WELLESLEY COLLEGE
Wellesley, Massachusetts

FOUNDATION AND PURPOSE

Wellesley College was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men." Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees, and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed, by usage or statute, to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder, the College is undenominational, but distinctively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G.
Houghton and Mr. Clement S. Houghton as a memorial to their father. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday, the singing is led by a trained choir of students under the direction of the professor of music.

The Wellesley College Christian Association, organized to promote religious life, to arouse an intelligent interest in social reforms, and to foster interest in home and foreign missions, meets weekly for prayer and religious instruction in the chapel given by the founder of the College.

The department of Biblical History affords the systematic study of the Bible required of all students.
ADMISSION

Applications for admission should be made upon forms which will be furnished by the Dean on request. An application fee of ten dollars is required from all candidates for admission, and no application is recorded until this fee is received (see page 141). It is desirable that applications should be made several years in advance, since rooms in college houses are assigned to new students in the order of application for admission to College. However, attention is called to the fact that a place will not be reserved for an applicant whose credentials filed in July do not satisfactorily cover twelve of the fifteen points required for admission. Moreover, since the number of new students admitted is limited by the capacity of lecture rooms, it is necessary to close the application list for any given year at a date which varies from year to year. Candidates are liable to find the application list closed if they do not make their applications more than a year in advance of the time at which they propose to enter.

ADMISSION TO THE FRESHMAN CLASS

Students are admitted either by examination (see pages 47 to 49) or by certificate (see pages 49 to 51).

Every candidate for a degree must offer for admission to the freshman class subjects amounting to fifteen "points." The points assigned to the subjects indicate the number of years, with five recitations a week, which will normally be required in the secondary school to make adequate preparation. Of the fifteen "points" required for admission, eleven are prescribed as follows:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>3</td>
</tr>
<tr>
<td>History</td>
<td>1</td>
</tr>
<tr>
<td>Latin</td>
<td>4</td>
</tr>
<tr>
<td>Mathematics</td>
<td>3</td>
</tr>
</tbody>
</table>
In 1912 and 1913 the remaining four points must be chosen as follows:—

A Second Language . . . . . . 3 points
Greek or French or German (maximum).

A Third Language . . . . . . 1 point
Greek or *French or *German (minimum).

or

A Science:
Botany or Chemistry or Physics . . . 1 point
or
†History . . . . . . . . . . . 1 point

or
Music . . . . . . . . . . . 1 point

In 1914 and thereafter the remaining four points may be distributed in any one of the three following ways:—

1. 3 points in Greek or French or German
   combined with
   1 point in one of the following subjects:—
   Botany.
   Chemistry.
   Greek,
   †History.
   Music.
   Physics.

2. 2 points in French
   and
   2 points in German.

3. 2 points in either French or German
   combined with
   2 points made up of 1 point each in two of the following
   subjects:—
   -Botany.
   Chemistry.
   Greek.
   †History.
   Music.
   Physics.

* After September, 1913, one point in French or one point in German will not be accepted for admission.
† See page 32.
A place on the list of candidates for admission will not be reserved for an applicant whose credentials filed in July do not satisfactorily cover twelve of the fifteen points required for admission. The Board of Admission reserve the right to exclude any candidate whose preparation is in their judgment so defective as to debar her from carrying successfully the work of the freshman year.

The admission subjects are divided into two groups, as follows:

**Preliminaries:** English a (Reading and Practice), French 3 point requirement (except Prose Composition and the use of the spoken language), German 3 point requirement (except Prose Composition and the use of the spoken language), Greek 3 point requirement (except Prose Composition), History (prescribed point), Latin (except Prose Composition), Plane Geometry. Examinations in Preliminaries may be taken at any time during the college preparatory course.

**Finals:** Algebra, Botany, Chemistry, English b (Study and Practice, including Composition), French (1 and 2 point requirement, the Prose Composition and the use of the spoken language of the 3 point requirement), German (1 and 2 point requirement, the Prose Composition and the use of the spoken language of the 3 point requirement), Greek (1 point requirement, the Prose Composition of the 3 point requirement), History (second point), Latin Prose Composition, Music, Physics. Examinations in Finals may be taken at any time during the last two years before admission, provided at least three are taken during the last year. Candidates are advised to take English Composition and Algebra in the last year.

The regulation in regard to the time of examination applies to final examinations held by principals of schools, preliminary to granting certificates, as well as to the admission examinations.

A candidate for admission must be at least sixteen years of age, and must present satisfactory evidence of good moral character and good health. A statement from the applicant’s
physician to the effect that she is organically sound and in
good health, together with a certificate of vaccination must be
filed with the Dean before June first of the year in which
admission is sought. Each candidate before she is formally
accepted is given a thorough physical examination. The
College reserves the right to reject any candidate if the results
of this examination in the opinion of the medical staff justify
such action or to accept the candidate only on the understanding
that she will take five years to complete the course.

The student who has met all entrance requirements is qualifi-
ced for immediate matriculation for the Baccalaureate degree
in Arts. All communications concerning admission should be
addressed to the Dean of Wellesley College, Wellesley, Mass.

**DEFINITION OF REQUIREMENTS**

The number enclosed in parentheses following the subject indicates
the number of points assigned to that subject, that is, the number of
years with five recitations a week which will normally be required in the
secondary school for adequate preparation in the subject. If the certifi-
cate of a candidate shows that the time given to any subject is less than
that indicated as necessary by the number of points an examination may
be required.

**ENGLISH (3)**

b. Study and Practice.

This part of the examination presupposes the thorough study of each of the works named in the following list. The examination will be upon subject-matter, form, and structure.

The books set for this part of the examination are:

Shakespeare's *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro*, and *Il Penseroso*; Burke's *Speech on Conciliation with America*, or Washington's *Farewell Address* and Webster's *First Bunker Hill Oration*; Macaulay's *Life of Johnson* or Carlyle's *Essay on Burns*.

Note.—In the Wellesley examination it is taken for granted that candidates will have learned by heart illustrative passages from all poems read. Books set in the requirements of previous years are satisfactory substitutes.

Composition.—To test the candidate's command of clear and accurate English, she will be required to write brief compositions upon one or more topics drawn from the assigned readings in b, as indicated. The topics will call for only a general
knowledge of the substance of the books. The candidate will also be required to write upon one or more subjects of ordinary experience or knowledge, not taken from the prescribed books.

To meet the requirement in Composition:

1. There should be practice in writing equivalent to fortnightly themes the first two years, and weekly themes the last two years of the preparatory course. The subjects for themes should not be drawn chiefly from books. The student should be led, especially, for short themes, to choose her own subjects, based on daily experience and observation. She must be able to spell, capitalize and punctuate correctly. She must have a practical knowledge of the essentials of English grammar, including ordinary grammatical terminology, inflection, syntax, the use of phrases and clauses.

2. The study of the theory of Rhetoric should be distinctly subordinate to the needs of the student in composition, and limited to the broad essentials. She should study the structure of sentence and paragraph; she should analyze and make outlines of essays with a view to understanding the orderly development of thought; she should be taught the principles of unity, coherence, and emphasis, not in the abstract but as exemplified in her own work and the work of others; she should be taught thoroughly the common idiom of the language. The following books are recommended:

Scott and Denney’s *Composition-Rhetoric*; Carpenter’s *Exercises in Rhetoric and Composition* (High School Course); Robbin’s and Perkins’s *Introduction to the Study of Rhetoric* supplemented by Herrick and Damon’s *Composition and Rhetoric*; or A. S. Hill’s *Foundations of Rhetoric* or Webster’s *Literature and Composition* or Shackford and Judson’s *Composition—Rhetoric—Literature*.

The final examination in English b (including Composition) must be taken in accordance with the regulation for examination in “Finals.” See page 25.

**Requirement for 1913, 1914, and 1915**

Preparation in English has two main objects: (1) command of correct and clear English, spoken and written; (2) ability to read with accuracy, intelligence and appreciation.

*English Grammar and Composition.*—The first object requires instruction in grammar and composition. English grammar should ordinarily be reviewed in the secondary school; and correct spelling and grammatical accuracy should be rig-
orously exacted in connection with all written work during the four years. The principles of English composition governing punctuation, the use of words, paragraphs, and the different kinds of whole composition, including letter-writing, should be thoroughly mastered; and practice in composition, oral as well as written, should extend throughout the secondary school period. Written exercises may well comprise narration, description, and easy exposition and argument based upon simple outlines. It is advisable that subjects for this work be taken from the student’s personal experience, general knowledge, and studies other than English, as well as from her reading in literature. Finally, special instruction in language and composition should be accompanied by concerted effort of teachers, in all branches, to cultivate in the student the habit of using good English in her recitations and various exercises, whether oral or written.

