Inquiries, Visits and Correspondence

Wellesley welcomes inquiries and visits to the College from prospective students, their parents, and other interested individuals. For those who would like more detailed information on many of the programs and opportunities described in this catalog, the College publishes a number of brochures and booklets. These publications, as well as answers to any specific questions, may be obtained by writing to the appropriate office as listed.

For those who would like to visit the College, the administrative offices in Green Hall are open on most Saturday mornings during the academic term. With the exception of a few holidays, arrangements can usually be made to greet prospective students during Wellesley’s vacation periods. Accommodations for alumnae and for parents of students or prospective students are available on the campus in the Wellesley College Club and may be reserved by calling the College Club at 781-283-2700.

A prospective student who wishes to arrange an interview with a member of the Board of Admission should make an appointment at least three weeks in advance. Student guides are available to provide tours for visitors without appointments. Visitors, however, may wish to call the Board of Admission prior to coming to Wellesley to obtain information regarding scheduled tours.

Please visit our Web site: www.wellesley.edu/admission/ to learn more about Wellesley before you arrive on campus. For directions, go to www.wellesley.edu/admission/visiting.html.

The College

The mission of Wellesley College is to provide an excellent liberal arts education for women who will make a difference in the world.

Wellesley is a college for the student who has high personal, intellectual, and career expectations. Beyond this common ground, there is no typical Wellesley student. Since the College is a multicultural community, students come from all over the world, from different cultures and backgrounds, and they have prepared for Wellesley at hundreds of different secondary schools. Through the Davis Degree Program, women beyond the traditional college age, many with families, are part of the student body working toward a Wellesley degree. Men and women from other colleges and universities study at Wellesley through various exchange programs.

This diversity is made possible, in large part, by the College’s need-blind admission policy. Students are accepted without consideration of their ability to pay. Once admitted, those who demonstrate need receive financial aid through a variety of services.

Henry Fowle Durant, Wellesley’s founder, was an impassioned believer in educational opportunity for women. His strong philosophy carries over to the present day. Throughout its 127-year history Wellesley has been one of the country’s preeminent liberal arts colleges, and a distinguished leader in the education of women.

In some respects, the liberal arts curriculum at Wellesley has changed little since the College was founded. Though the structure of distribution requirements has evolved, the requirement that each student should be acquainted with the main fields of human interest has remained a constant. The concept of the major — the opportunity for each student to establish mastery in a single area through concentrated study during her junior and senior years — has remained consistent as well. The College is committed to this framework because it emphasizes the essence of education: the ability to speak and write clearly, the knowledge to manage quantitative data with ease, the confidence to approach new material, and the capacity to make critical
judgments. These skills are essential — whatever the student chooses to do with her life.

Within this traditional liberal arts framework, the Wellesley curriculum is dynamic and responsive to social change and new fields of study. The dramatic expansion of information of the last decades has led to an increasingly interdisciplinary course of study. Single majors in traditional disciplines have been joined by double majors and specially designed interdisciplinary and interdepartmental majors. Some departments also offer minors.

One of the first liberal arts colleges to establish a separate Computer Science Department and Computer Science major, Wellesley remains at the forefront of technological development. Students and faculty in all disciplines use the College's academic computing facilities in their courses and research. The Knapp Media and Technology Center provides state-of-the-art technology for students in courses ranging from multimedia language instruction to graphic arts.

The well-known Wellesley Centers for Women, composed of the Center for Research on Women and the Stone Center for Developmental Services and Studies, produce work of national importance about issues facing women in contemporary society.

The Wellesley-MIT cross-registration program allows students to combine the strengths of both institutions while remaining in residence on their own campuses. Wellesley students enroll in a variety of MIT courses including architectural design, financial accounting, computer science, engineering, mathematics, and the sciences. Wellesley students construct individual majors in such subjects as urban planning, engineering, and linguistics, which draw on the resources of departments at both MIT and Wellesley.

The Twelve College Exchange Program brings men and women from member colleges to Wellesley for a semester or a year, and enables Wellesley students to live and study on another campus. The College also offers exchanges with nearby Brandeis University and Olin College of Engineering; Spelman College, a distinguished Black liberal arts college in Atlanta, Georgia; and Mills College in Oakland, California. In addition, Wellesley students are encouraged to spend a semester or a year abroad in programs at many institutions throughout the world. Financial aid for study abroad, although limited, is available through Wellesley.

The Wellesley faculty is a community of recognized scholars. They include scientists, artists, and political and economic analysts. Dedicated to teaching, they bring a vast range of academic and professional interests to the College. Many members of the faculty live on or near the campus. They are committed to all aspects of life in the Wellesley community and are available to students outside of the classroom.

There is one faculty member for every nine students. The average class size ranges from 18 to 21 students. A few popular introductory courses enroll more than 100, but these classes routinely break into small discussion groups under the direction of a faculty member. Seminars typically bring together 15 to 18 students and a professor to investigate clearly defined areas of interest. The low student-faculty ratio offers an excellent opportunity for students to undertake individual work with faculty or honors projects and research.

Excellent academic facilities support learning at Wellesley. Students have access to virtually all the collections on campus through a computerized library system totaling over 1.4 million items. Among the special holdings are a world-renowned Browning Collection, a Book Arts Collection, and a Rare Book Collection. Interlibrary loans through the Boston Library Consortium augment the College’s own holdings.

Wellesley's strength in the sciences dates to the nineteenth century, when the College's physics laboratory was the second in the country (the first was at MIT). The Science Center brings together all the science departments, including Mathematics and Computer Science, in a contemporary setting that fosters interdisciplinary discussion and study. Laboratories are completely equipped for a wide variety of fields. The Center also includes an observatory and an extensive complex of greenhouses.

Students in the arts find excellent facilities in the Jewett Arts Center and the Davis Museum and Cultural Center.

Wellesley recognizes that classroom activities and studying are only part of a college education. The residence hall system not only provides a pleasant and comfortable place to live but seeks to integrate academic and extracurricular life through educational programs. Residence life is administered in several ways, ranging from dormitories staffed by professional resident directors to student-run cooperatives.

For many students, the lessons learned competing on the athletic field, publishing the Wellesley News, or participating in a Wellesley-sponsored summer internship in Washington, D.C. have lifelong impact. The College encourages self-expression through 157 established student organizations, as well as any interest that a student may choose to pursue alone or with a group of friends. Wellesley also supports those students who investigate religious issues and thought. The Office of Religious and Spiritual Life offers religious programs in many faiths, including denominational services for those who wish to participate.

As a small community, Wellesley's quality of life depends upon the involvement and commitment of each of its constituents. For this reason, students participate in decision making in nearly every aspect of College life. They serve, frequently as voting members, on every major committee of the Board of Trustees, including the Investment Committee, as well as the Academic Council, the Board of Admission, and the Committee on Curricula and Instruction. In academic departments, they frequently participate in the curriculum and faculty search committees. They also serve on committees that set policy for residential life and govern Schneider Center, the focus of much student activity on campus.

Established in 1901 by student and faculty agreement, the Wellesley College Government Association is the official organization of all Wellesley students. Through Senate, its elected representative body, College Government officers are elected each spring on a campus-wide basis; Senate representatives are elected from each residence hall and from the Davis Scholars and Wellesley off-campus students.

Each student who comes to Wellesley College joins an extended community of alumnae. Some of them have been outstanding scholars and researchers, others have been businesswomen and leaders in politics and social issues, still others have made important contributions to their communities through volunteer work. No matter how they have chosen to make their mark in the world, these women have proven that four years at Wellesley College is just a beginning.
The Campus

Located just 12 miles west of Boston, Wellesley’s 500-acre campus of woodlands, hills, meadows, an arboretum, ponds, and miles of footpaths and fitness trails borders scenic Lake Waban. The 65 buildings on campus range in architectural style from Gothic to contemporary.

Facilities and Resources

State-of-the-art academic facilities, ranging from creative arts media to advanced scientific research equipment support Wellesley’s curriculum. These facilities are available to all students.

Classrooms

The three primary classroom buildings on campus are Founders Hall for the humanities, Pendleton Hall for the social sciences and arts, and the Science Center.

Science Center

The Science Center houses the Departments of Astronomy, Biological Sciences, Chemistry, Computer Science, Geology, Mathematics, Physics, and Psychology, as well as several interdepartmental programs. The Center includes up-to-date teaching and research laboratories, extensive computer facilities, and modern classrooms. The Science Library contains more than 110,000 volumes, maintains subscriptions to more than 725 paper journals and periodicals with additional journals in electronic format, and provides access to online databases.

Sage Hall, the College’s original science building, dates to 1927. The Science Center, encompassing Sage Hall and new construction, was built in 1977 and won the Halston Parker Prize for architecture in 1987. Renovations and additions to the Science Center were done in 1991. The Center contains a variety of state-of-the-art instrumentation including: a confofocus microscope, two NMR spectrometers (one with a micro-MRI accessory), microcalorimeters, and a high-power pulsed tunable laser. For more information, visit our Web site: www.wellesley.edu/ScienceCenter/mainpage1.html.

Botanic Gardens

The Margaret C. Ferguson Greenhouses, combined with the 22 acres of the Hunnewell Arboretum and the Alexandra Botanic Gardens, are an outstanding teaching facility and community resource visited by thousands each year.

The 15 greenhouses contain more than 1,000 plants. Each house has individual temperature and humidity control, providing a wide-range of climates: desert, tropical, subtropical, and temperate. Two greenhouses are reserved for plant science classes, while two others provide research facilities for faculty and students. Built in 1922, the original greenhouses were renovated in the 1980s to conform to modern, energy-efficient construction.

The extensive plant collections in the Arboretum and Botanic Gardens serve as an outdoor teaching laboratory for horticulture, environmental studies, and biology. For more information visit our Web site: www.wellesley.edu/FOH/home.html.

Observatory

The Whitin Observatory contains laboratories, classrooms, a darkroom, and the Astronomy Library. Its research equipment includes 6-, 12-, and 24-inch telescopes, state-of-the-art electronics, and computers. The observatory was a gift of Mrs. John C. Whitin, a former trustee of the College. Built in 1900, and enlarged in 1906 and 1966, it is considered an unusually fine facility for undergraduate training in astronomy.

Computer Facilities

Students have access to hundreds of computers in public clusters, classrooms and dorm computing rooms, and to advanced computing and multimedia equipment and software in the Knapp Media and Technology Center, located in the Margaret Clapp Library, and the Knapp Social Science Center in the Pendleton classroom building. Wellesley’s DormNet provides support to students who use the high-speed, campus-wide network from their dorm rooms to access electronic resources both on campus and around the world. These resources include: the College Web site; the library online catalog and full-text electronic resources; centralized E-mail, bulletin and conferencing provided via FirstClass; self-taught and instructor-led online courses in desktop applications provided through a subscription to Element K; and an array of instructional software. For more information visit our Web site: www.wellesley.edu/infoservices.html.

Knapp Media and Technology Center

The Knapp Media and Technology Center, located in the Margaret Clapp Library, contains high-end computer workstations, a video-production studio, a video-conferencing site, media-equipped project rooms, video-digitizing capabilities and editing rooms, a plotter, and other multimedia equipment and software.

Information Services staff assist faculty and students in the use of these technology and information resources and collaborate in the development of multimedia projects.

For more information see www.wellesley.edu/Knapp/mtc.html.

Jewett Arts Center and Pendleton West

The Jewett Arts Center consists of the Mary Cooper Jewett art wing and the Margaret Weyerhaeuser Jewett music wing. The art wing consists of classrooms, studios, photography darkrooms, video and computer facilities, the art library, and an art gallery.

The music wing holds the music library, listening rooms, practice studios, classrooms, and a collection of musical instruments from various periods available for the student’s use. Music performances, theatre events, lectures, and symposia can be held in the Jewett Auditorium, a 320-seat theatre. The arts facilities of Pendleton West include drawing and painting studios, a sculpture foundry, a printmaking facility, and a concert salon. A bridge links the Jewett Arts Center to the Davis Museum and Cultural Center.

The Knapp Social Science Center at Pendleton Hall

The Knapp Social Science Center at Pendleton Hall East opened in January 2001. The new Center was created to integrate the social sciences and to provide instructional space that is varied in design and layout. The physical space includes case-study classrooms, computer classrooms with individual student workstations, seminar rooms, and a video-conferencing facility. In addition to research facilities for faculty and students, an archaeology laboratory and a media laboratory were added which function as extended teaching areas. Public spaces include a viewing room equipped with a large TV/VCR/DVD set-up, wireless computing capability and a two-story atrium with...
bleachers and informal seating. The Center was given by Betsy Wood Knapp '64 and her husband Cleon Knapp.

The Davis Museum and Cultural Center
The Davis Museum and Cultural Center is the art museum of Wellesley College. As a vital force in the intellectual and pedagogical life of the College, the museum collects, preserves, exhibits, and interprets art in the belief that contact with original works of art is an essential component of a liberal arts education and a key factor for understanding the world in which we live. Located in the center of the campus, the museum offers innovative exhibitions, technology-based installations, lectures, symposia, films, concerts, performances, publications as well as interdisciplinary projects that are developed in collaboration with faculty.

The four-story facility includes spacious galleries for the museum's permanent collection that spans the 3,000 years of art history, temporary exhibition galleries, cinema, and café.

For additional information, visit the DMCC Web site: www.davismuseum.wellesley.edu.

Margaret Clapp Library
In 2000, Wellesley College Library received the first nation-wide "Excellence in Academic Libraries" award. The combined Clapp, Art, Astronomy, Music, and Science collections number over 1.4 million. The library’s physical holdings are supplemented by a wealth of online materials and through resource-sharing with the Boston Library Consortium.

Among the Library’s notable features are the College Archives, the Book Arts Lab, where typography and letterpress printing are taught, and the Special Collections, which contain rare books and manuscripts that support student research.

Research and Instruction specialists staff service desks, help with in-depth research, and schedule hands-on sessions for professors and their classes.

All of the libraries offer workstations with elbow room, quiet and comfortable study space, help from knowledgeable staff, and information to enhance life and learning. Visit our Web site: www.wellesley.edu/Library for details.

Residence Halls
Residence halls are grouped in three areas of the campus: Bates, Freeman, McAfee, Simpson, Cedar Lodge, Dower, French House, Homestead, Instead, and Stone-Davis are near the Route 16 entrance to the campus; Tower Court; Severance, Cervantes, Lake, and Claffin are situated off College Road in the center of the campus; and Shafer, Pomeroy, Cazenove, Beebe, and Munger are located by the Route 135 entrance to the College. For more information visit our Web site: www.wellesley.edu/FirstYear/residence.html.

Continuing Education House
A "home on campus" for Elisabeth Kaiser Davis Scholars and Postbaccalaureate students, as well as for nonresident students of traditional age, the CE House is a place where students gather for programs, meetings, group study in the living room, or simply to share conversation over lunch or coffee in the kitchen. The Office of Continuing Education is located here. For more information visit our Web site: www.wellesley.edu/CE.

Child Study Center
The Child Study Center, a laboratory preschool under the direction of the psychology department, was originally designed in 1913 as a school for young children. Students and faculty from any discipline can study, observe, conduct approved research, volunteer, or assistant teach in classes with children ages two to five. In addition to the observation and testing booths in the historic Anne Page Building, there is a Developmental Laboratory at the Science Center.

Nannerl Overholser Keohane Sports Center
Classes for all indoor sports, aquatics, fitness, and dance are conducted in the Nannerl Overholser Keohane Sports Center, which includes an eight-lane competition swimming pool; badminton, squash, and racquetball courts; two free-weight rooms; exercise/dance/yoga studios; volleyball courts; and an athletic training area. The Field House has a basketball arena, a volleyball arena, two cardiovascular machine areas, indoor tennis courts, and a 200-meter track. Outdoor water sports focus around the boathouse on Lake Waban, where the canoes, sailboats, and crew shells are kept. Wellesley maintains a nine-hole golf course; eight tennis courts; two soccer fields; an artificial-turf field hockey/lacrosse field; a 10-lane track and softball field; and a swimming beach. For more information visit our Web site: www.wellesley.edu/Athletics/main.html.

Alumnae Hall
The largest auditorium on the campus, Alumnae Hall seats more than 1,300 people and contains a large ballroom as well as the Ruth Nagel Jones Theatre. Wellesley alumnae gave this building to the College in 1923.

Chapel
Presented to Wellesley in 1897 by the son and daughter of William S. Houghton, a former College trustee, the Houghton Memorial Chapel hosts weekly religious and spiritual services, musical performances, lectures, and other College community gatherings. Stained glass windows commemorate the founders and a tablet by Daniel Chester French honors Alice Freeman Palmer, Wellesley’s second president. A smaller multi-faith Chapel, Muslim prayer room, and Buddhist/Hindu meditation room are located on the ground floor level.

Schneider College Center
Schneider College Center is the focal point of cocurricular activity. The Center contains lounge areas, a cafeteria, a student-managed pub, and a student-managed café. Several student organizations have their offices here: College Government; the Student Programming Board; Wellesley News; Legenda; and WZLY. Several multicultural organizations have offices on the fourth floor. Other facilities and offices in Schneider include a Student Leadership Resource Center; a lounge and kosher kitchen for Hillel; Office of Religious and Spiritual Life; the Office of Residential Life; and the Office of Student Activities. For more information visit our Web site: www.wellesley.edu/DeanStudent/schneider.html.

Harambee House
The cultural and social center for Wellesley students of African descent, Harambee House offers programs to the entire College community that highlight various aspects of African, African American, and African Caribbean culture. Harambee has a growing library dedicated to the history and culture of African and African American peoples and a record library of classical...
jazz by Black artists, which is located in the Jewett Music Library. Harambee House also houses various organizations for students of African descent, and Ethos Woman (a literary magazine), as well as meeting and function rooms. For more information, visit our Web site: http://puma.wellesley.edu/~greencat/final/intro.html.

Slater International Center
Headquarters for international and multicultural activities, Slater International Center is dedicated to encouraging greater understanding among all cultures through personal association and cooperative endeavor. The Center serves campus organizations that have an interest in international and multicultural issues and helps sponsor seminars and speakers. The International Student Advisor’s office is located in the Center. The advisor counsels international students, advises international organizations, and handles immigration matters for students and faculty. The Center also coordinates a peer counseling group of international students to help newcomers adjust to the United States. Students can also use the center to study, cook, and meet informally. For more information visit our Web site: www.wellesley.edu/ISS/sic/sic.html.

Society Houses
Wellesley has three society houses: Shakespeare House, for students interested in Shakespearean drama; Tau Zeta Epsilon House, for students interested in art and music; and Zeta Alpha House, for students interested in literature. Each has kitchen and dining facilities, a living room, and other gathering areas. Phi Sigma is a society that promotes intelligent interest in cultural and public affairs.

Green Hall
The offices of the president, the board of admission, the deans, and others directly affecting the academic and business management of the College are located in Green Hall. Named for Hetty H.R. Green, the building was erected in 1931. The hall’s Galen Stone Tower, a focal point of the campus, rises to 182 feet and houses the carillon which is played for major College events.

Infirmary
Simpson Infirmary, a licensed outpatient clinic and infirmary, is an institutional member of the American College Health Association.

President’s House
Formerly the country estate of Mr. and Mrs. Henry Fowle Durant, Wellesley’s founders, the President’s House is located on a hill bordering Lake Waban just south of the main campus. It is frequently the site of alumnae and trustee gatherings and events for faculty, staff, and students throughout the year.

Wellesley College Club
A center for faculty, staff, and alumnae, the Wellesley College Club’s reception and dining rooms are open for lunch and dinner to members, their guests, and parents of students. Overnight accommodations are available for all members, alumnae, and parents of current and prospective students. For more information visit our Web site: www.wellesley.edu/Collegeclub.

Wellesley Centers for Women
Established in 1995 by a vote of the Wellesley College Board of Trustees, the Wellesley Centers for Women are composed of the Center for Research on Women and the Stone Center for Developmental Services and Studies.

Instituted in 1974 by a grant from the Carnegie Corporation and sustained by private and government funding, the Center for Research on Women conducts policy-oriented studies focused on the education, employment, and family life of women from all walks of life. The Women’s Review of Books is published at the Center.

The Stone Center for Developmental Services and Studies, founded in 1981 with a gift from Grace W. and Robert S. Stone, is dedicated to the prevention of psychological problems, the enhancement of psychological well-being, and the search for better understanding of human development. The Center’s mission is carried out through education, research, community outreach, and counseling. Culturally diverse populations are of special interest.

Student Life
Educating the whole person is key to the Wellesley experience. The College offers many opportunities for a student to develop socially, culturally, personally, and intellectually. Learning and living in a diverse community fosters self-confidence, communication and leadership skills, and a sense of social responsibility that extends beyond the classroom. Participation in student organizations, volunteer programs, and college governance creates solid friendships that support Wellesley students during their college years and throughout their lives.

Wellesley sponsors 157 student organizations that reflect many interests including ethnic, social, political, service, and religious interests. More than 20 multicultural organizations include the Slater International Association; Mezcla, an association for Latina students; Ethos, an organization of Black students; the Asian Student Union, composed of Asian and Asian American students; and the Korean American Student Association. Religious groups such as the Newman Club, the Wellesley Christian Fellowship, Hillel, Al-Muslimat, and Ministry to Black Women offer many programs throughout the year. Students produce a number of publications: Wellesley News, the weekly student newspaper; Ethos Woman, a literary magazine for and about Third World women; GenerAsians, a magazine by and about the Asian/Asian American community; Legenda, the College yearbook; and The Galenstone. An all-student staff operates WZLY, the campus radio station.

Students are encouraged to reach beyond the Wellesley community. The Center for Work and Service Internship Office lists many opportunities for public and community service in government agencies and nonprofit organizations in the greater Boston area. In addition, the Community Service Center coordinates student groups that work with youth services, the elderly, the Easter Seal Swim Program, the Boston Food Bank, Habitat for Humanity, and Rosie’s Place, a shelter for homeless women.

Athletics has become a significant part of life at Wellesley. Students are frequent trophy winners in NCAA, Division III, and
other intercollegiate events in the College's 11 programs including basketball, cross-country running, fencing, and field and water sports. For students interested in sports for recreation, there are opportunities in club sports such as softball, sailing, table tennis, skiing, and rugby as well as nontraditional athletics including yoga, dance, and scuba diving. The Nannerl Overholser Keohane Sports Center provides state-of-the-art facilities for competition sports (see The Campus for details). Lake Waban is used for water sports and Paramaecium Pond for ice skating.

Traditionally the arts are an essential part of the Wellesley experience. Students with musical interests can explore the Wellesley College Orchestra, the Prism Jazz Ensemble, Yanvalou Dance and Drum Ensemble, the Tupelos, the Blue Notes, the Toons, the Widows, Graceful Harmony, the Guild of Carillonneurs, and the MIT Orchestra. Those with theatrical interests can choose from the Wellesley College Theatre, the Experimental Theatre, and the Shakespeare Society. At the Jewett Arts Center's Student Gallery, students can exhibit their work or organize and curate shows.

An important extension of both social and academic life, technology is integral to the Wellesley experience. The entire College community exchanges ideas and information on Wellesley's electronic bulletin boards. Every student has access to the campus-wide network in her dorm room, which includes e-mail and electronic bulletin boards—as well as research opportunities on campus and via the Internet. In addition, clusters of PCs and Macintoshes are located in every residence hall and the Knapp Media and Technology Center in the main library. All students also have voice-mail boxes from which they can receive telephone messages.

A number of traditional social events have become part of life at Wellesley: Junior Show, Parent and Family Weekend, Spring Weekend, and International Week are supplemented by frequent informal parties.

There are a variety of social centers on campus. Schneider Center, the focal point of community activity, includes a coffee house and conference rooms. Slater International Center is the frequent setting for international and multicultural events and celebrations. Harambee House, the social and cultural center of Wellesley's African American community, sponsors lectures and music and dance performances. Lectures and cultural programs are also presented by many other student organizations. The Davis Museum and Cultural Center, with its Collins Cinema and Café, is a place to relax with friends, view domestic and international films, and listen to lectures and live performances.

**Student Residences and Services**

Wellesley's residence hall system fosters a sense of community through student self-government and program planning. The majority of Wellesley students live in one of the 21 residence halls. The College provides counseling, religious, and health services to support the physical and mental well-being of residential and off-campus students. For the health and comfort of our students, employees, and guests, smoking is not permitted in the residence halls.

**Residence Halls**

Much of campus life and informal education revolves around the residence halls. Planned programs and daily interaction with students from diverse lifestyles and cultural backgrounds offer Wellesley students a rich learning environment outside the classroom. The residence experience usually includes lectures, group discussions, dinners with faculty members, and social events with students from other colleges.

Each residence hall has a distinctive character and structure. Resident Directors, professionals trained in working with young women and issues that arise from living in a small community, staff 15 of the larger halls (most housing 120–140 students). Each Resident Director is a liaison to the College community, and supervises a residence staff that includes a Resident Advisor on each floor of the building and a House President. The Resident Advisors and House Presidents are trained in community programming and act as resources and referral agents for all students. In addition, the First-Year Mentor (FYM) Program is designed to establish a healthy community life for first-year students. Juniors and seniors who serve as FYMs are trained as facilitators to work with first-years and help them build class community and leadership, provide an ongoing forum for intellectual discourse, and disseminate important information. The smaller halls each house fewer than 70 upperclass students and are staffed by student Resident Advisors and offer more independent government.

Many opportunities exist for students to assume leadership positions. Students in the larger residence halls elect a House Council that administers the hall government. The Vice President of Programming and her committee in each hall plan a variety of social, cultural, and educational events throughout the year. Each residence hall also elects representatives to the Senate. These students consult with members of the residence hall on campuswide issues and convey opinions of their constituencies to the student government.

The Residential Life office staff works to strengthen the involvement of faculty, staff, and alumnae in residence hall life.

Most of the residence halls contain single, double, and triple rooms, and some suites. All incoming first-year students and sophomores are placed in double or triple rooms. The cost of all rooms is the same, regardless of whether they are shared, and students are required to sign a residence contract. Each large hall has a spacious living room, smaller common rooms, and a study room. All but three of the large halls have dining facilities open on a five- or seven-day basis. All dining rooms offer vegetarian entrees; Pomeroy serves kosher/vegetarian food at all meals. There are limited kitchenette facilities in the halls for preparing snacks. Each building is equipped with coin-operated washers and dryers.

The College supplies a bed, a desk, a chair, a lamp (halogen lamps are not allowed), a bookcase, and a bureau for each resident student. Students furnish linen, blankets, quilts, their own curtains, pictures, rugs, and posters. Each student is required to contribute one to two hours a week monitoring the front door of her residence hall, otherwise known as "bells."

**Student Parking and Transportation**

Because of limited parking on campus, resident first-year students are not permitted to have cars on campus. The Chief of Campus Police, or designated representative, must approve any exemptions to this policy. The Director of Disability Services must approve any temporary or permanent exemptions to this policy due to medical or accessibility circumstances. The parking fee for sophomores, juniors, and seniors is currently $75 per semester or $135 per year, and for off-campus students $60 per semester or $100 per year. The College may
further restrict normal parking procedures to accommodate campus construction projects, or other special events as needed.

There is hourly bus service from the campus to MIT in Cambridge (7:30 a.m. to 11:50 p.m. Monday–Friday) with subway connections to the Greater Boston area. On weekends the College provides bus service to Boston and Cambridge on an expanded schedule tailored to students' needs.

Services for Students with Disabilities
Wellesley College is committed to providing students with disabilities the access and support they need to achieve their academic potential and to participate fully in Wellesley's activities.

Each student is viewed as an individual with a unique set of strengths and abilities. Disability Services professionals, who report to the Dean of Students, are available to provide individualized assistance and information to students. The Director of Disability Services provides assistance to students with physical disabilities: the Director of Programs of the Pforzheimer Learning and Teaching Center works with students with learning disabilities and attention disorders; the Director of the Stone Center Counseling Services assists students with psychological and emotional disabilities; and the Directors of the Health Service help students who identify as having medical disabilities. These staff members work collaboratively with faculty and other campus members to coordinate services for students with disabilities.

Students with disabilities are encouraged to explore more information about services confidentially in person or at www.wellesley.edu/DisabilityServices/DSHome.html.

Stone Center Counseling Service
Counseling is readily available. Many students benefit from talking with a professional about personal matters affecting their daily life or their basic sense of purpose and direction.

Members of the College Counseling Service, part of the Stone Center for Developmental Services and Studies, provide short-term individual and group counseling. Preventive programs are also offered, addressing mental health and developmental issues.

Clinical staff members are trained in the disciplines of psychiatry, psychology, and social work. Long-term treatment is not provided, but students are referred to appropriate private clinical professionals and sliding-scale agencies. There is no fee for any counseling services provided to students by Stone Center staff. Professional confidentiality is maintained at all times in accordance with the law.

Religious and Spiritual Life
Wellesley's Office of Religious and Spiritual Life fosters a sense of community by supporting the diverse religions traditions and spiritual perspectives represented in the Wellesley community.

The Religious Life Team, which includes a Buddhist Advisor, a Hindu Advisor, a Jewish Chaplain, a Muslim Advisor, a Roman Catholic Chaplain, a Protestant Christian Chaplain, and a Unitarian Universalist Chaplain, as well as advisors and student groups for the Bahá'í, Jain, Native American, Native American, Pagan, Sikh, and Zoroastrian communities are available for religious and pastoral counseling. Students, faculty, and staff are invited to take part in one or more of these faith communities, for worship, meditation, practice, and discussion on a weekly basis and educational and social activities throughout the academic year. In addition, the Dean of Religious and Spiritual Life coordinates a program that examines the role of spirituality in the educational process at Wellesley and officiates at multi-faith community worship.

Many outlets are available for students to express their spirituality. Flower Sunday, one of Wellesley’s oldest surviving traditions, is a multi-faith celebration held at the beginning of each academic year. Jewish students celebrate High Holiday services and have access to a kosher kitchen in Schneider Center. The Muslim Prayer Room, located in the lower level of the Chapel, is open for students to gather for daily prayers, and students may join Al-Muslimat, an organization for Muslim women at Wellesley, which meets for weekly Qur'anic study and discussion. A Buddhist/Hindu Meditation Room is available in the lower level of the Chapel. These are just a few of the observances and facilities available to Wellesley students.

For more information about religious and spiritual life at Wellesley, visit our Web site: www.wellesley.edu/RelLife/.

College Health Service
The Health Service includes both an outpatient clinic and a state-licensed infirmary that is staffed 24 hours per day by registered nurses and on-call physicians while College is in session. During clinic hours, physicians, nurse practitioners, and nurses provide primary medical and gynecological care to all students. There is a small on-site laboratory. When required, consultation with specialists is available both locally and in Boston.

Emphasis on education and preventive measures to promote healthful lifestyles is integral to the Health Service philosophy. The Health Service collaborates with other College services such as Counseling Service, Residence, and Physical Education.

The confidentiality of the clinician-patient relationship is carefully maintained; medical information is not shared with College authorities or parents without the student’s specific consent. When there is concern about a student’s safety, however, that concern takes precedence over issues of confidentiality. Information may also be disclosed to meet insurance claims or legal requirements.

There is no charge for outpatient visits to a nurse, nurse practitioner, or physician at the Health Service. There are charges for laboratory tests, some procedures, and inpatient care. A College-sponsored Student Accident and Sickness Insurance Program is available to cover these charges. Please see that section for further details.

The Ruhlman Conference
Founded in 1997 as a forum for students to present their work in public, the Ruhlman Conference provides an opportunity for students, faculty, staff, friends, family, and alumnae to gather and celebrate student achievement.

Students submit presentation proposals for consideration at the end of the fall semester. Sensitive to the diversity of student interest and accomplishment, the conference allows a variety of presentation formats: talks, colloquia, panels, poster sessions, exhibitions, musical and theatrical performances, and readings of original work. By providing an opportunity for public presentation of what is often a private, isolated activity, the Ruhlman Conference underscores the idea that research can be part of an ongoing conversation in a community of scholars.

Held each April, the conference has been made possible by the Barbara Peterson Ruhlman Fund for Interdisciplinary Study.
**The Tanner Conference**
Established through the generosity of Estelle "Nicki" Newman Tanner '57, the Tanner Conference celebrates the relationship between the liberal arts classroom and student participation in an increasingly diverse and interdependent world. The Tanner Conference provides a venue for students and alumnae to reflect critically upon, analyze, and share their off-campus experiences with others in the College community.

Encompassing the diversity of off-campus experiences of students, the conference explores the learning that occurs through internships, service learning experiences, student teaching, study abroad, international Wintersession programs, experiential learning in courses, and independent study and research conducted away from Wellesley. Held each fall, the conference also presents an opportunity for alumnae to return to campus to discuss how their participation in these experiences as Wellesley students has enriched their lives.

**Student Government**

*Throughout its history the College has based its student life policies upon the concepts of personal integrity, respect for individual rights, and self-government. The rules and procedures governing student life are designed to reflect these ideals and uphold the individual's right to privacy and safety. Information concerning all aspects of Wellesley community life is contained in the Guide to Student Life which is online at www.wellesley.edu/DeanStudent/StudentHandbook/studentlifeindex.html.*

**Honor Code**

Inherent in Wellesley's democratic system of government and its accompanying law is the Honor Code. As the vital foundation of government, the Honor Code rests on the assumption that individual integrity is of fundamental value to each member of the community. Within the philosophy of self-government, the personal honor and responsibility of each individual as he or she approaches both the regulated and nonregulated areas of academic, social, and residence hall life in the Wellesley community are of central importance.

The Honor Code covers all duly adopted rules of the College for the governance of academic work, for the use of College resources, and for the conduct of its members. Each student — degree candidate, exchange student, and postbaccalaureate student — is bound by all the rules.

Each student is expected to live up to the Honor Code, as a member of the student body of Wellesley College both on and off the campus. She/he should also remember that she/he is subject to federal, state, and local laws that are beyond the jurisdiction of Wellesley College.

The Honor Code can work only with full support of the entire College community. In addition to upholding the regulations and spirit of the Honor Code personally, both students and faculty are responsible for the success of the system. This includes guarding against and, if necessary, reporting any inadvertent or intentional abuses of the Honor Code by any member of the community.

**College Government**

Most of the legislation and regulations guiding student life are enacted and administered by the student College Government, of which all students are members. Responsibilities delegated by the Board of Trustees to the College Government include governance of all student organizations, appointment of students to College committees, allocation of student activity funds, and administration of the Honor Code and the judicial process. Many of these responsibilities are assumed by Senate, the elected legislative body of College Government, which also provides the official representative voice of the student body. Violations of the Honor Code are adjudicated through General Judicary.

**Confidentiality of Student Records**

Maintenance of the confidentiality of individual student educational records has always been important at Wellesley, as is a concern for the accuracy of each record. Under the provisions of the federal Family Educational Rights and Privacy Act of 1974, every Wellesley student is assured the right to inspect and review all college records, files, and data directly related to her, with certain exceptions such as medical and psychiatric records, confidential recommendations submitted before January 1, 1975, records to which the student has waived her right of access, and financial records of the student's parents. The student may also seek a correction or deletion where a record is felt to be inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student. The Privacy Act also protects the privacy of personally identifiable information maintained in student records by prohibiting the release of such information (other than those facts defined below as "Directory Information") without the written consent of the student, except to persons such as officials or teachers within the College who have a legitimate educational interest in seeing the information, officials of other institutions in which the student seeks to enroll, the student's parents if the student is a dependent for tax purposes, and certain other persons and organizations.

The final regulations for the Act make clear that, in the case of students who are dependents of their parents for Internal Revenue Service purposes, information from the education records of the student may be disclosed to the parents without the student's prior consent. It will be assumed that every student is a dependent of her parents, as defined by the Internal Revenue Code, unless notification to the contrary with supporting evidence satisfactory to the College is filed in writing with the Registrar by October 1 of each academic year. All correspondence relating to a student's undergraduate performance is removed from a student's file and destroyed one year after graduation. All disciplinary records are destroyed when a student graduates from the College. Disciplinary records are never a part of a student's permanent file while she is at Wellesley.

Copies of the Privacy Act, the regulations therein, and the "Wellesley College Guidelines on Student Records" are available on request from the Office of the Registrar. Students wishing to inspect a record should apply directly to the office involved. Complaints concerning alleged noncompliance with the Privacy Act by the College, which are not satisfactorily resolved by the College itself, may be addressed in writing to the Family Policy Compliance Office, Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202-4605.

**Directory Information**

The Privacy Act gives Wellesley the right to make public at its discretion, without prior authorization from the individual student, the following personally identifiable infor-
mation: name; class year; home address and telephone number; college address and telephone number; college E-mail address; schedule of classes; major and minor field(s); date and place of birth; dates of attendance at Wellesley College; degrees, honors, and awards received; weight and height of student athletes; participation in officially recognized sports and activities; and previous educational institution most recently attended. In addition, student photographs are part of a College photograph directory that resides on the Campus-Wide Information System. It is accessible only on campus.

The Privacy Act also allows individual students to place limitations on the release of any of the above information. A student who wishes to do this must inform the Registrar, Green Hall, in writing each year by July 15 for the following academic year.

In practice, College policies discourage the indiscriminate release of any information about individual students. College directories and lists are for use within the College community.

Center for Work and Service

The Center for Work and Service offers comprehensive career preparation and resources for students and alumnae. A wide range of information and services to help students explore the world of work, participate in community service, and prepare for their futures is available. A staff of experienced professionals counsels students and alumnae at all stages of career exploration.

Students can explore various professions, educational options, and community service opportunities using the resources of the Center for Work and Service. Among the offerings are:

- career counseling and inventories
- internship search and funding resources
- community service events
- fellowship and graduate school advising
- administration of Wellesley College Graduate Fellowships and other fellowship programs
- prelaw and prehealth advising
- job and internship recruiting programs
- not-for-profit and public service job search track
- alumnae panel presentations
- workshops
- the Shadow Program (students matched with alumnae at their workplaces)
- online Alumnae Career Advisory Network (over 20,000 Wellesley graduates who have volunteered to serve as contacts for career exploration)
- online job, internship, and community service databases and directories
- an extensive career library
- an interactive Web site: www.wellesley.edu/CWS

In recent years, the Center for Work and Service has undertaken programs that have aligned the Center more closely with the educational core of the College. Faculty and Center staff collaborate to help integrate the student’s overall career decision-making process and to amplify the connection between her academic experience and life outside the classroom.

After graduation, the Center remains a resource for alumnae by offering career counseling, job listings, regional career programs, alumnae career Web pages, use of the Center for Work and Service library, and a reference file service.

For more information, please visit: www.wellesley.edu/CWS.

Admission

The Board of Admission admits students who will benefit from the education Wellesley offers and who will be able to meet the graduation requirements. Consideration is given to creativity, high motivation, and strong academic potential.

Each application is evaluated on its own merits, without regard to race, religion, color, creed, national origin, or sexual orientation. Wellesley College encourages qualified applicants from a wide variety of cultural, economic, and ethnic backgrounds to join its diverse multicultural student population.

The Board of Admission includes faculty, administration, and students. In selecting candidates for admission, the Board considers several factors: high school records; rank in class; standardized test scores; letters of recommendation from teachers, guidance counselors, or principals; the student’s own statements about herself and her activities; and interview reports when available from the staff or alumnae.

The Board values evidence of unusual talent and involvement in all areas of academic and social concern. The admission decision is never based on a single factor. Each part of the application contributes to a well-rounded appraisal of a student’s strengths and helps determine whether Wellesley would be the right place for her to continue her education.
Criteria for Admission

General Requirements for First-Year Student Applicants

Wellesley College does not require a fixed plan of secondary school course preparation. Entering students normally have completed four years of college preparatory studies in secondary school that includes training in clear and coherent writing and in interpreting literature; history; training in the principles of mathematics (typically four years); competence in at least one foreign language, ancient or modern (usually four years of study); and experience in at least two laboratory sciences.

Students planning to concentrate in mathematics, premedical studies, or natural sciences are urged to elect additional courses in mathematics and science in secondary school. Students planning to concentrate in language or literature are urged to study a modern foreign language and Latin or Greek.

There are often exceptions to the above, and the Board will consider an applicant whose educational background varies from this description. Wellesley’s applicant pool has been consistently strong. As a result, not all applicants who are qualified are admitted. Visit our Web site: www.wellesley.edu/admission/ for more details about the admission process.

The Application

The Wellesley Application consists of the Common Application plus the Wellesley Supplement. You may obtain the Wellesley Application from the Board of Admission, from our Web site: www.wellesley.edu/admission/application.html/, or from the Common Application Web site at www.commonapp.org/. You may download the application or apply online from either site. Please note the $50 application fee is waived if you apply electronically for the year 2004-05. If you mail your application, please include a $50 nonrefundable application fee. If the fee imposes a burden on the family’s finances, a letter from the applicant’s guidance counselor requesting a fee waiver should be sent to the Director of Admission with the application.

The Interview

While Wellesley does not require a personal interview for the first-year application, applicants are strongly recommended to arrange one. An interview is required of transfer applicants, Accelerating Candidates and Davis Degree Candidates (see related sections). If a candidate cannot come to the College, she should call or write to the Board of Admission or use the form provided in the application supplement to request the name of an alumna interviewer in her area. A high school junior may arrange for an informal conversation with an alumna or member of the Board.

Campus Visit

Students who are seriously considering Wellesley will have a better understanding of student life here if they can arrange to spend a day on campus. Candidates are welcome to attend classes, have meals in the residence halls, and talk informally with Wellesley students. Prospective students who plan to visit are urged to notify the Board of Admission at least three weeks in advance so that tours, interviews, meals, and class attendance can be arranged.

Standard Tests

The College Board Scholastic Assessment Tests (SAT I: Reasoning Test and three SAT II: Subject Tests) or the ACT Assessment is required of all applicants. One SAT II must be the SAT II: Writing Test; the other two may be in subjects of the student’s choice.

The applicant may obtain the registration form at school. Each applicant is responsible for arranging to take the tests and having the test results sent to Wellesley College. The College Board and ACT send the publications and the registration forms for the tests to all American secondary schools and many centers abroad.

Students should register six weeks before the College Board test dates. Limited walk-in registration may be available at some centers. For the ACT, students should register four to six weeks prior to the test date. No walk-in registration is available.

Either the SAT I or three SAT IIs may be taken, but it is not possible to take both the SAT I and the SAT IIs on the same day, so students must register for two different test dates. The latest test date from which scores can be used for September 2004 admission is December 6, 2003.

The College Board Code Number for Wellesley College is 3957. The ACT Code Number for Wellesley College is 1926.

Admission Plans

Regular Decision

Candidates applying under the Regular Decision plan must file an application by January 15 of the year for which they are applying. Applicants will be notified of the Board of Admission’s decisions in April. Applicants for Regular Decision may take SATs or the ACT any time through December of the senior year. Results of tests taken after December arrive too late for consideration.

Early Decision

Students with strong high school records who have selected Wellesley as their first-choice college by the fall of senior year should consider the Early Decision plan. Candidates may initiate applications at other colleges, but they agree to make only one Early Decision application. Once admitted under Early Decision, all other applications must be withdrawn.

Applications must be submitted by November 1 and indicate that they are intended for the Early Decision plan. Although College Board tests taken through the November test date or ACT tests taken through the October test date may be used, it is preferred that students complete the tests by the end of their junior year. Decisions on admission and financial aid will be mailed no later than mid-December.

Early Evaluation

Candidates whose credentials are complete by January 1, and who select this plan on the Wellesley Supplement form, will receive an Early Evaluation of their chances for admission. These evaluations will be sent by the end of February. Candidates will receive the final decision from the Board of Admission in April.

Accelerating Candidates

Candidates who have demonstrated academic strength and personal/social maturity may apply to enter college after completing their junior year of high school. These candidates are considered with other applicants in the Regular Decision plan, but are requested to identify themselves as Accelerating Candidates in their correspondence with the Board of Admission. An interview is required, preferably at the
College. Accelerating candidates are not eligible for Early Decision or Early Evaluation. In all other respects they follow the same procedures as the Regular Decision plan.

Deferred Entrance
Some students who apply successfully to Wellesley may then desire to defer their entrance to the first-year class for one year. If so, they should accept the offer of admission by May 1, and submit their deposit. At that point, the request for deferral should be made to the Director of Admission in writing. Students who attend another American college full-time during the year between high school and their entrance to Wellesley are not considered deferred students but must reapply for entrance as transfers. Ordinarily, transfer students may not defer entrance to the following semester or year. This also applies to international students.

International and Transfer Students

Through the years Wellesley has attracted a large international student population. The resulting cosmopolitan atmosphere has benefited the entire campus. The College also seeks highly qualified transfer students who believe that Wellesley’s special opportunities will help them achieve specific goals. For international and transfer students there are some additional and different application procedures and deadlines.

International Students
All international students from overseas secondary schools or universities outside of the United States apply for admission through the International Student Board of Admission and complete the Form for Applicants Currently Studying Overseas. This includes U.S. citizens who have been educated in a school system abroad.

Admission is considered for September entrance only. The application and all required credentials must be received by January 15 in the year in which the student plans to enter. The application form should be returned with a nonrefundable $50 registration fee drawn on a U.S. bank, or a fee waiver request from the secondary school.

Financial aid is available for only a limited number of international citizens. Therefore, admission is highly competitive for students who apply for financial assistance. Wellesley’s established policy is to accept only those international students for whom we can provide the necessary financial support.

The SAT I and II or the ACT entrance examinations are required of all international students in addition to their own national examinations. The TOEFL (Test of English as a Foreign Language), or the ELPT (SAT II: English Language Proficiency Test) is strongly recommended for all students for whom English is not their first language and who have been studying in English for less than five years. The TOEFL is not required if English is the candidate’s first language. The official ACT or the official SAT I: Reasoning Test and SAT II: Subject Tests score reports must be forwarded directly to Wellesley College by the College Board, using Wellesley’s Code Number 3957 on the College Board registration form. If the ACT or the SAT I and SAT IIs are not administered in an applicant’s country, they may take only the TOEFL.

Interested students are encouraged to initiate the application process one full year in advance of the planned entrance date. Please write to the Board of Admission or complete the online form: www.wellesley.edu/admission/contactus.html to obtain the International Students information brochure and the application form. Inquiries should include the student’s country of citizenship, present school, academic level, and the year of planned college entrance. Our fax number is (781) 283-3678.

International Students Applying from U.S. High Schools
Citizens of other countries who are currently in secondary school in the United States before entering college apply through the regular admission program. International citizens applying through the regular admission program who also wish to apply for the limited financial aid funds available are eligible to apply only under the Regular Decision plan (January 15 deadline).

Admission of Transfer Students
Wellesley College accepts transfer students from accredited four- and two-year colleges. They must offer an excellent academic record at the college level and strong recommendations from their dean and college instructors. The Scholastic Assessment Test (SAT I Reasoning Test) and three SAT II Subject Tests or the ACT and an interview are required of transfer applicants. Students wishing to transfer into Wellesley should apply by February 10 for entrance in the fall semester, and by November 15 for the spring semester. Applications may be obtained from the Board of Admission. Notification is in early April and late December, respectively. The application forms should be returned with a nonrefundable $50 registration fee or a fee waiver request authorized by a financial aid officer or college dean.

The College will accept for transfer credit only those courses that are comparable to the ones offered in the liberal arts curriculum at Wellesley. Candidates accepted for transfer will be given a tentative evaluation of their credit status at the time of admission. Transfer credit for studies completed outside of the United States will be granted only when the Registrar has given specific approval of the courses elected and the institutions granting the credit. To receive a Wellesley degree, a transfer student must complete a minimum of 16 units of work and two academic years at the College, so ordinarily only incoming sophomores and juniors are eligible to apply. A Wellesley unit is equivalent to four semester hours. Some transfer students may need to carry more than the usual four courses per semester in order to complete their degree requirements within four years. Incoming juniors, in particular, should be aware that Wellesley requires evidence of proficiency in one foreign language before the beginning of the senior year. In addition, all transfer students should note Wellesley’s course distribution, quantitative reasoning and writing requirements, which must be fulfilled for graduation (see The Curriculum). Incoming junior transfer students may not take part in the Twelve College Exchange Program or Junior Year Abroad. All transfer students may elect to take courses through the cross-registration program with MIT.
For international transfer applicants
If you are an international student (not a U.S. citizen or permanent resident of the United States) studying at a college or university outside the United States and you wish to transfer to Wellesley, you must apply for admission as a first-year student and for fall entrance only. The application deadline is January 15. After successfully completing one year of study at Wellesley, you may be eligible for transfer credit for courses from your previous institution. Please note that financial aid funding is available for a very limited number of international students.

If you are an international student (not a U.S. citizen or permanent resident of the United States) attending a college within the United States, you may apply as a transfer candidate for entrance in the fall or spring. The deadline for fall entrance is February 10, and the deadline for spring entrance is November 15. Please note that because of limited financial aid funding for international students, those international citizens who are applying from institutions within the United States are not eligible for financial aid.

Continuing Education
Wellesley College offers two programs for students beyond traditional college age. They are the Elisabeth Kaiser Davis Degree Program and the Postbaccalaureate Study Program. The Davis Degree Program is designed for women who seek the Bachelor of Arts degree. The Postbaccalaureate Study Program is available for men and women who already have a bachelor’s degree and seek nondegree course work. Students enroll in the same courses as the traditional-age undergraduates and may enroll on a part-time or full-time basis.

Elisabeth Kaiser Davis Degree Program
Candidates for the Davis Degree Program are women, usually over the age of 24, whose education has been interrupted for at least two years or whose life experience makes enrollment through the Davis Degree Program the logical avenue of admission. These students, known as Davis Scholars, meet all degree requirements of the College, but the flexibility of the Davis Degree Program allows a woman to combine school with work and family responsibilities. A small number of Davis Scholars live on campus, some in small dormitories especially reserved for Davis Scholars and others in larger dormitories integrated with students of traditional college age. Davis Scholars in residence must carry a full academic course load of at least three courses a semester and should consult with their Class Deans to determine how many semesters they will have to complete their degree. Nonresident Davis Scholars, other than international students, have no time limitation for completing their degrees and may choose whether to be full- or part-time students. International Davis Scholars must be full-time students whether or not they are in residence.

Many applicants to the Davis Degree Program have not experienced a traditional college-preparatory secondary school program, or their transcripts from the past are not an accurate reflection of current abilities. Such applicants are urged to complete at least four college-level courses for credit to strengthen their academic skills and credentials before applying for the program.

An applicant needs to show training in the principles of mathematics, including algebra and trigonometry, and she must demonstrate strong writing skills and the ability to think coherently. Students who have never pursued a foreign language should complete course work in a foreign language prior to applying.

The College will accept courses for transfer credit only if they are comparable to ones offered in the liberal arts curriculum at Wellesley, and if a grade of C or better was earned. Course work presented for transfer credit must be accompanied by an official transcript from an accredited college, descriptions of courses at the time they were taken, and the degree requirements of the institution. All information should be sent with the application for admission. Please visit our Web site at www.wellesley.edu/admission/admission/davis.html for more information about the program.

Postbaccalaureate Study Program
Candidates for the Postbaccalaureate Study Program are men and women who already have a bachelor’s degree and wish to do further undergraduate work for a specific purpose. Students take courses to prepare for graduate school, enrich their personal lives, or make a career change. The Premedical Study program is a popular choice. A degree is not offered. For more information on the Postbaccalaureate Study Program, please contact the Board of Admission or visit the Web site at www.wellesley.edu/admission/.

Admission
Application forms for the Elisabeth Kaiser Davis Degree Program and Postbaccalaureate Study Program may be obtained from the Board of Admission. Official transcripts, essays, and letters of recommendation must be submitted before a candidate is considered. A personal interview is also required. The Board of Admission looks for evidence such as work, volunteer experience, and especially recent course work, that demonstrates a candidate’s intellectual ability and initiative.

