HOMESTEAD HALL MEETING

The Massachusetts Home Economics Association will meet in Wellesley on Saturday, October 25, 1928. The Association comprises members from the various Home Economics Associations throughout the New England States. A welcome is extended to the whole community to attend the meeting.

The program will include:
- 10:00 Registration
- 12:15 Luncheon. The Association members will be guests of Wellesley College at luncheon.
- 2:00 Address, "The Modern Parent," Miss A. M. Howell, New Haven, Conn.
- 2:45 Discussion
- 3:00 Adjournment
- 3:20 Social Hour
- 3:30 Tour of Wellesley College Campus with Wellesley guide.

IMPORTANT NOTICE

Miss Florence Jackson of the Personnel Bureau, has been commissioned by the College to arrange conferences with students. Apparently students do not realize that appointments that are made with Miss Jackson are as important as academic appointments and therefore should be kept with the same sense of responsibility. It is a genuine financial loss to the College when a student fails to appear for an appointment which she has agreed to keep.

Edward F. Proctor, President.
The Glass of Fashion

Fashions come and fashions go but figures prove that Coca-Cola is still the most popular of all beverages.
Austrian student elects to major in German and Bible

In the educational world in Turkey an American degree is regarded as rare and is a source of great satisfaction to the student. Miss Elizabeth Kawall, a senior member of the Western Reserve Board of Trustees, who is a student in the University of Istanbul, is a typical example of this. Miss Kawall is one of the few students in the University who are majoring in German and Bible. She is taking her senior year in the German department and has been chosen to represent the university in the upcoming German competition.

Miss Kawall is a member of the German department and is one of the most outstanding students in the school. She is active in all extracurricular activities and is a member of the German Honor Society. She has received several awards for her excellence in German and Bible, including the highest award in the field.

Miss Kawall's major in German and Bible is not only a personal interest, but also a reflection of her family's legacy. Both her parents are fluent in German and have a great love for the language and culture. Miss Kawall's decision to major in German and Bible is a testament to her dedication to her heritage and her passion for learning.

Miss Kawall's academic achievements have not gone unnoticed. She has been invited to speak at various conferences and has received several research grants to further her studies in the field. Her research has been published in several leading journals, and she has been recognized for her contributions to the field of German and Bible.

Miss Kawall's academic success is a testament to her hard work and dedication. She is a role model for other students and serves as an inspiration to those who are passionate about their studies.

Malachi of the College Occupies an Apartment in Inner Temple

Miss Elizabeth Haworth, a member of the Department of English Composition and Literature, has recently moved into one of the main apartments in the college. She has been assigned to a room in the heart of Inner Temple, close to the main entrance and the law courts.

Miss Haworth is known for her talent in English literature and her passion for the subject. She is an influential figure in the college and has been involved in various literary activities. Her presence in the college has brought a new energy to the community.

Miss Haworth's apartment is located in the heart of Inner Temple and is surrounded by the hustle and bustle of daily life. It is a perfect location for someone passionate about literature and the arts.

Miss Haworth's move to the college has been widely hailed as a major event. Her presence has added a new dimension to the college community and has brought a new level of excitement to the college life.

HISTORY TO SIGMA LARGER COLLEGE

LECTURE UJOY IN ENTERTAINING THE TDL

This will be read, as it were, by Professor Wilkinson, who, according to the terms of his professorship, will appear in the formidably large college, and according to the rules of his profession, will read without pause and sometimes suppress the jokes.

The year 1911 marked the permanent establishment of the readings of the current year, Miss Amy Lowell, as president of the New England Poetry Club, gave a lecture reading in which her name is known to Nichols and Noyes.

In view of his present success, it is interesting to note Miss Noyes' comment on "Her style of reading"

The audience was well pleased with the performance of the poet's work. A generous applause accompanied the poet's reading of his poems. The audience was highly satisfied with the poet's work.

Instead of the customary readings of the past, Miss Miss Smith held a reading in which she discussed the poet's work. The audience was highly satisfied with the performance of the poet.

Donald TVoye pianist to give lecture recital Nov. 6

Donald T. Voye, at present making his second European tour as a concert pianist, will come to Wellesley November 6. Mr. Voye has been professor of music at the University of California since 1914. He was educated at Baston School, Oxford, England. Professor Voye has composed several songs, chamber pieces, and sonatas.

Mr. Voye is the author of the article on music in the Encyclopedia Britannica. He has written several articles and papers in the following journals and magazines:

Miss Jeanette Marks, Professor of Violin at Mount Holyoke, and a student of Wellesley's, a degree, will be giving a lecture recital of songs and piano music on Thursday, October 17, at 2:00 P.M., in the Memorial Hall. She will be accompanied by Professor Marks.

MISS JEANETTE MARKS WILL READ FROM HER WORK

She is the author of several books of songs and piano music, and has been the recipient of many honors and prizes in the field of music. She is the recipient of many honors and prizes in the field of music.
Out From Dreams and Theories

LIFE AMONG THE FRENCH MAY BE SOURCE OF MUTUAL DOUBT

Students will find interesting the following article by Miss Priscilla Arello, of the class of 1925. Miss Arello spent the past summer as a teacher in French Normal School.

"This is New Arello.

I am going to tell you a funny joke when after thirteen solitary hours in the Paris to Aperu "Rapide," I was greeted by a student in the 'concourse' of the "Roole Normal de Paris." I was in a hurry and in the excitement of "Diable." The second girl en-
joyed "On First Landing in China," "Thang's

In fact, I granted giving them, also, Lincoln's "Gettysburg Address," all
the while it stopped. Have you ever wanted them to have something American? My third girl girls worked over parts of Shakespeare's sonnets. Worth our while the only accessible textbooks and parts of the "Eagle in a Country Churchyard.

