To those members of the college who remember Sarola Glose as student at Wellesley, it will be particularly welcome to know that one of the largest sums was given to the school in India where Miss Glose is now teaching.

"Permit me to thank you very cordially and the students and members of the Pachydi College for the munificent gift of a thousand dollars for the aid and the work of the local Maharani School, received by me through the local branch of the Imperial Bank of India, Ltd. It is just like Miss Sarola Glose to be taking interest in, and working for, the institution where she had her early education and I cannot sufficiently thank her for the interest she has reposed in us for our school.

"The school began its career in 1899 as a Primary School with 46 pupils on the roll and a few honorary teachers and developed into a High School in 1911. This fact in itself will tend to show that a necessity existed in this place for a larger educational institution.

"Concerning the staff of our school, Miss Ho, just returned from Daily Vacation Bible Class..."

WELLESLEY INTERESTED IN SCHOOL BY SAROLA GLOSE

NEW BUILDINGS HAVE BEEN CONSTRUCTED AT YENCHING

Some of us may at times complete that part of the thundering tractors, the bother of temporary bridges and the mud on our feet, to welcome Miss Ho just returned from Daily Vacation Bible Class. . . . .

WELLESLEY COLLEGE NEWS

Funds Divided Among Forty Needy Cases

Dr. Hume receives large amount for hospital in India and for Ford $5,000 goes to Yenching.

"Where does our money go?” is a question that deserves a full answer. The Service Fund Budget—a budget that consists entirely of gifts—was given in the following amounts to justify itself.

WELLESLEY COLLEGE NEWS

WELLESLEY COLLEGE NEWS

New Buildings Have Been Constructed at Yenching

The Service Fund consists of gifts of money given by the students and the faculty for the cause of education, benevolence and relief throughout the world. The college avails no obligations, but several objects received in the interest of Wellesley for many years.

This summarizes briefly the object of the Service Fund but it hardly makes plain the spirit that motivates it. The campaign that is carried on annually is not a "drive" urged by any ghostly pleasure such as war, for war.

A much steadier feeling predominates, the giving of the money to the Service Fund. There is time to think it over in time to realize just how much a little bit from each person can stretch when there are no barriers of creed or race to hinder giving. The Service Fund is International and through giving to it, Wellesley establishes contacts that give us heart. This cannot be, unless the money is donated, but is not so dropped in the box, but in the light of comprehending its function of service to others.

One must really feel genuinely interested and excited to know that Aunt Dinah can educate negro children more readily because of the Service Fund. The nations of India in being are being cured by a surgeon who travels in a Ford named "Elnor." And this is only the tip of the iceberg.

It is for this reason that the Service Fund week is not to be looked on as a drive. No one should feel compelled to give unless there is a genuine desire to do so. But when it is given to the question, there is not much doubt that contributions will be numerous.

PLEASE NOTE

(a) That the Service Fund does not cover membership in, or contributions to, college organizations—such as the Red Cross, Christian Association, Student's Aid Society, Wellesley Semi-Centennial Fund.
(b) That the Service Fund Committee prefers no request be made for distribution of individual gifts to specific institutions and causes.

Pledges May Be Paid

(a) By envelope system; these envelopes are placed on the platform, and when told she would soon be able to move to the idol.

"Cases of all sorts come to the hospital, some pathetic, some amusing, some that grip the heart-strings. A little girl of eleven was brought by her mother-in-law. The child had fallen down a well, and presented a dislocated jaw, a large lump beneath the chin, a large scalp wound, and a badly bruised arm. She stayed two months, and when told she would soon be able to leave the hospital, she began to cry and protest that she did not want to go."

Wellesley has been connected with the hospital since 1896 when Dr. Julia Bisell of Wellesley and the Woman's Medical College in Pennsylvania opened a dispensary in a native house.

Her efforts to acquire a well-equipped hospital resulted in the present building. Her goal achieved, Dr. Bisell broke down in health and was obliged to leave the work, but her college has always helped her to carry on her work.

"One of the outstanding events of this year in Almednagar has been the visit of Dr. Gandhi. We felt it was an opportunity of a lifetime to see a man like Dr. Gandhi, who, in spite of many mysteries, has had an enormous influence for good along the lines of social and religious uplift of the people."

THE SERVICE FUND

INDIA NEEDS THE BENEFIT

THAT HOSPITAL CARE GIVES

To us behind the scenes, Service Fund so often seems but one more demand for money. Yet giving to Service Fund is not giving money; it is giving eternal life and health to women and children in the case of the Almednagar Hospital in India. The following account of the work done by the hospital and of the past Wellesley has played in the past.