Applications should be submitted as early as possible, and must be accompanied by a nonrefundable $50 application fee. Applications for the Elisabeth Kaiser Davis Degree Program are considered once a year for fall semester entrance only. The application deadline is February 15 for admission in the fall. The deadline for international applicants for this program is January 15. The application deadlines for postbaccalaureate applicants are November 15 for spring semester admission and March 1 for fall semester admission.

You are welcome to view or download our brochures at www.wellesley.edu/admission/ for more information about any of the programs described in this section.
Wellesley offers a variety of payment plans and financing options to assist all students and their families in meeting the costs of a Wellesley education. In addition, through financial aid, the College is able to offer its education to all students regardless of their financial circumstances (see the Financial Aid section for more information). For more information visit the Student Financial Services Web site: www.wellesley.edu/SFS/.

The financial responsibilities to Wellesley College include meeting payment deadlines, meeting loan or grant requirements, and addressing outstanding balances.

It is important to understand that information and communications will be directed to the student, rather than a parent or guardian. If a parent or other individual handles the educational finances, it is the student’s responsibility to make the information contained in this catalog available to the person who is responsible.

| Health Insurance/per session                 | 50                |
Student Activity Fee
The student activity fee is administered by the Student College Government. It provides resources from which student organizations can plan and implement extracurricular activities.

Facilities Fee
The Facilities Fee supports the infrastructure of the College’s facilities.

General Deposit
The General Deposit of $300, paid by each entering student, will be credited to the student’s account. The general deposit is nonrefundable.

Refund Policy
To be eligible for a refund the student must notify her Class Dean in writing that she is leaving Wellesley. The date the written notice is received by the Dean, or the date the College determines that she has gone on leave or withdrawn will be the effective date of leave or withdrawal.

Refunds are made for withdrawal or leave of absence prior to the ninth week of the semester. The comprehensive fee is prorated on a calendar week basis. No refund is made after the eighth week.

Refunds are prorated among the sources of original payment. Scholarships, grants, and educational loans are refunded to the grantor or lender.

Wellesley College maintains credit balances for returning students and applies the credit to future charges. A student may request a refund of a credit balance by submitting a written request to Student Financial Services.

A student who leaves Wellesley during her first semester at the College has her charges prorated based on the number of weeks in attendance until the tenth week. Students who complete ten weeks but do not complete the first full semester are not eligible for a refund.

An off-campus Davis Scholar or Postbaccalaureate student who drops a course during the add/drop period receives a full refund. Charges are prorated on a calendar basis thereafter until the eighth week.

All other students have charges refunded as follows:

Tuition Refund Plan
The Tuition Refund Plan, sponsored by A.W.G. Dewar, Inc., is designed to protect the family from the loss of funds paid for tuition, fees, room and board should the student find it necessary to withdraw due to medical reasons. The Plan complements the Wellesley College refund policy and covers not only payments made by the student or parent, but also any loans and grants received.

The cost of the Plan is based on the amount of tuition and fees or tuition, fees, room and board.

Resident Student Option $256
Off-Campus Option $195

You must enroll in the plan before the first day of classes for the semester. For more information see A.W.G. Dewar’s Web site: www.tuitionrefundplan.com.

Student Accident and Insurance Program
Students enrolled at least ¾ time are required by Massachusetts State law to be enrolled in an insurance program. The policy, provided through Security Mutual Life Insurance Company of New York, is a comprehensive plan designed to meet the needs of Wellesley students. All students enrolled in courses at Wellesley College may see a physician, nurse practitioner, or nurse at the Health Services office without charge; however, charges are incurred for certain procedures, treatments, and laboratory tests. The Student Accident and Sickness Insurance Program covers most of these charges and all inpatient charges in the College infirmary. Insurance coverage is effective from August 23 to August 22 of the following year.

Information about the insurance program is mailed to the students each year. Please refer to the insurance brochure for additional information.

All Davis Scholars are assessed insurance. A waiver must be completed to waive this charge.

The fee for 2003–04 is $1,000. Please visit the Student Financial Services Web site for additional information. There is no separate plan for the fall semester. The fee for insurance appears on the first bill of the fall semester.

If a student is covered by other comparable insurance and does not wish to participate in the College plan, she may waive the coverage. A waiver form can be completed online. All fields of the form must be completed and it must be submitted by the end of the first week of classes to waive the College plan.

Financial responsibility for all medical and dental expenses rests with the student and her family. Wellesley College does not assume financial responsibility for injuries incurred in instructional, intercollegiate, intramural, or recreational programs. The College carries an NCAA policy to provide limited supplemental coverage for students injured while participating in intercollegiate athletics under the auspices of the Department of Physical Education, Recreation, and Athletics.

Please visit the Student Financial Services Web site for billing and waiver information.

Billing and Payment
Fall semester billing statements will be mailed in early July. Wellesley College must receive payment by August 1.

Spring semester billing statements will be mailed in early December. Wellesley College must receive payment by January 2. Charges incurred after the payment deadline, including those as a result of add/drop, music charges, parking and library fines, etc., are due immediately and subject to late payment fees.
Bills are mailed in the student’s name to the student’s home address when classes are not in session or to her on-campus address during the school year. Students should retain the statements for their records.

Students will receive a billing statement any month in which there are new or outstanding charges.

Payment Procedures

Full payment and/or acceptable documentation demonstrating that the balance will be fully paid must be received prior to the published deadline. Acceptable documentation includes enrollment in the Tuition Management Systems (TMS) monthly payment plan, a copy of an award letter for an outside scholarship, or a copy of a billing authorization or sponsorship letter. Loans based on the credit worthiness of the borrower may not be deducted without approval from the lender. A copy of an approval notice or signed promissory note will be accepted as documentation for this type of loan.

The student’s name and Wellesley College ID or social security number must be included on all payments and correspondence.

The student is responsible for monitoring her account balance and for keeping track of payment due dates even if someone else is handling the finances. It is the student’s responsibility to ensure that loans, grants, and other payments are sent to the College by the payment due dates. As the student will be the only recipient of monthly statements, she needs to communicate her account status to anyone paying her charges.

Inquiries regarding late payment fees may be resolved after the account has been settled. Late fee disputes can be reviewed only if a written petition has been received. The petition should include the student’s name and ID number, the term the late fee was charged, and the circumstances to be reviewed.

There are potential consequences if payment responsibilities are not met. Monthly late fees may be assessed on any balance remaining unpaid after the payment deadline. Wellesley College also reserves the right to withhold services if the student has not fulfilled her financial obligation. The student may be prevented from participating in the housing process, registering, accepting a place in an associated leave program (i.e., Junior Year Abroad program), receiving transcripts, or receiving her diploma. In addition, the College reserves the right to administratively withdraw a student if a balance continues to remain unpaid.

If any overdue obligation is referred to either the College Collection Department or to an outside agency or attorney for collection efforts and/or legal suit, the debt is increased to cover all reasonable costs of collection, including collection agency fees and court costs. By registering for any class in the College, each student accepts and agrees to be bound by the foregoing College policy as applied to any preexisting or future obligation to the College.

Outside Scholarships or Grants

If a student receives a scholarship or other outside award not previously considered in the determination of her financial aid award, federal regulations require her to notify Student Financial Services. These awards will not be reflected on a student’s account or billing statement until the College has received the funds. Please note, unless specifically stated in the sponsorship letter, all outside scholarships will be evenly applied to the fall and spring semesters.

For security reasons, we urge students not to carry large sums of cash.

Wellesley College does not accept credit card payments; however, you may charge your semester bill on VISA, MasterCard, or Discover by visiting the Tuition Management Systems Web site at www.afford.com or by phone at 800-722-4867. Please note, a teleprocessing fee is assessed.

Wire Transfer

Wire transfer of funds electronically from a U.S. or international bank to Wellesley College’s bank involves bank fees which are deducted from the funds wired to Wellesley College. The net amount applied to the student account will be the amount of the wire transfer less the bank fees. Please remember to reference the student’s name and Wellesley College identification number. Please refer to our Web site for specific information on wire transfers.

Monthly Payment Plan

If you plan to use your savings and/or current income to cover all or part of your educational expenses, the Interest-Free Monthly Payment option offered through Tuition Management Systems (TMS) helps by providing more manageable cash flow and greater budgeting flexibility. Instead of lump-sum payments, the TMS plan allows you to pay all or part of your educational expenses in manageable monthly installments. You may use the TMS plan to pay your balance after financial aid or in combination with other loans. By enrolling in the TMS Monthly Payment Plan, your student account will receive a credit each month representing 1/2 of the full amount of your contract. We will credit your student account in advance of your making all of your payments to TMS. Although Student Financial Services can provide assistance, you are responsible for determining the contract amount. TMS is not responsible for this decision and will make changes only upon your request.

The toll free number is 800-722-4867 (if calling from outside of the United States, please use 401-849-1550) or you may visit their Web site at www.afford.com.

Tuition Stabilization Plan

This program provides a written contract guaranteeing that the cost of tuition will remain the same for each of four consecutive years at Wellesley College, provided the student pays by June 30 an amount equal to four times the first year’s tuition cost. Provisions are made for leaves of absence (up to two semesters), refunds, and withdrawals. This program only stabilizes the cost of tuition at Wellesley College; all other charges such as room and board will be billed at the rate for the applicable year, as will tuition for any exchange program or other college at which the student enrolls.

Please contact Student Financial Services for enrollment information.
Financing Options

To finance your Wellesley education, several options are available whether or not a student has been awarded financial aid, other scholarships, or loans. Detailed information can be obtained from the Office of Student Financial Services or by visiting www.wellesley.edu/SFS/EducationalFinancing.html.

Federal Parent Loan for Undergraduate Students (PLUS)
Under this federally guaranteed loan program, parents may borrow the cost of education, less financial aid and other education grants or loans, from participating banks and other lenders. The applicant and student must be U.S. Citizens or U.S. Permanent Residents.

Monthly repayment begins immediately after the loan is disbursed; however, repayment of the loan principal and, under certain circumstances, interest, may be deferred while the borrower is a full-time student or experiencing economic hardship.

MEFA
This joint loan program of the Massachusetts Educational Financing Authority and Wellesley College provides fixed or variable low interest rate loans and convenient repayment terms. The full cost of education or tuition stabilization may be borrowed and a home equity option is available in most states.

Federal Unsubsidized Stafford Loan
Under this federally guaranteed loan program, a student with attendance costs not met by financial aid who is not eligible (based on federal rules for determining financial need) to borrow up to federal maximums under the Federal Subsidized Stafford Loan Program, may borrow the difference between her subsidized Stafford Loan (if any) and the Unsubsidized Stafford program limits.

An independent student or a dependent student whose parent does not qualify for a Federal PLUS Loan may also borrow up to additional federal maximums if she has costs of attendance not met by financial aid and she has already borrowed her basic Federal Stafford Loan maximum.

Interest starts to accrue immediately, but repayment may be deferred while the student is enrolled at least half-time or is experiencing economic hardship.

First-time Federal Stafford borrowers must complete an entrance interview and sign a promissory note before funds may be disbursed to her student account.

Alternative Educational Loans
Please visit www.wellesley.edu/SFS/EducationalFinancing.html to view borrower benefits, preferred lenders and loan application links or contact the Educational Financing Office for assistance.

Financial Aid

The Wellesley College financial aid program opens educational opportunities to able students of diverse backgrounds, regardless of their financial resources. No entering first-year student should be discouraged from applying to Wellesley because of the need for financial aid. Approximately 50 percent of all Wellesley students receive financial aid, based on need, from the College.

At Wellesley College financial aid is based on demonstrated need as defined through the College's financial aid policies. Amounts vary in size according to the resources of the individual and her family and may equal or exceed the comprehensive College fee. Although aid is generally granted for one year at a time, the College expects to continue aid as needed throughout the student’s four years, provided funds are available and the student continues to have need as defined by Wellesley’s policies.

Determining the amount of aid begins with the examination of family financial resources. Using both federal and institutional methodologies, the Financial Aid staff establishes the amount the parents can reasonably be expected to contribute. The staff also looks at the amount that the student can contribute from her earnings, assets, and benefits. Each year, the Financial Aid Committee determines a standard amount expected from the student’s summer and vacation earnings. The total of the parents’ and the student’s contributions is then subtracted from the student’s cost of attendance. For the typical dependent student residing on campus, the cost of attendance is composed of the College fees, a standard amount for books and personal expenses, and a standard amount for travel based on the student’s home state. The remainder equals the financial need of the student and is offered in aid. The financial aid is packaged in a combination of three types of aid: work, loan, and grant. The Financial Aid Committee sets yearly amounts of academic year work and loan.

Work

Generally, a portion of a student’s financial aid is met through a job on or off campus, usually as part of the Federal Work Study Program. Students are expected to work up to ten hours a week. For 2003–04, first-year
students are expected to earn $2,000; sophomores, $2,000; juniors and seniors, $2,200. The Student Employment Office maintains listings of on- and off-campus part-time job opportunities.

Financial aid students receive priority for on-campus jobs. Students can work in academic and administrative offices, museums, libraries, and in a variety of off-campus nonprofit and community service agencies. Some off-campus jobs are restricted to students with federal work-study.

Loans
The next portion of a student’s financial aid is met through low-interest educational loans. The 2003–04 amounts are $2,625 for first-year students, $3,000 for sophomores, $3,500 for juniors, and $3,500 for seniors. There are several kinds of loans available with different interest rates and terms of repayment. The suggested loan amount and loan program are specified in the aid offer. Higher loan amounts are packaged in special circumstances, such as late filing of aid applications.

First-time borrowers must complete an entrance interview and sign a promissory note before funds may be disbursed to her student account.

Repayment of Loans from the College
A student who has received a loan is obligated to repay the loan after withdrawal, graduation, or leave of absence. Before she leaves the College she should make arrangements for an exit interview in the Office of Student Financial Services. At that time she will be notified of her rights and responsibilities regarding the loan and will be given a repayment schedule.

Students with Students’ Aid loans have entrance and exit interviews with the Students’ Aid Society.

In order to be eligible for financial aid from the College, transfer students or Davis Scholars who have been enrolled elsewhere cannot be in default on prior educational loans. The College will not offer any federal, state, or institutional aid to students in default on prior educational loans.

Grants
The remaining portion of the student need is awarded in grants by the College from its own resources, from the federal government through the Federal Supplemental Educational Opportunity Grant and Pell Grant Programs, or from outside agencies.

Students who are eligible for other grants are required to apply for state and federal grants. If the student does not apply or fails to apply on time, the College will not replace the amount she would have received. In addition, whenever possible, students should seek grants from local programs, from educational foundations, and from other private sources. Students who qualify for nongovernmental outside scholarships usually benefit from loan and work reductions.

Applying for Financial Aid
Applicants for admission who intend to apply for financial aid must file five forms: the Wellesley College Application for Financial Aid, the Financial Aid Profile of the College Scholarship Service (CSS) Profile, the Free Application for Federal Student Assistance (FAFSA), plus signed copies of all pages and schedules of both the parents’ and the student’s most recent federal income tax returns. Applicants may also be asked to have the IRS send a tax transcript directly to Student Financial Services. Additional documents are required if parents are separated/divorced or self-employed.

The College considers information from both parents regardless of their marital status. Students are expected to furnish information from parents in their initial year and all remaining years. Students in the Davis Degree Program who satisfy federal guidelines for self-supporting students and are not, in reality, dependent upon their parents for support are exempt from this requirement. Davis Scholars who are supported by their parents file the aid application with parental information.

Application Form
The Wellesley College Application for Financial Aid should be returned to the Director of Student Financial Services, Wellesley College, 106 Central Street, Wellesley, MA 02481-8203, by November 1 for Early Decision applicants, January 15 for Regular Decision applicants and fall semester Transfer applicants, and November 15 for spring semester Transfer applicants.

Academic Requirements for Financial Aid
Evaluations of all students’ academic records are made at the end of each semester by the Academic Review Board. Eligibility for financial aid is reviewed on a yearly basis. Students must make satisfactory progress toward the degree and maintain a C average. No credit is associated with course incompletion, course withdrawal, noncredit remedial courses or course repetition; therefore, these courses are not considered in progress toward the degree.

Ordinarily, a full-time undergraduate student completes the requirements for the B.A. degree in eight semesters. A student may submit an appeal to the Academic Review Board for additional time. The Academic Review Board will consider special circumstances and may grant up to ten semesters for a full-time student or up to 14 semesters for a part-time student. A student may request financial aid for semesters beyond the usual eight if the Academic Review Board has approved the extension.

Town Tuition Grants
Wellesley College funds ten Town Tuition Grants to residents of the town of Wellesley who qualify for admission and who meet the town’s residency requirements. Application is made to the Board of Selectman. These students may live at home or on campus. Those who choose to live on campus may apply to the College for additional financial aid, and their applications will be reviewed in relation to the same financial aid policies applicable to all Wellesley students.

ROTC Scholarships
ROTC admission criteria conflict with the nondiscrimination policy of Wellesley College (see inside back cover). Students, however, may enroll in ROTC programs offered at MIT through the College’s cross-registration program. Wellesley students may apply for scholarship aid from the Air Force and Army. Interested students should contact the appropriate service office at Massachusetts Institute of Technology, Cambridge, MA 02139, or call: Air Force, (617) 253-4475; Army, (617) 253-4471.
Financial Aid for International Students
A limited amount of financial aid is available for international students. If an international student enters without aid, she will not be eligible for it in future years.

Financial Aid for Davis Scholars
Students in the Elisabeth Kaiser Davis Degree Program receive work and loans as the first components of the aid package, with a grant meeting the remaining need. The cost of education will vary for Davis Scholars living off campus in accordance with the number of courses for which they are enrolled during first and second semesters and during Wintersession. In order to be eligible for aid during a semester, students must take at least two units. Financial aid is not available to meet the full costs of living off campus.

Wellesley Students' Aid Society
The Wellesley Students' Aid Society, Inc. is an organization of Wellesley College alumnae. In addition to providing funds for grants and long-term tuition loans, the organization also serves as a resource for short-term emergency loans and other student services.

Assistance for Families
Not Eligible for Aid
Wellesley has special concern for middle- and upper-income families who find it difficult to finance their daughter's education through current income. The Office of Student Financial Services is available to assist all families, regardless of the need for aid.

If those families do not qualify for aid, the College will assist in several ways. Wellesley will help any student find employment, on or off campus, and will furnish information and advice on obtaining student and parent loans. Three payment programs are offered by the College: a Semester Plan, a Monthly Plan, and a Prepaid Tuition Stabilization Plan. Please visit the Student Financial Services Web site: www.wellesley.edu/SFS/.

FAFSA/CSS Profile
The FAFSA and information about registration for the CSS Financial Aid Profile will be available from high school guidance offices for new students and from Wellesley College for returning students. Applicants should plan to register two weeks before the form is due to allow sufficient time for CSS to process the registration and for families to complete the Profile.

The Profile must be filed by February 1 for Regular Decision applicants and fall semester Transfer applicants, and by November 15 for spring semester Transfer applicants. Early Decision applicants must file the CSS Profile by November 15. All applicants, Regular Decision and Early Decision, should file for the FAFSA by February 1.

Graduate Fellowships
Wellesley College offers a number of fellowships for graduate study, independent research, and work that are open to graduating seniors and graduates of Wellesley. Two of these fellowships are open to women graduates of any American institution. Awards are usually made to applicants who plan full-time graduate study for the coming year. Please note that these fellowships are for study at institutions other than Wellesley College. Preference in all cases, except for the Peggy Howard Fellowship, will be given to applicants who have not held one of these awards previously. Awards are based on merit and need, with the exception of the Knafel and Trustee scholarships, which are determined on merit alone. For more information about graduate fellowships and graduate school, visit our Web site: www.wellesley.edu/CWS/.

For Wellesley College
Graduating Seniors
Jacqueline Krieger Klein '53 Fellowship in Jewish studies to encourage all seniors to pursue further education in the field of Jewish studies. Award: Up to $3,000

Susan Rappaport Knafel '52 Scholarship for Foreign Study awarded to a member of the graduating class who displays a desire to learn and an ability to impart knowledge and judgment to others. The scholarship will fund a year of study in a foreign institution to pursue a specific subject that requires contact with foreign scholars, libraries, or other resources. Award: $25,000

Susan Rappaport Knafel '52 Traveling Fellowship awarded to a member of the graduating class who displays an interest in and an acceptance of others, and who displays the ethos of a Wellesley education. The fellowship will fund a year of travel abroad, with the requirement that the recipient not remain in the same area for more than two months. Award: $22,000

Trustee Scholarships are awarded on a competitive basis to graduating seniors who are currently applying to graduate school. The title Trustee Scholar is honorary; in cases of financial need, awards of up to $3,000 may be given.
For Wellesley College Graduates
Anne Louise Barrett Fellowship for graduate study or research, preferably in music, with emphasis on study or research in musical theory, composition, or the history of music abroad or in the United States. Preference will be given to candidates demonstrating financial need. Award: Up to $14,000

Margaret Freeman Bowers Fellowship for the first year of study in the fields of social work, law, or public policy/public administration, including MBA candidates with plans for a career in the field of social services. Preference will be given to candidates demonstrating financial need. Award: Up to $8,000

Eugene L. Cox Fellowship for graduate study or research in medieval or renaissance history and culture, abroad or in the U.S. Award: Up to $8,000

Professor Elizabeth F. Fisher Fellowship for research or further study in geology or geography, including urban, environmental, or ecological studies. Preference given to geology and geography. Award: Up to $2,500

Ruth Ingersoll Goldmark Fellowship for study in English literature, English composition, or the Classics. Award: Up to $2,500

Horton-Hallowell Fellowship for graduate study in any field, preferably in the last two years of candidacy for the Ph.D. degree or its equivalent, or for private research of equivalent standard. Award: Up to $9,000

Peggy Howard Fellowship in Economics to provide financial aid for graduate study in economics. Administered by the economics faculty. Award: Up to $8,000

Thomas Jefferson Fellowship for advanced study in history. Award: Up to $10,000

Edna V. Moffett Fellowship for a young alumna, preferably for the first year of graduate study in history. Award: Up to $12,000

Alice Freeman Palmer Fellowship for study or research abroad or in the United States. The holder must be no more than 26 years of age at the time of her appointment and unmarried throughout the whole of her tenure. Award: Up to $24,000

Vida Dutton Scudder Fellowship for study or research in the field of social science, political science, or literature. Award: Up to $10,000

Harriet A. Shaw Fellowship for study or research in music, art, or allied subjects, abroad or in the United States. Preference given to music candidates; undergraduate work in history of art required of other candidates. Award: Up to $11,000

Mary Elvira Stevens Traveling Fellowship for a full year of travel or study outside the United States. Any scholar, artistic, or cultural pursuit may be considered. Candidates must be at least 25 years of age on December 31 of the year of application. Applications for the Mary Elvira Stevens may be obtained from the Center for Work and Service, Wellesley College, 106 Central Street, Wellesley, MA 02481-8203. The application and supporting material should be returned to the same address by Monday, December 1, 2003. Award: Up to $20,000

Sarah Perry Wood Medical Fellowship for the study of medicine. Nonrenewable. Award: Up to $64,000

Fanny Bullock Workman Fellowship for graduate study in any field. Award: Up to $15,000

For Women Graduates of Any American Institution
Mary McEwen Schimke Scholarship, a supplemental award to provide relief from household and child care expenses while pursuing graduate study. The award is made on the basis of scholarly expectation and identified need. The candidate must be over 30 years of age, currently engaged in graduate study in literature and/or history. Preference given to American Studies. Award: Up to $1,500

M.A. Cartland Shackford Medical Fellowship for the study of medicine with a view to general practice, not psychiatry. Award: Minimum of $9,000

Instructions for Applying
Applications for the Peggy Howard Fellowship may be obtained from the Economics Department, Wellesley College. Applications and supporting materials are due by April 1.

Applicants for the Jacqueline Krieger Klein '53 Fellowship may contact the Department of History, Wellesley College for deadline and application.

Applications for the Mary Elvira Stevens Fellowship may be obtained from the Center for Work and Service, Wellesley College. The applications and supporting materials should be returned to the same address and received no later than December 1, 2003.

Applications for the Knafl Fellowship and all other fellowships may be obtained from the Committee on Graduate Fellowships, Center for Work and Service, Wellesley College, 106 Central Street, Wellesley, MA 02481, or they can be found online at www.wellesley.edu/CWS/. Applications and supporting material for the Knafl awards must be received by February 5, 2004. Applications and supporting material for all other fellowships must be postmarked no later than January 5, 2004. If hand-delivered, the application must be received in the Center for Work and Service no later than January 5, 2004.

For Wellesley College Graduates: Opportunities in Asia
Elisabeth Luce Moore '24 Wellesley-Yenching Program. The Wellesley-Yenching Program is a lasting example of Wellesley College's long tradition of interest and involvement in China, dating from 1906. In 1999, Wellesley received a generous grant from the Henry Luce Foundation to honor Elisabeth Luce Moore '24 who was born in China and has been a strong supporter of the College's ties to Asia. Part of this grant was used to endow the Wellesley-Yenching Program and to strengthen these three opportunities to work in Asia:

Wellesley-Yenching Graduate Fellowship at Chung Chi College in Hong Kong. The fellow's time may be divided between helping to organize and promote English language activities at Chung Chi College as a whole, and serving as a teaching or research assistant for an academic department.

Wellesley-Yenching Graduate Fellowship at Ginling College in Nanjing, China. The fellows teach English in the classroom for approximately 12 to 14 hours each week with office hours three to four times a week.

Wellesley-Yenching Graduate Fellowship at the National Palace Museum in Taipei, Taiwan. Approximately one-half of the fellow's work will be with the NPM Secretariat where she will write, translate, and revise English documents for various departments. The other half of the fellow's work will be with one of the Museum's other departments.

Application information is available in the Center for Work and Service, 106 Central Street, Wellesley, MA 02481 or it can be found online at www.wellesley.edu/CWS/. The deadline is March 1, 2004.
The Academic Program

The process of learning begins with the mind and motivation of the student herself. The most tempting array of courses and the most carefully planned requirements alone will not guarantee the growth of an educated mind. The academic experience is designed for the student who seeks a broad acquaintance with the many and diverse fields of human inquiry as well as the opportunity to explore her personal intellectual interests in depth. It provides for the acquisition of knowledge and the skills appropriate to the liberal arts but above all is responsive to the student who genuinely wishes to acquire the habit of learning. It seeks to stimulate the mind, refine the eye, and enlarge the capacity for free, independent, and discriminating choice.

Online Course Information

Students may access Wellesley College course information and class schedules through the Internet via the Campus-Wide Information System: www.wellesley.edu/.

The Curriculum

The curriculum at Wellesley is structured to provide strong guidance and to allow, at the same time, great personal choice. By the time a Wellesley student has earned the Bachelor of Arts degree, she should be acquainted with the main fields of human inquiry, capable of integrating knowledge from various fields, and prepared for continuous scholarly and personal growth. In her major field, the student is expected to demonstrate maturity of thought, acquaintance with recognized authorities in the field, and general competence in dealing with sources of research or analysis.

Requirements

for Degree of Bachelor of Arts

Each student is responsible for meeting all degree requirements and for ensuring that the Registrar's Office has received all credentials. Each candidate for the degree of Bachelor of Arts is required to complete 32 units of academic work with a C average or better. With some exceptions, described below, each semester course is assigned one unit of credit. Specific courses, designated by their departments and approved by the Committee on Curriculum and Instruction, are assigned 1.25 units of credit. To be eligible for 1.25 units of credit, a course must meet for 300 minutes or more per week and involve, in addition, substantial time spent on course-related work outside scheduled class meetings. Departments may also request permission from the Committee on Curriculum and Instruction to offer courses for 0.5 units of credit.

A student may earn no more than 2 units toward the degree as the result of the accumulation of fractional units through 1.25 unit courses taken at Wellesley; the same 2-unit limit applies to the accumulation of fractional units through 0.5 unit courses.

A unit of credit is equivalent to four semester-hours or six quarter-hours. The normal period of time in which to earn the degree is four years and the average course load is four units per semester. First-year students are encouraged to carry a maximum of four units each semester, but upperclass students may take five. A minimum of three units is required of all students in residence.

Courses are classified as Grades I, II, and III. Introductory courses are numbered 100–199 (Grade I); intermediate courses, 200–299 (Grade II); advanced courses, 300–399 (Grade III). Each student must include in her program at least four units of Grade III work, at least two of which shall be in the major. At least two units of Grade III work must be taken in a student's last two years. Directions for election of the major vary with the department. Please see departmental listings for specific major requirements.

Distribution Requirements

In order to provide students with as much flexibility as possible, Wellesley requires no specific courses except Writing 125. However, to ensure that students gain insight and awareness in areas outside their major fields, the College requires that they elect nine units drawn from eight substantive and skill-based categories as part of the 32 units required for graduation. (Courses numbered 250/350, Research or Individual Study, or 360/370, Honors Research, do not satisfy this requirement.) Students who enter as first-year students must take six of these nine units at Wellesley, two units in each of the three groups of distribution areas described below. Transfer students and Davis Scholars who enter with eight units prior to Wellesley must take at least three units at Wellesley, and students entering with 16 prior units may take the distribution requirements at Wellesley or use their prior units.

Courses assigned to two distribution areas may not be used to fulfill two distribution requirements. This limitation does not apply to overlay requirements (the writing requirement, the multicultural requirement, and the Quantitative Reasoning requirement, described on pp. 24–25).

Students must complete three units drawn from the following two distribution areas. At least one unit must come from each of these two areas:

Language and Literature

Courses in this group focus on: (1) the history, critical analysis, theory, and/or creation of literature, and (2) increasing mastery of the grammar, usage, and cultural context of languages studied beyond the elementary level. Courses in creative writing also fulfill this requirement.

Normally, only one course fulfilling the language requirement in a given department will be designated as satisfying the distribution requirement in Language and Literature. Courses in language instruction at the Grade One level may not be used to satisfy this distribution requirement.

Visual Arts, Music, Theatre, Film, and Video

Courses in this area focus on: (1) the history, critical analysis, and/or theory of the visual and performing arts, and (2) practice in the creation and performance of these arts.

Students must complete three units drawn from the following four distribution areas. One unit must come from the Social and Behavioral Analysis category; the two additional units must come from two of the three categories:

Social and Behavioral Analysis

Courses fulfilling this requirement introduce students to different theoretical and methodological approaches to the study of human societies and behaviors. These courses examine how individuals interact with and are influenced by social groups.
and institutions, including those associated with politics, economics, religion, family, health, education, and the arts; how and why particular forms of social organization emerge within groups or societies; and the nature of social change and conflict.

**Epistemology and Cognition**
Courses in this area examine the nature, sources, and limits of human knowledge. Some of these courses consider the standards for justifying knowledge about human beings and the world in which they live, as well as philosophical debates, both contemporary and historical, about the nature of such standards. Other courses explore aspects of intelligence – among them language, memory, perception, and learning and the cognitive, computational, and neural processes that underlie them.

**Religion, Ethics, and Moral Philosophy**
Courses meeting this requirement engage students in disciplined reflection on human conduct, the nature of values, the traditions of thought that have informed these values, and the religious traditions of the world. These courses will help students understand moral and political theory, ethical issues, and the role of religion in human life and society.

**Historical Studies**
Courses in this area develop students' understanding of history in one, or both, of two ways: (1) by illuminating the distinctiveness of one or another part of the past, with the goal of bringing students to an appreciation of political, social, economic, or cultural configurations different from their own, and (2) by exploring the processes of historical change, through which one configuration of institutions, ideas, and behaviors is replaced by another.

_Students must complete three units from the following two distribution areas. At least one unit must come from each of these two areas, and at least one unit must be a laboratory course:_

**Natural and Physical Science**
This requirement is designed to give students a basic knowledge of the capabilities and limitations of the scientific method of inquiry. Courses in this area focus on understanding scientific concepts and emphasize the methods used to gather, interpret, and evaluate scientific data.

**Mathematical Modeling and Problem Solving in the Natural Sciences, Mathematics, and Computer Science**
Courses in this group help students develop skills needed: (1) to formulate, understand, and analyze mathematical models of natural phenomena, and/or (2) to formulate and solve complex problems requiring a logical progression through multiple mathematical or computational steps.

**Foreign Language Requirement**
Before the beginning of the senior year, students must exhibit a degree of proficiency in the use of one foreign language, either ancient or modern. Many students fulfill this requirement by passing one of the language tests offered by the College Board. Wellesley requires a score of 690 or better on the SAT II: Subject Test, or a score of at least 4 on the Advanced Placement Examination (AP) to fulfill the foreign language requirement. (Prior to fall 2000, a score of 650 on the SAT II or a score of 3 on the AP examination fulfilled this requirement.) This requirement can also be met by the completion of two units of language study at the second-year college level or one unit of language study above the second-year college level.

Students may earn credit for introductory courses in no more than two modern foreign languages. Fulfillment of the foreign language requirement through work done at another institution must be approved by the appropriate department. A student whose native language is not English and who has studied that language and its literature through high school will be exempted from this requirement, subject to approval of the Class Dean and the Academic Review Board.

**Writing Requirement**
Each entering student is required to complete one semester of expository writing in her first year. Courses (numbered 125) are offered in the Writing Program. Transfer students and Davis Scholars who have not fulfilled a similar requirement must also complete one semester of expository writing, either a Writing 125 course or Writing 225. Students are expected to use acceptable standards of spoken and written English in their college work.

**Multicultural Requirement**
All students must complete one unit of course work that focuses on (1) African, Asian, Middle Eastern, Caribbean, Latin American, Native American, or Pacific Island peoples, cultures, or societies; and/or (2) a minority American culture, such as those defined by race, religion, ethnicity, sexual orientation, or physical ability; and/or (3) the processes of racism, social or ethnic bias, or cross-cultural interaction. Each student, in consultation with her first-year advisor, her major or minor advisor, or her Class Dean, will choose a course to meet this requirement. She will explain her choice in a written statement to be submitted to and signed by the advisor or dean with whom she has consulted.

The multicultural requirement may be satisfied with a course that also satisfies a distribution requirement. Writing 125 may not be used to satisfy the multicultural requirement.

**Quantitative Reasoning Requirement**
The ability to think clearly and critically about quantitative issues is imperative in contemporary society. Today, quantitative reasoning is required in virtually all academic fields, is used in almost every profession, and is necessary for decision-making in everyday life. The quantitative reasoning requirement is designed to ensure that all Wellesley College students are proficient in the use of mathematical, logical, and statistical problem-solving tools needed in today's increasingly quantitative world.

The quantitative reasoning requirement consists of two parts: (1) the basic skills component and (2) the overlay course component. The basic skills component is satisfied either by passing the Quantitative Reasoning Assessment given to all entering students or by passing QR 140, the basic skills course that builds mathematical skills in the context of real-world applications. Students are required to satisfy the basic...
skills component in their first year so that they may enroll in the many courses for which basic quantitative skills (including algebra, geometry, basic probability and statistics, graph theory, estimation, and combinatorics) are a prerequisite.

The overlay component is satisfied by passing a QR overlay course. Such courses emphasize statistical analysis and interpretation of data in a specific discipline. The Committee on Curriculum and Instruction has designated specific courses in fields from across the curriculum as ones that satisfy the QR overlay requirement. A QR overlay class may satisfy another distribution requirement as well. For more information about the Quantitative Reasoning Program, see Courses of Instruction.

The Major
Students may choose from among 32 departmental majors and 21 interdepartmental or structured individual majors or they may design an individual major. Of the 32 units required for graduation, at least eight are to be elected in the major. Many departments require more than eight courses, and Directions for Election of the major vary. (See departmental listings for specific requirements.) While a student must complete one major, she may choose to complete two majors or a major and a minor. No single course may be counted toward two majors or toward both a major and a minor.

Students who would like to elect an individual major should submit a plan of study to two faculty members from different departments. Normally, the plan should include eight units above the introductory level, four of which should be in one department. The program for the individual major is subject to the approval of the Committee on Curriculum and Instruction.

By the second semester of the sophomore year each student elects a major field and prepares for the Registrar a statement of the courses to be included in the major. Later revisions may be made with the approval of the chair of the major department, the director of the interdepartmental major, or in the case of the individual major, with the consent of the student's advisors and the Committee on Curriculum and Instruction.

Other Requirements
In order to ensure a broad exposure to the liberal arts curriculum and to avoid premature specialization, of the 32 units required for graduation, students must elect 18 units outside any one department. Of the last four semesters completed for the degree, a normal course load must be taken at Wellesley in two consecutive semesters.

In addition, all students must complete the physical education requirement described in the Courses of Instruction (see Department of Physical Education, Recreation, and Athletics) for which no academic credit is given.

Additional Academic Programs

Research or Individual Study
Each academic department provides the opportunity for qualified students to undertake a program of Individual Study directed by a member of the faculty. Under this program, an eligible student may undertake a research project or a program of reading in a particular field. The results of this work normally are presented in a final report or in a series of short essays. Further conditions for such work are described (in departmental listings) under the courses 250, 250H, 350, and 350H. Students may do no more than two units of 350 work in any one department. Individual Study courses may not be used to satisfy distribution requirements. For further opportunities for research and individual study see the Honors section under Academic Distinctions.

The Minor
Some departments at Wellesley offer a minor. Normally, a minor consists of at least five units, with one of them at the Grade III level. Directions for Election of the minor are included in the departmental listings. Interested students should consult the chair of the department. A minor form must be filed in the Office of the Registrar. No student is required to complete a minor.

Preparation for Law School
The prelaw student should develop three basic competencies: skill in analysis and reasoning, effective writing and speaking, and breadth of understanding of the diverse factors that make up the community in which the legal system functions (see Legal Studies courses). These competencies can be developed in any field in which the student chooses to major, whether in the social sciences, the humanities, or the natural sciences. Law schools do not specify particular major fields or particular courses of study for admission.

Preparation for Medical School
Medical, dental, and veterinary medical schools require special undergraduate preparation. Students should consult as early as possible with the Health Professions Advisory Committee to plan their academic preparation to meet their individual needs and interests. Appointments can be made with the Health Professions secretary in the Science Center.

In general, most health profession schools require two units of English and two units each of the following science courses (with lab): Introductory Biology, Introductory Chemistry, Organic Chemistry, and Physics. Many schools also require mathematics, in some cases two units of calculus, and additional science courses. Veterinary schools frequently require courses such as speech, technical writing, animal nutrition, genetics, biochemistry, etc. Requirements vary and catalogs of individual schools should be consulted.

All science requirements should be completed before taking the Medical College Admission Test (MCAT) or the Dental Admission Test (DAT), which are taken approximately 16 months before entering medical or dental school. In order to receive the full support of the Health Professions Advisory Committee, undergraduate students should plan to complete at least six of the science and math course requirements at Wellesley and/or its exchange colleges.

Preparation for Engineering
Students interested in mathematics, physics, chemistry, or biology can apply these interests in a very practical way through engineering, an expanding field for women.

Engineering can be pursued at Wellesley through cross-registration with MIT. Wellesley students can prepare for graduate study in engineering by combining courses in engineering at MIT with their Wellesley science major. Students interested in an undergraduate engineering degree might try to qualify for the Double Degree Program (see Special Academic Programs).
Students interested in engineering should take mathematics and physics at Wellesley in their first year, in preparation for MIT courses. Information concerning fields, prerequisites, and contact persons at MIT is available through the Office of the Class Deans.

**Academic Advising**

At Wellesley, academic advising for the first-year and sophomore student is provided by the Class Deans and the faculty. The Class Dean is a central source of information about degree requirements, academic legislation, and resources available at the College to help students achieve their academic goals. She advises students about course selections and sequences, and she is available throughout a student's years at Wellesley for consultation about matters of more general intellectual and personal concern.

Starting during Orientation, the faculty serve as mentors about the liberal arts experience, helping first-year students discuss their academic interests, goals, and experiences during their first year at Wellesley and introducing them to areas of the curriculum about which they may lack knowledge. In addition, each first-year student is asked to select a faculty advisor, based on her first semester course choices, to ensure that she has an opportunity to explore her individual interests and concerns about the degree.

The advising of juniors and seniors is also shared by the faculty and the Class Deans. This arrangement provides for systematic and equitable supervision of each student's progress toward the B.A. degree. In addition, it has the double benefit of specialized advice from faculty in the major field and detailed examination of the student's overall program.

**The Pfrozheimer Learning and Teaching Center**

The Pfrozheimer Learning and Teaching Center, located in the Margaret Clapp Library, plays a significant role in supporting the intellectual life of both students and faculty on the Wellesley campus. The mission of the Center is twofold: (1) to help students realize their academic potential and (2) to provide opportunities for faculty members to explore different methods of teaching. Peer tutors are at the heart of the Center’s academic services for students. Tutors support students as they build on their academic strengths, overcome difficulties, and develop effective strategies for reading, writing, and thinking. Faculty members participate in programs that enable them to share insights, refine teaching skills, and implement pedagogical innovations.

**Academic Policies and Procedures**

*The academic policies and procedures of the College have been subject to continuous change and examination throughout the College’s history, responding to changes in student lifestyles and innovations in the curriculum. The policies and procedures that govern most routine aspects of academic life are described below.*

**Academic Standards**

Academic standards at Wellesley are high, and students take full responsibility for attending classes, submitting required work on time, and appearing for examinations. If students have difficulties with course work, become ill, or have other problems that interfere with their academic work, they should consult with their Class Deans for assistance in making special arrangements for their studies. Tutoring and programs in study skills are offered through the Pfrozheimer Learning and Teaching Center.

Students are expected to maintain at least a C average throughout their college career. At the end of each semester the records of those students who are not in good academic standing are examined by the Academic Review Board. The Board will recommend sources of help and may impose conditions for continuing at the College. The College tries to provide the appropriate support services to students in difficulty. Students who show consistent effort are rarely asked to leave the College.

**Academic Review Board**

The Academic Review Board is the principal body for overseeing each student's academic progress and for granting exceptions to degree requirements and academic policies. The Board researches and recommends changes in academic policy and is also responsible for proposing an annual academic calendar. Dates of Academic Review Board meetings are posted on the Campus-Wide Information System. A student who wishes to submit a petition to the Academic Review Board should do so in consultation with her Class Dean. She should deliver her petition, in writing, at least one week before the petition is to be considered by the Board.

**Credit for Advanced Placement Examinations**

Students who have taken Advanced Placement Examinations and who make the scores specified by Wellesley College may receive up to eight units of credit toward the B.A. degree, provided they do not register in college for courses that cover substantially the same material as those for which they have received Advanced Placement credit. One unit of credit will be given for each AP examination to students who have received a grade of 4 or 5 with the following exceptions: one unit of credit will be given for a score of 3 and two units for a score of 4 or 5 in the Mathematics BC examination. For art history and studio art majors a score of 5 is required on the Art History examination for exemption from Art 100. No more than two units will be granted for credit in any one department. AP units may not be used to satisfy distribution requirements. Some departments restrict the use of AP credits toward the major; consult the department or see Directions for Election under the departmental listings. Note: The taking of a course deemed equivalent to one for which AP credit has been granted will nullify the AP credit.

Wellesley College may grant credit for the International Baccalaureate (Higher Level) and other thirteenth-year programs outside the U.S. (e.g., A-levels). For more information, contact the Registrar's Office.

**Summer School and Transfer Course Credit after Matriculation**

Students who wish to take courses during the summer or while on a leave of absence must get their courses approved for credit toward the Wellesley degree. An approval form, available in the Registrar’s Office, must be completed for each course taken outside the Twelve College Exchange Program or outside an approved foreign study program. On this form the Registrar's Office will evaluate the course for the amount of credit, and the department chair for course content. Certain academic departments will not approve outside credit from two-year colleges after a student has matriculated (see departmental Directions for Election). Students should have their courses evaluated and approved prior to...
enrolling, otherwise credit is not guaranteed. (A course must be equivalent to four semester-hours or six quarter-hours in order to earn one full unit of Wellesley credit.) Credit will be granted only for liberal arts courses taken at an accredited institution. Courses must be taken for a letter grade, and credit will be given only for an approved course in which a grade of C or better is earned. Students must request that an official transcript be sent to the Wellesley College Registrar's Office. Transcripts should be received by October 1 for summer and previous year course work and by March 1 for fall semester work.

Approved courses may be used toward the distribution requirement within the limitations outlined on pp. 23–25. Students must earn the equivalent of three full Wellesley units (12 semester-hours or 18 quarter-hours) in each distribution group. First-year students must fulfill the writing requirement by completing Writing 125.

Limitations on the Amount of Outside Credit Used Toward the Degree
Of the 32 units required for the B.A. degree, a student may earn a maximum of 16 units through a combination of the following: AP examinations (no more than eight), courses taken at another institution during the summer (no more than four), courses at another institution not taken during the summer (no more than eight), college and university credit earned prior to graduation from secondary school and not included in the units of secondary school work presented for admission (no more than two). All students, including transfer students and Davis Scholars, must complete 16 units at Wellesley. There are limits on the number of outside credits that can be used to fulfill the distribution requirement. See pp. 23–25.

Exemption from Required Studies
Students may be exempted from any of the studies required for the degree, except Writing 125, provided they can demonstrate to the department concerned a reasonable competence in the elements of the course. Exemption from any of the studies required does not affect the general requirement for completion of 32 units of credit. It does, however, make it possible for some students to select more advanced courses earlier in their college careers.

Such exemption may be achieved in one of two ways: a score of 4 or 5 on the AP tests or passing a special examination. Permission for the exemption examination must be obtained from the chair of the department concerned. In addition to the evidence offered by the examination, some departments may require the student to present a paper or an acceptable laboratory notebook.

Grading System
Wellesley uses the following letter grade system:
Grade A (4.00) is given to students who meet with conspicuous excellence every demand that can fairly be made by the course.
Grade A− (3.67)
Grade B+ (3.33)
Grade B (3.00) is given to those students who add to the minimum of satisfactory attainment excellence in all, but some, of the following: organization, accuracy, originality, understanding, and insight.
Grade B− (2.67)
Grade C+ (2.33)
Grade C (2.00) is given to those students who have attained a satisfactory familiarity with the content of a course and who have demonstrated ability to use this knowledge in a satisfactory manner.
Grade C− (1.67)
Grade D (1.00) is a passing grade. There is no grade of D+ or D−.
Grade F (0.00)

Students also have the option of electing courses on a credit/noncredit basis. By the end of the third week of a semester, students notify the Registrar whether they plan to take a course for a letter grade or on the credit/noncredit basis. Credit (CR) is given to students who have earned a grade of C or better in the work of the course, thereby indicating satisfactory familiarity with the content of the course. If credit is not earned, the course will appear on the permanent record with the notation, (NCR), meaning no credit is earned.

Students may take an unlimited number of courses on a credit/noncredit basis. In order to remain eligible for Academic Distinction at Commencement, however, a student may not exceed certain limits in the number of credit/noncredit courses she takes. Students who begin their degrees as first-year students at Wellesley may take no more than one-quarter of their Wellesley and MIT courses after the first year on a credit/noncredit basis. For students who begin their degrees somewhere other than at Wellesley (that is, for transfer students and Davis Scholars), the number of credit/noncredit courses is prorated in proportion to the number of Wellesley courses taken after the equivalent of the first year of college. Students can consult their Class Deans for further clarification.

Incomplete Work
If work for a course is not completed by the end of a semester, a student may ask her instructor for an incomplete. The instructor may decide not to grant an incomplete but rather to assign a grade, taking into account that not all requirements for the course have been met. If the instructor does agree to give the student an incomplete, the student must submit any missing written work to the Registrar’s Office by a date determined by the instructor but no later than the first day of the succeeding semester. Make-up exams are arranged by the Registrar’s Office, generally during the first week of classes. Once all work has been completed and graded, a final grade preceded by “I” will be recorded on the transcript. If a student does not finish her incomplete work by the deadline, the instructor may either submit a grade or ask the Registrar’s Office to record a grade of permanent “INC.”

Excused Incomplete Work
If illness or personal emergency prevents a student from completing her course work by the end of the semester, she may petition the Academic Review Board through her Class Dean to have an incomplete excused. If her petition is granted, the incomplete notation will be removed from her record once the work is completed and a final grade is submitted.

Examinations
An examination period occurs at the end of each semester. Within this period, students may devise their own examination schedules for the majority of courses. Examinations are scheduled for some art, music, science, and foreign language courses that require audiovisual equipment. Make-up and special examinations are offered at the beginning of each semester for admission to advanced courses without the stated prerequisites and for exemption from required studies.
Transcripts and Grade Reports
Official transcripts may be ordered in writing from the Registrar’s Office. The request for a transcript should include the name and address of the person to whom the transcript is to be sent, the name by which the person was known as a student at Wellesley, and the years of attendance at the College. There is a charge of $3 for each transcript, and this fee should accompany the request. Transcripts may not be issued if the student has an outstanding bill. Current students may view their grades online at the end of each semester. Grade reports are mailed to students at the end of the year.

Registration for Courses
All returning students must register in April for the courses they select for the fall semester and in November for the spring semester. Upon returning to college at the start of each semester, the student will be issued a schedule of her classes. All changes to this schedule must be recorded in the Registrar’s Office by the end of the second week of classes. A student will not receive credit for a course unless she has registered for it, and a student who has registered for a course will remain registered unless she takes formal action to drop it. Each student is responsible for maintaining the accuracy of her registration by informing the Registrar’s Office, in writing, of any changes made to it.

Any conflicts in scheduling must be reported to the Registrar’s Office immediately. A student is not permitted to take a course if it conflicts with any other course on her schedule.

Adding or Dropping Courses
Add/Drop forms are available from the Registrar’s Office during the first two weeks of classes. A student may submit only one Add/Drop form, indicating on it any changes in her schedule. New courses must be added by the end of the second week of classes. A course may be dropped at any time through the last day of classes. If a course is dropped before the beginning of the fifth week of classes, it will not appear on a student’s record. Students are advised to consult their Class Dean when making any changes in their program.

Auditing Courses
A student who wishes to attend a class as a regular visitor must have the permission of the instructor. Auditors may not submit work to the instructor for criticism, and audited courses will not be considered for credit. An audited course does not appear on the transcript.

Acceleration
Some students complete all the requirements for the degree in less than the usual eight semesters. After one semester at Wellesley, students who wish to accelerate should consult their Class Deans and then write a letter to the Academic Review Board, petitioning to fulfill the requirements in less than the normal period of time.

The petition should include the month and year in which the degree requirements will be fulfilled, and all units that will be counted toward the degree.

An accelerating student must maintain at least a C average at all times.

Voluntary Departures from the College (Leave of Absence and Withdrawal)
Recognizing that students may benefit from interrupting the ordinary sequence of four continuous years at Wellesley, the College allows students to take leaves of absence for a variety of reasons that may include study at another institution, work, travel, health or family problems, or other personal needs. Application for a leave of absence may be made to the Class Dean after a student has completed at least one semester at Wellesley. The leave may be for as short a period as one semester or as long as four semesters. A student who goes on a leave of absence cannot remain in residence on campus more than 48 hours after the effective date of the leave. If a student’s leave exceeds four semesters, she will be withdrawn from the College but will be welcome to apply for readmission if she so chooses.

Application for a voluntary leave of absence is due by December 1 for spring semester and by April 15 for fall semester. To obtain permission to attend another institution with the intention of transferring credit back to her Wellesley degree, a student must also submit a detailed plan to her major advisor and her Class Dean. A student on leave may transfer to her Wellesley degree up to eight units of credit taken during an academic year at another institution.

A student who plans to return to the College should take a leave of absence; a student who wishes to leave the College permanently should notify her Class Dean that she is withdrawing. A student who withdraws cannot remain in residence on campus more than 48 hours after the effective date of the withdrawal. If, after withdrawing, a student decides she does after all wish to rematriculate at Wellesley, she must apply for readmission.