**Literature.**—The second object is sought by means of two lists of books, headed respectively Reading and Study, from which may be framed a progressive course in literature covering four years. In connection with both lists, the student should be trained in reading aloud and be encouraged to commit to memory some of the more notable passages, both in verse and in prose. As an aid to literary appreciation, she is further advised to acquaint herself with the most important facts in the lives of the authors whose works she reads and with their place in literary history.

*a. Reading.*

The aim of this course is to foster in the student the habit of intelligent reading and to develop a taste for good literature, by giving her a first-hand knowledge of some of its best specimens. She should read the books carefully, but her attention should not be so fixed upon details that she fails to appreciate the main purpose and charm of what she reads.

With a view to a great freedom of choice, the books provided for reading are arranged in the following groups, from which at least ten units* are to be selected,—two from each group:—

*Each unit is set off by semicolons.
Group I (two to be selected). The Old Testament, comprising at least the chief narrative episodes in Genesis, Exodus, Joshua, Judges, Samuel, Kings, and Daniel, together with the books of Ruth and Esther; Homer's Odyssey, with the omission, if desired, of Books I, II, III, IV, V, XV, XVI, XVII; Homer's Iliad, with the omission, if desired, of Books XI, XIII, XIV, XV, XVII, XXI; Vergil's Æneid. The Odyssey, Iliad, and Æneid should be read in English translations of recognized literary excellence.

(For any unit of this group a unit from any other group may be substituted.)

Group II (two to be selected). Shakespeare's Merchant of Venice, Midsummer Night's Dream, As You Like It, Twelfth Night, Henry V, Julius Caesar.

Group III (two to be selected). Defoe's Robinson Crusoe, Part I; Goldsmith's Vicar of Wakefield; Scott's Ivanhoe, or Quentin Durward; Hawthorne's House of the Seven Gables; Dickens's David Copperfield, or Tale of Two Cities; Thackeray's Henry Esmond; Mrs. Gaskell's Cran- ford; George Eliot's Silas Marner; Stevenson's Treasure Island.

Group IV (two to be selected). Bunyan's Pilgrim's Progress, Part I; the Sir Roger de Coverley Papers in the Spectator; Franklin's Autobiography (condensed); Irving's Sketch Book; Macaulay's Essay on Lord Clive, and Essay on Warren Hastings; Thackeray's English Humourists; Selections from Lincoln, including at least the two Inaugurals and Lincoln's Speeches in Independence Hall and at Gettysburg, Last Public Address, Letter to Horace Greeley, along with a brief memoir or estimate; Parkman's Oregon Trail; Thoreau's Walden, or Huxley's Autobiography, and Selections from Lay Sermons including the addresses on Improving Natural Knowledge, A Liberal Education, and A Piece of Chalk; Stevenson's Inland Voyage, and Travels with a Donkey.

Group V (two to be selected). Palgrave's Golden Treasury (First Series), Books II and III, with especial attention to Dryden, Collins, Gray, Cowper, and Burns; Gray's Elegy in a Country Churchyard; Goldsmith's Deserted Village; Coleridge's Ancient Mariner; Lowell's Vision of Sir Launfal; Scott's Lady of the Lake; Byron's Childe Harold; Canto IV, and The Prisoner of Chillon; Palgrave's Golden Treasury (First Series), Book IV, with especial attention to Wordsworth, Keats, and Shelley; Poe's Raven; Longfellow's Courtship of Miles Standish; Whittier's Snow Bound; Macaulay's Lays of Ancient Rome; Arnold's Sokræ and Rustum; Tennyson's Gareth and Lynette, Lancelot and Elaine, The Passing of Arthur; Browning's Cavalier Tunes, The Lost Leader, How They Brought the Good News from Ghent to Aix, Home Thoughts from Abroad, Home Thoughts from the Sea, Incident of
the French Camp, Hervé Riel, Pheidippides, My Last Duchess, Up at a Villa—Down in the City.

b. Study.

This part of the requirement is intended as a natural and logical continuation of the student's earlier reading, with greater stress laid upon form and style, the exact meaning of words and phrases, and the understanding of allusions. For this close reading are provided a play, a group of poems, an oration, and an essay.

Shakespeare's Macbeth; Milton's L'Allegro, Il Penseroso, and Comus; Burke's Speech on Conciliation with America, or both Washington's Farewell Address and Webster's First Bunker Hill Oration; Macaulay's Life of Johnson, or Carlyle's Essay on Burns.

The examination will be divided into two parts, one of which may be taken as a preliminary, and the other as a final.

However accurate in subject-matter, no paper will be considered satisfactory if seriously defective in punctuation, spelling, or other essentials of good usage.

The first part of the examination will be upon ten units chosen, in accordance with the plan described earlier, from the lists headed Reading (English a); and it may include also questions upon grammar and the simpler principles of rhetoric, and a short composition upon some topic drawn from the student's general knowledge or experience. On the books prescribed for reading, the form of the examination will usually be the writing of short paragraphs on several topics which the candidate may choose out of a considerable number. These topics will involve such knowledge and appreciation of plot, character-development, and other qualities of style and treatment as may be fairly expected of young students. In grammar and rhetoric, the candidate may be asked specific questions upon the practical essentials of these studies, such as the relation of the various parts of a sentence to one another, the construction of individual words in a sentence of reasonable difficulty, and those good usages of modern English which one should know in distinction from current errors.

The second part of the examination will include composition and those books comprised in the list headed Study (English b). The test in composition will consist of one or more essays, developing a theme through several paragraphs; the subjects will be drawn from the books prescribed for Study, from the candidate's other studies, and from her personal knowledge and experience quite apart from reading. For this purpose the examiner will provide several subjects, perhaps five or six, from which the candidate may make her own selections. The test on the
books prescribed for study will consist of questions upon their content, form, and structure, and upon the meaning of such words, phrases, and allusions as may be necessary to an understanding of the works and an appreciation of their salient qualities of style. General questions may also be asked concerning the lives of the authors, their other works, and the periods of literary history to which they belong.

The final examination in English b (including Composition) must be taken in accordance with the regulation for examination in "Finals." See page 25.

**HISTORY (1 or 2)**

**Prescribed Point**

A full year course in one of the following subjects:—

(1) Ancient History, including a brief introductory study of the earlier nations, but with special emphasis on Greek History to the death of Alexander, and on Roman History to the accession of Commodus.

(2) English History, with due regard to social and political development.

(3) American History, with the elements of Civil Government.

Candidates are advised to offer the course in Ancient History as a part of their preparation.

In the subject chosen, the student should acquire accurate knowledge of the history as presented in a standard text-book of not less than 300 pages, and should read such fuller authorities as may be available, in amount not less than 500 pages. Some practice in drawing maps to illustrate territorial changes, in making digests of lectures and reading, and in preparing verbal or written reports on subjects assigned for individual investigation is essential to successful work.

Students presenting themselves for examination are expected to bring notebooks, maps, and essays, that may serve as supplementary evidence of the character of their preparation.

**Elective Point**

A candidate may offer one of these three subjects as a second point in History in place of the minimum requirement in Greek, Music, or Science, provided that one of the two points offered is Ancient History, and that the work for the second
point is done during the last two years of the preparatory course.

The final examination in the second point in History must be taken in accordance with the regulation for examination in "Finals." See page 25.

**MATHEMATICS (3)**

*Algebra.*—Factors, Common Divisors and Multiples, Ratio and Proportion, Theory of Exponents including Imaginaries, Radicals and Equations involving Radicals, Inequalities, Quadratic Equations (including the theory), Binomial Theorem, Arithmetic and Geometric Progressions.

The final examination in Algebra must be taken in accordance with the regulation for examination in "Finals." See page 25.

*Plane Geometry.*—As found in Chauvenet, or its equivalent.

Deficiency in preparation usually results from one or more of the following causes: the use of text-books which are too elementary, insufficient time spent in preparation, neglect of exercises in original demonstration in Geometry, and of reviews in both Algebra and Geometry. It is strongly urged that there be constant exercise in original demonstration in Geometry, with frequent written examinations in both Algebra and Geometry, the problems proposed being drawn from other sources than the text-books.

**LATIN (4)**

The requirements are based on recommendations made by the Commission on College Entrance Requirements in Latin, as embodied in the Document of the College Entrance Examination Board of December 1, 1910.

I. **Amount and Range of the Reading Required**

(1) The Latin reading, without regard to the prescription of particular authors and works, shall be not less in amount than Cæsar, Gallic War, I-IV; Cicero, the orations against Catiline, for the Manilian Law, and for Archias; Vergil, Æneid, I-VI.

(2) The amount of reading specified above shall be selected by the schools from the following authors and works: Cæsar (Gallic War and Civil War) and Nepos (Lives); Cicero (orations, letters, and De Senectute) and Sallust (Catiline and Jugurthine War); Vergil (Bucolics, Georgics, and Æneid) and Ovid (Metamorphoses, Fasti, and Tristia).
II. Scope of the Examinations

(1) Translation at Sight. Candidates will be examined in translation at sight of both prose and verse. The vocabulary, constructions, and range of ideas of the passages set will be suited to the preparation secured by the reading indicated above.

