as: ARTH 340
Distribution: ABS; HS
Term(s): Spring
AMST 342 - Sexualities in Whitman’s America (1.0)
Along with the social revolutions of the 1970s, the most dramatic transformation of gender and sexual roles in the United States took place between the 1860s and the 1920s, when urbanization, women’s activism, and emerging homosexual subculture radically altered American society. Literature imagined, enacted, and recorded such changes, and, with Walt Whitman as a bold early voice for sexual liberation, feminist and queer writers such as Emma Goldman, Emily Dickinson, Henry James, Willa Cather, and Langston Hughes paved the way for sexual modernity. This advanced course will provide students with feminist and queer theory and social history in order to pursue in-depth interpretations of key literary figures and to document American contributions to the wider international transformation of gender and sexual roles during this period.
Instructor: Fisher
Prerequisite: Permission of the instructor required.
AMST 101, or at least one 200-level course in American studies or English.
Distribution: LL
Term(s): Not Offered

AMST 348 - Conservatism in America (1.0)
An examination of conservative movements and ideas in terms of class, gender, and race. Historical survey and social analysis of such major conservative movements and ideas as paleoconservatism, neoconservatism, and compassionate conservatism. The emergence of conservative stances among women, minorities, and media figures. The conservative critique of American life and its shaping of contemporary national discourse on morality, politics, and culture.
Instructor: Imber (Sociology)
Prerequisite: A 100-level sociology course or permission of the instructor. Open to juniors and seniors only.
Cross-Listed as: SOC 348
Distribution: SBA
Term(s): Spring

AMST 350 - Research or Individual Study (1.0)
Prerequisite: Open by the permission of the director to juniors and seniors. 
Distribution: None
Term(s): Fall; Spring

AMST 355 - Calderwood Seminar in Public Writing: Critiquing American Popular Culture (1.0)
What does Modern Family or Instagram say about American society and culture? Do self-publishing and e-books liberate literature or undermine it? How have networks like HBO promoted or undercut LGBTQ civil rights or gay marriage? American Studies often focuses on the appraisal, interpretation, and critique of historical and contemporary popular culture. Designed for juniors and seniors, this seminar will explore how American Studies multidisciplinary perspectives can be adapted to reviews, critiques, opinion pieces, and other forms of journalistic, literary, and public writing. Students will consider a variety of historical and contemporary American cultural products, including television, film, books, literature, websites, exhibitions, performances, and consumer products, in order to enter the public conversation about the cultural meanings, political implications, and social content of such culture.
Instructor: Fisher
Prerequisite: AMST 101 or another AMST 100- or 200-level course
Distribution: SBA
Term(s): Fall

AMST 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the director.
Distribution: None
Term(s): Fall
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

AMST 363-01-S - Advanced Studies in American Literature (1.0)
Topic for 2014-15: War Resistance and American Literature
A study of how war resistance, or the antiwar impulse, has been represented and thought about in American sacred texts, fictions, plays, poems, films, songs, operas, letters, treatises, memoirs, and essays. Some possible texts, in chronological order: John Woolman’s visionary 18th-century Journal, the Book of Mormon, Thoreau’s “Civil Disobedience,” Julia Ward Howe’s Mother’s Day Proclamation, William James’s “The Moral Equivalent of War,” memoirs by Jane Addams and Dorothy Day, High Noon, speeches by Dwight Eisenhower, letters and essays by Martin Luther King, journalism by Norman Mailer and Barbara Deming, Daniel Berrigan’s drama The Trial of the Catonsville Nine, Nicholson Baker’s Human Smoke, Philip Glass’ opera Satyagraha, and a broad, broad range of anti-war poems and songs. Opportunity for both creative and critical work.
Instructor: Rosenwald
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or two courses in American Studies, or two courses in Peace and Justice Studies, or by permission of the instructor to other qualified students. 
Cross-Listed as: ENG 363-01-S and PEAC 363
Distribution: LL; HS
Term(s): Spring

AMST 364-01-S - Race and Ethnicity in Literature (1.0)
Topic for 2014-15: Twenty-First Century American Literature of Immigration and Diaspora
This course explores the exciting new literature produced by writers transplanted to the United States. We’ll consider how the perspectives of recent immigrants redefine what is American by sustaining linkages across national borders, and we’ll examine issues of hybrid identity and multiple allegiances, collective memory, traumatic history, nation, home and homeland, and globalization. Our course materials include novels, essays, and films. We’ll be looking at writers in the United States with cultural connections to Egypt, Nigeria, Dominican Republic, India, Greece, Vietnam, Bosnia, Ethiopia, Korea, and Mexico. Some authors to be included: Andrée Aciman, Teju Cole, Junot Díaz, Kiran Desai, Lê Thị Diem Thúy, Jeffrey Eugenides, Aleksandar Hemon, Dinaw Mengestu, and Téa Obreht.
Instructor: Brogan (English)
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students. 
Cross-Listed as: ENG 364-01-S
Distribution: LL
Term(s): Spring

AMST 370 - Senior Thesis (1.0)
Prerequisite: AMST 360 and permission of the department.
Distribution: None
Term(s): Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

AMST 385-01-S - Advanced Studies in a Genre (1.0)
Topic for 2014-15: Film Noir
A journey through the dark aside of American imagination. Where classic Hollywood filmmaking trades in uplift and happy endings, Film Noir inhabits a pessimistic, morally ambiguous universe. This course will explore the development of this alternative vision of the American experience, from its origins around the time of the Second World War, through the revival of the genre in the early 1970s, to its ongoing influence in contemporary cinema. We’ll pay particular attention to noir’s redefinition of American cinematic style, and to its representations of masculinity and femininity. Films that may be studied include Howard Hawk’s The Big Sleep, Billy Wilder’s Double Indemnity, Robert Altman’s The Long Goodbye, Roman Polanski’s Chinatown, and David Lynch’s Mulholland Drive.
Instructor: Shetley (English)
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students. 
Cross-Listed as: ENG 385-01-S
Distribution: LL
Term(s): Spring
DEPARTMENT OF ANTHROPOLOGY

Professor: Karakasidou, Kohl
Associate Professor: Van Arsdale (Chair)
Assistant Professor: Matzner
Visiting Lecturer: Vining, Wanderer

Anthropology is a vibrant discipline that explores the diversity of ways of life, as well as the commonality of the human condition across the world. Anthropologists work in both far away places and “at home,” analyzing the contemporary moment as well as the distant past. We study not only cultural practices, but also the dynamics of power and inequality, change, and global processes.

Attending to these facets of human life, anthropology at Wellesley encompasses socio-cultural studies, historical work, archaeology, and biological analysis of human characteristics and practices. Putting these methods into conversation, an education in anthropology orients students to understanding and analyzing human nature and how culture operates in their own everyday lives, as well as the lives of others.

The anthropological perspective is inherently multicultural and multidisciplinary. By studying anthropology, students are “led out” (educo) of their own personal backgrounds to appreciate the incredible cultural diversity of humanity, receiving an exceptionally broad liberal arts education.

Particular thematic strengths of our faculty and curriculum include:

- Nationalism and Ethnic Rivalry
- Cultures of Health and Medicine
- Archaeology and the Reception of Antiquity
- Anthropology of Media and Visual Culture
- Forensic Anthropology
- Gender and Class
- Ethnography of the Built Environment
- Ethnographic Film
- Human Origins, Evolution, and Variation

Our faculty carries out field research in places as varied as Wellesley, Massachusetts; Mumbai, India; the Balkans; Central America; and the Caucasus.

Anthropology Major

Goals for the Anthropology Major

- An understanding of cultural diversity throughout the world that evaluates cultures at different levels of economic and social development on their own terms
- A familiarity with the vast ways in which human cultures vary in their social institutions and practices from small bands of egalitarian hunter-gatherers to sharply stratified states
- An understanding of how diverse cultures have traditionally adapted to and interacted with their environment and how today they are responding to and confronting the challenges of globalization
- An awareness of how humans have evolved as a species and how and why they exhibit patterned physical variation today, including a critical social and biological understanding of “racial” diversity
- A familiarity with basic features of world prehistory and human cultural evolution from the Old Stone Age to the emergence of early civilizations

- Critical knowledge of methods used in anthropological field research, including the excavation of paleo-anthropological and archaeological sites and the construction of ethnographies based upon personal interaction with local cultures
- An appreciation for the different theoretical approaches used to understand human variation in its myriad of forms

Requirements for the Anthropology Major

A major in anthropology consists of a minimum of nine units (which may include courses from MIT’s anthropology offerings), of which ANTH 104, ANTH 204 or ANTH 206, ANTH 300, and ANTH 301 are required. Students may also elect other relevant courses (such as statistics and biology), depending on the particular need and interest of the student. Majors are encouraged to take other courses that have a cultural or multicultural focus.

Honors in Anthropology

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Anthropology Related Courses

Attention Called

AFR 226 Environmental Justice, "Race," and Sustainable Development
AFR 235 Societies and Cultures of Africa
AFR 297 Medical Anthropology: A Comparative Study of Healing Systems
ARTH 236 Art, Architecture, and Culture in the Ancient Americas
LING 114 Introduction to Linguistics
PEAC 259-01- F/SPAN 261 Peace and Conflict Resolution
WGST 205 Love and Intimacy: A Cross-Cultural Perspective

Our minor in anthropology consists of five units: ANTH 104, two 200-level courses, and two 300-level courses. Students minoring in anthropology are encouraged to choose at least one ethnographic area course and at least one course which focuses on a particular theoretical problem.

ANTH - Anthropology Courses

ANTH 104 - Introduction to Cultural and Social Anthropology (1.0)

A comparative approach to the concept of culture and an analysis of how culture structures the worlds we live in. The course examines human societies from their tribal beginnings to the postindustrial age. We will consider the development of various types of social organization and their significance based on family and kinship, economics, politics, and religion.

Instructor: Armstrong, TBA
Prerequisite: None
Distribution: SBA

ANTH 201 - The Ancient World beyond Greece and Rome: Archaeology, Texts, and the Myths of Modernity (1.0)

This course explores the rise of civilization in the Near East, Inner Asia, and South Asia from the perspective of archaeology, philology, and history. Special attention is paid to crosscurrents between these regions in antiquity and to how our interpretative vocabulary—for example, our notions of culture, civilization, the city, the state, and ethnicity—is defined in social sciences and ancient
texts. The course contrasts evolutionary, comparative, particularist, indigenist, and nationalistic approaches to the study of culture and society in the ancient world. Readings include modern scholarship and original texts in translation. The course pays significant attention to cultures and polities that are often treated as peripheral (Kush, Meroe, Urartu, Golcis, Bactria-Margiana, Jiroft, Scythia, Khorrmen, and Sogdiana).

Prerequisite: None
Distribution: SBA
Term(s): Not Offered

ANTH 204 - Physical Anthropology (1.0)

This course will examine the evolutionary foundations of human variability. This theme is approached broadly from the perspectives of anatomy, paleontology, genetics, primatology, and ecology. For this purpose, the course will address the principles of human evolution, fossil evidence, behavior, and morphological characteristics of human and nonhuman primates. Explanation of the interrelationships between biological and sociobehavioral aspects of human evolution, such as the changing social role of sex, are discussed. In addition, human inter-population differences and environmental factors that account for these differences will be evaluated.

Instructor: Van Arsdale
Prerequisite: None
Distribution: SBA
Term(s): Fall

ANTH 206 - Archaeology (1.0)

A survey of the development of archaeology. The methods and techniques of archaeology are presented through an analysis of excavations and prehistoric remains. Materials studied range from early hominid sites in Africa to the Bronze Age civilizations of the Old World and the Aztec and Inca empires of the New World. Students are introduced to techniques for reconstructing the past from material remains. The course includes a field trip to a neighboring archaeological site.

Instructor: Vining
Prerequisite: None
Distribution: SBA
Term(s): Spring

ANTH 207 - Hominid Evolution (1.0)

The hominid fossil record provides direct evidence for the evolution of humans and our ancestors through the past 5 million to 7 million years. This will provide an overview of human evolutionary history from the time of our last common ancestor with the living great apes through the emergence of “modern” humans. Emphasis is placed on evolutionary mechanisms, and context is provided through an understanding of the prehuman primates. The hominid fossil record begins with the ancestors and the appearance of unique human features such as bipedality, the loss of cutting canines, the appearance of continual sexual receptivity, births requiring midwifery, and the development of complex social interactions. An early adaptive shift sets the stage for the subsequent evolution of intelligence, technology, and the changes in physical form that are the consequences of the unique feedback system involving cultural and biological change.

Instructor: Van Arsdale
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

ANTH 209 - Forensic Anthropology with Laboratory (1.0)

The identification of human remains for criminological and political purposes is widespread. This course explores issues in the identification and interpretation of human bones including methods for determining sex, age, stature, and ancestry as well as for identifying pathologies and anomalies. The course will pay particular attention to those anatomical elements, both soft tissue and bones, that aid in the reconstruction of individuals and their lifestyles. In addition, the course explores search and recovery techniques, crime-scene analysis, the use of DNA in solving crimes, and the role of forensic anthropology in the investigation of mass fatalities from both accidents and human rights violations. It also addresses ballistics and the use of photography in forensic investigation. The course will include a weekly lab component focused on human osteology and skeletal analysis.

Instructor: Van Arsdale
Prerequisite: None
Distribution: NPS
Term(s): Spring

Does not fulfill the laboratory requirement.

ANTH 211 - Winter Session Program in the Republic of Georgia (0.5)

Students travel to Tbilisi, Georgia, for Winter Session. They attend lectures in English at Tbilisi State University on Georgian history, language, and culture and on contemporary political developments there and visit sites of historical interest in and around Tbilisi. They live with Georgian families and spend three weeks completing a self-designed internship with a local organization.

Instructor: Kohl, Tumarkin
Prerequisite: One course in anthropology or Russian area studies. Application required.
Cross-Listed as: RAST 211
Distribution: SBA, HS
Term(s): Winter

Not offered every year. Subject to Provost’s Office approval.

ANTH 214 - Race and Human Variation (1.0)

This is a course about race concepts and human biological variation, viewed from historical and biological perspectives. This course thus has two intertwined emphases. One is placed on the historical connection between science and sociopolitical ideologies and policies. The other is on the evolutionary origin of human biological and cultural diversity. Through lecture and discussion section, topics explored include the role of polygenism, historically and in current scientific thought; biological determinism and scientific racism; the Holocaust and other examples of “applied biology”; and the role of the race concept in current scientific debates, such as those over the place of the Neanderthals in human evolution, as well as those over the book. The course seeks to guide students through a critical exercise in studying the evolutionary origins of contemporary human biological variation and its close relationship with scientific and popular concepts of race.

Instructor: Van Arsdale
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

ANTH 217 - Peoples, Histories, and Cultures of the Balkans (1.0)

The Balkan region has been a major trade and cultural crossroads for millennia and encompasses a variety of landscapes, peoples, and cultures. We will read authoritative historical studies and ethnographies as well as short stories, poetry, books of travel, and fiction. We will consider the legacy of the classical world, the impact of Islam, the emergence of European commercial empires, the impact of the European Enlightenment in national movements, the emergence of modernization, and the socialist experiments in the hinterlands. The course offers a critical overview of the politics of historical continuity and the resurgence of Balkan nationalism during the last decade of the twentieth century.

Instructor: Karakasidou
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

ANTH 219 - Balkan Cinematic Representations (1.0)

In the course of Europe’s road to modernity, the southeastern corner of the continent became known as the Balkans. The Western imagination rendered the peoples and the rich cultures of the area as backward, violent, and underdeveloped. This course examines the imagery of the area and its people through film. We will explore the use of history by filmmakers and the use of films in understanding a number of issues in the history of the Balkans. The course will trace the adoration of ancient Greek antiquity, the legacy of Byzantium and Orthodox Christianity as well as the Ottoman influence and the appearance of Islam. The historical past is [re]constructed and [re]presented in film, as are the national awakenings and liberation movements. The list of films we will watch and the anthropological and historical readings we will do aspire to cover various aspects of Balkan societies as revealed through visual and cinematic representations.

Balkan film is politically, socially, and historically engaged, and we will use film narratives and stories to understand the area’s diverse landscapes and cultures, religions and identities, love and hatred.

Instructor: Karakasidou
Prerequisite: None
Cross-Listed as: CAMS 219
Distribution: SBA
Term(s): Not Offered

ANTH 222 - Anthropology of Science (1.0)

This course will introduce students to the anthropology of science and the use of anthropological methodology to study the making of science and technology. Through the analysis of case studies of biotechnology, energy, computing, lay and activist science, medical, genetics, bioethics, the environment and conservation around the world, this class will investigate the global dynamics of science and technology. We will compare and contrast the production and use of scientific knowledge around the globe. What happens when science and technology travel and how do new places emerge as centers of knowledge production? How are culture, identity, technology, and science linked?

Instructor: Wanderer
Prerequisite: None
Distribution: SBA
Term(s): Spring

ANTH 225 - The Power of Words: Language and Social Inequality in the Americas (1.0)

This course explores the relationship between language and social structures of inequality, discussing issues including language-based discrimination, language shift, and language endangerment. Through lectures and course readings we will investigate how speakers construct relationships between particular linguistic varieties (languages, dialects, registers, accents) and
particular characteristics of groups of people. We begin
with an overview of pre-colonial American socie-
ties to provide the necessary background for un-
derstanding the impact of European conquest and
colonization on indigenous American populations.
We then consider the implications of these histori-
cal processes for contemporary American communities
and discuss how linguistic practices interact with
social divisions to produce unequal power relations.
Instructor: Vining
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

ANTH 226 - Archaeology of Environmental
Change (1.0)
Modern concerns about climate change and human
impact on the environment are the most recent in a
long history of human-environmental interactions.
Closer attention to long-term human-environmen-
tal interactions shows we have a constant history of
impacting environments—both subtly and
profundely—throughout the world. This class will
examine such interactions from a long-term
perspective spanning the past 10,000 years. Through
case studies in Environmental Archaeology, we will
examine notions of "pristine wildernesness," how past
cultural adaptations have created sustainable
environments or caused environmental
deterioration, and will scrutinize environmentally
driven models of societal change. With this focus on
anthropogenic environments, we will look critically
at models that externalize humans as ecological
forces. We will also explore selected
multidisciplinary approaches to reconstructing past
human-environmental dynamics.
Instructor: Vining
Prerequisite: None. Prior course work in anthropology
(socio-cultural, archaeology, or bioarchaeology),
environmental studies, earth sciences, or related
disciplines preferred.
Cross-Listed as: ES 226
Distribution: SBA
Term(s): Spring

ANTH 227 - Living in Material Worlds:
Archaeological Approaches to Material Culture
(1.0)
Do you ever wonder what your possessions say
about you? Our possessions and other things we use
lie at the hearts of our everyday lives. We
inadvertently generate material culture during our
daily activities and interactions. In turn, material
culture helps us structure negotiations with one
another in our cultural worlds. Archaeology is
unique among anthropological endeavors in its
reliance on material culture to reconstruct and
understand past human behavior. We will learn
methodological and theoretical approaches from
archaeology and ethnography for understanding
material culture. Lecture topics will be explored in
hands-on labs. Studying the world of material can
provide a common framework to identify and
understand patterns within complex relationships.
The course will emphasize how to design, execute
and present original research through lectures and
labs. Students will develop conceptual tools for
spatial-reasoning, how to use specific software
packages, and how to present interpretations and
results in graphs. The applications of GIS will be
relevant to students from Anthropology, Sociology,
Economics, History, and other cognate
disciplines. We will cover main concepts and
applications of GIS as used in human ecology,
planning and development, conflict studies, and
epidemiology, for example.
Instructor: Vining
Prerequisite: None
Distribution: SBA
Term(s): Fall
Does not fulfill the laboratory requirement.

ANTH 230 - The Mexico of Anthropology (1.0)
This course provides students with a foundation in
anthropological literature on Mexican cultures and
society as well as an overview of the history of
applied anthropology in Mexico. Mexico has long
been a hub of anthropological studies as well as
something of a social-scientific laboratory for testing
out state-sponsored strategies for the incorporation,
asassimilation, and education of indigenous, frequently
non-Spanish-speaking populations. Beginning after
the Mexican Revolution, many anthropologists
worked in the dual capacity of researchers and
employees of the state. Using Mexico as a case study,
students will consider the relationship between
social scientific practice and state development
policies.
Instructor: Falconi
Prerequisite: None
Distribution: SBA, HS
Term(s): Not Offered

ANTH 232 - Anthropology of Media (1.0)
This course introduces students to key analytic
frameworks through which media and the mediation
of culture have been examined. Using an
anthropological approach, students will explore how
media as representation and as cultural practice
have been fundamental to the (trans)formation of
modern sensibilities and social relations. We will
examine various technologies of mediation—from
the Mussian body as "Man's first technical
instrument" to print capitalism, radio and cassette
cultures, cinematic and televsional publics, war
journalism, the digital revolution, and the political
milieu of spin and public relations. Themes in this
course include: media in the transformation of the
senses; media in the production of cultural
subjectivities and publics; and the social worlds and
cultural logics of media institutions and sites of
production.
Instructor: Karakasidou
Prerequisite: None
Cross-Listed as: CAMS 232
Distribution: SBA
Term(s): Not Offered

ANTH 237 - Ethnography in/of South Asia (1.0)
Anthropology has a fraught and complex history
within South Asia. Many of its techniques of
knowledge production were honed within the
colonial context. In the postcolonial period, these
techniques have been taken up by scholars within
the region and beyond to update and challenge longstanding understandings of the region. Much
historical and recent scholarship grapples with how
one ought to understand the unique nature of the
region's forms of culture and social organization, and
to place them in relation to modernity and the West.
South Asia proves an insistently fruitful case for
assessing the universality or provincial nature of
Western social theory and to consider the
connections between knowledge and power. In this
course, students will come to comprehend and
assess the history of ethnography and anthropology
in India, Pakistan, and other parts of South Asia.
Through contemporary ethnographic texts, they will
gain insight into the major social and cultural
categories and phenomena that have come to define
South Asia today such as caste, kinship and gender,
class, nationalism, and popular culture. Throughout,
we will consider the politics of representation and
knowledge production that are particularly fraught
in this postcolonial context.
Instructor: Matzner
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

ANTH 247 - Societies and Cultures of Eurasia
(1.0)
A survey of the non-Russian, largely non-European
peoples of the former Soviet Union (particularly
ethnic groups in Transcaucasia, Central Asia, and
Siberia). The course will review how traditional
cultures in these areas changed during the years of
Soviet rule and will examine the problems they face
today with newly gained independence or greatly
increased autonomy. Nationality policies of the

This course will provide students with a unique opportunity to participate in ongoing field excavations at the Paleolithic site of Dmanisi, Georgia. Students will work alongside an international group of students and researchers, learning field methods in paleoanthropology. Students will also receive daily lectures on a variety of topics important for understanding the ongoing research at the site, including geology, taphonomy, archaeology, and palentology. Throughout the four-week program, students will also be given time to work on independent projects that will be presented at the end of the field school. Weekend excursions to other important prehistoric sites in the region will provide additional context to the ongoing work at Dmanisi.

Instructor: VanArsdale
Prerequisite: ANTH 207 or ANTH 209 or permission of the instructor.
Distribution: SBA
Term(s): Fall
Not offered every year. Subject to Provost’s Office approval. Does not satisfy the laboratory requirement.

ANTH 274 - Anthropological Genetics (1.0)
This course will provide an introduction into the core concepts of population genetics, with special focus on their application to human and nonhuman primate evolution. Population genetics is the branch of evolutionary biology concerned with how genetic variation is patterned within and between populations and how these patterns change over time. Though the theory is applicable to all organisms, specific examples drawn from the human and nonhuman primate literature will be used as case studies. Topics will also include the genetic basis for disease, pedigree analysis, and personal genomics. The course will be structured around lectures and discussion with regular computer labs to provide firsthand experience working with anthropological genetic topics and analyses of genetic data sets.

Instructor: VanArsdale
Prerequisite: BISC 110, or BISC 111, or permission of the instructor.
Distribution: NPS
Term(s): Fall

ANTH 279 - Life Across Borders: Migration, Language, and Culture in Latin America
This intensive two-week excursion (followed by two weeks of follow-up assignments) examines the cultural and geographic significance of Iceland’s unique landscape and settlements. Glacial lakes, bustling cities, remote fishing villages, and eerily lava fields provide the setting for an introduction to the fascinating field of cultural geography. Students gain hands-on experience with methods of cultural anthropology, including participant-observation, interviewing, writing field notes, photography, and critical analysis. A once-in-a-lifetime opportunity, this course offers students a rare chance to conduct ethnographic research in one of the most stunning places on Earth!

Instructor: Armstrong
Prerequisite: None
Distribution: SBA
Term(s): Summer I
Not offered every year. Subject to Provost’s Office approval.

ANTH 301 - History and Theory in Anthropology (1.0)
An exploration of anthropological research and writing through the analytical and practical study of “fieldwork” and “ethnography.” Examines a variety of anthropological research methods and genres of representation, paying particular attention to questions of knowledge, location, evidence, ethics, power, translation, experience, and the way theoretical problems can be framed in terms of anthropological research. Students will be asked to apply critical knowledge in a fieldwork project of their own design.

Instructor: Matzner
Prerequisite: ANTH 301 or two 200-level units in anthropology, economics, history, political science, or sociology, or permission of the instructor.
Distribution: SBA
Term(s): Spring
model or “paradigm” took hold and the extent of cognitive sharing, by either intellectual borrowing or breakthrough. The development of contemporary theory will be examined both as internal to the discipline and as a response to changing intellectual climates and social milieu. The course will focus on each theory in action, as the theoretical principles and methods apply to ethnographic case studies.

**Instructor:** Matzner  
**Prerequisite:** Two 200-level units in anthropology, economics, history, political science, or sociology, or permission of the instructor.  
**Distribution:** SBA  
**Term(s):** Fall

**ANTH 305 - Ethnographic Film (1.0)**  
This seminar explores ethnographic film as a genre for representing “reality,” anthropological knowledge and cultural lives. We will examine how ethnographic film emerged in a particular intellectual and political economic context as well as how subsequent conceptual and formal innovations have shaped the genre. We will also consider social responses to ethnographic film in terms of the contexts for producing and circulating these works; the ethical and political concerns raised by cross-cultural representation; and the development of indigenous media and other practices in conversation with ethnographic film. Throughout the course, we will situate ethnographic film within the larger project for representing “culture,” addressing the status of ethnographic film in relation to other documentary practices, including written ethnography, museum exhibitions, and documentary film.

**Instructor:** Matzner  
**Prerequisite:** ANTH 301 or two 200-level units in anthropology, cinema and media studies, economics, history, political science, or sociology or permission of the instructor.  
**Cross-Listed as:** CAMS 305  
**Distribution:** SBA  
**Term(s):** Fall

**ANTH 310 - Wintersession in the Southern Balkans (0.5)**  
This course aspires to familiarize students with the subtleties of national Balkan rifts and cultural divisions, through an international study in the Southern Balkans during Wintersession. The overall theme of the course will center on nationalisms, minorities and ethnic minorities. The cultural diversity of the area will be examined both as a historical and as contemporary phenomenon. Students will be exposed to the legacy of the classical world, the impact of Christianity and Islam, the role of European commercial empires, the impact of the European Enlightenment in national movements, the emergence of modernization, and the socialist economies (e.g., irrigation agriculture, pastoral nomadism) and tribal forms of social organization and analyzes their transformation with the emergence of independent territorial nation-states and the advent of oil wealth during the twentieth century. The course considers different sects and expressions of Islam in specific countries and discusses kinship structures and family relationships, including the varying roles of women in specific societies. Contemporary political and economic issues and conflicts in Afghanistan, Iran, Turkey, Iraq, and Israel/Palestine will be studied from an anthropologically informed perspective of cultural continuity and change and the contingent refashioning of religious, ethnic, and national identities over time.

**Instructor:** Kakasasidou  
**Prerequisite:** ANTH 217 or ANTH 219, or some familiarity with the area.  
**Distribution:** SBA  
**Term(s):** Not Offered  
**Not offered every year. Subject to Provost’s Office approval.**

**ANTH 314 - Human Biology and Society (1.0)**  
This seminar will provide an anthropological perspective on the intersection between human biology and society in three related topics. The first unit will focus on human genetic diversity and the increasing use of genetic information in society. Included in this unit will be discussions of genetic ancestry testing and the construction of identity. The second unit will examine in more detail the genetic basis of phenotypic traits and disease, exploring what our genes can reveal about us while also considering the problems of biological determinism. The final unit will extend the understanding of human biological variation by looking at the relationship between humans and our environment, how our environment changed throughout prehistory and contemporary times, and what role the environment plays in shaping human variation.

**Instructor:** VanArsdale  
**Prerequisite:** ANTH 204, ANTH 214, or permission of the instructor.  
**Distribution:** SBA  
**Term(s):** Spring

**ANTH 319 - Nationalism, Politics, and the Use of the Remote Past (1.0)**  
This seminar critically examines the use of prehistory and antiquity for the construction of accounts of national origins, historical claims to specific territories, or the biased assessment of specific peoples. The course begins with an examination of the phenomenon of nationalism and the historically recent emergence of contemporary nation-states. It then proceeds comparatively, selectively examining politically motivated appropriations of the remote past that either were popular earlier in this century or have ongoing relevance for some of the ethnic conflicts raging throughout the world today. The course will attempt to develop criteria for distinguishing credible and acceptable reconstructions of the past from those that are unbelievable and/or dangerous.

**Instructor:** Kohl  
**Prerequisite:** One 200-level unit in anthropology, economics, political science, sociology, or permission of the instructor.  
**Distribution:** SBA, HS  
**Term(s):** Not Offered

**ANTH 344 - The Middle East: Anthropological Perspectives (1.0)**  
This course discusses traditional subsistence economies (e.g., irrigation agriculture, pastoral nomadism) and tribal forms of social organization and analyzes their transformation with the emergence of independent territorial nation-states and the advent of oil wealth during the twentieth century. The course considers different sects and expressions of Islam in specific countries and discusses kinship structures and family relationships, including the varying roles of women in specific societies. Contemporary political and economic issues and conflicts in Afghanistan, Iran, Turkey, Iraq, and Israel/Palestine will be studied from an anthropologically informed perspective of cultural continuity and change and the continuous refashioning of religious, ethnic, and national identities over time.

**Instructor:** Kohl  
**Prerequisite:** Normally open to students who have taken a grade II unit in anthropology and/or a 200-level unit in a relevant area/subject matter.  
**Distribution:** SBA  
**Term(s):** Spring

**ANTH 350 - Research or Individual Study (1.0)**  
**Prerequisite:** Permission of the instructor. Open to juniors and seniors.  
**Distribution:** None  
**Term(s):** Fall; Spring

**ANTH 360 - Senior Thesis Research (1.0)**  
**Prerequisite:** Permission of the department.  
**Distribution:** None  
**Term(s):** Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**ANTH 362 - Experimental Ethnography: At the Boundaries of Art and Anthropology (1.0)**  
This course explores the territory of ethnography as it is practiced at the intersection of art and anthropology. Ethnography is a practice of anthropological knowledge production that involves engaging with cultural identity and difference. It raises issues about the relationship between the Self and Other, representation and reality. Although traditionally, ethnographies are written manuscripts, anthropologists are experimenting with ethnographic representation in other media and formats. Artists engaged in conceptual, social and site-specific modes are engaging in parallel ethnographic practices. Through this course, students will be introduced to the history and contemporary efflorescence of these experiments and cross-polinations.

**Instructor:** Kelley (Art)  
**Prerequisite:** A 200-level course in ARTS, ANTH, or CAMS  
**Cross-Listed as:** ARTS 317-01-F, CAMS 362  
**Distribution:** ARS; SBA  
**Term(s):** Fall

**ANTH 370 - Senior Thesis (1.0)**  
**Prerequisite:** ANTH 360 and permission of the department.  
**Distribution:** None  
**Term(s):** Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
For elementary and intermediate Arabic see Middle Eastern Studies
AN INTERDEPARTMENTAL MAJOR

Co-directors: Rivera (Studio Art), Friedman, McNamara (Art History)
Advisory Committee: Friedman (Art History), McNamara (Art History), Dorrien (Studio Art), Mowbray (Studio Art), Rivera (Studio Art)

A major in architecture offers the opportunity for study of architectural history and practice through an interdisciplinary program. Following the ancient Roman architect Vitruvius’ advice on the education of the architect, the program encourages students to familiarize themselves with a broad range of subjects in the humanities, sciences, and social sciences. Students may also elect courses in studio art, mathematics, and physics that lead to the appreciation of the principles of design and the fundamental techniques of architecture.

Architecture Major

Goals for the Architecture Major

The goals of the Architecture major are threefold:
• To develop skills in design and spatial thinking through the practices of drawing, design, modeling, and digital media production
• To understand architecture and urban form in their historical contexts
• To have an appreciation of the roles of client, program, and economic conditions on the practice of architecture and the shaping of the built environment

Requirements for the Architecture Major

Students considering an Architecture major should choose an advisor in their area of concentration and work out a program of study. The Architecture major consists of 11 units, which may be weighted toward architectural history or studio investigation.

For students entering in the Fall of 2011 or later, the requirements are listed below.
• ARTH 100 and ARTH 101. There is no exemption from this requirement by Advanced Placement, or by International Baccalaureate, or by an exemption examination.
• ARTH 205 and ARTS 113
• ARTH 200 or ARTH 231 or ARTH 228 or ARTS 216
• Two additional intermediate courses in architectural history, studio art, or design (200 level)
• Two advanced courses in architectural history, studio art, or architectural design (300 level). At least one of these units must be taken in the Department of Art at Wellesley.
• Two additional courses related to architecture

Notes:
Attention is drawn to ARTS 109 (Two Dimensional design), which serves as a prerequisite for intermediate and advanced studios involving new technology.
Courses in Sociology, Anthropology, Philosophy, and Women’s and Gender Studies may also apply. Consult your advisor. Olin College courses may also be applicable to the major. See Department of Art website for recommended courses at Wellesley, MIT, and Olin.
Architecture majors who entered before the fall of 2011 are required to take ARTH 100/ARTH 101 and ARTH 205.

ARTH 247 Islamic Art and Architecture, 650-1500
ARTH 259 The Art and Architecture of the European Enlightenment
ARTH 266 New Perspectives on the Global City
ARTH 289 Nineteenth-Century European Art
ARTH 309-01-S Seminar. Problems in Architectural History
ARTH 318 Seminar. New England Arts and Architecture
ARTH 320 Seminar. Topics in American Architecture
ARTH 325 Seminar. Rococo and Neoclassical Interiors
ARTH 340/AMST 340 Seminar. Disneyland and American Culture
ARTH 344 Seminar. Topics in Islamic Art

Transfer Credit in Architecture

Although courses at MIT are not required for the major, the MIT-Wellesley exchange provides a unique opportunity for students to elect advanced courses in design and construction. Students are also encouraged to consider travel or international study as important aspects of their education in architecture. Normally, no more than three units of transfer credit—two units at the 200 level and one unit taken at MIT at the 300 level—may be applied toward the minimum requirements for the major.

Courses for Credit Toward the Architecture Major

The following courses are recommended to students designing a program of study in architecture. Additional courses may be applicable and some courses are not offered yearly, so each student should develop her program of study in active consultation with her advisor.

History of Art

ARTH 100 Global Perspectives on Art and Architecture: Ancient to Medieval
ARTH 101 Global Perspectives on Art and Architecture: Renaissance to Contemporay
ARTH 200 Architecture and Urban Form
ARTH 201 Medieval Art and Architecture, 400-1400
ARTH 202 Byzantine Art and Architecture
ARTH 203 Near Eastern Art and Architecture
ARTH 228 Modern Architecture
ARTH 230 Frank Lloyd Wright and the American Home
ARTH 231 Architecture and Urbanism in North America
ARTH 236 Art, Architecture, and Culture in the Ancient Americas
ARTH 237 Art, Architecture, and Culture in Post-Conquest Mexico
ARTH 238 Chinese Art and Architecture
ARTH 240 Asian Art and Architecture
ARTH 241 Egyptian Art and Archaeology
ARTH 243 Roman Art and Architecture
ARTH 245 House and Home: Domestic Architecture, Interiors, and Material Life in North America, 1600-1900
ARTH 247 Islamic Art and Architecture,

ARTH 259 The Art and Architecture of the European Enlightenment
ARTH 266 New Perspectives on the Global City
ARTH 289 Nineteenth-Century European Art
ARTH 309-01-S Seminar. Problems in Architectural History
ARTH 318 Seminar. New England Arts and Architecture
ARTH 320 Seminar. Topics in American Architecture
ARTH 325 Seminar. Rococo and Neoclassical Interiors
ARTH 340/AMST 340 Seminar. Disneyland and American Culture
ARTH 344 Seminar. Topics in Islamic Art

Studio Art

ARTS 105 Drawing I
ARTS 109 Two-Dimensional Design
ARTS 113 Three-Dimensional Design
ARTS 207 Sculpture I
ARTS 216 Spatial Investigations
ARTS 217 Life Drawing
ARTS 219 Introductory Print Methods: Lithography/Montotype
ARTS 220 Introductory Print Methods: Intaglio/Relief
ARTS 221/CAMS 239 Digital Imaging
ARTS 222 Introductory Print Methods: Typography/Book Arts
ARTS 255/CAMS 255 Dynamic Interface Design
ARTS 307 Advanced Sculpture
ARTS 314 Advanced Drawing
ARTS 317-01-F/ANTH 362/CAMS 362 Seminar. Topics in the Visual Arts
ARTS 321/CAMS 321 Advanced New Media
ARTS 322 Advanced Print Concepts

MIT

The following introductory courses (200-level) may be taken for credit toward the major:

4.111 Introduction to Architecture and Environmental Design or 4.11A (an IAP version of the same course)

4.112 Architecture Design Fundamentals I
4.401 Architecture Building Systems
4.500 Introduction to Design Computing

The following advanced courses (300-level) may be taken for credit toward the major (one unit only):

4.113 Architecture Design Fundamentals II
4.114 Architectural Design Studio I
4.115 Applied Architectural Design Studio II
4.4111 D-Lab Schools: Building Technology Laboratory
4.4400 Building Structural Systems I
*Note: courses marked with * are counted "within the Department of Art"; all others are counted as courses outside the department.

**Olin**

ENGR 2199 Engineering for Humanity

**Mathematics**

MATH 115  Calculus I
MATH 116  Calculus II
MATH 120  Calculus IIA
MATH 205  Multivariable Calculus

Note: More advanced courses may also be counted toward the major.

**Physics**

PHYS 104  Fundamentals of Mechanics with Laboratory
PHYS 107  Principles and Applications of Mechanics with Laboratory

**Theatre Studies**

THST 209  Introduction to the Art of Scenic Design

---

**ARCH - Architecture Courses**

**ARCH 301 - Introduction to AutoCAD (0.5)**

This course explores the use of computer aided design and drafting techniques. The primary aim is to provide students with solid working knowledge of AutoCAD 2008 and its applications in architecture and design.

Prerequisite: ARTS 105, plus two 200-level courses in either architectural history, drawing, or design, or MIT studio (at least one of these must be a studio art course). Preference to architecture majors.

Distribution: None

Term(s): Not Offered

**ARCH 350 - Research or Individual Study (1.0)**

Prerequisite: Permission of the instructor. Open to juniors and seniors.

Distribution: None

Term(s): Fall; Spring

**ARCH 360 - Senior Thesis Research (1.0)**

Prerequisite: Permission of the directors and advisory committee.

Distribution: None

Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**ARCH 370 - Senior Thesis (1.0)**

Prerequisite: ARCH 360 and permission of the directors and the advisory committee.

Distribution: None

Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
The Art Department grants transfer credit for 200-level Art History courses only; 100- and 300-level requirements for the major or minor must be completed on campus. Normally, no more than two units of transfer credit in Art History can be applied toward the minimum requirements of a major or minor in Art History. Majors and minors must take their one required Studio class on campus. If approved by the Registrar and the relevant department, additional transfer credits will count toward completion of your Wellesley degree.

STUDIO COURSES

The Art Department grants transfer credit for 100- and 200-level Studio courses only; 300-level requirements for the major or minor must be completed on campus. Normally, no more than two units of transfer credit in Studio can be applied toward the minimum requirements of a major or minor in Studio. Studio majors may also request transfer credit for one 200-level modern or contemporary Art History course, but Art History 100 and 101 must be taken on campus. If approved by the Registrar and the relevant department, additional transfer credits will count toward completion of your Wellesley degree.

PROCEDURE

For either departmental or distribution credit in Art History and Studio, students must visit the Registrar’s home page and follow the procedures outlined there. Transfer of credit for Art History classes always requires a full syllabus (translated if necessary) that must be sent directly to Professor Rebecca Bedell as an attachment.

The Art Department will not act on any transfer of credit requests without completed paperwork and (if relevant) portfolio; the sooner you submit this information, the sooner we can inform you of the departmental decision. As this may affect your major or graduation plans it is to your advantage to complete this process in a timely fashion.

Studio Art, Architecture, and MAS majors who have taken a Studio course elsewhere must present a portfolio of work produced in each Studio course to determine whether it may be credited toward the major. This portfolio review must be scheduled with the Director of Studio Art or relevant program director (in the case of Architecture or MAS) before completing a confirmation of major form in the fall of the senior year.

TRANSFER STUDENTS

Students arriving at Wellesley as transfer students in their junior or senior years may transfer up to five classes toward a departmental major in Art History or Studio Art; these credits cannot take the place of 300-level courses. All transfer students must arrange an appointment with the department chair and/or relevant program director and Professor Rebecca Bedell. Transfer Credit Advisor to review transcripts and syllabi. Normally, we require transfer students in Art History to enroll in ARTH 100 and ARTH 101.

History of Art Major

REQUIREMENTS FOR THE ART HISTORY MAJOR

An Art History major must maintain a minimum of nine units. Students considering a major in Art History should choose an advisor and work out a program of study with her or him. The minimum major must be constructed according to the following guidelines:

A. ARTH 100 and 101. Advanced Placement or Transfer Credit will not be accepted in fulfillment of this requirement.

B. One of the following courses in Studio Art: ARTS 105, 106, ARTS 108/CAMS 138, ARTS 109, ARTS 113, 115/CAMS 135, ARTS 204.

C. A minimum of six further units in Art History above the 100-level to make a total of nine units, which must include distribution requirements. At least two of these must be 300-level courses. Students may elect to pursue a 350, but may not substitute this course for one of the 300-level courses.

Among the six units, a student must select one from each of the following four distribution areas:

1. Ancient, Medieval, or Art before 1400: ARTH 201, ARTH 202, ARTH 203. *ARTH 227, ARTH 241, ARTH 242, ARTH 243, ARTH 256, ARTH 267, ARTH 268, ARTH 290, ARTH 302, ARTH 332, ARTH 343, ARTH 373

2. Renaissance, Baroque, Rococo, or Art of the Eighteenth Centuries: ARTH 218, ARTH 221, ARTH 244, *ARTH 245, ARTH 246, ARTH 251, ARTH 259, ARTH 305, *ARTH 311, ARTH 325, ARTH 330, ARTH 331, *ARTH 342/CAMS 342

* Double-listed courses ARTH 227, ARTH 245, ARTH 255, ARTH 292, ARTH 311, ARTH 316, ARTH 322, ARTH 342 can be used to fulfill either of the two listed distribution areas but not both. Normally ARTH 299, ARTH 345, and ARTH 369 do not count toward these distribution requirements.

If approved by the Department’s Transfer of Credit Representative, two courses elected at other institutions may be used to meet the major requirements but the Studio course must be taken at Wellesley. No more than one unit of 350 credit may be counted toward the major. Courses from two-year colleges will not be credited to the major.

HONORS IN ART HISTORY

A Senior Thesis in Art History engages a topic involving substantial, independent, year-long research, normally resulting in a polished professional paper of between 50-100 pages in length. For a student who has a clear idea of what she wants to investigate, a well-considered plan of research, and a willingness to accept the responsibility of working independently, a senior thesis can be a rewarding experience. Candidates for departmental honors in Art History complete a senior thesis in two units of independent study/thesis (ARTH 360, ARTH 370) undertaken in the fall and spring of the senior year. Admission to the honors program in the department is open to
students who complete the following requirements: a 3.5 GPA in the major; a minimum of five units in Art History above the 100 level. (The four of the five units must be taken in the department, and one of the five units must be at the 300 level in the department. To be eligible for honors in Art History, a student must have taken at least one 300-level seminar in the art department. A 3.50 does not count. Further information is available on the Department website.

Graduate Study in Art History
For students considering graduate study in the history of art, ARTH 345 is strongly recommended. Graduate programs in the history of Western art require students to pass foreign language exams. Please consult your advisor regarding your expected concentration.

Students interested in graduate study in the field of art conservation should investigate requirements for entrance into conservation programs. Ordinarily college-level chemistry through organic should be elected, and a strong studio background is required.

Teacher Certification
Students interested in obtaining certification to teach art in the Commonwealth of Massachusetts should consult the director of studio art and the chair of the Department of Education.

Courses for Credit Toward the History of Art Major and Minor
The following courses taught in other departments can be counted toward the Art History major or minor; however, only one of them may be used for the minimum major and the student must fulfill the distribution areas with ARTH classes only.

AFR 207 Images of Africans People Through the Cinema
AFR 222 Blacks and Women in American Cinema
CAM 101 Introduction to Cinema and Media Studies
CAM 203/CHIN 243 Chinese Cinema (in English)
CAM 205/JPN 256 History of Japanese Cinema (in English)
CAM 241/WGST 249 Asian American Women in Film
CHIN 243/CAMS 203 Chinese Cinema (in English)
FREN 222 French Cinema from the Lumière Brothers to the Present: The Formation of Modernity

History of Art Minor

REQUIREMENTS FOR THE ART HISTORY MINOR
An Art History minor must elect a minimum of six units. Students considering a minor in Art History should choose an advisor and work out a program of study with her or him. The minimum major must be constructed according to the following requirements:

A. ARTH 100 and 101. Advanced Placement or Transfer credit will not be accepted in fulfillment of this requirement.

B. A minimum of four further units above the 100-level to make a total of six units. Of the four units, one must be taken in three of the following four distribution areas:

1. Ancient/Medieval or Art before 1400: ARTH 201, ARTH 202, ARTH 203, *ARTH 227, ARTH 241, ARTH 242, ARTH 243, ARTH 256, ARTH 267, ARTH 268, ARTH 290, ARTH 302, ARTH 332, ARTH 343, ARTH 373

2. Renaissance/Baroque/Rococo or Art of Fifteenth to the Eighteenth Centuries: ARTH 218, ARTH 221, ARTH 244, *ARTH 245, *ARTH 246, ARTH 251, ARTH 259, ARTH 305, *ARTH 311, ARTH 325, ARTH 330, ARTH 331, *ARTH 342/CAMS 342

* Double-listed courses ARTH 227, ARTH 245, ARTH 255, ARTH 292, ARTH 311, ARTS 316, ARTS 322, ARTS 342 can be used to fulfill either of the two listed distribution areas but not both.

Furthermore, at least four of the six units must be taken at Wellesley College. At least two of the six units must be 300-level courses. Only one course from outside the department, from the list below, may be counted toward the minor. A 350 will not count toward the minor.

History of Art/Studio Art Double Major

History of Art/Studio Art Double Major
For the double major in Art History and Studio Art, a student must elect ARTH 100 and ARTH 101, six additional units in Art History (following the requirements for the Art History major, with the added requirement that the course in distribution area 3 must examine twentieth-or twenty-first-century art) and eight additional units in Studio Art (following the requirements for the Studio major), for a total of sixteen units. A minimum of two courses must be taken at the 300-level in each major, a 350 unit may not be substituted for one of these courses.

Interdepartmental Majors
Students should be aware of affiliated majors in Architecture, Media Arts and Sciences, Cinema and Media Studies, medieval/Renaissance Studies, and American Studies. Many of these interdepartmental programs draw upon courses and faculty based in the Art Department, so students should consult a faculty advisor for more information.

Note
For the purposes of meeting the "18 units" requirement (See Academic Program, Other Requirements or Articles of Legislation, Book II, Article I, Section 8, A), Art History and Studio Art are considered separate departments. Courses in Studio Art are counted as units "outside the department" for Art History majors and courses in Art History are counted as courses "outside the department" for Studio Art majors.

Studio Art Major
Prospective Studio Art majors and minors should complete all 100-level art requirements (including the Art History survey) during their first two years at Wellesley before concentrating in a particular medium or studying internationally. Note that AP or IB courses may not be counted toward fulfillment of a major or minor in Studio Art. Given that most studio courses have prerequisites, students are advised to pace their course selections carefully so as to be ready to concentrate on advanced and independent studio work culminating in a major gallery exhibition in their senior year.

Requirements for the Studio Art Major
A Studio Art major must elect a minimum of 11 units:

• ARTH 100 and ARTH 101 (Introduction to the History of Art, Parts I and II). There is no exemption from this requirement by Advanced Placement, by International Baccalaureate, or by an exemption examination.

• ARTS 105 (Drawing I)

• Any two of the following: ARTS 106, ARTS 108/CAMS 138, ARTS 109, ARTS 113, ARTS 115/WRIT 115, ARTS 165

• An Art History course addressing twentieth-century or contemporary art.

• At least five studio courses above the 100 level. At least two of these must be at the advanced (300) level. Note that some 300-level Studio Art courses may be elected more than once for credit in the major.

• Formal presentation of an independent, thesis, or advanced studio project in a senior exhibition.

Honors in Studio Art
Honors in Studio Art is earned by the demonstration of excellence in both course work and a self-directed senior thesis project. A Studio Art thesis consists of a sustained body of visual work produced over two semesters, culminating in a formal exhibition in the Jewett Arts Center galleries, and accompanied by a paper of 15-20 pages documenting the development of the project. Seniors who have completed all foundational requirements in the major and have a grade point average of at least 3.5 in studio courses above the 100 level may propose a thesis project for honors in the fall of the senior year. If approved, this yearlong project is guided by a studio faculty advisor and assessed periodically by the full studio faculty. The gallery exhibitions and thesis paper are reviewed by an oral thesis committee in the spring in order to determine honors. A Studio Art major interested in pursuing an honors project should discuss her ideas with a potential thesis advisor in the spring of her junior year and take at least one advanced course in her proposed media concentration before the senior year.

Graduate Study in Studio Art
Students considering M.F.A. programs in the visual arts should aim to develop a deep major (more than the minimum 11 units) and pursue affiliated course
work in Art History, Philosophy and Visual Culture whenever possible. Since contemporary art is often interdisciplinary, students are encouraged to discuss the breadth of their course selections with their studio advisors.

Teacher Certification
Students interested in obtaining certification to teach art in the Commonwealth of Massachusetts should consult the director of studio art and the chair of the Department of Education.

Studio Art Minor
Requirements for the Studio Art Minor
A Studio Art minor must elect a total of seven units consisting of an art history course (normally ARTH 100 or 101), two studio courses at the 100 level (one of which must be 105), plus four additional units in Studio Art, of which at least one is at the 300 level (ARTS 250s and ARTS 350s excluded).

ARTH - Art History Courses

ARTH 100 - Global Perspectives on Art and Architecture: Ancient to Medieval (1.0)
Sweeping in its chronological and geographical scope, this two-part survey engages students in the analytical study of art, architecture, and urban form. It is a foundational course in critical and visual analysis: being able to look and analyze what you see is fundamental to a liberal arts education. Two lectures and one conference per week; conferences emphasize the interpretation of original works of art and hands-on historical materials and techniques. This is a required class for all art history, architecture, and studio art majors, who should plan to elect both ARTH 100 and ARTH 101 in their first or second year at Wellesley. Students in this section of ARTH 100 will attend the same twice-weekly lectures as the other ARTH 100 students, but their assignments will be different, and they will attend two special WRIT 107 conferences each week. Through writing about art, students in WRIT 107/ARTH 100 will develop skills in visual and critical analysis.

Instructor: Bedell, Lynn-Davis (Art)
Prerequisite: None. Open only to first-year students. Distribution: ARS
Term(s): Fall
This course satisfies the First-Year Writing requirement and counts as a unit toward the major in Art History, Architecture, or Studio Art.

ARTH 101 - Global Perspectives on Art and Architecture: Renaissance to Contemporary (1.0)
Sweeping in its chronological and geographical scope, this two-part survey engages students in the analytical study of art, architecture, and urban form. It is a foundational course in critical and visual analysis: being able to look and analyze what you see is fundamental to a liberal arts education. Two lectures and one conference per week; conferences emphasize the interpretation of original works of art and hands-on historical materials and techniques. This is a required class for all art history, architecture, and studio art majors, who should plan to elect both ARTH 100 and ARTH 101 in their first or second year at Wellesley. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 101 students, but their assignments will be different, and they will attend two special WRIT 108 conferences each week. Through writing about art, students in WRIT 108/ARTH 101 will develop skills in visual and critical analysis.

Instructor: Lynn-Davis (Art)
Prerequisite: None. Open only to first-year students. Distribution: ARS
Term(s): Spring
This course satisfies the First-Year Writing requirement and counts as a unit toward the major in Art History, Architecture, Studio Art, or Media Arts and Sciences.

ARTH 200 - Architecture and Urban Form (1.0)
An introduction to the study of architecture and the built environment.

Instructor: Friedman
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

ARTH 201 - Medieval Art and Architecture, 400-1400 (1.0)
This course surveys the visual cultures of Medieval Europe and the Mediterranean. Topics include religious art and architecture and their ritual aspects, the Medieval approaches to the human body and the material world, the intersection between gender and devotional practices, relationships between script and image in illuminated manuscripts, cross-cultural encounters around the Mediterranean.

Instructor: Balafrej
Prerequisite: None. ARTH 100 and ARTH 101 recommended. Distribution: ARS
Term(s): Not Offered

ARTH 202 - Byzantine Art and Architecture (1.0)
This course serves as an introduction to the arts of Byzantium (312-1453 C.E.). Through the examination of diverse media, including buildings, mosaics, icons, manuscripts, and musical arts, this course aims to develop an understanding of the Byzantine culture within the larger context of medieval Europe and the Mediterranean.

Prerequisite: None. ARTH 100 and ARTH 101 recommended. Distribution: ARS
Term(s): Not Offered

ARTH 203 - Near Eastern Art and Architecture (1.0)
This course will offer an introduction to the art and architecture of the Ancient Near East, from the flourishing of the first cities in the fourth millennium B.C.E. to the beginning of the Islamic conquests in the seventh century C.E. In addition to the lands of the Sumerians, Akkadians, Babylonians, Phoenicians, and Cypriots, we will focus especially on the great empires of ancient Assyria (Iraq) and Persia (Iran). Topics will include urban development, palatial architecture, portraiture, representations of empire, cross-cultural connections, early forms of mass media, temples, and votive dedications. We will conclude by considering how Near Eastern antiquities came to be estheticized and politicized in nineteenth- and twentieth-century Europe and North America. Trips to local museums will be required.

Instructor: Cassibry
Prerequisite: None. ARTH 100 and ARTH 101 recommended. Distribution: ARS
Term(s): Fall

ARTH 205 - Breaking Boundaries: The Arts of Mexico and the United States (1.0)
An artificial boundary has long divided the art histories of Mexico and the United States, placing them in separate textbooks, classes, and exhibitions. This lecture course breaks that model. We will compare and contrast the arts of these two nations, beginning with the independence movements of the eighteenth century and ending with the rise of modernism in the 1950s. Topics include representations of native peoples, responses to the machine age, and the battle of woman artists like Frida Kahlo and Georgia O’Keeffe for a respected place in the art world.

Instructor: Bedell, Oles
Prerequisite: None. ARTH 100 and ARTH 101 recommended. Distribution: ARS
Term(s): Not Offered

ARTH 215 - The Medi-terranean(s) (1.0)
This course surveys the circulation of artistic forms and aesthetic values in premodern times. We will first focus on art transfers around the Mediterranean Sea, between Europe, Islam and Byzantium in the Middle Ages. This should help us conceptualize the Mediterranean as a Medi-terranean, that is, as an intermediary space, a space that mediates different lands. We will then apply this concept of the Medi-terranean to other geo-cultural zones of interaction, such as the Red Sea, the Indian Ocean, and Central Asia in the same period.

**Instructor:** Balafrej  
**Prerequisite:** None  
**Distribution:** ARS  
**Term(s):** Spring

### ARTH 218 - From Van Eyck to Bruegel: Painting in the Netherlands in the Fifteenth and Sixteenth Centuries (1.0)

Focusing on the works of Jan van Eyck, Hieronymus Bosch, and Peter Bruegel the Elder, this course surveys the development of devotional panel painting and the emergence of the independent genre of portraiture, landscape, and scenes from daily life. Of special interest will be the changing role of art in an era of momentous political and religious change, and the ways in which that change is recorded in the works of these particularly "engaged" artists.

**Instructor:** Carroll  
**Prerequisite:** None. ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Fall

### ARTH 221 - Seventeenth-Century Dutch and Flemish Painting (1.0)

The course focuses on Flemish artists painting for the Baroque courts of Europe (Rubens and van Eyck) and on Dutch artists painting during the Golden Age of the Dutch Republic (Rembrandt, Vermeer, Ruisdael).

**Instructor:** Carroll  
**Prerequisite:** None. ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Not Offered  
Normally offered in alternate years.

### ARTH 224 - Modern Art to 1945 (1.0)

A survey of modern art from the 1890s to World War II, examining the major movements of the historical avant-garde (such as cubism, expressionism, Dada, and surrealism) as well as alternate practices. Painting, sculpture, photography, cinema, and the functional arts will be discussed, and critical issues, including the art market and gender, national, and cultural identities, will be examined.

**Instructor:** Berman  
**Prerequisite:** None. ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Not Offered  
Normally offered in alternate years.

### ARTH 225 - Modern Art Since 1945 (1.0)

A survey of art since World War II, examining painting, sculpture, photography, performance, video, film, conceptual practices, social and intermedial practices, and the mass media. Critical issues to be examined include the art market, feminist art practices, the politics of identity, and artistic freedom and censorship.

**Instructor:** Berman  
**Prerequisite:** None. ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Spring  
Normally offered in alternate years.

### ARTH 226 - History of Photography: From Invention to Media Age (1.0)

Photography is so much a part of our private and public lives, and it plays such an influential role in our environment, that we often forget to examine its aesthetics, meanings, and histories. This course provides an introduction to these analyses by examining the history of photography from the 1830s to the present. Considering fine arts and mass media practices, the class will examine the works of individual practitioners as well as the emergence of technologies, aesthetic directions, markets, and meanings.

**Instructor:** Berman  
**Prerequisite:** None. ARTH 100 and ARTH 101 strongly recommended.  
**Cross-Listed as:** CAMS 207  
**Distribution:** ARS  
**Term(s):** Fall

Normally offered in alternate years.

### ARTH 228 - Modern Architecture (1.0)

A survey of the major movements in architecture in Europe and the Americas from neoclassicism to the present.

**Instructor:** Friedman  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Fall

Normally offered in alternate years.

### ARTH 230 - Frank Lloyd Wright and the American Home (1.0)

An investigation of Wright's domestic architecture in its cultural and historical context.

**Instructor:** Friedman  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Not Offered

Normally offered in alternate years.

### ARTH 231 - Architecture and Urbanism in North America (1.0)

This course will present a survey of American architecture and urbanism from prehistory to the late twentieth century. Lectures and discussions will focus particularly on placing the American-built environment in its diverse political, economic, and cultural contexts. We will also explore various themes relating to Americans' shaping of their physical surroundings, including the evolution of domestic architecture, the organization and planning of cities and towns, the relationships among urban, suburban and rural environments, the impact of technology, and Americans' ever-changing relationship with nature.

**Instructor:** McNamara  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Not Offered

Normally offered in alternate years.

### ARTH 232 - American Art (1.0)

This course surveys American art from the Colonial period to World War II, a time of tumultuous change when Americans were in the process of inventing themselves. All through this period, American art was implicated in the larger social, political, and economic developments of its time. We will investigate these intersections as we focus on major artists and major movements. Themes will include the place of art in a democratic society, the rise of women artists, American encounters with art from other parts of the world, and the roles that art played in such areas as identity formation, westward expansion, and cultural anxieties about American masculinity.

**Instructor:** Bedell  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Not Offered

### ARTH 236 - Art, Architecture, and Culture in the Ancient Americas (1.0)

Before the arrival of the Europeans in the late fifteenth century, several brilliant civilizations emerged in North and South America, including the Maya, Aztec, Moche, and Inca. Incorporating the tools of art history, cultural studies, and archaeology, this course explores the visual culture of these pre-Conquest peoples. Lectures that introduce the broader aspects of each civilization will be accompanied by workshops that explore cutting-edge issues. We will also work extensively with objects on display in the Davis Museum.

**Instructor:** Oles  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Not Offered

Normally offered in alternate years.

### ARTH 237 - Art, Architecture, and Culture in Post-Conquest Mexico (1.0)

A survey of visual culture in Mexico from the Spanish conquest in the 1520s to current developments in contemporary art. Against a rich spectrum of historical events, we will examine key works of art and architecture - from colonial monasteries to paintings of Aztec history; from modernist housing blocks to conceptual art - focusing on how the arts have served to build a sense of cultural or national identity. Specific topics to be addressed include the construction of race and gender, official patronage of public art, and the myths that have shaped, and continue to shape, what it means to be “Mexican.”

**Instructor:** Oles  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Spring

Normally offered in alternate years.

### ARTH 238 - Chinese Art and Architecture (1.0)

This course is a survey of the art and architecture of China from the Neolithic period to the turn of the twentieth century in two simultaneous approaches: chronologically through time and thematically with art in the tomb, at court, in the temple, in the life of the elite, and in the marketplace. It is designed to introduce students to the major monuments and issues of Chinese art and architecture by exploring the interactions of art, religion, culture, society, and creativity, especially how different artistic styles were tied to different intellectual thoughts, historical events, and geographical locations.

**Instructor:** Liu  
**Prerequisite:** None. ARTH 100 and ARTH 101 recommended.  
**Distribution:** ARS  
**Term(s):** Fall
especially how different artistic styles were tied to different intellectual thoughts, political events, and geographical locations. Students are expected to acquire visual skills in recognizing artistic styles, analytical skills in connecting art with its historical contexts, and writing skills in expressing ideas about art. Field trips to the Museum of Fine Arts in Boston, Harvard’s Sackler Museum, the Metropolitan Museum of Art in New York, and/or the Peabody Essex Museum in Salem, depending on available exhibitions.

Instructor: Liu  
Prerequisite: None. ARTH 100 recommended.  
Distribution: ARS  
Term(s): Not Offered  

NORMALLY OFFERED

ARTH 241 - Egyptian Art and Archaeology (1.0)  
The greater Nile Valley has yielded some of the world’s most ancient and compelling monuments. In this course we will survey the art and architecture of ancient Egypt from Neolithic times (c. 6000 B.C.) through the Roman period (c. second century A.D.). One class session per month will meet in the Museum of Fine Arts.

Instructor: Freed  
Prerequisite: None. ARTH 100 recommended.  
Distribution: ARS  
Term(s): Not Offered  

NORMAL OFFERED IN alternate years.

ARTH 242 - Greek Art and Architecture (1.0)  
This course surveys Greek Art and Architecture, from the emergence of Athens as a leading cultural center in the eighth century B.C.E. to the fall of the last Hellenistic kingdom in the first century B.C.E. Key topics include cross-cultural connections and colonialism; the changing visual identities of women; the development of naturalistic portraiture; inscriptions and artists’ identities on Greek vases; the symposium as a content for art; polychromy, the colorful painting of marble buildings and sculptures; urbanism and the components of a Greek city; and architecture in the service of religious festivals (including processions, athletic games, and theatrical competitions). Field trips to Boston’s Museum of Fine Arts, the Davis Museum, the classics department’s archaeology collection, and Wellesley’s Greek theatre.

Instructor: Cassiday  
Prerequisite: None. ARTH 100 or one unit of classical civilization recommended.  
Distribution: ARS  
Term(s): Not Offered  

ARTH 243 - Roman Art and Architecture (1.0)  
This course will survey the material culture of the Roman Empire. We will consider how art and architecture helped define the empire’s key social events, from grandiose triumphal processions to intimate household banquets. In order to gain a better understanding of the empire’s diversity, we will look at sites throughout Europe, the Near East, and North Africa, in addition to the city of Rome itself. Frequent class trips to the Museum of Fine Arts, Boston.

Instructor: Cassiday  
Prerequisite: None. ARTH 100 or one unit of classical civilization recommended.  
Distribution: ARS  
Term(s): Spring  

ARTH 244 - Art, Patronage, and Society in Sixteenth-Century Italy (1.0)  
This course will examine the so-called High Renaissance and Mannerist periods in Italy. We will focus in particular on papal Rome, ducal Florence, and republican Venice, and the work of Leonardo da Vinci, Michelangelo, Raphael, Titian, and their followers in relation to the social and cultural currents of the time. Issues such as private patronage, female artists, contemporary sexuality, and the connections between monumental and decorative art will be examined in light of recent scholarship in the field.

Instructor: Musacchio  
Prerequisite: None. ARTH 100 and ARTH 101 recommended.  
Distribution: ARS  
Term(s): Not Offered  

NORMAL OFFERED IN alternate years.

ARTH 245 - House and Home: Domestic Architecture, Interiors, and Material Life in North America, 1600-1900 (1.0)  
Domestic architecture is perceived as both a setting for private life and a means of public self-expression. This course will explore the duality of “house and home” by paying close attention to the changing nature of domestic environments in North America from 1600 to 1900. Topics will include the gendering of domestic space; the housing arrangements, architects, designers, and prescriptive literature in shaping domestic environments; technological change; the marketing and mass production of domestic furnishings; the relationship of houses to their natural environments; and visions for alternative, reform, or utopian housing arrangements. Site visits and walking tours are a central component of the course.

Instructor: McNamara  
Prerequisite: None. ARTH 101 recommended.  
Distribution: ARS  
Term(s): Not Offered  

ARTH 246 - Collectors, Saints, and Cheese-Eaters in Baroque Italy (1.0)  
This course surveys a selection of the arts in Italy from circa 1575 to circa 1750. The works of artists such as the Carracci, Caravaggio, Bernini, Gentileschi, and Longhi will be examined within their political, social, religious, and economic settings. Particular emphasis will be placed on Rome and the impact of the papacy on the arts, but Bologna, Florence, and Venice will also play a part, especially in regard to the growing interest in scientific enquiry and the production of the arts in courts and for the Grand Tour.

Instructor: Musacchio  
Prerequisite: None. ARTH 100 and ARTH 101 recommended.  
Distribution: ARS  
Term(s): Not Offered  

NORMAL OFFERED IN alternate years.

ARTH 247 - Islamic Art and Architecture, 650-1500 (1.0)  
The course provides a thematic chronological survey of Islamic art and architecture from their inception around 650 C.E. to the dawn of the modern empire in 1500 C.E. Until recently, most scholarship approached Islamic art through stylistic taxonomies or technical studies of materials. In contrast, this course seeks to bridge Islamic art and social history, in order to uncover the dynamics between objects and users or viewers in specific social settings. We will look at the use of early Islamic monuments as stages for religious and political spectacles, at the exchange of portable objects designed as gifts and commodities around the Mediterranean, at the female patronage of religious buildings, among other things.

Instructor: Balafrej  
Prerequisite: None. ARTH 100 and ARTH 101 recommended.  
Distribution: ARS  
Term(s): Fall  

Normally offered in alternate years.

ARTH 248 - Chinese Painting: Masters and Principles (1.0)  
Chinese painting is the only tradition in world art that can rival the European painting tradition in the quantity and diversity of its output, the number of recorded artists of note, the complexity of aesthetic issues attached to it, and the sophistication of the written literature that accompanies it through the centuries. This course examines Chinese painting from early times to the turn of the twentieth century with an introduction to traditional connoisseurship. Issues to be considered include major themes, styles, formats, and functions of Chinese painting. Special attention is given to imperial patronage; the relationship between painting, calligraphy, and poetry; literati ideal versus professionalism; gender and display; and the tension between tradition and creativity. Trips to the Museum of Fine Arts, Boston, and the Metropolitan Museum of Art, New York City.

Instructor: Liu  
Prerequisite: None. ARTH 100 and ARTH 101 recommended.  
Distribution: ARS  
Term(s): Not Offered  

NORMAL OFFERED IN alternate years.

ARTH 250H - Research or Individual Study (0.5)  
Prerequisite: ARTH 100 or ARTH 101 or permission of the instructor.  
Distribution: None  
Term(s): Fall; Spring  

ARTH 251 - The Arts in Renaissance Italy Before and After the Black Death (1.0)  
This course surveys a selection of the arts in Renaissance Italy, focusing primarily on Tuscany and central Italy. This period witnessed the rise of the mendicant orders, the devastation of the Black Death, the growth of civic and private patronage, and, finally, the exile of the Medici family, all of which had a profound impact on the visual arts. The work of major artists and workshops will be examined and contextualized within their political, social, and economic settings by readings and discussions of contemporary texts and recent scholarship.

Instructor: Musacchio  
Prerequisite: None. ARTH 100 and ARTH 101 recommended.  
Distribution: ARS  
Term(s): Not Offered  

NORMAL OFFERED IN alternate years.

ARTH 255 - Twentieth-Century Chinese Art (1.0)  
This course examines Chinese art in the socially and politically tumultuous twentieth century, which witnessed the end of imperial China, the founding of the Republic, the rise of the People’s Republic, the calamity of Mao’s cultural revolution, the impact of the West, and the ongoing social and economic reforms. Critical issues of examination include the encounters of East and West, the tensions of tradition and revolution, the burdens of cultural memory and historical trauma, the interpretations of modernity and modernism, the flowering of avant-garde and experimental art, and the problems of globalization and art markets. The course is designed to develop an understanding of the diverse threads of art and society in twentieth-century China.

Instructor: Liu  
Prerequisite: None. ARTH 100 and ARTH 101 recommended.  
Distribution: ARS  
Term(s): Fall  

Normally offered in alternate years.

ARTH 256 - History of Architecture, Interiors, and Material Life in North America, 1600-1900 (1.0)  
This course surveys a selection of the arts in North America from the early decades of the seventeenth century to the end of the twentieth century, focusing on the interplay of art and society in twentieth-century China. Issues to be considered include major themes, styles, formats, and functions of Chinese painting. Special attention is given to imperial patronage; the relationship between painting, calligraphy, and poetry; literati ideal versus professionalism; gender and display; and the tension between tradition and creativity. Trips to the Museum of Fine Arts, Boston, and the Metropolitan Museum of Art, New York City.

Distribution: ARS  
Term(s): Not Offered  

NORMAL OFFERED IN alternate years.
ARTH 256 - Etruscan and Celtic Art: Cross-Cultural Connections in Ancient Europe (1.0)
This course will offer an introduction to Etruscan and Celtic Art. The Etruscans dominated early Italy and became notorious for the prominence of women in their society as well as for their love of Greek pottery. Etruscan artists reinterpreted the themes and styles of this imported Greek art in distinctive tomb paintings, engraved mirrors, and statues. Etruscan artists also served the early kings of Rome, and we find their work at the heart of this ancient city. At the same time, Celtic tribes dominated much of Europe, and their tombs reveal a fascination with Greek and Etruscan art. It was partly in response to such imports that the Celts developed the Western world’s first great abstract style, which experienced a revival in Britain under Anglo-Saxon rule.

Instructor: Cassibry
Prerequisite: None. ARTH 100 and ARTH 101 recommended.
Distribution: ARS
Term(s): Spring

ARTH 259 - The Art and Architecture of the European Enlightenment (1.0)
An introduction to European art and architecture in the Age of Enlightenment (1760-1815). Beginning with Louis XIV’s development of Versailles and ending with Napoleon’s Egyptian campaign, we will examine works of art in relation to social, political, cultural, and scientific debates of the period. Topics include new ideas of nature and landscape design; medical theory and the representation of the body; spaces of social reform and libertinage; travel and the rediscovery of antiquity; colonialism; and counter-Enlightenment trends. The course combines recent scholarship in art history with readings from the history of science, French and English literature, and cultural studies.

Instructor: Galvez
Prerequisite: None. ARTH 100 and ARTH 101 recommended.
Distribution: ARS
Term(s): Fall

Normally offered in alternate years.

ARTH 262 - African American Art (1.0)
This course will study art made by African Americans from early colonial America to the present. We will also examine images of African Americans by artists of diverse cultural backgrounds. Throughout the course we will analyze construction(s) of subjectivity of African-American identity (black, Negro, colored) as it relates to visual representations in relation to contemporary African artists and art institutions.

Instructor: Greene
Prerequisite: None. ARTH 100 and ARTH 101 recommended.
Distribution: ARS
Term(s): Not Offered

ARTH 266 - New Perspectives on the Global City (1.0)
This team-taught course introduces students to the study of the global city through an examination of key topics in urban history, planning, architecture, culture, economics and environment. Focusing on major sites from New York to Mumbai, we will look at the many ways in which cities have been designed and represented, analyze the use of public and private space by men and women, and explore the construction of urban narratives, both in the past and in the age of cyberculture. The course will include guest lecturers and site visits.

Instructor: Friedman, McNamara
Prerequisite: None. ARTH 100 and ARTH 101 recommended.
Distribution: ARS
Term(s): Spring

ARTH 279 - History of the Book from Manuscript to Print (1.0)
A survey of the evolution of the book, both as a vessel for the transmission of text and image and as evidence of material culture. Through close examination of rare books in Campus Library’s Special Collections, we will explore the social and political forces that influenced the dissemination and reception of printed texts. Lectures will cover the principle techniques and materials of book production from the ancient scroll to the modern codex, including calligraphy, illumination, format and composition, typography, illustration, papermaking, and bookbinding. Weekly reading, discussion, and analysis of specimens will provide the skills needed to develop a critical vocabulary and an investigative model for individual research. Additional sessions on the hand press in the Book Arts Lab and in the Pendleton paper studio.

Instructor: Rogers (Curator of Special Collections)
Prerequisite: Permission of the instructor.
Distribution: ARS
Term(s): Spring

ARTH 302 - Seminar: Ancient Palaces and Villas (1.0)
This seminar will focus on the palatial art and architecture of the ancient Mediterranean, Mesopotamia, and Persia. We will analyze the surprisingly diverse functions of these ancient complexes, which could include residences for kings and queens, tombs for their dynasties, offices for administrators, spaces for religious ceremonies, and even elaborate circuses for chariot-racing. We will also examine the urban significance of palaces, some of which anchored newly founded cities, and of which redefined the spaces of cities already hundreds of years old, and some of which rejected the city altogether in favor of the countryside. We will also consider the art of adornment. Genres of art deemed appropriate for palaces ranged from historical relief sculptures depicting violent military campaigns to whimsical floor mosaics imitating unswept floors.

Instructor: Cassibry
Prerequisite: ARTH 100 or permission of the instructor.
Distribution: ARS
Term(s): Spring
ARTH 309-01-S - Seminar. Problems in Architectural History (1.0)

This seminar will focus on the ways in which twentieth-century architects and clients in various cultures have responded to the challenge of designing buildings for worship, study, and community. We will look at the traditions of building within various religious and spiritual communities, examining how these have changed and how they have remained the same.

Instructor: McNamara
Prerequisite: ARTH 228
Distribution: ARS
Term(s): Spring

ARTH 319 - Seminar. American Art (1.0)
Instructor: Bedell
Prerequisite: A 200-level course in American art, literature, or history or a 200-level course in nineteenth-century European art, literature, or history.
Distribution: ARS
Term(s): Not Offered

ARTH 320 - Seminar. Topics in American Architecture (1.0)
Topic for 2014-15: Mid-Century Modern: The American Style
This course focuses on American design and its historical contexts in the period from 1930 to the late 1960s. Topics include: Art Deco and the American city; the Museum of Modern Art and its influence; Frank Lloyd Wright; Mies van de Rohe and American Modernism; tourism, travel, and tropical style; the suburban house; modern furniture and interior design, and the roots of Postmodernism.

Instructor: Friedman
Distribution: ARS
Term(s): Fall

ARTH 321 - Seminar. Topics in Nineteenth-Century Art (1.0)

Distribution: ARS
Term(s): Not Offered

ARTH 316-01-F - Topics in African/African American Art (1.0)
Topic for 2014-15: The Body: Race and Gender in Modern and Contemporary Art
This course charts past and present artistic mediations of racial, ethnic and gendered experiences throughout the world, using the rubric of the body. In the struggle to understand the relation between self and other, artists have critically engaged with the images that define our common sense of belonging, ranging from a rejection of stereotypes to their appropriations, from the discovery of alternative histories to the rewriting of dominant narratives, from the concepts of difference to theories of diversity. The ultimate goal of the course is to find ways of adequately imagining and imaging various identities today. We will discuss socio-political discourses, including essentialism, structuralism, postmodernism, and post-colonialism and we will question the validity of such concepts as diaspora, nationalism, transnationalism and identity in an era of global politics that celebrates the hybrid self.

Instructor: Greene
Prerequisite: Open only to juniors and seniors, by permission of the instructor.
Cross-Listed as: AFR 316-01-F
Distribution: ARS
Term(s): Fall

Ann E. Maurer ’51 Speaking Intensive Course

ARTH 318 - Seminar. New England Arts and Architecture (1.0)
This seminar will introduce students to the visual and material culture of New England from the period of European contact to the end of the twentieth century, with particular emphasis on Boston and environs. Course readings, lectures, and discussion will address the broad range of artistic expressions from decorative arts to cultural landscapes, placing them in their social, political, and economic contexts as well as in the larger context of American art and architecture. A major theme of the course will be the question of New England’s development as a distinct cultural region and the validity of regionalism as a category of analysis. The course will include a number of required field trips to New England museums and cultural institutions.

Instructor: McNamara
Prerequisite: ARTH 101 or permission of the instructor.
Distribution: ARS
Term(s): Spring

ARTH 325 - Seminar. Rococo and Neoclassical Interiors (1.0)
This seminar explores the eighteenth-century European interior through an analysis of architecture, painting, sculpture, and decorative arts. By focusing on domestic interiors as well as garden pavilions, theatres and political arenas, we will examine the role that objects and spaces played in the formation of eighteenth-century ideas of desire and identity. Specific patrons and artists discussed include Marie-Antoinette, François Boucher, Robert Adam, and Claude-Nicolas Ledoux. We will also examine the Rococo’s revival in later periods—including nineteenth-century France and Gilded Age America—and its relevance for contemporary art. Museum visits will allow us to explore the phenomenon of the “period room.”

Instructor: Martin
Prerequisite: ARTH 101 and permission of the instructor.
Distribution: ARS
Term(s): Not Offered

ARTH 329 - Seminar. You May Say I Am a Dreamer: Art Cinema Surrealisms (1.0)
Dream logic, convulsive identity, and a questioning attitude: these tenets of historical Surrealism have fueled narrative art films radiating bizarre beauty and aiming to reach spectators through channels beyond rational comprehension. This interdisciplinary seminar begins by examining Surrealist classics (from Buñuel to Lynch). We then consider how, in the shade of Surrealism’s porous borders [with magical realism, for example], films were/are made worldwide that honor the above tenets and prompt us to unthink the movements’ Eurocentrism. Since the wonders of the digital revolution are seen by some as enabling a physical and metaphysical manifestation of all the Surrealists sought out, this seminar’s critical revision of Surrealism’s theory and practice is not just timely—it is a must. What would a Surrealist questioning attitude be today?

Instructor: Viano (Cinema and Media Studies)
Prerequisite: ARTH 101 or CAMS 202 or permission of the instructor.
Cross-Listed as: CAMS 329
Distribution: ARS
Term(s): Not Offered

ARTH 330-01-S - Seminar. Italian Renaissance Art (1.0)

Topic for 2014-15: Birth, Marriage, and Death in Renaissance Italy
During the Italian Renaissance, major family events like childbirth, marriage, and death were marked by both works of art and at times elaborate rituals. In this seminar we will examine childbirth trays, marriage chests, painted and sculpted portraits, and funerary monuments, as well as a wide range of additional domestic objects that surrounded people in their everyday life. These objects will be related to contemporary monumental and public art, literature, account books, and legislation, as well as recent scholarship in art history, social history, and women’s studies, to provide insight into Renaissance art and life.

Instructor: Musacchio
Prerequisite: ARTH 101 or permission of the instructor.
Distribution: ARS
Term(s): Spring

ARTH 331-01-S - Seminar. The Art of Northern Europe. (1.0)

Topic for 2014-15: Rembrandt
In the 17th century, Rembrandt was heralded as “the foremost heretic in painting,” both for his innovative working methods in painting, drawing and etching, and for his radical reinterpretations of traditional genres: the portrait, landscape, still-life, as well as religious and mythological narratives. This seminar will examine various aspects of Rembrandt’s creative achievement through class discussions, research assignments, and field trips to museums in the Boston area and New York.

Instructor: Carnell
Prerequisite: ARTH 101
Distribution: ARS
Term(s): Spring

ARTH 333 - Seminar. Visual Analysis of Film (1.0)

Instructor: Carnell
Distribution: ARS
Term(s): Not Offered

ARTH 334 - Seminar. Paris, Capital of the Nineteenth Century (1.0)
This seminar explores the art, architecture, and material culture of nineteenth-century Paris, focusing on a specific aspect of this topic—such as fashion, urbanism, or Art Nouveau—each new time the course is taught. We will explore how Paris became the undisputed arts capital in this period as well as a catalyst for political activism, urban change, aesthetic innovation, and modernity. Related topics to consider include the mass media; Haussmannization; historical revivalism; Impressionism; gender and consumerism; and the rise of the avant-garde. Artists and writers to discuss include Ingres, Daumier, Balzac, Baudelaire, Degas, Cassatt, Rodin, and Guimard.

Instructor: Martin
Prerequisite: ARTH 101 or permission of the instructor.
Distribution: ARS
Term(s): Not Offered

ARTH 335-01-F - Seminar. Topics in Modern Art (1.0)

Instructor: Friedman

ARTH 339-01-S - Seminar. Topics in Modern Art (1.0)

Instructor: Friedman
Distribution: ARS
Term(s): Not Offered
Germany, and then in the U.S. and internationally. The class will consider the historical position of the Bauhaus; examine the school’s curriculum, philosophy, practices, and faculty; and examine its legacies in recent architecture, photography, design, and painting.

Instructor: Berman
Prerequisite: ARTH 224, ARTH 101, ARC 200, or by permission of the instructor
Cross-Listed as: GER: 313-01-F
Distribution: ARS
Term(s): Fall

ARTH 338-01-S - Seminar. Museum Studies. (1.0)

Topic for 2014-15: Museum Issues
This seminar will focus on a lively examination of the art museum from historical, theoretical, and applied perspectives. Topics include the evolution of the institution and its built environments, the philosophical and social implications of categorizing, collecting and display, ethical issues in museum practice, the rights of the work of art, the competing demands of new and traditional stakeholders, and contemporary challenges. The goal will be to achieve a well-founded and critical understanding of the art museum’s problematic but productive role in structuring and facilitating experience and knowledge for a variety of constituencies.

Instructor: Fischman
Prerequisite: ARTH 100 or ARTH 101 and permission of the instructor required. Preference given to senior art majors.
Distribution: ARS
Term(s): Spring

ARTH 337-01-S - Seminar: Topics in Chinese Painting (1.0)

Topic for 2014-15: The Song Imperial Painting Academy
The Imperial Painting Academy (Huayuan) of the Song Dynasty (960-1127), officially founded in 984, was the first of its kind in the history of world art. The paintings of the Academy, often compared to those of the Renaissance, are among the great artistic achievements of humanity. This seminar investigates the nature of imperial patronage and the institution and practice of the Academy through close reading and critical analysis of painters’ biographies and other Song literature (in translation), their surviving works, and modern scholarship. The seminar also intends to offer students valuable case study exercises to explore various research methods. Special viewing sessions at the Museum of Fine Arts, Boston, the Metropolitan Museum of Art, New York and the Jewett Arts Center are planned.

Instructor: Liu
Prerequisite: ARTH 100 or permission of the instructor; preferences are given to juniors and seniors.
Distribution: ARS
Term(s): Spring

ARTH 338-01-S - Seminar. Topics in Latin American Art (1.0)

Topic for 2014-15: Who Was Frida Kahlo?
Thirty years ago, Frida Kahlo was a somewhat marginal figure, best known as the wife of Mexican muralist Diego Rivera. Today she is one of the most famous artists in the world, as popular with museum-goers as Leonardo or Van Gogh. This seminar will explore Kahlo’s life and work using a variety of critical and disciplinary approaches, from connoisseurship to feminism, to better understand her complex self-invention. We will place her paintings, drawings, and writings in their historical context - focusing on her relationship to Surrealism, for example. We will also study how she has been interpreted by curators and biographers, artists and filmmakers, fakers and advertisers.

Instructor: Ollie
Prerequisite: None
Distribution: ARS
Term(s): Spring

ARTH 340 - Seminar. Disneyland and American Culture (1.0)

One of the most-visited tourist attractions in the world, subject of thousands of books and articles, adored by millions, yet reviled by many intellectuals, Disneyland has occupied a prominent place in American culture since it opened in 1955. This seminar will examine Disneyland as an expression of middle-class American values, as a locus of corporatism and consumerism, as a postmodern venue, as a utopia, and as an influence upon architecture and urban design. In a broader sense, we will use Disney to explore the ideals, the desires, and the anxieties that have shaped post-World War II American culture.

Instructor: Bedell
Prerequisite: AMST 101 or ARTH 101 and a 200-level course in American or modern culture (history, art, literature, economics, etc). Permission of the instructor required.
Cross-Listed as: AMST 340
Distribution: ARS, HS
Term(s): Spring

ARTH 341 - Seminar. The Landscape Painting of China, Korea, and Japan (1.0)

Landscape or shanshui (literally “mountains” and “rivers” in Chinese) rose as an independent and major painting category in the tenth century in East Asia and is among the great traditions of world art. How did it develop so early? What did it mean? How was it used? Why is landscape still a popular subject in modern East Asian art? Following the development of landscape painting from the early periods to the twentieth century, the course explores such issues as landscape and national development, landscape and power, landscape as representation of nature, landscape as images of the mind, and the tension of tradition and creativity in painting landscape. Comparisons will be made with Dutch, English, French, and American landscape painting to provide a global perspective.

Instructor: Liu
Prerequisite: ARTH 101 or permission of the instructor.
Distribution: ARS
Term(s): Not Offered

ARTH 342 - Seminar. Domesticity and Its Discontents (1.0)

The course will study changing representations of domestic life and domestic interiors from the seventeenth century through the present. The first part of the course will focus on paintings of family life in the home from the seventeenth through the nineteenth centuries. The second part of the course will focus on the analysis of films, particularly domestic melodramas, that are concerned with family life and interior spaces.

Instructor: Carnell
Prerequisite: ARTH 101, CAMS 101, or permission of instructor
Distribution: ARS
Term(s): Spring
Not open to students who have completed ARTH 263.

ARTH 344 - Seminar: Topics in Islamic Art (1.0)

Distribution: ARS
Term(s): Not Offered

ARTH 345 - Seminar. Methods of Art History (1.0)

What are the ways in which art has been defined, evaluated, theorized, and researched? What assumptions underlie the discipline of art history? This seminar provides a survey of all major approaches to the critical understanding of visual art. These include connoisseurship, iconography, Marxism, psychoanalysis, semiotics, gender and postcolonial theory, and cultural studies. Critical reading and intensive class discussion will be emphasized. Recommended for all majors.

Instructor: Baharej
Prerequisite: ARTH 100 or ARTH 101 and one 200-level course, or permission of the instructor.
Distribution: ARS
Term(s): Spring

ARTH 346 - Seminar. Poetic Painting in China, Korea, and Japan (1.0)

Poetic painting is a conspicuous visual phenomenon in East Asian art that at its best is technically superlative and deeply moving. This seminar investigates the development of this lyric mode of painting first in China and then in Korea and Japan from the eighth century to the twentieth century. The practices of scholar-officials, emperors and empresses, masters in and outside of the Imperial Painting Academy, literati artists, and modern intellectuals. Literary ideals and artistic skills, tradition and creativity, patronage and identity, censorship and freedom of expression, and other tensions between paintings and poetry/poetry theories will be examined.

Instructor: Liu
Prerequisite: ARTH 101 or permission of the instructor.
Distribution: ARS
Term(s): Not Offered

ARTH 347 - Seminar. Topics in South Asian Arts (1.0)

Prerequisite: ARTH 101
Distribution: ARS
Term(s): Not Offered

ARTH 350 - Research or Individual Study (1.0)

Prerequisite: ARTH 100 and ARTH 101 or permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

ARTH 350H - Research or Individual Study (0.5)

Prerequisite: ARTH 100 and ARTH 101 or permission of the instructor.
Distribution: None
Term(s): Fall; Spring

ARTH 360 - Senior Thesis Research (1.0)

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ARTH 369 - Seminar. Conservation Studies: The Materials and Techniques of Painting and Sculpture (1.0)

This seminar will provide an introduction to the materials and techniques used by painters and sculptors. Units on painting will focus on ancient painting (from the earliest cave paintings through ancient Egypt and classical antiquity); wall paintings
from various parts of the world, with emphasis on the fresco painting technique; Western easel painting of the medieval, Renaissance, and later periods; traditional Asian paintings on silk and paper supports; and modern painting. Units on sculpture will focus on metal and ceramics, using artifacts from many cultures and periods of time, ranging from ancient China to the Italian Renaissance and later. Modern sculptural materials, including plastics, will also be introduced.

Instructor: Newman
Prerequisite: ARTH 100 or ARTH 101 or permission of the instructor.
Distribution: ARS
Term(s): Fall

ARTH 370 - Senior Thesis (1.0)
Prerequisite: ARTH 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ARTH 373 - Seminar. Antiquities Today (1.0)
This seminar focuses on modern debates inspired by antiquities. Key themes include the political and financial motivations for seizing, looting, and illegally excavating antiquities; museum acquisitions policies and the UNESCO treaty concerning the antiquities trade; the art market and the problem of fakes; and changing practices in the restoration and replication of antiquities. Each session addresses a case study, such as the Parthenon Marbles in the British Museum; the bronze horses from Venice’s Basilica San Marco; the Stone of Scone from Scotland; the Iraq Museum in Baghdad; the ivory snake goddess in Boston’s Museum of Fine Arts; the Aphrodit statue, the Tanagra figurines, and the Septimus Severus portrait in the Davis Museum; and the remnants of Wellesley’s cast collection in the art and classics departments.

Instructor: Cassibry
Prerequisite: ARTH 100 or by permission of the instructor.
Distribution: ARS
Term(s): Not Offered

ARTH 380 - Seminar. American Women Artists in Italy: Art, Tourism, and Gender (1.0)
This seminar will examine the American women artists who lived and worked in Italy in the late nineteenth century. Improved steamships and railways allowed these women to travel abroad with relative ease, and while there they entered traditionally male professions like painting and sculpture and wrote home to their families about changing practices in the restoration and replication of antiquities. Each session addresses a case study, such as the Parthenon Marbles in the British Museum; the bronze horses from Venice’s Basilica San Marco; the Stone of Scone from Scotland; the IRAQ Museum in Baghdad; the ivory snake goddess in Boston’s Museum of Fine Arts; the Aphrodit statue, the Tanagra figurines, and the Septimus Severus portrait in the Davis Museum; and the remnants of Wellesley’s cast collection in the art and classics departments.

Instructor: Cassibry
Prerequisite: ARTH 100 or by permission of the instructor.
Distribution: ARS
Term(s): Not Offered

ARTH 388 - The History of New Media (1.0)
This course will examine the history of "new media" art, paying particular attention to the relationship between this history and larger shifts in technology, philosophy and politics. Beginning with the roots of these explorations in the technological innovations and cultural re-alignments of the 19th century, we will trace the development of film, video, performance, sound and digital art through the course of the 20th century. Our course will culminate with an examination of contemporary studio and curatorial practice. Students will be expected to produce a seminar paper of no more than 15 pages that explores in depth some question of the history, creation, analysis or preservation of new media work. Students may also choose to develop a digital exhibition or a work of digital art in lieu of a formal research paper.

Instructor: Maizels
Prerequisite: ARTH 100 and ARTH 101 required; additional 200-level courses in twentieth-century art desirable.
Distribution: ARS
Term(s): Fall

ARTH 391 - Persuasive Images (1.0)
Visual images have always been enlisted to influence individual and collective decision-making, action, and identity. However, the rise of the mass media in the nineteenth century and the multiplication of visual technologies in the twentieth century have created unprecedented opportunities for the diffusion of persuasive images. This seminar enlists case studies to examine the uses and functions of visual images in advertising and propaganda and considers, in particular, graphic arts, photography, film, and other reproductive media. It also considers the interplay between elite and popular arts. The goal of the course is to refine our critical understanding and reception of the visual world.

Instructor: Berman
Prerequisite: 200-level courses in art or media arts and sciences.
Cross-Listed as: CAMS 341
Distribution: ARS
Term(s): Not Offered

ARTS 105 - Drawing I (1.0)
A foundational course in observational drawing with attention to the articulation of line, shape, form, gesture, perspective, and value. Studio work introduces a range of traditional drawing tools and observational methods while exploring a variety of approaches to image making and visual expression. In-class drawing exercises and weekly homework assignments address a range of subjects including the human figure. Recommended for all students considering majors in the visual arts and required for those majoring in studio art or architecture.

Instructor: Ivy, Mowbray Rivera (Fall), Ivy, Mowbray (Spring), TBA (Summer)
Prerequisite: None. Juniors and seniors must submit an application for an override.
Distribution: ARS
Term(s): Fall; Spring; Summer I

ARTS 106 - Introduction to Chinese Painting (1.0)
This course introduces the basic concepts, techniques, and philosophies of traditional Chinese painting. Class activities will emphasize the theoretical and aesthetic principles associated with the use of brushstroke, composition, ink, and color. Subjects include Chinese calligraphy as well as the three major categories of traditional Chinese painting: flower and bird, mountain and river, and figure painting. Weekly studio assignments introduce a range of techniques, and by the end of the term students compose their own paintings in a traditional Chinese manner. Aimed for first- and second-year students; juniors and seniors should check the Art Department website for override application forms prior to registration.

Instructor: Meng
Prerequisite: None. Juniors and Seniors must submit an application for an override.
Distribution: ARS
Term(s): Not Offered

ARTS 108 - Photo I: Introduction to Photography (1.0)
Photo I is an introduction to the foundations of photography. Technical skills will be learned through camera work, lighting, and traditional darkroom practices. Conceptual, aesthetic, and critical skills essential to understanding photography’s broader role in contemporary art and society will be learned through assignments, readings, discussions, lectures, gallery visits, and group critiques.

Instructor: Kelley, TBA (Summer)
Prerequisite: Open to First-years and Sophomores without restriction. Juniors and Seniors may request permission to enroll using the Art Department override application form.
Cross-Listed as: CAMS 138
Distribution: ARS
Term(s): Fall; Spring; Summer I
Art Department override application form

ARTS 109 - Two-Dimensional Design (1.0)
This foundational studio course addresses the issue of composition in two-dimensional media. It focuses on the fundamental elements of visual design (eg., line, shape, value, space, color) and their compositional impact. Studio projects emphasize visual problem-solving skills as a means of achieving more effective communication, with some attention to the issues of typography. Assignments explore a range of media, including digital processes. Aimed for first- and second-year students; juniors and seniors should check the Art Department website for override application forms prior to registration.
ARTS 113 - Three-Dimensional Design (1.0)
This introductory course explores the basic formal and spatial considerations when working with three-dimensional structure and form. Studio projects incorporate a range of materials and methods of visualization. Outside assignments and class discussions are aimed toward helping students enhance their creativity and spatial awareness while acquiring sensitivity for placement, process, and materials. Required for Architecture majors. Aimed for first- and second-year students, juniors and seniors should check the Art Department website for override application forms.
Instructor: Dorrien (Fall), Mowbray (Spring)
Prerequisite: None. Juniors and seniors must submit an application for an override.
Distribution: ARS
Term(s): Fall, Spring

ARTS 165 - Introduction to Video Production (1.0)
Introduction to the principles of video production with emphasis on developing basic skills of recording with a video camera, scripting, directing, and editing short videos.
Instructor: Mekuria (Fall), TBA (Spring)
Prerequisite: None. Aimed for first- and second-year students; juniors and seniors should check the Art Department website for override application form prior to registration.
Cross-Listed as: CAMS 135
Distribution: ARS
Term(s): Fall, Spring
Meets the Production requirement for CAMS majors.

WRIT 115-ARTS 115 - Word and Image Studio (1.0)
This studio art course centers on the interplay of word and image. While pursuing a range of studio projects in graphic media (drawing, book arts, and print), we will examine the role of text and visible language in the work of various contemporary artists. Our studio activities and discussions will explore fundamental visual concepts while cultivating an increased awareness of visual rhetoric and typographic design. Throughout the semester, considerable attention will be placed on developing more effective written commentary, critical thinking, and oral presentation skills relevant to visual investigation.
Instructor: McGibbon (Art)
Prerequisite: None. Open to first-year students only.
Distribution: ARS, W
Term(s): Spring
This course satisfies the First-Year Writing requirement and counts as a unit toward a major in Studio Art or Art History or Media Arts and Sciences. No letter grades given.

ARTS 207 - Sculpture I (1.0)
An exploration of sculptural concepts through the completion of projects dealing with a variety of materials including clay, wood, plaster, stone, and metal, with an introduction to basic foundry processes. Emphasis on working from direct observation of the model.
Instructor: Dorrien
Prerequisite: ARTS 105 or ARTS 113 or permission of the instructor required.
Distribution: ARS

ARTS 208 - Intermediate Digital Photography (1.0)
Building on the foundation of ARTS 108/CAMS 138, Intermediate Digital Photography continues to develop students’ conceptual photographic acumen, while introducing advanced studio and location lighting, digital retouching, inkjet printing, and basic multimedia production. Contemporary and historic theories of photography as contemporary art and the aesthetic and cultural implications of the ubiquity of digital photography will guide assignments. Emphasis is on developing project-based photography through cultivating research, planning, conceptual, and production skills.
Instructor: Kelley
Prerequisite: ARTS 108/CAMS 138 or permission of the instructor required.
Cross-Listed as: CAMS 238
Distribution: ARS
Term(s): Spring
Studio fee of $35.

ARTS 216 - Spatial Investigations (1.0)
A mixed-media course designed for architecture and studio art majors wishing to strengthen their visual, creative, and spatial responsiveness. Class work explores various forms of drawing in two and three dimensions, including basic architectural rendering, fixed viewpoint perspective, mapping, modeling, some digital work, and temporary site-built installations. Following a series of studio projects and discussions considering issues of space and place, the physicality of space, and our historic relationship to architecture, each student produces a self-directed final project. Strongly recommended for architecture majors before enrolling in architectural design courses at MIT.
Instructor: Mowbray
Prerequisite: ARTS 105
Distribution: ARS
Term(s): Fall
Studio fee of $35.

ARTS 217 - Life Drawing (1.0)
Understanding the human figure by direct observation of and drawing from the model. A highly structured approach with emphasis on finding a balance between gestural response and careful measurement. Rigorous in-class drawings as well as homework assignments. Dry and wet media as well as work on a variety of scales. Recommended for architecture majors as well as those who intend to do further studio work from the figure.
Instructor: Harvey
Prerequisite: ARTS 105
Distribution: ARS
Term(s): Spring

ARTS 219 - Introductory Print Methods: Lithography/Monotype (1.0)
An exploration of the planographic methods of graphic production, i.e. stone and plate lithography, image transfers, monotype, and digital printing. Students develop visual and creative flexibility through hands-on manipulation of image sequences, text, color layering, and multiplicity. Some projects incorporate photo-digital processes as well as book forms. Field trips, discussions with visiting artists, and a group print exchange will complement the individual assignments. Recommended for students interested in media arts and book studies. Note that ARTS 219, ARTS 220, ARTS 221, and ARTS 222 are complementary courses exploring different graphic techniques and may be elected in any order.
Instructor: McGibbon
Prerequisite: ARTS 105, ARTS 106, ARTS 108, or ARTS 109, or permission of the instructor required.
Distribution: ARS
Term(s): Spring
Studio fee of $35.

ARTS 220 - Introductory Print Methods: Intaglio/Relief (1.0)
An introduction to intaglio and relief-print methods, including copperplate etching, collograph, and woodcut. Students develop visual and creative flexibility through hands-on work with image sequences, text, and multiples. Several projects explore color and typography as well as digital media. Students participate in a collaborative print exchange in addition to completing individual projects. ARTS 219, ARTS 220, and ARTS 221 are complementary courses addressing similar graphic concepts but different techniques and may be elected in any order.
Instructor: McGibbon
Prerequisite: ARTS 105 or ARTS 109 or permission of the instructor required.
Distribution: ARS
Term(s): Fall
Studio fee of $35.

ARTS 221 - Digital Imaging (1.0)
Introduction to artistic production through electronic imaging, manipulation, and output. Emphasis on expression, continuity, and sequential structuring of visuals through the integration of image, text, and motion. Image output for print, screen, and adaptive surfaces are explored in conjunction with production techniques of image capture, lighting, and processing. Lectures and screenings of historic and contemporary uses of technology for artistic and social application of electronic imaging.
Instructor: Olsen (Spring) TBA (Summer)
Prerequisite: ARTS 108/CAMS 138 or ARTS 109 or permission of the instructor.
Cross-Listed as: CAMS 239
Distribution: ARS
Term(s): Spring, Summer
Studio fee of $35.

ARTS 222 - Introductory Print Methods: Typography/Book Arts (1.0)
This studio course explores the relationship between text and image through letterpress relief printing techniques and handmade book structures. Studio projects will include the production of limited edition artist’s books that focus on the interplay of two and three dimensions in the book form. Emphasis will be placed on creative problem solving within the limitations of technology, and on the importance of the act of revision. Class sessions in
the Papermaking Studio and Special Collections will augment intensive studio work in Clapp Library’s Book Arts Lab.

Instructor: Ruffin (Book Arts Lab, Clapp Library)
Prerequisite: ARTS 105, ARTS 108, or ARTS 109.
Distribution: ARS
Term(s): Not Offered

**ARTS 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**ARTS 250H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**ARTS 255 - Dynamic Interface Design (1.0)**
Critical examination of the expanding field of information and interface design for interactive media. Emphasis will be on effective visual communication, information design, and creative content within online media. Hands-on production will focus on design methods, multimedia Web vector-based media, and dynamic audio. Screenings and discussions on contemporary practices, theoretical, artistic, and cultural issues.

Instructor: Olsen
Prerequisite: ARTS 108/CAMS 138, ARTS 109 and CS 110 or CS 111.
Cross-Listed as: CAMS 255
Distribution: ARS
Term(s): Not Offered

**ARTS 260 - Moving Image Studio (1.0)**
Creative exploration of the moving image as it relates to digital methods of animation, video, and motion graphics. Hands-on production of audio, image, text, and time-based media synthesis, with a conceptual emphasis on nonlinear narrative, communication design, and visual expression. Screenings and lectures on historical and contemporary practices, coupled with readings and discussions of the theoretical, artistic, and cultural issues in the moving image.

Instructor: Olsen
Prerequisite: ARTS 108/CAMS 138 or ARTS 165/CAMS 135 or ARTS 221/CAMS 239.
Cross-Listed as: CAMS 230
Distribution: ARS
Term(s): Fall
Normally offered in alternate years.

**ARTS 265 - Intermediate Video Production/The Documentary Form (1.0)**
An exploration of the techniques and styles of producing documentary videos. We will survey current issues surrounding objectivity and representation as it concerns the documentary form. Strong emphasis on storytelling. Special focus on lighting, sound recording, and editing. We will screen and analyze various styles of documentary films.
Final projects will be short documentaries.

Instructor: Mekuria
Prerequisite: ARTS 165/CAMS 135 or permission of the instructor required.
Cross-Listed as: CAMS 235
Distribution: ARS
Term(s): Not Offered

**ARTS 307 - Advanced Sculpture (1.0)**
Continuation on a more advanced level of sculptural issues raised in ARTS 207. Projects include working from the figure, metal welding or wood construction, and metal casting in the foundry as well as stone carving.

Instructor: Dorrin
Prerequisite: ARTS 207, ARTS 216, or permission of the instructor required.
Distribution: ARS
Term(s): Spring
Studio fee of $50.

**ARTS 308 - Photography III (1.0)**
Advanced explorations of aesthetic and content issues through the use of both traditional light-sensitive and digital methodologies. Advanced photographic techniques and equipment will be presented to solve visual problems arising from each student’s work. Continued emphasis is placed on research into the content and context of the photographic image in contemporary practice through gallery visits, guest lecturers, and library work.

Instructor: Kelley
Prerequisite: ARTS 208/CAMS 238, and either ARTS 109, ARTS 221/CAMS 239, or permission of the instructor required.
Cross-Listed as: CAMS 338
Distribution: ARS
Term(s): Not Offered
Studio fee of $35.

**ARTS 313 - Virtual Form (1.0)**
Introduction to the design and production of three-dimensional objects and spaces using industry-standard modeling software. Overview of basic modeling, surface design, and camera techniques. Emphasis on creative application of the medium in relation to architectural, experimental, and time-based forms. Screenings and lectures on traditional and contemporary practices, coupled with readings and discussions of the theoretical, artistic, and cultural issues in the virtual world.

Instructor: Olsen
Prerequisite: ARTS 113 or MIT 4.11. Strong computer familiarity needed.
Cross-Listed as: CAMS 313
Distribution: ARS
Term(s): Not Offered
Normally offered in alternate years.

**ARTS 314 - Advanced Drawing (1.0)**
An intensive studio course for juniors and seniors, considering the visual, conceptual and spatial issues of contemporary drawing. Building upon methods introduced at the 100 and 200 levels, this course explores the act of drawing as a speculative and critical thinking process as well as a visual language. Class work addresses various observational methods, color, and the physicality of drawing. In-depth studio critiques, field trips, and interaction with visiting artists will augment the projects. Following a period of intense studio exploration and dialogue, each student develops and hones an independent body of work.

Instructor: McGibbon
Prerequisite: ARTS 105 and at least one 200-level studio course in two-dimensional media.
Distribution: ARS
Term(s): Fall
ARTS 314 may be repeated, ordinarily for a maximum of two semesters.

**ARTS 315 - Advanced Painting (1.0)**
A project-based painting course that aims to challenge pre-established assumptions about the discipline. This studio provides an opportunity for advanced students to share their painting practice and benefit from an intensive, well-informed creative dialogue. The group interacts in a seminar fashion, in which topics are formulated and students are asked to develop independent projects around them. Each student will continue to explore the issues of color, paint handling, and subject matter, while developing an independent vocabulary and well-informed body of work.

Instructor: Rivera
Prerequisite: ARTS 218 or permission of the instructor required.
Distribution: ARS
Term(s): Spring
ARTS 315 may be repeated, ordinarily for a maximum of two semesters.

**ARTS 317-01-F - Seminar: Topics in the Visual Arts (1.0)**
Topic for 2014-15: Experimental Ethnography: At the Boundaries of Art and Anthropology
This course explores the territory of ethnography as it is practiced at the intersection of art and anthropology. Ethnography is a practice of anthropological knowledge production that involves engaging with cultural identity and difference. It raises issues about the relationship between the Self and Other, representation and reality. Although traditionally, ethnographies are written manuscripts, anthropologists are experimenting with ethnographic representation in other media and formats. Artists engaged in conceptual, social and site-specific modes are engaging in parallel ethnographic practices. Through this course, students will be introduced to the history and contemporary efflorescence of these experiments and cross-pollinations.

Instructor: Kelley
Prerequisite: A 200-level course in ARTS, ANTH, or CAMS
Cross-Listed as: ANTH 362, CAMS 362
Distribution: ARS; SBA
Term(s): Fall

**ARTS 321 - Advanced New Media (1.0)**
Various topics in New Media are explored through research, creative activity, and theoretical discussion. Topics address historical as well as contemporary issues that bridge art and technology. This is an advanced level New Media course giving students the opportunity to focus in on their craft and concepts as well as receive critiques from other students with similar goals. Lectures on the historic and contemporary practices of intermedia artists, designers, thinkers and scientists, coupled with readings and discussions. Collaboration will be encouraged between, Studio Art, Music, CAMS, Media Arts, Theater and Computer Science.

Instructor: Olsen
Prerequisite: Two 200-level courses in ARTS, ANTH, or MMS.
Cross-Listed as: CAMS 321
Distribution: ARS
Term(s): Spring
ARTS 321/321 may be repeated, ordinarily for a maximum of two semesters.

**ARTS 322 - Advanced Print Concepts (1.0)**
A graphics-based, conceptually driven seminar designed for juniors and seniors with print, design, or media arts experience at the 200 level. Students may employ a combination of digital and analog methods as they develop new independent projects in dialogue with one another. Studio critiques, readings, field trips, and visiting artist events will explore the possibilities of collaboration, sequential
imagery, color interaction, and multiples, from the artist’s book to the site-based project.

Instructor: McGibbon
Prerequisite: ARTS 219, ARTS 220, ARTS 221/CAMS 239, ARTS 222, or by permission of the instructors.
Distribution: ARS
Term(s): Not Offered

ARTS 324 - The Space In-Between: Filling the Gap Between 2D and 3D (1.0)
This team-taught advanced studio course will address the space in-between two Dimensional and three Dimensional processes of creation in the fields of Architecture and Visual Arts. The art world does not recognize boundaries in-between disciplines anymore and the boundaries between Design, Architecture and the Visual Arts are blurry or often completely erased. As we conduct research, on our fields it becomes clearer how the disciplinary discourses are shared and interchangeable, making space for interdisciplinary practices. This course will provide students with the knowledge and understanding to confidently traverse between the 2 Dimensional realm to the 3 Dimensional territory.

The course will combine theoretical discourse and studio work that will challenge the divisions between the disciplines of Architecture and the Visual Arts as well as bridge the two-dimensional and three-dimensional through critical understanding of these two representational spaces, and experiential learning of their asymmetries.

Instructor: Mowbray and Rivera
Prerequisite: ARTS 105
Distribution: ARS
Term(s): Spring

ARTS 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

ARTS 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

ARTS 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ARTS 365 - Advanced Video Production (1.0)
An intensive course in story development, writing screenplay, directing actors and technical crew, and producing short, dramatic or mixed-genre videos. Rigorous work on advanced camera operation, lighting, sound recording, and editing techniques. We will screen and analyze short films and sample screenplays. Course requires strong organizational and directorial aptitude. The final projects will be short narrative, experimental, or mixed-genre videos.

Instructor: Mekuria
Prerequisite: ARTS 165/CAMS 135, ARTS 265/CAMS 235, or permission of the instructor.
Cross-Listed as: CAMS 335
Distribution: ARS
Term(s): Fall

ARTS 370 - Senior Thesis (1.0)
DEPARTMENT OF ASTRONOMY

Professor: Bauer (Chair, Sem. I), McLeod (Chair, Sem. II), French
Assistant Professor: Watters
Instructor in Astronomy Laboratory: Slivan

Astronomy is the study of the universe—from planets and stars to the Milky Way and distant galaxies, from the instant of the Big Bang to the current era of rapid expansion and beyond to the distant future. Modern astronomers rely on careful observations of the cosmos and on their understanding of physical laws to make sense of our often baffling, but always fascinating universe. The astronomy curriculum emphasizes hands-on observations at the Whitin Observatory, using a fleet of small telescopes in introductory courses and the 24-inch research telescope for advanced courses and student research. The underlying physical principles of astronomy are elucidated at all levels, from introductory courses for nonscience majors to upper level classes in advanced astrophysics.

Astronomy Department Information

The astronomy department offers introductory courses accessible to the nonscience major. ASTR 100 and ASTR 101 are broad survey courses that may be taken in any order, and either one may be taken with the nighttime lab ASTR 102. ASTR 206 fulfills the Quantitative Reasoning Overlay course requirement.

Astronomy Major

Goals for the Astronomy Major

For students intending to pursue a Ph.D. in Astronomy, we offer, jointly with the Department of Physics, a major in Astrophysics. For students interested in other pursuits, such as education, journalism, computing, and public outreach in museums, we offer a major in Astronomy. Majors in Astronomy will have a broad understanding of the varied phenomena in the heavens, from the solar system and stars to the realm of galaxies and the large-scale structure and evolution of the universe. They will understand the motions of the night sky, be familiar with modern observational techniques and computational tools, and have carried out an independent project using our 24-inch telescope. They will have the problem solving and critical-thinking skills necessary to understand astronomical research, and the ability to communicate these results with clarity and precision, both orally and in writing.

Requirements for the Astronomy Major

The Astronomy major consists of 10 courses. Required courses include any 100-level ASTR course with lab; ASTR 206; two 300-level courses in ASTR; PHYS 107; PHYS 106 or PHYS 108; any 200-level course in MATH; any two courses in ASTR at the 200-level or above, and any other course in ASTR or a related field. Students should consult with faculty about choosing electives and research opportunities appropriate for their fields of study. For example, students interested in earth science should elect ASTR 203/GBIO 212 (Planetary Geology) and ASTR 223/GBIO 223 (Climates) and add courses in geosciences and chemistry. Students working toward teacher certification would add courses in other sciences and in education, and might coordinate their fieldwork with ASTR 350, while those planning to enter the technical workforce might elect additional courses in computer science. Students planning to pursue graduate study in astronomy should instead elect an interdepartmental major in Astrophysics.

Accessibility of Astronomy Facilities

Students with disabilities are welcome in all Astronomy facilities. The Whitin Observatory has telescopes accessible to students with mobility-related disabilities, including six outdoor telescopes for 100-level courses and the computer-controlled 24-inch telescope used for upper-level courses and independent research. Other accommodation requests can be made by contacting Disability Services, or by meeting with the instructor.

Honor in Astronomy

To earn honors in the major, students must have a grade point average of at least 3.5. In all work in the major field above the 100-level; the department may petition on her/his behalf for GPA in the major is between 3.0 and 3.5. The student must complete a significant research project culminating in a paper and oral examination. The project must be conducted after the junior year and approved in advance by the department, and might be satisfied by a thesis, a summer internship, or a 350. See Academic Distinctions.

Astronomy Minor

Requirements for the Astronomy Minor

A minor in Astronomy consists of five units in ASTR including ASTR 206 and any 300-level course.

ASTR - Astronomy Courses

ASTR 100 - Life in the Universe (1.0)

This course investigates the origin of life on the Earth and the prospects for finding life elsewhere in the cosmos, and begins with an overview of the Earth’s place in the solar system and the universe. The course examines the early history of the Earth and the development of life, changes in the sun that affect the Earth, characteristics of the other objects in our solar system and their potential for supporting life, the detection of planets around stars other than the sun, and the search for extraterrestrial life. Some nighttime observing will be required; optionally, students may co-enroll in ASTR 102 for a lab.

Instructor: Staff
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken ASTR 100L [2011–12].
Distribution: NPS
Term(s): Fall; Spring
Students wishing to satisfy the laboratory requirement must co-enroll and fulfill the ASTR 100 and ASTR 101 courses above.

ASTR 102 - Introductory Astronomy Laboratory (0)

This laboratory is intended to accompany our introductory astronomy courses. Lab sections meet weekly on the Whitin Observatory. Students will learn constellations and sky motions through a combination of naked-eye observing and hands-on exercises. They will learn to operate our telescopes and will use them to carry out observations using both historical and modern techniques.

Instructor: Slivan
Corequisite: ASTR 100 or ASTR 101
Distribution: None
Term(s): Fall; Spring
Students enrolled in ASTR 102 must co-enroll and complete either ASTR 100 or ASTR 101. The lab (ASTR 102) will carry 0 units of credit, and will be offered mandatory OR/NCR. Students who pass the lab will satisfy the Laboratory Requirement; meanwhile, numerical grades from the lab will be folded into the course grade for the student’s concurrent introductory astronomy course.

ASTR 101 - Introduction to Stars, Galaxies, and Cosmology (1.0)

This course examines the life stories of stars, from birth in clouds of gas and dust, through pluck middle age, to violent explosive demise, leaving white dwarfs, neutron stars, or black holes. It also explores the makeup and structure of galaxies, which contain billions of stars and are racing away from each other as part of the overall expansion of the universe. Finally, it presents modern cosmological models for the origin and ultimate fate of the universe. The course emphasizes the interaction of observations and the mathematical models developed from these data. Some nighttime observing will be required; optionally, students may co-enroll in ASTR 102 for a lab.

Instructor: Bauer, McLeod
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken ASTR 101L [2011–12].
Distribution: NPS; MM
Term(s): Fall; Spring
Students wishing to satisfy the laboratory requirement must enroll in ASTR 102 in the same semester in which they are taking this course.

ASTR 103 - Geophysical Astronomy (3.0)

This course examines the geometry and mechanics of the solar system, from the motions of the planets to the motions of small bodies. It explores the nature of the solar system’s past and future evolution, and how it is influenced by the Sun and the other planets.

Instructor: Staff
Prerequisite: ASTR 100
Cross-listed as: PHYS 100
Distribution: NPS; MM
Term(s): Fall; Spring
No letter grade.

ASTR 200 - Astronomy Seminar (1.0)

This seminar explores the scientific and practical aspects of the observational and theoretical study of the stars, planets, and other objects in the universe. Students will be introduced to the methods and tools used by astronomers to study the universe, and will be given the opportunity to participate in ongoing research projects. The seminar will also cover the history and philosophy of astronomy, and will explore the role of astronomy in society.

Instructor: Staff
Prerequisite: ASTR 100
Cross-listed as: PHYS 200
Distribution: NPS; MM
Term(s): Fall; Spring
Students must have a grade point average of at least 3.0 and have completed ASTR 100 or equivalent coursework in order to enroll in this course.

ASTR 203 - Planetary System (1.0)

Spacecraft observations have revealed a breathtaking diversity of geologic features in the solar system, from ancient river valleys on Mars and violent volcanic eruptions on Io to ice fountains on

Instructor: Staff
Prerequisite: ASTR 100
Cross-listed as: PHYS 203
Distribution: NPS; MM
Term(s): Fall; Spring
Students must have a grade point average of at least 3.0 and have completed ASTR 100 or equivalent coursework in order to enroll in this course.
Enceladus and the complex surfaces of comets and asteroids. From a comparative point of view, this course examines the formation and evolution of the planets and small bodies in the solar system. Topics will include: volcanism, tectonic activity, impacts, and tides.

Instructor: TBA
Prerequisite: Any 100-level ASTR or GEOS course.
Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Cross-Listed as: GEOS 213
Distribution: NPS
Term(s): Fall
Spring
This course is also offered at the 300-level as ASTR 323/GEOS 313. Normally offered in alternate years.

ASTR 206 - Astronomical Techniques with Laboratory (1.25)
This course provides an introduction to modern methods of astronomical observation. Students will learn to use the Whitin Observatory’s 24-inch research telescope. Topics include: planning observations, modern instrumentation, and the acquisition and quantitative analysis of astronomical images. This course requires substantial nighttime telescope use and culminates with an independent observing project.
Instructor: McLeod
Prerequisite: Any 100-level course in astronomy with laboratory.
Distribution: NPS; MM; QRF
Term(s): Fall

ASTR 211 - Astrophysics (1.0)
Astrophysics is the application of physics to the study of the universe. We will use elements of mechanics, thermodynamics, electromagnetism, quantum mechanics, special relativity, and nuclear physics to investigate selected topics such as exoplanets, the life stories of stars and galaxies, dark matter, and the origin of the universe. Our goals will be to develop insight into the physical underpinnings of the natural world, and to develop a “universal language” of physics to investigate selected topics such as exoplanets, the life stories of stars and galaxies, dark matter, and the origin of the universe.
Instructor: TBA
Prerequisite: PHYS 107, MATH 116.
Distribution: NPS; MM
Term(s): Not Offered

ASTR 223 - Planetary Climates (1.0)
We’ve all heard about recent and ongoing climate change on Earth. What about the climate 100 million years ago, or weather patterns on Venus and climate change on Mars? In this course, we’ll explore the evolution of the climate system on four worlds in our solar system: the Earth, Mars, Venus, and Saturn’s moon Titan. We’ll examine how geologists learn about the history of Earth’s climate and how it has changed over time, as well as the sources of modern climate change and its impact on life. The course will also explore the techniques that planetary scientists use to learn about the atmospheres and surface environments on other worlds.
Instructor: Watters
Prerequisite: Any 100-level course in ASTR or GEOS 101, GEOS 102, or GEOS 206, or ES 101; or permission of the instructor.
Cross-Listed as: GEOS 223
Distribution: NPS; MM
Term(s): Not Offered

ASTR 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor
Distribution: None
Term(s): Fall; Spring

ASTR 250GH - Astronomy Reading Group (0.5)
The Astronomy Department runs a weekly reading group on changing topics. Readings will be chosen based on the interests of the participating students and faculty members. Students who enroll commit to participating in each week's discussion and, in collaboration with other group members, selecting some of the weekly topics and readings.
Instructor: Astronomy Staff
Prerequisite: Permission of the instructor; first-years welcome.
Distribution: None
Term(s): Fall

ASTR 301 - Seminar. Topics in Astronomy (1.0)
This course meets with ASTR 203/GEOS 213 (see description) and on alternate Wednesdays for additional instruction and seminar-style discussions exploring special topics in planetary geology. Students will read and discuss journal articles and advanced texts, and produce a final project that involves an in-depth treatment of a topic of their choosing. Possible topics include: space weathering on the Moon, giant impacts and basin formation, alteration of igneous rocks on Mars, tectonics on Venus, models of planetary interiors, spacecraft instrumentation and remote sensing techniques, and landscape evolution on Titan.
Instructor: TBA
Prerequisite: Must satisfy prerequisites for ASTR 203/GEOS 213 and have taken at least one of the following: PHYS 107, GEOS 203, GEOS 206, GEOS 218. Not open to students who have taken ASTR 203/GEOS 213.
Cross-Listed as: GEOS 313
Distribution: NPS
Term(s): Spring

ASTR 303 - Advanced Planetary Geology (1.0)
This course meets with ASTR 203/GEOS 213 (see description) and on alternate Wednesdays for additional instruction and seminar-style discussions exploring special topics in planetary geology. Students will read and discuss journal articles and advanced texts, and produce a final project that involves an in-depth treatment of a topic of their choosing. Possible topics include: space weathering on the Moon, giant impacts and basin formation, alteration of igneous rocks on Mars, tectonics on Venus, models of planetary interiors, spacecraft instrumentation and remote sensing techniques, and landscape evolution on Titan.
Instructor: TBA
Prerequisite: Must satisfy prerequisites for ASTR 203/GEOS 213 and have taken at least one of the following: PHYS 107, GEOS 203, GEOS 206, GEOS 218. Not open to students who have taken ASTR 203/GEOS 213.
Cross-Listed as: GEOS 313
Distribution: NPS
Term(s): Spring

ASTR 311 - Advanced Astrophysics (1.0)
This course meets with ASTR 211 (see description) and on alternate Wednesdays for additional instruction and seminar-style discussion. Students will read and discuss journal articles and upper-level texts, and produce a final project that involves an in-depth treatment of a topic of their choosing. Possible topics include: space weathering on the Moon, giant impacts and basin formation, alteration of igneous rocks on Mars, tectonics on Venus, models of planetary interiors, spacecraft instrumentation and remote sensing techniques, and landscape evolution on Titan.
Instructor: TBA
Prerequisite: PHYS 207
Cross-Listed as: PHYS 311
Distribution: NPS; MM
Term(s): Fall

ASTR 323 - Advanced Planetary Climates (1.0)
This course meets with ASTR 223/GEOS 223 (see description) and on alternate Wednesdays for additional instruction and seminar-style discussions exploring special topics in planetary climates. Students will read and discuss journal articles and advanced texts, and produce a final project that involves an in-depth treatment of a topic of their choosing. Possible topics include: atmospheric escape mechanisms, physics of planetary exospheres, the anti-greenhouse and methane cycle on Titan, planetary global climate models, structure of the Venusian atmosphere, modern ice ages on Mars, evolution of the early Martian climate, spacecraft instrumentation, and remote sensing techniques.
Instructor: Watters
Prerequisite: Must satisfy prerequisites for ASTR 223/GEOS 223 and have taken PHYS 107 or by permission of the instructor.
Cross-Listed as: GEOS 323
Distribution: NPS; MM
Term(s): Not Offered

ASTR 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

ASTR 360 - Senior Thesis Research (1.0)
Prerequisite: ASTR 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

ASTR 370 - Senior Thesis (1.0)
Prerequisite: ASTR 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
AN INTERDEPARTMENTAL MAJOR

Director: Bauer (Astronomy Sem. I), McLeod (Astronomy Sem. II)
Advisory Committee: Bauer (Astronomy), French (Astronomy), McLeod (Astronomy), Stark (Physics)

The Departments of Astronomy and Physics offer an interdepartmental major in astrophysics, which combines the physics major with a foundation of course work in astronomy. This major should be considered by students interested in graduate study in astronomy or astrophysics, and by those who would like a coordinated astronomy extension to the physics major.

Astrophysics Major

Goals for the Astrophysics Major

Upon completion of the astrophysics major, a student will be prepared for advanced study leading to a professional career in astronomy, astrophysics, or related physical sciences. Majors in astrophysics will have a broad understanding of the physical processes at work in a range of astronomical settings, from the solar system and the structure and evolution of stars to the realm of galaxies and the large-scale structure and evolution of the universe. They will understand the motions of the night sky, be familiar with modern observational techniques and computational tools, and have carried out a research project using our 24-inch telescope. They will have the problem-solving and critical-thinking skills necessary to interpret astronomical research, and the ability to communicate these results with clarity and precision, both orally and in writing.

Requirements for the Astrophysics Major

In addition to the 10 courses required for the physics major, the student takes four astronomy courses. An astrophysics major normally consists of the following: PHYS 107, PHYS 108, PHYS 202, PHYS 207, PHYS 302, PHYS 305, PHYS 310, PHYS 314; MATH 215; PHYS 216; any 100-level ASTR course with lab; ASTR 206; ASTR 311; and any other 300-level course in ASTR or ASPH. All students who wish to consider a major in astrophysics are urged to complete the introductory physics sequence (PHYS 107 and PHYS 108) as soon as possible. In planning the major, students should note that some of the courses have prerequisites in mathematics.

Honors in Astrophysics

To earn honors in Astrophysics, students must have a minimum grade point average of at least 3.5 in all work in the major field above the 100 level; the advisory committee may petition on her behalf if her GPA in the major is between 3.0 and 3.5. The student must complete a significant research project culminating in a paper and an oral examination. The project must be conducted after the junior year and approved in advance by the Astrophysics Advisory Committee, and might be satisfied by a thesis, a summer internship, or a 350. See Academic Distinctions.

Accessibility of Astrophysics Facilities

Students with disabilities are welcome in all astronomy department courses, including those with laboratories. The Whitin Observatory has telescopes accessible to students with mobility-related disabilities, including six outdoor telescopes for 100-level courses and the computer-controlled 24-inch telescope used for upper-level courses and independent research. Other accommodation requests can be made by contacting Disability Services, or by meeting with the instructor.

**BIOLOGICAL CHEMISTRY**

**AN INTERDEPARTMENTAL MAJOR**

Director: Elmore (Chemistry)

Biological Chemistry Advisory Committee: Beers (Biological Sciences), Darling (Biological Sciences), Elmore (Chemistry), Goss (Biological Sciences), Klepec-Ceraj (Biological Sciences), Náthez (Chemistry), Oakes (Chemistry), Peterman (Biological Sciences), Radakrishnan (Chemistry), Tetel (Neuroscience), Varðar-Ulu (Chemistry), Wolfson (Chemistry)

Biological Chemistry is an interdisciplinary major offered by the Departments of Biological Sciences and Chemistry, allowing students to explore the chemistry of biological systems. Biological Chemistry includes fields we call biochemistry, cell and molecular biology, as well as other molecular aspects of the life sciences. It deals with the structure, function, and regulation of cellular components and biologically active molecules, such as proteins, carbohydrates, lipids, and nucleic acids. Expertise in biological chemistry is central to breakthroughs in DNA technology, drug discovery and design, and molecular approaches to disease.

**Biological Chemistry Major**

**Goals for the Biological Chemistry Major**

- Fundamental knowledge of the principles of chemistry and biology in relation to biological chemistry, and the ability to apply this knowledge to problems specifically at the interface of these disciplines
- Familiarity with the structure and function of biomolecules involved in biochemical pathways and regulation of cellular processes
- Strong problem-solving abilities, and ability to adapt knowledge acquired in new situations to evaluate data, to approach new problems competently and to be independent learners
- Strong quantitative skills and critical thinking abilities; skills in hypothesis generation and testing, data interpretation and analysis, designing experiments, and the creation and evaluation of models to explain data
- Strong experimental skills in the laboratory, experience with the operation of modern instrumentation and computers, and the understanding of general lab protocols and safety issues
- Ability to collaborate with other researchers, and awareness of ethical issues in biochemistry and molecular biology
- Strong communication skills involving oral and written presentations, and the ability to read and critically evaluate a scientific paper for content or techniques

**Requirements for the Biological Chemistry Major**

**BIOC**: BIOC 219; BIOC 220; BIOC 223; BIOC 320; BIOC 323; BIOC 331

**CHEM**: a) both CHEM 105 and CHEM 205, or CHEM 120; b) CHEM 211

**BISC**: a) BISC 110 or BISC 112; b) two 300-level courses from among the following: BISC 311; BISC 314; BISC 316; BISC 319; BISC 320; BISC 328; BISC 331; BISC 334; BISC 335; BISC 336; BISC 345 or other course if relevant to the major and approved by the director. At least one of the two 300-level courses must be a laboratory course, excluding 350, 355, 360, 365, 370.

**PHYS**: PHYS 104 or PHYS 107

**MATH**: MATH 116, MATH 120, or equivalent.

Students should be sure to satisfy the prerequisites for 300-level courses. Students planning graduate work in biochemistry should consider taking additional courses in chemistry, such as analytical, inorganic, and the second semester of organic. Students planning graduate work in molecular or cell biology should consider taking additional advanced courses in these areas. Independent research (250, 350, 355/365, 360/370) is highly recommended, especially for those considering graduate studies.

The following BIOC courses are cross-listed in either BISC or CHEM: BIOC 219; BIOC 220; BIOC 223; BIOC 320; BIOC 323; BIOC 331.

BIOC majors should register with the BIOC designation.

A recommended sequence of required courses in the first two years would be as follows:

**Year 1**: CHEM 105 (or CHEM 120) and Math or Physics; CHEM 205 or CHEM 211 and BISC 110/BISC 112

**Year 2**: CHEM 205 or CHEM 211 and BIOC 219; BIOC 223 and BIOC 220, and Math or Physics

In Years 3 and 4, students may elect to complete any combination of BIOC 331; BIOC 320; BIOC 323; 300-level BISC courses (independent study)

Please discuss your program with the director or another member of the advisory committee as early as possible, especially if you are planning on international study.

BIOC 250, BIOC 250H, BIOC 350, BIOC 355/BIOC 365 are open to any student. The research should focus on some aspect of the molecular biosciences and may be advised by any member of the Biological Chemistry Advisory Committee, or by another member of the Biological Sciences or Chemistry Departments upon approval of the advisory committee. BIOC 360 and BIOC 370 are open only to Biological Chemistry majors (see “Honors,” below).

**Honors in Biological Chemistry**

Honors work may be advised by any member of the Biological Chemistry Advisory Committee or by another member of the Biological Sciences or Chemistry Departments upon approval by the Advisory Committee. Students should enroll in BIOC 360/BIOC 370 after approval by the advisory committee. The honors program will follow the guidelines of the appropriate department, but each honors candidate must be approved by the Biological Chemistry Advisory Committee.

**BIOC - Biological Chemistry Courses**

**BIOC 219 - Genetics with Laboratory (1.25)**

The goal of the course is to develop an understanding of the fundamental principles of genetics at the molecular, cellular, and organismal levels. The mechanisms that regulate the control of gene expression leading to alteration in phenotype during cellular differential will be studied. A link will be established between the generation of genetic variants through mutation and recombination, their patterns of inheritance, interactions between genes to produce complex phenotypes, and the maintenance of such genetic variation in natural populations. Topics will include organization of the eukaryotic genome, gene structure and function, multilevel gene control and dysregulation in disease, genetics of pattern formation, inheritance of gene differences, gene and allele interactions, and aspects of population and evolutionary genetics. Laboratory investigations will expose students to the fundamentals of genetics including classical and molecular techniques for genetic analysis.

Instructor: Sequeira (Biological Sciences), Beers (Biological Sciences), Crum (Biological Sciences), Matthews (Biological Sciences)

Prerequisite: BISC 110/BISC 112 and one unit of college biology. Not open to first-year students.

Cross-Listed as: BISC 219

Distribution: NPS

Term(s): Fall

**BIOC 220 - Cellular Physiology with Laboratory (1.25)**

Examines structure-function relationships in eukaryotic cells. We will explore the operation and regulation of molecular machines that carry out processes central to life. Considerable emphasis is placed on experimental approaches for investigating the following topics: protein structure and enzyme kinetics, biological membranes and transport, cytoskeletal assembly and function, protein biosynthesis and trafficking, cell communication and signaling, the cell cycle, and intercellular interactions. Laboratory investigations will provide students with experience in classical and modern approaches to examine and quantify cellular processes.

Instructor: Darling (Biological Sciences), Goss (Biological Sciences), Beers (Biological Sciences), Matthews (Biological Sciences)

Prerequisite: BISC 110/BISC 112 and two units of college biology. One semester of organic chemistry is recommended. Not open to first-year students.

Cross-Listed as: BISC 220

Distribution: NPS

Term(s): Spring

**BIOC 223 - Fundamentals of Biochemistry: Understanding the Physical Principles of Biochemistry and the Molecules of Life with Laboratory (1.25)**

A gateway course that introduces the fundamental multidisciplinary concepts governing life at the molecular level. Following a review of aqueous equilibria, thermodynamic, kinetic, and spectroscopic principles, the emphasis will be on the molecular structure, assembly, and interactions of biological macromolecules and modern techniques for studying them. Proteins, nucleic acids, carbohydrates, and lipids will be covered to provide a molecular understanding of nature and to build an appreciation for its structural complexity. This course is designed to prepare students for the qualitative and quantitative approaches used in the theoretical and experimental studies of biological problems covered in the upper level courses BIOC 323/CHM 323, BIOC 331/CHM 331, BIOC 326/CHM 320.

Instructor: Elmore (Chemistry)

Prerequisite: CHEM 205 or CHEM 120, CHEM 211, and BISC 110/BISC 112. Not open to students who have taken CHEM 221.

Cross-Listed as: CHEM 223

Distribution: NPS

Term(s): Spring
Instructor: Radhakrishnan (Chemistry)

Mechanics and dynamics. Prediction and molecular design are explained. Computational applications such as protein structure and mechanical and statistical mechanical models, and techniques such as spectroscopy and calorimetry are relevant systems. Commonly used experimental qualitative and quantitative insight into biologically are mathematically represented and provide both approximations for the biomolecular world. Models understand, evaluate, and use models as Emphasis is placed on empowering students to the study of biological molecules and processes.

Physical chemistry and how they relate specifically to the study of biological molecules and processes. Consideration of the function and regulation of biomolecules and macromolecular assemblies, with particular emphasis on binding proteins, enzymes, and metabolic pathways. Contemporary experimental and computational techniques used to study these systems will be discussed, with a focus on applications in the primary literature. Students will be expected to express increased intellectual independence on assignments, including the development of independent research proposals.

Instructor: Oakes (Chemistry)

Prerequisite: BIOC 223
Cross-Listed as: CHEM 320
Distribution: NPS
Term(s): Fall

BIOC 320 - Integrated Biophysical Chemistry Advanced Laboratory (1.0)
An intensive laboratory course offering a multiweek independent research project and training in experimental applications of physical chemistry and biochemistry. Topics will include spectroscopy, chemical thermodynamics of biomolecules, and enzyme kinetics. This course will emphasize independent hypothesis development and experimental design skills as well as professional conference-style presentation of results. Students will read primary literature, construct a research proposal, develop their own laboratory protocols manual, conduct experiments using a variety of instrumentation, and present their research in a poster format at the end of the semester. One class period per week plus one lab and mandatory weekly meetings with instructor.

Instructor: Oakes (Chemistry)
Prerequisite: BIOC 223
Cross-Listed as: CHEM 320
Distribution: NPS
Term(s): Fall

BIOC 323 - Advanced Biochemistry: Function of Biological Molecules (1.0)
Consideration of the function and regulation of biomolecules and macromolecular assemblies, with particular emphasis on binding proteins, enzymes, and metabolic pathways. Contemporary experimental and computational techniques used to study these systems will be discussed, with a focus on applications in the primary literature. Students will be expected to express increased intellectual independence on assignments, including the development of independent research proposals.

Instructor: Elmore (Chemistry)
Prerequisite: BIOC 223. Not open to students who have taken CHEM 320.
Cross-Listed as: CHEM 323
Distribution: NPS
Term(s): Fall

BIOC 331 - Physical Chemistry of Biological Systems: The Fundamental Models of Biological Molecules and Processes (1.0)
Provides a survey of fundamental principles in physical chemistry and how they relate specifically to the study of biological molecules and processes. Emphasis is placed on empowering students to understand, evaluate, and use models as approximations for the biomolecular world. Models are mathematically represented and provide both qualitative and quantitative insight into biologically relevant systems. Commonly used experimental techniques such as spectroscopy and calorimetry are explained from first principles with quantum mechanical and statistical mechanical models, and computational applications such as protein structure prediction and molecular design are explained through physical models such as molecular mechanics and dynamics.

Instructor: Radhakrishnan (Chemistry)
Prerequisite: BIOC 223/ CHEM 223 (for BIOC majors) or CHEM 222 (for CHEM minors), and MATH 116. Not open to students who have taken CHEM 232.
Cross-Listed as: CHEM 331
Distribution: NPS, MM
Term(s): Spring

BIOC 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

BIOC 355 - Biological Chemistry Thesis Research (1.0)
The first course in a two-semester investigation of a significant research problem, culminating in the preparation of a thesis and defense of that thesis before a committee of faculty from the Biological Chemistry program. Students will discuss their research progress informally with faculty and student colleagues and gain familiarity with contemporary research through presentations by outside seminar speakers. This route does not lead to departmental honors.