Required Departures from the College (Conditional Leaves of Absence, Withdrawal, Suspension, and Expulsion)
The College reserves the right to require a student to leave. She may be suspended if she violates College rules and regulations or the rights of others, or she may be required to take a leave of absence for various reasons: if her continuing presence constitutes a risk to her health, safety or general well-being or to those of the College community; if she is not making adequate progress toward the degree; or if she fails to meet financial obligations to the College. If a student is suspended or required to go on leave, she will not be allowed to return to the College until she has met conditions set by the appropriate College official or board. These conditions will be related to the cause of the suspension or leave. A student on a medical conditional leave, for example, would be required to provide documentation of appropriate medical treatment; a student on an academic conditional leave would be required to meet conditions set by the Academic Review Board; a student on a financial conditional leave would be required to clear her balance. Depending on the kind of leave, there may be a deadline by which the student must be cleared in order to return for the following semester. If the student does not meet the conditions of her leave within four semesters, she will be withdrawn from the College. If she later decides to apply for readmission, she must fulfill the conditions of the original leave.

The College also reserves the right to withdraw or expel a student who has egregiously or repeatedly failed to maintain academic or behavioral standards. A student who has been withdrawn may apply for readmission at some later date, whereas a student who has been expelled will not be considered for readmission.
Readmission
A student who has withdrawn from the College and wishes to return should contact the Office of the Dean of Students for the appropriate forms. Readmission will be considered in light of the reasons for withdrawal. A nonrefundable fee of $30 must accompany the application for readmission.

Special Academic Programs
The traditional four-year curriculum offered at Wellesley is expanded by many special academic programs. Some are administered by the College and some are programs run by other institutions in which Wellesley students may participate. Students may participate in some while in residence at the College; others involve living at other colleges or abroad for a semester or a year.

Wintersession
Wintersession is a time in January when students may choose to remain on campus to pursue internships or independent study, noncredit courses, or courses offered for academic credit. Wellesley offers a number of Wintersession courses for credit, including introductory and intermediate language courses, interdisciplinary courses not offered during the fall and spring terms, and immersion experiences involving travel abroad. Several credit-bearing courses are also available at MIT during Wintersession. Students taking Wintersession courses are subject to academic regulations as if they were taking the course during a regular semester.

Wellesley College Summer School
This program is open to all college students in good academic standing, college graduates, and high school juniors and seniors. It offers a range of courses drawn from the Wellesley College curriculum and taught by Wellesley faculty. College students and college graduates may opt to live in the Summer School residence hall or off campus. High school students may not live in the residence hall. Tuition and other fees for summer school are not included in the regular-year tuition. Wellesley students may apply for limited financial aid from the Summer School Office; no financial aid is available to non-Wellesley students.

Wellesley Summer School courses carry full academic course credit. Beginning with Summer 2000, these courses count as regular units for Wellesley students and are included on the student's transcript and in the calculation of her grade point average. They do not count toward the limit of four Summer School units that Wellesley students can apply to their degrees. For more information, please contact the Summer School Office or consult your Class Dean.

Cross-Registration Program with the Massachusetts Institute of Technology
Wellesley operates a program of cross-registration with Massachusetts Institute of Technology. A Wellesley student interested in enrolling in specific courses at MIT should consult her department advisor. Registration in MIT courses takes place each semester in both the Wellesley Registrar's Office and in the Exchange Office at MIT. Students electing to take courses at MIT must register at both institutions during an extended add/drop period of one week each semester. A student will not receive credit for an MIT course unless she has registered properly for it at both MIT and Wellesley. First-year students in their first semester may not take courses at MIT. The amount of Wellesley credit is determined by the total number of hours listed for a course in the MIT catalog as follows:

Wellesley Double Degree Program
Wellesley offers a Double Degree Program that enables Wellesley students who are accepted to MIT as transfer students to earn a B.A. degree from Wellesley and an S.B. degree from MIT over the course of five years. Students fulfill degree and major requirements at both institutions. Interested Wellesley students apply for transfer admission to MIT during the spring semester of their sophomore year. Students should only consider MIT departments that are not represented at Wellesley and should also be aware that access to a given department could at times be limited for transfer students. Wellesley applicants are subject to the same admissions criteria and financial aid policies used by MIT for all other college transfer applicants.

Accepted students do not enroll at MIT until they have completed their junior year at Wellesley. During this "bridge year" students are assigned major advisors at both institutions so that they can plan a program which will advance their work toward both degrees. During the fourth and fifth years students enroll at MIT. Our existing Wellesley/MIT Exchange permits cross-registration throughout the five-year period; this enables students to integrate their two courses of study more completely.

Cooperative Programs with Babson College, Brandeis University, and Olin College of Engineering
Wellesley has established cooperative programs with Babson College, Brandeis University, and Olin College of Engineering. All courses must be approved individually for transfer credit and for the major by the relevant Wellesley department.

The Twelve College Exchange Program
Wellesley belongs to a consortium that includes Amherst, Bowdoin, Connecticut College, Dartmouth, Mount Holyoke, Smith, Trinity, Vassar, Wesleyan, Wheaton, and Williams. Two one-semester programs associated with the Twelve College Exchange are the National Theater Institute in Waterford, Connecticut, and the Williams Mystic Seaport Program in American Maritime Studies. Students in good standing may apply for a semester or full academic year in residence at any of the member institutions with the following exception. Dartmouth and Williams have announced that they will not be accepting exchange students until further notice. The number of places on all campuses is limited and admission is competitive. Preference is given to students planning to participate in their junior year.

Students must request that transcripts be sent to the Registrar's Office to receive credit for work done away from Wellesley.

The Wellesley-Spelman Exchange Program
Wellesley maintains a student exchange program with Spelman College in Atlanta, Georgia, a distinguished Black liberal arts college for women. The program is open to students in their junior or senior year.

The Wellesley-Mills Exchange Program
Wellesley maintains an exchange program with Mills College, a small women's college in Oakland, California, which has a cross-registration program with the University of California at Berkeley.
Semester in Environmental Science at Woods Hole
Qualified Wellesley students may apply for the Semester in Environmental Science Program held each fall at the Marine Biological Laboratory in Woods Hole, Massachusetts. This 14-week program emphasizes the measurement and understanding of biogeochemical cycles and processes in terrestrial, freshwater, and marine ecosystems. Intended primarily for juniors, participation is limited to approximately two students per year. Interested students should contact the Department of Biological Sciences for additional information.

International Study
Students may apply for admission for their junior year to programs and universities overseas. By studying at respected universities in other countries, students gain new insights into the cultural wealth of other nations and a new perspective on their studies. Limited scholarship money is available to students eligible for financial aid. The selection of recipients for awards is made early in the second semester of the sophomore year on the basis of academic qualifications and faculty recommendations. The amount of each individual award is determined according to need. Information about these awards may be obtained from the International Studies Office.

The International Studies Office helps students make plans for study abroad and the transfer of credit from abroad. Students apply to one of over a hundred approved or College-sponsored programs. Wellesley administers programs in Aix-en-Provence, France and Vienna, Austria. The College is a member of consortia that offer programs in Italy, Japan, and Spain. Wellesley also participates in exchange programs with universities in Argentina, Japan, Korea, and the United Kingdom.

Students interested in spending the junior year abroad should consult their Class Dean and the Director of International Studies, preferably during the first year, to ensure completion of Wellesley eligibility requirements. No more than eight units of credit may be earned at another institution during a one-year leave of absence.

Students must request that transcripts be sent to the Registrar’s Office in order to receive credit for study done abroad.

Summer International Study
Students planning summer study in foreign countries should consult the International Studies Office. While Wellesley supports summer study, there are only a limited number of programs from which transfer credit will be accepted.

Washington Summer Internship Program
The College sponsors a summer public service internship program in Washington, D.C. The internships are for ten weeks and come with paid housing in local university dormitories and with stipends to help cover other living costs. Selection of participants is made each fall and is based on academic background, faculty recommendations, work experience, extracurricular activities, a writing sample, and an interview.

The Washington program offers an opportunity for 16–18 juniors to work in government agencies, political organizations, public interest groups, and research and cultural centers. Recent placements have included the White House Communications Office, the State Department, the Senate Judiciary Committee, the Sierra Club, the National Women’s Health Network, and the National Gallery of Art. In addition to their full-time jobs, interns plan and participate in a weekly seminar program designed to broaden their understanding of government, politics, and public policy. Each intern is also assigned a mentor from the Washington Alumnae Club. For further information, contact the Department of Political Science.

Academic Distinctions
To give recognition for superior or advanced work, either upon graduation or during the student’s career, the College confers a number of academic distinctions.

Honors
Students who have shown marked excellence and an unusual degree of independence in their work may participate in the Honors Program, based on their record in the major field. Current legislation requires a 3.5 average in all work above Grade I in the major field. Students with exceptional qualifications whose averages fall between 3.5 and 3.0 also may be recommended by their departments. Normally students apply to their departments in the spring of their junior year. Under this program, an eligible student may undertake independent research or special study that will be supervised by a member of the faculty. In several departments, options for general examinations, special honors seminars, and opportunities to assist faculty in teaching introductory and intermediate level courses are available to honors candidates. The successful completion of the work and of an oral honors examination leads to the award of honors in the major field.

Other Academic Distinctions
The College names to First-Year Distinction those students who maintain high academic standing during the first year. Wellesley College Scholars and Durant Scholars are named at Commencement, based on academic records after the first year. Students with an average of 3.60 or higher will be Wellesley College Scholars cum laude; those with an average of 3.75 or higher will be Durant Scholars magna cum laude; students with a 3.90 or higher average will be Durant Scholars summa cum laude.

For purposes of establishing honors, grade point averages are truncated to two decimal places. Students whose records contain more than three incompletes within the last 24 units or who have taken more than a stipulated number of credit/non-credit courses (see Grading System) shall not be eligible for these honors.

Juniors and seniors are elected to membership in the Eta of Massachusetts chapter of Phi Beta Kappa on the basis of their total academic achievement in college. Seniors who are majoring in the sciences may be elected to associate membership in the Wellesley chapter of Sigma Xi.

On recommendation of the faculty, the trustees award the title of Trustee Scholar to four seniors who intend to pursue graduate studies. The awards are made on a competitive basis; the title is honorary. In cases of financial need, stipends are awarded to the Scholars or, if not required by them, to alternates who need financial assistance. Applications and supporting credentials should be sent to the Secretary to the Committee on Graduate Fellowships by December 1.

Certain prizes have been established at the College for the recognition of excellence in a particular field. The selection of the recipient is made by the appropriate academic department; each award carries a small stipend or gift and usually bears the name of the donor or the person honored.
Courses of Instruction

A semester course that carries one unit of credit requires approximately eleven hours of work each week spent partly in class and partly in preparation. The amount of time scheduled for classes varies with the subject from two periods each week in many courses in the humanities and social sciences to three, four, or five scheduled periods in certain courses in foreign languages, in art and music, and in the sciences. A semester course which carries 1.25 units of credit ordinarily includes at least 300 minutes per week of scheduled class time as well as significant work outside of class. Classes are scheduled from Monday morning through late Friday afternoon.

Department of Africana Studies

Professor: Martin**, Cudjo; Rollins**;
Steady (Chair)
Assistant Professor: Ong;
Visiting Professor: Whitlow

AFR 105 Introduction to the Black Experience
Martin
NOT OFFERED IN 2003-04. This course serves as the introductory offering in Africana Studies. It explores in an interdisciplinary fashion salient aspects of the Black experience, both ancient and modern, at home and abroad.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O

AFR 150 First- and Second-Year Student Colloquia
NOT OFFERED IN 2003-04. The colloquia are offered under specific topics which vary from year to year. The colloquia have no prerequisites, although some are open only to first-year students. Each course counts as one unit, and may be elected to satisfy in part one of the distribution requirements. Since class sizes are limited, students ordinarily may not enroll in more than one of these courses. They may, however, apply for more than one, indicating their preference. If a course is oversubscribed, the chair or instructor, in consultation with the class dean, will decide which applicants will be accepted.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O

AFR 200 Africans in Antiquity
Martin
NOT OFFERED IN 2003-04. Highlights of the African experience in ancient times; African origins of humankind; Nubia and Egypt; Nile Valley influences on the beginnings of Western civilization; the African presence in Greece and Rome; African influence on Judaism and Christianity; Africans in the Bible; ancient Africans in the Americas.
Prerequisite: None
Distribution: Historical Studies
Semester: N/O

AFR 201 The African American Literary Tradition
Cudjo
NOT OFFERED IN 2003-04. A survey of the Afro-American experience as depicted in literature from the eighteenth century through the present. Study of various forms of literary expression including the short story, autobiography, literary criticism, poetry, drama, and essays as they have been used as vehicles of expression for Black writers during and since the slave experience.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O

AFR 202/PHIL 202 African Philosophy
Merkh (Philosophy)
Initiation into basic African philosophical concepts and principles. The first part of the course deals with a systematic interpretation of such questions as the Bantu African philosophical concept of Muntu and related beliefs, as well as Bantu ontology, metaphysics, and ethics. The second part centers on the relationship between philosophy and ideologies and its implications in Black African social, political, religious, and economic institutions. The approach will be comparative. Students may register for either AFR 202 or PHIL 202. Credit will be given in the department in which the student is registered.
Prerequisite: Open to first-year students who have taken one course in philosophy and to seniors, juniors, and sophomores without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy or Epistemology and Cognition.
Semester: Fall

AFR 203/SOC 203 Introduction to African American Sociology
Rollins
NOT OFFERED IN 2003-04. An introduction to the African American intellectual traditions within the discipline of sociology. Beginning with an examination of the contributions of the founders of these traditions (DuBois, Johnson, Frazier, Cox et al.), the course then focuses on some of the main contemporary discussions: the Black family, Afrocentric sociology, the class versus race debate, and feminist sociology. Throughout the semester, African American sociology will be discussed within the contexts of traditional Eurocentric sociology and the particular political-economic structure in which it exists. Students may register for either AFR 203 or SOC 203. Credit will be given in the department in which the student is registered.
Prerequisite: SOC 102 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O

AFR 206 Introduction to African American History, 1500 to the Present
Martin
An introductory survey of the political, social, economic, and cultural development of African Americans from their African origins to the present.
Prerequisite: None
Distribution: Historical Studies
Semester: Spring

AFR 207 Images of Africana People through the Cinema
Ong
An investigation of the social, political, and cultural aspects of development of Africana people through the viewing and analysis of films from Africa, Afro-America, and the Caribbean. The class covers precolonial, colonial, and postcolonial experiences and responses of Africana people. Films shown will include Sugar Cane Alley, Zan Bako, and Sankofa.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall

AFR 208/SOC 206 Women in the Civil Rights Movement
Rollins
An examination of the role of women in the classical Civil Rights movement. Particular attention will be paid to the interplay between the social factors of the women (e.g., their class, religiosity, race, regional background, age) and their perspectives/behavior within the movement. Essentially, women's impact on the Civil Rights movement and the effects of the movement on the women involved are the foci of this course. Students may register for either AFR 208 or SOC 206. Credit will be given in the department in which the student is registered.
Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: Fall

AFR 209/ARTH 209 West African Architecture
Finley (Art)
West Africa has given birth to many key architectural forms, from the round house to the mosque to the slave castle. This seminar examines the history, meaning and use of these and other classic examples of West African architecture and charts their transformation and reappearance in African diasporic communities in the Americas. We will study how religion, gender and culture affect the use of space and the shape of the built environment in West Africa from the classical period to the present. Students may register for either AFR 209 or ARTH 209. Credit will be given in the department in which the student is registered.
Prerequisite: None. ARTH 100/101 and AFR 105 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring

AFR 210/MUS 210 Folk and Ritual Music of the Caribbean
Fleurant (Music)
NOT OFFERED IN 2003-04. An appreciative evaluation, discussion, and analysis of the folk and ritual music of the Caribbean. The course will survey the musical components of a variety of Afro-Caribbean religions, including Kunita, Rastafari, Shango, Candomble, Macumba, Umbanda, Wini, Vodun, Santeria, Lucumi, and Quimboiseur. Through recordings and documentary sources, students will explore a variety of musical and cultural aesthetics. Issues surrounding the phenomenon of African retentions in the Americas will also be examined. Students may register for either MUS 210 or AFR 210. Credit will be given in the department in which the student is registered.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video or Religion, Ethics, and Moral Philosophy
Semester: N/O

AFR 211 Introduction to African Literature
NOT OFFERED IN 2003-04. The development of African literature in English and in translation. Although special attention will be paid to the novels of Chinua Achebe, writers such as Ngugi Wa Thiongo, Camara Laye, Wole Soyinka, Mirama Ba, Nawal El Saadawi, and Buchi Emecheta will also be considered. The influence of oral tradition on these writers styles as well as the thematic links between them and writers of the Black awakening in America and the West Indies will be discussed.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
AFR 212 Black Women Writers

Cudjo

NOT OFFERED IN 2003-04. The Black woman writer's efforts to shape images of herself as Black, as woman, and as artist. The problem of literary authority for the Black woman writer, criteria for a Black woman's literary tradition, and the relation of Black feminism or "womanism" to the articulation of a distinctively Black and female literary aesthetic.

Prerequisite: None
Distribution: Language and Literature Semester: N/O Unit: 1.0

AFR 213 Race Relations and Racial Inequality

NOT OFFERED IN 2003-04. This course is designed to examine the historical relationship between race and the American legal system. Through an examination of the legal response to racism in American society, students will gain an appreciation of the evolving law of race relations.

Prerequisite: None
Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

AFR 214 Internationalization of Black Power

Martin

This course will revisit the Civil Rights and Black Power eras of the 1950s through the 1970s, with the emphasis on the more militant Black Power phase of the struggle. We will rely mostly on the writings of the actual leaders of these struggles. Personalities/topics include Malcolm X, Elijah Muhammad, Martin Luther King, Jr., Assata Shakur, the Black Liberation Army, Black Panther Party, the Republic of New Africa, Kwame Toure (Stokely Carmichael), Black Arts Movement, Cointelpro, Kwanzaa, and the rise of Black Studies.

Prerequisite: None
Distribution: Historical Studies Semester: Spring Unit: 1.0

AFR 222 Images of Women and Blacks in American Cinema

Olleng

A study of the creation of images and their power to influence the reality of race and sex in the American experience. Viewing and analysis of American cinema as an artistic genre and as vehicle through which cultural and social history are depicted.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video Semester: Spring Unit: 1.0

AFR 223 Caribbean and African Development Issues

Prerequisite: None
Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

AFR 224/MUS 209 A History of Jazz

Panetta (Music)

This course offers a listener's introduction to jazz, one of the greatest expressions of American artistic genius. Early jazz drew from several vibrant streams of indigenous musical art (including ragtime and blues), and subsequent stylistic phases have corresponded closely to significant developments in social history; knowledge of jazz is thus highly relevant to an understanding of American culture since 1900. Through a selection of recordings and readings, we will follow the progression of jazz styles from African roots to recent developments. A fundamental goal of the course is that students learn to listen to music critically; to discern and interpret form, texture, style, and expressive content in jazz of all periods. Students may register for either MUS 209 or AFR 224. Credit will be given in the department in which the student is registered.

Prerequisite: None. Not open to students who have taken AFR 233/MUS 233. Distribution: Arts, Music, Theatre, Film, Video or Historical Studies Semester: Fall Unit: 1.0

AFR 225 Introduction to Black Psychology

Whitlow

Issues and perspectives in the study of the psychological development of Black people in America, past and present. Special consideration to such issues as the Afrocentric and Eurocentric ethos, the nature of Black personality as affected by slavery and racism, psychological assessment, treatment and counseling techniques, and the relationships between psychological research and social policy in American research.

Prerequisite: None
Distribution: Social and Behavioral Analysis Semester: Spring Unit: 1.0

AFR 226 Environmental Justice, Race, and Sustainable Development

Steady

NOT OFFERED IN 2003-04. An investigation of the extent to which the causes and consequences of environmental degradation are influenced by social inequality and the devaluation of indigenous peoples. The course will examine how the poor, indigenous peoples and people of color are subjected to environmental hazards. Topics to be discussed include the link between negative environmental trends and social inequality; the social ecology of slums; ghettos and shanty towns; the disproportionate exposure of some groups to pollutants, toxic chemicals, and carcinogens; dumping of hazardous waste in Africa and other Third World countries; and industrial threats to the ecology of small island states in the Caribbean. The course will evaluate Agenda 21, the international program of action from the Earth Summit designed to halt environmental degradation and promote sustainable development.

Prerequisite: None
Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

AFR 229 Rap Music and the African American Poetical Tradition

Cudjo

This course examines the African American poetical tradition from its roots in African oral literature to its contemporaneous manifestation in rapping, a showcase for African American braggadocio, and the art of verbal dexterity and storytelling. The connection of this literary tradition with African cultural values will also be explored. The course will examine the works of Phyliss Wheatley, Langston Hughes, James Weldon Johnson, Melvin Tolson, Gwendolyn Brooks, Robert Hayden, Derek Walcott, Gill Scott-Heron, the Last Poets, Nikki Giovanni, Public Enemy, Run-D.M.C., Tupac, and other artists.

AFR 232/332/MUS 225/325 Topics in Ethnomusicology: Africa and the Caribbean

NOT OFFERED IN 2003-04. This course will focus on the traditional, folk, and popular musics of Africa and the Caribbean. Emphasis will be placed on issues of Africanism and marginal retention in the musics of Brazil, Cuba, and Haiti. The musical repertoires of Candomble, Santeria, and Vodun, as well as the sanba, rumba, and merengue, will be discussed in terms of their respective influences on the modern musics of Africa. The musical "round trip" between Africa and the Caribbean, whereby genres like the rumba spawned new forms including the juju of Nigeria, the souse of Zaire, and the highlife of Ghana, will be closely examined. Students may register for either MUS 225/325 or AFR 232/332. Credit will be given in the department in which the student is registered.

Prerequisite: MUS 100, 111, 122 or permission of instructor. In addition, for MUS 325 or AFR 332, MUS 200 or 201 is required. Distribution: Arts, Music, Theatre, Film, Video or Religion, Ethics, and Moral Philosophy Semester: N/O Unit: 1.0

AFR 233/MUS 233 Three Jazz Masters

Purifoy (Music)

Edward Kennedy "Duke" Ellington (1899-1974), Miles Davis (1926-1991), and John Coltrane (1926-1967) were among the most significant figures in twentieth-century American music. All three were masterful composers, improvisers, and ensemble leaders, and their highly influential accomplishments greatly expanded the scope of African-American creativity. Through readings, historical film excerpts, and intensive listening, we will survey the careers of these artists and assess their recorded works, which combine musical innovation, social relevance, profound feeling, and substantial intellectual content. This course assumes no musical background. Students may register for either AFR 233 or MUS 233. Credit will be given in the department in which the student is registered.

Prerequisite: None. Not open to students who have taken AFR 224/MUS 209. Distribution: Arts, Music, Theatre, Film, Video or Historical Studies Semester: Spring Unit: 1.0
AFR 234 Introduction to West Indian Literature
Codjoe
NOT OFFERED IN 2003-04. Survey of contemporary prose and poetry from the English-speaking West Indies. Special attention paid to the development of this literary tradition in a historical-cultural context and in light of the perspectives recent literary theories offer. Authors to include: V. S. Naipul, Derek Walcott, Wilson Harris, Jean Rhys, and others.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O Unit: 1.0

AFR 235 Societies and Cultures of Africa
Steady
The objective of this course is to provide students with an introduction to the richness, diversity, and complexity of African societies and cultures while appreciating their unifying features. Topics to be discussed include forms of social organization, the importance to kinship and marriage systems, the centrality of religion, the position of women, urbanization and problems of development, democratization and political transformation, political instability, and armed conflicts. In order to understand a people's view of themselves and their relationship to the outside world, an in-depth case study will be made of one ethnic group - the Yoruba of southwestern Nigeria.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

AFR 242 New World Afro-Atlantic Religions
Ongb
With readings, documentary films, discussions, and lectures, this course will examine the complex spiritual beliefs and expressions of peoples of African descent in Brazil, Cuba, Haiti, Jamaica, and North America. The course surveys African diasporic religions such as Candomble, Santeria, Voodoo, Shango, and African American religions. Attention will be paid to how diasporic Africans practice religion for self-definition, community-building, socio-cultural critique, and for reshaping the religious and cultural landscapes of the Americas.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring Unit: 1.0

AFR 251 Religion in Africa: An Introduction
Ongb
NOT OFFERED IN 2003-04. An examination of African experience and expression of religion. The course surveys African religions among the Akan of Ghana, Yoruba of Nigeria, Nuer of the Sudan, the Zulu of South Africa, and the Bemazava-Sakalava of Madagascar. The course will focus on how gender, age, status, and cultural competence influence Africans' use of architecture, ritual, myth, dance, and music to communicate, elaborate on the cosmos, and organize their lives. Special attention will be paid to the resilience of African deities and indigenous cultural media during the encounter between African religions, Christianity, and Islam.

AFR 297 Medical Anthropology: A Comparative Study of Healing Systems
Steady
This course examines alternative healing systems that attempt to treat the whole person as a physical, social, and spiritual being and also to promote community participation and healing. It offers new perspectives on the biomedical model as it examines the socio-cultural context of the causation, diagnosis, prevention, and cure of disease. Examples of healing systems will be from Third World countries, particularly in Africa, the Caribbean, and Latin America, and from industrialized societies, particularly from African American and indigenous communities in the United States. Examination will be made of healing systems which include divination, herbal medicine, folk medicine, and faith healing.
Prerequisite: None
Distribution: Social and Behavioral Analysis

**AFR 322/ARTH 322 Seminar. Memory and Identity in Contemporary Visual Art of the African Diaspora**

Finley (Art)

Since the 1950s, projects of Black liberation and empowerment have influenced the work of artists of African descent in the Black Atlantic. Pivotal historic events, such as the Civil Rights movement, the dismantling of colonial rule in Africa and the Brixton race riots in England, have urged Black artists to reexamine issues of memory, identity, history and belonging. This course considers those artists who trace a visual genealogy of the African diaspora and work in what has been identified as a tradition of remembrance. We will focus on artists working after 1960, but also will study the roots of this tradition in the beginning of the twentieth century and in earlier periods. Trips to the Studio Museum in Harlem and other museums.

Students may register for either AFR 322 or ARTH 322. Credit will be given in the department in which the student is registered.

Prerequisite: Permission of instructor required. File application in department before pre-registration. ARTH 101 recommended.

**AFR 341 Topics in Africana Social Science**

Obeng

Topic for 2003-04: Neglected Africans of the Diaspora. The seminar explores the nature and composition of the African Diaspora and its changing meanings. Focusing on Africans in India and Pakistan, Oman, Britain, Belize, Martinique, Ecuador, and Costa Rica, we will examine the socio-cultural connections among diasporic Africans such as the forced migrations of enslaved Africans and voluntary emigration of free skilled Africans out of continental Africa. The seminar also explores the geo-political, religious, and cultural factors that foster distinctive diasporic African identities and how these people constitute and contribute to global citizenry. Attention will be paid to the permeable boundaries of global politics, religion, economics, culture, and citizenship.

**AFR 344 Advanced Africana Seminar**

NOT OFFERED IN 2003-04. This course examines through interdisciplinary approaches key texts that shape our understanding of Africana Studies. The major theories, ideas, issues, and significant writings that shape Africana Studies will be examined. Consideration will be given to approaches to Africana Studies, concepts of Afrocentrism, and how each text that is selected allows us to understand the discipline in a more critical manner. This seminar will be placed within the political, cultural, racial and religiously plural landscapes of African people. Authors to be studied are Eric Williams, C.L.R. James, Walter Rodney, Cheikh Anta Diop, Ralph Ellison, Frantz Fanon, John Mbiti, V.Y. Mudimbe, and Marcus Garvey.

**Directions for Election**

For students entering Wellesley in fall 2000 and later: A major in Africana Studies requires nine units. An Africana Studies major will choose one of four possible tracks: Africa, the Caribbean, the United States, or a general Africana Studies track. All of the four tracks of study encompass the interdisciplinary approach of the department, while allowing students to focus on a particular area and gain expertise in one discipline. The first three courses of study focus on geographic areas: the fourth, designed in consultation with the student’s advisor, allows the student to create a concentration on a particular salient aspect (e.g., Africana women or Africana arts) or issue (e.g., comparative race relations) in the Africana world.

It is strongly recommended that majors and minors take 105 before undertaking specialized courses of study. This course provides an overview of the discipline of Africana Studies, including its philosophical and historical foundations, and introduces students to its major fields of inquiry. Of the nine units required for an Africana Studies major, at least two must be at the 300 level and, ordinarily, not more than two may be taken outside the department.
Africa: This program of study is designed to provide students with an interdisciplinary and integrated understanding of the peoples of the African continent, from its ancient foundation through its current geopolitical situation. However, to insure students' breadth of knowledge of the African world, two courses which focus on a geographic area other than Africa are required. Six courses which focus on Africa are the cornerstone of this track: one course must be in History; one must be a social science (Economics, Political Science, Sociology, Anthropology, or Psychology); one must be chosen from the humanities (Literature, Art, Music, Philosophy, and Religion); and two should be chosen from a specific discipline. The following courses are appropriate for the Africa track:

History: AFR 105, 200, 319, 340
Social Science: AFR [204], [205], [213], [223], [245], 297, [306], 341, [POL 209]
Humanities: AFR 202, 207, 211, 222, [231], 232, 251, ARTH 241, FREN 218, 330

The Caribbean: This program of study also provides students with an interdisciplinary knowledge of a particular geographic area: the Caribbean—its history, peoples, culture, and significance in the world system. As with the other tracks, students focusing on the Caribbean are expected also to acquire some breadth of knowledge about the Africana world; thus, two courses focused on other areas are required. Of the five courses on the Caribbean, one must be a humanities course: one must be a social science; one must be a history course; and two must be chosen from one discipline. (See the African track for the specific disciplines considered "humanities" and "social sciences.") The following courses are appropriate for the Caribbean track:

History: AFR [216], 319, 340
Social Sciences: AFR [245], 275, 300, [306], 341
Humanities: AFR 207, 210, 232, 234, 310, [335], SPAN 269, FREN 218, 330

The United States: As in the previous tracks, students who choose the United States should approach their study of African America through many disciplines. The track requires five courses focusing on the United States: one in History, one in humanities, one in social science, and two in the discipline in which the student chooses to concentrate. (See the Africa track for the specific disciplines considered "humanities" and "social sciences.") To insure students' breadth of knowledge of the Africana world, however, this track also requires two courses focused on one or more geographic areas other than the United States. The following courses are appropriate for the United States track:

History: AFR 105, 206, 214, 319, 340
Social Sciences: AFR 203, 208, 214, [215], [217], [219], [220], [221], 225, [230], 305, [306], [315], POL 1 337S
Humanities: AFR 150, 201, 212, 222, 233, 262, 310, MUS 300

General Africana Studies: This track allows students to design a more eclectic concentration in Africana Studies or a concentration which cuts across geographic and discipline boundaries (e.g., Africana Women's Studies) or a discipline-focused concentration that is cross-cultural (e.g., Africana Arts). Students must have their programs of study approved by their advisors. This program should demonstrate the same geographic and disciplinary breadth as the previous three (i.e., at least two geographic regions must be represented in the courses chosen; and at least one history course, one humanities, and one social science are required). Of the seven courses to be elected, at least three must be in one discipline.

For all tracks, students are encouraged to spend a period of time in geographically and academically appropriate situations. Students in the Caribbean track are encouraged to consider the Wintersession courses in Cuba and Jamaica. And those in the Africa or the Caribbean track, are strongly encouraged to consider Study Abroad programs in these geographic areas. Those focusing on the United States should consider spending a semester or year at an historically Black college. Credit toward the major may be given for such experiences when appropriate.

A minor in Africana Studies will consist of five courses, including 105 recommended and one 300-level. (Students may be exempted from specific requirements by the department.) Minors are strongly encouraged to take courses on at least two geographic areas (e.g., the United States and the Caribbean) and in two or more disciplines. Minors are also encouraged to attend departmentally-sponsored extracurricular lectures, especially those (required of majors) that focus on methodology.

American Studies

AN INTERDEPARTMENTAL MAJOR

Director: Cain (English)

American Studies Advisory Committee: Bedell (Art), Kohler (Sociology), Kodera (Religion), Rosenwald (English), Stetsner (Political Science), Varon (History)

The American Studies major seeks to understand the American experience through a multi-disciplinary program of study. The requirements for the major are as follows. Nine units of course work are required for the major, at least six of which should be taken at Wellesley College. These courses include American Studies 101, which should be completed before the end of the junior year; at least two courses in historical studies (HS); one course in literature (LL); one course in the arts (ARS); and one course from any one of the following three areas: social and behavioral analysis (SBA); or epistemology and cognition (EC), or religion, ethics, and moral philosophy (REP). Students are also expected to take at least two Grade III-level courses, one of which should be American Studies 317 or 318, taken in the junior or senior year. To ensure some concentration in a field of American society and culture, at least three courses should be elected in one department. In consultation with the director, a student also may choose to focus her concentration in an area or field, such as law, women, or Asian America, assembling her group of three or more courses in this topic from two or more departments. American Studies majors with an Asian American concentration are encouraged to take courses that specifically address Asian American issues, such as AMST 151, ENG 269, HIST 267, WOST 248, WOST 249. Within this structure, students are encouraged to explore the diversity of American culture, and the many ways to interpret it. Most courses at the College that are primarily American in content may be applied to the American Studies major. American Studies majors are encouraged to take as part of, or in addition to, their major courses, surveys of American history, literature, and art (for example, HIST 203/204, ENG 262/266, ARTH 231/232) and a course on the American Constitution and political thought (for example, POL 4 340). In addition, students are urged to take one or more courses outside the major that explore the theory and methods of knowledge creation and production (for example, PHIL 314 or 345, SOC 301, or QR 194). Students eligible for honors work and considering doing a thesis during their senior year should plan to identify a thesis advisor, specify their project, and, if possible, begin work before the end of their junior year. Courses of study, and the possibility of honors work, should be discussed with the American Studies director.

AMST 101 Introduction to American Studies

Varon (History)

An interdisciplinary examination of some of the varieties of American experience, aimed at developing a functional vocabulary for further work in American Studies or related fields. After a brief, intense review of American history, the
course will direct its focus towards four important moments in that history: 1776, 1848, 1920, and 2000, investigating each of these moments in relation to selected cultural, historical, artistic, and political events, figures, institutions, and texts.

Prerequisite: This course is required of American Studies majors and should be completed before the end of the junior year.

Distribution: None
Semester: Fall

AMST 151 The Asian American Experience
Iwanaga (Writing Program), Kadera (Religion)
An interdisciplinary introduction to the study of Asian Americans, the fastest-growing ethnic group in North America. Critical examination of different stages of their experience from the "coolie labor" and "yellow peril" to the "model minority" and struggles for identity; roots of Asian stereotypes; myth and reality of Asian women; prejudice against, among, and by Asians; and Asian contribution to a more pluralistic, tolerant, and just American society. Readings, films, lectures, and discussions.

Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall

AMST 317 Seminar Advanced Topics in American Studies
Cushman (Sociology)
Examination of American patriotism in relation to expressions of patriotism in other societies and cultures. Analysis of theories of patriotism, classic and contemporary writings, and against patriotism, the tension between patriotism and cosmopolitanism, representations of patriotism in popular culture, and the contemporary reemergence of patriotism in the United States. The class will design and carry out a social research project on contemporary expressions of American patriotism.

Prerequisite: Enrollment is limited and preference is given to American Studies majors.
Distribution: Social and Behavioral Analysis or Historical Studies
Semester: Fall

Rosencwaid (English)
A theoretical and practical study of an important, diverse, and living American tradition. Some central questions: What is nonviolence? What roles has it played in American history? What has its relation been to law and to wealth and poverty? In what sorts of life, action, institution, legislation, and text has it been manifested? How has it been viewed and depicted? How is it actually done? Discussion of such nonviolent activists and thinkers as John Woolman, Henry David Thoreau, Jane Addams, William James, Dorothy Day, Martin Luther King, and Barbara Deming, and of depictions of nonviolence by such artists as Nathaniel Hawthorne, Harriet Beecher Stowe, Norman Mailer, and the filmmaker Robbie Leppzer; conversation with activists and scholars from inside and outside the nonviolent community; a training in nonviolent action. Course work will include both scholarly projects and at least one experiential one.

Prerequisite: Enrollment is limited and preference is given to American Studies majors.
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: Fall

AMST 318 Seminar Advanced Topics in American Studies
Kadera (Religion)
Topic for 2003-04: Interning the "Enemy Race": Japanese Americans in World War II. A close examination of the rationale and the aftermath of internment after Japan's attack of Pearl Harbor of American citizens of Japanese ancestry, together with Japanese nationals, living in the West Coast of the United States. The topics to be considered include: Japan's rise as a colonial power, starting in the late 19th century; the place of Asian migrant workers and the "Yellow Peril"; life in the camps; the formation of the Japanese American Citizens League; how the United States has since responded to its "enemies"; changing immigration laws; race and politics in America.

Prerequisite: Enrollment is limited and preference is given to American Studies majors.
Distribution: Social and Behavioral Analysis or Historical Studies
Semester: Spring

Brogan (English)
Topic for 2004-05: Gotham: New York City in Literature and Art. This course examines that icon of modernity, New York City, as it appears in literature, photography, and film. We'll cross neighborhoods and centuries to consider how Americans have variously envisioned this cultural and financial capital. Moving from the grim nineteenth-century streets of Five Points to the canyons of Wall Street, from Roth's Lower East Side tenements to Wharton's grand Fifth Avenue residences, from the photographs of Berenice Abbott and Lewis Hine to the films of Spike Lee and Martin Scorsese, we'll think in inter-disciplinary ways about how the richly varied interpretations of New York contribute to a national discussion about urban ideals, modernism, immigration, and money.

Prerequisite: Enrollment is limited and preference is given to American Studies majors.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: Spring

AMST 350 Research or Individual Study

ANTH 104 Introduction to Cultural and Social Anthropology
Karakasidou, Merry, Staff
A comparative approach to the concept of culture and an analysis of how culture structures the worlds we live in. The course examines human societies from their tribal beginnings to the post-industrial age. We will consider the development of various types of social organizations and their significance based on family and kinship, economics, politics, and religion.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

ANTH 202/SOC 202 Introduction to Human Rights
Merry, Cushman (Sociology)
Human rights is one of the most powerful approaches to social justice in the contemporary world, yet it is a rapidly developing and changing system. This course offers a critical analysis of human rights as a social, cultural, and legal system. It explores the historical and philosophical origins of the contemporary human rights system and its growth and development as a global social movement over the last few decades. This includes the diversification of rights to include social, economic and cultural rights and the collective rights of indigenous peoples. The course examines the ongoing controversy between human rights’ claims to universality in contrast to assertions of cultural difference. Special topics include the rise of nongovernmental human rights organizations, humanitarianism as an ideology, debates on military humanitarian interventions, the emergence of violence against women as a human rights issue, and the forms and types of justice in societies that have experienced large-scale violence.
Students may register for either ANTH 202 or SOC 202. Credit will be given to the department in which the student is registered.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ANTH 204 Physical Anthropology
Kohl
The origin of humans as a sequence of events in the evolution of the primates. This theme is approached broadly from the perspectives of anatomy, paleontology, genetics, primatology, and ecology. Explanation of the interrelationship between biological and socio-behavioral aspects of human evolution, such as the changing social role of sex. Review of the human fossil record and the different biological adaptations of the polytypic species Homo sapiens.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ANTH 206 Archaeology
Kohl
A survey of the development of archaeology. The methods and techniques of archaeology are presented through an analysis of excavations and prehistoric remains. Materials studied range from early hominid sites in Africa to the Bronze Age civilizations of the Old World and the Aztec and Inca Empires of the New World. Students are introduced to techniques for reconstructing the past from material remains. The course includes a field trip to a neighboring archaeological site.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ANTH 208 Archaeological Science
Lechtman (at MIT)
An introduction to scientific techniques used in contemporary archaeology. Using a case study format, faculty from the Boston-wide Center for Materials Research Archaeology and Ethnology (CMRAE) present different methods for studying such topics as reconstruction of ancient environments; dating techniques; assessing the diets of ancient populations; and sourcing artifacts through chemical and physical analyses.
Prerequisite: One year college-level physics or chemistry (or equivalent, see instructor).
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

ANTH 210 Racism and Ethnic Conflict
Staff
This course will explore Asian American identities and communities as pivotal sites to understand the dynamics of race/ethnicity, gender, and class in the United States. We will explore the transnational and heterogeneous histories, identities, and representations among multiple communities of Asian Americans, as well as in relation to those of African Americans and white Americans. To investigate the construction and roles of Asian Americans as “in-between” black and white, we will pay particular attention to key events/representations such as the Los Angeles Rodney King uprisings, the model minority myth, etc. This course is interdisciplinary, as it draws from critical race theories, anthropology, ethnography, literature, and history.
Prerequisite: 104, or one unit in Sociology, Africana Studies, Political Science, or Economics, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ANTH 211 Winter Session Program in the Republic of Georgia
Kohl
Students travel to Tbilisi, Georgia for the winter term. They will attend lectures in English at Tbilisi State University on Georgian history, language and culture and on contemporary political developments there and visit sites of historical interest in and around Tbilisi. They will live with Georgian families and spend three weeks completing a self-designed internship with a local organization. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: One course in ANTH or RAST. Application required.
Distribution: Social and Behavioral Analysis or Historical Studies
Semester: Winter session
Unit: 0.5
ANTH 215 The Triumph of Culture: Perceptions of Nature and Human Interaction on the Environment
Karikasidou
NOT OFFERED IN 2003-04. This course examines how discourses on the environment in various political systems have influenced humanity’s relationship with the natural world. While reviewing the perspectives offered by cultural ecology, human ecology, political ecology, and historical ecology, as well as cultural materialism and cultural evolutionary theory, it considers how nature and the environment have been perceived in different cultures across time. Scrutinizing perceptions of the environment as a source of danger and disease, the course explores the cultural conquest of nature and the introduction of synthetic chemicals in industrial cultures, both capitalist and socialist. It concludes with a critical comparison of preservation and preservation discourses in contemporary environmentalist and eco-politics thought and action around the world.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 220 Race/Ethnicity in the U.S.: Asian American Identities and Communities in Comparative Perspective
NOT OFFERED IN 2003-04. This course will explore Asian American identities and communities as pivotal sites to understand the dynamics of race/ethnicity, gender, and class in the United States. We will explore the transnational and heterogeneous histories, identities, and representations among multiple communities of Asian Americans, as well as in relation to those of African Americans and white Americans. To investigate the construction and roles of Asian Americans as “in-between” black and white, we will pay particular attention to key events/representations such as the Los Angeles Rodney King uprisings, the model minority myth, etc. This course is interdisciplinary, as it draws from critical race theories, anthropology, ethnography, literature, and history.
Prerequisites: 104 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 221 Societies and Cultures of Asia
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. This course explores Asian societies in historical perspectives. It introduces students to a variety of important issues: the imaginative geographies of the landscape; the impact of the world economic system and colonialism; the social and political formations of cultural groups and their transformation into ethnic and national communities; the role of gender and religion; the impact of development policies; the importance of religion; and the overwhelming influence of media. The course will also consider diverse influences from the west and the locally-specific responses to these changes.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O, Offered in 2004-05.
Unit: 1.0

ANTH 238 The Vulnerable Body: Anthropological Understandings
Karikasidou
NOT OFFERED IN 2003-04. This course begins with the assumption that the human body is a unit upon which collective categories are engraved. These categories can vary from social values, to religious beliefs, to feelings of national belonging, to standards of sexuality and beauty. Readings in this course will concentrate around the classic and recent attempts in the social and historical sciences to develop ways of understanding this phenomenon of “embodiment.” We will begin with an overview of what is considered to be the “construction” of the human body in various societies and investigate how the body has been observed, experienced, classified, modified, and sacralized in different social formations.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 242 "Civilization" and "Barbarism" during the Bronze Age, 3500-2000 B.C.E.
Kohl
NOT OFFERED IN 2003-04. A review of the earliest emergence of state-stratified societies in the Old World (Pharaonic Egypt, Mesopotamia, the Indus Valley, and Shang China) and their integration through trade, conflict, migrations, and diffusions of technologies, particularly metalworking, with neighboring illiterate societies on their peripheries. The course concludes with a comparison with core-periphery relations in pre-Columbian Mesoamerica and Peru.
Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 244 Societies and Cultures of the Middle East
Kohl
An anthropological overview of the contemporary Middle East with a focus on Islam and neo-traditionalist movements; families, values, and traditional social institutions, and the emergence of national identities. Contemporary ethnic and international conflicts from an anthropological perspective.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ANTH 247 Societies and Cultures of Eurasia
Kohl
A survey of the non-Russian, largely non-European peoples of the former Soviet Union (particularly ethnic groups in Transcaucasia, Central Asia, and Siberia). The course will review how traditional cultures in these areas changed during the years of Soviet rule and will examine the problems they face today with newly gained independence or greatly increased autonomy. Nationality policies of the former Soviet Union will be discussed with a particular emphasis on how they affect the current territorial disputes and conflicts among different ethnic groups (e.g., the undeclared war between Armenia and Azerbaijan over the enclave of Nagorno-Karabagh).
Prerequisite: 104, or one unit in Political Science, Economics, Sociology, or History.
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ANTH 250 Research or Individual Study
Prerequisite: 104
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ANTH 250H Research or Individual Study
Prerequisite: 104
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ANTH 251 Cultures of Cancer
Karikasidou
This course critically examines cancer as a pervasive disease and a metaphor of global modern cultures. Students will be exposed to the ways cancer is perceived as a somatic and social standard in locally constructed cognitive frameworks. They will investigate the scientific and emotional responses to the disease and the ways cancer challenges our faith and spirituality, our ways of life, notions of pollution and cleanliness and our healing strategies. This approach to cancer is comparative and interdisciplinary and focuses on how specialists in different societies have described the disease, how its victims in different cultures have narrated their experiences, how causality has been perceived, and what interventions (sacred or secular) have been undertaken as therapy and prevention.
Prerequisites: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ANTH 260 Gender, Culture, and Human Rights
Merry
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. This course examines the development of women’s human rights as a facet of the growing international human rights movement and the opposition to this movement in the name of culture. It focuses on specific women’s human rights issues such as violence against women, trafficking in persons, female genital cutting, honor killings and rape in wartime. The course will consider the theories of culture and rights embodied in these debates and examine ways of retheorizing culture.
Prerequisite: ANTH 202/SOC 202 or one unit in ANTH or SOC or HIST
Distribution: Social and Behavioral Analysis
Semester: N/O, Offered in 2004-05
Unit: 1.0

ANTH 269 Anthropology of Gender, Marriage, and the Family
Merry
NOT OFFERED IN 2003-04. An examination of the variations in gender and family life globally. Comparisons of patterns of behavior and belief systems surrounding marriage, sexuality, household, male and female power, and masculine and feminine temperament. Emphasis on the ways kinship and family life organize society and the ways gender is constructed in conjunction with other identities such as race, class, and nationality. Discussion of the cultural context of male violence against women and women’s rights as human rights.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0
ANTH 300 Ethnographic Methods and Ethnographic Writing
Meigs
Exams a variety of anthropological research methods and genres of representation paying particular attention to questions of knowledge, location, evidence, ethics, power, translation, experience, and the way theoretical problems can be framed in terms of ethnographic research. Students will be asked to apply critical knowledge in a fieldwork project of their own design.
Prerequisite: Two 200-level units in any of the following: ANTH, SOC, POL, ECON, or permission of instructor. Distribution: Social and Behavioral Analysis. Semester: Spring Unit: 1.0

ANTH 301 History and Theory in Anthropology
Karakiisidoi
This course introduces students to contemporary anthropology by tracing its historical development and its specific application in ethnographic writing. It examines the social context in which each selected model or "paradigm" took hold and the extent of cognitive sharing, by either intellectual borrowing or breakthrough. The development of contemporary theory will be examined both as internal to the discipline and as a response to changing intellectual climates and social milieu. The course will focus on each theory in action, as the theoretical principles and methods apply to ethnographic case studies.
Prerequisite: Two 200-level units in any of the following: ANTH, SOC, POL, ECON, or permission of instructor. Distribution: Social and Behavioral Analysis. Semester: Fall Unit: 1.0

Directions for Election
A major in Anthropology consists of a minimum of eight units (which may include courses from MIT's Anthropology offerings), of which 104, 300 and 301 are required. We recommend QR 199 Introduction to Social Science Data Analysis. Students may also elect other relevant statistics or calculus courses, depending on the particular need and interest of the student. Majors are encouraged to take other courses that have a cultural or multicultural focus, such as Cultural Psychology (PSYC 245).

A minor in Anthropology consists of five units: 104, two 200-level courses, and two 300-level courses. Students minoring in anthropology are encouraged to choose at least one ethnographic area course and at least one course which focuses on a particular theoretical problem.

Human Rights Concentration in Anthropology and Sociology
The Departments of Anthropology and Sociology offer a Concentration in Human Rights in conjunction with a major in either department. Students electing this concentration will major in either Anthropology or Sociology and choose a major advisor within the respective departments. Students will take three specific courses in the concentration that will be counted toward the major in either department.

ANTH 202/SOC 202 Introduction to Human Rights
ANTH 260 Gender, Culture, and Human Rights
SOC 259 The Sociology of International Justice

Students interested in the Human Rights Concentration should contact Sally Merry, Department of Anthropology or Thomas Cushman, Department of Sociology. A student electing this concentration is encouraged, in consultation with her advisor, to take other courses in the college curriculum dealing with human rights, to engage in independent research (ANTH or SOC 350, 360 and 370) and to participate in internship experiences in human rights organizations in the United States and abroad.

ANTH 340 Gendered Violations
Merriam (Center for Research on Women)
This course joins an anthropological perspective on the construction of gender with an analysis of the forms of intervention which have developed to confront and change gendered violations of women. The course will focus on domestic violence, sexual assault, and sexual harassment and their relationship to the cultural construction of masculinity and femininity in various cultural contexts. The course is experimental in combining social science research and analysis with questions about policy making and intervention into this problem, focusing particularly on the use of law and education.
Prerequisite: Two 200-level units in any of the following: ANTH, SOC, POL, ECON, or permission of instructor. Distribution: Social and Behavioral Analysis. Semester: Spring Unit: 1.0

ANTH 342 Seminar: Native American Ethnology
Thompson
Selected topics concerning Native Americans today. Ethnographic review of North American cultures. Topics of tribal and urban Indian communities, ethnic conflicts, the impact of recession, sovereignty, and legal questions. Native Americans in literature and art.
Prerequisite: 104 and one 200-level unit in ANTH, SOC, POL, or permission of instructor. Distribution: Social and Behavioral Analysis. Semester: Spring Unit: 1.0

ANTH 346 Colonialism, Development, Nationalism, and Gender
NOT OFFERED IN 2003-04
Focus on the nature of development, colonialism, and dependency and the implications of colonialism for the creation of the modern, postcolonial world. Topics related to the impact of world capitalism on indigenous peoples will be covered, as well as globalization, nationalism, and the historical creation of ideas about race.
Prerequisite: Two 200-level units in any of the following: ANTH, SOC, POL, ECON, or permission of instructor. Distribution: Historical Studies or Social and Behavioral Analysis. Semester: N/O Unit: 1.0

ANTH 319 Nationalism, Politics, and the Use of the Remote Past
Kohl
This seminar critically examines the uses of prehistory and antiquity for the construction of accounts of national origins, historical claims to specific territories, or the biased assessment of specific peoples. The course begins with an examination of the phenomenon of nationalism and the historically recent emergence of contemporary nation-states. It then proceeds comparatively, selectively examining politically-motivated appropriations of the remote past that either were popular earlier in this century or have ongoing relevance for some of the ethnic conflicts raging throughout the world today. The course will attempt to develop criteria for distinguishing credible and acceptable reconstructions of the past from those that are unbelievable and/or dangerous.
Architecture

AN INTERDEPARTMENTAL MAJOR

Director: Friedman (Art), McGibbon (Art)

A major in Architecture offers the opportunity for study of architectural history and practice through an interdisciplinary program. Following Vitruvius’ advice on the education of the architect, the program encourages students to familiarize themselves with a broad range of subjects in the humanities, sciences, and social sciences. Students may also elect courses in studio art, mathematics, and physics which lead to appreciation of the principles of design and the fundamental techniques of architecture.