(2) Prescribed Reading. Candidates will be examined also upon the following prescribed reading: Cicero, orations for the Manilian Law and for Archias, and Vergil, Æneid, I, II, and either IV or VI, at the option of the candidate, with questions on subject-matter, literary and historical allusions, and prosody. Every paper in which passages from the prescribed reading are set for translation will contain also one or more passages for translation at sight; and candidates must deal satisfactorily with both these parts of the paper, or they will not be given credit for either part.

(3) Grammar and Composition. The examinations in grammar and composition will demand thorough knowledge of all regular inflections, all common irregular forms, and the ordinary syntax and vocabulary of the prose authors read in school, with ability to use this knowledge in writing simple Latin prose.

The final examination in Prose Composition must be taken in accordance with the regulation for examination in "Finals." See page 25.

Suggestions Concerning Preparation

Exercises in translation at sight should begin in school with the first lessons in which Latin sentences of any length occur, and should continue throughout the course with sufficient frequency to insure correct methods of work on the part of the student. From the outset particular attention should be given to developing the ability to take in the meaning of each word—and so, gradually, of the whole sentence—just as it stands; the sentence should be read and understood in the order of the original, with full appreciation of the force of each word as it comes, so far as this can be known or inferred from that which has preceded, and from the form and the position of the word itself. The habit of reading in this way should be encouraged and cultivated as the best preparation for all the translating that the student has to do. No translation, however, should be a mechanical metaphrase. Nor should it be a mere loose paraphrase.
The full meaning of the passage to be translated, gathered in the way described above, should finally be expressed in clear and natural English.

A written examination cannot test the ear or tongue, but proper instruction in any language will necessarily include the training of both. The school work in Latin, therefore, should include much reading aloud, writing from dictation, and translation from the teacher's reading. Learning suitable passages by heart is also very useful, and should be more practiced.

The work in composition should give the student a better understanding of the Latin he is reading at the time, if it is prose, and greater facility in reading. *It is desirable, however, that there should be systematic and regular work in composition during the time in which poetry is read as well; for this work the prose authors already studied should be used as models.*

Equivalents are accepted, but verse is not accepted in place of prose, nor anything instead of the required translation of English into Latin.

The teachers of Latin in the preparatory schools are urged to insist upon the use of good English in translation.

The study of Greek is strongly recommended to candidates who plan to elect courses in Latin in college.

Ability to read at sight easy French or German prose is of great advantage to all classical students.

**GREEK (1 or 3) Maximum Requirement (3)**

**Grammar.** *The etymology must be thoroughly mastered.*

**Prose Composition.** At least forty written exercises based upon the Greek of Xenophon, including connected passages and accompanied by a systematic study of the main principles of syntax.

The final examination in Prose Composition must be taken in accordance with the regulation for examination in "Finals." See page 25.

Xenophon, *Anabasis*, three books.

Homer, *Iliad*, three books, with scansion.

Candidates must be prepared to translate at sight both Attic and Homeric Greek of average difficulty, and to write in Greek a connected passage based upon Xenophon.
Particular attention should be given to the correct writing of Greek with the accents, to exercises both oral and written, and to the use of the blackboard for constant practice upon forms and constructions.

The teachers of Greek in the preparatory schools are urged to insist upon the use of good English in translation.

Ability to read at sight easy French or German prose is of great advantage to all classical students.

Minimum Requirement (1)

This preparation admits the student to course 14 in College, and these two courses complete the preparation for course 1 (see page 98).

The final examination in minimum Greek must be taken in accordance with the regulation for examination in "Finals." See page 25.

FRENCH

Requirement for 1912 and 1913 (1 or 3)

*Minimum Requirement (1)

The preparation for this requirement should comprise:—

(1) Careful drill in pronunciation.

(2) The rudiments of grammar, including the inflection of the regular and the more common irregular verbs, of nouns, adjectives, participles, and pronouns; the simpler uses of the conditional and subjunctive, the elementary rules in syntax, and their application in the construction of sentences.

(3) Abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression. These exercises should include frequent practice in French narrative, with a due regard to the idiomatic use of tenses such as the passé indéfini, the imparfait, the conditionnel.

(4) Writing French from dictation.

* After 1913 one point in French will not be accepted for admission. For the statement of the new 2 point requirement, operative for 1914 and thereafter, see pages 38, 39. Two points in French may not be offered before 1914.
(5) The reading of 300 duodecimo pages of graduated texts from at least three different authors, with constant practice in translating into French easy variations upon the texts read, and in reproducing from memory sentences previously read.

(6) Frequent abstracts, sometimes oral and sometimes written, of portions of the text already read.

(7) Training from the outset to understand French, both when spoken and read aloud, and to answer ordinary questions in that language.

The final examination in minimum French must be taken in accordance with the regulation for examination in "Finals." See page 25.

†Maximum Requirement (3)

To meet the maximum requirement in French, the candidate must present the whole minimum requirement as given above and, in addition, the following:

The final examination in maximum French must be taken in accordance, with the regulation for examination in "Finals." See page 25.

These results may be obtained by an exhaustive study of any good grammar, application and not recitation of rules, with constant practical tests; by translation from English into French; by paraphrasing texts read, or, by direct free composition in French, together with critical reading of texts. It is particularly urged that these texts be chosen from nineteenth century writers of prose, verse, and drama, and if possible from more than four authors.

In order to secure the desired results, the main emphasis should be laid

† For the new statement of the 3 point requirement operative in 1914, see pages 39-41.
on the correct daily use of the spoken language in the class room, on the correct and intelligent reading of French (apart from translation) and on prose composition, including the writing of short themes in French.

The texts suggested for reading are:

**Requirement for 1914 and thereafter (2 or 3)**

The requirements follow the recommendations of the Modern Language Association embodied in the Document of the College Entrance Examination Board of December 1, 1910. See page 40 for suggestions concerning preparation in the case of students expecting to enter Wellesley College.

**2 point Requirement**

(Termed a, "Elementary," by the College Entrance Examination Board.)

**The Aim of the Instruction**

At the end of the elementary course the pupil should be able to pronounce French accurately, to read at sight easy French prose, to put into French simple English sentences taken from the language of everyday life or based upon a portion of the French text read, and to answer questions on the rudiments of the grammar as defined below.

**The Work to be Done**

During the first year the work should comprise:—

(1) Careful drill in pronunciation.

(2) The rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the plural nouns, the inflection of adjectives, participles, and pronouns;
the use of personal pronouns, common adverbs, prepositions, and conjunctions; the order of words in the sentence, and the elementary rules of syntax.

(3) Abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression.

(4) The reading of from 100 to 175 duodecimo pages of graduated texts, with constant practice in translating into French easy variations of the sentences read (the teacher giving the English) and in reproducing from memory sentences previously read.

(5) Writing French from dictation.
During the second year the work should comprise:

(1) The reading of from 250 to 400 pages of easy modern prose in the form of stories, plays, or historical or biographical sketches.

(2) Constant practice, as in the previous year, in translating into French easy variations upon the texts read.

(3) Frequent abstracts, sometimes oral and sometimes written, of portions of the text already read.

(4) Writing French from dictation.

(5) Continued drill upon the rudiments of grammar, with constant application in the construction of sentences.

(6) Mastery of the forms and use of pronouns, pronominal adjectives, of all but the rare irregular verb forms, and of the simpler uses of the conditional and subjunctive.

The final examination in the 2 point requirement in French must be taken in accordance with the regulation for examination in "Finals." See page 25.

3 Point Requirement

(Termed 3, "Intermediate," by the College Entrance Examination Board.)

THE AIM OF THE INSTRUCTION

At the end of the intermediate course the pupil should be able to read at sight ordinary French prose or simple poetry, to translate into French a connected passage of English based on
the text read, and to answer questions involving a more thorough knowledge of syntax than is expected in the elementary course.

**THE WORK TO BE DONE**

This should comprise the reading of from 400 to 600 pages* of French of ordinary difficulty, a portion to be in the dramatic form†; constant practice in giving French paraphrases, abstracts or reproductions from memory of selected portions of the matter read; the study of a grammar of moderate completeness; writing from dictation‡.

**Suggestions Concerning Preparation**

1. Emphasis should be laid on the correct daily use of the spoken language in the class room, on the correct and intelligent reading of French (apart from translation) and on direct composition, including the writing of short themes in French.

2. From the outset particular attention should be given to developing the ability to take in the meaning of each word—and so, gradually, of the whole sentence—just as it stands; the sentence should be read and understood in the order of the original, with full appreciation of the force of each word as it comes, so far as this can be known or inferred from that which has preceded, and from the form and the position of the word itself. The habit of reading in this way should be encouraged and cultivated as the best preparation for all the work that the student has to do.