Prerequisite: Open only to seniors by permission of the instructor.
Distribution: None
Term(s): Fall; Spring

BIOC 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

BIOC 365 - Biological Chemistry Thesis (1.0)
The second course in a two-semester investigation of a significant research problem, culminating in the preparation of a thesis and defense of that thesis before a committee of faculty from the Biological Chemistry program. Students will discuss their research progress informally with faculty and student colleagues and gain familiarity with contemporary research through presentations by outside seminar speakers. This route does not lead to departmental honors.

Prerequisite: BIOC 355 and by permission of the instructor.
Distribution: None
Term(s): Fall; Spring

BIOC 370 - Senior Thesis (1.0)
Prerequisite: BIOC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
Biological Sciences Major

Goals for the Biological Sciences Major

- An understanding of the fundamental principles and concepts of biology at all levels of organization, from molecules to ecosystems
- Strong problem-solving abilities; the ability to think in a broad context about new biological problems and to evaluate data and arrive at defensible conclusions within the framework of current knowledge
- Strong quantitative skills and critical-thinking abilities; the ability to frame focused biological questions that are approachable experimentally, to formulate and test hypotheses, to analyze and interpret data, and to apply statistical tests
- Strong laboratory skills; experience with the operation of complex instrumentation and computers; and an understanding of general lab protocols and safety issues
- The ability to read and interpret the primary biological literature and to use literature databases
- Strong communication skills; the ability to speak and write about biological topics; and the ability to work effectively as a member of a team
- An appreciation of the relevance of biology in our lives and the biological literacy required to address ethical and public policy issues of biological significance

Requirements for the Biological Sciences Major

A major in Biological Sciences includes nine biological sciences courses, at least seven of which must be taken at Wellesley, plus two units of college chemistry (CHEM 105 or higher). All BISC majors must take either BISC 110 or BISC 112, and either BISC 111, BISC 111T or BISC 113. Four 200-level courses are required, with at least one course from each of the following three groups: cell biology, (BISC 219, BISC 220); systems biology (BISC 203, BISC 207, BISC 216); and community biology (BISC 201, BISC 202, BISC 209, BISC 210, BISC 214, BISC 217/ES 217 [201 1-12]). A minimum of two 300-level courses are also required for the major. One of these courses, exclusive of BISC 350, BISC 360, or BISC 370, must include laboratory and must be taken at Wellesley. Additional chemistry beyond the two required units is strongly recommended or required for certain 300-level courses: BISC 250, BISC 350, BISC 360, and BISC 370 do not count toward the minimum major. BISC 103, BISC 104, BISC 105, BISC 106, BISC 107, BISC 108, BISC 109, and BISC 190 count toward the minimum major in Biological Sciences and may also be used to fulfill the College distribution requirements: BISC 106, BISC 108, and BISC 109 as a laboratory sciences; BISC 103, BISC 104, BISC 105, and BISC 107 as non-laboratory science courses. BISC 109, BISC 111/BISC 113, BISC 198, and BISC 201 fulfill the Quantitative Reasoning overlay course requirement.

Independent Research and Honors in Biological Sciences

The Biological Sciences Department strongly encourages students to get involved in independent research. Such opportunities can serve to improve skills in conducting laboratory or field-based studies. Data analysis, scientific writing, and oral communication are likely components of independent research projects. Research opportunities in the biological sciences major are fulfilled in the following ways:

1. Independent Study in Biological Sciences (BISC 250/BISC 250H or BISC 350/BISC 350H):
   Independent study projects may be supervised by a member of the faculty of the Department of Biological Sciences or an off-campus director. Please note that off-campus independent research experiences require active participation of a department faculty member throughout the research period. Advisor approval is required for acceptance into the thesis program. Advisor approval is required for acceptance into the thesis program if the student has enrolled at Wellesley, courses from two-year colleges will not be accepted at any level.

2. Thesis in the Biological Sciences (BISC 355/BISC 365):
   The thesis program is a two-semester investigation of a significant research problem, culminating in the preparation of a written thesis and defense of that thesis before a faculty committee. The primary goals of the thesis project are the development of independent research capabilities, the improvement of scientific writing skills, and oral communication of scientific data. Independent research projects may be supervised by a member of the faculty of the Department of Biological Sciences or an off-campus director. Please note that off-campus independent research experiences require active participation of a department faculty member throughout the research period. Advisor approval is required for acceptance into the thesis program.

3. Honors thesis in the Biological Sciences (BISC 360/BISC 370):
   Honors in the Biological Sciences is earned by the demonstration of excellence in both course work and a thesis research project. All junior majors are invited to apply for the honors program. Advisor approval is required for acceptance into the thesis program and final acceptance is contingent upon a vote of the department faculty and a grade point average of 3.5 or higher in courses in the major above the 100 level. The primary goals of the thesis program are the development of independent research capabilities, the improvement of scientific writing skills, and oral communication of scientific data. Honors candidates prepare a written thesis and defend their thesis before an examination committee. After the oral examination, the thesis committee evaluates the candidate’s performance and may recommend approval of the degree with honors in the major.

For more information regarding any of the above options, please see the Department’s “Guide to Independent Research.”

Graduate Study in Biological Sciences

Students planning graduate work are advised to take calculus, statistics, organic chemistry, and two units of physics, and to have a reading knowledge of a second language. They should consult the catalogs of the graduate schools of their choice for specific requirements.

Advanced Placement Policy in Biological Sciences

AP credit does not replace any course offered in the Department of Biological Sciences and does not count toward a major or minor. No exemption exams are given. All courses require the fulfillment of the Quantitative Reasoning basic skills requirement as a prerequisite.

Transfer Credit and International Study in Biological Sciences

In order to obtain Wellesley credit for any biology course taken at another institution during the summer or the academic year, approval must be obtained from the chair of the department. After a student has enrolled at Wellesley, courses from two-year colleges will not be accepted at any level.

Students wishing to obtain credit for biology courses taken prior to enrollment at Wellesley should consult the chair of the department.

Students wishing to apply courses taken overseas toward their major at Wellesley should also consult the chair.

Interdepartmental Majors

Students interested in an interdepartmental major in Biological Chemistry, Environmental Studies or Neuroscience are referred to the sections of the course catalog where those programs are described. They should consult with the director of the appropriate program.

Biological Sciences Minor
Requirements for the Biological Sciences Minor
A minor in Biological Sciences (five courses) consists of the following:
1. BISC 110/BISC 112 and BISC 111/BISC 111T/BISC 112
   Two 200-level courses, each of which must be in a different group as described in the first paragraph above under major requirements
2. One 300-level course, excluding 350
3. Four of the five courses for a minor must be taken at Wellesley. Chemistry is recommended.

BISC - Biological Sciences
Courses
BISC 103 - Human Biology (1.0)
The anatomy and physiology of human tissues, organs, and organ systems will be the focus of this course, intended for students seeking to fulfill natural/scientific reasoning requirements. The course will be structured around four four-week modules. Each unit will consist of four lecture/discussions and one computer laboratory module (WebLab). Weblabs will consist of medical case studies focused on the lecture and discussion material for that week.

Instructor: Sommers Smith
Prerequisite: None. Not open to students who have taken BISC 109.
Distribution: NPS
Term(s): Not Offered

BISC 104 - Science or Science Fiction? (1.0)
This course will examine the scientific facts behind phenomena portrayed in a variety of Hollywood and foreign movies. We will cover topics ranging from the definition and recreation of life, genetics and behavior to evolution and environmental issues. The course will include weekly screenings of movies outside of class time as well as lectures, assigned readings and discussions. While obtaining an introduction to key concepts in biology, students will also explore misconceptions about science and scientists that are perpetuated by these movies.

Instructor: König
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: NPS
Term(s): Summer I

BISC 105 - Stem Cells: A New Frontier in Biomedicine (1.0)
In this interdisciplinary course, we will focus on the unique biological properties of stem cells and how these cells might lead to novel patient therapies. Questions to be addressed include: How were stem cells discovered? Where do stem cells come from, and how can they be used to study human diseases? What are the similarities and differences between embryonic stem cells, adult stem cells, and induced pluripotent stem cells? We will also discuss the scientific, ethical and political controversies associated with stem cell discoveries. Promising areas of current research will be described.

Instructor: O'Donnell
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: NPS
Term(s): Fall

BISC 107 - Biotechnology (1.0)
This course focuses on applications of recently developed biological techniques, including recombinant DNA, antibody techniques, and reproductive technology. We will discuss topics ranging from forensic to GM's, genetic testing, gene therapy, and designer babies. The social and ethical issues surrounding these techniques are also discussed. No prior knowledge of biology is expected, as all necessary background information will be discussed.

Instructor: König
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: NPS
Term(s): Not Offered

BISC 108 - Environmental Horticulture with Laboratory (1.25)
This course will examine how plants function, both as individual organisms and as critical members of ecological communities, with special emphasis on human uses of plants. Topics will include plant adaptations, reproduction, environmentally sound landscape practices, urban horticulture, and the use of medicinal plants. The laboratory involves extensive use of the greenhouses, experimental design, data collection and analysis, and field trips.

Instructor: Jones, Goodall, McDonough, Thomas
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: NPS
Term(s): Spring

BISC 109 - Human Biology with Laboratory (1.25)
This course focuses on human anatomy, physiology, and evolution. Lecture topics will include: human origins and evolution; the structure and function of the major physiological systems; exercise physiology; and human genetics. Laboratories explore human physiology focusing on the development and application of skills in experimental design, statistical analysis, and scientific writing.

Instructor: Ellerby, Slouw, Sommers Smith
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken BISC 103.
Distribution: NPS; QRF
Term(s): Fall

BISC 110 - Introductory Cellular and Molecular Biology with Laboratory (1.25)
A gateway course that focuses on the study of life at the cellular and molecular level, including eukaryotic and prokaryotic cell structure, function of biological macromolecules, cellular metabolism, molecular genetics, and mechanisms of growth and differentiation. This course will provide the fundamental tools for exploration of this field with the aim of enhancing conceptual understanding. Laboratories focus on experimental approaches to these topics and are shared with BISC 112. Either BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 may be taken first.

Instructor: Staff
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken BISC 112.
Distribution: NPS
Term(s): Fall; Spring; Summer I

BISC 111 - Introductory Organismal Biology with Laboratory (1.25)
A study of life, ranging from the physiology of organisms to the structure of ecosystems. The main themes of the course are evolution and biodiversity, form and function in plants and animals, and ecological interactions among organisms. The course provides the fundamental tools for exploration of organismal biology with the aim of enhancing conceptual understanding. Laboratories focus on experimental approaches to these topics and are shared with BISC 113. Either BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 may be taken first.

Instructor: Staff
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken BISC 111T/BISC 113.
Distribution: NPS; QRF
Term(s): Fall; Spring

BISC 111T - Introductory Organismal Biology with Laboratory (Tropical Island) (1.25)
Introduction to the central questions, concepts, and methods of experimental analysis in selected areas of organismal biology with a focus on tropical island biology. Topics include evolution, ecology, and plant and animal structure and physiology. Lectures and discussions during the Spring semester will prepare students for the field laboratory taught at the Central Caribbean Marine Institute in Little Cayman. Laboratory work will be carried out primarily in the field and includes introductions to the flora and fauna of the island and the coral reefs, as well as group projects. The nine-day field portion of the class will take place in mid-May.

Instructor: König
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken BISC 111T/BISC 113.
Application necessary.
Distribution: NPS; QRF
Term(s): Spring

BISC 112 - Exploration of Cellular and Molecular Biology with Laboratory (1.0)
Seminar-style introduction to life at the cellular and molecular level, designed as an alternative to BISC 110 for students with strong high school preparation (such as AP, IB, or other). This course will include eukaryotic and prokaryotic cell structure, function of biological macromolecules, cellular metabolism, molecular genetics, and mechanisms of growth and differentiation, with an emphasis on experimental approaches to investigating these topics. This course will aim to develop students' skills in data analysis and scientific writing along with building foundational knowledge in the field. Lab sections are shared with BISC 110. This course differs from BISC 110 in its small class size and discussion-based format; it meets for one discussion and one lab session per week. Either BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 may be taken first.

Instructor: Staff
Alternative. Students also learn to use statistical tools, such as ANOVA and t-tests, regression and correlation, graphical representation of data, probability, and patterns in the origination, diversity, and extinction of species over time.

Instructor: Hughes, Dolce
Prerequisite: BISC 108 or BISC 111/BISC 111T/BISC 113 or ES 101 or by permission of the instructor.
Distribution: NPS; QRF
Term(s): Fall

BISC 202 - Evolution with Laboratory (1.25)
Examination of evolution, the central paradigm of biology, at the level of populations, species, and lineages. Topics include the genetics of populations, the definition of species, the roles of natural selection and chance in evolution, the reconstruction of phylogeny using molecular and morphological evidence, and patterns in the origination, diversity, and extinction of species over time.

Instructor: Sequeira
Prerequisite: BISC 110/BISC 112 and BISC 111/BISC 111T/BISC 113, or permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 203 - Comparative Physiology and Anatomy of Vertebrates with Laboratory (1.25)
The physiology and functional anatomy of vertebrate animals, with an emphasis on comparisons among representative groups. The course covers topics in morphological, osmoregulatory, reproductive, cardiovascular, respiratory, digestive, neural, and ecological physiology. The laboratories incorporate the study of preserved materials and physiological experiments.

Instructor: Cameron, Buchholtz
Prerequisite: BISC 109 or BISC 111/BISC 111T/BISC 113, or permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 204 - Introduction to Cells (1.25)
The course will cover the basic concepts of cellular biology, including the structure and function of the cell, the organization of the cell, and cellular processes such as metabolism, energy production, and regulation. Students will also learn about the role of cells in disease and disease processes.

Instructor: Hughes
Prerequisite: BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 or permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 205 - Genetics and Genomics with Laboratory (1.25)
The course will introduce students to the principles of genetics and genomics, including the study of inheritance, genetic variation, and the role of genetics in disease. Students will also learn about the application of genomics in medicine, agriculture, and environmental sciences.

Instructor: Staff
Prerequisite: BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 and permission of the instructor.
Distribution: NPS
Term(s): Spring

BISC 206 - Human Microscopic Anatomy with Laboratory (1.25)
This course is designed to provide students with an understanding of the microscopic anatomy of the human body, focusing on the structure and function of various tissues and organs. Students will learn about the histological composition of tissues, the cellular organization of organs, and the functional interplay of various organ systems.

Instructor: Cameron, Buchholtz
Prerequisite: BISC 109 or BISC 111/BISC 111T/BISC 113, or permission of the instructor.
Distribution: NPS; QRF; LAB
Term(s): Summer I
Not open to students who have taken BISC 250 with Lecturer Sommers-Smith.

BISC 207 - The Biology of Plants with Laboratory (1.25)
An introduction to the scientific study of plants. Topics will include growth and development, stress physiology, plant defense, applications of genetic engineering to the study and improvement of plants, and the properties of medicinal plants. The project-oriented laboratory sessions will provide an introduction to some of the techniques currently employed in answering research questions ranging from the organismal to the cellular level.

Instructor: Staff
Prerequisite: BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 and permission of the instructor.
Distribution: NPS
Term(s): Spring

BISC 208 - Quantitative Reasoning with Laboratory (1.0)
This course is designed to provide students with an understanding of statistical theory and practical applications of statistical methods. Students will learn how to collect, analyze, interpret, and present data using appropriate statistical techniques.

Instructor: Hughes
Prerequisite: A score of 4 or 5 on the Biology AP exam or equivalent experience or permission of the instructor.
Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken BISC 111/BISC 111T/BISC 113 may be taken first.
Distribution: NPS; QRF
Term(s): Fall; Spring

One Fall & Spring section of this course is a First-Year Seminar, reserved for first-year students only. The Fall section will be shadow graded.

BISC 113 - Exploration of Organismal Biology with Laboratory (1.0)
An exploration of the central questions, concepts, and methods of experimental analysis in selected areas of organismal biology, designed as an alternative to BISC 111 for students with strong high school preparation (such as AP, IB, or other). Topics include: the evolution and diversification of life, the form and function of plants and animals, and ecological interactions among organisms, with an emphasis on laboratory methods, data analysis, and science writing. Lab sections are shared with BISC 111. This course differs from BISC 111 in its smaller class size, a seminar-style format, and a focus on discussion of landmark scientific studies that shape this field; it meets for one discussion and one lab session per week. Either BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 may be taken first.

Instructor: Staff
Prerequisite: A score of 4 or 5 on the Biology AP exam or equivalent experience or permission of the instructor.
Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken BISC 111/BISC 111T/BISC 113 may be taken first.
Distribution: NPS; QRF
Term(s): Fall; Spring

Ann E. Maurer ’51 Speaking Intensive Course
One Fall & Spring section of this course is a First-Year Seminar, reserved for first-year students only. The Fall section will be shadow graded.

BISC 198 - Statistics in the Biosciences (1.0)
This course combines statistical theory and practical application, the latter using examples from ecology and experimental biology to illustrate some of the more common techniques of experimental design and data analysis. Students will learn how to plan an experiment and consider the observations, measurements, and potential statistical tests before data are collected and analyzed. Other topics include graphical representation of data, probability, distributional theory and their applications, one- and two-way ANOVA and t-tests, regression and correlation, goodness-of-fit tests, and nonparametric alternatives. Students also learn to use statistical computer software.

Instructor: Hughes
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement and one course in biology, chemistry, or environmental science.
Distribution: NPS; QRF
Term(s): Spring

BISC 209 - Microbiology with Laboratory (1.25)
Introduction to bacteria, archaea, viruses, and eukaryotic microorganisms. Overview of the microbial world including a survey of the morphological, structure, function, and diversity of microorganisms and microbial effects on the environment. Introduction to the fundamental concepts of microbial evolution, genomics, metabolism, ecology, genetics, pathogenesis, and immunity. Students will gain experience in microbiological laboratory procedures including aseptic technique, microscopy, enrichment, isolation, enumeration, cultivation, and identification of microorganisms.

Instructor: Klepac-Ceraj, McDonough
Prerequisite: BISC 110/BISC 112 and one unit of college chemistry.
Distribution: NPS
Term(s): Fall

BISC 210 - Marine Biology with Laboratory (1.25)
This course covers more than 70 percent of the Earth’s surface and is our planet’s primary life support system. This course examines adaptations and interactions of plants and animals in a variety of marine habitats. Focal habitats include the photic zone of the open ocean, the deep-sea, subtidal and intertidal zones, estuaries, and coral reefs. Emphasis is placed on the dominant organisms, food webs, and experimental studies conducted within each habitat. Laboratories will emphasize fieldwork in marine habitats as well as hands-on study of marine organism adaptation and anatomy.

Instructor: Moore, Hughes
Prerequisite: BISC 111/BISC 111T/BISC 113 or ES 101, or by permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 214 - Animal Behavior with Laboratory (1.25)
In meeting the challenges of survival and reproduction, animals have evolved behaviors that can be specific, cyclic, and sometimes unpredictable. With an eye to how behaviors ultimately shape an animal’s fitness, we will explore the aspects of life that make each animal’s strategy unique, including communication, orientation, foraging, conflict and aggression, mating, parental care, and social life. Laboratories will expose students to the challenges of collecting, analyzing, interpreting, and presenting data on animal behavior.

Instructor: Eldery, Mattila, Slaw
Prerequisite: BISC 109 or BISC 111/BISC 111T/BISC 113, or permission of the instructor.
Distribution: NPS
Term(s): Spring

BISC 216 - Mechanisms of Animal Development with Laboratory (1.25)
Mechanisms of Development is a survey of the cellular and molecular foundations of animal development. The course covers current research on the regulatory and signaling mechanisms that control development, with an emphasis on the role of genetic and epigenetic factors in development.

Instructor: Staff
Prerequisite: BISC 110/BISC 112 or BISC 111/BISC 111T/BISC 113 and permission of the instructor.
Distribution: NPS
Term(s): Spring
will include: embryonic induction, pattern formation, organ development, regeneration, stem cells, and aging. Laboratory sessions will focus on experimental approaches to development.

**Instructor:** O'Donnell, Suzuki  
**Prerequisite:** BISC 110/BISC 112 and BISC 111/BISC 111T/BISC 113, or permission of the instructor.  
**Distribution:** NPS  
**Term(s):** Fall

---

**BISC 219 - Genetics with Laboratory (1.25)**

The goal of the course is to develop an understanding of the fundamental principles of genetics at the molecular, cellular, and organismal levels. The mechanisms that regulate the control of gene expression leading to alteration in phenotype during cellular differentiation will be studied. A link will be established between the generation of genetic variants through mutation and recombination, their patterns of inheritance, interactions between genes to produce complex phenotypes, and the maintenance of such genetic variation in natural populations. Topics will include: organization of the eukaryotic genome, gene structure and function, multilevel gene control and dysregulation in disease, genetics of pattern formation, inheritance of gene differences, gene and allele interactions, and aspects of population and evolutionary genetics. Laboratory investigation will expose students to the fundamentals of genetics including classical and molecular techniques for genetic analysis.

**Instructor:** Sequeira, Beers, Crum, Matthews  
**Prerequisite:** BISC 110/BISC 112 and one unit of college chemistry. Not open to first-year students.  
**Cross-Listed as:** BIOC 219  
**Distribution:** NPS  
**Term(s):** Fall

---

**BISC 220 - Cellular Physiology with Laboratory (1.25)**

Examines structure-function relationships in eukaryotic cells. We will explore the operation and regulation of molecular machines that carry out processes central to life. Considerable emphasis is placed on experimental approaches for investigating the following topics: protein structure and enzyme kinetics, biological membranes and transport, cytoskeletal assembly and function, protein biogenesis and trafficking, cell communication and signaling, the cell cycle, and intercellular interactions. Laboratory investigations will provide students with experience in classical and modern approaches to examine and quantify cellular processes.

**Instructor:** Darling, Goss, Beers, Matthews  
**Prerequisite:** BISC 110/BISC 112 and two units of college chemistry. One semester of organic chemistry is recommended. Not open to first-year students.  
**Cross-Listed as:** BIOC 220  
**Distribution:** NPS  
**Term(s):** Spring

---

**BISC 247 - Plant Diversity and Ecology with Laboratory (1.25)**

This course is a combination of "What's that wildflower?" and "Why does it grow over there and not here?" We begin by examining large-scale patterns of plant diversity from an evolutionary and phylogenetic perspective and then shift to an ecological perspective. Along the way, we zoom in to specific concepts and processes that help us understand overall patterns. Laboratories will primarily be taught in the field and greenhouses and will include plant identification, observational and experimental studies, and long-term study of forest communities on the Wellesley campus. Laboratories will also include aspects of experimental design and data analysis. The goal of the course is not only to train students in botany and plant ecology, but to engage them in the world of plants every time they step outside.

**Instructor:** Griffith (Environmental Studies)  
**Prerequisite:** ES 101 or BISC 108 or BISC 111 or BISC 113 or permission of instructor  
**Cross-Listed as:** ES 247  
**Distribution:** NPS  
**Term(s):** Fall  
Not open to students who have completed ES 217/BISC 217.

---

**BISC 250 - Research or Individual Study (1.0)**

**Prerequisite:** Permission of the instructor.  
**Distribution:** None  
**Term(s):** Fall, Spring

---

**BISC 250G - Research or Individual Study Group (1.0)**

**Prerequisite:** Permission of the instructor.  
**Distribution:** None  
**Term(s):** Fall, Spring

---

**BISC 250H - Research or Individual Study (0.5)**

**Prerequisite:** Permission of the instructor.  
**Distribution:** None  
**Term(s):** Fall, Spring

---

**BISC 301 - Seminar. Topics in Plant Biology (1.0)**

**Distribution:** NPS  
**Term(s):** Not Offered

---

**BISC 302 - Human Physiology with Laboratory (1.25)**

This course takes an integrated approach to the study of organ system function in humans. We will examine control mechanisms that allow the body to maintain a constant balance in the face of environmental challenges, such as exercise, temperature change, and high altitude. Our particular focus will be recent findings in the areas of neural, cardiovascular, respiratory, renal, and muscle physiology. In the laboratory, students gain experience with the tools of modern physiological research at both the cellular and organismal levels.

**Instructor:** Cameron, Helluy  
**Prerequisite:** BISC 111/BISC 111T/BISC 113 or NEUR 100, and either BISC 203 or NEUR 200.  
**Distribution:** NPS  
**Term(s):** Spring

---

**BISC 305 - Seminar. Evolution (1.0)**

A brief history of life. Topics include the origin of life from nonlife, evolution of replicatory molecules, the early history of photosynthesis and eukaryotic structure, the diversification of domains, kingdoms and animal phyla, and the stepwise appearance of strategies for life in terrestrial and aerial environments. The course will emphasize student participation and make extensive use of the primary literature.

**Instructor:** Buchholz  
**Prerequisite:** Two units in Biological Sciences at the 200-level or permission of the instructor.  
**Distribution:** NPS  
**Term(s):** Not Offered

---

**BISC 306 - Principles of Neural Development (1.0)**

This course will discuss aspects of nervous system development and how they relate to the development of the organism as a whole. Topics such as neural induction, neurogenesis, programmed cell death, axon guidance, synaptogenesis, and the development of behavior will be discussed, with an emphasis on the primary literature and critical reading skills. Laboratory sessions focus on a variety of methods used to define developing neural systems.

**Instructor:** Beltz (Neuroscience)  
**Prerequisite:** BISC 216 or NEUR 200, or permission of the instructor.  
**Cross-Listed as:** NEUR 306  
**Distribution:** EC, NPS  
**Term(s):** Fall  
Does not fulfill the laboratory requirement.

---

**BISC 307-01-S - Advanced Topics in Ecology with Laboratory (1.25)**

Freshwater ecosystems support a myriad of fascinating biota, many with links to the terrestrial realm, and are essential sustainers of human societies. Increasingly, freshwaters are threatened with multi-source pollution, and diversion to industry and agriculture. What is the fate of freshwater resources as the human population surges toward 9 billion or more by 2050? How will humanity cope with impending water shortages as climate change proceeds? And, what of the freshwater biota? Through discussions of the primary literature and student research presentations, we will explore the effects on freshwater ecosystems of climate change, pollutants, invasive species, and water use policy, as well as the societal implications of such challenges. From a local ecological perspective, we’ll sample several New England freshwater ecosystems to study their current species richness and temporal dynamics, as a baseline for future change.

**Instructor:** Hughes  
**Prerequisite:** Two courses in Biological Sciences at the 200-level or above, at least one of which is from the community biology group; or permission of the instructor.  
**Cross-Listed as:** ES 307-01-S  
**Distribution:** NPS  
**Term(s):** Spring

---

**BISC 308 - Tropical Ecology with Wintersession Laboratory (1.25)**

Tropical rain forests and coral reefs seem to invite superlatives. They are among the most fascinating, diverse, productive, but also most endangered ecosystems on earth. These topics are addressed during the fall lectures in preparation for the laboratory part of the course, which takes place in Central America during Wintersession. We first travel to a small island, part of an atoll bordering the world’s second longest barrier reef off the coast of Belize. In the second half of the field course we explore an intact lowland rain forest in Costa Rica. Laboratory work is carried out primarily outdoors and includes introductions to flora and fauna, and implementation of research projects designed during the fall.

**Instructor:** König, Helluy  
**Prerequisite:** BISC 201, BISC 207, or BISC 210, and permission of the instructor. Application required.  
**Distribution:** NPS  
**Term(s):** Fall, Winter  
Normally offered in alternate years. Subject to Provost’s Office approval.

---

**BISC 311 - Evolutionary Development Biology with Laboratory (1.25)**

The diversity of organismal forms has fascinated human beings for centuries. How did butterflies get eyespots? What is the evolutionary origin of bird feathers? How did snakes get to be so long? How did...
BISC 314 - Environmental Microbiology with Laboratory (1.25)
This course explores current advances in our understanding of microbial diversity, community structure, metabolic activities in Bacteria and Archaea, and interactions between microbes. Topics will span the microbial ecology of natural environments, including marine ecosystems and the human body. Student participation and discussion of original scientific literature will be emphasized. In laboratory, students will learn how to characterize microorganisms, microbial communities, and microbial interactions using a suite of classical and molecular techniques.
Instructor: Klenac-Ceraj
Prerequisite: CHEM 211 plus any of the following: BISC 201, BISC 202, BISC 209, BISC 210, BISC 219, or BISC 220, or permission of the instructor.
Distribution: NPS
Term(s): Spring

BISC 315 - Neuroendocrinology with Laboratory (1.25)
Hormones act throughout the body to coordinate basic biological functions such as development, differentiation, and reproduction. This course will investigate how hormones act in the brain to regulate physiology and behavior. We will study how the major neuroendocrine axes regulate a variety of functions, including brain development, reproductive physiology and behavior, homeostasis, and stress. The regulation of these functions by hormones will be investigated at the molecular, cellular, and system levels. Laboratory experiments will explore various approaches to neuroendocrine research, including the detection of hormone receptors in the brain and analysis of behavior.
Instructor: Tetz (Neuroendocrine)
Prerequisite: NEUR 200, or both BISC 110/BISC 112 and BISC 203, or permission of the instructor.
Cross-Listed as: NEUR 315
Distribution: E; NPS
Term(s): Fall

BISC 316 - Molecular Genetics with Laboratory (1.25)
Molecular genetic techniques, which allow us to identify, analyze and manipulate genes, have revolutionized our understanding of how organisms develop and function. This course focuses on the use of molecular genetic and genomic approaches to dissect and manipulate complex biological systems. In this semester-long project-based course, students will use these approaches to pursue an original research question in a genetic model organism. Seminar-style class sessions will focus on critical analysis, presentation and discussion of the primary literature relevant to the research project. In the laboratory, students will gain experience with a variety of current molecular genetic methods (e.g., DNA cloning and sequencing, PCR, genomic analysis, RNAi, gene knock-outs, mutagenesis, bioinformatics) with an emphasis on experimental design and data analysis.
Instructor: Peterman
Prerequisite: BISC 219 or permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 319 - Evolution and Conservation Genetics with Laboratory (1.25)
Oceanic archipelagos such as Galápagos stand at a crossroads: while many still retain most of their original species, ecological degradation is proceeding rapidly. We will focus on the study of the components of accumulation of species diversity in island systems and of the forces or agents that can threaten that endemic diversity. By looking at relationships among organisms, populations, and species, we can interpret how historical processes can leave evolutionary footprints on the geographic distribution of traits. Additionally, by analyzing genetic patterns within island populations, we can detect signals of demographic growth or decline and evaluate the role of genetic factors in population persistence. After a series of introductory lectures, the course will involve student presentations and discussion of primary literature examining cases in archipelagos (Hawaii, Canaries, and Galápagos). In the laboratory, we will explore computational biology tools for analysis of DNA sequences, and apply methods of phylogeny, phylogeography reconstruction, and population demographics. We will also explore the growing field of molecular dating of evolutionary events.
Instructor: Sequeira
Prerequisite: BISC 201 or BISC 202 or BISC 210 or BISC 219, or permission of the instructor.
Distribution: NPS
Term(s): Spring

BISC 320 - Proteomics with Laboratory (1.25)
The discipline of proteomics focuses on the large-scale study of proteins in living organisms. This course introduces students to the techniques utilized, and the scientific questions being addressed, to understand this complex world. As a student in this course you will have hands-on experience in methods of organelle isolation, polyacrylamide gel electrophoresis, chromatography, and the operation of a tandem mass spectrometer. The lecture portion of this course will focus on the primary literature, primarily dealing with the question of how proteomics is contributing to our understanding, and treatment of various diseases. This course will include a component of laboratory-based independent research and a final paper in the form of a grant proposal.
Instructor: Harris
Prerequisite: BISC 219, BISC 220 and CHEM 211, or permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 322 - Designs for Life: The Biomechanics of Animals and Plants with Laboratory (1.25)
This course will focus on how organisms cope with a complex physical world. Their sophisticated designs withstand large environmental forces, caused by gravity, wind, and water flow. Animals, as well as confronting the problems of not falling over or apart, must overcome additional challenges associated with locomotion. Biomaterials, including spider silk that is stronger than steel and springy tendons that power prodigious jumps, help make this possible. Topics for discussion will include how biomaterials give organisms structure and strength, how muscle acts as a biological motor during locomotion, how animals swim and fly, and how they run, walk and jump effectively on land. Class discussion and student presentation of recent primary literature will be an integral part of the course. Labs will include the analysis of video images to calculate accelerations and power during movement, and the use of force plates to quantify contact forces during running and jumping.
Instructor: Elerby
Prerequisite: Any two units in Biological Sciences at the 200 level or permission of the instructor. Not open to students who have taken BISC 321.
Distribution: NPS
Term(s): Fall

BISC 327-01-S - Seminar. Topics in Biodiversity (1.0)
Topic for 2014-15: Biology in Natural and Designed Ecosystems
This course will examine biological communities along a gradient from natural ecosystems to the built environment. What can we learn by applying concepts from community ecology to human-dominated landscapes? How important is biodiversity in urban and suburban settings? How can we restore and maintain biodiversity in human environments, and how is human health connected to the biological communities we inhabit? Students will discuss primary literature, explore and describe a range of biological communities on and around campus, and, as a final project, design a small-scale ecosystem (aka gardens, indoors or out, terrestrial or aquatic).
Instructor: Jones
Prerequisite: Two units in biological sciences at the 200 level or above, or permission of the instructor.
Cross-Listed as: ES 327-01-S
Distribution: NPS
Term(s): Spring

BISC 328 - Seminar. Modern Biological Imaging (1.0)
This course will take an interdisciplinary approach to examine how scientists and clinicians address physiologically significant questions in cell and molecular biology using imaging-based techniques and modalities. We will examine the development and utilization of both qualitative and quantitative optical microscopy techniques, with a focus on fluorescent microscopy. Student exploration and analysis of review and primary literature will be integral to this course. Additional topics that afford the opportunity to interact with outside speakers may include biomedical imaging (MRI, CT, ultrasound, etc.), electron microscopy, and atomic force microscopy (AFM). The course incorporates a combination of introductory lectures, seminar-style discussions, "guest artist" speakers, and student presentations throughout the semester.
Instructor: Darling
Prerequisite: CHEM 211 and either BISC/BIOC 201 or 220 or permission of the instructor
Distribution: NPS
Term(s): Fall

BISC 331 - Seminar. Cancer Genomics (1.0)
Cancer can be attributed to disruption of gene structure and function. Functional genomics has contributed more to the understanding and treatment of cancer in the last 10 years than the previous half century of oncology research. This course will provide a comprehensive study of the
BISC 334 - The Biology of Stem Cells (1.0)

In this course, we will study stem cells in terms of molecular, cellular, and developmental biology. We will focus on different types of stem cells, particularly embryonic stem cells, adult stem cells, and induced pluripotent stem cells. More specifically, we will explore how stem cells develop, the criteria by which stem cells are currently defined, and stem cell characteristics under investigation. Current research in the area of disease and potential stem cell therapies will also be discussed. Biotechnological issues related to stem cell biology will be described. Students will present and discuss original literature throughout the course.

Instructor: O'Donnell
Prerequisite: BISC 216 or BISC 219 or BISC 220
Distribution: NPS
Term(s): Fall

BISC 335 - Seminar. Cellular and Molecular Mechanisms of Disease (1.0)

This course will explore the underlying mechanisms of a variety of human diseases whose causes have been heavily studied at the cellular and molecular level. We will take a research-oriented approach to the material through critical reading and analysis of primary literature on each topic and we will explore how this knowledge informs the design, development, and implementation of treatments. Topics of study may include diseases related to: metabolism, genetics, protein folding, cytoskeleton, membrane trafficking, inflammation, and/or pathogenic infection. This course will utilize a combination of lectures to introduce general concepts, seminar-style discussions of primary literature articles, and student presentations throughout the semester.

Instructor: O'Sullivan
Prerequisite: BISC 220
Distribution: NPS
Term(s): Spring

BISC 336 - Seminar. Immunology (1.0)

In this course, we will analyze the molecular, cellular, and biochemical mechanisms involved in the development and function of the immune system. We will also explore the immunological basis of infectious diseases (e.g., influenza and tuberculosis), allergic disorders, autoimmune diseases (e.g., multiple sclerosis and rheumatoid arthritis), immunodeficiency syndromes (e.g., AIDS), transplantation, and cancer. This course will utilize a combination of lectures to introduce new material, seminar-style discussions of primary research articles, and student presentations.

Instructor: Matthews
Prerequisite: BISC 219 or BISC 220
Distribution: NPS
Term(s): Fall

BISC 338 - Seminar. The Biology of Social Insects (1.0)

Warfare, communication, agriculture, and caring for family are phenomena that are typically attributed to human societies, but social insects do these same things. In this course, we will explore the weird and wonderful world of social insects to discover their diverse strategies for success. We will learn about how conflict and selfishness have shaped the cooperative effort that characterizes these seemingly utopian communities. Topics will include the natural history of social insects, self-organization in systems, models of division of labor, communication, and an examination of some of the biological oddities that have arisen as a result of kin selection. The format for the course will consist of demonstrations of basic principles, followed by discussion and presentation of classic literature and groundbreaking current research.

Instructor: Mattila
Prerequisite: BISC 201, BISC 202, or BISC 214, or by permission of the instructor.
Distribution: NPS
Term(s): Fall

BISC 339 - Seminar. Biology of Parasites (1.0)

Parasites hold a fascination for biologists. The lifestyles of these ubiquitous and sometimes dangerous organisms, perhaps seeming bizarre to us, have proven very successful evolutionary adaptations to life on or within our hosts. Parasites belong to many different protozoan groups and animal phyla, and many families of plants. We will explore this great diversity of parasite forms and specializations, including parasite biogeography, life cycles, life histories and evolution, immunomodulation, and behavioral alteration of hosts, and host defenses. An important emphasis in our course will be the human health impacts of parasites, methods of parasite control, and prospects for treatment and prevention of parasitic diseases. Participants will present both primary and review literature for discussion, augmented with introductory material for each major topic.

Instructor: Hughes
Prerequisite: Two units in biological sciences at the 200 level or permission of the instructor.
Distribution: NPS
Term(s): Not Offered

BISC 340 - Calderwood Seminar in Public Writing: Biology in the News (1.0)

While scientists have made great progress understanding the intricate details of many biological processes, the scientific literacy of the general public has not kept pace with these exciting developments. The goal of this writing-intensive seminar is to synthesize knowledge from a wide range of biological disciplines and to learn how to communicate important biological concepts to a broad audience. Students will review articles from the primary literature, decide which findings are relevant, and work on making the information and the scientific process transparent, accessible, and interesting to non-experts. The goal of the work is to help people to make educated choices, e.g., about health and environmental issues, by writing short articles for media ranging from the newspaper to the website of an NGO.

Instructor: König
Prerequisite: Any two BISC 200-level courses; juniors and seniors only.
Distribution: NPS
Term(s): Fall

BISC 345 - Advanced Topics in the Molecular and Cell Biology of Development with Laboratory (1.25)

Instructor: Peterman
Distribution: NPS
Term(s): Not Offered

BISC 347 - Advanced Plant Diversity and Ecology with Laboratory (1.25)

This course meets along with ES 247/BISC 247 and offers an opportunity for students to engage more deeply with the material and perform independent research. Students will be expected to thoroughly review and reference peer-reviewed literature and assist in leading in-class discussions. Additionally, each student will develop and conduct an experiment (or observational study) over course of the semester that examines mechanisms of plant diversity and coexistence.

Instructor: Griffith (Environmental Studies)
Prerequisite: BISC 201 or ES 220 or BISC 207 or permission of instructor
Cross-Listed as: ES 347
Distribution: NPS
Term(s): Fall

This course is not available to students that have completed ES 217/BISC 217 or ES 247/BISC 247.

BISC 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall, Spring

BISC 350H - Research or Individual Study (0.5)

Independent research supervised by a member of the faculty of the Department of Biological Sciences or an off-campus director. Off-campus projects require an on-campus advisor from the department. Students will be expected to devote 5-6 hours per week to their research.
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

BISC 355 - Biological Sciences Thesis Research (1.0)

The first course in a two-semester investigation of a significant research problem, culminating in the preparation of a thesis and defense of that thesis before a committee of faculty from the Department of Biological Sciences. This route does not lead to departmental honors.
Prerequisite: Open only to seniors by permission of the instructor.
Distribution: None
Term(s): Fall

BISC 360 - Senior Thesis Research (1.0)

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall, Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

BISC 365 - Biological Sciences Thesis (1.0)

The second course in a two-semester investigation of a significant research problem, culminating in the preparation of a thesis and defense of that thesis.
before a committee of faculty from the Department of Biological Sciences. This route does not lead to departmental honors.

Prerequisite: BISC 355 and by permission of the instructor.
Distribution: None
Term(s): Spring

**BISC 370 - Senior Thesis (1.0)**

Prerequisite: BISC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
Calderwood Seminars in Public Writing are advanced-level, writing-intensive courses that engage students in a review of their majors or areas of special interest. These seminars challenge students to integrate what they have learned in other courses and to communicate this knowledge to a broad audience.

Calderwood Seminars will rotate among departments and programs. Class size will remain small and enrollment, ordinarily, will be limited to juniors and seniors. The Seminars may fulfill major requirements.

The Calderwood Seminars in Public Writing are named after Stanford Calderwood, a patron of the arts and benefactor of Wellesley College. Throughout his career, Mr. Calderwood realized the value of written communication. To improve the capabilities of Wellesley College students as public writers, the Calderwood Charitable Foundation has provided generous support for this program.

Key elements for the Calderwood Seminars in Public Writing:

- Seminars targeted at juniors and seniors that draw on skills learned in prior courses and that empower a student’s “voice” in her major field or area of study

- Seminars that offer a reflective overview of a major or area by covering topics central to the field or that explore a defining theme

- Seminars that emphasize public writing, rather than writing for a specialized and professional audience. Public writing—the ability to translate complex arguments and professional jargon to a broad audience—is a central feature of a liberal arts education

- Seminars that encourage a more collaborative experience, with students writing frequently and rewriting their work in response to comments by their professors and input from classmates

Calderwood Seminars in Public Writing Courses

- **AMST 355**  Calderwood Seminar in Public Writing: Critiquing American Popular Culture
- **BISC 340**  Calderwood Seminar in Public Writing: Biology in the News
- **CAM 327**  Calderwood Seminar in Public Writing: Public Writing on Film and TV
- **CPLT 359/FREN 359**  Calderwood Seminar for Public Writing: You Say You Want to Change the World: Advocating for Other Cultures (in English)
- **ECON 335**  Calderwood Seminar in Public Writing: Economic Journalism
- **ENG 390**  Calderwood Seminar in Public Writing: The New York Review of Books at Fifty
- **FREN 359/CPLT 359**  Calderwood Seminar in Public Writing: You Say You Want to Change the World: Advocating...
DEPARTMENT OF CHEMISTRY

Professor: Arumainayagam, Hearn, Wolfson (Chair)
Associate Professor: Elmore, Flynn, Haines, Miwa, Nunez
Assistant Professor: Carpio-Moniz, Radhakrishnan, Stanley, Vardar-Ulu
Adjunct Assistant Professor: Reisberg, Verschoor
Senior Instructor in Chemistry Laboratory: Doe, Hall, McCarthy, Turnbull
Instructor in Chemistry Laboratory: Huang, Kadar, Moyar, Mukandian, Oakes, Trainer

Chemistry has often been referred to as “The Central Science.” Knowledge of the properties and behavior of atoms and molecules is crucial to our understanding of medicine, biological systems, neuroscience, nanotechnology, environmental science and myriad other areas. All of the traditional divisions of chemistry—analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry—are represented on the faculty, in the course offerings and in opportunities for student-faculty collaborative research.

Unless otherwise noted, all courses meet for three periods of lecture/discussion and one 3.5-hour lab period. All courses are offered on a pass/fail basis and 1.5 semester credits are awarded for successful completion except CHEM 112, which awards 1.0 semester credits.

Goals for the Chemistry Major

- Be able to think both concretely and abstractly about the world on a molecular level
- Learn fundamental lab techniques and understand how concepts learned in lecture and laboratory can be implemented in the real world
- Perform scientific research in the form of independent study or thesis program
- Approach and model problems using concepts and skills grounded in chemistry and learn about how solving such problems benefits the broader society
- Have a solid foundation in chemical principles and the ability to integrate concepts from chemistry and related fields in an interdisciplinary way
- Be able to present chemically relevant material clearly and accurately to an expert or a non-expert audience
- Be prepared for postgraduate study and/or public/private sector employment in fields such as chemistry, medicine, teaching, marketing and sales, human resources, law, consulting, and business management

Requirements for the Chemistry Major

Any student who plans to take chemistry beyond CHEM 205 or CHEM 120 should consult one or more members of the chemistry department faculty. The department website (www.wellesley.edu/Chemistry/chem.html) contains specific suggestions about programs and deals with a variety of topics including preparation in mathematics and physics, graduate programs, and careers of former majors.

The major will consist of the following:

- CHEM 105/CHEM 105P and CHEM 205, or CHEM 120
- CHEM 211 and CHEM 212
- CHEM 330
- Three from among CHEM 222, CHEM 223, CHEM 334 [2012-13 only], CHEM 335, CHEM 340 [2012-13 only], CHEM 341, or CHEM 361
- One unit of research/independent study (CHEM 250, CHEM 350, CHEM 355, or CHEM 360) or completion of approved summer or off-campus research and required paper/presentation
- One additional non-research/thesis chemistry course at the 300 level not including CHEM 320 or CHEM 331

For students entering before Fall 2012:

- MATH 116 or MATH 120; and PHYS 106 or PHYS 108

For students entering in Fall 2012 or later:

- MATH 215 (strongly recommended) or MATH 205; and PHYS 106 or PHYS 108

Students planning to go to graduate school in chemistry should choose PHYS 108, MATH 215, and CHEM 335. Students planning to study physical chemistry in graduate school should consider taking CHEM 335 in their junior year and PHYS 320 in their senior year.

The required mathematics and physics courses (PHYS 108 but not PHYS 106) may also be counted toward a major or a minor in those departments. Early completion of the mathematics and physics requirements is strongly encouraged. Normally no more than three courses of chemistry taken at another institution may be counted toward the major.

Students interested in the interdepartmental major in biological chemistry are referred to the section of the catalog where that major is described. They should also consult with the director of the biological chemistry program.

Students interested in an independent major in chemistry should consult the department chair.

Independent Research in Chemistry

The chemistry major requires one semester or summer of research. The research requirement for the chemistry major can be fulfilled in the following ways:

1. Independent Study in Chemistry (CHEM 250 or CHEM 350):
   Research is supervised by a member of the Wellesley College chemistry department.
   Off-campus research requires active participation of a Wellesley faculty member throughout the research period. In order to fulfill the research requirement for the major, the student must complete a paper of 8-10 pages on the research and give a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrating a familiarity with searching the chemical literature. A copy of the paper must be submitted to the chair of the chemistry department.

2. Thesis in Chemistry (CHEM 355/CHEM 365 or CHEM 360/CHEM 370):
   If the first semester of thesis (CHEM 355 or CHEM 360) is used to fulfill the research requirement, the student must complete a paper of 8-10 pages on the research and give a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrating a familiarity with searching the chemical literature. A copy of the paper must be submitted to the chair of the department. If the student completes the second semester (CHEM 365 or CHEM 370), the thesis and the thesis defense fulfill the paper and presentation requirement.

3. Other Research Experiences:
   A student may participate in an approved off-campus research program during the academic year (10 hours per week minimum for one semester) or an approved summer research program (eight weeks minimum length), write a paper of 8-10 pages on the research, and give a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrating a familiarity with searching the chemical literature. A copy of the paper must be submitted to the chair of the department. Students electing to use an off-campus research experience to fulfill the research requirement must have the research project approved by a faculty member in the Chemistry Department before starting the program.

Honors in Chemistry

The only route to honors in the major is writing a thesis and passing an oral examination (CHEM 360 and CHEM 370). To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.2 and 3.5. See Academic Distinctions.

Chemist Accreditation

The American Chemical Society has established a set of requirements in various areas which it considers essential for the training of chemists. Students wishing to meet the standard of an accredited chemist as defined by this society should consult the chair of the department.

Teacher Certification in Chemistry

Students interested in obtaining certification to teach chemistry in the Commonwealth of Massachusetts should consult the chair of the education department.

Transfer Credit in Chemistry

DEPARTMENT OF CHEMISTRY
In order to obtain Wellesley credit for any chemistry course taken at another institution, during the summer or the academic year, approval must be obtained via the Wellesley College Registrar’s Office from the chair of the department prior to enrolling in the course. Students, especially those taking chemistry courses abroad, may be required to contact the course professor to obtain specific details about the course because the online course description may be insufficient to make an informed decision. In general, courses from two-year colleges will not be accepted at any level. These restrictions normally apply only to courses taken after enrollment at Wellesley. Transfer students wishing to obtain credit for chemistry courses taken prior to enrollment at Wellesley should consult the chair of the department.

Advanced Placement and Exemption Examinations in Chemistry

For students entering in Fall 2013 and later: If a student scores a 5 on the AP or 5 or higher on the IB higher level examination or C or higher on the A-levels, she automatically qualifies for CHEM 120.

Students who score 5 on the AP exam or 5 or higher on the IB higher level examination who complete CHEM 120 may count one unit of AP or IB course credit toward graduation. The department offers exemption and placement examinations at the beginning of the fall semester. If a student scores a 5 on the AP or 5 or higher on the IB higher level examination or C or higher on the A-levels and does well on the CHEM 120 exemption exam, she can go directly into CHEM 211. If a student scores below a 5 on the Chemistry AP or below a 5 on the IB higher level examination or below a C on the A-levels, but performs well on the CHEM 120 placement exam, she will be placed into CHEM 120. A student may take CHEM 105P without taking AP chemistry or a placement exam.

Withdrawal from Courses with Laboratory in Chemistry

Students who withdraw from a course that includes laboratory and then elect that course in another semester must complete both the lecture and laboratory portions of the course the second time.

Chemistry Minor

Requirements for the Chemistry Minor

A minor in chemistry includes:

- CHEM 105/CHEM 105P and CHEM 205, or CHEM 120
- CHEM 211
- CHEM 330 or CHEM 232 [2012-13] or CHEM 331 (see Note, below)
- a choice of CHEM 221 [2011-12] or CHEM 223 or CHEM 222 or CHEM 340 [2012-13] or CHEM 341 or CHEM 361
- one additional 200- or 300-level unit, excluding CHEM 250/ CHEM 350/CHEM 351/CHEM 355/CHM 365.  

Note: In order to satisfy the physical chemistry requirement for the minor, students must choose one of the following two options:

- For students interested in biological applications of chemistry: CHEM 331, for which the prerequisites include CHEM 222 (recommended) or CHEM 223
- OR
- For students interested in the mathematical foundations of chemistry: CHEM 330, for which the prerequisites include MATH 215 (strongly recommended) or MATH 205.

Normally no more than one unit in chemistry from another institution may be counted toward the minor.

**CHEM - Chemistry Courses**

**CHEM 102-01-S - Contemporary Problems in Chemistry with Laboratory (1.25)**

**Topic for 2013-14: Understanding Drugs**

A study of a wide variety of drugs, both legal and illegal. The focus will be on how these molecules affect our minds and bodies based on an understanding of their biochemistry. Topics will include antibiotics, steroids, stimulants, innoculants, narcotics, and hallucinogens. The history, discovery, development, testing, regulation, and prohibition of these substances will also be considered. The laboratory will include synthesis and analysis of an anesthetic and an intoxicant, plus the detection of drugs in our bodies and on currency.

Instructor: Reiberg

Prerequisite: Open to all students except those who have taken any other chemistry course.

Distribution: NPS

Term(s): Spring

**CHEM 105 - Fundamentals of Chemistry with Laboratory (1.25)**

This course is designed for students majoring in the physical and biological sciences as well as those wishing an introduction to modern molecular science. Core principles and applications of chemistry are combined to provide students with a conceptual understanding of chemistry that will help them in both their professional and everyday lives. Topics include principles of nuclear chemistry, atomic and molecular structure, molecular energetics, chemical equilibrium, and chemical kinetics. The laboratory work introduces students to synthesis and structural determination by infrared and other spectroscopic techniques, periodic properties, computational chemistry, and other spectroscopic techniques, and various quantitative methods of analysis. This course is intended for students who have taken one year of high school chemistry and have a math background equivalent to two years of high school algebra. Students who have AP or IB credit in chemistry, and who elect CHEM 105, forfeit the AP or IB credit.

Instructor: Staff

Prerequisite: One year of high school chemistry.

Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken CHEM 105P.

Distribution: NPS; MM

Term(s): Fall; Spring; Summer I

**CHEM 105P - Fundamentals of Chemistry with Laboratory (1.25)**

This course is designed for students majoring in the physical and biological sciences as well as those wishing an introduction to modern molecular science. Core principles and applications of chemistry are combined to provide students with a conceptual understanding of chemistry that will help them in both their professional and everyday lives. Topics include principles of nuclear chemistry, atomic and molecular structure, molecular energetics, chemical equilibrium, and chemical kinetics. The laboratory work introduces students to synthesis and structural determination by infrared and other spectroscopic techniques, periodic properties, computational chemistry, statistical analysis, and various quantitative methods of analysis. This course is intended for students who have taken one year of high school chemistry and have a math background equivalent to two years of high school algebra. Students who have AP or IB credit in chemistry, and who elect CHEM 105, forfeit the AP or IB credit.

Instructor: Staff

Prerequisite: One year of high school chemistry.

Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken CHEM 105P.

Distribution: NPS; MM

Term(s): Fall; Spring; Summer I

**CHEM 106 - Think Like a Scientist, Act Like an Artist: How to Appreciate and Communicate Science (1.0)**

Even though curiosity, creativity, and the desire to benefit society lie at the heart of scientific research, scientists are rarely recognized as creative people, who can connect to their communities; that characterization is typically reserved for artists. The goal for this course is to create an opportunity for any student to experience how scientists approach real-world problems using the scientific process, and to communicate their understanding to the general public through the power of artistic representation. Students will compare and contrast scientists' and artists' approach to problems, and will discuss effective strategies that scientists can borrow from artists to communicate their data-driven understanding of the world around them while showcasing their inherent creativity.

Instructor: Vardar-Ulu

Prerequisite: None

Distribution: NPS

Term(s): Spring

Mandatory: credit/noncredit.

**CHEM 107 - First-Year Seminar: The Science and Culture of Blood (1.0)**

This course will use the central topic of blood as an introduction to biological chemistry and cultural anthropology and as a mechanism for making interdisciplinary connections between the natural and social sciences. We will touch on such scientific aspects as mechanics of fluid movement, solubility, intermolecular forces, immunity, blood typing, sickle cell disease, AIDS, and hemophilia. The social science aspects will include discussions of family and kinship, vampires and other mythologies, menstruation, taboos or rituals around blood as food, blood in art, human/animal sacrifice, and the culture of AIDS. Case studies will introduce students to scientific thinking and integrative skills.

Instructor: Armstrong (Anthropology, Writing), Wolfsen (Chemistry)

Prerequisite: None. Open to first-year students only.

Cross-Listed as: ANTH 107

Distribution: SBA; NPS

Term(s): Fall

No letter grade.

**CHEM 108 - First-Year Seminar: Cutting-Edge Developments in the Sciences: Progress and Controversy (1.0)**

Science in the twenty-first century continues to be a wellspring of innovation, and every day the scientific literature and the popular press provide numerous articles describing cutting-edge work in areas of intense interest to the public, including drug discovery, nanotechnology, energy, nuclear science and the environment. This discussion-based seminar is designed to foster critical reading skills in the current scientific literature and to provide students with a sense of ways in which scientists and math experiences, require additional academic support for the study of introductory chemistry. Includes two additional class meetings each week.

Students in CHEM 105P must enroll in lab section 105P.

Instructor: Miwa

Prerequisite: Permission of the instructor. Open by permission to students who have not fulfilled the Quantitative Reasoning basic skills requirement but are taking QR 140 concurrently. Not open to students who have taken CHEM 105.

Distribution: NPS; MM

Term(s): Fall
CHEM 120 - Intensive Introductory Chemistry with Laboratory (1.25)

A one-semester course for students who have completed more than one year of high school chemistry, replacing CHEM 105 and CHEM 205 as a prerequisite for more advanced chemistry courses. It presents the topics of nuclear chemistry, atomic structure and bonding, periodicity, kinetics, thermodynamics, electrochemistry, equilibrium, acid/base chemistry, solubility, and transition metal chemistry. All of these topics are presented in the context of both historical and contemporary applications. The laboratory includes experiments directly related to topics covered in lecture, an introduction of statistical analysis of data, molecular modeling and computational chemistry, instrumental and classical methods of analysis, thermochromy, and solution equilibria. The course meets for four periods of lecture/discussion and one 3.5-hour laboratory.

Instructor: Arumainayagam
Prerequisite: Open to students who have a score of 5 on the Chemistry AP exam or an IB Chemistry higher level score of 5 or above; open also to students with two years of chemistry but without the requisite AP or IB score who perform sufficiently well on the Chemistry 120 placement exam. Students must have fulfilled the basic skills component of the Quantitative Reasoning requirement. Not open to students who have completed CHEM 105/105P and/or CHEM 205. Students who score 5 on the AP exam or 5 or higher on the IB higher level examination may count one unit of AP or IB credit towards graduation even if they enroll in CHEM 120.

Distribution: NPS; MM; QRF
Term(s): Fall

CHEM 205 - Chemical Analysis and Equilibrium with Laboratory (1.25)

This course builds on the principles introduced in CHEM 105, with an emphasis on chemical equilibrium and analysis, and their role in the chemistry of the environment. Topics include chemical reactions in aqueous solution with particular emphasis on acids and bases; solubility and complexation; electrochemistry; atmospheric chemistry; photochemistry and smog; global warming and acid deposition; sampling and separations; modeling of complex equilibria and kinetic systems; statistical analysis of data; and solid state chemistry of ceramics, zeolites and new novel materials. The laboratory work includes additional experience with instrumental and noninstrumental methods of analysis, sampling, computational chemistry, and solution equilibria.

Instructor: Staff
Prerequisite: CHEM 105 or CHEM 105P and fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken CHEM 120.

Distribution: NPS; MM; QRF
Term(s): Fall; Spring

CHEM 211 - Organic Chemistry I with Laboratory (1.25)

Topics covered include: stereochemistry, synthesis and reactions of alkanes, alkenes, alkynes, alkyl halides, alcohols and ethers, nomenclature of organic functional groups, IR, and GC/MS.

Instructor: Staff
Prerequisite: CHEM 105, CHEM 105P, or CHEM 120, or permission of the department.

Distribution: NPS
Term(s): Fall; Spring

During Summer Session this is a six-week course.

CHEM 212 - Organic Chemistry II with Laboratory (1.25)

A continuation of CHEM 211. Includes NMR spectroscopy, synthesis, reactions of aromatic and carbonyl compounds, amines, and carbohydrates. In addition, students are expected to study the chemical literature and write a short chemistry review paper.

Instructor: Staff
Prerequisite: CHEM 211

Distribution: NPS
Term(s): Fall; Spring

CHEM 220 - Principles of Biochemistry (1.0)

An introduction to the chemical foundations of life processes, with focus on theory and applications relevant to medicine. Topics include bioenergetics, metabolism, and macromolecular structure. Some basic skills such as data analysis and understanding of the primary literature will be approached through in-class discussions and application to current biomedical problems. This course is suitable for students wanting an overview of biochemistry, but it will not contain the experimental introduction to biochemical methods and instrumentation laboratory required for some majors.

Instructor: Wolfson
Prerequisite: CHEM 205, CHEM 211, CHEM 212, and BIOC 110/BISC 112; or CHEM 120, CHEM 211, CHEM 212, and BISC 110/BISC 112.

Distribution: NPS
Term(s): Spring

Does not count toward the minimum major in Chemistry. Not open to students who have completed CHEM 222 or CHEM/BIOC 223.

CHEM 222 - Introduction to Biochemistry with Laboratory (1.25)

A study of the chemistry of biomolecules and macromolecular assemblies, with emphasis on structure-function relationships; an introduction to bioenergetics, enzyme kinetics, and metabolism. This course is intended for students who plan to complete only one semester of biochemistry course work at Wellesley. Students who plan to continue with a second semester should instead enroll in CHEM 223. The laboratory introduces modern laboratory techniques for the study of proteins and nucleic acids, as well as developing skills of experimental design and critical data analysis, and should be of particular value to students planning or engaged in independent research.

Instructor: Hearn
Prerequisite: CHEM 212, or permission of instructor

Distribution: NPS
Term(s): Fall

CHEM 223 - Fundamentals of Biochemistry: Understanding the Physical Principles of Biochemistry and the Molecules of Life with Laboratory (1.25)

A gateway course that introduces the fundamental multidisciplinary concepts governing life at the molecular level. Following a review of aqueous equilibria and thermodynamic, kinetic, and spectroscopic principles, the emphasis will be on the molecular structure, assembly, and interactions of biological macromolecules and modern techniques for studying them. Proteins, nucleic acids, carbohydrates, and lipids will be covered to provide a molecular understanding of nature and to build an appreciation for its structural complexity. This course is designed to prepare students for the qualitative and quantitative approaches used in the theoretical and experimental studies of biological problems covered in the upper-level courses BIOC 323/CHEM 323, BIOC 331/CHEM 331, and BIOC 320/CHEM 320.

Instructor: Elmore
Prerequisite: CHEM 205 or CHEM 120, CHEM 211, and BISC 110/BISC 112. Not open to students who have taken CHEM 221.

Cross-Listed as: BIOC 223
Distribution: NPS
Term(s): Spring

CHEM 250 - Research or Individual Study (1.0)

Research is supervised by a member of the Wellesley College chemistry department. Off-campus research requires active participation of a Wellesley faculty member throughout the research period. Course fulfills the research requirement for the major only upon completion of a paper of 8-10 pages on the research and a presentation to the chemistry department during one of the two research seminar presentation periods. A copy of the paper must be submitted to the chair of the department. (Note: Paid internships are not eligible for CHEM 250.)

Prerequisite: Open by permission to students who have taken at least one chemistry course and are not eligible for CHEM 350.

Distribution: None
Term(s): Fall; Spring

CHEM 306 - Seminar (1.0)

This course will cover a variety of aspects about drugs: discovery, development, mechanisms of action, metabolism, pharmacokinetics, pharmacodynamics, toxicity, clinical trials, and legal aspects. Utilizing clinically important drugs as examples, chemistry principles will be reviewed and applied to understand the concepts of medicine at a molecular level. Such understanding can be the foundation for the further drug discovery and elucidation of the mechanism of drug action. One of the objectives of this course is to provide students with the ability to integrate concepts from chemistry and medicine in an interdisciplinary way. This course will prepare the students for future study or career in fields such as chemistry, medicine, law, and business management.

Instructor: Huang
Prerequisite: One semester organic chemistry course or permission of instructor

Distribution: NPS
Term(s): Summer

CHEM 306-01 F - Seminar (1.0)

Topic for 2014-15: The Organic Chemistry of Drug Design and Discovery

This discussion-based seminar course will examine the ways in which the methods of synthetic organic chemistry are used in the design and discovery of new medications. Families of drugs—such as antibiotics, neuroleptics, anti-arthritics and many others—will be used to demonstrate the relationships between compound structure and drug activity. The emphasis will be on the processes by which organic chemists devise structure changes to improve drug efficacy or to minimize drug side effects.

Instructor: Hearn
Prerequisite: CHEM 212, or permission of instructor
CHEM 306-02 -F - Seminar (1.0)

Foods are chemicals that kindle our sensory pleasure while food recipes and preparation techniques reflect the oldest practical results of chemical research. This seminar is a hands-on exploration of the unique physicochemical properties of the food we eat and an excellent opportunity to apply basic scientific principles introduced in other courses. It will cover the chemical composition of food, specifically proteins, carbohydrates, and lipids, as well as their chemical and physical transformations during food preparation. Topics include flavor, color, texture, and smell of food, enzymatic reactions in fruits and vegetables, colloidial food and food emulsions, cheese making, joys of pastries and sweets, as well as the requirements for a successful kitchen experiment. Class meetings will combine analysis and discussions of original literature, short videos and demonstrations, tasty and fragrant in-class experiments, a visit to a food production site, and extensive group work culminating in student presentations.

Instructor: Vardar-Ulu
Prerequisite: CHEM 205 or CHEM 120, and CHEM 211
Distribution: NPS
Term(s): Fall

CHEM 309 - Computational Chemistry (1.0)

Computational chemistry now plays a crucial role in both the design and the analysis of molecules and systems across industries including pharmaceuticals, materials, and manufacturing. This course will provide students with a conceptual understanding of computational modeling techniques pertinent to chemistry along with practical experience applying these methods. Specific techniques considered in the course may include quantum mechanical ab initio and semiempirical models, molecular mechanics, molecular dynamics simulations, optimization and sampling frameworks, and chemical informatics, with case studies coming from current literature. Emphasis will be placed on the trade-offs between model accuracy and efficiency, and fundamental principles in computer programming, numerical methods, hardware, and software will be introduced as they relate to this trade-off. Application of these methods to solve problems in diverse areas, such as protein structure, drug design, organic reactivity, and inorganic systems, will also be emphasized. In addition to regular computer-based exercises, the course will culminate in an independent project utilizing techniques presented in the course.

Instructor: Radhakrishnan
Prerequisite: CHEM 205 or CHEM 120 and CHEM 211 and MATH 116, or permission of the instructor.
Distribution: NPS; MM
Term(s): Not Offered

CHEM 317 - Advanced Organic Chemistry: Physical Organic Chemistry (1.0)

Exploration of organic reactions and mechanisms through an understanding of the physical fundamentals of organic chemistry. Emphasis will be on the experimental study of reaction mechanisms. Topics include photochemistry, cycladdition reactions, transition state theory, and molecular orbital theory as applied to organic chemistry. The course draws extensively from primary literature.

Instructor: Miwa
Prerequisite: CHEM 212
Distribution: NPS
Term(s): Spring

CHEM 318 - Advanced Organic Chemistry: Reactions, Mechanisms, and Modern Synthetic Methods (1.0)

This course will cover strategies and tactics for assembling complex organic molecules. Considerable emphasis will be placed on stereoselective synthesis, including the stereoselective construction of ring systems, acyclic stereocontrol, and asymmetric catalysis. Reaction mechanisms will also be emphasized throughout the semester. Lecture topics will be accompanied by case studies drawn from the current chemical literature. The course will culminate in an independent project involving pharmaceuticals and other molecules of medicinal importance.

Prerequisite: CHEM 212
Distribution: NPS
Term(s): Not Offered

CHEM 320 - Integrated Biophysical Chemistry Advanced Laboratory (1.0)

An intensive laboratory course offering a multweek independent research project and training in experimental applications of physical chemistry and biochemistry. Topics will include spectroscopy, chemical thermodynamics of biomolecules, and enzyme kinetics. This course will emphasize independent hypothesis development and experimental design skills as well as professional conference-style presentation of results. Students will read primary literature, construct a research proposal, develop their own laboratory protocols manual, conduct experiments using a variety of instrumentation, and present their research in a poster format at the end of the semester. One class period per week plus one lab and mandatory weekly meetings with instructor.

Instructor: Oakes
Prerequisite: CHEM 223
Cross-Listed as: BIOC 320
Distribution: NPS
Term(s): Fall

Ann E. Maurer '51 Speaking Intensive Course

CHEM 323 - Advanced Biochemistry: Functions of Biological Molecules (1.0)

Consideration of the function and regulation of biomolecules and macromolecular assemblies, with particular emphasis on binding proteins, enzymes, and metabolic pathways. Contemporary experimental and computational techniques used to study these systems will be discussed, with a focus on applications in the primary literature. Students will be expected to express increased intellectual independence on assignments, including the development of independent research proposals.

Instructor: Elmore
Prerequisite: CHEM 223. Not open to students who have taken CHEM 328.
Cross-Listed as: BIOC 323
Distribution: NPS
Term(s): Fall

CHEM 330 - Physical Chemistry I with Laboratory (1.25)

Molecular basis of chemistry; intensive overview of theories, models, and techniques of physical chemistry; extensive coverage of quantum mechanics; applications of quantum mechanics to atomic and molecular structure, and spectroscopy; classical thermodynamics of gases and solutions; intermediate topics in chemical kinetics and introduction to reaction dynamics; basic statistical mechanics to calculate thermodynamic variables and equilibrium constants.

Instructor: Arumainayagam
Prerequisite: CHEM 211 or by permission of the department; PHYS 104 or PHYS 107, MATH 215 (strongly recommended) or MATH 205. Not open to students who have taken CHEM 232, CHEM 233, CHEM 331, CHEM 334, or CHEM 335.
Distribution: NPS; MM; RF
Term(s): Fall

CHEM 331 - Physical Chemistry of Biological Systems: The Fundamental Models of Biological Molecules and Process (1.0)

Provides a survey of fundamental principles in physical chemistry and how they relate specifically to the study of biological molecules and processes. Emphasis is placed on empowering students to understand, evaluate, and use models as approximations for the biomolecular world. Models are mathematically represented and provide both qualitative and quantitative insight into biologically relevant systems. Commonly used experimental techniques, such as spectroscopy and calorimetry, are explained from first principles with quantum mechanical and statistical mechanical models, and computational applications such as protein structure prediction and molecular design are explained through physical models such as molecular mechanics and dynamics.

Instructor: Radhakrishnan
Prerequisite: BIOC 223/CHEM 223 (for BIOC majors) or CHEM 222 (for CHEM minors). and MATH 116. Not open to students who have taken CHEM 232.
Cross-Listed as: BIOC 331
Distribution: NPS; MM
Term(s): Spring

Does not count toward the chemistry major, but counts toward the biological chemistry major and the chemistry minor.

CHEM 335 - Physical Chemistry II with Laboratory (1.25)

Quantum mechanics, group theory, and statistical thermodynamics provide the foundation for molecular spectroscopy that is used to understand the chemical nature of molecules. By addressing modern chemical problems, students will gain insight into how chemical reactions occur while learning about exciting, vibrant fields of modern chemical research. This advanced course will emphasize the mathematical basis of physical chemistry with an emphasis on matrix representations. The essential fundamentals will be reinforced while modern applications and new developments in experimental and theoretical
CHEM 350 and five to six hours for CHEM 350H. (Note: Paid internships are not eligible for CHEM 355.)

CHEM 350 - Research or Individual Study (1.0)
Research is supervised by a member of the Wellesley College chemistry department. Students are expected to devote (per week) 10-12 hours for CHEM 350 and five to six hours for CHEM 350H. Student projects will be planned accordingly. Off-campus research requires active participation of a Wellesley faculty member throughout the research period. Course fulfills the research requirement for the major only upon the completion of a paper of 8-10 pages on the research and a presentation to the chemistry department during one of the two research seminar presentation periods. A copy of the paper must be submitted to the chair of the department. (Note: Paid internships are not eligible for CHEM 350.)
Prerequisite: Open by permission to students who have taken at least three chemistry courses.
Distribution: None
Term(s): Fall; Spring

CHEM 350H - Research or Individual Study (0.5)
Research is supervised by a member of the Wellesley College chemistry department. Students are expected to devote (per week) 10-12 hours for CHEM 350 and five to six hours for CHEM 350H.
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

CHEM 355 - Chemistry Thesis Research (1.0)
The first course in a two-semester investigation of a significant research problem, culminating in a significant research problem, culminating in departmental honors upon the completion of the second semester of a thesis and defense of that thesis before a committee of faculty from the chemistry department. Students in 360 and 370 will be expected to attend the weekly departmental honors seminar, listed in the schedule of classes. The seminar provides a forum for students conducting independent research to present their work to fellow students and faculty. (See Academic Distinctions.) If the first semester of a thesis is used to fulfill the research requirement, the student must complete a paper of 8-10 pages on the research and give a presentation to the chemistry department during one of the two research seminar presentation period. A copy of the paper must be submitted to the chair of the department. (Note: Paid internships are not eligible for CHEM 360.)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

CHEM 360 - Senior Thesis Research (1.0)
CHEM 360 is the first course in a two-semester investigation of a significant research problem, culminating in departmental honors upon the completion of the second semester of a thesis and defense of that thesis before a committee of faculty from the chemistry department. Students in 360 and 370 will be expected to attend the weekly departmental honors seminar, listed in the schedule of classes. The seminar provides a forum for students conducting independent research to present their work to fellow students and faculty. (See Academic Distinctions.) If the first semester of a thesis is used to fulfill the research requirement, the student must complete a paper of 8-10 pages on the research and give a presentation to the chemistry department during one of the two research seminar presentation periods. A copy of the paper must be submitted to the chair of the department. (Note: Paid internships are not eligible for CHEM 360.)
Prerequisite: CHEM 360 and permission of department.
Distribution: None
Term(s): Fall; Spring

CHEM 361 - Analytical Chemistry with Laboratory (1.25)
Classical and instrumental methods of chemical analysis. Topics include statistical analysis, electronics and circuitry, electrochemistry, spectroscopy, and separations science with special attention to instrument design and function. The course work emphasizes the practical applications of chemical instrumentation and methods to address questions in areas ranging from art history to biochemistry to materials science. The laboratory work focuses on the design, construction, and use of chemical instrumentation along with the interfacing of instruments with computers.
Instructor: Mukundan
Prerequisite: CHEM 205 and CHEM 211 or CHEM 120 and CHEM 211.
Distribution: NPS, QRF
Term(s): Fall

CHEM 365 - Chemistry Thesis (1.0)
The second course in a two-semester investigation of a significant research problem, culminating in the preparation of a thesis and defense of that thesis before a committee of faculty from the chemistry department. Students will participate in a regular weekly seminar program, in which they will discuss their research progress informally with faculty and student colleagues and gain familiarity with contemporary research through presentations by outside seminar speakers. This route does not lead to departmental honors. Course counts toward the research requirement if the student completes the thesis and the thesis presentation. See Academic Distinctions. (Note: Paid internships are not eligible for CHEM 370.)
Prerequisite: CHEM 360 and permission of department.
Distribution: None
Term(s): Fall; Spring

CHEM 370 - Senior Thesis (1.0)
CHEM 370 is the second course in a two-semester investigation of a significant research problem, culminating in departmental honors upon the completion of a thesis and defense of that thesis before a committee of faculty from the chemistry department. Students will participate in a regular weekly seminar program, in which they will discuss their research progress informally with faculty and student colleagues and gain familiarity with contemporary research through presentations by outside seminar speakers. Course counts toward the research requirement if the student completes the thesis and the thesis presentation. See Academic Distinctions. (Note: Paid internships are not eligible for CHEM 370.)
Prerequisite: CHEM 360 and permission of department.
Distribution: None
Term(s): Fall; Spring
CHINESE STUDIES

See East Asian Languages and Culture
AN INTERDEPARTMENTAL MAJOR AND MINOR

Co-director: Viano, Wood
Professor: Viano
Assistant Professor: Knoff
Senior Lecturer: Wood
Participating Faculty: Berman (Art), Carroll (Art), Ceazair-Thompson (English), Creff (Women's and Gender Studies), Kelley (Art), Karakasidou (Anthropology), Laviosa (Italian Studies), Mata (Women's and Gender Studies), Matzner (Anthropology), Mekuria (Art), Nolden (German), Oles (Art), Olsen (Art), Prabhu (French), Shetley (English), Song (East Asian Languages and Cultures), Zimmerman (East Asian Languages and Cultures)
The Cinema and Media Studies program (CAMS) offers an innovative, interdisciplinary major and minor focused on the history, theory, and practice of the media that characterize modernity and those new media that are currently emerging. CAMS engages with all forms of still, moving-image, and screen-based audio-visual media, from the dominant forms of the last century (film, television, and still photography) through today’s emergent forms (digital, Web, gallery-based, and more). While the major requires students to select one of two distinct tracks—in Cinema/Media Studies or Video/Media Production—an innovative feature of the major is that we expect students in all tracks to be conversant in both theory and production. Students in the program come to understand theory through practice, and practice through theory.

Cinema and Media Studies Major

Goals for the Cinema and Media Studies Major

Students in the CAMS major will learn that the various media we use/interact with are not only the products of human imagination and expression, but are an influential, perhaps primary, means by which we come to understand the world and ourselves in it as thinking, communicating, and interacting members of ethnicities, genders, classes, societies, nations, and global communities.

Students who complete the CAMS major will have:

- Acquired a broad-based contemporary and historical knowledge of international film and audio-visual media
- Acquired a set of critical and analytical tools for the study of film and audio-visual media
- Developed a critical awareness of the cultural, political and economic role of film and media in modern societies
- Produced media works in the form or forms of their choice
- Explored, through their own processes of image-making, the relationships between technology, aesthetic process, and social impact of modern media culture.

Requirements for the Cinema and Media Studies Major

The major in Cinema and Media Studies requires 10 units and offers two areas of concentration, Cinema/Media Studies and Video/Media Production. Students choose either the Studies track or the Production track at the time they elect the major.

Common Requirements

Students in both tracks are required to take the following:

1. CAMS 101, Introduction to Cinema and Media Studies
2. CAMS 201, Between Magic and Reality: A Century of Cinema, Part I
3. CAMS 202, Between Reality and Magic: A Century of Cinema, Part II
4. One theory course, which can be fulfilled by one of these two courses:
   - CAMS 200, Thinking Through Cinema: Film and Media Theory
   - CAMS 218, Theories of Media from Photography to the Internet

Students entering before Fall 2014 may also use:
   - PHIL 203, Philosophy of Art

5. One production course, to be chosen among:
   - CAMS 135/ARTS 165, Introduction to Video Production
   - CAMS 13B/ARTS 108, Photography I
   - CAMS 234/ENG 204, The Art of Screenwriting

In addition to the common requirements, students electing the Studies track must take:

6. Two core courses, to be chosen from among these:
   - CAMS 209, Desiring Difference: Gender and Sexuality in Cinema
   - CAMS 213, From Berlin and London to Hollywood (in English)
   - CAMS 222, "Being There": Documentary Film and Media
   - CAMS 225, The Great Beauty: Italian Transnational Cinema and Its Legacy
   - CAMS 227, Television
   - CAMS 270, Dark and Light of the Internet
   - CAMS 272, Games and Play: History and Theories of Video Games

7. Two 300-level courses in CAMS or as approved by the directors.

8. At least one additional CAMS course, which may be chosen from among the CAMS cross-listed and related courses.

In addition to the common requirements, students electing the Production track must take:

6. One core course (to be chosen from the list above)
7. Four additional studio courses to be selected among the following (or equivalent) courses:
   - CAMS 235/ARTS 265, Intermediate Video Production/The Documentary Form
   - CAMS 335/ARTS 365, Advanced Video Production

Students entering before Fall 2014 may also use:
   - PHIL 203, Philosophy of Art

In addition to the common requirements, students electing the Production track must take:

6. One core course (to be chosen from the list above)
7. Four additional studio courses to be selected among the following (or equivalent) courses:
   - CAMS 235/ARTS 265, Intermediate Video Production/The Documentary Form
   - CAMS 335/ARTS 365, Advanced Video Production

All majors must ensure that they take at least two courses in CAMS (or as approved by the directors) at the 300 level; one of these may be a 350. Normally all 300-level work must be taken at Wellesley. CAMS 360 and CAMS 370 do not count toward the 300-level requirement, but are honors-level courses taken in addition to the 10 courses required for the major.

Honors

Candidates for Departmental Honors in CAMS complete a senior thesis in two units of independent study/thesis (CAMS 360, CAMS 370) undertaken in the fall and spring of the senior year. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the program may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

For majors in the Studies track, the route to honors is writing a thesis paper and passing an oral examination on the content and argument of the paper. A senior thesis engages a topic involving year-long research resulting in a polished paper of 50-100 pages in length. For a student who has a clear idea of what she wants to investigate, a well-considered plan of research, and a willingness to accept the responsibility of working independently, a senior thesis can be a rewarding experience.

Honors in the Production track is earned by the demonstration of excellence in a self-directed senior thesis project. A Production thesis consists of an extended piece or body of visual work produced over two semesters; this work normally involves research, script-writing, and pre-production, production, and post-production phases. The final work is accompanied by a paper of 15-20 pages documenting the development of the project, and is exhibited at a public showing at the end of the semester.

Courses for Credit Toward the Cinema and Media Studies Major

For the following courses to count toward the major, CAMS majors are advised to request approval from the Program Director before registering.

- AMST 207: Rainbow Cowboys (and Girls)
- AFR 207: Images of Africans People Through the Cinema
- AFR 222: Blacks and Women in American Cinema
- AFR 261: History of Black American Cinema
- ANTH 219/CAMS 219: Balkan Cinematic Representations
- ANTH 239: Visual Culture of South Asia
CAMS - Cinema and Media Studies Courses

CAMS 101 - Introduction to Cinema and Media Studies (1.0)

CAMS 101 introduces students to the study of audiovisual media, including oral, print, photographic, cinematic, broadcast, and digital media forms and practices. Using a case study approach, we will explore the nature of audiovisual communication (representation in historical, cultural, and symbolic contexts), and examine different theoretical and critical perspectives on the role and power of media to influence our social values, political beliefs, identities, and behaviors. We'll also consider how consumers of media representations can and do contest and unsettle their embedded messages. Our emphasis will be on developing the research and analytical tools, modes of reading, and forms of critical practice that can help us to negotiate the increasingly mediated world in which we live. 

Instructor: Knouf (Fall); Wood (Spring) 
Prerequisite: None. Open to all students. CAMS 101 is required for all students majoring or minoring in Cinema and Media Studies, and should ideally be taken before any other CAMS course.

Term(s): Fall; Spring 
Distribution: ARS

CAMS 105 - First-Year Seminar: Twenty-first-Century Cinema: An Introduction to the Cinematic Experience (1.0)

An introduction to the art of film designed for first-year students, this course explores the excitement of contemporary global filmmaking. Through selected films and readings, the course focuses on the basic elements of filmic language, including mise-en-scène, editing, cinematography, and the relation of sound to image, and narrative structure. Students learn to view the art of film not only as a medium for personal expression, but also as a complex interplay between aesthetic, ideological, economic, and technological concerns. Discussions will examine in detail how today's filmmakers are utilizing both traditional cinematic forms and emerging new media technologies and the ways they are changing the cinematic experience in the twenty-first century.

Instructor: Viano 
Prerequisite: None. Open to first-year students only. 
Distribution: ARS

Terms(s): Fall, Spring 

CAMS 200 - Thinking Through Cinema: Film and Media Theory (1.0)

Cinema has impacted every aspect of our culture, transforming politics, influencing other art forms, and redefining modern conceptions of reality, temporality, and human desire. This course is an overview of the major theoretical issues raised in a century of cinema by examining the ways thinkers and filmmakers have engaged with the medium through this innovative and rigorous new form of scholarship. We explore the major texts in the history of film theory, from early writings on film as an emergent medium to contemporary post-cinema discussions on digital convergence. Topics include cinematic specificity, indexicality, theories of ideology, spectators and perception, structuralism and poststructuralism, semiotics, psychoanalysis, postcolonial, feminist, and queer theories. These theoretical texts contextualize by weekly film screenings, lectures, and discussion.

Instructor: Staff 
Prerequisite: CAMS 101 or ARTH 101 or permission of the instructor. 
Distribution: ARS

Terms(s): Offered

CAMS 201 - Between Magic and Reality: A Century of Cinema, Part 1 (1.0)

Cinema's first century is a vast, wondrous universe where art, media technology, and political economy variously intertwine. This course charts a path through this universe by casting a spotlight on exemplary constellations: films that captured our imagination, significant artists, groundbreaking movements, transnational synergies. Part 1 explores how in less than 20 years a fairground attraction

SPAN 264 Progress and Tribulations: Spanish Literature and Cinema in the Third Millennium (2000-Present)
spread to every country in the world, and became the greatest industrialized art form of the twentieth century, agent of modernity and globalization—how the marvelous creativity of silent films laid the stylistic foundations for everything that followed; how the advent of sound played out in a world in the grip of economic depression and totalitarian regimes; and how World War II brought about neorealism’s cinematic revolution.

Instructor: Viano
Prerequisite: CAMS 101 or ARTH 101 or permission of the instructor. Required for all students majoring or minoring in Cinema and Media Studies. Not open to students who have taken CAMS 102 [2011-12].
Distribution: ARS
Term(s): Spring

CAMS 205 - History of Japanese Cinema (in English) (1.0)
From the long take and the pictorial composition to the swirling action of the sword fight, we explore how Japanese directors first adopted and then transformed the language of cinema. We move chronologically, from early silent film to recent independent cinema, and we view films that speak to the concerns of each subsequent generation. Because Japanese directors have created a visual style that counters certain Hollywood conventions, we also devote class time to learning how to read film. Readings from literature and history enhance study. Directors include: Mizoguchi, Ozu, Kurosawa, Oshima, Imamura, Koreeda, and Nishikawa. No previous knowledge of Japan, Japanese, or film studies is required.
Instructor: Zimmermann (East Asian Languages and Cultures)
Prerequisite: None
Cross-Listed as: JPN 256
Distribution: LL; ARS
Term(s): Not Offered

CAMS 207 - History of Photography: From Invention to Media Age (1.0)
Photography is so much a part of our private and public lives, and it plays such an influential role in our environment, that we often forget to examine its aesthetics, meanings, and histories. This course provides an introduction to these analyses by examining the history of photography from the 1830s to the present. Considering fine arts and mass media practices, the class will examine the works of individual practitioners as well as the emergence of technologies, aesthetic directions, markets, and meanings.
Instructor: Berman (Art)
Prerequisite: None
Cross-Listed as: ARTH 226
Distribution: ARS
Term(s): Fall
Normally offered in alternate years.

CAMS 219 - Balkan Cinematic Representations (1.0)
In the course of Europe’s road to modernity, the southeastern corner of the continent became known as the Balkans. The Western imagination rendered the peoples and the rich cultures of the area as backward, violent, and underdeveloped. This course examines the imagery of the area and its people through film. We will explore the use of history by filmmakers and the use of films in understanding a number of issues in the history of the Balkans. The course will trace the adoration of ancient Greek antiquity, the legacy of Byzantium and Orthodox Christianity as well as the Ottoman influence and the appearance of Islam. The historical past is r(e)constructed and r(e)presented in film, as are the national awakenings and liberation movements. The list of films we will watch and the anthropological and historical readings we will do aspire to cover various aspects of Balkan societies as revealed through visual and cinematic representations. Balkan film is politically, socially, and historically engaged, and we will use film narratives and stories to understand the area’s diverse landscapes and cultures, religions and identities, love and hatred.
Instructor: Karakusidou (Anthropology)
Prerequisite: None
Cross-Listed as: ANTH 219
Distribution: SBA
Term(s): Not Offered

CAMS 222 - “Being There”: Documentary Film and Media (1.0)
This course surveys the history, theory, and practice of documentary film, considering the ways its forms and ethics have changed since the beginning of cinema. We study the major modes of the documentary, including cinema verité, direct cinema, investigative documentary, ethnographic film, agit-prop and activist media, and the personal essay, as well as recent forms such as the docudrama, the archival film, "mockumentary," and Web-based forms. We will examine the "reality effects" of these works, focusing on the ways in which they create their authority. We will ask: How do these films shape notions of truth, reality, and point of view? What are the ethics and politics of representation and who speaks for whom when we watch a documentary? What do documentaries make visible or conceal?

Instructor: Wood
Prerequisite: CAMS 101 or ARTH 101 or permission of the instructor. CAMS core course. Meets core requirement for CAMS major and minor.
Distribution: ARS
Term(s): Fall

CAMS 225 - The Great Beauty: Transnational Italian Cinema and Its Legacies (in English) (1.0)

In the aftermath of the neorealist revolution, a unique synergy of geopolitical, cultural, and aesthetic factors propelled several Italian filmmakers into the international limelight. During what came to be known as Italian cinema’s golden age, many of its epochal films were in fact made across national borders, in a dialogue with other (film) cultures. Whether they treated the history of another country (e.g. Algeria’s anticolonial struggle), rewrote quintessentially foreign genres (e.g. Dario Argento’s horror), or even dared to challenge Walt Disney (Fantasia’s remake Allegro ma non troppo), these films exemplified the many facets of what today we would call “Italian transnational cinema.” This course examines some of the most significant films from such period and traces their influence onto their twenty first century successors.

Instructor: Viano
Prerequisite: None
Cross-Listed as: ITAS 225
Distribution: ARS
Term(s): Not Offered

CAMS 227 - Television (1.0)

Television today is omnipresent and, it sometimes seems, omnipotent: seen by millions worldwide, generating massive revenue, enormously influential in shaping conceptions of ourselves and our world. The course will begin with a study of the specific form of television and of the development of televisual style (and spectatorial perception) since the invention of the medium. We will consider how television sells not just consumer goods but cultural myths and self-images: of family, class, and national identity; gender roles, sexuality, and lifestyle; and race and ethnicity. We will explore the ways in which industrial and regulatory practices operate behind the scenes to shape and control what and who gets broadcast, and how. The course will conclude with a look ahead to television’s next frontiers.

Instructor: Wood
Prerequisite: CAMS 101, CAMS 135/ARTS 165, or ARTH 101 or permission of the instructor. CAMS core course. Meets core requirement for CAMS major and minor.
Distribution: ARS
Term(s): Not Offered

CAMS 229 - Transnational Journeys in European Women’s Filmmaking (1.0)

The purpose of this course is to examine award winning films directed by European women, from activist documentaries to experimental and mainstream features. These artists set their narratives in a milieu of national contexts, diasporic identities, and post-national transformations. They also weave together private spheres and public events, revisit historical wounds, explore contemporary realities and assemble these elements as the tiles of a socio-cultural mosaic. Examined through feminist theory, the films selected for this course explore the poetics of presence and (in)visibility. This course also aims to develop a transnational comparative film analysis.

Instructor: Laviosa
Prerequisite: None
Distribution: ARS
Term(s): Spring

CAMS 230 - Moving Image Studio (1.0)

Creative exploration of the moving image as it relates to digital methods of animation, video, and motion graphics. Hands-on production of audio, image, text, and time-based media synthesis, with a conceptual emphasis on nonlinear narrative, communication design, and visual expression. Screenings and lectures on historical and contemporary practices, coupled with readings and discussions of the theoretical, artistic, and cultural issues in the moving image.

Instructor: Olsen (Studio Art)
Prerequisite: CAMS 138/ARTS 108, CAMS 135/ARTS 165, or CAMS 239/ARTS 221
Cross-Listed as: ARTS 260
Distribution: ARS
Term(s): Fall

CAMS 231 - Why is Miley in Malaysia?: Global Art, Media, and Culture (1.0)

How did Beyoncé become an international superstar? How can the Guggenheim Museum operate successfully in countries as diverse as the U.S., Spain, and Abu Dhabi? How will Al Jazeera in English differ from Al Jazeera in Arabic? This course explores the changing relationships between art, culture, media, and society in our increasingly global world. How do national artistic and cultural institutions change as nations change? How is the role of gallerists, publishers, museums, and the media transformed when creators and their creations circulate widely?

Instructor: Levitt (Sociology)
Prerequisite: One 100-level unit or permission of the instructor.
Cross-Listed as: SOC 231
Distribution: SBA
Term(s): Spring

This course counts towards the major in LAST

CAMS 232 - Anthropology of Media (1.0)

This course introduces students to key analytic frameworks through which media and the mediation of culture have been examined. Using an anthropological approach, students will explore how media as representation and as cultural practice have been fundamental to the (trans)formation of modern sensibilities and social relations. We will examine various technologies of mediation—from the Maussian body as “Man’s first technical instrument” to print capitalism, radio and casette cultures, cinematic and televisual publics, war journalism, the digital revolution, and the political milieu of spin and public relations. Themes in this course include: media in the transformation of the senses; media in the production of cultural subjectivities and publics; and the social worlds and cultural logics of media institutions and sites of production.

Instructor: Karakasidou (Anthropology)
Prerequisite: None
Cross-Listed as: ANTH 232
Distribution: SBA
Term(s): Not Offered

CAMS 234 - The Art of Screenwriting (1.0)

A creative writing course in a workshop setting for those interested in the theory and practice of writing for film. The course focuses on the full-length feature film, both original screenplays and screen adaptations of literary work. Enrollment is limited to 15 students.

Instructor: Cezair-Thompson (English)
Prerequisite: None
Cross-Listed as: ENG 204
Distribution: LI; ARS
Term(s): Fall

CAMS 235 - Intermediate Video Production/The Documentary Form (1.0)

An exploration of the techniques and styles of producing documentary videos. We will survey current issues surrounding objectivity and representation as it concerns the documentary form. Strong emphasis on storytelling, Special focus on lighting, sound recording, and editing. We will screen and analyze various styles of documentary films. Final projects will be short documentaries.

Instructor: Mekuria (Studio Art)
Prerequisite: CAMS 135/ARTS 165 or permission of the instructor required.
Cross-Listed as: ARTS 265
Distribution: ARS
Term(s): Not Offered

CAMS 238 - Intermediate Digital Photography (1.0)

Building on the foundation of ARTS 108/CAMS 138, Intermediate Digital Photography continues to develop students’ conceptual and technical acumen, while introducing advanced studio and location lighting, digital retouching, inkjet printing, and basic multimedia production. Contemporary and historic theories of photography as contemporary art and the aesthetic and cultural implications of the ubiquity of digital photography will guide assignments. Emphasis is on developing project-based photography through cultivating research, planning, conceptual, and production skills.

Instructor: Kelley (Studio Art)
Prerequisite: CAMS 138/ARTS 108 or permission of the instructor required.
Cross-Listed as: ARTS 208
Distribution: ARS
Term(s): Spring
Studio fee of $35.

CAMS 239 - Digital Imaging (1.0)

Introduction to artistic production through electronic imaging, manipulation, and output. Emphasis on expression, continuity, and sequential structuring of visuals through the integration of image, type, and motion. Image output for print, screen, and adaptive surfaces are explored in conjunction with production techniques of image capture, lighting, and processing. Lectures and screenings of historic and contemporary uses of technology for artistic and social application of electronic imaging.
CAMS 240 - Gendering the Bronze Screen: Representations of Chicanas/Latinas in Film (1.0)

The history of Chican@ and Latin@ on the big screen is a long and complicated one. To understand the changes that have occurred in the representation of Chican@/Latin@, this course proposes an analysis of films that trace various stereotypes to examine how those images have been perpetuated, altered, and ultimately resisted. From the Anglicizing of names to the erasure of racial backgrounds, the ways in which Chican@/Latin@ are represented has been contingent on ideologies of race, gender, class and sexuality. We will be examining how films have typecast Chicanas/Latinas as criminals or as “exotic” based on their status as women of color. Chino/Latino filmmakers continue the practice of casting Chicanas/Latinas solely as supporting characters to male protagonists.

Instructor: Mata (Women’s and Gender Studies)
Prerequisite: None
Cross-Listed as: WGST 223
Distribution: ARS
Term(s): Fall

CAMS 241 - Asian American Women in Film (1.0)

This course will serve as an introduction to representations of Asian/American women in film beginning with silent classics and ending with contemporary social media. In the first half of the course, we examine the legacy of Orientalism, the politics of interracial romance, the phenomenon of “yellow face”, and the different constructions of Asian American femininity, masculinity, and sexuality. In the second half of the course, we look at “Asian American cinema” where our focus will be on sexuality. In the second half of the course, we look at the Internet as an unmitigated good promising social change, or a place of great danger that enables unparalleled amounts of both surveillance and bad behavior. Charting a route between these poles, this course explores the Internet through a close attention to its materiality and history. Topics include the intersection of the state, corporations, the military, and academia in the Internet’s construction; the formation of identity; representations of gender, race, class, and ethnicity; artistic interventions; the role of free software movements and hacking; legal questions; changes in commerce; and forms of participatory media. Important to our investigation is an experience with the Internet-as-material, as such, we will conduct exercises that explore the technical makeup of the Internet (no prior technical knowledge necessary). The course will show how the technical and social dimensions of the Internet mutually constitute each other.

Instructor: Knouf
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

CAMS 270 - The Light and the Dark of the Net: Histories and Theories of the Internet (1.0)

The Internet is often described in binary terms: as an unmitigated good promising positive social change, or a place of great danger that enables unparalleled amounts of both surveillance and bad behavior. The Internet as an experience is an unmitigated good promising positive social change, or a place of great danger that enables unparalleled amounts of both surveillance and bad behavior. Charting a route between these poles, this course explores the Internet through a close attention to its materiality and history. Topics include the intersection of the state, corporations, the military, and academia in the Internet’s construction; the formation of identity; representations of gender, race, class, and ethnicity; artistic interventions; the role of free software movements and hacking; legal questions; changes in commerce; and forms of participatory media. Important to our investigation is an experience with the Internet-as-material, as such, we will conduct exercises that explore the technical makeup of the Internet (no prior technical knowledge necessary). The course will show how the technical and social dimensions of the Internet mutually constitute each other.

Instructor: Matzner (Anthropology)
Prerequisite: ANTH 301 or two 200-level units in anthropology, cinema and media studies, economics, history, political science, or sociology, or permission of the instructor.
Cross-Listed as: ANTH 305
Distribution: SBA
Term(s): Fall

CAMS 272 - The Ludic Imagination: Histories and Theories of Games and Play (1.0)

Video games have become a major cultural force, with budgets for new titles rivaling those of feature films. Yet video games are often maligned as time wasters or contributors to deviant behavior. This course takes a different stance, and shows that games are not simply frivolous activities, but rather emblems of societal desires. Introducing the burgeoning field of “game studies”, we will examine how games are used to manufacture identities, as well as to critique and transform them. An integral part of this course will focus on the formal language of the video game. Topics will include the relationships between industry and indie games; forms of representation in video games; artistic uses of games for cultural critique; the connections between video games and other forms of screen-based media; and the ways in which new forms of play merge the physical and the digital worlds. Important to our investigation will be hands-on encounters with new and old games in order to highlight the connections between the theories we study and the embodied experience of play.

Instructor: Knouf
Prerequisite: CAMS 101, CAMS 135/ARTS 165, or ARTH 101 or permission of the instructor.
Distribution: SBA
Term(s): Spring

CAMS 274 - British Cinema and English Literature in the Hollywood Century (1.0)

Our primary study will be British movies, in their self-defining struggle against three gargantuan competitors: (1) Hollywood, with its huge resources of money and talent, seemingly not bound by restrictions of class, ethnicity, or academy; (2) the greatness of England’s own narrative “high art”, which may have begun as merely “popular” forms but by the advent of film had become safely enshrined as great; and (3) theatre itself, film’s closest and most jealous grand relative—still the prime source of trained actors, and for decades unsharable of its resources with the upstart medium of film. Strategies such as these gather their meanings through anecdote, like the transmutation of Brooklyn’s Stanley Kubrick into an English director; the converse movement of Alfred Hitchcock to Hollywood; and the often self-parodied “use” of Hollywood by British writers like Evelyn Waugh, Christopher Isherwood, Aldous Huxley, Graham Greene, W.H. Auden, and—though without their intent—Shakespeare and Austen.

Instructor: Tyler (English)
Prerequisite: None
Cross-Listed as: ENG 274
Distribution: LI; ARS
Term(s): Not Offered

CAMS 305 - Ethnographic Film (1.0)

This seminar explores ethnographic film as a genre for representing “reality,” anthropological knowledge, and cultural lives. We will examine how ethnographic film emerged in a particular intellectual and political economic context as well as how subsequent conceptual and formal innovations have shaped the genre. We will also consider social responses to ethnographic films in terms of the contexts for producing and circulating these works: the ethical and political concerns raised by cross-cultural representation; and the development of indigenous media and other practices in conversation with ethnographic film. Throughout the course we will situate ethnographic film within the larger project for representing “culture,” addressing the status of ethnographic film in relation to other documentary practices, including written ethnography, museum exhibitions, and documentary film.

Instructor: Matzner (Anthropology)
Prerequisite: ANTH 301 or two 200-level units in anthropology, cinema and media studies, economics, history, political science, or sociology, or permission of the instructor.
Cross-Listed as: ANTH 305
Distribution: SBA
Term(s): Fall

CAMS 308 - Seminar, Imagining Mexico and the Border in Films (1.0)

This seminar explores how Mexico and the U.S.-Mexican border have been represented in the (mainly) commercial cinema. We will study about 12-15 films in depth, by directors ranging from D.W. Griffith to Sergei Eisenstein to Emilio “El Indio” Fernandez. From the earliest moving pictures of Mexico (produced by Thomas Alva Edison in 1898) to recent productions, certain themes are repeated and transformed: idealized images of the peasant and traditional culture; revolution, bands, and violence; and the sexual and social complexity of the border region. We will also consider how positions on race, gender, and national identity are negotiated in the movies. Along with understanding the complexities of plot and characterization, the seminar will focus on the formal language of the medium itself.

Instructor: Olsen (Art)
Prerequisite: Permission of the instructor required.
Distribution: ARS
Term(s): Not Offered

CAMS 313 - Virtual Form (1.0)

Introduction to the design and production of three-dimensional objects and spaces using industry-standard modeling software. Overview of basic modeling, surface design, and camera techniques. Emphasis on creative application of the media, in relation to architectural, experimental, and time-based forms. Screenings and lectures on traditional
and contemporary practices, coupled with readings and discussions of the theoretical, artistic, and cultural issues in the virtual world.

Instructor: Olsen
Prerequisite: ARTS 113 or MIT 4.11. Strong computer familiarity needed.
Distribution: ARS
Term(s): Not Offered

 Normally offered in alternate years.

**CAM 321 - Advanced New Media (1.0)**

Various topics in New Media are explored through research, creative activity, and theoretical discussion. Topics address historical as well as contemporary issues that bridge art and technology. This is an advanced level New Media course giving students the opportunity to focus in on their craft and concepts as well as receive critiques from other students with similar goals. Lectures on the historic and contemporary practices of intermedia artists, designers, thinkers and scientists, coupled with readings and discussions. Collaboration will be encouraged between, Studio Art, Music, CAMS, Media Arts, Theater and Computer Science.

Instructor: Olsen (Studio Art)
Prerequisite: Two 200-level courses in ARTS, CAMS, or MAS.
Cross-Listed as: ARTS 321
Distribution: ARS
Term(s): Spring

CAM 321/ARTS 321 may be repeated, ordinarily for a maximum of two semesters.

**CAM 327 - Calderwood Seminar in Public Writing: Public Writing on Film and TV (1.0)**

This course will explore a wide range of writing on current film and television, thinking about the forms of contemporary discourse on the moving image and ways our own writing can join the conversation. We will read and write essays, trends pieces, and star studies, bringing our specialized knowledge as moving image enthusiasts to bear on pieces intended to speak to and engage a broad reading public.

Students will develop and present their writing in workshop discussions, and serve as editors to their peers. Readings from classic and contemporary writers on film and television will help us refine our sense of what makes writing on media illuminating, accessible, and compelling.

Instructor: Shotley
Prerequisite: CAMS 202 or permission of the instructor
Distribution: ARS
Term(s): Spring

**CAM 329 - Seminar. You May Say I Am a Dreamer: Art Cinema Surrealisms (1.0)**

Dream logic, convulsive identity, and a questioning attitude: these tenets of historical Surrealism have fueled narrative art films radiating bizarre beauty and aiming to reach spectators through channels beyond rational comprehension. This interdisciplinary seminar begins by examining Surrealist classics (from Buñuel to Lynch). We then consider how, in the shade of Surrealism's porous boundaries (with magical realism, for example), films were/is made worldwide that honor the above tenets and prompt us to rethink the movement's Eurocentrism. Since the wonders of the digital revolution are seen by some as enabling a physical and metaphysical manifestation of all the Surrealists sought out, this seminar's critical revision of Surrealism's theory and practice is not just timely— it is a must. What would a Surrealist questioning attitude be today?

Instructor: Viano

Prerequisite: CAMS 202 or ARTH 101 or permission of the instructor
Cross-Listed as: ARTH 329
Distribution: ARS
Term(s): Not Offered

**CAM 333 - Light on Laughter: Envisioning the Comic through Cinema (1.0)**

Since its legendary origins, cinema has explored the many faces of laughter, from madcap to deadpan, from carnival to satire, from black humor to grotesque. Likewise, philosophers, poets, mystics, and, more recently, film theorists, psychologists, and neuroscientists have sought to chart and define "the passion which maketh those grimaces called laughter" (Hobbes). By pairing an exemplary selection of films from different epochs and regions with representative readings in the classical, modern, and contemporary theories of the comic, this cross-cultural and multidisciplinary seminar explores cinematic comedy's porous borders and interrogates the widespread, if not universal, human emotion of laughter, its culturally and gender specific embodiments, its social role, and its transgressive potential.

Instructor: Viano
Prerequisite: CAMS 101, CAMS 201, CAMS 202, or permission of the instructor
Distribution: ARS
Term(s): Not Offered

**CAM 334 - African Cinema: Character and Narrative (1.0)**

This course examines how character is built and how narration occurs in cinema. It covers the study of cinematic techniques in African cinema and explores how this cinematic tradition has responded to specific issues of representation in African history that came to bear upon filmmaking and cinematic language. The larger purpose of the course is to understand filmmaking as an aesthetic and political form of intellectual expression but also as an industry in Africa, with a place in African cultural and political history.

Instructor: Pnabha (French)
Prerequisite: FREN 211 or, beginning with the class of 2018, FREN 210 and one additional unit, FREN 213 or above. In addition, CAMS 101 and at least one 200-level CAMS course. Permission of the instructor for students with no previous cinema class.
Cross-Listed as: FREN 334
Distribution: LL; ARS
Term(s): Not Offered

This course is scheduled to meet four hours weekly, but not all students will attend all four hours. The schedule will include common instructional time in English for all students as well as separate sessions in English (required for CAMS only) and in French (required for FREN only). However, all registered students need to be available during the scheduled time slot of the class throughout the semester.

**CAM 335 - Advanced Video Production (1.0)**

An intensive course in story development, writing screenplays, directing actors and technical crew, and producing short, dramatic, or mixed-genre videos. Rigorous work on advanced camera operation, lighting, sound recording, and editing techniques. We will screen and analyze short films and sample screenplays. Course requires strong organizational and directorial aptitude. The final projects will be short narrative, experimental, or mixed-genre videos.

Instructor: Mekuria (Art)
Prerequisite: CAMS 135/ARTS 165, CAMS 235/ARTS 265 or permission of the instructor
Cross-Listed as: ARTS 365
Distribution: ARS
Term(s): Not Offered

**CAM 338 - Photography III (1.0)**

Advanced explorations of aesthetic and content issues through the use of both traditional light-sensitive and digital methodologies. Advanced photographic techniques and equipment will be presented to solve visual problems arising from each student's work. Continued emphasis is placed on research into the content and context of the photographic image in contemporary practice through gallery visits, guest lecturers, and library work.

Instructor: Kelley
Prerequisite: CAMS 238/ARTS 208, and either ARTH 109 or CAMS 239/ARTS 221 or permission of the instructor required.
Cross-Listed as: ARTS 308
Distribution: ARS
Term(s): Not Offered
Studio fee of $35.

**CAM 340 - The Longest Wave: The Films of Agnés Varda and Jean-Luc Godard (1.0)**

The respective careers of Agnés Varda and Jean-Luc Godard stand as supreme examples of the French New Wave's spirit. Spanning more than 50 years, their oeuvre has constantly evinced the political awareness, formal innovation, and independence from the mainstream that were the ideals of that most influential movement. Weekly screenings of their salient films, and a selection of critical literature, will allow the students in this course to examine and appreciate these two auteurs' multifaceted careers, from their roots in the New Wave to their most recent, personal work in digital video.

Instructor: Viano
Prerequisite: CAMS 202, ARTH 101, or permission of the instructor required.
Distribution: ARS
Term(s): Not Offered

**CAM 341 - Persuasive Images (1.0)**

Visual images have always been enlisted to influence individual and collective decision-making, action, and identity. However, the rise of the mass media in the nineteenth century and the multiplication of visual technologies in the twentieth century have created unprecedented opportunities for the diffusion of persuasive images. This seminar enlists case studies to examine the uses and functions of visual images in advertising and propaganda and considers, in particular, graphic arts, photography, film, and other reproductive media. It also considers the interplay between elite and popular arts. The goal of the course is to refine our critical understanding and reception of the visual world.

Instructor: Berman
Prerequisite: 200-level courses in art or media arts and sciences.
Cross-Listed as: ARTH 391
Distribution: ARS
Term(s): Not Offered

**CAM 343 - Seminar. Visual Analysis of Film (1.0)**

Distribution: ARS
Term(s): Not Offered

**CAM 350 - Research or Individual Study (1.0)**

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

Instructor: Kelley (Art)
DEPARTMENT OF CLASSICAL STUDIES

Professor: Starr (Chair), Dougherty
Associate Professor: Gilhuly, Burns
Visiting Lecturer: Brook

Classical Studies explores ancient Greek and Roman culture across the Mediterranean basin, from the second millennium B.C.E. to the fall of the Roman Empire in the West. The organizing idea of the field is not a single method or a discipline, but the study of Greco-Roman antiquity (and its influence up to the present day) in all its richness and diversity, its familiarity and its strangeness. Classical Studies encompasses languages and literatures, archaeology, epigraphy, history, art history, politics, law, science, philosophy, religion, and mythology. In this respect, it is the original and most wide-ranging of interdisciplinary fields. It can thus stand alone as a dynamic and challenging field of study or can complement almost any other major in a liberal arts program.

The Department of Classical Studies offers two major programs: Classics and Classical Civilization. The Classics major combines work in both Greek and Latin with coursework in English on the history, literature, society, and material culture of the ancient world. The Classical Civilization major requires the study of either Greek or Latin, together with coursework in English on different aspects of the ancient world. Courses in Greek and Latin are conducted in English and encourage close analysis of the ancient texts, with emphasis on their literary and historical values. Students interested in studying classical archaeology can do so within either the Classics or Classical Civilization majors. Students wishing to pursue graduate work in Classics should plan to take course work in both Greek and Latin at the 300 level and to begin the study of German, French, or Italian.

The Classical Studies Department offers students the opportunity to explore the ancient world through an integrated, cohesive program of courses worked out by the student and her advisor (a faculty member of her choice or the department chair). Individual programs are tailored to meet students’ specific interests, such as classical literature, archaeology, ancient theatre, ancient philosophy, law, political theory, ancient religion, material culture, and the classical tradition.

Major in Classics or Classical Civilization

Goals for the Majors in Classics and Classical Civilization

The goals of both the Classics and Classical Civilization Major are as follows:

- To develop the ability to read and interpret texts in Greek and/or Latin
- To work with primary texts and/or artifacts to develop an understanding of the historical, political, and cultural worlds of ancient Greece and Rome on their own terms
- To develop and use appropriate critical reasoning skills in the analysis and interpretation of classical antiquity

Requirements for the Majors in Classics and Classical Civilization

Classics: Ten units are required for the major in Classics, in two groups. Group 1: Language: Students majoring in Classics must do work in both Greek and Latin, totaling six units. At least two of these units must be at the 300 level, and no more than two 100 level courses will count toward the language requirement of the major. Group 2: Courses in Classical Civilization: In addition, Classics majors must complete four courses in Classical Civilization (or approved courses from related departments), chosen in consultation with and with the approval of their faculty Major Advisor to create a coherent but broad program of study; at least two of those four courses in Group 2 must be in Classical Civilization and no more than one can be at the 100-level.

Classical Civilization: Nine units are required for the major in Classical Civilization, in two groups. Group 1: Language: Students majoring in Classical Civilization must complete four units in either Greek or Latin (or two 300-level units). Group 2: Courses in Classical Civilization or further courses in Greek or Latin (or approved courses from related departments), including one unit each in at least two of the following three areas: literature, material culture; history and society. At least two of the nine units must be at the 300 level, one of which must be in CLCV or Greek or Latin. Courses in ancient history, ancient art, ancient philosophy, and classical civilization are recommended as valuable related work.

Honors in Classics and Classical Civilization

The Department of Classical Studies offers honors programs in both Classics and Classical Civilization. The only route to honors in either major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Teacher Certification in Classical Studies

Students interested in obtaining certification to teach Latin and classical humanities in the Commonwealth of Massachusetts should consult the department chair and the chair of the Department of Education.

Advanced Placement Policies and Language Requirement in Classical Studies

A student entering Wellesley must have an Advanced Placement score of 5 or an SAT II score of 690 to satisfy the foreign language requirement. AP courses will not be counted toward either major offered by the Classical Studies department. All students who wish to elect a 200-level or higher Latin course must take Wellesley’s Latin placement examination. The department reserves the right to place a new student in the language course for which she seems best prepared regardless of her AP score or the number of units she has offered for admission.

International Study in Classical Studies

Qualified students are encouraged to spend a semester, usually in the junior year, on international study. Excellent programs are available in Rome and Athens.

Special Opportunities in Classical Studies

Limited departmental funds are available to support special opportunities for Classics-related research and travel.

Courses for Credit Toward the Classics and the Classical Civilization Majors

ANTH 206 Archaeology
ANTH 207 Global Perspectives on Art and Architecture: Ancient to Medieval

CLCV - Classical Civilization

Courses

CLCV 104 - Classical Mythology (1.0)
Achilles’ heel, the Trojan Horse, Pandora’s Box, an Oedipal complex, a Herculean task—themes and figures from classical mythology continue to play an important role in our everyday life. We will read the original tales of classical heroes and heroines together with more modern treatments in film and literature. Why do these stories continue to engage, entertain, and even shock us? What is the nature and power of myth? Readings from ancient sources in English translation.
Instructor: Burns
Prerequisite: None
Distribution: LI, REP
Term(s): Fall

CLCV 106 - Daily Life in the Ancient World (1.0)
Daily life in ancient Greece and Rome, from the ordinary activities of everyday life (family life; work and leisure; shopping, cooking and eating; games and entertainment; going to see a gladiatorial show or an athletic contest or a play; parties) to the turning points of an individual’s life (birth, initiation into...
adulthood, marriage, childbirth, old age, death). The rhythm of a year as expressed in festivals and holidays. The practices, customs, and shared beliefs that gave meaning and structure to the lives of both individuals and cultures. A mix of lecture, discussion, and case studies based on the lives of real people. Assignments drawn from a wide variety of ancient sources in translation, from cookbooks to personal letters to tombstone inscriptions to some of the greatest literature in the Western tradition.

CLCV 200 - Athens and Rome: A Tale of Two Cities (1.0)
The Periclean Parthenon with its polished white and perfectly arranged marble columns is the perfect symbol of ancient Athens’ identity as a city of democracy and philosophy, while the Roman Colosseum reverberating still with the distant echoes of gladiatorial combat embodies the military greatness with which we associate classical Rome. These iconic monuments have come to define the way we think about ancient Athens and Rome, and this course will explore how a city’s built environment reflects and even articulates its place in the world. Contextualizing monuments in relation to historical events, political organization, and civic identity, students will study these primary centers of the classical Mediterranean as they developed from humble beginnings to imperial capitals by contrast with other ancient cities studied through group research projects.

Instructor: Starr
Prerequisite: None
Distribution: HS
Term(s): Spring

CLCV 201 - The Age of Experiment: Literature and Culture of Archaic Greece (1.0)
Beautiful and moving on its own terms, the poetry of Homer, Hesiod, and Sappho also gives us a window into one of the most turbulent, prolific, and influential periods of Greek history. From the eighth to the sixth century B.C.E., an amazing array of events—the rediscovery of the alphabet, the development of far-reaching trade routes and colonial foundations, the establishment of the Olympic games and a Panhellenic identity—completely transformed the way the Greeks constructed their world, literally and imaginatively. This course will explore the textual traces of this expansive and experimental period through the works of Homer, Hesiod, lyric poetry, and selections from Herodotus.

Instructor: Gibbuly
Prerequisite: None
Distribution: LI
Term(s): Not Offered

CLCV 202 - The Invention of Athens (1.0)
In the fifth century B.C.E., Athens was home to great intellectual ferment as well as political growth and crisis. This intellectual revolution resulted in significant artistic and intellectual accomplishments: Pericles oversaw the building of the Acropolis; citizens saw productions of Oedipus Tyrannus, Medea, and Lysistrata; and Herodotus and Thucydides invented the genre of history as we know it. On the political front, Athens defended itself against the Persian empire, developed into the most powerful city-state in the Mediterranean, and then dramatically fell as the result of failed imperial policy. In the early fourth century, Plato engaged with the political and intellectual conflicts of this period in The Apology and The Symposium. In this course, students will consider works of philosophy, history, tragedy, comedy, rhetoric, and political theory in their cultural and political context. We will examine and interrogate Athenian democracy, its conflicts, and its stunning and influential cultural achievements.

Instructor: Brook
Prerequisite: None
Distribution: LI; HS
Term(s): Fall

CLCV 204 - Roman Literature (1.0)
We often think of the ancient Romans as brutish soldiers obsessed with building empires and shedding blood. But the Romans were equally enthralled by the refinements of verbal art: Roman children learned to read by reciting the poems of Homer; Julius Caesar penned a book about grammar on his way to a military campaign in Gaul. In fact, the word “literature” itself comes down to us from the Romans, along with many of our assumptions about what literature ought to look like. In this course we will seek to understand why literature was so important to the Romans and why so many Latin works are still considered essential reading today. We will read a variety of poems, novels, and plays, examining their sociopolitical role in the Roman world while also exploring their impact on English literature. Authors may include Plautus, Lucretius, Vergil, Ovid, Seneca, Martial, Apuleius, and Augustine.

Instructor: Young
Prerequisite: None
Distribution: LI
Term(s): Not Offered

CLCV 205 - Ancient Spectacle (1.0)
The games of the Roman amphitheater were more than entertainment for the masses, just as the Athenian productions of tragedy and comedy combined theatre with religion and politics. This course examines the spectacle of competitive performances and rituals of power that helped shape ancient Greek and Roman society. Students will investigate ancient writings alongside art-historical and archaeological evidence to consider how social values and identities were constructed through these shared experiences. We will also consider how modern performances of ancient texts, the Olympic Games, and cinematic representations have emphasized the splendor, drama, and gore of antiquity.

Instructor: Burns
Prerequisite: None
Distribution: HS
Term(s): Not Offered

CLCV 206 - Gods and Heroes (1.0)
The mythic tales of gods and heroes featured in the epic poems, sacred hymns, and tragic theatre of Greece and Rome were also present in material form as votive statues, on painted vessels, and in architectural decoration. This course will focus on the interplay between textual and visual representations of Olympian deities like Zeus, Hera, and Poseidon; legendary figures such as Heracles, Theseus, and the heroes of the Trojan War; and the infamous women of myth: Helen, Clytemnestra, and Medea. We will analyze how visions of the heroic age—replete with legendary battles, divine seductions, and exotic monsters—provided ancient societies with new opportunities to create a shared history, foster ethnic and civic identity, and transmit ideological values about age and gender. Regular trips to the Museum of Fine Arts, Boston.

Instructor: Burns
Prerequisite: CLCV 104 or ARTH 100 or permission of the instructor.
Distribution: ARS; HS
Term(s): Not Offered

CLCV 210 - Greek Drama (1.0)
The Athenian playwrights of the Classical period, Aeschylus, Sophocles, Euripides, and Aristophanes, produced brilliant tragedies and comedies that continue to engage us today and to define our notion of drama. At the same time, the Athenian people forged the principles that form the basis for our own political institutions. The element of performance, common to both drama and democracy, provides an important key to understanding this interesting confluence of theater and politics, and this class will combine the close reading (in English) of ancient Greek drama with a consideration of the plays in their context. We will also address the interplay between Greek tragedy and comedy, assessing each genre’s capacity for social and political criticism as well as the subversion of Athenian values and norms.

Instructor: Brook
Prerequisite: None
Distribution: LI; ARS
Term(s): Spring
This course may be taken as either CLCV 210, or, with additional assignments, CLCV 310.

CLCV 212 - On the Road with Odysseus, Huck, Thelma and Louise: Travel in Fiction and Film (1.0)
Every story is a travel story, and if you can’t travel this summer, you can always read about it! This class explores the theme of travel in fiction and film. Beginning with Homer’s Odyssey, a text that maps out the key themes of movement, escape, and coming of age that resurface in the works of Mark Twain, Jamaica Kincaid and Michael Ondaatje and films like Thelma and Louise and O Brother Where Art Thou?

Instructor: Dougherty
Distribution: LL
Term(s): Summer 1

CLCV 213 - Gender in Antiquity (1.0)
Do notions of gender change over time? In this course, we will explore how gender was constructed in antiquity and how it functioned as an organizational principle. Through close readings of selections from Greek and Roman epics, lyric poetry and drama, as well as philosophical and historical texts, we will analyze ancient gender norms, exploring how they were bent, dressed up, and used.

Instructor: Gibbuly
Prerequisite: None
Distribution: LL
Term(s): Not Offered

CLCV 214 - Bronze Age Greece: Archaeology and Legend (1.0)
The legends of the Trojan War, the lost city of Atlantis, and the labyrinth of the Minotaur all represent Greek writers’ attempt to understand the distant past. Archaeologists have also used these ancient narratives to understand the discoveries of Bronze Age Greece: how kingdoms functioned, the nature of interaction between neighboring societies, and the collapse of civilizations. This course includes written accounts, material evidence, and visual representations, as it surveys the cultures of Mycenaean Greece and Minoan Crete. The archaeological evidence of settlements, sanctuaries, and cemeteries will be contextualized through the
detailed study of administrative records written on clay tablets and artistic representations, especially wall-paintings and luxury arts.

Instructor: Burns
Prerequisite: None
Distribution: SBA; HS
Term(s): Spring

CLCV 220 - Introduction to Comparative Literature (1.0)

Taking up one of the major concerns of Comparative Literature as a field, this course looks at how texts move, tracing several works of Greek and Roman literature as they travel through centuries and across continents. We will begin with the troubled notion of a classic and explore questions of canonicity. Case studies will include texts such as Sophocles' Antigone and the poems of Catullus and Sappho. With the help of readings in reception and translation theory, we will look at these works as they change over time, asking how they have contributed to modern discourses and practices including colonialism, postcolonialism, psychoanalysis, feminism, contemporary pop culture, and modernist avant-gardes.

Instructor: Young
Prerequisite: None
Distribution: LL
Term(s): Not Offered

CLCV 225 - Beyond Sonnets: The World of Poetic Forms (1.0)

In this course we will study a range of poetic forms which originated in Europe, Asia or the Middle East and then became popular among English-speaking poets. In each case, we will examine the form within its original cultural milieu, then trace its entry into English and subsequent development in modern English and contemporary American poetry. Some of the questions we will ask include: How do poetic forms reflect and respond to the cultural landscape in which they developed? How does the meaning and use of a form evolve when it enters a new culture? What are some of the technical difficulties inherent in adapting a form into a new language? To what extent do poetic forms come freighted with the histories from which they arose? Some of the forms we will discuss include: Ode (Greek), Funeral Elegy (Greek), Epigram (Rome), Love Elegy (Rome), Sestina (Italy), Pantoum (Malaysia), Ghazal (Indo-Persian-Arabic), Haiku and Renga (Japan).

Instructor: Young
Prerequisite: None
Cross-Listed as: CPLT 225
Distribution: LL
Term(s): Fall

Ann E. Maurer '51 Speaking Intensive Course

This course may be taken as either CLCV 225 or, with additional assignments, as CLCV 325.

CLCV 226 - Wintersession in Crete (0.5)

This course explores ancient Crete through direct exploration of archaeological evidence across the largest island in the Aegean. Our studies will embrace a long span of history, from the rise of complex societies in the Bronze Age through the modern era. Special emphasis will be given to the art and architecture in the Minoan civilization (3000-1000 B.C.E.) preserved at palace centers, mountain shrines, and agricultural villages. We will explore points of continuity and change in the religious, political, and economic organization of society through the subsequent Greek, Roman, Venetian, Byzantine, and Ottoman periods. We will also examine the special place of Minoan imagery in the island's current identity forged through its unique heritage.

Instructor: Burns
Prerequisite: A 200-level course in classical studies or related field. Application required.
Distribution: HS
Term(s): Not Offered

Not offered every year. Subject to Provost's Office approval.

CLCV 230 - War: From Troy to Baghdad (1.0)

War is undoubtedly bad. But human beings have always practiced war. Indeed, war preceded history itself by tens of thousands of years—if by history we mean the written inquiry into the past. But what causes wars? How have wars been justified historically? How are wars won and lost? What are their effects? In this class, we examine a series of case studies in warfare, including the Trojan War, the Peloponnesian War, and the Roman Punic Wars. We will read classic accounts of warfare and theoretical literature about tactics, strategy, and logistics, and also will analyze how war is represented in other media, such as art and film.

Instructor: Rogers
Prerequisite: None
Distribution: LL; HS
Term(s): Not Offered

CLCV 236 - Greek and Roman Religion (1.0)

The founders of Western civilization were not monotheists. Rather, from 1750 B.C.E. until 500 C.E., the ancient Greeks and Romans sacrificed daily to a pantheon of immortal gods and goddesses who were expected to help mortals achieve their earthly goals. How did this system of belief develop? Why did it capture the imaginations of so many millions for more than 2,000 years? What impact did the religion of the Greeks and Romans have upon the other religions of the Mediterranean, including Judaism and Christianity? Why did the religion of the Greeks and Romans ultimately disappear?

Instructor: Rogers
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered

This course may be taken as either CLCV 236 or, with additional assignments, CLCV 336.

CLCV 240 - Romans, Jews, and Christians in the Roman Empire (1.0)

At the birth of the Roman Empire virtually all of its inhabitants were practicing polytheists. Three centuries later, the Roman Emperor Constantine was baptized as a Christian and his successors eventually banned public sacrifices to the gods and goddesses who had been traditionally worshipped around the Mediterranean. This course will examine Roman-era Judaism, Graeco-Roman polytheism, and the growth of the Jesus movement into the dominant religion of the late antique world.

Instructor: Rogers
Geller (Religion)
Prerequisite: None
Cross-Listed as: REL 240
Distribution: REP; HS
Term(s): Fall

CLCV 243 - Roman Law (1.0)

Ancient Roman civil law; its early development, codification, and continuing alteration; its historical and social context (property, family, slavery); its influence on other legal systems. Extensive use of actual cases from antiquity.

Instructor: Starr
Prerequisite: None

CLCV 250 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

CLCV 250H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

CLCV 300 - Athens and Rome: A Tale of Two Cities (1.0)

The Periclean Parthenon with its polished white and perfectly arranged marble columns is the perfect symbol of ancient Athens' identity as a city of democracy and philosophy, while the Roman Colosseum reverberating still with the distant echoes of gladiatorial combat embodies the military greatness with which we associate classical Rome. These iconic monuments have come to define the way we think about ancient Athens and Rome, and this course will explore how a city's built environment reflects and even articulates its place in the world. Contextualizing monuments in relation to historical events, political organization, and civic identity, students will study these primary centers of the classical Mediterranean as they developed from humble beginnings to imperial capitals by contrast with other ancient cities studied through group research projects.

Instructor: Burns
Prerequisite: Permission of the instructor required.
Distribution: HS
Term(s): Spring

CLCV 305 - Ancient Spectacle (1.0)

The games of the Roman amphitheater were more than entertainment for the masses, just as the Athenian productions of tragedy and comedy commingled theatre with religion and politics. This course examines the spectacle of competitive performances and rituals of power that helped shape ancient Greek and Roman society. Students will investigate ancient writings alongside art-historical and archaeological evidence to consider how social values and identities were constructed through these shared experiences. We will also consider how the
modern performances of ancient texts, the Olympic Games, and cinematic representations have emphasized the splendor, drama, and gore of antiquity.

Instructor: Burns  
Prerequisite: Permission of the instructor required.  
Term(s): Not Offered

CLCV 310 - Greek Drama (1.0)  
The Athenian playwrights of the Classical period, Aeschylus, Sophocles, Euripides, and Aristophanes, produced brilliant tragedies and comedies that continue to engage us today and to define our notion of drama. At the same time, the Athenians forged the democratic principles that form the basis for our own political institutions. The element of performance, common to both drama and democracy, provides an important key to understanding this interesting confluence of theater and politics, and this class will combine the close reading (in English) of ancient Greek drama with a consideration of the plays in their context. We will also address the interplay between Greek tragedy and comedy, assessing each genre's capacity for social and political criticism as well as the subversion of Athenian values and norms.

Instructor: Brook  
Prerequisite: Permission of the instructor required.  
Distribution: LL, ARS  
Term(s): Spring  
The course may be taken as either CLCV 210 or, with additional assignments, CLCV 310.

CLCV 313 - Gender in Antiquity (1.0)  
Do notions of gender change over time? In this course, we will explore how gender was constructed in antiquity and how it functioned as an organizational principle. Through close readings of selections from Greek and Roman epics, lyric poetry and drama, as well as philosophical and historical texts, we will analyze ancient gender norms, exploring how they were bent, dressed up, and used.

Instructor: Gilhuly  
Prerequisite: A course in classical studies, women's and gender studies, or other relevant department or by permission of the instructor.  
Distribution: LL  
Term(s): Not Offered

CLCV 321 - Eros: Love and Desire in Ancient Greece (1.0)  
Who was Eros? This course will explore how the ancient Greeks struggled to understand, and sometimes escape, this powerful god of love. We will use ancient texts and the visual arts together to consider the ways in which Greek society both encouraged and tried to contain different notions of desire. Readings, such as Sappho's poetry, tragic plays by Euripides, and Plato's philosophical dialogues, provide richly compelling personifications of Eros himself, portrayals of people under his influence, and debates about the nature of love while representations of desiring and desired persons found in the visual arts reveal the workings of desire in various public and private contexts.

Instructor: Burns  
Prerequisite: Previous course work in classical studies or art history.  
Distribution: LL, ARS  
Term(s): Not Offered

CLCV 325 - Beyond Sonnets: The World of Poetic Forms (1.0)  
In this course we will study a range of poetic forms which originated in Europe, Asia or the Middle East and then became popular among English speaking poets. In each case, we will examine the form within its original cultural milieu, then trace its entry into English and subsequent development in modern English and contemporary American poetry. Some of the questions we will ask include: How do poetic forms reflect and respond to the cultural landscape in which they were produced? How does the meaning and use of a form evolve when it enters a new culture? What are some of the technical difficulties inherent in adapting a form into a new language? To what extent do poetic forms come freighted with the histories from which they arose? Some of the forms to be discussed include: Ode (Greece), Funeral Elegy (Greece), Epigram (Rome), Love Elegy (Rome), Sestina (Italy), Pantoum (Malaysia) Ghazal (Indo-Persian-Arabic), Haiku and Renga (Japan).

Instructor: Young  
Prerequisite: Fulfillment of the language requirement (in any language) or permission of the instructor.  
Cross-listed as: CPLT 325  
Distribution: LL  
Term(s): Fall

CLST 360 - Senior Thesis Research (1.0)  
Prerequisite: Permission of the department.  
Distribution: None  
Term(s): Fall, Spring  
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

CLST 370 - Senior Thesis (1.0)  
Prerequisite: CLST 360 and permission of the department.  
Distribution: None  
Term(s): Fall, Spring  
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

GRK - Greek Courses

GRK 101 - Beginning Greek I (1.0)  
An introduction to ancient Greek language. Development of Greek reading skills.  
Instructor: Dougherty  
Prerequisite: Open to students who do not present Greek for admission.  
Distribution: None  
Term(s): Fall

GRK 102 - Beginning Greek II (1.0)  
Further development of language skills and reading from Greek authors.  
Instructor: Brook  
Prerequisite: GRK 101 or equivalent.  
Distribution: None  
Term(s): Spring

GRK 201 - Intermediate Greek I: Athenian Literature (1.0)
Study of a selected work from Classical Athenian literature, such as a dialogue of Plato or a tragedy of Euripides. Supplementary reading in English translation from other Greek works to illuminate the text in its literary and cultural context.

Instructor: Brook
Prerequisite: GRK 101 and GRK 102 or two admission units in Greek, or permission of the instructor.
Distribution: LL
Term(s): Fall

**GRK 202 - Intermediate Greek II: Homer (1.0)**
Study of selected books in Greek from Homer's Iliad or Odyssey with emphasis on the oral style of early epic; further reading in Homer in translation; the archaeological background of the period.

Instructor: Dougherty
Prerequisite: GRK 201
Distribution: LL
Term(s): Spring

**GRK 207 - Archaic Greek Poetry (1.0)**
In this course, students will read selections from the important Greek poets of the archaic period such as Homer, Hesiod, Archilochus, Sappho, and Pindar. We will consider the poetry in light of the historical, cultural, and literary context of the archaic period, focusing in particular on issues of genre and performance.

Instructor: Dougherty
Prerequisite: GRK 101 and GRK 102 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

**GRK 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**GRK 250H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Term(s): Fall; Spring

**GRK 303 - Euripides (1.0)**
Close reading and discussion of a play (or plays) from the extant works of the Athenian playwright Euripides. Translation and discussion of the Greek text will be supplemented with additional readings of Greek dramas in translation as well as secondary readings on issues relating to the plays and their broader literary, social, political, and cultural contexts.

Instructor: Gilhuly
Prerequisite: GRK 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

**GRK 304 - Sophocles (1.0)**
Close reading and discussion of a play (or plays) from the extant works of the Athenian playwright Sophocles. Translation and discussion of the Greek text will be supplemented with additional readings of Greek dramas in translation as well as secondary readings on issues relating to the plays and their broader literary, social, political, and cultural contexts.

Instructor: Brook
Prerequisite: GRK 202 or permission of the instructor.
Distribution: LL
Term(s): Spring

**GRK 305 - Greek Comedy (1.0)**
Readings from Greek comic poets such as Aristophanes and Menander. Close reading of the Greek combined with analysis of both primary and secondary sources. Texts will be considered in their broader social, political, and literary contexts.

Instructor: Gilhuly
Prerequisite: GRK 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

**GRK 306 - Herodotus (1.0)**
In this course students will read selections from Herodotus' Histories. We will consider the text in light of the historiographical and literary traditions, with a view toward understanding Herodotus' innovations and inheritance.

Instructor: Dougherty
Prerequisite: GRK 201 and 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

**GRK 307 - Archaic Greek Poetry (1.0)**
In this course, students will read selections from the important Greek poets of the archaic period such as Homer, Hesiod, Archilochus, Sappho, and Pindar. We will consider the poetry in light of the historical, cultural, and literary context of the archaic period, focusing in particular on issues of genre and performance.

Instructor: Dougherty
Prerequisite: GRK 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

**GRK 308 - Aeschylus (1.0)**
Close reading and discussion of a play (or plays) from the extant works of the Athenian playwright Aeschylus. Translation and discussion of the Greek text will be supplemented with additional readings of Greek dramas in translation as well as secondary readings on issues relating to the plays and their broader literary, social, political, and cultural contexts.

Instructor: Dougherty
Prerequisite: GRK 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

**GRK 309 - Plato's Symposium (1.0)**
Plato's best-known dialogue provides an opportunity to consider the construction of desire in Greek antiquity. Close reading of the text will allow for the analysis of language and rhetoric, as well as the characterization of each speaker. Broader study of the symposium as a social institution will enrich the significance of the text's narrative structure and immediate relevance within classical Athens.

Instructor: Burns
Prerequisite: GRK 202 or permission of the instructor.
Distribution: LL
Term(s): Fall

**GRK 350 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

**GRK 350H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**GRK 360 - Senior Thesis Research (1.0)**
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

**GRK 370 - Senior Thesis (1.0)**
Prerequisite: GRK 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**LAT 101 - Beginning Latin I (1.0)**
Introduction to the Latin language; development of Latin reading skills.

Instructor: Starr
Prerequisite: Open to students who do not present Latin for admission, or by permission of the instructor.
Distribution: None
Term(s): Fall

**LAT 102 - Beginning Latin II (1.0)**
Further development of Latin reading and language skills.

Instructor: Young
Prerequisite: LAT 101
Distribution: None
Term(s): Spring

**LAT 200 - Intermediate Latin I: Introduction to Roman Literature and Culture (1.0)**
In conjunction with a thorough review of Latin grammar, we will make the transition to Latin literature and Roman culture. Selections in Latin may include Catullus (poetry), Ovid and the other love elegists, the emperor Augustus' The Deeds of the Divine Augustus, Perpetua (one of the earliest known women Latin authors) and the anonymous novella, The Story of Apollonius King of Tyre. Topics to be studied might include social status and identity (What defined you? Might your status/identity change, whether for better or worse?); Rome's relation to Greece, which Rome conquered but which long dominated Roman culture; or the nature and function of literature in Roman life.

Instructor: Young
Prerequisite: LAT 102 or Wellesley's placement exam
Distribution: LL
Term(s): Fall

**LAT 201 - Intermediate Latin II: Vergil and Augustus (1.0)**
Vergil's Aeneid, Georgics, and Eclogues in their literary context of both Greek poetry (Homer, Apollonius of Rhodes, Euripides) and Latin poetry (Ennius, Lucretius, Catullus, Horace) and in their historical context in the reign of Augustus, the first Roman emperor. Readings in Latin from Vergil and in translation from other ancient works. Use of Internet resources on Vergil and Rome.

Instructor: Starr
Prerequisite: LAT 200 or Wellesley's placement exam
Distribution: LL
Term(s): Spring

**LAT 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall; Spring

LAT 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall; Spring

LAT 301 - Reading Latin Literature (1.0)
Romans read Latin as quickly and with as much pleasure as we read English. In this course you will learn to read Latin more like a Roman: with increased reading speed, improved comprehension, richer appreciation of literary styles, and greater pleasure. This course focuses not on systematically reviewing grammar but on concrete reading techniques that go beyond just looking up every word and on large and small-scale literary and rhetorical analysis. We'll read major works of Latin literature, with the specific works chosen depending on part in the interests of the students in the class: possible choices might include selections from an ancient novel or a history, a philosophical essay, an oration, or a biography.