Although courses at MIT are not required for the major, the MIT-Wellesley exchange provides a unique opportunity for students to elect advanced courses in design and construction. Students are also encouraged to consider travel or study abroad as important aspects of their education in architecture, and to take advantage of the wide resources of the College and the Department of Art in pursuing their projects.

Each student designs her program of study individually in consultation with the directors. Majors are required to take ARTH 100-101 and ARTS 105. In addition, four units of course work above the 100-level and two 300-level units of coursework must be taken in the Department of Art. At least three of these art units (including one at 300-level) must be taken at Wellesley College. A list of requirements for honors eligibility is available from the director.

Students may include selections from the list below in their core programs.

History of Art

ARTH 100 Introduction to the History of Art

Part I: Ancient and Medieval Art

Staff

A broad multicultural survey of the art of the Ancient and Medieval worlds. The course focuses upon major monuments and masterpieces, including the Egyptian pyramids, the temples and sculptures of Greece and Rome, the Buddhist shrines of India, the painted scrolls of China and Japan, the mosques of the Islamic Near East, and the Gothic cathedrals of Europe. Two lectures and one conference per week. Conferences emphasize the interpretation of original works of art, and offer some hands-on sampling of historical materials and techniques.

Required course for all Art History, Architecture, and Studio Art majors, who should plan to elect both ARTH 100 and 101 in their first or second year at Wellesley.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Semester: Fall

Unit: 1.0

ARTH 101/WRIT 125 Introduction to the History of Art Part II: Renaissance to the Present

Rhodes

See description for ARTH 101 above. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 101 students, but their assignments will be different, and they will attend two special Writing 125 conferences each week. Through writing about art, students in 101/125 will develop skills in visual and critical analysis. This course satisfies the Writing 125 requirement and counts as a unit towards a major in Art History, Architecture, or Studio Art.

Prerequisite: Open to all first-year students

Distribution: Arts, Music, Theatre, Film, Video

Semester: Spring

Unit: 1.0

ARTH 200 Architecture and Urban Form

Friedman

An introduction to the study of architecture and the built environment.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Semester: Fall

Unit: 1.0

ARTH 203 Cathedrals and Castles of the High Middle Ages

Ferguson

A study of the major religious and secular buildings of the Romanesque and Gothic periods with emphasis on France and England. Attention given to the interpretation and context of buildings and their relationship to cult, political, and urban factors. Occasional conferences.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Unit: 1.0

ARTH 205 Breaking Boundaries: The Arts of Mexico and the United States

Bedell, Oles

NOT OFFERED IN 2003-04. An artificial boundary has long divided the art histories of Mexico and the United States, placing them in separate textbooks, classes, and exhibitions. This lecture course breaks this model. We will compare and contrast the arts of these two nations, beginning with the independence movements of the eighteenth century and ending with the rise of modernism in the 1950s. Topics include representations of native peoples, responses to the machine age, and the battle of women artists like Frida Kahlo and Georgia O’Keeffe for a respected place in the art world.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Semester: N/O

Unit: 1.0

ARTH 209/AFR 209 West African Architecture

Finley

West Africa has given birth to many key architectural forms, from the round house to the mosque to the slave castle. This seminar examines the history, meaning, and use of these and other classic examples of West African architecture and charts their transformation and reappearance in African diasporic communities in the Americas. We will study how religion, gender, art and culture affect the use of space and the shape of the built environment in West Africa from the classical period to the present. Students may register for either ARTH 209 or AFR 209. Credit will be given in the department in which the student is registered.

Prerequisite: None

Distribution: Arts, Music, Theatre, Film, Video

Unit: 1.0

ARTH 218 Painting in the Netherlands in the Fifteenth and Sixteenth Centuries

Carroll

NOT OFFERED IN 2003-04. How does art mirror the world? The course focuses on three generations of Northern Renaissance artists who offered different answers to that question. The generation of Jan van Eyck depicted the glories of the natural world and the promise of salvation. The generation of Hieronymus Bosch depicted the follies of a sinful world and the perils of damnation. The generation of Pieter Bruegel depicted ordinary life in the present-day world and the harshness of oppression. In reviewing the work of these artists, we will also study the emergence of new, independent categories of painting: landscape, portraiture, and scenes of daily life.

Prerequisite: None, ARTH 100 and 101 recommended

Distribution: Arts, Music, Theatre, Film, Video

Semester: N/O

Unit: 1.0

ARTH 219 Nineteenth-Century Arts from the French Revolution to Impressionism

Ganz

A lecture course on art in France from the upheavals of the 1789 Revolution and the legacy of the Enlightenment, through Impressionism’s
challenge to canonical art practices, concluding with the radical fin-de-siècle movements and their implications for the development of modern art. This course will consider painting, sculpture, prints and photography in relation to notions of nationalism and history, the avant-garde and revolutionary politics, popular and elite culture, women painters and gendering of representation, as well as French painting’s indebtedness to international cultural traditions and its engagement with colonial discourse.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

**ARTH 220 Painting and Sculpture of the Later Sixteenth and Seventeenth Centuries in Southern Europe**

**ARTH 224 Modern Art to 1945**
Berman
**NOT OFFERED IN 2003-04.** A survey of modern art from the 1880s to World War II, examining the major movements of the historical avant-garde (such as cubism, expressionism, dada, surrealism) as well as alternate practices. Painting, sculpture, photography, cinema, and the functional arts will be discussed, and critical issues, including the art market, and gender, national, and cultural identities, will be examined.

Prerequisite: None. ARTH 100 and 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O Unit: 1.0

**ARTH 225 Modern Art Since 1945**
Berman
A survey of art since World War II, examining painting, sculpture, photography, performance, video, film, conceptual practices, and the mass media. Critical issues to be examined include the art market, feminist art practices, the politics of identity, and artistic freedom and censorship.

Prerequisite: None. ARTH 100 and 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

**ARTH 226 History of Photography: From Invention to Advertising Age**
Berman
Photography is so much a part of our private and public lives, and it plays such an influential role in our environment, that we often forget to examine its aesthetics, meanings and histories. This course provides an introduction to these analyses by examining the history of photography from the 1830s to the present. Considering fine arts and mass media practices, the class will examine the works of individual practitioners as well as the emergence of technologies, aesthetic directions, markets, and meanings.

Prerequisite: None. ARTH 100 and 101 strongly recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall Unit: 1.0

**ARTH 238 Art, Architecture, and Culture in the Pre-Columbian Americas**
Evans
Before the arrival of the Europeans in the late fifteenth century, several brilliant civilizations emerged in North and South America, including the Maya, Aztec, Moche, and Inca. Incorporating the tools of art history, cultural studies, and archaeology, this course explores the visual culture of these pre-Columbian peoples. Lectures that introduce the broader aspects of each civilization will be accompanied by workshops that explore cutting-edge issues. We will also work extensively with objects on display in the Davis Museum. Students with no prior background in art history are encouraged to attend.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

**ARTH 240 Asian Art**
Liu
This course surveys the major artistic traditions of Asia from prehistory to the turn of the twentieth century, including India, Southeast Asia, China, Korea and Japan. It will study monuments with emphasis on the interaction of art and society, and especially how artistic creativity and style are tied to religious beliefs, philosophical/intellectual thoughts, social and political changes, geographical locations, and other historical contexts. Through lectures, discussions, workshops, and paper assignments, students and instructor will constantly explore the definition of Asian art. *Trips to the Boston Museum of Fine Arts and the Harvard Sackler Museum.*

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0
ARTH 241 Egyptian Art

Ford

The greater Nile Valley had yielded some of the world’s most ancient and most compelling monuments. In this course we will survey the art and architecture of ancient Egypt from Neolithic times (c. 6000 B.C.) through the Roman period (c. 2nd century A.D.). Emphasis will be placed on objects in the Egyptian collection of the Museum of Fine Arts, Boston, and one class session per month will meet in the Museum.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall

Unit: 1.0

ARTH 242 Life, Love, and Art in Ancient Greece

Marvin

NOT OFFERED IN 2003-04. Greek art did more than just initiate the Western artistic tradition. It reflects a paradoxical society that prized freedom, inspired with wicked democracy, invented philosophy, helped women, encouraged homosexual pederasty. We will look at the historical development of Greek sculpture and painting—what they meant to the people who made them, and to the later centuries that prized them. Repeated trips to the Boston Museum of Fine Arts.

Prerequisite: One unit of ARTH or CLCV
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O

Unit: 1.0

ARTH 243 Roman Art

Marvin

NOT OFFERED IN 2003-04. From twisting alleys, bars, and brothels of the buried city of Pompeii to standing monuments like the Colosseum, the remains of Rome’s cities disclose a world of extremes. Stretching from Britain to Egypt to southern Russia, the Roman Empire meant luxury and slavery, elegance and cruelty, portraits of individuals and monuments of mass propaganda. We will survey the art of that empire both public and private. Trips to the Boston Museum of Fine Arts and perhaps other museums.

Prerequisite: Open to sophomores, juniors, and seniors or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O

Unit: 1.0

ARTH 247 Islamic Art and Architecture

Bokhari

The course will examine the flourishing of both sacred and secular architecture of the Islamic world (610-1780) from mosques to markets and citadels to cemeteries. The humble vernacular architecture of town and village with its numerous regional variations will be examined as well as the jeweled splendor of court, harem and palace life. Emphasis will be placed upon function and meaning rather than on chronology and style. Coursework covers the vast reaches of Islam from Spain to India. Students will also use the collection at the MFA and the Sackler Museum at Harvard University to examine the refined and exquisite Islamic decorative arts including porcelain, enamel, manuscript illumination, metalwork, glasswork, silk carpets, textiles and the high art of calligraphy.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring

Unit: 1.0

ARTH 248 Chinese Painting

Liu

Chinese painting is the only tradition in world art that can rival the European painting tradition in the quantity and diversity of its output. The number of recorded artists of note, the complexity of aesthetic issues attached to it, and the sophistication of the written literature that accompanies it through the centuries. This course will examine Chinese painting from early times to the turn of the twentieth century with an introduction to traditional connoisseurship. Issues of examination include major themes, styles, and functions of Chinese painting. Special attention will be given to the patronage: the relationship of painting, calligraphy, and poetry; amateurism vs. professionalism; gender in painting; and the tension between tradition and creativity. Trip to the Boston Museum of Fine Arts.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video

ARTH 251 Italian Renaissance Art, 1400-1520

Armstrong

Major artists of the Italian Renaissance are considered in their cultural context. Topics include the formation of the Renaissance style in Florence (Masaccio, Donatello); functions of religious art (Fra Angelico); the revival of Classical Antiquity (Mantegna, Botticelli); new forms of portraiture (Piero della Francesca, Leonardo da Vinci) and landscape (Bellini, Giorgione); and High Renaissance painting in Florence, Rome, and Venice (Raphael, Michelangelo, Titian).

Prerequisite: None, ARTH 248 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring

Unit: 1.0

ARTH 252 Painting for Principles: Late Medieval Painting and Manuscript Illumination in France and Italy

Armstrong

NOT OFFERED IN 2003-04. Late Medieval Europe witnessed an extraordinary artistic flourishing, largely dependent on aristocratic patronage. Elegant French Gothic art and the new realism of Italian painters are twin elements of the period style. Religious and secular paintings by Giotto (Florence) and Duccio (Siena), and exquisite manuscripts illuminated for French royalty (such as the Très Riches Heures of the Duke of Berry) appear as documents of princely life and of the new attention to nature seen in Late Medieval art.

Prerequisite: None, ARTH 100 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O

Unit: 1.0

ARTH 253 The Beautiful Book: Medieval and Renaissance Book Illumination in France and Italy

Armstrong

A survey of European illuminated manuscripts including several Hiberno-Saxon and Carolingian manuscripts, but emphasizing the magnificent decoration of French and Italian books in the Gothic and Renaissance periods. Topics will include the construction of manuscripts; relation of text to images and decoration; aristocratic and religious patronage of illuminators, and the illustration of the earliest printed book woodcuts. Original illuminated manuscripts and early printed books in the Wellesley College Special Collections will be studied in several sessions. All students will also participate in preparing a small exhibition of Wellesley’s illuminated manuscripts to be held in the Davis Museum.

Prerequisite: None, ARTH 100 or ARTH 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall

Unit: 1.0

ARTH 255 Twentieth-Century Chinese Art

Lin

NOT OFFERED IN 2003-04. This course will examine Chinese art in the socially tumultuous and artistically creative twentieth century, which witnessed the end of China’s 2000-year tradition of monarchical rule, the founding of the Republic, the rise of the People’s Republic, the Cultural Revolution, and the ongoing Open-Door Reform. Issues will include China’s encounters with the West, the tensions of tradition and revolution, the burdens of cultural memory and historical trauma, the interpretations of modernism and avant-garde, and the problems of globalization and national identity. The course is designed to develop an understanding of the diverse threads of twentieth-century Chinese art.

Prerequisite: None, ARTH 248 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O

Unit: 1.0

ARTH 260 North American Indian Art

Wallace

NOT OFFERED IN 2003-04. A survey of North American Indian art, artifacts, and building from the earliest Paleo-Indian arrivals to the present.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O

Unit: 1.0

ARTH 261 Spanish Art

Wallace

Spanish painting, sculpture, and printmaking from El Greco through Goya. Other major artists studied will be Ribata, Ribera, Velázquez, Zurbaran, and Murillo. There will be a field trip to the Museum of Fine Arts to study the prints of Ribata and Goya in the outstanding collection there.

Prerequisite: None

ARTH 264 Introduction to Internet Studies and Visual Computer Cultures
White
In this course, students critically consider the history, theories, and critiques of the Internet. Students engage with computer cultures through critical and historical literature, science fiction, multi-media, and internet sites. Topics include cyberpunk, gaming, gendering chat, hackers and programming, hypertext, Internet art and authorship, and surveillance. Contemporary texts of all sorts are related to such "classics" as Gibson's "Neuromancer," Foucault's "panopticon," Haraway's "Cyborg Manifesto," and Wiener's cybernetics theories. Readings from art history, computer science, literary criticism, media studios, philosophy, psychology, political science, sociology and women's studies provide different perspectives. Students assess the usefulness of this literature in addressing computer cultures.
Prerequisite: Open to sophomores, juniors, and seniors only.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall Unit: 1.0

ARTH 302 Seminar. Double Trouble: Critical Considerations of Photographic and New Technology Copies
White
In this course, students critically engage with different perspectives on the copy. We consider originality, what happens when "originals" are copied, fears surrounding reproductions, and the possibility of politically using copying and cloning to reveal social, class, gender, race, and sexuality. Students encounter these ideas through critical literature, fiction, film, photography, television, multi-media, and Internet sites. Course topics include exacting images and photographic failures, spectatorship, digital photography and Internet art, uncanny twins, monstrous cloning, morphing, Frankenstein and cyborgs, and other reproductive technologies. This material introduces some key issues in art history, Internet studies, literary criticism, media studies, and museum studies.
Prerequisite: Open to juniors and seniors only. Permission of instructor required. File application in art department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

ARTH 303 Seminar. The Graphic Arts
Wallace
NOT OFFERED IN 2003-04.
Prerequisite: Open to sophomores, juniors, and seniors who have had at least one 200-level art course involving the history of painting. Permission of instructor required. File application in department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O Unit: 1.0

ARTH 309 Seminar. Problems in Architectural History
Friedman
Topic for 2003-04: The Architecture of Leisure 1945-1975. This seminar will examine the history of three building types - weekend houses, resort hotels and retail stores - in the decades immediately following World War II. Focusing on the U.S., France and Germany, the course will explore the Modernist and Art Deco foundations of conventions within each type, and analyze postwar developments through a series of case studies. Particular attention will be paid to such issues as growth of consumerism, the culture of spectatorship, and changes in social relations and cultural values, especially gender, sexuality, and race.
Prerequisite: Permission of instructor required. File application in department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

ARTH 320 Seminar. American Architecture
O'Gorman, Friedman
Topic for 2003-04: American Architecture Today. This will be a lecture/seminar course in which a series of practicing architects will present their work on campus at public lectures, then join the students registered in the course for discussion. Students, either individually or in teams, will write papers on the work of the individual architects.
Prerequisite: Permission of instructor required. File application in department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall Unit: 1.0

ARTH 322/AFR 322 Seminar. Memory and Identity in Contemporary Visual Art of the African Diaspora
Finley
Since the 1950s, projects of Black liberation and empowerment have influenced the work of artists of African descent in the Black Atlantic. Pivotal historic events, such as the Civil Rights movement, the dismantling of colonial rule in Africa and the Brixton race riots in England, have urged Black artists to reexamine issues of memory, identity, history and belonging. This course considers those artists who trace a visual genealogy of the African diaspora and work in what has been identified as a tradition of remembrance. We will focus on artists working after 1960, but also will study the roots of this tradition in the beginning of the twentieth century and in earlier periods. Trips to the Studio Museum in Harlem and other museums. Students may register for either ARTH 322 or AFR 322. Credit will be given in the department in which the student is registered.
Prerequisite: Permission of instructor required. File application in department before preregistration. ARTH 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

ARTH 323 Seminar: Topics in the Decorative Arts
DeLorme
NOT OFFERED IN 2003-04.
Prerequisite: Permission of instructor required. File application in department before preregistration. ARTH 101 recommended.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O Unit: 1.0

ARTH 330 Seminar. Renaissance Venice
Armstrong
Renaissance artists and architects glorified the Republic of Venice as the center of a cultural and political empire. The seminar will explore how they represented contemporary religious beliefs, portrayed political rulers and their wives, established new norms for representing landscape, exploited the erotic appeal of the female form, participated in the revival of Classical themes in art, and refashioned the city's churches, palaces, and urban spaces. The artists considered will include Giorgione, Titian, Tintoretto, and Palladio.
Prerequisites: Open to students who have taken one unit in Medieval, Renaissance, or Baroque art, architecture, history or literature; or who have completed two units of Art History at the 200 level. Medieval/Renaissance Studies majors and Architecture majors are encouraged to enroll. Permission of the instructor required. File application in Art Department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall Unit: 1.0

ARTH 335 Problems in Modern Art
Berman
Topic for 2003-04: Placements and Displacements: Installation Art. This seminar examines histories, theories, and practices of installation art, art built into, or incorporating, physical spaces and places. One of the most widely explored current art practices, the art of installation intersects with film, video, assemblage, architectural practices, and performance art, as well as with other media. It is also one of the premier transnational and transculural forms of contemporary art. Through class readings, reports, and museum and gallery visits (both in New York and New England), students will explore this phenomenon in both its contemporary and historical dimensions, with a particular focus on the way in which it engages issues of individual and social identity.
Prerequisite: Permission of instructor required. File application in department before preregistration.
Distribution: Arts, Music, Theatre, Film, Video

ARTH 341 Seminar. The Landscape Painting of China, Korea, and Japan
Liu
The landscape painting of China, Korea and Japan is among the great traditions of world art. What did it mean? How was it used? Why is landscape still a popular subject in modern Chinese, Korean, and Japanese art? Following the development of landscape painting from the early period to the twentieth century, the course will examine issues such as landscape and national development, ideology and power; landscape as representation of nature; landscape as images of the mind; and the tension of tradition and creativity in painting landscape. Comparisons will be made with Dutch, English, and American landscape painting to provide a global perspective.
Prerequisite: Permission of instructor. File application in department before preregistration.

ARTH 345 Seminar. Methods of Art History
Rhodes
What are the ways in which art has been defined, evaluated, theorized, and researched? What assumptions underlie the discipline of art history? This seminar provides a survey of all major approaches to the critical understanding of visual art. These include connoisseurship, iconography, Marxism, psychoanalysis, semiotics, gender and ethnicity studies, and cultural studies. Critical reading and intensive class discussion will be emphasized.
Prerequisite: Permission of instructor required. File application in department before preregistration.

ARTH 381 Boston Museum of Fine Arts Seminars
A limited number of qualified students may elect for credit seminars offered by the curators of the Boston Museum of Fine Arts to students in Boston-area colleges and universities. These are held in the museum and use objects from the collections for study. Admission to museum seminars is by permission of the instructor at the museum only. Call the curator for information about the day and time of classes and application procedures as the class size is limited. Normally, students may enroll for a maximum of two BMFA seminars.

Topic A: Ancient Egypt in the Middle Kingdom
Denise Doherty, Curator, Ancient Egyptian, Nabataen and Near Eastern Art
(617-369-3326 or ddoherty@nmfa.org)
The ancient Egyptians considered the period now known as the Middle Kingdom (Dynasties 1-13, about 2040-1640 B.C.) as a classic age of art and literature. Nevertheless, the period remains relatively unknown today, and new discoveries continue to revise and improve our understanding of its history. This seminar will explore the history, art, and civilization of the era, including architecture, painting, sculpture, tomb and temple decoration, decorative arts, religion, funerary practices, and literature. The collection of the MFA, which houses some of the era’s greatest artistic masterpieces as well as an extraordinary collection of archaeological objects revealing daily life, will serve as the focal point for studying art and material culture.
Enrollment limited to twelve.
Prerequisite: Admission to Museum Seminars is by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

Topic B: Art Deco in Europe
Bet McLeod, Assistant Curator of Decorative Arts and Sculpture, Art of Europe
(617-369-4241 or bmcleod@nmfa.org)
The style known as Art Deco takes its name from the Exposition Internationale des Arts Décoratifs et Industriels Modernes, held in Paris, in 1925. This seminar will provide a variety of contexts in which to understand and interpret the style, focusing on decorative arts in all media (textiles, furniture, metalwork, ceramics, glass). Students will identify and research objects, and prepare reports on such themes as the cultural and material origins of the style; materials and techniques; the style as represented in different media; the reception of Art Deco in the United States. This seminar is being offered in conjunction with preparation for a major international exhibition at the MFA from August 2004 to January 2005. As opportunities permit, there will be visits to sale rooms, galleries, and collections.
Enrollment limited to twelve.
Prerequisite: A survey of art history and some familiarity with twentieth-century movements recommended. Some knowledge of French would be useful. Admission to Museum Seminars is by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0
Unit: 1.0

ART 107 Book Arts Studio
Rogers and Ruffin (Clapp Library)
In an interactive setting, students will survey the history of the book and gain hands-on experience in bookmaking, with an emphasis on the creative possibilities of historical craft and contemporary art. Part of each class session will focus on examples from Wellesley’s Special Collections. In the Library’s Book Arts Lab, students will learn to set type by hand and print on hand presses. Through a collaborative project which will involve use of the Knapp Media Center, students will create a limited edition artist’s book.
Prerequisite: None. Permission of instructors required. File application online through Art Web page before preregistration.
Distribution: None. Credit/non only
Semester: Spring
Unit: 0.5

ARTS 108 Photography I
Black, Staff
This introductory course explores photography as a means of visual communication by producing and analyzing photograph images. Emphasis is on acquiring basic black-and-white technical skills with 35mm cameras and traditional darkroom practices. Class discussions and studio projects address a range of technical, compositional, and aesthetic issues fundamental to imagemaking. Strong emphasis is on the development of both a technical grasp of the tools and a critical awareness of the medium through assignments and critiques.
Prerequisite: None. Permission of instructor required. File application online through Art Web page before preregistration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

ARTS 109 Basic Two-Dimensional Design
Slovick
This studio course focuses on the issue of composition in two-dimensional imagery. It introduces the fundamental elements of design (e.g. line, shape, value, space, color) and their function in the process of composition. Studio projects emphasize formal problem-solving skills as a means of achieving more effective visual communication. Weekly assignments given in a variety of media. Recommended for those interested in pursuing any type of two-dimensional or digital media.
Prerequisite: None. Open to all non-seniors. Seniors must obtain permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

ARTS 113 Basic Three-Dimensional Design
Irish, Darrien
This introductory course explores the basic formal and spatial considerations when working with three-dimensional structure and form. Studio projects incorporate a range of materials
ARTS 165 Introduction to Video Production

Hudson, Staff
Introduction to the principles of video production with emphasis on developing basic skills of recording with a video camera, scripting, directing, and editing short videos.
Prerequisite: None. Permission of instructor required. File application on-line through Art Web page before pre-registration.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

ARTS 206 Chinese Painting II

Meng
NOT OFFERED IN 2003-04. This course offers students advanced training in traditional and non-traditional methods of Chinese painting. Students may choose to focus on a specific area of subject matter, such as landscape, flowers and birds, or figurative studies, and students will be encouraged to develop a personal vision using the media of Chinese painting techniques. In addition to field trips to museums and galleries, there will be lectures and demonstrations by visiting artists.
Prerequisite: ARTS 106 or by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 207 Sculpture I

Dorrien
An exploration of sculptural concepts through the completion of projects dealing with a variety of materials including clay, wood, plaster, stone, and metals, with an introduction to basic foundry processes. Emphasis on working from direct observation of the model. Studio fee of $30.
Prerequisite: ARTS 105 or 113 or by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 208 Photography II

Black
This course builds upon technical and aesthetic background acquired in Photography I. Students explore the medium format camera while expanding their use of the 35mm camera. Other topics include lighting equipment, advanced developing and printing processes, and initial digital photographic work. Continued strong emphasis is on the development of a personal photographic vision and a critical awareness of the medium and its history through assignments and critiques.
Prerequisite: ARTS 108 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 217 Life Drawing

Harvey
Understanding the human figure by direct observation of and drawing from the model. A highly structured approach with emphasis on finding a balance between gestural response and careful measurement. Rigorous in-class drawings as well as homework assignments. Dry and wet media as well as work on a variety of scales. Recommended for Architecture majors as well as Studio Art students who intend to do further work from the figure.
Prerequisite: ARTS 105
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 218 Introductory Painting

Staff, Harvey
An introduction to the fundamental issues of painting, emphasizing color, composition, and paint manipulation through direct observation, outside assignments, slide presentations, and class discussions aimed towards helping students gain technical skills, visual sophistication, and critical awareness. Students paint from a variety of subjects, including the self-portrait and still life.
Prerequisite: ARTS 105 or 109 or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

ARTS 219 Introductory Print Methods: Lithography/Monotype

McGibbon
An exploration of the major concepts of printmaking, with a focus upon planographic techniques such as stone lithography, silicone plate lithography, photopolymer transfers, and monotype. Students develop visual and creative flexibility while working with image sequences, text, and multiples. Several assignments explore color and as well as digital processes. Students participate in a collaborative print portfolio exchange in addition to completing individual projects. ARTS 219 and 220 are complementary courses and may be elected in either order. Studio fee of $35.
Prerequisite: ARTS 105 or 109 or by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 220 Introductory Print Methods: Intaglio/Relief

McGibbon
An investigation of the major concepts of printmaking, with a focus upon intaglio methods such as copper plate etching, and relief methods including linocut. Students develop visual and creative flexibility while working with image sequences, text, and multiples. Several projects explore color and some incorporate photo-polymer and digital material. Students participate in a collaborative print portfolio exchange in addition to completing individual projects. ARTS 219 and 220 are complementary courses and may be elected in either order. Studio fee of $35.
Prerequisite: ARTS 105 or 109 or by permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

ARTS 250 Research or Individual Study

Prerequisite: Open to qualified students by permission of instructor and department chair.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTS 250H Research or Individual Study

Prerequisite: Open to qualified students by permission of instructor and department chair.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ARTS 265 Intermediate Video Production

Staff
An exploration of the techniques and styles of producing documentary videos. We will survey current issues surrounding objectivity and representation as it concerns the documentary form. Strong emphasis on storytelling. Special focus on lighting, sound recording, and editing. We will screen and analyze various styles of documentary films. Final projects will be short documentaries.
Prerequisite: ARTS 165 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 307 Sculpture II

Dorrien
Continuation on a more advanced level of sculptural issues raised in Sculpture I. Projects include working from the figure, metal welding or wood construction, and metal casting in the foundry as well as stone carving. Studio fee of $50.
Prerequisite: ARTS 307 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 308 Photography III

Black
NOT OFFERED IN 2003-04. Advanced explorations of aesthetic and content issues through the use of the camera and light sensitive materials are the focus of this course. More advanced photographic techniques and equipment will be presented to solve visual problems arising from each student's work. Both traditional darkroom practices and digital printing solutions will be taught. Continued emphasis on research into the content and context of the photographic image in contemporary practice through gallery visits, guest lectures, and library work.
Prerequisite: ARTS 108, 208, and either 105 or 109, or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 314 Advanced Drawing

Staff
Designed for those interested in expanding their visual and conceptual awareness through continued work in drawing. Investigation of mixed media approaches as well as traditional drawing techniques, materials, and concepts. Class exercises, sketchbook work and outside assignments stress the observation of form, structure, and space as applied to a wide range of subjects, including the figure. Emphasis on the development of personal imagery and developing an individual body of work.
Prerequisite: ARTS 105 and either 109, 217, 218 or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0
ARTS 315 Advanced Painting
Staff
Each student will spend time exploring further the issues of color, composition, paint handling, and subject matter. In addition, students will be required to establish and develop personal imagery and an individual vocabulary. ARTS 315 may be repeated, ordinarily for a maximum of two semesters.
Pre-requisite: ARTS 218 or by permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

ARTS 317 Seminar. Topics in the Visual Arts
McGibbon
Topic for 2003-04: Art and Travel. The creative process is often considered a journey. What happens when an artist decides to integrate the experience of travel into his or her work? This seminar considers the many ways that contemporary artists respond to an increasingly global range of issues as they travel and make art.
Studio projects explore strategies of process art, including time, visual sequencing, forms of documentation, installation and viewer interaction. Readings, discussions, and collaborative exercises consider issues of space and place, mapping, tourist art, and the influence of international art biennials. Designed for juniors and seniors majoring in studio art, media arts, or architecture, this course enables students to work in a variety of media based upon previous experience. Some meetings will be coordinated with ARTH 335, which explores related concerns from historical and theoretical perspectives.
Pre-requisite: ARTS 105 and at least 2 other studio courses (one at the 200-level) required. Permission of instructor required. File application on-line through the Art Web page before pre-registration.
Distribution: Arts, Music, Theater, Film, Video
Semester: Fall
Unit: 1.0

ARTS 322 Advanced Print Concepts
McGibbon
NOT OFFERED in 2003-04. OFFERED in 2004-05. Experimentation with mixed media graphics using the graphic image, including handmade books, installed site works and collaborative print exchanges. Selected readings and discussions explore the use of multiplicity and sequence in contemporary art. Some projects combine digital photo processes in combination with traditional printing methods. Students in this course will attend a national printmaking conference and assist with a major print exhibition in April. Emphasis placed toward developing an individual body of work.
Pre-requisite: ARTS 219, 220, 208 or 214 or by permission of the instructor. ARTS 219 and 220 explore similar graphic concepts using different technological means; students may elect either (or both) prior to ARTS 322.
Distribution: Arts, Music, Theater, Film, Video
Semester: N/O. Offered in 2004-05.
Unit: 1.0

ARTS 350 Research or Individual Study
Pre-requisite: 200-level work in the field and permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTS 350H Research or Individual Study
Pre-requisite: 200-level work in the field and permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ARTS 360 Senior Thesis Research
Pre-requisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ARTS 365 Advanced Video Production
Meikirin
NOT OFFERED in 2003-04. An intensive course in story development, writing screenplay, directing actors and technical crew, and producing short, dramatic or mixed-genre videos.
Rigorous work on advanced camera operation, lighting, sound recording, and editing techniques. We will screen and analyze short films and sample screenplays. Course requires strong organizational and directorial aptitude. The final projects will be short, narrative, or mixed-genre videos.
Pre-requisite: ARTS 165, 265. or permission of instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

ARTS 370 Senior Thesis
Pre-requisite: 360
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Applied Arts Program
In addition to the regular Studio Art curriculum, a separately funded program allows the Art Department to offer a series of short, noncredit workshops with visiting artist teachers. These workshops vary throughout the year, but usually a variety of studio topics which have included ceramics, book arts, woodworking, pinhole photography and graphic design. These workshops are noncredit and open to all students without prerequisite. Upcoming workshops are announced throughout the year through Art Department electronic distribution lists and by posting on Community, Art and other FirstClass Conferences. Sign-up sheets are posted in the Art Department.

Directions for Election
Note: For the purposes of meeting the "18 units" requirement (Articles of Legislation, Book II, Article I, Section 8, A), Art History and Studio Art are considered separate departments.
Courses in Studio Art are counted as units "outside the department" for Art History majors. Courses in Art History are counted as courses "outside the department" for Studio Art majors.

History of Art
A Major in the History of Art must elect:
A. ARTH 100 and 101. Exemption from this requirement is possible only for students who achieve a grade of 5 on the Advanced Placement Art History examination or pass an exemption examination arranged by the department chair. A student who takes ARTH 100 and 101 will lose her AP/Art credit.
B. One of the following courses in Studio Art: ARTS 105, 106, 108, 109, 113, 165, 204, 206, [210].
C. A minimum of six further units in History of Art to make a total of nine units. Six must include distribution requirements. At least two of these must be 300-level courses.
For distribution, a student must elect at least one unit in four of the following six areas of specialization: Ancient, Medieval, Renaissance, Baroque (seventeenth and eighteenth centuries), Modern (nineteenth and twentieth centuries), non-Western Art. ARTH 222 and 229 may count as Renaissance or Baroque. Among the four areas elected, one must be either before 1400 AD/CE or outside the tradition of Western art. Normally, ARTH 223, 233, 235, 305 and 345 may not be used to meet this distribution requirement.
Beginning with the class of 2006, students may count only one cross-listed course to the minimum major. If approved by the department chair, courses elected at other institutions may be used to meet the distribution requirement. No more than one unit of 350 credit may be counted towards the minimum major.
Ordinarily, no more than three units of transfer credit (one Studio, two Art History) may be counted toward the minimum major. Once a student has enrolled at Wellesley, courses from two-year colleges will not be credited to the major.
Although the department does not encourage over-specialization in any one area, a careful choice of related courses a student may plan a field of concentration emphasizing one period or area. Students interested in such a plan should consult the department as early as possible.
ARTH 345 is strongly recommended for those considering graduate study in History of Art. Art majors are also encouraged to take courses in the language, culture, and history of the areas associated with their specific fields of interest.
Art History and Architecture majors are encouraged to apply to the department to write a 360/370 Honors Thesis. In the Art Department the only path towards Departmental Honors is the 360/370 Honors Thesis. A list of requirements for honors eligibility is available from the Chair of the Department. A proposal must be written and accepted. Contact the department in the spring semester prior to the proposed honors year for deadlines and information.
Graduate programs in the History of Western Art require degree candidates to pass exams in French and German. Graduate programs in the History of Asian Art require Chinese and/or Japanese.
Students interested in graduate study in the field of art conservation should consult with the department chair regarding requirements for entrance into conservation programs. Ordinarily college-level chemistry through organic should be elected, and a strong studio art background is required.
A History of Art Minor must elect a minimum of six units:
(A) ARTH 100 and 101; and (B) four additional units above the 100-level with at least two at the 300-level; maximum one unit of 350. Of the four units above the 100-level, three shall, in the opinion of the student's faculty advisor, represent a coherent and integrated field of interest. The fourth unit shall, in the case of students whose primary field is Western European or American art, be a course in Western or ancient art. In the case of students whose primary field of interest is ancient or non-Western art, the fourth unit shall be Western European or American Art.
For the minor, at least four units for credit in Art History must be taken in the Art Department, and only one cross-listed course may be counted towards the minor.

The attention of students is called to the interdisciplinary majors in Architecture, in Classical and Near Eastern Archaeology, and in Medieval/Renaissance Studies and American Studies.

Studio Art

A Studio Art major must elect a minimum of nine units:

A. ARTH 100 and 101 (unless exempted with a grade of $5$ on the Advanced Placement Art History Examination).

B. ARTS 105, and any two of the following:

ARTH 106, 108, 109, 113, or 165.

C. A minimum of two units of studio courses at the 200 level.

D. A minimum of two units of studio courses at the 300 level.

A Studio Art minor must elect a minimum of six units consisting of:

ARTH 105, one unit of either 106, 108, 109, 113, or 165 or [210], plus four additional units in Studio Art, one of which is at the 300 level (250's and 350's excluded).

Prospective studio majors and minors are strongly encouraged to elect 100-level art courses (including ARTH 100 and 101) during their first two years at Wellesley in order to establish a solid visual foundation and a broad understanding of the field. Studio art majors intending to study abroad should make a special effort to complete all 100-level requirements for the major prior to leaving campus during the junior year. Normally, no more than three units of transfer credit (two in Studio Art, one in Art History) may be applied towards the minimum requirements of the major or minor. Students interested in pursuing graduate or professional work in the studio arts should elect additional course work in Art History and cultural studies as well as studio art whenever possible, especially in courses that address twentieth-century art and visual culture. Since contemporary art often addresses interdisciplinary issues, students are encouraged to discuss the breadth of their overall course selections (including non-art courses) with their studio advisor. All prospective majors and minors should obtain a copy of the Art Department Course Guide from the Art office for a more comprehensive discussion of the major as well as special opportunities within the arts at Wellesley.

In tandem with the Davis Museum and Cultural Center, the Art Department offers numerous opportunities for students to deepen their experiential knowledge of the arts. Though special exhibitions, visiting artist lectures and projects, work-study positions and internships, Studio art majors and minors are strongly encouraged to exhibit their work and gain practical experience organizing exhibitions and installing art in the Lewis Arts Center Student Galleries and Collins Café, and other venues on campus. Each year many professional artists visit the campus and studio art students are encouraged to take advantage of these interactions.

Seniors who qualify for Honors and have completed all 100-level requirements in the major may propose a Senior Thesis Project for Honors. If approved by the studio faculty as a whole, this year-long, self-directed project culminates in a spring exhibition. A student interested in thesis work should discuss her ideas with a potential thesis advisor and take at least some advanced work in her proposed media concentration before the senior year.

A list of requirements for honors eligibility is available from the Director of Studio Art. A proposal must be written and accepted. Contact the department in the spring semester prior to the proposed honors year for deadlines and information.

AP Policy

Students may not receive credit for AP courses in Studio Art, nor will they be able to waive prerequisites such as ARTH 105, 108, or 109 based on a high grade from the AP exam. However, they may present a portfolio of work to the Director of Studio Art for assessment and placement, and that portfolio may include work completed through an AP course.

History of Art/Studio Art Double Major. In the case of a double major in Art History and Studio Art, ARTH 100-101 will count in the Art History major. Students must also elect one additional course at the 200 or 300 level in both Art History and Studio Art for a total of eight (8) units of Art History and eight (8) units of Studio Art.

Teacher Certification. Students interested in obtaining certification to teach Art in the Commonwealth of Massachusetts should consult the Director of Studio Art and the Chair of the Department of Education.

Department of Astronomy

Professor: Bauer, French (Chair)

Associate Professor: McLeod

Instructor in Astronomy Laboratory: Register

The Astronomy Department offers two introductory survey courses geared to non-science majors: 100 and 101L. These courses are taught at a similar level and both fulfill the mathematical modeling distribution requirement. Students who elect to take both may do so in either order. Students who have a strong background in science and/or are considering a major in Astronomy or Astrophysics should elect Astronomy 110. Astronomy 206 fulfills the Quantitative Reasoning Overlay Course requirement.

ASTR 100 Life in the Universe

Bauer, McLeod

This course will cover the origin of life on the earth and the prospects for finding life elsewhere in the cosmos. We will begin with an overview of earth's place in the solar system and the universe. Among the topics we will explore: the early history of the earth and the development of life, changes in the sun that affect the earth, characteristics of the other objects in our solar system and their potential for supporting life, the detection of planets around stars other than the sun, and the search for extraterrestrial life. Some nighttime observing will be required. This course does not count toward a major in astronomy or astrophysics.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.

Distribution: Mathematical Modeling or Natural and Physical Science

Semester: Fall, Spring

Unit: 1.0

ASTR 101L Introduction to Stars, Galaxies, and Cosmology with Laboratory

Bauer, McLeod

A survey of stars, galaxies, and cosmology. This course examines the life stories of stars, from birth in clouds of gas and dust, through placid middle age, to violent explosive demise, leaving white dwarfs, neutron stars, or black holes. It also explores the makeup and structure of galaxies, which contain billions of stars and are racing away from each other as part of the overall expansion of the universe. Finally, it presents theories for the origin and ultimate fate of the universe. The course will stress the interaction of observations and the mathematical models developed from these data. Evening laboratory at the observatory.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken 110.

Distribution: Mathematical Modeling or Natural and Physical Science

Semester: Fall, Spring

Unit: 1.25

ASTR 110L Fundamentals of Astronomy with Laboratory

French

This course serves as an introduction to astronomy for students with a strong science background. The emphasis is on the physical principles that shape the Universe and on the tools we exploit to learn about stars, galaxies, and cosmology. Laboratory one evening per
week offers hands-on access to the telescopes. Some assignments require daytime observing outside of class.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have already taken 101.

Distribution: Mathematical Modeling or Natural and Physical Science

Semester: Fall

Unit: 1.25

ASTR 201 Motions in the Sky: Archaeoastronomy and the Copernican Revolution

Bauer

NOT OFFERED IN 2003-04. OFFERED IN 2004-05. This course will cover the motions of the sun, moon, and planets in the sky and how humans have interpreted them through time.

Archaeoastronomy is the study of astronomical knowledge in a culture as revealed through the archaeological record, written records, and ethnography. We will discuss the archaeoastronomy of several cultures, including the Mayans, native North Americans, and the Chinese. We will follow the beginnings of modern astronomy from the ancient Greeks through the Copernican revolution and Newton's formulation of the laws of motion. Normally offered in alternate years.

Prerequisite: Any 100-level astronomy course.

Distribution: Natural and Physical Science

Semester: N/O Offered in 2004-05.

Unit: 1.0

ASTR 203 Planetary Geology

Bauer

Spacecraft observations have shown us a breathtaking diversity of geologic features in the solar system, from ancient river valleys on Mars and violent eruptions on Io to the icy surface of Halley's comet. From a comparative point of view, we will discuss the formation and evolution of the planets and small bodies in the solar system. Topics will include: volcanism, tectonic activity, impacts, and tides. Normally offered in alternate years.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement and any 100-level ASTR or GEOL course.

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.0

ASTR 205 Relativity and Cosmology

Bauer

NOT OFFERED IN 2003-04. OFFERED IN 2004-05. Einstein's theories of space and time have brought about a fundamental change in our conceptual understanding of the universe. Using trigonometry and algebra, we will explore special and general relativity, space travel, black holes, gravitational lensing, galaxy evolution, dark matter, and the expanding universe. Normally offered in alternate years.

Prerequisite: 101 or 110

Distribution: Mathematical Modeling or Natural and Physical Science

Semester: N/O Offered in 2004-05.

Unit: 1.0

ASTR 206wL Basic Astronomical Techniques with Laboratory

McLeod

Students will learn to use our 24-inch research telescope. Topics include: planning observations, modern instrumentation, and the acquisition and quantitative analysis of astronomical images and spectra. This course requires substantial nighttime telescope use and culminates with an independent observing project.

Prerequisite: 101 or 110, and familiarity with trigonometric functions and logarithms.

Distribution: Mathematical Modeling or Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall

Unit: 1.25

ASTR 301 Seminar. Multiwavelength Astronomy

McLeod

Much of our knowledge of the universe comes from radiation outside of the visible spectrum, from low-energy radio waves that enable us to probe stellar nurseries to high-energy gamma rays that reveal the death throes of exploding stars. In between, microwaves provide decisive evidence for the Big Bang, infrared light enables us to take the temperature of distant comets, and X-rays map out seething hot gas in clusters of galaxies. We will discuss current research in fields of astronomy that rely heavily on wavelengths outside of the visible range.

Prerequisite: Any 200-level astronomy course.

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.0

ASTR 311 Elements of Astrophysics

French

Astrophysics is the application of physics to the study of the universe. We will use elements of mechanics, thermodynamics, electromagnetism, quantum mechanics, special relativity, and nuclear physics to investigate selected topics such as planets, the life stories of stars and galaxies, dark matter, and the origin of the universe. Our goals will be to develop insight into the physical underpinnings of the natural world, and to develop a 'universal toolkit' of practical astrophysical techniques that can be applied to the entire celestial menagerie. These tools include scaling analysis, numerical solutions to complex problems, and other research approaches advanced in professional literature.

Prerequisite: PHYS 202 and 203

Distribution: Mathematical Modeling or Natural and Physical Science

Semester: Spring

Unit: 1.0

ASTR 315 Seminar. Topics in Astrophysics

French

Topic for 2003-2004: Planetary Astrophysics. Study of the properties of planetary systems, with an emphasis on the underlying physical principles. Topics covered include celestial mechanics of planets, satellites, and rings, atmospheric structure and dynamics, seismology and planetary interiors, the physical properties of comets, asteroids, and moons, and the search for extrasolar planets. A required term project will involve quantitative analysis of modern ground-based or spacecraft observations of our solar system, or of planets around other stars. Normally offered in alternate years.

Prerequisite: PHYS 202 and 203 (or permission of instructor for students who are taking this as a corequisite with PHYS 202).

Directions for Election

The Astronomy major consists of a minimum of nine courses: 101wL or 110wL, 206wL; 311; at least one of 301 or 315; Physics 202; Physics 203; MATH 216/PHYS 216; any additional two courses in Astronomy above the 100 level.

Students intending to major in Astronomy are encouraged to begin physics as soon as possible, and to take 110wL rather than 101wL. Physics 219 is strongly recommended. In planning a major program, students should note that some of these courses have prerequisites in mathematics and/or physics.

A substantial background in physics and mathematics is required for graduate study in Astronomy. Students planning graduate work in Astronomy should elect the astrophysics major.

A minor in Astronomy (five units) consists of:

101 or 110, 301, and three additional units in Astronomy.

See description of Whitin Observatory and its equipment.
Astrophysics

AN INTERDEPARTMENTAL MAJOR

Director: French (Astronomy)

The Departments of Astronomy and Physics offer an interdepartmental major in Astrophysics, which combines the Physics major with a foundation of course work in Astronomy. This major should be considered by students interested in graduate study in astronomy or astrophysics, and by those who would like to coordinate Astronomy extension to the Physics major.

In addition to the nine courses required for the Physics major, the student takes four Astronomy courses. An Astrophysics major consists of:

- Physics 107, 108, 202, 203, 302, 305, 306, 314; and
- MATH 216/PHYS 216 as well as Astronomy 101w, 110w, 206w, 311, and either 315 or a 350 in either Astronomy or Astrophysics or Physics 370. Physics 219 is strongly recommended. In planning the major, students should note that some of the courses have prerequisites in mathematics.

Biological Chemistry

AN INTERDEPARTMENTAL MAJOR

Director: Allen (Biological Sciences)

Biological Chemistry Advisory Committee: Allen (Biological Sciences), Hicks (Chemistry), Wolfson (Chemistry)

The Departments of Biological Sciences and Chemistry offer an interdepartmental major in Biological Chemistry which provides opportunities for advanced study of the chemistry of biological systems.

In addition to two courses in Biochemistry (Chemistry 221 or 222 and 328), the area of concentration must include the following courses:

- Chemistry: (a) both 105 [110] and 205 [111], or 120; (b) 211; (c) either 232 or 233; Biology (a): 110 or 110X; (b) 219; (c) 220; (d) one course from among the following: 310, 313, 314, 316, 317, 320; (e) one additional 300-level course excluding 350, 360, 370; Physics: 104 or 107; Mathematics: 116, 116Z, 120 or equivalent.

Students should be sure to satisfy the prerequisites for the 300-level courses in Biology and Chemistry. Note that CHEM [114/114E] satisfy the CHEM 105 requirement, and CHEM [115/115E] satisfy the CHEM 205 requirement. Exemption of BISC 110 means that a more advanced Biology course must be taken. Although CHEM 222 may be used to satisfy the requirement for the first semester of Biochemistry, CHEM 221 is the preferred course for Biological Chemistry majors.

Students planning graduate work in Biochemistry should consider taking additional courses in Chemistry, such as analytical, inorganic, and the second semesters of organic and physical chemistry. Students planning graduate work in molecular or cell biology should consider taking additional advanced Biology courses in those areas. Independent research (350 and/or 360/370) is highly recommended, especially for those considering graduate study.

A recommended sequence of required courses would be:

**Year I**, Chemistry 105 and Math or Physics; Chemistry 205 and Biology 110
**Year II**, Chemistry 211 and Biology 219; Biology 220 and Math or Physics
**Year III**, Chemistry 221 and Math; Chemistry 328 and 323
**Year IV**, 300-level Biology courses and Independent Study

Please discuss your program with the director or any member of the Program Advisory Committee as soon as possible.

Professor: Allen’, Beltz (Chair), Berger-Sweeney, Buchholz, Cameron, Harris, Smith, Webb
Associate Professor: Moore, Peterman’, Rodenhouse
Assistant Professor: Himmelman, Hood-DeGrenier, König, O’Brien, O’Donnell, Sequesta
Visiting Assistant Professor: Hughes

Senior Instructor in Biological Sciences Laboratory: Helley, Leviott, Paul, Thomas

Instructor in Biological Sciences Laboratory: Cram, Hacepınar, Kaldell, McDonough

Unless otherwise noted, all courses meet for two periods of lecture each week. If indicated, there will also be one three- and one-half hour laboratory session weekly. Seminars normally meet for one double period each week.

BISC 107 Biotechnology
Smith

This course focuses on applications of recently developed biological techniques, including recombinant DNA, antibody techniques and reproductive technology. The social and ethical issues surrounding these techniques are also discussed. No prior knowledge of biology is expected, as all necessary background information will be discussed. Two lectures weekly. Not to be counted toward the minimum major in Biological Sciences.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.0

BISC 108 Horticulture with Laboratory
Himmelman, König, Thomas

This course will emphasize plant structure, growth and function. Topics will include plant adaptations, reproduction, environmentally sound landscape practices, urban horticulture, and the use of medicinal plants. The laboratory involves extensive use of the greenhouses, experimental design, data collection and analysis, and field trips. Not to be counted towards the minimum major in Biological Sciences.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.25

BISC 109 Human Biology with Laboratory
Berger-Sweeney, O’Brien, McDonough

The study of human physiology, including nutrition, nervous system, endocrinology, reproduction, circulation, respiration, genetics and immune responses. Two lectures weekly with a weekly laboratory or data analysis session. Laboratories involve data collection using computers, physiological test equipment, limited animal dissection and a personal nutrition study.

Not to be counted toward the minimum major in Biological Sciences.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Fall
Unit: 1.25
BISC 110 Introductory Cell Biology with Laboratory

Staff

Introduction to eukaryotic and prokaryotic cell structure, chemistry and function. Topics include: cell metabolism, genetics, cellular interactions and mechanisms of growth and differentiation. Laboratories focus on experimental approaches to these topics. Either 110 or 111 may be taken first. Students with a strong background in biology and chemistry should consider 110X.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.