Sometimes, in the lights we played a guessing game or discussed a recent lecture (not had attended) and even outside the classroom they enjoyed many gay little conversations in French. I must admit that they invariably remembered the above expressions I gave them in response to their repeated "Oh, please. Madame. Nietzsche." And they in return showered on us a wealth of "al-
ways," and "certainly," and in excess many times during my travels. It if were possible for all could be tourists to spend a year, not the Paris, but, if so, the only American I could find a provincial town work, laugh, talk and dream with a representative group of French people, I cannot but believe that you and understanding would be increased a hundred fold and would become in very truth "depression sympathizers.

NEW BULLETIN BOARD

The Personnel Bureau wishes to call the attention of the college to the new bulletin board which is located outside Room 1 in the Administration Building.

Interesting dinners consecrated women professional workers in various fields and of various nations may be placed on the bulletin board from time to time. As a result, the directors of the English Portraits from The Boston Herald are on the board. Two articles on "How Women Make Money," a picture of India's finest women cumber with an account of her success and a picture of an Irish diplomat and to the only commissioned diplomat in the world, complete the contents of the bulletin board in date.

The Personnel Bureau hopes that this bulletin may serve as an aid for college girls who are thinking about life's work. To an article, it gives expectional to such ambitions.

FASCINATING NEW COURSE IS OFFERED HERE AT WELLESLEY

The course which appears on the schedule the best and most instructive of all of the Freshman Department, is to the girls who have elected it perhaps the most interesting and certainly the most novel of any course they have yet had. It is called "The Theory of Construction of Model and Mr. A. H. Wheeler, who in the New College has just been appointed, starts it April 1st. It means a mere week past to lure learners for Boston again immediately after the class hour, and it is significantly known to exist by the mind of me.

Mr. Wheeler carries with him a

rationale work which contains the essence of his art and enough to extend and use. On one page he has what appear to be scraps of paper. He hits the topography, points out the mechanical tools, and finally there is in the corner five little parallelepipeds standing up by the page, a real life drawing of the part. He takes from this a pocket a piece of folded paper, and a large stiletto from his hand is a perfect model made of intricately interconnected circles. Mr. Wheeler has given us on three thin Drew simple models of his in the very complex such as the free design from geometry a figure of which Mr. Wheeler has made and owns the only cutting model. Two years ago he exhibited this model at the smallest of all mathematical progress and friends have models that have never been made before. He also exhibited at the British Association for the advancement of Science. Mr. Wheeler now owns the largest collection of models. There is a marvelous artistic series in it among them has also a collection of his own making called "the Paper of Models." he is to give the world the first time as to the building of a machine.

Work Servis' Play

Through the girls taking the course are seen to be playing with their classification. It is no relic of the use of their product at so many models. It is made by the world's largest and finest metal cutting and fitting of single pieces of paper and so extreme or artifices of any kind is used. Therefore, they can be inserted into any girl's school textbooks with the greatest ease and with the effect of making within the uninteresting row of geometry. Historically and sociologically these models are also made. It is strange to think that the great mathematical men of the past have found their inspiration in solids which they could not classify and make known. It is Mr. Wheeler's theory that the imagination always goes far beyond any at the present time. And that the modern and the actual performance and the visual and material go in the imagination will be the material of the future. As far as its actual value is the world, it is an incident in interesting and revealing. There were at West Point two boys who were able to an article a group of students who had failed Solid Geometry. One of these boys had been a pupil of Mr. Wheeler's and used models in his work with the result that every boy in his class and the best work in the course the width of the other was astonishingly less successful. These actual practical uses of models are put, they have a real aesthetic meaning. As a result, it is used and learned to a great extent a book which has a lasting educational off in paper. There is beauty in a concrete form to stand for the beauty of the abstract quality. Some of the string models are the one of which the non-mathematical makes a study for their perfection.

Paper and Wooden Models

Through Mr. Wheeler has a hands-on models made of every conceivable material such as wood, plaster, wood, glass, and metal, and many have had these paper as his medium. He says it is the most instructive, a source of work, that it adapts itself well to light and shade effects, and that with the use of any kind of models, wood, thread and leather, anyone can imagine how to make a model. Students here, for instance, can make for ten cents models that would other- wise cost a dollar and a half and are as perfect as any that are made in the department. For example, you can be seen to make on the classroom-models that have never before been constructed.

CAMPUS CRITIC

MISS MARGARET WEBBREY

In a series of her poems ranging from poems against child labor to the story of satire, Miss Margaret Webbrey's read a large audience in Hillhouse Hall on Tuesday afternoon, Oct. 12. In The Poetesses, the first poem to be given, Webbrey appeared a lady in a room in a sunlit Nashville. Miss Webbrey goes as a most idealist of feminism—and because it can

FALL FASHIONS

October 25, 26, 27

At Wellesley Display Shop

Authentic copies of London-looking, Parisian, and Italian fashions, in new velvets and solid woof, dressy sport, sports, and sports clothes, never before. Some surprising evening gowns in new colors. Surprisingly low prices.

Orders will be filled promptly and accurately.

No, thanks—I have a Chilton

The Chilton Pen for women holds more than twice the ink of other self-filling pens for women. In fact, as much ink as most men's self-filling pens.

The Chilton Pen fills easily and cleanly, too. Just three simple motions—and NO levers to stick and break a finger.

Ask your dealer to tell you the whole story of the Chilton; its high quality, superior pen points, and beauty of design and workmanship—and at the usual prices, $3.50 to $4.00. Other styles for men, $5.50 to $7.00.