Instructor: Starr Prerequisite: LAT 201 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor Distribution: LL Term(s): Fall

LAT 302 - Roman Poems and Poetry Books (1.0)
How can we read Roman poetry the way a Roman would have read it, knowing what to expect in a poem and a poetry book? An exploration of features common to many Roman poems and books of poetry, with focused attention to the dramatic nature of Roman poetry (speaker, addressee, scene, monologue, dialogue), diction and poetic language, simile and metaphor, point of view, intertextuality (the relationship of one poem to another), ekphrasis, genre and generic composition (e.g., the song before the lover's closed door, the drinking song, the letter), and the resonances of the various popular meters. Readings from major Latin poems in Latin and from various Roman works in translation; focused exercises to build the skills necessary for reading Latin poetry.

Instructor: Starr Prerequisite: LAT 201 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Not Offered

LAT 303 - Catullus (1.0)
Tormented lover, urbane jester, obscene abuser, political subversive, poetic revolutionary—the persona of Catullus are as varied as the poems that produce them. This course is a topical investigation of Catullus' poetry and its Roman contexts. Topics will include poetry and biography; allusion, aesthetics and the "New Poetry"; social performance and self-representation; Roman masculinity and femininity; obscenity and invective; sex, poetry, and power. Readings will draw on a variety of theoretical orientations that inform Catullan criticism: biography, psychoanalysis, intertextuality, feminism, New Historicism.

Instructor: Young Prerequisite: LAT 201 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Not Offered

LAT 304 - Imperial Latin Literature (1.0)
Latin literature flourished in the Imperial period, even though it is referred to as "Golden" instead of "Golden" Latin Literature. We'll explore various authors and genres, including such authors as Seneca (philosophy and drama), Lucan (epic), Tacitus (history), Pliny (letters), Juvenal (satire), and Martial (epigrams). We'll also examine the impact of rhetoric on the writing of Latin prose and poetry.

Instructor: Starr Prerequisite: LAT 301 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Not Offered

LAT 309 - Roman Elegy (1.0)
Indebtied to their Greek predecessors in so many genres, the Romans nevertheless claimed the erotic elegy as their own innovation. Catullus, Gallus, Tibullus, Propertius, and Ovid developed the form which became the precursor of the love language and literature of Europe.

Instructor: Staff Prerequisite: LAT 301 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Spring

LAT 310 - Roman Historical Myths (1.0)
Romans based their history in myth and made their history into myths. This course includes reading from major authors such as Livy, Vergil, Horace, Ovid, Propertius, and Tacitus, focusing on historical myths such as Romulus and Remus, the Rape of the Sabine Women, Tarquinius Superbus, and Hercules and Cacus. We will then examine how later Romans reworked those myths to serve current political purposes and how they transformed historical events into powerful myths.

Instructor: Starr Prerequisite: LAT 301 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL; HS Term(s): Not Offered

LAT 315 - Ovid (1.0)
Many of our favorite mythological tales come down to us from Ovid's Metamorphoses, an iconoclastic compendium of Greco-Roman myth that defies categorization. We will read our way through key portions of this kaleidoscopic poem, paying close attention to Ovid's xerarchian Latin while probing his delightful, but often discomfiting, tales from a number of angles. Domination and desire, political and personal sovereignty, order versus entropy, and the seductive powers of narrative are just some of the issues probed by this irrepressible poem. We will use our close engagement with Ovid's text as an opportunity to examine these and other literary and philosophical questions.

Instructor: Young Prerequisite: LAT 301 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Not Offered

LAT 316 - Roman Didactic Poetry (1.0)
Does poetry have anything to teach us? The Romans thought it did. They developed an entire genre of "didactic" verse intended to instruct the reader in topics ranging from the structure of the universe to the art of seduction. In this course we will read substantial portions of three didactic poems: Lucretius' philosophical poem on human happiness, On The Nature of the Universe, Vergil's panoramic farming manual, The Georgics, and Ovid's coy self-help book, The Art of Love. We will also read later examples of the form by modern authors. In the process we will learn more about atoms, grafting, bee-keeping, and flirting—as well as the history and techniques of a strange and fascinating genre.

Instructor: Young Prerequisite: LAT 201 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Spring

LAT 317 - Petronius' Satyricon (1.0)
In this course, we will read selections from Petronius' quixotic Satyricon in the original Latin. This satirical "novel" exposes the tawdry underneath of Neronian Rome in a manner that is both hilarious and disturbing. And yet the Satyricon's nature and purpose remain tantalizingly elusive. In attempting to unlock the text, we will investigate its (manipulation of) genre(s) and its place within the satirical tradition; its language; and its richly crafted characters and the insight they provide into the sociology of ancient Rome. We will also explore the reception of the Satyricon in contemporary aesthetic productions, including T. S. Eliot's Waste Land, F. Scott Fitzgerald's Great Gatsby, and the film Fellini's Satyricon.

Instructor: Staff Prerequisite: LAT 201 or a 300-level Latin course, or Wellesley's placement exam and permission of the instructor. Distribution: LL Term(s): Not Offered

LAT 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors. Distribution: None Term(s): Fall; Spring

LAT 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall; Spring

LAT 356 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department. Distribution: None Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

LAT 370 - Senior Thesis (1.0)
Prerequisite: LAT 360 and permission of the department. Distribution: None Term(s): Fall; Spring

Students enrolled in Senior Thesis Research (360) in the first semester carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
COGNITIVE AND LINGUISTIC SCIENCES

AN INTERDEPARTMENTAL MAJOR
Professor: Lucas (Director), Levitt
Assistant Professor: Carpenter
Advisory Committee: Lucas (Psychology and Cognitive and Linguistic Sciences), Levitt (Linguistics and French), McIntyre (Philosophy), Hildreth (Computer Science)

A major in cognitive and linguistic sciences is the interdisciplinary study of language and mind.

Cognitive and Linguistic Sciences Major

Goals for the Cognitive and Linguistic Sciences Major

The major is designed with two goals in mind:

- Provide students with a broad intellectual grounding in an interdisciplinary approach to the study of the mind. This goal is met by a group of required core courses which introduce students to techniques for studying language and cognition as well as background in the philosophical underpinnings of the cognitive and linguistic sciences
- Supply substantive training in one of the component disciplines (psychology, linguistics, computer science, or philosophy) through course work within a concentration area chosen by the student. The concentration will enable the student to strengthen and deepen her understanding of the mind within a single domain.

Requirements for the Cognitive and Linguistic Sciences Major

Students majoring in cognitive and linguistic sciences must take a minimum of nine units for the major, including four core units, one from each of the categories below, and a minimum of four electives in the major, including four core units, one from each of the categories below, and a minimum of four electives in the major.

- Computer Science Requirement: PHIL 220, CS 211, CS 212, LING 240, LING 244, or PHIL 216
- Linguistics Requirement: LING 114 or CLSC 216
- Formal System Requirement: PHIL 208, PHIL 209, PHIL 216, PHIL 221, PHIL 313, PHIL 340, PHIL 345 (when the topic for PHIL 349 is approved by the student’s advisor in the computer science major).

Linguistics Requirement: PHIL 207, PHIL 208, PHIL 209, PHIL 210, PHIL 216, PHIL 313, PHIL 340, or PHIL 345. PHIL 345 may be taken after the prerequisite courses have been completed.

CLSC - Cognitive and Linguistic Sciences Courses

CLSC 214 - Evolution and Human Behavior (1.0)

Evolutionary Psychology is the scientific study of human nature as shaped by natural selection. It is grounded in evolutionary biology and the psychological sciences with connections to disciplines ranging from neuroscience to anthropology and economics. Topics covered will include adaptive solutions to major life challenges including survival, mating, family relations, and group living (e.g., cooperation, aggression, and status).

Instructor: Lucas
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Cross-Listed as: PSYC 214
Distribution: SBA; EC
Term(s): Fall

CLSC 216 - Psychology of Language (1.0)

Introduction to the study of the psychological processes underlying language ability. Topics covered will include the biological and evolutionary foundations of language, child and adult language acquisition, reading, and sound, word, and sentence processing. We will also consider whether language is unique to humans, whether it is innate, and the degree to which language influences thought.

Instructor: Lucas
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Cross-Listed as: PSYC 216
Distribution: SBA; EC
Term(s): Spring

CLSC 250 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

CLSC 250H - Research or Individual Study (0.5)

Prerequisite: Open by permission of the instructor to first-year students and sophomores.
Distribution: None
Term(s): Fall, Spring

Cognitive and Linguistic Sciences Concentrations Courses

In designing a concentration, students need to demonstrate the intellectual coherence of their choices. Therefore, concentrations must be designed in close collaboration with the director. In cases where the student’s chosen concentration is in a discipline other than that of the director, a second advisor in the student’s field of concentration must also be arranged. Students must take at least one 300-level course in their concentration. Courses numbered 350/360/370 do not count toward this 300-level requirement.

Linguistics Concentration

Students concentrating in linguistics must elect at least four courses beyond the formal systems requirement from the following list. Three of these courses must be linguistics courses, including one 300-level course: LING 230, LING 240, LING 244, LING 312, LING 315, LING 319 or LING 322; CHN 231/CHN 331, CS 235, EDUC 308, EDUC 310, or EDUC 325; ENG 210; FREN 211 or FREN 308; PHIL 207, PHIL 216, or PHIL 333; CLSC 216 or PSYC 316. KOR 206 or KOR 256 may be taken after consultation with the student’s linguistics advisor.

Students planning to do graduate work in the discipline of linguistics should take at least one course in statistics, preferably PSYC 205. Students are also encouraged to do research, for example, through an independent study or thesis or an MIT UROP.

Linguistics Requirement: LING 114 or MIT 24.9

Formal System Requirement for Linguistics: LING 240 or LING 244 or appropriate equivalent MIT course

Students will also be expected to demonstrate proficiency in a foreign language above the College’s foreign language requirement (at an intermediate level or above).

Psychology Concentration

Students concentrating in psychology must take PSYC 205 and one of PSYC 304R or PSYC 314R. PSYC 207R may be substituted for either of the latter when approved by the Director. In addition, students must elect at least two courses from the following list: CLSC 214, PSYC 215, PSYC 217, PSYC 218, PSYC 219, PSYC 301, PSYC 305, PSYC 316, PSYC 318, PSYC 319, PSYC 328, PSYC 345 (when the topic for PSYC 345 is approved by the student’s psychology advisor).

Psychology Requirement: CLSC 216

Formal System Requirement for Psychology: One of CS 111, CS 112, LING 240, LING 244, or PHIL 216. For students planning to do graduate work in psychology, CS 112 is recommended.

Philosophy Concentration

Students concentrating in philosophy must elect at least four of any of the following courses: PHIL 207, PHIL 208 [2011-12], PHIL 209 [2010-11], PHIL 216, PHIL 217 [2011-12], PHIL 221, PHIL 313, PHIL 340, or PHIL 333. PHIL 345 may be taken after consultation with the student’s philosophy advisor.

Philosophy Requirement: LING 114 or CLSC 216

Formal System Requirement for Philosophy: PHIL 216

Computer Science Concentration

Students concentrating in computer science must take CS 230 and CS 232. In addition, students must elect at least two courses from the following list: CS 220, CS 231, CS 235, CS 251, CS 310, CS 332, or CS 349 (when the topic for CS 349 is approved by the student’s computer science advisor).

Linguistics Requirement: LING 114 or CLSC 216

Formal System Requirement for Computer Science: CS 111

Students planning to do graduate work in an interdisciplinary field that integrates computation and cognition should take at least one course in statistics. Students are also encouraged to do research, for example, through an independent study, thesis, MIT UROP, or summer internship.

CLSC - Cognitive and Linguistic Sciences Courses

CLSC 214 - Evolution and Human Behavior (1.0)

Evolutionary Psychology is the scientific study of human nature as shaped by natural selection. It is grounded in evolutionary biology and the psychological sciences with connections to disciplines ranging from neuroscience to anthropology and economics. Topics covered will include adaptive solutions to major life challenges including survival, mating, family relations, and group living (e.g., cooperation, aggression, and status).

Instructor: Lucas
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Cross-Listed as: PSYC 214
Distribution: SBA; EC
Term(s): Fall

CLSC 216 - Psychology of Language (1.0)

Introduction to the study of the psychological processes underlying language ability. Topics covered will include the biological and evolutionary foundations of language, child and adult language acquisition, reading, and sound, word, and sentence processing. We will also consider whether language is unique to humans, whether it is innate, and the degree to which language influences thought.

Instructor: Lucas
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Cross-Listed as: PSYC 216
Distribution: SBA; EC
Term(s): Spring

CLSC 250 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

CLSC 250H - Research or Individual Study (0.5)

Prerequisite: Open by permission of the instructor to first-year students and sophomores.
Distribution: None
Term(s): Fall, Spring
CLSC 300 - Seminar. Topics in Cognitive and Linguistic Sciences (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: SBA; EC
Term(s): Fall; Spring

CLSC 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

CLSC 360 - Senior Thesis Research (1.0)

Prerequisite: Permission of the director.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

CLSC 370 - Senior Thesis (1.0)

Prerequisite: CLSC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

LING - Linguistics Courses

LING 114 - Introduction to Linguistics (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: EC
Term(s): Fall; Spring

LING 238 - Sociolinguistics (1.0)

The application of linguistics to the analysis of sociocultural variation in language. We will examine the way information about age, gender, social class, region, and ethnicity is conveyed by variations in the structural and semantic organization of language. We will also examine language attitudes and language planning in multilingual societies.
Instructor: Levitt

LING 244 - Language: Form and Meaning (1.0)

This course will consider some basic questions about language: What do we actually know when we know a language? How is the structure of language best described? Are there properties which all languages share, and what do those properties tell us about language itself? We will look at specific problems in morphology, syntax, and semantics, and the strengths and weaknesses of different linguistic theories will be considered. While many of the problems considered in this class will involve English, we will also be looking at other languages, both European and non-European.
Instructor: Tham (East Asian Languages and Cultures)
Prerequisite: LING 114
Distribution: EC
Term(s): Fall

LING 248 - Introduction to Historical Linguistics (1.0)

An examination of all forms of language change, including sound change, analogical change, semantic and lexical change, and syntactic change. Students will learn and apply the techniques of the comparative method in order to reconstruct earlier stages of various languages and to understand how linguists determine the genetic relationships among languages. Several theories of linguistic change will be explored. Students will also be introduced to the history of the discipline of linguistics, which largely began with the development of the techniques for historical reconstruction.
Instructor: Levitt
Prerequisite: LING 114 or permission of the instructor.
Distribution: EC
Term(s): Not Offered

LING 312 - Bilingualism: An Exploration of Language, Mind, and Culture (1.0)

Exploration of the relationship of language to mind and culture through the study of bilingualism. The bilingual individual will be the focus for questions concerning language and mind: the detection of "foreign" accent, the relationship of words to concepts, the organization of the mental lexicon, language specialization of the brain, and the effects of early bilingualism on cognitive functioning. The bilingual nation will be the focus for questions dealing with language and culture: societal conventions governing use of one language over another, effects of extended bilingualism on language development and change, and political and educational impact of a government's establishing official bilingualism.
Instructor: Levitt
Prerequisite: Open to juniors and seniors who have taken a related 200-level course in linguistics, psychology, anthropology, or philosophy, or permission of the instructor.
Distribution: SBA; EC
Term(s): Not Offered

LING 315 - Invented Languages: From Wilkins' Real Character to Avatar's Na'vi (1.0)

Instructor: Carpenter
Prerequisite: Open to juniors and seniors who have taken LING 114 or CLSC/PSYC 216 and a related 200-level course in linguistics, psychology, anthropology, or philosophy, or permission of the instructor.
Distribution: SBA; EC
Term(s): Not Offered

LING 319 - The Spoken and Written Word: Effects on Cognition and Culture (1.0)

For thousands of years, humans communicated via the ephemeral spoken word, and then writing was invented. How has the advent of writing affected us, both as individuals and members of cultural groups? To answer this question, we will explore the cognitive, linguistic, and cultural implications of spoken and written forms of communication. We start with an overview of the field of orality and literacy studies, followed by an examination of theories of the origin of human language and the history of the development of writing. We then move to an analysis of how the brain processes the spoken and written word and how these modes of communication affect memory and reasoning. From a cultural perspective, we examine the ways in which certain ancient and current societies differ as a function of their use of oral versus written forms of communication.
Instructor: Carpenter
Prerequisite: Open to juniors and seniors who have taken LING 114 or CLSC/PSYC 216 and a related 200-level course in linguistics, psychology, anthropology, or philosophy, or permission of the instructor.
Distribution: SBA; EC
Term(s): Not Offered

LING 322 - Seminar: The Cognitive Science of Verbal Humor and Verbal Play (1.0)

We will examine verbal humor and verbal play from the perspectives of several of the key disciplines of cognitive science, including psychology, linguistics and philosophy. We will begin with psychological studies of humor, and then look at computational models of humor and its relationship to personality, health and well-being. We then focus on how the analysis of verbal humor and verbal play depends on the categories and concepts of formal linguistics. We next turn to sociolinguistic approaches to the subject, including an examination of women's use of verbal humor. Finally, we explore some key philosophical questions: Why does humor exist and what does it reveal to us about the mind?
Instructor: Levitt  
Prerequisite: Open to juniors and seniors who have taken a related 200-level course in linguistics, psychology, anthropology, or philosophy, or permission of the instructor.  
Distribution: EC  
Term(s): Spring

LING 350 - Research or Individual Study (1.0)  
Prerequisite: Permission of the instructor. Open to juniors and seniors.  
Distribution: None  
Term(s): Fall, Spring
A STRUCTURED INDIVIDUAL MAJOR

Director: Nolden (German)
Mellon Postdoctoral Fellow: Curtis
Advisory Board: Hall (Spanish), Rosenwald (English), Silver (Religion), Weiner (Russian), Young (Classical Studies), Zimmerman (EALC), TBD (ex officio: Chair for Language Chairs)

Using literary texts as its base of inquiry, Comparative Literature promotes the study of intercultural relations that cross national boundaries, multicultural relations within a particular society, and the interactions between literature and other forms of human activity, including the arts, the sciences, philosophy, and cultural artifacts of all kinds.

Comparative Literature Major

Goals for the Comparative Literature Major

- Acquaint students with the wide range of writing across national and linguistic borders and prepare them to read texts of different cultural traditions in their own languages
- Familiarize students with the ways in which literature can interact with various other forms of human activity and how literary texts can be read in interdisciplinary contexts
- Teach students to write well and to develop and use the skills of close reading

Requirements for the Comparative Literature Major

For students entering in the Fall of 2011 and later:
The comparative literature major introduces students to the study of literature across departmental, national, and linguistic boundaries. Students devise their own course of study in consultation with their advisor and with the director of the program, in relation to the major’s particular languages and concentration and mindful of the many and diverse courses that pertain to the study of literature.

These include, but are not limited to, the following:
1. courses in literary history;
2. courses in particular literary genres, authors, or periods;
3. courses in the theory of literature;
4. courses in linguistics;
5. courses on the theory and practice of translation;
6. courses supplementing the study of literary texts offered in the humanities and social sciences.

Many courses combine or fall between these categories.

Majors in comparative literature shall complete a minimum of 10 units. All units must count toward the major and in the departments in which they are offered (unless they are language courses, of which up to two 200-level courses may be counted toward the major).

1. Foundation: Students shall take “World Literature” (CPLT 180) early in their studies.
2. Concentration: At least three courses must be elected in a single department or program. In consultation with the advisor and director, students may choose to concentrate in the literature of a nation or a region or in a specific field of inquiry (e.g. literature and religion, translation, literature and politics, philosophical or theoretical inquiries into literature, visual arts and literature, etc.). Majors assemble a group of concentration courses from literature or cognate departments (of which English may be one); when relevant, the student shall be obliged to satisfy departmental prerequisites for these courses.
3. Complementation. a) Pre-modern study. Majors shall take a minimum of one course outside of the modern period (the major advisor will assist the student in selecting appropriate pre-modern courses); b) Theory of literature. Majors shall take at least one course offering a theoretical perspective helpful to their particular course of study; c) 300-level courses. Majors shall take two 300-level courses, each in a different language, of which English may be one; ideally one of these courses pertains to their concentration. d) Independent work. Majors shall either supplement one of their 300-level courses with an extra independent project or else enroll in a CPLT 350, CPLT 360, and/or CPLT 370.

For students who entered prior to the Fall of 2011:
See above, with the following amendments: 1) Foundation: It is strongly recommended that World Literature (CPLT 180) is selected. 2) Concentration: It is strongly recommended that at least three courses are selected in a single department or program.

Honors in Comparative Literature

There are two routes to honors in the major: Plan A entails writing a thesis and Plan B entails a dossier of essays written for several courses with a statement of connections among them and critical questions raised by them. Both Plan A and Plan B require a student to pass an oral exam.

To be admitted to the honors program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

CPLT - Comparative Literature Courses

CPLT 113 - Studies in Fiction (1.0)
A reading of some of the greatest novels of English, American, and world literature. Taught primarily in lecture, this course will not be writing intensive. Designed especially for first-year students and non-majors.
Instructor: Peltason (English)
Prerequisite: None. Especially recommended to non-majors.
Cross-Listed as: REL 113
Distribution: LL
Term(s): Fall

CPLT 120 - First-Year Seminar: Rousseau, Franklin, Kant: The American and European Enlightenment (1.0)
The course will focus on the main tenets of the Enlightenment and thus introduce students to an important segment of European and American intellectual history. Students will become familiar with the core ideas of enlightenment and rationalism (critique, tolerance, universalism, secularization, etc.) and will learn to understand how these ideas were debated and articulated in different and yet related arts, disciplines, and cultural and political discourses. They will become familiar with patterns of intellectual transfer across Europe and the US, and they will develop an understanding of how deeply the legacy of the enlightenment has influenced the world we live in today.
Instructor: Nolden
Prerequisite: None. Open only to first-year students.
Distribution: LL
Term(s): Not Offered
Mandatory credit/noncredit.

CPLT 180 - World Literature (1.0)
This course is an introduction to the study of world literature. Students will read a selection of foundational works of literature from a variety of times and cultures, observing those qualities that allowed the works to transcend their historical moment in order to enter into global consciousness. We will study the assigned texts from three points of view: as individual works of literary art, as rising out of a specific cultural context, and as works that have escaped that original context into other languages and ages. Noting how some meanings are lost in translation and others gained, students will develop a mode of reading and a critical vocabulary. The required readings will likely be drawn from the following works: The Epic of Gilgamesh, The Odyssey, The Ramayana, The Aeneid, One Thousand and One Nights, Dream of the Red Chamber, The Tale of Genji, Don Quixote, Robinson Crusoe, Jane Eyre, Heart of Darkness, One Hundred Years of Solitude, Omeros, The Satanic Verses, Things Fall Apart. Taught primarily in lecture and not writing-intensive.
Instructor: Sides (English)
Prerequisite: None
Distribution: LL
Term(s): Fall

CPLT 208 - Legend, Satire, and Storytelling in the Hebrew Bible (1.0)
The art of narrative composition in the Hebrew Bible. The literary techniques and conventions of ancient Israelite authors in the Bible’s rich corpus of stories. Philosophical and aesthetic treatment of themes such as kingship, power, gender, and covenant. Primary focus on the role of narrative in the cultural life of ancient Israel, with attention also to the difficulties of interpreting biblical stories from within our contemporary milieu.
Instructor: Silver (Religion)
Prerequisite: None
Cross-Listed as: REL 208
Distribution: REL, H5
Term(s): Spring

CPLT 233 - Seminar: Literature and Slavery: Freedom in Speech (1.0)
Literature often has political value. In the eighteenth and nineteenth centuries, while political societies formed and revolutions began, writers and activists also turned to novels, short stories, plays, and poetry to pose philosophical questions about slavery and freedom. These texts all appeared during a time when the transatlantic trade in enslaved peoples flourished, founded, and eventually waned. What did literature have to do with the slave trade’s decline? In this course, we will read British, American, French, Cuban, and Haitian texts about human freedom and its necessary and unnecessary restrictions. We will consider the influence of genre, history, and readership on these texts and we will...
also ask how literature might help us define slavery and freedom. Ultimately, students will take what they learn from this literature on slavery and develop their own ideas about why and how literature has political value.

Instructor: Curtis
Prerequisite: None
Distribution: LL
Term(s): Spring

CPLT 225 - Beyond Sonnets: The World of Poetic Forms (1.0)

In this course we will study a range of poetic forms which originated in Europe, Asia or the Middle East and then became popular among English speaking poets. In each case, we will examine the form within its original cultural milieu, then trace its entry into English and subsequent development in modern English and contemporary American poetry. Some of the questions we will ask include: How do poetic forms reflect and respond to the cultural landscape in which they developed? How does the meaning and use of a form evolve when it enters a new culture? What are some of the technical difficulties inherent in adapting a form into a new language? To what extent do poetic forms come freighted with the histories from which they arose? Some of the forms to be discussed include: Ode (Greece), Funeral Elegy (Greece), Epigram (Rome), Love Elegy (Rome), Sestina (Italy), Pantoum (Malaysia) Ghazal (Indo-Persian-Arabic), Haiku and Renga (Japan).

Instructor: Young
Prerequisite: None
Cross-Listed as: CLCV 225
Distribution: LL
Term(s): Fall
Ann E. Maurer ’51 Speaking Intensive Course

This course may be taken as either CPLT 225 or, with additional assignments, as CPLT 325.

CPLT 229 - Telling Stories from the Past (1.0)

Drawing on works from a number of national traditions and genres, the course focuses on the telling of the story of history. Beginning with a reflection on the writing of history and literature, the course goes on to examine the interaction between past events and literary, cinematic, and historiographical texts. What happens when past events are represented in literary, cinematic, and historiographical texts? How are past events made present? What difficulties do literature, cinema, and history encounter in representing atrocious events like the Holocaust? To work toward answering some of these questions, we will read historical novels (or extracts from them), as well as view films and survey some of the many critical writings that have addressed these thorny and often contentious issues.

Instructor: Ward (Italian Studies)
Prerequisite: None
Distribution: LL
Term(s): Not Offered

CPLT 284 - Magical Realism (1.0)

This course examines fictions whose basic reality would be familiar if not for the introduction of a magical element that undermines commonplace notions about what constitutes reality in the first place. The magical element can be a demon, talisman, physical transformation, miraculous transition in space or time, appearance of a second plane of existence, revelation of the unreality of the primary plane of existence, etc. Students will read Kafka’s Metamorphosis, Queuane’s The Blue Flowers, Bulgakov’s The Master and Margarita, Márquez’s One Hundred Years of Solitude, Calvino’s If on a Winter’s Night a Traveler, Pynchon’s The Crying of Lot 49, Murakami’s Hard-Boiled Wonderland and the End of the World, and Sokalov’s School for Fools, and short stories by Borges, Cortazar, and Nabokov.

Instructor: Weiner (Russian)
Prerequisite: None
Distribution: LL
Term(s): Fall

CPLT 288 - The Art of the European Novel (1.0)

Our course will trace the development of the novel from its early beginnings through its reincarnation in the Middle Ages (Wolfram von Eschenbach’s Parzival) to its popular rise in the last three centuries. We will consider authors from France (Rabelais, Flaubert), Spain (Cervantes), England (Richardson, Brontë), Germany (Kafka), Russia (Tolstoy), and Italy (Calvino) and discuss various subgenres of this most popular of all literary genres (among them the picaresque novel, Bildungsroman, gothic novel, etc.).

Instructor: Nolden (German)
Prerequisite: None
Distribution: LL
Term(s): Not Offered

CPLT 325 - Beyond Sonnets: The World of Poetic Forms (1.0)

In this course we will study a range of poetic forms which originated in Europe, Asia or the Middle East and then became popular among English speaking poets. In each case, we will examine the form within its original cultural milieu, then trace its entry into English and subsequent development in modern English and contemporary American poetry. Some of the questions we will ask include: How do poetic forms reflect and respond to the cultural landscape in which they developed? How does the meaning and use of a form evolve when it enters a new culture? What are some of the technical difficulties inherent in adapting a form into a new language? To what extent do poetic forms come freighted with the histories from which they arose? Some of the forms to be discussed include: Ode (Greece), Funeral Elegy (Greece), Epigram (Rome), Love Elegy (Rome), Sestina (Italy), Pantoum (Malaysia) Ghazal (Indo-Persian-Arabic), Haiku and Renga (Japan).

Instructor: Young
Prerequisite: Fulfillment of the language requirement (in any language) or permission of the instructor.
Cross-Listed as: CLCV 325
Distribution: LL
Term(s): Spring
Ann E. Maurer ’51 Speaking Intensive Course

CPLT 334 - Literature and Medicine (1.0)

Drawing on texts from different countries, this course investigates literature’s obsession with medicine. Literary representations of doctors and patients, as well as the effect of sickness on family structure, touching on mental and physical suffering of various kinds—hysteria and depression, childbirth and abortion, disability, PTSD and AIDS, death and mourning, the search for healing, and the redemptive power of art. Attention will be given to the links between the treatment of medical issues in fiction and autobiographies. Selected visual representations, in film and photography, will also be introduced.

Instructor: Respaat
Prerequisite: One 200-level course in literature or by permission of the instructor. Not open to first-year students.
Distribution: LL
Term(s): Not Offered

CPLT 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the director. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

CPLT 359 - Calderwood Seminar for Public Writing: You Say You Want to Change the World: Advocating for Other Cultures (in English) (1.0)

Your local school board is considering eliminating foreign language instruction at the high school. You think it’s a bad idea. How will you make your voice heard? This seminar will explore writing that challenges language majors to rethink and repurpose their academic knowledge, shaping it to contribute to public debates. Such writing may include op-eds and letters to the editor; book, film and music reviews; blogs; and interviews with notables in the field. Students will write weekly and revise their work in response to comments from the instructor and their peers. The presence of majors in different languages will introduce students to the assumptions, perspectives and approaches of other cultures, with the goal of helping participants become advocates for a wider, more inclusive cultural literacy.

Instructor: Lydgate (French)
Prerequisite: At least two courses at the advanced 200 level or the 300 level in the major department.
Cross-Listed as: FREN 359
Distribution: LL
Term(s): Spring
Open to junior and senior majors in the foreign language departments and related programs, and in Classical Studies and Comparative Literature.

CPLT 360 - Senior Thesis Research (1.0)

Prerequisite: CPLT 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

CPLT 370 - Senior Thesis (1.0)

Prerequisite: CPLT 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
Computer Science encompasses the systematic study of computing systems and computation. It is continually evolving and expanding, making it an exciting field of study. All of the traditional areas in computer science as well as newer directions are represented in our faculty's expertise (including algorithms, programming languages, data structures, artificial intelligence, human-computer interaction, databases, computer architecture, networks, security, vision, graphics, parallel computing, robotics, bioinformatics, Web information retrieval, multimedia), allowing us to offer a large variety of courses and substantial research opportunities for students.

For advice on making a choice about an introductory Computer Science course, consult “Choosing an Introductory CS Course” online at new.wellesley.edu/cs/curriculum/introductory.

Computer Science Major

Goals for the Computer Science Major

The aim of our program for the major is to prepare students for a successful career in computer science or a related discipline, including a solid preparation for graduate work or direct entry into the computing profession. To achieve this success, computer science majors must possess the following knowledge and competencies upon graduation:

- A firm foundation in fundamental areas of computer science, encompassing its theoretical basis, software methodologies, computer hardware, and applications
- Strong problem-solving and critical, analytical thinking skills; confidence as independent learners who can apply computational thinking to new problems and adapt to new technologies
- Strong written and oral communication skills, including the ability to work on a team-based project and to solve problems in a collaborative setting

Computer science majors should understand the connections between computer science and other disciplines, and appreciate the importance of computer science to society.

Requirements for the Computer Science Major

Students majoring in computer science must complete CS 111, CS 230, CS 231, CS 235, CS 240, CS 251, two 300-level CS courses, and at least one additional CS course at the 200 or 300 level. Students who do not take CS 111 must replace this requirement with an additional one-unit CS course at the 200 or 300 level. CS 118 [2012-13] may serve as a substitute for CS 111 for major requirements by permission of the department chair. Computer science courses at other institutions used to meet the nine-course requirement must be approved in advance by the department chair on an individual basis. In addition, all majors in computer science are expected to complete (1) MATH 225 (Combinatorics and Graph Theory) and (2) at least one additional course in mathematics at the 200 or 300 level. Particularly relevant mathematics courses are MATH 206 (Linear Algebra), MATH 220 (Probability and Elementary Statistics), MATH 223 (Number Theory), MATH 305 (Abstract Algebra), MATH 309 (Foundations of Mathematics), and MATH 325 (Graph Theory). The MATH courses are considered prerequisites for the CS degree and could be counted toward another major. Students should consult a computer science faculty member for advice in choosing mathematics courses best suited to their interests. Students are encouraged to consult the department’s website (new.wellesley.edu/cs) for suggestions of possible course schedules for completing the major. Students considering a junior year abroad should consult a faculty member in the department as soon as possible in their sophomore year to plan a schedule of courses to complete the major.

All computer science majors are required to participate in computer science student seminars held throughout the academic year. In these seminars, students have the opportunity to explore topics of interest through reading and discussion, field trips, invited speakers, independent research projects, or software development projects.

Honors in Computer Science

Students can earn honors in computer science by successfully completing an honors-quality senior thesis. A detailed description of the senior thesis project in computer science can be found at the department’s website (new.wellesley.edu/cs/research/thesis). Majors who are interested in undertaking a senior thesis project are urged to discuss their plans with either their advisor or the department chair as early as possible in their junior year.

Graduate Study in Computer Science

Students who plan to pursue graduate work in computer science are strongly encouraged to develop their background in mathematics, particularly in the areas of linear algebra, logic, probability and statistics, number theory, and graph theory. In addition, students who are planning either graduate work or advanced technical research or development work are strongly encouraged to pursue at least one independent study or research project before graduating, in the form of a Wellesley course (CS 250, CS 350, CS 360), an MIT UROP, or a summer internship. Consult new.wellesley.edu/cs/research for more details.

Advanced Placement Policy in Computer Science

Students may receive a maximum of one unit of college credit for a score of 5 on the Computer Science A or AB Advanced Placement Exam. This unit does not count toward the computer science major or minor. Students receiving AP credit for computer science should consult with the department regarding enrollment in CS 230 or CS 240. Computer science majors and minors should consult with a computer science faculty advisor before electing to take a computer science course as credit/noncredit.

Computer Engineering

Students interested in computer engineering should consult the course listings in Extradepartmental and enroll in EEXT 160, Introduction to Engineering Science. This course is intended to be a gateway experience for possible subsequent engineering studies, such as the engineering certificates from the Olin College of Engineering. The Special Academic Programs section contains a description of these certificates that represent groups of engineering courses at Olin designed to complement a major at Wellesley. More information can be found at new.wellesley.edu/advising/classdeans/engineerin- g.

Interdepartmental Majors

Students interested in an interdepartmental major in Cognitive and Linguistic Sciences, Media Arts and Sciences, or Neuroscience are referred to these listings in the catalog.

Students interested in engineering should consult the course listings in Extradepartmental.

Computer Science Minor

Requirements for the Computer Science Minor

The computer science five-course minimum minor is recommended for students whose primary interests lie elsewhere, but who wish to obtain a fundamental understanding of computer science. The minor consists of CS 111, CS 230, one of CS 231, CS 235, or CS 240, at least one CS course above the 100 level, and at least one 300-level CS course. Independent study courses (CS 250, CS 250H, CS 350, CS 350H) do not count toward the required courses for the minor. Students who do not take CS 111 must replace this requirement with one additional one-unit CS course at the 200 or 300 level. CS 118 [2012-13] may serve as a substitute for CS 111 for minor requirements by permission of the department chair.

CS - Computer Science Courses

CS 110 - Computer Science and the Internet (1.0)

This course explains the basics of how the Internet works and how to build a website. Topics include client-server architecture; structuring Web pages with HTML, CSS, and JavaScript; the representation of colors, images, and sound on the computer; encryption; cookies; and CGI forms. We also discuss accessibility, copyright, intellectual property, and critical thinking in the context of the Internet. The required project models most phases of the standard software lifecycle. Students are introduced to programming by building an interactive website using JavaScript. Students are required to attend an additional 70-minute discussion section each week.

Instructor: Mir, Staff
Prerequisite: None. No prior background with computers is expected.
Distribution: MM
Term(s): Fall, Spring

CS 111 - Computer Programming and Problem Solving (1.0)

An introduction to problem solving through computer programming. Students learn how to read, modify, design, debug, and test algorithms that solve problems. Programming concepts include control structures, data structures, abstraction, recursion, modularity, and object-oriented design. Students
CS 112 - Computation for the Sciences (1.0)

This course teaches how to create apps for mobile devices as a vehicle for learning big ideas of computer science, engineering, and entrepreneurship, and explore technology’s impact on society. Applications include games, quizzes, electronic voting, location-aware apps, social networking, and apps that communicate with Web services. All apps will be created on Android phones using App Inventor, a visual programming environment that does not require previous programming experience. The course culminates in a project where students design and implement new mobile apps for clients. Students are required to attend an additional 70-minute laboratory section each week.

Instructor: Price Jones, Tjaden, Turbak
Prerequisite: None. No prior background with computers is expected.
Distribution: MM
Term(s): Fall; Spring
Does not fulfill the laboratory requirement.

CS 215 - Multimedia Design and Programming (1.0)

The purpose of this course is to give students a broad foundation in issues related to creating multimedia and hypermedia applications. Topics to be covered include history and philosophy of hypermedia; principles of human-computer interaction; multimedia programming; optimizing for CD-ROMs and the World Wide Web; digital representation and editing of media (audio, graphics, video); media compression and transmission; and delivery of multimedia applications.

Instructor: Metaxas
Prerequisite: CS 111 or CS 118 [2012-13], with a grade of at least C+, is required, or permission of the instructor. At least one of ARTS 105, ARTS 108/CAMS 138, or ARTS 109/CAMS 139 [2010-11] is recommended.
Distribution: MM
Term(s): Fall
Does not fulfill the laboratory requirement.

CS 220 - Human-Computer Interaction (1.0)

Human-Computer Interaction is one of the areas that have transformed the way we use computers in the last 30 years. Topics include methodology for designing and testing user interfaces, interaction styles (command line, menus, graphical user interfaces, virtual reality, tangible user interfaces), interaction techniques (including use of voice, gesture, eye movements), design guidelines, and user interface software tools. Students will design a user interface, program a prototype, and test the results for usability.

Instructor: Shaer
Prerequisite: One of CS 110, CS 111, CS 112, CS 117, CS 118 [2012-13]
Distribution: MM
Term(s): Spring

CS 230 - Data Structures (1.0)

An introduction to techniques and building blocks for organizing large programs. Topics include: modules, abstract data types, recursion, algorithmic efficiency, and the use and implementation of standard data structures and algorithms, such as lists, trees, graphs, stacks, queues, priority queues, tables, sorting, and searching. Students become familiar with these concepts through weekly programming assignments using the Java programming language. Students are required to attend an additional two-hour laboratory section each week.

Instructor: Metaxas, Shaer, Tjaden, Staff
Prerequisite: CS 111 or CS 118 [2012-13] or permission of the instructor. Students who received a grade of C+ or lower in CS 111 or CS 118 [2012-13] must contact the instructor before enrolling.
Distribution: MM
Term(s): Fall; Spring
Does not fulfill the laboratory requirement.

CS 231 - Fundamental Algorithms (1.0)

An introduction to the design and analysis of fundamental algorithms. General techniques covered: divide-and-conquer algorithms, dynamic programming, greediness, probabilistic algorithms. Topics include: sorting, searching, graph algorithms, compression, cryptography, computational geometry, and NP-completeness.

Instructor: Metaxas, Tjaden
Prerequisite: CS 230 and either MATH 225 or permission of the instructor.
Distribution: MM
Term(s): Fall; Spring

CS 232 - Artificial Intelligence (1.0)

An introduction to artificial intelligence (AI), the design of computer systems that possess and acquire knowledge and can reason with that knowledge. Topics include knowledge representation, problem solving and search, planning, vision, language comprehension and production, learning, common sense reasoning, and expert systems. To attain a realistic and concrete understanding of these problems, the Python programming language will be taught and used to implement the algorithms of the course.

Instructor: Staff
Prerequisite: CS 230 or permission of the instructor.
Distribution: MM
Term(s): Not offered
Normally offered in alternate years.

Term(s): Fall; Spring
Projects may include client-server applications and network measurement tools. Prerequisite: CS 230 or permission of the instructor. Distribution: MM Term(s): Not Offered Normally offered in alternate years.

CS 249-01-5 - Topics in Computer Science (1.0)
Topic for 2014-15: Web Mashups
On the Web, your friends are on Facebook, the music you like on Pandora, the instructional videos on YouTube, the places to visit on Google Maps. Is there a way to bring these contents into one single website? Yes, and it is called a web mashup, a new kind of website created by combining together data and services from different websites. These websites (such as Google Maps) allow access through an API (application programming interface), and one can combine their contents in innovative and inspiring ways. Students in this course will build a final project a web mashup that provides an informational, societal, or entertainment value not available in existing websites, by learning the latest, cross-platform technologies such as HTML5, jQuery, Ajax, and Google App Engine. Instructor: Mustafaraj Prerequisite: One of CS 110, CS 111, CS 112, CS 114, CS 117 or CS 118 and by permission of the instructor. Distribution: MM Term(s): Spring Not open to students who have taken CS 304 in previous semesters.

CS 250 - Research or Individual Study (1.0)
Prerequisite: CS 230 or permission of the instructor. Distribution: None Term(s): Fall, Spring Normally mandatory credit/noncredit

CS 250H - Research or Individual Study (0.5)
Prerequisite: CS 230 or permission of the instructor. Distribution: None Term(s): Fall, Spring Normally mandatory credit/noncredit

CS 251 - Theory of Programming Languages (1.0)
This course offers an introduction to the dimensions of modern programming languages. Covers major programming paradigms: function-oriented, imperative, object-oriented, and logic-oriented. Dimensions include syntax, naming, state, data, control, concurrency, nondeterminism, and types. These dimensions are explored via mini-language interpreters written in OCaml, Scheme, and Haskell that students experiment with and extend. Instructor: Turbak Prerequisite: CS 230 or permission of the instructor. Distribution: MM Term(s): Spring

CS 304 - Databases with Web Interfaces (1.0)
A study of the three-layer architecture commonly used for Web-based applications such as e-commerce sites. We will learn to model and design databases using entity-relationship diagrams and the Standard Query Language (SQL) for managing databases. We will learn PHP, CGI/Python, and Java Servlets, which are three important technologies for Web-based architectures. We will also discuss performance, reliability, and security issues. Finally, we will create dynamic websites driven by database entries. Instructor: Anderson Prerequisite: CS 230 or permission of the instructor. Distribution: MM Term(s): Fall

CS 307 - Computer Graphics (1.0)
A survey of topics in computer graphics with an emphasis on fundamental techniques. Topics include: graphics hardware, fundamentals of three-dimensional graphics including modeling, projection, coordinate transformation, synthetic camera specification, color, lighting, shading, hidden surface removal, animation, and texture-mapping. We also cover the mathematical representation and programming specification of lines, planes, curves, and surfaces. Instructor: Anderson Prerequisite: CS 230 or permission of the instructor. Distribution: MM Term(s): Spring Normally offered in alternate years.

CS 310 - Foundations of Cryptology (1.0)
When is a cryptographic system secure and how will we ever know? This course introduces the computational models and theory computer scientists use to address these issues. Topics include one-way functions, trapdoor functions, probabilistic complexity classes, pseudorandom generators, interactive proof systems, zero-knowledge proofs, and the application of these theories to modern cryptology. Instructor: Shall Prerequisite: CS 231 or CS 235 or permission of the instructor. Distribution: MM Term(s): Not Offered

CS 313 - Computational Biology (1.0)
Many elegant computational problems arise naturally in the modern study of molecular biology. This course is an introduction to the design, implementation, and analysis of algorithms with applications in genomics. Topics include bioinformatic algorithms for dynamic programming, tree-building, clustering, hidden Markov models, expectation maximization, Gibbs sampling, and stochastic context-free grammars. Topics will be studied in the context of analyzing DNA sequences and other sources of biological data. Applications include sequence alignment, gene-finding, structure prediction, motif and pattern searches, and phylogenetic inference. Course projects will involve significant computer programming in Java. No biology background is expected. Instructor: Price Jones Prerequisite: CS 230 or permission of the instructor. Distribution: MM Term(s): Not Offered Normally offered in alternate years.

CS 315 - Web Search and Mining (1.0)
In the last decade we have experienced an explosive growth of information through the Web. Locating information seems to be very easy, while determining the quality of information can be tricky. This course is for students who want to know why search engines can answer your queries fast and (most of the time) accurately, why at other times they seem to be missing the point and provide untrustworthy information, and how one can design a website that acquires high visibility. We will cover traditional information retrieval methods and Web search algorithms such as crawlers and spiders, with a focus on probabilistic and graph-theoretic methods that can detect Web spam. We will also cover some basic understanding of text mining and data clustering. Time permitting, we will examine other relevant issues of the information explosion era, such as the shape and structure of the Web, epistemology of information, and properties of large random networks. Instructor: Metaxas Prerequisite: CS 230 or permission of the instructor. Not open to students who have taken this topic as CS 349. Distribution: MM Term(s): Spring Normally offered in alternate years.

CS 320 - Tangible User Interfaces (1.0)
Tangible user interfaces emerge as a novel human-computer interaction style that interlinks the physical and digital worlds. Extending beyond the limitations of the computer mouse, keyboard, and monitor, tangible user interfaces allow users to take advantage of their natural spatial skills while supporting collaborative work. Students will be introduced to conceptual frameworks, the latest research, and a variety of techniques for designing and building these interfaces. Developing tangible interfaces requires creativity as well as an interdisciplinary perspective. Hence, students will work in teams to design, prototype, and physically build tangible user interfaces. Instructor: Shaer Prerequisite: CS 215, CS 220, or CS 230, or permission of the instructor. Not open to students who have taken this course as a topic of CS 349. Distribution: MM Term(s): Fall

CS 322 - Seminar: Digital Technologies and Learning Communities (1.0)
This seminar is an intensive examination of the intersection of digital technologies and learning, and of implications for learning communities and the learning enterprise. Digital technologies have become part of our social fabric. The capacity to critically assess and use these technologies to support learner success is more important than ever. This course is designed to support the development of thoughtful and responsive educators’ ability to address the unique challenges inherent in the technology-rich options of today’s learning environments. Instructor: Chapman Prerequisite: EDUC 110, EDUC 215, or EDUC 216 Cross-Listed as: EDUC 322 Distribution: EC Term(s): Fall

CS 332 - Visual Processing by Computer and Biological Vision Systems (1.0)
This course explores models for deriving information about the three-dimensional world from visual images. We examine methods used in computer vision systems to analyze digital images and strategies used by biological vision systems to interpret the retinal image. We will use an interdisciplinary approach that combines computer science, psychology, and neuroscience, and contributes to the design of effective computer vision systems and the understanding of human visual processing. Topics include edge detection; stereo vision; motion analysis; shape from shading; color; object recognition; and image processing applications in medicine, security, information retrieval, and intelligent vehicles. The course uses vision software written in MATLAB. Students are required to attend an additional 70-minute discussion section each week. Instructor: Heldreth
Prerequisite: CS 342 - Computer Security (1.0)
An introduction to computer security. Topics include ethics, privacy, authentication, access control, information flow, operating system security (with a focus on Linux), cryptography, security protocols, intrusion prevention and detection, firewalls, viruses, network security, Web security, and programming language security. Assignments include hands-on exercises with security exploits and tools in a Linux environment. Participants will independently research, present, and lead discussions on security-related topics. Students are required to attend an additional 70-minute discussion section each week.
Instructor: Turbak
Prerequisite: CS 230 and CS 240 or permission of the instructor. CS 242 recommended.
Distribution: MM
Term(s): Fall
Normally offered in alternate years.

CS 349-01-S - Advanced Topics in Computer Science (1.0)
Topic for 2014-15: Quantifying Data Privacy
Privacy is recognized as a fundamental human right, and this recognition is increasingly being extended to people's data. Yet, there is vigorous debate and disagreement on the meaning of data privacy and how to preserve it. This course is an in-depth study into how computer scientists quantify privacy, how dealing with data necessitates such a consideration, what are good notions of data privacy and how we can design technologies and algorithms that fulfill such notions.
Instructor: Mir
Prerequisite: CS 230 and MATH 225 or permission of the instructor
Distribution: MM
Term(s): Spring

CS 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring
Normally mandatory credit/noncredit

CS 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring
Normally mandatory credit/noncredit

CS 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

CS 370 - Senior Thesis (1.0)
Prerequisite: CS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
DEPARTMENT OF EAST ASIAN LANGUAGES AND CULTURES

Teacher Certification in East Asian Languages and Cultures

Students interested in seeking certification in teaching Chinese or Japanese should speak with the chairs of the EALC department and education department early in their college career.

Transfer Credits in East Asian Languages and Cultures

The transfer of credit (either from another American institution or from a program abroad) is not automatic. Students wishing to transfer credit from another institution must present proof of course content and performance to the EALC chair in the form of syllabi, written work, exams, and transcripts, as well as establish which EALC requirements are replaced by the transferred credits. Students wishing to transfer credit for language courses may additionally be required to take a placement test administered by the department upon their return to Wellesley. Relevant coursework at MIT (usually under the 21F or 21H designation) may be counted as Wellesley courses with the permission of the chair.

For students wishing to count transfer credit toward a major or minor in the department, the following restrictions apply:

• A maximum of four units toward the major and one unit toward the minor may be transferred from another institution;
• A minimum of four units of coursework for the major or a minimum of three units of coursework for the minor must be completed within EALC at Wellesley;
• Non-language courses at the 300 level must be taken within the department for credit toward the major in Chinese and Japanese.

Advanced Placement Policies and Language Requirement in East Asian Languages and Cultures

A student entering Wellesley must have an Advanced Placement score of 5 or SAT II score of 690 to satisfy the foreign language requirement. AP courses will not be counted toward either major offered by the EALC department. All students who wish to register for a Chinese, Japanese, or Korean class must take the appropriate placement examination. The department reserves the right to place a new student in the language course for which she seems best prepared regardless of her AP or SAT II score.

International Study in East Asian Languages and Cultures

In order to obtain credit for international study, students must obtain prior consent from the Office of International Study and the EALC department chair, as well as satisfy the requirements for transfering credit listed above.

Chinese Language and Culture

Chinese Language and Culture Major

Requirements for the Major in Chinese Language and Culture

The Chinese program trains students to achieve fluency in the Chinese language and to think critically about Chinese literature and culture. Chinese majors take courses in Chinese language, linguistics, literature, and culture, in translation and in the original, culminating in advanced work on literature, linguistics, and culture at the 300 level. Students are strongly encouraged to begin their Chinese language study during their first year at Wellesley. Students with Chinese language background must take a placement test to determine their proper courses. In addition, the EALC department strongly recommends that all majors spend at least a summer or a semester studying at an approved program in China, Taiwan, or Hong Kong.

For students entering before 2014, the major consists of a minimum of eight units distributed as follows:

1. Three core language courses to be fulfilled by either
   a) Track 1: CHIN 202, CHIN 301, and CHIN 302; or
   b) Track 2: CHIN 203, CHIN 204, and either CHIN 306 or CHIN 307
2. Two non-language courses taken within the department, at least one of which must be a literature course (excluding CHIN 350) at the 300 level.
3. Three additional units in Chinese literature, linguistics, language, comparative East Asian literature, or East Asian Studies.

For students entering in Fall 2014 and later, the major consists of a minimum of eight courses distributed as follows:

1. Three core language courses to be fulfilled by either
   a) Track 1: CHIN 202, CHIN 301, and CHIN 302; or
   b) Track 2: CHIN 203, CHIN 204, and one of the following: CHIN 306, CHIN 307, or CHIN 310
2. Two non-language courses drawn from the offerings of faculty in EALC, including:
   CHIN 150, CHIN 208, CHIN 209, CHIN 210, CHIN 211/311, CHIN 212/312, CHIN 213, CHIN 223/323, CHIN 225, CHIN 230/330, CHIN 231/331, CHIN 232/332, CHIN 243, CHIN 244/344, CHIN 317, CHIN 326, CHIN 339, CHIN 339, CHIN 361 and EALC 225/325. One non-language course must be in premodern literature or culture. Two non-language courses must be at the 300-level.
3. Two additional courses in Chinese language, literature, culture, or linguistics. These two courses may be taken within the department or drawn from the courses approved by the program in East Asian Studies, providing they have a substantial China focus. With the chair’s permission, one of these two may be a course in Japanese or Korean language, literature, culture, or linguistics.

Other considerations:

• CHIN 101, CHIN 102, CHIN 103, CHIN 104, and CHIN 201 may be counted toward the degree but not the major.
• Students entering with advanced language preparation may, with departmental permission, substitute additional Chinese literature, culture, or linguistics courses, or up to 2 courses in another East Asian language offered within the department, for some or all of the core language classes listed above. Students should work out their program in consultation with their advisor.
Chinese Language and Culture

Related Courses

Attention Called
- LING 244 Language: Form and Meaning
- EALC 225 Traditional Romances of East Asia (in English)
- EALC 325 Traditional Romances of East Asia (in English)

Chinese Language and Culture Minor

Requirements for the Minor in Chinese Language and Culture

The minor in Chinese Language and Culture consists of five courses distributed as follows:

1. Three core language courses to be fulfilled by either:
   a. Track 1: CHIN 202, CHIN 301, and CHIN 302 or
   b. Track 2: CHIN 203, CHIN 204, and one of the following: CHIN 306 or CHIN 307, or CHIN 310

2. One non-language course drawn from the offerings of faculty in EALC, including:
   - CHIN 150, CHIN 200, CHIN 209, CHIN 210 [2009-10], CHIN 211/CHIN 311, CHIN 212/CHIN 312, CHIN 213, CHIN 223/CHIN 323, CHIN 225 [2011-12], CHIN 230/CHIN 330 [2010-11], CHIN 231/CHIN 331, CHIN 232/CHIN 332 [2011-12], CHIN 243, CHIN 244/CHIN 344, CHIN 317 [2008-09], CHIN 326, CHIN 338, CHIN 339, CHIN 381, and EALC 225/EALC 325.

3. One non-language course drawn from the list above or from the courses approved by the program in East Asian Studies.

With permission of the chair, students may select up to two courses from outside the department of East Asian Languages and Cultures, at most one in a discipline. No more than one of these courses may be taken away from Wellesley.

Students entering with advanced language preparation may substitute alternative literature/language courses as necessary with departmental permission. Students should work out their program in consultation with their advisor.

Japanese Language and Culture

Related Courses

Attention Called
- EALC 225 Traditional Romances of East Asia (in English)
- EALC 245 The Book in East Asia: From the Beginning to World War II (in English)
- EALC 325 Traditional Romances of East Asia (in English)

Japanese Language and Culture Courses

The department offers courses in Japanese Language and Culture but no major or minor in this area. Students who have completed JPN 309 may request to do an Independent Study using the Japanese language (JPN 350). Those who wish to do an Independent Study that does not require the Japanese language should register for JPN 250. An advisor should be chosen from within the department.

CHIN - Chinese Language and Culture Courses

CHIN 101 - Beginning Chinese (1.25)

An introductory course that teaches the skills of listening comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on pronunciation, vocabulary, grammar, and communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Four 70-minute classes plus one 30-minute small-group session.

CHIN 102 - Beginning Chinese (1.25)

An introductory course that teaches the skills of listening comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on pronunciation, vocabulary, grammar, and communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Four 70-minute classes plus one 30-minute small-group session.

CHIN 103 - Advanced Beginning Chinese (1.0)

An introductory course that teaches the skills of listening comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on pronunciation, vocabulary, grammar, and communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Three 70-minute classes.

CHIN 104 - Advanced Beginning Chinese (1.0)

An introductory course that teaches the skills of listening comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on pronunciation, vocabulary, grammar, and communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Three 70-minute classes.

CHIN 150 - Before Commerce There Was Poetry: The Chinese Poetic Tradition (in English) (1.0)

Poetry played complex and varied roles in Chinese society. Emperors used it to justify their rule, diplomats to conduct their business, ordinary men and women to comment on the times and to give voice to their innermost feelings. The poetry written in pre-modern China is still treasured as one of the highlights of Chinese civilization, and Chinese poems have influenced concepts of poetry around the world.

Winter-Spring 2014
world. We will trace the development of the lyric voice, exploring the ways in which these works present the world and make arguments about it. We will discuss how Chinese poets construct different notions of the self through their poems, and how poetry gives voice to conflicts between aesthetics and morality, between the self and the community, and between the state and other sources of social capital.

Instructor: Allen
Prerequisite: Open to first-year students only.
Distribution: LL
Term(s): Not Offered

CHIN 201 - Intermediate Chinese (1.25)
Further training in listening comprehension, oral expression, reading, and writing. Four 70-minute classes plus one 30-minute small group session.

Instructor: Chen
Prerequisite: CHIN 101-CHIN 102 or placement by the department.
Distribution: None
Term(s): Fall
Each semester of CHIN 201 and CHIN 202 earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

CHIN 202 - Intermediate Chinese (1.25)
Further training in listening comprehension, oral expression, reading, and writing. Four 70-minute classes plus one 30-minute small group session.

Instructor: Chen
Prerequisite: CHIN 101-CHIN 102 or placement by the department.
Distribution: LL
Term(s): Spring
Each semester of CHIN 201 and CHIN 202 earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

CHIN 203 - Advanced Intermediate Chinese (1.0)
Further training in listening comprehension, oral expression, reading, and writing. Three 70-minute classes.

Instructor: Lam, Tham
Prerequisite: CHIN 103-CHIN 104 or placement by the department.
Distribution: None
Term(s): Fall
Each semester of CHIN 203 and CHIN 204 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

CHIN 204 - Advanced Intermediate Chinese (1.0)
Further training in listening comprehension, oral expression, reading, and writing. Three 70-minute classes.

Instructor: Lam
Prerequisite: CHIN 103-CHIN 104 or placement by the department.
Distribution: LL
Term(s): Spring
Each semester of CHIN 203 and CHIN 204 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

CHIN 208 - Writing Modern China (in English) (1.0)
Over the course of the twentieth century, China underwent enormous changes in the sweep of modernization, which opened the door to a wealth of experimentation, especially in literature and culture.

The primary focus of this course is to explore how literary forms adapted to the dominant political and cultural movements of modern China. At the same time, individual Chinese writers crafted unique visions from their experiences "on the ground." In works that date from the late Qing to the present, we will explore the varied representations of Chinese modernity, including topics such as the individual and society, revolution and tradition, the countryside and the city, gender and sexuality. No prior knowledge of Chinese literature or Chinese language is required.

Instructor: Song
Prerequisite: None
Distribution: LL; HS
Term(s): Not Offered

CHIN 211 - Dream of the Red Chamber in Chinese Literature and Culture (in English) (1.0)
Variously known in English as Dream of the Red Chamber, A Dream of Red Mansions, and The Story of the Stone, Honglou meng is the most widely discussed Chinese novel of all time. Written in the mid-eighteenth century, the novel offers telling insight into Chinese culture as it once was and as it remains today. The novel is still wildly popular due to its tragic love story, its sensual depiction of the plights of the talented woman in late imperial culture, and its narrative intricacies. The goal of the course is to understand the novel both as a literary text and as a cultural phenomenon. Optional extra sessions will accommodate those who wish to read and discuss the novel in Chinese.

Instructor: Widmer
Prerequisite: None
Distribution: LL
Term(s): Not Offered

CHIN 212 - Speaking What's On My Mind: Classical Chinese Poetry and Song (1.0)
To understand China and its culture it is imperative to understand its poetry. Poetry played complex and varied roles in Chinese society: emperors used poems to justify their rule; ordinary men and women used poems to comment on the times and to give voice to their innermost feelings. The poetry they wrote is still read and treasured as one of the highlights of Chinese civilization, and Chinese poems have influenced concepts of poetry around the world. What is the enduring appeal of these poems?

Instructor: Tham
Prerequisite: Open to students who have taken one 200-level course in Chinese language (courses in English do not count toward the major).
CHIN 243 - Chinese Cinema (in English) (1.0)
This course explores the cinematic conventions and experiments employed by Chinese filmmakers over the past hundred years. Unique Chinese film genres such as left-wing melodrama, martial arts films and model play adaptations, as well as the three "new waves" in China's recent avant-garde cinema, will be examined and discussed. Individual filmic visions and techniques experimented with by important directors such as Fei Mu, Hou Hsiao-hsien, Zhang Yimou, and Ju Zhangke will be closely analyzed. Class discussions will aim to help students understand the history, politics, and aesthetics of Chinese cinema. Theoretical aspects of film studies will also be incorporated into class readings and discussions. No prior knowledge of China or film studies is required.
Instructor: Lam
Prerequisite: CHIN 301 or permission of the instructor.
Distribution: LL
Term(s): Spring

CHIN 244 - Classical Chinese Theatre (in English) (1.0)
This course covers three basic categories of traditional theatre in China. It begins with the short form known as zaju of the Yuan Dynasty (thirteenth to the fourteenth centuries), when dramatic works began to be written by identifiable authors. Next come the long and elaborate kunqu (or kunqiang) of the Ming and Qing, including the recently resurrected Peony Pavilion by Tang Xianzu. The last category is Peking opera, a form that originated during the second half of the Qing Dynasty, around 1790, and is regularly performed today. Most of our dramas were written by men, but a few by women who will also be considered. The interrelation between forms will be discussed, as will drama's role in film. We will take up the impact of Chinese drama on such Westerners as Stanislavsky and Brecht as the course concludes.
Instructor: Widmer
Prerequisite: None
Distribution: LL, ARS
Term(s): Not Offered

CHIN 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

CHIN 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

CHIN 301 - Advanced Chinese I (1.0)
This course is designed to further expand students' comprehension, speaking, reading, and writing skills. Reading materials will be selected from newspapers, short stories, essays, and films. Three 70-minute classes conducted in Chinese.
Instructor: Lam, Q. Tang
Prerequisite: CHIN 201-202 or permission of the instructor.
Distribution: LL
Term(s): Fall

CHIN 302 - Advanced Chinese II (1.0)
Advanced language skills are further developed through reading, writing, and discussions. Reading materials will be selected from a variety of authentic Chinese texts. Audio and video tapes will be used as study aids. Three 70-minute classes conducted in Chinese.
Instructor: Lam
Prerequisite: CHIN 301 or permission of the instructor.
Distribution: LL
Term(s): Spring

CHIN 306 - Advanced Reading in Twentieth-Century Literature and Culture (1.0)
This course is designed to further expand and refine students' language skills through intensive reading of authentic Chinese materials, such as novels, short stories, essays, and plays and through viewing of contemporary Chinese films. Particular attention will be paid to increasing levels of literary appreciation and to enriching understanding of the sociocultural contexts from which our readings have emerged.
Instructor: M. Song
Prerequisite: CHIN 204 or CHIN 301; students entering the course through CHIN 301 are strongly encouraged to first complete CHIN 302 as well.
Distribution: LL
Term(s): Fall

CHIN 307 - Advanced Readings in Contemporary Issues (1.0)
A variety of authentic materials, including films and literary works, will be selected to cover the period from 1949 to the early twenty-first century.
Instructor: Tham
Prerequisite: CHIN 204 or CHIN 301; students entering the course through CHIN 301 are strongly encouraged to first complete CHIN 302 as well.
Distribution: LL
Term(s): Spring

CHIN 310 - Introduction to Classical Chinese (1.0)
Classical Chinese was the primary written language used in China from antiquity through the early twentieth century. This course introduces the basic grammar and vocabulary of Classical Chinese through readings selected from canonical sources in literature, philosophy, and history. We will pay special attention to grammatical differences between classical and modern Chinese. Students with an interest in art history, history, philosophy, and/or literature are encouraged to take this course to improve their reading skills.
Instructor: Allen
Prerequisite: CHIN 301 or CHIN 302, or CHIN 306 or permission of the instructor.
Distribution: LL
Term(s): Spring

CHIN 311 - Dream of the Red Chamber in Chinese Literature and Culture (in English) (1.0)
Variously known in English as Dream of the Red Chamber, A Dream of Red Mansions, and The Story of the Stone, Honglou meng is the most widely discussed Chinese novel of all time. Written in the mid-eighteenth century, the novel offers telling insight into Chinese culture as it once was and as it remains today. The novel is still widely read, partly due to its tragic love story, its sensitive depiction of the plight of the talented woman in late imperial culture, and its narrative intricacies. The goal of the course is to make the novel both as a literary text and as a cultural phenomenon. Optional extra sessions will accommodate those who wish to read and discuss the novel in Chinese.
Instructor: Widmer
Prerequisite: One previous course on Chinese history or culture.
Distribution: LL
Term(s): Not Offered

CHIN 312 - Speaking What's On My Mind: Classical Chinese Poetry and Song (1.0)
To understand China and its culture it is imperative to understand its poetry. Poetry played complex and varied roles in Chinese society: emperors used songs to justify their rule; ordinary men and women used poems to comment on the times and to give voice to their innermost feelings. The poetry they wrote is still read and treasured as one of the highlights of Chinese civilization, and Chinese poems have influenced concepts of poetry around the world. What is the enduring appeal of these poems? How did poetry come to hold such an important place in Chinese culture? We will trace the development of the lyric voice in China, examining poems, the men and women who wrote them, and the historical contexts from which our readings have emerged.
Instructor: Allen
Prerequisite: At least three years of modern Chinese.
Distribution: LL
Term(s): Not Offered

CHIN 323 - When Women Rode Horses: The Tang Dynasty, China's Golden Age (in English) (1.0)
The Tang Dynasty has long been considered a high point of Chinese civilization. Travelers from lands as distant as India and Rome brought everything from exotic objects to new dances and new religious ideas, making foreign influence stronger than in any period until the modern era. The dynasty was also a period of transition in which modes of literature, thought, and government that would dominate for the next thousand years first emerged. In this class, we will examine the literary and intellectual culture of Tang Dynasty China, exploring such topics as the capital city as an urban space and a nexus of Chinese and foreign cultures; intellectual trends inspired by Buddhism and a reevaluation of Confucian ideas; and representations of the Tang in later periods.
Instructor: Allen
Prerequisite: One previous course in Chinese literature, history, or culture.
Distribution: LL, HS
Term(s): Spring

CHIN 326 - The City in Modern Chinese Literature and Film (in English) (1.0)
This seminar will focus on one of the most important topics in modern Chinese culture: the urban imagination. Analyzing how megacities and urban life are represented and imagined is central to an understanding of the differently articulated forms of Chinese modernity that have taken throughout the twentieth century. We will examine the literary and visual representations of the city in modern China through close analyses of the novels, short stories, films, photographs, and paintings that illuminate Chinese urbanism. Cultural manifestations of such Chinese metropolises as Beijing, Shanghai, Hong Kong, and Taipei will be extensively discussed.
Instructor: Song
Prerequisite: One course at the 200 or 300 level in East Asian languages and cultures, East Asian arts, history, philosophy, or religion.
Distribution: LL, ARS
Term(s): Not Offered

CHIN 331 - Chinese and the Languages of China (in English) (1.0)
This course will examine the historical development of the Chinese language and Chinese writing systems, and the ways in which Chinese has influenced other languages and writing systems historically and in the present. We will study Chinese writing systems, phonology, morphology, syntax, and semantics, and their relationships to other languages and writing systems. We will also examine the influence of the Chinese language on other languages, and the ways in which other languages have influenced Chinese. Special attention will be paid to the influence of Chinese on languages in East Asia, as well as on languages in the rest of the world.
Instructor: Lam
Prerequisite: One previous course on Chinese history or culture.
Distribution: LL
Term(s): Not Offered
What is “Chinese”? How are “Mandarin” and “Cantonese” related to “Chinese”? Is Taiwanese a Chinese language? Is it a Chinese dialect? How did Mandarin become the “common language” (Putonghua)? This course introduces the various language families in China and examines the linguistic, historical, cultural and sociopolitical factors that have played into our understanding of terms such as “Chinese,” “Mandarin,” “language,” and “dialect.” Topics to be discussed include: the differences in the sound systems of Mandarin and other Chinese languages, how Mandarin became the national language, the traditional importance of a national language in China, the writing system and the simplified/traditional divide, and minority languages in China. In English with some readings in Chinese.

Instructor: Tham
Prerequisite: One of the following: CHIN 302, CHIN 306, CHIN 307, or permission of the instructor.
Distribution: LL; EC
Term(s): Spring

CHIN 338 - Reading in Modern Chinese Literature (1.0)
This course guides students to explore Chinese literary modernity through authentic literary texts written by major Chinese writers of the past hundred years. It aims to give students the opportunity to deepen their understanding of modern China in both its historical and cultural practice. Instead of language training, literary and cultural analyses will be emphasized. Class discussions will be conducted in Chinese, and students are expected to offer their critical responses to readings through oral presentations and papers written in Chinese.

Instructor: Song
Prerequisite: CHIN 306, CHIN 307, or permission of the instructor.
Distribution: LL
Term(s): Spring

CHIN 339 - Popular Culture in Modern China (in English) (1.0)
This course provides a comprehensive examination of modern Chinese popular culture in mainland China, Taiwan, Hong Kong, and other transnational Chinese communities in the past century. We discuss important issues in the field of popular culture across a variety of Chinese media, including film, literature, opera, theater, music, vintage photographs, and comic books. In doing so, this course will probe popular culture as it has manifested itself in the dynamic dialogue between high art and mass culture and trace its sociopolitical, cultural, and aesthetic impact on modern China.

Instructor: Song
Prerequisite: One course on China (e.g., CHIN 208, CHIN 243/CRS 203, ANTH 223 [201.0-1.1], HIST 278, ARTH 255), or by permission of the instructor.
Distribution: LL; ARS
Term(s): Not Offered

CHIN 344 - Classical Chinese Theatre (in English) (1.0)
This course covers three basic categories of traditional theatre in China. It begins with the short form known as zaju of the Yuan Dynasty (thirteenth to the fourteenth centuries), when dramatic works began to be written by identifiable authors. Next come the long and elaborate chuanqi of the Ming and Qing, including the recently resurrected Peony Pavilion by Tang Xianzu. The last category is Peking opera, a form that originated during the second half of the Qing Dynasty, around 1790, and is regularly performed today. Most of our dramas were written by men, but a few by women will also be considered. The interrelation between forms will be discussed, as will drama’s role in film. We will take up the impact of Chinese drama on such Westerners as Stanislavsky and Brecht as the course concludes.

Instructor: Widmer

Distribution: LL; ARS
Term(s): Not Offered

CHIN 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

CHIN 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

CHIN 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

CHIN 370 - Senior Thesis (1.0)
Prerequisite: CHIN 360 and permission of the department. 
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

CHIN 381 - Eileen Chang (in English) (1.0)
This seminar offers an intensive study of the writings of Eileen Chang, one of the most important Chinese writers. Close analysis of her literary style will be combined with discussions on such key concepts of the Chinese literary modernity: gender, nation, cosmopolitanism, affectivity, subjectivity, and diaspora. Her major works will be read in biographical, historical and cultural contexts, with considerations of the classical novels influencing her as well as the modern and postmodern writers and filmmakers working under her influences.

Instructor: Song
Prerequisite: One course at the 200 or 300 level on Chinese literature, history or culture, or by permission of the instructor.
Distribution: LL
Term(s): Spring

EALC - East Asian Languages and Cultures Courses

EALC 225 - Traditional Romances of East Asia (in English) (1.0)
The course begins with a brief introduction to an eleventh-century novel from Japan, Murasaki Shikibu’s The Tale of Genji. This work shows considerable awareness of Chinese culture, but the design is entirely original and the aesthetics typically Japanese. There is no influence at all between Genji and our next subject, Cao Xueqin’s eighteenth-century masterpiece, Dream of the Red Chamber, also known as The Story of the Stone. However, the similarities point to shared East Asian traditions, and the contrasts can be traced to major differences in the aesthetics of China and Japan. For students who have already studied The Tale of Genji or Dream of the Red Chamber, alternative readings will be assigned. At the end of the semester, we will take up two other pieces, one each from Korea and Vietnam. These two, as well, fit into a larger East Asian
syndrome, but exhibit national characteristics at the same time.

Instructor: Widmer
Prerequisite: One 200-level course in either Chinese or Japanese language and culture required.
Distribution: LL
Term(s): Not Offered

**JPN - Japanese Language and Culture Courses**

**JPN 101 - Beginning Japanese (1.25)**
Introduction to the modern standard Japanese language. Emphasis on developing proficiency in listening, speaking, reading, and writing, using basic expressions and sentence patterns. Four 70-minute classes plus one 30-minute small group session.

Instructor: Maeno
Prerequisite: None
Distribution: None
Term(s): Fall
Each semester of JPN 101 and JPN 102 earns a 12.5 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**JPN 102 - Beginning Japanese (1.25)**
Introduction to the modern standard Japanese language. Emphasis on developing proficiency in listening, speaking, reading, and writing, using basic expressions and sentence patterns. Four 70-minute classes plus one 30-minute small group session.

Instructor: Maeno
Prerequisite: None
Distribution: None
Term(s): Spring
Each semester of JPN 101 and JPN 102 earns a 12.5 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**JPN 130 - Japanese Animation (in English) (1.0)**
What makes Japan tick? New visitors to Japan are always struck by the persistence of traditional aesthetics, arts, and values in a highly industrialized society enmeshed in novelty. Through animation films (English subtitles) and readings on animation, we will explore this phenomenon from the inside. Focus is on the works of Tezuka Osamu, Hayao Miyazaki, and others. No Japanese language required.

Instructor: Morley (Theatre Studies)
Prerequisite: None
Cross-Listed as: THST 130
Distribution: LL, ARS
Term(s): Fall

**JPN 131 - Sex, Swords, and the Supernatural: The Culture of Edo Period Japan (in English) (1.0)**
Japan enjoyed tremendous political stability under samurai rule for 265 years before opening up to the West in the late 19th century. Far from static, however, this era, known as the Edo period (1603-1868), was one of dynamic economic growth, social change, intellectual ferment, and artistic experimentation, when a vibrant urban culture emerged to spread to cities and villages across the Japanese archipelago. Many of the things we associate with traditional Japanese culture today, including haiku, kabuki, sumo, geisha, sushi, manga, and the samurai ethos, emerged or developed into maturity at this time. This course introduces students to Edo Japan by way of its rich visual and literary cultures, with particular emphasis on the representation of sexuality, gender, violence, honor, and otherworldly phenomena. No knowledge of Japan or Japanese required.

Instructor: Goeer
Prerequisite: None
Distribution: LL, ARS
Term(s): Spring

**JPN 201 - Intermediate Japanese (1.25)**
Continuation of JPN 101-JPN 102. The first semester will emphasize further development of listening and speaking skills with more complex language structures as well as proficiency in reading and writing. Four 70-minute classes plus one 30-minute small group session.

Instructor: Torii
Prerequisite: JPN 101-JPN 102 or by permission of the instructor.
Distribution: None
Term(s): Fall
Each semester of JPN 201 and JPN 202 earns a 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**JPN 202 - Intermediate Japanese (1.25)**
Continuation of JPN 101-JPN 102. The first semester will emphasize further development of listening and speaking skills with more complex language structures as well as proficiency in reading and writing. The second semester will emphasize reading and writing skills. Four 70-minute classes plus one 30-minute small group session.

Instructor: Torii
Prerequisite: JPN 101-JPN 102 or by permission of the instructor.
Distribution: LL
Term(s): Spring
Each semester of JPN 201 and JPN 202 earns a 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**JPN 231 - Selected Readings in Advanced Japanese I (1.0)**
This course is designed for the students who have completed the second year of Japanese (JPN 201-JPN 202). Each lesson introduces you to practical vocabulary items, grammatical structures, and cultural orientations that give you the ability to discuss such topics in a more advanced and culturally appropriate manner. Throughout the course, the development of more fluent speech and stronger literacy will be emphasized by studying more complex and idiomatic expressions. Acquisition of an additional few hundred kanji characters will be part of the course. The class will be conducted entirely in Japanese. Three classes per week.

Instructor: Torii
Prerequisite: JPN 201-JPN 202 or permission of the instructor.
Distribution: LL
Term(s): Fall

**JPN 232 - Selected Readings in Advanced Japanese II (1.0)**
A continuation of JPN 231, this course further develops literacy in Japanese. Students focus on intensive reading of various styles of written Japanese, writing on different topics, and development of fluent oral skills. Japanese movies will be used for reinforcement of grammar and for discussion. Class discussion will be conducted entirely in Japanese. Three classes per week.

Instructor: Torii
Prerequisite: JPN 231 or permission of the instructor.
Distribution: LL
Term(s): Spring

**JPN 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

**JPN 250H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

**JPN 251 - Japanese Writers Explore their World (in English) (1.0)**
Longing dreams, and transformations, recurrent subjects in early Japanese Literature, are familiar to us from animation and popular culture. We will return to the beginnings of these themes in the great works of Japanese poetry and prose in translation from the seventh through the eighteenth centuries: The Pillowbook, The Tale of Genji, medieval tales of miraculous transformations, puppet plays and kabuki, among others. Who were the writers, and for whom were they writing? What role did Buddhism and Shinto play? How were the concepts of longing and dream transformed into a unique esthetic that has continued to influence Japanese culture?

Instructor: Morley (Theatre Studies)
Prerequisite: None
Cross-Listed as: THST 251
Distribution: LL, ARS
Term(s): Fall
This course may be taken as either JPN 251 or, with additional assignments, JPN 355.

**JPN 252 - Supernatural Japan (in English) (1.0)**
In 1776, the Japanese writer Ueda Akinari set down a famous collection of ghost stories entitled Tales of Moonlight and Rain. Beginning with this collection, we will explore how representations of the supernatural were both embedded in and transformed by discourses of modernity. Throughout the twentieth century, writers such as Tanizaki Jun’ichiro, Akutagawa Ryunosuke, Izumi Kyoka, and Enchi Fumiko kept the supernatural strand alive. In tales of the fantastic and the strange, they also made trenchant commentary on the state of their society. We read (and contrast) literary and visual texts to explore alternative visions of Japan’s rush to modernize.

Instructor: Zimmerman
Prerequisite: None
Distribution: LL
Term(s): Not Offered

**JPN 255 - Japan on Stage (1.0)**
This course provides an introduction to Japanese theatre with an emphasis on the development of the performance text from the eighth century to the contemporary period. Our work will be a combination of textual analysis and hands-on performance. Using videos and translated texts, as well as critiques by actors (in particular those of the medieval noh actor Zeami Motokiyo and the kabuki collection of actor’s anectals) and scholarly studies, we will cover three units: noh and kyogen; kabuki and bunraku puppet theatre; and contemporary theatre. Students will have an opportunity to experiment with writing a modern noh play based on their understanding of the noh theatrical conventions, and to perform in a kyogen play. No
previous experience in Japanese Studies or Theatre Studies required.
Instructor: Morley (Theatre Studies)
Prerequisite: None
Cross-Listed as: THST 255
Distribution: ARS
Term(s): Not Offered

JPN 256 - History of Japanese Cinema (in English) (1.0)
From the long take and the pictorial composition to the swirling action of the sword fight, we explore how Japanese directors first adopted and then transformed the language of cinema. We move chronologically, from early silent film to recent independent cinema, and we view films that speak to the concerns of each subsequent generation. Because Japanese directors have created a visual style that counters certain Hollywood conventions, we also devote class time to learning how to read film. Readings from literature and history enhance study. Directors include: Mizoguchi, Ozu, Kurosawa, Oshima, Imamura, Koreeda, and Nishikawa. No previous knowledge of Japanese cinema or film studies is required.
Instructor: Zimmerman
Prerequisite: None
Cross-Listed as: CAMS 205
Distribution: LL; ARS
Term(s): Not Offered

JPN 257 - Magic, Monsters, and Miniatures: Japanese Children’s Culture through the Centuries (in English) (1.0)
How have images of children and expectations of childhood changed from classical Japanese literature to manga and contemporary Japanese children’s literature? We will read children’s literature from the eighteenth century to the twenty-first century, encountering children from various historical periods as well as mice, monsters, gods, demons, and heroes. We will consider how translations have helped shape Japanese children’s literature in recent times and how translations from Japanese have traveled abroad. Knowledge of Japanese is not required.
Instructor: Williams
Prerequisite: None
Distribution: LL
Term(s): Not Offered

JPN 259 - The Historical Imagination in Japanese Cinema (in English) (1.0)
This course explores jidaigeki (period films) produced in Japan from the 1940s to the present. Students analyze twenty films that engage explicitly with the past, including several film adaptations of pre-modern Japanese literary works, and, in the process, become familiar with both the broad sweep of Japanese history and the enduring significance of Japan’s rich cultural heritage. Aided by secondary readings, students also investigate the ways in which narrative structures, thematic concerns, and formal techniques do not issue forth from the creative vision of directors in an unmediated way, but were contingent on the complex cultural, political, and economic circumstances of the historical moments in which the films were made. Directors include: Mizoguchi, Kurosawa, Kurosawa, Kurosawa, Kurosawa, Kurosawa, Kurosawa, Kurosawa, Kurosawa, Kurosawa.
Instructor: Goree
Distribution: LL; ARS
Term(s): Spring

JPN 308 - Advanced Japanese Through Short Fiction and Essays (1.0)
In this course, students will read original works of short fiction and essays in Japanese by well-known contemporary authors. We will explore various genres and popular themes in Japanese literature and look at authors’ styles and voice. The class will be completely in Japanese, and the major emphasis in the course will be on discussion of the works in class. Through these works, students will also be introduced to advanced Japanese grammar, expressions, patterns, kanji, and vocabulary.
Prerequisite: JPN 232 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

JPN 311 - Advanced Oral Japanese (1.0)
This course aims to improve aural comprehension and speaking skills in Japanese. We will pay attention to various levels of Japanese speech: informal, formal, and honorific. Instruction will be given in how to use such forms in different social and cultural contexts. Students will incorporate media such as television and film as they work toward a final project. Two weekly class meetings with individual meetings as deemed necessary by instructor.
Instructor: Torii
Prerequisite: JPN 232
Distribution: LL
Term(s): Not Offered

JPN 312 - Literary Japanese: Reading the Classics (1.0)
Reading and discussion in Japanese of selections from classical Japanese literature with focus on translation skills. Students will have the opportunity to sample The Tale of Genji and The Pillow Book, among others, in the original and to familiarize themselves with the classical language. Two periods with discussion sessions.
Instructor: Morley (Theatre Studies)
Prerequisite: JPN 232 or permission of the instructor.
Cross-Listed as: THST 312
Distribution: LL
Term(s): Not Offered

JPN 314 - Contemporary Japanese Narrative (1.0)
We read and discuss Japanese fiction in the original, focusing on a generation of contemporary female writers who are currently transforming the literary landscape of Japan. Through fresh use of language and challenging themes, writers such as Ogawa Yoko, Wataya Risa, and Kanehara Hitomi draw sharp portraits of urban life in Japan. Weekly translation exercises develop literary reading skills and improve comprehension. For the final project, students will translate a contemporary short story in collaboration with the instructor. Two class meetings with individual meetings.
Instructor: Zimmerman
Prerequisite: JPN 232 or permission of the instructor.
Distribution: LL
Term(s): Fall

JPN 315 - Everyday Japanese through Children’s Books (1.0)
This course will focus on reading and translating Japanese in a variety of registers and everyday contexts. Students will improve their Japanese reading and speaking skills through translation exercises, sight-reading, class discussion in Japanese, and a final translation project. Course readings will be drawn from modern and contemporary children’s books by award-winning authors and illustrators as well as earlier children’s literature of historical importance. Two class meetings with individual meetings as necessary.
Instructor: Williams
Prerequisite: JPN 232 or permission of the instructor.
Distribution: LL
Term(s): Spring

JPN 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

JPN 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

JPN 351 - Seminar. Theatres of Japan (in English) (1.0)
The Tale of the Heike (Heike Monogatari), an epic recounting the twelfth century battles between the Heike (Taira) and Genji (Minamoto) clans for dominance over the imperial court, has spawned plays in almost every genre of Japanese theatre. Some will be familiar with the story from anime as well. We will use this text and the themes that appear to explore the performance arts of noh, kyogen, bunraku puppet theatre, and kabuki. Where possible we will view DVDs of the plays under discussion. Some of the major themes we will be examining have shaped Japanese culture into the modern period: loyalty and the code of the warrior; Buddhism; the aesthetic of pathos; Confucianism; and the significance of China. Our approaches will be multiple, as we will be discussing performance texts and the differences between genres of theatre as well as the Heike themes and their manifestation in different periods of Japanese drama.
Instructor: Morley (Theatre Studies)
Prerequisite: One course on theatre or on Japan.
Cross-Listed as: THST 351
Distribution: LL; ARS
Term(s): Spring

JPN 352 - Seminar. Postwar Japan in Word and Image (in English) (1.0)
With the lifting of state censorship in the postwar period, Japanese writers and artists broke new ground, wrestling with the legacy of the war (Oe Kenzaburo, Mizutani Shigeru), gendering gender norms (Kono Taeko, Uchida Shungiku), unveiling less visible aspects of Japanese society (Nakagami Kenji, Yu Miri), or even forging new modes of representation (Murakami Haruki). Drawing on fiction, manga, and film, we embed texts in their historical and social contexts, listening for the "hum of the times." No Japanese required.
Instructor: Zimmerman
Prerequisite: One course on Japan or by permission of the instructor.
Distribution: LL
Term(s): Spring

JPN 353 - Lady Murasaki and The Tale of Genji (in English) (1.0)
Shortly after 1000 C.E., in the imperial court of Japan, Murasaki Shikibu, a court lady of middle rank, completed what is arguably the first novel in the history of world literature, The Tale of Genji. Who was she? How did she come to write a novel of such surprising psychological subtlety? Who is the hero? Why is he still appealing a millennium later? Focusing on The Genji and Murasaki’s diary, we
The development of language occurs in dynamic interaction with sociocultural interests and daily life in Korea. Four 70-minute classes with regular individual meetings.

KOR 101 - Beginning Korean (1.25)

An introductory course on standard conversational Korean for students who have little or no knowledge of Korean. The course will provide basic skills in speaking, listening, reading, and writing, with a focus on spoken language proficiency. The course will emphasize the development of communication skills in given situations and tasks, and provide an introduction to sociocultural interests and daily life in Korea. Four 70-minute classes with regular individual meetings.

Instructor: S. Lee
Prerequisite: None
Term(s): Fall
Each semester of KOR 101 and KOR 102 earns 1.25 units of credit. Students who are placed into KOR 101 must complete both semesters satisfactorily to receive credit for either course; those who are placed into KOR 102 must complete both semesters at the 200 level to retain credit for KOR 102.

KOR 102 - Beginning Korean (1.25)

An introductory course on standard conversational Korean for students who have little or no knowledge of Korean. The course will provide basic skills in speaking, listening, reading, and writing, with a focus on spoken language proficiency. The course will emphasize the development of communication skills in given situations and tasks, and provide an introduction to sociocultural interests and daily life in Korea. Four 70-minute classes with regular individual meetings.

Instructor: Jang
Prerequisite: KOR 101 - KOR 102 or placement by the department.
Distribution: None
Term(s): Fall
Each semester of KOR 201 and KOR 202 earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

KOR 201 - Intermediate Korean (1.25)

A continuation of KOR 101-KOR 102. The first semester will emphasize further development of listening and speaking skills with more complex language structures as well as proficiency in reading and writing. The second semester will emphasize reading and writing skills. Four 70-minute classes with regular individual meetings.

Instructor: Jang
Prerequisite: KOR 101 - KOR 102 or placement by the department.
Distribution: None

Distribution: LL
Term(s): Spring
Each semester of KOR 201 and KOR 202 earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course. Those who are placed into KOR 202 must complete both semesters at the third year level (231 or 232) to retain credit for KOR 202.

KOR 206 - An Introduction to Korean Language and Culture (in English) (1.0)

This course aims to provide a fundamental understanding of Korean culture, society, and the Korean people by focusing on the Korean language. The development of language occurs in dynamic relation to culture and community. Topics include the origin and history of the Korean language, the writing system (Hangul-Korean alphabet), different dialects (including North Korean dialects), cross-linguistic analysis, intercultural communication, language use in pop culture, language variation...
KOR 309 - Advanced Korean Through Contemporary Texts and Multimedia (1.0)
This course aims at achieving advanced level fluency in reading and writing Korean through the study of various texts and multimedia. Course "texts" include contemporary works of Korean literature, current newspaper articles, broadcast news, and clips of television shows and films. The course will develop sophisticated interpretive and presentational skills in formal contexts while enhancing the student's level of literary appreciation and intellectual analysis. The focus is on mastery of a wide range of vocabulary and idiomatic expressions, individual writing projects, classroom discussion, and presentations on assigned topics.

Instructor: S. Lee
Prerequisite: KOR 202 or permission by the instructor.
Distribution: LL
Term(s): Not Offered

KOR 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the department and instructor.
Distribution: None
Term(s): Fall; Spring

KOR 351 - Performance in Korean Cultural History (1.0)
This course will explore Korea's culture, literature, history and the ways in which Korea has presented itself over the centuries through performance. Psy and the Korean Wave are examples of performance in the sense of highly professional, trained acts. How has acting served to situate Korea as a culture unto itself as well as in its global context as political, economic, artistic, industrial entity? We shall find, for example, that songs and dance performances sponsored by the Shilla kingdom were used to facilitate Korea's relations with neighbors domestic and foreign. Final projects in the course may be analytical essays, artistic interpretations including original folios of poems in the Korean sijo form, or other engagements with Korea's cultural practices.

Instructor: McCann
Prerequisite: None
Distribution: LL
Term(s): Fall; Spring

KOR 356 - Gender and Language in Modern Korean Culture (in English) (1.0)
Postwar modernization and industrialization have brought dramatic changes in Korean society. In spite of remarkable economic growth and rapid social progress, Korean women still struggle with gender inequality. This course explores the relationship between language use and cultural views of womanhood in modern Korea, using phonetics, semantics, discourse analysis, and sociolinguistics. By examining actual language use in myths, movies, ads, and popular culture, we explore how sociolinguistic factors shape gender dichotomies, notions of individual identity, and ethnicity. Substantial evidence of linguistic data will be used to clarify the connection between language and gender as we address the challenges faced by women of East Asia.

Instructor: S. Lee
Prerequisite: KOR 206 and permission of the instructor.
Distribution: EC
Term(s): Not Offered
**AN INTERDEPARTMENTAL MAJOR**

**Director:** Giersch (History)

**Affiliated Faculty:** Allen (EALC-Chinese), Chen (EALC-Chinese), Giersch (History), Goree (EALC-Japanese), Joseph (Political Science), Kodera (Religion), Lam (EALC-Chinese), Lee (EALC-Korean), Liu (Art History), Maeno (EALC-Japanese), Matsusaka (History), Moon (Political Science), Morley (Theatre Studies), Song (EALC-Chinese), Tong (EALC-Chinese), Thom (EALC-Chinese), Torii-Williams (EALC-Japanese), Widmer (EALC-Chinese), Zimmerman (EALC-Japanese)

**Faculty Advisory Committee:** Giersch (History), Joseph (Political Science), Kodera (Religion), Lee (EALC-Korean), Liu (Art History), Matsusaka (History), Moon (Political Science), Morley (Theatre Studies), Zimmerman (EALC)

East Asian Studies is an interdisciplinary major offered jointly by faculty from departments at the College whose research and teaching interests focus on East Asia and from the Department of East Asian Languages and Cultures (EALC). The major is designed for students with a broad interest in East Asia. It encourages students to familiarize themselves with one or more countries or societies of East Asia and also requires that students have an area of concentration, which may be based on a country/culture or academic discipline. To major in East Asian Studies, students must fulfill the requirements in Language study, Humanities, and History and Social Sciences (see below). Through this combination of breadth and depth, students learn about the historic links between East Asian societies and how ideas, cultures, and policies flow across and shape life in East Asia today.

**East Asian Studies Major**

**Goals for the East Asian Studies Major**

- To familiarize students generally with the arts, histories, languages and literatures, religions, and the social, political, and cultural systems of East Asia
- To develop fuller expertise in a specific area of study, whether by country or scholarly discipline
- To ensure a firm foundation in at least one of three East Asian languages: Mandarin Chinese, Japanese, or Korean

**Requirements for the East Asian Studies Major**

Prospective East Asian Studies majors should begin study of an East Asian language as soon as possible in their first year. The program also recommends that students take one or more courses that explore East Asia (such as HIST 274, REL 106, or EALC 225) in their first two years to attain familiarity with the region. The program encourages students to:

- Familiarize themselves with several East Asian societies and cultures.
- Choose an area of concentration that is country/culture-based or based on an academic discipline. For example, students may select a focused study of one country or culture (e.g. China, Japan, Korea(s)), or select a disciplinary or interdisciplinary focus (see below).

Prospective majors should consult with a member of the East Asian Studies faculty as early as possible to discuss their academic plans. Majors devise their own programs of study in consultation with an advisor from the student’s area of concentration. Both the major advisor and the program director must approve proposals for the major.

Ten units are required for the major, consisting of the following:

1. **Language courses**: four units.
   - All students must complete at least four language courses above the 100 level in the language most appropriate to their area of concentration. (Students will not receive credit toward the major for the first year of language study.) Those who begin their language study at Wellesley in a 300-level language class must still complete at least four language courses. Students with native or near-native fluency in an East Asian language must also complete at least four units of language, possibly in a different Asian language, in consultation with their advisor.
   - Language study beyond what is required for the major is strongly recommended. All majors are also encouraged to spend at least a summer or a semester studying abroad in China, Japan, Korea, or Taiwan. The East Asian Languages and Literatures Department, through the chairperson of EALC, must approve plans for language study taken away from Wellesley and to be applied toward the major.

2. **Non-language courses**: six units.
   - All majors must also take at least one non-language course on East Asia in each of the following categories:
     1. Humanities
     2. History and Social Sciences
   - A minimum of three non-language courses are required to fulfill a selected concentration, and two must be at the 300 level.
   - i. **Country/culture-based concentrations** may focus on one of the following: China, Japan, Korea(s).
   - ii. **Discipline or focused interdisciplinary-based concentrations** that are normally possible at Wellesley include arts and visual studies, history, linguistics, literature, politics, religion, and women’s and gender studies. Under unusual circumstances, and with the approval of her advisor and the program director, a student may design her own disciplinary concentration. Majors normally declare their concentration no later than the spring semester of their junior year.

3. A minimum of four non-language courses must be taken at Wellesley, including the required two units of 300-level courses. Of the two required 300-level courses, only one may be a 350, 360, or 370.

4. A maximum of two non-language courses taken outside Wellesley can count toward the major.

5. Some courses can count as a language or non-language course for the purpose of fulfilling requirements for the major. Each course unit can be credited only once toward the major. No double-counting (e.g. as both a language course and non-language course) is permitted.

6. One course in American Asian studies may be counted toward the major, provided that the course addresses a significant aspect of East Asian traditions, culture, or society in its global, cross-cultural contexts. Students should consult with their advisors.

**Honors in East Asian Studies**

The only route to honors in the major is writing a thesis and passing an oral examination. A grade point average of at least 3.5 in the major, above 100-level courses, is the minimum requirement for application. Students must also submit a dossier of required material, including a thesis proposal, to the EAS director and the Faculty Advisory Committee, which will approve students for admission. The director will inform students of the dossier requirements and submission deadlines. The Faculty Advisory Committee may petition on behalf of a student whose GPA in the major is between 3.0 and 3.5, if her dossier is particularly strong. See Academic Distinctions.

**Transfer Credits in East Asian Studies**

In order to obtain Wellesley credit for any EAS-related course taken at another institution during the academic year or summer, the student must obtain approval from the College Registrar and the program director prior to enrolling in the course. First the Registrar must award the appropriate college credit for each unit. Second, the approval of the course(s) to be credited to the EAS major must be granted by the program director. Students should present relevant syllabi and other materials about the prospective course to the director. Students, especially those taking EAS courses abroad, may be required to contact the course instructor in order to obtain specific details about the course in cases where the online course description may be insufficient to make an informed decision.

**Courses for Credit Toward the East Asian Studies Major**

**Language Courses** (Mandarin Chinese, Japanese, Korean):

See offerings in Department of East Asian Languages and Cultures (EALC)

**Humanities:**

- AMST 212 Korean American Literature and Culture
- ARTH 238 Chinese Art and Architecture
- ARTH 240 Asian Art and Architecture
- ARTH 244 Chinese Painting: Masters and Principles
- ARTH 255 Twentieth-Century Chinese Art
- ARTH 256 Seminar. The Landscape Painting of China, Korea, and Japan
- ARTH 254 Seminar. Poetic Painting in China, Korea, and Japan
- CAMS 203/CHIN 243 Chinese Cinema (In English)
- CHIN 208 Writing Modern China (In English)
- CHIN 211 Dream of the Red Chamber in Chinese Literature and Culture (In English)
- CHIN 212 Speaking What’s On My Mind: Classical Chinese Poetry and Song
- CHIN 223 When Women Rode Horses: The Tang Dynasty, China’s Golden Age (In English)
- CHIN 231 Chinese and the Languages of China (In English)
- CHIN 243/CAMS 203 Chinese Cinema (In English)
CHIN 244  Classical Chinese Theatre (in English)
CHIN 311  Dream of the Red Chamber: In Chinese Literature and Culture (in English)
CHIN 312  Speaking What's On My Mind: Classical Chinese Poetry and Song
CHIN 326  The City in Modern Chinese Literature and Film (in English)
CHIN 331  Chinese and the Languages of China (in English)
CHIN 338  Reading in Modern Chinese Literature
CHIN 339  Popular Culture in Modern China (in English)
CHIN 381  Eileen Chang (in English)
EALC 225  Traditional Romances of East Asia (in English)
EALC 245  The Book in East Asia: From the Beginning to World War II (in English)
EALC 325  Traditional Romances of East Asia (in English)
JPN 130/THST 130  Japanese Animation (in English)
JPN 251/THST 251  Japanese Writers Explore Their World (in English)
JPN 252  Supernatural Japan (in English)
JPN 255/THST 255  Japan on Stage
JPN 256/CAMS 205  History of Japanese Cinema (in English)
JPN 257  Magic, Monsters, and Miniatures: Japanese Children's Culture through the Centuries (In English)
JPN 312/THST 312  Literary Japanese: Reading the Classics
JPN 314  Contemporary Japanese Narrative
JPN 315  Everyday Japanese through Children's Books
JPN 351/THST 351  Seminar. Theatres of Japan (in English)
JPN 352  Seminar. Postwar Japan in Word and Image (in English)
JPN 353/THST 353  Lady Murasaki and The Tale of Genji (in English)
JPN 355/THST 355  Japanese Writers Explore Their World
KOR 206  An Introduction to Korean Language and Culture (in English)
KOR 256  Gender and Language in Modern Korean Culture (in English)
REL 108  Introduction to Asian Religions
REL 253  Buddhist Thought and Practice
REL 254  Chinese Thought and Religion
REL 255  Japanese Religion and Culture
REL 257  Contemplation and Action
REL 259  Christianity in Asia
REL 290  Kyoto: Center of Japan's Religion and Culture (Wintersession in Kyoto)
REL 353  Seminar. Zen Buddhism
REL 354  Seminar. Tibetan Buddhism
REL 357  Seminar. Issues in Comparative Religion
CHIN 338, JPN 312, JPN 314: Fulfill either Language or Humanities requirement for the major.

**History and Social Sciences:**

HIST 269  Japan, the Great Powers, and East Asia, 1853-1993
HIST 274  China, Japan, and Korea in Comparative and Global Perspectives
HIST 277  China and America: Evolution of a Troubled Relationship
HIST 278  Reform and Revolution in China, 1800 to the Present
HIST 280  Topics in Chinese Commerce and Business
HIST 346  Japan's East Asian Empire in Comparative Perspective, 1879-1951
HIST 352  Seminar. The Origins of Modernity in East Asia and Europe
HIST 372  Seminar. Chinese Nationalism and Identity in the Modern World
KOR 256  Gender and Language in Modern Korean Culture (in English)
POL2 208  Politics of China
POL2 304  State and Society in East Asia
POL2 308  State and Society in China
POL3 227  The Vietnam War

---

**EAS - East Asian Studies Courses**

**EAS 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**EAS 350 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

**EAS 360 - Senior Thesis Research (1.0)**
Prerequisite: Permission of the director.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**EAS 370 - Senior Thesis (1.0)**
Prerequisite: EAS 360 and permission of the director.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
Economics Major

Goals for the Economics Major

Our majors should attain

1. a basic understanding of economic principles
2. an ability to engage in critical reasoning
3. competency in making written and oral arguments

These skills are essential in helping each of our majors to graduate as more informed consumers, students, voters and workers. Included in a basic understanding of economics is an appreciation of trade-offs and opportunity costs, the role of government in a market economy, efficiency and equity in market outcomes, the costs and benefits of international trade, the challenge of stabilizing the macroeconomy, and the factors that raise the long-term growth rate of the economy. The critical reasoning skills our students should also develop include an ability to evaluate the logic of an argument, to employ analytical tools to construct an argument, and to use empirical evidence to support or reject a position. Our students develop rigorous quantitative skills. Having gained a core understanding of economics and having developed critical reasoning skills, our majors should be able to convey their insights in well-constructed written and oral presentations.

Requirements for the Economics Major

The economics major consists of a minimum of nine units. The major must include core course work in microeconomics (ECON 101 and ECON 201), macroeconomics (ECON 102 and ECON 202), and statistics (ECON 103 and ECON 203), as well as at least two 300-level units (ordinarily not counting ECON 350, ECON 360, or ECON 370). A minimum of two 300-level courses must be taken at Wellesley unless a student has completed 300-level work in economics at MIT; in such a case, only one 300-level course need be taken at Wellesley. Students who have completed MATH 220 or PSYC 205 need not complete ECON 103, but must take an additional economics elective to complete the major.

Choosing courses to complete the major requires careful thought. All majors should choose an advisor and consult him/her regularly. Students are also advised to consult the department handbook, which deals with a variety of topics including preparation in mathematics, desirable courses for those interested in graduate study in economics, and complementary courses outside economics. Calculus, along with several other mathematical tools, is central to the discipline. Beginning with students entering Wellesley in Fall of 2007, one semester of mathematics at Wellesley at the level of MATH 115 or above is required for all ECON 201, ECON 202, and ECON 203 sections. Students who entered the College in 2006 or before may fulfill the mathematics requirement with MATH 115 or its equivalent. We encourage students to consult a department advisor about whether additional mathematics courses might be desirable. Students interested in economics and its applications in international relations might want to consider the interdepartmental major in International Relations.

ECON - Economics Courses

ECON 100 - First-Year Seminar: The American Labor Market and the American Woman (1.0)
Instructor: Velenchik
Term(s): Fall
Shadow graded.

ECON 101 - Principles of Microeconomics (1.0)
This first course in economics introduces students to the market system. Microeconomics considers the decisions of households and firms about what to consume and what to produce, and the efficiency and equity of market outcomes. Supply and demand analysis is developed and applied. Policy issues include price floors and ceilings, competition and monopoly, income distribution, and the role of government in a market economy.
Instructor: Staff
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: SBA
Term(s): Fall; Spring

ECON 102 - Principles of Macroeconomics (1.0)
This popular press is replete with observations about women and work. Women earn less than men for the same work. Women are confronted with a "glass ceiling." Women entered the labor force at the end of the 20th century. Women are stuck in "female" occupations. Women worry about "having it all." This course will use some basic economic reasoning and both quantitative and qualitative information to explore how women's participation has shaped the American labor market, and how participation in the labor market has shaped American women. We will pay particular attention to the role of race, ethnicity, immigrant status and education in determining labor market choices and outcomes. Course work will include presentations, papers and multi-media projects. This course does not count toward the major in Economics.
Instructor: Velenchik
Prerequisite: This course is open only to students enrolled in Wellesley PLUS. This course does not count toward the major in Economics.
Distribution: SBA
Term(s): Fall
Shadow graded.

ECON 201 - Principles of Microeconomics (1.0)
This first course in economics introduces students to the market system. Microeconomics considers the decisions of households and firms about what to consume and what to produce, and the efficiency and equity of market outcomes. Supply and demand analysis is developed and applied. Policy issues include price floors and ceilings, competition and monopoly, income distribution, and the role of government in a market economy.
Instructor: Staff
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: SBA
Term(s): Fall; Spring
This course follows ECON 101 and analyzes the aggregate dimensions of a market-based economy. Topics include the measurement of national income, economic growth, unemployment, inflation, business cycles, the balance of payments, and exchange rates. The impact of government monetary and fiscal policies is considered.

Instructor: Staff
Prerequisite: ECON 101. Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: SBA
Term(s): Fall; Spring

ECON 103 - Introduction to Probability and Statistical Methods (1.0)

An introduction to the collection, analysis, interpretation, and presentation of quantitative data as used to understand problems in economics and sociology. Using examples drawn from these fields, this course focuses on basic concepts in probability and statistics, such as measures of central tendency and dispersion, hypothesis testing and parameter estimation. Data analysis exercises are drawn from both academic and everyday applications.

Instructor: Keskin, Levine, McKnight, Swingle (Sociology)
Prerequisite: ECON 101, ECON 102, or one course in sociology and fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking MATH 220, PSYC 205, or POL 199.
Cross-Listed as: SOC 190
Distribution: SBA; QR
Term(s): Fall; Spring; Summer I

Students must register for a laboratory section, which meets for an additional 70 minutes each week. Does not fulfill the laboratory requirement.

ECON 201 - Intermediate Microeconomic Analysis (1.0)

Intermediate microeconomic theory: analysis of the individual household, firm, industry, and market, and the social implications of resource allocation choices. Emphasis on application of theoretical methodology.

Instructor: Fetter, Park, Skeath
Prerequisite: ECON 101, ECON 102, and one math course at the level of MATH 115 or higher. The math course must be taken at Wellesley.
Distribution: SBA
Term(s): Fall; Spring

ECON 202 - Intermediate Macroeconomic Analysis (1.0)

Instructor: Joyce, Neumiller, Shuchkov, Sicel
Prerequisite: ECON 101, ECON 102, and one math course at the level of MATH 115 or higher. The math course must be taken at Wellesley.
Distribution: SBA
Term(s): Fall; Spring

ECON 203 - Econometrics (1.0)

Application of statistical methods to economic problems. Emphasis will be placed on regression analysis that can be used to examine the relationship between two or more variables. Issues involved in estimation, including goodness-of-fit, statistical inference, dummy variables, hetero-skedasticity, serial correlation, and others will be considered. Emphasis will be placed on real-world applications. The credit/noncredit grading option is not available for this course.

Instructor: Butcher, McEwan, Park, Shastry
Prerequisite: ECON 101, ECON 102, and one math course at the level of MATH 115 or higher. The math course must be taken at Wellesley. One course in statistics (ECON 103, MATH 220, or PSYC 205) is also required.
Distribution: SBA
Term(s): Fall; Spring

ECON 210 - Financial Markets (1.0)

Overview of financial markets and institutions, including stock and bond markets, money markets, derivatives, financial intermediaries, monetary policy, and international currency markets.

Instructor: Joyce
Prerequisite: ECON 101, ECON 102, and ECON 103.
Distribution: SBA
Term(s): Fall

ECON 213 - International Finance and Macroeconomic Policy (1.0)

This course introduces the study of macroeconomics in an open economy. Topics include basic features of foreign exchange markets, the structure of the balance of payments accounts, and the effectiveness of macroeconomic policy under fixed and flexible exchange rates and varying degrees of capital mobility. The course also examines the evolution of the international financial system, the role of the IMF, the creation of the European Monetary Union, and the recent financial crises in East Asia, Russia, and Brazil.

Instructor: Weerapana
Prerequisite: ECON 101 and ECON 102.
Distribution: SBA
Term(s): Spring

ECON 214 - Trade Policy (1.0)

An introduction to international trade in theory and practice. Emphasis on the microeconomic dimensions of trade relations between countries, examining why nations engage in international trade and evaluating the benefits and costs of such activity. Topics to be covered include trade and the welfare of workers in developed and developing nations; arguments for and against trade protection; the use of tariffs, quotas, and other trade barriers; and the choice of trade strategies in developing economies.

Instructor: Lindauer
Prerequisite: ECON 101 and ECON 102.
Distribution: SBA
Term(s): Fall

ECON 220 - Development Economics (1.0)

Survey and analysis of problems and circumstances of less-developed nations. Examination of theories of economic growth for poor nations. Review of policy options and prospects for low- and middle-income economies. Specific topics include: population growth, poverty and income distribution, foreign aid, and human resource strategies.

Instructor: Lindauer
Prerequisite: ECON 101, ECON 102, ECON 103 recommended.
Distribution: SBA
Term(s): Fall

ECON 222 - Games of Strategy (1.0)

Should you sell your house at an auction where the highest bidder gets the house, but only pays the second-highest bid? Should the U.S. government institute a policy of never negotiating with terrorists? The effects of decisions in such situations often depend on how others react to them. This course introduces some basic concepts and insights from the theory of games that can be used to understand any situation in which strategic decisions are made. The course will emphasize applications rather than formal theory. Extensive use is made of in-class experiments, examples, and cases drawn from business, economics, politics, movies, and current events.

Instructor: Skeath
Prerequisite: ECON 101. Permission of the instructor required.
Distribution: SBA
Term(s): Spring

ECON 223 - Personal Finance (1.0)

What should you study? How should you invest? These questions require knowledge of both the law and economics of personal finance. The course offers a hands-on approach that uses real-world prototypes. The earning, spending, investing, and insuring decision-making in any course of their lives provides the framework for class discussions. The course incorporates many of the latest developments in finance. It provides a way of thinking about personal finance that will be relevant even as the law and financial markets change.

Prerequisite: ECON 101 and ECON 103.
Distribution: SBA
Term(s): Not Offered

ECON 226 - Economics of Education Policy (1.0)

Applies microeconomic analysis to important questions in education policy. Should public school vouchers be implemented? Are there teacher shortages and how can they be solved? What are the long-term benefits of early childhood education? The course uses conceptual insights from microeconomics to understand these and other questions; particular emphasis is placed on economic interpretation of case studies and contemporary policy debates.

Prerequisite: ECON 101 and ECON 103.
Distribution: SBA
Term(s): Not Offered

ECON 228 - Environmental and Resource Economics (1.0)

This course considers the economic aspects of resource and environmental issues. After examining the concepts of externalities, public goods, and common property resources, we will discuss how to measure the cost and benefits of environmental policy in order to estimate the socially optimal level of the environmental good. Applications of these tools will be made to air and water pollution, renewable and nonrenewable resources, and global climate. In addressing each of these problems we will compare various public policy responses such as regulation, marketable permits, and tax incentives.

Instructor: Keskin
Prerequisite: ECON 101
Cross-Listed as: ES 228
Distribution: SBA
Term(s): Not Offered

ECON 229 - Women in the Economy (1.0)

This course uses economic theory and empirical analysis to examine the lives of women and their role in the economy. We first discuss the economics of gender and note that the research on the economics of gender tends to fall into three areas: analyses of labor markets, analyses of public policies and practices to address issues facing working women and their families, and analyses of the economic status of women across countries. After that introduction, we will discuss women’s educational attainment and participation in the labor market, gender segregation and the gender pay gap, discrimination, division of labor within household, and work versus family-life balance. In the second segment we will review...
government and company policies, like affirmative action, aimed at issues faced by working women and families. The final section will examine international evidence on the economic status of women and their changing role in the world economy.

Instructor: Kerr
Prerequisite: ECON 101 and ECON 103, or by permission of instructor
Distribution: SBA
Term(s): Spring

ECON 232 - Health Economics (1.0)
An economic analysis of the health care system and its players: government, insurers, health care providers, patients. Issues to be studied include demand for medical care, health insurance markets, cost containment measures (HMOs, PPOs, IPA), government health care programs (Medicare and Medicaid), variations in medical practice, medical malpractice, competition versus regulation, and national health care reform.

Instructor: Colle
Prerequisite: ECON 101 Distribution: SBA
Term(s): Fall

ECON 238 - Economics and Politics (1.0)
This course will cover the economic issues that will be discussed in the upcoming U.S. presidential election. We will cover the economic forces and the stylized facts at work behind the major economic issues facing the electorate: health care, income security (welfare), job security, taxes, income distribution, Social Security, trade, and global warming. This course is about the economic analysis of the issues and not the politics of the issues. We will compare and contrast the two candidates’ proposals on each of the most pressing economic issues, both in the short run and in the long run, and attempt, where possible, to put them in their proper historical perspective. Free trade or fair trade? Flat tax, fair tax, death tax? Cap and trade or carbon tax? Private accounts for Social Security or changes in the retirement age? Single payer health care with a mandate?

Prerequisite: ECON 101 and ECON 102
Distribution: SBA
Term(s): Not Offered

ECON 241 - Poverty and Inequality in Latin America (1.0)
Survey of economic development in the Latin American region, focusing upon poverty and inequality and the data used to measure them. Topics to be covered include regional and national trends in poverty and inequality and the formulation and evaluation of social policies, especially in the areas of education and health. Work in the course will emphasize the interpretation and use of data.

Instructor: McIntwan
Prerequisite: ECON 101 and ECON 103
Distribution: SBA
Term(s): Spring

ECON 242 - The Information Economy (1.0)
What effects are the Internet economy and digital business having on consumers and firms? How should firms price information goods/media? Why have rock concert ticket prices doubled in just six years’ time? Why are cable channels sold in bundles while songs on iTunes are sold individually? This course examines how information goods (like music, TV, books, and software) differ from other consumption goods, how markets for these goods develop, and how to think strategically about such goods. Topics include network effects, lock-in, standard setting, product tie-ins, intellectual property rights, and online piracy.

Instructor: Banaher
Prerequisite: ECON 101 and ECON 103
Distribution: SBA
Term(s): Fall

ECON 243 - The Political Economy of Gender, Race, and Class (1.0)
An introduction to radical economic analysis of contemporary, globalizing capitalism, and of emergent alternatives. Analysis of the ways in which gender, race, and class are built into core capitalist economic values, practices, and institutions. Study of the economic transformation sought by the feminist, anti-racist, anti-class, and environmental movements, including the transformation of economic agency from competitive to more solidaristic and socially responsible forms. Investigation of alternative, more egalitarian, “solidarity economy” practices and institutions, such as simple living, socially responsible choice, fair trade, cooperatives, social entrepreneurship, and recuperated factories.

Instructor: Matthaei
Prerequisite: ECON 101 or ECON 102, or permission of the instructor
Distribution: SBA
Term(s): Spring

ECON 246 - Inequality (1.0)
How much income and wealth inequality is there in the United States today? How has inequality changed over time and what explains these changes? What effect does inequality have on standards of living, health and democracy? Should we attempt to reduce inequality, or would doing so come at too great a cost to liberty and economic growth? Answering these questions requires knowledge and analytical tools from both economics and philosophy. Through a combination of empirical analysis and normative argument, this team-taught course will provide you with the core skills you need to understand and critically assess contemporary debates on inequality in America.

Prerequisite: ECON 101
Cross-Listed as: PHIL 246
Distribution: SBA, REP
Term(s): Not Offered

ECON 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor
Distribution: None
Term(s): Fall, Spring

ECON 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor
Distribution: None
Term(s): Fall, Spring
Mandatory credit/no credit.

ECON 301 - Advanced Microeconomic Analysis (1.0)
Further development and application of the tools of analysis developed in ECON 201 (Intermediate Micro). Students will study advanced topics in consumer and producer theory, particularly addressing the existence of risk, uncertainty, asymmetric information, and noncompetitive market structures. Other areas to be covered include general-equilibrium analysis, game theory, and prospect theory.

Instructor: Skeath
Prerequisite: ECON 201, MATH 205 recommended
Distribution: SBA
Term(s): Not Offered
conclusions from non-randomized studies, such as propensity score matching. Students will develop the expertise necessary to assess the credibility of causal claims and master the conceptual and computational tools needed to design and analyze studies that lead to causal inferences. Examples will come from economics, psychology, sociology, political science, medicine, and beyond.

Instructor: Pattanayak
Prerequisite: Any one of ECON 203, SOC 290, POL 199, PSYC 305 or a Psychology 300-level R course; or permission of the instructor.
Cross-Listed as: QR 309 and SOC 319
Distribution: SBA
Term(s): Not Offered

ECON 310 - Public Economics (1.0)
This course explores the reasons for government intervention in the economy and the responses of households and firms to the government’s actions. Economic models and empirical research are used to analyze tax policies and spending programs. Topics include the effect of taxes on savings and labor supply, externalities and public goods, and social insurance programs such as social security and unemployment insurance.

Instructor: Cole
Prerequisite: ECON 201 and ECON 203.
Distribution: SBA
Term(s): Fall

ECON 311 - Economics of Immigration (1.0)
This course examines the economic causes and consequences of international migration, both historically and in the present, with a focus on the U.S. experience. We explore changes in immigration law over time and the political debates surrounding immigration in the past and present. Topics include: the effect of immigrants on the wages of the native born; immigrants’ use of welfare and other social services; and immigrants’ involvement in crime and their treatment in the criminal justice system. In each case, students will discuss the popular perception of the theory, and the empirical evidence, with a focus on the public policy alternatives for dealing with each issue.

Instructor: Butcher
Prerequisite: ECON 201 and ECON 203.
Distribution: SBA
Term(s): Fall

ECON 312 - Economics of Globalization (1.0)
The process of globalization has aroused great controversy. This course examines the reasons for the integration across borders of the markets in goods and the factors of production, and the consequences of these trends. In the first part of the course we discuss the meanings, measurement, and history of globalization. We then investigate the rationale and record of international trade, the immigration of labor, and global financial flows. We examine issues related to international public goods, and the need for collective solutions to such global problems as pandemics and pollution. We also investigate the records of international governmental organizations.

Instructor: Joyce
Prerequisite: ECON 201
Distribution: SBA
Term(s): Not Offered

ECON 313 - Seminar. International Macroeconomics (1.0)
Theory and policy of macroeconomic adjustment in the open economy. Topics to be covered include models of exchange-rate determination, the choice between fixed and floating exchange rates, monetary union, policy effectiveness in open economies under different exchange rate regimes, and adjustment to balance-of-payments disequilibria.

Instructor: Neumuller
Prerequisite: ECON 201 and ECON 203.
Distribution: SBA
Term(s): Fall

ECON 314 - Advanced International Trade (1.0)
This course analyzes the causes and consequences of international trade. The theory of international trade and the effects of trade policy tools are developed in both perfect and imperfect competition, with reference to the empirical evidence. This framework serves as context for the consideration of several important issues: the effect of trade on income inequality, the relationship between trade and the environment, the importance of free trade to developing countries, and the effects of free trade agreements.

Instructor: Levine
Prerequisite: ECON 201 and ECON 203.
Distribution: SBA
Term(s): Spring

ECON 318 - Economic Analysis of Social Policy (1.0)
This course uses economic analysis to evaluate important social policy issues in the United States, focusing on the role of government in shaping social policy and its impact on individuals. Does welfare make people work less or have more children? Why is the teenage birthrate so high, and how might it be lowered? How do fertility patterns respond to changes in abortion policy? Theoretical models and econometric evidence will be used to investigate these and other issues.

Instructor: Levine
Prerequisite: ECON 201 and ECON 203.
Distribution: SBA
Term(s): Not Offered

ECON 319 - Economics of Disease and Destruction (1.0)
Diseases, wars, and disasters exert important influence on economies. In this course students analyze the effects of factors such as malaria, HIV/AIDS, Chagas disease, drought, and civil war on the economies of developing and developed countries. Both the effects of disease and destruction on outcomes and how economics can shape policy reactions will be considered, with special emphasis on careful economic estimation of cause and effect. Examples will come from historical and recent episodes around the world.

Prerequisite: ECON 201, ECON 202, and ECON 203.
Distribution: SBA
Term(s): Not Offered

ECON 320 - Economic Development (1.0)
This course examines what factors help to explain why some countries are rich and others poor and whether economic policies can affect these outcomes. We will study key aspects of life for poor households in the developing world, such as inequality, gender, and the intra-household division of resources; education; child labor; health; savings and credit; institutions; and globalization. Students will study recent research in the field and examine empirical evidence on these topics.

Instructor: Shastry
Prerequisite: ECON 201 and ECON 203.
Distribution: SBA
Term(s): Fall

DEPARTMENT OF EDUCATION

Education is at the center of social and personal life. Its study is necessarily interdisciplinary. We offer a variety of courses, each one with its own distinct intellectual challenge but all seeking to connect different points of view, whether the course is focused on urban education, school reform, diversity, policy, history, research, child welfare, literacy, language, play, or learning to teach. We invite students to try a single course (first-year seminars and many other first-year courses are possible) and to consider one of the two minors we offer, the Teacher Education and Education Studies minors.

Education Minors

Goals for Education Minors

- Teacher Education minors will acquire the knowledge and skills needed to be teachers of their subject(s) with students in elementary, middle, or high schools. They will become able to collaborate, to reflect on and discuss critically their teaching and the situation of their students, and to learn from further experience and study.
- Education Studies minors will acquire a multifaceted, critical perspective on education in a variety of time periods and settings, including urban ones, and on policy issues and methods of educational research. They will be ready to continue learning through further study, discussion, and reflection.

Requirements for Education Minors

The education department offers two minors (but no major), one in Teacher Education and one in Education Studies. The minors offer opportunities to explore teaching and education from the perspective of a classroom teacher or a field of study. Students may choose to focus on urban education within either minor.

Teacher Education

We prepare teachers to teach in a variety of urban and suburban schools with diverse students. Grounded in the liberal arts, each Wellesley or MIT student in our program receives careful individual attention in the process of discovering how her/his own special gifts can be used in the challenging work of teaching. Our students take introductory courses in educational philosophy, history, or policy, and then do course work in curriculum, instruction, assessment, and specific methods for teaching reading and elementary school subjects or for middle and high school subjects. They do fieldwork, including tutoring and after-school programs in urban and suburban settings and a teaching internship in urban or suburban schools. Students who wish to be licensed to teach high school (grades 8-12), middle school (grades 5-8), or elementary school (grades 1-6) should obtain the department's description of the requirements. Generally, the program requires students to take specific subject-matter courses within their teaching fields along with four to seven education and psychology courses, two of which are the teaching practicum (EDUC 303) and accompanying seminar (EDUC 302). If students are not able to register for required introductory courses, they should consult with the department about alternatives. In addition, teacher certification requires fieldwork prior to the student teaching practicum (internship). Students enrolled in EDUC 303 (Practicum) may register for EDUC 320, but are not required to do so.

We encourage you to talk with us to learn about program options. Early planning is preferable, but we will also be glad to discuss teaching program possibilities with you at any point. Students may register for a minor beginning in the spring of the sophomore year, but a minor is not required for teacher licensure. With the exception of EDUC 302, EDUC 303, and EDUC 320, the department’s courses are designed for all students, not simply for those planning a career in public or private school teaching. Students seeking preparation in teaching but not certification should discuss special arrangements with Ken Hawes (high school or middle school) or Noah Rubin (elementary school or preschool). We have found that student teaching prior to full-time teaching provides enormously valuable preparation for work in schools, especially in schools with high-need students.

The Teacher Education minor consists of the following:

(A) one of WRIT 114/EDUC 102 or EDUC 110 or EDUC 117 or EDUC 200 or EDUC 201 or EDUC 212 or EDUC 215 or EDUC 216 or EDUC 335, or PSYC 248 or PSYC 321 or MIT 11.124 or MIT 11.125; one approved course; (B) one of PSYC 207 or PSYC 208 or EDUC 325; and (C) EDUC 300, EDUC 302, and EDUC 303. For students seeking elementary certification, EDUC 304, EDUC 305, EDUC 310, and EDUC 314 are required instead of EDUC 300. EDUC 325 is also required for high school or middle school certification. Certification through Wellesley is transferrable to other states.

Education Studies

We also offer courses that extend students’ knowledge of education as a field of study. Students in Education Studies may wish to examine the origins of education and child welfare practices, the roles of schools in society and communities; school reform, questions of educational theory or research, and the relation of education to social problems more generally. Students may structure the minor to include one or two courses in other fields, including economics, history, politics, sociology, or psychology of education as listed in Courses for Credit Toward the Minor. Students entering in the fall of 2012 and after may take only one such course.

Students interested in urban education should take courses in education policy, school improvement, or history of education, all of which deal to some extent with urban issues; the urban education seminar; and, if possible, courses on diversity and English as a Second Language. Although the College does not have a program, major, or minor in Urban Studies, students interested in specializing in urban education should consult the list of courses related to Urban Studies in the catalog and consider taking courses in the Department of Urban Studies and Planning at MIT, along with the urban education courses suggested above. Courses on urban studies also might be combined with other majors or minors. Courses on child literacy and teaching mathematics may also be helpful for students considering going into urban education. Students interested in education policy should take some of these same courses and may want to take courses in the economics and political science departments and Quantitative Reasoning program, which deal with policy more broadly. For both urban education and education policy, fieldwork in a school or tutoring program is highly recommended. Students interested in the study of children and youth should take at least two 200-level education courses, the seminar on the history of childhood and child welfare, and two or three course related to children and adolescents in Courses for Credit Toward the Minor.

The Education Studies minor consists of five courses chosen from the following:

(A) two of EDUC 212 or EDUC 215 or EDUC 216; and (B) three of WRIT 114/EDUC 102, EDUC 110, EDUC 117, EDUC 200, EDUC 308, EDUC 310, EDUC 312, EDUC 314, EDUC 325, EDUC 335, or MIT 11.125 with possible substitution of one of the courses listed in Courses for Credit Toward the Minor. Note: Not all of these courses are offered every year; some may be limited to majors in these fields. At least one 300-level education course must be included.

Title II Information

As required by Title II of the Higher Education Act of the United States, we provide the following information. The number of students enrolled in our state-approved teacher education programs during academic year 2009-10 was 13. The number of these students who continued into student teaching was 13. The number who completed all requirements of the program was 13. The student/faculty ratio for supervised student teaching was 3.25:1. The average number of required hours of student teaching is 360 (12 weeks of at least 30 hours per week). The minimum required is 300.

The pass rates for our students on the Massachusetts Tests for Education Licensure are as follows: 1. Basic skills: a. Reading 100% b. Writing 100%. Basic skills aggregate (a and b combined) 100% 2. Academic content areas: Aggregate 100%, Summary (1. and 2. combined) pass rate 100%.

Courses for Credit Toward the Education Minor

ECON 226 Economics of Education Policy
ECON 326 Seminar, Advanced Economics of Education
ENG 205 Writing for Children
PSYC 207 Developmental Psychology
PSYC 208 Adolescence
PSYC 248 Psychology of Teaching, Learning, and Motivation
PSYC 321 Community Psychology with Winter Internship Revised
PSYC 326 Seminar, Child and Adolescent Psychopathology
PSYC 333 Clinical and Educational
differences in infants, toddlers, and preschoolers as they grow in all skill areas—motor, cognitive, social emotional, and language and communication. Through readings, focused observations, writing assignments, and reflective discussion, students will learn to make the connections between developmental understanding and appropriate curriculum planning in an Early Childhood setting. Instructors: Kloppeenberg (WCCC), Howland (WCCC) Prerequisite: None Distribution: SBA Term(s): Summer I

EDUC 201 - Educating Young Children with Special Needs (1.0)

An examination of characteristics of young children with special needs and of programs, practices, and services that support them. We will focus on theoretical and applied knowledge about special needs, including communication disorders, cognitive impairments, giftedness, and physical and health-related disabilities. Screening, assessment, early intervention, individualized education programs, inclusive education, community resources, and family issues will be discussed. We will explore how programs make accommodations and modifications based on young children’s special needs. Observations and a three-hour weekly field placement are required.

Instructor: Geer; Ferguson Prerequisite: Some course work in child development or by permission of the instructor. Distribution: EC Term(s): Summer II

EDUC 212 - Seminar. History of American Education (1.0)

An intensive study of the role that education has played in American society and of the evolution of support and expectations for public schools. We will examine how schools have served the needs of immigrants and students from different gender, racial, ethnic, linguistic, social class, and religious backgrounds. We will focus on the education of teachers, the organization of urban school systems, the growth of high schools and preschools, attempts to reform schools and the curriculum, and efforts to promote equal educational opportunity.

Instructor: Beatty Prerequisite: None Distribution: HS Term(s): Fall

EDUC 215 - Understanding and Improving Schools (1.0)

Can schools remedy inequalities, or do they reflect and reinforce them? Drawing from work in educational anthropology, sociology, history, and critical theory, we ask what schools are meant to produce and how this production functions in the everyday life of schooling. We first examine the proposition that schools can be oppressive spaces, and then consider how communities have organized their own struggles to demand and define humanizing and liberatory education. We ask—always—what the purpose of education should be.

Instructor: Rubin Prerequisite: None Distribution: SBA Term(s): Fall/Spring

EDUC 216 - Education and Social Policy (1.0)

An examination of education policy in recent decades as well as the social, political, and economic forces that have shaped these policies over the years. We will analyze the different—and sometimes conflicting—goals, motivations, and outcomes of educational policies. Who designs educational policy and for whom? Whose interests are served and whose interests are unmet? Using a case study approach, we will discuss major topics of debate in American education, including equal educational opportunity, school desegregation, bilingual education, school choice, and education standards and testing, and consider new policies.

Instructor: Hawes, Sung Prerequisite: None Distribution: SBA Term(s): Fall/Spring

EDUC 250 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall/Spring

EDUC 250H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall/Spring

EDUC 300 - Teaching and Curriculum in Middle School and High School (1.0)

An intensive study of the knowledge and skills required in classroom teaching, including curriculum development, planning, instruction, testing, and assessment. We will focus especially on classrooms as learning environments and on teacher understanding of student academic development. Additional laboratory periods for teaching presentations and an accompanying field placement are required.

Instructor: Hawes Prerequisite: One of EDUC 102, EDUC 117, EDUC 212, EDUC 215, EDUC 216, PSYC 248, PSYC 321, or MIT 11.124 or other approved course, or by permission of the instructor. Distribution: EC Term(s): Fall Open to all students, mandatory for those seeking middle-school or high-school certification; students should contact the instructor either before or soon after registration to plan their field placement.

EDUC 302 - Seminar. Methods and Materials of Teaching (1.0)

Study and observation of teaching techniques, the role of the teacher, classroom interaction, and individual and group learning. Examination of curriculum materials and classroom practice in specific teaching fields. Students interested in working with middle- or high-school students should enroll in section 302-01. Students interested in working with elementary or preschool students should enroll in section 302-02.

Instructor: Hawes, Rubin Prerequisite: EDUC 300 or EDUC 304 or by permission of the instructor. Corequisite: EDUC 303 and EDUC 305 for students interested in working with elementary or preschool students. Distribution: SBA Term(s): Spring Open to students seeking substantial observation and teaching experience in a school, mandatory for students seeking teacher certification; students should contact the instructor either before or soon after registration to plan their field placement.
EDUC 303 - Practicum. Curriculum and Supervised Teaching (1.0)
Observation, supervised teaching, and curriculum development in students’ teaching fields throughout the semester. Attendance at an appropriate school placement required.
Instructor: Hawes, Rubin
Prerequisite: Students seeking teacher certification must apply to the department for admission to this course in the semester before it is taken; other students should contact the instructor either before or soon after registration to plan their field placement.
Corequisite: EDUC 302, and EDUC 305 for students interested in working with elementary or preschool students.
Distribution: SBA
Term(s): Spring
Open to students seeking substantial observation and teaching experience in a school, mandatory for students seeking teacher certification; students should contact the instructor either before or soon after registration to plan their field placement. Mandatory credit/non-credit.

EDUC 304 - Curriculum and Instruction in Elementary Education (1.0)
A seminar taught by a team of experienced teachers. This course focuses on curriculum development, planning, instruction and assessment in elementary school classrooms. Additional laboratory periods for teaching presentations and an accompanying field placement are required.
Instructor: Dalshenm, Friedman, Haskell, Rubin, Tutton
Prerequisite: or Corequisite: EDUC 310 or EDUC 314 or by permission of the instructor.
Distribution: EC
Term(s): Fall
Mandatory for those seeking elementary education certification; students should contact the instructor either before or soon after registration to plan their field placement.

EDUC 305 - Curriculum, Instruction and Special Needs in Elementary Education (1.0)
A seminar taught by a team of experienced teachers. A continuation of EDUC 304, this course focuses on curriculum materials and instructional materials used in elementary school classrooms—particularly for serving the diverse needs of students. Strategies for behavior management, for working with children with disabilities and special needs, for applying a model of Sheltered English Immersion to serve English language learners, and for working in collaboration with parents and communities will be addressed. Accompanying field placement is required.
Instructor: Dalshenm, Friedman, Haskell, Rubin, Tutton
Prerequisite: EDUC 304 or by permission of the instructor.
Distribution: EC
Term(s): Spring
Mandatory for those seeking elementary education certification; students should contact the instructor either before or soon after registration to plan their field placement.

EDUC 308 - Seminar. World Languages Methodology (1.0)
A course in the pedagogical methods of foreign languages intended to apply to any foreign language and to teaching English as a Second Language; emphasizes the interdependence of the four language skills—listening, speaking, reading, writing—in cultural contexts; introduces students to a theoretical study of linguistic and psychological issues necessary to evaluate new ways of presenting language material. This seminar will focus on selected texts and readings on the methodology of world-language teaching.
Instructor: Rentjian-Burgy (Spanish)
Prerequisite: Open to sophomores, juniors, and seniors.
Distribution: SBA
Term(s): Not Offered

EDUC 310 - Seminar. Child Literacy and the Teaching of Reading (1.0)
An examination of how children acquire reading, writing, and oral language skills, and how this relates to cognition. We will focus on current research and practice in literacy development for elementary-age children. Oral language, reading processes, assessment using a variety of techniques, phonemic awareness, phonics, and comprehension strategies will be addressed; a weekly 1.5-hour field placement experience is required. We will study reading instruction across content areas and teaching strategies that address the needs of a diverse population of learners, including at-risk students, second-language learners, Sheltered English Immersion instruction, and students with special needs. This course is structured to support students pursuing elementary education certification, but is open to all students and highly applicable to students considering teaching abroad and in urban schools.
Instructor: Tutton
Prerequisite: Open to sophomores, juniors, and seniors. One 100- or 200-level course in Education or by permission of instructor.
Distribution: EC
Term(s): Fall; Spring

EDUC 312 - Seminar. History of Childhood and Child Welfare (1.0)
An exploration of the construction of childhood as a social concept and of changes in concepts of childhood in America. We will examine the emerging and fading roles of the state in assuming responsibilities for child rearing, education, and child welfare. We will study the history of how institutions and social policies have attempted to shape the lives of children of differing genders, and economic, racial, cultural, linguistic, and ethnic backgrounds. We will look at how children have resisted adult prescriptions and created their own cultures. The impact of media and the development of children's material culture will be a particular focus. Is the United States a "child friendly" country?
Instructor: Beatty
Prerequisite: Open to juniors and seniors. Not open to students who have taken EDUC 110.
Distribution: HS
Term(s): Spring

EDUC 314 - Learning and Teaching Mathematics: Content, Cognition, and Pedagogy (1.0)
An examination of how adults and elementary-school students learn basic mathematics content, specifically number and operations, functions and algebra, geometry and measurement, and statistics and probability. We will simultaneously study our own cognition as we learn mathematical concepts and principles, children's cognition as they learn mathematics, and how mathematics can be taught to children in classroom settings. This course is team taught by Wellesley College faculty with a background in mathematics and quantitative reasoning and an elementary school teacher and mathematics specialist. Weekly fieldwork of 90 minutes in an elementary classroom is required. This course is structured to support students pursuing elementary education certification, but is open to all students.
Instructor: Polito (Quantitative Reasoning), Dalshenm
Prerequisite: One education course.
Distribution: EC
Term(s): Fall

EDUC 320 - Observation and Fieldwork (1.0)
Observation and fieldwork in educational settings. This course may serve to complete the requirement of documented introductory field experiences of satisfactory quality and duration necessary for teacher certification. Arrangements may be made for observation and tutoring in various types of educational programs; at least one urban field experience is required.
Instructor: Hawes, Rubin
Prerequisite: EDUC 300 or EDUC 304. Open only to students who plan to student teach. Permission of the instructor required.
Distribution: SBA
Term(s): Fall; Spring
Mandatory credit/non-credit.

EDUC 321 - Bilingual Education Policy and Politics (1.0)
This seminar provides a foundation for understanding the politics surrounding bilingual education policies since the rise of a federal bilingual education act in 1968. After an introductory overview of the intersection of language, education and nation-building, the course chronologically follows the trajectory of bilingual education policies and practice through five decades. We will study how bilingual education politics and policy were shaped by a range of other policies, patterns, movements and controversies, including the 1965 Immigration Act, the civil rights and power movements of the 1960-70s, the 1980s English-only movement, the 1990s "culture wars," globalization and its effects on the in/out-flows of jobs and immigrants, racialization and retrenchment of welfare state policies, and the rise of standardized testing and accountability regimes.
Instructor: Sung
Prerequisite: One education course.
Distribution: SBA
Term(s): Fall

EDUC 322 - Seminar: Digital Technologies and Learning Communities (1.0)
This seminar is an intensive examination of the intersection of digital technologies and learning, and of implications for learning communities and the learning enterprise. Digital technologies have become part of our social fabric. The capacity to critically assess and use these technologies to support learner success is more important than ever. This course is designed to support the development of thoughtful and responsive educators addressing the unique challenges inherent in the technology-rich options of today's learning environments.
Instructor: Chapman
Prerequisite: EDUC 110, EDUC 215, or EDUC 216
Cross-Listed as: CS 322
Distribution: EC
Term(s): Fall

EDUC 325 - Seminar. English as a Second Language via Immersion (1.0)
Pedagogy of Sheltered English Immersion and English as a Second Language, including understanding of the cultures of learners and their communities, and other contextual considerations. How to shelter and adapt subject matter in content areas. Fieldwork is required. This course is required...
for high-school and middle-school teacher licensure, but will also be valuable to those with other ESL interests.