Distribution: Natural and Physical Science

Semester: Fall, Spring

Unit: 1.25

BISC 110X Introductory Cell Biology with Laboratory

Harris, Hacopian

One section of 110 will be taught for first-year students with exceptional high school backgrounds in biology and chemistry. For upper-level students who have similarly strong backgrounds in the sciences. A more in-depth coverage of the topics typically covered in 110 will be possible because students entering this course will have some science experience. See Biological Sciences 110 for a description of topics.

Prerequisite: Students with lab experience and who have received a score of 4 or 5 on the Biology AP test may enroll. Students who have not taken the Biology AP or with a score lower than 4 must obtain permission from the instructor. All students must have fulfilled the basic skills component of the Quantitative Reasoning requirement. The successful completion of an AP course in chemistry, or its equivalent, is strongly recommended.

Distribution: Natural and Physical Science

Semester: Fall

Unit: 1.25

BISC 111 Introductory Organismal Biology with Laboratory

Staff

Introduction to the central questions, concepts, and methods of experimental analysis in selected areas of organismal biology. Topics include: evolution, ecology, and plant and animal structure and physiology. Either 110 or 111 may be taken first. Students with a strong background in biology should consider 111X.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.

Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall, Spring

Unit: 1.25

BISC 111X Introductory Organismal Biology with Laboratory

Rodenhurst, Paul

This section of 111 will be taught for first-year students with exceptional high school backgrounds in biology and for upper-class students who have taken another science course at Wellesley. Because students entering this course will have some science experience, coverage of the topics included in BISC 111X will be more in depth than BISC 111. See BISC 111 for a description of the topics covered.

Prerequisite: Students with lab experience and who have received a score of 4 or 5 on the Biology AP test may enroll. Students who have not taken the Biology AP or with a score lower than 4 must obtain permission from the instructor. All students must have fulfilled the basic skills component of the Quantitative Reasoning requirement.

Distribution: Mathematical Modeling and Natural and Physical Sciences. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Spring

Unit: 1.25

BISC 201 Ecology with Laboratory

Rodenhurst, Thomas

An introduction to the scientific study of interactions between organisms and their environment. Topics include adaptations to environmental constraints, foraging, reproduction, population growth and regulation, species interactions, and the structure and function of biological communities and ecosystems. Emphasis is placed on experimental ecology and its uses in solving environmental problems. Local biological habitats including lakes, forests, marshes, bogs, tundra, and streams are studied during laboratory field trips.

Prerequisite: 111 or by permission of the instructor.

Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall

Unit: 1.25

BISC 202 Evolution with Laboratory

Buchholz

NOT OFFERED IN 2003-04. Examination of evolution, the central paradigm of biology, at the level of populations, species, and lineages. Topics include the genetics of populations, the definition of species, the roles of natural selection and chance in evolution, the reconstruction of phylogeny using molecular and morphological evidence, and patterns in the origin, diversity, and extinction of species over time.

Prerequisite: 110 and 111

Distribution: Natural and Physical Science

Semester: N/O

Unit: 1.25

BISC 203 Comparative Physiology and Anatomy of Vertebrates with Laboratory

Cameron, Buchholz

The functional anatomy of vertebrate animals, with emphasis on comparisons among representative groups. The course covers topics in thermoregulatory, osmoregulatory, reproductive, cardiovascular, respiratory, digestive, neural, and ecological physiology. The laboratories incorporate the study of preserved materials and physiological experiments.

Prerequisite: 109 or 111, or permission of instructor.

Distribution: Natural and Physical Science

Semester: Fall

Unit: 1.25

BISC 206 Histology I: Microscopic Anatomy of Mammals with Laboratory

Smith

The structure and function of mammalian tissues, and their cells, using light microscopic, histochemical and electron microscopic techniques. Topics covered include the connective tissues, epithelia, nervous tissue, blood, lymphoid tissue and immunology, as well as others. Laboratory study includes direct experience with selected techniques.

Prerequisite: 110

Distribution: Natural and Physical Science

Semester: Fall

Unit: 1.25

BISC 207 The Biology of Plants with Laboratory

Küng

An introduction to experimental plant biology. Topics will include growth and development, stress physiology, plant defense, applications of genetic engineering to the study and improvement of plants and the properties of medicinal plants. The project-oriented laboratory sessions will include field work as well as an introduction to some of the molecular and cellular techniques currently employed in answering research questions in plant biology.

Prerequisite: 110 or 111

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.25

BISC 209 Microbiology with Laboratory

Allen, Leavitt

Introduction to the microbial world, with emphasis on bacteria and viruses and their activities in nature, using examples of how these microbes influence human activity. Both medical and non-medical applications, and useful (food production, genetic engineering) as well as harmful (disease, bioterrorism) consequences of microbes will be discussed along with consideration of biological principles and techniques characterizing the organisms.

Prerequisite: 110 and one unit of college chemistry

Distribution: Natural and Physical Science

Semester: Summer

Unit: 1.25

BISC 210 Marine Biology with Laboratory

Moore, Helluy

Oceans cover more than 70% of the earth's surface and are our planet's primary life support system. This course examines adaptations and interactions of plants, animals and their environments in marine habitats. Focal habitats include the photic zone of the open ocean, the deep-sea, subtidal and intertidal zones, estuaries, and coral reefs. Emphasis is placed on the dominant organisms, food webs, and experimental studies conducted within each habitat.

Prerequisite: 111 or by permission of the instructor

Distribution: Natural and Physical Science

Semester: Fall

Unit: 1.25

BISC 211 The Biology of Brain and Behavior with Laboratory

Berger-Sweeney, Goldman (Physics), Paul

An introduction to the study of the nervous system and behavior with particular emphasis on the structure and function of the nervous system. In the first half of the semester, basic neuroanatomy, neurochemistry and neurophysiology are covered. In the second half of the semester, brain mechanisms involved in sensation, language, addiction, memory, and cognition are emphasized. The laboratory is designed to expose the student to basic neuroanatomy, neurochemistry, and neurophysiology.

Prerequisite: 110 and either 111 or 109

Distribution: Epistemology and Cognition or Natural and Physical Science

Semester: Fall 2004-05: Fall, Spring

Unit: 1.25

BISC 216 Mechanisms of Animal Development with Laboratory

O'Donnell

In this course, we will explore animal development beginning with the process of fertilization. We consider how a single cell gives rise to the many specialized cell types of the adult. The mechanisms that determine cell fate as the multicellular embryo differentiates will be discussed. Topics will include: embryonic induction, pattern formation, organogenesis (organ development), regeneration, and stem cells. Laboratories will focus on experimental approaches to development.

Prerequisite: 110 and 111 or permission of instructor

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.25
BISC 219 Molecular Genetics with Laboratory
Webb, Sequeira, Crum, Kudell
The course will be devoted to an understanding of the molecular and biochemical basis of genetics and the interactions between cells that provide the basis for tissue and organismal development. Topics will include: organization of the eukaryotic genome, gene structure and function, differential gene expression, cellular and tissue differentiation including aspects of both animal and plant development, and genetics of pattern formation. Laboratory experiments will expose students to the fundamentals of molecular genetics.
Prerequisite: 110 and one unit of college chemistry. Not open to first-year students.
Distribution: Natural and Physical Science Semester: Fall
Unit: 1.25

BISC 220 Cellular Physiology with Laboratory
Harris, Hood-Degrenier, Crum, Leavitt
This course will focus on structure/function relationships in eukaryotic cells. Topics will include: enzyme structure and kinetics, bioenergetics, protein-protein interactions, membrane and membrane-bound organelle structure and function, cytoskeleton, transport mechanisms, cell communication and signaling. The laboratory consists of three projects: enzyme purification and characterization, the cytological and biochemical characterization of the actin cytoskeleton and mammalian cell culture and studies in programmed cell death.
Prerequisite: 110 and two units of college chemistry. One semester of organic chemistry is recommended. Not open to first-year students.
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 222 Ecological Physiology with Laboratory
O'Brien
Animals inhabit widely differing environments by means of a variety of physiological strategies. We will discuss the physiological and biochemical underpinnings of nutritional, thermal, osmoregulatory, circulatory and respiratory adaptation in vertebrate and invertebrate examples. We will then apply those principles to ecological challenges including dietary specialization, flight and migration, hibernation, torpor and aestivation, freezing tolerance, diving, adaptations to altitude. The weekly laboratory session will be a mix of laboratory and field exercises, with a focus on experimental design and analysis.
Prerequisite: 110 and 111
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 302 Animal Physiology with Laboratory
Cameron, Paul
This course takes an integrated approach to the study of organ system function in animals, with an emphasis on human physiology. We will examine control mechanisms that allow the human body to maintain a constant balance in the face of environmental challenges such as exercise, temperature change and high altitude. Our particular focus will be recent findings in the areas of neural, cardiovascular, respiratory, renal and muscle physiology. In the laboratory, students gain experience with tools of modern physiological research at both the cellular and organismal levels.
Prerequisite: 111 and one of the following - 203, 207, 213, 220, 222
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 303/CS 303 Bioinformatics
Webb, Tjaden (Computer Science), Cohen (Brandeis), Ringe (Brandeis)
A multidisciplinary seminar exploring the origins, present and future applications and challenges of the intersection of biological and computer sciences. The field of bioinformatics generated in response to the era of genomics encompasses all aspects of biological data acquisition, storage, processing, analysis and interpretation with a view to generating in silico models of cellular function.
Prerequisites: 219 or 220 or CS 231
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.0

BISC 304 Histology II: Microscopic Anatomy of Mammalian Systems with Laboratory
Smith
Analysis of structure-function relationships of mammalian systems, based principally on microscopic techniques. Examination of structural changes caused by selected disease states in each system, as well as discussion of recent literature. Laboratory study includes tissue preparation for microscopy, as well as hands-on experience at the transmission electron microscope and participation in a group research project.
Prerequisite: 206
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 305 Seminar: Evolution
Buchholtz
Major events in the history of life. Origin of life from nonlife, evolution of replicatory molecules, origin of eukaryotic cellular structure, diversification of organic domains, kingdoms and animal phyla, development of strategies for life in terrestrial environments, patterns of extinction. The course will emphasize student participation and make extensive use of the original literature.
Prerequisite: Two units in Biological Sciences at the 200 level or permission of instructor
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.0

BISC 306 Principles of Neural Development with Laboratory
Beltz, Paul
Aspects of nervous system development and how they relate to the development of the organism as a whole. Topics such as neurogenesis, programmed cell death, axon guidance, synaptogenesis, transmitter plasticity, and the development of behavior are discussed.
Laboratory sessions focus on a variety of methods used to define developing neural systems.
Prerequisite: 213 or 216, or permission of instructor
Distribution: Epistemology and Cognition or Natural and Physical Science Semester: Fall
Unit: 1.25

BISC 307: Advanced Topics in Ecology with Laboratory
Moore
Topic for 2003-04: Ecology of Freshwaters with Laboratory. Rivers, lakes, and wetlands are among our richest ecosystems, yet their physical integrity and biotic diversity are the most imperiled. This course examines the biological, physical, and chemical processes that occur in flowing waters, wetlands, lakes and vernal pools. Lectures and discussions address key concepts for understanding, conserving and restoring freshwater ecosystems. Lab work will include field work in a variety of freshwater habitats, mathematical modeling, and an independent project carried out by each student.
Prerequisite: 201, 219 or by permission of the instructor
Distribution: Natural and Physical Science Semester: Spring
Unit: 1.25

BISC 308 Tropical Ecology with Wintersession Laboratory
NOT OFFERED IN 2003-04. Ecology of coral reefs and rain forests are examined. Lectures and discussions during the fall prepare students for the field laboratory taught in Belize and Costa Rica. The first half of the laboratory is based on an island bordering the world's second longest barrier reef; living and laboratory facilities for the second half of the course are in intact lowland rain forest. Laboratory work is carried out primarily out-of-doors and includes introductions to the flora and fauna, as well as field tests of student-generated hypotheses. Not offered every year. Subject to Dean's Office approval.
Prerequisite: 201, 207, or 210, and permission of instructor. Application required.
Distribution: Natural and Physical Science Semester: N/O
Unit: 1.25

BISC 310 Advanced Topics in Cellular Regulation with Laboratory
Hood-Degrenier
Eukaryotic cells possess a diverse array of molecular circuits that regulate their normal activities and respond to external signals. Common modes of regulation include modulation of protein expression or localization, covalent protein modifications, and protein-protein interactions. This course will rely heavily on current literature and student presentations to examine the molecular mechanisms that regulate such processes as cell division, DNA repair, stress responses, cell differentiation, and immune responses.
Laboratory experiments will investigate several regulatory pathways using the budding yeast Saccharomyces cerevisiae as a model organism.
Prerequisite: 220, 219 also recommended
Distribution: Natural and Physical Science Semester: Fall
Unit: 1.25

BISC 313 Microbial Physiology and Biochemistry with Laboratory
Allen
NOT OFFERED IN 2003-04. The study of the chemical activities (cellular growth and its physiological basis, metabolic patterns, biochemical and molecular genetics, and the relation of structure to function) of microorganisms as models of general biological phenomena. Emphasis on experimental approaches and current literature. In the laboratory, group experi-
ment problems designed to allow the development of research techniques and analysis will be approached.

Prerequisite: 209, 219 or 220, and CHEM 211, or permission of instructor.
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.25

**BISC 315 Advanced Topics in Neurobiology with Laboratory**

NOT OFFERED IN 2003-04.

Prerequisite: 215
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.25

**BISC 316 Molecular Biology with Laboratory**

NOT OFFERED IN 2003-04. The practical applications of recombinant DNA techniques to the study of the control and organization of genes at the molecular level. The course will be centered around a laboratory project designed to provide experience with the methodologies used in molecular biology (e.g., molecular cloning, gene mapping, mutagenesis and expression, DNA sequencing, computer analysis of nucleic acid and protein structure/function, bioinformatics).

Prerequisite: 219 and permission of instructor
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.25

**BISC 320 The Proteomics of Eukaryotic Cells with Laboratory**

*Harris, Kiddell*

The Human Genome Project and the sequencing of the genomes of several other organisms have provided biologists with vast storehouses of information. However, it is important to remember that DNA sequences are a recipe for life, not life itself. To a great extent the living condition arises from the complex interactions of thousands of cellular proteins. Research that focuses on the large-scale study of proteins is called proteomics. This course introduces students to the techniques utilized and the scientific questions being addressed in this newly emerging discipline. Student participation and the use of original literature will be emphasized. In the laboratory students will perform two-dimensional gel electrophoresis, yeast two-hybrid analysis and other selected techniques associated with the identification and characterization of proteins.

Prerequisite: 220 and CHEM 211, or permission of the instructor. BISC 219 is recommended.
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.25

**BISC 330 Seminar**

*Allen*

NOT OFFERED IN 2003-04.

Prerequisite: 209 or 220 or permission of instructor
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

**BISC 331 Seminar**

*O'Brien*

Topic for 2003-04: Topics in Ecophysiology: Stable Isotope Ecology. This course will examine a new and exciting interface between ecology and physiology, in which naturally-occurring variation in the isotope ratios of C, N, O, and H can be used as "fingerprint" of biochemical, physiological, ecological, and ecosystem processes. These fingerprints reveal clues about how plants and animals interact with their environments. They can also be used to gain insights about past environments and the animals that inhabited them. The course format will be presentation and discussion of primary literature, after a segment to teach basic principles. Topics may include (but are not limited to) studies of migration, nutritional physiology, diet analysis, food web analysis, nutrient cycling, and paleoecology.

Prerequisite: Two of the following: 201, 203, 207, 209, 210 or 222, or permission of instructor
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.0

**BISC 332 Advanced Topics in Neuroscience**

*Berger-Sweeney*

**Topic for 2003-04: Animal Behavior.** Why do animals do what they do? Is it possible to unravel animal behavior? This course will explore and compare the behavioral repertoires of several different species, including insects, birds, fish, rodents and primates. The behaviors will range from feeding and reproductive strategies to maternal-infant relationships and social organization. We will emphasize neural mechanisms that underlie these behaviors. Not open to first-year students.

Prerequisite: BISC 203 or 213. Not open to students previously enrolled in BISC 318 in Spring 1998.
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

**BISC 350 Research or Individual Study**

Prerequisite: Open by permission of instructor, ordinarily to students who have taken at least four units in biology.
Distribution: None

**Directions for Election**

A major in Biological Sciences includes eight biology courses, at least six of which must be taken at Wellesley, plus two units of college chemistry. BISC 110 and 111 or their equivalent are required for the major. Four 200-level courses are required, with at least one course from each of the following three groups: (206, 216, 219, 220-Cell Biology); (202, 207, 213, 222-Systems Biology); (201, 202, 209, 210-Community Biology). A minimum of two 300-level courses are also required for the major. One of these courses, exclusive of 350, 360, or 370 work, must include laboratory and must be taken at Wellesley. Additional chemistry beyond the two required units is strongly recommended or required for certain 300-level courses.

Chemistry courses 221 and 328, and Biological Sciences 350, 360, and 370 do not count toward the minimum major.

BISC 107, 108, and 109, which do not count toward the minimum major in Biological Sciences, do fulfill the College NFS distribution requirements 108 and 109 as laboratory sciences; 107 as a nonlaboratory science course. BISC 109, 111 (and 111X), and 201 fulfill the QR overlay course requirements.

Within the major, students may design a program in general biology or one which emphasizes subjects dealing with animals, plants, microbes, or cellular/molecular mechanisms. A broad training in the various aspects of biology is recommended.

A minor in Biological Sciences (five units) consists of: (A) two 100-level units and (B) two 200-level units, each of which must be in a different group as described in the first paragraph above under major requirements, and (C) one 300-level unit, excluding 350, which must be taken at Wellesley. Four of the five courses for a minor must be taken at Wellesley. Chemistry is recommended. Students planning a minor should consult the chair.

Students interested in the interdepartmental major in Biological Chemistry are referred to that section of the catalog where the program is described. They should consult with Ms. Allen, the director of the Biological Chemistry program.

Students interested in the interdepartmental major in Neuroscience are referred to the section of the catalog where this program is described. They should consult with Ms. Belz, director of the Neuroscience program.

Students interested in the interdepartmental major in Environmental Studies are referred to this listing in the catalog where the program is described. They should consult with Ms. DeSombré or Ms. Rodenhouse, co-directors of the Environmental Studies program. Students interested in concentrating in community biology may wish to supplement and enrich their work at Wellesley by taking Extradepartmental courses offered through the Marine Studies Consortium or the Seminar in Environmental Science (SES) offered each fall at the Ecosystems Center of the Marine Biological Laboratory, Woods Hole, Mass. Students are referred to the sections of the catalog titled Extradepartmental and Special Academic Programs where these opportunities are described.
Department of Chemistry

Professor: Hicks, Kolodny. Coleman, Hearn. Wolfson, Fuller-Stanley (Chair)

Associate Professor: Haines, Aravaninayagam, Miwa

Assistant Professor: Reisberg, Verschoor, Flynn

Visiting Assistant Professor: Wicht

Senior Instructor in Chemistry Laboratory: Turnbull, Doe, Hall, Shawcross

Instructor in Chemistry Laboratory: McCarthy, Quadle

Unless otherwise noted, all courses meet for three periods of lecture/discussion and one 3-hour laboratory appointment weekly. Chemistry 101, 306, and the selected topics courses will generally be taught without laboratory, but may include laboratory for some topics.

The Chemistry Department reviews elections of introductory chemistry students and places them in [110] 105, [111] 205, or 120 according to their previous preparation and Advanced Placement (AP) scores. Students wishing to enter Chemistry 211 based on an AP score must present a laboratory notebook or other evidence of prior laboratory work to the department chair.

Ordinarily, students who have taken one year of high school Chemistry should elect Chemistry [110] 105 followed by either Chemistry [111] 205 or 211. Students with more than one year of high school Chemistry normally elect Chemistry 120.

CHEM 101 Contemporary Problems in Chemistry
Reisberg

Topic for 2003-04: Understanding Drugs. A study of a wide variety of drugs, both legal and illegal. The focus will be on how these molecules affect our minds and bodies based on an understanding of their biochemistry. Topics will include antibiotics, steroids, stimulants, intoxicants, narcotics, hallucinogens and addiction. The history, discovery, development, testing, regulation and prohibition of these substances will also be considered.

Prerequisite: Open to all students except those who have taken any other Chemistry course.

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.0

CHEM 102 Contemporary Problems in Chemistry with Laboratory
Reisberg

Topic for 2003-04: Understanding Drugs. A study of a wide variety of drugs, both legal and illegal. The focus will be on how these molecules affect our minds and bodies based on an understanding of their biochemistry. Topics will include antibiotics, steroids, stimulants, intoxicants, narcotics, hallucinogens and addiction. The history, discovery, development, testing, regulation and prohibition of these substances will also be considered. The laboratory will include synthesis and analysis of an analgesic and an intoxicant, plus the detection of drugs in our bodies and on currency.

Prerequisite: Open to all students except those who have taken any other Chemistry course.

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.0

CHEM 105 Fundamentals of Chemistry with Laboratory
Staff

This course is designed for students majoring in the physical and biological sciences as well as those wishing an introduction to modern molecular science. Core principles and interesting applications of chemistry will be combined to provide students with a conceptual understanding of chemistry that will help them in both their professional and everyday lives. Topics will include principles of atomic and molecular structure including nuclear chemistry, molecular energetics, an introduction to chemical equilibrium, chemical kinetics and classes of chemical reactions. The laboratory work introduces students to synthesis and structural determination by IR and other spectroscopic techniques, molecular modeling, periodic properties, statistical analysis and various quantitative methods of analysis.

Prerequisite: 105 is designed for students who have completed one year of high school chemistry and mathematics equivalent to two years of algebra. Students who do not meet these prerequisites and who wish to take 110, 105 should contact the department chair. Students must have fulfilled the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken 110.

Distribution: Natural and Physical Science or Mathematical Modeling

Semester: Fall, Spring

Unit: 1.25

CHEM 111 Introductory Chemistry II with Laboratory
Staff

A continuation of Chemistry 110 that builds upon the principles developed in that course. Topics include the quantum nature of matter, the orbital model of atomic structure, chemical periodicity, orbital models of chemical bonding, properties of solutions, acid/base chemistry, solubility and complexation, transition metal chemistry, and nuclear chemistry. The laboratory includes additional experience with instrumental and non-instrumental methods of analysis, sampling, computational chemistry, and solution equilibria. This course will be offered for the last time in Fall 2003. Thereafter it will be replaced by CHEM 205.

Prerequisites: 110 and fulfillment of the basic skills component of the Quantitative Reasoning requirement.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall 2003

Unit: 1.35

CHEM 120 Intensive Introductory Chemistry with Laboratory
Kolodny

Chemistry 120 is a one-semester course for students who have completed more than one year of high school chemistry, replacing Chemistry [110] 105 and [111] 205 as a prerequisite for more advanced chemistry courses. It presents the topics of nuclear chemistry, atomic structure and
bonding, periodicity, kinetics, thermodynamics, electrochemistry, equilibrium, acid/base chemistry, solubility and transition metal chemistry. All of these topics are presented in the context of both historical and contemporary applications. The laboratory includes experiments directly related to topics covered in lecture, an introduction to statistical analysis of data, molecular modeling and computational chemistry, instrumental and classical methods of analysis, thermochromy and solution equilibria.

Prerequisite: Open only to students who have taken more than one year of high school chemistry and have fulfilled the basic skills component of the Quantitative Reasoning requirement. Not open to students who have completed [110] 105 and/or [111] 205.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall

Unit: 1.25

CHEM 205 Chemical Analysis and Equilibrium with Laboratory

Staff

This course builds on the principles introduced in Chemistry 105, with an emphasis on chemical equilbrium and analysis, and their role in the chemistry of the environment. Topics will include chemical reactions in aqueous solution with particular emphasis on acids and bases, solubility and complexation, electrochemistry, atmospheric chemistry, photochemistry and smog, global warming and acid deposition, sampling and separations, modeling of complex equilibrium and kinetic systems, statistical analysis of data, and solid state chemistry of ceramics, zeolites and new novel materials. The laboratory work includes additional experience with instrumental and non-instrumental methods of analysis, sampling, computational chemistry and solution equilibria.

Prerequisites: 105 and fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken [111] 105 or 120.

Distribution: Mathematical Modeling or Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall, Spring

Unit: 1.25

CHEM 211 Organic Chemistry I with Laboratory

Fulcher-Stanley, Miwa, Hearn, Wicht

Topics covered include: stereochemistry, synthesis and reactions of alkanes, alkenes, alkynes, alkyl halides, alcohols and ethers, nomenclature of organic functional groups, IR, and GC/MS.

Prerequisite: 105 or 111, or 120 or permission of the department.

Distribution: Natural and Physical Science

Semester: Fall, Spring

Unit: 1.25

CHEM 221 Biochemistry I: Structure and Function of Macromolecules with Laboratory

Wolffson

A study of the chemistry of macromolecules, especially nucleic acids and proteins, with emphasis on structure-function relationships and methodology; an introduction to enzyme kinetics and mechanisms.

Prerequisite: 211 and RISC 220

Distribution: Natural and Physical Science

Semester: Fall

Unit: 1.25

CHEM 222 Introduction to Biochemistry with Laboratory

R. Wolffson

A study of the chemistry of macromolecules with emphasis on structure-function relationships; an introduction to bioenergetics, enzyme kinetics, and metabolism.

Prerequisite: 211 and 311

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.25

CHEM 231 Physical Chemistry I with Laboratory

Arumainayagam

This course establishes and develops the principles that are used to explain and interpret the observations made in other branches of chemistry. Two major topics, chemical thermodynamics and kinetics, are introduced. Properties of solutions and gases are examined using these principles. Applications to other areas of chemistry will be discussed. The laboratory segment of the course incorporates statistical analysis of measured data.

Prerequisite: [111] 205 or 120, or by permission of the department, and MATH 116, 116Z, or 120 and PHYS 104 or 107.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall

Unit: 1.25

CHEM 232 Physical Chemistry for the Life Sciences with Laboratory

Kolody

An examination of several topics in physical chemistry, with an emphasis on their applications to the life sciences. Topics include quantum chemistry and spectroscopy, electrochemistry, chemical thermodynamics and kinetics.

Prerequisite: [111] 205 or 120, or permission of the department, and MATH 116, 116Z, or 120 and PHYS 104 or 107.

Distribution: Natural and Physical Science or Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Spring

Unit: 1.25

CHEM 250 Research or Individual Study

Prerequisite: Open by permission to students who have taken [111] 205 or 120. This course cannot be counted toward a minimum major in Chemistry.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

CHEM 251 Research or Individual Study

This course may count toward the research requirement for the chemistry major if the following criteria are met: the student registers for 251, writes an 8-10 page (minimum) paper on the research and gives a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrating a familiarity with searching the chemical literature.

Prerequisite: Open by permission to students who have taken [111] 205 or 120. This course cannot be counted toward a minimum major in Chemistry.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

CHEM 261/361 Analytical Chemistry with Laboratory

Flyn

Classical and instrumental methods of quantitative analysis, analytical separations, and statistical treatment of data. Topics will include electrochemical, spectroscopic, and chromatographic chemical analysis with emphasis on instrument design and function and method development. The course work emphasizes the practical applications of chemistry to environmental and industrial problems. Assignments will be tailored to the level (200 or 300) for which the student is registered.

Prerequisite: 211. Not open to students who have taken 361 previously.

Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.

Semester: Fall

Unit: 1.25

CHEM 306 Seminar

Topic A: The History of Chemistry – From Stone Age Metallurgy to Nanotubes

Coleman

An examination of the history of chemistry through the ages. Emphasis will be placed on early metallurgy, Chinese and Arabic alchemy, phlogiston, the discovery of the elements and the development of the periodic table, evolving concepts of chemical combination, the rise of structural chemistry, the development of the chemical industry, the nineteenth-century battles between theory and practice, the creation of the new elements and the pervasive role of chemistry in the twentieth and twenty-first centuries. Texts will include Lavoisier’s Elements of Chemistry, the Norton History of Chemistry and Cathy Cobb’s Magic, Mayhem and Mavericks: The Spirited History of Physical Chemistry.

Prerequisite: Two units of Chemistry above the 100 level.

Distribution: Natural and Physical Science

Semester: Fall

Unit: 1.0

Topic B: Medical and Biological Applications of Magnetic Resonance

Kolody

The field of magnetic resonance includes both spectroscopy and imaging. Applications in chemistry, biology and medicine range from the determination of structures of macromolecules using multidimensional nuclear magnetic resonance spectroscopy (NMR) to the observation of brain activation using functional magnetic resonance imaging (MRI). The theoretical and instrumental basis of NMR spectroscopy and imaging will be presented. Examples of applications of these techniques will be taken from the current scientific literature. The seminar will be participatory, with each student making formal class presentations.

Prerequisite: Two units of Chemistry above Grade I level and permission of instructor.

Distribution: Natural and Physical Science

Semester: Spring

Unit: 1.0

CHEM 313 Organic Chemistry II with Laboratory

Hearn, Miwa

A continuation of 211. Includes spectroscopy, synthesis, reactions of aromatic and carbonyl compounds, amines, and carbohydrates. In addition, students are expected to study chemical literature and write a chemistry review-paper.

Prerequisite: 211

Distribution: Natural and Physical Science

Semester: Fall, Spring

Unit: 1.25
CHEM 319 Seminar. Selected Topics in Organic Chemistry
NOT OFFERED IN 2003-04.
Prerequisite: 313
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

CHEM 328 Biochemistry II: Chemical Aspects of Metabolism with Laboratory
Hicks
An examination of reaction mechanisms, mechanisms of enzyme and coenzyme action; structures and metabolism of carbohydrates and lipids.
Prerequisite: 221 or 222
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.25

CHEM 329 Seminar. Selected Topics in Biochemistry
NOT OFFERED IN 2003-04.
Prerequisite: One semester of Biochemistry and permission of instructor.
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

CHEM 333 Physical Chemistry II with Laboratory
Arumaitaynagam
Quantum Chemistry and spectroscopy; structure of solids. Introduction to computational Chemistry.
Prerequisite: 231, PHYS 106 or 108 and EXTD 215.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: Spring
Unit: 1.25

CHEM 341 Inorganic Chemistry with Laboratory
Coleman
Review of atomic structure, multielectron atoms, the periodic table and periodicity, chemical applications of group theory, molecular orbital theory, the chemistry of ionic compounds, generalized acid/base theories, transition metal complexes, organometallic chemistry, catalysis, and bioinorganic chemistry. The laboratory introduces a variety of experimental methods used in inorganic synthesis including non-aqueous solvent, high temperature, inert atmosphere and vacuum techniques as well as techniques in computational chemistry and spectroscopic methods of characterization.
Prerequisite: 313
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.25

CHEM 350 Research or Individual Study
Prerequisite: Open by permission to students who have taken at least three units in chemistry above the 100 level. Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHEM 350H Research or Individual Study
Prerequisite: Open by permission to students who have taken at least two units in chemistry above the 100 level.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CHEM 351 Research or Individual Study
This course may count toward the research requirement for the chemistry major if the following criteria are met: the student registers for 351, writes an 8-10 page (minimum) paper on the research and gives a presentation to the chemistry department during one of the two research seminar presentation periods. The paper must contain substantial literature references, demonstrate a familiarity with searching the chemical literature.
Prerequisite: Open by permission to students who have taken at least three units in chemistry above the 100 level.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHEM 360 Senior Thesis Research
Prerequisite: By permission of department. Students in 360 and 370 will be expected to participate regularly in the departmental honors seminar. The seminar provides a forum for students conducting independent research to present their work to fellow students and faculty. See Academic Distinctions.
Distribution: None. Counts toward the research requirement for the Chemistry major.
Semester: Fall, Spring
Unit: 1.0

CHEM 370 Senior Thesis
Prerequisite: 360
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election
Any student who plans to take chemistry beyond [111] 205 or 120 should consult one or more members of the Chemistry Department faculty. The Department Handbook, available at the department office, Science Center 147, contains specific suggestions about programs and deals with a variety of topics including preparation in mathematics and physics, graduate programs, and careers of former majors.

The Chemistry core curriculum was revised in academic year 2002-03. For students in the class of 2007 and beyond and those currently who wish to major in chemistry but have taken fewer than three chemistry courses the major will consist of [110] 105 and [111] 205 or 120; 211; 231 or 232; 313; three from among: 221 or 222, 333, 341, 361 and two additional courses in Chemistry at the 200 or 300 level, at least one of which must include laboratory. A lab-based 350 or 351 can count as one of the additional courses. All students who plan to major in chemistry must complete a minimum of one unit of research/independent study. The research requirement may be earned during the academic year by completing a 251, 351 or 360. To obtain research credit toward the major all of these must culminate in the writing of a chemistry paper on the project and a presentation in the department. The research requirement may also be fulfilled by participating in a summer research program and meeting the stipulations regarding the paper and presentation. Students must arrange to have the research project approved by a faculty member in the Chemistry department before starting the project. The research may be conducted on or off campus and must be for a minimum of 8 weeks. MATH 116 or 120 and PHYS 106 or 108 are required. The mathematics and physics courses may be counted toward a minor in those departments. Early completion of the Mathematics and Physics requirements is encouraged. (Students who begin Mathematics at 115 or 116 are encouraged to enroll in 116Z.)

Students planning graduate work in some areas of chemistry or closely allied fields should strongly consider taking Chemistry 333 and additional Mathematics and Physics courses. MATH 216/PHYS 216 (Mathematics for the Sciences II) is particularly appropriate for students interested in physical or inorganic chemistry. Normally no more than three units of chemistry taken from another institution may be counted towards the major.

Students interested in the interdisciplinary major in Biological Chemistry are referred to the section of the catalog where that major is described. They should also consult with the director of the Biological Chemistry program.

A minor in Chemistry includes [110] 105 and [111] 205 or 120; 211; 231 or 232; a choice of 221 or 222 or 341 or 361; one additional 200- or 300-level unit, excluding 350/351. The mathematics and physics prerequisites for 231 or 232 must also be satisfied. Normally no more than one unit in chemistry from another institution may be counted toward the minor.

The American Chemical Society has established a set of requirements in various areas which it considers essential for the training of chemists. Students wishing to meet the standard of an accredited chemist as defined by this society should consult the chair of the Chemistry Department.

Teacher Certification
Students interested in obtaining certification to teach chemistry in the Commonwealth of Massachusetts should consult the chair of the Education Department.

Placement and Exemption Examinations
For exemption and placement into the next higher course, students will be expected to submit laboratory notebooks, reports, or other evidence of laboratory experience. A student who has scored well (4 or 5) on the Advanced Placement examination usually takes 120 or goes directly into Organic Chemistry 211. Similarly, students with high scores on the International Baccalaureate Examination can elect 211. If a student chooses to start in Organic Chemistry, she should confer with an organic instructor before the course begins. If an AP student with a score of 4 or 5 completed Chemistry 120 or Chemistry 105/205, she will receive the appropriate introductory chemistry credit but will receive no AP credit.

Credit for Courses Taken at Other Institutions
In order to obtain Wellesley credit for any Chemistry course taken at another institution during the summer or the academic year, approval must be obtained from the chair of the department prior to enrolling in the course. In general, courses from two-year colleges will not be accepted at any level. 300-level credit will not be approved for the second semester of organic chemistry taken at any other institution. These restrictions normally apply only to courses taken after enrollment at Wellesley. Transfer students wishing to obtain credit for chemistry courses taken prior to enrollment at Wellesley should consult the chair of the department.

Withdrawal from Courses with Laboratory
Students who withdraw from a course which includes laboratory, and then elect that course in another semester, must complete both the lecture and laboratory portions of the course the second time.
CHIN 101-102 Beginning Chinese
D. Chen, Zhao
An introductory course that teaches the skills of listening and comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on both linguistic aspects (pronunciation, vocabulary, and grammar) and sociocultural strategies in communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Four 70-minute classes plus one 30-minute small group session. Each semester earns 1.25 units of credit, however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: None. Open to students with no background or previous Chinese language training.
Distribution: None
Semester: Fall, Spring
Unit: 1.25

CHIN 103-104 Advanced Beginning Chinese
Ma
An introductory course that teaches the skills of listening and comprehension, speaking, reading, and writing in Mandarin Chinese. Emphasis is on both linguistic aspects (pronunciation, vocabulary, and grammar) and sociocultural strategies in communication. Computer programs for pronunciation, listening comprehension, grammar, and writing Chinese characters will be used extensively. Three 70-minute classes. Each semester earns 1.0 unit of credit, however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: Open to students who can speak some Chinese (Mandarin or other Chinese dialect), or who have some knowledge about reading and writing Chinese characters. Department placement test is required.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHIN 201-202 Intermediate Chinese
D. Chen, Zhao
Further training in listening comprehension and oral expression. Continued work on the Chinese writing system, emphasizing the acquisition of an acceptable expository style. Four 70-minute classes plus one 30-minute small group session. Each semester earns 1.25 units of credit, however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: 101-102 or permission of instructor.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.25

CHIN 203-204 Advanced Intermediate Chinese
Lam
Further training in listening comprehension and oral expression. Continued work on the Chinese writing system, emphasizing the acquisition of an acceptable expository writing skill. Three 70-minute classes. Each semester earns 1.0 unit of credit, however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: 103-104 or permission of instructor.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

CHIN 206 The Chinese Literary Imagination I: Beginnings to the Northern Song Dynasty (in English)
J. Chen
This is a thematic introduction to Chinese literature in translation, tracing the development of poetry, narrative, and criticism up through the Northern Song dynasty (960-1127). We will focus on the representation of the self in literary texts – its authenticity and/or theatricality – with particular attention to historical contexts, issues of genre and gender, and the pressures exerted by political and religious ideologies. Where it is relevant, we will also take up some concerns of recent theoretical approaches to literary and cultural studies.
Prerequisite: None
Distribution: Historical Studies or Language and Literature
Semester: Fall
Unit: 1.0

CHIN 207 The Chinese Literary Imagination II: The Song Dynasty to the Fall of Imperial China (in English)
J. Chen
This is the second half of a thematic introduction to Chinese literature in translation, focusing on the vernacular genres of the Song, Yuan, Ming, and Qing dynasties. We will explore the ways in which the self is constructed in the late imperial period, across genres such as diaries and informal prose, drama, short fiction and novels, and poetry. Questions of gender and sexuality, urban culture, and historical context will also be addressed.
Prerequisite: None
Distribution: Historical Studies or Language and Literature
Semester: Spring
Unit: 1.0

CHIN 208 The Chinese Literary Imagination III: Late Qing to the Present Day (in English)
Huss
This is a thematic introduction to modern Chinese literature which travels from the Late Qing period through the twentieth century to the present day. We will explore how the individual and the nation are constructed in short fiction, poetry, essays and novels. Topics such as revolution and censorship, exile and the foreign, urban and rural identity, gender and sexuality will guide discussions. We will view the cinematic versions of several contemporary novels as well.
Prerequisite: None
Distribution: Historical Studies or Language and Literature
Semester: Spring
Unit: 1.0

CHIN 243 Chinese Cinema (in English)
Huss
Contemporary film from Hong Kong, Taiwan, and the People’s Republic of China. This course investigates the history of the Chinese film industry; the issue of cultural hegemony (the power Hollywood is thought to exert over film industries of the “Third World”); cinematic constructions of Chinese gender, family, nationhood, and individuality; and applications of contemporary Western film theory.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Fall
Unit: 1.0

CHIN 250 Research or Individual Study
Prerequisite: Open by permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

CHIN 250H Research or Individual Study
Prerequisite: Open by permission of instructor.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

CHIN 301 Advanced Chinese I
Lam
This course is designed to further expand students’ comprehension, speaking, reading, and writing skills. Reading materials will be selected from newspapers, short stories, essays, and films. Three 70-minute classes conducted in Chinese.
Prerequisite: 201-202 or permission of instructor.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

CHIN 302 Advanced Chinese II
Huss
Advanced language skills are further developed through reading and writing. Reading materials will be selected from a variety of authentic Chinese texts. Audio and video tapes will be used as study aids. Three 70-minute classes.
Prerequisite: 301 or permission of instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

CHIN 303 Advanced Chinese Conversation
Staff
This course is designed for students who wish to refine their proficiency in Chinese, enhancing it with specialized functional terminology and modes of expression for specific contexts and situations. The emphasis is placed on listening comprehension, speaking skills and cultural understanding. Subject to Dean’s Office approval.
Prerequisite: At least two years of Chinese or permission of instructor.
Distribution: Language and Literature
Semester: Fall, Summer
Unit: 1.0

CHIN 306 Advanced Reading in Twentieth-Century Literature and Culture
Ma
This course is designed to further expand and refine students’ grammatical proficiency and communicative skills through intensive reading of authentic Chinese materials, such as short stories, newspapers, and essays and viewing of films and television broadcasts. Particular emphasis also given to increasing level of literary appreciation and critical awareness of the sociocultural contexts that shape readings. Three 70-minute classes conducted in Chinese.
Prerequisite: 203-204
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

CHIN 307 Advanced Readings in Contemporary Issues
Lam
A selection of texts ranging from the May Fourth Period to the current day. Three 70-minute classes.
Prerequisite: 306 or permission of instructor.
Distribution: Language and Literature
Semester: Spring
Unit: 1.0
CHIN 310 Introduction to Classical Chinese
J. Chen
Basic grammar and vocabulary of Classical Chinese, explored through readings selected from canonical sources in literature, philosophy, history and law. Special attention will be paid to grammatical differences between classical and modern Chinese. Students with an interest in Art History, History and/or Literature are highly encouraged to take this course to improve their reading skills. Three 70-minute classes.
Prerequisite: 301, 302, 306, or permission of instructor
Distribution: Language and Literature
Semester: Spring
Unit: 1.0

CHIN 316 Twentieth-Century Literature
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. Reading and discussion of modern Chinese literature. Readings will include selections from novels, short stories, and poetry as well as critical essays. Three 70-minute classes conducted in Chinese.
Prerequisite: 302, 306, 307, 310 or permission of instructor
Distribution: Language and Literature
Semester: N/O. Offered in 2004-05.
Unit: 1.0

CHIN 330 Women in Chinese Literature (in English)
NOT OFFERED IN 2003-04. This course surveys over 3,000 years of Chinese literature, examining how certain notions and paradigms about Chinese womanhood are developed, molded, adopted, and perpetuated by both male and female writers. Topics will include the chaste woman tradition, gender ventriloquism (particularly male versifying from a female point of view), the lyrics of Li Qingzhao, and other popular images of women in traditional poetry, fiction and drama.

CHIN 340 Topics in Chinese Literature (in English)
Huss
Topic for 2003-04: Literature of the Chinese Diaspora. The idea of "Zaguow/Gwogw," the motherland, has been central to Chinese literary writing throughout the past century. Novelists and poets in China are politicians by default and bear witness in their lives and deaths, to the tremendous economic, political and cultural transformation that has occurred in twentieth-century mainland China. But what does China mean to writers of the Chinese diaspora? Writers in Taiwan, Hong Kong, Japan, North America, Europe? We will probe representations of the self, the martial hero, exile, gender, sexuality, colonialism, nation and how all of these are (or are not) tied to the concept of a motherland. All of the novels read for this course were written in Chinese outside of mainland China and are available in English translation. This course can be repeated once due to its changing content.

CHIN 349 Mind, Place, and Landscape in Traditional China (in English)
J. Chen
What is a place? How do writers and painters depict places? What does it mean to describe places one has never visited; or to create places that do not actually exist? In this course, we will examine the representation of places and landscapes across a variety of traditional Chinese media, including historical texts, poetry, fiction, drama, tomb art, paintings, literary and art criticism, travel diaries, and pilgrimage accounts. Topics will include spiritual and mental journeys, the imagination of the afterworld, landscape as portraiture, the mapping of empire, and dram narratives.

Directions for Election
The goal of the Chinese major is to provide students with a solid foundation in the disciplines of Chinese language and literature through intensive language training and broad exposure to Chinese literary and cultural traditions through literature/culture courses taught in both English and Chinese. Students are strongly encouraged to begin their Chinese language study during their first year at Wellesley. Students with a Chinese language background must take a placement test to determine their proper courses. In addition, the Chinese Department strongly recommends that all majors spend a summer and/or a semester of their junior year studying Mandarin at an approved program in China, Taiwan, or Hong Kong.

The Chinese major consists of a minimum of ten courses. The following three sets of guidelines for the Chinese major have been devised in order to meet the needs of students who come to Wellesley with differing Chinese language backgrounds.

A. Students beginning their Chinese language study at Wellesley in 101-102, 103-104 or 201-202 shall complete the ten-course Chinese major as follows: (1) Five language courses from among 101-102* or 103-104*; 201-202* or 203-204*; 301, 302, or 306; (2) 310 or 316; (3) two literary courses from 206, 207, 208, 243 (taught in English); (4) two additional literature/culture courses from among 330, 340, 349 (340 may be repeated once for credit).

B. Students beginning their Chinese language study at Wellesley in 203-204 shall complete the ten-course Chinese major as follows: (1) Three language courses consisting of 203-204* and 303, 306 or 307; (2) 316 and an additional 300-level course in Chinese; (3) two literary courses from 206, 207, 208 and 243 (taught in English); (4) three additional literature/culture courses taught in English from among 330, 340, 349 (340 may be repeated once for credit).

C. Majors beginning their Chinese language study at Wellesley in third-year Chinese shall complete the 10-course Chinese major as follows: (1) Two language courses from among 301, 302, 303, 306, 307; (2) 310 or 316; (3) two literary courses from 206, 207, 208, 243 (taught in English); (4) five additional literature/culture courses from among 330, 340, 349 (340 may be repeated once for credit).

Students interested in an interdepartmental major (and minor, if applicable) in Chinese Studies, are referred to the listing for this interdepartmental program.

Certificate Program
Students interested in seeking certification in teaching Chinese should speak with the chair of the Chinese Department and Education Department early in their college career.

Study Abroad
A maximum of three courses taken abroad may be counted toward the Chinese major. Students should note that more credit may be counted toward the Wellesley degree. In order to obtain credit for study abroad, students must obtain prior consent from the Registrar's Office and the Chinese Department chair, and must pass a placement test administered by the Chinese Department upon return to Wellesley. In addition, it is essential that proof of course content and performance in the form of syllabi, written work, examinations, and grades be presented to the Chinese Department chair.

Advanced Placement Policies and Language Requirement
A student entering Wellesley must have an Advanced Placement score of 4 or 5 to satisfy the foreign language requirement.

Transfer Credits
The transfer of credit (either from another American institution or from a language program abroad) is not automatic. A maximum of three units may be transferred toward the major. Students wishing to transfer credit should be advised that a minimum of six units of course work must be completed in the Chinese Department at Wellesley. Transfer students from other institutions are required to take a placement test administered by the Chinese Department. It is essential that proof of course content and performance in the form of syllabi, written work, examinations, and grades be presented to the Chinese Department chair.
Chinese Studies

AN INTERDEPARTMENTAL MAJOR

Directors: Ma (Chinese), Giersch (History)

Chinese Studies is an interdisciplinary major that is offered as an alternative to the Chinese departmental major and is designed for students whose primary interests are in areas other than language and literature. Ten units are required for the major. Students must normally complete at least five units in Chinese language courses. They must also take a minimum of five non-language units, two of which must be at the 300 level and which must focus on China.

At least three of the non-language units must be from outside the Chinese Department. A minimum of three of the non-language courses must be taken at Wellesley, including both of the 300-level courses. One of the non-language units may deal with a part of East Asia other than China (e.g., Korea, Japan, Vietnam).

Among the non-language units, majors (starting with the Class of 2005) must take at least one unit in each of the following categories:

1) Art History, Chinese Literature or Cinema (in English), Music, or Religion. Note: Courses in Philosophy may also count for this distribution requirement if offered at Wellesley in the future or if taken for transfer credit at another institution and approved by the program directors.

2) Anthropology, History or Political Science. Note: Courses in Economics, or Sociology may also count for this distribution requirement if offered at Wellesley in the future or if taken for transfer credit at another institution and approved by the program directors.

Students with native or near-native language skills must also complete ten units for the major; but they may count more than five non-language units toward the major. Majors are encouraged to spend at least a summer or a semester studying in a Chinese-speaking part of the world.

Majors who have demonstrated exceptional ability and an unusual degree of independence in their coursework may be eligible to participate in the Honors Program. Honors candidates ordinarily enroll in Chinese Studies 360 during the fall and Chinese Studies 370 during the spring semester of the senior year and are expected to write a thesis based substantially on original research in primary sources, although these sources do not necessarily have to be in Chinese. Students interested in the Honors Program are strongly encouraged to work with their faculty adviser(s) to identify a thesis topic no later than the spring semester of the junior year and to begin their research during the following summer. They should also consult with the program directors about additional policies concerning honors work in the major.

Cinema and Media Studies

AN INTERDEPARTMENTAL MAJOR

Director: Viano (Italian Studies)

Advisory Committee: Obeng (African Studies), Kanakasabau (Anthropology), Mekuria (Art), Huss (Chinese), Shelby (English), Gilkain (French), Ward (German), Zimmerman (Japanese), Bishop (Russian), Cushman (Sociology), Gascon-Vera (Spanish), Cregg (Women's Studies), Wood (The Writing Program)

The Cinema and Media Studies (CAMS) major is multicurricular in scope and interdisciplinary in method. Its chief objective is to provide students with the skills to understand and interpret the various forms of the moving image. Audio-visual media have played a dominant role in the cultural life of the century just ended, and promise to figure even more prominently in the century that has just begun. The Cinema and Media Studies program equips students to reflect critically on the prevalence and power of audio-visual media, to analyze in an informed and judicious way specific audio-visual texts, and to appreciate the power of outstanding works of cinematic art. The program aims to substitute active viewing for passive absorption, and to offer students a context and a set of tools with which to assess the media texts that shape the world we all inhabit.

Students majoring in CAMS must take a minimum of nine units, including CAMS 175 and CAMS 231, one unit in the Art Department and one unit in the Sociology Department chosen from among the courses listed below. Two units must be at the 300 level, and only one of them can be a 350. To ensure some concentration, at least four units at the 200 level or above should either be elected from within one department or should center around a particular field within CAMS, such as cinema and video as art, media and identity, media and the culture industry. (For some examples of suitable field concentrations and associated courses, please consult the CAMS Web page.)

Students primarily interested in the computing aspects of arts and multimedia should consult with the Committee on Curriculum and Instruction for advice about an individual major in Media Arts and Sciences. See http://www.wellesley.edu/CS/mmmajor/

CAMS 120/WRIT 125 Women in Film
Wood (The Writing Program)

To a large extent, film is about watching, and much film is about watching women. This course provides basic instruction in film analysis, and then makes a foray into theories of cinema. How does the camera work, not only to display its characters, but also to direct the gaze upon them? What are the relationships between the visual spectacle and the progress of the film's story? Writing assignments ask students to observe, analyze, interpret, and explain. Films will include early films (Chaplin, Arzner), late films (American Beauty), films of the 40s, and
something by Hitchcock. This course satisfies the Writing 125 requirement and counts as a unit towards a major in Cinema and Media Studies. Includes a third session each week.

Prerequisite: Open to all first-year students.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

CAMS 175 Introduction to Cinema Studies

Viano

In this introductory course students will learn about cinema studies as a recently formed discipline. Starting with a reflection on the difference between film and cinema, we will question the field's theoretical lynxpins, such as spectatorship and authorship, intertextuality and cultural production. The role played by audio-visual technology in the formation of what is called modernity's structure of feeling will be investigated through the analysis of feature films, documentaries, animation, and various videotaped materials. Finally, students will get a sense of film history, with a special focus on silent films and cinema's beginnings worldwide.

