Thurs., Jan 10 - 86

Mary came this P.M. with its sad story about the little Bells. She
seems Child! I hope she is not about to suffer! Your
father has been too active to
feel continuous at the same
strain. He and needs a let-
up & change. He ought not
to work this summer. Better
and him away from Brooklyn.
I come away yourself as
soon as possible - but
Monday you say - that's
the day appointed for
all. So moved out of
Willards - all went out there.
This P.M. in obedience to Mr. Emerson’s desire to choose the site of the house they could only do so approximately. It must be then tested. They are very full of it...I want a successful presentation particularly they desire someone to speak on the presentation side. They will have Dr. Duma speak.

The ceremony is fixed for the day by commitment. Next Monday week 3 P.M. Arrangements for affairs are

love accordingly. Now have our Thanksgiving dinner.

I wonder if the cold is got.
It is desirable to have an answer at once - in order that someone else may be got if the fails - as I suppose we have little reason to expect that he won't fail.

I am thinking of writing him but am still at a loss how to manage the money. Would you write to him on the inspiration?

Mrs. Durant confirmed me that they were going to make the commencement the festival of a circus. When all at once they found the whole routtage in the newspaper.

Sarah sends love. She gets very tired going to Belmont. Her chap is running away - and away - and away - and away - and away. He does the weight of chapter in town. And glad it will be when you come!
I much regret to hear that you are ill again! I am sure it will be delightful, but I cannot accept your invitation to such a thing. Shall we be planned wisely as well? I have been asking, and the will go, if not two - but the sun not very bright. Some are - I am only glad that they can run before the hills.

The weather is right - at least 90° up to the time you mention. Many thanks.

Mrs. Livingson wrote that she was coming up this week, but has not yet appeared. I am pretty tired tonight, but on the whole am much stronger and more mentally able than I was a week ago.

The Wickers are crooked - I am greatly pleased with them. Good night.

The best that heart can conceive be to my dearest.