Instructor: Renjilian-Burgy (Spanish)
Prerequisite: Open to sophomores, juniors, and seniors.
Distribution: EC
Term(s): Fall

EDUC 334 - Seminar. Education, Immigration, and Social Mobility (1.0)
This seminar examines ways in which race, ethnicity, and social class shape immigrants' educational and economic trajectories. We will read and analyze accounts of immigrants' experiences in public schools, sample research on immigration and education, and critique conventional wisdom regarding immigrant success in American society. We will explore differences in the educational outcomes of older and newer immigrants and look at the role of schools and other community organizations in the lives of immigrant youth.

Instructor: Hong
Prerequisite: One course in education. Open to sophomores, juniors, and seniors.
Distribution: SBA
Term(s): Not Offered

EDUC 335 - Seminar. Urban Education (1.0)
An intensive examination of urban education reform and urban schools, with emphasis on how the context of cities affects education and on some of the challenges faced by urban teachers, students, and parents, such as poverty, race- and class-based segregation, linguistic barriers, immigration, and inequities in school quality. Through the study of foundational educational texts and various urban contexts, we will focus on economic, political, social, and cultural aspects of urban schools and community life. Students will learn and implement a field-based, original action research project through this course. Fieldwork in an urban setting is required.

Instructor: Hong
Prerequisite: EDUC 212, EDUC 215, or EDUC 216; permission of the instructor required.
Distribution: SBA
Term(s): Not Offered
Application required.

EDUC 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

EDUC 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring
For Engineering, see Extradepartmental
DEPARTMENT OF ENGLISH

Professor: Bidart, Cain, Ko, Lee, Lynch, Meyer, Noggle, Peltason, Rosenwald, Sabin, Shetley
Associate Professor: Brogan (Chair), Chiasson, Hickey, Rodensky, Tyler
Assistant Professor: Gonzalez, Woll-Randall, Whitaker
Newhouse Administrative Assistant: Wallenstein
Senior Lecturer: Casair-Thompson, Sides
Robert Garis Fellow: Smeee
Director of Creative Writing. Sides
Honors Coordinator: Rodensky

English, as a discipline, stresses the intensive study of writers and their works in literary, cultural, and historical contexts. It is key to the appreciation and analysis of literary language, through which writers compose and organize their poems, stories, novels, plays, and essays. We offer a wide range of courses: introductory courses in literary skills; more advanced courses in influential writers, historical periods, and themes in English, American, and world literatures in English; and numerous courses in creative writing, including screenwriting and creative nonfiction.

Our course offerings strike a balance between great authors of past centuries and emerging fields of study. We teach courses on writers such as Shakespeare, Milton, Jane Austen, and James Joyce, and on Asian-American literature, writers from the Indian subcontinent, and film. We emphasize analysis and argument in literary criticism, critical thinking, and literary research, and we foster and develop a deep, complex, passionate response to literature.

English Department Information

Courses at the 100 level presume no previous college experience in literary study. They provide good introductions to such study because of their subject matter or their focus on the skills of critical reading. ENG 120 (Critical Interpretation) is open to all students, but is primarily designed for prospective English majors. The course trains students in the skills of critical reading and writing. 200-level literature courses, with the exception of Shakespeare (ENG 223 and ENG 224), are open to all students without prerequisite. They treat major writers and historical periods, and provide training in making comparisons and connections among different works, writers, and ideas. 300-level literature courses encourage both students and instructors to pursue their special interests. They presumes a greater overall competence, together with some previous experience in the study of major writers, periods, and ideas in English or American literature. They are normally open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, and by permission of the instructor to other qualified students. For independent work (ENG 350), students with at least a 3.33 GPA in courses in the department will have first consideration. Students are encouraged to confer with the instructors of courses in which they are interested. Students should consult the more complete descriptions of all courses, composed by their instructors and available from the department administrative assistants.

Creative Writing. The English department offers beginning and advanced courses in poetry (ENG 202 and ENG 302), in fiction (ENG 103, ENG 205, and ENG 301), in children’s literature (ENG 205), and in screenwriting (ENG 204/CAMS 204). A literary nonfiction writing course (ENG 206/WRIT 225) that covers different genres (for example, reviewing the arts, travel writing, personal essay, and memoir) is offered in collaboration with the Writing Program. The Theatre Studies department offers an introductory playwrighting course (THST 221). These courses are open to all Wellesley College students. Creative writing courses are taught mandatory credit/noncredit.

English Major

Goals for the English Major

In short, the Wellesley English department seeks to acquaint all its majors with the following bodies of knowledge and to develop in them the following abilities:

- A knowledge of English literary history, including both the canonical works of the past and works from emerging traditions;
- Familiarity with critical methodologies generally employed in the discipline of literary studies;
- An ability to write with clarity, originality, and style;
- An ability to recognize and construct a lucid and persuasive argument;
- An ability to read literature with close attention to language and form. Those who major in English and Creative Writing should fulfill all the goals above and in addition should develop a distinctive literary voice and knowledge of the history and cross-cultural diversity of the genres, traditions, and styles in which they are working.

Requirements for the English Major

The English major consists of a minimum of 10 units, at least eight of which must be in areas other than creative writing. At least seven units must be above 100 level, and of these at least two units must be earned in 300-level literature, film, or literary theory courses. At least eight of the units for the major must be taken in the department, including the two required units in 300-level courses dealing with literature, film, or literary theory; with the approval of a student’s major advisor, two courses taught within language and literature departments and related interdisciplinary programs and departments at Wellesley and other approved schools may be offered for major credit; these may include literature courses taught in translation or language courses at the third-year level or higher. Students planning to study for a full academic year in a program abroad in the United Kingdom should seek the counsel of their advisors or the department chair to avoid running up against the college’s rule that 18 courses must be taken outside any one department; universities in the United Kingdom commonly require all courses to be taken within their English departments.

The First-Year Writing requirement does not count toward the major. Courses designated WRIT 105/ENG 120 satisfy both the ENG 120 requirement and the First-Year Writing requirement, and count as a unit toward the fulfillment of the major. Other combined sections, such as WRIT 106/ENG 122 (2012–13), count toward the major as well. Independent work (ENG 350, ENG 360, or ENG 370) does not count toward the minimum requirement of 300-level courses for the major or toward the 10 courses required for the major. 300-level courses in creative writing also do not count toward the minimum requirement of two 300-level courses for the major.

All students majoring in English must take ENG 120 (Critical Interpretation) or WRIT 105/ENG 120, at least one course in Shakespeare (200 level), and two courses focused on literature written before 1900, of which at least one must focus on literature before 1800.

Courses taken in other departments at Wellesley College may not be used to satisfy any of the above distribution requirements for the major. With the chair’s permission, courses taken abroad during junior year or on Twelve College Exchange may satisfy certain distribution requirements. ENG 112, ENG 223, ENG 224, and ENG 247/MER 247 do not satisfy the pre-1800 distribution requirement. Transfer students or Davis Scholars who have had work equivalent to ENG 120 at another institution may apply to the chair for exemption from the critical interpretation requirement.

The Creative Writing Concentration in the English major

The creative writing concentration within the English major is designed for majors with a strong commitment to developing their own creative work. Students electing the creative writing concentration take a series of workshops in one or more creative genres (fiction, poetry, children’s literature, playwriting, screenwriting, and creative nonfiction) and select, in consultation with their advisor, courses in literary study that provide the background in and knowledge of literary tradition necessary to make a contribution to that tradition.

Students interested in the creative writing concentration are urged to begin planning their programs early in their careers at Wellesley. It is expected that they will have taken at least one writing workshop by the time of election of the English major (spring semester sophomore year or fall semester sophomore year, for students studying internationally), and have been in touch with a member of the creative writing faculty to plan the major. English majors electing the creative writing concentration must choose a member of the creative writing faculty as their advisor. Students who are interested in the creative writing concentration but who do not feel confident that they have had sufficient experience in writing to choose the concentration at the time of the election of the major should elect the English major; they may add the creative writing concentration later.

Students electing the creative writing concentration must fulfill all the requirements of the English major, including ENG 120, a course on Shakespeare, the period distribution requirements, and two 300-level literature courses. It is expected that creative writing students will take a focused program of critical study in the genre or genres in which they specialize.

In addition to eight courses in the critical study of literature, majors in the creative writing concentration take a minimum of four units of creative writing work. Creative writing courses may be repeated once for additional credit. A student who is extremely motivated and capable of independent work and who has the permission of a faculty advisor may take an independent study (ENG 350); however, it is recommended that students take full advantage of the workshop experience provided by the creative writing courses. A student qualifying for honors in English and whose proposal has been approved by the Creative Writing Committee may pursue a creative writing thesis; the thesis option, although it includes two course units (ENG 360 and ENG 370), can only count as one of the four creative writing courses required by the concentration.

Creative writing faculty generally direct creative
Shakespeare wrote for a popular audience and was immensely successful. Shakespeare is also universally regarded as the greatest playwright in English. In this introduction to his works, we will try to understand both Shakespeare's popularity and greatness. To help us reach this understanding, we will focus especially on the theatrical nature of Shakespeare's writing. The syllabus will likely be as follows: Romeo and Juliet, A Midsummer Night's Dream, Twelfth Night, Othello, King Lear, and The Winter's Tale.

Instructor: Ko
Prerequisite: None. Especially designed for the non-major and thus not writing-intensive. It does not fulfill the Shakespeare requirement for English majors.
Distribution: LL, ARS
Term(s): Spring

ENG 114 - Topics in American Literature (1.0)
A study of the major poems and poets of the English language, from Anglo-Saxon riddles to the works of our contemporaries. How have poets found forms and language adequate to their desires to praise, to curse, to mourn, to seduce? How, on shifting historical and cultural grounds, have poems, over time, remained useful and necessary to human life? Approximately 1,000 years of poetry will be studied, but special attention will be brought in four cases: Shakespeare’s Sonnets; John Milton’s “Lycidas”; the odes of John Keats; the poems of Emily Dickinson. The course will conclude with a unit on contemporary poets (Sylvia Plath, Elizabeth Bishop, Philip Larkin, John Ashbery and others).
Instructor: Bidart
Prerequisite: None. Especially recommended to non-majors.
Distribution: LL
Term(s): Not Offered

ENG 115 - Great Works of Poetry (1.0)
A study of the major poems and poets of the English language, from Anglo-Saxon riddles to the works of our contemporaries. How have poets found forms and language adequate to their desires to praise, to curse, to mourn, to seduce? How, on shifting historical and cultural grounds, have poems, over time, remained useful and necessary to human life? Approximately 1,000 years of poetry will be studied, but special attention will be brought in four cases: Shakespeare’s Sonnets; John Milton’s “Lycidas”; the odes of John Keats; the poems of Emily Dickinson. The course will conclude with a unit on contemporary poets (Sylvia Plath, Elizabeth Bishop, Philip Larkin, John Ashbery and others).
Instructor: Bidart
Prerequisite: None. Especially recommended to non-majors.
Distribution: LL
Term(s): Not Offered

ENG 120 - Critical Interpretation (1.0)
English 120 introduces students to a level of interpretative sophistication and techniques of analysis essential not just in literary study but in all courses that demand advanced engagement with language. Sections explore the principal literary genres, including a selection of poems, a play, and prose narrative. Required of English majors and minors, "Critical Interpretation" fosters intellectual community among its students by teaching some texts common to all sections and keying them to campus events such as performances of the year's play by London actors, film screenings, lunchtime lectures by 120 faculty, and other occasions for discussion and collaboration.
Instructor: Sabin, Whitaker, Wali-Randall, Rosenwald
Prerequisite: None. Open only to first-year students. Distribution: LL, W
Term(s): Fall; Spring

ENG 121 - Jane Austen's Novels (1.0)
Students will read a selection of the great novels of Jane Austen and use her work to learn skills for the close reading of fiction in general. We will study the details of Austen’s fictional technique. From what perspective are the novels told? How does the author reveal her attitudes toward her characters? At the same time we will consider the broader questions raised by the novels. What values motivate Austen’s fiction? How does she comment on the larger social and historical scene? What are her views on such issues as slavery or the proper role of women?
Prerequisite: None
Distribution: LL
Term(s): Not Offered

ENG 133 - Studies in Fiction (1.0)
A reading of some of the greatest novels of English, American, and world literature. Taught primarily in lecture, this course will not be writing-intensive. Designed especially for first-year students and non-majors. Instructor: Peltason
Prerequisite: None. Especially recommended to non-majors.
Cross-Listed as: CPLT 113
Distribution: LL
Term(s): Fall

ENG 140 - Foundations of Literary Study (1.0)
A study of translation in theory and in practice, in its literal and metaphorical senses alike, mostly but not exclusively in the West. Topics: translation of literary texts, translation of sacred texts, the history of the translator, translation and politics, translation and gender, human and machine translation, adaptation as translation (text to music, novel to film, verbal narrative to comics, etc.). Guest lectures by practicing translators. No foreign language prerequisite. Opportunity for both critical and creative work, for commenting on translations and adaptations, and for producing them.
Instructor: Rosenwald
Prerequisite: Open only to first-year students.
Distribution: LL
Term(s): Fall

WRIT 105-ENG 120 - Critical Interpretation (1.0)
This course introduces students to a level of interpretive sophistication and techniques of analysis essential not just in literary study but in all courses that demand advanced engagement with language. Sections explore the principal literary genres, including a selection of poems, a play, and prose narrative. Required of English majors and minors, "Critical Interpretation" fosters intellectual community among its students by teaching some texts common to all sections and keying them to campus events such as performances of the year's play by London actors, film screenings, lunchtime lectures by English faculty, and other occasions for discussion and collaboration.
Instructor: Sabin, Whitaker, Wali-Randall, Rosenwald
Prerequisite: None. Open only to first-year students.
Distribution: LL, W
Term(s): Fall; Spring

This course satisfies both the First-Year Writing requirement and the Critical Interpretation requirement of the English major. Includes a third session each week.
**ENG 202 - Poetry (1.0)**
A workshop in the writing of short lyrics and the study of the art and craft of poetry. Enrollment is limited to 15 students.
Instructor: Chiasson  
Prerequisite: None  
Distribution: LL  
Term(s): Fall  
Mandatory credit/noncredit. Students who have taken this course once may register for it one additional time.

**ENG 203 - Short Narrative (1.0)**
A workshop in the writing of the short story; frequent class discussion of student writing, with some reference to established examples of the genre. Enrollment is limited to 15 students.
Instructor: Sides, Wallenstein, Cezair-Thompson  
Prerequisite: None  
Distribution: LL  
Term(s): Fall; Spring  
Mandatory credit/noncredit. Students who have taken this course once may register for it one additional time.

**ENG 204 - The Art of Screenwriting (1.0)**
A creative writing course in a workshop setting for those interested in the theory and practice of writing for film. This course focuses on the full-length feature film, both original screenplays and screen adaptations of literary work. Enrollment is limited to 15 students.
Instructor: Sides, Wallenstein, Cezair-Thompson  
Prerequisite: None  
Cross-Listed as: CAMS 234  
Distribution: ARS  
Term(s): Fall  
Mandatory credit/noncredit. Students who have taken this course once may register for it one additional time.

**ENG 205 - Writing for Children (1.0)**
What makes for excellence in writing for children? When Margaret Wise Brown repeats the word "moon" in two subsequent pages—"Goodnight moon. Goodnight cow jumping over the moon"—is this effective or clunky? What makes rhyme and repetition funny and compelling in one picture book (such as Rosemary Wells’s Noisy Nora) but vapid in another? How does E.B. White establish Fern’s character in the opening chapter of Charlotte’s Web? What makes Cynthia Kadohata’s Kira-Kira a novel for children rather than adults—or is it one? In this course, students will study many examples of children’s literature from the point of view of writers and will write their own short children’s fiction (picture book texts, middle-reader or young adult short stories) and share them in workshops. Enrollment is limited to 15 students.
Instructor: Sides  
Prerequisite: None  
Cross-Listed as: WRIT 225/ENG 206  
Distribution: LL  
Term(s): Fall  
Mandatory credit/noncredit.

**ENG 206-01-S - Nonfiction Writing (1.0)**
**Topic for 2014-15: Writing and Action**
Many colleges afford students an experience of independence from home but also of apparent insulation from social and material pressures they will later have to confront directly, and for which they come to college to prepare. But whatever this insulation, students constitute a significant political and cultural bloc, especially in Boston. Interludes of quietism and conformity notwithstanding, student behavior remains a form of action. Students in this course will take on projects relevant to their own current historical situation and to a broader community. As in journalism, history, and biography, their research will be based on primary sources—interviews, official documents, firsthand accounts—while their writing will appropriate techniques of fiction to endow the presentation of factual material with the ambiguity and expansiveness of art.  
Prerequisite: Fulfillment of the First-Year Writing requirement.  
Cross-Listed as: WRIT 225-01-S  
Distribution: LL  
Term(s): Spring  
Mandatory credit/noncredit.

**ENG 210 - History of the English Language (1.0)**
In 1774, an anonymous author wrote of the perfection, the beauty, the grandeur & sublimity to which Americans would advance the English language. In this course, we will explore the complex history that allows us to conclude that American English is not perfect and is but one English among many. We will study Old English, later medieval English, the early modern English of Shakespeare’s day, and the varying Englishes of the modern British isles as well as those of modern America. We will read linguistic and literary histories along with literary passages from multiple times and places. We will ask, how does the history of the language affect our views of the world and our selves? And how are we continually shaping English’s future?  
Instructor: Whittaker  
Prerequisite: None  
Distribution: LL  
Term(s): Spring

**ENG 213 - Chaucer: Community, Dissent, and Difference in the Late Middle Ages (1.0)**
What happens to the medieval Christian community when the unity of the Church breaks down? How does a narrative position its author and its characters within contemporary political controversy? Which characters are inside the traditional bounds of community? Which are outside? And how should we interpret the differences between them? In this course, we will examine these and other questions about medieval English literature and culture through the lens of Chaucer’s writing. The course focuses on Middle English language and poetics as well as medieval structures of community—political, cultural, religious, and economic. The course will give special attention to how differences and conflicts, including those born of physical disparities and religious heresies, are managed within communities and portrayed in literature.  
Instructor: Whittaker  
Prerequisite: None  
Distribution: LL  
Term(s): Spring

**ENG 220-01-F - Renaissance Literature (1.0)**
**Topic for 2014-15: Renaissance Literature and the History of Media**
The literary flowering of the English Renaissance was made possible by technology. The arrival of the printing press in England in the 1490s enabled a much wider circulation of literary texts, encouraging writers to influence each other and feeding the tastes of an expanding reading public. At the same time, older manuscript technologies persisted and cross-pollinated with new cultures of print. This course will examine central texts of Renaissance literature, including works by Wyatt, Surrey, Spenser, Sidney, Marlowe, Shakespeare, and Milton, investigating how their texts were produced and shaped by the media technologies of their times. The course will use Wellesley’s Special Collections and Book Arts Lab to offer students hands-on experience with Renaissance books and production methods such as papermaking and letterpress printing.  
Instructor: Wall-Randell  
Prerequisite: None
The formative period of Shakespeare’s genius: comedies such as _A Midsummer Night’s Dream_ and _The Merchant of Venice_; histories such as _Richard II_ and _Henry IV_ (Part I); and tragedies such as _Julius Caesar_ and _Hamlet_. We will undertake detailed study of Shakespeare’s poetic language and will examine the dramatic form of the plays and the performance practices of Shakespeare’s time. We will also explore important themes, ranging from gender relations and identities to national self-consciousness. The viewing and analysis of contemporary performances and films will be integrated into the work of the course.

**Instructor:** Peltason  
**Prerequisite:** ENG 120 or permission of the instructor.  
**Distribution:** LL; ARS  
**Term(s):** Fall

**ENG 224 - Shakespeare Part II: The Jacobean Period (1.0)**

The great tragedies and the redemptive romances from the second half of Shakespeare’s career, which include _Trovilus and Cressida_, _Measure for Measure_, _Othello_, _King Lear_, _Coriolanus_, _Antony and Cleopatra_, _Cymbeline_, _The Winter’s Tale_, and _The Tempest_. While encompassing thematic concerns ranging from gender relations to the meaning of heroism, particular focus will fall on tragic form and its transformation in the romances. Extensive attention will be paid to theatrical practices, Shakespearean and contemporary, aided by the viewing of stage performances and film adaptations.

**Instructor:** K1  
**Prerequisite:** ENG 120 or permission of the instructor.  
**Distribution:** LL; ARS  
**Term(s):** Spring

**ENG 225 - Seventeenth-Century Literature (1.0)**

Seventeenth-century literature is nothing if not passionate: its poems, plays, and prose brim with rapturous sentiment, ecstatic religious devotion (often both at once), murderous rage, and dizzying intellectual experimentation. This period was one of great political and cultural change, in which England tried out a new form of government and philosophers offered new ways of investigating the world. Among other texts, we’ll read the indelible “Metaphysical” poetry of Donne, Herbert, Marvell, and Vaughan; the satiric, gender-bending urban comedies of Jonson, Middleton, and Dekker; the revenge tragedies of Webster, whose female characters are the greatest in Renaissance drama after Shakespeare’s; and the poetry and fiction of pioneering women poets and fiction-makers such as Lanier, Wroth, Philips, Behn, Cavendish, and Bradstreet.

**Prerequisite:** None  
**Distribution:** LL  
**Term(s):** Not Offered

**ENG 227 - Milton (1.0)**

Milton helped set the standard of literary power for generations of writers after him. His epic _Paradise Lost_ exemplifies poetic inspiration, sublimity, creativity, originality, and unconventionality, offering a richness of meaning and emotion that seems to provoke uniquely incompatible interpretations, even radical uncertainty about whether his work is good or bad. This course will focus on how this poem challenges and expands our views of God, evil, heroism, Hell, good, Heaven, pain, bliss, sex, sin, and failure in startling ways. We will consider Milton as the prototype of a new kind of poet who pushes meaning to its limits, from his early writings, to _Paradise Lost_, to _Paradise Regain’d_ at his career’s end, and sample the range of critical responses his poetry has elicited.

**Instructor:** Wall-Randell  
**Prerequisite:** None  
**Distribution:** LL  
**Term(s):** Fall

**ENG 234 - Restoration and Eighteenth-Century British Literature (1.0)**

This course will explore the richness of Restoration and eighteenth-century British literature by focusing on three related areas: its use of humor, sometimes genteel and subtle, sometimes crude, obscene, and outrageous; to define and police the limits of society; the new opportunities it afforded women to participate in public culture as readers and writers; and its rendering of encounters between Britons and the wider world brought about by the nation’s engagement in slavery and other types of commerce, overseas exploration, and empire. The authors we will read include Alexander Pope, Jonathan Swift, Aphra Behn, John Wilmot, Earl of Rochester, Samuel Johnson, Lady Mary Wortley Montagu, and Olaudah Equiano.

**Prerequisite:** None  
**Distribution:** LL  
**Term(s):** Not Offered

**ENG 249 - Writing Medieval Gender in England (1.0)**

This course will mine the earliest beginnings of English literary history for new answers about how gender constructions have been and can be fluid, rigid, oppressive, or liberating. We’ll find that though nearly all early English scribes identified as male (if they identified themselves at all), we can still perceive the voices, bodies, and experiences of authors and subjects who identified as women, men, girls, boys, or none of these, or who moved from one gender identity to others, or who remained somewhere in between. We’ll supplement our Old and Middle English readings (most of them in translation) with short, accessible samples from modern theoretical writing on gender, sexuality, and queerness.

**Prerequisite:** None  
**Cross-Listed as:** ME/R 249  
**Distribution:** LL  
**Term(s):** Not Offered

**ENG 251 - Modern Poetry (1.0)**

The modernist revolution at the beginning of the twentieth century is one of the most important revolutions in the history of English—writers radically rethought what a poem is, what a novel is, what writing itself is. We are still the heirs of the great innovators who emerged during that time: Yeats, Eliot, Pound, Frost, Moore, Stevens, Williams, Hughes. In this course we will look at what connects their work and the profound divisions among them.

**Instructor:** Bidart  
**Prerequisite:** None  
**Distribution:** LL  
**Term(s):** Spring  
**Mandatory credit/noncredit.**

**ENG 253-01 F - Contemporary American Poetry (1.0)**

A survey of the great poets and poems of the last 50 years, a period when serious poetry has often had to remind us it even exists. Our poets articulate the inside story of what being an American person feels like in an age of mounting visual spectacle, and in an environment where identities are suddenly, often thrillingly, sometimes distressingly, in question. Poets include: Robert Lowell, Elizabeth Bishop, the poets of “The New York School” (John Ashbery, Frank O’Hara, Barbara Guest, James Schuyler), Allen Ginsberg, Sylvia Plath, A.R. Ammons, Louise Glück, Robert Pinsky, Anne Carson, Susan Howe, Frank Bidart, Jorie Graham, D.A. Powell, Terrance Hayes, Tracy K. Smith, and others.

**Instructor:** Chiasson  
**Prerequisite:** None  
**Distribution:** LL
ENG 266-01-S - American Literature from the Civil War to the 1930s (1.0)

This course will focus on important Americans novels from the late nineteenth century to the mid-twentieth century, and the attempts (sometimes successful, sometimes not, but always interesting) to turn them into movies, translating them from the page to the screen. Authors to be studied will include Stephen Crane, Theodore Dreiser, Kate Chopin, Henry James, Willa Cather, Ernest Hemingway, F. Scott Fitzgerald, and Edith Wharton. For comparison and contrast, we may also consider a play (e.g., Eugene O'Neill) and an autobiography (e.g., Malcolm X); the texts and the film adaptations. Perhaps the converse movement of Alfred Hitchcock to Hollywood by British writers like Evelyn Waugh, Christopher Isherwood, Aldous Huxley, Graham Greene, W.H. Auden, and—though without their intent—Shakespeare and Austen.

Instructor: Tyler
Prerequisite: None
Distribution: LL
Term(s): Fall
Cross-Listed as: AMST 268

ENG 274 - British Cinema and English Literature in the Hollywood Century (1.0)

Our primary study will be British movies, in their self-defining struggle against three American competitors: (1) Hollywood, with its huge resources of money and talent, seemingly not bound by restrictions of class, ethnicity, or academy; (2) the greatness of England's own narrative "high art," which may have begun as merely "popular" forms but by the advent of film had become safely enshrined as great; and (3) theatre itself, film's closest and most jealous grand relative—still the prime source of trained actors, and for decades unsharing of its resources with the upstart medium of film. Challenges such as these get their meanings through anecdote, like the transmutation of Brooklyn's Stanley Kubrick into an English director; the converse movement of Alfred Hitchcock to Hollywood; and the often self-parodied "use" of Hollywood by British writers like Evelyn Waugh, Christopher Isherwood, Aldous Huxley, Graham Greene, W.H. Auden, and—though without their intent—Shakespeare and Austen.

Instructor: Tyler
Prerequisite: None
Distribution: LS
Term(s): Fall
Cross-Listed as: CAMS 274

ENG 228 - American Drama and Musical Theater (1.0)

Study of some distinguished twentieth-century American plays, theatre pieces, and musicals. Possible musicals: The Cradle Will Rock, Showboat, West Side Story, A Chorus Line, Into the Woods, Chicago. Possible playwrights and ensembles: Eugene O'Neill, Arthur Miller, Tennessee Williams, Lorraine Hansberry, the Bread and Puppet Theatre, the Teatro Campesino, Maria Irene Fornés, August Wilson, David Henry Huang, Tony Kushner, Anna Deavere Smith. Focus on close reading, on historical and social context, on realism and the alternatives to realism, on the relations between text and performance. Opportunities both for performance and for critical writing.

Prerequisite: None
ENG 282 - Topics in Literary Criticism (1.0)
An introduction to critical theory through the reading of selected literary texts and the application of pertinent theoretical models.
Prerequisite: None
Distribution: LL
Term(s): Not Offered

ENG 283-01-S - Southern Literature (1.0)
A study of the literature of the American South, with special focus on the region's unique cultural traditions, the development of a distinctive body of stylistic and thematic characteristics, and the complex intersections of region, gender, ethnicity, and sexuality in Southern literary expression.

Topic for 2014-15: New Orleans In and Against America
Anchoring the course will be literature haunted by New Orleans, including novels (part of Faulkner's Absalom, Absalom!, Don DeLillo's Libra, Walker Percy's The Moviegoer, J.K. Toole's A Confederacy of Dunces) and other readings (the autobiography of Louis Armstrong, and shorter pieces by Welty, Hurston and others). Besides the literary works, we will study: the music of Jelly Roll Morton, Louis Armstrong and many other artists; cooking with hands-on experience to see how European recipes were transmuted by the city's African-American cooks; architecture and other visual arts; the Nineties zeitgeist was self-conscious about the traditions, the development of a distinctive body of stylistic and thematic characteristics, and the complex intersections of region, gender, ethnicity, and sexuality in Southern literary expression.

Topic for 2014-15: New Orleans In and Against America
Anchoring the course will be literature haunted by New Orleans, including novels (part of Faulkner's Absalom, Absalom!, Don DeLillo's Libra, Walker Percy's The Moviegoer, J.K. Toole's A Confederacy of Dunces) and other readings (the autobiography of Louis Armstrong, and shorter pieces by Welty, Hurston and others). ENG 324-01-F - Advanced Studies in Shakespeare (1.0)
Topic for 2014-15: Shakespeare in Performance Around the Globe
The globalization of Shakespeare has only accelerated in the past quarter century, generating a trove of new stage productions, films and adaptations that continue to re-imagine, challenge and revitalize Shakespeare. This course will explore some of the more striking examples, in both English and other languages, from a Korean stage version of A Midsummer Night’s Dream and a Chinese film adaptation of Hamlet (The Banquet) to Spanish and Indian retellings of Othello. In the process, we will also investigate what concepts like authenticity, translation, and adaptation mean in an intercultural context. The reading list will be finalized at a later date so that local productions can be considered, but will most likely include: A Midsummer Night’s Dream, Hamlet, Othello, Macbeth and King Lear.
Instructor: Ko
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students. Not open to students who took this course in Spring 2012.
Distribution: LL; ARS
Term(s): Fall

ENG 325 - Advanced Studies in Sixteenth- and Seventeenth-Century Literature (1.0)
Distribution: LL
Term(s): Not Offered

ENG 335 - Advanced Studies in Restoration and Eighteenth-Century Literature (1.0)
Distribution: LL
Term(s): Not Offered

ENG 345 - Advanced Studies in Nineteenth-Century Literature (1.0)
Distribution: LL
Term(s): Not Offered

ENG 349 - Research Seminar in English (1.0)
Distribution: LL
Term(s): Not Offered

ENG 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

ENG 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

ENG 351-01-F - The Robert Garis Seminar (0.5)
An advanced, intensive writing workshop, open to six students, named for a late Wellesley professor who valued good writing. The instructor and students will meet once in the spring, and students are then expected to work on their projects over the summer.

ENG 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ENG 363-01-S - Advanced Studies in American Literature (1.0)
Topic for 2014-15: War Resistance and American Literature
A study of how war resistance, or the antiwar impulse, has been represented and thought about in American sacred texts, fictions, plays, poems, films, songs, operas, letters, treatises, memoirs, and essays.
Opportunity for both creative and critical work.
Instructor: Rosenwald
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be at the 200 level, or by permission of the instructor to other qualified students.
Cross-Listed as: AMST 363-01-S and PEAC 363
Distribution: LL; HS
Term(s): Spring
ENG 382 - Literary Theory (1.0)  
A survey of major developments in literary theory and criticism. Discussion will focus on important perspectives—including structuralism, poststructuralism, Marxism, and feminism—and crucial individual theorists—including Bakhtin, Empson, Barthes, Derrida, Foucault, Jameson, Sedgwick, and Zizek.  
Instructor: Lee  
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students.  
Distribution: LL; EC  
Term(s): Spring

ENG 383-01-F - Women in Literature, Culture, and Society (1.0)  
Topic for 2014-15: Nineteenth-Century Novels of Romantic Mistake  
"Reader, I married him," Jane Eyre tells us as her novel draws to a close. Many nineteenth-century novels end with a marriage. So despite suggestions within the body of the novel that women's traditional role is not a satisfying one, the heroine often seems content in that role by the novel's end. But what happens if the heroine chooses wrongly? In this course, we will consider novels that look at a heroine's life after a marriage that she comes to regret, as well as some novels in which the bad romantic choices do not result in marriage. What do these novels of romantic mistake have to say about women's lives? Probable authors: Anne Brontë, Charlotte Brontë, James, Austen, Elliot. Special attention will be given to the process of researching and writing a long seminar paper.  
Instructor: Meyer  
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students.  
Distribution: LL  
Term(s): Fall

ENG 384-01-F - Colonial and Postcolonial Literature (1.0)  
Topic for 2014-15: Literature, Mass Media, and Human Rights: The Image of Africa in the West (1898 to the present)  
How did the myth of Africa as "the dark continent" originate and does it persist today? Do contemporary images of Africa's humanitarian crises, including genocide, reconfigure earlier stereotypes of African "darkness"? What narrative choices have been involved in presenting Africa/Africans as Other? This course examines the relationship between ethnic difference and moral indifference within a literary and cultural framework. We will analyze tropes of helplessness and persecution, assumptions about the recipients as well as the givers of "aid" and consider questions about audience. Possible writers include: Conrad, Orwell, Achebe, Coetzee, Gordimer, Sontag, Gourévitch. Possible films include: The African Queen, The Battle of Algiers, Camp de Thiaroye. Media theory and the visual arts will be important supplements.  
Instructor: Cezair-Thompson  
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students.  
Distribution: LL; ARS  
Term(s): Fall

ENG 385-01-F - Advanced Studies in a Genre (1.0)  
Robert Lowell once said, "I don't know the value of what I've done, but I know that I changed the game." How did the development of each poet, and the complex friendship between them, contribute to how both Bishop and Lowell "changed the game"? We will look, in other words, at the connection between genre, poetic development, and biography.  
Instructor: Bidart  
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students. Not open to students who have taken this course as a topic of ENG 355.  
Distribution: LL  
Term(s): Fall

ENG 385-01-S - Advanced Studies in a Genre (1.0)  
Topic for 2014-15: Film Noir  
A journey through the dark aside of American imagination. Where classic Hollywood film making trades in uplift and happy endings, Film Noir inhabits a pessimistic, morally ambiguous universe. This course will explore the development of this alternative vision of the American experience, from its origins around the time of the Second World War, through the revival of the genre in the early 1970s, to its ongoing influence in contemporary cinema. We'll pay particular attention to noir's redeinition of American cinematic style, and to its representations of masculinity and femininity. Films that may be studied include Howard Hawk's The Big Sleep, Billy Wilder's Double Indemnity, Robert Altman's The Long Goodbye, Roman Polanski's Chinatown, and David Lynch's Mulholland Drive.  
Instructor: Shetley  
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students.  
Cross-Listed as: AMST 385-01-S  
Distribution: LL  
Term(s): Spring

ENG 387-01-F - Authors (1.0)  
Topic for 2014-15: Ernest Hemingway, Life and Writings  
An intensive study of one of the major American writers of the twentieth century. The course will focus on the primary texts, but we will also give attention to the biographical, literary, and historical contexts that influenced Hemingway's writings.  
Instructor: Cain  
Prerequisite: Open to juniors and seniors who have taken two literature courses in the department, at least one of which must be 200 level, or by permission of the instructor to other qualified students.  
Distribution: LL  
Term(s): Spring
AN INTERDEPARTMENTAL MAJOR AND MINOR

Professor: DeSombre (Director)
Associate Professor: Turner
Assistant Professor: Griffith
Visiting Lecturer: Higgins

Advisory Faculty: Beanson (Geosciences), Brabant (Geosciences), Jones (Biological Sciences), Matthies (Philosophy), Moore (Biological Sciences), Paarlberg (Political Science), Rodenhouse (Biological Sciences), Sequeira (Biological Sciences), Thomas (Biological Sciences)

Affiliated Faculty: de Bres (Philosophy), Han (Political Science), Karakasidou (Anthropology), Mattila (Biological Sciences), Stark (Physics), Steady (Africana Studies)

Environmental Studies is a particular way of thinking, conducting research, and posing questions. We recognize that knowledge of societies, the environment, and the complex and multifaceted relationship they share, emerges from a wide range of disciplines, including the sciences, social sciences, and humanities. An Environmental Studies major or minor aims to provide students with critical skills that will allow them to engage current environmental issues and prepare to recognize future ones. Central to this goal is helping students develop independent critical thinking, problem framing, and problem solving skills across disciplines and cultures with which they can diagnose and prioritize a wide range of environmental issues, from the local to the international, from the most pressing to the most long-term. Because of the interdisciplinary nature of environmental issues, the program draws upon courses from multiple departments. Each student will choose electives in consultation with her advisor to help focus her studies on an issue or approach that interests her.

Environmental Studies Major

Goals for the Environmental Studies Major/Minor

The Environmental Studies program seeks to educate students to: Develop and compare potential solutions to environmental problems from local to global scales.

- Critically assess the relationships among the cultural, economic, ethical, scientific, and social dimensions of environmental issues.
- Integrate field-based, laboratory, and other forms of research used by scholars and practitioners.
- Build ability and confidence in communicating information to professional and public audiences.
- Create a cohesive and supportive interdepartmental community.

Requirements for the Environmental Studies Major

There are three components to the 10-course major:
1. Two introductory courses, which may be taken in any order:
   a. Science: ES 101
   b. Interdisciplinary: ES 102 or ES 103
2. One 200-level core course in each of these categories:
   a. Science: ES 201 or ES 220 or BISC 201
   b. Social Science: ES 214 or ES 228/ECON 228 (which requires ECON 101 as a prerequisite)
   c. Humanities: ES 203 or ES 299 or PHIL 233
3. Four electives from Environmental Studies courses and the list of Courses for Credit Toward the Major, at least two of which must be at the 300 level. (Students are encouraged to take more than four electives.)
4. One capstone course: ES 300 or ES 399

Note that ES 102, ES 103, ES 201, ES 203, ES 214, ES 220, ES 299, ES 399, BISC 201, ES 228/ECON 228, and PHIL 233 can be taken as electives (but no single course can fulfill two requirements for the major).

By special arrangement with the Ecosystems Center of the Marine Biological Laboratory and the Marine Studies Consortium, Wellesley College students in good standing may apply for courses in these off-campus programs. The number of participants in each program is limited. (See Special Academic Programs.) Students should also consider courses at MIT and Olin College. Courses at MIT and Olin, as well as EXTD courses, count as Wellesley courses rather than as courses taken off campus, for the purposes of the Environmental Studies major, but specific courses must be approved by the student’s advisor to count toward the major. For courses offered during the Semester in Environmental Studies, Ecosystems Center of the Marine Biological Laboratory, Woods Hole, Massachusetts, see www.mbl.edu/SES.

Sustainability Certificate Program in Environmental Studies

The Three College Sustainability Certificate Program is available to undergraduate students enrolled at Wellesley, Olin, and Babson Colleges, who will take it alongside the degree programs they are following on their respective campuses. See Sustainability Certificate Program in the Wellesley Course Catalog for details.

Courses for Credit Toward the Environmental Studies Major

The following courses may be used as electives. Courses not listed may be accepted by petition. (Note that some 200- and 300-level courses have prerequisites outside of required Environmental Studies courses.)

Environmental Justice, "Race," and Sustainable Development
Planetary Climates
Environmental Horticulture with Laboratory
Ecology with Laboratory
Evolution with Laboratory
Marine Biology with Laboratory
Tropical Ecology with Laboratory
Environmental Microbiology with Laboratory
Evolution and Conservation Genetics with Laboratory
Water Resources Planning and Management
Coastal Zone Management
Earth Processes and the Environment with Laboratory
The Dynamic Earth with Laboratory
Planetary Climates
Sedimentology and Stratigraphy with Laboratory
Environmental Geochemistry with Laboratory
Isotope Geochemistry
Environmental Ethics
Seminar: People, Agriculture, and the Environment
Environmental Studies Minor

Requirements for the Environmental Studies Minor

There are three components to the five-course minor:

1. One introductory course: ES 101, ES 102, or ES 103.

2. One 200-level core course in two of these three categories (two courses total):
   a. Science: ES 201 or ES 220 or BISC 201
   b. Social Science: ES 214 or ES 228/ECON 228 (which requires ECON 101 as a prerequisite)
   c. Humanities: ES 203 or ES 299 or PHIL 233

3. Two electives from ES courses or Courses for Credit Toward the Major. (Introductory, core, and capstone courses may also count as electives, but no single course can fulfill two requirements for the major.) A student may petition to count a course not listed in the Courses for Credit Toward the Major list. Students should contact the Director for approval, and the Director will use her/his discretion in seeking guidance from the ES Advisory Faculty.

Students may count no more than one course taken away from Wellesley toward the environmental studies minor. This course should be approved by the director prior to enrollment.

ES - Environmental Studies Courses

ES 101 - Fundamentals of Environmental Science with Laboratory (1.25)

How can we understand environmental problems if we don’t understand the environment? In this course, we will approach environmental issues as scientific investigators: What do we need to know in order to understand ozone depletion? Mercury pollution? Ocean acidification? Habitat degradation? These are complex issues that are distinct in many ways, but which often share fundamental concepts that draw from many scientific disciplines. By examining the science behind these problems, we will develop the skills required to address them and develop strategies that will help us address our relationship to the environment. ES 101, ES 102, and ES 103 may be taken in any order.

Instructor: Griffith (FA), Thomas (FA) (Biological Sciences), Higgins (SP)
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Open to first-years and sophomores; juniors and seniors may only enroll with permission of the instructor.
Distribution: NPS; LAB
Term(s): Fall; Spring

ES 102 - Environment and Society: Addressing Climate Change (1.0)

This course offers an interdisciplinary introduction to Environmental Studies, with a focus on climate change. Major concepts that will be examined include: the state of scientific research, the role of science, politics, and economics in environmental decision-making, and the importance of history, ethics, and justice in approaching climate change. The central aim of the course is to help students develop the interdisciplinary research skills necessary to pose questions, investigate problems, and develop strategies that will help us address our relationship to the environment. ES 101, ES 102, and ES 103 may be taken in any order.

Instructor: Higgins (FA), Turner (SP)
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: SBA
Term(s): Fall; Spring

ES 103 - First-Year Seminar: Environment and Society: Food, Agriculture, and Sustainability (1.0)

Where does our food come from? Is the way we grow, distribute, and consume it sustainable? What is the difference between organic and conventional agriculture? Are genetically modified, ethically defensible? How does our assessment change if we consider agriculture in a developing country in Africa? To answer these questions, students will take an interdisciplinary approach to environmental studies that draws on economics, politics, history, ethics, and the sciences. Students will actively investigate these questions through activities such as hands-on research on a long-term agricultural research plot on campus, field trips to investigate practices at nearby farms, and policy-relevant debates in class. This course fulfills the 100-level interdisciplinary course requirement for the Environmental Studies major; it does not fulfill any college-wide distribution requirements.

Instructor: Turner
Prerequisite: None. Open to first-year students only.
Distribution: None
Term(s): Fall

ES 201 - Environmental, Health, and Sustainability Sciences with Laboratory (1.25)

Problems in environmental, health, and sustainability sciences are inherently transdisciplinary and require a diverse skill set to frame, analyze, and solve. This course will focus on developing a toolbox of skills including systems level thinking, field and analytical methods, biogeochemical analysis (natural waters, soils, and other environmental materials), and modeling with a goal of building a science-based foundation for the analysis of complex issues at the interface between humans and the environment. Students will conduct semester-long research projects and will present their results in a final poster session.

Instructor: Brahander (Geosciences)
Prerequisite: Any 100-level GEOS course (except GEOS 111), ES 101, SUST 201, or permission of the instructor.
Cross-Listed as: GEOS 201
Distribution: NPS
Term(s): Fall

ES 203 - Cultures of Environmentalism (1.0)

What is environmentalism? This course explores how different communities of people have answered that question in the United States and abroad. It focuses on the mainstream environmental movement and other formulations of environmentalism, such as environmental justice, deep ecology, animal rights, and indigenous peoples’ concerns for the environment. This course takes an interdisciplinary approach to examining the role of culture in shaping how people have valued the environment and organized to protect it. What role do the arts, popular culture, and literature play in environmental activism? What are the ethical and philosophical foundations of modern environmental movements? How is environmental activism historically specific and shaped by particular constructions of race, gender, religion, and nature?

The goal of this course is to consider how environmental activism and decision-making can and must be sensitive to cultural context. Students are required to undertake a 15-20 hour service-learning project with a Boston-area environmental group.

Instructor: Turner
Prerequisite: ES 101 or ES 102 or ES 103, or permission of the instructor.
Distribution: REP
Term(s): Spring

ES 209 - Agroecology. The Science of Sustainable Food Systems with Laboratory (1.25)

Agricultural production is embedded within, and interacts with, ecological, economic and social systems. How do we know what impact food production has on the ecosystem, farmers, consumers, and others? Agroecology is a field that applies ecological principles to agricultural systems, explores social implications of food systems, and seeks solutions to food production and distribution through quantitative and qualitative analysis. The objectives of this course are to understand the fundamentals of agroecology, learn research design techniques to test questions related to these fundamentals, and understand analytical tools that reflect a whole-systems approach to evaluating the food system. We will pair lectures and discussions in the classroom with research on local farms, including farmer interviews, farm mapping and analysis of ecological factors on the farm.

Instructor: Goodall
Prerequisite: BISC 108 or ES 103 or equivalent
Distribution: None; LAB
Term(s): Summer I

ES 210 - Hydrogeology: Water and Pollutants with Laboratory (1.25)

Clean water supply is a high priority for both developed and underdeveloped communities worldwide. Limits to supply and their implications for an increasing population make a clear understanding essential for citizens. Water sources and movement of water from the atmosphere through the earth’s surface and subsurface will be examined. Laboratory work will include field and laboratory analyses of physical and chemical properties and pollutant issues of local community supplies including the Wellesley campus, and Towns of Wellesley, Natick, and Norwell.

Instructor: Besançon (Geosciences)
Prerequisite: Any 100-level GEOS course (except 111), or permission of the instructor.
Cross-Listed as: GEOS 210
Distribution: NPS; MM
Term(s): Fall

ES 212 - Lake Baikal: The Soul of Siberia (1.25)

Normally offered in alternate years.

ES 219 - Labor Studies with Laboratory (1.25)

Normally offered in alternate years.

ES 220 - Fieldwork in East Siberia (1.25)

Normally offered in alternate years.

ES 221 - Fieldwork in Europe (1.25)

Normally offered in alternate years.

ES 222 - Fieldwork in Central Asia (1.25)

Normally offered in alternate years.

ES 223 - Fieldwork in Latin America (1.25)

Normally offered in alternate years.

ES 224 - Fieldwork in the Caribbean (1.25)

Normally offered in alternate years.

ES 225 - Fieldwork in Africa (1.25)

Normally offered in alternate years.

ES 226 - Fieldwork in Australia (1.25)

Normally offered in alternate years.

ES 227 - Fieldwork in Asia (1.25)

Normally offered in alternate years.

ES 228 - Fieldwork in Australia (1.25)

Normally offered in alternate years.
with the lake’s stakeholders, and tours of ecological and cultural sites surrounding the lake. Instructor: Hodge (Russian), Moore (Biological Sciences) Prerequisite: or corequisites: ES 101 or BISC 111; RUSS 101, and permission of the instructor. Preference will be given to students who have also taken HIST 211. Application required. Cross-Listed as: RAST 212 Distribution: LL; NPS Term(s): Not Offered Not offered every year. Subject to Provost’s Office approval.

ES 214 - Social Causes and Consequences of Environmental Problems (1.0)
This course focuses on the social science explanations for why environmental problems are created, the impacts they have, the difficulties of addressing them, and the regulatory and other actions that succeed in mitigating them. Topics include: externalities and the politics of unpriced costs and benefits; collective action problems and interest-group theory; time horizons in decision-making; the politics of science, risk, and uncertainty; comparative political structures; and cooperation theory. Also addressed are different strategies for changing environmental behavior, including command and control measures, taxes, fees, and other market instruments, and voluntary approaches. These will all be examined across multiple countries and levels of governance.
Instructor: DeSombre Prerequisite: ES 102 or ES 103, or one course in political science, or permission of the instructor. Cross-Listed as: POL2 214 Distribution: SBA Term(s): Fall

ES 220 - Environmental Limits and Conservation with Laboratory (1.25)
The growing use of global resources challenges our ability to conserve resources themselves, as well as species, ecosystems, and environmental quality. This brings up fundamental questions regarding limits to the sustainability of human and natural systems. This course investigates these far-reaching concepts by examining topics such as fundamentals and implications of thermodynamics, energy and material flow through human and natural systems, conservation of resources and biodiversity, and natural resource management. We will also explore the role of science and technology in surmounting previous limits (e.g. energy consumption and agricultural yields), as well as the implications of inherent limits that may never be broken. Laboratory work will focus on quantitative skills and tools used to assess the sustainability of different systems.
Instructor: Griffith Prerequisite: One of the following: ES 101, GEOS 101, GEOS 102, BISC 108, or permission of the instructor. Distribution: NPS; MM Term(s): Spring

ES 226 - Archaeology of Environmental Change (1.0)
Modern concerns about climate change and human impacts on the environment are the most recent in a long history of human – environmental interactions. Closer attention to long-term human-environmental interactions shows we have a constant history of impacting environments—both subtle and profoundly—throughout the world. This class will examine such interactions from a long-term perspective spanning the past 10,000 years. Through case studies in Environmental Archaeology, we will examine notions of“pristine wildnesses,” how past cultural adaptations have created sustainable environments or caused environmental deterioration, and we will scrutinize environmentally driven models of societal change. With this focus on anthropogenic environments, we will look critically at models that externalize humans as ecological forces. We will also explore selected multidisciplinary approaches to reconstructing past human-environmental dynamics.
Instructor: Vining (Anthropology) Prerequisite: None Prior course work in anthropology (sociocultural, archaeology, or bioarchaeology), environmental studies, earth sciences, or related discipline preferred. Cross-Listed as: ANTH 226 Distribution: SBA Term(s): Spring

ES 228 - Environmental and Resource Economics (1.0)
This course considers the economic aspects of resource and environmental issues. After examining the concepts of externalities, public goods, and common property resources, we will discuss how to measure the cost and benefits of environmental policy in order to estimate the socially optimal level of the environmental good. Applications of these tools will be made to air and water pollution, renewable and nonrenewable resources, and global climate. In addressing each of these problems we will compare various public policy responses such as regulation, marketable permits, and tax incentives.
Instructor: Keskin (Economics) Prerequisite: ECON 101 Cross-Listed as: ECON 228 Distribution: SBA Term(s): Fall

ES 229 - Latin America: Topics in Food Systems and the Environment (1.0)
From an ecological perspective, Latin America is a vast region composed of numerous biomes: tropical forests, savannas, deserts, mountains, and temperate forests and grasslands. Culturally, this region is home to diverse human communities including 600 indigenous groups. Economically, many countries in Latin America depend upon the export of natural resources and agricultural products. Growing populations, increased global trade, and a complicated history of colonization put pressure on all of these areas, creating a fascinating and important backdrop for exploring issues in food systems and the environment. Topics will be guided by student interest, but may include food justice, agroecology, water rights, biodiversity conservation, biopiracy, transnational agreements, farmer networks and social movements.
Instructor: Goodal Prerequisite: ES 101, ES 102 or ES 103 Distribution: None Term(s): Fall

ES 247 - Plant Diversity and Ecology with Laboratory (1.25)
This course is a combination of “What’s that wildflower?” and “Why does it grow over there and not here?” We begin by examining large-scale patterns of plant diversity from an evolutionary and phylogenetic perspective and then shift to an ecological perspective. Along the way, we zoom in to specific concepts and processes that help us understand overall patterns. Laboratories will primarily be taught in the field and greenhouses and will include plant identification, observational and experimental studies, and long-term study of forest communities at the Wellesley campus. Laboratories will also include aspects of experimental design and data analysis. The goal of the course is not only to train students in botany and plant ecology, but to engage them in the world of plants every time they step outside.
Instructor: Griffith Prerequisite: ES 101 or BISC 108 or BISC 111 or BISC 113 or permission of instructor Cross-Listed as: BISC 247 Distribution: NPS Term(s): Fall Not open to students who have completed ES 217/BISC 217.

ES 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall; Spring

ES 250GH - Environmental Studies Reading Group (0.5)
The Environmental Studies program runs a weekly reading group on changing topics. Readings will be chosen based on the interests of the participating students and faculty members. Students who enroll commit to coming to each week’s discussion, preparing a set of responses to the week’s reading, and, in collaboration with other group members, selecting some of the weekly topics and readings.
Instructor: Staff Prerequisite: Permission of the instructor, normally limited to students who have taken two courses in environmental studies Distribution: None Term(s): Fall Mandatory credit/noncredit.

ES 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor. Distribution: None Term(s): Fall; Spring

ES 289 - Environmental Mapping and Analysis (1.25)
Today’s maps are much more than a means to get from here to there—they are rich with information and have become vital tools for addressing some of the world’s most pressing environmental problems. Modern spatial analysis and mapping methods, including Geographic Information Systems (GIS), have opened up new ways to discover, interpret, and predict complex spatial patterns and systems. This course offers students hands-on experience with state-of-the-art spatial tools, statistical analyses, and data visualization in order to study multidisciplinary topics such as environmental justice, natural resource management/economics, environmental pollution, and biodiversity conservation. The combined lecture/lab format of the course in addition to its two instructors provides a thorough immersion into an evolving and exciting field.
Instructor: Griffith, Ferwerda (Research and Instructional Support) Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement and ES 101, ES 102, or ES 103, or permission of the instructor. Distribution: QRF Term(s): Not Offered

ES 299 - U.S. Environmental History (1.0)
This course examines the relationship between nature and society in American history. The course will consider topics such as the decimation of the bison, the rise of Chicago, the history of natural disasters, and the environmental consequences of war. There are three goals for this course: First, we will examine how humans have interacted with nature over time and how nature, in turn, has shaped
ES 300 - Environmental Decision-making (1.0)

An interdisciplinary seminar in which students work together in small groups to understand and develop solutions for current environmental problems. Each year, we focus on a given environmental issue of concern to our community, e.g., environmental implications of building design, energy use, or water quality. In particular, we work to understand its scientific background, the political processes that lead to potential solutions, and the ethical and environmental justice implications. Student-led research provides the bulk of the information about the issue and its role in our local environment; lectures and readings provide supplementary information about the local situation and the global context.

Instructor: DeSombre
Prerequisite: A declared major or minor in environmental studies, ES 101 or ES 102 or ES 103, and completion of the core distribution requirements, or permission of the instructor. This course is only open to juniors and seniors.
Distribution: None
Term(s): Spring

ES 307-01-S - Advanced Topics in Ecology with Laboratory (1.25)

Freshwater ecosystems support a myriad of fascinating biota, many with links to the terrestrial realm, and are essential sustainers of human societies. Increasingly, freshwaters are threatened with multi-source pollution, and diversion to industry and agriculture. What is the fate of freshwater resources as the human population surges toward 9 billion or more by 2050? How will humanity cope with impending water shortages as climate change proceeds? And, what of the freshwater biota? Through discussions of the primary literature and student research presentations, we will explore the effects on freshwater ecosystems of climate change, pollutants, invasive species, and water use policy, as well as the societal implications of such challenges. From a local ecological perspective, we’ll sample several New England freshwater ecosystems to study their current species richness and temporal dynamics, as a baseline for future change.

Instructor: Hughes
Prerequisite: Two courses in Biological Sciences at the 200-level or above, at least one of which is from the community biology group; or permission of the instructor.
Cross-Listed as: BISC 307-01-S
Distribution: NPS
Term(s): Spring

ES 312 - Seminar. Environmental Policy (1.0)

Focuses both on how to make and how to study environmental policy. Examines issues essential in understanding how environmental policy works and explores these topics in depth through case studies of current environmental policy issues. Students will also undertake an original research project and work in groups on influencing or creating local environmental policy.

Prerequisite: ES 214 or one 200-level unit in political science and permission of the instructor. Enrollment is limited to juniors and seniors.
Cross-Listed as: POL2 312
Distribution: SBA
Term(s): Not Offered

ES 313 - Environmental Impact Assessment (1.0)

Our environment is constantly changing as a result of anthropogenic events; we can apply scientific principles and assessment tools to reduce the adverse impacts that our actions have on the environment. Environmental impact assessment is the systematic identification and evaluation of the potential impacts or effects of proposed projects, products, and decisions relative to the current state of the total environment. This course teaches the scientific fundamentals of environmental impact assessment, along with the related approaches of environmental risk assessment, life cycle assessment, and industrial ecology, that can help us make informed choices about how to minimize environmental harm and about alternatives. These tools will be applied to case studies in class, and a semester-long team project.

Instructor: Higgins
Prerequisite: One introductory ES course and one 200-level science course, or permission of the instructor.
Distribution: NPS
Term(s): Not Offered

ES 325 - International Environmental Law (1.0)

For international environmental problems, widespread international cooperation is both important and quite difficult. Under what conditions have states been able to cooperate to solve international environmental problems? Most international efforts to address environmental problems involve international law—how does such law function? What types of issues can international environmental law address and what types can it not? This course addresses aspects of international environmental politics as a whole, with particular attention to the international legal structures used to deal with these environmental problems. Each student will additionally become an expert on one international environmental treaty to be researched throughout the course.

Instructor: DeSomber
Prerequisite: ES 214/POL2 214 or POL3 221, or permission of the instructor.
Cross-Listed as: POL3 325
Distribution: SBA
Term(s): Spring

ES 327-01-S - Seminar. Topics in Biodiversity (1.0)

**Topic for 2014-15: Biology in Natural and Designed Ecosystems**

This course will examine biological communities along a gradient from natural ecosystems to the built environment. What can we learn by applying concepts from community ecology to human-dominated landscapes? How important is biodiversity in urban and suburban settings, and how is human health connected to the biological communities we inhabit? Students will discuss primary literature, explore and describe a range of biological communities on and around campus, and, as a final project, design small-scale ecosystems (ala gardens, indoors or out, terrestrial or aquatic).

Instructor: Jones (Biological Sciences)
Prerequisite: Two units in biological sciences at the 200 level or above, or permission of the instructor.
Cross-Listed as: BISC 327-01-S
Distribution: NPS
Term(s): Spring

ES 347 - Advanced Plant Diversity and Ecology with Laboratory (1.25)

This course meets along with ES 247/BISC 247 and offers an opportunity for students to engage more deeply with the material and perform independent research. Students will be expected to thoroughly review and reference peer-reviewed literature and assist in leading in-class discussions. Additionally, each student will develop and conduct an experiment (or observational study) over course of the semester that examines mechanisms of plant diversity and coexistence.

Instructor: Griffith
Prerequisite: BISC 201 or ES 220 or BISC 207 or permission of instructor.
Cross-Listed as: BISC 347
Distribution: NPS
Term(s): Fall
This course is not available to students that have already taken ES 247/BISC 247.

ES 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

ES 350H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

ES 360 - Senior Thesis Research (1.0)

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ES 370 - Senior Thesis (1.0)

Prerequisite: ES 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ES 381 - U.S. Environmental Politics (1.0)

This course examines the politics of environmental issues in the United States. The course has two primary goals: First, to introduce students to the institutions, stakeholders, and political processes important to debates over environmental policy at the federal level. Second, to develop and practice skills of analyzing and making decisions relevant to environmental politics and policy. Drawing on the literature of environmental politics and policy, this course will consider how environmental issues are framed in political discourse, various approaches to
environmental advocacy and reform, and the contested role of science in environmental politics. The course will be organized around environmental case studies, including endangered species conservation, public lands management, air and water pollution, and toxics regulation.

Instructor: Turner
Prerequisite: A 200-level ES course or POL1 200 or permission of the instructor.
Cross-Listed as: POL1 381
Distribution: SBA
Term(s): Fall

**ES 383 - The Science of Compliance: The Evolution of Technology to Meet the Goals of U.S. Environmental Policy (1.0)**

For more than 40 years U.S. environmental policies have been passed, amended, and enforced with the purpose of protecting human health and preserving the environment. This course will examine the evolution of technologies to meet the goals of major U.S. environmental policies including the Clean Air Act, the Safe Drinking Water Act, the Clean Water Act, and the Comprehensive Environmental Response, Compensation, and Liability Act and the role that available technologies play in setting the enforceable standards within policies. We will learn fundamental scientific principles of water treatment, wastewater treatment, and air pollution control technologies and examine how scientists and engineers employ these technologies to meet policy goals. Students will further examine the relationship between a recent or future environmental policy and technological evolution.

Instructor: Higgins
Prerequisite: ES 101 or ES 220 or permission of the instructor.
Distribution: NPS
Term(s): Fall
According to College legislation, the student-faculty Committee on Educational Research and Development has the authority to recommend experimental courses and programs to the Academic Council. Faculty members and students are invited to submit their ideas to the committee.

Experimental/Team-Taught Courses

Experimental Courses
In 2014-15, the following experimental courses will be offered:

ANTH 107/CHEM 107  First-Year Seminar: The Science and Culture of Blood
ARTH 266  New Perspectives on the Global City
ARTS 324  The Space In-Between: Filling the Gap Between 2D and 3D
CAMS 378/MUS 378  Deconstructive Audio: Early Electronic Music and the Aesthetics of Outmoded Technology
CHEM 107/ANTH 107  First-Year Seminar: The Science and Culture of Blood
ENG 287/MUS 287  Words, Music, Voices
ENG 290/GER 290  Imaginary Crimes, Imaginary Courts: Law in Literature
GER 290/ENG 290  Imaginary Crimes, Imaginary Courts: Law in Literature (In English)
MUS 287/ENG 287  Words, Music, and Voices
MUS 378/CAMS 378  Deconstructive Audio: Early Electronic Music and the Aesthetics of Outmoded Technology
SOC 307/WRIT 307  Learning by Giving: Nonprofit Organizations and American Cities in the Twenty-First Century
SPAN 246/THST 246  Performative Pathways to Language Fluency: Spanish Through the Lens of Theatre
SUST 220  Paradigms, Predictions, and Joules: A Historical and Scientific Approach to Energy and the Environment
THST 246/SPAN 246  Performative Pathways to Language Fluency: Spanish Through the Lens of Theatre
WGST 330  (Im)Morality on Stage: Repro-Eugenics in Twentieth-Century United States
WRIT 307/SOC 307  Learning by Giving: Nonprofit Organizations and American Cities in the Twenty-first Century
The following section includes courses of interest to students in various disciplines and courses offered within the Marine Studies Consortium.

**Engineering**

**Lecturer: Banzaert**

Students interested in engineering—from a broad nationalism and as a first step in exploring engineering more deeply—should consider ENGR 120 Making a Difference Through Engineering and ENGR 160 Fundamentals of Engineering. First-year students may enroll in ENGR 111 Product Creation for All, and students who have taken ENGR 120 are eligible for ENGR 125, an associated Wintersession course. Students may also consider possible subsequent engineering studies such as an engineering certificate from the Olin College of Engineering. Additional information about taking courses at Olin can be found online at crossregional.edu. Students also have opportunities to take courses at MIT via the Wellesley-MIT exchange program. Class Dean Jennifer Stephan and Amy Banzaert, lecturer in engineering, advise Wellesley students interested in engineering.

**Marine Studies Consortium Courses**

The Marine Studies Consortium offers courses focusing on a variety of aquatic topics. These courses are taught at neighboring institutions and are open to a limited number of Wellesley students by permission of the consortium representative, Marianne Moore, Department of Biological Sciences. The courses offered are EXTD 123, EXTD 128, EXTD 225, and EXTD 226.

**ENGR - Engineering Courses**

**ENGR 111 - First-Year Seminar: Product Creation for All (1.0)**

This hands-on first-year seminar will explore how products are created, including an exploration of ideation and brainstorming, reverse engineering, and the product development process. An emphasis will be placed on the role of human factors engineering, including usability successes and failures of specific products. Students will learn about these topics through two approaches: disassembly and study of existing products and creation of simple product prototypes for specific, local nonprofit organizations serving populations such as those with developmental or physical limitations. By the end of the semester, students will be able to comprehend and independently apply both the product development process and specific human factors engineering approaches used in the design of many everyday objects; they will also have developed their own creativity and better understand how to further develop and apply that skill.

Instructor: Banzaert

Prerequisite: Open to first-year students only.

Fulfillment of the basic skills component of the Quantitative Reasoning requirement.

Distribution: MM

Term(s): Spring

**ENGR 120 - Making a Difference through Engineering (1.0)**

A project-based exploration of the technical challenges facing undererved communities in developing countries and locally. Technologies are focused primarily at the household level, exploring the benefits and limitations of existing and proposed solutions. Students will learn and apply engineering design skills—including estimation, prototyping, and creativity—to address real problems facing community partners affiliated with the class. Methodologies for participatory development and co-creation will be considered and utilized as appropriate. The necessity for interdisciplinary work when generating solutions will be emphasized. Specific themes for the class will vary and may include energy, health, and transportation.

Instructor: Banzaert

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.

Distribution: MM

Term(s): Not Offered

Mandatory credit/noncredit

**ENGR 125 - Making a Difference through Engineering Fieldwork (0.5)**

Fieldwork experience over Wintersession for implementing and assessing projects developed in ENGR 120. Students will spend the majority of Wintersession in a developing country (e.g., Nicaragua or El Salvador), primarily living with community members. They will deliver projects developed in ENGR 120, assess these and previously delivered projects, and identify new projects. Development and practice of skills needed for engineering fieldwork: interview methods, cross-cultural observation, creative capacity building, rapid design iteration, device building with limited supplies, and co-creation.

Instructor: Banzaert

Prerequisite: ENGR 120 and by written application.

Distribution: None

Term(s): Not Offered

Not offered every year. Subject to Provost’s Office approval.

**ENGR 160 - Fundamentals of Engineering (1.0)**

Engineering is about combining ideas from mathematics, physics, computer science, and many other fields to design objects and systems that serve human needs. This project-based course introduces the big ideas of engineering and prepares students for taking additional engineering courses at Olin College or MIT. Topics include: the design and construction of mechanisms using rapid prototyping tools such as laser cutters, 3D printers, and computer-aided design software (SolidWorks); modeling and controlling physical systems using the MATLAB and Simulink programming environments; and feedback and control using digital electronics (microcontrollers).

Instructor: Banzaert

Prerequisite: PHYS 107 or the equivalent, or by permission of the instructor.

Distribution: NPS, MM

Term(s): Spring

**ENGR 250H - Research or Individual Study (0.5)**

Prerequisite: Permission of the instructor.

Distribution: None

Term(s): Fall, Spring

**EXTD - Extradepartmental Courses**

**EXTD 123 - Water Resources Planning and Management (1.0)**

A comprehensive introduction to the economics and ecology of water supply and water pollution control. Topics include watershed management, groundwater and wetlands protection, and wastewater treatment. The inherent difficulty in applying static laws and regulations to a dynamic natural resource such as water is a recurring theme. Offered by the Marine Studies Consortium.

Instructor: Staff

Prerequisite: Open to students by permission of the consortium representative, Marianne Moore, Department of Biological Sciences.

Distribution: None

Term(s): Fall

**EXTD 128 - Coastal Zone Management (1.0)**

This course presents a survey of the coastal environment and its physical characteristics, natural systems, economic uses, and development pressures. Lectures examine strategies formulated in the United States for land and water-resource management in the coastal zone. The roles of federal, state, and local governments, environmental groups, and resource users are also explored. Finally, by comparing coastal-zone management problems in the United States to those elsewhere in the world, students gain a global perspective. Offered by the Marine Studies Consortium.

Instructor: Staff

Prerequisite: Open to students by permission of the consortium representative, Marianne Moore, Department of Biological Sciences.

Distribution: None

Term(s): Spring

**EXTD 225 - Biology of Fishes (1.0)**

This upper-level survey course covers the evolution, systematics, anatomy, physiology, and behavior of freshwater, marine, and anadromous fishes from temperate to tropical environments. The course also examines the diversity of fish interactions in aquatic communities: predator/prey relationships, host/symbiont interactions, and the various roles of fishes as herbivores. Study of inter- and intra-specific predator-prey relationships among fish populations in aquatic communities integrates principles of ecology. Offered by the Marine Studies Consortium.

Instructor: Staff

Prerequisite: One year of general biology and two upper-level biology courses. Open to students by permission of the consortium representative, Marianne Moore, Department of Biological Sciences.

Distribution: None

Term(s): Spring

**EXTD 226 - Biology of Whales (1.0)**

This upper-level course examines the biology and conservation of cetaceans: whales, dolphins, and porpoises. Topics include physiology, population biology, life history analysis, molecular genetics, morphology, distributional ecology, and social behavior. Early lectures focus on the biology of cetaceans and how they are adapted to the marine environment. Subsequent lectures use case studies to review how biological principles can be applied to the conservation of a wide range of cetacean species. Offered by the Marine Studies Consortium.

Instructor: Staff

Prerequisite: One year of general biology and two upper-level biology courses. Open to students by permission of the consortium representative, Marianne Moore, Department of Biological Sciences.

Distribution: None

Program Access: Open admission with permission of the instructor. Program Access: Open admission with permission of the instructor.
Term(s): Spring
First-Year Seminar Program

The First-Year Seminar Program offers courses across a wide range of disciplines and topics. Enrollment is limited to a small number of first-year students. The seminars emphasize active, collaborative, and creative learning. Courses may fulfill specific distribution and/or major requirements.

Goals for the First-Year Seminar Program

1. Shape student expectations of the values, rigor, aspirations, and rewards of the intellectual enterprise practiced in a vibrant and supportive academic community.
2. Foster skills and habits of mind essential for intellectual inquiry.
3. Build a sense of intellectual and social community among students from diverse backgrounds in a cooperative and collaborative learning environment.
4. Create opportunities early in a student’s college career for close interaction with faculty and for the individualized instruction typical of a liberal arts education.
5. Demonstrate how knowledge is constructed in a particular field.

The French language gave me an entrée into another culture. It allowed me to discover different means of expression, a different way of life, different values, a different system of thought. Because when you’re a judge and you spend your whole day in front of a computer screen, it’s important to be able to imagine what other people’s lives might be like, lives that your decisions will affect.

—U.S. Supreme Court Justice Stephen Breyer

Courses in the French Department target fluency in the language of France and French-speaking countries and open doors to cultures that are rich in tradition and have pivotal roles to play in a rapidly diversifying Europe and a rapidly contracting world. All but three of our courses, elementary to advanced, are taught in French. The subjects we teach in literature and culture span ten centuries, from the Middle Ages to the present. In addition to covering a broad cultural range, our courses are designed to help students develop a number of critical life skills—linguistic, analytical, interpretive, expressive, creative.

Why French? Because French affords access to cultures—both historic and modern—that are vital and that offer a fresh perspective on our own time and culture. Becoming a sensitive observer of a French-speaking culture means learning to understand and respect its unique set of values, and, by extension, to embrace many different kinds of otherness. A student who has mastered French well enough to enter sympathetically into cultures different from her own has learned to push beyond what currently exists and to express herself in a new way. She is likely to be more complexly understanding, more subtly perceptive, more keenly able to move freely and securely among cultures of France and of other Francophone countries, and to have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students must complete 300-level courses before the fall of senior year. In addition, a 300-level course is to be taken concurrently with FREN 360-FREN 370. See Academic Distinctions at the beginning of this catalog.

Graduate Study in French

Students planning graduate work in French or comparative literature are encouraged to write an honors thesis and study a second modern language and/or Latin.

Teacher Certification in French

Students interested in obtaining certification to teach French in the Commonwealth of Massachusetts should consult the chair of the education department.

Advanced Placement Policies and Language Requirement in French

A student entering Wellesley must have an Advanced Placement score of 5 or an SAT II score of 690 to satisfy the foreign language requirement. The Wellesley College language requirement is normally met with the completion of either FREN 201-FREN 202 or FREN 203. Students who present an AP score of 3 or an SAT II score between 600-640 can satisfy the requirement by taking FREN 205. Students who present an AP score of 4 or an SAT II score between 650-680 can satisfy the requirement by taking one of the following courses: FREN 206, FREN 207, or FREN 209. All incoming students who have taken French are required to take the placement test prior to registering for French department courses. Any discrepancy between a student’s AP score and her score on the placement test will be resolved by the placement committee. Any student who takes a language course at another institution and would like college credit must obtain permission in advance and take the French placement test upon
her return to verify she has attained the required level.

**International Study**

Since international study enriches academic learning with real-time experience, all students of French, majors and non-majors alike, are strongly encouraged to spend a year or semester abroad in France or a Francophone country. Wellesley-in-Aix, the college's own international study program in Provence, is the ideal choice; other programs may be approved upon application to the International Study Committee. The French department has funds to support a limited number of summer internships in France or Francophone countries, through the Wellesley-in-Aix program. The department encourages those students who cannot spend a semester abroad to participate in the department's Wintersession course in Paris.

**Maison Française**

Qualified students are encouraged to live at the Maison Française, a French-speaking residence and cultural center for the Wellesley College community. It houses 14 students and two French assistants from the University of Provence. The Maison Française is a place where majors and non-majors who have demonstrated a significant competence in French live and can exchange ideas and experiences. During the academic year, the Maison Française organizes seminars, talks, and colloquia that all students interested in French are encouraged to attend.

**French Cultural Studies**

The French department's interdepartmental major in French Cultural Studies intended for students whose interests in the French and Francophone world are primarily cultural and historical. Interested students are directed to the description of the major and its directions for election, which appear at the end of the French curriculum.

FREN - French Courses

FREN 101 - Beginning French I (1.0)

Systematic training in all the language skills, with special emphasis on communication, self-expression, and cultural insights. A multimedia course based on the video series *French in Action*. Classes are supplemented by regular assignments in a variety of video, audio, print, and Web-based materials to give students practice using authentic French accurately and expressively. Three periods.

Instructor: Gunther

Prerequisite: Open to students who do not present French for admission or by permission of the instructor.

Distribution: None

Term(s): Fall

Each semester of FREN 101 and FREN 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

FREN 102 - Beginning French II (1.0)

Systematic training in all the language skills, with special emphasis on communication, self-expression, and cultural insights. A multimedia course based on the video series *French in Action*. Classes are supplemented by regular assignments in a variety of video, audio, print, and Web-based materials to give students practice using authentic French accurately and expressively. Three periods.

Instructor: Ganne-Schiermeier

Prerequisite: Open to students who do not present French for admission or by permission of the instructor.

Distribution: None

Term(s): Spring

Each semester of FREN 101 and FREN 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

FREN 103 - Intensive French I (1.25)

Intensive training in French. The course covers the material of French 101-102 in a single semester. Five class periods four days a week. For students with little or no previous study of French. This is a demanding course designed for students interested in taking a junior year or semester abroad. Not recommended for students seeking to fulfill the foreign-language requirement in French.

Instructor: Egron-Sparrow

Prerequisite: Open to first-year students and sophomores who do not present French for admission or by permission of the instructor.

Distribution: None

Term(s): Fall

Completion of FREN 202 allows first-year students to qualify for international study after two further courses in French: a unit of FREN 206, FREN 207 or FREN 209, and a unit of FREN 210 or FREN 211.

FREN 202 - French Language, Literatures, and Cultures (1.0)

Reading, writing, and speaking skills and critical thinking are developed through analysis and discussion of cultural and literary texts. Issues of cultural diversity, globalization and identity are considered. Thorough grammar review. Three 70-minute periods a week.

Instructor: Prabhu, Morari, Tranvouez

Prerequisite: FREN 102 or FREN 103, SAT II score of 500-590, or an equivalent departmental placement score, or an AP score of 1 or 2, or permission of the instructor.

Distribution: LL

Term(s): Spring

Each semester of FREN 201 and FREN 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course. Students are strongly advised to complete the FREN 201-FREN 202 sequence early in their college career, and within the same academic year, and in order to ensure they receive credit for both courses they should consult the chair of the department if they foresee a gap in their enrollment in the sequence. A student who petitions to take FREN 202 without having completed FREN 201 must elect one of the following courses in order to complete the language requirement: FREN 205, FREN 206, FREN 207, or FREN 209.

FREN 203 - Intensive French II (1.25)

The continuation of FREN 103. Systematic training in all the language skills. Five class periods four days a week.

Instructor: Egron-Sparrow

Prerequisite: Open only to students who have completed FREN 103 or by permission of the instructor.

Distribution: LL

Term(s): Spring

The course is equivalent to FREN 201-FREN 202, and is designed to prepare students to qualify for international study after two further courses in French: a unit of FREN 206, FREN 207 or FREN 209, and a unit of FREN 210 or FREN 211.

During Summer Session this is a six-week course.

FREN 205 - Literature and Film in Cultural Contexts (1.0)

Discussion of modern literature and film in their cultural contexts. Training in techniques of literary and cultural analysis. Materials include novels, short stories, poetry, films, screenplays, and videos from France and the Francophone world. Vocabulary building and review of key points of grammar. Frequent written practice. Attention to oral skills and listening comprehension, as needed.

Instructor: Datra

Prerequisite: FREN 202 or FREN 203, an SAT II score of 600-640, an equivalent departmental placement score, or an AP score of 3.

Distribution: LL

Term(s): Fall

FREN 206 - Intermediate Spoken French (1.0)

This course develops the skills of listening and speaking in French, with special emphasis on pronunciation and attention to the related skills of
reading, writing and grammatical accuracy. Participants will practice conversation through discussion of a wide variety of materials, including websites, magazine articles, short stories and films.

Instructor: Tranvouez, Ganne-Schiereikmeier, Pettersson
Prerequisite: FREN 202, FREN 203, or FREN 205, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.
Distribution: LL
Term(s): Fall, Spring

FREN 207 - Perspectives on French Culture and Society: French Identity in the Age of Globalization (1.0)

This introduction to French society and culture, we will examine France’s identity crisis at the beginning of the twenty-first century. From its historical position of political, economic, and intellectual leadership in Europe and the world, France is searching to maintain its difference as a defender of quality over mass appeal and the proud values of its national tradition in the face of increasing globalisation. Topics covered include Franco-American relations, the European Union, immigration, the family, and the role of women in French society. Readings are drawn from a variety of sources: historical, sociological, and ethnographic. Magazine and newspaper articles along with television programs and films will provide supplementary information.

Instructor: Gunther
Prerequisite: FREN 202, FREN 203, or FREN 205, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.
Distribution: LL, SBA
Term(s): Spring

FREN 209-01-F - Studies in Literature (1.0)

Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208, FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.

FREN 210-01-F - French Literature and Culture Through the Centuries (1.0)

Topic for 2014-15: From the Enlightenment to the Twenty-first Century

Major authors from the eighteenth century to the twenty-first studied in their historical and cultural contexts, with emphasis on close reading, critical analysis, and writing in French. Literary generations and movements, from the philosopher-writers of the Enlightenment through the nineteenth-century innovations of the romantic and realist writers, to groundbreaking twentieth-century experiments in prose, poetry and theater, the painful disillusion of the Second World War, French colonialism and its demise. We end with French writing from the newly liberated colonies.

Instructor: Prabhu
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208, FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL
Term(s): Spring

FREN 211 - Studies in Language (1.0)

Students in this course will explore works of prose, poetry, fiction and autobiography and acquire the skills and techniques needed to decipher and analyze them in writing. A writing-intensive course, in which participants learn to produce a reaction paper, an essay, a creative narration, textual analysis of a poem, and a sustained argument. Specific emphasis on critical thinking and interpretive judgment. Students will learn to construct logical, well-thought-out essays, including the dialectical essay (la dissertation) practiced in French universities. An ongoing, intensive review of grammar underlies and anchors the course. Open to first-year students who have taken one of the prerequisite courses.

Instructor: Pettersson
Prerequisite: FREN 202, FREN 203, or FREN 205, an SAT II score of 650-680, an equivalent departmental placement score, or an AP score of 4.
Distribution: LL, SBA
Term(s): Fall

FREN 212 - From Myth to the Absurd: French Drama in the Twentieth Century (1.0)

Term(s): Fall

FREN 210 and FREN 211 each fulfill the 200-level requirement for the major, for study abroad, and for all French Department courses at the 300 level. Beginning with the class of 2018, majors may elect either course to satisfy the requirement, but should consult with a member of the French Department to determine which course best suits their needs.

FREN 213 - From Myth to the Absurd: French Drama in the Twentieth Century (1.0)

An investigation of the major trends in modern French drama: the reinterpretation of myths, the influence of existentialism, and the theatre of the absurd. Special attention is given to the nature of dramatic conflict and to the relationship between text and performance. Study of plays by Anouilh, Cocteau, Giraudoux, Sartre, Camus, Ionesco, Beckett, and Genet.

Instructor: Masson
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208, FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL
Term(s): Fall
present, with specific attention to the ways these themes are embodied in poetic form. In which ways is poetry most apt to address and express the passions of the human heart and mind?

Instructor: Petterson
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an AP score of 5, or an equivalent departmental placement score
Distribution: LL
Term(s): Not Offered

FREN 226 - Speaking Through Acting (1.0)
Improvement of French oral skills and public speaking skills through the use of acting techniques. Intensive analysis of short literary texts and excerpts from several plays with emphasis on pronunciation, diction, elocution, acting, and staging.

Instructor: Masson
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; ARS
Term(s): Spring

FREN 227 - America Through French Eyes: Perceptions and Realities (1.0)
The French have long been fascinated by the United States, especially since the end of the Second World War. At times, the United States has been seen as a model to be emulated in France; more often, it has stood out as the antithesis of French culture and values. This course examines French representations of the United States and of Americans through key historical and literary texts—essays, autobiographies, and fiction—as well as films. Topics to be explored include: representations of African American French in films (Josephine Baker), French views of Taylorization, the Coca-Cola wars of the 1950s, French-American tensions during the Cold War, especially under de Gaulle, as well as more recent debates about Euro Disney, McDonald’s, Hollywood, globalization, and multiculturalism.

Instructor: Datta
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; HS
Term(s): Not Offered

FREN 228 - Versailles and the Age of Louis XIV (1.0)
Louis XIV sought to present his royal court at Versailles as the ultimate in monarchical splendor and power. Yet writers who frequented the court focus on its dangerous intrigues, moral corruption, and petty rivalries. The course will explore this discrepancy through close study of official and unofficial productions of the court. Royal paintings, medallions, architecture, ceremonies, and official historiography all foreground the Sun King’s glory; novels, memoirs, letters, and moral treatises seem to undo the very notion of courtly magnificence put forward by the monarchy. Both elements are crucial to understanding the social, political, religious, and artistic practices that defined the court. Recent films and historical works on Versailles will help us evaluate its legacy for contemporary French culture.

Instructor: Bilis
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; HS
Term(s): Not Offered

FREN 229 - Through the Transatlantic Mirror: French-American Encounters from the Age of Revolution to the Age of Dinsey (in English) (1.0)
France and the United States have fascinated each other throughout their history, beginning with the founding of the American republic. Americans from the nineteenth to the mid-twentieth centuries viewed France, and Paris in particular, as a beacon of art, culture, literature, and philosophy. For some, especially African Americans, Paris offered a refuge from discrimination back home. Although the French initially perceived the United States as a rustic backwater, by the dawn of the twentieth century it had emerged as a symbol of the future, and as the vehicle of a worldwide mass culture epitomized by Hollywood, Coca-Cola, McDonald's, and Disneyland. This course traces the evolving relationship between France and the United States in the nineteenth and twentieth centuries. Drawing on a variety of historical and literary documents, among them novels and essays as well as films, we will investigate the ways in which each country served as a mirror for the other’s culture and experience.

Instructor: Gunther
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; SBA
Term(s): Not Offered

FREN 230 - A Passionate Cinema: French Bodies on Screen (1.0)
This course takes a historical approach to the representation of love, desire, and the body in French cinema. Although tales of love and desire are a source of commercial success for film directors and producers everywhere, in France they created aesthetic, historical, and ideological patterns that led to the creation of a French national cinema. We will examine how, by implementing the contemporary perspective on desire, French filmmakers built a national style clearly distinguishable from, even opposed to, mainstream (Hollywood) cinema in four important aspects: lighting, narrative codes, editing, and voice-over. Weekly screenings will cover poetic realism (1930s: Vigo, Renoir, Carné, Duvivier, Grémillon), nouvelle vague (Godard, Maile, Truffaut), women’s cinema (Briellat, Denis, Akerman), and new French cinema (1990 and 2000: Assayas, Garrel, Téchiné).

Instructor: Morari
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; HS
Term(s): Not Offered

FREN 231 - The French Press (1.0)
Instructor: Bilis
Prerequisite: AT least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; HS
Term(s): Not Offered

FREN 232 - Occupation and Resistance: The French Memory and Experience of World War II (1.0)
Few experiences in recent French history have marked French collective memory as profoundly as World War II. During these years, the French dealt not only with the trauma of defeat and the German Occupation, but also with the divisive legacy of the collaborationist Vichy regime, headed by Marshal Philippe Petain, a revered World War I hero.

Memories of the war have continued to mark the public imagination to the present day, manifesting themselves in the various arenas of French national life. This course examines the history and memory of the French experience of World War II through historical documents, memoirs, films, literature, and songs.

Instructor: Datta
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209, or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL; HS
Term(s): Not Offered

FREN 233 - Fictions of Childhood in Nineteenth-Century France (1.0)
Representations of childhood in literature, the arts, and political and medical debates of the French nineteenth century. In the 1800s children and childhood emerged as new social preoccupations in France, both in the private sphere and in the country’s developing political institutions. Medical doctors, anthropologists and social critics advanced often conflicting views of children and of their nascent humanity; these debates galvanized public opinion and profoundly changed the status of the child in French culture. This course will first explore childhood from a historical point of view, focusing on feral children, street children, and child labor. We will then investigate literary texts in which children play a central role, especially Hugo’s Les Misérables. Finally, we will examine several writers’
autobiographical accounts of their own childhoods (Stendhal, Sand, Vallès, Proust).

Instructor: de Tholoméy
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209 or above, an SAT II score of 690-800, an equivalent departmental placement score or an AP score of 5.
Distribution: LL
Term(s): Not Offered

FREN 235 - From Page to Stage: Candide, the Play (1.0)

This course will introduce students to the art of adapting a prose narrative for the stage using Voltaire's short novel Candide. We begin by comparing narrative writing and dramatic writing to determine what is at stake when creating a viable theatrical piece. Students will work in teams to transform individual chapters of Candide into scenes.

Participants will take turns being actors, directors and stage managers, and will practice dictation, acting, and pronunciation in exercises aimed at improving their speaking skills. The group will produce a public performance at the end of the semester.

Instructor: Masson
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209 or above, SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL
Term(s): Spring

FREN 237 - Saint-Germain-des-Prés (1.0)

The legendary sixth arrondissement neighborhood as a cultural crucible in post-Liberation Paris. Saint-Germain-des-Prés as the focus of an unprecedented concentration of literary and artistic talent after 1945: existentialists, writers, artists, café intellectuals, and nonconformists. The discovery of jazz and American popular culture. Saint-Germain and the myth of the Left Bank. Study of texts by Sartre, Camus, Simone de Beauvoir, Boris Vian, Raymond Queneau; songs by Juliette Gréco and others; newreel, film, and audio documents of the period.

Instructor: Lydgate
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209 or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL, ARS
Term(s): Not Offered

FREN 238 - Love Interests: Marriage and Adultery in 19th-Century French Literature (1.0)

This course will examine major nineteenth-century novels and plays, with a specific focus on the relationship between literary genres and the themes of love, marriage, and adultery. How does literature reflect upon other types of discourses on the subject? How do literary texts and caricatures of the period engage questions of class, social order, and transmission of property? And what is the narrative role of desire in representations of marriage and adultery?

Readings will include texts by Balzac, Maupassant, Musset, Dumas, Stendhal and Flaubert. We will also discuss caricatures of the period (Daumier, Gavarni).

Instructor: de Tholoméy
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 or above, SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL
Term(s): Spring

FREN 241 - Laughter is the Best Medicine (1.0)

Is laughter timeless? Or is it the product of a specific cultural, national, and historical point of view? Is what made 17th- and 18th-century audiences laugh still funny today? In this course dedicated to the study of the evolution of the French comedic genre, students will reflect upon their own sense of the comical and compare it with that of prerevolutionary audiences. Molère and Marivaux, two of literature's great playwrights, will anchor our analysis of the formal conventions, linguistic registers, themes, tropes, and character-types of comedy. Contemporary film and comedic routines will sharpen our awareness of the lasting influence these and other early modern playwrights have had on French humor.

Instructor: Bilis
Prerequisite: At least one unit of FREN 206, FREN 207, FREN 208 [2012-13], FREN 209 or above, an SAT II score of 690-800, an equivalent departmental placement score, or an AP score of 5.
Distribution: LL
Term(s): Spring

FREN 302 - Discourses of Desire in the Renaissance (1.0)

An exploration of ways in which writers of the sixteenth century in France express and explore the desire for transcendence in spiritual and physical experience. Convinced that the texts of antiquity contain occult teachings, scholars of the early Renaissance seek to purge ancient books of their medieval commentaries and the corruptions of centuries of manuscript culture, and pore over astrological and hermetic treatises. Religious reformers pursue an analogous purification of the sacred texts, intent on restoring the lost inwardness and otherworldliness of Christian faith. Poets and prose writers challenge the rigid medieval dichotomy between the unsensual spirit and the unsensual body, casting a newly loving eye on physical beauty and finding in human desire a privileged expression of the quest for intellectual and spiritual meaning. We will investigate these issues in works by Rabelais, Marguerite de Navarre, Calvin, Ronsard, Louise Labé, Montaigne, and Agrippa d'Aubigné.

Instructor: Lydgate
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 216; and one additional unit, FREN 213 or above.
Distribution: LL, HS
Term(s): Spring

FREN 303 - Advanced Studies in Seventeenth and Eighteenth Centuries (1.0)

Instructor: Bilis
Distribution: LL, HS
Term(s): Not Offered

FREN 306 - Literature and Inhumanity: Novel, Poetry, and Film in Interwar France (1.0)

This course will examine the confrontation between literature and inhumanity through the French literary period and film of the early twentieth century. Poetry by Guillaume Apollinaire, Robert Desnos, André Breton, Francis Ponge, and René Char, films by Luis Buñuel, and novels by André Gide, Jean-Paul Sartre, and André Malraux all serve to illustrate the profound crisis in human values that defined and shaped the twentieth century.

Instructor: Petterson
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 216; and one additional unit, FREN 213 or above.
Distribution: LL
Term(s): Not Offered

FREN 308 - Advanced Studies in Language (1.0)

The art of translation and its techniques are studied through analysis of the major linguistic and cultural differences between French and English.

Translations from both languages will serve to explore past and present-day practices and theories of translation.

Instructor: Petterson
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 216; and one additional unit, FREN 213 or above.
Distribution: LL
Term(s): Fall

FREN 313 - George Sand and the Romantic Theatre (1.0)

George Sand, multifaceted woman and influential writer, allows us to explore the romantic theatre as well as the overall theatre production of the nineteenth century. The fact that Sand’s theatre was overlooked in her time and subsequently forgotten raises important questions of public recognition and literary posterity that we will examine.

Instructor: Masson
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 216; and one additional unit, FREN 213 or above.
Distribution: LL, ARS
Term(s): Not offered

FREN 314 - A Cinematic History of Intellectual Ideas in Post-WWII France: The Politics of Art (1.0)

This course examines the various ideological turns and patterns in post-World War II France through the study of cinema. Proceeding from the assumption that aesthetics and politics are intertwined, the course will focus on form and content in order to examine the political engagement of filmakers, overtly militant cinema, propaganda, and the shaping of moral spectatorship, in parallel with specific trends in French intellectual and political history.

Our focus will be on the films of Alain Resnais, Jean-Luc Godard, Agnès Varda, Chantal Akerman, Claude Chabrol, Mathieu Kassovitz, and Abdell Kechiche. Readings will include contemporary political philosophers Jacques Rancière, Alain Badiou, and Étienne Balibar.

Instructor: Morais
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 216; and one additional unit, FREN 213 or above.
Distribution: LL, ARS
Term(s): Spring

FREN 315 - Two Women in Literature and Politics: Olympe de Gouges and George Sand (1.0)

The lives and writings of Olympe de Gouges (1748-1793) and George Sand (1804-1875) raise a critical question: does history shape writers, or do writers shape history? Olympe wrote the Declaration of the Rights of Women and campaigned for the right of women to divorce, and in her play L’Esclavage des Noirs she argues against slavery. George Sand, influenced by socialist ideas, writes novels and plays that question the social norms and gender roles imposed on women by the conservative society of the 19th century. We will discuss these two writers’ opposition to revolutionary violence and reflect on the ways in which their voices were ultimately silenced: Olympe decapitated by the guillotine, Sand marginalized as the “Bonne Dame de Nohant,” the author merely of rustic novels.

Instructor: Masson
FREN 324 - The Belle Epoque and the Emergence of Modern France (1.0)

The term belle époque (1880-1914) evokes images of Parisian boulevards, bustling cafés, glittering shop windows, and Montmartre cabarets, all symbols of modern consumer culture. No emblem of the era is as iconic as the Eiffel Tower, constructed for the World’s Fair of 1889 as a tribute to French technology and progress. During the years preceding World War I, Paris was the center of the European avant-garde—indeed, the capital of modernity. While cultural upheaval is its hallmark, this period also witnessed the definitive establishment of a republican regime, the expansion of an overseas empire, and the integration of the countryside into national life. Drawing on historical documents and literary texts as well as films, posters, and songs, this interdisciplinary course examines French culture, politics, and society during the era that ushered France into the modern age.

Instructor: Petterson
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 210; and one additional unit, FREN 213 or above.
Distribution: LL; HS
Term(s): Fall
Not open to students who took the same topic as FREN 349.

FREN 333 - French Classical Tragedy: Corneille versus Racine: Rethinking the Parallel (1.0)

From the French Revolution to May 1968 (1.0)

The term belle époque (1880-1914) evokes images of Parisian boulevards, bustling cafés, glittering shop windows, and Montmartre cabarets, all symbols of modern consumer culture. No emblem of the era is as iconic as the Eiffel Tower, constructed for the World’s Fair of 1889 as a tribute to French technology and progress. During the years preceding World War I, Paris was the center of the European avant-garde—indeed, the capital of modernity. While cultural upheaval is its hallmark, this period also witnessed the definitive establishment of a republican regime, the expansion of an overseas empire, and the integration of the countryside into national life. Drawing on historical documents and literary texts as well as films, posters, and songs, this interdisciplinary course examines French culture, politics, and society during the era that ushered France into the modern age.

Instructor: Petterson
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 210; and one additional unit, FREN 213 or above.
Distribution: LL; HS
Term(s): Fall
Not open to students who took the same topic as FREN 349.

FREN 332 - France and Europe: Ambiguities, Obstacles, and Triumphs (1.0)

After an introduction to various social, cultural, and political aspects of contemporary France and the French, we will turn our attention to issues surrounding France’s role in the project to unify Europe. We will investigate the tensions that arise as France commits more deeply to membership in the European Union, and how France is experiencing EU membership differently from its neighbors, in ways that reflect its unique history and culture. Readings will be drawn from a variety of disciplines, including texts by historians, political scientists, sociologists, and economists.

Instructor: Gunther
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 210; and one additional unit, FREN 213 or above.
Distribution: LL; HS
Term(s): Spring
Not open to students who took the same topic as FREN 349.

FREN 334 - African Cinema: Character and Narrative (1.0)

This course examines how character is built and how narration occurs in cinema. It covers the study of cinematic techniques in African cinema and explores how this cinematic tradition has responded to specific issues of representation in African history that came to bear upon filmmaking and cinematic language. The larger purpose of the course is to understand filmmaking as an aesthetic and political form of intellectual expression, but also as an industry in Africa, with a place in African cultural and political history.

Instructor: Prabhu
Prerequisite: FREN 211 or, beginning with the class of 2018, FREN 210 and one additional unit, FREN 213 or above. In addition, CAMS 101 and at least one 200-level CAMS course. Permission of the instructor for students with no previous cinema class.
Cross-Listed as: CAMS 334
Distribution: LL; ARS
Term(s): Not Offered
This course meets four hours weekly, but not all students attend all four hours. The schedule includes common instructional time in English for all students as well as separate sessions in English (required for CAMS only) and in French (required for FREN only). However, all registered students need to be available during the scheduled time slot of the class throughout the semester.
FREN 335 - Ethics and Difference (1.0)
A course on the idea of difference in historical perspective, with particular emphasis on ethical aspects of claiming/identifying difference. Study of difference in texts by the Philosophers of the Enlightenment, travel accounts, anthropological writing, ethnographic film, and recent fiction. The course focuses on methods of close reading and the function of grammatical structures such as objects and variations in tenses, on the position of the narrator, and on nuances in vocabulary. Individual assignments will be based on students' wider interests. Themes of difference include gender, race, ethnicity, nationality, class, and differential power in individual or group relationships.
Instructor: Prabhu
Prerequisite: FREN 211 or, for students entering in 2014 or later, FREN 210; and one additional unit, FREN 213 or above.
Distribution: LL
Term(s): Fall

FREN 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

FREN 359 - Calderwood Seminar in Public Writing: You Say You Want to Change the World: Advocating for Other Cultures (in English) (1.0)
Your local school board is considering eliminating foreign language instruction at the high school. You think it's a bad idea. How will you make your voice heard? This seminar will explore writing that challenges language majors to rethink and repurpose their academic knowledge, shaping it to contribute to public debates. Such writing may include op-eds and letters to the editor; book, film and music reviews; blogs; and interviews with notables in the field. Students will write weekly and revise their work in response to comments from the instructor and their peers. The presence of majors in different languages will introduce students to the assumptions, perspectives and approaches of other cultures, with the goal of helping participants become advocates for a wider, more inclusive cultural literacy.
Instructor: Lydgate
Prerequisite: At least two courses at the advanced 200 level or the 300 level in the major department.
Cross-Listed as: CPLT 359
Distribution: LL
Term(s): Spring

FREN 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

HUM 330 - French and Francophone Studies / Postcolonial Studies (1.0)
This course examines texts that foreground pressing concerns of the postcolonial world: in Africa, the Creole islands of the Caribbean and Indian Ocean, Europe and South Asia. Close attention will be paid to the relationship of a colonial culture to that of the metropolis, the functioning of minority and majority languages, and the narrative techniques that make these differences manifest in fictional and theoretical writing. The course includes discussion of postcolonial theory and its many debates. Most readings will be done in the original French for credit in the French Department, and in the original English or in English translation for credit in other departments. Taught in French and English (Co-taught by the Cornille Visiting Professor in the Humanities, Françoise Lionnet)
Instructor: Anjali Prabhu, (Françoise Lionnet)
Prerequisite: For French credit 210/211 + 1 additional unit of 213 or above Open to Juniors and Senior.
Distribution: LL
Term(s): Fall
French Cultural Studies Major

Goals for the French Cultural Studies Major

- Students should develop an in-depth understanding of French history, culture, society, and politics.
- Students should also be able to conduct rigorous in-depth research using primary as well as secondary sources on cultural and historical topics.
- Because they take classes in one or more departments outside the French department, students are expected to develop an understanding of the scope and methods of other disciplines and gain new analytical frameworks for thinking about the cultures and histories of France and the Francophone world.

French Cultural Studies Information

FREN 101 - FREN 102, FREN 103, and FREN 201 count toward the degree but not toward the major. First-year students who begin with FREN 101-FREN 102 in college and who wish to study internationally should consult the chair of the department during the second semester of their first year.

Requirements for the French Cultural Studies Major

For students entering before Fall 2014:

The major in French Cultural Studies consists of a minimum of eight units. At least four units in the French department above the 100 level are required, including FREN 207 and FREN 211.

For students entering in Fall 2014 or later:

The major in French Cultural Studies consists of a minimum of eight units. At least four units in the French department above the 100 level are required, including FREN 207 and FREN 211 or, FREN 210.

For all students:

In special cases, an upper-level culture course in French-approved by the program director may be substituted for FREN 207. At least two units in French at the 300 level are required. FRST 350, FRST 360 and FRST 370 do not normally count towards the minimum requirement of two 300-level courses for the major. In exceptional cases, this requirement may be waived by the FCS director and/or the chair of the French department. No more than two courses taken credit/noncredit at Wellesley College may be applied to the French Cultural Studies major.

Honors in French Cultural Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students must complete a 300-level course or its equivalent before the fall of senior year. In addition, a 300-level course is to be taken concurrently with FRST 360-FRST 370. See Academic Distinctions.

Teacher Certification in French Cultural Studies

Students interested in obtaining certification to teach French in the Commonwealth of Massachusetts should consult the chair of the Education Department.

FRST 370 - Senior Thesis (1.0)

Prerequisite: FRST 360 and permission of the department. Distribution: None Term(s): Fall; Spring

For courses taken for the French Cultural Studies major but not exclusively on France or a Francophone topic, students are expected to write their main paper(s) on a French theme. In addition, and in consultation with the director, research and individual study (FRST 350) may be approved. The procedure to be followed for honors is identical to that for the French major.

FRST 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the department. Distribution: None Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

FRST 360 - Senior Thesis Research (1.0)

Prerequisite: Permission of the department. Distribution: None Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
DEPARTMENT OF GEO SCIENCES

Director: Professor Hawkins
Associate Director: Dr. Besancon
Assistant Director: Ms. Monecke

The Department of Geosciences seeks to educate majors in the following bodies of knowledge and to develop in them the following skills:

- A knowledge and understanding of the internal structure and composition of the Earth, the history of the Earth, and the internal and surficial processes that shape its evolution
- A knowledge and understanding of how earth systems interact to produce the environment in which we live
- The cognitive and analytical reasoning skills needed to frame and solve interdisciplinary geoscientific problems
- The written, oral, and visual/spatial communication skills needed to communicate scientific knowledge

Requirements for the Geosciences Major

A major in geosciences includes eight geosciences courses (a minimum of eight units of course work), at least six of which must be taken at Wellesley. Entry into the major may be through GEOS 101, GEOS 102 or GEOS 106 [2011-12]. Four 200-level courses are required, normally chosen from GEOS 200, GEOS 201, GEOS 203, GEOS 206 [2013-14], GEOS 210 and GEOS 218. Three 300-level courses are required, of which at least one must be GEOS 350, GEOS 360 or GEOS 370. Four complementary courses from mathematics, biological sciences, chemistry, physics, astronomy, or computer science are also required, and two of these must come from the same discipline. Most majors pursue research experiences as part of their curriculum. Students will choose an appropriate set of courses with the guidance of a departmental advisor.

Honors in Geosciences

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her/his behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Graduate Study in Geosciences

Students considering graduate school are urged to take two semesters of mathematics, two of chemistry, two of physics, and a geoscience field course, either the MIT 12.114-12.115 sequence offered in alternate years by MIT for a summer geoscience field course offered by another institution. Students will choose an appropriate set of complementary courses with the guidance of a departmental advisor.

Geosciences Minor

Requirements for the Geosciences Minor

A minor in geosciences consists of five courses, including GEOS 101, GEOS 102, or GEOS 106 [2011-12] and at least one course at the 300 level. Students will choose an appropriate set of courses with the guidance of a departmental advisor.

GEOS - Geosciences Courses

GEOS 101 - Earth Processes and the Environment with Laboratory (1.25)
Geologic processes both rapid (earthquakes and landslides) and slow (mountain building and sea level rise) are intimately linked with sustaining the diversity of life on the planet. This course will examine these and other processes in which the atmosphere, geosphere, and biosphere are linked via the flow of energy and mass. Laboratory exercises and field trips will introduce skills needed to observe and document processes shaping our environment. Problem solving in small groups during class time will foster critical thinking, and classroom debates between larger teams will focus research and communications skills on current issues in geosciences such as building and removing dams, and the science surrounding global climate change.
Instructor: Brabander
Prerequisite: Any 100-level GEOS course (except GEOS 111).
Distribution: NPS
Term(s): Spring

GEOS 102 - The Dynamic Earth with Laboratory (1.25)
The Earth is a dynamic planet—driven by processes that operate on its surface and within. In this course we study these processes as well as interactions between the solid earth, the hydrosphere, atmosphere, and the biosphere that together produce the environment we live in. Topics covered include the origin and history of the Earth, plate tectonics, the distribution of earthquakes and volcanoes, hydrology, landscape evolution, and global climate; these processes influence our lives daily. Laboratory exercises, project work, and local field trips provide hands-on opportunities to develop key concepts and hone observational and analytical skills.
Instructor: Hawkins, Besancon, Monecke
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken GEOS 102.
Distribution: NPS, QRF
Term(s): Fall

GEOS 201 - Environmental, Health, and Sustainability Sciences with Laboratory (1.25)
Problems in environmental, health, and sustainability sciences are inherently interdisciplinary and require a diverse skill set to frame, analyze, and solve. This course will focus on developing a toolbox of skills including systems level thinking, field and analytical methods, biogeochemical analysis (natural waters, soils, and other environmental materials), and modeling with a goal of building a science-based foundation for the analysis of complex issues at the interface between humans and the environment. Students will conduct semester-long research projects and will present their results in a final poster session.
Instructor: Brabander
Prerequisite: Any 100-level GEOS course (except GEOS 111), ES 101, SIST 201, or permission of the instructor.
Cross-Listed as: ES 201
Distribution: NPS
Term(s): Fall
Normally offered in alternate years.

GEOS 203 - Earth Materials with Laboratory (1.25)
An introduction to the materials—minerals, rocks, magmas, sediments—that make up the Earth, and how those materials influence the processes that operate within and on the surface of the Earth. Emphasis is placed on the geological, chemical, and physical basis for understanding the physical properties and chemical composition of minerals, magmas, rocks, and sediments, and the processes by which these materials form. Lecture and laboratory sessions are integrated to create a studio-style, project-based learning experience.
Instructor: Hawkins
Prerequisite: Any 100-level GEOS course (except GEOS 111).
Distribution: NPS
Term(s): Spring

GEOS 208 - Oceanography (1.0)
The Earth is an ocean planet. Covering 71 percent of the Earth’s surface and holding 97 percent of the Earth’s water, the oceans are perhaps our planet’s most distinctive feature. This course will address
fundamental questions about the oceans such as, why do we have oceans and ocean basins? Why do we have ocean currents? How have the interactions among physical, chemical, and biological processes produced the ocean we have today? Why should we strive to learn more about the oceans, and what are the links between the oceans and Earth's climate? In-class exercises, case studies, and data analysis will emphasize fundamental oceanographic processes and problem solving skills. A mandatory field trip to the coast will allow students to explore coastal processes in action.

Instructor: Besançon
Prerequisite: Any 100-level GEOS, ES, or BISC course, or permission of the instructor.
Distribution: NPS
Term(s): Spring

GEOS 210 - Hydrogeology: Water and Pollutants with Laboratory (1.25)

Clean water supply is a high priority for both developed and underdeveloped communities worldwide. Limits to supply and their implications for an increasing population make a clear understanding essential for citizens. Water sources and movement of water from the atmosphere through the earth's surface and subsurface will be examined. Laboratory will include field and laboratory analyses of physical and chemical properties and pollutant issues of local community supplies including the Wellesley campus, and towns of Wellesley, Natick, and Norwell.

Instructor: Besançon
Prerequisite: Any 100-level GEOS course (except GEOS 111), or permission of the instructor.
Cross-Listed as: ES 210
Distribution: NPS; MM
Term(s): Fall
Normally offered in alternate years.

GEOS 213 - Planetary Geology (1.0)

Spacecraft observations have revealed a breathtaking diversity of geologic features in the solar system, from ancient river valleys on Mars and violent volcanic eruptions on Io to ice fountains on the Moon, giant impacts and basin formation, tectonic spreading, and the complex surfaces of comets and asteroids. From a comparative point of view, this course examines the formation and evolution of the planets and small bodies in the solar system. Topics will include: volcanism, tectonic activity, impacts, and tides.

Instructor: TBA (Astronomy)
Prerequisite: Any 100-level ASTR or GEOS course.
Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Cross-Listed as: ASTR 203
Distribution: NPS
Term(s): Spring
This course is also offered at the 300-level as GEOS 315/ASTR 303. Normally offered in alternate years.

GEOS 218 - Geomorphology with Laboratory (1.25)
The Earth's surface is constantly changing and is controlled by the interaction of topography and climate. In this class we will investigate the major landforms that can be found on Earth's surface, the processes that have shaped them, the delicate balance between landform and process, and the rates of geomorphic change. Among other processes, we will explore glacial activity, coastal processes, landslides, and stream flow. Topographic maps, surveying equipment, and geographic information systems (GIS) will be used to analyze and interpret geomorphic features. A variety of landforms will be studied during outdoor lab exercises and during a weekend field trip.

Instructor: Moncke
Prerequisite: Any 100-level GEOS course (except GEOS 111).
Distribution: NPS
Term(s): Not offered
Normally offered in alternate years.

GEOS 220 - Volcanoes and Volcanism with Laboratory (1.25)

Volcanic eruptions impact human populations and provide insight into the inner workings of planet Earth. In this course we will examine volcanic landforms, eruptions, products and hazards, as well as, the tectonic causes of and the magmatic processes that drive volcanism. We will also explore the impact of volcanism on humans, earth climate and earth history. Lecture and laboratory sessions are integrated to create a studio-style, project-based learning experience. Given sufficient student interest, the course will be supplemented by an optional field trip to a recently active volcanic system during fall break.

Instructor: Hawkins
Prerequisite: Any 100-level GEOS course (except GEOS 111).
Distribution: NPS
Term(s): Fall
Normally offered in alternate years.

GEOS 223 - Planetary Climates (1.0)

We've all heard about recent and ongoing climate change on Earth. What about the climate 10 million years ago or weather patterns on Venus and climate change on Mars? In this course, we'll explore the evolution of the climate system on four worlds in our solar system: the Earth, Mars, Venus, and Saturn's moon Titan. We'll examine how geologists learn about the history of Earth's climate and how it has changed over time, as well as the sources of modern climate change and its impact on life. The course will also explore the techniques that planetary scientists use to learn about the atmospheres and surface environments on other worlds.

Instructor: Watters (Astronomy)
Prerequisite: Any 100 level course in ASTR; or GEOS 101, GEOS 102, or GEOS 206; or ES 111; or permission of the instructor.
Cross-Listed as: ASTR 223
Distribution: NPS
Term(s): Not offered
Normally offered in alternate years. This course is also offered at the 300-level as GEOS 323/ASTR 323.

GEOS 223H - Regional Geology and Geomorphology of the Southwestern USA (0.5)
The southwestern United States is one of the world's premier geologic classrooms, providing the opportunity to study a wide range of geologic processes, geologic features and landscapes, including recently active volcanic and magmatic complexes, active and ancient fault systems, completely deformed metamorphic and igneous rocks, sedimentary rocks deposited in a variety of environments over the last 700 million years, and landscapes shaped by tectonic, isostatic, fluvial, alluvial, eolian and glacial processes. Students will learn to observe, describe, measure and interpret the nature of geologic features and processes by writing field notebook and completing field exercises.

Instructor: Hawkins, Moncke
Prerequisite: Any 100-level GEOS course
Distribution: NPS
Term(s): Winter

GEOS 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

GEOS 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

GEOS 304 - Sedimentology and Stratigraphy with Laboratory (1.25)

Sediments and sedimentary rocks cover most of the Earth's present surface. Sedimentology encompasses the study of the origin, transport, deposition, and lithification of sedimentary rocks and is critical to accurate interpretation of the geologic rock record. Observations of modern sedimentary processes illuminate past environments; sedimentary strata record evidence of mountain building and seismic activity, and the development of ancient environments and the sources of modern nearshore and off-shore sediments.

Instructor: Hawkins
Prerequisite: GEOS 200, GEOS 203, or permission of the instructor.
Distribution: NPS
Term(s): Fall
Normally offered in alternate years.

GEOS 313 - Advanced Planetary Geology (1.0)

This course meets with ASTR 203/GEOS 213 (see description) and on alternate Wednesdays for additional instruction and seminar-style discussions exploring special topics in planetary geology. Students will read and discuss journal articles and advanced texts, and will produce a final project that involves an in-depth treatment of a topic of their choosing. Possible topics include: space weathering on the Moon, giant impacts and basin formation, alteration of igneous rocks on Mars, tectonics on Venus, models of planetary interiors, spacecraft instrumentation and remote sensing techniques, and landscape evolution on Titan.

Instructor: TBA (Astronomy)
Prerequisite: Must satisfy prerequisites for GEOS 213/ASTR 203 and have taken at least one of the following: PHYS 107, GEOS 203, GEOS 206, GOES 218. Not open to students who have taken GEOS 213/ASTR 203.
Cross-Listed as: ASTR 303
Distribution: NPS
Term(s): Spring
Normally offered in alternate years.

GEOS 315 - Environmental Geochemistry with Laboratory (1.25)

This course introduces geochemical approaches, including mass balance, residence time, isotope fractionation, and thermodynamic and kinetic modeling necessary to track the flow of materials in key earth surface reservoirs including water, soil, and plants. This geochemical toolbox will then be used to analyze complex earth systems including the linkages between tectonics and climate change and the fingerprinting of anthropogenic pollutants in the
built environment. In lab a semester-long analytical geochemical research project is designed and executed in small groups.

Instructor: Brabander
Prerequisite: One course above the 100 level in two of the following disciplines: geosciences, chemistry, biological sciences or environmental studies; or permission of the instructor.
Distribution: NPS; MM
Term(s): Spring
Normally offered in alternate years.

GEOS 316 - Paleoseismology (1.0)
Recent earthquake and tsunami events dramatically highlight the vulnerability of human populations and infrastructure to seismic hazards. Only a thorough understanding of the frequency and magnitude of such events will enable local communities to prepare for future disasters. The rapidly evolving field of paleoseismology tries to answer such questions as: Where do earthquakes occur? How large might they be? How frequent are they? In this seminar-style class we will discuss literature to examine primary and secondary earthquake-induced deformation in various geologic archives and under different stress regimes. Through exercises and research projects students will learn techniques to assess the seismic hazard and to prepare threatened communities.

Instructor: Monecke
Prerequisite: Any 200-level GEOS course, or permission of the instructor.
Distribution: NPS
Term(s): Not Offered
Normally offered in alternate years.

GEOS 318 - Tectonics and Structural Geology with Laboratory (1.25)
This course is an overview of the relationship between plate tectonics and rock deformation. Students will explore and discover the descriptive, kinematic and dynamic analysis of deformed rocks and the theoretical treatment of stress and strain, rock rheology and other factors that control deformation. Lecture and laboratory sessions are integrated to create a studio-style, project-based learning experience. Classroom learning will be supplemented by two Saturday field trips and one weekend field trip that emphasize fundamental field methods, such as measuring and mapping rock units and geologic structures. The field trips are mandatory.

Instructor: Hawkins
Prerequisite: GEOS 200, GEOS 203, or permission of the instructor.
Distribution: NPS
Term(s): Not Offered
This course will be offered for the first time in Fall 2015. Not open to students who have taken GEOS 206.

Normally offered in alternate years.

GEOS 320 - Isotope Geochemistry (1.0)
This seminar-style course will use the primary literature to study state-of-the-art techniques in isotope geochemistry. Radiogenic, cosmogenic, and stable isotope systematics will be explored with applications ranging from geochronology, tectonics, and transport of pollutants, and the use of isotopes to trace biogeochemical processes. Field trips to Boston-area isotope labs and opportunities for collaborative research projects will complement the seminar.

Instructor: Brabander
Prerequisite: Any 200-level GEOS course, or permission of the instructor.
Distribution: NPS
Term(s): Not Offered

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

Normally offered in alternate years.

GEOS 333 - Environmental Geochemistry (1.0)
This course will focus on the role of geochemistry in the cycling of elements in the environment. Emphasis will be placed on the study of natural systems, with a special focus on the geochemistry of the atmosphere, hydrosphere, and sediments. The course will provide an overview of the fundamental processes that control the distribution of elements in the environment and will examine the role of geochemistry in understanding environmental problems such as acid rain, the control of greenhouse gases, and the fate and transport of pollutants.

Instructor: Brabander
Prerequisite: Any 200-level GEOS course, or permission of the instructor.
Distribution: NPS
Term(s): Not Offered

Normally offered in alternate years.

GEOS 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

GEOS 370 - Senior Thesis (1.0)
Prerequisite: GEOS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
DEPARTMENT OF GERMAN

Professor: Hansen, Kruse, Nolden (Chair)
Assistant Professor: Hans
Faculty Director of Study Abroad: Nolden

The Department of German offers a varied curriculum that introduces students to a wide range of texts and contexts in order to introduce the cultural heritage and contemporary life of Germany, Austria, and German-speaking Switzerland. Language courses emphasize rapid acquisition of communication skills. Because almost all upper-level courses are conducted in German, the advanced student can achieve a high level of fluency.

German Department Information
The language of instruction above the 100 level is almost exclusively German unless otherwise noted. Students thus have constant practice in hearing, reading, speaking, and writing the language.

The department reserves the right to place a new student in the course for which she seems best prepared, regardless of background and number of units she offers for admission.

The department offers a unified major called German Studies as well as a minor in German Studies. GER 101-GER 102 is counted toward the degree but not toward the major or minor. Students who begin German at Wellesley and wish to major will be encouraged to advance as quickly as possible to upper-level work by doing intermediate language training during the summer or accelerating in our January-in-Berlin program during Wintersession.

German Studies Major
Goals for the German Studies Major
The goals of the major in German Studies are, broadly stated, to equip students with the cultural and linguistic skills to participate in German-speaking cultures. Specifically:

- Students acquire in our courses the linguistic skills to engage in high-level conversation in German and to write sophisticated German
- Students learn to understand and appreciate a wide variety of complex texts (literary, historical, journalistic, musical, cinematic, scholarly, etc.)
- Students receive a broad introduction to the cultures (comprising the art, history, music, philosophy, or politics) of German-speaking countries
- Students are prepared to follow a course of studies at a German or Austrian university, to succeed in internships in German-speaking firms, to enter graduate school in related fields, and to pursue diverse careers both in the United States and abroad.

Requirements for the German Studies Major
- The major in German Studies constitutes a minimum of nine units. With the approval of the department, courses taken abroad may count toward the major at the 200 level. Each student should consult with her department advisor about the best sequence of courses in her case.
- The nine units include two requirements, either GER 325 or GER 329 and GER 389. The remaining seven units must be at the 200 level or above. GER 201 and GER 202 count toward the major. Two of the other seven may be in English, and, with departmental approval, may include one course taught outside of the department.

Honors in German Studies
The department offers two plans for the honors program.

For Plan A, students write a thesis and pass an oral examination. Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students continue with Senior Thesis (370) in the second semester.

For Plan B, students prepare for a written and an oral examination based on a reading list devised by the student under the guidance of an advisor. Preparation of a special author or project can be reflected proportionately in the honors examination. Plan B carries no course credit, but students may elect a unit of 350 as part of their preparation for the honors examination.

To be admitted to either plan, a student must have a grade point average of at least 3.5 in all work in the major field above the 100-level. The department may petition on behalf of exceptional students whose averages fall between 3.0 and 3.5.

International Study in Germany
Students in GER 201 who wish to accelerate at the intermediate level may apply to the January-in-Berlin program. Participants travel to Berlin in January where they study with a professor from the German department. During their stay, they complete GER 202W and receive credit as they would for a course taken on campus. Upon returning for the second semester at Wellesley, students are encouraged to continue with a 200-level course taught in German.

Qualified students are encouraged to spend their junior year at our joint program with Middlebury College in Berlin, or another program approved by the College.

GER - German Courses

GER 101 - Beginning German (1.0)
An introduction to contemporary German with emphasis on communicative fluency. Extensive practice in all four skills: listening, speaking, reading, and writing. Videos and Web-based activities introduce the student to topics from contemporary culture in German-speaking countries.

Instructor: Hansen
Prerequisite: None
Distribution: None
Term(s): Fall, Winter

Each semester of GER 101 and GER 102 earns one unit of credit. Both semesters must be completed satisfactorily to receive credit for either course.

The department strongly urges all participants to sign up for both semesters in order to achieve the full introduction to the language that both semesters provide. After completing GER 102, students may apply for a departmental stipend to support summer language international study.

GER 102 - Beginning German (1.0)
An introduction to contemporary German with emphasis on communicative fluency. Extensive practice in all four skills: listening, speaking, reading, and writing. Videos and Web-based activities introduce the student to topics from contemporary culture in German-speaking countries.

Instructor: Hans, N
Prerequisite: GER 101
Distribution: None
Term(s): Spring

Each semester of GER 101 and GER 102 earns one unit of credit. Both semesters must be completed satisfactorily to receive credit for either course.

GER 201 - Intermediate German (1.0)
Strengthening and expanding of all language skills with special emphasis on idiomatic usage. Thorough grammar review, written, oral, and aural practice. Readings on contemporary cultural topics.

Instructor: Nolden
Prerequisite: GER 101 and GER 102 or permission of the instructor
Distribution: None
Term(s): Fall

Each semester of GER 201 and GER 202 earns one unit of credit. Both semesters must be completed satisfactorily to receive credit for either course.

GER 202 - Intermediate German (1.0)
Strengthening and expanding of all language skills with special emphasis on idiomatic usage. Thorough grammar review, written, oral, and aural practice. Readings on contemporary cultural topics.

Instructor: Nolden
Prerequisite: GER 101 and GER 102 or permission of the instructor
Distribution: LL
Term(s): Spring

Each semester of GER 201 and GER 202 earns one unit of credit. Both semesters must be completed satisfactorily to receive credit for either course.

GER 202W - Intermediate German in Berlin (1.0)
Like GER 202 on campus, this course strengthens and expands all language skills including idiomatic grammar review, oral and listening practice, readings on contemporary and historical topics, and practice in composition. This course will be taught as an intensive Wintersession course in Berlin and will feature an important cultural component.

Instructor: Nolden
Prerequisite: GER 201 or permission of the instructor
Application required. Not open to students who have taken GER 202.
Distribution: LL
Term(s): Winter

Students must have received credit for GER 201 in order to receive credit for GER 202W. Not offered every year. Subject to Provost’s Office approval.
GER 232 - Longing and Belonging: Music in German Culture (1.0)
Music has played an important role in the formation of German cultural identity. In present-day Germany and Austria, the classical tradition associated with composers such as Bach, Mozart, or Schubert coexists with a rich tradition of so-called popular music. In this class, we will study selected examples of German musical history from the eighteenth to the twenty-first centuries in their cultural context. We will analyze the complex relationship between music and text in these works and discuss the many ways in which music has been involved in the formation of cultural identities. While exploring German history and culture through the lens of its rich musical traditions, students will develop their proficiency in all aspects of the German language.
Prerequisite: GER 202 or equivalent.
Distribution: LL
Term(s): Not Offered
Taught in German, three periods.

GER 235 - The Fantastic in German Literature (1.0)
This course surveys the rich tradition of German literature of the fantastic and the uncanny. These works, which employ allegories of escapist fantasy, horror, supernatural terror, delusion, and abnormal psychic states, are chosen for their literary treatment of fears that prey on the human imagination. We shall begin with a couple of less well-known examples from the Grimms’ folk tales, and explore works of major writers for images of the Doppelgänger, talking animals, and magical helpers. Emphasis on the development of communicative skills in order to negotiate complex meaning in reading, speaking, and writing. Review of selected topics in grammar and style. Designed for students who have completed four semesters of language training or equivalent.
Prerequisite: GER 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered
Taught in German, three periods.

GER 236 - Memory, Identity, and Nation in German Short Stories (1945-present) (1.0)
This course focuses on short stories and novels from post-WWII Germany to the present. We examine how literature confronted cultural change not only in a Germany first divided, then reunified, but also in an international context. Readings will include works by authors such as Thomas Mann; Alfred Andersch, Christa Wolf; Judith Hermann, and Wladimir Kaminer. The course is designed to introduce great works of recent German literature and methods of literary analysis, and to practice advanced language skills through targeted grammatical review, analytical writing, and discussion. Taught in German, three periods.
Instructor: Hans
Prerequisite: GER 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

GER 237 - Love in German Literature (1.0)
The course will explore some of the best-known literary expressions of romantic relationships written in German. We will begin with medieval poetry of courtly love and move to examples from Goethe, the Romantics, and Heinrich Heine, and then to the modern period. We will also study a song cycle by Franz Schubert. The topic encompasses problems like falling in love, forbidden love, tragic love, fulfillment, separation, and the erotic. The course has two goals. The first is to enhance appreciation of literature and culture through close reading and contextualization of works by period and genre. The second is to develop communicative skills in order to negotiate complex meaning in speaking and writing. Emphasis on vocabulary building, review of selected grammar topics, and extensive writing practice. Designed for students who have completed four semesters of language training or equivalent.
Prerequisite: GER 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

GER 238 - Texts and Contexts: Genres of German Literature (1.0)
This course presents representative works from major periods of German literature. Texts will survey different genres (lyric poetry, drama, essay, prose fiction) and major writers. We will develop skills of interpretation through speaking and writing about all aspects of these works. The course has two goals. The first is to enhance appreciation of literature and culture through close reading and contextualization of works by period and genre. The second is to develop communicative skills in order to negotiate complex meaning in speaking and writing. Emphasis on vocabulary building, review of selected grammar topics, and extensive writing practice. Designed for students who have completed four semesters of language training or equivalent.
Instructor: Hansen
Prerequisite: GER 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered
Taught in German, three periods.

GER 239 - Germany and Austria Today: Advanced Conversation and Composition (1.0)
Intensive practice in oral and written communication and presentation; introduction to rhetorical strategies of conversation and discussion; introduction to elements of German prose style; practice of various forms of writing. Review of selected grammar topics. On the basis of newspaper and magazine articles, essays and stories, television news, film clips, and website materials, we will discuss and write about current events and issues in Germany and Austria. Designed for students who have completed four or five semesters of language training or equivalent.
Instructor: NN
Prerequisite: GER 202 or permission of the instructor.
Distribution: LL
Term(s): Spring
Taught in German, three periods.

GER 244 - Deutschlandreisen: Fictional Journeys Through Germany (1.0)
In this course we will read travel narratives in which important authors, painters, and filmmakers of the last two centuries have captured their journeys through Germany. We will ask what it is that these travelers have perceived and experienced, how they have mapped out their journeys, and how they have artistically represented their experiences. Texts, paintings, and films by Heinrich Heine, Joseph von Eichendorff, Ernst Ludwig Kirchner, Wim Wenders, Christian Kracht, Sten Nadolny, Andre Kaminski, and others.
Prerequisite: One unit taught in German above GER 202, or permission of the instructor.
Distribution: LL
Term(s): Not Offered

GER 245 - Radicals, Decadents, and New Women: Literature, Culture, and Society in Weimar Germany, 1918-1933 (in English) (1.0)
The short-lived Weimar Republic represents a crucible in which the traumatic aftereffects of World War I violently collide with troubled political and socioeconomic conditions. What we often think of as the “Golden Twenties” were, in fact, years marked by hardship and radical extremism. We will examine and analyze literary and theoretical texts, films, and visual arts in order to understand how the new republic grappled with its hopes and anxieties. We will trace cultural developments from Expressionism through New Objectivity; to the move toward National-Socialist ideology as expressed in essays on social and political issues, poetry, plays, and texts by authors such as Brecht, Kästner, and Thomas Mann; and films by Wiene, Lang, and von Sternberg. Lectures, readings, and discussions in English.
Prerequisite: None
Distribution: LL, HS
Term(s): Not Offered

GER 246 - German Autobiography (1.0)
In this course, we will read German autobiographies from several centuries to familiarize ourselves with patterns of autobiographical writing as well as with important moments in German and Austrian history. Texts will be drawn from the canon of literary memoirs, but will also include writings by scientists, politicians, and other persons of general interest. Our course will commence with passages from the memoirs of the Jewish merchant Glückl von Hameln, an example of early women’s autobiographical writing. The emphasis of the course will be on the twentieth century.
Instructor: Nolden
Prerequisite: GER 202 or above.
Distribution: LL
Term(s): Spring

GER 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

GER 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

GER 258 - Deutschland Bilder: Recent Images of Germany (1.0)
Focusing on the last two decades, this course will discuss how Germany has been featured in the imagination of writers, painters, and film makers both born in Germany and abroad.
Instructor: Nolden
Prerequisite: GER 202 or permission by instructor
Distribution: LL
Term(s): Fall

GER 260 - Text, Texts, Texting (1.0)
In this class we will read and analyze electronic texts to understand how the application of digital media impacts the act of writing and our conception of literature. We will discuss new genres of writing, including Internet novels, and we will ask how texts interact with visuals and how innovative ways of creating texts have generated different types of reading as well.
Prerequisite: One unit taught in German above GER 202, or permission of the instructor.
Distribution: LL, ARS
Term(s): Not Offered

GER 276 - Franz Kafka (in English) (1.0)
All aspects of Kafka’s works and life will be explored in the historical and social context of early twentieth-
GER 280 - Film in Germany, 1919-2013 (in English) (1.0)

This course provides a survey of the history of films made by German directors. It introduces you to the a variety of filmmaking centers of film-making for Hollywood, we will discuss the role of the mass appeal of Kultbücher will begin with Expressionism, Film in the Third Reich, Postwar Beginnings, and New German Cinema. We will concentrate on films by Lang, Murnau, Riefenstahl, Sierck, Staude, Akin, Fassbinder, Wenders, and Tylker.

Instructor: Kruse
Prerequisite: None
Distribution: LL
Term(s): Fall

GER 325 - Goethe and His Critics (1.0)

Texts from all phases of Goethe’s literary career will be studied in their cultural and sociohistorical context. Readings will include examples from Goethe’s poetry and dramatic and narrative works as well as texts by some of Goethe’s contemporary critics (i.e. Kleist and Heine).

Instructor: Berman
Prerequisite: ARTH 224, ARTH 101, ARCH 200, or permission of the instructor
Cross-Listed as: ARTH 315-01-F
Distribution: ARS
Term(s): Fall

GER 329 - Readings in Eighteenth- and Early Nineteen-Century Literature (1.0)

This course introduces themes and issues of the German Enlightenment, Storm and Stress, Classicism, and Early Romanticism. Texts by Gellert, Lessing, Wagner, Schiller, Goethe, and Kleist. Introduction to important authors, texts, and ideas of German Enlightenment and Romanticism, thus providing a solid understanding of the very foundation on which present-day German culture is based.

Instructor: Nölden
Prerequisite: Two units taught in German above 202, or permission of the instructor.
Distribution: LL
Term(s): Not Offered

GER 345 - Radicals, Decadents, and New Women: Literature, Culture, and Society in Weimar Germany, 1918-1933 (1.0)

Same course as GER 245, with additional readings in German, and an additional weekly class meeting with discussions in German. Three periods.

Instructor: Hans
Prerequisite: One 300-level unit or permission of the instructor.
Distribution: LL
Term(s): Spring
HEBREW

For Elementary and Intermediate Hebrew and Research or Independent Study in Hebrew, see Jewish Studies.
DEPARTMENT OF HISTORY

History Major

Goals for the History Major

Students who successfully complete a major in history will have acquired:

- A broad and deep understanding of the process of change over time, the relationship between past and present, and historical causality
- A humanistic awareness of the individual as part of a larger temporal stream, a civic sense of historical responsibility, and a social-scientific consciousness of societies and cultures as evolving systems
- Solid grounding in a body of specialized historical and historiographical knowledge about selected countries and regions or comparative problems that span various cultures and times
- Diversified knowledge of the histories and historiographies of a range of cultures and chronological periods
- A critical understanding of the methods that historians employ in reconstructing the past, including various approaches to historical research, the interpretation of primary sources and other evidence, and the utility of theory in historical analysis
- Extensive training and experience in reading monographs and scholarly articles critically, in writing concise analytical essays and longer research papers, and in oral communication skills

Requirements for the History Major

The minimum major requires nine units of course work above the 100 level, including two 300-level units (2.0). Normally, majors must include at least one seminar in their program of two 300-level units. Normally, seven of the nine units and all 300-level work must be taken at Wellesley. No AP or IB credits. A student nearing completion of her major requirement may, in special circumstances and only with the permission of her major advisor and the department chair, receive credit toward the major for one related course in another department at Wellesley. One cross-listed course may be counted toward the major, but a student may not count both a cross-listed and a related course toward the major.

Majors in history are allowed great latitude in designing a program of study, but it is important for a program to have breadth, depth, and historical perspective. To ensure breadth, the program must include at least one course (1.0 unit) in the history of Africa, China, Japan, Latin America, the Middle East, or South Asia and at least one course (1.0 unit) in the history of Europe, the United States, or Russia. To encourage depth of historical understanding, we urge majors to focus eventually upon a special field of study, such as:

1. A particular geographical area, country, or culture
2. A specific time period
3. A particular historical approach, e.g., intellectual and cultural history, social and economic history
4. A specific historical theme, e.g., the history of women, revolutions, colonialism

To ensure that students have a broad historical perspective, history majors must take at least one course (1.0 unit) in pre-modern history (e.g., Medieval Italy, Colonial Latin America, and so forth).

Honors in History

The only path to honors is the senior thesis. As specified in College legislation, students must have a grade point average of 3.5 or higher in courses applied to the major. In addition, they must complete six of the nine major units of course work before the end of their junior year. For additional information, please consult the department website or ask at the History department office (FND 202A).

Teacher Certification

Students interested in obtaining certification to teach history in the Commonwealth of Massachusetts should consult the chair of the Education Department.

Interdepartmental Majors

Students interested in a major combining history and international relations should consider the interdepartmental major in International Relations-History.

IR History Major Information

The IR-History Chair for 2014-15 is Professor Nikhil Rao.

Students who elect the International Relations-History major take the following courses in addition to the International Relations core:

1. Two history courses dealing substantively with the period before ca. 1900
2. Three history courses dealing with the modern history of countries or regions
3. Two courses dealing with modern international history to be selected in consultation with advisor
4. HIST 395: International History Seminar.

Three of these eight history courses must focus on one region of the world; at least three courses must deal with the non-Western world; and two must be at the 300 level.

5. One additional 200- or 300-level course in Africana Studies, Anthropology, Economics, Political Science, Sociology, or Women’s and Gender Studies.

History Minor

Requirements for the History Minor

The history minor consists of a minimum of five units of course work, of which at least four courses (4.0 units) must be above the 100 level and at least one course (1.0 unit) at the 300 level (excluding 350). Of these five courses, at least three courses (3.0 units) shall represent a coherent and integrated field of interest, such as American history, Medieval and Renaissance history, or social history. Of the other courses, at least one course (1.0 unit) shall be in a different field. Normally at least four courses (4.0 units) must be taken at Wellesley, and related courses in other departments will not count toward the minor.

HIST - History Courses

HIST 115 - First-Year Seminar: Routes of Exile: Jews and Muslims (1.0)

This course will examine exile—both internal and geographic—through contemporary memoirs, letters, novels, and films. Our primary focus will be on Jews and Muslims living in North Africa and the Middle East. Questions to be asked include: How was community defined? What provided the author with a sense of belonging? What prompts his/her exile? Is the homeland portable? If so, how, and on what terms? Each week we shall explore a different expression of exile. Discussion will include comparisons and contrasts with previous readings.

Instructor: Malino
Prerequisite: None. Open to first-year students only.
Distribution: HS
Term(s): Fall
No letter grade.

HIST 200 - Roots of the Western Tradition (1.0)

In this introductory survey, we will examine the religious, political, and scientific traditions of Western civilization originating in Mesopotamia and Egypt from 3500 B.C.E. and were developed by Greeks and Romans until the Islamic invasions of the seventh century C.E. The course will help students understand the emergence of polytheism and the great monotheistic religions, the development of democracy and republicanism, and the birth of Western science and the scientific method.

Instructor: Rogers
Prerequisite: None
Distribution: REP; HS
Term(s): Fall

HIST 201 - The Rise of the West? Europe 1789-2003 (1.0)

This course traces the history of Modern Europe and the idea of “the West” from the French Revolution to the Second Gulf War. We will explore the successes of empire, industry, and technology that underwrote European global domination until World War I and Europe’s subsequent financial dependence on the United States. We will reexamine conventional narratives of the rise of Europe and the West, and explore how people experienced ‘progress’ differently according to geography, class, gender, nationality, and ethnicity. We will also follow the emergence of mass consumption, urbanization, total war, genocide, and decolonization, as well as the developing political ideologies of national self-
determination, feminism, and human rights, and the
scientific idioms of eugenics, psychology, and
anthropology.
Instructor: Sobolodian
Prerequisite: None
Distribution: HS
Term(s): Spring

HIST 202 - Between Marx and Coca-Cola: Europe’s Global 1960s (1.0)
Europe’s world changed in the 1960s. Overseas
empires vanished in decolonization processes both
diplomatic and violent, leaving a place newly dubbed
“the Third World” and a project newly labeled
“development.” Western European youth born after
D-Day protested U.S. overseas wars even as they
consumed more American popular culture than ever.
A self-described New Left found inspiration in
Algerian revolutionaries, Cuban guerrillas, Maoist
Red Guards, and U.S. Black Panthers, while Eastern
Europe saw experiments in “socialism with a human
face.” This lecture course explores the world-making
projects of a decade lived “between Marx and Coca-
Cola” and tracks the long shadow cast by 1968 in
modern social progressive and conservative
terrorism, and developments such as legalized
U.S. imperialism, mass consumption, globalization,
and empires vanished in decolonization processes both
patterns of peace, violence, and the drug trade; the
imposing variety of revolution; ethnic, religious, feminist,
and political and cultural nationalism; the richness and
colonial rule; the role of urban centers in the
development in dependent economies; the
transnational migration and globalization.