Prerequisite: Preference given to Cinema and Media Studies majors, first-year students and sophomores.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

CAMS 210 Cinema in the 1960s

Viano

This course aims to investigate the "tornado" in the cinema in the 1960s: the birth of ubiquitous New Waves, the interest in avant-garde cinema, and the rise of political filmmaking. We will watch films made in developed as well as developing countries. We will read historical accounts of the cinematic output, together with interviews and manifestos. Finally, we will briefly analyze cinema's critical role as collective memory: films that re-visions the 1960s a few decades later, thus constituting images of history.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

CAMS 231 Film as Art

Shelly

Study of the aesthetic aspect of film through the critical viewing of classic films. Screenings and discussion of outstanding works of cinematic art drawn from various styles and traditions of filmmaking, including the Holywood studio system, independent film, the French new wave, neorealism, surrealism, and the avant-garde. Readings from prominent filmmakers and critics chosen to offer a sense of the development of film aesthetics and of the range of critical opinion on the artistic potential of the medium.

Prerequisite: None. Preference given to Cinema and Media Studies majors.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

CAMS 232 Auteurs: Dancing around the Theme

Viano

Topic for 2003-04: Jarmusch (American independent before it became a fad) and Makhmalbaf (Iran's greatest film chameleon) with Resistance as centering guide. In-depth exploration of two auteurs: directors who, in spite of economic and ideological constraints, successfully encrypted their personal vision and authorial voice in their films. Though the auteurs chosen will vary each year, one shall be non-Western so as to force our gaze into a global perspective. To focus our exploration on the charismatic potential of cinema itself rather than the director's personality, a philosophically relevant theme will act as centering guide, while four films by different directors (to be chosen during the course) will enable our imaginary dance around the globe.

Prerequisite: CAMS 175, or instructor's written permission.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

CAMS 313 Seminar. Who's Afraid of Film Theory?

Viano

NOT OFFERED IN 2003-04. Only twenty years after Louis Lumiere ironically said of his technical marvel, Le Cinémagraphe (1895), that "cinematography is an invention without a future" his quip had already become a laughing matter. Not only had cinema spawned a global business and so as to but had also begun to attract thinkers from various disciplines. The American Hugo Münsterberg's 1916 psychological study of how this "invention without a future" affected people's perceptions, feelings, and cognitive patterns was just the beginning of an international debate that would evolve into an academic discipline with a strong future. Through a balanced selection of (mostly written) texts, this seminar retraces film theory's trajectory and significance, while hopefully exercising students' fear of theory.

63 Cinema and Media Studies
Department of Classical Studies

Professor: Lewcowitz, Marvin*; Starr, Rogers, Dougherty (Chair)
Assistant Professor: Reay
Senior Lecturer: Colatizi
Melion Postdoctoral Fellow: Greene

The Department of Classical Studies offers three closely related major programs: Greek, Latin, Classical Civilization. Majors in Greek and Latin are based entirely on courses in the original languages while the Classical Civilization major combines work in the original languages with courses taught in English on the history, literature, society, and material culture of the ancient world. A related, interdepartmental major, Classical Civilization and Classical and Near Eastern Archaeology, brings together courses in Classical Studies with course work in other departments. Classes in Greek and Latin are conducted in English and encourage close analysis of the ancient texts, with emphasis on their literary and historical values.

The department reserves the right to place a new student in the course for which she sees best prepared regardless of the number of units she has offered for admission. The department requires its own placement test for students interested in enrolling in Latin courses other than Latin 101/102.

Qualified students are encouraged to spend a semester, usually in the junior year, at the Intercollegiate Center for Classical Studies in Rome. For further information about this program, see Directions for Election.

Classical Civilization

AN INTERDEPARTMENTAL MAJOR

The major in Classical Civilization offers the opportunity to explore the ancient world through an integrated, cohesive program of courses worked out by the student and her advisor. Individual programs are tailored to meet students' specific interests, such as Classical Literature, Ancient Theater, Ancient Philosophy and Political Theory, Ancient Religion, and the Classical Tradition. A brochure listing suggested courses for these and other options is available in the Department of Classical Studies and on the Web site www.wellesley.edu/Classical Studies/CLSTWWW/CLSTHome.html.

CLCV 102 Uncovering the Ancient World: An Introduction to the Worlds of Greece and Rome

Starr

Instead of excavating an entire site, archaeologists often start by digging exploratory trenches, an approach this course will take to exploring both what we know about Greece and Rome and, as important, how we know what we know. Through specific investigative projects, we'll explore major topics in the ancient world, such as Homeric Greece, culture and empire in the Athens of Pericles, the founding of Rome, and the interplay of cultures in the Roman empire. We'll probe the various kinds of evidence we have, including literature, art, architecture, religious artifacts, historical documents, and legal cases, and discuss the advantages and disadvantages each type of evidence presents.

Prerequisite: None
Distribution: Historical Studies or Language and Literature
Semester: Spring
Unit: 1.0

CLCV 104 Classical Mythology

Lewcowitz

Achilles' heel, the Trojan Horse, Pandora's box, an Oedipal complex, a Herculean task - themes and figures from Classical mythology continue to play an important role in our everyday life. We will read the original tales of Classical heroes and heroines together with more modern treatments in film and literature. Why do these stories continue to engage, entertain, and even shock us? What is the nature and power of myth? Readings from ancient sources in English translation.

Prerequisite: None
Distribution: Language and Literature or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

CLCV 120/WRIT 125

Topic A: Comedy: Old, New, and Ever Since Colatizi

The comic plays of Greece and Rome are the ancestors of sitcom and soap opera, stage show and screenplay. Aristophanes offers fantasy, political satire, and fierce social commentary. Menander, Plautus, and Terence all feature domestic intrigues, ridiculous dilemmas, and stock characters. We will read and view some of their plays, along with Shakespeare's The Comedy of Errors, Goldsmith's She Stoops to Conquer, Sheridan's The Rivals, Oscar Wilde's The Importance of Being Earnest, and A Funny Thing Happened on the Way to the Forum. Three meetings. This course satisfies the Writing 125 requirement and counts as a unit towards the Classical Civilization major.

Prerequisite: None. Open only to first-year students. Distribution: Language and Literature
Semester: Fall
Unit: 1.0

Topic B: Troy and the Poets Colatizi

NOT OFFERED IN 2003-04. The myths of the Trojan War begin the Classical tradition in literature. In considering how gods and mortals interact, the Greek and Roman poets continually return to these stories as they change their ideas about heroism; divine power; religious obligation; private and public responsibility; sexual passions; glory, death, and the afterlife. We will read selections from Homer's Iliad and Odyssey, the Greek dramatists, and Vergil's Aeneid, as well as modern critics and poets who reinterpret these works. Three meetings. This course satisfies the Writing 125 requirement and counts as a unit towards the Classical Civilization major.

Prerequisite: None. Open only to first-year students. Distribution: Language and Literature
Semester: N/O
Unit: 1.0

CLCV 210/310 Greek Tragedy: Plays, Politics, Performance Dougherty

NOT OFFERED IN 2003-04. The fifth-century Athenian playwrights, Aeschylus, Sophocles, and Euripides, produced brilliant tragedies that continue to haunt us today and to define our notion of drama. At the same time, the Athenian people forged the democratic principles that form the basis for our own political institutions. The element of performance, common to both drama and democracy, provides an important key to understanding this interesting confluence of theater and politics, and this class will combine the close reading (in English) of ancient Greek tragedies with the viewing of a selection of contemporary dramatic performances such as modern Italian cinema, Black Gospel traditions, and contemporary productions of Greek drama. This course may be taken as either 210 or, with additional assignments, 310.

Prerequisite: 210 open to all students; 310 by permission of instructor. Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: N/O
Unit: 1.0

CLCV 211/311 Epic and Empire

Reay

NOT OFFERED IN 2003-04. Alexander the Great is said to have slept with two things under his pillow: a dagger and a copy of Homer's Iliad. Julius Caesar and Augustus traced their lineage back to Aeneas, the hero of Vergil's Aeneid. Epic poetry and empire: coincidence or collision? This course will investigate the relationship of epic poetry and empire, focusing especially on Vergil's Aeneid and Lucan's Civil War within their historical contexts. How is poetry imbued with political meaning? Is epic a prop of imperial ideology or is it a site of resistance? Consideration of the post-classical adaptation of classical paradigms in works such as Milton's Paradise Lost, Barlow's The Columbiad, and Whitman's Leaves of Grass. All works read in translation. This course may be taken as either 211 or, with additional assignments, 311.

Prerequisite: 211 open to all students; 311 by permission of instructor. Distribution: Historical Studies or Language and Literature
Semester: N/O
Unit: 1.0

CLCV 212/312 On the Road: Travel in Literature and Film from Homer's Odyssey to Thelma and Louise Dougherty

If you can't travel yourself, you can always read about it. This course will focus on the lure of travel, the companionship of the road, and the complicated issues of return. We will also consider the impact of gender on the construction of travel, the connection between travel and romance, and the association of travel and knowledge. How do these (and other) themes laid out so forcefully in the Odyssey continue to dominate works of literature and film? Readings will include Homer's Odyssey, Twain's The Adventures of Huckleberry Finn, and Kerouac's On the Road; films will include The Return of Martin Guerre, and Thelma and Louise. This course may be taken as either 212 or, with additional assignments, 312.

Prerequisite: 212 open to all students; 312 by permission of instructor. Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Fall
Unit: 1.0
CLCV 215/313 Women’s Life in Greece and Rome
Lefkowitz
Were the ancient Greeks and Romans misogynists? Did their attitudes set the pattern for discrimination against women in modern European literature and life? Does modern feminist theory help or hinder the investigation of these questions? Reading from ancient historical, religious, medical, and legal documents in English translation. This course may be taken as either 215 or, with additional assignments, 315.
Prerequisite: 215 open to all students; 315 by permission of instructor.
Distribution: Language and Literature or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

CLCV 220 Excavating the “Wine Dark Seas”: An Introduction to Nautical Archaeology
Greene
Why do we care about shipwrecks? What can sunken treasures and even mundane objects tell us about the past? In this course we will examine how and why ancient Greek mariners crossed the “wine-dark seas” for travel, warfare, and especially commerce. Beginning with the practical techniques of nautical archaeology, we will move to a survey of recent discoveries, including wrecks and harbors from the Bronze Age to the Hellenistic Period. Through archaeological evidence, literary sources, and contemporary economic theory, the course will take an interdisciplinary approach to the development of commercial enterprises in the ancient Mediterranean.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

CLCV 232 The Bay of Naples in Antiquity
Colaluzi
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. The Graeco-Roman life of luxury at ancient Italy’s loveliest and most notorious pleasure spot; the interplay of the Roman conception of luxury, decadence, and culture and their manifestation in the rich villas and cities buried by the eruption of Mt. Vesuvius. Selections in translation from Greek and Roman writers; visits to sites, including Pompeii, Herculaneum, Capri, Paestum, Cumae, and the National Museum in Naples. Students will stay in Sorrento for three weeks. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: Application required.
Distribution: Language and Literature or Historical Studies
Semester: N/O. Offered in 2004-05. Unit: TBD

CLCV 234 Roads to Rome: Leading the Roman Life
Marvin
NOT OFFERED IN 2003-04. For Roman families the year was shaped by the agricultural calendar, the day by alternations of work and leisure, and society by hierarchies of class and gender. This course will examine what it meant to lead a Roman life, using both textual evidence (historical and literary) and the physical remains of Roman cities and towns. It will investigate how civic and religious institutions, public spectacles and domestic social rituals shaped the lives of individual Romans.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: N/O
Unit: 1.0

CLCV 236/336 Greek and Roman Religion
Rogers
The founders of Western civilization were not monotheists. Rather, from 1750 BC until AD 500 the ancient Greeks and Romans sacrificed daily to a pantheon of immortal gods and goddesses who were expected to help mortals achieve their earthly goals. How did this system of belief develop? Why did it capture the imaginations of so many millions for over 2000 years? What impact did the religion of the Greeks and Romans have upon the other religions of the Mediterranean, including Judaism and Christianity? Why did the religion of the Greeks and Romans ultimately disappear? This course may be taken as either 236 or, with additional assignments, 336.
Prerequisite: 236, open to all students; 336, by permission of instructor.
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

CLCV 240/REL 240 Romans, Jews, and Christians in the Roman Empire
Rogers and Zellen (Religion)
At the birth of the Roman Empire virtually all of its inhabitants were practicing polytheists. Three centuries later, the Roman Emperor Constantine was baptised as a Christian and his successors eventually banned public sacrifices to the gods and goddesses who had been traditionally worshipped around the Mediterranean. This course will examine Roman era Judaism, Graeco-Roman polytheism, and the growth of the Jesus movement into the dominant religion of the late antique world. Students may register for either CLCV 240 or REL 240. Credit will be given in the department in which the student is registered.
Prerequisite: None

CLCV 345 Slavery and Society in the Graeco-Roman World
Rogers
NOT OFFERED IN 2003-04. Some historians have argued that the development of democracy in ancient Athens depended upon the existence of slave labor in Athens. In Republican Rome, where the children of freed slaves could become Roman citizens, scholars have claimed that the majority of Roman citizens were the descendants of slaves by the end of the first century B.C.E. How was slavery defined in the ancient Near East and the Graeco-Roman world? What were the political, social, and economic effects of slavery upon the Greek city-states and Rome? How did the Romans incorporate ex-slaves into Roman society? Was there any opposition to slavery? In this seminar we will briefly examine slavery in the ancient Near East and then trace the development of slavery in Greece and Rome from the middle of the second millennium B.C.E. until the fourth century C.E.

Classical and Near Eastern Archaeology

AN INTERDEPARTMENTAL MAJOR

Director: Marvin

The purpose of a major in Classical and Near Eastern Archaeology is to acquaint the student with the complex societies of the Old World in antiquity.

The program for each student will be planned individually from courses in the Departments of Anthropology, Art, Classical Studies, History, Philosophy, and Religion as well as from the Architecture and Anthropology programs at MIT. The introductory course in archaeology (Anthropology 206) or its equivalent is required for all archaeology majors.

Students who concentrate in classical archaeology must normally have at least an elementary knowledge of both Greek and Latin, and take both Greek and Roman history as well as Greek and Roman art. Students who concentrate on the ancient Near East must have an elementary knowledge of one ancient Near Eastern language. Attention is called to Hebrew 101-102 and 201-202 and to the Brandeis exchange program.

Students should plan for at least one summer of excavation and/or travel.

**LAT 200 Intermediate Latin I: Petronius; Loud Bash at the Mansion Colaizzi**

Tacitus called him Nero’s “zar of cool” (architct, elegantiae). His *Satyricon* was Europe’s first novel, full of low life and hijinks – both a parody of epic poetry and a pattern for romance novels. Petronius offers a series of comic episodes in Southern Italy involving dubious encounters with gluttons, witches, werewolves, acrobats, singers, party-crashers, and even professors, many of whom gather to hear poetry, eat exotic foods, and drink too much with Trimalchio, the crude millionaire (and former slave). Our selected readings will serve as a review of Latin grammar and an introduction to Latin literature.

LAT 310 Roman Historical Myths
Starr
NOT OFFERED IN 2003-04. Romans based their history in myth and made their history into myths; reading from major authors such as Livy, Vergil, Horace, Ovid, Propertius, and Tacitus, focusing on historical myths such as Romulus and Remus, the Rape of the Sabine Women, Tarquinius Superbus, and Hercules and Cacus, how later Romans reworked those myths to serve current political purposes, and how Romans transformed historical events into powerful myths.
Prerequisite: LAT 201 or permission of instructor.
Distribution: Language and Literature or Historical Studies
Semester: N/O Unit: 1.0

LAT 319 Selected Topics
Reny
Topic for 2003-04: Catullus. Tormented lover, urbanite jester, obsessive abuser, political subversive, poetic revolutionary--the persona of Catullus are as varied as the poems that produce them. This course is a topical investigation of Catullus' poetry and its Roman context. Topics will include: poetry and biography; allusion, aesthetics, and the "New Poetry"; social performance and self-representation; Roman masculinity and femininity; obscenity and invective; sex, poetry, and power. Readings will draw on a variety of theoretical orientations that inform Catullan criticism: biography, psychoanalysis, intertextuality, feminism, New Historicism.

Greek and Latin: All students majoring in Greek must complete four units of 300-level work in the Greek language. All students majoring in Latin are required to complete four units of 300-level work in the Latin language, and study of Vergil, either in 201 or at the 300 level, is strongly recommended. Eight units are required for both majors.

Students majoring in Greek or Latin are advised to elect some work in the other language. It should be noted that work in both Greek and Latin is essential for graduate study in the classics.

Advanced Placement Policies and Language Requirement: A student entering Wellesley must have an Advanced Placement score of 4 or 5 to satisfy the foreign language requirement. All students who wish to elect a 200-level or higher Latin course must take Wellesley's Latin Placement examination. Although AP Latin Literature will be counted as a 200-level course for the major, credit will not be given for AP Vergil if the student elects LAT 201.

Classical Civilization: A student who wishes to major in Classical Civilization should plan with her major advisor an appropriate sequence of courses, which should include one unit each in at least two of the following three areas: (1) Literature (2) History, Society, Religion, Philosophy (3) Art and Archaeology. The major program should ordinarily contain at least four units of work (or two units of 300-level work) in either Greek or Latin, and either CLCV 102 or CLCV 104 and two units at the 300 level, one of which must be CLCV or GRK or LAT, for a total of nine units. Programs proposed for the major must be approved by the major advisor and the department chair.
Cognitive and Linguistic Sciences

AN INTERDEPARTMENTAL MAJOR

Director: Lucas (Psychology)

Cognitive and Linguistic Sciences Advisory Committee: Isaak (Linguistics), Levitt (Linguistics and French), McIntyre (Philosophy), Hildreth (Computer Science)

Lecturer: Isaak

A major in Cognitive and Linguistic Sciences is designed to provide students with the breadth necessary for an interdisciplinary approach to the study of language and mind, as well as with substantive training in one of the component disciplines (Linguistics, Psychology, Philosophy, or Computer Science).

Students majoring in Cognitive and Linguistic Sciences must take a minimum of nine units for the major, including four core units, one from each of the categories below, and a minimum of four electives in a concentration. It is recommended but not required that the ninth course be in a different concentration. Courses eligible for the major are listed below. Students are encouraged to consult the MIT catalog for additional offerings in the major.

Core Courses

Students must fulfill the following four core requirements:

1) Linguistics*: [LANG] LING 114 or PSYC 216
2) Formal Systems Requirement*: CS 111 or [LANG] LING 244 or PHIL 216
3) PHIL 215
4) CLSC 300: Seminar. Topics in Cognitive and Linguistic Sciences

*Where there is a choice, students should choose the course that fits most clearly with their chosen concentration. For example, students concentrating in Linguistics should choose [LANG] LING 114 rather than PSYC 216 and students concentrating in psychology should choose PSYC 216 rather than [LANG] LING 114. Where a choice is not clear, the student should consult with her major advisor.

Concentrations

In designing a concentration, students need to demonstrate the intellectual coherence of their choices. Therefore, concentrations must be designed in close collaboration with each student's major advisor. Students must take at least one 300-level course in their concentration.

Linguistics Students concentrating in Linguistics must elect at least four courses from the following list. Three of these courses must be LING courses, including one 300-level course: [LANG] LING 240, [LANG] LING 322, [LANG] LING 327, [LANG] LING 329, CS 225, EDUC 308, EDUC 310, FREN 211, FREN 308, PHIL 207, PHIL 216, PHIL 349, PSYC 216, PSYC 316, SOC 216, AMST 317 and RUSS 301 may be taken after consultation with the student's advisor.

Students will also be expected to demonstrate proficiency in a foreign language above the College's foreign language requirement (at an intermediate level or above).

Psychology Students concentrating in Psychology must take PSYC 205 and PSYC 314R. In addition students must elect at least two courses from the following list: PSYC 215, PSYC 217, PSYC 218, PSYC 219 or BISC 213, PSYC 316, PSYC 318, PSYC 319, PSYC 345, [LANG] LING 322, BISC 315.

Philosophy Students concentrating in Philosophy must elect at least two courses from the following list: PHIL 207, PHIL 209, PHIL 216, PHIL 217, PHIL 221, PHIL 313, PHIL 314, PHIL 340, PHIL 349. PHIL 345 may be taken after consultation with the student's advisor.

Computer Science Students concentrating in Computer Science must take CS 230 and CS 232. In addition, students must elect at least two courses from the following list: CS 231, CS 235, CS 251, CS 303, CS 305, CS 310, CS 331, CS 332, CS 349 (when the topic for CS 349 is approved by the director).

CLSC 300 Seminar. Topics in Cognitive and Linguistic Sciences

Lucas

Topic for 2003-04: Evolutionary Origins of Language and Thought. An investigation of the extent to which the extraordinary cognitive abilities of humans are the product of biological evolution. Students will read and learn to critically evaluate research which suggests that the characteristic ways in which people think and communicate are due to natural selection.

Prerequisite: Open to juniors and seniors who have taken at least two courses in the major or permission of instructor.

Distribution: Social and Behavioral Analysis or Epistemology and Cognition

Semester: Spring

Unit: 1.0

Students in any concentration may also elect independent studies and honors projects:

LING 114 Introduction to Linguistics
Isak
Designed to familiarize students with some of the essential concepts of linguistic analysis. Suitable problem sets in English and in other languages will provide opportunities to study the basic systems of language organization – phonology, morphology, syntax, and semantics. Additional topics include introductions to language organization in the brain, child language acquisition, language change, and writing systems.
Prerequisite: None. Not open to students who have taken [LANG] 144.
Distribution: Epistemology and Cognition
Semester: Fall, Spring  Unit: 1.0

LING 240 The Sounds of Language
Isak
This course examines the ways in which speech sounds are used in the languages of the world. The course will discuss the articulatory basis of speech sounds and will investigate differences in the ways that various languages organize sounds into linguistic systems. We will consider why differences exist between languages, both in terms of the number of sounds employed and how those sounds are used. We will also consider the types of difficulties that phonological differences between languages might pose for the second language learner and the importance of phonology in the development of writing systems.
Prerequisite: LING 114. Not open to students who have taken [LANG] 240.
Distribution: Epistemology and Cognition
Semester: Spring  Unit: 1.0

LING 244 Language: Form and Meaning
Isak
NOT OFFERED IN 2003-04. This course will consider some basic questions about language: What do we actually know when we know a language? How is the structure of language best described? Are there properties which all languages share, and what do those properties tell us about language itself? We will look at a number of specific problems in morphology, syntax, and semantics, and the strengths and weaknesses of a number of different linguistic theories will be considered. While many of the problems considered in this class will involve English, we will also be looking at a number of other languages, both European and non-European.
Prerequisite: LING 114. Not open to students who have taken [LANG] 244.
Distribution: Epistemology and Cognition
Semester: N/O  Unit: 1.0

LING 322 Child Language Acquisition
Isak
NOT OFFERED IN 2003-04. Language acquisition in young children. Examination of children's developing linguistic abilities and evaluation of current theories of language learning. Topics include infant speech perception and production and the development of phonology, morphology, the lexicon, syntax, and semantics in the young child. Data from studies of children learning languages other than English will also be considered.
Prerequisite: Open to juniors and seniors who have taken LING 114 or PSYC 216, or permission of instructor. Not open to students who have taken [LANG] 322.
Distribution: Epistemology and Cognition
Semester: N/O  Unit: 1.0

LING 327 The English Language: An Historical Perspective
Isak
This course will provide an overview of the history of the English language from the pre-Germanic period to the twentieth century and will investigate the major sound changes that the English language has undergone during this time. A major goal of the course will be to provide students with a better understanding of the current state of the English language in terms of its historical development, as well as its relationship to other Indo-European languages. This course will also discuss general principles of language change and the kinds of evidence that linguists employ in reconstructing earlier stages in a language's history.
Prerequisite: LING 114, PSYC 216, or permission of instructor. Not open to students who have taken [LANG] 327.
Distribution: Social and Behavioral Analysis
Semester: Fall  Unit: 1.0

LING 329 Native American Languages: History, Structure, and Prospects
Isak
NOT OFFERED IN 2003-04. This course provides an overview of the indigenous languages of the Americas. The history of the description and classification of Native American languages will be discussed, along with some of the more salient structural properties of these languages and how they differ from European languages. We will also consider how linguistics can be used as a tool to study the prehistory of a people. Finally, we will be considering the problem of endangered languages and some of the efforts which have been made to preserve Native American languages.
Prerequisite: LING 114, PSYC 216, or permission of instructor. Not open to students who have taken [LANG] 329.
Distribution: Social and Behavioral Analysis
Semester: N/O  Unit: 1.0

LING 350 Research or Individual Study
Prerequisite: Two 200-level units.
Distribution: None
Semester: Fall, Spring  Unit: 1.0

Comparative Literature

A STRUCTURED INDIVIDUAL MAJOR
Director: Weiner (Russian)

The Comparative Literature major is a structured individual major for students seeking to study literature across departmental, national, and linguistic boundaries. Students in comparative literature devise their own programs in careful consultation with two advisors, one in each of two departments, and with the director of the program.

Students who major in Comparative Literature should, in putting their major together, be aware of the many and diverse courses here that pertain to the study of literature. These include, but are not limited to:
1) courses in literary history;
2) courses in particular literary genres;
3) courses in the theory of literature;
4) courses in linguistics;
5) courses on the theory and practice of translation.

Many courses combine or fall between these categories. Students should also be aware of the many courses on literature in translation, and should consult the list of these courses at the back of the catalog.

Directions for Election:

1. Ten Units. Majors in Comparative Literature will complete a minimum of ten units. All courses must count towards the major in the departments in which they are offered.

2. Comparative Literature Seminar. All majors shall take ICPL 330, the comparative literature seminar.

3. Advanced Literature Courses. In addition to ICPL 330, majors shall take at least two more literature courses at the 300 level. These two advanced literature courses shall be in at least two languages, of which English may be one, and in at least two departments, and majors shall meet departmental prerequisites for these courses.

4. Pre-Modern Literature. Majors shall take at least one course outside of the modern period in at least one of the literatures they are studying; what "the modern period" means for a particular literature will depend on the literature, and will be determined by the major's advisors.

5. Theory of Literature. Majors shall take at least one course offering a theoretical perspective helpful to their particular course of study. Sometimes this will be English 382: Introduction to Literary Theory or English 382: Criticism. But other courses, too, can meet this requirement. A student focusing on the multilingual literatures of North America might meet this requirement with [Language Studies 312: Bilingualism]; a student focusing on the process of intercultural adaptation and translation might meet it with French 308: Advanced Studies in Language.

6. Independent Research. Majors shall take some course in which they do a substantial piece of independent work in comparative literature. This course may be ICPL 330, or a 350 in a
pertinent department, or ICPI 360 and/or ICPI 370, or another course chosen by the student in consultation with her advisors.

In general, programs will be worked out in relation to the major's particular languages and interests. Examples of possible interests would include poetry, the novel, women's writing, and the relations between politics and literature.

ICPI 330 Seminar. Comparative Literature in Early Modern Europe (Classical Studies)

Topic for 2003-2004: Epic and Empire, Ancient and Modern. This course investigates epic poetry's political fortunes from ancient Greece and Rome (Homer's Iliad and Odyssey, Vergil's Aeneid, Lucan's Civil War) to early modern England (Milton's Paradise Lost), to nineteenth-century America (Whitman's Leaves of Grass), and the modern Caribbean (Walcott's Omeros). More than any other literary genre (until the rise of the novel, perhaps), epic has been the principal literary venue for posing the most pressing of national questions, and for legitimating and celebrating the inevitability of a nation's imperial power or bemoaning the historical accident that made it possible. Questions that will concern us include: How is poetry freighted with political meaning? What are the relationships of epic narrative, myth, history, theology, and empire? Is epic a prop of imperial ideology? Or is it a site of resistance? Special attention to generic motifs, both formal and thematic; gender and "otherness"; issues of patronage, propaganda, and resistance. Additional reading in political history and contemporary literary theory. This course counts as a unit towards a major in Classical Civilization.

CS 100 Introduction to Internet Research and Resources

Or 100 (Office for Information Services)

CS 100 is a half-credit course designed for students with little computing experience. Students learn to search, access, and critically evaluate information available on the Internet. Topics include copyright, privacy, and security issues of digital data and electronic communications, together with the basic use of computer science underpinning of these issues. Students learn to use many different search engines and full-text databases to do complex searches. Students will also use HTML and other authoring tools, such as Dreamweaver and Fireworks, to maintain a Web-published portfolio of their Internet research. Students who have already designed a basic website might find it more useful to take CS110 or CS111. Students must take CS 100 as Credit/Non.

Prerequisite: None. No prior background with computers is expected.

Distribution: None
Semester: Fall
Unit: 0.5

CS 110 Computer Science and the Internet

Anderson, Metaxas, Staff

This course will explain the basics of how the Internet works and how to build a Web site. Topics include packet-switched networks, client-server architecture of HTML languages to produce Web pages, the representation of colors and images on the computer, the role of file compression, the use of cookies, and the relevance of copyright and intellectual property issues on the Internet. The required project also models most phases of the standard software lifecycle. Students are introduced to programming by building an interactive Web site using JavaScript. Students are required to attend an additional discussion section each week. Students considering additional computer science courses should take 110, not 111. Students can receive MM distribution credit for only one of 110, 111, and 199. Consult "Choosing an Introductory CS Course" online at http://cs.wellesley.edu/~cs/whichCS1xx.html.

Prerequisite: None. No prior background with computers is expected.

Unit: 1.0

CS 111 Computer Programming and Problem Solving

Stephan, Tjaden, Staff

An introduction to problem solving through computer programming. Using the Java programming language, students learn how to read, modify, design, debug, and test algorithms that solve problems. Programming concepts include control structures, data structures, abstraction, recursion, modularity, and object-oriented design. Students explore these concepts in the context of interactive programs involving graphics and user interfaces. Students are required to attend an additional two-hour laboratory section each week. Required for students who wish to major or minor in computer science or elect more advanced courses in the field. Students can receive MM distribution credit for only one of 110, 111, and 199. Consult "Choosing an Introductory CS Course" online at http://cs.wellesley.edu/~cs/whichCS1xx.html.

Prerequisite: None. No prior background with computers is expected.

CS 115/PHYS 115 Robotics Design Studio

(Wintersession)

Anderson, Berg (Physics)

In this intensive course, students are introduced to engineering principles as they design and assemble robots out of LEGO parts, sensors, motors, and tiny computers. Fundamental robotics skills are learned in the context of studying and modifying a simple robot known as SciBorg. Then, working in small teams, students design and build their own robots for display at a Robot Exhibition. These projects tie together aspects of a surprisingly wide range of disciplines, including computer science, physics, math, biology, psychology, engineering, and art. Students may register for either CS 115 or PHYS 115. Credit will be given in the department in which the student is registered. Not offered every year. Subject to Dean's Office approval.

Prerequisite: None
Distribution: Natural and Physical Science
Semester: Wintersession

CS 199 Simulation, Probability, and Statistics

Turbak

Computer simulations play an increasingly important role in decision making and public policy. In this course, we learn some programming techniques that allow us to understand and modify existing simulation programs and to design and build simple simulations. We also learn how to use important tools of probability and statistics in the implementation and evaluation of simulations. Students are required to attend an additional two-hour laboratory section each week. This course is open to all students, including those who have taken upper-level CS courses. Students who take CS 199 as their first CS class must still take CS 111 before taking upper-level CS classes. Students can receive MM distribution credit for only one of 110, 111, and 199. Consult "Choosing an Introductory CS Course" online at http://cs.wellesley.edu/~cs/whichCS1xx.html.

Prerequisite: Permission of instructor. Fulfillment of the basic skills component of the Quantitative Reasoning requirement.

CS 215 Multimedia Design and Programming

Metaxas

The purpose of this course is to give students a broad foundation in issues related to creating multimedia and hypermedia applications. Topics to be covered include history and philosophy of
hypermedia, principles of human-computer interaction, multimedia programming, optimizing for CD-ROMs and the WWW, digital representation and editing of media (audio, graphics, video), media compression and transmission, and delivery of multimedia applications. 

**Prerequisite:** By permission of the instructor. File application on-line before preregistration. At least 411 (preferred) or 110 is required. In addition, ARTS 105, ARTS 108 or ARTS 109 is recommended.

**CS 230 Data Structures**

*Hiddeith, Staff*

An introduction to techniques and building blocks for organizing large programs. Topics include: modules, abstract data types, recursion, algorithmic efficiency, and the use and implementation of standard data structures and algorithms such as lists, trees, graphs, stacks, queues, priority queues, tables, sorting, and searching. Students become familiar with these concepts through weekly programming assignments using the Java programming language.

**Prerequisite:** 111 or by permission of the instructor. Students who received C+ or lower in 111 must contact the instructor before enrolling. 
**Distribution:** Mathematical Modeling 
**Semester:** Fall, Spring 
*Unit:* 1.0

---

**CS 231 Fundamental Algorithms**

*Matthews, Staff*

An introduction to the design and analysis of fundamental algorithms. General techniques covered: divide-and-conquer algorithms, dynamic programming, greediness, probabilistic algorithms. Topics include: sorting, searching, graph algorithms, compression, cryptography, computational geometry, and NP-completeness.

**Prerequisite:** 230

**CS 235 Languages and Automata**

*Shull*

An introduction to the concepts of languages and automata. Topics include languages, regular expressions, finite automata, grammars, pushdown automata and Turing machines. The first half of the semester covers the Chomsky hierarchy of languages and their associated computational models. The second half of the semester focuses on decidability issues and unsolvable problems. The course closes with a brief introduction to complexity theory.

**Prerequisite:** 230. MATH 225 recommended. 
**Distribution:** Mathematical Modeling 
**Semester:** Fall 
*Unit:* 1.0

**CS 251 Theory of Programming Languages**

*Turbak*

An introduction to the dimensions of modern programming languages. Covers major programming paradigms: functional, imperative, object-oriented, and logic-oriented. Dimensions include syntax, naming, state, data, control, concurrency, non-determinism, and types. These dimensions are explored via toy language interpreters written in Scheme, ML, and Haskell that students experiment with and extend.

**CS 305 Theory of Algorithms**

*Staff*

**NOT OFFERED IN 2003-04.** We design algorithmic solutions for major classes of combinatorial and computational problems. The computational resources required by such algorithms are determined. We use these results of the analysis to discuss performance tradeoffs, accept compromises based on clearly articulated goals, and propose improvements or alternative solutions. Advanced data structures and algorithmic techniques are introduced as required during the design process. Topics include: Matroids and greedy algorithms, binomial and Fibonacci heaps, splay trees, random search trees, max flow, matching, parallel algorithms and NC.

**Prerequisite:** 231, or by permission of the instructor. 
**Distribution:** Mathematical Modeling. 
**Semester:** N/O 
*Unit:* 1.0

---

**CS 307 Computer Graphics**

*Anderson*

A survey of topics in computer graphics with an emphasis on fundamental techniques. Topics include: graphics hardware, fundamentals of two and three-dimensional graphics such as clipping, windowing, and coordinate transformations, raster graphics techniques such as line drawing and filling algorithms, hidden surface removal, shading, color, and animation. Students learn how to design graphics displays using a state-of-the-art computer graphics software package.

**Prerequisite:** 230 
**Distribution:** Mathematical Modeling 
**Semester:** Fall 
*Unit:* 1.0

**CS 310 Theory of Computation**

*Staff*

Why are some problems easy to solve, while others are nearly impossible? We study inherent properties of computational problems in order to see how they relate to quantitative aspects of the algorithms that solve them. The course seeks to classify problems according to common mathematical structures and to understand the relationships between problem classes. Topics include standard deterministic and non-deterministic complexity, oracles, Boolean circuit complexity, advice functions, randomized complexity, protocols and Kolmogorov complexity. *Alternate year course.*

**Prerequisite:** 235 or by permission of the instructor.

CS 331 Parallel Machines and Their Algorithms
Not offered in 2003-04. This course is a broad introduction to parallelism that studies problem solving using a large number of cooperating processing elements. It is divided into three parts. First, it introduces the need for parallel computation and describes some of the fundamental algorithmic techniques. The second part surveys some of the more popular interconnection networks employed in today's parallel computers. In the third part, several parallel algorithms are designed and implemented on a cluster of communicating computers.
Prerequisite: 231 or by permission of the instructor.
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

CS 332 Visual Processing by Computer and Biological Vision Systems
Hildreth
Not offered in 2003-04. Offered in 2004-05. An introduction to algorithms for deriving symbolic information about the three-dimensional environment from visual images. Aspects of models for computer vision systems will be related to perceptual and physiological observations on biological vision systems. Assignments will use computer vision software written in Java. Topics include: edge detection, stereopsis, motion analysis, shape from shading, color, visual reasoning, object recognition. Alternate year course.
Prerequisite: 230 or by permission of the instructor.
Distribution: Mathematical Modeling
Semester: N/O. Offered in 2004-05.
Unit: 1.0

CS 340 Computer Architecture with Laboratory
Not offered in 2003-04. Offered in 2004-05. The course explores advanced assembly language programming instructions and techniques. Concepts such as I/O, data acquisition, exceptions and direct memory access will be a focus. Also studied are advanced topics in the field of computer architecture, such as reduced instruction set computers, instruction level parallelism and superscalar processors, parallel processing, multiprocessors and multiprocessors, and memory systems. Students required to attend one three-hour digital laboratory weekly. Alternate year course.
Prerequisite: 240
Distribution: Mathematical Modeling. This course satisfies the laboratory requirement.
Semester: N/O. Offered in 2004-05.
Unit: 1.25

CS 341 Operating Systems
Stephan
An examination of the software systems that manage computer hardware. Topics include processes, interprocess communication, process coordination, deadlock, memory management, swapping, paging, virtual memory, input/output management, file systems, protection, security, networks, distributed systems, multiprocessors, and massively parallel machines. Alternate year course.
Prerequisite: 240 or by permission of the instructor.
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

CS 349 Advanced Topics in Computer Science
Topic A: Advanced Algorithms
Tjaden
Upper level seminar emphasizing advanced methods for algorithmic design, analysis, and implementation. We will study some of the fascinating algorithms with applications to areas such as web-searching, cryptography, computational geometry, as well as other disciplines outside of computer science. Topics include randomized algorithms, number-theoretic algorithms, on-line algorithms, expectation-maximization algorithms, and approximation algorithms. Participants will independently research, present, and lead seminar discussions on advanced algorithmic topics.
Prerequisite: 231 or permission of instructor.
Distribution: Math Modeling
Semester: Fall
Unit: 1.0

Topic B: Cryptography
Shull
This seminar investigates the art and science of secret writing and its application to computer and network security. The course begins with an introduction to classical symmetric-key cryptosystems, steganography, and modern block ciphers as well as the mathematical analyses required to make and break them. We focus next on public-key cryptography and its application to data and network security. Issues include: key management, message authentication and hash functions, nonrepudiation, data integrity and confidentiality. Applications such as Kerberos, X.509, authentication service, PGP, S/MIME, secure sockets layer, and IP security are examined. The class closes with a discussion of alternative cryptosystems and current research.

Directions for Election
Students majoring in computer science must complete 111, 230, 231, 235, 240, 251, two 300-level courses other than 350, 360 or 370, and at least one additional computer science course at the 200 or 300 level. Students who do not take 111 must replace this requirement with one additional computer science course at the 200 or 300 level. Computer science courses at MIT or other institutions used to meet the nine-course requirement must be approved in advance by the Department chair on an individual basis. In addition, all majors in computer science will be expected to complete (1) either MATH 225 or MATH 305 and (2) at least one additional course in mathematics at the 200 or 300 level. Students are encouraged to complete the 200-level CS and mathematics requirements as early in the major as possible. Students are encouraged to consult the Computer Science Student Handbook for suggestions of possible course schedules for completing the major. Students considering a junior year abroad should consult a faculty member in the department as soon as possible in their sophomore year to plan a schedule of courses to complete the major.

All computer science majors are required to participate in the Computer Science Student Seminar held throughout the academic year. In this seminar, students have the opportunity to explore topics of interest through reading and discussion, field trips, invited speakers, independent research projects, or software development projects.

The computer science five-course minimum minor is recommended for students whose primary interests lie elsewhere, but who wish to obtain a fundamental understanding of computer science. The minor consists of Computer Science 111, 230, 240, either 231 or 235, and at least one 300-level computer science course. Students who do not take 111 must replace this requirement with one additional computer science course at the 200 or 300 level. Students may receive a maximum of 1 unit of credit for a score of 4 or 5 on the Computer Science A or AB advanced placement exam. This unit can be counted toward the computer science major or minor at the 100 level. Students receiving AP credit for computer science should consult with the department regarding enrollment in 230.

Students who plan to pursue graduate work in computer science are strongly encouraged to develop their background in mathematics, particularly in the areas of linear algebra, probability and statistics, and graph theory. Such students should elect one or more of 310 or MATH 305. In addition, students who are planning either graduate work or technical research work are further encouraged to obtain laboratory experience by electing one or more of 301, 340, 350/360 or appropriate courses at MIT. Majors who are interested in writing a senior honors thesis are urged to discuss their plans with either their advisor or the Department Chair as early as possible in their junior year.

Students interested in an interdepartmental major in Cognitive and Linguistic Sciences are referred to this listing in the catalog.
ECON 101 Intermediate Microeconomic Analysis
Kearney, Skeath, Velenchik
Intermediate microeconomic theory: analysis of the individual household, firm, industry, and market, and the social implications of resource allocation choices. Emphasis on application of theoretical methodology.
Prerequisite: 101, 102 and MATH 115.
Distribution: Social and Behavioral Analysis Semester: Fall, Spring Unit: 1.0

ECON 202 Intermediate Macroeconomic Analysis
Hilt, Weerapana
Prerequisite: 101, 102 and MATH 115.
Distribution: Social and Behavioral Analysis Semester: Fall, Spring Unit: 1.0

ECON 204 U.S. Economic History
Kauffman
This course traces the structure and development of the U.S. economy from colonial times to World War II; highlights historical episodes including the start of the nation, slavery, the westward movement, the Civil War, and the Great Depression. Specific topics include agriculture, trade, technology, finance, and labor. Emphasis on relating U.S. historical experience to current economic problems.
Prerequisite: 101 and QRF 199 or its equivalent.
Distribution: Historical Studies or Social and Behavioral Analysis Semester: Spring Unit: 1.0

ECON 210 Financial Markets
Joyce
Overview of financial markets and institutions, including stock and bond markets, money markets, derivatives, financial intermediaries, monetary policy, and international currency markets.
Prerequisite: 101 and 102, and QRF 199 or its equivalent.
Distribution: Social and Behavioral Analysis Semester: Fall Unit: 1.0

ECON 212 Trade and Migration
Lindauer, Kim
An introduction to international trade in theory and practice. Emphasis on the application of microeconomic principles in international economics. Topics to be covered include the debate over free versus fair trade; trade and the welfare of workers in developed and developing nations; the use of tariffs, quotas, and other instruments of protection; trade deficits; and the costs and benefits of international migration.
Prerequisite: 101 and 102.
Distribution: Social and Behavioral Analysis Semester: Fall, Spring Unit: 1.0

ECON 213 International Finance and Macroeconomic Policy
Kim, Weerapana
This course introduces the study of macroeconomics in an open economy. Topics include basic features of foreign exchange markets, the structure of the balance of payments accounts, and the effectiveness of macroeconomic policy under fixed and flexible exchange rates and varying degrees of capital mobility. The course also examines the evolution of the international financial system, the role of the IMF, the creation of the European Monetary Union and the recent financial crises in East Asia, Russia, and Brazil.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis Semester: Fall, Spring Unit: 1.0

ECON 215 Federal Tax Policy
Case
NOT OFFERED IN 2003-04. An introduction to and economic analysis of the Federal tax system, including the individual income tax, the corporation income tax, Social Security taxes, and the gift and estate tax. Economic analysis will focus on equity and efficiency. Policy issues to be covered include the effect of taxes on savings, investment, and labor supply. Also covered will be alternatives to the current structure including "flat taxes" and value-added taxes.
Prerequisite: 101
Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

ECON 220 Development Economics
NOT OFFERED IN 2003-04. Survey and analysis of problems and circumstances of less developed nations. Examination of theories of economic growth for poor nations. Review of policy options and prospects for low and middle income economies. Specific topics include: population growth; poverty and income distribution, foreign aid, and human resource strategies.
Prerequisite: 101 and 102, QRF 199 recommended.
Distribution: Social and Behavioral Analysis Semester: N/O Unit: 1.0

ECON 222 Games of Strategy
Skeath
Should you sell your house at an auction where the highest bidder gets the house, but only pays the second-highest bid? Should the U.S. government institute a policy of never negotiating with terrorists? The effects of decisions in such situations depend on how others react to them. This course introduces some basic concepts and insights from the theory of games that can be used to understand any situation in which strategic decisions are made. The course will emphasize applications rather than formal theory. Extensive use is made of in-class experiments, examples, and cases drawn from business, economics, politics, movies, and current events.
Prerequisite: 101. Permission of instructor required.
Distribution: Social and Behavioral Analysis Semester: Spring Unit: 1.0

ECON 225 Urban Economics
Case
Analysis of the location decisions of households and firms. Topics include real estate development and finance, housing markets and housing finance, real estate cycles, regional economics, problems of the inner city, discrimination in housing and credit markets, homelessness, and alternative public policy responses to urban problems. The course requires several projects involving fieldwork.
Prerequisite: 101
Distribution: Social and Behavioral Analysis Semester: Fall Unit: 1.0
ECON 226 Economics of Education Policy
McEwan
Applies microeconomic analysis to important questions in education policy. Should private school vouchers be implemented? Are there teacher shortages and how can they be solved? What are the long-term benefits of early childhood education? The course uses conceptual insights from microeconomics to understand these and other questions; particular emphasis is placed on economic interpretation of case studies and contemporary policy debates.
Prerequisite: 101 and QR 199
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 228 Environmental and Resource Economics
Botivier
This course considers the economic aspects of resource and environmental issues. After examining the concepts of externalities, public goods, and common property resources, we will discuss how to measure the cost and benefits of environmental policy, in order to estimate the socially optimal level of the environmental good. Applications of these tools will be made to air and water pollution, renewable and nonrenewable resources, and global climate. In addressing each of these problems we will compare various public policy responses such as regulation, marketable permits and tax incentives.
Prerequisite: 101
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 230 Contemporary Economic Issues
Johnson
Topic for 2003-04: Economics of Technology
How do firms decide on which technology to use and which new products to develop? What level of protection should be granted using patents and copyright laws? Should scientific research be publicly funded? How does E-business change the way firms behave? This course addresses these questions by examining how economists predict, explain, and evaluate technological change. Sector studies are used to explore key issues and will include the industrial and green revolutions, aerospace and biotechnology industries, the Internet, and E-commerce.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 238 Economics and Politics
Botivier
This course provides an introduction to the study of the interaction between economics and the political process from both international and domestic perspectives. Topics include voting theory, public good provision, taxes and subsidies, and the effects of market power and rent-seeking behavior on the political system. Emphasis throughout will be on the application of economic theories to current events.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 241 Economic Development of Latin America
McEwan
Survey and analysis of economic development in the Latin American region. Topics to be covered include theories of development, the role of the state, patterns of growth and industrialization, the debt crisis and structural reforms of recent decades, poverty and income inequality, and human resource development. Emphasis on case studies and comparative analysis of countries.
Prerequisite: 101 and 102
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 243 The Political Economy of Gender, Race, and Class
Matthai
An introduction to radical economic analysis of contemporary, globalizing capitalism. Analysis of race, class, and gender, and of their interconnections. Radical economic critiques of current neo-liberal economic policies. Study and critique of contemporary radical economic movements, including the environmental movement; the movements for socially responsible consumption, investment, business, and work; and the anti-globalization or globalization from below movement.
Prerequisite: 101 or 102 or permission of instructor
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 244 Comparative Political Economy: Transition and Reform
NOT OFFERED IN 2003-04. This course begins with an analysis of the major economic philosophies. Discussion will then focus in varying degrees upon the following economies: USSR/Russia, Sweden, Germany, France, the European Union, Japan, and South Korea. The discussion of each economy will focus on its evolution and behavior, especially the importance of historical conditions and attitudinal changes in the establishment and modification of working rules for institutions.
Prerequisite: 101 and 102. Not open to students who have completed 301

ECON 303 Mathematics for Economics
Veerapani
This course has students apply mathematical techniques in economic analysis. Students are expected to have a good knowledge of calculus and will be introduced to topics in linear algebra, differential equations, and static and dynamic optimization. Emphasis will be placed on economic applications including maximization decisions of consumers and producers, comparative statics, phase diagram analysis of dynamic systems, and basic features of dynamic optimization.
Prerequisite: 201 and 202, MATH 205. MATH 206 recommended
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 304 Seminar. New Institutional Economic History
Kaufman
This course will investigate the evolution of economic institutions throughout the world over the past 1,000 years. We will consider a broad range of institutional questions and use evidence from historical episodes in their analysis. How are effective trading rules created (evidence from the eleventh-century Maghribi traders)? How does a government become "credible" (evidence from seventeenth-century England)? Why have Blacks consistently earned less than Whites (evidence from nineteenth- and twentieth-century America)? What are the effects of governmental tampering with housing prices (evidence from early twentieth-century Hong Kong)?
Prerequisite: 200 and 201
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 305 Industrial Organization
Skeath
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. A course in applied microeconomics, focusing on the performance of real world markets. Emphasis on the welfare costs of market power as well as public policy responses. Topics include analysis of imperfectly competitive markets (e.g., monopolistic competition, oligopoly, imperfect and asymmetric information), firm and industry strategic conduct, and antitrust policy attempts to improve industrial performance.
Prerequisite: 201
Distribution: Social and Behavioral Analysis
Semester: N/O. Offered in 2004-05.
Unit: 1.0

ECON 310 Public Economics
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. Public economics examines how government policies affect a nation's allocation of resources and distribution of income. We examine why government may or may not want to respond to externalities such as pollution, how to conduct cost-benefit analyses of public goods, and why voting mechanisms often do not lead to the optimal level of public goods provision. Our focus is on the efficiency and equity of government expenditure and tax policies.
Prerequisite: 200 and 201
Distribution: Social and Behavioral Analysis
Semester: N/O. Offered in 2004-05.
Unit: 1.0

ECON 313 Seminar. International Macroeconomics
Joyce
Theory and policy of macroeconomic adjustment in the open economy. Topics to be covered include models of exchange rate determination, the choice between fixed and floating exchange rates, monetary union, policy effectiveness in
open economies under different exchange rate regimes, and adjustment to balance of payments disequilibria.
Prerequisite: 200 and 202
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 314 International Trade Theory
Johnson
Theoretical analysis of international trade. Emphasis on models of comparative advantage, determination of gains from trade and the effects of trade restrictions such as tariffs and quotas. Further topics include the role of scale economies, the political economy of protectionism, and strategic trade policy.
Prerequisite: 201
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 315 History of Economic Thought
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. Study of the history of Western economic theory over the last 200 years. Focus on the development of mainstream, neoclassical theory out of classical political economy, as well as study of various heterodox schools, including Marxist, institutionalist, and feminist economics. Analysis of the topics of scarcity, price determination, income distribution, monopoly, unemployment, economic freedom and democracy, sexual and racial inequality, the environment, and economic methodology. Student debates on selected issues.
Prerequisite: 201 or 202
Distribution: Social and Behavioral Analysis or Epistemology and Cognition
Semester: N/O. Offered in 2004-05.
Unit: 1.0

ECON 317 Advanced Econometrics
NOT OFFERED IN 2003-04. This course builds upon 200 (Econometrics) by allowing students to examine more advanced topics, including techniques of model specification, estimation, and evaluation. Both cross-sectional and time series models are considered.
Prerequisite: 200, 201 and 202
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 318 Economic Analysis of Social Policy
Kearney
This course uses economic analysis to evaluate important social policy issues in the US, focusing on the role of government in shaping social policy and its impact on individuals. Theoretical models and econometric evidence are used to investigate questions related to four major topics: welfare, marriage and fertility, social insurance, and crime. Topics covered include welfare’s impact on work decisions; how fertility patterns respond to changes in abortion policy; the optimal way to deliver health insurance to the poor; and an analysis of criminals’ responses to the incentives of the criminal justice system.
Prerequisite: 200 and 201
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 320 Seminar. Economic Development
Velenchik
Theoretical and empirical exploration of microeconomic issues of concern to developing countries. Specific topics may include land tenure regimes and the structure of agricultural markets, the behavior of rural households in the production of output and the management of risk, the functioning of rural and urban labor markets, human capital formation and the education system, intra-household resource allocation, and the measurement and policy responses to inequality and poverty.
Prerequisite: 200, 201, and 202
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 323 Finance Theory and Applications
Hilt
This course provides a rigorous treatment of financing and capital budgeting decisions within firms. Topics include: financial statement analysis; strategies and analytical methods for the evaluation of investment projects; capital structure and dividend policy decisions; risk, return, and the valuation of financial instruments; and management incentive structures. Risk management and the use of derivatives will also be considered.
Prerequisite: 200 and 201, Not open to students who have completed [336: Topic A]
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 325 Law and Economics
Witten
Economic analysis of legal rules and institutions. Application of economic theory and empirical methods to the central institutions of the legal system including the common law doctrines of negligence, contract, and property as well as civil, criminal, administrative procedure and family law. The course will contrast economic and non-economic theories of law and will address the strengths and limitations of the economic approach to law.
Prerequisite: 200 and 201
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 331 Seminar. Monetary Theory and Policy
NOT OFFERED IN 2003-04. The formulation of monetary policy and its theoretical foundations. This includes discussion of the latest developments in monetary theory, the money supply process, monetary autonomy in an open economy, and current procedures in the U.S. and other nations.
Prerequisite: 200 and 202
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

ECON 333 Economic Growth and Fiscal Policy
Ardagna
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. The first part of the course analyzes cross-country income differences, addressing questions like: why are some countries so rich and others so poor?; and why has per capita income in Argentina declined significantly as a result of the level in France? We explain countries’ different growth performance, studying the role of physical and human capital accumulation, economic institutions, and economic policies. In the second part, we concentrate on the effects of fiscal policy on economic growth and on the macroeconomy in general. Topics include: the economic theory and political economy of public debt and budget deficits, the current debate on the US budget, and the macroeconomic effects of large fiscal stabilizations.
Prerequisite: 200 and 202
Distribution: Social and Behavioral Analysis
Semester: N/O. Offered in 2004-05.
Unit: 1.0

ECON 335 Seminar. Economic Journalism
Lindauer
Students will combine their knowledge of economics, including macro, micro and quantitative techniques, with their skills as exposition, in order to address current economic issues in a journalistic format. Students will conduct independent research to produce weekly articles. Assignments may include coverage of economic addresses, book reviews, recent journal articles, and interviews with academic economists. Class sessions will be organized as workshops devoted to critiquing the economic content of student work.
Enrollment limited to 10.
Prerequisite: 200, 201 and 202
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

ECON 336 Seminar. Feminist Economics
Matthai
An exploration of the diverse field of feminist economics, which critically analyzes both economic theory and economic life through the lens of gender and advocates various forms of feminist economic transformation. Areas of focus include economic analysis of gender differences and inequality in the family and in the labor market; feminist critiques of current economic institutions and policies, and suggested alternatives; and feminist critiques of economic theory and methodology.
Prerequisite: 201, 202, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

ECON 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors who have taken 201 and 202; 200 is strongly recommended. 350 students will be expected to participate in the Economic Research Seminar (see 360).
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ECON 360 Senior Thesis Research
Students writing a senior honors thesis will be expected to participate regularly throughout the 360 and 370 in the Economic Research Seminar. This weekly seminar provides a forum for students conducting independent research to present their work to fellow students and faculty.
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ECON 370 Senior Thesis
Prerequisite: 360
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring

MATH 203 Mathematical Tools for Finance
Directions for Election

Economics is the study of the universal problems of scarcity, choice, and human behavior. It contains elements of formal theory, history, philosophy, and mathematics. Unlike business administration, which deals with specific procedures by which business enterprises are managed, economics examines a broad range of institutions and focuses on their interactions within a structured analytical framework. The complete survey of economics consists of both 101 and 102. Any student who plans to take economics after 101 and 102 should consult a department advisor.