3. It is particularly urged that the reading be chosen from nineteenth century writers of prose, verse, and drama, and if possible from more than five authors.

The texts suggested are:

(2) For the 3 point requirement: Lamartine: *Scènes de la Révolution Française*; Maupassant: *Huit Contes Choisis*; Renan: *Souvenirs d'Enfance et de Jeunesse*; About: *Le Roi des Montagnes*; Balzac: *Le Curé

---

*i.e.,* In addition to the 2 point requirement.

† A part of this may be critical reading, a part rapid or outside reading.

‡ From texts not previously memorized.
de Tours; Colin: Contes et Saynètes; Colin: Advanced Sight Translation; Sandeau: Mlle. de la Seiglière; Scribe et Legouvé: Bataille de Dames.

The final examination in the 3 point requirement in French must be taken in accordance with the regulation for examination in "Finals." See page 25.

GERMAN

Requirement for 1912 and 1913 (1 or 3)

*Minimum Requirement (1)

The preparation for this requirement should comprise:

1. A distinct German pronunciation which should be acquired at the outset by a drill in phonetics.

2. Drill upon the rudiments of grammar; that is, upon the inflection of the articles, of such nouns as belong to the language of everyday life, adjectives, pronouns, weak verbs, and the more usual strong verbs; also upon the use of the more common prepositions, of the modal auxiliaries, and of the elementary rules of syntax and word order. This drill upon the rudiments of grammar should be directed to the end of enabling the pupil (1) to use his knowledge with facility in the formation of sentences, and (2) to state his knowledge correctly in the technical language of grammar.

3. Abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in the oral and written reproduction of natural forms of expression. These exercises should include some practice in the translation into German of easy variations upon the matter read.

4. Mastery of a vocabulary sufficient to understand and answer in German, simple questions upon the texts read.

5. The reading of about 200 pages of graduated texts.

6. Ability to read or write German script. This is not an absolute requirement, but students are strongly advised to become familiar with the German script at the outset.

The final examination in minimum German must be taken in accordance with the regulation for examination in "Finals." See page 25.

*After 1913 one point only in German will not be accepted for entrance. For the statement of the new 2 point requirement, operative for 1914 and thereafter, see page 43. Two points in German may not be offered before 1914.
Maximum Requirement (3)

To meet the maximum requirement in German the candidate must present the whole minimum requirement as given above, and in addition the following:—

(1) An accurate knowledge of more advanced grammar, i.e., of the less usual strong verbs, the principal uses of prepositions and conjunctions, the elements of word formation, the essentials of German syntax, the uses of modal auxiliaries, of the subjective and infinitive moods.

(2) Ability to speak correctly and idiomatically in German upon simple topics, and to understand the German spoken in the class room.

(6) Ability to translate at sight simple texts not only from German into English but especially from English into German.

The final examination in maximum German must be taken in accordance with the regulation for examination in "Finals." See page 25.

The desired results are not obtained if the main emphasis in the work is laid on translation from German into English instead of emphasizing the use of the spoken language in the class room, prose composition, and freie Reproduktion.

Requirement for 1914 and Thereafter (2 or 3)

The requirements follow the recommendations of the Modern Language Association embodied in the Document of the College Entrance Examination Board of December 1, 1910. See page 44 for suggestions concerning preparation in the case of students expecting to enter Wellesley College.

†For the new statement of the 3 point requirement, operative in 1914, see page 44. Candidates who are prepared before that year to meet fully the terms as there stated may in 1912 and 1913 offer that work instead of the maximum above.
2 Point Requirement

(Termed \(a\), "Elementary," by the College Entrance Examination Board.)

During the first year the work should comprise:—

1. Careful drill upon pronunciation.
2. The memorizing and frequent repetition of easy colloquial sentences.
3. Drill upon the rudiments of grammar, that is, upon the inflection of the articles, of such nouns as belong to the language of everyday life, of adjectives, pronouns, weak verbs, and the more usual strong verbs, also upon the use of the more common prepositions, the simpler uses of the modal auxiliaries, and the elementary rules of syntax and word-order.
4. Abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression.
5. The reading of from 75 to 100 pages of graduated texts from a reader, with constant practice in translating into German easy variations upon sentences selected from the reading lesson (the teacher giving the English), and in the reproduction from memory of sentences previously read.

During the second year the work should comprise:—

1. The reading of from 150 to 200 pages of literature in the form of easy stories and plays.
2. Accompanying practice, as before, in the translation into German of easy variations upon the matter read and also in the off-hand reproduction, sometimes orally and sometimes in writing, of the substance of short and easy selected passages.
3. Continued drill upon the rudiments of the grammar, directed to the ends of enabling the pupil, first, to use his or her knowledge with facility in the formation of sentences, and, secondly, to state his or her knowledge correctly in the technical language of grammar.

The final examination in the 2 point requirement in German must be taken in accordance with the regulation for examination in "Finals." See page 25.
3 Point Requirement

(Termed δ, "Intermediate," by the College Entrance Examination Board.)

THE WORK TO BE DONE

The work should comprise, in addition to the elementary course,* the reading of about 400† pages of moderately difficult prose and poetry, with constant practice in giving, sometimes orally and sometimes in writing, paraphrases, abstracts, or reproductions, from memory of selected portions of the matter read; also grammatical drill upon the less usual strong verbs, the use of articles, cases, auxiliaries of all kinds, tenses and modes (with special reference to the infinitive and subjunctive), and likewise upon word-order and word-formation.

The final examination in the 3 point requirement in German must be taken in accordance with the regulation for examination in "Finals." See page 25.

Suggestions Concerning Preparation

1. The books selected for class study should be thoroughly German in character and content. For the 2 point requirement not more than 100 pages in readers arranged for beginners should be included. For the 3 point requirement, not more than one work of the classical period of German Literature should be chosen.

2. The results desired cannot be obtained if the emphasis is laid upon translation from German into English.

3. Features that should not be neglected are:
   a. Vocabulary.—The careful study of a goodly number of common words and expressions drawn chiefly from the texts read.
   b. Frequent practice in the oral and written use of the language without the medium of English. This should consist partly in the answering in German of questions put in German, based on all the texts read intensively in class, partly in reproducing in German, without the aid of questions, the contents of these texts (Freie Reproduktion).

* That is, the 2 point requirement.

† At least 250 pages of intensive reading in class (making together with the 2 point requirement at least 525 pages in all). Besides this intensive reading, some rapid home reading of easier texts (100 pages or more) is strongly urged. It will be noted that the total number of pages of required reading has been somewhat reduced. This has been done in the hope that the preparation will be of superior quality.
BOTANY (1)

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, Document No. 48. The course should cover:—

(1) The general principles of plant anatomy, morphology, physiology, and ecology.

(2) A general knowledge of the great groups or phyla of plants.

In the second part of the course students should not only become familiar with the primary subdivisions of the great groups, but should be able to trace the evolution of plant forms by means of a comparative study of representative plants in the various groups.

Individual laboratory work by the students is essential and should receive at least double the amount of time given to lecture and recitation. Records of the laboratory work, properly certified by the teacher, in which stress is laid upon diagramatically accurate drawing and precise expressive description, must be presented with the certificate on or before July first, or at the time of the examination.

The final examination in Botany must be taken in accordance with the regulation for examination in "Finals." See page 25.

CHEMISTRY (1)

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, Document No. 48. The student should perform experiments in the laboratory to illustrate the properties of the most important elements, both metallic and non-metallic, and their compounds, and it is strongly recommended that a few of these experiments should be of a quantitative nature. Work in qualitative analysis is not recommended.

In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must be indexed and bear the indorsement of the teacher, certifying that the notes are a true record
of the student's work, and must be presented with the certificate on or before July first, or at the time of the examination. In case the notebook is lacking or inadequate, a laboratory test will be given.

The final examination in Chemistry must be taken in accordance with the regulation for examination in "Finals." See page 25.

**PHYSICS (1)**

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, *Document No. 48*. In addition to an examination, or a certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must be *indexed* and bear the endorsement of the teacher, certifying that the notes are a true record of the student's work, and they must be presented with the certificate on or before July first, or at the time of the examination.

The final examination in Physics must be taken in accordance with the regulation for examination in "Finals." See page 25.

**MUSIC (1)**

The requirement in Music (Harmony) is met by passing the Examination in Music *b* (Harmony) set by the College Entrance Examination Board.

This requirement is defined by the College Entrance Examination Board as follows:—

The examination in Harmony will consist only of a written test; there will be no test in performance. The candidate should have acquired:—

1. The ability to harmonize, in four vocal parts, simple melodies of not fewer than eight measures, in soprano or in bass—these melodies will require a knowledge of triads and inversions, of diatonic seventh chords and inversions, in the major and minor modes; and of modulation, transient or complete, to nearly-related keys.