Instructor: Slobodian
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 203 - Out of Many: American History to 1877 (1.0)
An introduction to American life, politics, and
culture, from the colonial period through the
aftermath of the Civil War. Surveys the perspectives
of the many peoples converging on North America
during this era, and explores the shifting fault lines of
“liberty” among them. Because Early America was not
inherently bound toward the creation of the
“United States of America,” we will ask how such an
unlikely thing, in fact, happened. How did a nation emerge from such a diverse array of communities?
And how did various peoples come to claim
citizenship in this new nation? Emphasis, too, on the
issues that convulsed the American colonies and
early republic: African slavery, revolutionary politics,
immigration, westward expansion, and the coming of
the Civil War.
Instructor: Grandjean
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 204 - The United States History in the Twentieth Century (1.0)
The United States’ past is one of making and
remaking the nation—as a government, a place, and
a concept. This course surveys that dynamic process from the post-Reconstruction period through 9/11.
Examining the people, practices, and politics behind
U.S. nation building, we will consider questions of
how different groups have defined and adopted
“American” identities, and how definitions of the
nation and citizenship shifted in relation to domestic
and global happenings. This will include considering how ideas of gender, race, ethnicity, and citizenship intersected within projects of nation building. We
will cover topics that include domestic race relations,
U.S. imperialism, mass consumption, globalization,
and terrorism, and developments such as legalized
segregation, the Depression, World Wars I and II, and
modern social progressive and conservative
movements.
Instructor: Greer
Prerequisite: None
Distribution: HS

HIST 205 - The Making of the Modern World Order (1.0)
This foundational course in international history
explores the evolution of trade, competition, and
cultural interaction among the world’s diverse
communities, from the Mongol conquests of the late
thirteenth century through the end of the twentieth
century. Themes include: the centrality of Asia to the
earliest global networks of trade and interaction; the
rise of European wealth and power in the
seventeenth and eighteenth centuries; empires;
imperialism and its impact; the evolution of the
nation-state; scientific and industrial revolutions; and
“modernization” and the new patterns of
globalization during the late twentieth century.
Attention to agents of global integration, including
trade, technology, migration, dissemination of ideas,
conquest, war, and disease.
Instructor: Matsuoka (Fall), Giersch (Spring)
Prerequisite: None
Distribution: HS
Term(s): Fall; Spring

HIST 206 - From Conquest to Revolution: A History of Colonial Latin America (1.0)
The “discovery” by Christopher Columbus in 1492 of
the “New World” unleashed a process of dramatic
changes in what we now call Latin America. Spurred
roughly from the fifteenth through the
mid-eighteenth centuries, this course examines the
ideological underpinnings of the Spanish Conquest,
the place of the Americas in a universal Spanish
empire, and the role of urban centers in the
consolidation of Spanish rule. Emphasis is placed on
indigenous societies and the transformation and
interactions with Africans and Europeans under
colonial rule; the role of Indian labor and African
slavery in the colonial economy; the creation,
consolidation, and decline of colonial political
institutions; and, finally, the role of religion and
baroque ritual in the creation of new hybrid colonial
cultures and identities.
Instructor: Oserio
Prerequisite: None
Distribution: HS
Term(s): Fall

HIST 207 - Contemporary Problems in Latin American History (1.0)
In this problem-centered survey of the
contemporary history of Latin America we will
critique and go beyond the many stereotypes that
have inhibited understanding between Anglo and
Latin America, cultivating instead a healthy respect
for complexity and contradiction. Over the course of
the semester we will examine key themes in current
history, including the dilemma of uneven national
development in dependent economies; the
emergence of anti-imperialism and various forms of
political and cultural nationalism; the richness and
variety of revolution; ethnic, religious, feminist,
literary, artistic, and social movements; the imposing
social problems of the sprawling Latin American
gigantopopuli; political heterodoxies of lefthand,
populism, authoritarianism, and neoliberalism;
the patterns of peace, violence, and the drug trade; the
considerable U.S. influence in the region, and finally,
transnational migration and globalization.
Instructor: Tumarkin
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 208 - Society and Culture in Medieval Europe (1.0)
This course examines life in medieval Europe c. 750-
1250 in all its manifestations: political, religious, social, cultural, and economic. Topics to be studied
include the papacy; the political structures of France,
Germany, and Italy; monks and monastic culture;
religion and spirituality; chivalry; courtly
love and literature; the crusading movement;
intellectual life and theological debates; economic
structures and their transformations; and the varied
roles of women in medieval life. Students will learn
to analyze and interpret primary sources from the
period, as well as to evaluate critically
historiographical debates related to medieval
history.
Instructor: Ramsayer
Prerequisite: None
Distribution: HS
Term(s): Spring

HIST 209 - The British Isles: From Roses to Revolution (1.0)
By the late seventeenth century, the British Isles
were poised to compete for European (and soon global) dominance, yet their unsteady road to power and
stability was precarious at every turn. This
course will thus explore a period that is often as
renowned as it is misunderstood and whose defining
events and personalities have long captured the
historical imagination: the Wars of the Roses; King
Henry VIII; Queens “Bloody” Mary and Elizabeth; the
British Civil War/Puritan Revolution; and the
Royal Restoration. While moving across time, we will also
focus on the broader socioeconomic, religious, and
intellectual changes that defined each monarch’s
reign. The course centers on England, but integrates
Scotland’s and Ireland’s particular histories of
conquest and resistance.
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 211 - Bread and Salt: Introduction to Russian Civilization (1.0)
For centuries, Russians have welcomed visitors with
offerings of bread and salt. This introductory course is an earthy immersion in Russian life and culture from the age of Tolstoy to Vladimir Putin. Black
bread, dense and pungent, is central to our
exploration of Russian drinking, feasting, and fasting.
We will also consider the patterns of autocratic and
communal rule and Russians’ current political and
corporate uses of portions of their history and
civilization. How did and do Russians understand,
represent, reinvent, and market their past? This
question will drive our discussions of national
identity in a country that twice—in the course of one
semester—lost an empire and struggled (and
continues to struggle) to create a new Russian
civilization and political culture.
Instructor: Tumarkin
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 212 - Atlantic Revolutions and the Birth of Nations (1.0)
This course deals with the momentous social,
political, and cultural transformations that
characterized the American, French, Haitian, and
Spanish American Revolutions (the “Atlantic
Revolutions”). Straddling the late eighteenth and
early nineteenth centuries (the “Age of
Revolutions”), these social and political movements
constituted a watershed of violent change that
ushered in the (many) problems and possibilities
of
the modern world: the birth of the Nation, nationalism, and democracy, among others. We will seek answers to questions such as, How did nationalism and universalism shape the nature and strategies of revolt and counter-revolution? What were the roles of slavery, race, women, religion, and geography in defining citizenship? How did historical writing and revolution work to create the foundational myths of the modern nation?

Instructor: Osorio
Prerequisite: None
Distribution: HS
Term(s): Spring

HIST 219 - The Jews of Spain and the Lands of Islam (1.0)
The history of the Jews in Muslim lands from the seventh to the twentieth century. Topics include Muhammad's relations with the Jews of Medina; poets, princes, and philosophers in Abbasid Iraq and Muslim Spain; scientists, scholars, and translators in Christian Spain; and the Inquisition and emergence of a Sephardic diaspora. Twentieth-century focus on the Jewish community of Morocco.

Instructor: Malino
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 220 - United States Consumer Culture and Citizenship (1.0)
We are a nation organized around an ethos of buying things. Throughout the twentieth century, the government, media, big business, and the public increasingly linked politics and consumerism, and the formulation has been a route to empowerment and exclusion. In this course, we study how and why people in the United States theorized about, practiced, and promoted mass material consumption from the turn of the twentieth century into the twenty-first. Topics will include the rise of consumer culture; the innovations of department stores, malls, freeways, and suburbs; developments in advertising and marketing; the global position of the American consumer in the post-World War II United States; and the political utility of consumption to various agendas, including promoting free enterprise, combating racism, and battling terrorism.

Instructor: Greer
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 222 - The Barbarian Kingdoms of Early Medieval Europe (1.0)
This course examines the Barbarian successor states established in the fifth and sixth centuries after the disintegration of the Roman Empire in the West. It will focus primarily on the Frankish kingdom of Gaul, but will also make forays into Lombard Italy, Visigothic Spain, and Vandal North Africa. In particular, the course will look in depth at the Carolingian empire established c. 800 by Charlemagne, who is often seen as the founder of Europe, and whose empire is often regarded as the precursor of today's European Union, Political, cultural, religious, and economic developments will be given equal time.

Instructor: Ramseyer
Prerequisite: None
Distribution: HS
Term(s): Fall

HIST 224 - Zionism and Irish Nationalism: A Comparative Perspective (1.0)
Theodore Herzl mused that he would like to be the Philosopher King (1.0) of his empire, and became a god. This course will examine the personality, career, and achievements of the greatest warrior in history.

Instructor: Rogers
Prerequisite: 229; None; 329: Permission of the instructor
Distribution: HS
Term(s): Not Offered

This course may be taken as either 229 or, with additional assignments, as 329.

HIST 230 - Greek History from the Bronze Age to the Death of Philip II of Macedon (1.0)
The origins, development, and geographical spread of Greek culture from the Bronze Age to the death of Philip II of Macedon. Greek colonization, the Persian Wars, the Athenian democracy, and the rise of Macedon will be examined in relation to the social, economic, and religious history of the Greek polis.

Instructor: Rogers
Prerequisite: None
Distribution: HS
Term(s): Spring

HIST 231 - History of Rome (1.0)
HIST 223 - History of the Holy Roman Empire to 1648 (1.0)
This course examines the Holy Roman Empire from its origins as a small city-state in the eighth century B.C.E. to its rule over a vast empire extending from Scotland to Iraq. Topics include the Etruscan influence on the formation of early Rome, the causes of Roman expansion throughout the Mediterranean during the Republic, the Hellenization of Roman society, the urbanization and Romanization of Western Europe, the spread of "mystery" religions, the persecution and expansion of Christianity, and the economy and society of the Empire.

Instructor: Rogers
Prerequisite: None
Thomasius, Beccaria, Herder, and Rousseau. Revolution. Authors include Spinoza, Leibniz, Locke, Newtonianism, rights and representation, and sensitivity, religious toleration and freedom of the press. A range of important themes: biblical criticism, deism on what makes this fascinating period distinctive: German militarism and anti-Semitism. We will focus on looking at differing theories of the city: Was it a place of freedom or increased control, especially for socially marginalized groups like women, colonized populations, and the poor? What is an artifact of dominant social forces or a space for individual self-creation? Themes we will cover include colonial urbanism, modernism, fascist city planning, suburbanization, tourism, migration, and reclamations of urban space by social movements, squatters, and youth subcultures. Instructor: Slobodian Prerequisite: None Distribution: HS Term(s): Fall

HIST 244 - History of the American West: Manifest Destiny to Pacific Imperialism (1.0) With its sweeping landscapes, grand myths, and oversized egos, the American West has loomed large within U.S. history. Since the nation’s birth, Americans looked toward the horizon and imagined their destinies, a gaze since copied by historians, novelists, and filmmakers. Nevertheless, the history of this vast region is much more fractured and complex. This course explores the West—as an idea and place—from the early nineteenth century through World War I. While we will engage the ways that Americans conjured and conquered the region, we will also look beyond their gaze toward the varied peoples, places, and forces that created the West. Topics covered include: Northern New Spain and Mexico; American Indians and U.S. expansionism; transcontinental and trans-Pacific trade and (im)migration; race, gender, and identity. Instructor: Quintana Prerequisite: None Distribution: HS Term(s): Spring

HIST 245 - The Social History of American Capitalism from Revolution to Empire (1.0) There is perhaps no better time than the present to study the history of American capitalism, as political leaders, pundits, bank and business executives, and workers across the world struggle to negotiate a reprieve from our current economic crisis. This course will explore the development of American capitalism from its birth in the mercantile world of imperial Great Britain through the financial ruin of the Great Depression. This course will closely examine the relationship between government, business, and society by engaging key moments in nineteenth-century American economic history: the rise of the corporation, transportation and communication innovations, industrialization, American slavery and commodity production, financial speculation and panic, the development of American banking, immigration policy, and labor relations. Instructor: Quintana Prerequisite: None Distribution: HS Term(s): Fall

HIST 246 - Vikings, Icons, Mongols, and Tsars (1.0) A multicultural journey through the turbulent waters of medieval and early modern Russia, from the Viking invasions of the ninth century and the entrance of the East Slavs into the splendid and mighty Byzantine world, to the Mongol overlordship of Russia, the rise of Moscow, and the legendary reign of Ivan the Terrible. We move eastward as the Muscovite state conquers the immense reaches of Siberia by the end of the turbulent seventeenth century, when the young and restless Tsar Peter the Great took his country to the forefront of modernity

HIST 233 - In Search of the Enlightenment (1.0) What was the Enlightenment? This course aims to help its participants develop an answer to that question. We will examine the state of the art in scholarly answers and test them against a series of classic documents of seventeenth- and eighteenth-century European intellectual history on a wide range of important themes: biblical criticism, deism and natural theology, Pietism and the “cult of sensibility,” religious toleration and freedom of the press, commerce and its moral implications, Newtonianism, rights and representation, and revolution. Authors include Spinoza, Leibniz, Locke, Thomasius, Beccaria, herder, and Rousseau. Instructor: Grote Prerequisite: None Distribution: HS Term(s): Spring

HIST 234 - The Holy Roman Empire: Religion, Politics, and Culture from Luther to Napoleon (1.0) This course traces the tumultuous history of Europe’s German lands in the three centuries between the Middle Ages and the modern era, long identified with the origins of twentieth-century German militarism and anti-Semitism. We will focus on what makes this fascinating period distinctive: Germany’s uniquely persistent political diversity and the religious schism that gave Germany multiple national religions. Topics include the Protestant Reformation, the Great Witch Panic, the devastating Thirty Years War that destroyed 150 years of economic growth, Prussia and Frederick the Great, the Enlightenment, the Napoleonic Wars, and the demise of the extraordinarily complex political system known as the Holy Roman Empire. Sources include treaties, treatises, literature, autobiographical texts, visual art, and music, by, among others, Luther, Bach, Lessing, Mozart, and Goethe. Instructor: Grote Prerequisite: None Distribution: HS Term(s): Not Offered

HIST 235 - The Birth of Economics: Adam Smith in Enlightenment Context (1.0) Adam Smith’s Wealth of Nations, first published in 1776, has long been regarded as a founding work of the modern discipline of economics, usually interpreted as a ringing endorsement of free-trade liberalism. We will spend the semester understanding and testing these interpretations by examining the intellectual and political contexts of Smith’s work. Authors include various Scottish luminaries and some of their English and continental contemporaries (Mandeville, Hume, Ferguson, and Smith himself, among others) whose texts illuminate a range of Enlightenment themes: conflict over Christian theology; speculation about the origins of human society; the birth of aesthetic theory amidst controversy about the social importance of the arts; new formulations of republican political ideals; and the emergence of the study of political economy and economic development. Instructor: Grote Prerequisite: None Distribution: HS Term(s): Fall

HIST 240 - Cities in Modern Europe (1.0) This lecture course explores the uses and visions of the city in Europe since the mid-nineteenth century. The course covers both the history of modern urban planning and the responses to it—the way the city was designed and the way it was inhabited. We will begin by looking at differing theories of the city: Was it a place of freedom or increased control, especially for socially marginalized groups like women, colonized populations, and the poor? What is an artifact of dominant social forces or a space for individual self-creation? Themes we will cover include colonial urbanism, modernism, fascist city planning, suburbanization, tourism, migration, and reclamations of urban space by social movements, squatters, and youth subcultures. Instructor: Slobodian Prerequisite: None Distribution: HS Term(s): Fall

HIST 242 - Postwar Europe and the Three Germanies (1.0) In 1945, Germany’s war had left much of Europe in ruins. Yet postwar planners recognized that the continent’s strongest economic power and most populous country would have to remain the center of a reconstructed Europe. This course explores the challenges confronting a divided continent after 1945 through the histories of East and West Germany, which faced similar problems but developed solutions that reflected the differing ideologies of state socialism and capitalism. It compares the relative influence of the U.S. and Soviet “partners,” strategies for dealing with the Nazi past and histories of collaboration, and efforts to build consumer culture and domestic consent. It also compares youth revolt, gender politics, and immigration, and explores the role of a third, reunified Germany in Europe and the world after 1989. Instructor: Slobodian Prerequisite: None Distribution: HS Term(s): Not Offered

HIST 243 - Gender and Sexuality in Twentieth-Century Europe (1.0) Issues of gender and sexuality were central to projects of social and political transformation in twentieth-century Europe. Regimes of nationalism, socialism, fascism, and capitalism each provided prescriptive models of “good” and “healthy” gender relationships, making sexuality the frequent and ongoing site for state and scientific intervention. At the same time, the ruptures of two world wars and the effects of modernization created spaces for unprecedented challenges to sexual mores from below. This course explores the fraught, and occasionally deadly, debates over sexual normalcy in twentieth-century Europe through the topics of eugenics, psychoanalysis, first- and second-wave feminism, the sexual politics of fascism, and the rise of the permissive society. Instructor: Slobodian Prerequisite: None Distribution: HS Term(s): Fall
Great travels to Western Europe to change Russia forever: We will focus on Khans, princes, tsars, nobles, peasants, and monks; social norms and gender roles; icons and church architecture; and a host of Russian saints and sinners.

Instructor: Tumarkin
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 247 - Splendor and Serfdom: Russia Under the Romanovs (1.0)**

An exploration of Imperial Russia over the course of two tumultuous centuries from the astonishing reign of Peter the Great at the start of the eighteenth century, to the implosion of the Russian monarchy under the unfortunate Nicholas II early in the twentieth, as Russia plunged toward revolution. St. Petersburg—the stunning and ghostly birthplace of Russia's modern history and the symbol of Russia's attempt to impose order on a vast, multiethnic empire—is a focus of this course. We will also emphasize the everyday lives of peasants and nobles; the vision and ideology of autocracy; Russia's brilliant intelligentsia; and the glory of her literary canon.

Instructor: Tumarkin
Prerequisite: None

Term(s): Fall

**HIST 248 - The Soviet Union: A Tragic Colossus (1.0)**

The Soviet Union, the most immense empire in the world, hurtled through the twentieth century, to the implosion of the Soviet Union in 1991, the most fundamental event of the post-Cold War period. The Soviet Union was the world's lone superpower, whose history is at once monumental and tragic. When the Russian Empire was transformed into a communist state in 1917, the outcome was uncertain. By 1991 the Soviet Union was the most massive and powerful empire the world had ever seen, a construct that was made possible by the extraordinarilycapable leadership of Lenin, Stalin, and Brezhnev. Yet the experiment proved vulnerable: the economy was inefficient, the people were restless, and much of the world was against it. This course will examine the history of the Soviet Union from its origins to its demise. We will explore the social, political, economic, and cultural history of the Soviet Union from the time of Peter the Great to the disintegration of the Soviet Union.

Instructor: Greer
Prerequisite: None

**HIST 249 - Cold War Culture and Politics in the United States (1.0)**

The Cold War was an era, a culture, and a set of policies defining U.S. domestic and foreign relations. This course examines Cold War politics, culture, and foreign policies in relation to various national developments—including the rise of social movements, changes in city landscapes, and the “birth of the cool”—and international events, including the Cuban Missile Crisis and conflicts concerning Vietnam. Bearing on these developments were opportunities and limitations that accompanied ideological struggles between the United States and the Soviet Union, the rise of new cultural industries, and demographic shifts in the United States. Broad topic areas include: U.S. foreign policies; conformity and deviation along lines of gender, race, and sexuality; and domestic and foreign perceptions of the United States in a Cold War context.

Instructor: Greer

**HIST 250H - Research or Individual Study (0.5)**

Prerequisite: Open to first-year students and sophomores
Distribution: None
Term(s): Fall; Spring

**HIST 252 - The Twentieth-Century Black Freedom Struggle (1.0)**

As popularly narrated, African Americans’ modern freedom struggle is a social movement beginning in the mid-1950s and ending in the late-1960s, characterized by the nonviolent protest of southern blacks and facilitated by sympathetic (non-southern) whites. In this course, we explore the multiple ways—beyond protest and resistance—that blacks in the twentieth-century United States struggled for their rights and equality using resources at their disposal. This exploration will take us out of the South and consider actors and activities often neglected in the narratives of the struggle. Throughout, we will return to the following questions: What defines a movement? What constitutes civil rights versus Black Power activity? How and why are people and institutions—then and now—invested in particular narratives of the black freedom struggle?

Instructor: Greer
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 253 - First Peoples: An Introduction to Native American History (1.0)**

An introduction to the history of Native American peoples, from precontact to the present. Through a survey of scholarly works, primary documents, objects, films, and Indian autobiographies, students will grapple with enduring questions concerning the Native past. How should we define “Native America”? How interconnected were Native peoples, and when? Can we pinpoint the emergence of “Indian” identity and understand how it developed? This course confronts those questions and other issues in Native American history, through such topics as the “discovery” by Europe and its effects, cultural and commercial exchange with Europeans, removal, the struggle for the West, the “Indian New Deal,” and the Red Power movement of the 1970s. Special attention to the Native northeast.

Instructor: Grandjean
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 254 - The American Revolution (1.0)**

This course considers America’s colonial past. It is a bloody but fascinating history, with plenty of twists and turns. We will investigate colonial American culture and ordinary life (including gender, family life, ecology, the material world, religion, and magical belief), as well as the struggles experienced by the earliest colonists and the imperial competition that characterized the colonial period. Between 1607 and 1763, a florid variety of cultures bloomed on the North American continent. We will explore these, with an eye toward understanding how the English colonies emerged from very uncertain beginnings to become—the mid-eighteenth century—the prevailing power on the continent.

Instructor: Grandjean

**HIST 260 - Pursuits of Happiness: America in the Age of Revolution (1.0)**

Investigates the origins and aftermath of one of the most improbable events in American history: the American Revolution. What pushed colonists to rebel, rather suddenly, against Britain? And what social struggles followed in the war’s wake? We will explore the experiences of ordinary Americans, including women and slaves; examine the material culture of Revolutionary America; trace the intellectual histories of the founders; and witness the creation of a national identity and constitution. Those who lived through the rebellion left behind plenty of material: letters; pamphlets; tea pots; runaway slave advertisements; diaries. We will consider these and more. Visits to Boston historic sites will take you back in time and space to the besieged, volatile city that led the colonies into war.

Instructor: Grandjean
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 263 - South Africa in Historical Perspective (1.0)**

An analysis of the historical background and lasting consequences of apartheid, focusing on the transformation of the African communities in the period of commercial capitalist expansion (1652-1885) and in the industrial era (1885 to the present). Important themes are: the struggle for land and labor; the fate of African peasants, labor migrants, miners and domestic servants; the undermining of the African family; the diverse expressions of African resistance; and the processes which are creating a new, post-apartheid South Africa. The enormous challenges of reversing inequality and resolving conflicts will receive special attention.

Instructor: Kapteijns
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 265 - History of Modern Africa (1.0)**

Many of Africa’s current characteristics are the legacy of colonial domination. We will therefore study different kinds of colonies, from those settled by White planters to the “Cinderellas” in which colonial economic intervention was (by comparison) minimal and the struggle for independence less bloody. For the post-independence period, we will focus on the historical roots of such major themes as neocolonialism, economic underdevelopment, ethnic conflict and genocide, HIV/AIDS, and the problems of the African state. However, Africa’s enormous natural and human resources, its resilient and youthful population, and its vibrant popular culture—a strong antidote against Afro-pessimism—will help us reflect on the future of this vast continent.

Instructor: Kapteijns
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 267 - Deep in the Heart: The American South in the Nineteenth Century (1.0)**

Perhaps no other region in the United States conjures up more powerful imagery than the American South—stately mansions with live oak avenues juxtaposed with the brutal reality of slavery. Yet this same region gave birth to other,
perhaps more powerful, cultural legacies—jazz and the blues, the freedom struggle and Jim Crow—a heritage both uniquely Southern and yet deeply American. To better understand this region that has always seemed to stand apart, this course will examine the early history of the American South from the Revolutionary War through the beginning of the twentieth century. Topics covered will include: African American slavery and emancipation, the Civil War, Reconstruction, the spread of evangelical Christianity, Indian Removal, African American culture, and the rise of Jim Crow segregation.

Instructor: Quintana
Prerequisite: None
Distribution: HS
Term(s): Spring

**HIST 269 - Japan, the Great Powers, and East Asia, 1853-1993 (1.0)**

The history of Japan's international relations from the age of empire through the end of the Cold War. Topics include: imperialism and nationalism in East Asia, diplomacy and military strategy, international economic competition, cultural and "civilizational" conflicts, World War II in East Asia, the U.S.-Japan alliance, and the politics of war memory. Special emphasis on Japan’s relations with the United States, China, Russia, and Korea.

Instructor: Matsuoka
Prerequisite: None
Distribution: HS
Term(s): Spring

**HIST 270 - Colonialism, Nationalism, and Decolonization in South Asia (1.0)**

The Mughal Empire in late seventeenth-century India was recognized as one of the richest and strongest powers in the world. Yet by the early nineteenth century, the British ruled the subcontinent. This course begins by examining the colonization of India. Colonial rule meant important changes to Indian life, spurred by British attempts to create private property, introduce social reforms, and spread English education. However, colonial rule also led to nationalism and efforts to imagine India as a unified nation-state. The course considers leaders such as Mohandas Gandhi and Mohammed Ali Jinnah's struggles against the British, culminating in Independence but also Partition of the subcontinent in 1947. We consider a wide range of sources including films, literature, and primary documents.

Instructor: Rao
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 271 - Political Economy of Development in Colonial and Postcolonial South Asia (1.0)**

In 1947, India was partitioned into India and Pakistan. Since then, these countries have wrestled with issues of governance and development, but colonial rule casts a long shadow over their efforts. This course introduces students to the complex polioeconomic landscape of the subcontinent by examining how the idea of development changes in modern South Asia's history. How did development efforts embedded in contexts of politics, society, and culture? How do political systems affect decisions? This course considers these questions by examining themes such as the colonial state's construction of railway and irrigation networks; Gandhi's critique of industrialization; Nehru's vision of an industrial economy; the challenges posed by Partition and militarization of Pakistan; the Green Revolution; and the onset of economic deregulation.

Instructor: Rao
Prerequisite: None
Distribution: HS
Term(s): Winter

**HIST 274 - China, Japan, and Korea in Comparative and Global Perspectives (1.0)**

Overview of each political/cultural community and their interactions from ancient times to 1912. Topics from earlier periods include ancient mytho-histories and archaeologica records, the rise of China’s Han and Tang empires, selective adaptations of Chinese patterns by indigenous polities and societies in Korea and Japan, commercial and technological revolution in China and its international impact, Mongol “globalization,” Japan in the age of the samurai, and Korea in the heyday of the yangban. Topics from later periods include the growth of international trade in East Asia and early modern developments in Ming-Qing China, Tokugawa Japan, and Late Choson Korea. Coverage extends through first waves of colonization in the late nineteenth century and the Europe’s expansion and the divergent trajectories of modern transformation in each society.

Instructor: Matsuoka
Prerequisite: None
Distribution: HS
Term(s): Fall

**HIST 275 - The Emergence of Ethnic Identities in Modern South Asia (1.0)**

South Asian society has long been represented by rigid systems of hierarchy. Caste, most famously, has been represented as an inexorable determinant of social possibility. Yet, what are the ways in which people actually identify themselves, and to what extent is hierarchical identification a product of South Asia’s modern history? This course explores the problems of social and cultural difference in South Asia. How do modern institutions such as the census and electoral politics shape the way in which these problems are perceived today? What are the effects of the introduction of English education? Caste will be the primary form of identity that we explore, but we also consider class, religion, and gender in seeking to unravel the complex notion of ethnicity.

Instructor: Rao
Prerequisite: None
Distribution: HS
Term(s): Spring

**HIST 276 - The City in South Asia (1.0)**

South Asian cities are currently undergoing massive demographic and spatial transformations. These cannot be understood without a consideration of both the specific history of South Asia and a broader account of urban change. This course examines these changes in historical perspective and situates urban South Asia within a global context. How did colonial rule transform old cities such as Delhi and Lahore? How were the differing ideologies of India and Pakistan mapped onto new capitals such as Chandigarh and Islamabad? How are ethnic pasts and techno-futures reconfigured in booming cities such as Bangalore and Mumbai? What are the connections between the urban environment and political mobilization? We consider a range of sources, including scholarly literature, films, and short stories.

Instructor: Rao
Prerequisite: None
Distribution: HS
Term(s): Fall

**HIST 277 - China and America: Evolution of a Troubled Relationship (1.0)**

A survey of China’s economic, cultural, and political interactions with the United States from 1784 to present with a focus on developments since 1940. Principal themes include: post-imperial China’s pursuit of wealth and power, changing international conditions, military strategy, the influence of domestic politics and ideology, and the basic misunderstandings and prejudices that have long plagued this critical relationship. Topics include: trade throughout the centuries; American treatment of Chinese immigrants; World War II and the Chinese Revolution; the Cold War; Taiwan; and the ongoing instability of relations since 1979. Sources include the ever-increasing number of declassified U.S. documents as well as critical materials translated from the Chinese.

Instructor: Giersch
Prerequisite: None
Distribution: HS
Term(s): Not Offered

**HIST 278 - Reform and Revolution in China, 1800 to the Present (1.0)**

From shattering nineteenth-century rebellions that fragmented the old empire to its emergence as a twenty-first century superpower, few places have experienced tumult and triumph in the same massive measures as modern China. To understand China today, one must come to terms with this turbulent history. This course surveys China’s major cultural, political, social, and economic transformations, including failed reforms under the last dynasty; the revolutions of 1911 and 1949; the rise of the Communist Party and Mao’s transformation of society and politics; the remarkable market reforms of recent decades; the contentious issue of Taiwan’s democratic transition; and China’s ongoing effort to define its position within East Asia and the world.

Instructor: Giersch
Prerequisite: None
Distribution: HS
Term(s): Spring

**HIST 279 - Heresy and Popular Religion in the Middle Ages (1.0)**

This course looks at popular religious beliefs and practices in medieval Europe, including miracles, martyrdom and asceticism, saints and their shrines, pilgrimages, relics, curses, witchcraft, and images of heaven and hell. It seeks to understand popular religion both in its own terms as well as in relationship to the church hierarchy. It also examines the basis for religious dissent in the form of both intellectual and social heresies that led to religious repression and the establishment of the Inquisition in the later Middle Ages.

Instructor: Ramsayer
Prerequisite: Permission of the instructor
Distribution: HS
Term(s): Not Offered
This course may be taken as 279 or, with additional assignments, as 379.

**HIST 280 - Topics in Chinese Commerce and Business (1.0)**

China’s stunning economic growth and the increasing visibility of transnational businesses run by entrepreneurs of Chinese descent have produced many efforts to explain the successes of “Chinese capitalism” and the “Chinese model.” Central to many arguments are debatable approaches to culture and history. Is there a uniquely Chinese way of doing business? Has mainland China developed a revolutionary new path of economic development? This course engages these debates through
influential works on Chinese business and economic history, from the nineteenth century through the reform period (1978 to the present). Topics include corporate governance and the financing of firms; the role of kinship and networking (guanxi); changing political contexts of development; competition with foreign firms; the impact of globalization; and debates over China’s remarkable economic rise.

Instructor: Giersch
Prerequisite: None
Distribution: HS
Term(s): Fall

HIST 284 - The Middle East in Modern History (1.0)
This course provides a survey of Middle Eastern history from c.1900 to present, with an emphasis on the Arab Middle East. It will focus on the historical developments of the period: the demise of the Ottoman Empire at the end of World War I; the Armenian genocide; the establishment of European "mandates" in most of the Arab world and the nationalist struggles for independence that ensued; the establishment of Israel and the expulsion of Palestinians in 1948; the Lebanese Civil War of 1975-1990; the Iranian Islamic Revolution of 1979 and the rise of Islamist political movements elsewhere; the regime of Saddam Hussein; the occupation of Kuwait and the Gulf War of 1990-1991; the failure of the Oslo peace process, Israeli settlements, and the increasing political power of Hamas and Hezbollah; the war in Iraq; the challenge of a potentially nuclear Iran; and the still unfolding and perhaps misnomered "Arab Spring."

Instructor: Kapteijns
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 290 - Morocco: History and Culture (Wintersemester in Morocco) (1.0)
An introduction to Moroccan culture, history, and society through experiential and classroom learning. Students will participate in seminars and attend lectures given by Moroccan faculty at the Center for Cross-Cultural Learning in Rabat. Program themes include: women in private and public life, Berber culture, Islamic, Arabic, Morocco’s Jewish heritage and history, and the legacy of European cultural rule. Students will travel as a group to the central and southern regions of the country to study historic sites and contemporary life and culture in a variety of rural and urban settings.

Prerequisite: None. Application required.
Distribution: HS
Term(s): Winter
Not offered every year. Subject to Provost’s Office approval.

HIST 293 - Changing Gender Constructions in the Modern Middle East (1.0)
Intertwined with the political history of the modern Middle East are the dramatic cultural and social changes that have shaped how many Middle Easterners live their lives and imagine their futures. This course explores the historical contexts of the changing constructions of femininity and masculinity in different Middle Eastern settings from World War I to the present. Such contexts include nationalist and Islamist movements; economic, ecological, and demographic change; changing conceptions of modernity and tradition, individual and family, and public and private space; and state violence and civil war. Primary sources will focus on the self-representations of Middle Eastern men and women as they engaged with what they considered the major issues of their times.

Instructor: Kapteijns
Prerequisite: None
Distribution: HS
Term(s): Not Offered

HIST 298 - United States and the Middle East Since World War II (1.0)
Using primary sources in translation and related readings, the course will critically analyze the programs, leadership, and strategies of protest and reform movements in the modern Middle East and North Africa. Through a selection of case studies (e.g. Algeria, Afghanistan, Egypt) students will develop an understanding of the historical roots, theoretical bases, and social dynamics of these movements and the salience of Islamic ideology and practice in contemporary political and cultural discourses in the region.

Instructor: Rollman
Prerequisite: None
Distribution: HS
Term(s): Summer II

HIST 299 - U.S. Environmental History (1.0)
This course examines the relationship between nature and society in American history. The course will consider topics such as the decimation of the bison, the rise of Chicago, the history of natural disasters, and the environmental consequences of war. There are three goals for this course: First, we will examine how humans have interacted with nature over time and how nature, in turn, has shaped human society. Second, we will examine how attitudes toward nature have differed among peoples, places, and times and we will consider how the meanings people give to nature inform their cultural and political activities. Third, we will study how these historical forces have combined to shape the American landscape and the human and natural communities to which it is home. While this course focuses on the past, an important goal is to understand the ways in which history shapes how we understand and value the environment as we do today.

Instructor: Turner (Environmental Studies)
Prerequisite: None
Cross-Listed as: ES 299
Distribution: HS
Term(s): Not Offered

HIST 302 - Seminar. World War II as Memory and Myth (1.0)
This seminar explores the many ways that victors and vanquished, victims and perpetrators, governments, political groups, and individuals have remembered, celebrated, commemorated, idealized, condemned, condenoned, forgotten, ignored, and grappled with the legacies of World War II in the past half-century. Our primary focus is the war in Europe, including Poland and Russia, although we will also consider the United States and Japan. We will investigate the construction of individual and collective memories about World War II and the creation and subsequent transformation of set myths about the war experience. In addition to books and articles, sources will include memoirs, primary documents, and films. We will also study the impact of war memories on international relations and analyze the “monumental politics” of war memorials.

Instructor: Tumarkin
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

HIST 319 - Seminar. Fear and Violence in Early America (1.0)
This seminar explores the terrors that stalked the inhabitants of colonial and early national America. How did early Americans describe their fears? What did they find frightening? And what roles did fear and violence play in shaping American society? In this seminar, we will first explore the language and psychology of fear, and then study the many ways that terror intruded on early American lives. Topics include the role of terror in early American warfare; fear of the supernatural; domestic violence and murder; the specter of slave rebellion; and fear and violence as entertainment in public executions and in early American literature.

Instructor: Grandjean
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

HIST 320 - Seminar. The Hand that Feeds: A History of American Food (1.0)
This seminar investigates the place of food in American history and culture, from reputed cannibalism in the American colonies to the rise of...
fast food in the twentieth century. Through selected episodes and commodities, we will explore the role of taste, competition for food, and capitalism in recasting American lives and identities. Topics include: colonial hunger and violence; the development of taste and "refined" eating; the role of food in defining race, class, and regional culture; the rise of mass production and its environmental effects and the reshaping of American bodies. In following the evolution of American food ways, we will visit eighteenth-century coffeehouses, antebellum slave quarters, campfires of the American West, the slaughterhouses of the Chicago meat market—and, of course—McDonald's.

Instructor: Grandjean
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Spring

**HIST 329 - Alexander the Great: Psychopath or Philosopher King (1.0)**
Alexander the Great murdered the man who saved his life, married a Bactrian princess, and dressed like Dionysus. He also conquered the known world by the age of 33, fused the Eastern and Western populations of his empire, and became a god. This course will examine the personality, career, and achievements of the greatest warrior against the background of the Hellenistic world.

Instructor: Rogers
Prerequisite: Permission of the instructor.
Distribution: HS
Term(s): Not Offered

**HIST 330 - Seminar. Revolution and Rebellion in Twelfth-Century European Society (1.0)**
This course will examine the revolutionary changes that occurred in all facets of life in twelfth-century Europe. The twelfth century represents one of the most important eras of European history, characterized by many historians as the period that gave birth to Europe as both idea and place. It was a time of economic growth, religious reformation, political and legal reorganization, cultural flowering, intellectual innovation, and outward expansion. Yet the twelfth century had a dark side, too. Crusades and colonization, heresy and religious disputes, town uprisings and mob violence also marked the century. Students will study the internal changes to European society as well as the expansion of Europe into the Mediterranean and beyond, paying close attention to the key people behind the transformations.

Instructor: Ramseyer
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Spring

**HIST 334 - Seminar. World Economic Orders, 1918-2008 (1.0)**
The idea of the "world economy" as a single, interconnected entity only entered widespread discussion in Europe and North America after World War I. This course explores the diverse ways of imagining and ordering the world economy since then and what Europe's place has been within it, from imperial economies to national economies to a supposedly "globalized" economy to recent talk of the European Union away from the United States and toward China and Russia. We will see how ideas such as development, modernization, and globalization have dictated falsely universal models, but have also served as emancipatory idioms for prevously marginalized individuals and populations. We will demystify economic arguments and learn to study economic texts for their content, but also as political and cultural documents.

Instructor: Slobodian
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Spring

**HIST 340 - Seeing Black: African Americans and United States Visual Culture (1.0)**
This course explores black Americans' relationship to visual culture in the twentieth-century United States. We will examine how African Americans have produced, used, and appeared in the visual media of news, entertainment, and marketing industries, and evaluate the significance of their representation to both black and non-black political and social agendas. Areas of inquiry will include the intersections between U.S. visual culture and race relations, African Americans' use of visual culture as a means of self- and group-expression, and the state's use of black media images. This exploration will take us through a study of Jim Crow politics, black migrations and artistic movement, U.S. foreign relations and conflicts, and the development of marketing and advertising.

Instructor: Greer
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

**HIST 341 - At the Margins: Social Movements and Countercultures in the Twentieth-Century United States (1.0)**
What do southern tobacco laborers, San Francisco's Daughters of Bilitis, beat poets, Las Vegas hotel workers, and Afrika Bambaataa have in common? In this 20th century U.S. history course, we will examine how these different groups experienced their marginal position within U.S. culture. We will look at the various strategies they used to challenge the status quo and to protect, promote, and express themselves. We will also examine resistance to their efforts to do so, and how these contests shaped U.S. culture. Throughout, we will pay close attention to the formation and structure of political, economic, and social movements. Historical actors we will follow include: members of queer communities, black feminists, welfare recipients, illegal "aliens," female athletes, and hip hop artists.

Instructor: Blanton
Prerequisite: By permission of the instructor.
Distribution: HS
Term(s): Fall

**HIST 346 - Japan's East Asian Empire in Comparative Perspective, 1879-1951 (1.0)**
This seminar explores the history of the Japanese empire in East Asia beginning with the annexation of the Ryukyu Islands (today, Okinawa Prefecture) to the evacuation of occupied territories after Japan's defeat in the Second World War. Issues to be examined include: the comparative typology of Japanese imperialism; the metropolitan perspective on expansionism; the colonial experience in Taiwan and Korea; informal empire in China (emphasizing the Northeast); the wartime empire; and the immediate aftermath of Japan's imperial collapse. Comparisons will be made with both European overseas (e.g., Africa, Southeast Asia) and colonial imperialisms (e.g., Germany, Russia). Readings include monographs, essay collections, journal articles, and some translated primary sources. A 25-page research paper is expected.

Instructor: Matsusaka
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Spring

**HIST 347 - Seminar. Meiji Japan and the Rise of the East Asian Modern 1868-1912 (1.0)**
Japan was the first Asian country to succeed in reproducing the twin pillars of nation-state and industrial economy sustaining nineteenth- and early twentieth-century Western modernity. This seminar takes a close look at Japan in the Meiji era (1868-1912) with emphasis on the development of innovative and adaptive strategies, cultural as well as political, and economic, for nation-building and "boot strap" industrialization. Although this achievement owed much to a reverse-engineering of the Western "miracle," it also drew heavily upon indigenous cultural and institutional resources. The result was a new, "East Asian modern" that would have profound influence on the region as a whole as well as twentieth-century Japan. Readings include unpublished primary sources in translation. A 25-page research paper is required.

Instructor: Matsusaka
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Spring

**HIST 350 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

**HIST 350H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

**HIST 352 - Seminar. The Origins of Modernity in East Asia and Europe (1.0)**
This seminar explores the origins and nature of modernity through comparative historical analysis. It begins with a look at a cluster of developments emerging ca. 1500-1850 commonly defining European modernity: market capitalism, industrialization, and the nation-state and its social engineering projects, along with freedom, progress, and scientific rationality. Recent scholarship on East Asia, however, reveals that China and Japan produced "ingredients" strikingly similar to those in Europe (and often in much earlier times). Why, then, did East Asia fail to produce a sustained and interactive "modern" complex of conditions until the wholesale adoption and adaptation of European models in the late nineteenth century? What were the causes and significance of this divergent path? Research paper required.

Instructor: Matsusaka
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

**HIST 353 - Seminar. Sentimental Education in Early Modern Europe (1.0)**
Humans have been called rational animals since antiquity, but the notion that we should also develop
HIST 358 - Seminar. Pepper, Silver, and Silk: The Political Culture of Early Commodity Circulation (1.0)
In the sixteenth century for the first time the world became linked through networks of global trade. From Lisbon to Calicut to Macao to Manila to Potosi to Antwerp, peoples and places became increasingly integrated through labor systems, migration, and new economic and political relationships. This course examines the development of these relationships and their political and cultural implications thorough the lens of the trade in pepper, the circulation of silver, and the manufacture of silk from the 1480s to 1700. Rather than focusing on the purely economic aspects of the trade, we will examine the new technologies and knowledge(s) that made global integration possible; the social and cultural revolutions fashioned by the production, consumption, and circulation of these commodities; and the political transformations that accompanied this circulation.

Instructor: Grote
Prerequisite: Open to juniors and seniors who have taken a grade II unit in history and/or a grade II unit in a relevant area/subject by permission of the instructor.
Distribution: HS
Term(s): Spring

HIST 370 - Senior Thesis (1.0)
Prerequisite: HIST 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

HIST 371 - Seminar. Chinese Nationalism and Identity in the Modern World (1.0)
China’s emergence as a great power is of vital importance, but recent violence in Xinjiang and international disputes with neighbors over China’s claims to the South Sea raise questions about how Chinese envision their multiethnic nation and its place in the world. This course places these questions in historical context by examining the evolution of modern China’s national and ethnic identities. Topics include: the birth of Chinese nationalism; revolutionary nationalism under the Communists; struggles over women’s place in the nation; propaganda, popular culture, and nationalism; nationalism and foreign policy; and alternative visions, including Tibetan and Uyghur identities.

Instructor: Giersch
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

HIST 372 - Seminar. Chinese Nationalism and Identity in the Modern World (1.0)
China’s emergence as a great power is of vital importance, but recent violence in Xinjiang and international disputes with neighbors over China’s claims to the South Sea raise questions about how Chinese envision their multiethnic nation and its place in the world. This course places these questions in historical context by examining the evolution of modern China’s national and ethnic identities. Topics include: the birth of Chinese nationalism; revolutionary nationalism under the Communists; struggles over women’s place in the nation; propaganda, popular culture, and nationalism; nationalism and foreign policy; and alternative visions, including Tibetan and Uyghur identities.

Instructor: Giersch
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

HIST 375 - Seminar. Empire and Modernity: The Rise and Fall of Spanish World Power (1.0)
This course traces the rise and fall of the first modern European Empire, the Spanish Empire. This first global empire ca. 1500 ruled over parts of Europe, Africa, the Americas, and Asia. This course provides a historical understanding of early modern ideologies, the institutions and the cultural practices that enabled Spain to rule over such vast territories. To this end we will examine the early modern precedents of modern imperialism; theories of empire and monarchy; ideologies of conquest and colonization; theories of modernity and empire; models of conquest and colonial exploitation; the role of race and slavery in empire building abroad and at home; the various ways in which the “conquered” colonized Europe and Europeans; and the long-term consequences of these exchanges.

Instructor: Osorio
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Fall

HIST 376 - Seminar. The City in Latin America (1.0)
Urbanity has long been central to Latin American cultures. This seminar examines the historical development of Latin American cities from the Roman principles governing the grid pattern imposed by the Spanish in the sixteenth century through the development of the twentieth-century, postmodern megalopolis. The seminar’s three main objectives are to develop a theoretical framework within which to analyze and interpret the history, and historical study of, Latin American cities; to provide a basic overview of the historical development of cities in the context of Latin American law, society, and culture; and to subject to critical analysis some of the theoretical “models” (i.e., Baroque, Classical, Dependency, Modernism, and so on) developed to interpret the evolution and workings of Latin American cities.

Instructor: Osorio
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

HIST 379 - Heresy and Popular Religion in the Middle Ages (1.0)
This course looks at popular religious beliefs and practices in medieval Europe, including miracles, martyrdom and asceticism, saints and their shrines, pilgrimages, relics, curses, witchcraft, and images of heaven and hell. It seeks to understand popular religion both on its own terms, as well as in relationship to the church hierarchy. It also examines the basis for religious dissent in the form of both intellectual and social heresies that led to religious repression and the establishment of the Inquisition in the later Middle Ages.

Instructor: Ramsayer
Prerequisite: Permission of the instructor.
Distribution: HS
Term(s): Not Offered

HIST 382 - Seminar. Gandhi, Nehru, and Ambedkar: The Making of Modern India (1.0)
The creation of the world’s largest democracy brought powerful ideas into contact and conflict: the overthrow of colonial rule through a philosophy of nonviolence; the desire to industrialize rapidly; and the quest to end centuries of caste discrimination. This seminar explores the key ideas that shaped modern India through the lives and extraordinary individuals. How did Gandhi’s experiments with food and sex affect his vision of India? How did Nehru’s understanding of world history structure his program of industrialization? How did Ambedkar’s untouchable upbringing shape his agenda? Could Gandhi’s nonviolent agenda be sustained? Could an India based on individual transformation also annihilate caste? We engage extensively with primary sources such as autobiographies, writings, and speeches, as well as scholarly accounts and films.

Instructor: Rao
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Fall

HIST 383 - Seminar. 1947: Partition in History and Memory in South Asia (1.0)
In the years leading to 1947, nationalist activism against the British and tensions between Hindus and Muslims escalated in the Indian subcontinent. This culminated in Partition and the emergence of the nations of India and Pakistan. Independence was marred, however, by the bloodshed accompanying the mass movements of Muslims into Pakistan and Hindus into India. What were the factors leading to this juxtaposition of triumphal Independence with shameful Partition? How have memories of Partition continued to affect powerfully politics and culture in the subcontinent? This seminar investigates such
questions using a wide variety of materials, including novels, such as Salman Rushdie’s *Midnight’s Children* and Bapsi Sidhwa’s *Cracking India*, feature films, such as Deepa Mehta’s *1947*, and documentary films, such as Sabiha Sumar’s *Silent Waters*.

Instructor: Rao
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject.
Distribution: HS
Term(s): Not Offered

**HIST 395 - International History Seminar (1.0)**

Readings in the histories of ethnic and religious violence. A crucial aspect of contemporary international history is the large-scale ethnic and religious violence that has marked civil wars throughout the world, from the former Yugoslavia to Somalia and Sierra Leone, and from Israel to Sri Lanka and Tibet. Though such violence is often labeled ethnic or religious, its causes are much broader. A conceptual unbundling of causal strands (diachronic and synchronic) can bring into focus different ways of dealing with the legacy of violence. Readings will also focus on local and international (humanitarian, legal, cultural, and military) interventions to end such conflicts, as well as approaches to post-conflict reconstruction. Students will choose their own research topics, and will approach them through the lens of the conceptual readings of the syllabus.

Instructor: Kapteijns
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject and permission of the instructor.
Distribution: HS
Term(s): Fall

**HIST 396 - Port Cities of the Indian Ocean in Historical Perspective (1.0)**

This is a research seminar about themes in the history of Indian Ocean port cities, namely those situated on the littorals of the Red Sea, East Africa, the Persian Gulf, and South Asia. The course engages with different dimensions of life in port cities, including their relations with immediate or distant overlords; diverse communities of traders; flows of religious experts, free and unfree labor, and other migrants; the technology that sustained oceanwide links and the epidemics that threatened them; and the impact of colonial (especially British) rule. Covering the period 1500 to the present, the course emphasizes the period preceding World War II, yet traces some themes to the present. Student research papers are at the center of this seminar.

Instructor: Kapteijns and Rao
Prerequisite: Normally open to juniors and seniors who have taken a 200-level unit in history and/or a 200-level unit in a relevant area/subject and have permission of the instructor(s).
Distribution: HS
Term(s): Not Offered
INTERNATIONAL RELATIONS

AN INTERDEPARTMENTAL MAJOR
International relations is an interdisciplinary field concerned with understanding global interactions, both in the historical past and in the present. The major is designed to expose students to a wide range of viewpoints and analytical methodologies in their study of such fields as diplomacy and foreign policy, peace, war and security, international political economy and development, and human rights.

The International Relations major is an interdepartmental major organized into three tracks: International Relations-Economics; International Relations-History; and International Relations-Political Science. All three tracks of the major share a set of five common “core” courses.

The majors are administered by their “home” departments, and interested students should contact the relevant department chair or contact person for guidance on choosing an advisor and completing the major. For 2014-15, these are the contact people:

Economics: Akila Weerapana
History: Nikhil Rao
Political Science: Stacie Goddard

Students who elect one of these International Relations majors may not combine it with a second major in their track department—e.g., students may not double major in International Relations-Economics and Economics. Other double majors are permitted, but generally unavoidable.

International Relations Major

Goals for the International Relations Major

- A student who completes a major in international relations will acquire the depth of knowledge and intellectual skills equivalent to completing a major in one of the three component disciplines (economics, history, political science).
- The student will also acquire the breadth of knowledge about the other two component disciplines necessary for an interdisciplinary approach to the study of international relations.
- The student will demonstrate advanced competence in the reading, writing, and speaking of a language other than English.
- International Relations-Economics majors will acquire a more in-depth understanding of international trade, development or finance, as well as a familiarity with empirical research done in one of these three areas.
- International Relations-History majors will acquire specific knowledge about the history of modern international relations, an appreciation of the importance of culturally and geographically localized historical knowledge in the analysis of global change, and an understanding through case studies, of the relevance of history to contemporary international issues.
- International Relations-Political Science majors will be familiar with the historical study of international relations across both world regions and centuries, complete at least five courses in the International Relations subfield, and engage in intensive research, writing, and interaction with a faculty member.

Requirements for the International Relations Major

International Relations majors consist of 14 units of course work—five core courses plus nine courses in one of the three tracks. In addition to this course work, all International Relations students are required to demonstrate advanced proficiency in a modern language, normally defined as two units of language study beyond the minimum required by the College. Language courses do not count towards the minimum 14 courses. Students who studied in educational systems requiring them to read, write, and speak a language other than English have met the language requirement for the IR major. If you intend to fulfill your language requirement this way, please provide your advisor with a signed statement attesting to the above under the honor code.

Five core courses: All students majoring in International Relations must take the following courses:

- ECON 101; ECON 102; ECON 213 or ECON 214 or ECON 220; HIST 205; POL3 221

It is strongly recommended that students complete all core courses by the end of the sophomore year.

Nine courses in one of the following majors:

Economics

- Students who elect the International Relations-Economics major take the following courses in addition to the International Relations core:
  - ECON 103/SOC 190, ECON 201, ECON 202, and ECON 203.
  - At least two of the following electives:
    - ECON 311, ECON 312, ECON 313, ECON 314, ECON 319, ECON 320, or ECON 333.
  - One intermediate or advanced history course dealing with the history of a country or region outside the United States or with international or diplomatic history.

History

- History students who elect the International Relations-History major take the following courses in addition to the International Relations core:
  - Two history courses dealing substantively with the period before ca. 1900
  - Three history courses dealing with the modern history of countries or regions
  - Two courses dealing with modern international history to be selected in consultation with advisor
  - HIST 395: International History Seminar.
  (Three of these eight history courses must focus on one region of the world; at least three courses must deal with the non-Western world; and at least two must be at the 300 level.)
  - One additional 200- or 300-level course in Africana Studies, Anthropology, Economics, Political Science, Sociology, or Women’s and Gender Studies

Political Science

- Students who elect the International Relations-Political Science major take the following courses in addition to the International Relations core:
  - Five political science courses in international relations (i.e., POL3 courses or POL2 courses that the director agrees may count as POL3), at least two of which must be at the 300 level and one of which must be a seminar
  - Two political science courses in comparative politics:
    - Either POL2 202 or POL2 204, and one of the following area studies courses: POL2 205, POL2 206 [2009-10], POL2 207, POL2 208, POL2 209 [2008-2009], or POL2 211
  - One political science course in American politics or in political theory or statistics and data analysis
  - One additional 200- or 300-level course in Africana Studies, Anthropology, Economics, History, Sociology, or Women’s and Gender Studies

With the approval of the International Relations director and the chair of the department in which she is majoring, a student may count up to two Wellesley courses taken outside the departments of Economics, History, or Political Science toward the nine courses in her major. Attention is particularly drawn to International Relations-related courses offered in the departments of Africana Studies, Anthropology, Sociology, and Women’s and Gender Studies.

Honors in International Relations

The policies governing eligibility for honors work in International Relations-Economics, International Relations-History, or International Relations-Political Science are set by the individual departments. Students interested in pursuing honors should consult the relevant departmental entry in the Bulletin.

Advanced Placement Policy in International Relations

The International Relations program’s policy about AP/IB credit follows that established by the relevant department. Please consult directions for election in the departments of Economics, History, and Political Science. In no case do AP credits count toward the minimum major in International Relations.

International Study in International Relations

International Relations majors are strongly encouraged to spend at least one semester in an international study program. Transfer credits from international study programs must be approved by the appropriate department chair. Students are strongly encouraged to seek the relevant approval before studying abroad. At least two 300-level units must be completed at Wellesley.

IREC - International Relations - Economics Courses

IREC 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

IREC 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
IREC 370 - Senior Thesis (1.0)
Prerequisite: IREC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

IRHI - International Relations - History Courses

IRHI 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

IRHI 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

IRHI 370 - Senior Thesis (1.0)
Prerequisite: IRHI 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

IRPS - International Relations - Political Science Courses

IRPS 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

IRPS 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

IRPS 370 - Senior Thesis (1.0)
Prerequisite: IRPS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
ITALIAN STUDIES

Italian Studies Major

Goals for the Italian Studies Major

To bring those students who take only language courses to a high level of competence in the language

To expose students to the names and works from a variety of genres that form (but also contest) the nation’s literary tradition and cultural heritage

To introduce students to the crucial moments and events of Italian history and political life, starting in the Middle Ages and going on to the present

To give students a methodological grounding that will serve them well should they opt to pursue their interest in Italian Studies at graduate school

Requirements for the Italian Studies Major

The major in Italian Studies offers students the opportunity to acquire fluency in the language and knowledge of the culture of Italy in a historical perspective. Students are strongly urged to begin Italian in their first year. ITAS 101-ITAS 102 count toward the degree, but not the major. Students majoring in Italian are required to take nine units above the 100 level. One of these courses must be ITAS 271, ITAS 272 [2011-12], ITAS 273, or ITAS 274. Two of the nine courses must be at the 300 level and be taken in the department. The requirement to take two courses at the 300 level may not be met by taking ITAS 350 (Research or Individual Study), ITAS 360 (Senior Thesis Research), or ITAS 370 (Senior Thesis). One course may be taken outside of the department, on a related topic to be decided by the student and her major advisor. Students are encouraged to consult with the chair about the sequence of courses they will take. Courses given in translation count toward the major. Qualified students are encouraged to spend their junior year in Italy on the Eastern College Consortium program in Bologna (of which the Department of Italian Studies is a participant) or on another approved program.

Honors in Italian Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

ITAS - Italian Studies Courses

ITAS 101 - Elementary Italian (1.0)

These courses focus on the development of basic language skills through the study of grammar. Viewing of language video programs, television programs, and films; listening to traditional and modern songs; and reading of passages and short stories, writing of compositions and oral presentations on cultural topics offer an introduction to Italy and its culture. Three periods.

Instructor: Laviose, Bartalesi-Graf
Prerequisite: None
Distribution: None
Term(s): Fall; Winter; Summer I

ITAS 102 - Intermediate Italian (1.0)

These courses focus on the development of basic language skills through the study of grammar. Viewing of language video programs, television programs, and films; listening to traditional and modern songs; and reading of passages and short stories, writing of compositions and oral presentations on cultural topics offer an introduction to Italy and its culture. Three periods.

Instructor: Laviose, Bartalesi-Graf
Prerequisite: ITAS 101
Distribution: None
Term(s): Fall; Winter; Summer I

ITAS 201 - Intermediate Italian (1.0)

These courses focus on the development of basic language skills through the study of grammar. Viewing of language video programs, television programs, and films; listening to traditional and modern songs; and reading of passages and short stories, writing of compositions and oral presentations on cultural topics offer an introduction to Italy and its culture. Three periods.

Instructor: Laviose, Southerden
Prerequisite: ITAS 101
Distribution: None
Term(s): Spring; Summer II

ITAS 202 - Intermediate Italian (1.0)

These courses focus on the development of basic language skills through the study of grammar. Viewing of language video programs, television programs, and films; listening to traditional and modern songs; and reading of passages and short stories, writing of compositions and oral presentations on cultural topics offer an introduction to Italy and its culture. Three periods.

Instructor: Laviose, Bartalesi-Graf
Prerequisite: ITAS 101
Distribution: None
Term(s): Fall; Winter; Summer I

ITAS 301 - Research or Individual Study (1.0)

ITAS 302 - Senior Thesis Research (1.0)

ITAS 370 - Senior Thesis (1.0)

ITAS 203 - An Introduction to Italian Culture (in English) (1.0)

This seminar is dedicated to the representation of Italian cities in Italian literature, art, and cinema. By presenting cities as spatial narratives, we will introduce students to some of the most important moments in Italian history and will invite them to examine the representation of urban landscape as a privileged vantage point to understand Italian culture. The seminar is designed to introduce students to the field of Italian Studies and to provide them with a solid background in Italian history and culture.

Instructor: Parussa
Prerequisite: None. Open to first-year students only.
Distribution: None
Term(s): Fall
No letter grade.

ITAS 201 - Intermediate Italian (1.0)

ITAS 201-ITAS 202. The aim of these courses is to develop students’ fluency in spoken and written Italian. The reading of short stories, articles from Italian newspapers, and selected texts on Italian culture as well as the writing of compositions are used to promote critical and analytical skills. Listening is practiced through the viewing of Italian films. Both reading and listening activities are followed by in-class discussions. Three periods.

Instructor: Laviose, Parussa
Prerequisite: ITAS 101-ITAS 102, or ITAS 103
Distribution: None
Term(s): Fall
Each semester of ITAS 201 and ITAS 202 earns one unit of credit. However, both semesters must be completed satisfactorily to receive credit for either course.

ITAS 202 - Intermediate Italian (1.0)

ITAS 201-ITAS 202. The aim of these courses is to develop students’ fluency in spoken and written Italian. The reading of short stories, articles from Italian newspapers, and selected texts on Italian culture as well as the writing of compositions are used to promote critical and analytical skills. Listening is practiced through the viewing of Italian films. Both reading and listening activities are followed by in-class discussions. Three periods.

Instructor: Southerden
Prerequisite: ITAS 201
Distribution: None
Term(s): Spring
Each semester of ITAS 201 and ITAS 202 earns one unit of credit. However, both semesters must be...
completed satisfactorily to receive credit for either course.

ITAS 202W - Intermediate Italian in Rome (1.0)
This intensive three-week program is a rigorous linguistic and a valuable full-immersion cultural experience in Italy. Like ITAS 202 on campus, the course consists of a fast-paced grammar review with practice of all language skills through readings of literary texts and newspaper articles, oral discussions, presentations on Italian current events, and compositions on cultural topics examined in class. The course includes a rich program of guest speakers, both Italian university professors and artists, and attendance at film screenings and theatre performances. Instructor: Laviosa
Prerequisite: ITAS 201. Application required.
Distribution: LL
Term(s): Winter
Students must have received credit for ITAS 201 in order to receive credit for ITAS 202W. Not offered every year. Subject to Provost’s Office approval. Not open to students who have taken ITAS 202.

ITAS 203 - Intensive Intermediate Italian (1.25)
This course is for students who have taken ITAS 103 or both ITAS 101 and ITAS 102. The course covers the same material as ITAS 201 and ITAS 202 over four class periods per week. The aim of the course is to improve and strengthen the skills acquired in Elementary Italian through reading authentic literary and journalistic texts, viewing of contemporary films, writing compositions, and grammar review. This is an intensive course developed especially for students with a strong interest in Italian Studies and who intend to spend a semester or year abroad. Instructor: Bartalesi-Graf
Prerequisite: ITAS 103 or both ITAS 101 and ITAS 102.
Distribution: LL
Term(s): Spring

ITAS 225 - The Great Beauty: Transnational Italian Cinema and Its Legacies (in English) (1.0)
In the aftermath of the neorealist revolution, a unique synergy of geopolitical, cultural, and aesthetic factors propelled several Italian filmmakers into the international limelight. During what came to be known as Italian cinema’s golden age, many of its epochal films were in fact made across national borders, in dialogue with other (film) cultures. Whether they treated the history of another country (e.g. Algeria’s anticolonial struggle), wrote quintessentially foreign genres (e.g. Dario Argento’s horror), or even dared to challenge Walt Disney (Fantasia’s remake Allegro ma non troppo), these films exemplified the many facets of what we today would call “Italian transnational cinema.”
This course examines some of the most significant films from such period and traces their influence into their twenty first century successors.
Instructor: Viano (Cinema and Media Studies)
Prerequisite: None
Cross-Listed as: CAMS 225
Distribution: ARS
Term(s): Not Offered

ITAS 261 - Italian Cinema (in English) (1.0)
A survey of the directors and film styles that paved the way for the golden age of Italian cinema, this course examines, first, Italian cinema of the first two decades of the twentieth century, going on to fascist cinema before embarking on an in-depth journey into the genre that made Italian cinema famous, namely, neorealism. We will analyze major films by Rossellini, Visconti, De Sica, and Antonioni (among others) with a view to understanding the ethical, social, political, and philosophical foundations of the neorealist aesthetic.
Instructor: Ward
Prerequisite: None
Distribution: LL; ARS
Term(s): Not Offered

ITAS 263 - Dante’s Divine Comedy (in English) (1.0)
The course offers students an introduction to Dante and his culture. The centrality and encyclopedic nature of Dante’s Divine Comedy make it a paradigmatic work for students of the Middle Ages.
Instructor: Southerden
Prerequisite: None
Distribution: LL
Term(s): Not Offered

ITAS 270 - Italy in the Twentieth-Century (1.0)
The course is designed to introduce students to the literature, film, politics, history and social issues of twenty-first century Italy. In addition to reading and viewing representative texts and films, the course will also pay close attention to contemporary events through on-line newspapers, magazines and TV channels.
Instructor: Ward
Prerequisite: ITAS 202, ITAS 203, or equivalent or permission of instructor
Distribution: LL
Term(s): Fall

ITAS 271 - The Construction of Italy as a Nation (1.0)
The course aims, first, to give students who wish to continue their study of Italian the chance to practice and refine their skills, and second, to introduce students to one of the major themes of Italian culture, namely, the role played by Italian intellectuals in the construction of Italy as a nation. We will read how Dante, Petrarch, and Machiavelli imagined Italy as a nation before it came into existence in 1860; how the nation came to be unified; and how the experience of unification has come to represent a fundamental point of reference for twentieth-century Italy. Other figures to be studied will include Benito Mussolini, D’Annunzio, Visconti, Levi, Blasetti, and Rossellini.
Instructor: Ward
Prerequisite: ITAS 202
Distribution: LL
Term(s): Not Offered

ITAS 272 - Small Books, Big Ideas. A Journey Through Italian Identities (1.0)
Unlike other European literatures, contemporary Italian literature lacks a major work of fiction representing the nation’s cultural identity. Rather, Italian literature boasts the small book, brief, unclassifiable narratives that express the variety and complexity of Italian culture. Realistic novels or philosophical short stories, memoirs or literary essays, these works are a fine balance between a number of literary genres and, as such, are a good entrée into the multifaceted and contradictory identity of Italy as a nation. The course will combine a survey of contemporary Italian literature with a theoretical analysis of how Italian identity has been represented in works by Moravia, Calvino, Ortese, and others.
Instructor: Parussa
Prerequisite: ITAS 201
Corequisite: and ITAS 202 or ITAS 203 as a corequisite.
Distribution: LL
Term(s): Spring

ITAS 273 - Italy in the 1960s (1.0)
The 1960s was a period of great change in Italy. The major consequence of the economic boom of the late 1950s was to transform Italy from a predominantly agricultural to an industrialized nation. Through a study of literary and cinematic texts, the course will examine this process in detail. Time will also be given to the consequences of the radical changes that took place: internal immigration, consumerism, the new role of intellectuals, resistance to modernity, neo-fascism, student protest. Authors to be studied will include Italo Calvino, Luchino Visconti, Pier Paolo Pasolini, Ermanno Olmi, Umberto Eco, and authors from the Neo-Avant Garde movement.
Instructor: Ward
Prerequisite: ITAS 202, ITAS 203
Distribution: LL
Term(s): Not Offered

ITAS 274 - Women in Love: Portraits of Female Desire in Italian Culture (1.0)
This course is dedicated to the representation of female desire in Italian culture. From Dante’s Francesca da Rimini to Pasolini’s Medea, passing through renowned literary characters such as Goldoni’s Mirandolina, Manzoni’s Gertrude, and Verdi’s Violetta, the course will explore different and contrasting voices of female desire: unrequited and fulfilled, passionate and spiritual, maternal and destructive, domestic and transgressive. In particular, the varied and beautiful voices of women in love will become privileged viewpoints to understand the changes that occur in Italian culture in the conception of desire and other intimate emotions, as well as in the notion of gender and sexuality. Students will read texts by men and women from a wide variety of literary genres and artistic forms including not only prose and poetry, but also theatre, opera, and cinema. They will also read important theoretical essays on the conception of love in Western cultures by Barthes, de Rougemont, Giddens, and Nussbaum.
Instructor: Parussa
Prerequisite: ITAS 202 or ITAS 201.
Distribution: LL
Term(s): Not Offered

ITAS 275 - Between Transcendence and Transgression: Desire from Dante to Milton (1.0)
This course takes as its focus the discourses of desire informing some of the major works of English and Italian literature from the Middle Ages to the seventeenth century. Through an exploration of the themes of transcendence and transgression in Dante, Petrarch, Boccaccio, Chaucer, Shakespeare, Ariosto, and Milton, students will analyze the dynamics of desire (whether sexual, psychological, or textual) that open up exciting vistas on the tensions between human and divine love, excess and control, lack and fulfillment, suffering and joy. The roles of transcendence and transgression will also be considered in the relationship each author entertains with his or her literary models and predecessors to see how desire shapes a dialogue across geographical and temporal boundaries.
Instructor: Southerden
Prerequisite: None
ITAS 309 - Italian-Jewish Literature (1.0)

In the light of events like the high-profile trial of a Nazi war criminal and Pope John Paul II's encyclical letter on the responsibilities of Christians in the Holocaust, this course aims to discuss the question of Jewish identity in contemporary Italian culture. Students will read prose and poetry, essays and articles, as well as watch films that address issues such as religious and national identity in a culturally and linguistically homogeneous country like Italy. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Italian-Jewish writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy.

Instructor: Parussa
Prerequisite: ITAS 271, ITAS 272, ITAS 273, ITAS 274, or ITAS 275
Distribution: LL
Term(s): Not Offered

ITAS 310 - Fascism and Resistance in Italy (1.0)

This course examines the two fundamental political and cultural experiences of twentieth-century Italy: the 20-year fascist regime and the resistance to it. We will study the origins of fascism in Italy's participation in World War I and its colonial ambitions, and then follow the development of fascism over the two decades of its existence and ask to what extent it received the consensus of the Italian people. We will go on to examine the various ways in which Italians resisted fascism and the role the ideals that animated antifascist thinking had in the postwar period. Authors to be studied include: Marinetti, D'Annunzio, Pascoli, Croce, Gabetti, Rosselli, Bassani, Ginzburg, Carlo and Primo Levi, and Sillone.

Instructor: Ward
Prerequisite: ITAS 271, ITAS 272 [2011-12], ITAS 273, or ITAS 274
Distribution: LL
Term(s): Not Offered

ITAS 315 - Italian Mysteries (1.0)

Italian Mysteries introduces students to the Italian tradition of mystery and detective writing of the nineteenth and twentieth centuries with particular attention paid to its philosophical and semiotic dimensions. It also exposes students to some of the political mysteries that have characterized Italy since the end of World War II and which have become the subject of much contemporary mystery writing, films, and documentaries. From an aesthetic standpoint, we will ask why a new generation of young writers has been drawn to these mysteries as subjects of their writings and examine the variety of narrative forms they use to investigate them. Authors to be studied will include Carlo Emilio Gadda, Umberto Eco, Carlo Lucarelli, Dario Fo, Simone Saracso, Giuseppe Genna, and the writing collectives known as Luther Blisset and Wu Ming.

Instructor: Ward
Prerequisite: ITAS 271, ITAS 272 [2011-12], ITAS 273, or ITAS 274
Distribution: LL
Term(s): Fall

ITAS 316 - Dreams of Eden: Gardens in Medieval and Renaissance Italian Literature and Art (1.0)

This course will focus on the topos of the garden in Italian literature and art during the Middle Ages and the Renaissance. Looking at the descriptions of memorable gardens in literary works by Dante, Petrarca, Ariosto, and Tasso, alongside paintings by artists such as Mantegna, Da Vinci, Botticelli, and Michelangelo, students will explore the relationship between the self and God, the earthly and the transcendent, nature and culture. An analysis of the female inhabitants of the gardens will, in turn, offer an opportunity to consider how far the garden may be considered a gendered space, and/or a political one, that embodies the conflict between love and duty, woman and God, illusion and reality.

Instructor: Parussa
Prerequisite: ITAS 271, ITAS 272 [2011-12], ITAS 273 or ITAS 274
Distribution: LL
Term(s): Not Offered

ITAS 320 - The Landscape of Italian Poetry (1.0)

The course is dedicated to the representation and exploration of landscape in the Italian poetic tradition. The course explores the varied and beautiful Italian landscape found expression in the literary works of major poets, students will be exposed to a rich body of work and the tradition it both follows and renews. In particular, the course will focus on a series of specific themes, giving special attention to language and style. These will include: the opposition between rural and urban landscapes; the tension between dialects and the national language; the complex dynamics of tradition and innovation. Through initial exposure to selected classical poets, including Dante and Petrarch, students will gain in-depth knowledge of the main formal structures of Italian poetry, from the classical sonnet, going on to free verse. In addition, we will read poems by the Italian greats of the twentieth century, namely Ungaretti, Saba, and Montale, as well as works by contemporary poets, such as Caproni, Sereni, and Valduga.

Instructor: Parussa
Prerequisite: ITAS 271, ITAS 272, ITAS 273, or ITAS 274, or permission of the instructor.
Distribution: LL
Term(s): Spring

ITAS 349 - The Function of Narrative (1.0)

Beginning with Boccaccio and going on to Manzoni, Verga, and beyond, the course introduces students to the major figures of the Italian narrative tradition. We then go on to study twentieth-century narrative texts, all the time seeking answers to the question of why narrative is such a fundamental human need. Why, for example, do we narrate our experience of life and the sense we have of ourselves, even in the form of diaries? Do the stories we tell faithfully reflect reality or do they create it? The course concludes with a reflection on narrative technique in cinema illustrated by the films of Antonioni. Other authors to be studied may include Calvino, Geresu, Rasy, Pasolini, Celati, and Benni.

Instructor: Ward
Prerequisite: ITAS 271, ITAS 272, ITAS 273, or ITAS 274, or permission of the instructor.
Distribution: LL
Term(s): Not Offered

ITAS 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

ITAS 356 - Senior Thesis Research (1.0)

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ITAS 370 - Senior Thesis (1.0)

Prerequisite: ITAS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
See East Asian Languages and Cultures
AN INTERDEPARTMENTAL MAJOR AND MINOR

Professor: Malino (Director)
Visiting Lecturer: Chalamish
Advisory Board: Geller (Religion), Malino (History), Rosenwald (English), Silver (Religion)

The major in Jewish Studies is designed to acquaint students with the many facets of Jewish civilization through an interdisciplinary study of Jewish religion, history, philosophy, art, literature, social and political institutions, and cultural patterns.

Jewish Studies Major

Goals for the Jewish Studies Major

Developing an understanding of the breadth and diversity of Jewish civilization through interdisciplinary learning in the arts, humanities, and social sciences.

- Learning to contextualize Jewish civilization within its broader milieu
- Understanding the foundation texts and central ideas and institutions of Judaism
- Building specialized knowledge in one area: e.g., among others, Biblical studies; ancient, medieval, early modern or modern Jewish history; European or Eastern Jewry; Hebrew language and literature; Israel's studies
- Establishing proficiency (equivalent to two years of undergraduate instruction) in Hebrew, either Biblical or modern, or if relevant Yiddish, Arabic or Spanish
- Interpreting primary texts critically, developing writing skills, and learning to identify essential links among disciplines and cultures

Requirements for the Jewish Studies Major

For the eight-unit major in Jewish Studies, students must take courses pertaining both to the ancient and modern worlds and show proficiency in Hebrew (equivalent to at least two semesters at the second-year level). In certain cases, where students whose area of concentration necessitates another language (such as Arabic, French, Spanish, Yiddish, or Ladino), that language may be substituted for Hebrew in consultation with the student's major advisor. In addition, students are expected to concentrate in some area or aspect of Jewish Studies (such as religion, history, or Hebrew language and literature) by taking four courses above the 100 level, including at least two at the 300 level.

Advanced study of Hebrew may be pursued as a JWST 350 course, and this may be used to fulfill the Language and Literature distribution requirement.

Majors devise their own programs in consultation with the director of the Jewish Studies program and an appropriate faculty member from the student's area of concentration. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for Jewish Studies.

In addition to Wellesley, students are encouraged to take courses at Brandeis University in the Department of Near Eastern and Judaic Studies which may be applicable to the Jewish Studies major. These courses must be approved, in advance, by the corresponding department at Wellesley. See the director of Jewish Studies for further details.

Honor in Jewish Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the program may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Courses for Credit Toward the Jewish Studies Major

| ANTH 247 | Societies and Cultures of Eurasia |

Jewish Studies Minor

Requirements for the Jewish Studies Minor

A minor in Jewish Studies consists of five units of which at least one must be at the 300 level and no more than one can be at the 100 level. Units must be taken in at least two departments. In consultation with the director of the program in Jewish Studies, students devise their own programs. Also in consultation with the director, students can arrange to take courses for inclusion in the Jewish Studies minor in Brandeis University's Department of Near Eastern and Judaic Studies.

HEBR - Hebrew Courses

HEBR 101 - Elementary Hebrew (1.0)
Introduction to Hebrew with emphasis on its contemporary spoken and written form. Practice in the skills of listening and speaking as well as reading and writing, together with systematic study of Hebrew grammar. Students will master a basic vocabulary of approximately 1,000 words, and become comfortable in the use of the present, past, and future tenses, as well as basic verb patterns.
Instructor: Chalamish
Prerequisite: None
Distribution: None
Term(s): Fall
Each semester of HEBR 101 and HEBR 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

HEBR 102 - Elementary Hebrew (1.0)
Introduction to Hebrew with emphasis on its contemporary spoken and written form. Practice in the skills of listening and speaking as well as reading and writing, together with systematic study of Hebrew grammar. Students will master a basic vocabulary of approximately 1,000 words, and become comfortable in the use of the present, past, and future tenses, as well as basic verb patterns.
Instructor: Chalamish
Prerequisite: None
Distribution: None
Term(s): Spring
Each semester of HEBR 101 and HEBR 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

HEBR 201 - Intermediate Hebrew (1.0)
Building on the foundations of HEBR 101-HEBR 102, the third semester will continue to develop skills in modern Hebrew. Students will broaden their knowledge of verb patterns, compound sentence structures, and mixed tenses. Special emphasis will be placed on composition and oral reports. The fourth semester will focus on literature through reading and discussion of selected short pieces of prose and poetry. Some examples of classical, rabbinic, and liturgical Hebrew will also be analyzed. Students will be required to write short compositions inspired by their readings.
Instructor: Chalamish
Prerequisite: HEBR 101-HEBR 102
Distribution: None
Term(s): Fall

Each semester of HEBR 201 and HEBR 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**HEBR 202 - Intermediate Hebrew (1.0)**
Building on the foundations of HEBR 101-HEBR 102, the third semester will continue to develop skills in modern Hebrew. Students will broaden their knowledge of verb patterns, compound sentence structures, and mixed tenses. Special emphasis will be placed on composition and oral reports. The fourth semester will focus on literature through reading and discussion of selected short pieces of prose and poetry. Some examples of classical, rabbinic, and liturgical Hebrew will also be analyzed. Students will be required to write short compositions inspired by their readings.

Instructor: Chalamish
Prerequisite: HEBR 101-HEBR 102
Distribution: LL
Term(s): Spring

Each semester of HEBR 201 and HEBR 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

**HEBR 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**JWST 350H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**JWST 360 - Senior Thesis Research (1.0)**
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**JWST 370 - Senior Thesis (1.0)**
Prerequisite: JWST 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**JWST - Jewish Studies Courses**

**JWST 111 - Society in Motion: Israel on Film (1.0)**
In this seminar we will look into the evolution of Israeli society and of its self-understanding through their representations on the screen. A wide-ranging selection of films as well as discussions of a variety of readings, visual arts, and popular music will introduce students to the central issues in Israeli social and cultural history—immigration, the presence of the military in everyday life, center and periphery—and the complexities of the debate surrounding them. Students will get a chance to become familiar with a unique and thriving cinema, and gain insight into film as document and social commentary.

Instructor: Chalamish
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

Mandatory credit/no credit.

**JWST 250 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**JWST 250H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

AN INTERDEPARTMENTAL MAJOR

Director: Osorio (History)
Advisory Committee: Agosín (Spanish), Ellkins (Religion), Guszalkyte (Spanish), Hagimoto (Spanish), Hall (Spanish), Levitt (Sociology), McEwan (Economics), Oles (Art), Osorio (History), Renjilian-Burgo (Spanish), Vega (Spanish), Watersprings (Political Science)

The Latin America Studies major is designed to provide students with a broad understanding of the Latin American experience through an interdisciplinary program of study.

Latin American Studies Major

Goals for the Latin American Studies Major

- To enable students to acquire an in-depth multidisciplinary knowledge of the political, economic, historical, and cultural development of the major regions of Latin America: Mexico, Central and South America, and the Caribbean Basin
- To familiarize students with classic works on Latin America, and the ways in which various disciplines have contributed to understandings of its culture, politics, and history, as well as with newer and challenging perspectives on the region
- To train students in the acquisition of critical analytical skills for understanding and evaluating the diversity of realities in both past and present Latin America

Requirements for the Latin American Studies Major

The Latin American Studies major requires the completion of 11 courses:

(a) 2 language courses at the SPAN 241 level or higher.*
(b) 9 additional courses to be selected from the list of approved courses for this major. For 2014-2015 see list below.
(c) For those 9 additional courses, beyond the language requirement, all students are required to choose a concentration consisting of 4 courses taken in one of the following disciplines: art history, history, political science, sociology, or Spanish.**
(d) Of these 9 courses, at least 2 must be taken at the 300-level.

(1) One 300-level course must be in the student’s concentration.
(2) One 300-level course must be a seminar.

(e) Overall, students must complete courses in at least 3 different disciplines.
(f) Upon declaring the major, students are required to submit to the director a detailed plan of study for approval.
(g) When the student’s chosen concentration is in a discipline other than that of the director, the student must also arrange a second advisor, in the student’s field of concentration.

* In those exceptional cases when a student can demonstrate oral and written mastery of Spanish, she may be exempted from this requirement by taking an oral and written examination.

** In special circumstances, students may petition the director for an alternative field of concentration.

Honors in Latin American Studies

Honors in Latin American Studies can only be obtained by:

(1) Writing a thesis on a Latin American subject; and
(2) Passing an oral examination

In order to be admitted to the honors thesis program, a student must:
(a) have a grade point average of 3.5 or higher in all her coursework above the 100-level in her major field of study [note that the department may petition on the student’s behalf when her GPA in the major falls between 3.0 and 3.5];
(b) have completed all fundamental course work in the area in which she proposed to do her honors work;
(c) and submit a proposal to the faculty committee by the end of her junior year.

The proposal must include:
a. A description of the proposed thesis project
b. A sample bibliography
c. And a copy of the student’s most up-to-date transcript

Students are advised to consult Academic Distinctions on the college website for further instructions.

Graduate Study in Latin American Studies

Majors may also apply to the Five-Year Cooperative Degree Program at Georgetown University in Latin American Studies. This program offers the highest qualified applicants the opportunity to count four courses from their undergraduate study towards the M.A. program in Latin American Studies at Georgetown University, enabling them to complete the degree in two semesters and one summer. The five-year B.A.-M.A. program is designed for those students who demonstrate excellence at the undergraduate level. Qualified undergraduates must maintain a minimum GPA of 3.5, declare an interest in the Cooperative degree program during their junior year, and participate in the Center’s summer study abroad program. During their senior year, candidates apply through the normal Georgetown M.A. application cycle. If accepted into the M.A. program, students may transfer up to four courses from their undergraduate study towards the M.A. program in Latin American Studies at Georgetown University, enabling them to complete the degree in two semesters and one summer.

See Cognitive and Linguistic Sciences
Mathematics has a fascinating dual nature. Many study it as an object of endless beauty, interest, and intellectual challenge, while others are motivated by its applications to real-world problems. Increasingly, mathematics is an essential tool for modeling phenomena in the physical, biological, and social sciences. Mathematical literacy is the key to surviving and thriving in the world of technology. At its heart, mathematics is the study of patterns: it is a creative art as well as a logical system. Mathematics is always been part of the liberal arts core at Wellesley College. One way our students continue this tradition is by combining mathematics with a minor or a double major in another field such as economics, English, classics, or chemistry. Mathematics is excellent preparation for a lifetime of discovering learning, and applying new knowledge. Most courses meet for three periods weekly or for two periods weekly with a third period approximately every other week. The mathematics department Web page (www.wellesley.edu/Math) has more detailed course descriptions and information for majors and minors.

Goals for the Mathematics Major

Mathematics Major

Goals for the Mathematics Major

The mathematics major offers students a rigorous program of study in analysis, algebra, topology, geometry, and various applied subjects. These categories form the foundations of the discipline in both the pure and applied arenas. During their mathematical studies, students learn how to execute sophisticated computations and to form arguments using appropriate laws of inference. Part of their training involves an understanding of mathematical grammar, syntax, diction, and style and the ways in which abstract concepts are accurately communicated in the domains of both speech and writing. The major is sufficiently broad and deep in scope that students are prepared thereafter to continue their studies in graduate school or to apply their skills in the private sector.

Requirements for the Mathematics Major

Students majoring in mathematics must complete MATH 115 and one of MATH 116/MATH 120 or the equivalent and at least eight units of 200-level and 300-level courses. These eight units must include MATH 205, MATH 206, MATH 302, MATH 305, and two additional 300-level courses. Credit for PHYS 216 satisfies the requirement that a mathematics major take MATH 205, but does not count as one of the units of 200-level and 300-level courses toward the major. At most two of the three courses MATH 206, MATH 210, and MATH 215 can be counted toward the major. Majors are also required to present one classroom talk in either their junior or senior year. This requirement can be satisfied with a presentation in the student seminar, but it can also be fulfilled by giving a talk in one of the courses whose catalog description says “ Majors can fulfill the major presentation requirement in this course.” In addition, a limited number of students may be able to fulfill the presentation requirement in other courses, with permission of the instructor. Students expecting to major in mathematics should complete the prerequisites for MATH 302 and MATH 305 before the junior year. Students may wish to consult the chair of the Department of Mathematics or their current mathematics instructor in deciding when to take MATH 302 and MATH 305. Independent study units (MATH 350, MATH 360, MATH 370) may not count as one of the 300-level courses required for the major.

Students expecting to do graduate work in mathematics should elect MATH 302, MATH 305, and at least four other 300-level courses, possibly including a graduate course at MIT. See the department Web page for course suggestions:
www.wellesley.edu/Math/coursework_prepgrad.html. They are also advised to acquire a reading knowledge of one or more of the following languages: French, German, or Russian.

Honors in Mathematics

The department offers the following options for earning honors in the major field:
1. Completion of MATH 302, MATH 305, and four other 300-level courses, and two written comprehensive examinations
2. Two semesters of thesis work (MATH 360 and MATH 370). An oral examination is required for both programs

To be admitted to the honors program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Teacher Certification in Mathematics

Students interested in teaching mathematics at the secondary-school level should consult the chair of the mathematics department and the chair of the education department. Students interested in taking the actuarial science examinations should consult the chair of the mathematics department.

Placement in Courses and Exemption Examinations in Mathematics

The mathematics department reviews elections of calculus students and places them in MATH 115, MATH 116, MATH 120, or MATH 205 according to their previous courses and summer placement results. See the descriptions for these courses. If there is a question about placement, the department recommends that the student attend the course in which she is placed and contact the sectioning coordinator (contact information in Science Center 361) to discuss her placement. No special examination is necessary for placement in an advanced course. See the department Web page www.wellesley.edu/Math/coursework_curriculum.c ak.html for more information.

Students may receive course credit toward graduation through the AP tests in mathematics and the IB Higher Level mathematics exam. Students with scores of 4 or 5 on the AP Examination or an AB-subscore of 4 or 5 on the BC Examination, or a score of 5, 6, or 7 on the IB Higher Level mathematics exam receive one unit of credit (equivalent to MATH 115) and are eligible for MATH 116 or MATH 120. Those entering with scores of 4 or 5 on the BC Examination receive two units (equivalent to MATH 115 and MATH 116/MATH 120) and are eligible for MATH 205. Students with a 5 on the AP examination in statistics receive one unit of credit (equivalent to MATH 101). Neither AP credits nor IB credits may count toward the major or minor.

Transfer Credit in Mathematics

Students are encouraged to elect MIT courses that are not offered by the Wellesley College mathematics department.

Mathematics Minor

Requirements for the Mathematics Minor

The mathematics minor is recommended for students whose primary interests lie elsewhere but who wish to take a substantial amount of mathematics beyond calculus. Option I (five units) consists of (A) MATH 205, MATH 206 and (B) MATH 302 or MATH 305 and (C) two additional units, at least one of which must be at the 200 or 300 level. Option II (five units) consists of (A) MATH 205, MATH 206 and (B) three additional 200- or 300-level units. PHYS 216 satisfies the requirement that a math minor take MATH 205, but does not count as one of the five units. At most two of the three courses MATH 206, MATH 210, and MATH 215 can be counted toward the minor. A student who plans to add the mathematics minor to a major in another field should consult a faculty advisor in mathematics.

MATH - Mathematics Courses

MATH 101 - Reasoning with Data: Elementary Applied Statistics (1.0)

An introduction to the fundamental ideas and methods of statistics for analyzing data. Topics include descriptive statistics, basic probability, inference, and hypothesis testing. Emphasis on understanding the use and misuse of statistics in a variety of fields, including medicine and both the physical and social sciences. This course is intended to be accessible to those students who have not yet had calculus.

Instructor: Diels (Summer), Shultz (Spring), Hermes (Fall)

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have completed MATH 205, except by permission of the instructor; such students should consider taking MATH 220 instead. Not open to students who have taken or are taking MATH 101Z, POL 199, QR 180, ECON 103/SOC 190, or PSYC 205.

Distribution: MM; QRF

Term(s): Fall; Spring; Summer

During Summer Session this is a six-week course.

MATH 101Z - Reasoning with Data: Elementary Applied Statistics with Health Applications (1.0)

In this course, students use probability and statistics to examine the risks that we encounter every day. The focus is on personal medical decision-making and the impact of our environment on our health. Students will address questions such as, How concerned should we be about pesticide use? How can we make informed decisions about women’s health issues, including contraception and sexually transmitted diseases? How much of an impact does diet have on health? Why did different studies of hormone replacement therapy come to contradictory conclusions, and how can we read reports on such studies intelligently and skeptically? Topics include
MATH 115 - Calculus I (1.0)
Introduction to differential and integral calculus for functions of one variable. The heart of calculus is the study of rates of change. Differential calculus concerns the process of finding the rate at which a quantity is changing (the derivative). Integral calculus reverses this process. Information is given about the derivative, and the process of integration finds the "integral," which measures accumulated change. This course aims to develop a thorough understanding of the concepts of differentiation and integration, and covers techniques and applications of differentiation and integration of algebraic, trigonometric, logarithmic, and exponential functions. MATH 115 is an introductory course designed for students who have not seen calculus before.
Instructor: Staff
Prerequisite: Open by permission of the department to all students who have not seen calculus before.
Term(s): Fall; Spring; Summer I
Distribution: MM

MATH 116 - Calculus II (1.0)
The course begins with applications and techniques of integration. It probes notions of limit and convergence and adds techniques for finding limits. Half of the course covers infinite sequences and series, where the basic question is, What meaning can we attach to a sum with infinitely many terms and why might we care? The course can help students improve their ability to reason abstractly and also teaches important computational techniques. Topics include integration techniques, L'Hôpital's rule, improper integrals, geometric and exponential functions. MATH 116 is an introductory course designed for students who have not seen calculus before.
Instructor: Staff
Prerequisite: MATH 115 or the equivalent. Not open to students who have completed MATH 116, MATH 120, or the equivalent.
Term(s): Fall; Spring; Summer II
Distribution: MM

MATH 202 - First-Year Seminar: Cryptography and Privacy (1.0)
This course will be an exploration of various aspects of modern cryptography and secrecy. One part will be concerned with the mathematics behind the virtually unbreakable public-key ciphers such as RSA; we will start with simple concepts like prime numbers and divisibility and quickly develop powerful number-theoretic machinery, with mathematical rigor and proof as the underlying theme. In the second part of the course, we will think about the consequences of the fact that cryptography gives everyone the ability to transmit information in a way that nobody except the intended audience can read it. In particular, we will discuss the moral and ethical implications of the regulation of cryptography and the ramifications this has on privacy.
Instructor: Volić
Prerequisite: MATH 115 or equivalent. Open to first-year students only.
Term(s): Fall; Spring; Summer I
Distribution: MM

MATH 203 - Mathematical Tools for Finance (1.0)
This course is intended for students who are interested in mathematics and its applications in economics and finance. The following topics will be covered: mathematical models in economics, market equilibrium, first and second order recurrences, the cobweb model, profit maximization, derivatives in economics, elements of finance, constrained optimization, Lagrangians and the consumer, microeconomic applications, business cycles, European and American options, call and put options, Black-Scholes analysis.
Instructor: Bu
Prerequisite: MATH 116 or the equivalent.
Term(s): Not Offered
Distribution: MM

MATH 205 - Multivariable Calculus (1.0)
Most real-world systems that one may want to model, whether in the natural or in the social sciences, have many interdependent parameters. To apply calculus to these systems, we need to extend the ideas and techniques of MATH 115 and MATH 116 to functions of several variables. Multivariable calculus includes vectors, matrices, determinants, polar, cylindrical, and spherical coordinates, curves, functions of several variables, partial and directional derivatives, gradients, Lagrange multipliers, multiple integrals, line integrals, and Green's Theorem.
Instructor: Staff
Prerequisite: MATH 116 or the equivalent. Not open to students who have completed PHYS 216.
Term(s): Fall; Spring; Summer I
Distribution: MM

MATH 206 - Linear Algebra (1.0)
Linear algebra is one of the most beautiful subjects in the undergraduate mathematics curriculum. It is also one of the most important with many possible applications. In this course, students learn computational techniques that have widespread applications in the natural and social sciences as well as in industry, finance, and management. There is also a focus on learning how to understand and write mathematical proofs and an emphasis on improving mathematical style and sophistication. Topics include vector spaces, subspaces, linear independence, bases, dimension, inner products, linear transformations, matrix representations, range and null spaces, inverses, and eigenvalues.
Instructor: Chang (Spring), Kerr (Spring), Schulte (Fall), Shuchat (Fall)
Prerequisite: MATH 205 or MATH 215, or, with permission of the instructor, MATH 116, MATH 120, or the equivalent. At most two of the three courses MATH 205, MATH 210, and MATH 215 can be counted toward the major or minor.
Term(s): Fall; Spring
Distribution: MM

MATH 210 - Differential Equations (1.0)
Introduction to theory and solution of ordinary differential equations, with applications to such areas as physics, ecology, and economics. Includes linear and nonlinear differential equations and equation systems, existence and uniqueness theorems, and such solution methods as power series, Laplace transform, and graphical and numerical methods.
Instructor: Wang
Prerequisite: MATH 205. At most two of the three courses MATH 206, MATH 210, and MATH 215 can be counted toward the major or minor.
Term(s): Not Offered
Distribution: MM

MATH 214 - Euclidean and Non-Euclidean Geometry (1.0)
A rigorous treatment of the fundamentals of two-dimensional geometry: Euclidean, spherical, elliptic, and hyperbolic. The course will present the basic classical results of plane geometry: congruence theorems, congruence theorems, classification of isometries, etc., and their analogues in the non-Euclidean settings. The course will provide a link between classical geometry and modern geometry, preparing for study in group theory, differential geometry, topology, and mathematical physics. The approach will be analytical, providing practice in proof techniques. This course is strongly recommended for prospective teachers of mathematics.
Instructor: Magid
Prerequisite: MATH 205 or permission of the instructor.
Term(s): Not Offered
Distribution: MM

MATH 215 - Mathematics for the Sciences I (1.0)
This course is tailored to the needs and preparations of students considering majors in the sciences. It presents techniques of applied mathematics relevant to a broad range of scientific studies, from the life sciences to physics and astronomy. The topics of study include complex numbers, ordinary differential equations, an introduction to partial differential equations, linear algebra (matrices, systems of linear equations, vector spaces, eigenvalue problems), and Fourier series. The course emphasizes mathematical techniques and presents applications from all the sciences. Some familiarity with vectors (e.g., dot products) is assumed.
Instructor: Tannenhausner
Prerequisite: MATH 116, MATH 120, or the equivalent.
At most two of the three courses MATH 206, MATH 210, and MATH 215 can be counted toward the major or minor.
Term(s): Fall
Distribution: MM

MATH 220 - Probability and Elementary Statistics (1.0)
This course is about the mathematics of uncertainty, where we use the ideas of probability to describe
patterns in chance phenomena. Probability is the
basis of statistics and game theory, and is immensely
useful in many fields including business, social and
physical sciences, and medicine. The first part of
the course focuses on probability theory (random
variables, conditional probability, probability
distributions), using integration and infinite series.
The second part discusses topics from statistics
(sampling, estimation, confidence interval,
hypothesis testing). Applications are taken from
areas such as medical diagnosis, quality control,
gambling, political polls, and others.

Instructor: Shuchat (Fall), Tannenhauer (Spring)
Prerequisite: MATH 205. Open to students with a strong
background in single-variable calculus (MATH 116,
MATH 120, or the equivalent) by permission of the
instructor.

Distribution: M; Q; RF
Term(s): Fall; Spring

MATH 223 - Number Theory (1.0)
Number theory is the study of the most basic
mathematical objects: the natural numbers (1, 2, 3,
etc.). It begins by investigating simple patterns: for
instance, which numbers can be written as sums of
two squares? Do the primes go on forever? How can
we be sure? The patterns and structures that emerge
from studying the properties of numbers are so
elegant, complex, and important that number theory
has been called “the Queen of Mathematics.” Once
studied only for its intrinsic beauty, number theory
has practical applications in cryptography and
computer science. Topics include the Euclidean
gaussian, modular arithmetic, Fermat’s and Euler’s
Theorems, public-key cryptography, quadratic
reciprocity. MATH 223 has a focus on learning to
understand and write mathematical proofs; it can
serve as valuable preparation for MATH 305.

Instructor: Diesl
Prerequisite: MATH 116, MATH 120, or the equivalent;
or CS 230 together with permission of the instructor.

Distribution: MM
Term(s): Spring
Not open to students who have taken or are taking
MATH 202.

MATH 225 - Combinatorics and Graph Theory
(1.0)
Combinatorics is the art of counting possibilities: for
instance, how many different ways are there to
distribute 20 apples to 10 kids? Graph theory is the
study of connected networks of objects. Both have
important applications to many areas of
mathematics and computer science. The course will
be taught emphasizing creative problem-solving as
well as methods of proof, such as proof by
contradiction and induction. Topics include:
selections and arrangements, generating functions,
recurrence relations, graph coloring, Hamiltonian
and Eulerian circuits, and trees.

Instructor: Shultz (Fall), Trenk (Fall), Volic (Spring)
Prerequisite: MATH 116, MATH 120, or the equivalent;
or CS 230 together with permission of the instructor.

Distribution: MM
Term(s): Fall; Spring

MATH 249 - Topic for 2013-2014: Fourier
Analysis and Partial Differential Equations
(1.0)
Topic for 2013-2014: How does an MP3 file achieve
91 percent compression yet still sound identical to the
uncompressed song? Why does heat flow from
hot to cold? How do airplane wings generate lift?
These questions can be answered by studying partial
differential equations (PDEs). This course will
rigorously develop Fourier series and transforms
and apply them to solve PDEs, including those
modeling wave motion, heat flow, and fluid flow.
Topics include Fourier series and transforms,
separation of variables, the heat, wave, Laplace, and
Euler equations; both theory and problem-solving
will be included.

Instructor: Fernandez
Prerequisite: MATH 205
Distribution: MM
Term(s): Not Offered

MATH 302 - Elements of Analysis I (1.0)
Real analysis is the study of the rigorous theory of
the real numbers, Euclidean space, and calculus. The
goal is to thoroughly understand the familiar
concepts of continuity, limits, and sequences. Topics
include compactness, completeness, and
connectness; continuous functions; differentiation
and integration; limits and sequences; and
interchange of limit operations as time permits.

Instructor: Diesl (Spring), Wang (Fall)
Prerequisite: MATH 205 and MATH 206.
Distribution: MM
Term(s): Fall; Spring

MATH 303-01S - Topics in Analysis (1.0)
Topic for 2014-15: Lebesgue Theory
Lebesgue measure and Lebesgue integration. Other
topics chosen from among metric spaces, the
Riemann integral, function spaces, $L^2$ theory,
Hilbert space, and Fourier series.

Instructor: Bu
Prerequisite: MATH 302
Distribution: MM
Term(s): Not Offered
Students who have taken this course once may
register for it one additional time. Majors can fulfill
the major presentation requirement in this course in

MATH 305 - Abstract Algebra (1.0)
In this course, students examine the structural
similarities between familiar mathematical objects
such as number systems, matrix sets, function
spaces, general vector spaces, and mod n arithmetic.
Topics include groups, rings, fields, homomorphisms,
normal subgroups, quotient spaces, isomorphism
theorems, divisibility, and factorization. Many
generals concept number theoretic notions such as
Fermat’s little theorem and the Euclidean
gaussian. Optional subjects include group actions
and applications to combinatorics.

Instructor: Chang (Fall), Schultz (Spring)
Prerequisite: MATH 206.
Distribution: MM
Term(s): Fall; Spring

MATH 306-01S - Topics in Abstract Algebra
(1.0)
Topic for 2014-15: Advanced Number Theory
The material for the course is motivated by an old
question of Fermat: when is a positive integer
expressible as a sum of two square integers? We will
study variations of this question that were
considered by the likes of Euler, Lagrange, Legendre,
Gauss and others, and in the process learn the
foundations of the theory of quadratic forms. We will
finish the course by stating and proving some higher-
degree analogues of quadratic reciprocity. Topics
include quadratic reciprocity, quadratic forms, genus
theory, the form class group, cubic and biquadratic
reciprocity, and introductory material for higher
reciprocity laws. Students in this course will be
responsible for assisting in the lecturing of the
material.

Instructor: Schultz

Prerequisite: MATH 223 and MATH 305
Distribution: MM
Term(s): Spring
Ann E. Maury: ‘51 Speaking Intensive Course
Majors can fulfill the major presentation
requirement in this course in 2014-2015.

MATH 307 - Topology (1.0)
This course covers some basic notions of point-set
topology, such as topological spaces, metric spaces,
connectedness and compactness, Heine-Borel
Theorem, quotient spaces, topological groups,
groups acting on spaces, homotopy equivalences,
separation axioms, Euler characteristic, and
classification of surfaces. Additional topics include
the study of the fundamental group (time
permitting).

Instructor: Volic
Prerequisite: MATH 302
Corequisite: MATH 305
Distribution: MM
Term(s): Fall
Majors can fulfill the major presentation
requirement in this course in 2014-2015.

MATH 309 - Foundations of Mathematics
(1.0)
This course will introduce students to aspects of set
theory and formal logic. The notion of set is one of
the fundamental notions of modern mathematics. In
fact, other mathematical notions, such as function,
relation, number, etc., can be represented in terms
of purely set theoretical notions, and their basic
properties can be proved using purely set theoretic
axioms. The course will include the Zermelo-
Fraenkel axioms for set theory, the Axiom of Choice,
transfinite arithmetic, Zorn’s Lemma, ordinal
numbers, and cardinal numbers. We also study
Gödel’s incompleteness theorem, which asserts that
any consistent system containing arithmetic has
questions that cannot be answered within the
system.

Instructor: Lange
Prerequisite: MATH 302 or MATH 305; or at least two
from MATH 206, MATH 214, MATH 223, MATH 225.
Distribution: MM
Term(s): Not Offered
Normally offered in alternate years.

MATH 310 - Complex Analysis (1.0)
This course offers a rigorous treatment of complex
analysis of one variable. Topics include complex
numbers and functions, analyticity, Cauchy’s integral
formula and its consequences, Taylor and Laurent
series, the residue theorem, the principle of the
argument, and Rouche’s theorem. Other subjects
may include conformal mappings, asymptotic series,
and infinite products. The course will be conducted
at the level of both theory and computation.

Instructor: Tannenhauer
Prerequisite: MATH 302
Distribution: MM
Term(s): Spring

MATH 312 - Differential Geometry (1.0)
Differential geometry has two aspects. Classical
differential geometry, which shares origins with
the beginnings of calculus, is the study of local properties
of curves and surfaces. Local properties are those
properties which depend only on the behavior of the
curve or the surface in a neighborhood of point. The
other aspect is global differential geometry; here we
see how these local properties influence the behavior
of the entire curve or surface. The main idea is that of
curvature. What is curvature? It can be intrinsic or
extrinsic. What’s the difference? What does it mean
to have greater or smaller (or positive or negative) curvature? We will answer these questions for surfaces in three-space, as well as for abstract manifolds. Topics include curvature of curves and surfaces, first and second fundamental forms, equations of Gauss and Codazzi, the fundamental theorem of surfaces, geodesics, and surfaces of constant curvature.

Instructor: Kerr
Prerequisite: MATH 206 or by permission of the instructor.
Distribution: MM
Term(s): Not Offered
Normally offered in alternate years.

**MATH 322 - Advanced Linear Algebra (1.0)**

Linear algebra at this more advanced level is a basic tool in many areas of mathematics and other fields. The course begins by revisiting some linear algebra concepts from MATH 206 in a more sophisticated way, making use of the mathematical maturity picked up in MATH 305. Such topics include vector spaces, linear independence, bases, and dimensions, linear transformations, and inner product spaces. Then we will turn to new notions, including dual spaces, reflexivity, annihilators, direct sums and quotients, tensor products, multilinear forms, and modules. One of the main goals of the course is the derivation of canonical forms, including triangular form and Jordan canonical forms. These are methods of analyzing matrices that are more general and powerful than diagonalization (studied in MATH 206). We will also discuss the spectral theorem, the best example of successful diagonalization, and its applications.

Instructor: Shultz
Prerequisite: MATH 305. Not open to students who took MATH 349 when advanced linear algebra was the topic.
Distribution: MM
Term(s): Fall
Normally offered in alternate years.

**MATH 325 - Graph Theory (1.0)**

Graph Theory has origins both in recreational mathematics problems (i.e., puzzles and games) and as a tool to solve practical problems in many areas of society. Topics covered will include trees and distance, connectivity and paths, network flow, graph coloring, directed graphs, and tournaments. In addition, students will gain a sense of what it means to do research in graph theory.

Instructor: Trenk
Prerequisite: MATH 225 and a 300-level course in math or computer science.
Distribution: MM
Term(s): Not Offered
Normally offered in alternate years.

**MATH 326 - Advanced Combinatorics (1.0)**

This course covers questions of enumerations, existence, and construction in combinatorics, building on the fundamental ideas introduced in MATH 225. Topics include: famous number families, combinatorial and bijective proofs, counting under equivalence, combinatorics on graphs, combinatorial designs, error-correcting codes, and partially ordered sets.

Instructor: Trenk
Prerequisite: MATH 225. Not open to students who took MATH 349 when Advanced Combinatorics was the topic.
Corequisite: MATH 305
Distribution: MM
Term(s): Fall

Majors can fulfill the major presentation requirement in this course in 2014-2015. Normally offered in alternate years.

**MATH 349-01-F - Selected Topics (1.0)**

**Topic for 2014-15: Matrix Groups: Introduction to Lie Groups**

A matrix group is a group of invertible matrices. Matrix groups arise in virtually every investigation of objects with symmetries, including molecules in chemistry, particles in physics, and projective spaces in geometry. They are an essential tool in animated graphics programming, quantum computing and more. A matrix group is simultaneously an algebraic and geometric object. The interplay between the algebra and geometry of matrix groups makes this a rich subject.

Topics will include the rigid motions of the sphere, general linear groups, and the orthogonal, unitary and symplectic groups (O(n), U(n) and Sp(n)). We will also discuss elementary topology (continuity, compactness and path-connectedness) of matrix groups, Lie algebras as tangent spaces, and the exponential map.

Instructor: Kerr
Prerequisite: MATH 305 or permission of the instructor.
Distribution: MM
Term(s): Fall

Majors may fulfill the major presentation requirement in this course in Fall 2014.

**MATH 349-01-S - Selected Topics (1.0)**

**Topic for 2014-15: Stochastic Processes**

This course will focus primarily on discrete stochastic processes, in particular Markov chains. Topics will include the Markov property, absorption probabilities, mean hitting times, the Gambler’s ruin, recurrence and transience, random walks, and invariant distributions. Additional topics include martingales, Brownian motion, and continuous systems.

Instructor: Chang
Prerequisite: MATH 220 and MATH 302
Distribution: MM
Term(s): Spring

**MATH 350 - Research or Individual Study (1.0)**

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall, Spring

**MATH 360 - Senior Thesis Research (1.0)**

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall, Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**MATH 370 - Senior Thesis (1.0)**

Prerequisite: MATH 360 and permission of the department.
Distribution: None
Term(s): Fall, Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
AN INTERDEPARTMENTAL MAJOR

Co-Directors: Metaxas (Computer Science), Kelley (Studio Art)

The Departments of Art and Computer Science offer an interdepartmental major in media arts and sciences that explores the artistic, cultural, and scientific applications of new media technologies. The program focuses on media production that balances artistic sensibility with analytical reasoning within the rich tradition of the liberal arts environment. Areas of study include: digital imaging and design; Web-connected database architectures; three-dimensional visualization and modeling; digital composition in audio/video; analog and digital print and photographic processes; computer graphics and animation; human-computer interaction; and programming for networked environments.

Media Arts and Sciences Major

Goals for the Media Arts and Sciences Major

The Media Arts and Sciences major provides a well-rounded understanding in both areas supporting it: art and computer science. Graduates of the program are expected to be able to analyze and produce multimedia applications that are both visually and functionally competent. They are also expected to be aware of the historical and contemporary trends that drive the creative application of digital media in our society. Importantly, they are expected to be critical thinkers of the use of digital media and their influence on the society. In the process, they are expected to have achieved competence in art theory, multimedia design, and use of technological tools.

Requirements for the Media Arts and Sciences Major

A major in Media Arts and Sciences requires 12 units of course work, at least eight of which must be above the 100 level and at least two of which must be at the 300 level. No more than one can be MAS 350 or MAS 360. In particular, to major in Media Arts and Sciences a student must take three required introductory courses, one each from studio art, art history, and computer science and at least three required art/music core courses and at least three required computer science core courses. The approved courses are listed in the labeled sections above. Flexibility has been built into the major to allow students to adapt their course of study to their interests, choosing an optional concentration in one of these:

- Media Arts by adding two more art/music core courses
- Media Sciences by adding two more computer science core courses

Majors are also encouraged to take at least one approved media culture course and an advanced media production course [e.g., a MAS individual study). In addition to other courses at Wellesley, students can take approved courses at the MIT’s Media Lab and Comparative Media Studies program or at Olin College of Engineering. An FAQ section can be found at the program’s website: www.wellesley.edu/MAS/ along with a spreadsheet to help students plan their major. For more information, students should contact the program directors.

Honors in Media Arts and Sciences

The Media Arts and Sciences thesis offers a year-long opportunity to develop independent research and production with honors. Students interested in proposing a thesis must have a minimum 3.5 GPA in the major, and the support of a faculty advisor in the art or computer science departments. Normally, the honors process needs to obey the guidelines of the corresponding department (art or computer science). An interdepartmental review will occur at the end of the fall semester, to determine whether the student should continue her project as a MAS 370 in the spring and convey its decision to the student by December 18. In a case where it is recommended that the senior thesis not be continued into the second semester, a student would receive credit for 360 work on the completion of a schedule of work previously agreed to between the thesis advisor and the student.

The thesis proposal should be discussed with the primary faculty advisor during the spring prior to senior year. Proposals for thesis projects must be submitted in writing, detailing the scope for the project, research methodology, and project timeline, and must be accompanied by an electronic portfolio of at least four Media Arts and Sciences/Studio Art projects. Proposals are due on August 25 before the beginning of the student’s senior year. (For students wanting to graduate in the fall, contact the program directors for adjusted dates.)

Advanced Placement Policy in Media Arts and Sciences

Students may receive a maximum of one unit of college credit for a score of 5 on the Computer Science A or AB AP exam. This unit can count toward the Media Arts and Sciences major.

Media Arts and Sciences Approved Courses

Students majoring in Media Arts and Sciences are required to take at least 12 courses. Three of them are introductory and at least six are core. At least two of them must be at the 300 level. The following sections have specific information about courses that can count toward the major.

Introductory Required Courses in Media Arts and Sciences

Students majoring in Media Arts and Sciences are required to take three introductory courses, one in art history or cinema and media studies, one in computer science, and one in studio art. The approved courses are listed below.

**Required Courses**

- **ARTH 101** Global Perspectives on Art and Architecture: Renaissance to Contemporary
- **CAM 101** Introduction to Cinema and Media Studies
- **ARTS 105** Drawing I
- **ARTS 108/CAMS 138** Photo I: Introduction to Photography
- **ARTS 109** Two-Dimensional Design
- **ARTS 165/CAMS 135** Introduction to Video Production
- **CAMS 138/ARTS 108** Photography: Photo Introduction
- **CAMS 135/ARTS 165** Introduction to Video Production
- **CS 110** Computer Science and the Internet
- **CS 114** The Socio-Technological Web

**Core Courses Required for the Media Arts and Sciences Major**

Students majoring in Media Arts and Sciences are required to take at least three art/music core courses and at least three computer science core courses from the following core courses. There is flexibility for a student to declare a concentration in Media Arts by adding two more art/music core courses or in Media Sciences by adding two more computer science core courses. The approved core courses are listed below.

**ARTS**

- **208/CAMS 238** Intermediate Digital Photography
- **219** Introductory Print Methods: Lithography/Monotype
- **220** Introductory Print Methods: Intaglio/Relief
- **221/CAMS 239** Digital Imaging
- **255/CAMS 255** Dynamic Interface Design
- **260/CAMS 230** Moving Image Studio
- **265/CAMS 235** Intermediate Video Production/The Documentary Form
- **308/CAMS 338** Photography III
- **315/CAMS 313** Virtual Form
- **317-01/ANTH 362/CAMS 362** Seminar: Topics in the Visual Arts
- **321/CAMS 321** Advanced New Media
- **322** Advanced Print Concepts
- **365/CAMS 335** Advanced Video Production
- **CAMS 230/ARTS 260** Moving Image Studio
- **CAMS 235/ARTS 265** Intermediate Video Production/The Documentary Form
- **CAMS 335/ARTS 365** Intermediate Digital Photography
- **CAMS 338/ARTS 308** Digital Imaging

**CS**

- **111** Advanced Video Production
- **215** Computer Programming and Problem Solving
- **216** Multimedia Design and Programming
- **220** Human-Computer Interaction
- **230** Data Structures
- **231** Fundamental Algorithms
- **242** Computer Networks
- **304** Databases with Web Interfaces
- **307** Computer Graphics
- **315** Web Search and Mining
Media Culture Courses Recommended for the Media Arts and Sciences Major

It is recommended that students majoring in Media Arts and Sciences take at least one media culture course from the ones listed below.

- ARTH 225 Modern Art Since 1945
- ARTH 226/CAMS 207 History of Photography: From Invention to Media Age
- ARTH 391/CAMS 341 Persuasive Images
- CAMS 200 Thinking Through Cinema: Film and Media Theory
- CAMS 207/ARTH 226 History of Photography: From Invention to Media Age
- CAMS 222 "Being There": Documentary Film and Media
- CAMS 341/ARTH 391 Persuasive Images

For Credit Toward the Media Arts and Sciences Major

The courses listed below are representative of other Wellesley and MIT courses that emphasize topics related to the Media Arts and Sciences major. MAS majors must request approval from the program directors before registering for CS 249 and CS 349. Students may include courses not listed below in their major with permission of the program directors.

- ANTH 232/CAMS 232 Anthropology of Media
- CAMS 234/ENG 204 The Art of Screenwriting
- CAMS 270 The Light and the Dark of the Net: Histories and Theories of the Internet
- CS 249-01-S Topics in Computer Science
- CS 332 Visual Processing by Computer and Biological Vision Systems
- CS 342 Computer Security
- CS 349-01-S Advanced Topics in Computer Science
- ENG 204/CAMS 234 The Art of Screenwriting
- NEUR 320 Vision and Art
- PHIL 203 Philosophy of Art
- POLI 316 Media and American Democracy

MIT Courses

The MIT Media Lab and the MIT Comparative Media Studies Program offer a large variety of courses that may be appropriate for a Media Arts and Sciences major. These offerings vary per semester; please consult the MIT catalog at student.mit.edu/catalog/mMASa.html and student.mit.edu/catalog/mCMSa.html. In addition, the MIT Undergraduate Research Opportunities Program (UROP) offers opportunities for students to participate in research with MIT faculty. The Media Lab faculty often offer research opportunities that are appropriate for a Media Arts and Science major. Research opportunities vary per semester; please check the MIT UROP webpage for information: web.mit.edu/urop/students/howto.html.

Olin Courses

The Olin College of Engineering offers the following courses that may be appropriate for a Media Arts and Sciences major:

- ENGR 2250 User-Oriented Collaborative Design

MAS - Media Arts and Sciences Courses

- **MAS 250 - Research or Individual Study (1.0)**
  - Prerequisite: Permission of the instructor.
  - Distribution: None
  - Term(s): Fall; Spring

- **MAS 250H - Research or Individual Study (0.5)**
  - Prerequisite: Permission of the instructor.
  - Distribution: None
  - Term(s): Fall; Spring

- **MAS 350 - Research or Individual Study (1.0)**
  - Prerequisite: Permission of the instructor. Open to juniors and seniors.
  - Distribution: None
  - Term(s): Fall; Spring

- **MAS 350H - Research or Individual Study (0.5)**
  - Prerequisite: Permission of the instructor.
  - Distribution: None
  - Term(s): Fall; Spring

- **MAS 360 - Senior Thesis Research (1.0)**
  - Prerequisite: Permission of the department.
  - Distribution: None
  - Term(s): Fall; Spring

- **MAS 370 - Senior Thesis (1.0)**
  - Prerequisite: MAS 360 and permission of the department.
  - Distribution: None
  - Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

- **MAS 370 - Senior Thesis (1.0)**
  - Prerequisite: MAS 360 and permission of the department.
  - Distribution: None
  - Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
AN INTERDEPARTMENTAL MAJOR

The major in Medieval/Renaissance Studies enables students to explore the richness and variety of European and Mediterranean civilization from later Greco-Roman times through the Renaissance and Reformation, as reflected in art, history, literature, music, and religion. It has a strong interdisciplinary emphasis; we encourage students to make connections between the approaches and subject matters in the different fields that make up the major. At the same time, the requirements for the major encourage special competence in at least one field.

Medieval/Renaissance Studies Major

Goals for the Medieval/Renaissance Studies Major

The Medieval/Renaissance major seeks to develop the following areas of knowledge and skills in its majors:

- An acquaintance with the richness and variety of European and Mediterranean civilizations from the later Greco-Roman times through the Renaissance and Reformation (c. 300-1600 CE), as reflected in art, history, literature, music, and religion
- The opportunity to work across disciplines and make connections between the approaches and subject matters in the different fields that make up the major
- An in-depth understanding and special competence in at least one area of humanistic study during the period
- The ability to analyze and critique primary and secondary source material in a variety of humanistic disciplines
- The ability to express ideas clearly and cogently in both written and spoken language, and to conduct original research

Students entering Wellesley in the fall of 2012 or later must take at least nine units of course work from the following list. Of these, at least four must be above the 100 level in an area of concentration— a single department, a geographic-cal location, a topic or theme.

Students who entered Wellesley prior to fall of 2012 must take at least eight units of course work from the following course listings. Of these, at least four must be above the 100 level in an area of concentration—a single department, a geographic-cal location, a topic or theme.

A major in Medieval/Renaissance Studies will normally select her major advisor from the department or area in which she is concentrating. Two units of course work must be at the 300 level, and under normal circumstances, both of these courses must be taken at Wellesley College. Normally, credit/noncredit courses do not count for the major.

Honors in Medieval/Renaissance Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have

- A grade point average of at least 3.5 in all work in the major field above the 100-level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Graduate Study and Careers in Medieval/Renaissance Studies

Majors who are contemplating postgraduate academic or professional careers in this or related fields should consult faculty advisors to plan a sequence of courses that will provide them with a sound background in the language and critical techniques essential to further work in their chosen fields. We make every effort to accommodate individual interests and needs through independent study projects (350s and senior theses) carried out under the supervision of one or more faculty members and designed to supplement, or substitute for, advanced seminar-level work.

Advanced Placement Policy in Medieval/Renaissance Studies

The Medieval/Renaissance Studies program does not accept Advanced Placement credits to replace course work in the major.

Transfer Credit in Medieval/Renaissance Studies

Under normal circumstances, no more than two courses taken outside of Wellesley College may be counted toward the major. For students entering in the fall of 2014 and later, neither of these can be the required 300-level course for the major. Students entering in the fall of 2013 and earlier should consult the Chair of Medieval/Renaissance about counting such courses as 300-level courses in the major.

International Study in Medieval/Renaissance Studies

There are numerous opportunities for international study for those who wish to broaden their experience and supplement their research skills through direct contact with European and Mediterranean culture. For students entering in the fall of 2014 and later, up to two courses in accredited programs abroad may be counted toward the major. For students entering in the fall of 2013 and earlier, up to three courses in accredited programs abroad may be counted toward the major. By participating in the Collegium Musicum, students can learn to perform Medieval and Renaissance music; see the departmental entry for Music.

than what popular cultures and beliefs would represented dramatically different configurations knowledge, gender, sexuality, and religion physical activity to romance, marriage, medical

During the Middle Ages, the relationship of intimate physical activity to romance, marriage, medical knowledge, gender, sexuality, and religion represented dramatically different configurations than what popular cultures and beliefs would indicate today. Focusing on the European Middle Ages, the course will examine, from various perspectives (primarily literature, medicine, and religious texts), how desire was informed by cultural constructions. Topics will include the development of “courtly love,” love as illness, the evolution of misogyny, marriage, prostitution, and birth control. Students will consider the pros and cons of the use of contemporary notions of sexuality for understanding premodern societies, and how, in turn, medieval formulations shaped current popular views regarding love and sex.

ME/R 247 - Arthurian Legends (1.0)
The legends of King Arthur and the Knights of the Round Table, with their themes of chivalry, magic, friendship, war, adventure, corruption, and nostalgia, as well as romantic love and betrayal, make up one of the most influential and enduring mythologies in European culture. This course will examine literary interpretations of the Arthurian legend, in history, epic, and romance, from the sixth century through the sixteenth. We will also consider some later examples of Arthuriana, on page and movie screen, in the Victorian and modern periods.

Instructor: Wall-Randell (English)
Prerequisite: None
Cross-Listed as: ENG 247
Distribution: LL
Term(s): Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

ME/R 249 - Writing Medieval Gender in England (1.0)
This course will mine the earliest beginnings of English literary history for new answers about how gender constructions have been and can be fluid, rigid, oppressive, or liberating. We’ll find that though nearly all early English scribes identified as male (if they identified themselves at all), we can still perceive the voices, bodies, and experiences of authors and subjects who identified as women, men, girls, boys, or none of these, or who moved from one gender identity to others, or who remained somewhere in between. We’ll supplement our Old and Middle English readings (most of them in translation) with short, accessible samples from modern theoretical writings on gender, sexuality, and queerness.

Prerequisite: None
Cross-Listed as: ENG 249
Distribution: LL
Term(s): Spring

ME/R 275 - Between Transcendence and Transgression: Desire from Dante to Milton (1.0)
This course takes as its focus the discourses of desire informing some of the major works of English and Italian literature from the Middle Ages to the seventeenth century. Through an exploration of the themes of transcendence and transgression in Dante, Petrarch, Boccaccio, Chaucer, Shakespeare, Ariosto, and Milton, students will analyze the dynamics of desire (whether sexual, psychological, or textual) that open up exciting vistas on the tensions between human and divine love, excess and control, lack and fulfillment, suffering and joy. The roles of transcendence and transgression will also be considered in the relationship each author entertains with his or her literary models and predecessors to see how desire shapes a dialogue across geographical and temporal boundaries.

Instructor: Southerden (Italian Studies)
MIDDLE EASTERN STUDIES

AN INTERDEPARTMENTAL MAJOR AND MINOR
Director: Marlow (Religion)
Lecturer: Aaddani, Zitnick
Advisory Committee: Euben (Political Science), Geller (Religion), Hajj (Political Science), Kapteijns (History), Malino (History and Jewish Studies), Marlow (Religion)

The major in Middle Eastern Studies is designed to acquaint students with the many facets of Middle Eastern civilizations through an interdisciplinary study of the languages, literatures, histories, religions, arts, social and political institutions, and cultural patterns of the region known as the Middle East. Study of Middle Eastern communities living in diaspora may also be counted toward the major.

The Middle Eastern Studies program offers both a major and a minor.

Middle Eastern Studies Major
Goals for the Middle Eastern Studies Major
- Introduce students to the histories, ecologies, social, political and cultural systems, and religious traditions and communities of the Middle East and North Africa
- Provide the necessary linguistic skills and methodological tools to pursue advanced and more specialized study
- Provide depth of study in a particular subfield or area (examples include modern Arab literature; art and architecture of the Middle East; literature and film; Islamic studies; history of religion in the Middle East; the Middle East in the twentieth century; North African studies; Iranian studies; women and gender in the Middle East)
- Refine the skills required in each of the contributing departments (Anthropology, Art, History, Political Science, Religion), including:
  - The abilities to formulate and test ideas and hypotheses
  - Adduce and evaluate evidence of various kinds
  - Identify, summarize, and criticize arguments in primary and secondary textual and other materials
  - Write with clarity and precision

Requirements for the Middle Eastern Studies Major
The major in Middle Eastern Studies requires nine units. Students must demonstrate proficiency in Arabic (equivalent to at least two semesters at the second-year level). No credit toward the major is given for the first year of language study. In certain cases, another Middle Eastern language (for example, Persian, Turkish, Hebrew) may be substituted for Arabic. The substitution of a language other than Arabic for the major requires the approval of the advisory committee. A student who wishes to substitute a language other than Arabic should consult her advisor and, with her advisor's approval, submit a written request to the director. If the request is approved, one year of Arabic study will still be required for the major in almost all cases. For students who are exempt from the language requirement, nine units are still necessary for the completion of the major. Students are required to concentrate in some area or aspect of Middle Eastern Studies (for example, Arabic language and literature; religion; the pre-modern Middle East; the modern Middle East; political science) by taking four courses above the 100 level, including at least two at the 300 level, one of which must normally be a seminar. As long as they have secured the program's approval, students may apply two courses taken away from Wellesley to the major. In exceptional cases, students who wish to count an additional course taken away from Wellesley to their majors may, after consultation with their advisors, submit a request for approval to the director. For the minor, only one course taken away from Wellesley may be counted.

Majors devise their own programs of study in consultation with an appropriate faculty member from the student's area of concentration. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for Middle Eastern studies.

In addition to Wellesley courses, students are encouraged to take relevant courses at Brandeis University, Olin College, and MIT. These courses must be approved toward the major, in advance, by the corresponding department at Wellesley.

Honors in Middle Eastern Studies
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the Advisory Committee may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions. A student who wishes to be admitted to the honors program should discuss her plans with her advisor well before the application is due, and should normally have completed at least two courses within the discipline or department of the advisor.

ARAB - Arabic Courses

ARAB 101 - Elementary Arabic (1.0)
An introduction to the Arabic language. The course takes a comprehensive approach to language learning and emphasizes the four skills of listening, speaking, reading, and writing. Students are introduced to the principles of grammar, taught how to read and write in the Arabic alphabet, and trained in the basics of everyday conversation. Through the use of a variety of written, video, and audio materials, as well as other resources made available through the Web, the course emphasizes authentic materials and stresses the active participation of students in the learning process.
ARAB 101 - Intermediate Arabic (1.0)

A continuation of ARAB 101-Arabic 102. The course takes students to a deeper and more complex level in the study of the Arabic language. While continuing to emphasize the organizing principles of the language, the course also introduces students to a variety of challenging texts, including extracts from newspaper articles, as well as literary and religious materials. Students will be trained to work with longer texts and to gain the necessary communicative skills to prepare them for advanced-level Arabic.

Instructor: Aodnani
Prerequisite: ARAB 101, ARAB 102, or permission of the instructor.
Distribution: None
Term(s): Fall
Each semester of ARAB 201 and ARAB 202 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

ARAB 202 - Intermediate Arabic (1.0)

A continuation of ARAB 201. The course takes students to a deeper and more complex level in the study of the Arabic language. While continuing to emphasize the organizing principles of the language, the course also introduces students to a variety of challenging texts, including extracts from newspaper articles, as well as literary and religious materials. Students will be trained to work with longer texts and to gain the necessary communicative skills to prepare them for advanced-level Arabic.

Instructor: Aodnani
Prerequisite: ARAB 101, ARAB 102, or permission of the instructor.
Distribution: LL
Term(s): Spring
Each semester of ARAB 201 and ARAB 202 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

ARAB 102 - Elementary Arabic (1.0)

An introduction to the Arabic language. The course takes a comprehensive approach to language learning and emphasizes the four skills of listening, speaking, reading, and writing. Students are introduced to the principles of grammar, taught how to read and write in the Arabic alphabet, and trained in the basics of everyday conversation. Through the use of a variety of written, video, and audio materials, as well as other resources made available through the Web, the course emphasizes authentic materials and stresses the active participation of students in the learning process.

Instructor: Zinick
Prerequisite: ARAB 101
Distribution: None
Term(s): Fall
Each semester of ARAB 101 and ARAB 102 earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

ARAB 250H - Research or Individual Study (0.5)

Prerequisite: ARAB 201-ARAB 202 or equivalent and permission of the instructor.
Distribution: LL
Term(s): Fall, Spring

ARAB 306 - Arabic Through Song and Poetry (1.0)

This course explores the importance of song lyrics and poetry in the Arabic-speaking world. In addition to providing a concise historical survey of some of the most influential figures in poetry and songwriting, the course offers training in textual analysis of selected texts in Arabic. Materials include sung poems from al-Andalus (Muslim Spain), poetry and song lyrics from traditional Arabic music from the 1900s onward, as well as from contemporary genres such as rock ‘n’ roll and hip-hop.

Instructor: Aodnani
Prerequisite: ARAB 201-ARAB 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

ARAB 201 - Advanced Arabic I (1.0)

Continuation of ARAB 201-202. Involving further development of students’ skills in listening, speaking, reading, and writing, this course exposes students to a variety of authentic Arabic materials, including print and online sources, incorporating MSA and diglossia. Focus is on enhancing communication skills in Arabic and attention to the use of language in its sociocultural context.

Appropriate for students who have completed ARAB 201-202 at Wellesley or the equivalent in summer courses or international study programs.
Instructor: TBA
Prerequisite: ARAB 201-ARAB 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

ARAB 304 - Advanced Contemporary Media Arabic (1.0)

An exploration of contemporary standard Arabic as used in audiovisual, Web-based, and print media, including newspapers, magazines, websites, audiovisual commentaries, news reports, forums, and popular television programs. Authentic Arabic press reports, current news broadcasts, and other reading or listening materials will provide a basis for discussion and debate in class. Focus on strengthening listening and speaking skills, and developing the ability to express and support various opinions on political, cultural, and other issues in contemporary Arab societies.

Instructor: TBA
Prerequisite: ARAB 201-ARAB 202 or permission of the instructor.
Cross-Listed as: MSA 310
Distribution: LL, SBA
Term(s): Spring
MESA 310 is taught in English. Students who wish to take the course for credit in Advanced Arabic should enroll in ARAB 310. For these students, assignments will be in Arabic according to their levels of proficiency, and an additional weekly meeting will be held.

ARAB 305 - Research or Individual Study (1.0)

Close readings and study of selected prose and verse from the rich repertoire of Classical Arabic literature. Readings will be selected in part in response to the interests of students enrolled in the course, but are likely to include some of the following: readings from sacred texts and the traditional scholarly traditions, mystical and philosophical writings, historiographical and geographical writings, collections of stories, travelers’ accounts, letters and diaries, and various kinds of poetry. All readings will be in Arabic, with discussion and written assignments mostly in English.
Instructor: Markow
Prerequisite: ARAB 201-ARAB 202 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

ARAB 202 - Advanced Arabic II (1.0)

Continuation of ARAB 301. Further development of all linguistic skills with special attention to reading, writing, and discussion. The course also introduces students to modern Arabic literature. Focus is on enhanced communication skills in Arabic and attention to the use of language in its sociocultural context.

Appropriate for students who have completed ARAB 301 at Wellesley or the equivalent in summer courses or international study programs.
Instructor: TBA
Prerequisite: ARAB 301 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

ARAB 304 - Advanced Contemporary Media Arabic (1.0)

An exploration of contemporary standard Arabic as used in audiovisual, Web-based, and print media, including newspapers, magazines, websites, audiovisual commentaries, news reports, forums, and popular television programs. Authentic Arabic press reports, current news broadcasts, and other reading or listening materials will provide a basis for discussion and debate in class. Focus on strengthening listening and speaking skills, and developing the ability to express and support various opinions on political, cultural, and other issues in contemporary Arab societies.

Instructor: TBA
Prerequisite: ARAB 201-ARAB 202 or permission of the instructor.
Cross-Listed as: MSA 310
Distribution: LL, SBA
Term(s): Spring
MESA 310 is taught in English. Students who wish to take the course for credit in Advanced Arabic should enroll in ARAB 310. For these students, assignments will be in Arabic according to their levels of proficiency, and an additional weekly meeting will be held.

ARAB 305 - Research or Individual Study (1.0)
ARAB 350H - Research or Individual Study (0.5)

MES - Middle Eastern Studies Courses

MES 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

MES 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

MES 310 - Resistance and Dissent in North Africa and the Middle East (in English) (1.0)
An exploration of themes of resistance and dissent in the literatures and cultures of North Africa and the Middle East since the early 1980s. Topics include the rise of democratic movements, such as political parties, associations, and NGOs; the role and importance of Islam to the identity of contemporary nation-states in the region; the status of women and minorities in the ideologies of the movements under study; and the status and implications of dissent.
Materials studied include works of fiction and nonfiction, films, speeches, song lyrics, and online publications.
Instructor: Aadnani
Prerequisite: Open to students who have taken at least one course in Middle Eastern studies, and to juniors and seniors by permission of the instructor.
Cross-Listed as: ARAB 310
Distribution: LL; SBA
Term(s): Spring
MES 310 is taught in English. Students who wish to take the course for credit in Advanced Arabic should enroll in ARAB 310. For these students, assignments will be in Arabic according to their levels of proficiency, and an additional weekly meeting will be held.

MES 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.

Department of Music  

Goals for the Music Major  
The Music Department at Wellesley College offers  
students a program that integrates performance,  
research, critical thinking, and the creative  
process. We strive to enhance students’ knowledge  
and understanding of diverse musical cultures, and  
to guide them in applying that understanding to their  
engagement with music. Recognizing how  
contemporary innovations in technology and digital  
media are impacting musical performance and  
compositional practices in the 21st century, we also  
provide students with opportunities to study  
computer music as well as interdisciplinary new  
media that draw on visual arts and film  
studies. Music majors study the global and historical  
contexts, literatures, aesthetics, and critical and  
practical theories of music. They work closely with  
the materials of music, becoming fluent in analyzing  
and interpreting both written and heard music. We  
require majors to cultivate aural and keyboard  
fluency as well as perform in ensembles, and we  
offer opportunities for independent projects in research, performance, composition, and/or  
 improvisation. Through this critical and applied  
approach, music majors learn new ways of reading,  
writing, performing, and thinking about sound.  

Requirements for the Music Major  
The major in Music is a program of at least 10  
units. Students entering prior to 2014 fulfill the  
requirements for the major as follows:  

MUS 122  
MUS 244  
MUS 200  
MUS 201  
MUS 202  
MUS 315  
MUS 300  

3 electives at the 200 or 300 level  

For students entering in 2014 and beyond, the  
department offers four areas of concentration in  
fulfilling the Music major:  

Western Classical Music  
MUS 122  
MUS 244  
MUS 200  
MUS 201  
MUS 202  
MUS 315  

4 electives  

Jazz/World Music  
MUS 122  
MUS 209  
MUS 220  
MUS 276  
MUS 298  

3 electives  

Digital Media/Experimental Music  
MUS 122  
MUS 202  
MUS 275  
MUS 277/377  

3 electives  

Students concentrating on Digital Media/Experimental Music take Harmonic Concepts in Tonal Music (MUS 122), History of Western Music III (MUS 202), Introduction to Electronic and Computer Music: History and Practices (MUS 275), Interactive Sound Art with Electronics (277/377), Computer Programming and Problem Solving (CS 111), one course in Cinema and Media Studies; one course in Media Arts and Sciences, and three electives.  

While MUS 101 can be counted toward the major, MUS 111 cannot.  Students who declare a Music major will also be required to participate in their choice of the department’s performing music ensembles for at least one academic year (i.e., two semesters). In most cases, courses taken  
credit/noncredit will not count toward the major. Ideally, students interested in majoring in music should begin the theory sequence with MUS 122 in the fall semester of the first year. This allows them to enroll in the spring-term offering of MUS 244, which is desirable for MUS 200 and the courses that follow sequentially. Starting on this sequence immediately affords the option of taking a wider variety of elective music courses in the junior and senior years, and also makes it easier for those studying abroad to complete the major comfortably. Students who need remedial theory (MUS 102H) should work with a Music advisor to set up an accelerated program of study if they would like to pursue the major. If a student places out of MUS 122 and/or MUS 244, she will need to pursue other Music courses to add up to 10 units.  

Students who plan to undertake graduate study in musicology or theory are strongly encouraged to study German, French, or Italian beyond the introductory level, as well as European history, literature, and art. Basic proficiency in one or more  

Among the following courses (MUS 101, MUS 200, MUS 201, MUS 202); 2 courses among MUS 101, 200, 201, and 202; Performing Music: Jazz Improvisation, Advanced (MUS 298); American Popular Music in the Twentieth Century (MUS 276), plus three electives. They participate in the Wellesley BlueJazz and Yamalou ensembles.  

Individual Major  
A student may elect to design an individual major in consultation with her major advisor.  
The Western Classical Music concentration is concerned with the elements of classical music: performance, theory, history, analysis, and cultural studies. Courses in this concentration focus primarily on Western European and North American musical repertoires. Concentrators in Western Classical take the full classical music theory and history sequence (MUS 122, MUS 244, MUS 315; MUS 200, MUS 201, MUS 202) plus four electives. Students participate in ensembles such as the Choir, Chamber Singers, the Brandeis-Wellesley Orchestra, the Collegium Musicum, the Guild of Carillonneurs, and the Chamber Music Society.  

Students concentrating on Jazz/World Music take Jazz Theory (MUS 220); Harmonic Concepts in Tonal Music (MUS 122); A History of Jazz (MUS 209); 2 courses among MUS 101, 200, 201, and 202; Performing Music: Jazz Improvisation, Advanced (MUS 298); American Popular Music in the Twentieth Century (MUS 276), plus three electives. They participate in the Wellesley BlueJazz and Yamalou ensembles.  