The Major in Economics

The Economics major consists of a minimum of nine units. The major must include core coursework in microeconomics (101 and 201), macroeconomics (102 and 202), and statistics (QR 199 and ECON 200), as well as at least two 300-level units (ordinarily not counting 350, 360 or 370). A minimum of two 300-level courses must be taken at Wellesley unless a student has completed 300-level work in economics at MIT; in such a case, only one 300-level course need to be taken at Wellesley.

Choosing courses to complete the major requires careful thought. All majors should choose an advisor and consult him/her regularly. Students are also advised to consult the Department Handbook, which deals with a variety of topics including preparation in mathematics, desirable courses for those interested in graduate study in economics, and complementary courses outside economics. Calculus, along with several other mathematical tools, is central to the discipline. MATH 115 or its equivalent is required for all 200, 201, and 202 sections. We encourage students to consult a departmental advisor about whether additional mathematics courses might be desirable.

Honors in the Major

The department offers majors two programs for pursuing departmental honors. Under Program I, students complete two semesters of independent research (360 and 370) culminating in an honors thesis. Under Program II, a student completes one semester of independent research (350) related to previous 300-level coursework, and then submits to an examination in economics that includes the topic covered in her research project. All honors candidates are expected to participate in the Economics Research Seminar.

The Minor in Economics

The Economics minor is recommended for students wishing to develop competence in economics in preparation for work or graduate study in area studies, business, international relations, law, public administration, public health, or other such professions. The minor consists of 101, 102, and QR 199, plus two additional 200-level units, ordinarily excluding 200, 201 and 202. A student wishing to add the economics minor to the major in another field should consult a faculty advisor in economics.

Students are urged to supplement their major or minor program in economics with related courses from other disciplines in the liberal arts, such as history, mathematics, philosophy, political science, and sociology.

Credit for Other Courses

Students who have completed an approved introductory statistics course in a discipline other than economics or who have AP or IB credit in statistics need not complete QR 199 but must take an additional economics course to complete the major or minor. In order to obtain credit for any economics course taken at another institution during the summer or academic year, approval must be obtained in advance from the department's transfer credit advisor. In general, courses from two-year colleges will not be accepted at any level. Courses taken elsewhere normally will not be transferred to the 300-level. Economics 200, 201, and 202 ordinarily should be taken at Wellesley. Transfer students wishing to obtain transfer credit for economics courses taken prior to enrollment at Wellesley should contact the department's transfer credit advisor.

Advanced Placement and Exemption Examinations

Students who enter with Advanced Placement credit in microeconomics or macroeconomics may choose to repeat the courses covered by the AP credit (in which case the credit is forfeited) or proceed to the remaining half of the introductory sequence (for those with one unit of AP credit) or to a 200-level elective (for those with two units of AP credit). AP or IB credit in statistics can be used to place out of QR 199. We recommend seeking advice from the department on how to proceed, particularly for students contemplating a 200-level course in their first semester. AP credits do not count toward the minimum major or minor in Economics.

Professor: Brenzel
Associate Professor: Beatty (Chair)
Assistant Professor: Hawes
Instructor: Speiser

Associate in Education: Denis Cleary (History Teacher, Concord Carlisle High School); Charlene Cook (Assistant Program Director – Unified Student Services, Boston); Ellen Cunniff (Principal, Sprague School, Wellesley); Jennifer Friedman (Literacy Coach, Lee School, Dorchester and Bates School, Roslindale); Julie Gamponia (Math Teacher, Quincy Middle School, Boston); Reen Gibb (Science Teacher, Brookline High School); David Gottlieb (Director Special Services, Lincoln-Sudbury Schools); Bethany Nichols (English Teacher, Needham High School); Diane Tutin (Teacher, Schofield School, Wellesley), Heather Woods (Information Services, Wellesley College).

EDUC 102/WRIT 125 Education in Philosophical Perspective

Hawes

This course is guided by questions such as: What is education? How do our own ideas and experiences of education relate to the ideas, experiences, and knowledge of education held by others? How can we find and try out new ideas and assumptions about education? How can we be more aware of the group and cultural influences in learning? The focus will be on the perspective and processes of learning and teaching, including the educational aims and values that may apply. We will use a variety of classical and contemporary writings as starting points in our investigations. This course satisfies the Writing 125 requirement and counts as a unit towards distribution requirements and towards the Education minor. Includes a third session each week.

Prerequisite: None. Open to all first-year students. Distribution: Epistemology and Cognition Semester: Spring Unit: 1.0

EDUC 212 Seminar, History of American Education

Beatty

What role has education played in American society? How did support for public education arise? How have schools served the needs of students from different social class backgrounds and religious denominations, African Americans and other minorities, girls, immigrants? Education has always been an arena of intense debate. We will examine some of the central conflicts and controversies in the history of American education, and trace the organization of urban school systems, growth of high schools and preschools, and attempts to reform the curriculum.

Prerequisite: None Distribution: Historical Studies Semester: Fall Unit: 1.0

EDUC 213 Understanding and Improving Schools

Hawes

Study of what goes into the making of good schools in a variety of settings, including urban and suburban schools. Examination of what we mean by “good schools” in terms of both aims and practices. We will use case studies of different kinds
of people working to reform schools, including teachers, principals, education advocates, and researchers. Field work will be an integral part of the course.

Unit: 1.25

EDUC 301 Theory and Practice of Early Childhood Care and Education
Speiser
An examination of rationales for different approaches to early childhood care and education and exploration of current teaching methods. Emphasis will be on understanding and providing for the diverse needs of young children in group settings. We will study critical issues in learning, with particular attention to play, cognitive development, and other curriculum topics. Regular observations and field work will be required.

Prerequisite: PSYC 207 or PSYC 248 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

EDUC 302 Seminar. Methods and Materials of Teaching
Speiser, Hawes
Study and observation of teaching techniques, the role of the teacher, classroom interaction, and individual and group learning. Examination of curriculum materials and classroom practice in specific teaching fields.

Prerequisite: 300 and by permission of department. Open only to students doing student teaching. Required for teacher certification.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

EDUC 303 Practicum. Curriculum and Supervised Teaching
Speiser, Hawes
Observation, supervised teaching, and curriculum development in students' teaching fields throughout the semester. Attendance at appropriate school placement required full-time five days a week.

Prerequisite: Required for teacher certification. Students must apply to the department for admission to this course in the semester before it is taken. Corequisite: 302.

Unit: 1.0

EDUC 310 Seminar. Child Literacy and the Teaching of Reading
Friedman, Tutin, Speiser
How do children learn to read? How do we acquire reading, writing, and oral language skills, and how does this relate to cognition? We will examine current research and practice in literacy development for elementary-aged children. Oral language, development of reading processes, assessment using a variety of techniques, phonemic awareness, phonics, and comprehension strategies will all be addressed through lectures, readings, study of literacy materials, and a field placement experience. We will focus on reading instruction across content areas and the transition from learning to read to reading to learn. Emphasis will be placed on understanding the application of this information to developing teaching strategies that address the needs of a diverse population of learners, including students at-risk, second-language learners, and students with special needs.

Prerequisite: Open to sophomores and seniors

Title II Information

As required by Title II of the Higher Education Act of the United States, we provide the following information. The number of students enrolled in our state-approved teacher education program during academic year 2001-2002 was 27. The number of these students who continued into student teaching was 20. The number who completed all requirements of the program was 20. The student/faculty ratio for supervised student teaching was 5.0. The average number of required hours of student teaching is 360 (12 weeks of at least 30 hours per week). The minimum required is 300.

The pass rates for our students on the Massachusetts Tests for Educator Licensure are: 1.) Basic skills a.) Reading 89% (compared to statewide average of 98%) b.) Writing 94% (state average 96%); Basic skills aggregate (a & b combined) 89% (state average 95%); 2.) Academic content areas: Aggregate 100% (compared to state average of 93%). Summary (1. & 2. Combined) pass rate 89% (compared to state average of 91%). Please note that these tests are not required for completion of our program, because many candidates seek licensure only in other states.

In addition, teacher certification requires field work prior to student teaching. Students enrolled in EDUC 303 Practicum may register for EDUC 320, but are not required to do so. To receive permission to register for EDUC 300 prior to pre-registration, students should apply by April 1. Applications are available in the Education Department. Students should plan their program of studies to fulfill the requirements and are encouraged to consult with a member of the Department as early as possible, but are welcome to do so at any point. Students may register for a minor beginning in the spring of the sophomore year, but a minor is not required for teacher certification. With the exception of 300, 302, 303, 304, and 320 the Department's courses are designed for all students, not simply those planning a career in private or public school teaching.

Education Studies

We also offer courses that extend students' general knowledge of education as a field of study. Students may focus on the origins of education and child rearing practices, on the role of women in education, on urban education and the role of schools in society, and on the various ways that ideas and policies in education have been applied to social problems.

ENG 121/WRIT 125 The Novels of Jane Austen

Meyer

Students will read a selection of the great novels of Jane Austen and use her work to learn skills for the close reading of fiction in general. We will study the details of Austen's fictional technique. From what perspective are the novels told? How does the author reveal her attitudes toward her characters? At the same time we will consider the broader questions raised by the novels. What values motivate Austen's fiction? How does she comment on the larger social and historical scene? What are her views on such issues as slavery or the proper role of women? This course satisfies the Writing 125 requirement and counts as a unit toward a major in English. Includes a third session each week.

Prerequisite: Open to all first-year students.

ENG 213 Chaucer

Lynch

Feminist, misogynist, heretic, moralist, progressive, reactionary — these are some of the conflicting labels that have been applied to Geoffrey Chaucer, enigmatic father of English poetry. This course will study Chaucer in his many incarnations, as courtly love poet, religious humanist, and bawdy prankster in the Canterbury Tales and selected shorter poems.

Prerequisite: None

ENG 223 Shakespeare Part I: The Elizabethan Period

Ko, Pelton

The formative period of Shakespeare's genius: comedies such as A Midsummer Night's Dream, As You Like It, Merchant of Venice, and Twelfth Night; histories such as Richard III, Richard II, Henry IV (Parts 1 and 2); tragedies such as Romeo and Juliet, Titus Andronicus, and Hamlet. Discussion of thematic concerns (ranging from gender relations and identities to national self-consciousness) will proceed from detailed analysis of not only the poetic language but also the dramatic form of the plays and the performance practices of Shakespeare's time. The viewing and analysis of contemporary performances will be integrated into the work of the course.

Prerequisite: 129

ENG 224 Shakespeare Part II: The Jacobean Period

Ko, Pelton

The great tragedies and the redemptive romances from the end of Shakespeare's career, chosen from among Troilus and Cressida, Measure for Measure, Othello, King Lear, Macbeth, Coriolanus, Antony and Cleopatra, Cymbeline, The Winter's Tale, and The Tempest. While considering thematic concerns ranging from gender relations to the meaning of heroism, particular focus will fall on tragic form and its transformation in the romances. Extensive attention will be paid to theatrical practices, Shakespearean and contemporary, aided by the viewing of stage performances and film adaptations.

ENG 225 Seventeenth-Century Literature

NOT OFFERED IN 2003-04. Poets and prose writers from an extraordinarily rich era of English literary history, an age remarkable in particular for the greatness, inventiveness, and variety of its lyric poetry; for its sophisticated and compelling representations of the literary self, and for the ways in which its writings bear witness to the political and intellectual ferment of the times. Primary focus on poems by the "Metaphysicals" (John Donne, George Herbert, Andrew Marvell, Richard Crashaw, Henry Vaughan, Thomas Traherne), Ben Jonson, Robert Herrick, and others, including women poets who were beginning to publish in increasing numbers during the period. Some attention to prose by such writers as Francis Bacon, Donne, Jonson, Robert Burton, Izaak Walton, Sir Thomas Browne, and Aphra Behn.

ENG 227 Milton
Noggle
*Paradise Lost* is arguably the greatest poem in the English language, and Milton has dominated literature written in that language since its publication in 1667. A sustained and concentrated study of this dazzling, poignant, ferocious epic, of the artistic, social, and religious questions that inform it, and of the poems and prose that precede and follow it in Milton's astonishing career.

ENG 234 The Dark Side of the Enlightenment: Eighteenth-Century British Literature
Noggle
The Enlightenment has been understood as the effort by Europeans in the eighteenth century to establish definitions of reason, progress, and human nature applicable to everybody, every culture, universally. It also corresponds with the great expansion of European imperialism, the rise of capitalism, and the fraught increased participation of women in social and intellectual life. Such actualities challenge Enlightenment ideals in ways dramatized in the most vibrant British writing of the period. This course presents major authors, including Jonathan Swift, Alexander Pope, and Samuel Johnson, as well as lesser known ones such as Aphra Behn, Mary Wrothley Montagu, and Mary Leapor, to reveal the madness shadowing the Enlightenment's rationality, the contradictions in its revision of gender roles, and the violence at times attending its universalism.

ENG 241 Romantic Poetry
Hickey
Poems, and some prose, by six fascinating and influential poets—Blake, Wordsworth, Coleridge, Shelley, Byron, and Keats—to be juxtaposed on occasion with texts by contemporaries such as Anna Barbauld, Mary Robinson, Dorothy Wordsworth, Felicia Hemans, and others. We'll consider such "romantic" ideas as imagination, feeling, originality, the ideal of poetry as personal expression, the relation of self and other, the natural and the supernatural, altered states of being, mortality and immortality, poetry and revolution, love, sexuality, gender, the meaning of art and the importance of history.

ENG 245 Victorian Conflicts
Hickey
Study of an intriguing and eclectic group of writers working during a period of great social change and vigorous questioning. Carlyle, Mill, Tennyson, Dickens, the Brownings, Emily Brontë, Ruskin, Arnold, D.G. and Christina Rossetti, Morris, Pater, Hopkins, Hardy, Wilde. Emphasis on the texts (mostly poetry, some short prose), with attention to their place in literary history and the ways in which they engage with compelling questions of their age (and ours); questions about the power and limits of language, tradition and originality, love and sexuality, gender roles, the representation of personal crisis, religious faith and doubt, evolution, industrialism, the place of art. Slide show of Pre-Raphaelite paintings; visit to Special Collections (including love letters of the Brownings); screening of Wilde's *The Importance of Being Earnest*.

ENG 251 Modern Poetry
Brogan
A study of the modernist revolution and its aftermath, emphasizing its stunning achievements and deep divisions. Examination of the different versions of modernism that emerged in the beginning of the twentieth century, exploration of lines of influence that link poets, and consideration of the trajectories of individual careers. Close attention to how the work of the period's leading poets—William Butler Yeats, T.S. Eliot, Wallace Stevens, William Carlos Williams, Marianne Moore, Elizabeth Bishop, Robert Lowell, Langston Hughes, among others—reflects and responds to a period of extraordinary political and social turbulence.

ENG 266 American Literature from the Civil War to the 1930s
Meyer, Rosenwald, Cain
A selection of literature from the period between the Civil War and the Great Depression, tracing the trajectory of American fiction from realism to high modernism. Emphasis on the ways that these texts invite and respond to questions about economics, social justice, sexual politics, and the role of literature in society. Attending closely to nuances of authorial style, classroom discussion will also consider each work in light of the ongoing debate between realism and formalism in art. Authors read will be drawn from the following: Twain, James, Roth, Chestnutt, Chopin, Dreiser, Wharton, Gilman, Stein, Toomer, Yejierska, Fitzgerald, Hemingway, Faulkner, and Hurston.

Tyler
Special topic section: Gay and Fey Traditions in Twentieth-Century Southern Literature.
Tennessee Williams, Carson McCullers, Truman Capote, J.K. Toole, and Dorothy Allison. Their literature itself is foremost, but we will also use two other available bodies of work: First, the numerous TV talk-show appearances by Williams and Capote, whose deliberate extravagances onscreen seemed designed to make "America" know that its major writers were often not only Southern but Southern and "queer." These couch-sitings amplified what Eudora Welty had called story-telling "in the days of porch-sitting in the Faulkner stories." Second, Hollywood's efforts to convert these "misbehaving" texts into mainstream profit, in movies from *Streetcar Named Desire* (1951) onward. We'll try to decode and otherwise interpret Hollywood's various strategies of straightening, masking, translating, encrypting, and "reading" the "wayward" sexualities in the original works.

ENG 269 Asian American Literature
Lee
Topic for 2003-04: Asian American Poetry. This course focuses on Asian American poetry. We will examine how Asian American poets explore identity, desire, and experience. Sometimes these poets emphasize ethnic identity and celebrate particular cultural belonging, while at other times they assert a universal shared humanity. Their poetry also explores ways of expressing alienation in many forms. We will explore how Asian American poetry lays claim to the past, as well as how it renounces it throughout. The course will provide particular attention to the relations between poetry and politics, and poetry and justice. Poets will include Li-young Lee, Cathy Song, Lawrence Inada, Nellie Wong, Agha Shahid Ali, contemporary spoken-word artists, and others.

ENG 271 The Rise of the Novel
Lee
A study of how the genre of the novel begins in forgeries, poses as real documents and letters, and eventually reveals itself as a kind of literature uniquely suited to modern society. There will be a particular emphasis on the novel's enduring fascination with women and criminals, the choices they make and the rewards and punishments they receive. Authors include Behn, Defoe, Richardson, Fielding, Edgeworth and Austen.

ENG 272 The Victorian Novel
Meyer, Rodensky
An exploration of the changing relationships of persons to social worlds in some of the great novels of the Victorian period. The impact on the novel of industrialization, the debate about women's roles, the enfranchisement of the middle and the working classes, the effect on ordinary persons of life in the great cities, the commodification of culture -- these and other themes will be traced in the works of some of the following: Charlotte Brontë, Emily Brontë, Charles Dickens, George Eliot, Elizabeth Gaskell, George Gissing, Thomas Hardy.

ENG 273 The Modern British Novel
Rodensky, Harman
A consideration of the ways in which modernist writers reimagine the interests of the novel as they experiment with and reshape its traditional subjects and forms. From the frank exploration of sexuality in Lawrence, to the radical subordination of plot in Woolf, modernist writers reconceive our notion of the writer, of story, of the very content of what can be said. A selection of works by E.M. Forster, D.H. Lawrence, James Joyce, Virginia Woolf, Jean Rhys, and Joseph Conrad.

ENG 277 English-Language Fiction in Global Perspective
Sabín
Topic for 2003-04: Modern Indian Literature in English. Focus on novels, memoirs, and non-fiction writing—mostly contemporary, with some earlier examples of what now begins to make up a tradition of modern Indian literature in English. Controversial questions to be addressed include: what is "authentically" Indian? What is the writer's responsibility to solve social and political problems? What roles do women play in this literature? Introduction to important religious and political contexts will be provided, but primary attention will go to the literature itself, with some attention to films. Authors will likely include Gandhi, R.K. Narayan, Raju Rao, Anita Desai, Salman Rushdie, Rapsi Sidhwa, Robinton Mistry, Ishu Lanka, plus films directed by Satyajit Ray and Deepa Mehta.

ENG 315 Advanced Studies in Medieval Literature
Lynch
Topic for 2003-04: The Eaten Word: Food and Drink in Medieval Literature and Culture. From the meal hall to the guildhall, from the pint of ale to the holy grail, eating and drinking offered a primary means of social bonding, religious devotion, and ritual definition throughout the Middle Ages and beyond. This course will survey the role of food in medieval literature and culture from literary, anthropological, religious, historical, and psychological perspectives. Selections from primary texts (e.g., Chaucer, Boccaccio, Arthurian romance, Rabelais) will be augmented by critics and theorists (e.g., Bynum, Bell, Bakhitin, Freud, Levi-Strauss). Guest lectures by faculty from other departments in the Medieval/Renaissance program.

ENG 320 Literary Cross Currents
Ford
Topic for 2003-04: The Language of Noir. This course expands its definition of the noir idiom outwards from the group of World War II-era films to which the term was originally applied. Beginning with the origins of noir in texts by Conrad and Hemingway, we will go on to read hardboiled writers Hammett, Chandler, and Cain with particular attention to the way that gender and race figure in their narratives. Weekly screenings of classic noir films such as The Maltese Falcon, Double Indemnity, and Touch of Evil will allow us to compare the textual and visual effects of noir style, and the course will conclude with an examination of the ways in which contemporary authors and filmmakers have appropriated noir style for new uses.

Topic for 2003-04: London. An exploration of how the crowded, dangerous, and seductive city of London figures in literature and in other high and low art forms. Topics range from the plague to social posers, from the art of walking in the city to the spirit of competitive conversation. Particular attention to the nexus of crime, theatricality, and spectatorship from which a self-consciously modern urban self emerges. Authors include Defoe, Johnson, Burney, Blake, Wordsworth and De Quincey.

ENG 355 Advanced Studies in Twentieth-Century Literature

Rodensky

Topic for 2003-04: Virginia Woolf. A close study of the novels, essays, and diaries of the most important English woman writer of the twentieth century. We will consider the development of Woolf's voice in her novels and her nonfictional writing as well as the relations between her fictional and nonfictional work. We will also take up the critical response to Woolf. How was her work received by her contemporaries? What happened in the 50s and 60s? Finally, we will take account of Woolf as an iconic figure, recreated most recently in Michael Cunningham's The Hours. Readings will probably include The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, A Room of One's Own, and selections from The Common Reader and A Writer's Diary.

Great cities have always been sites of invention—industrial, commercial, and cultural—and none more so than Chicago in the nineteenth and twentieth centuries. We shall be looking at some of the signs of that energy: novels by Theodore Dreiser, Nelson Algren, Richard Wright, and Saul Bellow; the pioneering writings of Jane Addams and the University of Chicago sociologists; the development of the skyscraper by architects like Louis Sullivan and Daniel Burnham; the emigration of Bauhaus modernism to America (László Moholy-Nagy's Institute of Design) and, with it, the emergence of a distinctive "Chicago School" of photography.

ENG 383 Women in Literature, Culture, and Society

Meyer

Topic for 2003-04: Nineteenth-Century Novels of Romantic Mistake. "Reader, I married him." Jane Eyre tells us as her novel draws to a close. Many nineteenth-century novels end with a marriage. So despite suggestions within the body of the novel that women's traditional role is not a satisfying one, the heroine seems contented in that role by the novel's end. But what if the heroine chooses wrongly? In this course we will consider novels that look at a heroine's life after a marriage that she comes to regret, as well as some novels in which the bad romantic choices do not result in marriage. What do these novels of romantic mistake have to say about women's lives?

Probable authors: Anne Brontë, Charlotte Brontë, James, Austen, Eliot.

Topic for 2003-04: Dickens and Trollope: Studies in the Victorian Comic Novel. A close study of six novels – three each by two of the most popular and most representative of Victorian writers. We'll follow the progression of two great novelists as they take the essentially comic form of their earlier novels and turn it to darker, deeper, and richer purposes in the course of their careers. From Trollope's *Chromeries of Barsetshire: Barsetshire Towers* (1855), *Frankley Parsonage* (1861), and *The Last Chronicle of Barset* (1867); from early and late in Dickens's career, *Martin Chuzzlewit* (1843-44), *Bleak House* (1853-54), and *Great Expectations* (1860-61).

Topic for 2003-04: Robert Lowell. Robert Lowell's *Collected Poems* will be published in 2003, a scholarly undertaking many years in the making. For the first time, it will be possible to see one of the most powerful and influential twentieth-century poets whole. We will explore the entire span of Lowell's career through the resources made available by this new edition, which includes a huge amount of helpful supplementary material – notes, excerpts from Lowell's letters and essays, drafts of poems. Students will have the opportunity to assess the ways in which a body of poetic work is "made" through the efforts of the poet's editor, who in the case of Lowell is also the instructor of this course.

Courses at the 100 level are open to all students and presume no previous college experience in literary study. They provide good introductions to such study because of their subject matter or their focus on the skills of critical reading. Critical Interpretation (English 120) is open to all students, but is primarily designed for prospective English majors. The course trains students in the skills of critical reading and writing. 200-level literature courses are open to all students. They treat major writers and historical periods, and provide training in making comparisons and connections among different works, writers, and ideas. 300-level literature courses encourage both students and instructors to pursue their special interests. They presume a greater overall competence, together with some previous experience in the study of major writers, periods, and ideas in English or American literature. They are open to all those who have taken two literature courses in the department, at least one of which must be 200 level, and by permission of the instructor or chair to other qualified students.

Unit: 1.0

Consult with them about any changes they wish to make in the course of their junior and senior years.

The English Major consists of a minimum of ten units, at least eight of which must be in areas other than creative writing. At least seven units must be above 100 level, and of these at least two units must be earned in 300-level literature, film, or literary theory courses. At least six of the units for the major must be taken in the department, including the two required units in 300-level courses.

Writing 125 does not count toward the major. Courses designated 125/120 satisfy both the English 120 requirement and the Writing 125 requirement, and count as a unit toward the fulfillment of the major. Other combined sections, such as Writing 125/English 127, count toward the major as well. Independent work (350, 360, or 370) does not count toward the minimum requirement of two 300-level courses for the major.

All students majoring in English must take Critical Interpretation (English 120), at least one course in Shakespeare (200 level), and two courses focused on literature written before 1900, of which at least one must focus on writing before 1800.

Courses taken in other departments may not be used to satisfy any of the above distribution requirements, with the exception of Medieval/Renaissance 246, which satisfies the pre-1800 distribution requirement. English 112, English 223, and English 224 do not satisfy the pre-1800 distribution requirement. Transfer students or Davis Scholars who have had work equivalent to 120 at another institution may apply to the chair for exemption from the Critical Interpretation requirement.

The English Minor consists of five units: (A) 120 and (B) at least one unit on literature written before 1900 and (C) at least one 300-level unit, excluding 350 and (D) at least four units, including the 300-level course, taken in the department; a maximum of two creative writing units may be included.

Honors. The department offers a choice of two programs for Honors. Under Program I the honors candidate does two units of independent research culminating in a thesis or a project in creative writing. Program II offers an opportunity to receive honors on the basis of work done for regular courses but carries no additional course credit. A candidate electing Program II presents a dossier of essays written for several courses with a statement of connections among them and critical questions raised by them. Applicants for honors should have a minimum 3.5 GPA in the major (in courses above 100 level) and must apply to the chair for admission to the program. A more detailed description of the department's application procedure is available from the department's administrative assistant.

Expository and Creative Writing. Special attention is called to the range of courses in writing offered by the College. In addition to Writing 125, required of all students, Writing 126 is open, with the permission of the instructor, to students who would benefit from a continuation
of Writing 125 or from an individual tutorial. Writing 225 is made possible through an endowed fund given by Luther I. Repogle in memory of his wife, Elizabeth McIlvaine Repogle. It is a workshop designed for students who want training in expository writing on a level above that of Writing 125, and satisfies the writing requirement for transfer students and Davis Scholars. Courses in the writing of poetry and fiction (200 and 300 level) are planned as workshops with small group meetings and frequent individual conferences. In addition, qualified students may apply for one or two units of Independent Study (350) in writing.

Graduate Study in English. Students expecting to do graduate work in English should ordinarily plan to acquire a reading knowledge of two foreign languages. They should take English 382, Criticism, or an equivalent course in literary theory. They should also consult with the department's graduate school advisor, and with their departmental advisor, about courses that are appropriate for those considering graduate work in English.

Teacher Certification. Students interested in obtaining certification to teach English in the Commonwealth of Massachusetts should consult with the chair of the Education Department and the English Department liaison to the Education Department.

Environmental Studies

AN INTERDEPARTMENTAL MAJOR WITH CONCENTRATIONS IN ENVIRONMENTAL JUSTICE AND PHILOSOPHY, ENVIRONMENTAL POLICY AND ECONOMICS, OR ENVIRONMENTAL SCIENCE

Co-directors: DeSomber" (Political Science); Rodenhouse (Biological Sciences)

Advisory Faculty: Karakasidou, Steady, Merry, Winkler (Environmental Justice and Philosophy); DeSomber, Paarlberg, (Environmental Policy and Economics); Andrews, Besancon, Coleman, Moore, Rodenhouse, Thomas, Thompson, Stark (Environmental Science).

Environmental issues are complex and involve disciplines across the sciences, social sciences, and humanities. The Environmental Studies major provides students with the knowledge and skills needed to study, understand, and address these pressing issues, which range from biological diversity and natural resource use; to energy use, industrial waste, and other concerns of industrial societies; to the relationship between the environment and economic development. Because of the interdisciplinary nature of environmental issues, the major draws upon courses from multiple departments; however, each student will focus her studies within one of the three areas of concentration in order to obtain the depth of knowledge needed for advanced study and critical analyses. Students will choose an advisor from among the advisory faculty representing her area of concentration. A minor is not offered in any area of concentration.

There are three components to the 11-course major:
1. two core courses (ES 100 and ES 300)
2. five courses in an area of concentration (at least one of which must be at the 300 level)
3. four elective courses complementing the area of concentration

Students may count no more than three courses taken away from Wellesley towards the Environmental Studies major. These courses should be approved by a co-director prior to enrollment.

1. Core courses (two courses required)

ES 100 Humans and Nature
Coleman (Chemistry), Karakasidou (Anthropology)

An introduction to social, political, economic, and scientific aspects of various environmental issues including acid deposition, stratospheric ozone depletion, global warming, energy resource management, soil depletion and population dynamics. Emphasis will be placed on the interrelatedness of these issues and on the interdisciplinary nature of the approaches that must be taken to deal with them. Laboratories will explore computer modeling as a tool for understanding environmental questions, monitoring of various environmental markers on the Wellesley campus, and will make use of other resources in the Boston area.

Prerequisite: None
Distribution: None. Does not satisfy the laboratory requirement.
Semester: Fall

Unit: 1.25

ES 300 Environmental Issues
Rodenhouse (Biological Sciences)

Topic for 2003-04: Climate Change. An interdisciplinary seminar in which students work together in small groups to understand and develop solutions for environmental problems. This year's course focuses on the issue of global climate change, including the scientific background, the political processes and the ethical and environmental justice implications of this environmental issue. Lectures and readings will inform students about the issue and its global and local manifestations.

Prerequisite: A declared major in environmental studies. ES 100 and at least four other courses in the student's area of concentration, or permission of the instructor.
Distribution: None
Semester: Spring

Unit: 1.0

Additional Environmental Studies Courses that may count (as indicated) towards areas of concentration or towards electives:

ES 212/RAST 212 Lake Baikal: The Soul of Siberia
Hodge (Russian) and Moore (Biological Sciences)

NOT OFFERED IN 2003-04. The ecological and cultural values of Lake Baikal – the oldest, deepest, and most biologically rich lake on the planet – are examined. Lectures and discussion in spring prepare students for the three-week field laboratory taught at Lake Baikal in eastern Siberia in August. Lectures address the fundamentals of aquatic ecology and the role of Lake Baikal in Russian literature, history, art, music, and the country's environmental movement. Laboratory work is conducted primarily out-of-doors and includes introductions to the flora and fauna, field tests of student-generated hypotheses, meetings with the lake's stakeholders, and tours of ecological and cultural sites surrounding the lake. This course can count towards a concentration in Environmental Science or as an elective for the other concentrations. This course does not count toward the minimum major in Biological Sciences. Students may register for either ES 212 or RAST 212. Credit will be given in the department in which the student is registered. Not offered every year. Subject to Dean's Office approval.
Prerequisite: BISC 111, RUSS 101, and permission of the instructors. Preference will be given to students who have also taken HIST 105.
Distribution: Natural and Physical Science
Semester: N/O

Unit: 1.25

ES 222 Dynamic Modeling of Environmental Issues
Coleman (Chemistry)

A hands-on introduction to the application of systems dynamics to developing computer-based models for complex problems, with an emphasis on the environment. Starting with simple closed systems, students will develop models of increasing sophistication and complexity for issues such as population dynamics, air and water pollution,
energy production and usage, waste management and sustainable development. Emphasis will be placed on the principles of problem solving and systems dynamics and on developing models that reflect, as closely as possible, real-world situations and the interrelatedness of various environmental concerns. This course can count towards a concentration in Environmental Science or as an elective for the other concentrations. Not offered every year. Subject to Dean’s Office approval.

Prerequisite: ES100 and successful completion of the Quantitative Reasoning requirement, or permission of the instructor.

Distribution: Natural and Physical Science or Mathematical Modeling
Semester: Winter Session

Unit: TBD

Individual Study and Senior Thesis Research
Research or Individual Study (ES 250 or 350) or Senior Thesis Research (ES 360/370) can be advised by any member of the Advisory Faculty in Environmental Studies. They may count towards the area of concentration. A half-unit course may only count as credit towards the major when combined with another half-unit course. Only three units of independent study may be counted towards the major.

ES 250 Research or Individual Study
Prerequisite: Permission of instructor, ordinarily limited to students who have completed at least three units toward their major.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ES 250H Research or Individual Study
Prerequisite: Permission of instructor, ordinarily limited to students who have completed at least three units toward their major.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ES 350 Research or Individual Study
Prerequisite: Permission of instructor, ordinarily limited to students who have completed at least five units toward their major.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ES 350H Research or Individual Study
Prerequisite: Permission of instructor, ordinarily limited to students who have completed at least five units toward their major.
Distribution: None
Semester: Fall, Spring
Unit: 0.5

ES 360 Senior Thesis Research
Prerequisite: By permission of the Advisory Faculty. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

ES 370 Senior Thesis
Prerequisite: 360
Distribution: None
Semester: Fall, Spring
Unit: 1.0

II. Areas of Concentration (five courses required from one of the following areas)
(Note that most 200- and 300-level courses have one or more 100-level prerequisites)

A. Environmental Justice and Philosophy — provides students with the background needed to understand and address the philosophical and ethical issues raised by human activity in the natural world, including the causes and consequences of environmental degradation as they are influenced by social inequality.

A student choosing to concentrate in this area would, with the approval of her advisor, choose five from among the following courses:

AFR 226 Environmental Justice, Race, and Sustainable Development
ANTH 215 The Triumph of Culture: Perceptions of Nature and Human Interaction on the Environment
INAT 302 Seminar. Global Inequalities
PEAC 259 Peace and Conflict Resolution
PHIL 206 Normative Ethics
PHIL 217 Philosophy of Science: Traditional and Feminist Perspectives
PHIL 233 Environmental Philosophy
POL2 312S Seminar. Environmental Policy
SOC 348S Seminar. Problems in North-South Relations
SOC 235 Business and Social Responsibility

Alternative courses in this area of concentration might include:

ANTH 238 The Vulnerable Body: Anthropological Understandings
ANTH 251 Cultures of Cancer
ANTH 345 Colonialism, Development, Nationalism, and Gender
EXTD 201 Current Issues in Bioethics
PHIL 213 Social and Political Philosophy
PHIL 340 Seminar. Contemporary Ethical Theory
POL2 302 Globalization and the Nation-State
POL3 325 International Environmental Law
REL 230 Ethics
REL 257 Contemplation and Action
REL 323 Seminar. Feminist Theologies
SOC 209 Social Inequality
SOC 221 Globalization

B. Environmental Policy and Economics — provides students with the background needed to understand how policy is developed, how specific policy decisions affect environmental quality, and how economic factors structure the opportunities and constraints of environmental policy and the use of natural resources.

A student choosing to concentrate in this area would, with the approval of her advisor, choose five from among the following courses:

ECON 228 Environmental and Resource Economics
POL2 202 Comparative Politics
POL2 204 Political Economy of Development and Underdevelopment
POL2 312S Seminar. Environmental Policy

POL3 323 International Economic Policy
POL3 325 International Environmental Law
POL3 332S Seminar. People, Agriculture, and the Environment
POL3 351S Global Governance

Alternative courses in this area of concentration might include:

AFR 226 Environmental Justice, Race, and Sustainable Development
ANTH 215 The Triumph of Culture: Perceptions of Nature and Human Interaction on the Environment
ECON 212 Trade and Migration
ECON 220 Development Economics
ECON 222 Games of Strategy
ECON 230 Contemporary Economic Issues, Topic for 2003-04: Economics of Technology
EXTD 123 Water Resources Planning and Management
EXTD 128 Coastal Zone Management
INAT 302 Seminar. Global Inequalities
POL2 302 Globalization and the Nation-State
POL3 327 International Organization
POL3 329 International Law
SOC 221 Globalization
SOC 235 Business and Social Responsibility

C. Environmental Science — offers an interdisciplinary approach for viewing the Earth and its inhabitants from more than one scientific perspective. Courses that are strongly recommended to strengthen the quantitative skills of all students concentrating in environmental science include introductory calculus (e.g., MATH 116Z) or statistics (e.g., MATH 101, QR 199). A student choosing to concentrate in this area would, with the approval of her advisor, choose five of the following courses, not all from the same department.

Biological Sciences
BISC 201 Ecology with Laboratory
BISC 202 Evolution with Laboratory
BISC 203 Comparative Physiology and Anatomy of Vertebrates with Laboratory
BISC 204 Ecology of New England Seascapes with Laboratory (Summer 2003)
BISC 207 The Biology of Plants with Laboratory
BISC 209 Microbiology with Laboratory
BISC 210 Marine Biology with Laboratory
BISC 307 Advanced Topics in Ecology with Laboratory
BISC 308 Tropical Ecology with Winter Session Laboratory
EXTD 225 Biology of Fishes
EXTD 226 Cetacean Biology and Conservation

85 Environmental Studies
processes, economic considerations and ethical choices compose and constrain understanding and action on environmental issues.

The primary set of courses from which a student should select electives, in consultation with her advisor, are those listed under Environmental Studies that are not core requirements, or those listed for the tracks in which the student is not concentrating.

### Off-Campus Programs

By special arrangement with the Ecosystems Center of the Marine Biological Laboratory and the Marine Studies Consortium (see EXTD courses listed in concentration listings), Wellesley College students in good standing may apply for courses in these off-campus programs. The number of participants in each program is limited (see Special Academic Programs). Students should also consider courses at MIT. Both MIT and EXTD courses count as Wellesley courses, rather than as courses taken off campus, for the purposes of the Environmental Studies major. For courses offered during the Semester in Environmental Studies, Ecosystems Center of the Marine Biological Laboratory, Woods Hole, Mass., see www.mbl.edu/SES.

### Related Courses

*For Credit Toward the Major*

The courses listed below are representative of other courses throughout the curriculum that may be used as electives for the major if approved by the advisor. Students may petition the advisory faculty to include courses not listed below.

- AFR 235 Societies and Cultures of Africa
- AFR 297 Medical Anthropology: A Comparative Study of Healing Systems
- AFR 318 African Women, Social Transformation, and Empowerment
- ANTH 104 Introduction to Cultural and Social Anthropology
- ANTH 242 "Civilization" and "Barbarism" during the Bronze Age, 3500-2000 B.C.E.
- ANTH 346 Colonialism, Development, Nationalism, and Gender
- ARTH 235 Landscape and Garden Architecture
- BISC 108 Horticulture with Laboratory
- BISC 110 Introductory Cell Biology with Laboratory
- BISC 111 Introductory Organismal Biology with Laboratory
- BISC 305 Seminar Evolution
- CHEM 105 Fundamentals of Chemistry with Laboratory
- CHEM 110 Introductory Chemistry I with Laboratory
- CHEM 111 Introductory Chemistry II with Laboratory
- CHEM 120 Intensive Introductory Chemistry with Laboratory
- CHEM 205 Chemical Analysis and Equilibrium with Laboratory
- ECON 101/102 Principles of Microeconomics/Macroeconomics
- [EXTD 124] Introduction to Marine Mammals
- GEOL 100 Oceanography
- GEOL 102 The Dynamic Earth with Laboratory
- GEOL 305 Paleontology with Laboratory
- HIST 223 Science and Society since 1800
- MATH 101 Reasoning with Data: Elementary Applied Statistics
- PEAC 104 Introduction to the Study of Conflict, Justice, and Peace
- PHIL 106 Introduction to Moral Philosophy
- PHYS 103 The Physics of Marine Mammals with Laboratory
- PHYS 104/106 Basic Concepts in Physics I/II with Laboratory
- PHYS 107/108 Introductory Physics I/II with Laboratory

- SOC 316 Migration: A Research Seminar
Experimental

According to College Legislation, the student-faculty Committee on Educational Research and Development has the authority to recommend experimental courses and programs to Academic Council. Faculty members and students are invited to submit their ideas to the Committee. In 2003-04 the following experimental courses will be offered:

**ES 222 Dynamic Modeling of Environmental Issues**
Coleman (Chemistry)
A hands-on introduction to the application of systems dynamics to developing computer-based models for complex problems, with an emphasis on the environment. Starting with simple closed systems, students will develop models of increasing sophistication and complexity for issues such as population dynamics, air and water pollution, energy production and usage, waste management and sustainable development. Emphasis will be placed on the principles of problem solving and systems dynamics on developing models that reflect, as closely as possible, real-world situations and the interrelatedness of various environmental concerns. This course can count towards a concentration in Environmental Science or as an elective for the other concentrations. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: ES 100 and successful completion of the Quantitative Reasoning requirement, or permission of the instructor.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: Winter/Session Unit: TBD

**EXP 202 Celluloid USA**
Viano (Italian Studies) and Staff
This course will investigate cinematic images of the United States. To present a range of views, eleven Wellesley College professors will lecture on films dating from the 1920s to the present.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring Unit: 1.0

**EXP 240 Papyrus to Print to Pixel**
Rogers (Library) and Ruffin (Library)
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. The electronic revolution wasn’t the first: written communication changed radically from the hand-written papyrus rolls of the ancient Greeks and Romans to the codex-form manuscripts of the Middle Ages, again with the invention of printing from moveable type, again with the development of industrial, mass-market, low cost printing and the paperback, and again with the development of electronic texts. Lectures, discussions, and weekly hands-on labs will examine how previous and contemporary revolutions in the technology of written communication have affected society, from religion to economics to politics. Assignments will include making papyrus sheets, producing a manuscript, making paper, setting type and letterpress printing, and desktop publishing.
Prerequisite: By application.
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: N/O. Offered in 2004-05. Unit: 1.0

**MATH 215/PHYS 215 Mathematics for the Sciences I**
Chung (Mathematics) and Stark (Physics)
Complex numbers, linear algebra (matrices, rank, inverses, eigenvectors and eigenvalues, diagonalization), ordinary differential equations (first order, second order linear), Fourier analysis, introduction to partial differential equations. Familiarity with vectors (dot products, cross products, lines, planes) is assumed. Emphasis on applications to the sciences. Students may register for either PHYS 215 or MATH 215. Credit will be given in the department in which the student is registered.
Prerequisite: Math 116, 116Z, or 120 or the equivalent course.
Distribution: Mathematical Modeling
Semester: Fall Unit: 1.0

**MATH 216/PHYS 216 Mathematics for the Sciences II**
Magid (Mathematics) and Hu (Physics)
Differential and integral vector calculus (spherical and cylindrical coordinates, flux, divergence and curl, Gauss’ and Stokes’ theorems), partial differential equations, special functions, numerical methods for solving algebraic and differential equations, introduction to MATLAB, computer simulation and modeling with applications to the sciences. Students may register for either PHYS 216 or MATH 216. Credit will be given in the department in which the student is registered.
Prerequisite: MATH 215/PHYS 215
Distribution: Mathematical Modeling
Semester: Spring Unit: 1.0

**Extradepartmental**

The following section includes courses of interest to students in various disciplines.

**Health and Society**

**EXTD 103 Introduction to Reproductive Issues**
Asch
This course explores reproduction in contemporary U.S. society, attending to psychological, social, ethical, and policy implications of pregnancy, childbirth, and parenthood. Reproductive health, technology, and practices are considered in light of the significance of children in different eras and cultures, and of national and international policies concerning children, families, and the status of women.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: Fall Unit: 1.0

**EXTD 201 Current Issues in Bioethics**
Asch
A philosophical examination of ethical problems in the practice of medicine and medical research; this course examines such topics as the professional/patient relationship, physician-assisted suicide, making medical decisions for one’s self and for others, allocating health care resources, and new developments in reproduction and genetics. The relationship of bioethics to moral philosophy, and different theories of bioethics will be integrated into exploration of these topics.
Prerequisite: Open to sophomores, juniors and seniors, and first-years with permission of instructor.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring Unit: 1.0

**EXTD 202 Multidisciplinary Approaches to Abortion**
Asch
Why is abortion an emotionally-charged, intellectually troubling, and nationally divisive issue? There is more to the topic of abortion than the conflict between “pro-choice” and “pro-life” positions. We can achieve better understanding of the problem by examining the biological and medical aspects of abortion as well as its religious, social, psychological, and philosophical implications. The class will explore a range of views on such topics as prenatal screening, the moral and legal significance of fathers’ claims, and the possible impact of medical and technological advances (such as RU-486) on the issue of abortion.
Prerequisite: Open to sophomores, juniors, and seniors who have taken one introductory course in a social science, biology, philosophy, or women’s studies.
Distribution: Religion, Ethics, and Moral Philosophy, or Social and Behavioral Analysis
Semester: Fall Unit: 1.0

**EXTD 203 Ethical and Social Issues in Genetics**
Asch
New genetic technologies confront us with complex questions. Should we use prenatal tests to select children’s characteristics? Should genetic information be private and confidential? How should knowledge of the genetic origins of certain conditions affect health policy? If some per-
sonality and behavioral characteristics have genetic components, should this change our views about personal responsibility?

Prerequisite: One course in any of the following: biology, philosophy, psychology, sociology, women's studies.

Distribution: Religion, Ethics, and Moral Philosophy

Semester: Spring

Unit: 1.0

**EXTD 204 Women and Motherhood**

**NOT OFFERED IN 2003-04.** As poet and feminist, Adrienne Rich points out that motherhood is both an "experience and institution." This course highlights how social institutions and cultural beliefs shape the experience and meaning of motherhood. We will contrast motherhood today with motherhood in other cultures and periods, and we will examine how contemporary medical practice and social policy have created new options and new problems for women. Topics will include the experience of pregnancy and childbirth, contemporary family policy, reproductive technologies, and what have become known as "maternal/fetal conflicts.”

Prerequisite: None

Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis

Semester: N/O

Unit: 1.0

**EXTD 300 Ethical and Policy Issues in Reproduction**

**NOT OFFERED IN 2003-04.** This seminar will analyze divergent views on current ethical questions in reproduction, giving attention to the grounds for these views, and their ramifications for clinical practice and public policy. Feminist and mainstream approaches to bioethics will be contrasted; topics will include: creating families through assisted reproduction and adoption; moral and social issues in human cloning; moral obligations of pregnant women; and the moral and legal status of unimplanted embryos and aborted fetuses.

Prerequisite: One of the following: ECON 232; EXTD 103, 202, 203, 204; PHIL 106, 206, 213, 227, 249; POLI 215; PSYC 222, 245, 302; SOC 200, 201, 209, 212, 217, [312], 314, [349]; WIST 217, 120, 211, 222, [230], 235, [254]; 311, or permission of the instructor.

Distribution: Religion, Ethics, and Moral Philosophy

Semester: N/O

Unit: 1.0

Other Extradepartmental Courses

**EXTD 212 Korean Cultural Identities**

**McCann**

Surveys articulations of Korean cultural identity in literature, art, and the writing of history from the Unified Silla Kingdom in the seventh century, through the succeeding Koryo and Choson dynasties, and into the first half of the twentieth century. Then examines events and aftermath of the Japanese colonial occupation, 1910-1945; liberation, division, and the Korean War, 1945-1953; and the separating cultural spheres in north and south. The concluding section of the course will consider the re-production of identity issues in the context and course of the first century of Korean-American history, 1903-2003. Taught in English.