"Just outside the gates of the Almednagar Hospital is a Hindu shrine to Kali, the goddess of destruction, which takes the place of slopping men in getting the doctor to hurried calls in places difficult of access."

Almednagar Hospital is connected with the relief work.) Fund week is not to be looked on as a from foreign lands.

Relatives and friends have told of marvelous experiences and of a strange new religion which knows no caste, where Brahmin and out-caste, rich and poor, are equal. Indian women have learned the patience and kindness that the "Bali Sahib" from foreign lands.

In W. Y. W. A. and Y. M. C. A., the students work with a freshness and enthusiasm which will be well imitated. Both men and women students have worked together with the faculty in our Christian fellowship.

**SERVICE FUND HAS UNIFIED CHARITABLE ENDOWMENT**

The origin of the Service Fund shows that this organization coordinates many and various gifts from students of the college to give help either to sister institutions which are in financial need, or to worthy charitable enterprises. In fact Wellesley has tried to reach out and give help where it is the most possible to do so. The worth-while work of many of the gift giving groups is now speaking for the causes before the notice of the college.

The Christian Association originally (Continued from Page 1 Col. 2)

the number of benefactors of the American Red Cross was so small that the sum was made up of many small contributions, and the chances that the enterprise would be successful were very small. Nevertheless, the enterprise was successful, and the funds accumulated by the sale of the bonds were used for the purpose of the enterprise. The bonds were sold for $40,000, and the money was invested in the purchase of $40,000 worth of bonds of the American Red Cross. The enterprise was successful, and the funds accumulated by the sale of the bonds were used for the purpose of the enterprise.

our sister colleges, Oregon State College, as manager and director of a group of women's colleges, is taking a leading role in the effort to build and manage an actual house in the culmination of many years' work in this direction. The house decoration, and other courses given in this department. Another rosy.

Wellesley School. Oh, yes, I think it is the best school I ever go to. We get some more things from here than from Sanie. If anyone wants Christian helps, they ought to come to Sanie Normal Training School. Oh, if the people only knew what kind of a school this is they would let their children crowd into it. We are indeed thankful to you. Please remember me to the other girls and give them many thanks for their great blessing.

**Sincerely yours, Olive Green**

**THE LETTER OF A LITTLE INDIAN GIRL**

The letter of a little Indian girl at the Sankey Normal Training School, describes very well the splendid work that is being done there.

From Aunt Dinah comes a delightful account of the work with children in Georgia.

My dear Miss Busbee,

Just at the time I was in great need, no help from you near me came, and "I thank you" is not strong enough to express my feeling. Please remember me with your love, and give my love to your friends there in aiding in the building.

I shall work faithful to have good men of these boys and ask God to bless and aid me. You have made me happy. Seven of the small ones who have whooping-cough are certainly very ill, but they are better and I am sure they will all recover. I am very much better myself by the following exxcepts from a letter to you. It is a first hand observer of the summer school in action.

I received your letter and was very glad to hear from you again. I am all well and happy so don't worry about me. Don't think of me all the time because we are getting along fine. I wrote to you about three times but you don't get them that's why, and I sent a picture of myself last week so maybe it is on the way or maybe it is in the office.

The weather is fine over here. I suppose there is snow on the ground yet, while there is no snow on the ground over here.

When the ground is all right and the farming begins I want you to make a small garden for the family and you could raise some potatoes and all kinds of stuff so we will have to use this summer and plant and sell for the children. Buy some more chickens so we could raise some more. We have a lot of chickens and I have tried some—see how they are. And many I would like to have some eggs. I want to have the chicken coop and the cell. I will be busy with the garden and crops and we will have a better arrangement than we had last year. I am sure you are taking it, and I hope it will last very far and so much small work for one in the yard.

I hope you will have a good time at school. I was a trying one in practically all sections of the United States. Twenty-five years' work has just been completed in the past year in the memorable Disaster Relief work conducted by the American Red Cross.

When one remembers that 800,000 persons were dependent at one time upon the Red Cross for food and shelter, and the immediate job of the job is apparent. Several Southern States saw their most fertile farm lands converted into a great lake. The Father of Waters challenged his adherents as never before, and how well they met the challenge is an old story by now. In every community where the rising waters became a menace to life and property the voluntary graduates of the institutions in the locality, who were the efficient and competent relief body. They took orders from the Red Cross directors on the spot and performed services of such quality that their intelligence, their courage and their unique youthfulness was an inspiration.

While the Mississippi burst its levees twice as far as New Orleans, and in other States, Red Cross relief was accomplished on a grander scale than ever before. There was a trying one in practically all sections of the United States.