Goals for the Music Major  
Music Major  

The Music Department at Wellesley College offers  
students a program that integrates performance,  
research, critical thinking, and the creative  
process. We strive to enhance students’ knowledge  
and understanding of diverse musical cultures, and  
to guide them in applying that understanding to their
European languages will also benefit students who plan to undertake graduate study in ethnomusicology, as well as in one or more other foreign languages relevant to a particular research interest.

Music majors develop their musicianship through the acquisition of basic keyboard skills, ear training, private instruction in practical music, and involvement in the various performance ensembles of the department.

Honors in Music

The department offers a choice of three programs for honors, all under the catalog numbers 360/370; honors students normally elect the two units in succession during the senior year. Eligibility for these programs requires a GPA of 3.5 in the major. Under Program I, the honors candidate carries out independent research leading to a written thesis and an oral examination. Under Program II, honors in composition, the 360 and 370 units culminate in a composition of substance and an oral examination on the honors work. Prerequisites for this program are MUS 315 and distinguished work in MUS 313.

Program III, honors in performance, culminates in a recital, a lecture-demonstration, and an essay on some aspect of performance practice. The prerequisite for Program III is MUS 344 or MUS 298 in the junior year and evidence during that year, through public performance, of exceptional talent and accomplishment. MUS 344 or MUS 298 must be then continued in the senior year, but now as a component of the MUS 360/MUS 370 sequence, and not for separate course credit.

Music Minor

Requirements for the Music Minor

The music minor is a program of at least five units. One unit must come from theory (MUS 122, MUS 220, or MUS 244), and another from history (MUS 101, MUS 200, MUS 201, MUS 202, MUS 209, MUS 222/MUS 322, MUS 224, MUS 230, MUS 235/MUS 335, MUS 275, MUS 276, MUS 277/MUS 377). Please note that MUS 111 does not count for the music minor. One of the five units may come from earning one credit through performing music lessons (MUS 198, MUS 199, MUS 298, MUS 299) or through completing two years in an ensemble (MUS 250H). In order to shape a program to suit diverse musical interests, the student minoring in music should plan to select the remaining two or three courses in consultation with their chosen advisor in the process of declaring her music minor. Not more than one academic course taken for credit/noncredit may be counted toward the minor.

Music minors are encouraged to develop musicianship through the acquisition of basic keyboard skills, and through ear training, private instruction in practical music, and involvement in the various performing organizations of the Department of Music.

Performance

Performing Music Instrument Collection

The music department owns 40 pianos (which include 28 Steinway grands, two Mason and Hamlin grands, and numerous Steinway uprights), a Noack practice organ, a harp, a marimba, a jazz drum kit, and a wide assortment of modern orchestral instruments. In addition, an unusually fine collection of instruments appropriate to early music performance is available for use by students. These include a Dolmetsch clavichord, a virginal, three harpschords, a positive organ, a fortepiano, an 1823 Clementi grand piano, a Gothic harp, a lute, eight violas da gamba, a Baroque violin, and an assortment of Renaissance and Baroque wind instruments. Of particular interest is the Charles Benton Fisk meantone organ (completed 1981) in Houghton Memorial Chapel which is America’s first major instrument constructed after seventeenth-century German prototypes. Galen Stone Tower contains a 32-bell carillon.

Advanced Performance Seminar (MUS 344)

The Performance Workshop offers advanced students an opportunity to perform frequently in an informal setting before fellow students and faculty, to discuss repertoire and interpretation, and to receive constructive comments.

Skills Instruction in Music

Group instruction in basic keyboard skills, including keyboard harmony, sight-reading, ear training, and score reading, is provided free to all students enrolled in any music course (including 101 with the instructor's permission and if space is available), and to MUS 99 students with the written recommendation of their private instructor. Ensemble sight-reading instruction on a more advanced level is also available for pianists.

Private Instruction in Music

The department offers private instruction in voice, piano, fortepiano, organ, harpsichord, harp, violin, Baroque violin, fiddle, viola, violoncello, double bass, viola da gamba, flute (Baroque and modern), oboe, clarinet, bassoon, trumpet, French horn, trombone, tuba, recorder, lute, classical guitar, saxophone, percussion, and marimba; and private jazz instruction in piano, violin, bass, saxophone, flute, trumpet, trombone, percussion, and voice. Each student will make every attempt to accommodate students wishing private instruction in instruments not currently taught.

All students planning to enroll for music lessons must take the Music Theory Placement Evaluation. Information concerning auditions and course requirements for noncredit and credit study is given above under listings for MUS 99, MUS 198, MUS 199, MUS 298, MUS 299, and MUS 344. Except for MUS 344, auditions and the Music Theory Placement Evaluation are ordinarily given at the start of the first semester.

There is no charge to students enrolled in MUS 198, MUS 199, MUS 298, MUS 299 or MUS 344 who: 1) have demonstrated financial need as determined by the Wellesley College Financial Aid Office; 2) are receiving financial aid from Wellesley College; and 3) are taking the normal length of lesson (45 minutes at the 199 level, one hour at the 299 level). All other MUS 198, MUS 199, MUS 298, and MUS 299 students, while still given the full-length lesson, are charged an annual fee of $1,014 (calculated as the rate for one half-hour lesson per week of the academic year). Students who contract for performing music instruction under MUS 99 are charged $1,014 for one half-hour lesson per week through both semesters, and may register for 45-minute or hour lessons for an additional charge. A fee of $35 per year is charged to performing music students for the use of a practice studio. The fee for the use of practice studio for fortepiano, harpsichord, carillon, and organ is $45.

Music lessons at Wellesley involve a full-year commitment: lesson contracts are binding for the entire school year. Performing music fees are payable by September 30; no refunds will be made thereafter.

For purposes of placement, the Music Theory Placement Evaluation is given before classes start in the fall semester. All students registered for MUS 111, MUS 122, or private instruction in MUS 99, MUS 198, or MUS 199 are required to take the Music Theory Placement Evaluation.

Arrangements for lessons are made at the department office during Orientation or the first week of the semester. Students may begin private study at the start of the second semester. Students returning from study abroad are allowed to take one semester of lessons after consultation with an instructor.

Academic Credit and Corequisites for MUS 198, MUS 199, MUS 298, and MUS 299 in Music

Credit for performing music at the MUS 198, MUS 199, MUS 298, and MUS 299 levels is granted only for study with the department’s performance faculty, not with outside instructors; the final decision for acceptance is based on the student’s audition. One unit of credit is granted for a full year (two semesters) of study in either MUS 198, MUS 199, MUS 298, or MUS 299; except by special permission, both semesters must be satisfactorily completed before credit can be counted toward the degree. While music performance courses (MUS 99, MUS 198, MUS 199, MUS 298, MUS 299, MUS 344) may be repeated without limit, no more than four units of credit in these courses may be counted toward the Wellesley degree. More than one course in performing music for credit can be taken simultaneously only by special permission of the department.

An additional music course must be elected as a corequisite for each unit of credit in performing music. If a student must take MUS 111 as a result of the placement test, this course counts as the corequisite for the year.

The department’s MUS 198, MUS 199, MUS 298, and MUS 299 offerings are made possible by the Estate of Elsa Graeke Whitney ’18.

Group Instruction in Music

Group instruction in classical guitar, percussion, viola da gamba, Renaissance wind instruments, and voice is available for a fee of $300 per year.

Performing Organizations in Music

The following organizations, all directed by faculty members, are vital extensions of the academic program of the Department of Music.

The Wellesley College Choir

The College Choir, consisting of approximately 50 singers, has a rich history of dedication to great choral literature and inspiring performances. Endowed funds provide for annual collaborative concerts with men’s choirs from such institutions as the University of Virginia, Miami University of Ohio, Harvard, and Cornell. The choir regularly commissions and premieres new compositions as well as performs a great variety of repertoire for women’s chorus. In addition to staging local performances of works for choir and orchestra and singing at annual concert events throughout the year, the choir tours both nationally and internationally. Auditions are held during Orientation.

The Wellesley College Chamber Singers

A select ensemble of 12 to 16 vocalists, the Chamber Singers perform concerts on and off campus. The Chamber Singers are often invited to perform with local instrumental ensembles, on professional concert series, and as part of choral festivals. Specializing in music for women’s voices, the repertoire ranges from medieval to contemporary literature.

Choral Scholars

As part of the Choral Program, students may audition to join the Choral Scholars. Open to all students and
effective for the full academic year, the scholarships are awarded to singers and conductors who have a serious interest in choral music. The recipients will be expected to participate in one or more of the choral ensembles; serve as section leaders and/or assistant conductors; meet weekly as a group for coaching and research; and take voice or conducting lessons. Applications are available at the start of the fall semester.

The Collegium Musicum
The Wellesley College Collegium Musicum specializes in the performance of Western music from the Middle Ages to the early nineteenth century. This ensemble of singers and instrumentalists is open to Wellesley College students, faculty, staff, and members of the local community. The Collegium is also frequently joined by guest artists, who enrich the ensemble for special projects. Members of the Collegium enjoy the use of an extensive collection of historical instruments. Separate consort instruction is available in viola da gamba and Renaissance wind instruments for both beginning and advanced players on a fee basis ($300 for the 2014-15 academic year).

The Brandeis-Wellesley Orchestra
The Orchestra is composed of students, faculty, staff, and associates of Wellesley College and Brandeis University. Observing the high standard of excellence associated with these institutions, the Orchestra is dedicated to bringing inspiring performances of the great orchestral literature—past and present—to a new generation of musicians and audiences. The Orchestra gives four to five concerts a year; one concert features the winners of the annual Concerto Competition, which is open to students taking lessons and participating in department ensembles. Two-hour rehearsals are held on Tuesday evenings at Brandeis and Thursday evenings at Wellesley, and shuttle buses are provided. Membership is based on auditions held at the start of each semester.

The Chamber Music Society
The Chamber Music Society offers an opportunity for small ensembles to explore the chamber music repertoire of the last four centuries. A number of groups, which include singers and players of strings, winds, and keyboards, rehearse independently and also meet weekly with a faculty coach at no cost. Throughout the year, players present formal and informal recitals. Entrance is by audition.

Wellesley BlueJazz
Wellesley BlueJazz Ensemble Program includes Wellesley BlueJazz Big Band and BlueJazz Combos. Faculty-directed rehearsals encourage the development of fluency in jazz improvisation. The ensembles perform throughout the year on campus and also collaborate with other colleges in the Boston area to present joint concerts. The Wellesley BlueJazz experience includes workshops and master classes with visiting guest artists and WB&J NightsOut attending jazz performances in the Boston area.

Yanvalou Drumming and Dance Ensemble
Yanvalou, an ensemble that explores the traditional music of Africa and the Caribbean, offers participants the opportunity to perform with authentic instruments, and to experience a variety of cultures through their music. In collaboration with its dance troupe, Yanvalou presents several concerts during each academic year.

Guild of Carillonneurs
Members are selected through an application process, and they receive weekly lessons and bi-weekly masterclasses on the 32-bell carillon in Gaven Stone Tower. The guild hosts open concerts and events for the local community, and members travel to other carillons for wider performance possibilities. On campus, guild members perform solo concerts on the college carillon between classes and for special events in the college community.

MUS - Music Courses

MUS 099 - Performing Music (without academic credit) (0)
One-half-hour private lesson per week. Students may register for 45-minute or hour-long lessons for an additional fee. May be repeated without limit.
Instructor: Staff
Prerequisite: None
Distribution: None
Term(s): Fall; Spring

MUS 101 - Music of the Globe (1.0)
Did you know that “hocketing patterns,” or rhythms that interlock, are important in Indian classical music but barely present in the classical music of Western Europe? This course offers a cross-cultural listening encounter with musical expressions from around the globe. Using a case-study approach, we will consider the commonalities and differences among classical, jazz, pop, and traditional music from many continents. Our auditory journeys will introduce you to various musical systems, instruments, composers, performers, and social settings for engaging with music. Open ears are the only prerequisite.
Instructor: Bhogal
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

MUS 102H - Musicianship Lab (0.5)
One class period per week, devoted to training in reading, playing, and singing from musical notation, and the study of scales, intervals, chords, and rhythmic patterns. Although this lab will continue throughout the academic year, students who complete the first semester successfully will be eligible to take MUS 111 in the second semester.
Instructor: Collins
Prerequisite: None
Distribution: None
Term(s): Fall; Spring

MUS 111 - Introduction to the Language of Music (1.0)
This course is designed to enhance understanding of how music works and to improve listening, reading, and general comprehension skills for students who can read music. While the focus is on the fundamentals of Western music (notation, rhythm, melody, scales, chords, formal plans), listening examples will be drawn from a variety of genres.

MUS 102 - Harmonic Concepts in Tonal Music (1.0)
Beginning with a comprehensive review of musical terminology and basic materials, MUS 102 explores the fundamentals of tonal harmony, voice-leading, phrasing, and form. Topics include harmonic functions and phrase structure, cadence formation, voice-leading and figured bass, and tonal analysis.

MUS 198 - Performing Music (Jazz Improvisation) Intermediate (1.0)
One 45-minute lesson per week. Students may take an hour-long lesson for an additional fee. A minimum of six hours of practice per week is expected. MUS 198 incorporates theory and practice of improvisation as well as written repertoire.
Instructor: Staff
Prerequisite: By entrance audition; in addition, MUS 111 must be completed or exempted, as determined by the mandatory Music Theory Placement Examination. Performing Music requires the completion of one music course before credit is given for each year of MUS 198; MUS 111 fulfills this requirement if needed during the first year. Students should consult the department website for details regarding the entrance audition for MUS 198.
Distribution: ARS
Term(s): Fall; Spring

MUS 199 - Performing Music (for academic credit) (1.0)
One 45-minute lesson per week. Students may take an hour-long lesson for an additional fee. A minimum of six hours of practice per week is expected.
Instructor: Staff
Prerequisite: Corequisite: By entrance audition; in addition, MUS 111 must be completed or exempted, as determined by the mandatory Music Theory Placement Examination. Performing Music requires the completion of one music course before credit is given for each year of MUS 199; MUS 111 fulfills this requirement if needed during the first year. Students should consult the department website for details regarding the entrance audition for MUS 199.
Distribution: ARS
Term(s): Fall; Spring

Instructor: Russell (Fall, Spring), Graham (Spring)
Prerequisite: None
Distribution: ARS
Term(s): Fall; Spring

The Music Theory Placement Examination will determine placement in MUS 102H, MUS 111, or MUS 122. A music theory lab supplements the three class meetings. May not be counted toward the major or the minor.

MUS 122 - Harmonic Concepts in Tonal Music (1.0)
Beginning with a comprehensive review of musical terminology and basic materials, MUS 122 explores the fundamentals of tonal harmony, voice-leading, phrasing, and form. Topics include harmonic functions and phrase structure, cadence formation, voice-leading and figured bass, and tonal analysis.

Regular ear-training practice complements written exercises.
Instructor: Tang
Prerequisite: Open to all students who have completed or exempted MUS 111. Students who meet this requirement are advised to take MUS 122 in the fall semester if they are interested in pursuing a major in music.
Distribution: ARS
Term(s): Fall; Spring

MUS 198

MUS 199

MUS 111

MUS 099

MUS 102H
MUS 200 - History of Western Music I (1.0)
The first portion of a three-semester comprehensive survey of Western music history, MUS 200 considers significant forms and styles of earlier eras, from the liturgical and vernacular repertoires of the Middle Ages to the music of the mid-eighteenth century. The course offers a strong historical component and encourages the development of analytical skills. As we examine compositions in many genres, we will pursue numerous avenues of inquiry, including close readings of verbal texts, evaluation of formal structures, harmonic analysis, assessment of melodic readings of verbal texts, evaluation of formal structures, and jazz styles. We will explore the fundamentals of jazz harmony, including tune analysis, the IV-V progression, secondary dominants, re-harmonization, and jazz piano voicings. Students will also use concepts learned in class to compose a blues and a solo based on a jazz standard. Class meets for one double period weekly with an additional keyboard ear-training lab.

Instructor: Bhogal
Prerequisite: MUS 122
Distribution: ARS
Term(s): Fall

MUS 201 - History of Western Music II (1.0)
MUS 201 is the second part in a continuation of the survey of Western music history begun in MUS 200. This portion examines music written between the early eighteenth and the late nineteenth centuries. We will continue to sharpen our analytical and listening skills through the study of musical form and style across a wide range of genres encompassing vocal, chamber, solo instrumental, and orchestral musical traditions. The standpoints of history, culture, and aesthetics will form the conceptual backdrop for our investigation of matters pertaining to harmony, melody, texture, timbre, meter, instrumentation, and performance conventions. Two lectures and one lab.

Instructor: Bhogal
Prerequisite: MUS 122
Distribution: ARS
Term(s): Spring

MUS 202 - History of Western Music III (1.0)
MUS 202 is the third part in a continuation of the survey of Western music history begun in MUS 200. This portion examines music created between the late nineteenth and late twentieth centuries. We will continue to sharpen our analytical and listening skills through the study of musical form and style across a wide range of genres encompassing vocal, chamber, solo instrumental, and orchestral musical traditions. The standpoints of history, culture, and aesthetics will form the conceptual backdrop for our investigation of matters pertaining to harmony, melody, texture, timbre, meter, instrumentation, and performance conventions. Two lectures and one lab.

Instructor: Johnson
Prerequisite: MUS 122
Distribution: ARS
Term(s): Fall

MUS 209 - A History of Jazz (1.0)
In the 1910s, African American musicians in New Orleans developed a new kind of dance music that took the art of improvisation to unprecedented heights and transformed the concept of musical time. Some likened the new music to an electric jolt: it swept the nation’s dance floors and sent signals of social change over its radio waves. Jazz has since reinvented itself as a modernist art form and an occasion for political protest. In our historical survey of jazz we will cultivate a listening praxis that engages us with jazz’s sounds in cultural and historical context. We will learn how to distinguish among genres and identify major artists and African American, Latin American, and European influences. Our class will feature visits by professional musicians.

Instructor: Staff
Prerequisite: None
Distribution: ARS, HS
Term(s): Spring

MUS 220 - Jazz Theory (1.0)
This course is based on an immersion approach into the language of jazz, creating a close connection between theory and practice. Ear training is a key component (singing bass lines and jazz solos, harmonic dictation), and we will practice improvisation techniques in class. We will study the basics: scales and modes, chords, forms, rhythmic structures, and jazz styles. We will explore the fundamentals of jazz harmony, including tune analysis, the IV-V progression, secondary dominants, re-harmonization, and jazz piano voicings. Students will also use concepts learned in class to compose a blues and a solo based on a jazz standard. Class meets for one double period weekly with an additional keyboard ear-training lab.

Instructor: Miller
Prerequisite: MUS 111
Distribution: ARS
Term(s): Fall

MUS 222 - Music, Gender, and Sexuality (1.0)
Music, Gender, and Sexuality offers the opportunity to identify from a historical perspective the human passion for music, circumscribed by femininity, masculinity, sexual orientation, race, politics, economics, and identity. Class discussions prompted by listening, video, reading, and writing assignments probe the nature of a variety of musical cultures in which biological destiny audibly intersects with gender paradigms. Students acquire tools with which to consider music as an ideal site for a fuller expression of humanity that transcends boundaries.

Instructor: Fontijn
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

This course meets together with MUS 322 for classes; assignments for MUS 322 students require score-reading and musical analysis.

MUS 224 - Hildegard of Bingen (1.0)
This interdisciplinary course will focus on the music, dramatic productions, vision literature, and theology of the renowned twelfth-century abbess, Hildegard of Bingen. Attention will also be given to her scientific work on medicine, the manuscript illuminations of her visions, and the productions of her music popular today.

Instructor: Fontijn, Elkins (Religion)
Prerequisite: None
Cross-Listed as: REL 224
Distribution: ARS, REP
Term(s): Spring

MUS 225 - Topics in World Music (1.0)
This course offers a comprehensive chronological survey of the history and evolution of opera, from 1600 to the present. Lectures will examine historical background, the subgenres of operatic literature (opera seria, opera buffa, music drama), and complete operas by major composers representing a number of eras and styles (including Monteverdi, Mozart, Verdi, and Berg). We will also study librettos, relevant novels, and other source materials in order to establish connections between musical structure and dramatic expression. Two class meetings, with additional sessions required for viewing operas in their entirety.

Instructor: Johnson
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

MUS 235-01-F - Topics in Instrumental Music (1.0)
Franz Schubert once reportedly said, “I hope to make something of myself, but who can do anything after Beethoven?” One un-Beethovenian thing Schubert did was to set more than 600 poems to music. This course will explore how his instrumental music came more and more to suggest the themes of reverie, recollection, and alienation so prevalent in that poetry. When 19-year-old Robert Schumann learned of Schubert’s death, he is said to have wept all night. We shall also investigate how Schumann’s instrumental music of the following decades, so influenced by Schubert’s song cycles, explored in its own ways the extreme contrasts of mood so characteristic of the poetry of Schumann’s contemporaries.

Instructor: Fisk
Prerequisite: MUS 111 or the equivalent.
Distribution: ARS
Term(s): Fall

MUS 240 - Opera Workshop (1.0)
This course is appropriate for singers currently enrolled in voice lessons who wish to gain expertise in dramatic musical performance—i.e., the techniques that aid singing actors in the presentation of operatic repertory. All students will receive extensive musical and dramatic coaching, and will have the opportunity to perform a scene or aria in an informal presentation. Emphasis will be placed on research of roles, character development, and actions appropriate to musical style, and the interaction of text, music, and movement. Students are expected to study and rehearse individually and with other participants outside of class sessions.

Instructor: Staff
Prerequisite: or Corequisite: MUS 199 in voice, with permission of MUS 199 instructor.
Distribution: ARS
Term(s): Not Offered
Students may take this course no more than three times.

MUS 244 - Tonal Counterpoint and Harmony (1.0)
A continuation of MUS 122, this course offers an introduction to sixteenth-century species/modal counterpoint and eighteenth-century tonal counterpoint, with an emphasis on its relationship to the harmony and melodic figuration of the seventeenth through nineteenth centuries. Students will complete a variety of compositional and analytic exercises in the style of Palestrina and Bach, and will also learn the history of Western counterpoint as articulated in the treatises of Zarlino, Galilei, Fux, Cherubini, and others. A keyboard lab offers practice in playing assigned counterpoint exercises, cadence progressions, and figured bass in keyboard style.

Instructor: J. Johnson
Prerequisite: MUS 122
Distribution: ARS
Term(s): Fall

MUS 299 - Independent Study (1.0)
Instructor: Johnson
Distribution: ARS
Term(s): Not Offered
Students may take this course no more than three times.
MUS 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

MUS 250H - Performing Ensembles for Credit (0.5)
This course is open to qualified students by permission of the individual ensemble director. One-half unit of credit is granted for a full year (two consecutive semesters) of participation in any one of the department-sponsored ensembles, provided that the corequisite is successfully completed. A maximum of two units of credit toward the degree can be accumulated through 0.5 courses. Of the 32 units required for graduation, no more than four units in performing music may be counted toward the degree; thus students taking music lessons for credit during all four years at Wellesley cannot receive degree credit via MUS 250H.
Corequisite: One academic music course per 0.5 credit earned.
Distribution: None
Term(s): Fall; Spring
No credit will be given for this course unless both semesters are completed satisfactorily. MUS 250H is graded on a credit/noncredit basis.

MUS 275 - Introduction to Electronic and Computer Music: History and Practices (1.0)
An overview of the fundamental concepts, techniques, and literature of electronic and computer music. Topics include the technology of acoustic and digital musical instruments, MIDI programming, sound-synthesis techniques (frequency modulation, sampling, linear synthesis, waveshaping, etc.), and the history of electronic music. Students will undertake brief compositional exercises, and learn basic programming and related technical skills.
Instructor: J. Johnson
Prerequisite: None
Distribution: ARS
Term(s): Spring

MUS 279 - Performing Music (Advanced, with Academic Credit) (1.0)
A one-hour private lesson per week. Students who have completed at least one year of MUS 199 are eligible for promotion to MUS 299. A student wishing to enroll in MUS 299 is expected to demonstrate accomplishment distinctly beyond that of the MUS 199 student. Students are recommended for promotion by their instructors. A minimum of 10 hours of practice per week is expected. MUS 299 may be repeated without limit. One 200- or 300-level music course must be completed for each unit of credit granted for MUS 299. A music course already used to fulfill the requirement for MUS 199 may not be counted again for MUS 299. One unit of credit is given for a full year of study. Not to be counted toward the major in music.
Instructor: Staff
Prerequisite: MUS 199 and recommendation of instructor.
Distribution: ARS
Term(s): Fall; Spring
For further information, including requirements and fees, see Performing Music: Private Instruction and Academic Credit. See also MUS 99 and MUS 198. Except by special permission, no credit will be given for this course unless both semesters are completed satisfactorily. Mandatory credit/noncredit.

MUS 300 - Seminar. Studies in History, Theory, Analysis, Ethnomusicology (0.5)
Prerequisite: MUS 200, MUS 201, and MUS 244, or permission of the instructor.
Distribution: ARS
Term(s): Not Offered

MUS 308 - Conducting (1.0)
The study of conducting is a synthesis of all skills important to a musician's craft, and the art of communicating a specific musical vision to bring a composer's written intentions to life. The physical gestures are expressive of a full understanding of both the score and the instruments and/or voices performing the work. This course is a study of the techniques that transform written music into sound, including score preparation and reading, baton technique, and rehearsal methods. Development of aural and interpretive ability as well as leadership skills are explored in the process. Students will have the opportunity to take their skills outside the classroom and conduct one of the College's musical ensembles as part of their work in the course.
Instructor: Graham
Prerequisite: Permission of the instructor.
Distribution: ARS
Term(s): Not Offered

MUS 315 - Advanced Harmony (1.0)
A study of chromatic harmony including modulation, mode mixture, variation, and development procedures such as harmonic and chromatic sequences, and the relationship between harmony
and tonal form. Students will be introduced to basic Schenkerian terminology and modes of analysis. As a final project, students will present a notebook of excerpts, compiled from the classical literature, exemplifying each of the topics presented in class.

Instructor: Tang
Prerequisite: MUS 244 and MUS 201.
Distribution: ARS
Term(s): Fall

MUS 322 - Music, Gender, and Sexuality (1.0)
Music, Gender, and Sexuality offers the opportunity to identify from a historical perspective the human passion for music, circumscribed by femininity, masculinity, sexual orientation, race, politics, economics, and identity. Class discussions prompted by listening, video, reading, and writing assignments probe the nature of a variety of musical cultures in which biological destiny audibly intersects with gender paradigms. Students acquire tools with which to consider music as an ideal site for a fuller expression of humanity that transcends boundaries.

Instructor: Fortsjn
Prerequisite: Permission of the instructor.
Distribution: ARS
Term(s): Not Offered

This course meets together with MUS 222 for classes; assignments for MUS 322 students require score-reading and musical analysis.

MUS 325 - Topics in World Music (1.0)
Distribution: ARS
Term(s): Not Offered

MUS 335-01-F - Topics in Instrumental Music (1.0)
Franz Schubert once reportedly said, “I hope to make something of myself, but who can do anything after Beethoven?” One un-Beethovenian thing Schubert did was to set more than 600 poems to music. This course will explore how his instrumental music came more and more to suggest the themes of reverie, recollection and alienation so prevalent in that poetry. When 18-year-old Robert Schumann learned of Schubert’s death, he is said to have wept all night. We shall also investigate how Schumann’s instrumental music of the following decades, so influenced by Schubert’s song cycles, explored in its own ways the extreme contrasts of mood so characteristic of the poetry of Schumann’s contemporaries.

Instructor: Fisk
Prerequisite: MUS 122 and MUS 201, or permission of the instructor.
Distribution: ARS
Term(s): Fall

MUS 344 - Advanced Performance Seminar (1.0)
Music 344 offers an exciting opportunity for accomplished performing music students to develop their artistry and performance skills on a high level. Qualified students participate in this weekly performance class in addition to their weekly one-hour lessons with their private instructors, and develop their abilities by performing frequently in class and receiving constructive feedback. Students also grow as musicians by listening to other students perform, by being exposed to the broad range of repertoire presented in class, and by participating in the process of constructive criticism. In conjunction with their in-class performances, students are asked to provide brief, written background information about their repertoire to enhance their understanding of the music and to prepare for writing program notes. Students should plan on a time investment of about 14 hours per week. Students enrolled for the full year, as is strongly encouraged, perform a jury in the Fall and full recital in the Spring.

Students who choose Honors in Performance (Honors Program III) must take MUS 344 as part of their MUS 360 and MUS 370 thesis work, the two components counting as 1 unit of credit per semester.

Instructor: Fisk, Staff
Prerequisite: A written recommendation from her instructor in Performing Music. Corequisite: Students must complete an additional 200- or 300-level music course during each year they are enrolled in MUS 344. Permission to elect subsequent units is granted only to a student who has fulfilled all corequisite requirements and whose progress in MUS 344 is judged excellent; a maximum of four units of MUS 344 may be counted toward the degree.
Distribution: ARS
Term(s): Fall; Spring
This is the only credit course in classical performance that can be counted toward the music major.

MUS 345 - Doing Ethnomusicology: Critical Music Studies “Out in the Field” (1.0)
This course has three primary aims: (1) to give students the experience of doing ethnographic research in a local community; (2) to introduce key concepts pertaining to ethnomusicology, or the study of music in cultural context; (3) to create a good working atmosphere in which students can share research with each other. Students will gain experience doing fieldwork as participant/observers; taking scratch notes and writing up field journals; recording and transcribing interviews; and doing library and online research. Each student will conduct weekly visits to a local musical group or community of her choice. Past projects have focused on Senegalese drumming, Balinese gamelan, and hip-hop dance. The semester will culminate in a final presentation and paper based on the student’s research.

Instructor: Staff
Prerequisite: MUS 122, MUS 220, or consent of the instructor.
Distribution: ARS
Term(s): Not Offered
Not open to students who took this course as a topic of MUS 225/MUS 325.

MUS 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

MUS 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

MUS 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

Prerequisite: MUS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

MUS 377 - Interactive Sound Art with Electronics (1.0)
A continuation of MUS 275, Introduction to Electronic and Computer Music: History and Practices, this course offers intermediate and advanced instruction in digital sound design for live performance, film, or installation work. Students will continue to develop fluency in the digital audio software applications Logic Pro, Ableton Live, and Max/MSP, and will develop semester-long projects involving either a live musical performance with electronics, a short film score, or a site-specific interactive audio installation. In addition to building individual sound projects, students will have the opportunity to engage with recent scholarship on technology, improvisation, and performance art, and to develop a fundamental understanding of acoustics and critical theories of sound.

Instructor: J. Johnson
Prerequisite: MUS 275 and either one music theory course or one computer science course
Distribution: ARS
Term(s): Not Offered
This course may be taken as either MUS 277 or, with additional assignments, MUS 377. The course meets together for classes.

MUS 379 - Deconstructive Audio: Early Electronic Music and the Aesthetics of Outmodeed Technology (1.0)
Glitch-core, bit-crushing, circuit bending, hardware hacking, tape splicing, record scratching—in response to the hegemony of laptops among contemporary composers, many sound artists are now turning for musical expressivity to electronic objects thought to be long-obsolete: the beat-up synthesizer, the rewired amplifier, the Speak & Spell toy, the 8-bit Nintendo system. In this course we will investigate this trend by looking backwards, towards the histories of these objects and their relationship to the earliest forms of electronic music. In addition to developing a rigorous understanding of the history of electronic music through the parallel technological advancements of other electronics, we will also learn to build electronic music-making machines of our own, using largely analog and outmoded technologies, as well as emulating the sounds of the past using present-day digital materials, including Arduino microprocessors, speaker cones, transistors, and 3D printers.

Instructor: J. Johnson and Knouf (Cinema and Media Studies)
Prerequisite: MUS 111 or MUS 122 or CAMS 101, or permission of the instructors
Cross-Listed as: CAMS 378
Distribution: ARS
Term(s): Fall; Spring

Prerequisite: MUS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
NEUROSCIENCE

AN INTERDEPARTMENTAL MAJOR
Professor: Beltz (Director)
Associate Professor: Conway, Tetel
Assistant Professor: Gobes, West
Visiting Lecturer: Bauer
Instructor in Neuroscience Laboratory: Quinan
Neuroscience Advisory Committee: Ducas (Physics), Elterby (Biological Sciences), Hildreth (Computer Science), Keane (Psychology).

Neuroscience explores how the nervous system develops and how it functions to generate behavior, emotion, and cognition. Neuroscience is highly interdisciplinary, integrating biology, psychology, chemistry, physics, and computer science. Exploring the complexity of the nervous system requires analyses at multiple levels. Neuroscientists investigate how genes and molecules regulate nerve cell development and function (cellular/molecular neuroscience), explore how neural systems produce integrated behaviors (behavioral neuroscience), seek to understand how neural substrates create mental processes and thought (cognitive neuroscience), and use mathematics and computer models to comprehend brain function (computational neuroscience). In studying how the brain and nervous system function normally and during disease states, neuroscientists also hope to better understand devastating neurological and psychiatric disorders.

Neuroscience Major
Goals for the Neuroscience Major
• Create a cohesive and supportive interdepartmental community
• Foster an excitement for neuroscience and an understanding of applications of neuroscience discoveries to everyday life
• Appreciate the ethical complexities involved in the pursuit and application of knowledge about the brain and cognition
• Cultivate an understanding of the relationships among disparate subfields that comprise neuroscience, including cellular and molecular, cognitive, computational, and systems neuroscience
• Develop the ability to read and critically evaluate the neuroscience literature
• Acquire confidence and fluency with oral and written communication
• Generate a facility with the major experimental methods and techniques used by neuroscientists, including:
  • electrophysiology
  • computational modeling
  • neurochemistry
  • neuropharmacology
  • neuroanatomy
  • genomics
• behavioral approaches
• Master analytical and statistical methods critical to the evaluation of experimental data
• Encourage an environment supportive of student involvement in neuroscience research

We anticipate that fulfillment of these goals will provide the intellectual and technical skills necessary for the successful pursuit of graduate school, medical school, and careers in neuroscience-related fields.

Requirements for the Neuroscience Major
The major in neuroscience offers three areas of concentration: cellular and molecular neuroscience, cognitive neuroscience, and systems and computational neuroscience. Students are expected to achieve competence in two of these three areas.

The major must include the following core courses:
• NEUR 100, NEUR 300, BISC 110 or BISC 112 and PSYC 205. Majors must elect three 200-level courses from at least two different areas of concentration: cellular and molecular neuroscience: BISC 219, BISC 220, CHEM 211, CHEM 220, CHEM 222 or CHEM 223; cognitive neuroscience: PHIL 215, PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218; systems and computational neuroscience: CS 232, MATH 215, PHYS 216, PHYS 222. Note that these 200-level courses have specific prerequisites that must be satisfied. Majors must also elect three 300-level courses from at least two different areas of concentration, at least one of which must be a laboratory course:
  • cellular and molecular neuroscience: NEUR 305, NEUR 332, NEUR 306/BISC 306, NEUR 315/BISC 315, BISC 362; cognitive neuroscience: PSYC 304R, PSYC 314R, PSYC 316, PSYC 319, PSYC 326; systems and computational neuroscience: NEUR 320, NEUR 325, NEUR 335, CS 332. Any other 300-level courses must be specifically approved by the Director. NEUR 332 will count towards the major in whatever concentration reflects the topic in that year. NEUR 250, NEUR 250G, NEUR 250H, NEUR 350, NEUR 350G, NEUR 350H, NEUR 360, and NEUR 370 do not count toward the minimum major. A minimum of eight courses toward the major requirements must be taken at Wellesley. Additional information is also available at www.wellesley.edu/neuroscience/major_complete.html.

Normally no more than three units in neuroscience taken at other institutions may be counted toward the major.

Transfer Credit in Neuroscience
To obtain Wellesley credit for any neuroscience course taken at another institution, preliminary approval must be obtained from the director of the program prior to enrolling in the course. In general, courses taken at two-year colleges will not be accepted. These restrictions apply to courses taken after enrollment at Wellesley. Transfer students wishing to obtain credit for courses taken prior to enrollment at Wellesley should consult the program director.

Honors in Neuroscience
The only route to honors in the major is writing a thesis (NEUR 360/NEUR 370) and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level. The department may petition on her behalf if her grade point average in the major is between 3.0 and 3.5. Projects may be supervised by members of the various departments associated with the major. Students considering the senior thesis option are advised to consult with the director of the program during the fall of their junior year. See Academic Distinctions.

Graduate Study in Neuroscience
Students wishing to attend graduate school in neuroscience are strongly encouraged to take CHEM 211/CHEM 212, CS 112, MATH 115/MATH 116, and PHYS through PHYS 106 or PHYS 108. PHYS 210 may also be of interest.

NEUR - Neuroscience Courses

NEUR 100 - Brain, Behavior, and Cognition: An Introduction to Neuroscience (1.0)
This course will provide a broad introduction to neuroscience, focusing on examples and approaches from cellular and molecular, cognitive, behavioral, systems, and computational neuroscience. The lecture aspect of the course will be accompanied by a 70-minute practicum in which students will engage directly in experimental neuroscience.

Instructor: Bauer, Conway, Tetel, Quinan
Prerequisite: None
Distribution: EC; NPS
Term(s): Fall; Spring

NEUR 200 - Neurons, Networks, and Behavior with Laboratory (1.25)
This course will build on basic concepts in neuroscience. Current issues will be examined within a broad framework that includes examples and readings in cellular and molecular, cognitive, behavioral, and computational neuroscience. Topics such as sensory systems, learning, memory, and cognition will be covered. The accompanying laboratory is designed to expose students to basic methods and experimental approaches in neuroscience.

Instructor: Beltz, Wiest, Quinan
Prerequisite: NEUR 100 and BISC 110 (or BISC 112) or permission of the instructor. Not open to first-year students.
Distribution: EC; NPS
Term(s): Fall; Spring

NEUR 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

NEUR 250G-01-F - Research or Group Study (1.0)

An introduction to the literature and research methods in visual neuroscience, with particular emphasis on color and behavior. Students will learn how to ask and address fundamental questions in systems neuroscience research by conducting literature searches and critically reading and evaluating original research articles in the field. Students will be exposed to current methods in the field, including behavioral analyses (psychophysics), neuroanatomy, analysis of fMRI data, and microelectrode recording data. Individual and group laboratory projects will be offered.

Instructor: Conway
Prerequisite: Open to first-years and sophomores by permission of the instructor.
Distribution: None
Term(s): Fall

NEUR 250G-02-F - Research or Group Study (1.0)

Topic for 2014-15: Behavioral Neurophysiology
An introduction to selected topics from the literature and research methods of behavioral neurophysiology, which seeks to relate animal behavior to electrical activities of the nervous system.
system. Students will develop research questions by conducting literature searches and critically reading and evaluating original research articles. Students will be exposed to current methods in behavioral neurophysiology, including neurophysiology recordings in behaving animals as well as computer analysis of the resulting neural and behavioral data. Individual and group laboratory projects will be offered. Experience programming in Matlab would be helpful but is not required.

Instructor: Wiest
Prerequisite: Open to first-year and sophomores by permission of the instructor.

Term(s): Fall

NEUR 250G-01-S - Research or Group Study (1.0)

An introduction to the literature and research methods in visual neuroscience, with particular emphasis on color and behavior. Students will learn how to ask and address fundamental questions in systems neuroscience research by conducting literature searches and critically reading and evaluating original research articles in the field. Students will be exposed to current methods in the field, including behavioral analyses (psychophysics), neuroanatomy, analysis of fMRI data, and microelectrode recording data. Individual and group laboratory projects will be offered.

Instructor: Conway
Prerequisite: Open to first-year and sophomores by permission of the instructor.

Term(s): Spring

NEUR 250G-02-S - Research or Group Study (1.0)

Topic for 2014-15: Behavioral Neurophysiology

An introduction to selected topics from the literature and research methods of behavioral neurophysiology, which seeks to relate animal behavior to electrical activities of the nervous system. Students will develop research questions by conducting literature searches and critically reading and evaluating original research articles. Students will be exposed to current methods in behavioral neurophysiology, including neurophysiology recordings in behaving animals as well as computer analysis of the resulting neural and behavioral data. Individual and group laboratory projects will be offered. Experience programming in Matlab would be helpful but is not required.

Instructor: Wiest
Prerequisite: Open to first-year and sophomores by permission of the instructor.

Term(s): Spring

NEUR 250H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor.

Distribution: None

Term(s): Fall, Spring

NEUR 300 - Capstone Seminar in Neuroscience (1.0)

In this capstone seminar for neuroscience majors, students will give group presentations of articles on cutting-edge areas of neuroscience research. The authors of these articles will be invited to campus to present their research and meet with the class. Some of the topics to be discussed include: developmental neuroscience, computational and systems neuroscience, neuroendocrinology, cognitive neuroscience, learning and memory, and neurodegenerative disorders. In addition, careers in neuroscience will be discussed.

Instructor: Belz, Tetel, Wiest
Prerequisite: NEUR 200. Open only to senior Neuroscience majors.

Distribution: EC; NPS

Term(s): Fall

NEUR 305 - Excitation, Plasticity and Disease with Laboratory (1.25)

Glutamate is the major excitatory neurotransmitter in the central nervous system. In this course, you will become familiar with the functions of glutamate in healthy neurotransmission, plasticity, and disease including stroke, epilepsy, schizophrenia, and drug abuse. In addition, you will continue to improve your ability to critically read scientific literature. This course is designed to be interactive, and lectures will be supplemented by in-class activities and discussions. In the laboratory portion of this course, you will have the opportunity to study the role of glutamate receptors in long-term potentiation, and study the role of glutamate receptor mutations on C. elegans behavior. Through these experiences you will improve your reading, critical thinking, writing, problem solving, and oral presentation skills.

Instructor: Bauer, Quinan
Prerequisite: NEUR 200

Distribution: EC; NPS

Term(s): Spring

NEUR 306 - Principles of Neural Development (1.0)

This course will discuss aspects of nervous system development and how they relate to the development of the organism as a whole. Topics such as neural induction, neurogenesis, programmed cell death, axon guidance, synaptogenesis, and the development of behavior will be discussed, with an emphasis on the primary literature and critical reading skills. Laboratory sessions focus on a variety of methods used to define developing neural systems.

Instructor: Belz
Prerequisite: NEUR 200 or BISC 216, or permission of the instructor.

Cross-Listed as: BISC 306

Distribution: EC; NPS

Term(s): Fall

Does not fulfill the laboratory requirement.

NEUR 315 - Neuroendocrinology with Laboratory (1.25)

Hormones act throughout the body to coordinate basic biological functions such as development, differentiation, and reproduction. This course will investigate how hormones act in the brain to regulate physiology and behavior. We will study how the major neuroendocrine axes regulate a variety of functions, including brain development, reproductive physiology and behavior, and stress. The regulation of these functions by hormones will be investigated at the molecular, cellular, and systems levels. Laboratory experiments will explore various approaches to neuroendocrine research, including the detection of hormone receptors in the brain and analysis of behavior.

Instructor: Tetel
Prerequisite: NEUR 200, or both BISC 110/BISC 112 and BISC 203, or permission of the instructor.

Cross-Listed as: BISC 315

Distribution: EC; NPS

Term(s): Fall

NEUR 320 - Vision and Art (1.0)

This course investigates the form and function of the visual system and the cultural and historical products that are engaged with it. Our goal is to explore the art, science, and culture of seeing. We will examine the nature of the visual stimulus and the physiological mechanisms that trigger perception. In parallel, we will explore how such processes drive the practice of art at different times and in different cultures. The course will employ experimental investigations of your own visual system, guided analysis of art objects, exercises in making art, field trips, examinations of illusions, and inquiries into machine vision. The interdisciplinary nature of the course requires an advanced level of participation, commitment, and self-directed learning culminating in a final project of your own design. The course will consist of lectures to be held on one evening per week, and laboratory exercises held during one three-hour session per week.

Instructor: Conway
Prerequisite: NEUR 100 or by permission of the instructor. Not open to first-year students.

Distribution: ARS; NPS

Term(s): Fall

NEUR 325 - Neurobiology of Sleep, Learning and Memory (1.0)

Although we spend a major part of our lives sleeping, we understand surprisingly little about sleep and dreaming. In this course we will discuss recent advances made in the field of neuroscience of sleep. Course topics include basic neurobiology of sleep (what is sleep, how is it regulated) as well as specialized discussions of sleep-related learning and memory investigated in different model systems. You will become familiar with these topics through a combination of in-depth review sessions, in-class activities and student presentations of the primary literature. Assignments are given to train presentation and writing skills and to give students the opportunity to explore their favorite topic in more detail.

Instructor: Gobe
Prerequisite: NEUR 100

Distribution: EC; NPS

Term(s): Not Offered

NEUR 332-01-F - Advanced Topics in Neuroscience (1.0)

Topic for 2014-15: Neuropharmacology

Neuropharmacology is the study of how drugs act on the nervous system. In this course, you will learn the molecular mechanisms of drug action, increase your depth of knowledge of the various neurotransmitter systems, and apply this knowledge to understand how drugs are used to treat disorders of the nervous system including pain, sleep disorders, affective disorders, addiction, schizophrenia, neurodegeneration, seizures, and stroke. You will have the opportunity to discuss primary literature, design theoretical drugs to treat nervous system disorders, and improve Web content about neuropharmacological agents. Through these experiences you will improve your reading, critical thinking, writing, and oral presentation skills.

Instructor: Bauer
Prerequisite: NEUR 200 or by permission of the instructor. Not open to first-year students.

Distribution: NPS

Term(s): Fall

NEUR 332-01-S - Advanced Topics in Neuroscience (1.0)

Topic for 2014-15: Neuropharmacology

Neuropharmacology is the study of how drugs act on the nervous system. In this course, you will learn the
molecular mechanisms of drug action, increase your depth of knowledge of the various neurotransmitter systems, and apply this knowledge to understand how drugs are used to treat disorders of the nervous system including pain, sleep disorders, affective disorders, addiction, schizophrenia, neurodegeneration, seizures, and stroke. You will have the opportunity to discuss primary literature, design theoretical drugs to treat nervous system disorders, and improve Web content about neuropharmacological agents. Through these experiences you will improve your reading, critical thinking, writing, and oral presentation skills.

**Instructor:** Bauer  
**Prerequisite:** NEUR 200 or by permission of the instructor. Not open to first-year students  
**Distribution:** NPS  
**Term(s):** Spring

**NEUR 335 - Computational Neuroscience with Laboratory (1.25)**  
The electrical activities of neurons in the brain underlie all of our thoughts, perceptions, and memories. However, it is difficult to measure these neural activities experimentally, and also difficult to describe them precisely in ordinary language. For these reasons, mathematical models and computer simulations are increasingly used to bridge the gap between experimental measurements and hypothesized network function. This course will focus on the use of mathematical models and computer simulations to describe the functional dynamics of neurons in a variety of animals. Topics will range from single neuron biophysics to the analysis of circuits thought to underlie sensory perception and memory. Topics will be introduced by background lectures, followed by student-led presentations of primary literature and construction of a computer model of the system studied. Lab will introduce students to computer programming of mathematical models in MATLAB and the neuron-simulator NEURON.

**Instructor:** Wiest  
**Prerequisite:** NEUR 200 and calculus at the level of MATH 115, or by permission of the instructor. No programming experience is required.  
**Distribution:** NPS; MM  
**Term(s):** Spring

**NEUR 350 - Research or Individual Study (1.0)**  
**Prerequisite:** Permission of the instructor. Open to juniors and seniors.  
**Distribution:** None  
**Term(s):** Fall; Spring

**NEUR 350G-01-F - Research or Group Study (1.0)**  
An introduction to the literature and research methods of visual neuroscience, with particular emphasis on color and behavior. Students will learn how to ask and address fundamental questions in systems neuroscience research by conducting literature searches and critically reading and evaluating original research articles. Students will be exposed to current methods in the field, including behavioral analyses (psychophysics), neuroanatomy, analysis of fMRI data, and microelectrode recording data. Individual and group laboratory projects will be offered. Experience programming in Matlab would be helpful but is not required.

**Instructor:** Conway  
**Prerequisite:** Open to juniors and seniors by permission of instructor.  
**Distribution:** None  
**Term(s):** Fall

**NEUR 350G-02-F - Research or Group Study (1.0)**  
**Topic for 2014-15: Behavioral Neurophysiology**  
An introduction to selected topics from the literature and research methods of behavioral neurophysiology, which seeks to relate animal behavior to electrical activities of the nervous system. Students will develop research questions by conducting literature searches and critically reading and evaluating original research articles. Students will be exposed to current methods in behavioral neurophysiology, including neurophysiology recordings in behaving animals as well as computer analysis of the resulting neural and behavioral data. Individual and group laboratory projects will be offered. Experience programming in Matlab would be helpful but is not required.

**Instructor:** Wiest  
**Prerequisite:** Open to juniors and seniors by permission of instructor.  
**Distribution:** None  
**Term(s):** Fall

**NEUR 350G-01-S - Research or Group Study (1.0)**  
An introduction to the literature and research methods in visual neuroscience, with particular emphasis on color and behavior. Students will learn how to ask and address fundamental questions in systems neuroscience research by conducting literature searches and critically reading and evaluating original research articles in the field. Students will be exposed to current methods in the field, including behavioral analyses (psychophysics), neuroanatomy, analysis of fMRI data, and microelectrode recording data. Individual and group laboratory projects will be offered.

**Instructor:** Conway  
**Prerequisite:** Open to juniors and seniors by permission of instructor.  
**Distribution:** None  
**Term(s):** Spring

**NEUR 350G-02-S - Research or Group Study (1.0)**  
**Topic for 2014-15: Behavioral Neurophysiology**  
An introduction to selected topics from the literature and research methods of behavioral neurophysiology, which seeks to relate animal behavior to electrical activities of the nervous system. **NEUR 350H - Research or Individual Study (0.5)**  
**Prerequisite:** Permission of the instructor.  
**Distribution:** None  
**Term(s):** Fall

**NEUR 360 - Senior Thesis Research (1.0)**  
**Prerequisite:** Permission of the department.  
**Distribution:** None  
**Term(s):** Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
A STRUCTURED INDIVIDUAL MAJOR

Director: Rosenwald (English)
Assistant Professor: Confortini
Mellon Postdoctoral Fellow: Osborn
Advisory Board: Candland (Political Science), Confortini (Peace and Justice Studies), de Bres (Philosophy), Kodera (Religion), Murphy (Political Science), Rosenwald (English), Skeath (Economics)

The Peace and Justice Studies program provides a program of study that integrates the many areas of intellectual inquiry relating to the historical and contemporary search for a peaceful and just society and world.

Peace and Justice Studies Major

Goals for the Peace and Justice Studies Major

To give students exposure to and an understanding of the core canonical concepts and findings in the field, and to enable students to develop proficiency in two primary areas of study: the social, political, historical, and cultural factors that lead to conflict, violence, and injustice; and the various philosophical, strategies, and techniques of peacemaking and conflict transformation at the level of nation-states, social groups and communities within nation-states, and individual and interpersonal relationships.

Approaches to conflict transformation will include the mainstream integrated approach, including crisis intervention, human rights, grassroots development, and restorative justice, and the nonviolent direct action approach. Students are also expected to take part in field-based experiential education that is linked to the student, her specific discipline, and peace studies in general.

Requirements for the Peace and Justice Studies Major

The major and the concentration should be designed in consultation with the program director.

Students entering before Fall 2014 are expected to complete nine (9) units of coursework.

Students entering in Fall 2014 or later are expected to complete nine and one-half (9.5) units of coursework.

The major consists of the following:

Four required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PEAC 104</td>
<td>Introduction to the Study of Conflict, Justice, and Peace</td>
</tr>
<tr>
<td>PEAC 204</td>
<td>Conflict Transformation in Theory and Practice</td>
</tr>
<tr>
<td>PEAC 250</td>
<td>Peace and Conflict Resolution</td>
</tr>
<tr>
<td>PEAC 304</td>
<td>Senior Seminar in Peace and Justice Studies</td>
</tr>
</tbody>
</table>

One of the following courses (students will generally need to fulfill prerequisites for these courses):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 222</td>
<td>Games of Strategy</td>
</tr>
<tr>
<td>ECON 243</td>
<td>The Political Economy of Gender, Race, and Class</td>
</tr>
<tr>
<td>HIST 206</td>
<td>From Conquest to Revolution: A History of Colonial Latin America</td>
</tr>
<tr>
<td>HIST 263</td>
<td>South Africa in Historical Perspective</td>
</tr>
</tbody>
</table>

Four courses above the 100 level in an area of concentration, including at least one at the 300 level. Students must elect a concentration in consultation with the program director and a faculty member knowledgeable in the area of concentration, and demonstrate the intellectual coherence of the concentration.

Students majoring in Peace and Justice Studies must also include an experiential education component in their course of study.

This component is intended to provide students with experience that complements and extends their theoretical learning in the classroom and to provide and opportunity for students to develop and apply knowledge, skills and peacemaking principles to concrete situations. It should be discussed with the program director and may include Wintersession, summer or yearlong internships, course-related experiential education programs, or community service projects.

Students entering before Fall 2014 are expected to maintain a journal noting hours spent, observations, and reflections, with particular emphasis on peace studies concepts. They must also complete the reflection portion of the major declaration form.

Students entering in Fall 2014 or later are required to complete a one-half unit individual study (PEAC 250H) culminating in a reflective essay on the experiential education program undertaken.

Honors in Peace and Justice Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

PEAC - Peace and Justice Studies Courses

PEAC 104 - Introduction to the Study of Conflict, Justice, and Peace (1.0)

An interdisciplinary introduction to the study of conflict, justice, and peace. The course engages students in developing an analytical and theoretical framework for examining the dynamics of conflict, violence, and injustice and the strategies that have been employed to attain peace and justice, including balances of power, cooperation, diplomacy and conflict resolution, law, human rights, social movements, social justice (economic, environmental, and race/class/gender), interpersonal communication, and religiously inspired social transformation.

Instructor: Confortini
Prerequisite: None
Distribution: SBA; REP
Term(s): Fall; Spring

PEAC 204 - Conflict Transformation in Theory and Practice (1.0)

This course provides the student with an in-depth study of conflict and its resolution. We will explore the basic theoretical concepts of the field and apply this knowledge as we learn and practice skills for analyzing and resolving conflicts. The course seeks to answer the following questions at both the theoretical level and the level of engaged action:
What are the causes and consequences of conflict?
How do we come to know and understand conflict?
How do our assumptions about conflict affect our strategies for management, resolution, or transformation?
What methods are available for waging and resolving conflicts productively rather than destructively?

Instructor: TBA
Prerequisite: PEAC 104 or permission of the instructor.
Distribution: SBA
Term(s): Spring

PEAC 205 - Gender, War and Peacebuilding (1.0)

In this course we explore the gendered dimensions of war and peace, including how gender as a symbolic construct configure how we make sense of war making and peacebuilding; how differently gendered people experience war and peace; and how peace and war are co-constitutive with gender relations. We pay particular attention to the "continuum of violence", from the "private" to the "public" sphere, from militarization of everyday living to overt violent conflict. We address issues such as the political economy of war, sexualized violence, the militarization of gendered bodies, and gendered political activism. Finally, we reflect on the implications of gendered wars for the building of peace, looking at the gendered aspects of "post-conflict" peacebuilding and gendered forms of resistance to political violence.

Instructor: Confortini
Prerequisite: None
Distribution: SBA
Term(s): Spring

PEAC 250 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PEAC 250H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PEAC 250F - Peace and Conflict Resolution (1.0)

This course will examine the role of the writer, the visual artist and the intellectual in contemporary Latin America from the seventies to the present. The readings assigned, as well as the films and other forms of visual representation, will expose the student to the role of the writer as a political activist and witness political violence and injustice. Special
Critical attention will be given to the relationship of aesthetic representations of the literature of Human Rights and to the ethical intricacies of the relationship between the arts and social justice.

Instructor: Agosin (Spanish)
Prerequisite: None
Cross-Listed as: SPAN 261
Distribution: LL; REP
Term(s): Fall

PEAC 304 - Senior Seminar in Peace and Justice Studies (1.0)

A capstone course for the major in Peace and Justice Studies, centered on a seminar project and paper that students research and write on a subject of their choice in relation to the course topic, and on readings and discussions exploring essential topics and research methods in peace studies.

Instructor: Confortini
Prerequisite: Required for Peace and Justice Studies majors; for others, permission of the instructor.
Distribution: SBA
Term(s): Fall

PEAC 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

PEAC 350H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PEAC 360 - Senior Thesis Research (1.0)

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

PEAC 363 - War Resistance and American Literature (1.0)

A study of how war resistance, or the antiwar impulse, has been represented and thought about in American sacred texts, fictions, plays, poems, films, songs, operas, letters, treatises, memoirs, and essays. Some possible texts, in chronological order: John Woolman’s visionary 18th-century Journal, the Book of Mormon, Thoreau’s “Civil Disobedience,” Julia Ward Howe’s Mother’s Day Proclamation, William James’s “The Moral Equivalent of War,” memoirs by Jane Addams and Dorothy Day, High Noon, speeches by Dwight Eisenhower, letters and essays by Martin Luther King, journalism by Norman Mailer and Barbara Deming, Daniel Berrigan’s drama The Trial of the Catonsville Nine, Nicholson Baker’s Human Smoke, Philip Glass’ opera Satyagraha, and a broad range of anti-war poems and songs. Opportunity for both creative and critical work.

Instructor: Rosenwald
Prerequisite: Open to juniors and seniors who have taken two literature courses in the English department, at least one of which must be at the 200 level, or two courses in American Studies, or two courses in Peace and Justice Studies, or by permission of the instructor to other qualified students.
Cross-Listed as: ENG 363-01-S and AMST-363-01-S
Distribution: LL; HS
Term(s): Spring

PEAC 360 - Senior Thesis (1.0)
The ability to formulate and consider alternatives
The interpretation of dense and challenging texts

Honors Thesis) taken at Wellesley. Every philosophy

350 Independent Study, or PHIL 360 or PHIL 370
must be a philosophy seminar (as opposed to PHIL

German. In order to assure that students have

philosophy should take PHIL 216 and acquire a

are strongly encouraged to take a third unit in

at least two units in each of subfields B and C. Majors

majors. In order to assure that all majors are familiar

includes the breadth of the field, every major must take

A striking thing about these assumptions and

many of us live as if we were clear

about whether our have even never asked

We accept one belief and dismiss

another without asking what it takes for a belief to

be worthy of acceptance. We decide whether an act

right or wrong without even asking what the

difference is between right and wrong. A famous

passage by the philosopher David Hume, written

when he was about 25, expresses the impulse to

philosophize: “I am uneasy to think I approve of one

object, and disapprove of another; call one thing

beautiful, and another deformed; decide concerning

truth and falsehood, reason and folly, without

knowing upon what principles I proceed.” The

clarity, depth and rigor encouraged in philosophy

courses are useful not only in philosophy, but also in

any other area of study, and it is a major that is

welcomed by graduate programs in many fields, as

well as by employers and professional schools.

Philosophy Major

Goals for the Philosophy Major

Majoring in philosophy will acquaint one with

important developments in ancient and early

modern philosophy and how these developments

influence contemporary philosophical debates.

Moreover, because philosophy is in the business of

critically evaluating the reasons offered to support

hypotheses, factual claims and evaluative judgments,

majoring in philosophy will develop or sharpen the

following skills:

• The interpretation of dense and challenging texts

• The ability to formulate and consider alternatives
to commonly accepted views

• The construction and defense of coherent, well-

considered positions

• The ability to offer reasoned responses to the

ideas and objections of others

Requirements for the Philosophy Major

The major in philosophy consists of at least nine

units. PHIL 201 and PHIL 221 are required of all

majors. In order to assure that all majors are familiar

with the breadth of the field, every major must take

at least two units in each of subfields B and C. Majors

are strongly encouraged to take a third unit in

subfield A. Students planning graduate work in

philosophy should take PHIL 216 and acquire a

reading knowledge of Latin, Greek, French, or

German. In order to assure that students have

acquired some depth in philosophy, the department

requires that each major complete at least two 300-

level units; these units must be in different subfields

of philosophy and at least one of the 300-level units

must be a philosophy seminar (as opposed to PHIL

350 Independent Study, or PHIL 360 or PHIL 370

Honors Thesis) taken at Wellesley. Every philosophy

major is responsible for doing a PHIL LAB

presentation during the fall or spring semester of her

senior year. This involves presenting a philosophy

text of her choice to an audience consisting of

philosophy majors, minors, and faculty, and then

leading an informal discussion of the philosophical

issues it raises.

Subfield Information

The philosophy department divides its courses and

seminars into three subfields:

(A) the history of philosophy: PHIL 201, PHIL 221,

PHIL 222, PHIL 224, PHIL 230, PHIL 301, PHIL 310;

(B) value theory: PHIL 106, PHIL 108, PHIL 109-S13,

PHIL 110, PHIL 202, PHIL 203, PHIL 204, PHIL 206,

PHIL 211, PHIL 212, PHIL 213, PHIL 233, PHIL 235,

PHIL 236, PHIL 246, PHIL 249, PHIL 253, PHIL 256,

PHIL 310-S12, S13, PHIL 317, PHIL 326, PHIL 333,

PHIL 340, PHIL 342, PHIL 345-F13, PHIL 349;

(C) metaphysics and theory of knowledge: PHIL

103, PHIL 109-S13, PHIL 110, PHIL 207, PHIL 211,

PHIL 215, PHIL 216, PHIL 217, PHIL 218, PHIL 243,

PHIL 245, PHIL 300-F14, PHIL 301, PHIL 310-S14,

PHIL 317, PHIL 325, PHIL 333, PHIL 345, PHIL 349

Honors in Philosophy

Honors in the Philosophy major may be earned by

writing a thesis or a set of related essays, and passing

an oral examination.

To be admitted to the thesis program, a student must

have a grade point average of at least 3.5 in all work

in the major field above the 100-level; the

department may petition on her behalf if her GPA in

the major is between 3.0 and 3.5. Members of the

department also prefer to see the following criteria

satisfied by the end of the junior year: PHIL 201 and

PHIL 221 completed, at least six philosophy courses

completed, and at least one 300-level seminar that

demonstrates the ability to work independently

completed with a grade of A or A-.

Transfer Credit in Philosophy

The department participates in exchange programs

with Brandeis and MIT. Both schools have excellent

philosophy departments, and students are encouraged
to consult the respective catalogs for

offerings.

Courses for Credit Toward the Philosophy Major

EDUC 102 Education in Philosophical Perspective

WRIT 114 EDUC 102 Education in Philosophical Perspective

Philosophy Minor

Requirements for the Philosophy Minor

The minor in philosophy consists of five units. No

more than one of these units may be at the 100 level;

PHIL 201 or PHIL 221 is required of all minors;

at least one of the five units must be at the 300 level.

PHIL - Philosophy Courses

PHIL 103 - Self and World: Introduction to Metaphysics and Epistemology (1.0)

This course introduces basic philosophical methods

and concepts by exploring a variety of approaches to

some central philosophical problems. Topics covered

include the existence of God, the relation between

reason and faith, skepticism and certainty, the

relation between mind and body, and the

compatibility of free will and causal determinism.

Readings are drawn from historical and

contemporary texts. Discussions and assignments

encourage the development of the student’s own

critical perspective on the problems discussed.

Instructor: Wood, Wearing

Prerequisite: None

Distribution: EC

Term(s): Fall; Spring; Summer II

PHIL 106 - Introduction to Moral Philosophy (1.0)

A study of central issues in moral philosophy, with

readings drawn from historical and contemporary

texts. Topics include the nature of morality,

conceptions of justice, views of human nature and

their bearing on questions of value, and competing

accounts of the bases of moral judgment.

Professor: Wood, Staff

Prerequisite: None

Distribution: REP

Term(s): Fall; Spring

PHIL 108 - First-Year Seminar: Friendship (1.0)

This seminar undertakes a philosophical examination

of the nature and value of friendship.

Two questions will animate the course: What is a

friend? And, why are friends valuable? Drawing

examples from literature and films, we will examine

different types of friendships and the features that

characterize and sustain them. Many philosophers

have argued that the best kind of friendship is one in

which the friend is loved for her own sake; we will

consider whether this is truly possible or whether all

friendships are ultimately instrumental. We’ll also

examine how the partiality inherent in friendship

conflicts with the demands of standard moral

theories. Finally, we will compare the love that

characterizes friendship with the feelings that

sustain relationships with parents, children, and

lovers.

Instructor: Wearing

Prerequisite: None. Open to first-year students only.

Distribution: REP

Term(s): Fall

No letter grade.

PHIL 201 - Ancient Greek Philosophy (1.0)

An introduction to the work of Plato, Aristotle,

and select Hellenistic philosophers that aims to develop

students’ skills in analyzing and constructing

philosophical arguments with attention to historical

context. Focusing on the ways in which various

ancient philosophical views of men and

consistent systems, we will address a range of

central topics in ancient thought, including issues in

ethics, political philosophy, metaphysics, and

epistemology. The course will deal primarily with

Plato and Aristotle and end with a briefer treatment of

the Epicureans, Stoics, and Skeptics.

Instructor: Rabinoff

Prerequisite: None

Distribution: EC; REP

Term(s): Fall

PHIL 202 - Introduction to African Philosophy (1.0)

Initiation into basic African philosophical concepts

and principles. The first part of the course deals with

a systematic interpretation of such questions as the
PHIL 203 - Philosophy of Art (1.0)
In this course, we will examine a broad set of philosophical questions raised by art. What is art? How do we know what it means (if it does mean anything)? What is beauty? What does it mean to have an aesthetic experience, and what grants an object or activity aesthetic value? What is the relationship between aesthetics and ethics? In exploring these general questions, we will consider topics such as taste, horror, mimesis, creativity, forgery, public art, and popular art. We will take into account diverse art forms, including, but not limited to, painting, photography, sculpture, literature, music, film, and dance. We will also consider the place of the aesthetic in nature and everyday experience.
Instructor: Matthes
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: ARS, EC
Term(s): Fall

PHIL 206 - Contemporary Ethical Issues (1.0)
Can we justify buying things while allowing people in distant countries to go without basic sustenance? Can someone justify killing whales to satisfy a taste for blubber? May the state prohibit recreational drug use? The course will examine the relationship between general ethical principles and the application of these principles to current ethical issues, forcing us to reflect on the complexity of the moral choices we make as individuals and as participants in societies. Special attention will be paid to conflicts between principles that aim to promote individual and collective well-being and those that prohibit restrictions on individual freedom and autonomy.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: REP
Term(s): Not Offered

PHIL 207 - Philosophy of Language (1.0)
This course will explore a variety of philosophical issues concerning language: the different ways in which spoken language functions and conveys information, the alleged difference between speech and action and how it relates to freedom of speech issues (e.g., pornography and hate speech), the general problem of how words get attached to their referents, and criticisms of traditional conceptions of meaning and reference.
Instructor: McGowan
Prerequisite: Open to first-year students who have taken one course in philosophy, and to sophomores, juniors, and seniors without prerequisite.
Distribution: EC, REP
Term(s): Fall

PHIL 211 - Philosophy of Religion (1.0)
This course undertakes a critical and philosophical study of central topics in the philosophy of religion, including questions concerning the nature and existence of god, the problem of evil, the relation between morality and the divine, the relation between faith and reason, the problems of personal identity involved in the doctrines of incarnation and resurrection, and a consideration of the origins and value of religion in life. Readings will draw from the rich heritage of philosophical discourse, including Plato, Anselm, Aquinas, Leibniz, Pascal, Kant, Nietzsche, Freud, and others, including some contemporary work.
Prerequisite: One course in philosophy or by permission of the instructor.
Distribution: EC, REP
Term(s): Not Offered

PHIL 213 - Social and Political Philosophy (1.0)
Why should we obey the government? Are there limits to what the state may demand of us? Does social justice require equality? Is taxation - or wage labor - theft? This course addresses these and other questions of social and political morality, through the lens of the major theories of Western philosophy. Topics will include Mill on the general welfare and the importance of liberty, Nozick on individual rights, Rawls and Dworkin on distributive justice and Marx and Cohen on equality. We’ll study the structure and justification of each of these theories, as well as apply them to contemporary issues such as affirmative action, health insurance, gay rights and welfare policy.
Instructor: de Bres
Prerequisite: Open to juniors, seniors and sophomores without prerequisite and to first-years who have taken one course in philosophy.
Distribution: SBA, REP
Term(s): Spring

PHIL 215 - Philosophy of Mind (1.0)
What is a mind? How is it related to a person’s brain and body? These two questions have driven centuries of work in the philosophy of mind, and we will take them as our starting point. After considering a variety of answers, we will pursue several topics that challenge our best accounts of the mind: consciousness, mental representation, the emotions, free will, and the possibility of thinking machines. Our goal will be to connect central philosophical perspectives on these issues with contributions from psychology, cognitive science, and neuroscience.
Instructor: Wearing
Prerequisite: One course in philosophy, psychology, or cognitive science, or permission of the instructor.
Distribution: EC
Term(s): Fall

PHIL 216 - Logic (1.0)
Logic studies the principles of valid, or correct, reasoning. It does this by looking for ways to regiment the relationship between a conclusion and the claims that support it. In this course, we will learn how to translate sentences of English into a symbolic language that brings out their logically relevant properties, and we will study formal methods—methods sensitive only to the form of the arguments, as opposed to their content—that allow us to determine whether the conclusions of arguments follow from their premises. Some consideration is given to the limits of the system itself as well as to the relationship between logic and ordinary language.
Instructor: McGowan, Wearing
Prerequisite: None
Distribution: EC

PHIL 218 - Feminist Philosophy of Science (1.0)
This course will use feminist critiques of mainstream philosophy of science to tackle central questions about the nature and status of scientific knowledge. First, we will investigate the proper basis for choosing among competing scientific theories. How direct is the relation between evidence and theory? Feminist philosophers of science have challenged the idealization of scientific practice at the heart of traditional conceptions of science. We will use their work to redefine our understanding of how one theory can be objectively better than another. At the same time, we will consider whether political and social values have any legitimate role to play in justifying the acceptance of a given theory. We will also examine the status of scientific theories as claims about the world. Are scientists discovering how the world “really” is? What, if anything, distinguishes science from other ways of understanding the world?
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: EC
Term(s): Not Offered

PHIL 221 - History of Modern Philosophy (1.0)
A study of central themes in seventeenth- and eighteenth-century philosophy, concentrating on Descartes, Hume, and Kant. More limited readings of such figures as Spinoza, Locke, Ann Conway, Leibniz, and Berkeley. Among the topics: the relationship between mind and body; the limits of reason; determinism and freedom; the bearing of science on religion.
Instructor: Marshall
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: EC, HS
Term(s): Spring

PHIL 226 - Philosophy of Law (1.0)
A systematic consideration of fundamental issues in the conception and practice of law. We will first consider the nature of law and legal reasoning. Is law derived from moral principles or created by legislative fiat? Is international “law” law? When judges interpret the Constitution, do they discover the law, or effect its development as they go? We will then discuss moral limits on the law. Which principles should guide the state’s restriction of citizens’ liberties? Is refusal to obey the law ever justified? We will also consider the legal issues surrounding responsibility and penalties. Under which circumstances can we hold people responsible for outcomes that they caused or could have prevented? What, if anything, justifies punishment by the state? Does the death penalty violate human rights? Readings will include selections from legal theory and contemporary court decisions.
Instructor: de Bres
Prerequisite: Open to juniors and seniors without prerequisite and to sophomores who have taken one course in philosophy.
Distribution: REP
Term(s): Spring
Not open to students who have taken PHIL 326.

PHIL 230 - Nineteenth-Century Philosophy (1.0)
This course will study selected themes in nineteenth-century philosophy. Readings from Kant, Hegel, Kierkegaard, Schoenauer, and Nietzsche will address central issues such as the status of reason,
PHIL 233 - Environmental Ethics (1.0)

Do nonhuman animals, plants, species, ecosystems, or wilderness have moral value beyond their relation to human interests? Do we have moral duties to refrain from harming the natural world or to preserve it for future generations? How should we weigh environmental concerns against other concerns (such as the elimination of poverty or economic growth) in cases where they come into conflict? How should the benefits of the environment, and the burdens of conserving it, be shared across individuals or countries? Does recognition of the importance of the environment call for a brand new kind of moral philosophy or merely a more sophisticated application of an old one? This course will examine a variety of philosophical answers to these questions and apply those answers to a set of pressing current issues, including global climate change; population policy and reproductive freedom; the local food movement; and the use of nonhuman animals for food, research, and entertainment.

Instructor: Mathes
Prerequisite: Open to first-year students who have taken one course in philosophy and sophomores, juniors and seniors without prerequisite.
Distribution: REP
Term(s): Fall

PHIL 236 - Global Justice (1.0)

An introduction to recent work in political philosophy on the ethics of international relations. The course will discuss some of the main theoretical approaches to the topic: realism, cosmopolitan egalitarianism, political liberalism, utilitarianism, and nationalism. We will also consider how these different approaches might be applied to some central moral controversies in international politics, including those relating to global poverty, human rights and humanitarian intervention, immigration, climate change, and fair trade.

Prerequisite: Open to first-year students who have taken one course in philosophy or political science, and to sophomores, juniors, and seniors without prerequisite.
Distribution: REP
Term(s): Not Offered

PHIL 242 - Existentialist Ethics (1.0)

The key insight of existentialist thought is that human beings are essentially and radically free: nothing determines or judges what you do or what kind of person you are except your own free choice. Furthermore, nothing is inherently valuable: an object or action is valuable only because you choose to value it. This class will explore the ethical consequences of this insight: is it possible to derive a moral standard within this framework, or is an existentialist bound to be a nihilist? If the source of value is each person’s free choice, what happens when people disagree? Can we praise or blame other people for their actions? The works of Jean-Paul Sartre, Friedrich Nietzsche, Simone de Beauvoir, and Soren Kierkegaard are among those studied.

Instructor: Rabinoff
Prerequisite: Open to sophomores, juniors and seniors without prerequisite and to first-years with permission of instructor.
Distribution: REP
Term(s): Spring

PHIL 243 - Teleporters and Time Travel: The Metaphysics Behind Science Fiction (1.0)

Characters on Star Trek use teleporters for instantaneous travel; Doctor Who and friends regularly travel through time and alter history; and many science fiction stories ask whether robots or even people could be free and moral beings even if they are caused to act as they do, whether by their programming or other antecedent causes. These recurring issues in science fiction are in fact philosophical; more exactly, they are questions of metaphysics, the study of the foundations of reality. In this course, we’ll look at some of these pressing philosophical issues. We’ll consider these stories as thought experiments with which we can test and explore various theories about the foundations of reality. We’ll investigate a variety of philosophical theories on issues of identity, necessity, possible worlds, causation, freedom, and time travel. We’ll also consider the role and nature of these thought experiments themselves: what role should they play in our theorizing?

Instructor: Marshall
Prerequisite: One prior philosophy class.
Distribution: EC
Term(s): Not Offered

PHIL 245 - Agency and Motivation (1.0)

An examination of the capacities important to human agency, drawing on work in philosophy as well as research in psychology and the cognitive sciences, with the goal of characterizing what distinguishes human agency from the goal-directed behavior of other animals. We will use the conceptually puzzling but utterly familiar phenomena of self-deception and action against one’s better judgment as a point of departure to explore philosophical theories about the ultimate sources of motivation, philosophical attempts to characterize the nature of intentional action, and differing conceptions of free will and the nature of autonomy.

Prerequisite: One course in philosophy.
Distribution: EC
Term(s): Not Offered

PHIL 246 - Inequality (1.0)

How much income and wealth inequality is there in the United States today? How has inequality changed over time and what explains these changes? What effect does inequality have on standards of living, health and democracy? Should we attempt to reduce inequality? If so, how? This course will examine the ethical questions posed by these questions, first exploring current debates about inequality in America. We will then consider the role and nature of these thought experiments in our theorizing.

Prerequisite: ECON 101
Cross-Listed as: ECON 246
Distribution: SBA; REP
Term(s): Not Offered

PHIL 249 - Medical Ethics (1.0)

A philosophical examination of some central problems at the interface of medicine and ethics. Exploration of the social and ethical implications of current advances in biomedical research and technology. Topics discussed will include psychosurgery, gender surgery, genetic screening, amniocentesis, and euthanasia.

Instructor: Staff
Prerequisite: Open to all students without prerequisite.
Distribution: REP
Term(s): Not Offered

PHIL 250 - Research or Individual Study (1.0)

Prerequisite: At least one course in philosophy and permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PHIL 250H - Research or Individual Study (0.5)

Prerequisite: At least one course in philosophy and permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PHIL 256 - Ethical Theories (1.0)

We all have feelings and opinions about what kinds of behavior are morally right or morally wrong. But how do we develop those intuitions into a coherent and plausible theory that can withstand criticism and be applied consistently across a range of cases? This course will be an examination of historical and contemporary approaches to systematic ethical theorizing. In the course of our inquiry, we will consider such questions as: Are the effects of your actions all that matter morally? Or does what you intend to do matter too? Is there a significant difference between what you intend to do and the consequences you can reasonably foresee? Is there a moral difference between causing harm and allowing someone to be harmed?

Instructor: Mathes
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors and seniors without prerequisite.
Distribution: REP
Term(s): Spring

PHIL 300-01-F - Seminar in Modern Philosophy (1.0)

Topic for 2014-15: The Empiricist Tradition

What would philosophy look like if we eliminated all metaphysical concepts that are not confirmed by ordinary experience? Locke, Berkeley, and Hume argue that we should reject, among other things, metaphysical conceptions of the self, causation, and the external world. We will examine their arguments for these conclusions. But what, then, becomes of the self once we deny that the self is a substantial and enduring entity? Likewise what becomes of causation and human action once we deny that causal powers exist in the world and in ourselves? And, finally, what becomes of scientific inquiry once we deny that there is an extramental world of material bodies? We will also examine their responses to these questions. The empiricists develop ingenious accounts of the world and of the mind that attempt to do without any controversial metaphysical claims; we will compare these efforts and consider whether they succeeded.

Instructor: Wood
Prerequisite: PHIL 221 or permission of the instructor.
Distribution: EC
Term(s): Fall

PHIL 310-01-S - Seminar. Ancient and Medieval Philosophy (1.0)

Topic for 2014-15: Ancient Greek and Roman Political Philosophy
PHIL 317 - Seminar. Philosophy and Race (1.0)
This seminar will explore various philosophical issues related to race. First, we shall explore the metaphysics of race. Drawing on work in biology, anthropology, the philosophy of science, and theories of social construction, this section of the course will be concerned with what sort of thing (or category) race is. Next, we will examine racist hate speech. Appealing to work in the philosophy of language, sociology, and free speech law, we will explore (alleged) connections between racist hate speech and various sorts of harm and discuss how, if at all, such connections affects the free speech status of racist hate speech. Finally, we will consider racist jokes. Using work in the philosophy of language and political philosophy, we shall explore how they work, what they communicate, and how they may be implicated in broader issues of social justice.
Prerequisite: At least two courses in philosophy or permission of the instructor. Not open to first-year students.
Distribution: EC
Term(s): Spring

PHIL 325 - The Free Will Problem (1.0)
Do we ever act with freedom of the will? To address this question, philosophers typically start by analyzing the concept of free will. Some conclude that a choice that is caused by antecedent states or is causally determined could not be an instance of free will. This approach can lead to skepticism about whether free will actually exists. Others start with the assumption that free will must exist because it is the trait that explains and justifies our practice of holding people responsible for what they do. This approach leaves open what free will might turn out to be. Variations on these two strategies in the work of philosophers, psychologists, and neuroscientists will be scrutinized and evaluated as we formulate our own positions in the free will debate.
Prerequisite: At least one course in philosophy, psychology, neuroscience, or cognitive and linguistic science, or permission of the instructor.
Distribution: EC
Term(s): Not Offered

PHIL 333 - Seminar. Language and Law (1.0)
Language issues permeate the criminal justice system. If a police officer says, "You wouldn't mind if I looked inside your trunk, now would you?" is that statement only a question or is it also a request or even an order? Committing perjury requires uttering something false; can a misleading but true utterance constitute perjury? This seminar will explore various linguistic issues related to the law (and the criminal justice system more generally). Tools from the philosophy of language and linguistics will be explored and then applied to legal questions. Topics covered include: perjury, consent, Miranda warnings, verbal crimes (e.g., solicitation, bribes), threats and cross-burning, invoking the right to counsel, sedition, and free speech.
Instructor: McGowan
Prerequisite: Two previous philosophy courses or permission of the instructor. Not open to first-year students.
Distribution: EC
Term(s): Spring

PHIL 340-01-S - Seminar: Moral Philosophy (1.0)
Topic for 2014-15: History and Heritage
In this course, we will examine a range of moral questions that arise when we reflect on our history: as individuals, as families, as cultures, and as a species. These questions will include: Is it important to know about your own ancestry? Do you have the right to know? What role does history play in constituting a group? Is a common history a justifiable basis for prioritizing the needs of your group? Who “owns” the past? Who ought to control it or profit from it? Whose values should take precedence when conflicts arise between archaeologists and indigenous communities? Can the deceased be harmed? What, if anything, do we owe them? Should people be compensated for historical injustices? How and why? Whose responsibility is it? We will also consider whether we are subject to moral demands to remember aspects of the past, and if so, how might we meet those demands.
Instructor: Matthes
Prerequisite: One previous course in Philosophy or permission of instructor.
Distribution: REP
Term(s): Spring
Ann E. Maurer '51 Speaking Intensive Course

PHIL 342-01-F - Seminar. Political Philosophy (1.0)
This seminar explores three cutting-edge topics in international political philosophy. We will start with the ethics of immigration policy. Are any immigration restrictions justified? Should rich countries admit more asylum seekers or temporary workers? Should illegal immigrants be permitted to stay? Next we will consider moral questions concerning international trade. Does it make sense to apply principles of fairness to trade? Should we trade with nations that violate basic labor standards? Are we morally required to buy local produce? We will finish with the morality of war. Is the use of violence against other states ever justified? Is it permissible to torture enemy combatants or kill civilians during war? Is terrorism ever defensible? The course will combine recent theoretical work by moral and political philosophers with contemporary case studies.
Instructor: de Bres
Prerequisite: Open to seniors without prerequisite and to juniors and sophomores who have taken one course in philosophy, or by permission of the instructor.
Distribution: REP
Term(s): Fall

PHIL 345 - Seminar. Advanced Topics in Philosophy of Psychology and Social Science (1.0)
Prerequisite: One course in philosophy, psychology, or cognitive and linguistic sciences, or by permission of the instructor.
Distribution: EC
Term(s): Not Offered
DEPARTMENT OF PHYSICAL EDUCATION, RECREATION AND ATHLETICS

PERA Professor of the Practice: Baumon, Belgiovine (Chair and Athletic Director)
PERA Associate Professor of the Practice: Dix, Kroll, McPhee, Mohammed, O’Meara, Spillane, Webb
PERA Assistant Professor of the Practice: Berry, Jennings, Kimbolic, King, Kaucher, Maklerney, Verity
Instructor: Berger, Bernstein, Cameron, Chang, Chin, Gifford, Grande, Harkless, Hayden-Ruckert, Kaloisby, LaBella, Leahy, Lekas, Liang, Magill, McLaughlin, Mercer, Owen, Pickul, Renninger, Schuler, Sieck, Ulisse, Weaver, Weeks, Wilson, Wong, Woodruff

The Department of Physical Education, Recreation and Athletics is dedicated to promoting students’ intellectual success and balanced living through increased knowledge, skill development, and participation in physical activity and sports. PERA engages and challenges all students through a diverse physical education curriculum, varied types and levels of recreation, and competitive varsity athletics, affirming the undergraduate degree requirement as an essential component of a liberal arts education.

Physical Education Requirement
To complete the College degree requirement in physical education, a student must earn at least eight (8) physical education credits through physical education classes, varsity athletics, or recreation programming. These credits do not count as academic units toward the degree, but are required for graduation. Students are strongly urged to fulfill the requirement by the end of the sophomore year. There are no exceptions for the degree requirement in physical education.

Upon fulfilling the Physical Education Requirement, students will possess the following knowledge and skill sets. These competencies are the foundation of a healthy, balanced life, and are instrumental to a well-rounded liberal arts education.

All students who participate in PERA programs will:
• Acquire knowledge of and competence in fundamental and advanced motor skills that will allow students to enjoy regular physical activity
• Demonstrate an understanding of the fundamental training principles that apply to cardiovascular fitness, flexibility, and strength
• Develop strategies for self-assessment and goal-setting to achieve fitness and sport-related objectives
• Understand the link between regular physical activity and improvements in mood, cognition, and academic performance
• Adapt quickly to challenging situations as a result of being exposed to risk-taking opportunities

Fulfilling the PE Requirement
Most students fulfill the PE requirement by taking two or more physical education classes. Students may also earn PE credits for participation on one or more of Wellesley’s 14 varsity athletic teams or for participation in a department-approved, College-sponsored recreational program (maximum two or four credits). Qualified students may also earn physical education credit for pre-approved independent study programs (maximum four credits).

No student is exempt from the physical education requirement. If a student has a temporary or permanent medical restriction, the student may work with PERA and Health Services to arrange an activity program to serve the student’s individual needs.

Incoming transfer students are awarded partial credit toward the physical education requirement dependent upon year and semester of admission. Typically, students admitted as sophomores are expected to complete four credits at Wellesley. Students admitted as juniors or as Davis Scholars will be considered as having completed the degree requirement.

A. Physical Education Classes (maximum credit: unlimited)

All classes are graded on a credit/noncredit basis:
• CR—Credit for course completed satisfactorily
• NC—No credit for course not completed satisfactorily

A. Varsity Athletics (maximum credit: unlimited)
The intercollegiate varsity program offers 14 sports through which a student may earn credit points toward the completion of the degree requirement. The athletics program is divided into three seasons: fall, winter, and spring.

</table>

Enrollment and eligibility for earning credit points for intercollegiate varsity athletics is limited to those students who are selected to the team by the head coach. Notices of organizational meetings and tryouts for these teams are distributed each year by head coaches.

C. Recreation: Intramural Crew, Dance, or Sport Clubs (maximum credit: 2-4 credits)
The college offers students the opportunity to engage in a variety of recreational activities through a partnership between Physical Education, Recreation, Athletics, and Student Involvement. Activities that include at least 10 hours of formal instruction under the guidance of a qualified instructor—such as dorm crew, class crew, and some dance and sport clubs—are worth a maximum of two credit points. PERA-supported club sports are worth a maximum of four credits. Offerings and notice of organizational meetings and participation for these clubs are available through PERA and Student Involvement.

The College encourages students to take advantage of many recreational opportunities, students may earn credit for recreational activity only once. Students must fulfill the remainder of the graduation requirement either through physical education course work or varsity athletics.

PE - Physical Education Courses

PE 100 - Elementary Swimming (4 PE Cr)
Upon completion of this course, the student will be able to swim at least 10 yards of freestyle, backstroke, or elementary backstroke. The student will be able to swim in deep water for 2 minutes, and swim in deep water for 5-10 yards. The student will also be able to perform the breaststroke and butterfly pull and kick for 5 yards.

Instructor: Dix
Prerequisite: None
Distribution: PE
Term(s): Fall

PE 104 - Basic Sailing (2 PE Cr)
Upon completion of this course, a student will be able to rig and urrig a tech dingy using the proper knots, recognize and define the points of sail, sail a figure-8 course set by the instructor using tacking, and define basic sailing terminology. A student will also demonstrate an understanding of her ability to safely handle weather conditions and be able to set their own course on Lake Waban without the assistance of an instructor.

Instructor: Dix, Spillane, Work
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring; PE Term I & PE Term II
Offered PE Terms 1 and 4.

PE 105 - Beginning Canoe (2 PE Cr)
After taking this course, students will be able to execute basic bow and stern strokes, enabling them to effectively steer and maneuver a tandem and solo canoe. Students will also be able to demonstrate basic safety and rescue maneuvers - including capsize recovery & boat over boat rescue.

Instructor: Spillane, Work
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring; PE Term I & PE Term II
Offered PE Terms 1 and 4.

PE 109 - Take the Leap: Intro to Diving (4 PE Cr)
Introduction to springboard diving will provide students an opportunity to learn movement patterns, skills, techniques, and basic dives from the 1- and 3-meter springboard in a safe, progressive manner. Students will learn both forward and backward takeoffs and entries into the water, as well as simple trampoline skills, stretches for flexibility, and
exercises related to the sport. Students will also learn diving terminology, scoring and how a diving meet runs. This class will culminate with a diving competition where students will perform in a mock diving meet in a fun, friendly environment.

Instructor: Clark
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 120 - Ballet I (4 PE Cr)

This introductory level course, designed for the student who has never before been introduced to the art, offers training in the basic skills of ballet technique. Beginning with barre exercises and progressing to simple steps that move across the center floor, this class will provide an introduction to basic techniques and gain technical skills in locomotor movements, turns, falls, and isolations. Basic concepts of sequencing, transition, phrasing, use of space, intention, and theme will underlie technical application. Upon completion of this class, students will have a sense of her individual quality of movement and what makes her style unique.

Instructor: Cameron
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 125 - Modern Jazz, Level II (4 PE Cr)

Upon completion of this class students will have enhanced their skills and understanding of turns, falls, leaps, and sequences, including Limon's rise & fall, Graham's contractions, & floor combinations, and Alley's powerful extensions and turns. Students will have an opportunity to learn and use basic choreographic skills, developing their own 'dance-voice.'

Instructor: Cameron
Prerequisite: PE 124 or permission of the instructor.
Distribution: PE
Term(s): Fall; Spring

PE 126 - African Dance (4 PE Cr)

Dance & music are an integral part of daily life and culture all over Africa. In this course we will explore the richness of West African culture through its music and movement. Students will learn traditional dance movements, songs and history. This course will focus on the correlation between the dance and its corresponding rhythm. Students should wear loose clothing and plan to be barefoot. Women should bring a piece of material to wear around their waists as a wrap-around skirt.

Instructor: Harkless
Prerequisite: None
Distribution: PE
Term(s): Fall

PE 127 - Classical Indian Dance (4 PE Cr)

As a result of taking Indian Dance, a student will be able to perform footwork, spins and turns in a rhythmic sequence. Cultural dance equipment, such as ankle bells, add a rhythmical sequence to the dances. Students will also learn how culture influences the storytelling aspects of the dances.

Instructor: Hayden-Ruckert
Prerequisite: None
Distribution: PE
Term(s): Fall

PE 128 - Afro-Brazilian Dance (4 PE Cr)

Brazil was the largest importer of African slaves in all of the Americas. As a result, its music and dance are heavily African-rooted, but also incorporate European and Native American influences. Brazil boasts one of the most elaborate Carnival celebrations in the world that displays a rich variety of dance and music. Upon completion of this class students will be able to recognize and execute a series of steps and choreography from several traditional Afrobevian dances.

Instructor: Harkless
Prerequisite: None
Distribution: PE
Term(s): Spring

PE 140 - Zumba (4 PE Cr)

Zumba is a fusion of Latin and international dance styles combined with fitness elements and movements. By taking this course, students will experience a cardiovascular and total body strength & conditioning workout. Improved endurance, coordination & balance are additional benefits of Zumba. Upon completion, students will have a basic understanding of dance & music sequencing, transitions, and phrasing, and will perform the choreography learned.

Instructor: Kroll
Prerequisite: None
PE 147 - Sports Performance Training (4 PE Cr)
This course is designed to provide students with the fundamental knowledge and skills involved in resistance training. Students will learn the proper technique of various forms of functional resistance training including: free weights, resistance bands, physioballs and body weight exercises. Students will also learn how to properly warm up and cool down through dynamic and passive movements. Students will follow a periodized resistance program throughout the semester aimed at making gains in strength and power. At the completion of this course, students will be able to create a personalized resistance training routine.
Instructor: LaBella
Prerequisite: PE-146 or permission of instructor
Distribution: PE
Term(s): Fall; Spring

PE 148 - Couch to 5K (4 PE Cr)
Students will increase their aerobic capacity and learn about various training strategies and the impact of physical conditioning on the body while training to run a 5K. Each class will progress through a variety of distances, time intervals, and levels of exertion, along with learning the physiological rationale for such progressions. Various training techniques, including interval training and cross training (e.g., bike, elliptical, etc.) will be used through the course. Each class meeting will include a dynamic warm-up and cool down. The eventual goal is for the student to be able to continuously run for 30+ minutes. Students will also be given a journal to track individual goals and progress throughout the semester. In addition, students will become familiar with research surrounding a variety of wellness topics, specifically, sleep, nutrition, exercise, and stress resilience.
Instructor: Pickul, Mohammed
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 150 - Beginning Spinning (4 PE Cr)
This class will benefit a wide range of abilities and fitness goals. You will learn bike setup and safety, heart rate monitoring, and techniques to enhance the mind/body connection. The class will offer energizing, cycling-inspired rides that combine sound training principles, inspirational music, and a unique mind/body philosophy. We will exercise at moderate to high intensity levels using the spinning bikes, while incorporating the six different spinning movements. Upon completion of this course students will be able to design and execute their own individualized spin program. This course will help you get into shape, reduce stress, increase energy, and build confidence. In addition, students will become familiar with research surrounding a variety of wellness topics, specifically, sleep, nutrition, exercise, and stress resilience.
Instructor: Chin
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 152 - Introduction to Triathlon Training (4 PE Cr)
Introduction to Triathlon Training introduces the three disciplines of swimming, biking, and running while intergrading key functional training components to improve overall power, strength, and endurance. Students will receive a well-balanced training regimen accompanied by technique instruction on swimming, biking and running. Upon completion, students will have a heightened understanding of the physiological and psychological demands required to compete in their first triathlon or improve on their current skill set.
Instructor: Kimball
Prerequisite: Base level of swim skill is required. See notes.
Distribution: PE
Term(s): Fall; Spring

PE 160 - Self-Defense (4 PE Cr)
Upon completion of this practical self-defense course, students will learn basic avoidance tactics, awareness skills and physical self-defense maneuvers. The student will be able to demonstrate effective escape skills, verbal responses, and offensive counter attacks (including elbow strikes, heel/palm hits, kicks and fighting from the ground). Safety equipment will be used in class, and physical contact is a part of every session.
Instructor: Weaver
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 161 - Tai Chi (4 PE Cr)
Tai Chi is the ancient Chinese art of meditation achieved through low-impact movements and postures. Weaponry (sabre) is an important aspect of this training and will be included in the course. By learning postures from the Wu Chien-Chuan competition form and the fundamentals of the tai chi saber, students will achieve proper spinal alignment and muscle relaxation.
Instructor: Chin
Prerequisite: None
Distribution: PE
Term(s): Fall

PE 162 - Kung Fu (4 PE Cr)
A student enrolled in Kung Fu will be able to develop physical stamina, coordination and mental discipline. The course focuses on sequences called forms that are dynamically executed.
Instructor: Chin
Distribution: PE
Term(s): Spring

PE 170 - Archery (4 PE Cr)
Upon completion of the course, a student will be able to execute the fundamental steps of target shooting and attain an intermediate level of skill. Videotaping will help students analyze their errors to improve overall shooting. Students will have the opportunity to test their archery skills and sights in a variety of archery games, such as tic tac toe, dartboard, and balloon shoot. Students will shoot from 15, 20, and 25 yards.
Instructor: Bauman
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 171 - Badminton (4 PE Cr)
Upon completion of the class, a student will be able to perform the basic strokes, including serves, clears, drop shots, drives and smashes. The student will have an understanding of the rules and positional strategy necessary to score and participate in a match.
Instructor: Kaliouby
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring; PE Term I; PE Term II
Offered PE terms 2 and 3.

PE 172 - Fencing (2 PE Cr)
At the end of this course, a student will be familiar with fencing history, rules, equipment and basic skills, including advance, retreat, attack and defense, with an emphasis on correct execution of these fundamental skills. Students will also learn bouts strategies and scoring. Opportunity for electric foil fencing will be included.
Instructor: Makerney
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring; PE Term I; PE Term II

PE 173 - Term Golf (2 PE Cr)
After taking this class, the student will be able to execute the basic golf strokes, including full swing, pitching, chipping and putting. The student will have an understanding of the rules in order to engage in course play. (Equipment provided.)
Instructor: Makerney
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring; PE Term I; PE Term II
Offered PE terms 1 and 4.

PE 174 - Semester Golf (4 PE Cr)
Upon completion of this course, students will be able to execute basic golf strokes like putting, chipping, pitching and full swing, as well as trouble shots like hitting from the sand or rough. Students will be able to describe the laws of golf ball flight and relate them to their own swings, and detect and correct basic errors through the use of videotaping. After working on the basic skills in the Fieldhouse for the first part of the semester, students will demonstrate their knowledge and skills in this lifetime activity by playing holes on our 9-hole golf course. (Equipment provided.)
Instructor: Makerney
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring
PE 177 - Rock Climbing (4 PE Cr)
Upon the completion of this course students will have a basic knowledge of belay/climber communication, rock climbing terms, knots, and movement on rock. Students will focus on personal goal setting and intrinsic motivation in the sport of rock climbing. This is an introductory course and no previous rock climbing experience is needed.
Instructor: McGovern
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 100 - Elementary Squash (4 PE Cr)
After taking this class, the student will be able to execute the basic squash swing and shots including the drive, crosscourt, volleys, serve, boast and drop shots. The student will have an understanding of the rules to engage in game play and knowledge of basic strategies. After this course, students will be able to take their skills with them and continue to participate in this growing sport. (Equipment provided.)
Instructor: Berry
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 184 - Volleyball (4 PE Cr)
This class is designed for students of every ability level interested in improving their volleyball skills. By the end of the class, students will be able to pass, set, dig, serve, and attack. Students will also have a basic knowledge of offensive and defensive strategies. Principles of physical fitness, including proper warm-up/cooldown, cardiovascular and strength training, and stretching will also be addressed.
Instructor: Webb
Distribution: PE
Term(s): Fall; Spring

PE 185 - Intro to Racket Sports (4 PE Cr)
Upon completion of this class, students will know the rules and basic skills of three racket sports -- tennis, badminton, and squash -- including the serve, backhand, forehand, lob, and overhead strokes.
Instructor: Berry
Prerequisite: None
Distribution: PE
Term(s): Fall

PE 186 - Horseback Riding (2-4 PE Cr)
The horseback riding program is conducted at the Dana Hall Riding School, a 15 minute walk from campus. The Riding Center at Dana Hall offers instruction for all levels, from beginner to advanced. Students are responsible for transportation, a non-refundable registration fee (approximately $600), and any required riding attire. To register, phone 781.237.0728.
Instructor: Dana Hall Staff
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 187 - Downhill Ski and Snowboard (2 PE Cr)
The downhill ski and snowboarding program is conducted at Nashoba Valley Ski Area, a 45-minute ride from the College. The Nashoba Valley Ski School accommodates all levels of expertise from beginning to expert. Dates and costs TBA. See PE website for details.
Instructor: Nahoba Staff
Prerequisite: None
Distribution: PE
Term(s): Spring; PE Term I
Offered PE Term 3

PE 190 - Beginning Yoga (4 PE Cr)
Iyengar Yoga is a rigorous approach to yoga postures (asanas) based on the work of B.K.S. Iyengar. The classes focus on active poses that are sustained and balanced with a brief restorative pose. As a result of taking this class, students will have increased awareness of the physical aspects of yoga practice-agility, strength, and balance. Postures for relaxation and stress relief will also be covered. In addition, students will become familiar with research surrounding a variety of wellness topics, specifically, sleep, nutrition, exercise, and stress resilience.
Instructor: Owen
Prerequisite: PE 190 or permission of instructor.
Distribution: PE
Term(s): Fall; Spring
One section of Continuing Yoga will be for first-years only.

PE 191 - Continuing Yoga (4 PE Cr)
Students in this Iyengar style class will perform intermediate yoga postures, including inverted poses, arm balances and back bends. Prerequisite: Beginning Yoga or previous Yoga experience and permission of the instructor. In addition, students will become familiar with research surrounding a variety of wellness topics, specifically, sleep, nutrition, exercise, and stress resilience.
Instructor: Owen
Prerequisite: PE 190 or permission of instructor.
Distribution: PE
Term(s): Fall; Spring
One section of Continuing Yoga will be for first-years only.

PE 180 - Elementary Squash (4 PE Cr)
As a result of taking this class, students will be able to execute the basic squash swing and shots including the drive, crosscourt, volleys, serve, boast and drop shots. The student will have an understanding of the rules to engage in game play and knowledge of basic strategies. After this course, students will be able to take their skills with them and continue to participate in this growing sport. (Equipment provided.)
Instructor: Berry
Prerequisite: None
Distribution: PE
Term(s): Fall; Spring

PE 101 - Table Tennis (2 PE Cr)
Students will be able to execute the basic skills of forehand, backhand, lob, smash, loop, service and footwork. They will also acquire an understanding of the game rules and tactics used in a match, and display their skills in a mini-tournament at the end of the term.
Instructor: Liung
Prerequisite: None
Distribution: PE
Term(s): Fall; PE Term I; PE Term II
Offered terms 1 and 2.

PE 181 - Table Tennis (2 PE Cr)
Students will be able to execute the basic skills of forehand, backhand, lob, smash, loop, service and footwork. They will also acquire an understanding of the game rules and tactics used in a match, and display their skills in a mini-tournament at the end of the term.
Instructor: Liung
Prerequisite: None
Distribution: PE
Term(s): Fall; PE Term I; PE Term II

PE 182 - Intermediate Tennis (4 PE Cr)
As a result of participation in Intermediate Tennis, students will improve the consistency of their basic tennis skills including the groundstrokes, volley and serves. With emphasis on footwork, positioning, and ball placement, students will be able to execute strategies for singles and doubles play. Students will also become familiar with the use of varied grips and spins, as well as specialty shots such as the overhead, lob and drop shot. Students will be able to implement their developing skills and strategies into match play.
Instructor: Kuscher
Prerequisite: PE 182 or permission of instructor.
Distribution: PE
Term(s): Fall; Spring

PE 183 - Intermediate Tennis (4 PE Cr)
As a result of participation in Intermediate Tennis, students will improve the consistency of their basic tennis skills including the groundstrokes, volley and serves. With emphasis on footwork, positioning, and ball placement, students will be able to execute strategies for singles and doubles play. Students will also become familiar with the use of varied grips and spins, as well as specialty shots such as the overhead, lob and drop shot. Students will be able to implement their developing skills and strategies into match play.
Instructor: Kuscher
Prerequisite: PE 182 or permission of instructor.
Distribution: PE
Term(s): Fall; Spring

PE 187 - Downhill Ski and Snowboard (2 PE Cr)
The downhill ski and snowboarding program is conducted at Nashoba Valley Ski Area, a 45-minute ride from the College. The Nashoba Valley Ski School accommodates all levels of expertise from beginning to expert. Dates and costs TBA. See PE website for details.
Instructor: Nahoba Staff
Prerequisite: None
Distribution: PE
Term(s): Spring; PE Term I
Offered PE Term 3
A major in physics involves the study of the universal principles underlying phenomena ranging from the behavior of subatomic particles to the structure of the universe. It also entails the applications of these principles to the phenomena we observe every day and to the technology used to explore the world and address people’s needs. Important components of the major are modeling, problem-solving, and developing the critical thinking skills necessary to address fundamental questions about Nature. To acquire these skills our majors engage in active inquiry in the classroom and teaching laboratories and in performing research. In addition to preparing students for graduate study in physics or engineering, a major in physics is an excellent basis for a career in other sciences, business, public policy, medicine, law, and the arts. Physics majors will also be prepared with fundamental intellectual tools to support their lifelong learning in a rapidly changing world.

Physics Major

Goals for the Physics Major

- The Wellesley physics major is designed to give students an effective and engaging sequence of experiences to prepare them for graduate study or any of the subsequent paths listed above. Physics courses for the first three semesters have laboratory components that provide hands-on training in investigating the physical world and exposure to modern equipment and analytical tools. There is also a two-term mathematical methods sequence that focuses on the link between mathematics and physics that is central to the modeling process. Our core upper-level courses include advanced work in three fields fundamental to the understanding of the many special topics within the discipline as well as an advanced laboratory course that gives students experience in modern experimental techniques.
- Most courses meet three times weekly. If indicated, there is an additional three-hour laboratory session weekly.

Requirements for the Physics Major

A major in physics should ordinarily include PHYS 107, PHYS 108, PHYS 202, PHYS 207, PHYS 302, PHYS 305, PHYS 310, and PHYS 314. MATH 215 and PHYS 216 are additional requirements. PHYS 320 is strongly recommended. One unit of another laboratory science is recommended.

All students who wish to consider a major in physics or a related field are urged to complete the introductory course (PHYS 107 and PHYS 108) as soon as possible, preferably in the first year. A strong mathematics background is necessary for advanced courses. It is suggested that students complete MATH 115 and MATH 116 or MATH 120 in their first year and the MATH 215-PHYS 216 sequence no later than their second year. All students majoring in physics are urged to develop proficiency in the use of one or more computer languages.

Honors in Physics

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Teacher Certification in Physics

Students interested in obtaining certification to teach physics in the Commonwealth of Massachusetts should consult the chairs of the education and physics departments.

Transfer Credit in Physics

In order to obtain Wellesley credit for any physics course taken at another institution, during the summer or the academic year, approval must be obtained from the chair of the department prior to enrolling in the course. There is a limit of one physics course for which transfer credit may be given. In general, courses from two-year colleges will not be accepted at any level. These restrictions normally apply only to courses taken after matriculation at Wellesley. Transfer students wishing to obtain credit for physics courses taken prior to matriculation at Wellesley should consult the chair of the department.

Advanced Placement and Exemption Examinations in Physics

If a student has a strong physics background (AP, IB physics credits, or the equivalent) and wishes to be exempted from our introductory courses for the purpose of enrolling in a higher-level physics course, she must pass an exemption examination administered by the department. Sample examinations are available from the department. Students may not receive more than two units of credit for the introductory physics sequence. For example, a student who enrolls in both PHYS 107 and PHYS 108 will not receive AP or IB credit.

Engineering

Students interested in engineering should consider ENGR 120: Making a Difference Through Engineering and ENGR 160: Fundamentals of Engineering. First-year students may enroll in ENGR 111: Product Creation for All and students who have taken ENGR 120 are eligible for ENGR 125, an associated Winteression course. Students may also consider possible subsequent engineering studies such as the engineering certificates from the Olin College of Engineering. The Special Academic Programs section contains a description of these certificates that represent groups of engineering courses at Olin designed to complement a major at Wellesley. Additional information about taking courses at Olin can be found online at crossreg.olin.edu. Students also have opportunities to take courses at MIT via the Wellesley-MIT exchange program. Class Dean Jennifer Stephan and Amy Banzer, visiting lecturer in engineering, advise Wellesley students interested in engineering. More information about engineering opportunities can be found online at www.wellesley.edu/engineering.

Physics Related Courses

Attention Called

MATH 215 Mathematics for the Sciences I

Physics Minor

Requirements for the Physics Minor

A minor in physics (six units) should ordinarily include PHYS 104 or PHYS 107, PHYS 108, PHYS 202, PHYS 207, PHYS 302, and one other unit at the 300 level (PHYS 350 cannot be counted as the other 300-level unit). MATH 215 and PHYS 216 are also required.

PHYS - Physics Courses

PHYS 100 - First-Year Seminar: Einstein and the Dark Universe (1.0)

This seminar explores Einstein’s theory of relativity and two fundamental puzzles in physics: dark matter and dark energy. Taught in a hands-on/workshop format, students will carry out an experimental test of relativity, as well as computational analyses which reveal that the Universe expansion is accelerating and that 80% of the matter in the Universe is fundamentally different from all known particles in the Standard Model of particle physics. We will also discuss the ongoing experimental search for the elusive dark matter particle, as well as efforts to understand the nature of dark energy. No prior physics background is assumed. We will make use of high school algebra and geometry in our work. Not to be counted toward the minimum physics major or to fulfill the physics entrance requirement for medical school.

Instructor: Battat
Prerequisite: Open to first-year students only.
Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Cross-listed as: ASTR 110
Distribution: NPS; MM
Term(s): Fall
No letter grade.

PHYS 101 - Einstein’s Century: Physics in the Last 100 Years (1.0)

In 1905, Albert Einstein published three seminal papers in the history of modern science, introducing the theory of special relativity, launching the field of quantum mechanics, and helping establish the atomic nature of matter. We will use Einstein’s contributions as a springboard for an introductory exploration of the nature of light, matter, space, and time. PHYS 101 is designed for the student who may not have a strong science background, but would like an introduction to the major themes of physics in the last 100 years. In addition to lectures and demonstrations we will have readings that draw from the biographical and historical contexts in which these ideas developed. We will make use of basic high school algebra, and some trigonometry, in our work. Not to be counted toward the minimum major or to fulfill entrance requirement for medical school.

Instructor: Staff
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken PHYS 100.
Distribution: NPS; MM
Term(s): Not Offered

PHYS 102 - Physics for Modern Living (1.0)

Will the house of the future have an LED in every socket and a hybrid car in the driveway? What do you need to build a nuclear bomb? What do cool roofs have to do with the greenhouse effect and night-vision goggles? This course covers physics topics with applications to current events. Stressing
instruments, optics, and optical experiments. They emphasize electrical circuits, electronic measuring devices, and the wave nature of light. The course will consider both ray-optics and wave-optics descriptions of light. Laboratory exercises will emphasize electrical circuits, electronic measuring devices, optics, and optical experiments. Instructor: Ducas (Fall); Hu (Spring) Prerequisite: PHYS 104 or permission of the instructor. Corequisite: MATH 116 or MATH 120. Not open to students who have taken PHYS 108. Distribution: NPS; MM Term(s): Fall

PHYS 118 - Physics of Music and Musical Acoustics (1.0) The connection between music and physics is both deep and wide. It extends from the mathematics underlying scales and musical structure to the physical basis of instrument design, our perception of sound, concert hall acoustics, and the digital production of music. This first-year seminar will provide opportunities for students to explore these connections in a variety of ways. In addition to seminar discussions there will be laboratory sessions with acoustic measurements and characterization of musical instruments, demonstrations and performances by the music faculty and staff, projects involving the construction of musical instruments, and a field trip to the Fisk Organ Company to learn how Wellesley College's own Opus 72 Fisk organ was designed and built. Instructor: Ducas, Music Faculty Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: NPS; MM Term(s): Fall

PHYS 207 - Intermediate Mechanics (1.0) The basic laws of Newtonian mechanics will be revisited in this course using more sophisticated mathematical tools. Special attention will be paid to harmonic oscillators, central forces, planetary orbits, and the motion of rigid bodies. Newton's laws will be applied to a single continuous medium to obtain a wave equation as an approximation. Properties of mechanical waves will be discussed. Nonlinear dynamics and chaos will be introduced. Instructor: Battat Prerequisite: PHYS 108. Corequisite: PHYS 216 or permission of the instructor. Distribution: NPS; MM Term(s): Spring

PHYS 210 - Techniques for Experimentalists (0.5) This course provides a hands-on introduction to the art and craft of the experimental scientist, focusing on a variety of techniques of broad applicability to laboratory work in the natural sciences. Topics include an introduction to electronics and other skills needed for the effective and flexible use of modern scientific instrumentation. The course meets for 12 three-hour sessions during the first half of the term. Instructor: Battat; Stark Prerequisite: PHYS 108. Not open to students who have taken PHYS 310. Distribution: NPS; MM Term(s): Spring

PHYS 216 - Mathematics for the Sciences II (1.0) This course provides an introduction to the concepts of vector calculus, solutions of ordinary and partial differential equations, and the basics of statistical methods. It is suitable for students with a variety of backgrounds in the sciences. Instructor: Battat; Stark Prerequisite: MATH 215. Corequisite: PHYS 210. Distribution: NPS; MM; QRF Term(s): Fall

PHYS 217 - Numerical Methods (1.0) This course covers numerical methods for the solution of mathematical problems that arise in science and engineering. Topics include numerical solutions of ordinary and partial differential equations, and the basics of statistical methods. It is suitable for students with a variety of backgrounds in the sciences. Instructor: Battat; Stark Prerequisite: MATH 215. Corequisite: PHYS 210. Distribution: NPS; MM; QRF Term(s): Fall

The development of quantum mechanics represented one of the most fundamental revolutions in our understanding of the natural world. Quantum mechanics forms the basis for our knowledge of atoms, molecules, and solid-state systems as well as of nuclei and fundamental particles. Thermodynamics deals with the concepts of heat and temperature and their connection to properties of matter and to processes in nature and constructed systems. This course introduces both of these important branches of physics and looks at their links by investigating such phenomena as atomic and molecular heat capacities, and the statistical basis for blackbody radiation and the second law of thermodynamics. Einstein's theory of special relativity, another cornerstone of modern physics, will also be introduced. Instructor: Ducas Prerequisite: PHYS 108, MATH 116, or MATH 120. Corequisite: MATH 215 Distribution: NPS; MM; QRF Term(s): Fall
Modern experimental physics draws on a wide range of laboratory skills, design strategies, and analysis techniques. The experimentalist approaches each measurement with an array of tools, from the effective use of sophisticated instrumentation and the construction of home-built equipment to the evaluation of experimental uncertainties. This course offers a comprehensive introduction to experimental physics as it is carried out in research settings. An introduction to laboratory electronics is followed by a sequence of experiments that illustrate the use of electronic, mechanical, and optical instruments to investigate fundamental physical phenomena in nuclear, atomic, molecular, and condensed matter systems. Scientific writing skills and oral presentation skills receive focused attention. An emphasis on independent work is gradually developed throughout the semester.

Instructor: Ducas
Prerequisite: PHYS 207 and PHYS 302
Distribution: NPS, MM
Term(s): Spring

PHYS 311 - Advanced Astrophysics (1.0)

This course meets with ASTR 211 (see description) and on alternate Wednesdays for additional instruction and seminar-style discussion. Students will read and discuss journal articles and upper-level texts, carry out more advanced problem sets, and produce a final project that involves an in-depth treatment of a topic of their choosing.

Instructor: TBA
Prerequisite: PHYS 207
Cross-Listed as: ASTR 311
Distribution: NPS, MM
Term(s): Fall

Normally offered in alternate years.

PHYS 314 - Electromagnetic Theory (1.0)

Richard Feynman once said, "From a long view of the history of mankind—seen from, say, ten thousand years from now—there will be little doubt that the most significant event of the nineteenth century will be judged as Maxwell's discovery of the laws of electrodynamics. The American Civil War will pale into provincial insignificance in comparison with this important scientific event of the same decade." In this course we will study the classical theory of electromagnetic fields and waves as developed by Maxwell. Topics include boundary value problems, electromagnetic radiation and its interaction with matter, and the connection between electrodynamics and relativity.

Instructor: Hu
Prerequisite: PHYS 108, PHYS 207, and PHYS 216
Distribution: NPS, MM
Term(s): Fall

PHYS 320 - Advanced Topics in Physics (1.0)

This course covers advanced extensions of the topics encountered elsewhere in the physics curriculum. Normally included are elements of advanced quantum mechanics (perturbation theory, interaction of atoms with radiation, entanglement) and classical mechanics (Lagrangian and Hamiltonian dynamics, rotating frames of reference, rigid body rotations) with additional possible topics from electrodynamics and statistical mechanics. The course is highly recommended for students considering graduate work in physics or related disciplines.

Instructor: Stark
Prerequisite: PHYS 207 and PHYS 302
Distribution: NPS, MM
Term(s): Spring

Normally offered in alternate years.
Political Science is the systematic study of politics. It is the academic discipline that analyzes how power is defined, who does or should have power in society, how those with power use or ought to use it, how those with less power challenge it, and the effect of power on people’s lives. Political Science courses explore a wide range of questions regarding the concepts and norms central to the study of power and politics (e.g., authority, domination, gender, freedom); the structure and operations of law and institutions (e.g., the U.S. Supreme Court, United Nations, nongovernmental organizations); the historical, sociological, and cultural factors involved in political and economic development; social movements and processes (e.g., women’s movements, immigration); comparative political systems (e.g., democracy, communism); political trends and transformations in various regions (e.g., East Asia, South Asia, Latin America); and analyses of current affairs in the many realms and contexts in which politics take place.

Political Science Major

Goals for the Political Science Major

Our curriculum is specifically designed to achieve several goals:

- Provide majors with a broad background in the discipline of political science through the study of the four subfields that comprise it: American politics and law, comparative politics, international relations, and political theory
- Help students develop the capacity to think critically about themselves and local, national, and global politics
- Train students to become informed and reflective citizens of a democracy, as well as knowledgeable about the global dynamics which influence the shape and content of political life
- Facilitate the acquisition of particular skills and tools, including the ability to read complex texts closely; write clearly and well; think critically and analytically; generate and test hypotheses; take and defend a position against the strongest counterarguments

Requirements for the Political Science Major

A major in Political Science consists of at least nine units. Courses at the 100 level may be counted toward the major, but not toward a subfield distribution requirement (see below).

It is strongly recommended that students interested in further work in political science take one of the small 100-level courses offered each fall. The Department of Political Science divides its courses beyond the introductory level into four subfields: American politics and law (POL1), comparative politics (POL2), international relations (POL3), and political theory (POL4). In order to ensure that political science majors familiarize themselves with the substantive concerns and methodologies employed throughout the discipline, all majors must take one 200-level or 300-level unit in each of the four subfields offered by the department.

Recommended first courses in the four subfields:
- American politics and law: POL1 200; in comparative politics: POL2 202 or POL2 204; in international relations: POL3 221; in political theory: POL4 201, POL4 240, POL4 241, POL4 248.

In addition to the subfield distribution requirement, all majors must do advanced work (300 level) in at least two of the four subfields; a minimum of one of these units must be a seminar, which normally requires a major research paper. (Courses fulfilling the seminar requirement are denoted by the word “Seminar” before the course title.) Admission to department seminars is by permission of the instructor only. Interested students must fill out a seminar application, which is available on the political science department website homepage prior to preregistration for each term. Majors should begin applying for seminars during their junior year in order to be certain of fulfilling this requirement. Majors are encouraged to take more than the minimum number of required 300-level courses.

Research or Individual Study

Individual or group research of an exploratory or specialized nature. Students interested in independent research should request the assistance of a faculty sponsor and plan the project, readings, conferences, and method of examination with the faculty sponsor. These courses are offered at the 250 (intermediate) and 350 (advanced) levels and for one or 0.5 unit of credit.

Honors in Political Science

In the political science department, the only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the honors program, a student must have a minimum 3.5 grade point average in work in the major above the 100 level. Students who fail slightly below this minimum requirement may petition for an exemption if they present a particularly strong proposal and if they have the strong support of a potential thesis advisor. Majors who are interested in writing a senior honors thesis are urged to discuss their ideas and plans with a potential faculty advisor as early as possible in their junior year. The deadline for submitting an honors thesis proposal is the second Monday in April; all students are expected to submit their proposals by this date.

Graduate Study in Political Science

Students considering going to graduate school for a Ph.D. in political science should talk with their major advisors about appropriate preparation in quantitative methods and foreign languages.

Transfer Credits in Political Science

A minimum of five units for the major must be taken at Wellesley, as must the courses that are used to fulfill at least two of the four subfield distributions and the seminar requirement. The department does not grant transfer credit at the 300 level for either the major or for College distribution or degree requirements. This policy applies to courses taken at MIT.

For the purpose of meeting a subfield distribution requirement in the major, a student may count a course taken elsewhere provided that it transfers as at least .75 Wellesley units.

Although Wellesley College does not grant academic credit for participation in internship programs, students who take part in the Washington Summer Internship Program may arrange with a faculty member to undertake a unit of 350, Research or Individual Study, related to the internship experience.

Advanced Placement Policy in Political Science

Students may receive units of College credit if they achieve a grade of 5 on the American Government and Politics or the Comparative Politics AP examinations. Such AP credits do not count toward the minimum number of units required for the political science major nor for the American or comparative subfield distribution requirements for the major. If a student does receive a unit of College credit for the American politics exam, she may not take POL1 200 (American Politics). Students who are uncertain whether to receive a College AP credit in American politics or to take POL1 200 should consult with a member of the department who specializes in American politics/law or comparative politics.

Courses for Credit Toward the Political Science Major

POL - Political Science Courses

POL 103 - First-Year Seminar: Mexico: Revolution, Democracy, and Drugs (1.0)

Mexico is a country of remarkable contradictions. Unleashing one of the great revolutions of the twentieth century in 1910, the revolutionaries and their heirs then ruled Mexico for 71 years. Developing a genuine multiparty political system only since 2000, Mexico’s democracy now faces an array of daunting challenges, including the increasing power of drug cartels whose tactics of violence and intimidation threaten the entire nation. Our seminar will aim to make sense out of the fascinating puzzle that is Mexico. We will focus on its twentieth-century Revolution, its distinctive political system (including the return to power of the PRI in 2013), and its current social, economic, and political challenges. We will examine its complex relationship with the United States, emphasizing the dual issues of immigration and drugs.

Instructor: Wasserspring
Prerequisite: None. Open to first-year students only.
Distribution: SBA
Term(s): Fall
 Mandatory credit/noncredit.

POL 112 - First-Year Seminar: Wars of Ideas in International Relations (1.0)

This first-year seminar examines “wars of ideas” in international politics. How do changes in ideas shape international conflict? To what extent do ideas and identities motivate foreign policies? Has international relations moved beyond states and their security interests, and is now driven by a “clash of civilizations”? Historically, we will explore the role of religion in shaping the modern state system in the 17th century, nationalism and imperialism in the 19th century, and fascism, liberalism, and communism in the 20th century. Contemporary case studies will look at ethnic conflict, the “resurgence” of religion in international politics, and the role of American national identity in the wars in Iraq and Afghanistan.

Instructor: Goddard
Prerequisite: None. Open to first-year students only.
Distribution: SBA
Term(s): Spring

Ann E. Maurer ’51 Speaking Intensive Course
POL 115 - First-Year Seminar: Politics and Ethics (1.0)
Can politics be a moral enterprise or is it a realm where violence, deception, and cruelty are and must be routine? Students will explore works of political, social, and feminist theory as well as case studies, plays, novels and film to critically engage with questions such as: how do we judge whether a political act is moral or immoral? Does the context of war negate the moral precepts that hold in peacetime? Do national borders mark the place where our moral commitments to others end? And last but not least: who’s the “we” that determines the content of moral judgments and the reach of our ethical obligations?
Instructor: Euben
Prerequisite: None. Open to first-year students only.
Distribution: REP
Term(s): Fall
Shadow graded.

POL 230 - Politics in Washington D.C: Strategy & Power (0.5)
This course provides students with the opportunity to see how the concepts and processes they learn about in the political science classroom are manifested in our nation's capital. This year the course will examine how political actors in Washington D.C. make strategic decisions to maximize their power in the policymaking process in the United States. Starting with a half-unit course in the fall semester, the course will examine how competing conceptions of power inform the strategic decisions political actors make, and the differing perspectives of those acting inside and outside traditional political institutions. During Wintersession, the course will meet in Washington D.C. Through meetings with representatives from interest groups, think tanks, and legislative, executive, and judicial branch institutions, students will observe and critically analyze the implicit and explicit understandings of power that inform the strategic choices of political actors.
Instructor: Han
Prerequisite: POL 200. Application required.
Distribution: SBA
Term(s): Not Offered
This course has a required Wintersession component. The fall and winter component each earns 0.5 units of credit; however, both components must be completed satisfactorily to receive credit for either component.
Application required.

POL 299 - Introduction to Research Methods in Political Science (1.25)
An introduction to the process of conducting research in political science. Students learn to produce their own insights about how politics works and why certain political outcomes emerge. The course addresses different approaches to asking and answering questions, with a particular focus on quantitative analysis. Students will design a research project, formulate and test hypotheses about politics, find ways to measure political phenomena, and assess methods of empirical analysis and interpretation. The course provides a solid foundation for conducting empirical research and is strongly recommended for students interested in independent research, a senior honors thesis, and/or graduate school.
Instructor: Woolfolk
Prerequisite: One course in political science. Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking POL 199 [2013-14], MATH 101, MATH 101Z, ECON 103, SOC 196, QR 188, or PSYC 205.
Distribution: SBA, QRF
Term(s): Fall

POL 1 Political Science Courses - American Politics and Law

POL 200 - American Politics (1.0)
The institutions, processes, and values that shape American politics. The origins and evolution of the U.S. Constitution and the institutions it created: Congress, the executive branch, the presidency, the federal court system, and federalism. Analysis of "intermediary" institutions including political parties, interest groups, elections, and the media. Study of enduring debates over values in American politics, with particular attention to conflicts over civil rights and civil liberties.
Instructor: Dionne, Han, Scherer, Woolfolk
Prerequisite: None.
Distribution: SBA
Term(s): Fall, Spring

POL 210 - Political Participation and Influence (1.0)
It is secret that some people have a lot of resources [money, knowledge, status] and others have little. This course examines the political consequences of inequalities in different political arenas from the ballot box to the courts, from the legislature to administrative agencies. Does the same elite group always come out on top or are there ways that disadvantaged actors can be effective? Beyond voting and organized activities, is direct action a useful tool of political influence? How do social movements, such as gay rights or environmentalism shape policy agendas? What role does the media play in amplifying or constraining the power of political actors? Will the Internet change the power equation in the United States?
Prerequisite: POL 200 or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

POL 215 - Courts, Law, and Politics (1.0)
Fundamentals of the American legal system, including the sources of law, the nature of legal process, the role of courts and judges, and legal reasoning and advocacy. Examination of the interaction of law and politics, and the role and limits of law as an agent for social change.
Instructor: Burke
Prerequisite: POL 200
Distribution: SBA
Term(s): Not Offered

POL 235 - The Courts and Public Policy (1.0)
This course analyzes the record of American judicial policymaking in such areas as education, the environment, immigration, welfare, policing, civil rights, disability, and personal injury. Are judges effective policy makers? What are the strengths and weaknesses of courts as compared to other policymaking institutions? Do courts have the capacity to manage complex organizations? To stimulate significant social change? This course examines the interaction between courts and other governmental institutions, especially Congress, the president, executive agencies, states and localities.
Instructor: Dionne
Prerequisite: One unit in American politics or permission of the instructor
Distribution: SBA
Term(s): Fall

POL 247 - Constitutional Law (1.0)
This course is a survey of landmark decisions of the U.S. Supreme Court throughout American history. The course covers both cases about the structure of our government and cases interpreting the Bill of Rights and the Fourteenth Amendment. Topics include executive powers, congressional authority under the Commerce Clause, nation-state relations, economic liberties, freedom of the press, the right to privacy, the rights of the criminally accused, and the civil rights of women and minorities.
Instructor: Scherer
Prerequisite: POL 200
Distribution: SBA
Term(s): Not offered

POL 300 - Public Policymaking in American Politics (1.0)
This course examines how public policy on a wide range of issues, from reproductive rights to education, environment, and immigration, is made in the United States. The battle over these issues involves many institutions and social change. The course, the executive branch, Congress, the courts, state and local governments—who compete, and sometimes cooperate, over public policy. Students will analyze current policy struggles to better understand the interactions among these institutions and the resulting shape of American public policy.
Instructor: Han
Prerequisite: POL 200
Distribution: SBA
Term(s): Not Offered

POL 303 - The Politics of Crime (1.0)
This course will explore major topics on criminal policy and procedures through the lens of American politics. This year, the course will cover the following topics: the Supreme Court and civil liberties; race, gender, class, and crime; the death penalty; prison reform; and the war on drugs.
Instructor: Scherer
Prerequisite: POL 200
Distribution: SBA
Term(s): Not Offered

POL 316 - Media and American Democracy (1.0)
This course focuses on the mutual influences of the American media, politics, and the public. We assess the role of the media as a source of democratic accountability, civic education, expert opinion, editorial signaling, entertainment, propaganda, and political engagement. We examine the constraints on media posed by professional norms, journalism, market pressures, and political ideology. Besides legacy media, we examine Internet news, comedy programs, opinionated news, political ads, blogs, YouTube, Twitter, and social networking sites and their impact at home and abroad. The aim is to develop critical thinking about information.
Instructor: Just
Prerequisite: POL 200
Distribution: SBA
Term(s): Not offered

POL 317 - Health Politics and Policy (1.0)
The American system of health care is distinctive. Financing is provided through voluntary employer contributions, tax subsidies, individual payments and an array of public programs, principally Medicare and Medicaid—but despite the variety of funding sources, Americans, unlike citizens of other affluent democracies, are not guaranteed health care.
This seminar will discuss why campaigns are important and what elections mean for democratic governance in the U.S. We focus on the 2014 midterm elections and the impact of party nominations, campaign funding, news coverage, political advertising, public opinion polling, and the growing role of the Internet and social media in campaigns. We will explore voting choices and obstacles to voting. Throughout the seminar, students will apply various journalism styles including reporting about campaign events, candidates and relevant political science research, blogging and commentary. Students will engage in mutually supportive criticism and share their individual projects on competitive Congressional races.

Instructor: Burke
Prerequisite: POL1 200
Distribution: SBA
Term(s): Not Offered

POL1 319 - Calderwood Seminar in Public Writing: Campaigns and Elections (1.0)

This seminar will discuss why campaigns are important and what elections mean for democratic governance in the U.S. We focus on the 2014 midterm elections and the impact of party nominations, campaign funding, news coverage, political advertising, public opinion polling, and the growing role of the Internet and social media in campaigns. We will explore voting choices and obstacles to voting. Throughout the seminar, students will apply various journalism styles including reporting about campaign events, candidates and relevant political science research, blogging and commentary. Students will engage in mutually supportive criticism and share their individual projects on competitive Congressional races.

Instructor: Burke
Prerequisite: POL1 200 or the equivalent or by permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Fall

POL1 324 - Seminar, Gender and Law (1.0)

Analysis of how law in the United States is used to confer rights, create obligations, and define the identities of women. The course explores the historical and modern approaches used by the Supreme Court to address gender disparity in society, including labor law, reproductive rights, family law, sexual discrimination in the workplace, and gay rights. The course also analyzes the relationship between the feminist movement, social policymaking, and the Supreme Court. The last part of the class will examine whether the gender of legal actors (litigants, lawyers, and judges) makes a difference in their reasoning or decision-making.

Instructor: Scherer
Prerequisite: POL1 200 and by permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Fall

POL1 331 - Seminar, Political Organizing: People, Power, and Change (1.0)

This is a course about the theory and practice of organizing for social change. Organizing is an approach to social change in which people work collectively to acquire the power, capacity, and resources to achieve their goals. In this course, students learn what organizing is and how it works. They do this by developing cognitive understandings (theory) of what organizing is, how it has historically played a role in making social change, and how it works. In addition, all students in the course engage in a hands-on organizing project of their own choosing in which they must organize a group of people to achieve a common goal. Students will be introduced to basic organizing skills and practices in the course and must apply them to their projects.

Instructor: Han
Prerequisite: POL1 200 or equivalent; or by permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Spring

POL1 337 - Racial and Ethnic Politics in the United States (1.0)

This course examines the role of race and ethnicity in American politics, with special attention to the opportunities and challenges that have defined the political lives of racial and ethnic minority groups in the United States over the last 40 years. We will consider the definition and political meaning of racial and ethnic identities; the causes and consequences of political attitudes and mobilization among racial and ethnic groups; the determinants and significance of substantive and descriptive representation of minority group interests; the political implications of intersections among race, ethnicity, class, gender, and sexuality; and the prospects for pan-ethnic and interracial coalitions in an increasingly diverse society.

Instructor: Woofalk
Prerequisite: POL1 200
Distribution: SBA
Term(s): Spring

POL1 359 - Rights in Conflict (1.0)

American political culture places individual rights at the center of political life. Political controversies in the United States frequently involve conflicts between different sets and understandings of rights. Does judicial revolution protect constitutional rights or endanger government by consent? Does religious liberty require or prohibit giving some sects exemptions from generally applicable laws? Must we limit speech to protect equality? Must we curtail some of these rights in times of crisis? Why are political controversies in America framed in terms of rights, and how does this affect American politics? This course explores these and other controversies through careful reading historical and contemporary texts (including Supreme Court cases), extensive class discussion, and writing about competing rights claims.

Instructor: Bonnie
Prerequisite: POL1 200 or POL1 201, POL1 240 or POL1 241 or POL1 248
Distribution: SBA
Term(s): Spring

POL1 362 - Seminar, Religion and Politics in the United States (1.0)

This course examines the influence of religion on contemporary American political life. With special attention to the relationship between religion and political behavior, we will critically evaluate the extent of religious influence on the political system and the processes by which religious affiliations, beliefs, and practices become connected to politics. We will consider how to define, conceptualize, and measure religion in the study of political behavior; the influence of religion on political attitudes, including political ideology, partisan identification, and policy opinions; and the impact of religion on the political activities of the public, religious leaders, interest groups, social movements, and political elites.

Instructor: Woofalk
Prerequisite: POL1 200 and permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Not Offered

POL1 381 - U.S. Environmental Politics (1.0)

This course examines the politics of environmental issues in the United States. The course has two primary goals: first, to introduce students to the institutions, stakeholders, and political processes important to debates over environmental policy at the federal level; second, to develop and practice skills of analyzing and making decisions relevant to environmental politics and policy. Drawing on the literature of environmental politics and policy, this course will consider how environmental issues are framed in political discourse, various approaches to environmental advocacy and reform, and the contested role of science in environmental politics. The course will be organized around environmental case studies, including endangered species conservation, public lands management, air and water pollution, and toxics regulation.

Instructor: Turner (Environmental Studies)
Prerequisite: A 200-level ES course or POL1 200, or permission of the instructor.
Cross-Listed as: ES 381
Distribution: SBA
Term(s): Fall

POL2 Political Science Courses - Comparative Politics

POL2 202 - Comparative Politics (1.0)

Comparative Politics examines political institutions and processes across and within countries. The course enables students to distinguish between core concepts in the study of politics (e.g., government, regime, state, nation); appreciate the politics of collective identities (e.g., class, ethnicity, gender, religion, race); understand common political processes (e.g., state formation, revolution, democratization); understand major electoral systems (e.g., single member elections, proportional representation); and systems of representation (e.g., parliamentary, presidential); gain familiarity with the political histories and domestic politics of several countries; and design research projects using a comparative methods. In Spring 2015, the theme is women, elections, and methods for increasing women's political empowerment.

Instructor: Candland
Prerequisite: None
Distribution: SBA
Term(s): Spring

POL2 204 - Political Economy of Development and Underdevelopment (1.0)

Overview of development studies with attention to major schools of political economy, their intellectual origins and centrality to contemporary debates about economic development. Topics include: colonialism, nationalism, and independence; postcolonial economic development models, policies, and strategies; perspectives on gender and development; changing conceptions and measures of poverty, development, and underdevelopment; contemporary debates in development studies.

