FACULTY STUDENT MEETINGS TO BE HELD SATURDAY NOONS

Concerning the question of faculty-student work week, the Christian Association wishes to make the following explanation. The idea behind it was a challenge to the campus in the matter of faculty-student relationships, an idea which many leaders of the campus commune have expressed. It seemed to challenge us to overcome the complexity of our present structure which would not only begin to solve the problem, but would also be a step in the right direction.

The explanation given by the president of the association was as follows:

"We are not asking for a complete change, but only for a gradual improvement in the way we work together. We believe that by working together, we can create a more harmonious and cooperative environment for everyone involved."

Opportunities for Juniors in Junior Month Explained

From Helen Sturt, 23rd representative to Junior Month, comes the following outline of what every girl in the college can do to make the days of Junior Month memorable:

1. Every girl in the class is eligible.
2. The girl who is chosen will attend the last week of July by the principal valiant in her life as so many of these girls think of going to one of the most prominent colleges in the nation.

The event is a grand one and the students are to be commended for the wonderful work they did.

Information concerning Junior Month.

The club's lodgings expenses are paid by the New York Chapter.

The college gives the best possible representatives from the college to the college besides the New York University's Women's Club, and always has unquestions responsibilities for its activities.

The event is a splendid one and the students are to be commended for the wonderful work they did.

Dr. Winslow to Speak Here

Dr. C. A. Winslow, professor of Public Health at Yale University and president of the American Public Health Association, will speak at Wellesley on the opportunities for a life career in the field of public health and on the development of that work in the United States. The lecture is arranged for Wellesley under the direction of the Surgeon-General of the Public Health Service of the United States, and is under the auspices of the Department of Hygiene and the Health Department of the city of Boston.

Dr. Winslow will speak at eight o'clock Wednesday evening, March 24 in Room 12, Founders Hall.

Douglas Houghton to Preach at the Chapel Next Sunday

One of the leading young preachers of Boston and its vicinity, Reverend Douglas Houghton, chaplain of the Congregational Church, Brookline, will speak at Wellesley Sunday morning at 11 o'clock.

Dorothy Mason, 12, was the only one of her schoolmates who had an opportunity to speak at the meeting, and she delivered a short speech on the subject of "The Value of Music," which was received with much applause.

YALE GLEE CLUB TO SING HERE APRIL 10

New Wellesley Choral Club, with Seventy Voices, Will Make Its First Appearance at the College

CLUBS TO SING JOINTLY

April 10, the first Saturday of April, will see the arrival of the New York Choral Club, with seventy voices, to sing at the college. The event will be a joint one, with the Wellesley College Choral Club, under the direction of Adelaide M.科技, singing the same program.

The event is a grand one and the students are to be commended for the wonderful work they did.

Mischa Levstik to Give Last Concert

Young Pianist Early Achieved Wide Fame And Recognition in World Of Music

CRITICS PRAISE VERSATILITY

A piano recital by Mischa Levstik, 23-year-old pianist from the Alemanian State, will bring to a close the concert season at Wellesley this year. The program, which is to be repeated in the college chapel, is the climax of the opportunities that have been afforded to the students of the college, and the house, for the season. The promise to be an exception, for Levstik has already achieved world-wide fame and recognition despite the fact that he is only twenty-seven years old, and the world of music is not accustomed for virtuosi to reach the heights of fame in their teens, but for students the age of Levstik, achievement has much beauty in the concert season as an exception to this rule as he brings to his listeners an understanding of music and an appreciation of its beauty. He also brings to the students of Wellesley a new and modern interpretation of music, and a fresh and original approach to the study of music.

Mischa Levstik's greatest assets are his originality, his wide range of appreciation, and his versatile talent. He plays with both, understanding, a command of the instrument, a charm which makes him loved by all, and a wonderful faculty which has found particular favor among music lovers.

The recital will be held in the college chapel on Sunday afternoon, April 10, at 3 o'clock. The students of Wellesley will gain from the knowledge of the music which they have enjoyed in their concerts and recitals.