2. Analytical knowledge of ninth chords, all non-harmonic tones, and altered chords (including augmented chords).
(Students are encouraged to apply this knowledge in their harmonization.)

It is urgently recommended that systematic ear-training (as to interval, melody, and chord) be a part of the preparation for this examination. Simple exercises in harmonization at the pianoforte are recommended. The student will be expected to have a full knowledge of the rudiments of music, scales, intervals and staff-notation, including the terms and expression-marks in common use.

The examination in music must be taken in accordance with the regulation for examination in "Finals." See page 25.

ADMISSION BY CERTIFICATE

Any school whose equipment and curriculum enable it to prepare students for the freshman class, upon complying with the regulations stated below, may receive the right to give a certificate of scholarship which shall exempt the candidate from college examinations for admission in the subjects satisfactorily covered by the certificate.

RIGHT OF CERTIFICATION

Any school in New England desiring the right of certifica-
tion should apply to the Secretary of the New England College Entrance Certificate Board, Prof. Nathaniel F. Davis, 159 Brown Street, Providence, R. I., before April first of the year in which it is proposed to make use of the privilege.

Any school outside New England desiring the right of certification should apply to the Dean of the College between October first and March first of any year.

In response to this application a blank form will be sent, which the principal is requested to fill out and return, sending with it a catalogue or circular of the school. *Specimen laboratory notebooks* must be submitted before science courses will be approved.

*During the interval between March first and October first applications for the right of certification will not be considered by the Board of Admission.*

In case the credentials of the school are approved by the Board of Admission, the right of certification is given for three years. At the expiration of this time the renewal of the right will depend upon the number of students sent during the three years either to Wellesley College or to some other college of equal rank, and upon the character of the preparation of these students as shown by their college record. The right of certification may be withdrawn at any time from a school which fails to give complete and satisfactory preparation.

**CERTIFICATE OF SCHOLARSHIP**

1. After a school has received the right of certification, the principal must present, upon a blank form furnished by the College, a certificate of scholarship for each candidate. Certificate blanks will be sent about April first to the principals of all accredited schools having candidates registered for the current year.

2. These certificates and laboratory notebooks must be forwarded in time to be received at the College by *July first*. On or before August first each candidate will be informed of the decision with regard to her certificate. Certificates re-
ceived after July first may be refused and in any case the decision will be necessarily delayed to the great disadvantage of the candidate.

3. All certificates must show distinctly that the candidate has met in detail the requirements as published in the current Calendar. Whenever any variation has been allowed, the work done must be specifically stated and offered as an equivalent, to be accepted or refused. **Attention is called to the division of the admission subjects into Preliminaries and Finals stated on page 25, and to the regulation in regard to the time of examination in "Finals."**

4. All certificates must be signed by the principal of the school, and countersigned by the assistants who have instructed the candidate.

5. Partial certificates from two accredited schools will not be accepted for the admission of a candidate, unless permission has been obtained from the Board of Admission.

6. All work completed after July first must be tested by examination at the College in September. Certificates for such work will not be accepted.

7. The candidate who has received the certificate of a principal will not be exempt from the examinations for admission in any particular subject, unless her certificate shows that she has satisfactorily accomplished the full amount of work required in that subject. Any student whose certificate is found on July first to be seriously deficient, may be refused the privilege of taking examination the following September.

**ADMISSION TO ADVANCED STANDING**

Candidates for advanced standing must fulfill the requirements for admission to the freshman class, and must also be prepared to be examined in the required studies previously pursued by the class which they wish to join, and in a sufficient number of electives to give full standing with that class.

Such candidates, if they come from other colleges, may present certificates of college work, but should clearly understand
that these do not necessarily exempt them from examinations. Each candidate should apply for a statement of the credentials which she will need to present. These credentials are due not later than July first. Candidates for advanced standing whose credentials admit them to Junior or higher rank, will take precedence of candidates for the freshman class in the assignment of rooms.

All correspondence should be addressed to the Dean of the College.

Candidates are referred to page 23 for the general statement as to the time at which applications should be made.

**ADMISSION OF CANDIDATES FOR THE M.A. DEGREE**

Candidates for the degree of Master of Arts must be graduates of Wellesley College or of other institutions of satisfactory standing, and must present adequate credentials of their ability to carry on the work for the M.A. degree.

Applications for admission as graduate students should be made upon forms which will be furnished by the Dean on request. It is desirable that the application be sent by May first of the year in which the student proposes to enter. It should be accompanied by records of standing, and, if possible, by papers and reports of work.

A matriculation fee of five dollars is payable when a student is accepted as a candidate for the Master's degree; for a graduate student without a scholarship it will be deducted from the first tuition fee; for a graduate student with a scholarship it will be deducted from the diploma fee. The diploma fee of twenty-five dollars is payable when the degree is received.

Thirty scholarships, as described on page 134, are open to accepted candidates for the M.A. degree, not residing in college buildings. Candidates who secure places in college buildings must pay the full charge for board and tuition.

Circulars containing full information for graduate students will be sent on application to the Dean. For requirements for the M.A. degree see p. 139.
ADMISSION OF STUDENTS NOT CANDIDATES FOR A DEGREE

Opportunities for special study are offered to students who are not candidates for a degree, but are qualified to undertake college work.

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Admission, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities of prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and acquirement are not ordinarily admitted, but if such desire admission they must expect to meet, by examination or by certificate from an accredited school, the requirements prescribed for admission to the freshman class, or a full equivalent for them and to satisfy such additional requirements as are prescribed by the departments which they propose to enter. Specific statements of these requirements in Music will be found on page 124; in Physical Education on page 106. In 1913 and thereafter candidates for admission to the department of Physical Education must offer Chemistry or Physics as one of the fifteen points required for admission.

All courses, graduate as well as undergraduate, are open to special students, subject to the conditions stated by the various departments; but every such student is expected to choose a primary subject to which she should devote the greater part of her time. A student who creditably completes a prescribed group of courses will be granted a certificate.

As the capacity of halls of residence is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college houses.

All correspondence should be addressed to the Dean of the College.
COURSES OF INSTRUCTION

The following Courses of Instruction are offered by the several departments. The College reserves the right to withdraw the offer of any course not chosen by at least six students.

All courses are classified in grades I, II, III; grade I including elementary courses and grade III the most advanced courses. The Roman numeral following the title of a course indicates the grade to which it belongs.

GENERAL NOTES. — Studio courses may be taken independently of the History of Art and will count toward the degree if one or more courses in the History of Art are taken before graduation. After one course in the History of Art has been completed, three hours of studio work as indicated in 5, 14, 15, 16, above, equivalent to nine hours of studio practice, may count toward the degree; four hours of studio work, equivalent to twelve hours of studio practice, may so count, if six hours in the History of Art have been completed.

Students in art courses are required to use laboratory methods, examining and comparing, sketching or describing, the photographs used in illustration.

Previous preparation in drawing is not required.

N. B. Any student who desires to give yearly the time of one full course to studio work throughout her college course may do so by spending five years in college before taking her degree, instead of four.

I. Musical Theory

The courses in theory and history are open to all students without regard to previous musical knowledge, and count toward the B.A. degree. The history and theory courses are subject to no separate tuition fee, with the exception of courses 9, 10, 11, and 12, where a nominal fee of five dollars is charged for tuning and repairs of instruments. Courses 8, 4, and 14, are designed especially for those students desiring to gain an appreciative knowledge of musical literature.

A limited number of tickets for reserved seats at the Boston Symphony concerts are free to students in the department who are able to use them profitably.

15. Elementary Theory. I.

_Open only to freshmen who are taking practical music. Two hours a week for a year. No prerequisites._

Miss Wheeler.

This course is designed for freshmen who enter college with the intention of specializing in music. It may be followed by course 1, but not by course 8. This course covers elementary acoustics, modern musical notation, diatonic and chromatic scales, invention and harmonization of melodies, invention and harmonization of basses up to and including the chord of the dominant seventh.

Mr. Macdougall.

This course aims to realize synthetically at the pianoforte the principles taught in course 1, following what may be termed a laboratory method.

Note.—Instruction will be given in small classes of not less than three students. The course is in no sense a substitute for pianoforte lessons. Students must satisfy the head of the department that they have a pianoforte technique adequate for the work; in general, the ability to play the easier Mendelssohn Songs without Words, and to read hymn tunes accurately at sight will be sufficient.

II. Practical Music (Instrumental and Vocal Lessons)

[Attention is called to the fact that a good student need not necessarily spend five years in college in order to carry on practical music at the same time with the academic course. See (a) below.]