Instructor: Murphy
Prerequisite: None
Distribution: SBA
Term(s): F; Spring
POL 205 - The Politics of Europe and the European Union (1.0)
A comparative study of contemporary Western European states and societies. Primary emphasis on politics in Germany, Britain, and France, and the political challenges posed by the European Union and pressure for regional integration. The course will focus on topics, such as the rise and decline of the welfare state and class-based politics; the implications of the end of the Cold War and German reunification; tension between national sovereignty and supranational policy goals; immigration and the resurgence of xenophobic movements and the extreme right.
Instructor: Krieger
Prerequisite: One unit in political science or European history; open to juniors and seniors without prerequisite.
Distribution: SBA
Term(s): Fall

POL 206 - The Politics of Russia and Eurasia (1.0)
An introduction to the history, politics, and international context of Russia and other countries of the former Soviet Union. The course will explore the creation, development, and dissolution of the Soviet Union, but will focus most closely on post-Soviet Russia and Eurasia. In doing so it will consider the interconnections between domestic politics, state-society relations, economic development, and foreign policy.
Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to second-semester first-years with the permission of the instructor.
Distribution: SBA
Term(s): Not Offered

POL 207 - Politics of Latin America (1.0)
The course will explore Latin American political systems, focusing on the dual challenges of democratization and development. An examination of the broad historical, economic, and cultural forces that have shaped Latin American nations as well as analysis of the contemporary forces molding politics today. In-depth analysis of three case studies. Cases for 2015 will be Brazil, Mexico and Venezuela. Attention also to the role of the United States in Latin American political development and the implications of China’s current interest in the region.
Instructor: Wasserspring
Prerequisite: One unit in political science or permission of the instructor.
Distribution: SBA
Term(s): Spring

POL 208 - Politics of China (1.0)
An introduction to the modern political history and contemporary political system of China. Topics include: the origins and victory of the Chinese Communist revolution; the rule and legacy of Chairman Mao Zedong; economic reform and political repression in the era of Deng Xiaoping; and recent developments in Chinese politics.
Instructor: Joseph
Prerequisite: One unit in political science, economics, history, or Asian studies recommended, but not required.
Distribution: SBA
Term(s): Fall

POL 211 - Politics of South Asia (1.0)
An introduction to the politics of South Asia (India, Pakistan, Bangladesh, Sri Lanka, Afghanistan, Nepal, Bhutan, and the Maldives) from historical and contemporary, national and comparative perspectives. Examines the relationship of political institutions to patterns of development. Comparative themes include: colonial experiences and nationalist ideologies; politicization of religions and rise of religious conflict; government and political processes; economic reforms; initiative for conflict transformation; women’s empowerment; and obstacles to and prospects for human development.
Instructor: Candland
Prerequisite: One unit in political science; open to juniors and seniors without prerequisite.
Distribution: SBA
Term(s): Not Offered

POL 214 - Social Causes and Consequences of Environmental Problems (1.0)
This course focuses on the social science explanations for why environmental problems are created, the impacts they have, the difficulties of addressing them, and the regulatory and other actions that succeed in mitigating them. Topics include: externalities and the politics of unpriced costs and benefits; collective action problems and interest-group theory; time horizons in decision-making; the politics of risk and uncertainty; comparative political structures; and cooperation theory. Also addressed are different strategies for changing environmental behavior, including command and control measures, taxes, fees, and other market instruments, and voluntary approaches. These will all be examined across multiple countries and levels of governance.
Instructor: DeSombre (Environmental Studies)
Prerequisite: ES 102 or ES 103, or one course in political science, or permission of the instructor.
Cross-Listed as: ES 214
Distribution: SBA
Term(s): Fall

POL 216 - Politics of the Middle East and North Africa (1.0)
How do Arab-Islamic history and culture shape politics in the contemporary Middle East and North Africa? Why is the Arab world—despite its tremendous oil-wealth—still characterized by economic underdevelopment and acute gaps between rich and poor? How have the events of September 11 and the U.S.-led "war on terror" affected the prospects for greater freedom and prosperity in the Middle East in the future? What do the 2011 revolts mean for the existing regime order and prospects for democracy? These are some of the questions we will examine in this course. In readings, lectures, and class discussions, the analysis of general themes and trends will be integrated with case studies of individual Arab states.
Instructor: Moon
Prerequisite: One 200-level unit in comparative politics or a unit in history related to East Asia. POL 202 is recommended.
Distribution: SBA
Term(s): Not Offered

POL 217 - Politics of the Middle East and North Africa (1.0)
The course analyzes politics, policies, and practices related to human development in Pakistan. Videoconferences join students at Wellesley College and Fatima Jinnah Women University in Rawalpindi, Pakistan and allows them to interact with one another and with Pakistani leaders in fields related to human development. Issues include public and private education; health, including reproductive health; community development in rural and urban settings; microfinance; and the rights of minorities, women, and workers. Case studies include the Aga Khan Rural Support Program, the Baitak (living room) School Network, the Citizens Foundation, and the Orangi Pilot Project.
Instructor: Candland, Baqir
Prerequisite: Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Not Offered

POL 219 - Politics of Human Development in Pakistan (1.0)
The course analyzes politics, policies, and practices related to human development in Pakistan. Videoconferences join students at Wellesley College and Fatima Jinnah Women University in Rawalpindi, Pakistan and allows them to interact with one another and with Pakistani leaders in fields related to human development. Issues include public and private education; health, including reproductive health; community development in rural and urban settings; microfinance; and the rights of minorities, women, and workers. Case studies include the Aga Khan Rural Support Program, the Baitak (living room) School Network, the Citizens Foundation, and the Orangi Pilot Project.
Instructor: Candland
Prerequisite: Any 200-level unit in comparative politics or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

POL 230 - Gender, Islam, and Politics (1.0)
This course explores comparative analysis of the economic and political development of selected countries in East Asia: Japan, the Philippines, South Korea, and North Korea. It examines the role of and relationship between the state and society with respect to economic development and failures, political repression and democratization, civil society development, nationalism, identity politics, globalization, and transnational activism. The course also examines how economic and political trends in East Asia might affect the future of North Korea and the challenges that North Korea poses to the political and economic future of East Asia. References to China, Taiwan, and Southeast Asia are also included in the course material.
Instructor: Moon
Prerequisite: One 200-level unit in comparative politics or a unit in history related to East Asia. POL 202 is recommended.
Distribution: SBA
Term(s): Not Offered

POL 240 - State and Society in East Asia (1.0)
The course explores comparative analysis of the economic and political development of selected countries in East Asia: Japan, the Philippines, South Korea, and North Korea. It examines the role of and relationship between the state and society with respect to economic development and failures, political repression and democratization, civil society development, nationalism, identity politics, globalization, and transnational activism. The course also examines how economic and political trends in East Asia might affect the future of North Korea and the challenges that North Korea poses to the political and economic future of East Asia. References to China, Taiwan, and Southeast Asia are also included in the course material.
Instructor: Moon
Prerequisite: One 200-level unit in comparative politics or a unit in history related to East Asia. POL 202 is recommended.
Distribution: SBA
Term(s): Not Offered

POL 250 - The United States and Great Britain: The Special Relationship (1.0)
The term “special relationship” conveys the idea that the United States and Great Britain have enjoyed a uniquely close and enduring bilateral relationship since World War II, a relationship anchored in mutually beneficial foreign policies enhanced by special bonds of common heritage, language, and values. The course analyzes and demystifies the historic meaning and significance of Anglo-American ties in the postwar period, providing evidence and argument that reframes the special relationship, emphasizing the connections between—and challenges posed by—the experiences of hegemonic power and the alter-effects of empire on domestic politics and political identities in both nations.
Instructor: Krieger
Prerequisite: Any 200-level unit in comparative politics or permission of the instructor.
Distribution: SBA
Term(s): Spring

POL 306 - Seminar. Revolution (1.0)
A comparative analysis of the theory and practice of revolution from the seventeenth century to the present, with an emphasis on revolutions in the twentieth and twenty-first centuries. Questions to be
POL 307 - Women and Development (1.0)

A comparative analysis of the impact of development on gender in the Third World. Topics include the status of women in traditional societies, comparative analysis of the role of colonialism in forging gender identities, the impact of change on peasant women, female urban and global migration experiences, women as "sellers" and "servants" in the urban environment, women's political organizing to improve their lives. Special emphasis on the role of the state in framing or reinforcing gender stereotypes. Comparative analysis of cultural conceptions of gender and the factors which enhance or hinder the transformation of these views will also be emphasized. Examples drawn from all regions of the developing world.

Instructor: Wasserspring
Prerequisite: Any 200-level unit of comparative politics or permission of the instructor.
Distribution: SBA
Term(s): Spring

POL 308 - State and Society in China (1.0)

An analysis of politics in contemporary China. Topics include the political economy of China's market reforms and opening to the outside world, political reform and the structure of power in the People's Republic; the legal system; change and contention in rural and urban China; policy issues such as the arts and censorship, the environment, public health, and demography; and politics in Tibet, Xinjiang, Hong Kong, and Taiwan.

Instructor: Joseph
Prerequisite: POL 208, HIST 278, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

POL 310 - Seminar. Politics of Community Development (1.0)

Focuses on strategies for poverty alleviation, employment generation, promotion of social opportunity, and empowerment. Emphasis is on development in Asia (especially South and Southeast Asia), Africa, and Latin America. Considers women's leadership in social change, local control of resources, faith-based activism, and collaboration between activists and researchers. Examines activities of nongovernmental organizations (NGOs) and their relations with funders, governments, and other NGOs. Specific NGOs and development programs will be closely examined.

Instructor: Candiland
Prerequisite: Permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Fall

POL 312 - Seminar. Environmental Policy (1.0)

Focuses both on how to make and how to study environmental policy. Examines issues essential in understanding how environmental policy works and explores these topics in depth through case studies of current environmental policy issues. Students will also undertake an original research project and work in groups on influencing or creating local environmental policy.
Prerequisite: ES 214 or one 200-level unit in political science and permission of the instructor. Enrollment is limited to juniors and seniors.
Cross-Listed as: ES 312
Distribution: SBA
Term(s): Not Offered

POL 336 - Transitional Justice (1.0)

 Transitional justice concerns the pervasive psychological, social, and political effects of past injustices and on the mechanisms aimed at dealing with these injustices. We will consider the theory and practice of transitional justice, which includes such mechanisms as criminal prosecution; the disqualification from public office of those associated with past injustices; truth and reconciliation commissions; reparations; revisions of national-historical narratives; official apologies; and, public commemoration. Our focus will be on understanding the nature of the political and moral dilemmas encountered by countries that apply these mechanisms. We will consider broad theoretical questions as well as specific examples, such as Germany after World War II; South Africa’s Truth and Reconciliation Commission; and the International Criminal Tribunals for the Former Yugoslavia and the Rwandan genocide.

Instructor: Ben-Josef Hirsch
Prerequisite: POL 210, POL 212, HIST 278, or permission of the instructor.
Distribution: SBA
Term(s): Fall

POL 353 - The Politics of Contemporary Cuba (1.0)

 Analysis and assessment of the Cuban Revolution and its contemporary politics raise issues central to world politics. The role of political leadership, political culture and its transformation, the development options of small economies, the effects of tourism as a development strategy, and international constraints upon domestic policy formulation are some of the important themes that emerge from a focus on contemporary Cuba. This course will focus on these issues as we evaluate the politics of the Cuban Revolution. Special emphasis also on the evolution of U.S. policy toward Cuba and the impact of Cuban Americans on that policy.

Instructor: Wasserspring
Prerequisite: Any 200-level unit in comparative politics (POL 3) or international relations (POL 3) or permission of the instructor.
Distribution: SBA
Term(s): Fall

POL 358-01 S - Seminar. Political Conflict in the Middle East (1.0)

Topic for 2014-15: The Arab-Israeli Conflict

This class will provide an in-depth understanding of the Arab-Israeli conflict and the evolution of the conflict over time. Our goal is to develop an appreciation of the complexities and the dynamism of this conflict through an examination of its origins, the actors involved, and the key historical and political factors that have shaped it.

Instructor: Ben-Josef Hirsch
Prerequisite: Any 200-level unit in comparative politics (POL 3) or international relations (POL 3) or permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Spring

POL 383 - Politics of Migration (1.0)

A comparative study of the politics of mass population movements across state borders, including forced relocation under colonialism, refugees of war, food migration, labor migration, and different forms of legal and illegal immigration, including the international trafficking of persons. Analyzes migration and immigration policies in sending and receiving countries, U.N. conventions on the movement of persons, and social movements against and on behalf of migrant peoples. Country cases to be examined include Algeria and France, Brazil and Japan, Canada and Hong. Kong, China and North Korea, Germany and Turkey, the Philippines, and the United States, and others. This course may qualify as either a comparative politics or an international relations unit for the political science major, depending upon the student's choice of research paper topic.

Instructor: Moon
Prerequisite: One 200-level course in comparative politics or international relations or permission of the instructor. Not open to students who have taken POL 208 or 305.
Distribution: SBA
Term(s): Not Offered

POL 3  Political Science Courses - International Relations

POL 312 - After 9/11 (1.0)

The terrorist attacks of September 11, 2001 were a transformative moment in world politics. The general optimism and sense of security that prevailed following the end of the Cold War gave way to fear and anxiety about America’s place in the world. This course explores how September 11th changed the United States, and the legacy the attacks and their aftermath have had on current American foreign policy. What is A Qeda and why did it target the United States? How did the United States fight the “Global War on Terror”? Why did the United States invade Afghanistan and Iraq? How do the policies of President Obama differ from those of President Bush? This course is for first year students and assumes no background in political science. Together we will develop a shared base of knowledge to debate the critical questions that continue to shape world politics.

Instructor: MacDonald
Prerequisite: None. Open only to first-year students.
Distribution: SBA
Term(s): Fall

POL 321 - World Politics (1.0)

An introduction to the international system with emphasis on contemporary theory and practice. Analysis of the bases of power and influence, the sources of tension and conflict, and the modes of accommodation and conflict resolution. This course serves as an introduction to the international relations subfield in the political science department and also as a means of fulfilling the political science core requirement of the international relations major.

Instructor: Ben-Josef Hirsch, Goddard, MacDonald
Prerequisite: None
Distribution: SBA
POL3 222 - The United States in World Politics (1.0)
An examination of American foreign policy, understood as the current and recent behavior of the U.S. government abroad. The prominence of American military power in the post-Cold War era makes understanding U.S. policy essential to the larger study of international relations. Emphasis will be placed on different theoretical approaches to explaining the United States’ behavior, including approaches based on structures of the international system versus explanations that are particular to American geography, history, culture, or institutions.
Instructor: Macdonald
Prerequisite: POL3 221
Term(s): Spring
Distribution: SBA
Term(s): Not Offered

POL3 229 - International Political Economy (1.0)
Fundamental relationships between power and wealth in world politics. An examination of trade, aid, investment, and finance as central problems of international relations. The role of state policies and international institutions in the internationalization of industrial economies since the Industrial Revolution. Economic nationalism. The impact of hegemonic powers, the Bretton Woods system, the World Trade Organization. Globalization, inequality, and the transformations of the Information Age. Realist, liberal, Marxist, postcolonial, feminist, and green perspectives on the global political economy.
Instructor: Murphy
Prerequisite: One unit in political science or permission of the instructor.
Distribution: SBA
Term(s): Spring

POL3 233 - International Economic Policy (1.0)
A review of the politics of international economic relations, including trade, money, and multinational investment within the industrial world and also among rich and poor countries. Political explanations for the differing economic performance of states in Asia, Africa, and Latin America. Consideration of the respective roles of intergovernmental organizations, nongovernmental organizations, and multinational corporations. Discussion of global governance issues including food, population, migration, energy, and environment.
Instructor: Moon
Prerequisite: POL3 221 and permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: SBA
Term(s): Not Offered

POL3 237 - International Relations of the Middle East (1.0)
This course provides historical and analytical overview of the international relations of the Middle East from late 19th century to the present. Our goal is to understand the unique position and significance of the region in world politics. The course utilizes international relations' theories and concepts to explain broad regional processes such as the emergence of the states-system during the inter-war period, superpowers' rivalry during the Cold War, and the more recent 'Arab Spring.' Thematical, the course will focus on the conflict in the Gulf and the Arab-Israeli-Palestinian conflict, nuclear proliferation in the region, the political economy of the Middle East and the importance of oil, the civil wars in Lebanon and Syria, political Islam and global Jihadism, and region's record on human rights.
Instructor: Hirsch
Prerequisite: POL3 221 or permission of the instructor.
Distribution: SBA
Term(s): Spring

POL3 239 - Africa in the World (1.0)
Sub-Saharan Africa's role in the world has changed dramatically since 2000. Global commodity shortages, China’s new investments, the continent's rapid recovery from the Great Recession, the United States' new concerns about global terrorism, the U.N. system's commitment to peace building after the wars of the 1990s and its concern with the continent's lagging achievement of the Millennium Development Goals, and the controversy over the stalled Doha Round of trade talks have fundamentally changed Africa's position in the world. This course explores the explanations offered for these changes by political economists and security analysts, investigates the opportunities that have opened for African policy makers (both public and private), and considers how they might respond.
Instructor: Murphy
Prerequisite: POL2 202, POL2 204, or POL3 221.
Distribution: SBA
Term(s): Fall

POL3 222 - The Vietnam War (1.0)
An examination of the origins, development, and consequences of the Vietnam War. Topics to be considered include: the impact of French colonialism on traditional Vietnamese society; the role of World War II in shaping nationalism and communism in Vietnam; the motives, stages, and strategies of American intervention in Vietnam; leadership, organization, and tactics of the Vietnam’s revolutionary movement; the expansion of the conflict to Cambodia and Laos; the antia war movement in the United States; lessons and legacies of the Vietnam War; and political and economic development in Vietnam since the end of the war in 1975.
Instructor: Joseph
POL4  Political Science Courses -  Political Theory

POL4 201 - Introduction to Political Theory (1.0)
An introduction to the study of political theory, and specifically to the problems of political action. Exploration of questions about civil disobedience, legitimate authority, ethics and politics, and the challenge of creating a just order in a world characterized by multiple beliefs and identities. Discussion of the social contract, liberalism, democracy, decolonization, violence, revolution, globalization, universalism, and cultural relativism, and differences of race, class, and gender. Authors include Plato, Machiavelli, Locke, Rousseau, Mohandas Gandhi, Fanon, Malcolm X, and Martin Luther King, Jr.

Instructor: Euben
Prerequisite: None
Distribution: REP
Term(s): Fall; Spring

POL4 240 - Classical Political Theory (1.0)
An investigation of some of the most important thinkers and texts of ancient Western (or what is also called classical) political theory, guided by particular questions and themes. What makes a text "classical"? Do these texts merely provide knowledge of the past, or do they offer wisdom that bears upon the dilemmas of contemporary politics? Is such wisdom distinctively "Western" or does it reveal paradoxes and challenges of political life that characterize other cultures as well? Themes of the course include the relationship (if any) between morality and politics; fate and free will; the content and purpose of politics; human nature; the virtues and dangers of democracy; political wisdom and good leadership. Authors include Homer, Sophocles, Thucydides, Plato, and Aristotle.

Instructor: Euben
Prerequisite: None
Distribution: REP
Term(s): Not Offered

POL4 241 - Modern European Political Thought (1.0)
Study of the development of European political theory from the seventeenth to nineteenth centuries. Among the theorists read are Hobbes, Locke, Rousseau, Burke, and Marx. Emphasis on the logic of each theorist's arguments and on their different understandings of the following concepts and relationships: human nature; individual and society; morality, political economy, and the state; reason, authority, and sovereignty; equality, justice, and freedom. Attention is paid to the historical context within which each theorist writes, and especially to how their works respond to and treat questions of class, race, and colonialism. Attention is also paid to how these works influence and challenge contemporary assumptions, visions, and movements.

Instructor: Grattan
Prerequisite: None
Distribution: REP
Term(s): Not Offered

POL4 242 - Contemporary Political Theory (1.0)
Study of several twentieth-century traditions that raise fundamental questions about the human condition, processes of historical and personal transformation, and our capacity to understand them. Exploration of contemporary political and social theories, including existentialism, contemporary variants of Marxism, postmodern
theory, alternative theories of power, and the ethics of war.

Instructor: Krieger
Prerequisite: None
Term(s): Not Offered

POLS 248 - Power and Politics (1.0)
An examination of the nature and functioning of power in politics, with an emphasis on the following questions: What is the nature of power and how has it been exercised in political life, both past and present? Who has power and who should have it? Is power primarily wielded by political leaders and bureaucrats, or has the development of new technologies decentralized power? Do the powerless understand and exercise power differently from those who traditionally hold it? Are power and violence inextricably intertwined or are they opposites? Authors include Thucydides, bell hooks, Hannah Arendt, Robert Dahl, Karl Marx, Michel Foucault, Adam Michnik, and Vaclav Havel.

Instructor: Euben
Prerequisite: One unit in political science, philosophy, or history, or permission of the instructor.
Distribution: REP
Term(s): Fall

POLS 249 - Politics of the Right, Left, and Center (1.0)
An introduction to historical and contemporary texts that have shaped political visions, movements, and orders across the ideological spectrum. Explores questions such as: What sources of authority should guide political decision-making and action: tradition or reason; the past or the future; individuals or society; citizens or government; local, national, or transnational allegiances? What social, economic, and political arrangements best facilitate the tensions between values such as order, equality, and freedom? What makes an idea or action conservative, radical, or moderate? Authors may include John Stuart Mill, Milton Friedman, Herbert Marcuse, Michael Oakeshott, Wendell Berry, Richard Neuhaus, and William Connolly.

Instructor: Grattan
Prerequisite: One unit in political science, philosophy, or history, or permission of the instructor.
Distribution: REP
Term(s): Fall

POLS 340 - American Political Thought (1.0)
Examination of the development of political thought in the United States, including its colonial and revolutionary origins, the constitution of a new government and a new citizenry, and subsequent social and political forces that have shaped American democracy and its future. Throughout the course, we consider how arguments about race, ethnicity, and class reflect not only marginalized experiences and discourses but also broader challenges and aspirations for American democracy. Readings include both primary and secondary sources.

Instructor: Grattan
Prerequisite: One course in political theory, philosophy, or American Studies, or permission of the instructor.
Distribution: REP
Term(s): Not Offered

POLS 343 - Seminar. Democracy and Difference (1.0)
An examination of liberal democracy and contemporary theoretical challenges introduced by diversity and difference. Does liberal democracy, with its emphasis on individual rights, separation of powers, representative assemblies, and the principle of a limited state, remain a durable model? How does the consideration of cultural diversity and difference, understood by reference to gender, race, ethnicity, language, religion, nationality, and sexual orientation, affect our understanding of citizenship, equality, representation, recognition, and community? Study of communitarian thought, multiculturalism, and feminist critiques of democracy.

Instructor: Krieger
Prerequisite: One 200-level unit in political theory, or permission of the instructor. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: REP
Term(s): Fall

POLS 344 - Feminist Political Theory (1.0)
An examination of feminist theory, beginning with early liberal and socialist feminisms and continuing on to radical, post-structuralist and postcolonial feminist theories. Particular attention to the complexity of theorizing about "what women are and need" in the context of a multicultural society and a postcolonial world. Consideration of feminist perspectives on law and rights, body image/eating disorders, pornography, racial and sexual differences, non-Western cultural practices such as veiling, and methodology. Authors include J.S. Mill, Alexandra Kollontai, Adi Lorde, Nancy Hartsock, Chandra Mohanty, bell hooks, Nayereh Tohidi, Catharine MacKinnon, Susan Okin, Wendy Brown, Joan Scott, and Judith Butler.

Instructor: Euben
Prerequisite: One 200-level unit in political theory, philosophy, or women's and gender studies and by permission of instructor.
Distribution: REP
Term(s): Spring

POLS 345 - Seminar. Race and Political Theory (1.0)
Examines race as a category of theory and practice from modernity through postcolonial and poststructuralist theory, emphasizing efforts by marginalized writers to reconstruct culture, politics, and economics. Do such efforts reflect understood conceptual resources for politics, or is thinking race counterproductive? May key concepts include violence, domination, and liberation; the politics of recognition, revolution, and redemption; race consciousness, identity politics, and coalition politics. Cases may include transatlantic slavery, the Haitian Revolution, Black Power, Latinidad, and prison abolition. Authors may include Frantz Fanon, James Baldwin, Toni Morrison, Kwame Ture, bell hooks, Angela Davis, Orlando Patterson, William Julius Wilson, Linda Alcoff, Eduardo Bonilla-Silva, and Cristina Beltrán.

Instructor: Grattan
Prerequisite: One 200-level unit in political theory or Africana studies. Enrollment is limited; interested students must fill out a seminar application available on the political science department website homepage.
Distribution: REP
Term(s): Spring

POLS 346 - Encountering Islamist Political Thought (1.0)
Political Theory is usually understood as Western, but questions about the nature and value of politics are central to intellectual traditions in a wide range of non-Western cultures. This course is an investigation of the most visible but least understood Muslim intellectual tradition today: Islamist (often called fundamentalist) political thought from the early twentieth century to the present. It is organized around themes such as Islam and democracy; violence and political action; women, gender, and Islamization; and the politics of language (e.g., the terminology of fundamentalism, Islamism, Western/non-Western, Islam versus the West). Authors include Hasan al-Banna, Sayyid Abul’-A’la Mawdudi, Sayyid Qutb, Ayatollah Ruhollah Khomeini, Yusuf al-Qaradawi, Zaynab al-Ghazali, Nadia Yassine, and Osama bin Laden.

Prerequisite: One 200-level unit in political theory, philosophy, or a course on Islam in history or religion.
Distribution: REP
Term(s): Not Offered

Psychology Major

Goals for the Psychology Major

• Students will receive an overview of the major areas of psychology, including major historical controversies, developments, theoretical perspectives, and empirical findings in various areas of psychology.

• Students will understand the kinds of questions psychologists ask about human nature, emotion, motivation, cognition, and behavior, the tools they use to answer those questions, and the perspectives and assumptions that distinguish psychology as a discipline from related fields such as anthropology, sociology, and biology.

• Students will understand the role that research plays in the development of psychological theory and the knowledge base of the field and will become critical consumers of psychological literature and research. They will be equipped to work with data and understand numerical presentation and interpretations of data.

• Students will have an opportunity for hands-on experience in translating psychological questions into hypotheses that can be explored empirically, in designing studies to explore those hypotheses, in analyzing data, and in preparing research reports according to the conventions of the field.

Requirements for the Psychology Major

Psychology is a broad field, and the major is designed to allow students to gain both breadth and depth of knowledge in the field. To that end, students take 200-level courses that represent different areas of the field, but develop depth by taking a 200-level content course that then leads, along with statistics, to a corresponding research methods course in which they learn firsthand about how knowledge is developed within specific subareas of the field. For example, a student may take social psychology (PSYC 210), followed by the research methods in social psychology course (PSYC 310R), but she will also have taken at least two other 200-level courses, including one from the 214–219 (PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218, PSYC 219) set of courses that historically have focused on somewhat different research questions than social psychology.

The psychology major consists of at least 9.25 units, including PSYC 101, PSYC 205 (Statistics), and a research-methods course plus at least three additional courses at the 200 level and two additional courses at the 300 level. Of the 200-level courses, at least one must be a course numbered 207–213 (courses on developmental, social, personality, and abnormal psychology—PSYC 207, PSYC 208, PSYC 210, PSYC 212, PSYC 213) and at least one must be numbered 214–219 (courses on cognition, memory, language, sensation and perception, and biological psychology—PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218, PSYC 219). Independent study courses (PSYC 250 and PSYC 250H) count toward the major, but not toward the required three 200-level courses. Only one independent study course (PSYC 250, PSYC 350H) or thesis course (PSYC 360, PSYC 370) can count as one of the two 300-level courses required in addition to the research-methods course. PSYC 299 does not count as one of the nine courses for the major. At least five of the courses for the major, including one 300-level course, must be taken in the department.

Statistics: PSYC 205 is the only Wellesley statistics course that will count toward the fulfillment of the major. In order to obtain Wellesley credit for a statistics course taken at another institution during the summer or academic year, approval must be obtained from the department prior to enrolling in the course. Transfer students wishing to obtain credit for statistics courses taken prior to enrollment at Wellesley should consult the chair of the department.

Research Methods Requirement: The department currently offers eight research methods courses: PSYC 304R, PSYC 306R, PSYC 307R, PSYC 310R, PSYC 312R, PSYC 313R, PSYC 314R, and PSYC 323R. Research methods courses taken outside of Wellesley will not fulfill this requirement. In order to be eligible for Senior Thesis (PSYC 360), students must complete the research methods course by the end of the junior year.

Honors in Psychology

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student should have a grade point average of at least 3.67 in all work in the major field above the 100 level; students with a slightly lower average who have a strong interest and commitment to research are welcome to submit applications. See Academic Distinctions.

Advanced Placement Policy in Psychology

The unit given to students for advanced placement in psychology depends on the minimum psychology major or minor at Wellesley, but it does fulfill the PSYC 101 requirement. If a student with an AP score of 5 completes PSYC 101, she will receive the appropriate psychology credit, but will receive no AP credit.

Advanced placement credit for statistics does not exempt students from or fulfill the PSYC 205 requirement. A student with an AP score of 5 in statistics must still take PSYC 205, but can receive AP credit.

Interdepartmental Majors in Psychology

Students interested in an interdepartmental major in neuroscience or cognitive and linguistic sciences are referred to the section of the catalog where these programs are described. They should consult with the directors of the neuroscience or cognitive and linguistic sciences programs.

Psychology Minor

Requirements for the Psychology Minor

The psychology minor consists of five units, including one course at the 300 level and including PSYC 101, PSYC 250, PSYC 299, and PSYC 350 do not count as one of the five courses for the minor. At least three of the courses for the minor must be taken in the department.

PSYC - Psychology Courses

PSYC 101 - Introduction to Psychology (1.0)

An introduction to some of the major subfields of psychology, such as developmental, personality, abnormal, clinical, physiological, cognitive, cultural, and social psychology. Students will explore various theoretical perspectives and research methods used by psychologists to study the origins and variations in human behavior.

Instructor: Staff
Prerequisite: None
Distribution: SBA
Term(s): Fall; Spring; Summer II

PSYC 205 - Statistics (1.0)

The application of statistical techniques to the analysis of psychological experimental and survey data. Major emphasis on the understanding of statistics found in published research and as preparation for the student's own research in more advanced courses.

Instructor: Carli, Cheek, Hennessey
Prerequisite: PSYC 101, NEUR 100, AP score of 5, or permission of the instructor. Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking ECON 103/50C; 190; MATH 101; MATH 102; POL 199, or QR 180 except for psychology and neuroscience majors, with permission of the instructor.
Distribution: SBA; QRF
Term(s): Fall; Spring; Summer I
Three periods of combined lecture-laboratory. Does not fulfill the laboratory requirement.

During Summer Session this is a six-week course.

PSYC 207 - Developmental Psychology (1.0)

Behavior and psychological development in infancy and childhood. An examination of theory and research pertaining to personality, social, and cognitive development. Lecture, discussion, demonstration, and observation of children. Observations at the Child Study Center required.

Instructor: Gleason, Pyers
Prerequisite: PSYC 101, AP score of 5, or permission of the instructor.
Distribution: SBA
Term(s): Fall; Spring

PSYC 208 - Adolescence (1.0)

Survey of contemporary theories and research in the psychology of adolescents. Topics will include the physical, cognitive, social, and personality development of adolescents.

Instructor: Staff
Prerequisite: PSYC 101, AP score of 5, or permission of the instructor.
Distribution: SBA
Term(s): Spring

PSYC 210 - Social Psychology (1.0)

The individual's behavior as it is influenced by other people and the social situation. Study of social influence, interpersonal perception, social evaluation, and various forms of social interaction.
PSYC 212 - Personality (1.0)
A comparison of major ways of conceiving and studying personality, including the work of Freud, Jung, behaviorists, humanists, and social learning theorists. Introduction to major debates and research findings in contemporary personality psychology.
Instructor: Norem
Prerequisite: PSYC 101, AP score of 5, or permission of the instructor.
Distribution: SBA
Term(s): Fall; Spring

PSYC 213 - Abnormal Psychology (1.0)
An examination of major psychological disorders with special emphasis on phenomenology. Behavioral treatment of anxiety-based disorders, cognitive treatment of depression, psychoanalytic therapy of personality disorders, and biochemical treatment of schizophrenia will receive special attention. Other models of psychopathology will also be discussed.
Instructor: Keane
Prerequisite: PSYC 101, AP score of 5, or permission of the instructor.
Distribution: SBA
Term(s): Fall; Spring

PSYC 214 - Evolution and Human Behavior (1.0)
Evolutionary Psychology is the scientific study of human nature as shaped by natural selection. It is grounded in evolutionary biology and the psychological sciences with connections to disciplines ranging from neuroscience to anthropology and economics. Topics covered will include adaptive solutions to major life challenges including survival, mating, family relations, and group living (e.g., cooperation, aggression, and status).
Instructor: Lucas
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Cross-Listed as: CLSC 214
Distribution: SBA; EC
Term(s): Fall

PSYC 215 - Memory (1.0)
Introduction to the study of human memory. Examines processes underlying encoding, storage, and retrieval of information. Will review theoretical models focusing on distinctions between different forms of memory, including short-term and long-term memory, implicit and explicit memory, episodic and semantic memory. Factors contributing to forgetting and distortion of memory will also be discussed.
Instructor: Deveney
Prerequisite: PSYC 101, AP credit, or permission of the instructor.
Not open to students who have taken NEUR 205.
Distribution: SBA; EC
Term(s): Fall; Spring

PSYC 216 - Psychology of Language (1.0)
Introduction to the study of the psychological processes underlying language ability. Topics covered will include the biological and evolutionary foundations of language, child and adult language acquisition, reading, and sound, word, and sentence processing. We will also consider whether language is unique to humans, whether it is innate, and the degree to which language influences thought.
Instructor: Staff
Prerequisite: PSYC 101, AP score of 5, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

PSYC 217 - Cognition (1.0)
Cognitive psychology is the study of the capabilities and limitations of the human mind when viewed as a system for processing information. An examination of basic issues and research in cognition focusing on attention, pattern recognition, memory, language, and decision-making.
Instructor: Keane
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Distribution: SBA; EC
Term(s): Spring

PSYC 218 - Sensation and Perception (1.0)
In a split-second, a curling of lips across a crowded room is registered by one’s eyes and translated effortlessly into a vividly three-dimensional, full-color perception of a baby’s smile. This and other sensory and perceptual feats, unmatched by any computer, are this course’s focus. Topics include consciousness, attention and inattention, perceptual learning and development, visual memory, faces, 3D depth, color, motion, and brain bases of sensation/perception. Emphasis is given to abnormal and illusory perception, such as that resulting from brain damage/stimulation or artistic sleight of hand. This course shows that our perception, far from being a “copy” of the outside world, incorporates many predictions and educated guesses. Frequent in-class demonstrations will provide insights into course concepts.
Instructor: Wilmer
Prerequisite: PSYC 101 or NEUR 100, AP score of 5, or permission of the instructor.
Distribution: SBA; EC
Term(s): Spring

PSYC 219 - Biological Psychology (1.0)
Introduction to the biological bases of behavior. Topics include structure and function of the nervous system, sensory processing, sleep, reproductive behavior, language, and mental disorders.
Instructor: Deveney
Prerequisite: PSYC 101, AP credit, or permission of the instructor.
Not open to students who have taken NEUR 100.
Distribution: SBA; EC
Term(s): Fall; Spring

PSYC 221 - Narrative Psychology (1.0)
An examination of the scientific study of humans’ approach to meaning-making through the telling of personal stories. This course will include consideration of the ways in which we create meaning out of our experiences with a special emphasis on identity development, drawing on scientific research from personality, developmental, and clinical psychology.
Instructor: Staff
Prerequisite: PSYC 101, AP score of 5, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

PSYC 222 - Asian American Psychology (1.0)
How can cultural values influence the way we process information, recall memories, or express emotion? What contributes to variations in parenting styles across cultures? How do experiences such as biculturalism, immigration, and racism affect mental health? This course will examine these questions with a specific focus on the cultural experiences of Asian Americans. Our aim is to understand how these experiences interact with basic psychological processes across the lifespan, with attention to both normative and pathological development.
Instructor: Chen
Prerequisite: PSYC 101, AMST 151, AP Psychology score of 5, or permission of the instructor.
Cross-Listed as: AMST 222
Distribution: SBA
Term(s): Fall

PSYC 245 - Cultural Psychology (1.0)
Examines the effect of cultural differences on identity and psychological functioning by comparing normative behavioral and psychological tendencies associated with membership in diverse cultural groups: East Asian, South Asian, Middle Eastern, African American, Latino, American Indian, and working-and-middle-class contexts within the United States. Topics include: self, agency, motivation, cognition, emotion, development, hierarchy, relationships, and physical and mental health.
Prerequisite: PSYC 101, AP credit, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

PSYC 248 - Psychology of Teaching, Learning, and Motivation (1.0)
The psychology of preschool, primary, secondary, and college education. Investigation of the many contributions of psychology to both educational theory and practice. Topics include student development in the cognitive, social, and emotional realms; assessment of student variability and performance; interpretation and evaluation of standardized tests and measurements; classroom management; teaching style; tracking and ability grouping; motivation, and teacher effectiveness.
Instructor: Hennessy
Prerequisite: PSYC 101, AP credit, or permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PSYC 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PSYC 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PSYC 299 - Practicum in Psychology (1.0)
Participation in a structured learning experience in an approved field setting under faculty supervision. Does not count toward the minimum major in psychology.
Instructor: Staff
Prerequisite: Permission of the instructor. Two units above the 100 level that are most appropriate to the field setting as determined by the faculty supervisor (excluding PSYC 205).
Distribution: None
Term(s): Fall; Spring

Mandatory credit/noncredit, except by permission of the instructor.
**PSYC 300-01 S - Seminar, Topics in Cognitive and Linguistic Sciences (1.0)**

**Topic for 2014-15: How We Choose**

Every day we make many choices. Some of these choices are trivial, but some can have profound effects on our lives. In this interdisciplinary course, we will investigate how individuals make choices, examining processes of decision-making that are often emotional and irrational. Topics include biases that lead to poor choices, loss aversion, sunk costs, risk taking, impulsiveness, moral choice, and group decision-making.

Instructor: Lucas (Cognitive and Linguistic Sciences)
Prerequisite: Open to juniors and seniors who have taken one of PSYC 214, PSYC 215, CLSC/PSYC 216, PSYC 217, PSYC 218, PSYC 219, LING 114, PHIL 215, or CS 111, or permission of the instructor.
Cross-Listed as: CLSC 300-01 S
Distribution: SBA; EC
Term(s): Spring

**PSYC 301 - Seminar, Cooperation and Competition (1.0)**

According to traditional models of rationality, rational agents should act in ways that will maximize their self-interest. And the study of evolution teaches us that individuals are in competition for survival. Nonetheless, we have all experienced acts of apparent selflessness, and societies could not function without cooperation among their members. How, then, can cooperative and selfless behaviors be explained? In this course evidence and theories from the psychological, economic, and neurobiological literatures will be examined. Cross-cultural, developmental, and cross-species differences will be explored as will the evolutionary origins of cooperation and competition and the role of cooperation in language.

Instructor: Lucas
Prerequisite: Open to juniors and seniors who have taken one of 214-219 (PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218, PSYC 219), LING 114, PHIL 215, or permission of the instructor.
Distribution: SBA; EC
Term(s): Fall

**PSYC 304R - Research Methods in Evolution and Human Behavior (1.25)**

An introduction to research methods appropriate to an evolutionary approach to the study of human nature. Student projects investigate topics across diverse areas of psychology, focusing on the psychological processes that our ancestors evolved to cope with survival and reproductive challenges. Possible topics include cooperative behavior, mate choice, adaptive aspects of language, and gender differences in cognition. Group projects with some individual exercises. Laboratory.

Prerequisite: PSYC 205 and one of the following: PSYC 212, PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218 or PSYC 219.
Distribution: SBA
Term(s): Not Offered

**PSYC 306R - Research Methods in Developmental Psychology and the School Experience (1.25)**

An introduction to research methods appropriate to the study of human development in teaching and learning settings from preschool through college. Individual and group projects. Laboratory. Observations at the Child Study Center and other classroom locations required.

Instructor: Hennessy
Prerequisite: PSYC 205 and PSYC 207 or PSYC 248.
Distribution: SBA
Term(s): Not Offered

**Does not fulfill the laboratory requirement.**

**PSYC 307R - Research Methods in Developmental Psychology (1.25)**

An introduction to research methods appropriate to the study of human development. Individual and group projects. Laboratory. Observations at the Child Study Center required.

Instructor: Pyers, Gleason
Prerequisite: PSYC 205 and PSYC 207.
Distribution: SBA
Term(s): Fall; Spring

**Does not fulfill the laboratory requirement.**

One section of this course (Gleason) will be an Ann E. Maurer ‘51 Speaking Intensive Course.

**PSYC 308 - Systems of Psychotherapy (1.0)**

This course examines theory, research, and practice in three schools of psychotherapy: psychodynamic, cognitive-behavioral, and humanistic. Topics to be covered include underlying assumptions of normalcy/pathology, theories of change, methods/techniques, and relationship between therapist and client.

Instructor: Wink
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

**PSYC 310R - Research Methods in Social Psychology (1.25)**

An introduction to research methods appropriate to the study of social psychology. Individual and group projects on selected topics. Laboratory.

Instructor: Akert
Prerequisite: PSYC 205 and PSYC 210.
Distribution: SBA
Term(s): Spring

**Does not fulfill the laboratory requirement.**

**PSYC 312R - Research Methods in Personality Psychology (1.25)**

An introduction to research methods appropriate to the study of personality psychology. Student projects investigate individual and group differences in personality traits, values, goals, and dimensions of self-concept. Laboratory.

Instructor: Norem
Prerequisite: PSYC 205 and PSYC 212.
Distribution: SBA
Term(s): Fall

**Does not fulfill the laboratory requirement.**

**PSYC 313R - Research Methods in Abnormal Psychology (1.25)**

An introduction to research methods appropriate to the study of abnormal psychology. Topics will include affective and personality disorders, substance abuse, and stressful life events. Individual and group projects. Laboratory.

Instructor: Theran
Prerequisite: PSYC 205 or PSYC 213. Not open to students who have taken PSYC 324R [2009-10].
Distribution: SBA
Term(s): Fall

**Does not fulfill the laboratory requirement.**

**PSYC 314R - Research Methods in Cognitive Psychology (1.25)**

Introduction to research methods appropriate to the study of human cognition (i.e., how people take in, interpret, organize, remember, and use information in their daily lives). Individual and group projects. Laboratory.

Instructor: Koane
Prerequisite: PSYC 205 and one of the following: PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218, PSYC 219.
Distribution: SBA
Term(s): Spring

**Does not fulfill the laboratory requirement.**

**PSYC 316 - Seminar, Language Acquisition (1.0)**

Children around the world acquire their first language, spoken or signed, with seemingly little effort. By the end of their first year, they are saying their first words, and a mere two years later they are speaking in full sentences! We will discuss the various factors that play into children’s rapid acquisition of their first language. Toward figuring out how children learn language, we will talk about early speech perception, word learning, the acquisition of phonology, morphology, syntax, and pragmatic knowledge. In addition, we will cover topics such as language development disorders (e.g., autism), the critical period hypothesis, sign language, bilingualism, and language and thought. Over the course of the semester, we will understand the empirical methods that guide the study of child language.

Instructor: Pyers
Prerequisite: Open to juniors and seniors who have taken two 200-level units, including either PSYC 205 or excluding PSYC 205, or permission of the instructor.
LING 114 may be substituted for either 200-level unit.
Distribution: SBA; EC
Term(s): Not Offered

**PSYC 318 - Seminar, Psychopharmacology (1.0)**

Topics include principles and mechanisms underlying action of drugs, major neurotransmitter systems, major classes of psychoactive drugs, and psychological disorders and medications.

Instructor: Deveney
Prerequisite: Open to juniors and seniors who have taken two 200-level units, including either PSYC 219 or NEUR 200, and excluding PSYC 205 or NEUR 332.
Distribution: SBA; EC
Term(s): Not Offered

**PSYC 319 - Seminar, Neuropsychology (1.0)**

An exploration of the neural underpinnings of higher cognitive function based on evidence from individuals with brain damage. Major neuroanatomical systems will be reviewed. Topics include motor and sensory function, attention, memory, language, and hemispheric specialization.

Instructor: Koane
Prerequisite: Open to juniors and seniors who have taken two 200-level units, including either PSYC 219 or NEUR 200, and excluding PSYC 205.
PSYC 321 - Community Psychology with Wintersession Applied Research (1.25)
Examines the sociocultural and developmental aspects of gender-specific instruction for girls and boys. The impact of single-gender public school education on social identity, gender stereotypes, motivation, and academic achievement will be explored. An experimental component will be conducted during Wintersession in partnership with the Office of Public School Choice at the South Carolina Department of Education. Students will collect and analyze classroom-based observational and interview data. During the spring, students will review pertinent research literature and statewide survey data, and reflect on the psychological and public policy implications of differential education.
Instructor: Genero
Prerequisite: Open to juniors and seniors who have taken PSYC 205 and two 200-level courses. Application required.
Distribution: SBA
Term(s): Not Offered
Not offered every year. Subject to Provost’s Office approval.

PSYC 323R - Research Methods in the Psychology of Human Sexuality (1.25)
An introduction to research methods appropriate to the study of individual and group differences in sexual attitudes and behavior. Student projects use archival and new survey data to investigate topics such as sexual motivation and attraction, sexual self-esteem and identity, intimacy in romantic relationships, and gender and cultural differences in sexuality. Laboratory.
Instructor: Cheek
Prerequisite: PSYC 205 and PSYC 208, 212-214 or PSYC 219.
Distribution: SBA
Term(s): Spring
Does not fulfill the laboratory requirement.

PSYC 326 - Seminar. Child and Adolescent Psychopathology (1.0)
Description, etiology, and developmental patterns of behavior problems of children, adolescents, and their families. Topics include theories of child and adolescent psychopathology, externalizing problems such as conduct disorder and attention-deficit/hyperactivity disorder, internalizing problems such as depression, anxiety, and children’s experiences of trauma; and developmental disorders such as mental retardation, risk and protective factors for child psychopathology, and child and family interventions.
Instructor: Tayan
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Spring

PSYC 327 - Seminar. Psychology of Human Sexuality (1.0)
An examination of psychological approaches to individual and group differences in sexual attitudes and behavior. This course draws upon theory and research from the fields of personality psychology and social psychology. Topics include: sexual motivation and attraction; sexual self-esteem and identity; intimacy in romantic relationships; and gender and cultural differences in sexuality.
Instructor: Cheek
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

PSYC 328 - Seminar. Genes, Brains, and Human Variation (1.0)
Why do some people have a keen memory for names or faces, a great sense of direction, or a remarkable ability to do two things at once? And why are some people only average (or even below average) in these areas? We will critically evaluate a broad range of perceptual and cognitive abilities (and disabilities) by drawing upon the fields of cognitive neuroscience, behavioral genetics, development, and human variation. We will address three kinds of question: What broad combination of nature and nurture, and what specific genes and experiences, contribute to differing abilities? What are the neural and cognitive bases of such abilities? And how can we or should we apply such knowledge to ourselves, our families, our communities, and our countries?
Instructor: Wilmér
Prerequisite: Two 200-level units, excluding PSYC 205, one of which should be PSYC 214, PSYC 215, PSYC 216, PSYC 217, PSYC 218, PSYC 219, or NEUR 200, or permission of the instructor.
Distribution: SBA; EC
Term(s): Fall

PSYC 329 - Seminar. Psychology of Adulthood and Aging (1.0)
An examination of how individuals develop and change over the life course. Particular emphasis on experiences associated with entry into adulthood, middle age, and older adulthood. Topics include: age-related changes in personality, emotion, and cognition; work and relationships (including marriage and parenting); life’s transitions (e.g., divorce, menopause, and retirement); influence of culture and history on crafting adult lives. Different models of the life course will be discussed.
Instructor: Staff
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

PSYC 330 - Psychology of Law (1.0)
This course will document biases in jury decisions, the role of personality and motivation from personality and social psychology. Within each perspective, we will consider ways in which individual differences at different levels of analysis (e.g., neural networks, hormonal processes, traits, emotional dispositions, family background, social and cultural contexts) are intertwined with motivation and goal pursuit. We will consider ways in which students might apply what psychologists have learned to the pursuit of their personal goals.
Instructor: Norm
Prerequisite: Open to juniors and seniors who have taken either PSYC 210 or PSYC 212 and one other 200-level unit, or permission of the instructor.
Distribution: SBA
Term(s): Spring

PSYC 333 - Clinical and Educational Assessment (1.0)
Current approaches to the psychological appraisal of individual differences in personality, intelligence, and special abilities will be investigated through the use of cases. Tests included in the survey are MMPI, CPI, WAIS, Rorschach, and the TAT. Special emphasis will be placed on test interpretation, report writing, and an understanding of basic psychometric concepts such as validity, reliability, and norms. Useful for students intending to pursue graduate study in clinical, personality, occupational, or school psychology.
Instructor: Wink
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Spring

PSYC 334 - Seminar. The Psychology of Creativity (1.0)
The study of the psychology of creativity is an exciting and ever-growing area of investigation. While the creative process often appears to be mysterious and outside of our conscious control, creative behavior is something that can be examined, quantified, and fostered. In this seminar, we will explore creativity at the individual, group, societal, and cultural levels. Our readings will combine many of the “classics” in the field with cutting-edge empirical studies of creativity in educational, business, and design settings. In addition to doing a substantial amount of reading and writing, each class member will choose a research topic to investigate as well as a semester-long personalized creativity project.
Instructor: Hennessey
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Fall

PSYC 337 - Seminar. Prejudice and Discrimination (1.0)
A discussion-based examination of social psychological theory and research on prejudice and discrimination with applications to current social issues. Topics include racism, sexism, heterosexism, ageism, and many other forms of intergroup bias, with an emphasis on the psychological mechanisms that underlie all prejudices. We will address two primary questions: Why do people have prejudices? What factors may reduce intergroup bias?
PSYC 338 - Social Influence (1.0)
This course focuses on a major topic in social psychology: attitude formation and change. Techniques of social influence that we encounter in everyday life will be explored, with a particular emphasis on advertising. The findings of empirical research and theory will be used to understand persuasive messages. Topics include how emotion, gender, and culture are used to maximize the effectiveness of advertisements, and how stereotypes are both perpetuated and refuted in advertising.
Instructor: Akert
Prerequisite: Open to juniors and seniors who have taken PSYC 210 and one other 200-level unit, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Spring

PSYC 339 - Seminar. Narrative Identity (1.0)
Narrative psychology explores the human propensity to create and use stories about significant figures and events in the process of identity formation. Topics will include an exploration of mermaids and related figures as cultural images, metaphors for personal transformation, and archetypal symbols of the collective unconscious. The Little Mermaid and La Sirene of Haitian Vodou will be examined as representations of men’s fear of, and attempts to control, women’s spirituality and sexuality. The personality theories of Jung and Reich provide the framework for the seminar.
Instructor: Cheek
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Fall; Summer II

PSYC 340 - Organizational Psychology (1.0)
An examination of key topics, such as social environment of the work place, motivation and morale, change and conflict, quality of worklife, work group dynamics, leadership, culture, and the impact of workplace demographics (gender, race, socioeconomic status). Experiential activities, cases, theory, and research.
Instructor: Carli
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Fall

PSYC 343 - Calderwood Seminar in Public Writing: Psychology in the Public Interest (1.0)
The primary goal of this course is to develop skills for communicating complex and technical information about human psychology and a psychological perspective to nonexperts. Students will learn to communicate psychological theories (as well as the empirical evidence and methods that support them) to the public through a set of varied writing assignments. These assignments will require students to take a step back from the details of their course work in psychology to think about how the major has shaped their understanding of human biological and social processes. Assignments may include interviews of research psychologists, observations of behavior, book reviews, evaluation of journal articles, and coverage of public talks related to psychological topics. Class sessions will be conducted as workshops devoted to analyzing and critiquing the presentation of psychological information in expository writing.
Instructor: Bahns
Prerequisite: Open to juniors and seniors who have taken two 200-level courses, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

PSYC 344 - Seminar. Social Imagination (1.0)
An examination of the uses and types of imagination in both childhood and adulthood. This course will touch on the mechanics of mental imagery and discuss the ways in which imagery is manifest in cognition and particularly in management of social relationships. Emphasis will be placed on the connections between imagination and emotion, such as in children’s enactment of scary or nurturant pretend play. How imagination affects interpersonal interactions will be considered, as will other topics such as children’s creation of imaginary companions, imagination as pathology, and individual differences in imagination, imagery of individuals deprived of particular senses, and the influence of imagination on memory.
Instructor: Gleason
Prerequisite: Open to juniors and seniors who have taken two 200-level courses, excluding PSYC 205.
Distribution: SBA; EC
Term(s): Not Offered

PSYC 345-01-F - Seminar. Selected Topics in Developmental Psychology (1.0)
Topic for 2014-15: Mindreading
Most adults have limited memories from their childhood and almost no memories from before the age of 3. Students will learn about the factors that influence this phenomenon of ‘childhood amnesia’ and the course of autobiographical memory development in children. The topic of language features heavily in this course, as language and autobiographical memory are inextricably linked. We will discuss how the language that parents use to reminisce with children influences autobiographical memory development. Additional topics include: language, autobiographical memory and gender, broader societal and cultural influences on memory, atypical language development and its effect on autobiographical memory, and bilingualism and autobiographical memory.
Instructor: Pyers
Prerequisite: Open to juniors and seniors who have taken PSYC 207 and one other 200-level course, excluding PSYC 205.
Distribution: SBA
Term(s): Fall

PSYC 346 - Seminar: Culture and Emotion (1.0)
This seminar examines ways in which cultural factors interact with basic emotional processes. We will integrate theoretical and empirical research from different areas of psychology (e.g., developmental, social, clinical), and will also include readings from other disciplines (e.g., anthropology and applied linguistics). Topics will include culture and emotion regulation, emotion and language, and socialization of emotion in the family.
Instructor: Chen
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205, or permission of the instructor.
Distribution: SBA
Term(s): Spring

PSYC 349 - Seminar. Nonverbal Communication (1.0)
An examination of the use of nonverbal communication in social interactions. Systematic observation of nonverbal behavior, especially facial expression, tone of voice, gestures, personal space, and body movement. Readings include scientific studies and descriptive accounts. Issues include: the communication of emotion; cultural and gender differences; the detection of deception; the impact of nonverbal cues on impression formation; nonverbal communication in specific settings (e.g., counseling, education, interpersonal relationships).
Instructor: Akert
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding PSYC 205.
Distribution: SBA
Term(s): Fall

PSYC 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

PSYC 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

PSYC 356 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

PSYC 360 - Senior Thesis Research (1.0)
Prerequisite: PSYC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

PSYC 370 - Senior Thesis (1.0)
Prerequisite: PSYC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

PSYC 380 - Independent Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

Students enroll in Independent Study (380) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Independent Study (380) in the second semester.

PSYC 394 - Directed Undergraduate Research (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

Students enroll in Directed Undergraduate Research (394) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Directed Undergraduate Research (394) in the second semester.

Not open to students who have taken PSYC 322.

PSYC 394H - Directed Undergraduate Research (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

Students enroll in Directed Undergraduate Research (394H) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Directed Undergraduate Research (394H) in the second semester.
Quantitative Reasoning Program

The ability to think clearly and critically about quantitative issues is imperative in contemporary society. Today, quantitative reasoning is required in virtually all academic fields, is used in most every profession, and is necessary for decision making in everyday life. The Quantitative Reasoning Program is designed to ensure that Wellesley College students have proficient in the use of mathematical, logical, and statistical problem-solving tools needed in today’s increasingly quantitative world.

The Quantitative Reasoning Program provides a number of services to the academic community. It oversees the administration of the Quantitative Reasoning Assessment (described below) and staffs QR 140, the basic-skills course, and some overlay courses. The program also provides tutorial support to students and instructors of quantitative reasoning overlay courses. Finally, the Quantitative Reasoning Program provides curricular support to faculty interested in modifying existing courses or designing new ones so that these courses will satisfy the overlay component of the Quantitative Reasoning requirement.

Quantitative Reasoning Requirement

All students must satisfy both components of the Quantitative Reasoning requirement: the basic-skills component and the overlay course component. The basic-skills component is satisfied either by passing the Quantitative Reasoning Assessment given during Orientation or by passing QR 140, the basic-skills course that builds mathematical skills in the context of real-world applications. Students are required to satisfy the basic skills component in their first year so that they may enroll in the many courses for which basic quantitative skills (including algebra, geometry, basic probability and statistics, graph theory, estimation, and mathematical modeling) are a prerequisite.

The overlay component is satisfied by passing a quantitative reasoning overlay course or by scoring a 5 on the AP Statistics exam. Quantitative reasoning overlay courses emphasize statistical analysis and interpretation of data in a specific discipline. The Committee on Curriculum and Academic Policy has designated specific courses in fields from across the curriculum as ones that satisfy the quantitative reasoning overlay requirement. These courses (listed below) may also be used to satisfy a distribution requirement. See the Statistics section of the catalog for more information about some of these quantitative reasoning overlay courses.

Quantitative Reasoning Program

Overlay Course Component of the Quantitative Reasoning Program

The following courses satisfy the overlay course component of the Quantitative Reasoning requirement. In order to register for a course on this list, a student must first satisfy the basic skills component of the Quantitative Reasoning requirement by passing either the Quantitative Reasoning Assessment or QR 140.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<tr>
<td>ECON 103/SOC 190</td>
<td>Introduction to Probability and Statistical Methods</td>
</tr>
</tbody>
</table>

The following rules apply to these statistics courses: MATH 101 and MATH 101Z are not open to students who have taken or are taking ECON 103/SOC 190, POL 199, QR 180, or PSYC 205. In addition, MATH 101 and MATH 101Z are not open to students who have completed MATH 205 except by permission of the instructor; such students should consider taking MATH 220 instead. MATH 101 and MATH 101Z are intended for students who do not anticipate taking further statistics courses in college. Students considering a major in economics, political science, sociology, or psychology are advised not to take MATH 101 and MATH 101Z; other courses are more appropriate for those majors.

ECON 103/SOC 190 (formerly QR 199) is a prerequisite for ECON 203 (Econometrics), which is required of economics majors, and for SOC 290 (Methods of Social Research), which is required of sociology majors.

ECON 103/SOC 190, MATH 101, MATH 101Z, MATH 220, PSYC 205, or QR 180 may only be taken if they are majoring or minoring in economics or sociology, and should consult the appropriate department chair.

Quantitative Reasoning Program

The overlay component is satisfied by passing a quantitative reasoning overlay course or by scoring a 5 on the AP Statistics exam.

Note that this list is subject to change. Check individual department listings for information about when each course is offered.

Statistics Courses for QR Overlay

Wellesley College offers statistics courses in a variety of disciplines. Some introductory statistics courses are intended as terminal courses (e.g., MATH 101) while others are prerequisites for more advanced research methods courses in the major (e.g., PSYC 205). The courses listed below all focus on descriptive and inferential statistics but differ in their specific applications and use of statistical software. Students who wish to take one of the following statistics courses to satisfy the QR Overlay requirement are advised to select the most appropriate course given their intended major(s) and minor. Students who scored a 5 on the AP Statistics exam have satisfied the QR Overlay requirement, but may be required to forgo that AP credit if a specific statistics course is required for their major. Please refer to the Quantitative Reasoning Program section for a complete list of QR Overlay courses and see the full course descriptions under each department or program for details on the applications emphasized in each course.

The following rules apply to these statistics courses: MATH 101 and MATH 101Z are not open to students who have taken or are taking ECON 103/SOC 190, POL 199, QR 180, or PSYC 205. In addition, MATH 101 and MATH 101Z are not open to students who have completed MATH 205 except by permission of the instructor; such students should consider taking MATH 220 instead. MATH 101 and MATH 101Z are intended for students who do not anticipate taking further statistics courses in college. Students considering a major in economics, political science, sociology, or psychology are advised not to take MATH 101 and MATH 101Z; other courses are more appropriate for those majors.

ECON 103/SOC 190, MATH 101, MATH 101Z, MATH 220, PSYC 205, or QR 180 may only be taken if they are majoring or minoring in economics or sociology, and should consult the appropriate department chair.

PSYC 205 is required of all psychology and neuroscience majors. Students who have not declared a psychology or neuroscience major may not enroll in PSYC 205 if they have taken or are taking ECON 103/SOC 190, MATH 101, MATH 101Z, POL 199, or QR 180; students who have declared a psychology or neuroscience major must take PSYC 205 even if they have already taken one of these other statistics courses.

QR 180 is an elective statistics course for students interested in education policy issues. The course is not open to students who have taken or are taking ECON 103/SOC 190, MATH 101, MATH 101Z, MATH 220, PSYC 205, or QR 180, except with permission of the instructor.
QR 140 - Introduction to Quantitative Reasoning (1.0)
In this course, students develop and apply mathematical, logical, and statistical skills to solve problems in authentic contexts. The quantitative skills emphasized include algebra, geometry, probability, statistics, estimation, and mathematical modeling. Throughout the course, these skills are used to solve real-world problems, from personal finance to medical decision-making. A student passing this course satisfies the basic skills component of the Quantitative Reasoning requirement. This course is required for students who do not pass the Quantitative Reasoning Assessment. Those who pass the assessment, but still want to enroll in this course must receive permission of the instructor.
Instructor: Polito, Taylor
Prerequisite: Permission of the instructor required for students with a score of 9.5 or above on the Quantitative Reasoning Assessment.
Distribution: QRB
Term(s): Fall; Spring

QR 180 - Statistical Analysis of Education Issues (1.0)
What factors explain individual and group differences in student achievement test scores and educational attainment? Do inequities in financing public elementary and secondary schools matter in terms of student achievement and future employment? This course explores the theories, statistical methods, and data used by social scientists and education researchers in examining these and other education issues. Students collect, analyze, interpret, and present quantitative data. They begin with descriptive statistics and work up to inferential statistics, including hypothesis testing and regression analyses.
Instructor: Taylor
Prerequisite: Fulfillment of the basic-skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking ECON 103, SOC 298, POL 199, PSYC 305 or a Psychology 300-level R course; or permission of the instructor.
Cross-Listed as: ECON 309 and SOC 319
Distribution: SBA; QRF
Term(s): Not Offered

QR 260 - Applied Data Analysis and Statistical Inference (1.0)
This is an intermediate statistics course focused on fundamentals of statistical inference and applied data analysis tools. Emphasis on thinking statistically, evaluating assumptions, and developing practical skills for real-life applications to fields such as medicine, politics, education, and beyond. Topics include t-tests and non-parametric alternatives, multiple comparisons, analysis of variance, linear regression, model refinement, missing data, and causal inference. Students can expect to gain a working knowledge of the statistical software R, which will be used for data analysis and for simulations designed to strengthen conceptual understanding. This course is offered through Wellesley's Quantitative Analysis Institute.
Instructor: Pattanayak
Prerequisite: Any Quantitative Reasoning Overlay course. Prerequisite for economics students: ECON 103. Prerequisite for psychology students: PSYC 205.
Distribution: MM
Term(s): Spring

This course can be counted as a 200-level course toward the major or minor in Economics or Psychology. Students who earned a 2014 QAI Certificate are not eligible for this course.

QR 309 - Causal Inference (1.0)
This course focuses on statistical methods for causal inference, with an emphasis on how to frame a causal (rather than associative) research question and design a study to address that question. What implicit assumptions underlie claims of discrimination? Why do we believe that smoking causes lung cancer? We will cover both randomized experiments – the history of randomization, principles for experimental design, and the non-parametric foundations of randomization-based inference – and methods for drawing causal conclusions from non-randomized studies, such as propensity score matching. Students will develop the expertise necessary to assess the credibility of causal claims and master the conceptual and computational tools needed to design and analyze studies that lead to causal inferences. Examples will come from economics, psychology, sociology, political science, medicine, and beyond.
Instructor: Pattanayak
Prerequisite: Any one of ECON 203, SOC 298, POL 199, PSYC 305 or a Psychology 300-level R course; or permission of the instructor.
Cross-Listed as: ECON 309 and SOC 319
Distribution: SBA; QRF
Term(s): Spring
DEPARTMENT OF RELIGION

Religious belief and practice have played an essential role in creating and challenging personal identity and societal norms since the dawn of human history. The study of religion is therefore a constituting element of humanistic inquiry. The Religion Department pursues that inquiry through the critical interpretation of religious traditions, offering courses by scholars trained in Buddhism and the traditions of East Asia, Hebrew Bible and the Ancient Near East, New Testament and Earliest Christianity, Judaism, Catholic and Protestant Christianity, and Islam. Students may also study religions of Africa, South America, and South Asia in cognate programs and departments.

The Religion Department’s courses employ a wide range of critical methods for interpreting these traditions including historical, literary, social, comparative, and cultural studies as well as moral and metaphorical reflection. The intellectual breadth and depth of Religion Studies has helped to prepare our graduates for many careers including business, law, medicine, public service, and teaching as well as ministry.

Religion Major

Goals for the Religion Major

Students who elect a major in Religion will acquire these competencies and skills:

- Substantial knowledge of one of the great religious traditions or a central theme in two or more traditions
- Close reading and interpretation of sacred texts and religious writings, including their specialized rhetoric, forms, and contexts
- Significant mastery of critical methods used in contemporary scholarship on religion

Requirements for the Religion Major

For students who entered in the Fall of 2011 or later, the major consists of a minimum of nine units, at least two of which must be at the 300-level, including a seminar in the area of concentration and, ordinarily, REL 380 Seminar: “Advanced Topics in the Study of Religion,” taught by different members of the department and required of all Religion majors in their senior year, and no more than two 100-level courses. A maximum of three courses taken outside the department may be counted toward the major, no more than two of which may be taken at an institution other than Wellesley.

For students who entered in the Fall of 2010 or earlier, the major consists of a minimum of nine units, at least two of which must be at the 300-level, including a seminar, and no more than two 100-level courses. A maximum of three courses taken outside the department may be counted toward the major, no more than two of which may be taken at an institution other than Wellesley.

The major requires both a concentration in a specific field of study and adequate exposure to the diversity of the world’s religions and cultures. To ensure depth, a major must present a concentration of at least four courses, including a seminar, in an area of study that she has chosen in consultation with and that is approved by her departmental advisor. This concentration may be defined by, for example, a particular religion, cultural-geographical area, canon, period of time, or themes such as women, ethics and morality, or religious communities in contact and conflict. To promote breadth, a major must complete a minimum of two courses, also to be approved by her departmental advisor, devoted to religious cultures or traditions that are distinct both from each other and from the area of concentration that together provide a global perspective on the study of religion. All majors are urged to discuss their courses of study with their advisors before the end of the first semester of their junior year.

Honors in Religion

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Courses for Credit Toward the Religion Major

Students wishing to take related courses for their major or minor outside the department must obtain approval of their advisor in advance. Majors and minors are encouraged to take courses in other departments and programs, including Jewish Studies, Middle Eastern Studies, Medieval and Renaissance Studies, South Asia Studies, and East Asian Studies.

REL 100 - Religion Today: Continuity and Conflict (1.0)

An introduction to religion in the contemporary world through the study of pilgrimages and rituals, spiritualities and ethics, and recent competing interpretations of the Bible. Exploration of how religious movements and traditions understand themselves and our increasingly globalized, pluralized, and secularized world. Topics range from religion and violence to fundamentalism, queer theology, ecofeminism, television gurus, Buddhism in the United States, Latina devotion to our Lady of Guadalupe, Jerusalem and Jewish apocalyptic belief, and Islam and political change.

Instructor: Eklins and Geller
Prerequisite: None
Distribution: REP
Term(s): Spring

REL 104 - Study of the Hebrew Bible/Old Testament (1.0)

Critical introduction to the Hebrew Bible/Old Testament, studying its role in the history and culture of ancient Israel and its relationship to ancient Near Eastern cultures. Special focus on the fundamental techniques of literary, historical, and source criticism in modern scholarship, with emphasis on the Bible’s literary structure and compositional evolution.

Instructor: Silver
Prerequisite: None
Distribution: REP; HS
Term(s): Spring

REL 105 - Study of the New Testament (1.0)

The writings of the New Testament as diverse expressions of early Christianity. Close reading of the texts, with particular emphasis upon the Gospels and the letters of Paul. Treatment of the literary, theological, and historical dimensions of the Christian scriptures, as well as of methods of interpretation. The beginnings of the break between the Jesus movement and Judaism will be specially considered.

Instructor: Geller
Prerequisite: None
Distribution: REP; HS
Term(s): Spring

REL 108 - Introduction to Asian Religions (1.0)

An introduction to the major religions of India, Tibet, China, and Japan with particular attention to universal questions such as how to overcome the human predicament, how to perceive ultimate reality, and what is the meaning of death and the end of the world. Materials taken from Islam, Hinduism, Buddhism, Confucianism, Taoism, and Shinto. Comparisons made, when appropriate, with Hebrew and Christian Scriptures.

Instructor: Kodera
Prerequisite: None. Not open to students who have taken REL 109.
Distribution: REP
Term(s): Fall, Summer

REL 109 - Religions of the Silk Road (1.0)

An introduction to the major religious communities and traditions of East, South, and West Asia, with particular attention to their contacts and interactions as facilitated by trade, travel, and pilgrimage from antiquity until roughly the fifteenth century. The framework for our study of these religious cultures will be the “Silk Road,” which stretched from Eastern China to the Mediterranean Sea and linked together the many communities that thrived across Eurasia throughout the preindustrial era. In addition to Buddhism and Islam, the course will cover Confucianism, Daoism, Jainism, Hinduism, and Zoroastrianism, as well as Manichaeanism and Nestorian Christianity. Readings are drawn from foundational sacred texts, and the accounts of merchants, travelers, and pilgrims. Additional attention to the material cultures and artistic works produced by the religious communities of the Silk Road.

Instructor: Markow
Prerequisite: None. Not open to students who have taken REL 108.
Distribution: REP
Term(s): Not Offered

REL 204 - Religious Speech and Social Power (1.0)
Do gods and politics belong together? What happens when someone invokes a deity or refers to a religious tradition when speaking politically? Is this kind of allusion simply ornamental? Or is religious speech qualitatively different from the secular kind? This course will survey key cross-cultural examples of religiously inflected political oratory. We will develop theoretical and linguistic tools to help us understand speech as social action and to make sense of what is at stake in a public invocation of the sacred. Students will read classical and contemporary theories of rhetoric, gain experience with discourse analysis, and study examples that range from Neo-Assyrian and ancient Israelite political prophecy through contemporary cases that include Martin Luther King's "I Have a Dream" speech and the public statements of George W. Bush and Osama bin Laden.

Instructor: Silver
Prerequisite: None. Not open to students who have taken REL 203.
Distribution: REP; HS
Term(s): Not Offered

REL 205 - Cosmic Order and the Ordered Self: Wisdom Literature in the Hebrew Bible (1.0)

The worldview of ancient Israelite wisdom literature: its philosophical, ethical, and cosmological systems, and broader cross-cultural contexts. Also the adaptation of individual ethical doctrines to the governance of the political collective during the great Judean reform movement of the seventh century B.C.E., and the breakdown of this system in the wake of the Babylonian Exile. Special attention to scribal responses to the Problem of Evil and their ideas on the relationship between the created cosmos and divine intentionality.

Instructor: Silver
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered

REL 206 - The Hindu Worlds (1.0)

This course will examine the major aspects of the constellation of distinct but interrelated religious traditions of South Asia generally entitled "Hinduism." The course will have three foci. One will be the intersecting ritual, philosophical, and devotional currents that laid the historical foundations of this tradition and form integral parts of it to this day. The second focus will be on Hindu social organization and issues of political identity. This will cover the Hindu social divisions of caste, gendered roles, and rituals as well as issues related to Hindu nationalism. The third focus will be on practices followed by and negotiations made by diaspora Hindus, especially those settled in America. This area will focus especially on Hindu responses to diversity and interfaith dialogue.

Instructor: Shukla-Bhatt
Prerequisite: None
Cross-Listed as: SAS 206
Distribution: REP
Term(s): Not Offered

REL 208 - Legend, Satire, and Storytelling in the Hebrew Bible (1.0)

The art of narrative composition in the Hebrew Bible. The literary techniques and conventions of ancient Israelite authors in the Bible's rich corpus of stories. Philosophical and aesthetic treatment of themes such as kingship, power, gender, and covenant. Primary focus on the role of narrative in the cultural life of ancient Israel, with attention also to the difficulties of interpreting biblical stories from within our contemporary milieu.

Instructor: Silver
Prerequisite: None
Cross-Listed as: CPLT 208
Distribution: REP; HS
Term(s): Spring

REL 209 - Women, Sexuality, and Patriarchalism in the New Testament (1.0)

The world from which Christianity emerged was largely patriarchal and sexist, with a variety of attitudes toward sexual behavior and marriage. The Christian movement itself took several different approaches toward each of these issues, which found their way into the New Testament collection and thus became the foundation for a multiplicity of stances in later centuries. This variety in the documents will be examined, with special attention to their roots and their results.

Instructor: Hobbs
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 211.

REL 211 - Jesus of Nazareth (1.0)

Historical study of Jesus, first as he is presented in the Gospels, followed by interpretation of him at several subsequent stages of Christian history. In addition to the basic literary materials, examples from the visual arts and music will be considered, such as works by Michelangelo, Grünewald, J.S. Bach, Beethoven, and Rouault, as well as a film by Pasolini. The study will conclude with the modern "quest for the historical Jesus."

Instructor: Hobbs
Prerequisite: None
Distribution: REP
Term(s): Not Offered
Normally alternates with REL 209.

REL 216 - Christian Thought and Practice: 100-1600 (1.0)

Scripture and tradition, orthodoxy and heresy, good and evil, free will and determinism, monasticism and evangelization, mysticism and crusade: influential thinkers on central concerns of Early, Medieval, and Renaissance/Reformation Christianity. Special attention to the diversity of traditions and practices, including devotion to saints, veneration of icons, and uses of scripture.

Instructor: Elkins
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered

REL 218 - Religion in America (1.0)

A study of the religions of Americans from the colonial period to the present. Special attention to the impact of religious beliefs and practices in the shaping of American culture and society. Representative readings from the spectrum of American religions including Aztecs and Conquistadors in New Spain, the Puritans, Jonathan Edwards and John Wesley, Ralph Waldo Emerson, Isaac Meyer Wise, Mary Baker Eddy, Dorothy Day, Black Elk, Martin Luther King, Jr., and contemporary Fundamentalists.

Instructor: Marini
Prerequisite: None
Distribution: REP; HS
Term(s): Spring
Normally alternates with REL 220.

REL 220 - Religious Themes in American Fiction (1.0)

An examination of connections between religion and popular culture today, including religious themes in the writings of Hawthorne, Thoreau, Melville, Harriet Beecher Stowe, Leslie Marmon Silko, Rudolfo Anaya, Alice Walker, and Allegra Goodman. Reading and discussion of these texts as expressions of the diverse religious cultures of nineteenth- and twentieth-century America.

Instructor: Marini
Prerequisite: None
Distribution: LL; REP
Term(s): Not Offered
Normally alternates with REL 218.

REL 224 - Hildegard of Bingen (1.0)

This interdisciplinary course will focus on the music, dramatic productions, vision literature, and theology of the renowned twelfth-century abbess Hildegard of Bingen. Attention will also be given to her scientific work on medicine, the manuscript illuminations of her visions, and the productions of her popular music today.

Instructor: Elkins, Fontiin (Music)
Prerequisite: None
Cross-Listed as: MUS 224
Distribution: ARS; REP
Term(s): Spring

REL 225 - Women in Christianity (1.0)

Martyrs, mystics, witches, wives, virgins, reformers, and ministers: a survey of women in Christianity from its origins until today. Focus on women's writings, both historical and contemporary. Special attention to modern interpreters—feminists, womanists, and lesbians.

Instructor: Elkins
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered

REL 226 - The Virgin Mary (1.0)

The role of the Virgin Mary in historical and contemporary Christianity. Topics include Mary in the Bible, early Christian writings, devotion to her in the Middle Ages, her role in Islam, artistic productions in her honor, debates about her bodily and her power, and her "appearances" at Guadalupe, Lourdes, and Fatima, and in the late twentieth and early twenty-first centuries. Attention also to the relation between concepts of Mary and attitudes toward virginity, the roles of women, and "the feminization of the deity."

Instructor: Elkins
Prerequisite: None
Distribution: REP; HS
Term(s): Fall

REL 230 - Ethics (1.0)

An inquiry into the nature of values and the methods of moral decision-making. Examination of selected ethical issues, including self-interest, freedom, collective good, capitalism, just war, racism, environmental pollution, globalism, and religious morality. Introduction to case study and ethical theory as tools for determining moral choices.

Instructor: Marini
Prerequisite: None
Distribution: REP
Term(s): Spring

REL 232 - Popular Culture and Religion (1.0)

An examination of connections between religion and popular culture today, including religious themes in...
files and on television, marketing of purportedly secular products with religious imagery, and religious institutions' use of popular media, such as digital technologies. Case studies primarily from the United States with attention to the ways in which media circulate transnationally.

Instructor: Staley
Prerequisite: None
Distribution: REP
Term(s): Fall

REL 243 - Christianity in American Cinema (1.0)
A study of cinematic representations of figures, texts, and events from Christian traditions, such as themes of flood, exodus, crucifixion, conversion, and apocalypse. Questions will include how filmic depictions of figures and events correlate with historian's understandings of related people and phenomena; how films invoke Christian theological concepts without referencing the religion; and whether the commodification of Christian traditions in movies has an impact on Christian practices today. Primary attention to American films since 1965.

Instructor: Geller
Prerequisite: None
Distribution: REP
Term(s): Spring

REL 240 - Romans, Jews, and Christians in the Roman Empire (1.0)
At the birth of the Roman Empire virtually all of its inhabitants were practicing polytheism. Three centuries later, the Roman Emperor Constantine was baptized as a Christian and his successors eventually banned public sacrifices to the gods and goddesses who had been traditionally worshipped around the Mediterranean. This course will examine Roman-era Judaism, Graeco-Roman polytheism, and the growth of the Jesus movement into the dominant religion of the late antique world.

Instructor: Geller, Rogers (History)
Prerequisite: None
Cross-Listed as: GLVC 240
Distribution: REP; HS
Term(s): Fall

REL 241 - Women in the Biblical World (1.0)
The roles and images of women in the Bible, and in early Jewish and Christian literature, examined in the context of the ancient societies in which these documents emerged. Special attention to the relationships among archaeological, legal, and literary sources in reconstructing the status of women in these societies.

Instructor: Geller
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 244.

REL 244 - Jerusalem: The Holy City (1.0)
An exploration of the history, architecture, and architecture of Jerusalem from the Bronze Age to the present. Special attention both to the ways in which Jerusalem's Jewish, Christian, and Muslim communities transformed Jerusalem in response to their religious and political values and also to the role of the city in the ongoing Middle East and Israel-Palestinian peace process.

Instructor: Geller
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 243.

REL 245 - The Holocaust and the Nazi State (1.0)
An examination of the origins, character, course, and consequences of Nazi anti-Semitism during the Third Reich. Special attention to Nazi racist ideology, and how it shaped policies that affected such groups as the Jews, the disabled, the Roma and the Sinti, Poles and Russians, Afro-Germans, homosexuals, and women. Consideration also of the impact of Nazism on the German medical and teaching professions.

Instructor: Geller
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered

REL 247 - The World of the Bible (1.0)
A historical examination of the milieu in which the Hebrew Bible and New Testament emerged, and a study of selected Biblical texts in historical context. An exploration of both literary and archaeological data to reconstruct facets of the history, religion, and culture, including the roles and depictions of women, of ancient Israel and the Jewish and Christian communities of the Roman Empire.

Instructor: Geller
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered

REL 248 - Romans, Jews, and Christians in the Roman Empire (1.0)
At the birth of the Roman Empire virtually all of its inhabitants were practicing polytheism. Three centuries later, the Roman Emperor Constantine was baptized as a Christian and his successors eventually banned public sacrifices to the gods and goddesses who had been traditionally worshipped around the Mediterranean. This course will examine Roman-era Judaism, Graeco-Roman polytheism, and the growth of the Jesus movement into the dominant religion of the late antique world.

Instructor: Geller, Rogers (History)
Prerequisite: None
Cross-Listed as: GLVC 240
Distribution: REP; HS
Term(s): Fall

REL 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

REL 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

REL 251 - Religion in South Asia (1.0)
An examination of the religions in South Asia as expressed in sacred texts and arts, religious practices, and institutions in a historical manner. Concentration on the origins and development of Hindu traditions, Buddhism, Jainism, and Sikhism, as well as integration of Islam and Christianity in the religious landscape of South Asia. Interactions among the diverse communities of the region will also form a major theme.

Instructor: Shukla-Bhatt (South Asia Studies)
Prerequisite: None
Cross-Listed as: SAS 251
Distribution: REP; HS
Term(s): Not Offered

REL 252 - Women and Religion in South Asia (1.0)
This course explores the role religion plays in the lives of women of diverse religious communities in South Asia and conversely, the role women play in these religious worlds. The exploration focuses on three interconnected aspects of women's lives in the religious worlds of South Asia: 1) prescriptions for women in sacred texts and the power of ideology on their lives, 2) women's struggles and negotiations in face of the restrictions put on them, 3) achievements of extraordinary and ordinary women historically and in contemporary times. Additionally, it aims to examine how the various religious traditions of South Asia respond to aspirations and struggles as women. Passages from sacred texts, women's own writings, historical accounts, video clips of women's rites, and films will provide the sources for our exploration.

Instructor: Shukla-Bhatt (South Asia Studies)
Prerequisite: None

REL 253 - Buddhist Thought and Practice (1.0)
A study of Buddhist views of the human predicament and its solution, using different teachings and forms of practice from India, Southeast Asia, Tibet, China, and Japan. Topics include the historic Buddha's sermons, Buddhist psychology and cosmology, meditation, bodhisattva career, Tibetan Tantricism, Pure Land, Zen, and dialogues with and influence on the West.

Instructor: Kodera
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 257.

REL 254 - Chinese Thought and Religion (1.0)
Continuity and diversity in the history of Chinese thought and religion from the ancient sages-kings of the third millennium B.C.E. to the present. Topics include: Confucianism, Taoism, Chinese Buddhism, folk religion, and their further developments and interaction. Materials drawn from philosophical and religious and literary works.

Instructor: Kodera
Prerequisite: None
Distribution: REP; HS
Term(s): Fall
Normally alternates with REL 255.

REL 255 - Japanese Religion and Culture (1.0)
Constancy and change in the history of Japanese religious thought and its cultural and literary expression from the prehistoric "age of the gods" to contemporary Japan. An examination of Japanese indebtedness to, and independence from, Korea and China, assimilation and rejection of the West, and preservation of indigenous tradition. Topics include: Shinto, distinctively Japanese interpretations of Buddhism, neo-Confucianism, their role in modernization and nationalism, Western colonialism, and modern Japanese thought as a crossroad of East and West.

Instructor: Kodera
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 254.

REL 257 - Contemplation and Action (1.0)
An exploration of the relationship between the two polar aspects of being religious. Materials drawn from across the globe, both culturally and historically. Topics include: self-cultivation and social responsibility, solitude and compassion, human frailty as a basis for courage, anger as an expression of love, nonviolence, Western adaptations of Eastern spirituality, meditation and the environmental crisis. Readings selected from Confucius, Gautama Buddha, Ryokan, Mahatma Gandhi, Abraham Heschel, Dag Hammarskjöld, Simone Weil, Thomas Merton, Thich Nhat Hanh, Henri Nouwen, Beverly Harrison, Benjamin Hoff, Ruben Habito, and others.

Instructor: Kodera
Prerequisite: None
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 253.

REL 259 - Christianity in Asia (1.0)
History of the Christian tradition in South and East Asia from the first century to the present. Emphasis on the Christian impact, both positive and negative, on Asian societies; why Asia rejected Western Christianity; and the development of uniquely Asian forms of Christian belief, practice, and sociopolitical engagement. Topics include: Thomas’s supposed “apostolic mission” to Korea, India and the Far East; Nestorian “heretics” in Tang China; symbiosis of Jews, Muslims, and Christians in ninth-century China; the two sixteenth-century Jesuits (Francis Xavier and Matteo Ricci); Spanish colonialism and the Roman Catholics of the Philippines; the 26 martyrs of Japan (1597); the Taiping Rebellion; Ichihara’s “No Church Christianity”; Horace Allen in Korea; Kitamori’s “Pain of God Theology”; Edo’s “Silence of God”; India’s “untouchables” and Christianity; Mother Teresa of Calcutta; the Three Self Movement in the People’s Republic of China; Korea’s Minjung Theology; and the rise of Asian American Christianity.

Prerequisite: None
Distribution: REP, HS
Term(s): Not Offered
Normally alternates with REL 261.

REL 261 - Cities of the Islamic World (1.0)

An exploration of the religious and cultural history of selected cities across the Islamic world from late antiquity to the present. Examines and critiques the concept of “the Islamic city” while focusing on the study of particular cities, including Damascus, Baghdad, Cairo, Istanbul, Isfahan, Samarqand, Lucknow, and Lahore. Topics include: migration, settlement, and the construction of new cities; conversion; the emergence of “sacred cities” as centers for pilgrimage, religious education, and Islamic legal scholarship; sacred space and architecture; religious diversity in urban environments; and the impact of colonialism on urban life.

Instructor: Marlow
Prerequisite: None
Distribution: REP, HS
Term(s): Not Offered
Normally alternates with REL 262.

REL 262 - The Formation of the Islamic Tradition (1.0)

Historical study of the Islamic tradition, from its beginnings in Arabia through its shaping in the seventh to tenth centuries in the diverse and newly integrated regions of Western and Central Asia and North Africa. Topics include the sacred sources of the Islamic religious tradition, the Prophet and the Qur’an; the formulation of religious law, ethics, theology, and philosophy; varied patterns of piety and mysticism; and the development of Sunni and Shi’i understandings of Islam and Islamic history. Particular attention to the diversity within the Islamic tradition, its intercultural contacts, and its continuing processes of reinterpretation. The course also addresses approaches, methods, issues, and new directions in the study of Islam and Muslim societies.

Instructor: Marlow
Prerequisite: None
Distribution: REP, HS
Term(s): Not Offered
Normally alternates with REL 261.

REL 263 - Islam in the Modern World (1.0)

A study of the modern history of the Islamic religion and its interaction with other historical forces in shaping particular developments in Muslim societies from the late eighteenth century to the present. The course explores the emergence and development of religious ideas and movements in the context of the colonial and postcolonial periods, and the histories of modern nation-states. Readings encompass a variety of perspectives and address a range of topics, including religious practice and interpretation; matters of governance and the state, economics, gender and gender relations, dress (for men and women), and the participation of women in various arenas of public life. The course is designed to be flexible and open-ended, allowing students the opportunity to explore topics that are particularly pertinent to their interests and the current political, historical, and cultural conditions.

Instructor: Kodera
Prerequisite: None
Distribution: REP, HS
Term(s): Not Offered

REL 264 - Islamic and Ate Civilizations (1.0)

Historical survey of Muslim-majority societies and the diverse cultural forms produced within them from the seventh century to the beginnings of the modern period. Topics include literary and artistic expression, architecture, institutions, philosophical and political thought, religious thought and practice. Critical attention to the concept of “civilization” and its uses and drawbacks for understanding the complex historical and cultural processes under study in the course.

Instructor: Marlow
Prerequisite: None
Distribution: REP, HS
Term(s): Not Offered
Normally alternates with REL 262.

REL 265 - Religion and Culture in Iran (1.0)

An exploration of the history of Iran and its peoples from antiquity to the present. Topics include cultural and religious life; social and economic developments; government and court politics; the interactions among rural, urban, and nomadic communities; the lives and roles of women; commerce, cultural exchange, and the impact on Iran of European imperial rivalry; the forging of the nation-state, discontent and dissent; the Islamic Revolution, post-revolutionary Iran; and the Iranian diaspora.

Instructor: Marlow
Prerequisite: None
Distribution: REP, HS
Term(s): Spring
Normally alternates with REL 261.

REL 266 - Sacred Arts of South Asia (1.0)

Cultural life in South Asia is vibrant with aesthetic expressions of religion in its diverse traditions—Hindu, Muslim, Buddhist, Jain, Sikh, and Christian. This course introduces students to one of the most powerful avenues for transmission of religious knowledge in the traditions of South Asia—the aesthetic experience derived through a variety of forms. In addition to visual messages sent through architectural motifs and paintings, teaching religious doctrines through narratives in drama, dance, and musical performance is common across religious boundaries. The course will introduce students to the range of aesthetic experience and religious knowledge from the subcontinent and relate them to contemporary theories of performance.

Instructor: Shukla-Bhatt (South Asia Studies)
Prerequisite: None
Cross-listed as: SAS 211
Distribution: ARTS; REP
Term(s): Not Offered

REL 269 - Religion and Culture in Iran (1.0)

An exploration of the history of Iran and its peoples from antiquity to the present. Topics include cultural and religious life; social and economic developments; government and court politics; the interactions among rural, urban, and nomadic communities; the lives and roles of women; commerce, cultural exchange, and the impact on Iran of European imperial rivalry; the forging of the nation-state, discontent and dissent; the Islamic Revolution, post-revolutionary Iran; and the Iranian diaspora.

Instructor: Marlow
Prerequisite: None
Distribution: REP, HS
Term(s): Fall

REL 270 - Kyoto: Center of Japan’s Religion and Culture (Wintersession in Kyoto) (0.5)

Hands-on observation and critical analyses of religion and culture in Kyoto, Japan’s capital for more than a millennium. Topics include: Shinto and Buddhism in traditional Japanese art and culture, such as “tea ceremony,” calligraphy, poetry, theatre and martial arts; Shinto and Japan’s appreciation of nature; Japan’s selective memory of the Pacific War and Japan’s growing nationalism; today’s Buddhist clergy as specialists of the world of the dead, in sharp contrast to the earlier (pre-seventeenth century) focus on meditation and acts of mercy for the living; “new religions” in contemporary Japanese society and politics; Japan’s assimilation of Western religions, as manifested in youth culture; the complicity of religion in the resurgence of nationalism and xenophobia; the contemporary Japanese fascination with the “other world.” Kyoto will be the center of operation with possible side trips to Nara, Hiroshima, and perhaps Tokyo. Length: Two and a half weeks in Japan, with three days of orientation on campus prior to departure.

Instructor: Kodera
Prerequisite: At least one unit in Asian religion; though not required, preference is given to students of Asian religions and of East Asian studies. Application is required. Enrollments are limited to 10 and require written permission of instructor.
Distribution: REP
Term(s): Winter
Not offered every year. Subject to Provost’s Office approval.

REL 279 - New Testament Greek (1.0)

Reading and discussion of many characteristic New Testament texts, with attention to aspects of Koiné Greek that differ from the classical Attic dialect.

Instructor: Hobbs
Prerequisite: One year of Greek; or exemption by examination; or permission of the instructor.
Distribution: LL; REP
Term(s): Not Offered

REL 301 - Seminar. Religion in Modern South Asia (1.0)

In many parts of South Asia, the encounter with modernity coincided with colonial rule. This complex history added to the tension between modernity and religious traditions. This seminar will examine the texts, intellectual discourses, political movements, and social changes emerging from religious phenomena in South Asia from 1800 to the present. Students will not only examine specific historical
events, but also reflect on how this historical knowledge can be applied in the areas of development, international relations, and human rights movements.

Instructor: Shukla-Bhatt (South Asia Studies)
Prerequisite: Two units at the 200 level in South Asia studies, or by permission of the instructor.
Cross-listed as: SAS 301
Distribution: REP; HS
Term(s): Spring

REL 303 - Seminar. South Asian Models of Religious Pluralism (1.0)

This seminar will explore in a historical manner the development of pluralistic discourses, ideologies, and interactions in South Asia. While remaining focused on South Asia, we will consider more generally the implications of this history for other religiously diverse societies. Readings will range from ancient texts, such as the Upanishads, Dhammapada, medieval writings of Sufi, Sikh, and bhakti traditions, to historical documents about policies of Mogul emperor Akbar, and modern writings on pluralism, including Gandhi's. We will also study the relationship of religious diversity to violence, and modern projects, by Diana Eck and others, to promote sustainable models of religious pluralism. Final projects will give students the opportunity to develop their own model for religious pluralism in a specific part of the world.

Instructor: Shukla-Bhatt (South Asia Studies)
Prerequisite: Open by permission of the instructor.
Cross-listed as: SAS 303
Distribution: REP; HS
Term(s): Not Offered

REL 304 - The Hindu Worlds (1.0)

This course will examine the major aspects of the constellation of distinct but interrelated religious traditions of South Asia generally entitled "Hinduism." The course will have three foci. One will be the intersecting ritual, philosophical, and devotional currents that laid the historical foundations of this tradition and form integral parts of it to this day. The second focus will be on Hindu social organization and issues of political identity. This will cover the Hindu social divisions of caste, gendered roles and rituals as well as issues related to Hindu nationalism. The third focus will be on practices followed by and negotiations made by diaspora Hindus, especially those settled in America. This area will focus especially on Hindu responses to diversity and interfaith dialogue.

Instructor: Shukla-Bhatt (South Asia Studies)
Prerequisite: SAS 251/REL 251 or permission of the instructor.
Cross-listed as: SAS 304
Distribution: REP
Term(s): Not Offered

REL 307 - Seminar. Gods, Politics, and the Body in the Ancient Near East (1.0)

Study of the interconnection of politics, theology, and identity in the ancient Near East. Exploration of how language about the divine was used to frame concepts of political collectivity. Particular focus on sovereignty and its resistance; the uses of violence, torture, and bodily spectacle; and the emergence of literacy and writing culture as catalysts for new forms of community.

Instructor: Silver
Prerequisite: At least one unit on the Bible or one 200-level unit in Near Eastern studies, political science, or classical civilization.
Distribution: REP; HS
Term(s): Not Offered

REL 310 - Seminar. Mark, the Earliest Gospel (1.0)

An exegetical examination of the Gospel of Mark, with special emphasis on its character as a literary, historical, and theological construct, presenting the proclamation of the Gospel in narrative form. The Gospel's relationships to the Jesus tradition, to the Old Testament/Septuagint, and to the Christological struggles in the early church will be focal points of study.

Instructor: Hobbs
Prerequisite: At least one unit on the Bible.
Distribution: REP
Term(s): Not Offered
 Normally alternates with REL 308.

REL 319 - Seminar. Religion, Law, and Politics in America (1.0)

A study of the relationships among religion, fundamental law, and political culture in the American experience. Topics include established religion in the British colonies, religious ideologies in the American Revolution, religion and rebellion in the Civil War crisis, American civil religion, and the New Religious Right. Special attention to the separation of church and state, selected Supreme Court cases on the religion clauses of the First Amendment, and religious and moral issues in current American politics.

Instructor: Marini
Prerequisite: REL 208, REL 217, REL 218, or at least one 200-level unit in American religion, history, sociology, or politics.
Distribution: REP; HS
Term(s): Not Offered
 Normally alternates with REL 330.

REL 323 - Seminar. Feminist, Womanist, Mujerista, and Queer Theologies (1.0)

A study of contemporary women theologians' critiques and reinterpretations of Christianity—its Scriptures, its God, its teachings about human bodies and earth—from second wave feminists to contemporary queer theorists. Special attention to African American, Latina, and Asian American authors. Consideration also of alternative concepts of divinity proposed by ecofeminists, lesbians, and devotees of goddesses.

Instructor: Elkins
Prerequisite: One 200-level course in religion, women and gender studies, or a related subject.
Distribution: SBA; REP
Term(s): Fall
 Normally alternates with REL 326.

REL 326 - Seminar. Theologies of Liberation (1.0)

Beginning with Liberation Theology's emergence in the 1970s with Gustavo Gutierrez (Peru), Leonardo Boff (Brazil), and James Cone (United States), this course then considers the reactions of the 1980s (including Jon Sobrino on the El Salvador martyrs) before turning to the theologies of liberation of the 1993 Waco tragedy and in the endtime speculations concerning Jerusalem. Attention also to the genre of apocalyptic cinema such classics as On the Beach (1959) and recent films such as The Happening (2008) and 2012 (2009).

Instructor: Geller
Prerequisite: A course in biblical studies, Judaism, Christianity, or by permission of the instructor. Not open to students who have taken REL 116.
Distribution: REP
Term(s): Not Offered

REL 330 - Seminar. Religion and Violence (1.0)

An exploration of the sources and manifestations of religious violence. Topics include the role of violence in sacred texts and traditions, intra- and interreligious conflicts, religion and nationalism, and religious violence in today's global society. Selected examples from Jewish, Christian, and Islamic traditions and contemporary religious conflicts in Africa, South Asia, and the Middle East.

Instructor: Marini
Prerequisite: HIST 205, REL 200 or REL 230, PEAR 104, or permission of the instructor.
Distribution: SBA; REP
Term(s): Not Offered
 Normally alternates with REL 319.

REL 342 - Seminar. Archaeology of the Biblical World (1.0)

An examination of the ways in which archeological data contribute to the understanding of the history of ancient Israel, and the Jewish and Christian communities of the Roman Empire.

Instructor: Geller
Prerequisite: At least one unit in archaeology, biblical studies, classical civilization, early Christianity, or early Judaism.
Distribution: HS
Term(s): Not Offered

REL 343 - Seminar. Apocalypse and Armageddon: Envisioning the Endtime (1.0)

A study in historical, religious, and cultural contexts of selected literary texts, social movements, and films that envision the endtime. The seminar will examine sources from antiquity to the present including Jewish and Christian apocalyptic texts and movements of the Hellenistic and Roman eras such as the Biblical books of Daniel and Revelation, the Jesus Movement, and the Roman-Jewish wars of the first and second centuries. Additionally, it will examine the Sabbatian movement of the seventeenth century, and modern apocalypticism reflected in the 1993 Waco tragedy and in the endtime speculations concerning Jerusalem. Attention also to the genre of apocalyptic cinema such classics as On the Beach (1959) and recent films such as The Happening (2008) and 2012 (2009).

Instructor: Geller
Prerequisite: A course in biblical studies, Judaism, Christianity, or by permission of the instructor. Not open to students who have taken REL 116.
Distribution: REP
Term(s): Not Offered

REL 350 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

REL 350H - Research or Individual Study (0.5)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

REL 353 - Seminar. Zen Buddhism (1.0)

Zen, the long known yet little understood tradition, studied with particular attention to its historical and ideological development, meditative practice, and expressions in poetry, painting, and martial arts.

Instructor: Kodera
Prerequisite: At least one unit in Asian religions.
Distribution: REP; HS
Term(s): Not Offered
 Normally alternates with REL 354.
REL 345 - Seminar. Tibetan Buddhism (1.0)
A critical, historical and comparative study of Buddhism that unfolded in the unique geographical, historical, cultural and religious climate of Tibet, and of the Tibetan communities in diaspora after the Communist Chinese takeover. Topics include pre-Buddhist religions of Tibet; development of the Vajrayana teaching and the Tantric practice; the cult of Tārā; Avalokitesvara Bodhisattva and the Dalai Lama; the plight of the Tibetan lamas and refugees in India and in the West; continuing controversy in China; the appeal and misunderstanding of Tibet and Tibetan Buddhism in the West; the future of Tibet and Tibetan Buddhism.

Instructor: Kodera
Prerequisite: At least one unit in Asian religions.
Distribution: REP; HS
Term(s): Spring
Normally alternates with REL 353.

REL 357 - Seminar. Issues in Comparative Religion (1.0)
Promises and challenges in the evolving debate over how different truth claims and faith communities might seek tolerance, respect, and coexistence. How to reconcile tradition with innovation, doctrine with practice, contemplation with action, globalism with tribalism. Impediments of monothesism and "revealed scripture." The role of religion in prejudice and discrimination; and yet also peace and justice. The rise of Buddhism in the West and of Christianity in the East. Readings include works by Wilfred Cantwell Smith, John Hick, Uchimura Kanzo, Endo Shusako, Raimundo Panikkar, Thich Nhat Hanh, the Dalai Lama, and Diana Eck.

Instructor: Kodera
Prerequisite: At least one unit in religion.
Distribution: REP; HS
Term(s): Not Offered
Normally alternates with REL 367.

REL 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

REL 361 - Seminar. Studying Islam and the Middle East (1.0)
An exploration of the study and representation of Islam and West Asia/the Middle East in European and American scholarship, literature, arts, and journalism, from the Middle Ages to the present. Topics, studied in historical context, include medieval European images of Islam, translations of sacred texts and literary works, religious peculiarity, colonial histories and correspondence, Orientalism and post-Orientalism, and new and emerging scholarship, the modern press and popular culture. Students will participate in focused discussion of primary sources and works of criticism, including Edward Said’s Orientalism, and will undertake individual and group-based research projects.

Instructor: Marlow
Prerequisite: Open to juniors and seniors, and sophomores who have taken at least one unit of Middle Eastern studies, or by permission of the instructor.
Distribution: REP; HS
Term(s): Spring

REL 364 - Seminar. Sufism: Islamic Mysticism (1.0)
An interdisciplinary exploration of the diverse manifestations of mysticism in Islamic contexts. Topics include the experiences and writings of individual Sufis, including Rabi’a, al-Junayd, Hujwiri, Ibn al-‘Arabi, Jalal al-Din Rumi, ‘Abd al-Qadir Jilani, Ruzbihan Baqī; the formation of Sufi organizations and development of mystical paths; the place of Sufism in Islamic legal, theological, and philosophical traditions as well as in Muslim religious practice; Sufism in local contexts, both urban and rural; holy men and women; Sufism’s permeation of artistic and aesthetic traditions, especially poetry and music; the reception, interpretations, and practices of Sufism in Western countries.

Instructor: Silver
Prerequisite: Open only to senior Religion majors and minors; required for senior majors and recommended for senior minors.
Distribution: REP
Term(s): Spring
DEPARTMENT OF RUSSIAN

Professor: Hodge
Associate Professor: Weiner (Chair)
Senior Lecturer: Epsteyn

Since its founding in the 1940s by Vladimir Nabokov, the Russian Department has dedicated itself to excellence in literary scholarship and undergraduate teaching. Our faculty members specialize in different areas of Russian language and literature and incorporate a broad range of cultural material—history, music, and visual art—into their courses. Numerous activities both inside and outside the classroom are designed to enrich students’ appreciation of the achievements and fascinating traditions of Russian civilization. At the same time, we give our students critical skills that will serve them outside the Russian context.

Russian Department Information

Students majoring in Russian should consult the chair of the department early in their college career. For information on all facets of the Russian department, please visit new.wellesley.edu/Russian. Students who cannot take RUSS 101 during the fall semester are strongly encouraged to take RUSS 101 during Wintersession; those interested in doing so should consult the chair early in the fall term.

Advanced courses on Russian literature and culture are given in English translation at the 200 level; corresponding 300-level courses offer supplemental reading and discussion in Russian. Please refer to the descriptions for RUSS 376, RUSS 377 and RUSS 386 below.

Russian Major

Goals for the Russian Major

- Be able to speak, read, write and understand Russian very well
- Be a close and attentive reader of Russian literary texts
- Be able to write a persuasive argument in both English and Russian
- Have a good grasp of the history of Russian literature from 1800 to the present
- Possess a broad understanding of important aspects of Russian culture, including film, fine arts, music, history, social customs, folk beliefs, and popular culture

Requirements for the Russian Major

A student majoring in Russian must take at least eight units in the department above RUSS 102, including:
1. Language courses through RUSS 302
2. RUSS 251
3. Two 200-level courses above RUSS 302
4. At least 3 of the following half-unit courses: RUSS 333, RUSS 376, and RUSS 386 or RUSS 101 and RUSS 102 are counted toward the degree but not toward the Russian major.

Thus, a student who begins with no knowledge of Russian would typically complete the following courses to major in Russian: RUSS 101 and RUSS 102, RUSS 201 and RUSS 202, RUSS 301 and RUSS 302, RUSS 251; two 200-level literature courses above RUSS 251; and one unit from 300-level literature courses.

Honors in Russian

Students may graduate with honors in Russian by writing a thesis. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Students who wish to attempt an honors thesis should consult the chair early in the second semester of their junior year. See Academic Distinctions.

International Study in Russian

Majors are encouraged to enroll in summer language programs to accelerate their progress in the language. Credit toward the major is normally given for approved summer or academic-year study at selected institutions in the United States and Russia. Major credit is also given for approved junior year international study programs.

Russian Area Studies

Students interested in an interdepartmental major in Russian Area Studies are referred to the following and should visit the Russian Area Studies Web pages at new.wellesley.edu/russianareastudies. Attention is called to Russian Area Studies courses in history, economics, political science, anthropology, and sociology.

Courses for Credit Toward the Russian Major

RUSS 202 - Intermediate Russian I (1.0)
Introduction to Russian grammar through oral, written, and reading exercises; special emphasis on oral expression. Four periods.
Instructor: Hodge, Epsteyn (Fall), Weiner (Winter)
Prerequisite: None
Term(s): Fall; Winter

RUSS 202H - Research or Individual Study (0.5)
Term(s): Fall; Spring
Distribution: None
Prerequisite: Permission of the instructor.
Application required.

RUSS 203W - Russian in Moscow (1.0)
This course is offered as an immersion experience, designed to improve students’ oral proficiency in Russian while introducing them to the cultural treasures of Russia’s capital. Mornings students study language with instructors at the Russian State University for the Humanities. Afternoons and evenings they visit sites associated with Moscow’s great writers, art galleries, and museums, and attend plays, operas, and concerts.
Instructor: Epsteyn
Prerequisite: RUSS 201 or permission of the instructor.
Application required.
Distribution: LL
Term(s): Not Offered
Not offered every year. Subject to Provost’s Office approval.

RUSS 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

RUSS 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

RUSS 251 - The Nineteenth-Century Russian Classics: Passion, Pain, Perfection (in English) (1.0)
Survey of Russian fiction from the Age of Pushkin (1820s-1850s) to Tolstoy’s mature work (1870s) focusing on the role of fiction in Russian history, contemporaneous critical reaction, literary movements in Russia, and echoes of Russian literary masterpieces in the other arts, especially film and music. Major works by Pushkin (Eugene Onegin, “The Queen of Spades”), Lermontov (A Hero of Our Time), Gogol (Dead Souls), Pavlova (A Double Life), Turgenev (Fathers and Sons), Tolstoy (Anna Karenina), and Dostoevsky (Crime and Punishment) will be read.
Instructor: Epsteyn
Prerequisite: None
Distribution: LL
Term(s): Fall

RUSS 272 - Battle for the Russian Soul: Ideology and the Nineteenth-Century Russian Novel (in English) (1.0)
Nineteenth-century Russian writers were locked in a desperate struggle for freedom under an extraordinarily repressive regime. Through an intensive analysis of the great ideological novels at the center of Russia’s historic social debates from the 1840s to the 1860s, we will unearth the roots of both
Lenin’s revolution and Dostoevsky’s fervent anti-radicalism. The tension between literary realism and political exigency will be explored in the fictional and critical works of Chaudaev, Herzen, Belinsky, Turgenev, Chernyshevsky, Goncharov, Dobrolubov, Pisarev, and Dostoevsky. Isaiah Berlin’s famous essays on the Russian intelligentsia, as well as representative works from the nonliterary arts, including Tom Stoppard’s The Coast of Utopia, will supplement our reading and discussion.

Instructor: Hodge
Prerequisite: None
Distribution: LL
Term(s): Not Offered

RUSS 276 - Fedor Dostoevsky: The Seer of Spirit (in English) (1.0)
Probably no writer has been so detested and adored, so demonized and deified, as Dostoevsky. This artist was such a visionary that he had to reinvent the novel in order to create a form suitable for his insights into the inner life and his prophecies about the outer. To this day readers are mystified, outraged, enchanted, but never unmoved by Dostoevsky’s fiction, which some have tried to brand as “novel-tragedies,” “romantic realism,” “polyphonic novels,” and more. This course challenges students to enter the fray and explore the mysteries of Dostoevsky through study of his major writings.

Instructor: Weiner
Prerequisite: None
Distribution: LL
Term(s): Spring

RUSS 277 - Lev Tolstoy: Russia’s Ecclesiast (in English) (1.0)
An odyssey through the fiction of the great Russian novelist and thinker, beginning with his early works (Sevastopol Stories) and focusing on War and Peace and Anna Karenina, though the major achievements of Tolstoy’s later period will also be included (A Confession, The Death of Ivan Illich). Lectures and discussion will examine the masterful techniques Tolstoy employs in his epic explorations of human existence, from mundane detail to life-shattering cataclysm. Students are encouraged to have read the Maude translation of War and Peace (Norton Critical Edition) before the semester begins.

Instructor: Hodge
Prerequisite: None
Distribution: LL
Term(s): Spring

RUSS 286 - Vladimir Nabokov (in English) (1.0)
An examination of the artistic legacy of the great novelist, critic, lepidopterist, and founder of Wellesley College’s Russian Department, Nabokov became one of the greatest novelists in both Russian and English literature. Students will read Lolita, Pushkin, and Pale Fire, which were written in English, and Nabokov’s English translations of two of his best Russian novels: The Defense and Invitation to a Beheading. The class will also discuss his utterly unique autobiography, Speak, Memory.

Instructor: Weiner
Prerequisite: None
Distribution: LL
Term(s): Fall

RUSS 301-01-F - Advanced Russian I (1.0)
Topic for 2014-15: St. Petersburg
Students will become experts in one of the great overarching themes of Russian Culture: St. Petersburg. We will read and discuss texts, view films, listen to music, and compose essays on the theme of Russia’s second capital. The course includes study of grammar and vocabulary expansion with strong emphasis on oral proficiency and comprehension. At the end of the semester, each student will write a final paper and present to the class her own special research interest within the general investigation of St. Petersburg’s history, traditions, culture and art.

Instructor: Epsteyn
Prerequisite: RUSS 201-RUSS 202 or the equivalent.
Distribution: LL
Term(s): Fall
Taught in Russian. Three periods.

RUSS 302-01-S - Advanced Russian II (1.0)
This course explores Soviet and Russian popular film classics loved by generations of viewers and that have become cultural symbols. We will study G. Aleksovsky’s musicals of the 1930s; sentimental, detective and fantastic comedies by the masters of the genre, L. Galai, E. Bazanov, and G. Danelia, in the 1950s-80s; and post-Soviet crime comedies of the twenty-first century. We will attempt to determine the source of their enduring popularity and cult status through an examination of their aesthetics and of their social and political context.

Instructor: Epsteyn
Prerequisite: RUSS 301-01-F or the equivalent.
Distribution: LL
Term(s): Spring
Taught in Russian.

RUSS 303W - Russian in Moscow (1.0)
This course is offered as an immersion experience, designed to improve students’ oral proficiency in Russian while introducing them to the cultural treasures of Russia’s capital. Mornings students study language with instructors at the Russian State University for the Humanities. Afternoons and evenings they visit sites associated with Moscow’s great writers, art galleries, and museums, and attend plays, operas and concerts.

Instructor: Epsteyn
Prerequisite: RUSS 301 or permission of the instructor.
Application required.
Distribution: LL
Term(s): Not Offered
Not offered every year. Subject to Provost’s Office approval.

RUSS 333 - Nineteenth-Century Russian Narrative Poetry: Tales of Mystery and Adventure (in Russian) (0.5)
Students will immerse themselves in the famous poems of Derzhavin, Zhukovsky, Pushkin, Lermontov, and Nekrasov, analyzing ballads and verse tales devoted to the natural and the supernatural. Exotic “Oriental” cultures as well as high and low Russian culture serve as the backdrop for these dramatic verse narratives. Russian painting, music, and history will enrich our discussions of Russian Romanticism in the poetry.

Instructor: Hodge
Prerequisite: or corequisite: RUSS 301 or RUSS 302.
Distribution: LL
Term(s): Not Offered
One period.

RUSS 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring
RUSSIAN AREA STUDIES

AN INTERDEPARTMENTAL MAJOR
Director: Tumarkin (History)
Advisory Committee: Epstein (Russian), Hodge (Russian), Kohl (Anthropology), Tumarkin (History), Weiner (Russian)

Sir Winston Churchill called Russia “a riddle wrapped in a mystery inside an enigma.” The Russian Area Studies program explores Russia and the former Soviet Union, a vast region stretching from Poland to the Pacific Ocean, a land of extremes: anarchy and totalitarianism; super-growth and stagnation; stability and dramatic volatility. The world’s largest producer of oil and gas, Russia has also given the world one of its most glorious literary and musical canons. The Russian Area Studies program is based on the premise that the region is best explored through an interdisciplinary study of its culture, history, politics, and language. The program prepares students for a range of careers, including work in government, business, academia, and the arts.

Russian Area Studies Major

Goals for the Russian Area Studies Major

- An informed understanding of Russia’s and Eurasia’s place in today’s world, the goals and values espoused by its leadership, and the challenges the region faces
- A learned appreciation of the vast diversity of the broad Eurasian space, which for millennia has been inhabited by a multitude of peoples
- An understanding of how those peoples and cultures have interacted over time
- A familiarity with the basic structures and dynamics of Russian and Eurasian historical development, including the nature of autocracy, dictatorship, and empire
- A proficiency in the Russian language sufficient for advanced study of its rich literary canon
- A familiarity with enough classic Russian literature and other cultural works for an understanding of the major themes in Russian culture of the nineteenth and twentieth centuries
- Experience in critical reading, writing essays, and oral communication
- A critical knowledge of methods used by scholars of literature, history, and the social sciences

Requirements for the Russian Area Studies Major

A major in Russian Area Studies consists of a minimum of eight units. Majors are normally required to take four units of the Russian language above the 100 level: RUSS 201-RUSS 202 and RUSS 301-RUSS 302. In addition, a major’s program should consist of at least four non-language units drawn from Russian Area Studies, Russian history, literature, and politics, as well as relevant courses in anthropology and comparative literature (see listings below). At least two of a major’s units should come from outside the Russian department and the Comparative Literature program. Majors are normally required to take at least two units of 300-level course work, at least one of which should be drawn from outside the Russian department.

Honors in Russian Area Studies

Seniors who wish to graduate with honors in the major must write an honors thesis. Applicants for honors must have minimum 3.5 GPA in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. Interested students should discuss their ideas and plans with their advisor, the program chair, or a member of the advisory committee as early as possible in their junior year.

International Study and Graduate Study in Russian Area Studies

Majors are encouraged to take advantage of various programs of study in the former Soviet Union, including the opportunity to spend a semester or year on exchange at a university in Russia or one of the other former Soviet republics. Majors who are contemplating postgraduate academic or professional careers in Russian Area Studies are encouraged to consult with faculty advisors, who will assist them in planning an appropriate sequence of courses. For more information on the Russian Area Studies program, students may consult the Wellesley College Russian Area Studies Web pages: new.wellesley.edu/russianareastudies.

Courses for Credit Toward the Russian Area Studies Major

ANTH 247 Societies and Cultures of Eurasia
ANTH 319 Nationalism, Politics, and the Use of the Remote Past
CPLT 284 Magical Realism
HIST 211 Bread and Salt: Introduction to Russian Civilization
HIST 246 Vikings, Icons, Mongols, and Tsars
HIST 247 Splendor and Serfdom: Russia Under the Romanovs
HIST 248 The Soviet Union: A Tragic Colossus
HIST 302 Seminar: World War II as Memory and Myth
RUSS 251 The Nineteenth-Century Russian Classics: Passion, Pain, Perfection (in English)
RUSS 272 Battle for the Russian Soul: Ideology and the Nineteenth-Century Russian Novel (in English)
RUSS 276 Fedor Dostoevsky: The Seer of Spirit (in English)
RUSS 277 Lev Tolstoy: Russia's Ecclesiast (in English)
RUSS 286 Vladimir Nabokov (in English)
RUSS 333 Nineteenth-Century Russian Narrative Poetry: Tales of Mystery and Adventure (in Russian)
RUSS 376 Fedor Dostoevsky's Short Stories (in Russian)
RUSS 377 Lev Tolstoy’s Short Stories (in Russian)
RUSS 386 Vladimir Nabokov’s Short Stories (in Russian)

In addition to the courses listed above, students are encouraged to incorporate the rich offerings of MIT and Brandeis into their Russian Area Studies programs.

RASST - Russian Area Studies Courses

RASST 211 - Wintersession Program in the Republic of Georgia (0.5)
Students travel to Tbilisi, Georgia, for Wintersession. They attend lectures in English at Tbilisi State University on Georgian history, language, and culture and on contemporary political developments there and visit sites of historical interest in and around Tbilisi. They live with Georgian families and spend three weeks completing a self-designed internship with a local organization.
Prerequisite: One course in Russian area studies or anthropology. Application required.
Cross-Listed as: ANTH 211
Distribution: SBA; HS
Term(s): Winter
Not offered every year: Subject to Provost’s Office approval.

RASST 212 - Lake Baikal: The Soul of Siberia (1.25)
The ecological and cultural values of Lake Baikal—the oldest, deepest, and most biotically rich lake on the planet—are examined. Lectures and discussion in spring prepare students for the three-week field laboratory taught at Lake Baikal in eastern Siberia in August. Lectures address the fundamentals of aquatic ecology and the role of Lake Baikal in Russian literature, history, art, music, and the country’s environmental movement. Laboratory work is conducted primarily out-of-doors and includes introductions to the flora and fauna, field tests of student-generated hypotheses, meetings with the lake’s stakeholders, and tours of ecological and cultural sites surrounding the lake.
Prerequisite: Hodge (Russian), Moore (Biological Sciences)
Application required.
Cross-Listed as: ENST 212
Distribution: LL; NPS
Term(s): Not Offered
Not offered every year: Subject to Provost’s office approval.

RASST 222 - Firebird! The Russian Arts Under Tsars and Commissars (1.0)
The magical Russian Firebird, with its feathers of pure gold, embodies creative genius and the salvational glory of Russian visual and performing arts. In this course we will explore Russian art, ballet, opera, music, and theatre and their place in the culture and history of both Russia and Europe. One of the great paradoxes of the Russian experience in the nineteenth and twentieth centuries was the astonishing capacity of Russia’s composers, choreographers, dancers, painters, and writers to create many of the world’s greatest artistic works while living and working under almost unimaginably repressive political regimes. How was this achieved? In addition to larger themes and movements we will consider the contexts, histories, meanings—and, in some cases, iconic afterlives—of selected works and performers.
Prerequisite: None
Distribution: ARS
This course may be taken as RAST 222 or, with additional assignments, RAST 322.

**RAST 322 - Firebird! The Russian Arts Under Tsars and Commissars (1.0)**
The magical Russian Firebird, with its feathers of pure gold, embodies creative genius and the salvational glory of Russian visual and performing arts. In this course we will explore Russian art, ballet, opera, music, and theatre and their place in the culture and history of both Russia and Europe. One of the great paradoxes of the Russian experience in the nineteenth and twentieth centuries was the astonishing capacity of Russia’s composers, choreographers, dancers, painters, and writers to create many of the world’s greatest artistic works while living and working under almost unimaginably repressive political regimes. How was this achieved? In addition to larger themes and movements we will consider the contexts, histories, meanings—and, in some cases, iconic afterlives—of selected works and performers.

Instructor: Tumarkin  
Prerequisite: Normally open to juniors and seniors who have taken at least one course in a related area (such as Russia, Europe, performing arts, or visual arts).  
Distribution: ARS  
Term(s): Spring

**RAST 350 - Research or Individual Study (1.0)**  
Prerequisite: Permission of the instructor. Open to juniors and seniors.  
Distribution: None  
Term(s): Fall; Spring

**RAST 360 - Senior Thesis Research (1.0)**  
Prerequisite: Permission of the department.  
Distribution: None  
Term(s): Fall; Spring  
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**RAST 370 - Senior Thesis (1.0)**  
Prerequisite: RAST 360 and permission of the department.  
Distribution: None  
Term(s): Fall; Spring  
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
DEPARTMENT OF SOCIOLOGY

Professor: Cuba (Chair), Cushman, Hertz, Imber, Levitt
Associate Professor: Radhakrishnan, Rutherford
Distinguished Visiting Professor: Silver
Senior Lecturer: Swingle
Visiting Lecturer: He

Sociology is the systematic and scientific study of social life, including informal and formal organizations and the multiple ways that people collectively give meaning to their behavior and lives. The scope of sociology ranges from the analysis of passing encounters between individuals in the street to the investigation of broad-scale global social change. Sociology brings a unique perspective to the study of institutional and collective forms of social life, including the family, human rights, mass media and popular culture, social movements, migration, the professions, and global systems and processes. Research is conducted across many cultures and historical periods in order to illuminate how social forces such as class, gender, race and ethnicity, age, group membership, and culture shape human experience. Sociologists use multiple methods including surveys, interviews, participant observation, and material and textual analyses.

Sociology Major

Goals for the Sociology Major

• To develop in students an appreciation for the sociological imagination, which is the ability to see the interrelations between personal biography, history, and social structure
• To teach students basic sociological concepts and research methods that will allow them to analyze and understand aspects of social life independently, with intellectual originality and rigor
• To develop the capacity for analytical and reasoning skills through hands-on experience with both qualitative and quantitative data
• To help students think critically about "taken-for-granted" information and knowledge about social life and provide assessments based on sociological analysis
• To introduce students to the major ideas of classical and contemporary sociological theory and to apply these theories to the interpretation of social life on a global scale
• To teach students to be careful analysts, eloquent writers, and articulate speakers
• To provide students with the analytical, interpretive, and research skills that will serve as a foundation for graduate school, professional school, or any career
• To foster a climate of open intellectual exchange by organizing public lectures and seminars and strongly encouraging collaborative student-faculty research

Requirements for the Sociology Major

A major in sociology consists of at least nine units. The core of the major consists of four required courses (SOC 190, SOC 200, SOC 201, and SOC 290) that emphasize basic concepts, theory, and research methods that are the foundation of the discipline, but are also useful in a range of social sciences and professions. Permission to take a required unit elsewhere for the major must be obtained from the department chair in advance. Students must take at least five additional units, two of which must be 300-level work (excluding SOC 350, SOC 360, and SOC 370). Majors are encouraged to elect courses in a variety of substantive topics in sociology (e.g., social problems, deviance, immigration, social change and development, race and ethnicity, medicine and epidemiology, religion, gender, mass media, and popular culture).

Choosing courses to complete the degree and the major requires careful thought and planning. Sociology majors are encouraged to explore the full range of disciplines and subjects in the liberal arts, and they should consult a faculty member to select courses each term and to plan a course of study over several years. It is recommended that students complete the sequence of theory and methods courses by the end of their junior year if they want to conduct independent research or honors projects during their senior year. If a major anticipates being away during all or part of the junior year, the theory (SOC 200 and SOC 201) and research methods course (SOC 290) should be taken during the sophomore year, or an alternative plan should be arranged with her advisor.

Honors in Sociology

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Sociology Minor

Requirements for the Sociology Minor

A minor in sociology (six units) consists of any 100-level unit, SOC 200, and four additional units, one of which must be a 300-level unit, excluding SOC 350. The plan for this option should be carefully prepared, a student wishing to add the sociology minor to the major in another field should consult a major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

SOC - Sociology Courses

SOC 102 - The Sociological Perspective: An Introduction to Sociology (1.0)

Thinking sociologically enables us to understand the intersection of our individual lives with larger social issues and to grasp how the social world works. Students in this course will become familiar with the background of sociology and the core analytical concepts employed by sociologists. Students will also gain familiarity with the major substantive topics explored by sociology, with focused attention given to the study of cultural formation, social identities, social control, social inequality, and globalization.

Instructor: Rutherford
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

SOC 108 - Thinking Global: An Introduction to Sociology (1.0)

How are your personal problems related to larger issues in society and the world? In what ways do global economic and political shifts affect your personal trajectory as a college student in the United States? In this course, you will come to understand sociology as a unique set of tools with which to interpret your relationship to a broader sociopolitical landscape. By integrating classic readings in the discipline of sociology with the principles of global political economy, we will analyze and contextualize a range of social, economic, and political phenomena at the scales of the global, the national, the local, and the individual.

Instructor: Radhakrishnan
Prerequisite: None
Distribution: SBA
Term(s): Fall

SOC 114 - First-Year Seminar: So, You Want to Be a Doctor? (1.0)

This course is not intended to persuade you to choose, or dissuade you from choosing, a career in medicine. It will introduce you to medical sociology, focusing on who becomes a doctor, the doctor's socialization in medical school, and the life of medical practice in a changing health care system. It will also consider whether a life in medicine is a spiritual vocation and the implications that such a "calling" has for the relationship between doctor and patient. Attention will be given to thinking and writing about the meaning of work in other than financially remunerative ways.

Instructor: Imber
Prerequisite: None. Open to first-year students only.
Distribution: SBA
Term(s): Fall
No letter grade.

SOC 123 - First-Year Seminar: Growing Up Unequal (1.0)

A key aspect of the classic "coming of age" story is a dawning recognition that we live in a system of social inequalities. Drawing on sociological study of childhood, emerging adulthood, and the social construction and intersection of race/class/gender, students in this first year seminar will critically examine both factual and fictional narratives of growing up in order to understand the role of structured social inequalities in shaping life chances.

Instructor: Rutherford
Prerequisite: None. Open to first-year students only.
Distribution: SBA
Term(s): Spring
Mandatory credit/noncredit.

SOC 137 - First-Year Seminar: Reading Sociology: What Literature and the Media Teach Us About Social Life (1.0)

What do we learn about class, race, and gender by reading novels? What difference does it make when we read about these ideas rather than watching programs about them on TV? This course treats
novels, short stories, poems, films, and radio and television programs as sociological texts. We will read and analyze them together to learn new concepts, methods, and analytical approaches. Class projects include debates, "author" interviews, and a creative writing project.

Instructor: Levitt
Prerequisite: None. Open to first-year students only.
Distribution: SBA
Term(s): Fall

Registration in this section is restricted to students selected for the Wellesley Plus Program. Mandatory credit/ noncredit.

**SOC 138 - Deviance and Conformity: An Introduction to Sociology (1.0)**

Why are some behaviors, differences, and people considered deviant or stigmatized while others are not? This introductory sociology course examines several theories of social deviance that offer different answers to this question. We will focus on the creation of deviant categories and persons as deviant, how people enter deviant roles, how others respond to deviance, and how those labeled as deviant cope with these responses.

Instructor: Cuba
Prerequisite: None
Distribution: SBA
Term(s): Fall

**SOC 150 - The Individual and Society (1.0)**

Examination of the idea of the individual, the concept of individuality, and the ideology of individualism in comparative-historical perspective. Focus on social conceptions of the individual; free-will versus determinism; the social nature of mind and self; the role of the individual in social change; the state and the individual; tensions between individualism and collectivism; the quest for individuality and authenticity in the modern world. Draws on classic and contemporary works in sociology in an interdisciplinary framework.

Instructor: Cushman
Prerequisite: Open to first- and second-year students only.
Distribution: SBA; EC
Term(s): Spring

**SOC 190 - Introduction to Probability and Statistical Methods w/Lab (1.0)**

An introduction to the collection, analysis, interpretation, and presentation of quantitative data as used to understand problems in economics and sociology. Using examples drawn from these fields, this course focuses on basic concepts in probability and statistics, such as measures of central tendency and dispersion, hypothesis testing, and parameter estimation. Data analysis exercises are drawn from both academic and everyday applications.

Instructor: Levine (Economics), Swingle, McKnight (Economics)
Prerequisite: ECON 101, ECON 102, or one course in sociology and fulfillment of the basic skills component of the Quantitative Reasoning Requirement. Not open to students who have taken or are taking MATH 220, PSYC 205, or POL 199.
Cross-Listed as ECON 103
Distribution: SBA; QRF
Term(s): Fall; Spring; Summer I

Students must register for a laboratory section, which meets an additional 70 minutes each week. Does not satisfy the laboratory requirement.

**SOC 200 - Classical Sociological Theory (1.0)**

A survey of the origins of sociology through the works of the classical founders of the discipline. Focused attention is given to the writings of Marx, Weber, and Durkheim, with emphasis on learning to read and interpret primary texts. Students will understand foundational sociological concepts as used by classical theorists and will also apply these concepts to understand contemporary social life. Students will also explore the development of the canon of classical sociological theory with special emphasis on the place of women and African Americans in the history of that canon.

Instructor: Rutherford
Prerequisite: One 100-level unit. Required of all majors.
Distribution: SBA
Term(s): Fall; Summer I

**SOC 201 - Contemporary Sociological Theory (1.0)**

An overview of important twentieth-century social and cultural theories. Focus on functionalist analysis, social conflict theory, dramaturgical theory, theories of modernity, and cognitive sociology. Class lectures and written work will focus on the application of sociological theories to the interpretation of a wide range of empirical phenomena.

Instructor: Cushman
Prerequisite: SOC 200. Required of all majors.
Distribution: SBA
Term(s): Spring

**SOC 202 - Human Rights in Global Context (1.0)**

Human rights is one of the most powerful approaches for promoting freedom and social justice in the contemporary world. This course offers critical social science analyses of human rights as a social, cultural, and legal system. It explores the historical and philosophical origins of the contemporary human rights system and its growth and development as a global social movement over the last few decades. This includes the evolution of the idea of individual rights to include social, economic, and cultural rights and the collective rights of indigenous peoples. Other topics include: the ongoing controversy between human rights claims to universalism in contrast to assertions of cultural difference; the rise of nongovernmental human rights organizations and the globalization of human rights; humanitarian intervention; the rights of vulnerable groups such as children and the poor; and the emergence of violence against women as a human rights issue.

Instructor: Cushman
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

**SOC 203 - Social Problems (1.0)**

This course investigates why certain problems become matters of significant public and policymaking concern while others do not. We do not focus on a predefined list of social problems but rather on the process by which some issues capture more attention than others. Our discussions analyze the actions of those institutions involved either in calling public attention to or discounting public attention away from particular problems in our society. This focus enables students to acquire a perspective toward social problems that they are unlikely to gain from the many other forums where people discuss social problems, such as journalism or politics.

Instructor: Silver
Prerequisite: None
Distribution: SBA
Term(s): Fall; Summer I

**SOC 204 - Social Problems (1.0)**

This course investigates why certain problems become matters of significant public and policymaking concern while others do not. We do not focus on a predefined list of social problems but rather on the process by which some issues capture more attention than others. Our discussions analyze the actions of those institutions involved either in calling public attention to or discounting public attention away from particular problems in our society. This focus enables students to acquire a perspective toward social problems that they are unlikely to gain from the many other forums where people discuss social problems, such as journalism or politics.

Instructor: Silver
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

**SOC 205 - American Families and Social Equality (1.0)**

American families are undergoing dramatic changes in social, political, and economic arenas: the rise of the dual-worker family, the increasing number of single mothers, the demands of family rights by gay and lesbian families, and the growing number of couples having children at older ages. The new economy poses real challenges for American parents as the social and economic gaps between families continue. As women dedicate a greater proportion of their time to the workplace, more children are cared for outside the home. How do children view parents' employment? How do families function when they have only limited hours together? What does fatherhood mean in these families? Using a provocative blend of social science, novels, and memoirs, we will examine how gender, race, ethnicity, and social class shape the experience of family life in the contemporary United States.

Instructor: Hertz
Prerequisite: None
Cross-Listed as: WGST 211
Distribution: SBA
Term(s): Not Offered

**SOC 209 - Social Inequality: Class, Race, and Gender (1.0)**

This course examines the distribution of social resources to groups and individuals, as well as theoretical explanations of how unequal patterns of distribution are produced, maintained, and challenged. Special consideration will be given to how race, ethnicity, and gender intersect with social class to produce different life experiences for people in various groups in the United States. Consideration will also be given to policy initiatives designed to reduce social inequalities and alleviate poverty.

Instructor: Rutherford, Silver
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Spring; Summer II

**SOC 212 - Comparative Sociology and Demography of the Family (1.0)**

An examination of the forces that shape contemporary living arrangements in American society and others. This course will cover a wide expanse of recent demographic research, including explanations for the variability of family forms based on kinship and non-kinship, changes in the meaning of marriage as well as the opportunities for marriage in Western countries; the increasing prevalence of single living in the United States; the meaning and function of friendship in different societies; the links between living arrangements and other institutions such as school and work; and the economic, social, and psychological effects of living arrangements on women, men, and children. Cross-national comparisons will be used in the course to highlight similarities and differences to American living arrangements.

Instructor: Swingle
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

**SOC 217 - Power: Personal, Social, and Institutional Dimensions (1.0)**

The study of power extends far beyond formal politics or the use of overt force into the operation of every institution and every life: how we are influenced in subtle ways by the people around us, who makes controlling decisions in the family, how
people get ahead at work, whether democratic governments, in fact, reflect the "will of the people." This course explores some of the major theoretical issues involving power (including the nature of dominant and subordinate relationships and types of legitimate authority) and examines how power operates in a variety of social settings: relations among men and women, professions, corporations, communities, nations, and the global economy.

Instructor: Cuba
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

SOC 221 - Globalization: Around the World in Fourteen Weeks (1.0)

Why are K-pop and Korean soap operas so popular among Western youth? How are international competitions like the Miss Universe pageant or the Olympics also geopolitical contests? Should Wellesley partner with Peking University? Does the globalization of production and consumption mean that we are all becoming the same? This course is about the social aspects of globalization. We will explore how family life, politics, community development, religion, humor, sports, and fashion change when they take place in an interconnected world.

Instructor: Levitt
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Spring

SOC 223 - Gender and Power in South Asia (1.0)

How do issues of gender continue to figure into the political agenda of contemporary South Asia? In this course, we will address the gendered dimensions of contemporary social, political, and economic debates in South Asia, while coming to grips with changing roles and representations of South Asian women. Topics to be covered include women's movements, the legal system, contemporary regional politics, the new economy, and popular culture.

Instructor: Radhakrishnan
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

SOC 224 - Gender and International Development (1.0)

As theoretical approaches to studying gender have shifted in the academic world, practical approaches to international development have changed to reflect them. In this course, we will focus on the relationship between theories of gender and their translation into policies and programs designed to ameliorate the lives of the world's poorest over the past several decades. In so doing, we will discuss the major trends in feminist theorizing, particularly in the postcolonial world, as well as the shifting paradigms of local and global organizations in designing and implementing "local" development projects. Topics to be addressed include microfinance, water distribution, land reform, and economic liberalization in Asia, Africa, and Latin America.

Instructor: Radhakrishnan
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

SOC 229 - Rebels with a Cause: The Tiananmen Movement and Collective Memory in China (1.0)

Sociological examination of the background, major events, and the long-term impact of the Tiananmen Movement in Chinese society. Focus on the "collective memory" of Tiananmen and the different interpretations of this event in the various thought communities that comprise Chinese society. Promotes understanding of contemporary China through an approach that stresses social science studies of social movements, democratization, political socialization, and collective memory. Topics include: the role of youth resistance to the one-party state; state responses to the Tiananmen movement; intensification of counterpropaganda in the post-89 context; the role of the Tiananmen movement in anti-communist uprisings in Eastern Europe; and current narratives and cultural memories of Tiananmen in contemporary Chinese society. Includes study of the sociological method of life history analysis and the difficulties of social science research in authoritarian societies.

Instructor: He
Prerequisite: None
Distribution: SBA
Term(s): Fall

SOC 230 - Methods of Social Research (1.0)

This course introduces some of the more prominent qualitative and quantitative methods used by sociologists to study the social world. The course emphasizes hands-on experience with several small-scale research projects with the goal of teaching students how to 1) integrate social theory with research methods, 2) ask good research questions, 3) define key concepts, 4) choose appropriate samples, 5) collect high-quality data in an ethical manner, 6) analyze data, and 7) write formal research papers. A section of this course will build upon the statistics learned in SOC 190, but statistics will not be the main focus.

Instructor: Swingle
Prerequisite: SOC 190/ECON 103 or permission of the instructor. Required of all sociology majors. Not open to students who have taken this course as SOC 301.
Distribution: SBA
Term(s): Spring

SOC 236 - Salsa and Ketchup: How Immigration is Changing the U.S. (1.0)

We live in a world on the move. There are an estimated 214 million international migrants worldwide. One out of every 33 persons in the world today is a migrant. In the United States, immigrants and their children make up nearly 25 percent of the population. This course is about the changing face of the United States. We use the Greater Boston Metropolitan area as a lab in which to explore race and ethnicity, immigration incorporation, and transnationalism. Fieldwork projects will examine how immigrants affect the economy, politics, and religion. We will also track contemporary debates around immigration policy.

Instructor: Levitt
Prerequisite: None
Cross-Listed as: AMST 246
Distribution: SBA
Term(s): Fall

SOC 241 - A Nation in Therapy (1.0)

What is therapy? Although historically tied to the values and goals of medicine, the roles that therapy and therapeutic culture play in defining life, liberty, and the pursuit of happiness are now ubiquitous. The impact of therapeutic culture on every major social institution, including the family, education, and the law, has created a steady stream of controversy about the ways in which Americans in particular make judgments about right and wrong, about others, and about themselves. Are Americans obsessed with their well being? Is there a type of humor specific to therapeutic culture? This course provides a broad survey of the triumph of the therapeutic and the insights into the character and culture that triumph reveals.

Instructor: Imber
Prerequisite: None
Cross-Listed as: AMST 241
Distribution: SBA
Term(s): Spring

SOC 246 - Salsa and Ketchup: How Immigration is Changing the U.S. (1.0)

We live in a world on the move. There are an estimated 214 million international migrants worldwide. One out of every 33 persons in the world today is a migrant. In the United States, immigrants and their children make up nearly 25 percent of the population. This course is about the changing face of the United States. We use the Greater Boston Metropolitan area as a lab in which to explore race and ethnicity, immigration incorporation, and transnationalism. Fieldwork projects will examine how immigrants affect the economy, politics, and religion. We will also track contemporary debates around immigration policy.

Instructor: Levitt
Prerequisite: None
Cross-Listed as: AMST 246
Distribution: SBA
Term(s): Fall

SOC 251 - Racial Regimes in the United States (1.0)

Racial categorization is an abstraction, yet its effects on our individual and collective lives are acutely real. How can we understand the mechanisms of racial domination in our society? In this class, we will move toward the formulation of a sociological conception of race by examining race comparatively in societies around the world. We will question and examine our own notions of race made in the United States, even as we explore institutions of racial domination in other parts of the world. Case studies will include the penal system in the United States, apartheid and post-apartheid states in South Africa, Brazil's "racial democracy," Chicago’s Black Metropolis, and caste systems in India and Japan, among other examples.

Instructor: Radhakrishnan
Prerequisite: At least one social science course required.
Distribution: SBA
Term(s): Spring

SOC 289 - Rebels with a Cause: The Tiananmen Movement and Collective Memory in China (1.0)

Sociological examination of the background, major events, and the long-term impact of the Tiananmen Movement in Chinese society. Focus on the "collective memory" of Tiananmen and the different interpretations of this event in the various thought communities that comprise Chinese society. Promotes understanding of contemporary China through an approach that stresses social science studies of social movements, democratization, political socialization, and collective memory. Topics include: the role of youth resistance to the one-party state; state responses to the Tiananmen movement; intensification of counterpropaganda in the post-89 context; the role of the Tiananmen movement in anti-communist uprisings in Eastern Europe; and current narratives and cultural memories of Tiananmen in contemporary Chinese society. Includes study of the sociological method of life history analysis and the difficulties of social science research in authoritarian societies.

Instructor: He
Prerequisite: None
Distribution: SBA
Term(s): Fall

SOC 304 - Modernity and Social Change (1.0)

This seminar focuses on sociological theories of modernity that seek to understand changes in a variety of social and cultural spheres. Substantive questions and themes include: the rise of individuality and individualism in modern societies; the quest for sincerity and authenticity in personal life; ideological conformity and the problem of freedom; cultural narcissism and the postponement of adolescence; the rise of the surveillance state and threats to privacy and individual rights; the violent consequences of unrestrained state power; terrorism and modernity; and the sociology of modern love.

Instructor: Cushman
Prerequisite: Open to juniors and seniors only. SOC 200 and SOC 201 recommended
Distribution: SBA
Term(s): Fall

SOC 306 - Seminar. Women and Work (1.0)

As theoretical approaches to studying gender have shifted in the academic world, practical approaches to understanding the role of women in society have also changed. This seminar examines the role of galleries, publishers, museums, and the media in the production and consumption of art. How do local and global institutions change as nations change? How is the politics, the new economy, and popular culture. Topics to be covered will include women's art, art, and the media, and gender. How do art institutions differ from Al Jazeera in Arabic? This course explores some of the major theoretical issues involving power (including the nature of dominant and subordinate relationships and types of legitimate authority) and examines how power operates in a variety of social settings: relations among men and women, professions, corporations, communities, nations, and the global economy.
The biggest force for change in the U.S. economy has been the growing diversity of the American labor force. The first half of the course emphasizes the impact of gender and racial diversity on the nature of work in America. We will discuss four key aspects: 1) the dynamics of gender and race in the workplace; 2) the tensions between work/family and gender equity; 3) the struggle to integrate women into male-dominated occupations and professions; and 4) the challenges for women in leadership roles. The second half of the course will focus on women as critical to the “new” global workforce in selected regions. We will discuss: 1) women’s migration and domestic work; 2) the paradox of caring for others while leaving one’s children behind; 3) women in global factories; and 4) women’s activism in their home communities.