INTERCOLLEGIATE DEBATING TEAMS HAVE BEEN ANNOUNCED

Wellesley will take the affirmative side of the debate on the question: "Resolved that all laws restricting freedom of speech be declared invalid and no longer enforced." The debate will be held in the college chapel on Wednesday, May 18, at 3 o'clock. The College will take the negative side.

REALISM TOPIC OF FIRST OF A. A. WHITEHEAD'S LECTURES

Professor A. N. Whitehead, mathematician, philosopher, and scientist, will give two lectures at Wellesley next week.

The first lecture, on Monday, March 21, at 11:30 A.M., in Rooms 2, Founders Hall, will deal with "The Relations of Mathematics and Philosophy," and the second lecture, on Tuesday, March 22, at 11:30 A.M., in Rooms 2, Founders Hall, will deal with "The Mathematical Concept of Reality."

The lectures are intended primarily for students in the departments of philosophy and mathematics, but other members of the college will be welcome. The lectures will be followed by a discussion on Wednesday evening, March 24, at 8:00 o'clock in the college chapel.

System With Village Juniors is Adopted

Plan Suggested By The Village Senior Committee is Accepted By College Senate in the House of Representatives as well as it was in the Senate, and President Emmet will soon present a resolution to be adopted.

The motion was carried by a vote of 200 to 10, and the resolution was adopted by the following vote:

1. Juniors' time is not too late to make a change in the yard plan as they have been elected.

2. Juniors should be given the opportunity to be chosen.

3. The students of Wellesley should be given the opportunity to be chosen.

4. The students of Wellesley should be given the opportunity to be chosen.

5. The students of Wellesley should be given the opportunity to be chosen.

6. The students of Wellesley should be given the opportunity to be chosen.

Barn Announces the Casts for the Spring Informals

The following cast is the result of the character auditions made by the Barnstorming Association.

Between the Sugar and the Scrawny Players, March 27 and 28.

The Whitney Observatory will be open to the public on Wednesday, May 2, from 3:30 to 8:30, and the moon will be visible with the telescope and the double star with the binoculars.

Wellesley Financiers Have Received Wide Recognition

The investment problem which Mr. Lawrence Smith's classes in Economics 330 have recently been practicing in connection with various large firms, both in the United States and abroad, is also receiving much attention in the financial world. Editorial comment in the March 9 number of the New York Times discusses the question as it pertains to Wellesley girls learning to play the stock market. It cannot be said with certainty that the girls are making any money, but it seems probable that they are learning a great deal about real market conditions.

Helen Levine, 27, and Mary Neal, 27, are now the possessors of a collection of real estate and factory-room apartment houses which they have purchased in different parts of the world, with a view to realizing a profit for the Wellesley Factory, a project which has been under consideration by the students and faculty. Miss Levine recently received an imposing commission from a rich man's daughter to sell a beautiful manor house in the country, and she seems to be quite successful in her endeavors.

How I Made My Money.

When the future capitalists were questioned as to how they made their money, it was revealed that both of them, at the advice of members of their families, had gone into real estate and factory-room apartment house enterprises, which they have been pursuing with great success. They have both said that they had "learned the hard way," and they believe that by this means they have been able to obtain valuable experience in the field of business.

COLLEGE NOTES

On Thursday evening, March 11, the Junior Dramatic Club presented "The Chorus Girls" for a benefit. The act was composed of three scenes from the play, and was very well received. The junior officers of the club, Miss Jeannette Jones, junior, 19, and Miss Janet Taylor, sophomore, 19, are making excellent use of the club's possibilities. The play was directed by Miss Taylor, and was acted by the members of the club. The program was well received by the audience, and the club hopes to continue its work in the future.

ALOHA OF THE SOUTH SEAS

A thoroughly entertaining and amusing play is Aloha of the South Seas now playing at the Wilton Theater. Characters are of many types (12) and the music is sung in various tongues including that of the "minstrels of Cuba" in Delilah, "Viva Villa!"" of the "Jail Bar" in Ceylon and "the old adagio" or true love's refrain. The story of Helene is delightful and intense, the love story of the Russians, which demands depth of feeling brought out a new and strong, solid, authentic, moving story. Miss Gisholm's sensitive, strong, resonant lower tones gave a stirring and impressive rendition.