It is believed that students having a command of pianoforte or organ technique will be able to profit by the theoretical instruction given in the department to a fuller degree than those without such a technique. To encourage students to acquire a technique, as well as to furnish authoritative instruction, the department undertakes to give lessons in pianoforte, organ and violin playing and in singing. Practical work is an elective, and students should notify the department of their election of the subject in the usual manner and at the proper time; with the exception of the applied music courses, 9, 10, 11, 12, practical work does not count toward the B.A. degree. It is offered to all students, whether candidates for degrees or not, as stated below:

(a) Candidates for the B.A. degree who propose to spend but four years in college may take practical music, provided that they obtain each year the permission of the Dean of the College as well as of the Professor of Music; they must also take Musical Theory unless they have completed two courses in the subject.

(b) Candidates for the B.A. degree who are willing to devote five years to the college course will be permitted to take practical music each year of the course. Freshmen may do so without taking Musical Theory, but all other students in the academic and musical course are governed by the restriction laid down in (a).

(c) Candidates for the B.A. degree who wish also the Certificate of the Department of Music should plan to devote five years to the college course. Such students are required to take practical music, two lessons a week, throughout the five years. They must complete, satisfactorily to the department, a course in the literature of the instrument chosen or of the voice; they must apply for the certificate at least three years in advance. After the first year the study of Musical Theory is required.

(d) Students not candidates for the B.A. degree who desire to specialize in Music must meet the requirements prescribed for admission to the freshman class, and must in addition pass an examination on the rudiments of music. This examination will be based upon W. H. Cummings's Rudiments of Music (No. 2 of Novello Company's Music Primers), chapters 6,9, and 10 omitted. Special students must take both Musical Theory and vocal or instrumental lessons, two a week, with not less than twelve hours of weekly practice. They must also take from six to nine hours per week of academic work, including Musical Theory, as may be decided in consultation with the Dean.

(e) Students not candidates for the B.A. degree who wish the Certi-
Certificate of the Department of Music must comply with the conditions laid down in (d); moreover the academic work taken must include modern languages. Such students must apply for the certificate on entering the department, and must have already acquired the fundamental technique of the instrument chosen or of the voice. The time occupied in study for the certificate depends upon the talent, upon the proficiency of the student at entrance, and upon her subsequent diligence; but in general four years at least are necessary. The various courses are so arranged that the pupil on completion will have an acquaintance with the best musical literature.

(f) Graduates of Wellesley College or of other institutions may make special arrangement for instrumental or vocal lessons.

(g) Permission to practice in Music Hall cannot be given to students not regularly registered in the department.

(h) Students whose progress is not satisfactory may be required to discontinue their lessons.

For tuition and other charges in the Department of Music see page 140.

Special stress is laid upon the study of memory. The course is conducted by lectures and by weekly laboratory appointments for the assignment and discussion of experimental work. Text-books: Calkins, *A First Book in Psychology*; Ebbinghaus, *Psychology*. Laboratory Manual: Seashore, *Elementary Experiments in Psychology*.

Miss Hubbard, Miss Thompson,  
Miss Holt, Miss Cook, Miss Robinson.  

This course is conducted by lectures and laboratory and field work.  
The student becomes familiar with a series of types of invertebrates and with one vertebrate, the frog. Each animal is studied in its structure, physiology, life-history and economic importance, and, in addition, attention is directed to its haunts, its food, its instincts and habits, and its adaptions to its surroundings.  
The study of birds constitutes a part of the work.  
This course aims to train the student in accurate observation. Attention is directed continually to fundamental biological principles, special emphasis being placed on the facts of evolution.

Open to juniors and seniors, and to sophomores who have completed course 1. Three hours a week for a year.  

Miss Cook.  

This course aims to do for the vertebrates what course 1 does for the invertebrates. It is opened by a careful and detailed study of the dogfish as a type of the group, followed by briefer study of the smelt or herring. The work on aquatic vertebrates is succeeded by similar studies of amphibious, aerial, and terrestrial ones. The aim throughout is both to trace the progressive modifications of the vertebrate type, together with those adaptions which fit its members for varying modes of life, and also to point out the relations between human structure and that of the lower vertebrates.  
Courses 1 and 2 together will meet the requirement in Biology of the Johns Hopkins Medical School.
5. Natural History of Animals. III.

COLLEGE EXAMINATIONS

An examination period occurs at the end of each semester. At these periods, and also during the days of the admission examinations in September, examinations for the removal of conditions and deficiencies and for advanced standing may be taken.

A student who wishes to take an examination upon a course which is not a part of her approved schedule for the year, must apply to the Dean for the requisite card of admission to the examination. The last day for receiving applications for such cards is for the September examinations, September first: for the mid-year examinations, January first: for the June examinations, May fifteenth.

N. B. Examinations for the removal of conditions and deficiencies excepted, no student can be admitted to examination upon a course which is not a part of her approved schedule for the year without permission both from the Head of the Department concerned and the Dean of the College. No student, therefore, should enter upon preparation for such an examination until her plan has been approved by both of the above named officers.

The College reserves the right to require the withdrawal of students whose scholarship is not satisfactory.

Master of Arts.

REQUIREMENTS FOR THE B.A. DEGREE

Every candidate for the B.A. degree must complete before graduation the equivalent of fifty-nine hours.* Since 1896, two grades in work which reaches the passing mark have been distinguished: one, "Passed"; the other, "Passed with Credit." In order to be recommended for the degree of Bachelor of Arts, a student must have "passed with credit" in not less than eight hours in each semester of her freshman

* This requirement of fifty-nine instead of fifty-eight hours applies to the class of 1914 and all succeeding classes.
and of her sophomore year, and in not less than nine hours in each semester of her junior and of her senior year. Deficiency of such work in any semester may be made good in accordance with regulations adopted by the Faculty. First-year French and first-year German may not both be counted among the fifty-nine hours. Neither first-year French nor first-year German may be so counted if taken after the sophomore year, and neither second-year French nor second-year German if taken after the junior year. Of the fifty-nine hours required for the B.A. degree, a certain number is prescribed, the rest elective.

I. Prescribed. The following subjects are required as specified:

Of the required subjects, Mathematics must be taken in the freshman year; Hygiene in the freshman year; Biblical History two hours per week in the sophomore and the junior years; English two hours per week in the freshman and the sophomore years. Of the natural sciences, one must be taken before the junior year, but either a language or a science must be taken in the freshman year. Philosophy should ordinarily be taken before the senior year.

II. Elective. All courses are classified in Grades I, II, III; Grade I including elementary courses and Grade III the most advanced courses. All of the fifty-nine hours not indicated in the above are elective, subject only to the restriction

† One hour of this requirement is met by a one-hour course in Hygiene in the freshman year; the second hour is met by four periods in practical work, two periods per week in the freshman year, and two in the sophomore year.
that every candidate for the B.A. degree must show before graduation that she has completed either

(1) nine hours in each of two departments,

or

(2) twelve hours in one department and six hours in a second department.

Of the courses offered to fulfill this requirement, at least one full course of Grade III must be taken in the senior year. The nine-hour groups must consist of at least six hours above Grade I, three hours of which must be of Grade III. The twelve-hour groups must consist of at least nine hours above Grade I, six hours of which must be of Grade III. The six-hour groups must include at least three hours above Grade I.

**REQUIREMENTS FOR THE M.A. DEGREE**

The work required of a candidate for the M.A. degree is equivalent to fifteen hours of college work, and includes no fewer than nine nor more than twelve hours of regular class work. A thesis, or a report or reports, based on independent work will be required. The student should choose one major subject, and not more than one minor subject, which should be related to the major; or she may, if she prefers, do all her work in one subject. A candidate for the M.A. degree is required to have a reading knowledge of French and of German.

One year of graduate work is required of all candidates for the M.A. degree, but two or more years are usually needed for the completion of the work.

Graduates of Wellesley College may do all the work in non-residence, under conditions defined in the Graduate Circular. One year *in residence* is required of all other candidates for the degree.

Information regarding thesis, final examinations, etc., will be found in the Graduate Circular which will be sent on application.

FIXED TIMES AND AMOUNTS OF PAYMENTS

1. For students who are lodged in college buildings.

Students who are lodged in college buildings make payments as follows:—

†The change in these rates applies to all students taking practical music for the first time in 1909-1910 and thereafter.
September (at the opening of college) . . . $250

Students who are not lodged in college buildings make the tuition payment ($175) at the time of the opening in September.

These students find room and board in the village of Wellesley. Payment is made to the head of the house at such rates and times as the parties to the contract may agree upon. Information regarding boarding places may be obtained by addressing the Registrar.