Instructor: Hertz
Prerequisite: Priority will be given to sociology or women’s and gender studies majors/minors who have taken at least two courses at the 200 level in their respective major. Permission of the instructor is required for all other students.

**SOCT 307 - Learning by Giving: Nonprofit Organizations and American Cities in the Twenty-First Century (1.0)**

The goals of this experimental team-taught course are several: 1) to develop a community-based research experience that will strengthen students’ substantive understanding of American cities and the organizations that serve their populations; 2) to offer students the opportunity to hone their social science research skills; 3) to strengthen students’ communication skills by offering them an alternative venue and audience for their writing; and 4) to foster collaboration among students on a project of consequence. Students will work in teams to research, write, and submit a grant application for a nonprofit organization working on homelessness or affordable housing. Course participation will require travel to Boston. Preference will be given to students who have a demonstrated commitment to service.

Instructor: Cuba, Brubaker (The Writing Program)
Prerequisite: One 200-level course in the social sciences. Enrollment is limited. Students must fill out an application available in the Sociology Department. Completed applications are due no later than noon on Thursday, April 10.

Cross-Listed as: WGST 306
Distribution: SBA
Term(s): Fall

**Ann E. Maurer ’51 Speaking Intensive Course**

**SOC 309-01-S - Seminar. Topics in Inequality (1.0)**

**Topic for 2014-15: Critical Intersections: Race, Class, Gender, and Nation**

In an increasingly borderless world, does the nation still inspire a sense of community and belonging? How are nations built and sustained? In this course, we will tackle these questions through the vocabularies of feminism, critical race theory, and postcolonial critique. By focusing on the mutual constitution of race, class, and gender, we will think about the nation as a tenuous patchwork of meanings that work together in different ways across various his-torical and spatial contexts, such as the U.S., India, and South Africa.

Instructor: Radhakrishnan
Distribution: SBA
Term(s): Spring

**SOC 310 - Encountering the Other: Comparative Perspectives on Mobility and Migration (1.0)**

This course looks comparatively and historically at the social and cultural aspects of migration and mobility. We will study different kinds of movement, involving different levels and intensity of contact between residents and newcomers. How does the “encounter” differ when it involves a tourist versus a permanent settler? How does the migration of ideas and practices enable the migration of people? How is ethnic, racial, and religious diversity managed in different contexts? Class projects will include oral histories, media and literary analyses, and a major independent research paper on the immigrant experience in a country of the student’s choice.

Instructor: Levitt
Prerequisite: One 100-level unit or permission of the instructor.
Distribution: SBA
Term(s): Spring

**SOC 311 - Families, Gender, the State and Social Policies (1.0)**

This course examines the politics facing contemporary U.S. families and potential policy directions at the State and Federal Levels. Discussion of the transformation of American families including changing economic and social expectations for parents, inequality between spouses, choices women make about children and employment, daycare and familial care giving, welfare and unemployment, and new American dreams will be explored.

This course will also examine as part of government incentives to promote self-sufficient families. Expanding family forms (i.e. single mothers by choice, lesbian/gay/trans families) through the use of new reproductive technologies is emphasized as examples of legislative reform and the confusion surrounding genetic and social kinship is explored. Comparisons to other contemporary societies will serve as foils for particular analyses. Students will learn several types of research methodologies through course assignments. Student groups will produce an original social policy case.

Instructor: Hertz
Prerequisite: Open to juniors and seniors. Priority will go to sociology and WGST majors and minors.
Cross-Listed as: WGST 311
Distribution: SBA
Term(s): Spring

**SOC 314 - Global Health and Social Epidemiology (1.0)**

Concerns about the health of communities date back to antiquity. Social epidemiology is the study of the incidence and distribution of disease among populations. This course offers historical, sociological, and ethical perspectives on the uses of epidemiology as it emerged from an age defined principally by infectious disease to one of chronic illness. What are the social and collective responses to pandemics, real and imagined? Case studies address in particular global public health issues, including smoking, nutrition, AIDS, mad cow disease, and influenza, among others. Both governmental and nongovernmental approaches to health, including the World Health Organization and Doctors Without Borders, are considered. Special attention is given to disparities in health care, a core sociological focus.

Instructor: Imber
Prerequisite: One 200-level unit or permission of the instructor.
Distribution: SBA
Term(s): Fall

**SOC 318 - Punishment (1.0)**

Over the past 30 years the purposes and practices of punishment in the United States have changed dramatically, becoming increasingly harsh (death penalty, three strikes, supermax prisons), retributive (an abandonment of rehabilitation efforts) and far reaching (more than 2 million Americans are in prison or jail). These changes represent a near-complete and rapid reversal of long-term trends in penal justice in the United States. This course explores the cultural, demographic, political, and technological factors that moved crime from a remote possibility in the minds of most Americans to a defining concern of a nation. Why, despite similar experiences of modernity, are European democracies characterized by such different cultures of control? What do our penal practices reveal about contemporary American culture, social structure, and politics?

Instructor: Cuba
Prerequisite: One 200-level course in sociology, or by permission of the instructor. Preference will be given to students who have taken SOC 138.
Distribution: SBA
Term(s): Spring

**SOC 319 - Causal Inference (1.0)**

This course focuses on statistical methods for causal inference, with an emphasis on how to frame a causal (rather than associative) research question and design a study to address that question. What implicit assumptions underlie claims of discrimination? Why do we believe that smoking causes lung cancer? We will cover both randomized experiments – the history of randomization, principles for experimental design, and the non-parametric foundations of randomization-based inference – and methods for drawing causal conclusions from non-randomized studies, such as propensity score matching. Students will develop the expertise necessary to assess the credibility of causal claims and master the conceptual and computational tools needed to design and analyze studies that lead to causal inferences. Examples will come from economics, psychology, sociology, political science, medicine, and beyond.

Instructor: Pattanayak
Prerequisite: Any of ECON 203, SOC 290, POL 199, PSYC 305 or a Psychology 300-level R course; or permission of the instructor.
Cross-Listed as: ECON 309 and QR 309
Distribution: SBA
Term(s): Not Offered
SOC 320 - Technology, Society, and the Future (1.0)
This course explores the powerful roles that technology plays in contemporary social life and suggests that some of the impacts that our ever-greater reliance on, and faith in, technology might have upon our lives. The course begins with a critical overview of the heralded promises that technology often carries; here, we explore some of the undersides of so-called "technological progress." The remainder of the course examines a variety of salient contemporary issues concerning the social implications of technological change.
Instructor: Silver (Framingham State University)
Prerequisite: None
Distribution: SBA
Term(s): Summer I

SOC 334 - Consumer Culture (1.0)
How and why does consumerism exercise such great an influence on global culture today? How are our institutions and relationships shaped and transformed by the forces of commodification and consumerism? Are there any realms of life that ought to be free from the market-driven forces of commodification? Can consumerism offer a positive means of cultural critique to processes we wish to resist? In this seminar, we explore the history of consumer culture in the United States and globally, with special attention to understanding the effects of commodification upon the self, human relationships, and social institutions. We will consider both classical and contemporary critiques of commodification and consumerism, as well as arguments for the liberatory dimensions of consumer society.
Instructor: Rutherford
Prerequisite: A 100-level sociology course or permission of the instructor; preference will be given to sociology majors.
Distribution: SBA
Term(s): Not Offered

SOC 348 - Conservatism in America (1.0)
An examination of conservative movements and ideas in terms of class, gender, and race. Historical survey and social analysis of such major conservative movements and ideas as paleoconservatism, neoconservatism, and compassionate conservatism. The emergence of conservative stances among women, minorities, and media figures. The conservative critique of American life and its shaping of contemporary national discourse on morality, politics, and culture.
Instructor: Imber
Prerequisite: A 100-level sociology course or permission of the instructor. Open to juniors and seniors only.
Cross-Listed as: AMST 348
Distribution: SBA
Term(s): Spring

SOC 350 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

SOC 350H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

SOC 360 - Senior Thesis Research (1.0)
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

SOC 370 - Senior Thesis (1.0)
Prerequisite: SOC 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
AN INTERDEPARTMENTAL MAJOR AND MINOR

Associate Professor: Shubha-Bhatt (Director)
Visiting Lecturer: Delacy
Affiliated Faculty: Candland (Political Science), Kodera (Religion), Marlow (Religion), Matzner (Anthropology) Radhakrishnan (Sociology), Rao (History), Sabin (English)

The major and minor in South Asia Studies are designed to equip students with a set of methods and scholarly approaches for study of South Asia. The region includes Afghanistan, Bangladesh, Bhutan, India, the Maldives, Nepal, Pakistan, and Sri Lanka (the members of the South Asia Association for Regional Cooperation). Majors and minors gain knowledge of an important region of the world and develop facility in three significant methodological, language, aesthetic, cultural, and literary interpretation; and behavior and social analysis.

South Asia Studies Major

Goals for the South Asia Studies Major and Minor

- Expose students to exemplary models of interdisciplinary learning and critical inquiry in the arts, humanities, and social sciences
- Provide a broad understanding of South Asian cultures and societies and their complex interrelationships
- Delimit the influence and impact of South Asia beyond its borders
- Enable students to make connections among disciplines in sharp and critical ways and
- Offer students the opportunity to become critical thinkers, cogent writers, and skillful researchers on a range of questions in South Asian life, through course work, independent study, and honors work

Requirements for the South Asia Studies Major

For students entering in Fall 2009 or later, the major in South Asia Studies requires nine units, including two units of elementary Hindi/Urdu (or demonstration of equivalent), one course in the humanities from among SAS 210 [2008-09], SAS 211/REL 281, SAS 251/REL 251, and ENG 277, one course in the social sciences from among HIST 270, HIST 272, HIST 276, POL2 211, POL3 223, or SOC 233; and at least two additional units above the 100 level, and two units at the 300 level. Students are expected to concentrate in one area of South Asia Studies, defined either in relation to a discipline, such as history or religion, or in relation to a theme, such as international development, cultural expression, gender, ethnicity, and identity. The major requires four courses in the area of concentration above the 100 level, including at least one of the required 200-level courses. Advanced study of Hindi/Urdu (or another Indian language) may be substituted for the Hindi/Urdu requirement and may be pursued as either a 200 course, or in an approved course at another institution. Majors devise their programs in consultation with an advisor from the affiliated faculty and with the approval of the program director. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for South Asia Studies. To supplement Wellesley's offerings, students are encouraged to take courses for the major at neighboring institutions such as Brandeis, Olin, and MIT. Majors are also encouraged to study at approved academic programs in South Asia. Courses taken at other institutions for credit toward the major or minor must be approved in advance by the student’s advisor and program directors.

Students who entered Wellesley before Fall 2009 may elect to complete the major requirements in effect at the time and should discuss this with their major advisor.

Honors in South Asia Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Courses for Credit Toward the South Asia Studies Major

ANTH 237, LGWS 247

ANTH 247 - Ethnography in/of South Asia

ENG 277 - From Gandhi to Jhumpa Lahiri: Modern Indian Literature

HIST 272 - Political Economy of Development in Colonial and Postcolonial South Asia

HIST 276 - The City in South Asia

HIST 382 - Seminar: Gandhi, Nehru, and Ambedkar: The Making of Modern India

HIST 396 - Port Cities of the Indian Ocean in Historical Perspective

PEAC 104 - Introduction to the Study of Conflict, Justice, and Peace

POL2 202 - Comparative Politics

POL2 204 - Political Economy of Development and Underdevelopment

POL2 211 - Politics of South Asia

POL2 219 - Politics of Human Development in Pakistan

POL2 307 - Women and Development

POL2 310 - Seminar: Politics of Community Development

POL2 323 - International Relations of South Asia

POL3 323 - International Economic Policy

REL 108 - Introduction to Asian Religions

REL 253 - Buddhist Thought and Practice

REL 260 - Islamic/ate Civilizations

REL 261 - Cities of the Islamic World

REL 262 - The Formation of the Islamic Tradition

REL 263 - Islam in the Modern World

REL 364 - Seminar: Sufism: Islamic Mysticism

REL 367 - Seminar: Muslim Travelers

SOC 221 - Globalization: Around the World in Fourteen Weeks

SOUTH ASIA STUDIES Minor

Requirements for the South Asia Studies Minor

A minor in South Asia Studies consists of five units, of which at least one should be at the 300 level (excluding 350). A program for the minor must include one course in the humanities from among SAS 210 [2008-09], SAS 211/REL 281, SAS 251/REL 251, and ENG 277, and one course in the social sciences from among HIST 272, HIST 276, POL2 211, POL3 223, or SOC 233; only one course at the 100 level can be counted toward the minor. Elementary Hindi/Urdu does not count toward the minor.

HNRU - Hindi Urdu Courses

HNRU 101 - Elementary Hindi/Urdu (1.0)

An introduction to the most widely spoken language in the South Asian subcontinent, which is also used extensively for interregional and international communications. Learning this language provides a linguistic passport to things South Asian. The language—often referred to as "Hindustani"—is written in two different scripts: the Perso-Arabic based Urdu, and the Sanskrit based Devanagari [Hindi]. Students will learn to converse in the language and to read and write in both scripts. Conventional teaching materials will be supplemented by popular songs and clips from contemporary Indian cinema and television, the two internationally popular media that use this language.

Instructor: Shukla-Bhatt

Distribution: None

Term(s): Fall

Each semester of HNRU 101 and HNRU 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

HNRU 102 - Elementary Hindi/Urdu (1.0)

An introduction to the most widely spoken language in the South Asian subcontinent, which is also used extensively for interregional and international communications. Learning this language provides a linguistic passport to things South Asian. The language—often referred to as "Hindustani"—is written in two different scripts: the Perso-Arabic based Urdu, and the Sanskrit based Devanagari [Hindi]. Students will learn to converse in the language and to read and write in both scripts. Conventional teaching materials will be...
supplemented by popular songs and clips from contemporary Indian cinema and television, the two internationally popular media that use this language.

Instructor: Shukla-Bhatt
Prerequisite: HNUR 101
Distribution: None
Term(s): Spring

Each semester of HNUR 101 and HNUR 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

HNUR 201 - Intermediate Hindi/Urdu (1.0)

Intermediate Hindi/Urdu will build on the reading, writing, and speaking skills acquired in Introductory Hindi/Urdu (HNUR 101-HNUR 102). The readings, drawn from simple literary texts as well as from social and journalistic writings, will reinforce the grammar learned in the introductory course and introduce new grammar topics. The writing exercises—mainly in essay formats—will stress usage of idioms and sentence constructions by students. The class will be conducted in Hindi/Urdu with a part of every class dedicated to conversation on the theme of the day in the language.

Instructor: Delacy
Prerequisite: HNUR 101-HNUR 102 or equivalent.
Distribution: None
Term(s): Fall

Each semester of HNUR 201 and HNUR 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

HNUR 202 - Intermediate Hindi/Urdu (1.0)

Intermediate Hindi/Urdu will build on the reading, writing, and speaking skills acquired in Introductory Hindi/Urdu (HNUR 101-HNUR 102). The readings, drawn from simple literary texts as well as from social and journalistic writings, will reinforce the grammar learned in the introductory course and introduce new grammar topics. The writing exercises—mainly in essay formats—will stress usage of idioms and sentence constructions by students. The class will be conducted in Hindi/Urdu with a part of every class dedicated to conversation on the theme of the day in the language.

Prerequisite: HNUR 101-HNUR 102 or equivalent.
Distribution: LL
Term(s): Spring

Each semester of HNUR 201 and HNUR 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SAS - South Asia Studies Courses

SAS 206 - The Hindu Worlds (1.0)

This course will examine the major aspects of the constellation of distinct but interrelated religious traditions of South Asia generally entitled "Hinduism." The course will have three foci. One will be the intersecting ritual, philosophical, and devotional currents that laid the historical foundations of this tradition and form integral parts of it to this day. The second focus will be on Hindu social organization and issues of political identity. This will cover the Hindu social divisions of caste, gendered roles and rituals as well as issues related to Hindu nationalism. The third focus will be on practices followed by and negotiations made by diaspora Hindus, especially those settled in America. This area will focus especially on Hindu responses to diversity and interfaith dialogue.

Instructor: Shukla-Bhatt
Prerequisite: None
Cross-Listed as: REL 206
Distribution: REP
Term(s): Not Offered

SAS 211 - Sacred Arts of South Asia (1.0)

Cultural life in South Asia is vibrant with aesthetic expressions of religion in its diverse traditions—Hindu, Muslim, Buddhist, Jain, Sikh, and Christian. This course introduces students to one of the most powerful avenues for transmission of religious knowledge in the traditions of South Asia—the aesthetic experience derived through a variety of forms. In addition to visual images sent through architectural motifs and paintings, teaching of religious doctrines in drama, dance, and musical performance is common across religious boundaries. The course will introduce theories of aesthetic experience and religious knowledge from the subcontinent and relate them to contemporary theories of performance.

Instructor: Shukla-Bhatt
Prerequisite: None
Cross-Listed as: REL 281
Distribution: ARS REP
Term(s): Not Offered

SAS 250 - Research or Individual Study (1.0)

Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

SAS 251 - Religions in South Asia (1.0)

An examination of the religions of South Asia as expressed in sacred texts and arts, religious practices, and institutions in a historical manner. Concentration on the origins and development of Hindu traditions, Buddhist, Jainism, and Sikhism, as well as integration of Islam and Christianity in the religious landscape of South Asia. Interactions among the diverse communities of the region will also form a major theme.

Instructor: Shukla-Bhatt
Prerequisite: None
Cross-Listed as: REL 251
Distribution: REP HS
Term(s): Not Offered

SAS 252 - Women and Religion in South Asia (1.0)

This course explores the role religion plays in the lives of women across various religious communities in South Asia and conversely, the roles women play in these religious worlds. The exploration focuses on three interconnected aspects of women’s lives in the religious worlds of South Asia: 1) prescriptions for women in sacred texts and the power of ideology on their lives; 2) women’s struggles and negotiations in face of the restrictions put on them; 3) achievements of extraordinary and ordinary women historically and in contemporary times. Additionally, it aims to examine how the various religious traditions of South Asia respond to aspirations and struggles as women. Passages from sacred texts, women’s own writings, historical accounts, video clips of women’s rites, and films will provide the sources for our exploration.

Instructor: Shukla-Bhatt
Prerequisite: None
Cross-Listed as: REL 252
Distribution: REP
Term(s): Fall

SAS 291 - Seminar. Religion in Modern South Asia (1.0)

In many parts of South Asia, the encounter with modernity coincided with colonial rule. This complex history added to the tension between modernity and religious traditions. This seminar will examine the texts, intellectual discourses, political movements, and social changes emerging from religious phenomena in South Asia from 1800 to the present. Students will not only examine specific historical events, but also reflect on how this historical knowledge can be applied in the areas of development, international relations, and human rights movements.

Instructor: Shukla-Bhatt
Prerequisite: Two units at the 200 level in South Asia studies, or by permission of the instructor.
Cross-Listed as: REL 301
Distribution: REP HS
Term(s): Spring

SAS 292 - Traditional Narratives of South Asia (1.0)

This course will explore traditional narratives from South Asia that have had significant cultural impact in the region. We will examine classical epic texts, hagiographical literature of diverse religious traditions, and regional folktales in translations not only as channels for transmission of cultural values, but also as sites of debate and sometimes even conflict through their contested interpretations. Examples of contested texts, such as the epic Ramayana, told in elite Hindu, Dalit, Jain, and Buddhist traditions, will be explored. Along with texts, performative traditions of these texts and their use in identity politics will be discussed.

Instructor: Shukla-Bhatt
Prerequisite: Two units at the 200 level in South Asia studies, or by permission of the instructor.
Distribution: LI REP
Term(s): Not Offered

SAS 293 - Seminar. South Asian Models of Religious Pluralism (1.0)

This seminar will explore in a historical manner the development of pluralistic discourses, ideologies, and interactions in South Asia. While remaining focused on South Asia, we will consider more generally the implications of this history for other religiously diverse societies. Readings will range from ancient texts, such as the Upanishads, Dharmapada, medieval writings of Sufi, Sikh and bhakti traditions, to historical documents about policies of Mogul emperor Akbar, and modern writings on pluralism, including Gandhi’s. We will also study the relationship of religious diversity to violence, and modern projects, by Diana Eck and others, to promote sustainable models of religious pluralism. Final projects will give students the opportunity to develop their own model for religious pluralism in a specific part of the world.

Instructor: Shukla-Bhatt
Prerequisite: Open by permission of the instructor.
Cross-Listed as: REL 303
Distribution: REP HS
Term(s): Not Offered

SAS 294 - The Hindu Worlds (1.0)

This course will examine the major aspects of the constellation of distinct but interrelated religious traditions of South Asia generally entitled "Hinduism." The course will have three foci. One will be the intersecting ritual, philosophical, and devotional currents that laid the historical foundations of this tradition and form integral parts of it to this day. The second focus will be on Hindu social organization and issues of political identity. This will cover the Hindu social divisions of caste, gendered roles and rituals as well as issues related to Hindu nationalism. The third focus will be on practices followed by and negotiations made by diaspora Hindus, especially those settled in America. This area will focus especially on Hindu responses to diversity and interfaith dialogue.

Instructor: Shukla-Bhatt
Prerequisite: Open by permission of the instructor.
Cross-Listed as: REL 304
Distribution: REP HS
Term(s): Not Offered
nationalism. The third focus will be on practices followed by and negotiations made by diaspora Hindus, especially those settled in America. This area will focus especially on Hindu responses to diversity and interfaith dialogue.

Instructor: Shukla-Bhatt
Prerequisite: SAS 251/REL 251 or permission of the instructor.
Cross-Listed as: REL 304
Distribution: REP
Term(s): Not Offered

**SAS 350 - Research or Individual Study (1.0)**
Prerequisite: Permission of the instructor. Open to juniors and seniors.
Distribution: None
Term(s): Fall; Spring

**SAS 350H - Research or Individual Study (0.5)**
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

**SAS 360 - Senior Thesis Research (1.0)**
Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**SAS 370 - Senior Thesis (1.0)**
Prerequisite: SAS 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
DEPARTMENT OF SPANISH

Spanish is one of the most widely spoken languages in the United States and the world today. The Spanish department offers a variety of courses intended to help students acquire proficiency in the language and develop critical skills of analysis and interpretation for exploring the rich and varied literatures and cultures that have emerged over 10 centuries in the Spanish-speaking world. The program emphasizes fundamental links between the study of language and its broader cultural contexts.

Spanish Department Information
Courses are normally conducted in Spanish; oral expression is stressed.
The department reserves the right to place new students in the courses for which they seem best prepared regardless of the number of units they have offered for admission.
SPAN 101-SPAN 102 and SPAN 201-SPAN 202 are counted toward the degree, but not toward the major.

Spanish Major
Goals for the Spanish Major
• Achieve linguistic fluency required to actively participate in Spanish-language settings (daily life, international study, professional interactions, undergraduate and graduate research)
• Attain proficiency in the critical analysis of literary works in Spanish, including a foundation in literary theory, canonical texts and emerging creative forms and media
• Develop a cultural and historical understanding of the diversity of the Hispanic world and its ongoing evolution in a contemporary setting

Requirements for the Spanish Major
A minimum of eight units exclusive of SPAN 101-SPAN 102 and SPAN 201-SPAN 202 must be presented for the Spanish major. Also required are at least two 300-level units, including a seminar during the senior year. Both of the 300-level courses counted toward the major must be taken at Wellesley. SPAN 350, SPAN 360, and SPAN 370 count toward the major, but normally do not fulfill the two 300-level courses requirement.
The major in Spanish incorporates considerable flexibility in designing a program of study, but must include the following elements, chosen in consultation with the major advisor:
• Foundational work: normally SPAN 241 and/or SPAN 242. Qualified students may begin the major at a higher level
• Breadth: course work focused on Spain as well as offerings focused on the Americas
• Depth: two units in which a student concentrates on a special field of her choice, such as:
  • A single literary or artistic form (i.e., prose narrative, poetry, film)
  • A broad cultural movement or theme (i.e., modernity, feminism, human rights)
  • A specific region of the Spanish-speaking world (i.e., Mesoamerica, Southern Cone, the Caribbean, U.S. Latino) and its cultural production
• Historical perspective: at least one unit in Medieval, Renaissance, Golden Age, or Latin American Colonial literature and culture
Upon approval from the department, up to four courses taken during a semester of study away from Wellesley and up to five during a full academic year away may be counted toward the major.

For students interested in an interdisciplinary approach to the study of Latin America, also available is the interdepartmental major in Latin American Studies, which allows students to choose from a list of courses in different departments, including Spanish. Majors devise their own programs in consultation with the directors of Latin American Studies. Students are referred to the Latin American studies interdepartmental program listing for further information.

Honors in Spanish
The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Teacher Certification in Spanish
Students interested in obtaining certification to teach Spanish in the Commonwealth of Massachusetts should consult Professor Renjilian-Burgy, Department of Spanish, and Professor Hawes of the Department of Education.

Advanced Placement Policies and Language Requirement in Spanish
A student may receive one unit of credit and satisfy the foreign language requirement with a grade of 5 on either of the AP Spanish exams. She will lose the AP credit(s) if she takes SPAN 202 or a lower-numbered course. AP credit does not count toward the major in Spanish.

International Study in Spanish
Qualified majors are encouraged to spend a semester or a year in a Spanish-speaking country either with Wellesley’s consortium program in Córdoba, Spain, and in partnership with Middlebury in Santiago, Chile, or another approved program. To be eligible for study in Córdoba for one or two semesters in Wellesley’s Programa de Estudios Hispánicos en Córdoba (PRESHCO), or in Santiago with the Middlebury in Chile Program a student should ordinarily be enrolled in SPAN 241 or a higher-level language or literature course the previous semester.

Courses for Credit Toward the Spanish Major
EDUC 308 Seminar: World Languages Methodology
EDUC 325 Seminar: English as a Second Language via Immersion

PORT - Portuguese Courses

PORT 103 - Intensive Elementary Portuguese (1.25)
An accelerated introduction to listening, speaking, reading, and writing in Portuguese, with emphasis on Brazilian culture. Authentic cultural readings, art, music, and films will be included. The course covers the full-year elementary language curriculum in one semester. In Portuguese. Four 70-minute classes plus an additional 20-minute period.
Instructor: Igrejas
Prerequisite: Fluency in Spanish (SPAN 202 or above) or permission of the instructor.
Distribution: None
Term(s): Fall

PORT 203 - Intensive Intermediate Portuguese (1.25)
An accelerated intensive review of all language skills and continued study of Lusophone art, music, film, and literature. Emphasis on oral and written expression and critical analysis. The course covers the full-year intermediate language curriculum in one semester. In Portuguese. Four 70-minute classes plus an additional 20-minute period.
Instructor: Igrejas
Prerequisite: PORT 103 or permission of the instructor.
Distribution: LL
Term(s): Spring

PORT 250 - Research or Individual Study (1.0)
Instructor: Igrejas
Distribution: None
Term(s): Fall; Spring

SPAN - Spanish Courses

SPAN 101 - Elementary Spanish (1.0)
Introduction to spoken and written Spanish; stress on interactive approach. Extensive and varied activities, including oral presentations, cultural readings and recordings, and video program. Three periods.
Instructor: Hall, Staff
Prerequisite: Open to all students who do not present Spanish for admission.
Distribution: None
Term(s): Fall; Summer I
Each semester of SPAN 101-SPAN 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SPAN 102 - Elementary Spanish (1.0)
Introduction to spoken and written Spanish; stress on interactive approach. Extensive and varied activities, including oral presentations, cultural readings and recordings, and video program. Three periods.
Instructor: Hall, Staff
Prerequisite: SPAN 101
Distribution: None
Term(s): Fall; Summer II
Each semester of SPAN 101-SPAN 102 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SPAN 110 - First-Year Seminar: Learning Language through Culture, Learning Culture through Language (1.0)
This course is for students who have learned Spanish primarily through an immersion experience abroad or at home. Participants in the course will have the opportunity to improve their written and oral Spanish language through the examination of cultural assumptions and values. Content is based on
a variety of topics such as legends, differing historical perspectives, religious traditions, family values, and others. The review of language structures and grammar will emerge from students' language levels, needs, and interests. Participants will read novels, short stories, plays, essays, and articles. They will listen to music and examine videos illustrating experiences of Spanish language learners in the United States and abroad. By the end of the semester, students will gain an understanding of how their culture influences their language learning and how their language learning affects their perspective of Latino/Hispanic culture. The course will be conducted exclusively in Spanish. At the end of the course, students will be advised about placement into further Spanish courses, based on their level of fluency.

Instructor: Darer
Prerequisite: For first-year students only who have learned Spanish primarily through an immersion experience abroad or at home.
Distribution: None
Term(s): Fall
Shadow graded.

SPAN 201 - Intermediate Spanish (1.0)
Intensive review of all language skills and introduction to the art, literature, and cultures of Spain and Latin America. Emphasis on oral and written expression and critical analysis. Three periods.
Instructor: Darer, Staff
Prerequisite: Two admission units in Spanish or SPAN 101-SPAN 102.
Distribution: None
Term(s): Fall, Summer I
Each semester of SPAN 201 and SPAN 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SPAN 202 - Intermediate Spanish (1.0)
Intensive review of all language skills and introduction to the art, literature, and cultures of Spain and Latin America. Emphasis on oral and written expression and critical analysis. Three periods.
Instructor: Darer, Staff
Prerequisite: SPAN 201
Distribution: LL
Term(s): Spring, Summer II
Each semester of SPAN 201 and SPAN 202 earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

SPAN 241 - Introduction to Hispanic Studies (1.0)
Practice in oral and written Spanish at the advanced level. Designed to enhance communicative competence, this course will provide an intensive review of advanced grammatical structures within cultural contexts of the Spanish-speaking world. Each section will explore a specific theme through the examination of Hispanic literary texts and the arts, as well as other cultural phenomena. Varied oral interactions, technological applications, and critical writing will be stressed.
Instructor: Agosin, Gascón-Vera, Staff
Prerequisite: SPAN 201, SPAN 202, SPAN 242, or permission by the department.
Distribution: LL
Term(s): Fall, Spring
Fall 2014. Section 1: Repression, Revolution, and the Arts (this section is open to first-year students only);

Section 2: Repression, Revolution, and the Arts;
Section 3: Media, Fantasy, and Reality.
Spring 2015. Section 1: Repression, Revolution, and the Arts; Section 2: Artifacts, Images, and Texts; Section 3: Artifacts, Images, and Texts

SPAN 242 - Literary Genres of Spain and Latin America (1.0)
A course to serve as a transition between language study and literary analysis; speaking and writing organized around interpretations of different genres by Hispanic authors; creative writing; oral presentations on current events relating to Spain and Latin America; a review, at the advanced level, of selected problems in Spanish structure.
Instructor: Gascón-Vera, Hagimoto, Staff
Prerequisite: SPAN 201, SPAN 202, SPAN 241, or permission by the department.
Distribution: LL
Term(s): Fall, Spring

SPAN 245 - Maps and Minds: Inventing the Americas Through Geographic Imagination (1.0)
This course explores the mapping of the Americas from the pre-Columbian times until today through the study of the making of maps, both visual and conceptual, as well as of mapping space in literary works. Students will be introduced to the fundamentals of the history of cartography and the notion of mapping in literature. Visual materials will range from maps drawn on sand, tree, cloth, and pottery from pre-Columbian societies, such as the Incas, the Aztecs, and the Nazca; medieval, Renaissance, and contemporary maps and map art; and the most recent examples of mapping in the scientifically "accurate" maps and Latin American city subway maps. We will read works by Christopher Columbus, Jorge Luis Borges, and Belén Gopegui, and view The Motorcycle Diaries.
Instructor: Gauzauskyte
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Fall

SPAN 246 - Performative Pathways to Language Fluency: Spanish Through the Lens of Theatre (1.0)
A collaboration between the Spanish and Theatre Studies departments, this class integrates the reading, studying and performing of some of the most important plays in Spanish Theatre. Using memorization, theatre exercises and textual analysis, students will learn about the Spanish theatrical tradition while developing their language and critical skills. After the midterm assessment, the remainder of the semester will be devoted to preparation for a final public performance. In Spanish.
Instructor: Ramos, Arciniegas (Theatre Studies)
Prerequisite: SPAN 241 or SPAN 242 or functional equivalent
Cross-Listed as: THST 246
Distribution: LL; ARS
Term(s): Spring
Not open to students who have completed SPAN 314/THST 314.

SPAN 248 - forging Spanish Identities: The "City of Three Cultures" and Intercultural Dialogue (1.0)
Taught entirely in Spanish and based in Córdoba in Andalucía, Spain, the course serves as both an upper-intermediate to advanced Spanish language course and an overview of Spain’s multicultural heritage (and how an understanding of this cultural legacy—characterized by a blending of Christian, Jewish and Islamic peoples—is fundamental for a deeper understanding of contemporary intercultural synergies). Students will live with Spanish host families and classes will be held primarily in the medieval “judería” (Jewish Quarter). Program-organized local excursions include Seville and Granada. Through traditional classroom instruction, readings, audio-visual resources, workshops led by prominent local experts focusing on history, archaeology, gastronomy, music and dance, students will reflect (through writing, speaking and individually-directed research) upon the historical and contemporary realities of intercultural dialogue.
Instructor: Vega
Prerequisite: Four semesters of college Spanish or equivalent.
Distribution: LL
Term(s): Summer II

SPAN 250 - Research or Individual Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

SPAN 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall, Spring

SPAN 252 - Christians, Jews, and Moslems: The Spirit of Spain in Its Literature (1.0)
An intensive study of writers and masterpieces that establish Spanish identity and create the traditions that Spain has given to the world: El Poema de Mio Cid, Maimonides, Ben Sahil de Sevilla, La Celestina, Lazarillo de Tormes, García de la Vega, Fray Luis de León, Gervantes, Lope de Vega, San Juan de la Cruz, and Calderón de la Barca.
Instructor: Gascón-Vera, Vega
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 253 - The Latin American Short Story (1.0)
A survey of the genre with in-depth analysis of works in Spanish by foundational writers Ricardo Palma, Rubén Darío, and Horacio Quiroga, as well as twentieth-century masters Jorge Luis Borges, Julio Cortázar, Juan Rulfo, Elena Garro, and Gabriel García Márquez, among others. Special attention to voices that have emerged since 2000, including Alberto Fuguet (Chile), Mayra Santos (Puerto Rico), and Juan Gabriel Vásquez (Colombia). Readings address issues of identity, memory, class, freedom, creative expression, myth-making, violence, mass media, race, education, women, children, and urban and rural life.
Instructor: Hall
Prerequisite: SPAN 241 or SPAN 242, or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 254 - Alienation and Desire in the City: Spanish Literature Since 1936 (1.0)
A study of the struggle for self-expression in Franco’s Spain and the transition from dictatorship to democracy. Special attention will be devoted to the literature of the Civil War and exile. The readings will include more recent explorations of the Spanish Civil War in literature, cinema and politics. Authors include Mercè Rodoreda, Carmen Laforet, Manuel Rivas, Alberto Méndez, Adelaída García Morales, and
During the years of post-dictatorial regimes in Latin America, writers, poets, historians, and filmmakers have become deeply involved in the ways in which literature and the arts can explore the representation of memory and oblivion and collective remembrance as well as forgetting. Among the cultural historians and writers we will read Arendt Elitz, Carlos Garda, and Raúl Zurita. Among the filmmakers, the works of Patricio Guzmán and his series on memory will be explored.

Instructor: Ramos, Syverson-Stork
Prerequisite: SPAN 241 or SPAN 242, or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 255 - Chicano Literature: From the Chronicles to the Present (1.0)
A survey of the major works of Chicano literature in the United States in the context of the Hispanic and American literary traditions. A study of the chronicles from Cabeza de Vaca to Padre Junípero Serra and musical forms such as corridos. A critical analysis of the themes and styles of contemporary writing. Works by Luis Valdez, Rodolfo Anaya, Tomás Rivera, Gloria Anzaldúa, Ámerico Paredes, Rosaura Sánchez, Jorge Ramos, and Rodolfo Gonzales.

Instructor: Renjilian-Burgy
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 262 - Death, Love, and Revolt: An Introduction to Spanish Poetry (1.0)
This course presents an introductory overview of poetry written in Spain, across regions and aesthetic periods. Our study will be anchored in poets representative of relevant movements, including Romanticism, Modernismo, and Modernity. Texts will also cover Medieval, Renaissance, and Baroque periods. The poet's context and the historical, aesthetic, and philosophical context that inspired their works will be addressed. In addition to the films themselves, students will be required to read selected works on film criticism and several literary texts that have been made into films. Directors whose films will be analyzed include María Luisa Bermejo, Fernando Solanas, Jorge Silva, and Raúl Ruiz.

Instructor: Renjilian-Burgy
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL, ARS
Term(s): Not Offered

SPAN 266 - Imperial Cultures: The “Siglo de Oro” (1.0)
The “Siglo de Oro” (the “Golden Century”) is one of the greatest periods of Iberian and Ibero-American cultural production (ca. 1492-1681). Many of the “classics” of the Iberian Peninsula, as well as masterpieces of Colonial Ibero-American art, literature, and music, bear the stamp of the “Siglo de Oro.” These works are essential to an understanding of Hispanic cultures. Primary authors and works to be studied (either fully or in excerpts) include the Anonymous Lazarillo de Tormes, Luis de Camões, Francisco de Quevedo, Miguel de Cervantes (shorter works), María de Zayas and Sotomayor, Félix Lope de
SPAN 267 - The Writer and Human Rights in Latin America (1.0)
The role of the Latin American writer as witness and voice for the persecuted. Through key works of poetry and prose from the 1970s to the present, we will explore the ways in which literature depicts issues such as censorship and self-censorship; the writer as journalist; disappearances; exile; testimonial writing; gender and human rights; and testimonial narratives. The works of Benedetti, Timmerman, Alegría, and others will be studied.

Instructor: Vega
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered
Not open to students who have taken SPAN 261.

SPAN 268 - Contemporary Spanish Cinema (1.0)
A survey of Spanish cinema. Themes of history and society as depicted by major directors since the Spanish Civil War of 1936. We will analyze films of important directors such as Pedro Almodóvar, Luis García Berlanga, Víctor Erice, Bigas Luna, Pilar Miró, and Itzíar Bollain.

Instructor: Hagimoto, Renjilian-Burgy
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL, REP
Term(s): Not Offered

SPAN 269 - Caribbean Literature and Culture (1.0)
An introduction to the major literary, historical, and artistic traditions of the Caribbean. Attention will focus on the Spanish-speaking island countries: Cuba, Dominican Republic, and Puerto Rico. Authors will include Juan Bosch, Lydia Cabrera, Guillermo Cabrera Infante, Julia de Burgos, Alejo Carpentier, Nicolás Guillén, René Marqués, Luis Palés Matos, and Pedro Juan Soto.

Instructor: Gascón-Vera
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL, ARS
Term(s): Not Offered

SPAN 270 - Captives, Clerics, and Corsairs: Cervantes in Africa (1.0)
Returning to Spain after military service in 1575, Miguel de Cervantes, author of Don Quixote, was captured by Barbary pirates and held in Algiers for five years. The resulting encounter with the multilingual, multicultural, and multifaith territories of North Africa—environment of two warring empires, the Ottoman and the Spanish—provided both challenge and opportunity for the writer. Against the backdrop of the Maghrib, this course will examine Cervantes’ portrayals of the captives, clerics, corsairs, and émigrés that populated this fascinating frontier world. Cervantine texts in several genres—as well as cultural artifacts—will inform our inquiry into the mind and manner of this soldier/eyewitness turned writer, as we examine the religious, political, ethnic, and economic issues of Cervantes’ Age.

Instructor: Hagimoto, Renjilian-Burgy
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 271 - Intersecting Currents: Afro-Hispanic and Indigenous Writers in Latin American Literature (1.0)
A close reading of selected texts that illustrate the intersection of African, Spanish, and indigenous oral and literary traditions. Readings include autobiographies, novels, and poetry. Authors to be studied may include Inca Garcilaso de la Vega, Rigoberta Menchú, Esteban Montejío, Luis Palés Matos, Nicolás Guillén, and Nancy Morejón. Topics include the emergence of non-elite voices, the relationship between identities and aesthetics, the marginal and the canonical, literature and the affirmation of the nation-state, and the uses of contemporary race and gender theory in literary analysis.

Instructor: Hagimoto
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 272 - Cultures of Spain (1.0)
An examination of Spain’s multicultural civilization and history, from the pre-Roman invasions to the contemporary struggles of the young “indigenas.” Literary, historical, artistic, and anthropological readings will inform our understanding of recurrent themes in Spanish national ideology and culture: Spain as a nexus of Christian, Jewish, and Islamic thought; regional, national, and internationalism; religion and class; long-term economic consequences of global empire; dictatorship and democracy; and the creation and questioning of national identity.

Instructor: Ramos
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Fall

SPAN 273 - Latin American Civilization (1.0)
An introduction to the multiple elements constituting Latin American culture. An examination of the principal characteristics of Spanish colonialism and Creole nationalism will inform our general understanding of Latin American culture today. Readings and class discussions will cover such topics as military and spiritual conquest, the Indian and African contributions, the emergences of criollo and mestizo discourses, and gender and race relations. Readings will include the works of Latin American writers, filmmakers, and historians.

Instructor: Hagimoto, Hagomo, Staff
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 274 - Captives, Clerics, and Corsairs: Cervantes in Africa (1.0)
SPAN 269 - Caribbean Literature and Culture (1.0)
SPAN 267 - The Writer and Human Rights in Latin America (1.0)

SPAN 275 - The Making of Modern Latin American Culture (1.0)
An examination of the principal characteristics of the search for identity and independence of the emerging Latin American nations as expressed in literary, historical, and anthropological writing. We will examine the experience of each of four distinct regions: Mexico and Central America, the Caribbean, the Andean countries, and the Southern Cone. Readings will include the works of contemporary Latin American writers, filmmakers, and historians. Special attention will be given to the relationship between social issues and the evolution of literary form.

Instructor: Hagimoto
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 276 - Caribbean Literature and Culture (1.0)

SPAN 277 - Exile, Resistance, and Creativity in Latin American Writers (1.0)
The course will explore the works of Latin American writers in exile, from the 1930s to the present, and the ways in which this literature has shaped the intellectual as well as the literary history of the region. Students will read novels, essays, plays, and poetry that evidence the particular themes found in the literature of exile such as the theme of absence, identity, censorship, and loss of language. Particular attention will be paid to the cultural and artistic representations of exile literature such as the vision of homelands and geography, the relationship to language, the meaning of place, and the construction of exile to gender. Among the writers to be read are Pablo Neruda, Gabriela Mistral, Luisa Valenzuela, Cristina Pieta Rossi, Reinaldo Arenas, Ariel Dorfman, and Julio Cortázar.

Instructor: Agosin
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 278 - The Jewish Women Writers of Latin America (1.0)
This course will explore the vibrant literary culture of Jewish women writers of Latin America from the 1920s to the present. We will examine selected works by these authors, daughters of immigrants, whose various literary genres reveal the struggle with issues of identity, acculturation, and diasporic imagination. Writers include Alicia Steimberg of Argentina, Clarice Lispector of Brazil, and Margo Ganz of Mexico, as well as a new generation of writers who explore issues of multiculturalism and ethnicity.

Instructor: Agosin
Prerequisite: SPAN 241 or SPAN 242 or permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 279 - The Legacy of the Nineteenth Century: Race, Gender, and Nation in Latin American Literature and Culture (1.0)
An examination of the interweaving relationship between race and gender in the framework of nation building during Latin America’s era of independence. Through literary, cultural, and historical studies, we will explore how the ideological trends that defined the fundamental characteristics of the nineteenth century continue to inform Latin American identities today. Topics covered include wars of independence, art and nationalism, anti-imperialism, the role of gender and sexuality in the national imagination, slavery and violence, and popular culture (e.g. folkloric music, visual arts). Readings may cover texts by Simón Bolívar, Andrés Bello, Domingo F. Sarmiento, José Martí, José Enrique Rodó, Gertrudis Gómez de Avellaneda, Olinda Matto de Turner, and José de Alencar.

Instructor: Hagimoto
SPAN 300 - Seminar, Honor, Monarchy, and Religion in Golden Age Drama (1.0)
The characteristics of the Spanish drama of the Golden Age. Analysis of ideals of love, honor, and religion as revealed in drama. Representative masterpieces of Lope de Vega, Cervantes and Ruiz de Alarcón, Tirso de Molina, and Calderón.
Instructor: Gascón-Vera, Syverson-Stork
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL; ARS
Term(s): Spring

SPAN 302 - Cervantes (1.0)
A close reading of the Quijote with particular emphasis on Cervantes' invention of the novel form: creation of character, comic genius, hero versus anti-hero, levels of reality and fantasy, and history versus creation of character, comic genius, hero versus anti-hero. Emphasis on Cervantes' invention of the novel form: "clothing" and "nakedness." The course will be divided into three parts dedicated to Native American texts and art (mythologies, codices, maps); European texts (Bible, Aristotle, Montaigne); and accounts of the conquest told from various points of view (Columbus, Ixtlilxochitl, Cabeza de Vaca, Catalina de Erauso). We will analyze how clothing and nakedness were used to symbolize changing power relationships between various protagonists: indigenous/white, female/male, and colonized/colonizer. Topics will include: notions of dress in distinct cosmological systems, clothing and gender in early colonial chronicles, clothing and its absence in the construction of the individual, and collective notions of the Self and the Other.
Instructor: Guausskyte
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 303 - Seminar, Luis Buñuel and the Search for Freedom and Morality (1.0)
Students will read the scripts and view the films most representative of alternative possibilities of freedom expressed by Luis Buñuel. The course will focus on the moral issues posed in his films and will start with a review of the historical motivations of the Buñuel perspective: Marxism, Freudianism, and Surrealism, as depicted in selected films of Buñuel, from his first, An Andalusian Dog (1928), to his last, That Obscure Object of Desire (1977).
Instructor: Gascón-Vera
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL; ARS
Term(s): Not Offered

SPAN 304 - Seminar, All about Almodóvar: Spanish Cinema in the "Transición" (1.0)
An examination of the culture of Spain of the last two decades seen through the eyes of filmmaker Pedro Almodóvar. We will study those films and literary texts that depict the development of Spain as a country in transition from a repressive dictatorship to democracy and postmodernism. Themes of freedom, homosexuality and cross-dressing, family, violence, and the transgression of love and death in our contemporary society will be analyzed. Films will range from Almodóvar’s first, Pepi, Lucy y Bom to his most recent productions, with special attention given to Mujeres al borde de un ataque de nervios and Tacones Infiernos.
Instructor: Gascón-Vera
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL; ARS
Term(s): Spring

SPAN 305 - Seminar, Hispanic Literature of the United States (1.0)
A study of U.S. Hispanic writers of the Southwest and East Coast from the Spanish colonial period to the present. Political, social, racial, and intellectual contexts of their times and shared inheritance will be explored. Consideration of the literary origins and methods of their craft. Authors may include: Cabeza de Vaca, Gaspar de Villagrá, José Villarreal, Lorna Dee Cervantes, José Martí, Uva Clavijo, Pedro Juan Soto, Miguel Algarín, and Edward Rivera.
Instructor: Renijil-Burgy
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 307 - Seminar, The Clothed and the Naked in Colonial Latin America (1.0)
In this seminar, we will study the colonial period of Latin America, focusing on the cultural notions of “clothing” and “nakedness.” The course will be

SPAN 315 - Seminar, Luis Buñuel and the Search for Freedom and Morality (1.0)
Students will read the scripts and view the films most representative of alternative possibilities of freedom expressed by Luis Buñuel. The course will focus on the moral issues posed in his films and will start with a review of the historical motivations of the Buñuel perspective: Marxism, Freudianism, and Surrealism, as depicted in selected films of Buñuel, from his first, An Andalusian Dog (1928), to his last, That Obscure Object of Desire (1977).
Instructor: Gascón-Vera
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL; ARS
Term(s): Not Offered

SPAN 318 - Seminar, Love and Desire in Spain’s Early Literature (1.0)
Medieval Spain, at the nexus of the Christian, Jewish, and Islamic cultures, witnessed a flowering of literature dealing with the nature and depiction of love. This course will explore various forms of Modernity in Spain. Using a wide variety of literary texts, paintings, movies, and architectural examples, this course will explore various forms of Modernity in Spain. Emphasis will be placed on the connections between Spanish and mainstream European Avant-Garde, as well as the marginalization of women’s contributions. Main figures will include Federico García Lorca, Gómez de la Serna, Manja Mallo, Vicente Huidobro, Rafael Alberti, Luis Buñuel, Concha Méndez, Ortega y Gasset, Salvador Dalí, and Pablo Picasso. The connections between modernity and postmodernity will also be explored.
Instructor: Ramos
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 324 - Seminar, Modernity and Avant-Garde in Spain (1.0)
Using a wide variety of literary texts, paintings, movies, and architectural examples, this course will explore various forms of Modernity in Spain. Emphasis will be placed on the connections between Spanish and mainstream European Avant-Garde, as well as the marginalization of women’s contributions. Main figures will include Federico García Lorca, Gómez de la Serna, Manja Mallo, Vicente Huidobro, Rafael Alberti, Luis Buñuel, Concha Méndez, Ortega y Gasset, Salvador Dalí, and Pablo Picasso. The connections between modernity and postmodernity will also be explored.
Instructor: Ramos
Prerequisite: Open to senior and junior majors or by permission of the instructor.
Distribution: LL
Term(s): Not Offered

SPAN 325 - Seminar, Candid Cuisine: Food in Latin American Literature and Culture (1.0)
An in-depth study of food in Latin American literature and culture, with a particular focus on its functions and symbolism in indigenous cultures and in the context of the transatlantic exchanges of food products, plants, animals, and recipes among the Americas, Europe, and Africa after 1492. We will also study the role of food and cuisine in the search for new literary forms of expression during the Latin American independence era and contemporary food times. Notions of food, kitchens, and hunger will be vehicles to explore issues of gender, race, power relations, slavery, and the emergence of new hybrid cultures. Readings will include Gonzalo Fernández de Oviedo’s Historia, Sor Juana Inés de la Cruz’s Respuesta, Francisco de Paula García Peléez’s Libro del Chocolate, Fernando Ortiz’s Contrapunteo cubano, and...
Laura Esquivel's *Como agua para chocolate*.

**Instructor:** Gezasskyte
**Prerequisite:** Open to senior and junior majors or by permission of the instructor.
**Distribution:** LL
**Term(s):** Not Offered

**SPAN 326 - Seminar. Federico García Lorca, 1898-1936 (1.0)**

Federico García Lorca (1898-1936) embodies Spanish Modernity. While his innovative poetry and drama established him as a crucial figure in the twentieth-century Spanish cultural landscape, his brutal murder by Fascist supporters during the Civil War made him a symbol of freedom lost. This seminar will study his artistic evolution: from his youth in Granada, and his studies in Madrid—where he met and befriended filmmaker Luis Buñuel and painter Salvador Dalí—to his trip to New York and Latin America. The class will study his poetry, theatre, and essays, and also explore both the construction of the Lorca myth, and the period of cultural splendor that is encapsulated in his biographical dates: from the loss of the empire in 1898, to the beginning of the Civil War in the summer of 1936.

**Instructor:** Ramos
**Prerequisite:** Open to senior and junior majors or by permission of the instructor.
**Distribution:** LL
**Term(s):** Not Offered

**SPAN 327 - Seminar. Latin American Women Writers: Identity, Marginality, and the Literary Canon (1.0)**

An examination of twentieth-century women writers from Latin America. Perspectives for analyses will include questions of identity (national, ethnic/racial, religious, sexual, gender), the extent to which Afro-Hispanic, Indigenous, and non-Christian writers constitute distinct, marginalized groups in Latin American literature, and a comparison of issues regarding identity in selected canonical and noncanonical works by Gabriela Mistral, Remedios Varo, Elena Poniatowska, Nancy Morejón, Rosario Aguilar, Goconda Belli, and Victoria Ocampo.

**Instructor:** Agosín
**Prerequisite:** Open to senior and junior majors or by permission of the instructor.
**Distribution:** LL
**Term(s):** Not Offered

**SPAN 329 - Seminar. Chile: Literature and the Arts (1.0)**

From 1971 to 2003, Chile, one of South America’s longest democracies, has experienced traumatic cultural, political, and social change. From the election of Salvador Allende (1971–1973) through the Pinochet dictatorship, during these turbulent times an unprecedented cultural life was manifested in literature, theatre, and the visual arts. In this seminar, we will explore the cultural changes experienced in Chile during three decades, the ways in which writers understood the complex web of creativity, as well as the specter of censorship. We will analyze how historical figures were revived through writers such as Gabriela Mistral, Rosamel del Valle, Pablo Neruda, and Salvador Allende. Narratives, journalistic essays, and theatrical and visual productions will be examined vis-à-vis the social and political history in which the topics were created.

**Instructor:** Agosín

**SPAN 335 - Seminar. Asia in Latin America: Literary and Cultural Connections (1.0)**

Connections between two geographically remote areas (Asia and Latin America) that would seem to have little in common will be studied. By analyzing prose, poetry, art, and music, we will examine diverse Asian influences in Latin American literature and culture from the nineteenth century to the present. We will explore how various images of the “exotic” Orient are represented in Latin America during the periods of “modernismo” and “vanguardia.” We will also examine contemporary Asian-Latin American writers and artists with an emphasis on the multicultural experience of immigration and assimilation. Authors include José Martí, José Rizal, Rubén Darío, José Juan Tablada, Enrique Gómez Carrillo, Octavio Paz, Jorge Luis Borges, Mario Benedetti, Anna Kuzumi Stahl, Doris Moromisato, José Watamabe, Su Karn Wen, and Eduardo Tokeshi.

**Instructor:** Hagimoto
**Prerequisite:** Open to senior and junior majors or by permission of the instructor.
**Distribution:** LL
**Term(s):** Fall

**SPAN 350 - Research or Individual Study (1.0)**

**Prerequisite:** Permission of the instructor. Open to juniors and seniors.
**Distribution:** None
**Term(s):** Fall; Spring

**SPAN 350H - Research or Individual Study (0.5)**

**Prerequisite:** Permission of the instructor.
**Distribution:** None
**Term(s):** Fall; Spring

**SPAN 360 - Senior Thesis Research (1.0)**

**Prerequisite:** Permission of the department.
**Distribution:** None
**Term(s):** Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**SPAN 370 - Senior Thesis (1.0)**

**Prerequisite:** SPAN 360 and permission of the department.
**Distribution:** None
**Term(s):** Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
SUSTAINABILITY CERTIFICATE PROGRAM

A THREE-COLLEGE COLLABORATION PROGRAM AMONG WELLESLEY, OLIN, AND BABSON COLLEGES

Program Director: Linder (Olin College)
Wellesley Faculty Advisory Group: DeSombre (Environmental Studies; Wellesley Program Contact); Brabander (Geosciences), Jones (Biological Sciences), Rodenhouse (Biological Sciences), Thomas (Environmental Studies and Biological Sciences), Turner (Environmental Studies)

Addressing the challenge of using Earth’s resources sustainably requires a collaborative and interdisciplinary approach, in which basic research about the causes and consequences of environmental problems is combined with an understanding of the incentives and processes for a large-scale reworking of economic activity and the technology with which to reconfigure the human effect on the natural world. Wellesley, Olin, and Babson Colleges are uniquely suited to address this challenge by providing a joint program capable of educating students in ways that each cannot accomplish alone. By truly integrating business, engineering, and the liberal arts in the service of environmental sustainability, the program will provide students with the cross-disciplinary academic preparation and the cross-campus cultural collaboration experiences needed to approach environmental issues holistically. This certificate program can serve as a complement to an Environmental Studies major or to any other major.

Sustainability Certificate Program

Goals for the Program
The Sustainability Certificate Program seeks to educate students to make use of the skills, tools, and concepts from the liberal arts, business, and engineering to address environmental challenges and to evaluate potential paths toward sustainability at both the individual and societal level.

Requirements for the Certificate Program
There are three components to the five-course certificate program:
1. Introductory Course (SUST 201)
2. Synthesis Course (SUST 301)
3. Three electives from the list of Courses for Credit Toward the Certificate Program.

Those three electives must include one course at each of the two non-home institutions (i.e. a Wellesley student must take one course at Babson and one at Olin) and one course in each of the two non-home areas—business, engineering, and the liberal arts (i.e. a Wellesley student must take a business course and an engineering course). These courses provide an interdisciplinary breadth of knowledge, skills, and experiences relating to environmental sustainability. (Several courses include the requirement that the major course project a student chooses focuses on sustainability issues.)

The Babson business courses listed may count toward the Wellesley degree only for students who complete the certificate program; these students may count no more than two Babson business courses toward the 32 units required for the Wellesley degree. (A student pursuing this program who takes a Babson accounting course may count only one additional Babson business course from this program toward the Wellesley degree.)

Admission to the Certificate Program
Students may declare their intention to pursue the certificate program any time after completing the introductory course; they must do so before enrolling in the synthesis course. Students with declared program participation will have preferential enrollment opportunities for the cross-campus electives. Upon declaring the intention to pursue the program, the student will be assigned a campus advisor; students may also contact the overall program director. Advising is a central part of ensuring a coherent structure to the certificate program, so students are encouraged to declare their intention to complete the program as soon as they can.

Record of Completion of the Certificate Program
The record of completion of the program will appear on the Wellesley transcript. The certificate does not count as a Wellesley minor, so courses taken for a Wellesley major or minor may also be counted toward the certificate program.

Additional Certificate Program Information
For more information about program admission and course of study, contact Beth DeSombre, the Certificate Program contact for Wellesley.
For detailed certificate program information, including the complete list of elective courses, please visit the Sustainability Certificate Program website: www.wellesley.edu/EnvironmentalStudies/Curriculum/sustainabilitycert.html
For detailed information on courses offered at Babson and Olin Colleges, please visit: fusionmnx.babson.edu/CourseListing/index.cfm?use action=CourseListing.CourseCatalog star.olin.edu/StudentRecords.cfm

Courses for Credit Toward the Certificate Program
The following courses may be used as electives. Students who have taken SUST 201 may be able to waive prerequisites for some of these courses; please contact the course instructor to determine the accessibility and appropriateness of the course. Note that students may not earn credit for both ECON 228 (at Wellesley) and ECON 3675 (at Babson). Courses listed with an asterisk (*) require that students undertake their course project on a sustainability-related topic to gain credit toward the certificate. See the three college website for additional elective courses.

SUST - Sustainability Courses

SUST 201 - Introduction to Sustainability (1.0)
This case-based course introduces students to the basic concepts and tools that business, engineering, and the liberal arts (science, social science, and the humanities) bring to a consideration of
SUSTAINABILITY CERTIFICATE PROGRAM

SUST 220 - Paradigms, Predictions, and Joules: A Historical and Scientific Approach to Energy and the Environment (1.0)

This interdisciplinary course, involving faculty and students from Olin, Babson, and Wellesley Colleges, will focus on “grand challenges” at the interface between energy and the environment through the disciplinary lenses of the history of technology and environmental science. We will study the changing relationship between human societies and their natural environment, examining the consequences of human energy use (agricultural production, power generation, and other forms of energy) at the local, regional, and global scales. By combining the tools, analytical frameworks, and skills found in the history and environmental science fields, we will build models that explain the observations and trends that we observe from historical case studies.

Instructor: Brabander (Geoscience), Martello (Olin)
Prerequisite: One 100-level science course or permission of the instructor.
Distribution: None
Term(s): Spring

Not open to students who have completed EXTD 220.

SUST 301 - Sustainability Synthesis (1.0)

This project-based course provides an opportunity for students to synthesize the work from the introductory course and elective courses to apply their knowledge of sustainability to a specific problem or issue of interest to an identified community. Groups of three to five students representing more than one school will work on a semester-long project of their choosing that focuses on understanding and providing solutions for a specific environmental problem, using the tools and concepts developed in the program.

Instructor: Staff (Wellesley), Staff (Olin), Staff (Babson)
Prerequisite: Declared participation in the certificate program, completion of SUST 201, and three out of four elective courses for the program.
Distribution: None
Term(s): Spring
Theatre Studies Major

Goals for the Theatre Studies Major

- The ability to break down and score a scene, conduct a rehearsal, and produce a play
- An understanding of the development of dramatic literature from the Greeks to the present, and the ability to identify major movements within that chronology
- Knowledge of current theatre technologies
- Problem solving independently and within an ensemble
- Basic construction skills and attention to detail in execution
- Competence to compete with conservatory-trained graduates for graduate school or casting/hiring opportunities within the industry

Requirements for the Theatre Studies Major

Students majoring in Theatre Studies must take a minimum of nine units. For students entering Wellesley in Fall 2009 or later these must include THST 203 and either THST 212 or THST 215. Two of the nine must be at the 300 level. At least five of the nine must come from within the theatre studies department. The remaining four may be drawn from any related department (see list above).

Developments in the theatre arts are a result of stage experiment, and because the theatre performance is an expression of theatre scholarship, it is expected that students planning a major in theatre will elect to complement formal study of theatre with practical experience in the extracurricular production program of the College Theatre and related on-campus producing organizations. Students may also remain on campus over the summer or Wintersession (depending on housing availability) to gain experience with the Wellesley Summer Theatre Company (the professional wing of the academic department) for credit. All students are encouraged to participate in THST 250 and THST 350 individual study offerings in order to pursue their particular area of theatrical interest.

Early consultation with the director is essential, because some of the relevant courses are not offered every year and careful planning is necessary. In addition to working with the director of the theatre program, students will be encouraged to consult with other members of the faculty familiar with the interdepartmental theatre major.

Exchange and International Study in Theatre Studies

Students majoring in theatre studies may elect to take at least one resident semester of concentrated work in the discipline to supplement and enrich their work at Wellesley. They may attend the National Theatre Institute at the Eugene O'Neill Theatre Center, another institution in the Twelve College Exchange Program, one of the many London programs offering intensive study in their discipline, or other programs approved by the department. On occasion, a student may elect to take a relevant course in the program at MIT.

Honors in Theatre Studies

The theatre program offers a variety of opportunities for honors. After consultation with the director, the candidate will devise a proposal that incorporates both the academic and the practical aspects of the thesis. Normally, the candidate completes the research and writing segment of the thesis in the first semester. In the second semester, the candidate produces the practical/theatrical component for public performance. Applicants for honors should have a minimum 3.5 GPA in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

THST - Theatre Studies Courses

THST 101 - Can We Have an Argument? Understanding, Employing, and Delivering Sound Rhetoric (1.0)

This course will apply theatrical performance training to the art of public speaking or rhetoric. One of the three original Liberal Arts, the art of discourse has long been recognized as fundamental to the creation of knowledge, and the development of thought. Employing dramatic strategies, such as original student-written texts, original student-written work, and an occasional Saturday Night Live sketch, students will discover the power of words to change hearts and minds, as well as their ability to undercut the speaker who does not know how to use them properly. The course is intended to develop comprehension and persuasive skills in students who might not be drawn to the fine arts, but who might benefit from theatrical training to become more effective thinkers, writers, and speakers.

Instructor: Arciniegas
Prerequisite: None
Distribution: ARS
Term(s): Summer II

THST 130 - Japanese Animation (in English) (1.0)

What makes Japan tick? New visitors to Japan are always struck by the persistence of traditional aesthetics, arts, and values in a highly industrialized society entrenched by novelty. Through animation films (English subtitles) and readings on animation we will explore this phenomenon from the inside. Focus is on the works of Tezuka Osamu, Hayao Miyazaki, and others. No Japanese language required.

Instructor: Morley
Prerequisite: None
Cross-listed as: JPN 130
Distribution: LL, ARS
Term(s): Fall

THST 200 - That's What She Said: Trailblazing Women of American Comedy (1.0)

This course invites students to take funny women seriously! Through their legacy of work as well as oral histories, we will investigate the evolving challenges and triumphs of women whose comedic voices influenced American expectations over the last century. Elaine May, Joan Rivers, Carol Burnett, Gilda Radner, Whoopi Goldberg, Margaret Cho, and Wellesley’s own Nora Ephron are only several of the funny (with eggs!) women who will make us laugh. Mediums to be explored include writing, improvisation, stand-up, comic acting on stage and screen, plus new media. Creating belly laughs changed the culture on which these women were commenting – ultimately, through deepening our understanding of the purposefulness and craft of comedy, we will have the opportunity to attempt the same.

Instructor: Rainer
Prerequisite: None
Distribution: ARS
Term(s): Spring

THST 203 - Plays, Production, and Performance (1.0)

This course invites students to take funny women seriously! Through their legacy of work as well as oral histories, we will investigate the evolving challenges and triumphs of women whose comedic voices influenced American expectations over the last century. Elaine May, Joan Rivers, Carol Burnett, Gilda Radner, Whoopi Goldberg, Margaret Cho, and Wellesley’s own Nora Ephron are only several of the funny (with eggs!) women who will make us laugh. Mediums to be explored include writing, improvisation, stand-up, comic acting on stage and screen, plus new media. Creating belly laughs changed the culture on which these women were commenting – ultimately, through deepening our understanding of the purposefulness and craft of comedy, we will have the opportunity to attempt the same.

Instructor: Rainer
Prerequisite: None
Distribution: ARS
Term(s): Spring
This course studies the principles and practice of the related arts that make up the production of a play in the theatre. Students will analyze the dramatic script in terms of the actor, the director, the scenic costume; and lighting designers; and the technicians. Practical applications of acquired skills integrate the content of the course. Each student participates in the creation of a fully realized "mini-production," given as a public performance at the end of the term. Emphasis is placed on artistic and interpersonal collaboration within the company.

Instructor: Hussey
Prerequisite: None
Distribution: ARS
Term(s): Fall

**THST 207 - Stagecraft for Performance (1.0)**

This course studies the craft and theory of the production arts in the theatre. The course will cover the process and will analyze the designers' function in the production: creating working drawings, problem solving, and use of both theatrical and alternative media for the realization of sound, set, and lighting designs. There will be additional time outside of class scheduled for production workshops.

Instructor: Towhan
Prerequisite: THST 203 or permission of the instructor.
Distribution: ARS
Term(s): Fall

**THST 208 - Introduction to Stage Management (0.5)**

This course examines the role and duties of a stage manager in the collaborative process and the stage manager's relationship to the director, designers, and actors. Students develop concepts through analysis of theatrical reports, call cues, assemble rehearsal schedules, call scripts, etc. Students will also be taught the importance of technical script analysis. Emphasis will also be placed on a number of transferable skills, including leadership, organization, delegation, effective communication, and attention to detail. In addition, students are strongly encouraged to complete a THST 250H by stage managing either a Wellesley College Theatre or an Upstage production during the academic year in order to complement the material learned in class.

Instructor: Towhan
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

**THST 209 - Introduction to the Art of Scenic Design (1.0)**

Think outside the box! Learn visual communication skills in this basic art of scenic design course. After reading assigned plays, students will learn how to develop their concepts through analysis of the action of the play. Visual research, sketches, and basic drafting skills will be developed in addition to the idea of a basic concept for each script. In addition to teaching artistic and technical skills, this course will emphasize the importance of collaboration with the director and fellow designers.

Instructor: Howland
Prerequisite: None
Distribution: ARS
Term(s): Fall

**THST 210 - Echoes of the Homeland (1.0)**

Have you ever wondered what is lost in the process of assimilation into American culture? In this interpretation class, students are introduced to the literature of Latino, Celtic, and African American cultures. Through prose, poetry, and drama, stories and characters are brought to vivid life. Students will hone their interpretive skills while exploring issues of identity, immigration, and the female experience. Material will be taken from folklore, mainstream literature, and emerging writers of today. Students will also have the opportunity to write about their "homeland" as part of a final exercise.

Instructor: Hussey, Roach, Lopez
Prerequisite: None
Distribution: ARS
Term(s): Fall
Mandatory credit/noncredit.

**THST 211 - Woman, Center Stage (1.0)**

This course will focus on American and European theatre and the powerful female protagonists, playwrights and practitioners who capture us. From Medea to Shakespeare's heroines through contemporary theatre artists including Anna Deveare Smith and Paula Vogel, we will explore what it means to put a woman's story center stage. What are the expectations of a society and an audience? Do female playwrights tell different stories than their male counterparts? Who are the women working in theatre today who are going to change the form forever?

Instructor: Lopez
Prerequisite: None
Distribution: ARS
Term(s): Fall

**THST 212 - Stagecraft for Performance (1.0)**

This course studies the craft and theory of the production arts in the theatre. The course will cover the process and will analyze the designers' function in the production: creating working drawings, problem solving, and use of both theatrical and alternative media for the realization of sound, set, and lighting designs. There will be additional time outside of class scheduled for production workshops.

Instructor: Towhan
Prerequisite: THST 203 or permission of the instructor.
Distribution: ARS
Term(s): Fall

**THST 213 - Inside Out: A Study of Character Through Voice and Movement (0.5)**

This course will teach basic playwriting skills to a group of writers whose stories will be read aloud with commentary from the instructor and the class. Students will listen, critique, and develop a character either from the inside out, using movement, or from the inside out, using the voice. Utilizing the techniques of Kristin Linklater, students will move toward "freeing their natural voices" and developing range, color, and texture for effective stage use. Concurrently, students will work on "freeing their bodies" and using physicality to flesh out a character. Class work will focus on both individual and group work with particular attention given to laying down voice and movement with text to create vivid, fully developed characters.

Instructor: Rainer
Prerequisite: None
Distribution: ARS
Term(s): Spring; Summer

**THST 214 - Inside Out: A Study of Character Through Voice and Movement (0.5)**

This course will teach basic playwriting skills to a group of writers whose stories will be read aloud with commentary from the instructor and the class. Students will listen, critique, and develop a character either from the inside out, using movement, or from the inside out, using the voice. Utilizing the techniques of Kristin Linklater, students will move toward "freeing their natural voices" and developing range, color, and texture for effective stage use. Concurrently, students will work on "freeing their bodies" and using physicality to flesh out a character. Class work will focus on both individual and group work with particular attention given to laying down voice and movement with text to create vivid, fully developed characters.

Instructor: Rainer
Prerequisite: None
Distribution: ARS
Term(s): Spring; Summer

**THST 215 - Twenty Plays, Twenty Years (1.0)**

A survey of contemporary American plays, Pulitzer Prize winners as well as investigating inventive new companies that break down the boundaries between performance and audience. We’ll read texts ripped from the headlines as well as what might be the “new classics.” We’ll also attend productions and discuss the journey from page to stage. This is not your parents’ theatre class. No Plays Over 20 Years Old. Students will use critical thinking to analyze trends in contemporary theatre, and contrast and compare contemporary events with the events in dramatic texts. We will incorporate our knowledge into class projects, such as adaptations, research papers, or original plays. Guest artists from the theatre world occasionally visit to illuminate other perspectives.

Instructor: Lopez, Rainer
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

**THST 216 - Twenty Plays, Twenty Years (1.0)**

A survey of contemporary American plays, Pulitzer Prize winners as well as investigating inventive new companies that break down the boundaries between performance and audience. We’ll read texts ripped from the headlines as well as what might be the “new classics.” We’ll also attend productions and discuss the journey from page to stage. This is not your parents’ theatre class. No Plays Over 20 Years Old. Students will use critical thinking to analyze trends in contemporary theatre, and contrast and compare contemporary events with the events in dramatic texts. We will incorporate our knowledge into class projects, such as adaptations, research papers, or original plays. Guest artists from the theatre world occasionally visit to illuminate other perspectives.

Instructor: Lopez, Rainer
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

**THST 217 - Twenty Plays, Twenty Years (1.0)**

A survey of contemporary American plays, Pulitzer Prize winners as well as investigating inventive new companies that break down the boundaries between performance and audience. We’ll read texts ripped from the headlines as well as what might be the “new classics.” We’ll also attend productions and discuss the journey from page to stage. This is not your parents’ theatre class. No Plays Over 20 Years Old. Students will use critical thinking to analyze trends in contemporary theatre, and contrast and compare contemporary events with the events in dramatic texts. Guest artists from the theatre world occasionally visit to illuminate other perspectives.

Instructor: Lopez, Rainer
Prerequisite: None
Distribution: ARS
Term(s): Not Offered

**THST 218 - Woman, Center Stage (1.0)**

This course will focus on American and European theatre and the powerful female protagonists, playwrights and practitioners who capture us. From Medea to Shakespeare's heroines through contemporary theatre artists including Anna Deveare Smith and Paula Vogel, we will explore what it means to put a woman's story center stage. What are the expectations of a society and an audience? Do female playwrights tell different stories than their male counterparts? Who are the women working in theatre today who are going to change the form forever?

Instructor: Lopez
Prerequisite: None
Distribution: ARS
Term(s): Fall

**THST 219 - Twenty Plays, Twenty Years (1.0)**

A survey of contemporary American plays, Pulitzer Prize winners as well as investigating inventive new companies that break down the boundaries between performance and audience. We’ll read texts ripped from the headlines as well as what might be the “new classics.” We’ll also attend productions and discuss the journey from page to stage. Instructor: Lopez, Rainer
Prerequisite: None
Distribution: ARS
Term(s): Not Offered
THST 222 - Theatrical Design Survey (1.0)
If you want to be a theatrical designer, this class is for you. In 12 weeks you will learn the basics of costume, lighting, and scenic design. This is a theatrical boot camp, team taught by New England professionals. Students will develop skills used by theatre set, light and costume designers. We will work collaboratively to understand the process of creating a theatrical production as it goes from page to stage.
Instructor: Howland, Towles, Stevenson
Prerequisite: None
Distribution: ARS
Term(s): Spring

THST 246 - Performative Pathways to Language Fluency: Spanish Through the Lens of Theatre (1.0)
A collaboration between the Spanish and Theatre Studies departments, this class integrates the reading, studying and performing of some of the most important plays in Spanish Theatre. Using memorization, theatre exercises and textual analysis, students will learn about the Spanish theatrical tradition while developing their language and critical skills. After the midterm assessment, the remainder of the semester will be devoted to preparation for a final public performance.
Instructor: Arciniegas, Ramos (Spanish)
Prerequisite: SPAN 241 or SPAN 242 or functional equivalent
Cross-Listed as: SPAN 246
Distribution: LL, ARS
Term(s): Spring

This course will be taught in Spanish. Not open to students who have taken THST 314/SPAN 314.

THST 250G - Research or Group Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

THST 250H - Research or Individual Study (0.5)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

THST 251 - Japanese Writers Explore Their World (in English) (1.0)
Longing, dreams, and transformations, recurrent subjects in early Japanese literature, are familiar to us from animation and popular culture. We will return to the beginnings of these themes in the great works of Japanese poetry and prose in translation from the seventh through the eighteenth centuries: The Pillowbook, The Tale of Genji, medieval tales of miraculous transformations, puppet plays and kabuki, among others. Who were the writers, and for whom were they writing? What role did Buddhism and Shinto play? How were the concepts of longing and dream transformed into a unique esthetic that has continued to influence Japanese culture?
Instructor: Morley
Prerequisite: None
Cross-Listed as: JPN 251
Distribution: LL
Term(s): Fall

This course may be taken as either THST 251 or, with additional assignments, THST 355.

THST 253 - Telling Stories in China, Japan, and Korea: The Performing Tradition in East Asia (1.0)
We will be reading and viewing a selection of the most popular and influential stories of the East Asian theatrical tradition, including Chinese drama from the Yuan, Ming, and Qing periods; the Japanese Noh and kabuki, and the Korean Pansori tradition. We will be looking at the deep cultural significance of shamanism in theater, as well as later Buddhist, Confucian, Taoist, and Shinto influences. How do the performing arts enable us to tell our most private and intimate stories of love, friendship, and death? What do these stories reveal to us about the cultures from which they emerge? Are there common themes that cross cultural boundaries?
Instructor: Morley
Prerequisite: None
Cross-Listed as: EALC 253
Distribution: LL, ARS
Term(s): Spring

THST 255 - Japan on Stage (1.0)
This course provides an introduction to Japanese theatre with an emphasis on the development of the performance text from the eighth century to the contemporary period. Our work will be a combination of textual analysis and hands-on performance. Using videos and translated texts, as well as critiques by actors (in particular those of the medieval Noh actor Zeami Motokiyo and the kabuki collection of factor's antics) and scholarly studies, we will cover three units: Noh and Kyogen; Kabuki and Bunraku puppet theatre; and contemporary theatre. Students will have an opportunity to experiment with writing a modern Noh play based on their understanding of the Noh theatrical conventions, and to perform in a Kyogen play. No previous experience in Japanese Studies or Theatre Studies required.
Instructor: Morley
Prerequisite: None.
Cross-Listed as: JPN 255
Distribution: ARS
Term(s): Not Offered
Not open to students who have taken THST 131 or JPN 131 in fall 2011.

THST 256 - Theatrical Design Survey (1.0)
This course will focus on seeing, analyzing, and critiquing the work of the director on stage and screen. The films of Nora Ephron will form a basis for the study involving contemporary film. Significant attention will be paid to the collaboration between directors, designers, and actors. The pragmatic aspects of mounting a stage production will be analyzed using the performances attended by the class as raw material for discussions. Students will attend five productions in the New England area paid for by Theatre Studies. Particular emphasis will be placed on the students determining how the productions reflect the intention of the playwright. As a final presentation, students will produce and direct a ten-minute play festival for the Wellesley community.
Instructor: Hussey
Prerequisite: THST 203 or THST 206
Distribution: ARS
Term(s): Spring

THST 305 - Advanced Scene Study (1.0)
Students will explore dramatic texts including but not limited to: Victorian Comedy and Melodrama, Heroic Drama and its satirists, Restoration Comedy and Tragedy, Jacobean Comedy and Tragedy, Roman and Greek Comedy and Tragedy as well non-english language plays.
Instructor: Arciniegas
Prerequisite: THST 204
Distribution: ARS
Term(s): Fall

THST 306 - The Director's Art (1.0)
Intended for the serious directing student, this course will focus on seeing, analyzing, and critiquing the work of the director on stage and screen. The films of Nora Ephron will form a basis for the study involving contemporary film. Significant attention will be paid to the collaboration between directors, designers, and actors. The pragmatic aspects of mounting a stage production will be analyzed using the performances attended by the class as raw material for discussions. Students will attend five productions in the New England area paid for by Theatre Studies. Particular emphasis will be placed on the students determining how the productions reflect the intention of the playwright. As a final presentation, students will produce and direct a ten-minute play festival for the Wellesley community.
Instructor: Hussey
Prerequisite: THST 203 or THST 206
Distribution: ARS
Term(s): Spring

THST 310 - Theatres of Japan (in Japanese) (1.0)
Explores theatre plays from Japanese classical literature and translation skills. Students will have the opportunity to sample The Tale of Genji and The Pillow Book, among others, in the original and to familiarize themselves with the classical language. Two periods with discussion section.
Instructor: Morley
Prerequisite: JPN 232 or permission of the instructor.
Cross-Listed as: JPN 312
Distribution: LL
Term(s): Not Offered

THST 315 - Acting Shakespeare (1.0)
This course focuses on the study and practice of skills and techniques for the performance of scenes and monologues and the realization of theatrical characters from Shakespeare's texts. Speeches and scenes will be performed for class criticism. The class will be subdivided by instructor according to skill levels. Students are expected to rehearse and prepare scenes outside of class time.
Instructor: Arciniegas
Prerequisite: Any THST course and any Shakespeare course in the English Department or permission of the instructor.
Distribution: ARS
Term(s): Spring; Summer I

THST 321 - The Advanced Art of Playwriting (1.0)
THST 321 is an opportunity for former students of THST 221 to build on skills developed during that course. Students will work in an intensive process with the goal of completing a two act play with related analysis material. Similar to THST 221, there will be opportunities to hear the material during table reads as part of class participation. Interested students should discuss their interest with the professor prior to registration.
Instructor: Roach
Prerequisite: THST 221 or permission of the instructor
Distribution: ARS
Term(s): Fall; Spring; Summer II
Mandatory credit/no credit.

THST 350 - Research or Group Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

THST 350G - Research or Group Study (1.0)
Prerequisite: Permission of the instructor.
Distribution: None
Term(s): Fall; Spring

THST 356 - Theatres of Japan (in Japanese) (1.0)
The Tales of the Heike (Heike Monogatari), an epic recounting the twelfth century battles between the Heike (Taira) and Genji (Minamoto) clans for
doom over the imperial court, has spawned plays in almost every genre of Japanese theatre. Some will be familiar with the story from anime as well. We will use this text and the themes that appear to explore the performance arts of noh, kyogen, bunraku puppet theatre, and kabuki. Where possible we will view DVDs of the plays under discussion. Some of the major themes we will be examining have shaped Japanese culture into the modern period: loyalty and the code of the warrior; Buddhism; the aesthetic of pathos; Confucianism; and the significance of China. Our approach will be multiple, as we will be discussing performance texts and the differences between genres of theatre, as well as the Heike themes and their manifestation in different periods of Japanese drama.

Instructor: Morley
Prerequisite: One course on theatre or on Japan.
Cross-Listed as: JPN 351
Distribution: LL; ARS
Term(s): Spring

**THST 353 - Lady Murasaki and The Tale of Genji (in English) (1.0)**

Shortly after 1000 C.E., in the imperial court of Japan, Murasaki Shikibu, a court lady of middle rank, completed what is arguably the first novel in the history of world literature, *The Tale of Genji*. Who was she? How did she come to write a novel of such surprising psychological subtlety? Who is the hero? Why is he still appealing a millennium later? Focusing on *The Genji* and Murasaki's diary, we examine the culture of the Heian court, Buddhist beliefs, the aesthetic of *mono no aware* (a beauty evocative of longing), and the literature (poetry, prose, and ladies' diaries) of the court salons. Films, plays, animation, and modern novels modeled on *The Genji* will also be discussed in class. No Japanese language required.

Instructor: Morley
Prerequisite: One course on Japan or by permission of the instructor.
Cross-Listed as: JPN 353
Distribution: LL
Term(s): Spring

**THST 355 - Japanese Writers Explore Their World (1.0)**

Longing, dreams, and transformations, recurrent subjects in early Japanese literature, are familiar to us from animation and popular culture. We will return to the beginnings of these themes in the great works of Japanese poetry and prose in translation from the seventh through the eighteenth centuries: *The Pillowbook, The Tale of Genji*, medieval tales of miraculous transformations, puppet plays and kabuki, among others. Who were the writers, and for whom were they writing? What role did Buddhism and Shinto play? How were the concepts of longing and dream transformed into a unique esthetic that has continued to influence Japanese culture? Students will read selections from the works covered in class in the original Japanese during an extra weekly class meeting.

Instructor: Morley
Prerequisite: JPN 232 or permission of the instructor.
Cross-Listed as: JPN 355
Distribution: LL
Term(s): Fall
Not open to student who have taken JPN 251/THST 251

**THST 360 - Senior Thesis Research (1.0)**

Prerequisite: Permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

**THST 370 - Senior Thesis (1.0)**

Prerequisite: THST 360 and permission of the department.
Term(s): Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
Women’s and Gender Studies is an interdisciplinary field that places gender and its intersections with race, social class, sexuality, and ethnicity at the center of rigorous academic inquiry. These structural forces shape the individual and collective lives of all persons across diverse cultures and times as well as provide analytical categories for critically examining the worlds in which we live. The Women’s and Gender Studies major offers particular attention to the lives and experiences of women and girls via the critical scholarship of the humanities, sciences, and social sciences. Department faculty endeavor to provide intellectually rich student-centered learning environments via limited class sizes, collaborative research opportunities, and summer internship support.

Women’s and Gender Studies Major

Goals for the Women’s and Gender Studies Major

• Studying “gender” within a critical and theoretical interdisciplinary and cross-cultural framework
• Building specialized knowledge in one of the following concentrations: global feminism; families and work; health care, science and bioethics; gay/lesbian/transgender/gender studies; body politics; ethics and rights; gender and cinema; public policy; intersectionalities of race, class, gender, and sexuality
• Learning how to craft a feminist critical inquiry framework
• Benefiting from a unique capstone experience in their senior year where students can explore a provocative topic in Women’s and Gender Studies with either peers or a faculty member

Requirements for the Women’s and Gender Studies Major

A major in Women’s and Gender Studies offers an opportunity for the interdisciplinary study of women from the perspectives of the humanities, sciences, and social sciences. Women’s and Gender Studies majors seek an understanding of the new intellectual frameworks that are reshaping critical thought about the meaning and role of gender in human life. Majors pursue knowledge of gendered experiences in diverse cultures and across time, examining the ways in which race, social class, sexuality, and ethnicity are constitutive of that experience.

A major in Women’s and Gender Studies requires nine units taken both within the department and through the related courses taught in other departments. Of these, two units must be 300-level courses taken within the department (not counting WGST 108, WGST 120, or WGST 222), and majors must elect at least four other units offered within the Women’s and Gender Studies department, of which two should be 300-level seminars.

Courses at the 100 level are introductions to topics in Women’s and Gender Studies. They are taught from the perspective of each faculty member’s specialty. Courses at the 200 level are overviews to substantive areas. Courses at the 300 level provide in-depth examination of material covered in 200-level courses.

Students majoring in Women’s and Gender Studies must elect four of the nine units in such a way that they form a “concentration,” i.e., have a focus or central theme in common. Such concentrations should include relevant method and theory units in the area of concentration, and must be discussed with and approved by a Women’s and Gender Studies faculty advisor. See Concentrations in this regard. Priority in all courses above the 100 level will go to majors and minors.

Capstone Experience in Women’s and Gender Studies

All majors will be required to select a capstone experience, with the guidance of their advisor, from the following three options offered in 2014-15. Students should begin to think about which option would best fit their concentration when they declare the major. They must declare their option by the end of their junior year.

Option 1: WGST 312 Seminar. Feminist Inquiry. Each year the seminar will be a different special topic. For 2014-15, the topic is “Feminist Roundtable.” Option 2: WGST 313 (Fieldwork in Women’s and Gender Studies).

Option 3: WGST 360/WGST 370 (Senior Thesis). Option 3 is the traditional senior honors thesis, which requires two units during the senior year. See Academic Distinctions in this catalog for requirements. A thesis does not need to have an experiential component, but typically it is based on some original research. Option 2 must involve an experiential component.

Honors in Women’s and Gender Studies

The only route to honors in the major is writing a thesis and passing an oral examination. To be admitted to the thesis program, a student must have a grade point average of at least 3.5 in all work in the major field above the 100 level; the department may petition on her behalf if her GPA in the major is between 3.0 and 3.5. See Academic Distinctions.

Advanced Placement Policy in Women’s and Gender Studies

Women’s and Gender Studies does not allow students to count AP credits toward the fulfillment of the major or minor.

Language and Literature in Modern Korean Culture (in English)
Health and Society Minor

Health and Society Program Minor

Health and Society is a multidisciplinary field that examines human health as an eco-social phenomenon and draws principally from the humanities and social sciences. The rapid global growth of things "health" - public health, health care, health policy, and biomedical sciences and technology - in the face of growing disparities raises serious questions about the underlying social conditions that contribute to collective health and illness. Thus the intersections of gender, race, social class, sexuality, and ethnicity in a transnational and global context are central focal points in the Minor.

This Minor is fitting for any student interested in learning about health and its social, cultural, political, ethical, environmental, and economic dimensions.

Goals for the Health and Society Minor

The Health and Society Minor seeks to educate students to:

• Understand historical and current collective efforts to improve health
• Introduce students to the multiple social determinants of health and their complex interactions
• Examine how gender, race, class, sexuality, age, and ability shape health, illness, healing, and health care
• Analyze how health problems are defined and how strategies for improved health are selected and implemented

Requirements for the Health and Society Minor

The Health and Society Minor consists of five units:

1. WGST 150 Health and Society. This required introduction course is open to first-years and sophomores; juniors and seniors may enroll only with permission of the instructor.
2. Four 200 level (or higher) electives from the list of Courses Approved Toward the Health and Society Minor.
   • At least one of the four electives must be in the WGST Department.
   • At least one must be a 300 level elective

*Students wishing to count a non-Wellesley course toward the Health and Society minor must petition the Program co-directors prior to course enrollment.

*The Minor is open to students in any major at the College. WGST majors can do the Health and Society minor so long as no single course counts toward both the Minor.

Courses for Credit Toward the Health and Society Minor

The following courses may be counted as electives for the Health and Society Minor. Courses not listed may be accepted by petition to the Program co-directors. Note that some 200- and 300-level courses have prerequisites that do not count toward the Minor.

AFR 226 Environmental Justice, "Race," and Sustainable Development

AFR 297 Medical Anthropology: A Comparative Study of Healing Systems

AFR 340 Seminar. Topics in African American History

ANTH 238 The Vulnerable Body: Anthropological Understandings

ANTH 251 Cultures of Cancer

ANTH 274 Anthropological Genetics

Women's and Gender Studies Minor

Requirements for the Women's and Gender Studies Minor

A minor in Women’s and Gender Studies consists of five courses, of which one must be chosen from among WGST 108, WGST 120, or WGST 222, and of which one must be a 300-level course (not WGST 350 or WGST 350H) offered within the department. A total of at least three courses must be taken within the Women's and Gender Studies department.

Minors must devise a three-course "concentration" (see above) in consultation with a Women’s and Gender Studies faculty advisor. Not more than one unit can be a 100-level course.

WGST Women's and Gender Studies Courses

WGST 100 - First-Year Seminar: The Body: From Reproduction to Fashion (1.0)

This course explores the ways in which the body, as a reflection and construction of the self, is tied to social and political relations. The body is also a surface upon which we inscribe cultural norms. Through this examination of the role that our bodies play in daily life we will delve into the study of gender, sexuality and power. We focus on three major areas: (1) the medicalization of bodies (such as abortion and infertility); (2) the discipline of bodies (cosmetic surgery, fitness); and (3) the use of the body as a vehicle for performance, self-expression, and identity (drag queens, fashion, sports). Throughout the course we will look at how ideas about bodies are transported across national borders and social, sexual, and class hierarchies.

Instructor: Hertz
Prerequisite: None. Open to first-year students only.
Distribution: SBA
Term(s): Fall
No letter grade. Ann E. Maurer ’51 Speaking Intensive Course

WGST 108 - The Social Construction of Gender (1.0)

This course discusses the ways in which gender is socially constructed through social interactions and within social institutions. The relationship among gender, race, ethnicity, and social class will be stressed. The processes and mechanisms that construct and institutionalize gender will be considered in a variety of contexts: political, economic, religious, educational, and familial.

Instructor: Marshall
Prerequisite: None. Open only to first-year students
WGST 120 - Introduction to Women’s and Gender Studies (1.0)

Introduction to the interdisciplinary field of women’s and gender studies with an emphasis on an understanding of the “common differences” that both unite and divide women. Beginning with an examination of how womanhood has been represented in myths, ads, and popular culture, the course explores how gender inequalities have been both explained and critiqued. The cultural meaning given to gender as it intersects with race, class, ethnicity, and sexuality will be studied. This course also exposes some of the critiques made by women’s studies’ scholars of the traditional academic disciplines and the new intellectual terrain currently being mapped.

Instructor: Marshall
Prerequisite: None. Open to first-year students only.
Distribution: SBA; W
Term(s): Fall

This course satisfies the First-Year Writing requirement and counts as an introductory course toward the major in Women’s and Gender Studies. Includes a third session each week.

WGST 200 - Introduction to Reproductive Issues: Culture and Politics (1.0)

This course focuses on the politics of reproduction and examines the inextricability of reproduction from culture and power relations. Reproductive debates are never only about reproduction and health. They serve as proxies for fundamental questions about citizenship, national and religious identities, gender, class, race and sexuality. This course explores reproduction in cross-cultural contexts, attending to the social, ethical and policy implications of pregnancy, parenthood, and reproductive technologies. It is divided into three sections: frames and contexts, reproductive issues and debates, and women’s agency, social movements and global policy. Readings will problematize the multiple dimensions of reproductive politics and the social hierarchies that are produced, resisted, and transformed in the practice of reproductive lives.

Instructor: Natividad
Prerequisite: One WGST course or by permission of instructor.
Distribution: SBA
Term(s): Fall

WGST 205 - Love and Intimacy: A Cross-Cultural Perspective (1.0)

This course explores reproduction in cross-cultural and transnational contexts. In this course, we will examine the systems of meaning and processes and structural inequalities. Other sections: frames and contexts, reproductive issues and debates, and women’s agency, social movements and global policy. Readings will problematize the multiple dimensions of reproductive politics and the social hierarchies that are produced, resisted, and transformed in the practice of reproductive lives.

Instructor: Galanne
Prerequisite: Open to first-year and sophomores; juniors and seniors may enroll only with permission of the instructor.
Distribution: SBA
Term(s): Fall

WGST 260 - Migration, Gender, and Globalization (1.0)

This course is an interdisciplinary exploration of migration and gender in transnational context. Utilizing feminist, queer, and social science theories of transnational migration and globalization, we will consider how the intensification of global flows of capital, information, goods, and people have lead to escalated border controls and migration management. By investigating phenomena such as neoliberalism, survival circuits, and the international division of reproductive labor and care, we will further gauge how and why notions of gender, family, race, and the ideal nation have become all the more contested in the wake of heightened cross-border movement.

Instructor: Musto
Prerequisite: None
Distribution: SBA
Term(s): Not Offered

WGST 207 - Gender and Sexuality in Cyberspace: A Transnational Feminist Approach (1.0)

This course examines cyberspace through a lens of gender, sexuality, race, geopolitics, and colonialism. We will take a transnational feminist approach that pays attention to uneven circuits of culture and capital and highlights difference among gendered and sexed subjects to examine the global connections between online and offline worlds. We will explore and question transparency and digital democracy in cyberspace, fluidity of identities, and unrestricted mobility and access that are presumed intrinsic to an antihierarchical Internet. Employing online and offline ethnography and discourse analysis, students will explore the central role of gender and sexuality in the context of liberation and surveillance, civil society and revolution, and community and security. How are these ideas complicated when examined beyond utopian or dystopian visions of cyberspace?

Instructor: Shakharsi
Prerequisite: One WGST course or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

WGST 211 - American Families and Social Equality (1.0)

American families are undergoing dramatic changes in social, political, and economic arenas: the rise of the dual-worker family, the increasing number of single mothers, the demands of family rights by gay and lesbian families, and the growing number of couples having children at older ages. The new economy poses real challenges for American parents as the social and economic gaps between families continues. As women dedicate a greater proportion of their time to the workplace, more children are cared for outside the home. How do children view parents’ employment? How do families function when they have only limited hours together? What does fatherhood mean in these families? Using a provocative blend of social science, novels, and memoirs, we will examine how gender, race, ethnicity, and social class shape the experience of family life in the contemporary United States.

Instructor: Hertz
Prerequisite: None
Cross-Listed as: SOC 205
Distribution: SBA
Term(s): Not Offered

WGST 212 - Feminist Bioethics (1.0)

Attentive to the ways that gender, race, class, sexuality, ability, and other social systems influence ethical frameworks, norms, and values as well as health and disease, feminist bioethics analyzes moral concerns in clinical care, biomedical research, health care organization and financing and health policy in the service of the health of all persons and communities. This course draws on the theoretical resources of feminist philosophy and religious social ethics as well as on the narratives and practices of law, medicine, public health, and the social and biological sciences to examine bioethical issues across the lifespan. Not limited to “women’s issues” (e.g. reproduction), the course also addresses the
How do cultural productions perpetuate stereotypes that reinforce hierarchies of race and gender? By critically reading popular cultural productions, we will ask: How have recent scientific, technological, and legal changes reconstituted the boundaries between self and other? Public and private space?

**GWST 218 - Stage Left: Chicana/Latina Theatre and Performance (1.0)**
This course serves as an introduction to Chicana/Latina theatre and performance and the role that class, race, gender, and sexuality play in constructing identity on the stage. We will examine how members of the Chicana/Latina community—individuals often marginalized from mainstream theatre productions—employ the public stage as a space for self-expression and resistance. Through an analysis of plays and theatre/performance scholarship, we will identify common themes and important differences in the various productions. We will further consider how community, citizenship, and notions of belonging manifest themselves on the public arena of the stage. We will begin by studying the role of theatre in the social justice movements of the 1960s and trace the changes that Chicana/Latina theatre and performance have undergone in subsequent years.

Instructor: Mata
Prerequisite: None
Distribution: ARS; SBA
Term(s): Spring

**GWST 219 - Gender in the Workplace (1.0)**
This course explores the experiences of women and men in the changing U.S. workplace. The course will address key issues related to gender, race and class in the workplace, with a focus on the social organization of work—the nature of work, division of labor, social inequality—and its consequences for women and men; and gendered organizations and processes of gender discrimination, including sexual harassment.

Instructor: Marshall
Prerequisite: GWST 108, GWST 120, GWST 222, or SOC 102.
Distribution: SBA
Term(s): Spring

**GWST 220 - American Health Care History in Gender, Race, and Class Perspective (1.0)**
Traditional American medical history has emphasized the march of science and the ideas of the “great doctors” in the progressive improvement in American medical care. In this course, we will look beyond just medical care to the social and economic factors that have shaped the development of the priorities, institutions, and personnel in the health care system in the United States. We will ask how gender, race, class, and sexuality have affected the kind of care developed, its differential delivery, and the problems and issues addressed.

Instructor: Reverby
Prerequisite: GWST 108, GWST 120, or GWST 222, or by permission of the instructor.
Distribution: HS
Term(s): Fall

**GWST 222 - Gender and Sexuality in Contemporary American Society (1.0)**
Drawing upon feminist, queer, and social science theories of gender and sexuality, this course explores transformations in the lives of cisgender and transgender people in a contemporary U.S. context. Questions we will examine include: To what extent are categories of gender, sexuality, race and class socially constructed? How do we move beyond just medical care to the social and economic factors that have shaped the development of the priorities, institutions, and personnel in the health care system in the United States? We will ask how gender, race, class, and sexuality have affected the kind of care developed, its differential delivery, and the problems and issues addressed.

Instructor: Reverby
Prerequisite: GWST 108, GWST 120, or GWST 222, or by permission of the instructor.
Distribution: HS
Term(s): Fall

**GWST 223 - Gendering the Bronze Screen: Representations of Chicanas/Latinas in Film (1.0)**
The history of Chicanas/Latinas on the big screen is a long and complicated one. To understand the changes that have occurred in the representation of Chicanas/Latinas, this course proposes an analysis of films that trace various stereotypes to examine how those images have been perpetuated, altered, and ultimately resisted. From the anglicizing of names to the erasure of racial backgrounds, the ways in which Chicanas/Latinas are represented has been contingent on ideologies of race, gender, class, and sexuality. We will be examining how films have typecast Chicanas/Latinas as criminals or as “exotic” based on their status as women of color, and how Chicanas/Latinas filmmakers continue the practice of casting Chicanas/Latinas solely as supporting characters to male protagonists.

Instructor: Mata
Prerequisite: None
Cross-Listed as: CAMS 240
Distribution: ARS
Term(s): Spring

**GWST 225 - Politics and Sexuality (1.0)**
This interdisciplinary course will provide an overview of the key texts, topics, debates, and politics that inform the field of sexuality studies. Students will use critical thinking skills to discern how gender and sexuality inform social, political, and historical ways of knowing and being. Because this field of inquiry has developed within the context of many different movements for social change, we will be discussing sexuality with respect to its intersections with feminist and LGBTQ (lesbian, gay, bisexual, transgender, and queer) movements. We will place these alongside critiques of race, nationalism, fundamentalism, and uneven economic development, and will aim to articulate foundational questions about the relationship between power and sexual subjectivity.

Prerequisite: One 100-level course or permission of the instructor.
Distribution: SBA
Term(s): Not Offered

**GWST 235 - Politics of Sexuality in a Transnational World (1.0)**
Drawing upon theories of sexuality and transnational feminist scholarship, this course explores sexuality as a construct, implicated in the division and management of populations within transnational political realms. Using social science and humanities approaches to sexuality, we tackle questions that include the following: How is sexuality integral to racial discourses, class formation, citizenship, and criminalization? How are disability and life optimization discourses, reproductive politics, and the management of life and death of different populations related to the regulation of sexuality? How do nationalism, colonialism, militarism, and capitalism deploy sexuality in different times? Why is sexuality important to the study of labor, immigration, refugee rights, tourism, and diasporas? Through studying ethnography, performance, literature, and film, this course will examine sociopolitical and cultural aspects of sexuality in a transnational context.
situation, where our focus will be on sexuality. In the second half of the course, we look at Westerns, a complex category that includes not only American, African American, Chicana/Latina, Asian American, and Pacific Islander men and women in visual culture. We will look comparatively at Native American, African American, Chicana/Latina, American, and Pacific Islander men and women in film, photography, performance, and installation art.

The course examines both dominant historical representations of race, class, sexuality, and gender in visual culture. We will look comparatively at Native American, African American, Chicana/Latina, American, and Pacific Islander men and women in film, photography, performance, and installation art.

Instructor: Cred

Term(s): Spring

WGST 313 - Fieldwork in Women's and Gender Studies (1.0)

This is a supervised, independent fieldwork project resulting in a research paper, documentary, policy initiative, creative arts presentation, or other research product. This project, developed in conjunction with a WGST faculty member, will have a significant component focusing on women's lives and/or gender. Topics should be part of the student's area of concentration. Students may (1) work in an organization, (2) work with activists or policy makers on social change issues or social policy issues, or (3) design their own fieldwork experience.

Instructor: Staff

Term(s): Fall; Spring

WGST 314 - Seminar. Transnational Feminisms (1.0)

This seminar is structured as a critical engagement with "global" and transnational feminism(s). It starts with an examination of some key feminist concerns and debates—feminist epistemology, issues of representation, agency and subjectivity, capitalism, patriarchy, post-colonialism and nationalism, globalization, development, migration, and incarceration. With a grasp of these analytical tools and issues, we move on to examine the formation of transnational women's movements that have mobilized around women's human rights. In the last part of the course, we will see why and how "sex trafficking" has become the convergent point of feminist debates, and consider the policy implications these differences and politics are having on the lives of women around the world.

Instructor: Musto

Term(s): Fall

WGST 317 - Seminar. Theories of Sexuality: Queer Theory (1.0)

This course will cover terms, concepts, and writers central to the elaboration of queer theory and practice. We will begin by situating the concerns of queer theory within the historical development of lesbian, gay, bisexual, and transgender movements for social change around the world, and within institutional contexts, including those of higher education. We will read some of the works that have come to be framed by the rubric of queer theory and works produced under the aegis of cultural studies, anthropology, history, literary studies, philosophy, performance studies, and gender and sexuality studies. Students will be encouraged to critically think about identities, subversion, homonormativity, homonationalism, complicity, and possibilities and limits of "queering."

Instructor: Shawkari

Term(s): Spring

WGST 321 - Seminar. Gender, Justice and Health Policy (1.0)

Various understandings of justice persist and vie for dominance in contemporary health policy debates. Health justice extends beyond recent health care reforms as well as beyond distributive notions of justice that typically minimize social structures (gender, race, class, culture, citizenship) and social processes (decision-making, division of labor). This seminar explores multiple constructions of justice (egalitarian, procedural, solidarity, social connection/responsibility, legal) drawn from moral and political philosophy and from religious social ethics. We examine these diverse justice frameworks as potential and actual normative guides in the domestic and global health policy realms, and do so through close readings of texts, weekly writing, seminar discussion facilitated by students and faculty, and student research.

Instructor: Galarneau

Term(s): Not Offered

WGST 324 - Seminar. History, Memory, and Women's Lives (1.0)

If a woman speaks of her experiences, do we get closer to the "truth" of that experience? How can oral history provide a window into the lives of women in the past and what does it close off? Analysis of methodological and theoretical implications of studying women's lives through oral histories as a way to end the silences in other historical forms. Special attention to be paid to other genres—history, fiction, ethnographies—as a foil to explore the strengths, and limitations, of the oral-history approach.

Instructor: Reverby

Term(s): Not Offered

WGST 326 - Seminar. Crossing the Border(s): Narratives of Transgression (1.0)

This course explores literatures that challenge the construction of borders, be they physical, ideological, or metaphorical. The theorizing of the border, as more than just a material construct used to demarcate national boundaries, has had a profound impact on the ways in which Chican@/Latina@ writers have written about the issue of identity and subject formation. We will examine how the roles of women are constructed to benefit racial and gender hierarchies through the policing of borders and behaviors. In refusing to conform to gender roles or hegemonic ideas about race or sexuality, the Chican@ and Latina@ writers being discussed in the course illustrate the necessity of crossing the constructed boundaries of identity being imposed by the community and the greater national culture.

Instructor: Mata

Term(s): Not Offered
Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.

WGST 370 - Senior Thesis (1.0)
Prerequisite: WGST 360 and permission of the department.
Distribution: None
Term(s): Fall; Spring

Students enroll in Senior Thesis Research (360) in the first semester and carry out independent work under the supervision of a faculty member. If sufficient progress is made, students may continue with Senior Thesis (370) in the second semester.
THE WRITING PROGRAM

Director: Velenchik (Economics)
Senior Lecturer: Vit, Wood
Lecturer: Armstrong, Brubaker, Johnson
Visiting Lecturers: Bryant, Nelson

Writing is central to academic life at Wellesley and will continue to play an important role in most students’ lives after they graduate, whether they choose majors in the sciences, the social sciences, or the humanities. The starting point for writing at Wellesley is the First-Year Writing requirement. All students are required to fulfill the First-Year Writing requirement by taking an introductory course in expository writing in either the fall or spring semester of their first year at Wellesley. Courses fulfilling this requirement, numbered WRIT 100 to WRIT 198, make up the majority of the course offerings in the Writing Program. These courses are taught by faculty from many departments as well as by a team of writing professionals; all First-Year Writing faculty view writing as an important part of their own professional lives and are committed to helping Wellesley students learn to use writing as a powerful tool of thought and expression, a way to gain entrance to public discourse.

All First-Year Writing courses have the primary goal of helping students establish a useful writing process, from developing ideas through revision. All sections provide instruction in analysis and interpretation, in argument and the use of evidence, in the development of voice, and in the conventions of academic writing, including writing from sources. Students may choose to take a standard First-Year Writing course (meeting two periods a week and addressing a small, well-defined topic related to the instructor's expertise), or they may choose to take a course as part of an introductory course in another department. (These "combined courses" have departmental course numbers in their titles, for example WRIT 105 - ENG 120, and include the courses numbered between WRIT 105 and WRIT 115 except WRIT 106; all carry one unit of credit, fulfill distribution and/or major requirements, and meet for at least three periods each week.)

In addition to these "combined courses", the Writing Program also offers courses designed to provide extra support and intensive preparation for making the transition to the demands of writing at the college level. Two of these courses (WRIT 120 and WRIT 123) are intended for students enrolled in the Wellesley Plus program. The other two courses (WRIT 121 and WRIT 122) are suitable for students who have one of the following characteristics: they speak English as an additional language; their high school education included limited opportunities for writing; they received scores of less than 600 on the Writing or Critical Reading sections of the SAT; they need help developing ideas and organizing them to make them into coherent arguments; or they need help with the conventions of academic writing. These courses fulfill the First-Year Writing requirement and count as an introductory course toward the major in Art History, Architecture, or Studio Art.

WRIT 105 - ENG 120 Critical Interpretation (1.0)
This course introduces students to a level of interpretative sophistication and techniques of analysis essential not just in literary study but in all courses that demand advanced engagement with language. Sections explore the principal literary genres, including a selection of poems, a play, and prose narrative. Required of English majors and minors, "Critical Interpretation" fosters intellectual community among its students by teaching some text together, and all students are encouraged to attend campus events such as performances of the year's play by London actors, film screenings, lunchtime lectures by English faculty, and other occasions for discussion and collaboration. Instructor: Sabin, Whitaker, Wall-Randall, Rosenwald (English)
Prerequisite: None. Open only to first-year students. Distribution: Ll; W Term(s): Fall; Spring
This course satisfies both the First-Year Writing requirement and the critical interpretation requirement of the English major. Includes a third session each week.

WRIT 106 - Narrative Theory (1.0)
How are stories put together? How do they create the sense that they are told from a distinct perspective? How do they create anticipation and retrospection? How do we distinguish the telling from the tale? This course offers an introduction to narrative theory, or theories that explain the devices and structures that stories use in order to make meaning. We will read excerpts from major works of narrative theory (Bal, Genette, Barthes), and we will explore how their concepts yield a better understanding and appreciation of short stories (as well as novels). Authors may include Balzac, Joyce, Conrad, and Faulkner. Instructor: Lee (English)
Prerequisite: None. Open only to first-year students. Distribution: W Term(s): Fall

WRIT 107 - ARTH 100 Global Perspectives on Art and Architecture: Ancient to Medieval (1.0)
Swapping in its chronological and geographical scope, this two-part survey engages students in the analytical study of art, architecture, and urban form. It is a foundational course in critical and visual analysis; being able to look and analyze what you see is fundamental to a liberal arts education. This is a required class for all art history, architecture, and studio art majors, who should plan to elect both ARTH 100 and ARTH 101 in their first or second year at Wellesley. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 100 students, but their assignments will be different, and they will attend two special WRIT 107 conferences each week. Through writing about art, students in WRIT 107/ARTH 100 will develop skills in visual and critical analysis.
Instructor: Bedell, Lynn-Davis (Art)
Prerequisite: None. Open only to first-year students. Distribution: ARS; W Term(s): Fall
This course satisfies the First-Year Writing requirement and counts as a unit toward the major in Art History, Architecture, or Studio Art.

WRIT 108 - ARTH 101 Global Perspectives to Art and Architecture: Renaissance to Contemporary (1.0)
Swapping in its chronological and geographical scope, this two-part survey engages students in the analytical study of art, architecture, and urban form. It is a foundational course in critical and visual analysis; being able to look and analyze what you see is fundamental to a liberal arts education. This is a required class for all art history, architecture, and studio art majors, who should plan to elect both ARTH 100 and ARTH 101 in their first or second year at Wellesley. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 100 students, but their assignments will be different, and they will attend two special WRIT 108 conferences each week. Through writing about art, students in WRIT 108/ARTH 101 will develop skills in visual and critical analysis.
Instructor: Lynn-Davis (Art)
Prerequisite: None. Open only to first-year students. Distribution: ARS; W Term(s): Spring
This course satisfies the First-Year Writing requirement and counts as a unit toward the major in Art History, Architecture, Studio Art, or Media Arts and Sciences.

WRIT 110 - WGST 108 The Social Construction of Gender (1.0)
This course discusses the ways in which gender is socially constructed through social interactions and within social institutions. The relationships among gender, race, ethnicity, and social class will be stressed. The processes and mechanisms that construct and institutionalize gender will be considered in a variety of contexts: political, economic, religious, educational, and familial.
Instructor: Marshall (Women's and Gender Studies)
Prerequisite: None. Open only to first-year students. Distribution: SBA; W Term(s): Fall
This course satisfies the First-Year Writing requirement and counts as an introductory course toward the major in Women's and Gender Studies. Includes a third session each week.

WRIT 111 - CAMS 115 Hitchcock, Auteur (1.0)
WRIT 121 - Almost Touching the Skies: Women's Coming of Age Stories (1.0)

This course will examine what it means to come of age as a woman in contemporary America by focusing on how the narrative has changed since the 1880's. Through a variety of readings by writers anthropologist in Almost Touching the Skies, including Zora Neale Hurston, Toni Cade Bambara, Shirley Geok-lin Lim, Kate Chopin and Louise Meriwether, the monstrous mother of the '50s, women who- could-never-be-mothers of film noir, the absent mother of the '80s and '90s, and (possibly), as we investigate race and immigration issues, mother as "other." Writing assignments will ask students to analyze films using the techniques of film analysis to investigate.

Instructor: Armstrong (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: SBA; W
Term(s): Fall

This course satisfies the First-Year Writing requirement and counts as a unit toward the Anthropology major. Includes a third session each week. No letter grades given.

WRIT 130 - Finding a Voice: Twentieth-Century Irish Literature (1.0)

The Anglo-Irish novelist Elizabeth Bowen once wrote the only place she felt at home was in the middle of the Irish Sea. Eavan Boland, the contemporary poet, claims, examining multiple versions of "the mother" in Hollywood cinema, both classic and contemporary. Among the mother archetypes we will consider are: the self-sacrificing mother of '40s melodrama, the monstrous mother of the '50s, women-who- could-never-be-mothers of film noir, the absent mother of the '80s and '90s, and (possibly), as we investigate race and immigration issues, mother as "other." Writing assignments will ask students to analyze films using the techniques of film analysis to investigate.

Instructor: Armstrong (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall

This course provides extra academic support and intensive preparation for the demands of writing at the college level. Meets a third session each week. No letter grades given.

WRIT 140 - Wire and the American City (1.0)

The acclaimed HBO television series The Wire has opened up a new avenue for scholars, urban community members, and everyday viewers to consider the complex problems of the contemporary American city. In this course, we will look at the rich array of new writing by sociologists, legal analysts, and political scientists in relation to selected episodes of The Wire. Required readings from authors including Randall Kennedy, Geoffrey Canada, William Julius Wilson, Kurt Schmoke, David Simon, and William Bennett as well as screenings of The Wire will serve as a springboard for argument and writing.

Instructor: Viti (The Writing Program)
Prerequisite: Enrollment restricted to students in the Wellesley Plus Program.
Distribution: W
Term(s): Spring

Registration in this course is restricted to students selected for the Wellesley Plus Program. This course provides extra academic support and intensive preparation for the demands of writing at the college level. Meets a third session each week. No letter grades given.

WRIT 114 - EDUC 102 Education in Philosophical Perspective (1.0)

This course is guided by questions such as: What is education? How do an individual's own efforts to make sense of the world and to guide her life relate to schools and academic work? To the diversity of experiences and cultures? What should the aims of education be? The focus will be on perspectives and processes of learning and teaching. We will use the works of earlier writers (for example, Confucius, Plato, and Dewey) and contemporary writers as starting points in our investigations.

Instructor: Hawes (Education)
Prerequisite: None. Open only to first-year students.
Distribution: EC; W
Term(s): Spring

This course satisfies the First-Year Writing requirement and counts as a unit toward the Teacher Education or Education Studies minor. Includes a third session each week. No letter grades given.

WRIT 115 - ARTS 115 Word and Image Studio (1.0)

This studio art course centers on the interplay of word and image. While pursuing a range of studio projects in graphic media (drawing, book arts, and print), we will examine the role of text and visible language in the work of various contemporary artists. Our studio activities and discussions will explore fundamental visual concepts while cultivating an increased awareness of visual rhetoric and typographic design. Throughout the semester, considerable attention will be placed on developing more effective written commentary, critical thinking, and oral presentation skills relevant to visual investigation.

Instructor: McGibbon (Art)
Prerequisite: None. Open only to first-year students.
Distribution: ARS; W
Term(s): Spring

This course satisfies the First-Year Writing requirement and counts as a unit toward a major in Studio Art or Art History or Media Arts and Sciences. No letter grades given.

WRIT 113 - ANTH 113 Reading and Writing Culture: Thinking and Writing like an Anthropologist (1.0)

Cultural anthropology has been described as the process of making the familiar strange and the strange familiar, and it is through this translation of culture that the experiences of anthropologists in the field are made available to a wider audience. In this course, we will read classic and current ethnographies (written documents of anthropological fieldwork) as a foundation for producing our own ethnographies. For one class meeting per week, we will visit strangely familiar locales in and around Wellesley (and Boston!). Our other two weekly meetings will provide an opportunity to carefully examine the practice of reading and writing culture. All semester, we will read great works of cultural anthropology and think like anthropologists by conducting interviews, making field notes, taking photographs, and exploring experimental methodologies. If you've ever wondered why people do what they do, this course will give you the tools to unpack the layers of culture that surround you.

Instructor: Armstrong (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: SBA; W
Term(s): Spring

This course satisfies the First-Year Writing requirement and counts toward the Anthropology major. Includes a third session each week. No letter grades given.

WRIT 122 - Wellesley and the World (1.0)

Wellesley's mission is to educate "women who will make a difference in the world." In this course, we will explore Wellesley's place in the world, learning how it has helped shape American higher education, promoted health and fitness, advanced women's rights, and influenced politics and diplomacy. We will also investigate the world that is Wellesley, taking specially designed tours of the campus as we examine the College's historic buildings and unique landscape architecture. Students will practice writing different types of college-level academic papers, including a position paper that thoughtfully considers counter-argument; a study of a work of architecture that integrates art, history, and analysis; and a critical research essay focused on a Wellesley alumna or on a topic related to the work that Wellesley alumnae have contributed to the world.

Instructor: Johnson (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall

This course is appropriate for students who speak English as an additional language, or who have not done much writing in high school, or who lack confidence in their writing. It will provide extra academic support and intensive preparation for the demands of writing at the college level. No letter grades given.

WRIT 120 - The Maternal in Film (1.0)

Film theorist MaryAnn Doane observes that "in Western culture, there is something obvious about the maternal, which has no counterpart in the paternal"—and whatever it is that is obvious about motherhood is represented and played out in countless films. In this course, we will test Doane's claim, examining multiple versions of "the mother" in Hollywood cinema, both classic and contemporary. Among the mother archetypes we will consider are: the self-sacrificing mother of '40s melodrama, the monstrous mother of the '50s, women who- could-never-be-mothers of film noir, the absent mother of the '80s and '90s, and (possibly), as we investigate race and immigration issues, mother as "other." Writing assignments will ask students to analyze films using the techniques of film analysis to be taught in the course.

Instructor: Wood (The Writing Program and Cinema and Media Studies)
Prerequisite: Enrollment restricted to students in the Wellesley Plus Program.
Distribution: W
Term(s): Spring

Registration in this course is restricted to students selected for the Wellesley Plus Program. This course will provide extra academic support and intensive preparation for the demands of writing at the college level. Meets a third session each week. No letter grades given.

WRIT 119 - All That's Missing: The Absent Mother in Film Noir (1.0)

In Hitchcock's working life, this course will use these questions to shape our understanding of film and film theory.

Instructor: Wood (The Writing Program and CAMS)
Prerequisite: None. Open only to first-year students.
Distribution: ARS; W
Term(s): Fall

This course satisfies the First-Year Writing requirement and counts as a unit toward the major in Cinema and Media Studies. Includes a third session each week.

WRIT 131 - WRIT 131 Finding a Voice: Twentieth-Century Irish Literature (1.0)

Eavan Boland, the contemporary poet, claims, examining multiple versions of "the mother" in Hollywood cinema, both classic and contemporary. Among the mother archetypes we will consider are: the self-sacrificing mother of '40s melodrama, the monstrous mother of the '50s, women-who- could-never-be-mothers of film noir, the absent mother of the '80s and '90s, and (possibly), as we investigate race and immigration issues, mother as "other." Writing assignments will ask students to analyze films using the techniques of film analysis to investigate.

Instructor: Armstrong (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: SBA; W
Term(s): Spring

This course satisfies the First-Year Writing requirement and counts toward the Anthropology major. Includes a third session each week. No letter grades given.
genres (poetry, fiction, drama, and non-fiction), we will explore what it means to be an Irish writer. From that experience, we will simultaneously pursue the enduring question: how does a writer find his or her voice?

Instructor: Bryant (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 131 - Modernism -- One Century Later (The Burden of the Past) (1.0)

This course will examine the blossoming of literature, art, and culture at the beginning of the 20th-Century known as Modernism. By reading some of the giants of the movement such as James Joyce, Gertrude Stein, Virginia Woolf, T.S. Eliot, Ezra Pound, Wallace Stevens, Marianne Moore, and Samuel Beckett, we will explore the major tenets of this creative explosion. Our discussion will center on the premise that this originally experimental approach to art dominated much of the following century. We will investigate the ways the succeeding artistic and intellectual endeavors reacted to the previous creations both directly through Post-Modernism, and indirectly through creative non-fiction and the prose poem.

Instructor: Bryant (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 132 - Class Matters in American Literature and Culture (1.0)

Through the lens of social and economic class, we will examine a range of materials that seek to document the realities of everyday life. Readings and discussions of modern American fiction, poetry, memoir, non-fiction essays, and likely a film or two will prompt us to ask: what are the enduring myths of American social mobility and success? How does perceived or actual class position inform selfhood, relationships to local or national communities, and access to resources and opportunities? What are the relationships between class and other forms of identity (e.g. race, gender, sexuality)? How do class issues intersect with human rights advocacy and social justice movements? Writing assignments will allow an examination of these questions in a range of genres.

Instructor: Brubaker (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall
No letter grades given.

WRIT 133 - Living in the Age of the Anti-Hero (1.0)

This course will ask questions about the social significance of the antihero archetype. We will analyze varied versions of this predominant figure, as the epitome of "serious" storytelling in literary, cinematic, and graphic media. We will look at seminal graphic novels, at "prestige" television series, and contemporary Hollywood. We will ask questions about gender and genre, about race and erasure, the function of the cinematic gaze and the gutter of the graphic novel page. We will digest essays in popular media that treat this contemporary phenomenon, and write about our own reception of these antiheroes, why they capture our imagination (or don't), and why we root for them despite their moral failings, or because of them.

Instructor: Gonzalez (English)
Prerequisite: None. Open only to first-year students
Distribution: W
Term(s): Fall
No letter grades given.

WRIT 134 - The Making of the Modern Self: Writing and Identity from the Middle Ages to the Present (1.0)

What do we understand by the term "selfhood," and especially "the modern self"? Can, or should, we think of the "birth" of the "modern self" as having occurred in a specific historical period? If so, when? What techniques do writers use to bring that self into being and what influences-historical, cultural, philosophical, psychological, and linguistic-help to shape it? Are literature and writing primarily a means of self-expression or self-creation? This course will explore themes such as these through writing assignments focused on the close-reading of selections from some of the great works of world literature (Dante, Montaigne, Shakespeare, Woolf) which contribute to the debate about the origins and development of the self and the notion of the individual. The course will culminate with a personal essay assignment, giving students the opportunity to express an aspect of their own selfhood in a new way.

Instructor: Southerden (Italian Studies)
Prerequisite: Only open to first-year students
Distribution: W
Term(s): Fall
No letter grades given.

WRIT 135 - Do French Women Really...? (1.0)

From their legendary ability to stay thin, to their shrewd mothering skills, sophisticated charm, culinary prowess, and sexual savoir-faire, les Françaises—French women—have long held American commentators in thrall. We will explore the complexity of twenty-first century portrayals of French women as models of a unique vein of femininity. We will explore how writers construct their images of French women from three directions: through close readings, critiques of authorial voice, and the analysis of supporting evidence. We will investigate a panoply of "French" in self-help books, memoirs, feminist manifestos, film, fiction, and historical accounts. Participants will analyze, then imitate the texts we consider, paying close attention to how the choice of a particular genre sheds light on the author's development of his or her thesis.

Instructor: Bilis (French)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall
Ann E. Maurer '51 Speaking Intensive Course

WRIT 136 - Romantic (and Unromantic) Comedy (1.0)

"Boy meets girl" has long been a classic starting point, in both literature and the movies. This course will focus on romantic comedy in American cinema, with significant looks backward to its literary sources. We will view films from the classic era of Hollywood (It Happened One Night, The Lady Eve), the revisionist comedies of the 1970s and beyond (Annie Hall, My Best Friend's Wedding), and perhaps some of the decidedly unromantic comedies of recent years (Knocked Up). We will also read one or two Shakespeare plays, and a Jane Austen novel, to get a sense of the literary precedents that established the paradigms within which cinematic comedy operates.

Instructor: Shetley (English)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall
No letter grades given.

WRIT 140 - Growing Up In the Novel (1.0)

No letter grades given.

WRIT 144 - The Story and The Writer (1.0)

Edith Wharton felt that the short story, at its best, was "a shaft driven straight into the heart of human experience." John Cheever, another brilliant practitioner of the short story, claimed that "so long as we are possessed by experience that is distinguished by its intensity and episodic nature, we will have the short story." Students will read and discuss stories by a wide range of writers, including Chekhov, Joyce, Hemingway, Wharton, Kafka, Joyce Carol Oates, Junot Díaz, and Marquez. We will look closely at the writer's craft and at those factors that influenced the writing. Students will refine their analytical research, and writing skills by working on essays based on the stories.

Instructor: Cezar-Thompson (English)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 144 - The Making of the Modern Self: Writing and Identity from the Middle Ages to the Present (1.0)

WRIT 147 - Literature, Gender, and Sexuality (1.0)

How has literature shaped our understanding of gender and sexual identity? To help answer this, we will analyze and write about stories that focus on experiences and expressions of gender and sexuality. We will explore how writers have represented and interpreted men and women's lives, including professional and domestic roles, hierarchies and inequalities, and acts of resistance and subversion. The reading list will include a diverse range of American writers such as Kate Chopin, Nella Larsen, James Baldwin, Armistead Maupin, Jamaica Kincaid, Audre Lorde, David Henry Hwang, and Annie Proulx. Our writing assignments in this course include an autobiographical nonfiction essay, a personal blog, two argumentative essays, a researched paper, and a literary review.

Instructor: Brubaker (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring

WRIT 148 - Sex in the Middle Ages (1.0)

As the sustained existence of a human race demonstrates, people have sex during the Middle Ages. However, the relationship of intimate acts themselves to romance, marriage, medical knowledge, gender, sexuality and religion represented dramatically different configurations than what popular cultures and beliefs would indicate today. Focusing on the European Middle Ages (from 585 C.E. to 1500 C.E.), we will examine, from various perspectives (primarily literature, medicine, and religious texts), how desire was informed by cultural constructions. Topics will include medical writings dealing with romantic love as a sickness, gendered expectations regarding the physical and the spiritual, the evolution of misogyny, expectations regarding marriage, prostitution and birth control, lust within the context of the Seven Deadly Sins, and current controversies surrounding the creation of normative sexuality and its value for pre-modern societies.

Instructor: Vega (Spanish)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 151 - Do French Women Really...? (1.0)

From their legendary ability to stay thin, to their shrewd mothering skills, sophisticated charm, culinary prowess, and sexual savoir-faire, les Françaises—French women—have long held American commentators in thrall. We will explore the complexity of twenty-first century portrayals of French women as models of a unique vein of femininity. We will explore how writers construct their images of French women from three directions: through close readings, critiques of authorial voice, and the analysis of supporting evidence. WRIT 152 - Growing Up In the Novel (1.0)

No letter grades given.
Because we’ve grown up reading the novels of the nineteenth, twentieth, and twenty-first centuries, we take for granted that the novel as a genre has a deep investment in a plot that begins with an immature protagonist and traces his or her progress (gender matters here, in ways we will discuss) over the course of the novel. We will investigate this pattern by reading and writing about novels that both conform to and interrogate it. We will also think about why this plot has come to dominate the novel. Readings may include Charlotte Bronte’s Jane Eyre, George Eliot’s The Mill on the Floss, Virginia Woolf’s The Voyage Out and D.H. Lawrence’s Sons and Lovers.

Instructor: Rodemaker (English)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 160 - The Magic of Everyday Life: Stories About Our Culture (1.0)
Fascinating cultural practices are found not only in far-off places but are also embedded in the stories of our everyday lives. From our families and friends to taxi drivers and grocery clerks, everyone’s personal history has something to teach us. Written accounts of culture (called ethnographies) are created from these narratives of how people live their lives. What extraordinary stories of culture are hidden in local, everyday places? What does it mean to write someone else’s story? Our own? What can we learn about culture by translating oral histories into words? With the understanding that some of the most interesting stories about human culture are told in our own backyards, we will approach writing through ethnographic storytelling, using our life experiences as our subject.

Instructor: Armstrong (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall

WRIT 163 - Wealth and Poverty in America: An Economist’s Perspective (1.0)
America has become increasingly unequal over the past 30 years. Corporate executives’ earnings are hundreds of times those of their blue-collar employees. The middle class is on the precipice, according to Harvard Magazine. More Americans are millionaires than ever before, but more of us are poor as well. What is happening? Why? What does this change mean for our economy and society? This course will use primary data, government publications, and articles in both the popular and scholarly press as a basis for writing about the causes and consequences of these trends. We will pay particular attention to learning about quantitative phenomena using numbers, charts, and graphs.

Instructor: Velenchik (The Writing Program and Economics)
Prerequisite: Fulfillment of the basics skills component of the Quantitative Reasoning requirement. Open only to first-year students.
Distribution: W
Term(s): Spring
No previous knowledge of economics is required. No letter grades given.

WRIT 164 - How the Supreme Court Shapes America: Rights, Responsibilities and More (1.0)
In this course, students will read and write about landmark United States Supreme Court opinions, and in doing so, locate important themes and trends in the Court’s decisions, beginning with the power of judicial review in Marbury v. Madison, and jumping ahead to more recent decisions about the Fourteenth Amendment and equal educational opportunity (Brown v. Board of Education), privacy rights (Griswold v. Connecticut and Roe v. Wade), executive privilege (U.S. v. Nixon), and federalism (Bush v. Gore). We will also read and analyze essays and reports by journalists and legal scholars who comment on the Supreme Court, including Laurence Tribe, Bob Woodward, Nina Totenberg, Jeffrey Rosen, and Jeffrey Toobin.

Instructor: Viti (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall
No letter grades given.

WRIT 165 - China Past and Present: The Eighteenth-Century “Flourishing Period” and its Legacy (1.0)
Eighteenth-century China was at the center of global transformations. From Bangkok to Boston, consumers demanded its teas and textiles. Chinese armies drove deep into Central Asia, conquering new territories. Population growth propelled a form of economic development that would leave modern legacies of extraordinary political and environmental challenges. Our course investigates these breathtaking changes and critically assesses their legacies for the present. Topics include family life and gender, rulership and territorial expansion in Tibet, environmental transformation, and long-term trends in Western perceptions of China. Assignments emphasize strong analytical writing through interpretation of primary sources, critical thinking about links between past and present, and independent research. Course materials (in English or subtitled)-translated novels, emperors’ personal writings, television dramas, European/ American accounts, and innovative historical studies.

Instructor: Giersch (History)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall
No letter grades given.

WRIT 166 - Illness and Therapy: A Cross-Cultural Perspective (1.0)
How have different cultures responded when faced with misfortune, sickness, and death? This course is a comparative study of illness and therapy, in both its historical and cultural contexts. As a phenomenon of nature, the outbreak and spread of disease allows us to examine people’s intimate and changing relationship with their physical environment. Concurrently, illness is a social phenomenon: how we define, treat, and assess conditions of sickness is shaped by our scientific etiologies, social structures, and cultural traditions. Three major maladies will serve as case studies: the bubonic plague, mental illness, and HIV/AIDS. Our approach will be interdisciplinary, and will explore differing perspectives offered by bio-medicine, anthropology, history, literature, and film.

Instructor: Nelson (The Writing Program)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Fall, Spring
No letter grades given.

WRIT 170 - Chemistry in the News (1.0)
This course will explore a classic method for learning about the structure and function of the human brain. Much of what we know about how the brain works we have learned from “deficit” that is, by investigating what has been lost when the brain is injured or diseased. We can also approach the subject of repair and regeneration of function by similar means. To learn about the human brain from “deficit,” students will read, discuss, and respond to case studies of patients who have suffered injury to or disease of the central nervous system. The final project will involve students researching and writing a neurological case study.

Instructor: Sommers Smith (Biological Sciences)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 171 - The Influence of Place (1.0)
How does where you are affect who you are? Throughout the semester we will draw from important writings on nature and the environment that depict and rely on a strong sense of place. By focusing on the formative nature of location we will cut across disciplinary boundaries in our examination of the interactions of humans and other organisms and the environment. We will explore aspects of geography as depicted in literary classics, as experienced on a personal level, and as understood through analytical and scientific approaches. Our work will allow students to hone writing skills while gaining an appreciation for the powerful influence of place.

Instructor: Thomas (Biological Sciences)
Prerequisite: None. Open only to first-year students.
Distribution: W
Term(s): Spring
No letter grades given.

WRIT 174 - The Human Brain: A Case-Study Approach (1.0)
This course will explore a classic method for learning about the structure and function of the human brain. Much of what we know about how the brain works we have learned from “deficit”; that is, by investigating what has been lost when the brain is injured or diseased. We can also approach the subject of repair and regeneration of function by similar means. To learn about the human brain from “deficit,” students will read, discuss, and respond to case studies of patients who have suffered injury to or disease of the central nervous system. The final project will involve students researching and writing a neurological case study.

Instructor: Viti (The Writing Program)
Prerequisite: Open to students from all classes by permission of the instructor.
Distribution: None
Term(s): Fall, Spring
Mandatory credit/ no credit.

WRIT 199H - Writing Tutorial (0.5)
This half-unit version of Writing 199 is also an individual tutorial taught by juniors and seniors. Students electing WRIT 199H can focus their work in the first half of the semester, finishing by the end of week seven, or can choose to work throughout the semester at a slower pace than would be required for...
WRIT 225-01-F - Nonfiction Writing (1.0)

Topic for 2014-15: Memoir

The memoir has in the last generation or two assumed a leading position in American literary culture. It has achieved this position perhaps despite its origins in a once-disreputable genre: confessional autobiography. Augustine admits in his Confessions to having been a thief in his boyhood; Rousseau promises in his to tell the reader “even the most truly odious things about myself.” But perhaps the imperative to make the details of private life public particularly appeals to the sensibility of a democratic age. You no longer have to be famous or old to write a memoir. But you must transcend the merely personal. The business of the course is to become accomplished in a form as famous for its intrinsic perils as for its pleasures.

Instructor: Viti (The Writing Program)
Prerequisite: Open to students from all classes by permission of the instructor.
Distribution: None
Term(s): Fall; Spring
Mandatory credit/no credit.

WRIT 225-01-S - Writing and Action (1.0)

Topic for 2014-15: Writing and Action

Many colleges afford students an experience of independence from home but also of apparent insulation from social and material pressures they will later have to confront directly, and for which they come to college to prepare. But whatever this insulation, students constitute a significant political and cultural bloc, especially in Boston. Interludes of quietism and conformity notwithstanding, student behavior remains a form of action. Students in this course will take on projects relevant to their own current historical situation and to a broader community. As in journalism, history, and current historical situation and to a broader course will take on projects relevant to their own

Distribution: LL
Term(s): Fall
Mandatory credit/no credit.

WRIT 225-02-S - Nonfiction Writing (1.0)

Topic for 2014-15: Writing the Travel Essay

Taken a trip lately—junior year abroad, summer vacation, spring break? Looked back fondly or in horror at a family road trip? Turn your experience into a travel essay. We will be studying both the genre of the literary travel essay as well as the more journalistic travel writing found in newspaper travel sections and travel magazines. And, of course, we will be writing our own travel narratives. The course focuses on the essentials of travel writing: evocation of place, a sophisticated appreciation of cultural differences, a considered use of the first-person (travel narratives are closely related to the genre of memoir), and basic strong writing/research skills.

Instructor: Sides (English)
Prerequisite: Fulfillment of the First-Year Writing requirement.
Cross-Listed as: ENG-206-02-S
Distribution: LL
Term(s): Spring
Mandatory credit/noncredit.

WRIT 225-ENG 206 is a changing topics writing workshop that will each year take up a particular nonfiction writing genre. Open to students who have fulfilled the First-Year Writing requirement; please note that this course is not intended as a substitute for the First-Year Writing requirement. Enrollment is limited to 15 students. Mandatory credit/noncredit.

WRIT 250 - Research or Individual Study (1.0)

Prerequisite: Open to qualified students who have fulfilled the First-Year Writing requirement. Permission of the instructor and the director of the Writing Program required.
Distribution: None
Term(s): Fall; Spring

WRIT 250H - Research or Individual Study (0.5)

Prerequisite: Open to qualified students who have fulfilled the First-Year Writing requirement. Permission of the instructor and the director of the Writing Program required.
Distribution: None
Term(s): Fall; Spring

WRIT 291 - Secrets of the Library: Advanced Academic Research and Writing (1.0)

We will explore library archives, special collections, and rare books, learning how and why to study and write about these rich primary materials. We will have access to the physical collections at Wellesley and Harvard’s Houghton Library, as well as both schools’ vast digital archives. Librarians will introduce us to the collections, and, as a group, we will make trips to Harvard and to Yale’s Beinecke Library. Students will learn how to work with library materials as scholars do, discerning a viable topic and approach, doing hands-on research, producing a significant writing portfolio, and offering oral presentations of their work. The materials in these collections will appeal to students interested in the humanities and social sciences, and in the history of science, medicine, and the law.

Instructor: Viti (The Writing Program)
Prerequisite: Fulfillment of the First-Year Writing requirement.
Distribution: LL
Term(s): Not Offered

WRIT 307 - Learning by Giving: Nonprofit Organizations and American Cities in the Twenty-First Century (1.0)

The goals of this experimental team-taught course are several: 1) to develop a community-based research experience that will strengthen students’ substantive understanding of American cities and the organizations that serve their populations; 2) to offer students the opportunity to hone their social science research skills; 3) to strengthen students’ communication skills by offering them an alternative venue and audience for their writing; and 4) to foster collaboration among students on a project of consequence. Students will work in teams to research, write, and submit a grant application for a nonprofit organization working on homelessness or affordable housing. Course participation will require travel to Boston. Preference will be given to students who have a demonstrated commitment to service.

Instructor: Cuba (Sociology) and Brubaker (The Writing Program)
Prerequisite: One 200-level course in the social sciences. Enrolment is limited. Students must fill out an application available in the Sociology Department. Completed applications are due no later than noon on Thursday, April 10.
Cross-Listed as: SOC 307
Distribution: SBA
Term(s): Fall

WRIT 390 - Calderwood Seminar in Public Writing: Law, Medicine, and Ethics (1.0)

Should young women serve as egg donors? What happens if Roe v. Wade is overturned? Should there be “markets” for organ donations? Does Obamacare call for “death panels”? Should parents be allowed to genetically engineer a perfect child? We will engage with these and other issues in law, medicine, and ethics from the perspective of public writers, trying to inform and influence public opinion. Students will write op-ed articles, a position paper, blog posts, and book and film reviews. This course is intended for juniors and seniors who want to develop their writing skills and gain expertise in headline debates in law and medicine.

Instructor: Viti (The Writing Program)
Prerequisite: Open to Juniors and Seniors, preference given to Seniors
Distribution: LL; SBA
Term(s): Spring