One recalls with delight the recent recital, Miss Molly Bernstein, who played throughout the entire program a lively and without an accompaniment is usually quite slow to the liking of the hearer. Every minute of her playing was interesting and the key, steady touch of her hands, arpeggios and brilliant embellishments was truly thrilling.

STUDENT RECITAL

On Tuesday afternoon, March 8, students of the music department gave a recital in Hillside Hall. The program was varied and the students displayed very fine and accomplished all kinds of music from the informal and lyrical song to the badly organized orchestral groups of the middle ages and Haydn. Louis Ravel's piano concerto, played with a good deal of technical work, and two French songs. The program also included a fine selection of the German songs, which was marked by vitality and color.

Two very different types of compositions were offered: one for the violin, very seldom playing (such a song was well interpreted by Miss Breiter). The other was a piano arrangement of a great deal of expression. The performance of Helen Bonham was charming, though lacking in technical work, as well as a good tone quality. Elizabeth Parkinson sang with charm and reverence, carrying her music into the spirit of her mood.

The work was well distributed between the students. A. J. C. Chicago, Inc. and the music department is rhythm, and harmonies of the Canzona.

The singing was done entirely by people voices but was not all alike. The time of the program, which was very sweet and of a flowing liquid quality. Helen Wood's voice was beautiful, and always a pleasure to the ear, and made me forget the technical work as well as a good tone quality. Elizabeth Parkinson sang with charm and reverence, carrying her music into the spirit of her mood.

Astronomical opportunities for women are not numerous.

Although astronomical jobs are rare, they are not as rare as one might think. There are many opportunities for women in astronomy and allied subjects. Such opportunities can be found in universities, observatories, and other institutions. Women can work as astronomers, physicists, or mathematicians. They can also work in fields related to astronomy, such as astrophysics, cosmology, or space science.

Women are also becoming more involved in astronomy education. There are many astronomy clubs and organizations that welcome women as members. Women can also find opportunities to teach astronomy at the college level.

Women have made significant contributions to astronomy. For example, Henrietta Leavitt, Vesto Slipher, and Cecilia Payne-Gaposchkin were all prominent astronomers in their time. Women are also making significant contributions to astronomy today. For example, Lydia Bony was the first woman to receive a Ph.D. in astronomy, and she later became the first woman to work as a professional astronomer.

Women are also finding opportunities in the field of astrophotography. This involves taking photographs of the night sky, which can be used to study the properties of stars and galaxies. Women have been active in astrophotography for many years, and they continue to make significant contributions to this field.

In recent years, there has been a growing interest in the field of astrobiology, which involves studying the origins and evolution of life in the universe. Women are actively involved in this field, and they are making significant contributions to our understanding of the origins of life.

Women are also making significant contributions to the field of astrophysics, which involves studying the physical properties of the universe. Women are involved in research on a wide range of topics, including the structure and evolution of the universe, the properties of black holes, and the properties of dark matter.

Women are also involved in the field of astrophysics education. There are many astronomy clubs and organizations that welcome women as members. Women can also find opportunities to teach astronomy at the college level.

WELLESLEY COLLEGE NEWS

Mrs. Gertrude Williams, Wellesley, 
16, who has recently returned from 
three months of interesting travel and 
experience in India, went to a small 
group of faculty and students in 
Shakespeare House for an afternoon 
seminar, March 7. Mrs. Williams, after a

great deal of reading and study, went 
to India prepared to be both critically 
supercilious with the Nationalist movement

there, but observation and experience,
some of which she cited in interesting detail,
have brought her to a feeling that the people of India are in an

"adolescent stage of civilization," and

must progress steadily for two centu-

ries or so before they are capable of 

intelligent self-rule. Although Mrs.

Williams's stay in India was not long,
she gathered the evidence in substantiation 
of her opinion from visits and interviews 

with some of the most interesting and 

influential people in India. English

and native, rich and poor. She visited 

several 

times at the palace of the Mohom-

nedan ruler of a Mohammedan 

state, a woman of vision and tolerance who

believes in education for girls, and 

the same time at the custom of veiled 

women, which has recently effected in 

her state prophecy, and a ban on the 

growth of the poppy.