FEES

An application fee of $10 is required from all candidates for admission, and no application is recorded until the fee is received (see page 142). The same fee is required from all students in college who are intending to return for the following year, and from all former students who apply for re-admission. If the student enters college, the amount of the application fee is deducted from the first tuition bill after entrance. If formal notice of withdrawal is received at the Dean's office before August 15th of the year for which the application is made, the fee will be refunded. In all other cases it is forfeited to the College. A student who postpones entrance until the year following the one for which she first applied may transfer her application fee. But a fee so transferred will not be refunded if the student later decides to withdraw, unless the request for the transfer was received within the specified time. Requests for second transfers are sometimes granted, but a fee transferred a second time will not be refunded under any circumstances.
An infirmary fee of five dollars is charged each student. This fee covers the privileges of the infirmary, when prescribed, for a period not to exceed fourteen days. This fee is due at the beginning of the year at the time of the first payment on account of board and tuition.

A gymnasium fee of five dollars is charged each student who takes courses in Physical Education.

An additional charge is made for materials and the use of apparatus in the following laboratory courses: $5 for each laboratory course in Astronomy, Botany, Chemistry, Geology, Physics, Zoology; $5 each for courses 9 and 10 in Musical Theory; $2.50 each for the half courses 11 and 12; $2 each for the studio courses in Art, and $1 each for all other Art courses. Every student should also reckon on the expenditure of $10 to $25 annually for the purchase of books. At the time of taking the degree a diploma fee is charged. This is $5 for the B.A. degree, and $25 for the M.A. degree.

RESIDENCE

College Hall, with three dining rooms, accommodates two hundred and seventeen persons; Stone Hall, with four dining rooms, ninety-seven; Shafer, ninety-six; Beebe, ninety-two; Pomeroy, seventy-seven; Cazenove, seventy-seven; Wilder, fifty-one; Freeman, forty-seven; Norumbega, fifty; Wood, forty-seven; Eliot, sixty-one; Fiske, thirty-six. All the rooms are furnished and supplied with electric lights.

A student vacating a room before the close of the year, or relinquishing a room reserved for her at the beginning of the year, will be charged for board until the vacancy has been filled by an incoming student. Therefore, notice of an intention to withdraw should be given at the earliest possible moment. No deduction is made for absences during the year.

All applications for rooms in college buildings take the date at which the application fee is received. (See pages 23 and 141.)

Until May first, but not after that date, applications from former students will take precedence of those of new students.
in the matter of rooms. A limited number of students can arrange for board at the college during the Christmas and spring vacations.

No student can receive a diploma until a satisfactory settlement of all her college dues has been made.

HEALTH

The resident physician, Katharine P. Raymond, B.S., M.D., together with the Director of Physical Education, the Director of Halls of Residence, and the President and the Dean of the College, ex officio, constitute a board of health to which all matters affecting the health of students are referred. An infirmary is maintained in Simpson Cottage under the charge of Dr. Raymond. Two trained nurses are in constant attendance. An infirmary fee of five dollars is charged each student. This fee covers the privileges of the infirmary when prescribed for a period not to exceed fourteen days. FELLOWSHIPS AND SCHOLARSHIPS

A. FOR GRADUATES

The Alice Freeman Palmer Fellowship, yielding an income of about $1,000, was founded in 1903, by Mrs. David P. Kimball.

The holder of this Fellowship must be a graduate of Wellesley College or some other American college of approved standing, a young woman of good health, not more than twenty-six years of age at the time of her appointment, unmarried throughout the whole of her tenure, and as free as possible from other responsibilities. The same person will not be eligible to the Fellowship for more than two years.

The Fellowship may be used for study abroad, for study at any American college or university, or privately for independent research. But several times during the period of tenure the holder of the fellowship must furnish evidence that it is used for purposes of serious study and not for general culture; and within three years from entrance on the fellowship she must present to the faculty a thesis embodying the results of the research carried on during the period of tenure.
Applications for this Fellowship should be received by the President of Wellesley College not later than February first, of the academic year preceding that for which the Fellowship is asked.

**Thirty Graduate Scholarships to the Value of $175 a Year**, the equivalent of one year's tuition, have been established for the benefit of approved candidates for the M.A. degree in residence at Wellesley. Applications for these scholarships should be addressed to the Dean of the College, Wellesley College, Wellesley, Mass.

**Scholarships in Schools of Classical Study.**—Studentships in the American School of Classical Studies in Athens, and the American School of Classical Studies in Rome, are open to graduates and graduate students of Wellesley College who have done sufficient work in the classics to meet the admission requirements. The object of these schools is to afford opportunity for the study of classical literature, art, and antiquities, to aid in original research in these subjects, and to conduct the exploration and excavation of classical sites.

*The American School of Classical Studies in Athens.*—The school year extends from October first to June first. The regulations for admission are as follows: "Bachelors of Arts of co-operating colleges, and all Bachelors of Arts who have studied at one of these colleges as candidates for a higher degree, shall be admitted to membership in the School on presenting to the Committee a certificate from the classical department of the college at which they have last studied, stating that they are competent to pursue an independent course of study at Athens under the advice of the Director. Members of the School are subject to no charge for tuition."* Further information can be made by application to Professor Chapin, who represents Wellesley College upon the Managing Committee of the School.

*The American School of Classical Studies in Rome.*—The school year extends from the fifteenth of October to the fifteenth of June. Information in regard to the work of the School and the requirements for admission can be had on application to Professor Hawes, who represents Wellesley College upon the Managing Committee of the school.*

*A few Fellowships are awarded on competitive examination.
Scholarships in the Marine Biological Laboratory at Wood's Holl.—Wellesley College is entitled to appoint annually two students who may enjoy all the advantages of this laboratory without expense for tuition. This laboratory, which is open during the summer for the study of marine life, affords opportunities both to investigators and to persons needing instruction or direction.

Students in either Botany or Zoology who desire to undertake original work will receive suitable direction. In addition to these opportunities there are courses of lectures on special topics and on subjects of general biological interest. Applications for appointment should state the character of the work to be done,—i.e., whether botanical or zoological, whether general work, investigation under direction, or independent investigation,—and should be forwarded to Professor Ferguson or Associate Professor Robertson in time to reach Wellesley College before April first.

Scholarships at the Zoological Station in Naples.—Wellesley College is a subscriber to the support of the American Women's Table at the Zoological Station in Naples, and thus has a voice in the selection of the persons who make use of it. Such persons must be capable of independent investigation in Botany, Zoology, or Physiology. Appointments are made for a longer or shorter period, as seems in each case expedient. Applications for the use of the table may be made through the President of the College.

Another source of pecuniary aid is in the work of the Students' Aid Society. Small amounts are loaned to students without interest, in the expectation that whenever they are able, these students will repay the Society. Assistance is often given partly in gifts and partly in loans. The funds at the disposal of the Society are wholly insufficient to meet the wants of deserving applicants. Contributions of any amount will be gladly received, and should be sent to the Treasurer of the Students' Aid Society, Mrs. Pauline A. Durant, Wellesley, Mass.

All applications for assistance should be made by letter addressed to the Secretary of the Students' Aid Society, Wellesley, Mass., before the first of May preceding the college year for which the aid is needed. It should be noted that owing to inadequacy of funds, aid cannot be promised in advance to students who have not entered.

The Wellesley College Loan Fund, established in 1908 through the gift of alumnæ and other friends of the College, and the McDonald-Ellis Loan Fund of $500 established in 1908 by former students of the McDonald-Ellis School, of Washington, D. C., in memory of the late principals of the school, are valuable aids in this work for students.

In two cottages a reduction is allowed on payment for board, under certain conditions.

**LIBRARY**

The Library of the College, endowed by Eben Norton Horsford, now numbers 70,724 volumes, including the departmental and special libraries enumerated below. The General Library is open on week days from 8 A. M. to 9.30 P. M., and on Sundays from 2 to 6 P. M. Students have direct access to the shelves. The library is catalogued by author and subject entries, and the most recent and useful bibliographical aids are provided; special effort is made by the librarians to train students in methods of research.
The Library subscribes for six daily and three weekly papers and for two hundred and nine American and foreign periodicals. The list includes the most important representatives of the branches of instruction comprised in the college curriculum.

The Gertrude Memorial Library, established by Mr. A. A. Sweet, the Missionary Library, and other collections in the General Library, furnish 5,166 volumes for Biblical study and religious reading.

The Library of American Linguistics, a special gift from Mr. Horsford, numbering 1,420 works, comprises the valuable collections of Major J. W. Powell and Mr. Horsford relating to North American Indian languages.

The Plimpton Library, established by Mr. George A. Plimpton, in memory of his wife, Frances Pearsons Plimpton, of the class of 1884, comprises 885 volumes of early Italian literature, including both manuscripts and printed books of the fifteenth century.

The Music Library, in Billings Hall, includes a collection of manuscripts and musical scores, besides books on music.

Library of Zoology and Physiology, 2,390 volumes.
Library of Chemistry, 1,529 volumes.