Mrs. Williams visited in native

homes where she was treated with the

warmth of the family, talking freely with 

him, while his wife who often 

would speak English. He was regarded by 

her as a servant, she witnessed a vil-

lage dramatic production in which 

most of the actors were illiterate and

during which she sat in the only chair.

In the village, she attended the Indian 

Nationalist Congress and met

spoke with Gandhi. Mrs. Williams

opinion of Gandhi, who differs from

the impression gained by Miss Hart in

her recent journey in the East, in that

he is a powerful personality, sincere

in an unselfishness, and possessed

of great magnetism. But she feels that

he is not a political leader and that

his doctrines are being favored because

they are not entirely consistent and

because they demand such great self-sacrifice on the part of followers.

SYSTEM WITH VILLAGE

JUNIORS IS ADOPTED

(Continued from Page 2, Col. 2)

impoverished to be a candidate for the 

office.

We recommend further that the 

college elect from the sophomore class a

minor election a Chairman of village

junior. We suggest that it be called

Junior-vice-president of College Gov-

ernment, and in this capacity relieve

the senior vice-president of responsi-

bility in the village, making it possible

for the latter to be of greater assis-

tance to the president in his duties.

We believe this should be a seven-point starred officer.

If this procedure is carried out in the 

report prove acceptable to the Senate, we

recommend that a complete plan of 

the village junior system be worked out

by a committee consisting of the vil-

lage water committee as already ap-

pointed, the Chairman of village

junior, and two sophomore elected by

their class and approved by the Senate.

Hope Discourses Sunday Morning Rain.

There was shown up at the meeting of the 

House of Representatives on March 21 the question of abolishing the 

excursion tax on Sunday morning.

The discussion showed a majority in favor of the change, although no formal vote was taken.

It was felt that this change would not cause a general recall; from Wellesley or keep people

who otherwise would go to church, from attending the service. The

convenience of the broader rule is obvious.

R. H. STEARNS CO.

Congratulations After Elections

will be remembered longer and with tender sentiments when you let us express your 

wishes. A little act of thoughtfulness in the excite-

ment of an announcement will make a bond between the recipient 

and you that time cannot 

erase.

Back in the days of Dobbin... when the college shop (then known as the "club") gave its 

best girl a great whirl around the campus on Sunday afternoons, 

Anheuser-Busch was naturally known among good fellows.

And today, when we do sixty 

miles an hour without hurrying 

and good names are popular everywhere,

BUSCH

P A L E D R Y

is the forced drink of college men because, like the college man, 

Busch Pale Dry is naturally known everywhere and every time.

ANHEUSER-BUSCHE'S HANS-LOUIS ST. LOUIS S. S. PIERCE CO. BOSTON, MASS.
CALENDAR

Thursday, March 19: ACADEMIC COUNCIL meeting at 3 p.m., Harkness 101, followed by the Finance Committee meeting in the President's Dining Room. The meeting will begin promptly at 3 p.m.

Spring Vacation at Pinchurst a riot of color, fun and sports

That last week in March and first week in April—time of your spring vacation—was the time to get around for the last couple of months at school. Pinchurst was the place to go for good practice at tennis, golf, shooting, or any of the sports. Practically unlimited grounds for every sport. For beginners, fixtures are provided if desired—in special instruction grounds.

If you need a rest, or change of climate, dodge the fog and winter in the exposed edge of spring at Pinchurst. Days of sport and rest, evenings of dancing, movies, talks, informal teas. Something of interest planned for every day and evening.

Spring break begins. Classes will not be held on this day.

Tuesday, March 30: Spring break continues.

Wednesday, March 31: Spring break continues.

Thursday, April 1: Spring break continues.

Friday, April 2: Spring break continues.

Saturday, April 3: Spring break continues.

Sunday, April 4: Spring break continues.

Monday, April 5: Spring break continues.

Tuesday, April 6: Spring break continues.

Wednesday, April 7: Spring break continues.

Thursday, April 8: Spring break continues.

Friday, April 9: Spring break continues.

Saturday, April 10: Spring break continues.

Sunday, April 11: Spring break continues.

Monday, April 12: Spring break continues.

Tuesday, April 13: Spring break continues.