Hygiene and Physical Education

The department occupies the new Mary Hemenway Hall on the western border of the college grounds. It is designed to meet the requirements of the course for the training of teachers of hygiene and physical education, and to provide practical instruction for the entire College. The equipment includes a large, well-lighted gymnasium with ample bathing facilities, administrative offices, class rooms, and laboratories for anatomy, physiology, hygiene, anthropometry, corrective gymnastics, and
research. Immediately adjoining Mary Hemenway Hall are tennis and archery courts, basket ball and hockey fields, with room for further expansion. Lake Waban furnishes facilities for rowing and skating, and there is also a golf course with a clubhouse. The equipment of the department is designed solely to aid in the application of modern principles of science to the maintenance and promotion of health.

THE FARNSWORTH ART BUILDING
AND ART COLLECTIONS

The Farnsworth Art Building, the gift of the late Isaac D. Farnsworth, was opened in September, 1889. Besides lecture rooms, galleries for collections, and studios for those engaged in drawing and painting, a special feature is the arrangement of laboratories and libraries, so that the books and art material relating to particular subjects and periods can be made immediately available to general students.

The Art Collection consists of a large number of photographs and other material, including the James Jackson Jarves collection of laces and vestments; the M. Day Kimball Memorial, consisting of original pieces of antique sculpture; a few examples of early Italian painting; a collection of Indian baskets, the gift of Mrs. Rufus S. Frost; various Egyptian antiquities obtained through the kindness of Mrs. John C. Whitin, including certain interesting papyri, and scarabs and seals from the collection of Dr. Chauncey Murch, the gift of Miss Helen Gould; a few paintings given by Mr. Edward M. Raymond; and the Stetson collection of modern paintings.

The collection of photographs and other reproductions numbers over eleven thousand.

EQUIPMENT IN MUSIC

Music Hall and Billings Hall are large brick buildings, devoted entirely to the department of Music. Music Hall contains offices, studios, and practice rooms equipped with twenty-nine new pianos of standard makes; also a large room, containing a
two-manual pipe organ for the use of the organ pupils. Billings Hall, opened in 1904, contains the office of the Professor of Music, the library and class rooms for instruction in Musical Theory; also a concert room, seating four hundred and twenty-five people, and containing the Grover organ,—a large three-manual organ, rebuilt and modernized.

LABORATORIES AND SCIENTIFIC COLLECTIONS

ASTRONOMY

The Whitin Observatory is supplied with a twelve-inch refracting telescope with micrometer, spectroscope, and photometer attachments; a six-inch telescope, also with driving clock and micrometer; two transits, the larger a three-inch prismatic transit; two chronographs, two sidereal clocks and a Bond chronometer; a concave grating spectroscope, and a collection of minor instruments and photographs.

Meteorological instruments, including thermometer shelter, thermograph, barograph, anemometer, and anemoscope, are installed at the observatory.

BOTANY

The department of Botany has the use of six modern laboratories well supplied with microscopes, electric stereopticon, and other modern apparatus and appliances. Apparatus for bacteriological work includes an autoclave, a hot-air sterilizer, and an incubator, while the embryological laboratory is equipped with a paraffin oven, and revolving, sliding, and freezing microtomes.

The illustrative collections comprise an herbarium of nearly nineteen thousand phanerogams and twenty-one thousand cryptogams recently increased by the lichen collection of over four thousand specimens of the late Prof. Clara E. Cummings; also a collection of woods, fruits, and economic vegetable products: three hundred charts by Henslow, Kny, Dodel, Tschirch, and others; a collection of Auzoux’s botanical models; Brendel’s
glass models of cryptogams; lantern slides and microscope mounts. A gift of seventeen hundred water color paintings of North American plants by the late Helen Frances Ayres has lately been received. In addition collections for a permanent museum now number more than five thousand specimens.

Classes have the use of a garden and plots of wild ground as well. Specimens are also supplied from a private greenhouse. The native flora about Wellesley is rich and easily accessible, furnishing a convenient field for both the taxonomist and ecologist. A small glass house is an aid to work in landscape gardening and in plant physiology. The library is well supplied with reference works and with current periodicals.

CHEMISTRY

The department of Chemistry occupies a separate building, which contains two lecture rooms and the chemical library, in addition to the rooms fitted up for laboratory work. Separate rooms are provided for work in General and Organic Chemistry, Qualitative and Quantitative Analysis, Air and Water Analysis and Food Analysis. The building is conveniently arranged and well equipped with necessary apparatus and appliances.

GEOLOGY AND GEOGRAPHY

The department of Geology and Geography has a large new and well-equipped lecture hall provided with a Leitz epidiascope for lantern slide, opaque and microscopic projection, with an attachment for polarized light; a new geography laboratory provided with desks three feet by five feet for each student for independent map and other laboratory work; and a geology laboratory equipped with appliances for blow-pipe analysis and petrographic study.

The Geology Museum contains a typical college collection of dynamical, structural and historical geology specimens,—a systematic collection of six thousand minerals arranged according to Dana, and a systematic collection of rocks. There are three collections arranged for class-room use,—one each in mineralogy,
petrology and palæontology. The department is fortunate in having received from Mrs. Henry Fowle Durant an unusually beautiful and very valuable collection of malachites and azurites from Bisbee, Ariz., and other minerals, which are displayed in specially designed cases.

The maps of the department include wall maps of different countries and sections of countries; many of the Coast and Geodetic Survey Charts; all the United States Geologic Folios, and over five thousand topographic maps of the United States Geologic Survey. Three thousand of these are arranged by groups to illustrate geographic types.

The department has four hundred lantern slides and in addition has the use of a very valuable collection of fourteen hundred lantern slides, including the rare collection of the late Prof. William H. Niles, which illustrate all phases of geology and geography.

MATHEMATICS

The collection of mathematical models consists of a set of models of simple solids, surfaces of the second and higher orders, and circular sections of surfaces of the second order. They are executed in wood, thread, card, and plaster.

PHYSICS

The department of Physics occupies a convenient lecture room, provided with arrangements for sunlight and lantern projection and adequate apparatus for illustrative experiments.

Laboratories for students are equipped with instruments adapted to a wide range of work. Rooms are especially fitted for photometry, photography, spectroscopic work, and electrical measurements. A workshop is provided with lathe and tools. Storage batteries and dynamos are connected with the laboratories.
PSYCHOLOGY

The work of the laboratory is carried on in seven rooms (including a dark-room) with electrical connections. The equipment includes electric-motor color mixers, a campimeter, a Wheatstone stereoscope, the Hering simultaneous contrast apparatus, König tuning-forks, Quincke's tubes, Galton's piston whistle, Zwaardemaker's clinical and fluid-mantle olfactometers, with a large collection of smell material, aesthesiometers, a pressure balance, the apparatus of Münsterberg and of Titchener for the localization of sound, Jastrow's memory apparatus, the Spindel and Hoyer apparatus for memory experiments, a Hipp chronoscope with the Ebbinghaus control apparatus, vernier chronoscopes, a pneumograph, a plethysmograph, sphygmographs of different forms, a finger-dynamometer, an automatograph, tambours, kymographs, electric motors, an electric tuning-fork, Lough's electrically actuated pendulum, Mälzel's mercury contact metronome, etc., besides apparatus for special investigations. Students have the use of models of the brain, eye, and ear.

ZOOLOGY

There are four laboratories for the study of Zoology and Animal Physiology. Each is adequately equipped for its special purpose. A complete set of physiological apparatus from the Harvard Apparatus Company is provided for each student in the physiology course.

The Zoology Museum contains a typical collection of both vertebrates and invertebrates, and a considerable number of models by Ziegler, Blaschka, Auzoux and Deyrolle. There are also excellent collections of birds and of insects, and a small one of fishes prepared by Denton.
NEEDS OF THE COLLEGE

Wellesley College, established by private benevolence, entered upon its work with a costly material equipment, but with no endowment in money.

The endowment of the library by Mr. E. N. Horsford, the later contributions of Mr. Rockefeller and others to general and special endowment, have greatly relieved the burden resting upon the College. Yet to-day the receipts from board and tuition fees form the main resource with which to meet running expenses and annual repairs, and to make those additions to apparatus and buildings which are demanded by the constant advance and expansion of college instruction throughout the country.

It must be evident that the past outlay has been amply justified by results. Notwithstanding the peculiar dependence of the College upon the number of students admitted and retained, its whole existence has been attended by a constant rise in the academic standard. From Wellesley have been graduated more than four thousand young women, who have carried the fruits of their college training into the schools and households of their country, and into benevolent work at home and abroad. It is believed that the College can with full confidence appeal to the public at large for further aid.

Among the urgent needs of the College are the following:—
1. Unrestricted funds for defraying general expenses.

HONOR SCHOLARSHIPS

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of two and one-half year's work, to juniors on the basis of one and one-half years' work. The standard in each case is absolute, not competitive.