Prerequisite: None

Distribution: Language and Literature or Historical Studies

Semester: Spring

Unit: 1.0

**EXTD 234 Imaginary Crimes and Courts: The Law in Literature**

**Krause**

**NOT OFFERED IN 2003-04.** Both in literature and in law, language shapes rhetorical worlds which seek to represent, constitute, interpret, and criticize the world created and inhabited by human beings. Since its beginnings through the twentieth century, imaginative literature, in turn, has embodied critical depictions of the law in the lives of individuals and societies. The course will examine texts from Sophocles to Doctorow and include texts by Shakespeare, Kleist, Dickens, Melville, and Kafka.

Prerequisite: None

Distribution: Language and Literature

Semester: N/O

Unit: 1.0

**EXTD 275 Contrasts on the Cape of Good Hope: Introduction to Contemporary South Africa**

**NOT OFFERED IN 2003-04.** This is an interdisciplinary, team-taught, intensive course for fourteen students from Smith and Wellesley (seven from each college). It will be based at the University of Cape Town, and taught primarily by UCT faculty and other academics/experts in the Cape Town area. The course will include instruction and practical experience in a variety of fields pertaining to South Africa, ranging from the physical and social sciences to medicine, the arts, politics, and the humanities. Topics include: the Truth and Reconciliation Commission; AIDS/HIV and other public health issues; environmental concerns; and contemporary developments in the arts. The course will include a community service component as well as academic work and other activities to engage students in contemporary South Africa. Not offered every year. Subject to Dean's Office approval.

Prerequisite: Open to rising sophomores, juniors, and seniors by permission of the instructor.

Distribution: None

Semester: N/O

Unit: 1.0

**EXTD 334 Literature and Medicine**

**Respawn**

**NOT OFFERED IN 2003-04. OFFERED IN 2004-05.** Drawing on texts from different countries, this interdisciplinary course will investigate literature's obsession with medicine. Literary representations of doctors and patients, disability, insanity, AIDS, birth, death and grief, the search for healing and the redemptive power of art. Attention will be given to the links between medical diagnosis and literary interpretation. Differences between the treatment of medical issues in fiction and in autobiographies will be explored. Selected visual representations, in film and photography, will also be introduced.

Prerequisite: One 200-level course in literature or by permission of the instructor.

Distribution: Language and Literature

Semester: N/O. Offered in 2004-05.

Unit: 1.0

**EXTD 350 Research or Individual Study**

Prerequisite: Open by permission to juniors and seniors.

Distribution: None

Semester: Fall, Spring

Unit: 1.0

**EXTD 225 Biology of Fishes**

This upper-level survey course covers the evolution, systematics, anatomy, physiology, and behavior of freshwater, marine, and anadromous fishes from temperate to tropical environments. The course also examines the diversity of fish interactions in aquatic communities.

**EXTD 123 Water Resources Planning and Management**

A comprehensive introduction to the economics and ecology of water supply and water pollution control. Topics include watershed management, groundwater and wetlands protection, and wastewater treatment. The inherent difficulty in applying static laws and regulations to a dynamic natural resource such as water is a recurring theme. Offered by the Marine Studies Consortium.

Prerequisite: None. Open to students by permission of the Consortium representative, Harold Andrews, Geology Department.

Distribution: None

Semester: Spring

Unit: 1.0

**EXTD 126 Maritime History**

This course is an introduction to New England's maritime history, with secondary emphasis on its relationship to the coastal ecosystem. The course will survey the sea's legacy from the earliest seventeenth-century fishing settlements to the shipbuilding and commerce of today. Course themes will include historical, political, and economic developments. Field trips will explore the rich resources of the Peabody Museum, Salem, Mass.; the USS Constitution, Boston, Mass.; and Mystic Seaport, Conn. Offered by the Marine Studies Consortium.

Prerequisite: None. Open to students by permission of the Consortium representative, Harold Andrews, Geology Department.

Distribution: None

Semester: Spring

Unit: 1.0

**EXTD 128 Coastal Zone Management**

This course presents a survey of the coastal environment, its physical characteristics, natural systems, economic uses, and development pressures. Lectures examine strategies formulated in the U.S. for land and water resource management in the coastal zone. The roles of federal, state, and local government, environmental groups, and resource users are also explored. Finally, by comparing coastal zone management problems in the U.S. to those elsewhere in the world, students gain a global perspective. Offered by the Marine Studies Consortium.

Prerequisite: None. Open to students by permission of the Consortium representative, Harold Andrews, Geology Department.

Distribution: None

Semester: Spring

**EXTD 334 Literature and Medicine**

**Respawn**

**NOT OFFERED IN 2003-04. OFFERED IN 2004-05.** Drawing on texts from different countries, this interdisciplinary course will investigate literature's obsession with medicine. Literary representations of doctors and patients, disability, insanity, AIDS, birth, death and grief, the search for healing and the redemptive power of art. Attention will be given to the links between medical diagnosis and literary interpretation. Differences between the treatment of medical issues in fiction and in autobiographies will be explored. Selected visual representations, in film and photography, will also be introduced.

Prerequisite: One 200-level course in literature or by permission of the instructor.

Distribution: Language and Literature

Semester: N/O. Offered in 2004-05.

Unit: 1.0

**EXTD 225 Biology of Fishes**

This upper-level survey course covers the evolution, systematics, anatomy, physiology, and behavior of freshwater, marine, and anadromous fishes from temperate to tropical environments. The course also examines the diversity of fish interactions in aquatic communities:
predator/prey relationships, host/symbiotic interactions, and the various roles of fishes as herbivores. Study of inter- and intra-specific predator-prey relationships among fish populations in aquatic communities integrates principles of ecology. Offered by the Marine Studies Consortium.

Prerequisite: One year of general biology and two upper-level biology courses. Open to students by permission of the Consortium representative, Harold Andrews, Geology Department.

Distribution: None
Semester: Spring
Unit: 1.0

EXTD 226 Cetacean Biology and Conservation
This upper-level course examines the biology and conservation of cetaceans: whales, dolphins, and porpoises. Topics include physiology, population biology, life history analysis, molecular genetics, morphology, distributional ecology, and social behavior. Lectures first focus on the biology of cetaceans and how they are adapted to the marine environment. Subsequent lectures use case studies to review how biological principles can be applied to the conservation of a wide range of cetacean species. Offered by the Marine Studies Consortium.

Prerequisite: One year of general biology and two upper-level biology courses. Open to students by permission of the Consortium representative, Harold Andrews, Geology Department.

Distribution: None
Semester: Spring
Unit: 1.0

EXTD 227 Wetlands: Ecology, Hydrology, Restoration
This course examines the vital role of wetlands in the hydrology and ecology of global landscapes. The function of inland and coastal marshes, swamps and bogs and their role in water and nutrient cycles will be examined. We will also survey the biodiversity of wetlands habitats, from microbes to vertebrates. The biological links between wetlands and human activities, such as agriculture, coastal development, and fisheries will be considered, as well as the legal framework for the protection and restoration of endangered wetlands. Offered by the Marine Studies Consortium.

Prerequisite: One year of introductory geology or chemistry or biology or physics or engineering or economics; and two semesters of upper level (elective) science courses. Open to students by permission of the Consortium representative, Harold Andrews, Geology Department.

Department of French
Professor: Mistacce, Gillain*, Lygate**, Respaut, Levitt, Masson*
Associate Professor: Datta (Chair), Rogers, Petterson
Assistant Professor: Tranvozse, Prabhu, Gréle*, Gautier
Senior Lecturer: Egron-Sparrow
All courses are conducted in French. Oral expression and composition are stressed.
The Wellesley College language requirement is normally met with the completion of either French 201-202 or French 202 and one of the following courses: 205, 206, 207, 208, or 210. Students who present an AP score of 3 or an SAT II score between 650 and 690 will satisfy the requirement by taking one of the following courses: 205, 206, 207, 208, or 210. Students who have studied French in high school but who do not present an SAT II or AP score in French at admission will be placed into the appropriate French class on the basis of their scores on the French Department’s placement test. After 211, the numbering of 200-level courses does not denote increasing levels of difficulty; 200-level courses above 211 may be taken in any sequence. Please see Directions for Election at the end of this section for information about possibilities for acceleration and about the major.
Qualified students are highly encouraged to live at the Maison Française and to spend their junior year or semester in France in the Wellesley-in-Aix program or another approved program.
They are also encouraged to participate in the French Department’s Winter Session course in Paris and to inquire about summer internship possibilities in France or another Francophone country.

FREN 229 America Through French Eyes: Perceptions and Realities

Dirt

The French have long been fascinated by the United States, especially since the end of the Second World War. At times, the U.S. has been seen as a model to be emulated in France; more often, it has stood out as the antithesis of French culture and values. This course examines French representations of the United States and Americans through an examination of key historical and literary texts — essays, autobiographies, and fiction — as well as films. Topics to be explored include: representations of African Americans in French films (Josephine Baker), French views of Taylorization, the Coca-Cola wars of the 1950s, French-American tensions during the Cold War, especially under de Gaulle, as well as more recent debates about Eurodisney, McDonald's, Hollywood, globalization, and multiculturalism.

Prerequisite: At least one unit of 205, 206, 207, 208, or 210, an SAT II score of 700, an equivalent departmental placement score, or an AP score of 4 or 5. Distribution: Language and Literature or Historical Studies Semester: Spring

FREN 301 Books and Voices in Renaissance France

Lydgate

Innovative writers in sixteenth-century France and the ideas and forms of expression they explored in the early decades of printing. The persistence of oral culture and the search for a voice in print; the triumph of French over Latin as a literary language of subtlety and power; the collisions of propaganda and censorship in a century torn by religious strife; the emergence of new audiences and new strategies of narrative and reading. Readings in prose works by Rabelais, Montaigne, Calvin, Marguerite de Navarre; poetry by du Bellay, Ronsard, and Louise Labé. Periodic reference to resources of the rare book collection in the Wellesley library.

FREN 304 Male and Female Perspectives in the Eighteenth-Century Novel

NOT OFFERED IN 2003-04. Drawing from recent feminist inquiries into the politics of exclusion and inclusion in literary history, the course examines, in dialogue with masterpieces authored by men, novels by major women writers of the period. These novels, though much admired in their time, were subsequently erased from the pages of literary history, and have only recently been rediscovered. Works by Prévost, Claudine-Alexandrine de Tencin, Françoise de Graffigny, Marie-Jeanne Riccoboni, Rousseau, Diderot, Lacos, and Isabelle de Charriére.

Distribution: Language and Literature Semester: Fall Unit: 1.0

FREN 313 George Sand and the Romantic Theater
NOT OFFERED IN 2003-04. George Sand, multi-faceted woman and influential writer, allows us to explore the romantic theater as well as the overall theater production of the nineteenth century. The fact that Sand's theater was overlooked in her time and subsequently forgotten raises important questions of public recognition and literary posterity that we will examine.
Prerequisite: Two 200-level units, one of which must be 211 or above.
Distribution: Language and Literature Semester: Spring Unit: 1.0

FREN 314 Cinema
NOT OFFERED IN 2003-04. François Truffaut: An in-depth review of Truffaut's overall contribution to cinema. Includes readings from his articles as a film critic, a study of influences on his directorial work (Renoir, Hitchcock) and a close analysis of twelve of his films using a variety of critical approaches: biographical, historical, formal, and psychoanalytical.
Prerequisite: Two 200-level units, one of which must be 211 or above.
Distribution: Language and Literature Semester: Fall Unit: 1.0

FREN 316 Duras
NOT OFFERED IN 2003-04. A study of Marguerite Duras's literary and film production centering on her poetics of the Other and her practice of écriture féminine. Figures of difference and marginality (including social outcasts, colonized people, madwomen, children, criminals, Jews, and women) will be examined in connection with Duras's subversion of sexual, familial, social, political, literary, and cinematic conventions. Analysis of representative novels, films, short stories, and plays. Readings from interviews, autobiographical texts, and articles, as well as from Duras's final reflections on her life and the experience of writing. New critical perspectives on her work.

FREN 321 Selected Topics
Topic A: Metaphors of Artistic Creation in Proust's À la Recherche du Temps Perdu
NOT OFFERED IN 2003-04. Proust's work is an exploration of metaphor as the key to understanding different aspects of the human experience. This course will focus on how Proust uses metaphor to explore themes of memory, time, and identity.
Prerequisite: Two 200-level units, one of which must be 211 or above.
Distribution: Language and Literature Semester: N/O Unit: 1.0

Topic B: Women of Ill Repute: Prostitution in Nineteenth-Century France
Rogers
Women of loose morals in French fiction from the Revolution to the end of the nineteenth century. This course will trace the figure of the prostitute—from the innocuous fallen woman with a heart of gold to the threatening incarnation of feminine perversity—in literary texts and in the paintings of prominent artists of the period. Readings in contemporary treatises on hygiene, public policy, and the legal status of prostitutes will situate the theme in the socio-cultural context of the time. Fiction by Balzac, Dumas, Hugo, Baudelaire, Maupassant, Barbery, d'Aurevilly, Zola, Paintings by Degas, Manet, Toulouse-Lautrec.
Prerequisite: Two 200-level units, one of which must be 211 or above. Not open to students who have taken this course as 222 Topic C in Spring 2002.

AN INTERDEPARTMENTAL MAJOR

Director: Datta (French)

Wellesley offers an interdepartmental major in French Cultural Studies which combines courses from the Departments of French with those in Africana Studies, Art, History, Music, Political Science, or any other department offering courses on France or Francophone countries. French Cultural Studies majors ordinarily work closely with two advisors, one from the French Department and one from the other area of concentration.

The major in French Cultural Studies consists of a minimum of eight units. At least four units in the French Department above the 100 level are required including 207 and 211. At least one unit in French at the 300 (advanced) level is required. No more than two courses taken credit/noncredit at Wellesley College may be applied to the French Cultural Studies major.

FRST 350 Research or Individual Study
Prerequisite: Open by permission of director. See Academic Distinctions. Distribution: None
Semester: Fall, Spring Unit: 1.0

FRST 360 Senior Thesis Research
Prerequisite: By permission of director. See Academic Distinctions. Distribution: None
Semester: Fall, Spring Unit: 1.0

FRST 370 Senior Thesis
Prerequisite: 360 Distribution: None Semester: Fall, Spring Unit: 1.0

Directions for Election

One hundred level courses: Course 101-102 and 103 count toward the degree but not toward the major. Students who begin with 101-102 in college and who plan to study abroad should consult the chair of the department during the second semester of their first year.

Acceleration: Students who receive a grade of A in 201 may, on the recommendation of their instructor, accelerate to 205.

Majors: Majors are required to complete a minimum of eight units, including the following courses or equivalents: 211 and 368. A student may count one AP credit in French toward the major. The goals of a coherent program are:
(a) oral and written linguistic competence; (b) acquisition of basic techniques of reading and interpreting texts; and (c) a general understanding of the history of French literature and culture. All majors must take two 300-level French courses at Wellesley College. No more than two courses taken credit/noncredit at Wellesley College may be applied to the French major. Students planning to major in French should consult with the Chair of the French Department.

Students interested in an interdepartmental major in French Cultural Studies are referred to the listing for this interdepartmental program.

Graduate Studies: Students planning graduate work in French or comparative literature are encouraged to write an honors thesis and study a second modern language and/or Latin.

Advanced Placement Policies and Language Requirement: A student entering Wellesley must have an Advanced Placement score of 4 or 5 on an SAT II score of 690 to satisfy the foreign language requirement.

Teacher Certification: Students interested in obtaining certification to teach French in the Commonwealth of Massachusetts should consult the chair of the Department of Education.

GEOL 100 Oceanography
Andrews
Covering over 70% of the Earth's surface, the oceans are one of the most distinctive features of our planet. Oceans evolve through time, control our climate, are home to a myriad of marine life forms and are floored by distinctive geologic features including huge volcanoes and giant rift valleys. We will explore topics such as ocean basin sediments, submarine volcanism, shoreline processes, tsunamis, ocean currents, el nino events, coral reefs, deep-sea life and marine food and mineral resources.
Prerequisite: None
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.0

GEOL 102 The Dynamic Earth with Laboratory
Staff
Introduction to geologic processes ranging from microscopic growth of mineral crystals to regional erosion and deposition by water, wind, and ice to volcanism and earthquakes associated with global plate motions. A particular focus of the course will be to better understand the interactions between human activities and the geologic environment. Laboratory and field trips.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Natural and Physical Science. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Fall, Spring
Unit: 1.25

GEOL 200 The Earth and Life through Time
Andrews
The Earth and life have been continually changing throughout the 4.6 billion years of Earth history. We will explore these changes, including the tectonic evolution of mountain ranges, the changing landscapes and environments across the North American continent, and the origin, evolution, and extinction of the various life forms that have inhabited our planet. Students will have the opportunity to examine Wellesley's extensive fossil collection, and a field trip to fossil sites in New York State will be offered.
Prerequisite: 102 or by permission of the instructor.
Distribution: Natural and Physical Science
Semester: Spring
Unit: 1.0

GEOL 202 Mineralogy with Laboratory
Besancon
An introduction to natural crystals, their properties, and some tools geologists use to study them: microscopy, x-ray crystallography, and chemical analysis. The laboratory emphasizes ways to extract geological data from minerals.
Prerequisite: 102 or permission of instructor.
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.25

GEOL 204 Catastrophes and Extinctions
NOT OFFERED IN 2003-04, OFFERED IN 2004-05. The Earth has not always been a safe place on which to live, as mass extinctions have punctuated the history of life and dramatically altered the course of evolution. Among the topics we will explore are the process of evolution and the nature of the fossil record, gradual change versus catastrophic events, dinosaurs and their extinction, periodicity of mass extinctions, the prospect of future extinctions, and an evaluation of the possible causes of extinctions, including sea-level changes, climate changes, volcanism, and meteorite impacts. Normally offered in alternate years.
Prerequisite: 102 or permission of instructor.
Distribution: Natural and Physical Science
Semester: N/O, Offered in 2004-05.
Unit: 1.0

GEOL 211 Geology and Human Affairs
NOT OFFERED IN 2003-04, OFFERED IN 2004-05. This seminar-style course will focus on interactions between people and their physical environment. Geologic component to emphasize coastal, fluvial and glacial processes, evaluation of bedrock for engineering projects, and groundwater. Human impacts will be examined in terms of adverse effects on geological systems and in terms of protective environmental regulation and remediation. New England case studies including evolution of Nauset Spit (Chatham, Mass.), groundwater contamination at Cape Cod Military Reservation, and management approaches in the Charles River watershed will be highlighted during the semester. Students will present their own case studies as final poster projects. Normally offered in alternate years.
Prerequisite: 102 or permission of instructor.
Distribution: Natural and Physical Science
Semester: N/O, Offered in 2004-05.
Unit: 1.0

GEOL 220 Volcanoes: Agents of Global and Regional Change
NOT OFFERED IN 2003-04. From Mount Saint Helens to Vesuvius to Krakatau, volcanoes affect global climate, change landscape evolution, and arc sometimes the cause of tremendous disasters. Understanding the wide variety of phenomena associated with volcanoes provides a broad perspective on how science can be used to protect lives and further human needs and interests. Using geologic literature, Internet search, and a general text, we will study case histories of volcanoes on earth and through the solar system. Written papers and oral presentations will be important parts of the course. Normally offered in alternate years.
Prerequisite: One or more previous courses in Geology.
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

GEOL 230 Earth from Above: Maps, Remote Sensing, and GIS
NOT OFFERED IN 2003-04, OFFERED IN 2004-05. Paper maps and photographs are moving into digital form. Governments, consulting firms, and scientists use geographic information systems (GIS) and image analysis to manage natural resources, administer city infrastructure, search for water supplies, analyze land use, investigate relationships between environmental factors, and prepare maps of all types. Assignments examine a variety of problems in natural science and geography using ArcGIS software. Normally offered in alternate years.
Prerequisite: 102
Distribution: Natural and Physical Science
Semester: N/O Offered in 2004-05.
Unit: 1.0

GEOL 240 Climate Past and Future
NOT OFFERED IN 2003-04, OFFERED IN 2004-05. The documented phenomenon of global warming raises pressing questions about future climate trends and what the world's population might expect if temperatures continue to rise. The science of climate is fundamental to understanding our world and the big picture of Earth's climate history. We will explore what the paleoclimate record of plant and animal fossils and the ice core and ocean sediment records tells us about the climate of the past, present, and future. In addition to class lectures and discussion, we will have a number of guest lectures and field trips.
Prerequisite: 102
Distribution: Natural and Physical Science
Semester: N/O. Offered in 2004-05.
Unit: 1.0

GEOL 304 Sedimentary Rocks and Sequences with Laboratory
Thompson
Sedimentary rocks cover most of the Earth's present surface and contain evidence for past environments throughout billions of years of geologic time. Studying sequences of such rocks is important both for understanding recurrent environmental fluctuations like sea level change and for maximizing resources from coal and petroleum to salt and aluminum ore. Sedimentary processes take on further significance because they take place in popular human habitats including coastlines and flood plains. Lectures will cover production of sediment via weathering, principles of sediment transport, characteristics of sedimentary environments, and interpretation of sedimentary sequences. Laboratory will emphasize identification of sedimentary rocks and minerals based on hand specimens, microscope and x-ray methods, and include field trips in the Boston area. Normally offered in alternate years.
Prerequisite: 202
Distribution: Natural and Physical Science
Semester: N/O
Unit: 1.0

GEOL 305 Paleontology with Laboratory
Andrews
Over 99.9% of the animal species that have inhabited our Earth are now extinct, and these ancient life forms, such as trilobites and ammonites, are now only known through their fossil remains. We will investigate the origin, evolution, and extinction of these fossil organisms, many of which have no close living rela-
GEOL 306 Structural Geology with Laboratory

Thompson

Introduction to geometry and origin of rock structure ranging from microtextures and fabrics to large-scale folding and faulting. Emphasis on processes of rock deformation in terms of theoretical prediction and experimental findings. Laboratory will include field trips in the Boston area. Normally offered in alternate years.

Prerequisite: 202 or permission of instructor.
Distribution: Natural and Physical Science
Semester: Fall
Unit: 1.25

GEOL 309 Petrology with Laboratory

NOT OFFERED IN 2003-04, OFFERED IN 2004-05. Study of the origin and occurrence of igneous and metamorphic rocks which make up most of the earth's crust. The earth generates magmas, primarily along plate boundaries, and they carry heat upward as they rise into the crust or onto the surface, forming igneous rocks. Heat, pressure, and deformation generate new minerals and textures in rocks. Students will decipher the sources and history of rocks using chemical and physical models and tools. Laboratory includes study of rocks in thin section, and a project study of rocks collected on Boston area field trips. Normally offered in alternate years.

Prerequisite: 202.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: N/O, Offered in 2004-05.
Unit: 1.25

GEOL 311 Hydrogeology with Laboratory

Besançon

Investigation of water supply and use. Principles of surface and groundwater movement and water chemistry are applied to the hydrologic cycle in order to understand sources of water for human use. Quantity and quality of water and the limitations they impose are considered. Normally offered in alternate years.

Prerequisite: 102 and permission of instructor.
Distribution: Natural and Physical Science or Mathematical Modeling
Semester: Spring
Unit: 1.25

Directions for Election

In addition to eight units in Geology, normally to include 200, 202, 304, 306, and 309, the minimum major requires four units from laboratory sciences, mathematics, or computer science. All four units may not be taken in the same department. A student planning graduate work should note that most graduate geology departments normally require two units each of chemistry, physics, and mathematics. Biology may be substituted if the student is interested in paleontology.

The department recommends that students majoring in Geology take a geology field course, either the 12.114-12.115 sequence offered in alternate years by MIT or a summer geology field course offered by another college.

A minor in Geology (five units) consists of: (A) 102 and (B) two units in one of the three following areas of concentration: I. (Paleobiology) 200, 204, 305 or II. (Petrology) 202, 304, 309 or III. (Environmental Geology) 211, 220, 230, 240, 311 and (C) two additional 200-300-level units.

Department of German

Professor: Ward, Hansen*, Kruse
Associate Professor: Nolden (Chair)
Visiting Instructor: Fietz
Director of Study Abroad Program: Nolden
Resident Director of Wellesley-in-Vienna: Hartmann

The language of instruction above the 100 level is almost exclusively German unless otherwise noted. Students thus have constant practice in hearing, reading, speaking, and writing the language.

The department reserves the right to place a new student in the course for which she seems best prepared, regardless of background and number of units she offers for admission.

Students in German 201 who wish to accelerate at the intermediate level may apply to the January-in-Vienna program. Participants travel to Vienna for three weeks in January where they study with a professor from the German Department. During their stay they complete German 202 and receive credit as they would for a course taken on campus. In addition, students will complete a 0.5 credit German Studies course on Austrian culture taught in English. (Not offered every year. Subject to Dean's Office approval.) Upon returning for the second semester at Wellesley, students are encouraged to continue with German 231.

Qualified students are encouraged to spend the junior year in Austria in the Wellesley-in-Vienna program or another program approved by the College.

GER 101-102 Beginning German

Kruse, Fietz

An introduction to contemporary German with emphasis on communicative fluency. Extensive practice in all four skills: listening, speaking, reading, and writing. Videos and web-based activities introduce the student to topics from contemporary culture in German-speaking countries. Each semester carries 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course. Three meetings per week.

GER 120/WRIT 125 06 Berlin and Cinema

Ward (German)

As the brilliant metropolis of 1920s cultural modernity, the epicenter of Cold War conflict, and the locus of divisive German unity after the fall of the Berlin Wall, Berlin has proven a rich site of inquiry for some of the world’s greatest filmmakers. We will view this fascinating city from the multiple and complex viewpoints offered in a range of documentary and fiction films, from the experimental silent film, Symphony of a Great City, to Rossellini’s Germany Year Zero to Wilder’s raucous 1947 comedy, A Foreign Affair. Wim Wenders’s Wings of Desire and films from the post-wall period will also be featured. The course emphasizes development of the requisite vocabulary to analyze film art and provides an overview of nine decades of German history. This course satisfies the Writing 125.
GER 235 Advanced Conversation: Germany and Austria Today
NOT OFFERED IN 2003-04. Intensive practice in oral communication and presentation; introduction to rhetorical strategies of conversation and discussion. On the basis of newspaper and magazine articles, essays and stories, television news, film clips, and Web site materials, we will discuss current events and issues in Germany and Austria. The course meets twice a week for 50 minutes during nine weeks of the semester. Required organizational meeting during add/drop period.
Prerequisite: GER 201-202 or permission of instructor.
Distribution: Language and Literature
Semester: N/O  Unit: 0.5

GER 241 Themes of Childhood, Youth, and Adolescence in German Literature
NOT OFFERED IN 2003-04. This course will explore images of children and adolescents in adult literature. The texts encompass the medieval to contemporary periods and are unified thematically by such issues as youthful rebellion, inter-generational struggles, social initiation, and the crisis of adolescence. We shall analyze the portrayals of youth as idealized heroes, as innocent victims, and as critical witnesses of the adult world. Authors include Goethe, Stifter, Hesse, and Aichinger. We will also read Grimm’s folktales, Wilhelm Busch’s proto-comic book, Max and Moritz, and Heinrich Hoffmann’s cautionary verses, Der Struwwelpeter. Taught in German. Two meetings per week.
Prerequisite: GER 201-202 or permission of instructor.
Distribution: Language and Literature
Semester: N/O  Unit: 1.0

GER 245 Constructing the Other in German Cinema (in English)
NOT OFFERED IN 2003-04. We will examine the way in which cinematic representation has constructed “the other” in the context of German cultural history of the twentieth century. Beginning with issues of gender, we will discuss the visualization of woman as other in classics of the silent era, including Metropolis, and Pandora’s Box. The role of nationalism, colonialism, racism, and anti-Semitism in the construction of “the other” in the cinema of the 30s and 40s will also be considered. We will then consider a wide variety of postwar films and filmmakers, for example, cinematic portrayals of “guest workers,” and the “other Germany” seen as other from both sides of the Cold War divide. Film screenings will be in addition to the lectures and discussions. Taught in English.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O  Unit: 1.0

GER 248 The Fantastic in German Literature
NOT OFFERED IN 2003-04. The course will explore short fiction of the fantastic and the uncanny that emerges after the eighteenth century. These works, which employ allegories of escapist fantasy, horror and supernatural terror, delusion, and abnormal psychic states, are chosen for their literary treatment of fears that prey on the human imagination. We will begin with tales from the Grimms’ collection of fairy tales and explore themes of the Doppelgänger, shape-shifting, talking animals, and magic. We will apply Sigmund Freud’s theory of “the uncanny” to literary texts from Romanticism to Kafka and beyond. Taught in German, two periods.

GER 252 Drama as Text and Performance
NOT OFFERED IN 2003-04. Focusing on one period of German theatre, we will examine main features of the genre of the drama as exemplified by plays and critical texts by major authors. A substantial part of the course will be devoted to performance issues, resulting in performance projects at the end of the semester. Taught in German. One semester period with additional rehearsal time.
Prerequisite: GER 201-202 or permission of instructor.
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: N/O  Unit: 1.0

GER 255 The Woman Question
NOT OFFERED IN 2003-04. We will trace the way the “Frauenfrage” was posed by three generations of women and men in German-speaking countries—the role of women in Romantic thought and their activity in Romantic circles and salons; the way in which the debate was changed by the revolutionary convulsions of 1848; the development of an organized women’s movement in the 1870s and 1880s. We will read essays, letters, and autobiographical works by women, and one novel by Fanny Lewald that reflect a range of attitudes toward woman’s societal role, as well as men’s contributions to the debate from Theodor Hippel’s On Improving the Status of Women to August Bebel’s Women under Socialism. Taught in German.
Prerequisite: GER 201 or permission of instructor.
Distribution: Historical Studies or Language and Literature
Semester: N/O  Unit: 1.0

GER 265 Literature and Empire: Myth and History in the Habsburg Dynasty (in English)
NOT OFFERED IN 2003-04. For more than 600 years Habsburg rule preserved a semblance of unity and order to widely heterogeneous peoples and cultures. At various historical periods the empire was one over which the sun never set, but it was finally undermined by ethnic nationalism and war. The noble family who had almost unprecedented political power to manage and mismanage political events will be the subject of this course. Through readings in literature, history, and biography we will explore the rich culture of the Danube monarchy and examine how the Habsburgs themselves forged the myth of their own dynasty and how they are portrayed in art and literature. Taught in English.
Prerequisite: None

GER 268 Richard Wagner, Nietzsche, Mann: The Composer and his Critics (in English)   
**Hansen**  
Richard Wagner - composer, poet, critic - is a controversial figure in German culture. This course will examine in depth the four operas that make up the great mythical tale of lust and power, The Ring of the Nibelung, Beginning with Norse sagas, we shall read Wagner’s sources, the major responses to Wagner, (concentrating on his contemporary, the philosopher Friedrich Nietzsche), and short stories by Thomas Mann.  
We shall also read Wagner’s own essays to understand his subsequent use by National Socialism.

Unit: 1.0

GER 274 Postwar German Culture   
**Ward**  
A survey of cultural, social, and political developments in Germany since 1945. Texts will be drawn from literature, historical studies, and autobiography. The changing role of women in the Federal Republic of Germany and the German Democratic Republic after 1949 will be an important topic of discussion. Special emphasis on developing advanced skills in reading, speaking, and writing German. Taught in German, two periods.

GER 276 Franz Kafka   
**Kraic**  
**NOT OFFERED IN 2003-04.** All aspects of Kafka's works and life will be explored in the historical and social context of early twentieth-century Central Europe. We will read a wide selection from his novels, e.g., The Trial, short stories, The Metamorphosis, In the Penal Colony; parables and aphorisms, diaries and letters, such as his Letters to Felice. We will discuss the delight and difficulty of reading Kafka, his posthumous reception as a world author, and his importance as a cultural icon in the late twentieth and early twenty-first centuries. Taught in English, two periods.

**Directions for Election**  
The department offers a major in Language and Literature as well as a minor in German. 101-102 is counted toward the degree but not toward the major or minor. Students who begin German at Wellesley and wish to major will be encouraged to advance as quickly as possible to upper-level work by doing intermediate language training during the summer or accelerating in our January-in-Vienna program during Winter Session.  
Students interested in an interdepartmental major in German Studies are referred to the listing for this interdepartmental program.  
The German Department will grant one unit of credit toward the degree for an Advanced Placement score of 4 or 5. Because the AP credit is considered the equivalent of German 202, a student will not get the Advanced Placement credit if she takes 202 or a lower course. A student entering Wellesley must have an Advanced Placement score of 4 or 5 to satisfy the foreign language requirement.
The Major in Language and Literature

The major in Language and Literature develops advanced language skills with emphasis on the critical reading of texts while also stressing a deeper acquaintance with the literary and cultural traditions of German-speaking countries. 202 may count to the eight-unit minimum major. 231 and two 300-level courses are required, either 325 or 329 (offered in alternate years) and one seminar (389). Of the remaining minimum four elective units, one unit can be a 200-level course offered by the department in English, but if a 300-level of the same course is offered with an extra session taught in German, this is highly recommended. With approval of the department, courses taken abroad may count toward the major toward the 200-level. Students are encouraged to supplement the minor with any of the related courses listed under German Studies. Each student should consult with her departmental advisor about the best sequence of courses in her case.

The Minor in German

The minor offers an opportunity to acquire advanced skills in the language with emphasis on communicative strategies and cross-cultural understanding. 202 may count to the five-unit minor. 231 is required. One 300-level course is highly recommended. One unit can be a 200-level course offered by the department in English, but if a 300-level of the same course is offered with an extra session taught in German, this is highly recommended. With the approval of the department, courses taken abroad may count toward the minor toward the 200-level. Students are encouraged to supplement the minor with any of the related courses listed under German Studies. Each student should consult with her departmental advisor about the best sequence of courses in her case.

Honors Program

The department offers two plans for the honors program. Plan A (See Senior Thesis Research, 360 and 370) provides the opportunity for original work in Language and Literature or German Studies, culminating in the writing of a longer paper or papers with an oral defense. Plan B, honors by examination, is open to candidates in Language and Literature only. Written and oral examinations are based on a reading list devised by the student under the guidance of an advisor. Plan B carries no course credit, but where appropriate, students may elect a unit of 350 to prepare a special author or project that would be included in the honors examination.

German Studies

**AN INTERDEPARTMENTAL MAJOR**

**Director: Nolden (German)**

This interdisciplinary and interdepartmental major is designed to provide the student with a broader understanding of the cultures of Germany, Austria, and Switzerland by achieving an advanced level of language proficiency and by studying the art, history, literature, philosophy, and politics of these countries in depth. German 202 may count toward the eight-unit minimum major. German 231 and two 300-level units are required. A minimum of five units should be completed in the German Department, one of them at the 300 level. The elective units taken in the German Department may be drawn from courses taught in German or English, including either Writing 125/German 120 or 121.

The remaining minimum of three elective units may be drawn from any of the Related Courses listed below. A student who enrolls in these courses is expected to do a project or paper on a German, Austrian, or Swiss topic in order to count the course toward her German Studies major. She may also do an interdisciplinary 360-370 project that is supervised by an interdepartmental committee. With approval of the relevant department, courses taken abroad may count toward the 200 level toward the major. A course in German history is highly recommended, as are two units from a single allied field. While it is helpful to have an advisor in the allied field, a student must have a major advisor in the German Department, which approves all individually constructed German Studies programs.

**GERS 298 Wintersession in Vienna**

Topic for 2003-04: Turn-of-the-Century Vienna: the Revolution in the Arts. Turn-of-the-century Vienna has been called the cradle of the twentieth century. Here begins a remarkable florescence of the arts in reaction to the norms of the nineteenth century. Ringstrasse culture, the bold showpiece of historical architecture, called forth a reaction from the next generation, which produced new art forms that are the basis of modernism. We will explore this breakthrough in the buildings of Otto Wagner and Adolf Loos; in the designs of Joseph Hoffmann and Koloman Moser; and in the paintings of Gustav Klimt, Egon Schiele, and Oskar Kokoschka. Includes cultural excursions to other monuments, theater, opera, and concerts. Not offered every year. Subject to Dean’s Office approval.
Prerequisite: Open only to students enrolled in the German 202 section taught in Wintersession-in-Vienna (January 2004). The course is designed to augment the language study of the GER 202 class. Application required.

**HIST** 105 Bread and Salt: Introduction to Russian Civilization
Tumarkin
NOT OFFERED IN 2003-04. For centuries Russians have welcomed visitors with offerings of bread and salt. This course is an earthy immersion in Russian everyday life, from the grand age of Tolstoy, to the wrenching era of Stalin, to Putin's dissonant new Russia. Russian black bread, dense and pungent, is central to our focus on food, feasting, fasting and famine in the Russian experience, as we explore the restricted diets of peasants, the excessive repasts of privileged classes, Soviet efforts to ritualize communal dining and living, and hunger in the wartime blockade of Leningrad. We will also weave in related themes, such as alcohol consumption, illness, and the Russian way of death. Guest lectures by Russianists in disciplines other than history.

HIST 201 Reinveting Europe, 1650-Present
Tarnarkin
NOT OFFERED IN 2003-04. This course will follow the peoples of Europe, both West and East, from the “splendid century” of Louis XIV to the present era of European Union. Our focus will be on the changing mentalities and everyday experiences of Europeans. We will journey from the political and cultural wars of the seventeenth and eighteenth centuries to the age of industrialization and new nineteenth-century ideologies of nationalism, liberalism and socialism. We will also explore European imperialism, totalitarianism under Hitler and Stalin, and two disastrous world wars. The course will conclude by examining how Europeans have coped since 1945 with Cold War divisions, the loss of international hegemony, the collapse of communism, and the new challenges of reunification.

HIST 209 From William the Bastard to Gloriana: England, 1066-1603
McGlynn
NOT OFFERED IN 2003-04. In 1066 the Normans invaded England, beginning a new chapter in the country’s history and introducing new ideas in religion, politics and law. This course will trace the development of England from the arrival of William the Conqueror to the reign of one of England’s most intriguing monarchs, Elizabeth I. We will look at issues of social and religious change, such as the Black Death and the Lollard heresy, but we will also examine the development of institutions such as parliament and the common law, which would have an impact far beyond the island of their origin.

HIST 212 The Strange Death of Gaelic Ireland, 1500-1600
McGlynn
NOT OFFERED IN 2003-04. Despite a continuous presence from 1169 onwards, England did not conquer Ireland in the Middle Ages. However, changing political and religious circumstances led to a commitment to a complete conquest of Ireland in the sixteenth century and after. This course will examine this process and the concomitant eclipse of Gaelic political, military and cultural structures. Between Poyning’s law of 1495 and the Act of Union of 1800, we will examine the plantation of the sixteenth century, the Cromwellian conquest of the seventeenth century and the penal laws of the eighteenth century, which largely set the conditions for the later troubles in Ireland.

HIST 213 Conquest and Crusade in the Medieval Mediterranean
Rogers
This course examines life in the Mediterranean from the disintegration of the Roman empire in the fourth and fifth centuries through the Latin Crusades of the Holy Land in the eleventh and twelfth centuries. Readings will focus on the various wars and conflicts in the region as well as the political, religious, and social structures of the great Christian and Muslim kingdoms, including the Byzantine empire, the Islamic caliphates of the Fertile Crescent and North Africa, the Turkish emirates of Egypt and the Near East, and the Latin Crusader States. Attention will also be paid to the cultural and religious diversity of the medieval
Mediterranean and the intellectual, literary, and artistic achievements of Christian, Muslim, and Jewish communities.

**HIST 214 Medieval Italy**

Rauneyer  
**NOT OFFERED IN 2003-04.** This course provides an overview of the diverse forms of political, social, and economic life in pre-Renaissance Italy from the disintegration of the Roman Empire in the fifth century through the rise of urban communes in the thirteenth century. Topics of discussion will include early medieval social and economic structures, political life and the Italian nobility, the volatile relationship between pope and emperor, the role of heresy and dissent, and the development and transformation of trade and commerce in both northern and southern Italy.

**HIST 215 Gender and Nation in Latin America**

Osoio  
**NOT OFFERED IN 2003-04.** Since their invention in the early nineteenth century, nations and states in Latin America have been conceived of in gendered terms. This has played a key role in producing and reproducing masculine and feminine identities in society. This course examines the powerful relationship between gender and nation in modern Latin America. Topics include patriarchal discourses of state and feminized representations of nation; the national project to define the family as a male-centered nuclear institution; the idealization of motherhood as a national and Christian virtue; the role of military regimes in promoting masculine ideologies; state regulations of sexuality and prostitution; changing definitions of the feminine and masculine in relation to the emergence of "public" and "private" spheres; and struggles over the definition of citizenship and nationality.

**HIST 216 Revolution in Latin America**

Osoio  
In Latin America, the twentieth century was indelibly marked by revolution and counter-revolution. Any analysis of the recent history of the peoples and states of Latin America must focus on the conditions, desires, and perils that have shaped the revolutionary experience. We will examine the main historical currents of armed revolution in Latin America, including instances of successful armed revolution, post-revolutionary state-making and nation-building, and the many guerrilla movements. Revolution in the Americas was not only about seizing state power, but about making "the new man" and reinventing society. We will consider the past, present, and possible future of revolution in the Americas.

**HIST 226 The First World War and the Making of Modern Europe**

Tretel  
The Great War of 1914-1918 ushered our age into existence. Its memories still haunt us and its aftershocks shaped the course of the twentieth century. The Russian Revolution, the emergence of new national states, Fascism, Nazism, the Second World War, and the Cold War are all its products. Today, many of the conflicts that triggered war in 1914 have resurfaced. Understanding the First World War, in short, is crucial to understanding our own era. This course examines the war -- its causes, course, and consequences -- through a variety of primary sources, including memoirs, films, and diplomatic documents. We will also attend to the many approaches scholars have taken to the war and consider the intense debates sparked by their interpretations.

**HIST 229/329 Alexander the Great: Psychopath or Philosopher King?**

Rogers  
**NOT OFFERED IN 2003-04.** Alexander the Great murdered his best friend, married a Bactrian princess, and dressed like Dionysus. He also conquered the known world by the age of 33, fused the eastern and western populations of his empire, and became a god. This course will examine the personality, career, and achievements of the greatest conqueror in Western history against the background of the Hellenistic World. This course may be taken as either 229 or, with additional assignments, as 329.

Old heresies persisted in southern Europe, while new heresies rose in the north and east and the church struggled to control new forms of lay piety. During the same period Europe was hit by the Black Death, which reduced the population by approximately a third. Finally, war affected much of Europe, from the Hundred Years War to the war against the Turks, whose steady approach from the east terrified Europeans. HIST 251 Continent in Crisis: North America During the Age of Revolution
Shelley
An examination of the forces that shattered British colonial society during the eighteenth century and gave rise to a new nation in North America. We will investigate the causes of the American Revolution from a continental perspective, paying careful attention to the experiences of Native Americans as well as colonists having European and African roots, and explore the consequences of this transformative event for all inhabitants of the new Republic.
Prerequisite: None

Semester: Spring
Unit: 1.0

HIST 252 Race, Ethnicity, and Difference in Early America
Shelley
NOT OFFERED IN 2003-04. An examination of the multi-racial, multi-ethnic societies which took shape in North America during the colonial period. We will explore the causes of voluntary and involuntary migration from Europe and Africa, the pattern of colonial settlement, concepts of family and community, strategies of cultural adaptation and resistance, the emergence of racial and ethnic consciousness, and the development of British and American identities.
Prerequisite: None

Unit: 1.0

HIST 253 First Peoples: An Introduction to Native American History
Shelley
A survey of the social, cultural, and political history of North America’s native peoples from 1200 through the present. Case studies of particular nations will be used to explore a wide range of issues, including the politics of treaty making, the economic and environmental consequences of the fur trade, “Removal” and reservation life, pan-Indianism, and the “Red Power” movement of the 1970s. In addition to historical scholarship, sources will include autobiography, fiction, and several cinematic depictions of Native American life.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 257 History of Women and Gender in America
Varon
The history of American women, from the colonial period to the 1960s, with a focus on women’s involvement in politics and on the changing nature of women’s work. Topics include colonization and the Revolution; the construction of the private and public “spheres”;

slavery and anti-slavery; immigration and ethnicity; women and war; the battle for suffrage; women’s health and sexuality; and civil rights and feminism.

HIST 263 South Africa in Historical Perspective
Kapetjiwa
An analysis of the historical background of Apartheid, focusing on the transformation of the African communities in the period of commercial capitalist expansion (1652-1885), and in the industrial era (1885-present). Important themes are the struggle for land and labor; the fate of African peasants, labor migrants, miners and domestic servants; the destruction of the African family; the diverse expressions of African resistance, and the processes which are creating a new, post-apartheid South Africa. Short stories, films and poetry are among the sources used.
Prerequisite: None
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

HIST 264 The History of Precolonial Africa
Kapetjiwa
NOT OFFERED IN 2003-04. Precolonial Africa encompasses ancient agrarian kingdoms (such as Egypt and Meroe), city-states on the shores of sea and desert, and “nations without kings,” with their own, unique social and political institutions. Students will learn about the material bases of these societies, as well as their social relations and cultural production, all the while familiarizing themselves with the rich array of written, oral, linguistic, and archeological sources available to the historian of Africa. After 1500, in the era of the European expansion, large parts of Africa were incorporated into the Atlantic tropical plantation complex through the Slave Trade. The enormous impact on Africa of this unprecedented forced migration of Africans to the Americas from c. 1500 to the 1880s will constitute the concluding theme.

Unit: 1.0

HIST 265 History of Modern Africa
Kapetjiwa
NOT OFFERED IN 2003-04. Many of Africa’s current characteristics are the legacy of colonial domination. We will therefore first study different kinds of colonies, from those settled by White planters to the “Cinderellas,” in which colonial economic intervention was (by comparison) minimal and the struggle for independence less bloody. For the post-independence period, we will focus on the historical roots of such major themes as neo-colonialism, economic underdevelopment, ethnic conflict and genocide, HIV-AIDS, and the problems of the African state. However, Africa’s enormous natural and human resources, its resilient and youthful population, and its vibrant popular culture—a strong antidote against Afro-pessimism—will help us reflect on the future of this vast continent.

HIST 266 The Struggle Over North Africa, 1800 to the Present
Rollin
Themes in the social, economic, political and cultural history of North Africa (the Maghreb and Mauretania, Libya, Egypt and Sudan) from 1800 to the present: major features of precolonial society and history in three regions, the transformations brought about by French, British and Italian colonial rule; North African resistance and wars for independence; the contradictions of the era of formal political independence, including the emergence of Islamist movements and the literary and political debate about post-colonial identities in the area. Students will draw on analyses by historians and social scientists, on novels, short stories, autobiographies, poetry by North Africans, and on music and film from and about North Africa.

HIST 268 The Industrialization of East Asia: the Case of Japan, 1854-1980
Matsusaka
NOT OFFERED IN 2003-04. Although Japan industrialized late compared to the West, it was a pioneer in Asia and provided a model for development in the non-Western world. This course examines the process of industrialization in Japan and its political, social and cultural ramifications. Explores issues of interest to students of economics, but not designed as an economic history. Thematic emphasis on institutional borrowing, state policy, big business activity, and labor-management relations. Focus on Japan (and its empire between 1985 and 1945), but
implicitly comparative; seeks to provide context of relevance for industrialization in East Asian and other developing countries.

HIST 279/379 Heresy and Popular Religion in the Middle Ages
Ranseyer
This course looks at popular religious beliefs and practices in medieval Europe, including miracles, martyrdom and asceticism, saints and their shrines, pilgrimages, relics, curses, witchcraft, and images of heaven and hell. It seeks to understand popular religion both on its own terms, as well as in relation to the Church hierarchy. It also examines the basis for religious dissent in the form of both intellectual and social heresies, which led to religious repression and the establishment of the Inquisition in the later Middle Ages. This course may be taken as 279 or, with additional assignments, as 379.

HIST 280 The City in Modern China
Giersch
NOT OFFERED IN 2003-04. China's cities have undergone particularly vibrant and disruptive changes over the last century. This course examines China's cities as local points of economic, cultural, and political transformations. Themes include migration, the formation of ethnic (native place) identities and enclaves, industrialization and work, crime, European imperialism, the Communist and Cultural Revolutions, and post-Mao reforms.

HIST 281/381 Dream of the Red Chamber: An Introduction to Chinese Society, c. 1650-1800
Giersch
We will read one of China's great novels, Dream of the Red Chamber, and use it as an entrée into the social, political and economic history of the early and high Qing periods. Cao Xueqin's engaging tale describes in rich detail the fictional li family, a wealthy, powerful clan whose political connections and social status closely resembled those of Cao's own family. While reading about the Jias, we will simultaneously use historical insights to deepen our understanding of family life, gender relations, religious devotion, sexuality, education, commerce, and political power during one of China's most dynamic periods. This course may be taken as either 281 or, with additional assignments, as 381.

HIST 284 The Middle East in Modern History
Kapteijns
Themes in the history of the Modern Middle East from 1914 to the present. After World War I, European powers dominated the area and carved it up into the modern nation states that we know today. We will study the political history of these states up to the present, but will focus especially on the historical roots and causes of crucial social developments and conflicts. Thus we will study the impact of the oil boom, labor migration, urbanization, the changing roles of women, and the emergence of politicized fundamentalist Islam, as well as aspects of the Palestinian-Israeli conflict, the Iranian Revolution, the Lebanese Civil War, and the Gulf War. Our emphasis will be on the Arab Middle East.

HIST 290 Morocco: History and Culture (Winter Session in Morocco)
Kapteijns, Malino, Rollman
An introduction to Moroccan culture, history, and society through experiential and classroom
learning. Students will participate in seminars and attend lectures given by Moroccan faculty at the Center for Crosscultural Learning in Rabat. Program themes include: women in private and public life, Berber culture, Islam, Arabic, Morocco's Jewish heritage and history, and the legacy of European cultural rule. Students will travel as a group to the central and southern regions of the country to study historic sites and contemporary life and culture in a variety of rural and urban settings.

Prerequisite: None
Distribution: None
Semester: Winter session

HIST 291 Marching Toward 1968: The Pivotal Year
Anker

Within a single year the Tet offensive in Vietnam, the assassinations of Martin Luther King, Jr. and Robert F. Kennedy; and the election of Richard M. Nixon transformed American foreign and domestic policy, ending an era of liberal internationalism, domestic reform, and generational protest. Exploration of how, and why, "The Sixties" happened. Consideration of recent political and intellectual trends -- from President Clinton to political correctness -- that reflect the continuing impact of the 1960s on American public life.

Prerequisite: 204 or an AP score of 4 or 5.

HIST 301 Seminar. Women of Russia: A Portrait Gallery
Tumarkin

NOT OFFERED IN 2003-04. An exploration of the tragic, complex, inspiring fate of Russian women in the nineteenth and twentieth centuries, a period that spans the Russian Empire at its height, the Russian Revolution of 1917, and the Soviet experiment. We will read about Russian peasants, nuns, princesses, feminists, workers, revolutionaries, poets, partisans, and prostitutes, among others in our stellar cast of characters. Sources include memoirs, biographies, great works of literature, and the visual arts.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies

Unit: 1.0

HIST 302 Seminar. Jewish Women Writers in Historical Perspective
Ronell

A panorama of Jewish life from the early modern period through contemporary times as portrayed by East European/Russian, American, Jewish, and Israeli authors. Works by Jewish women around the world illuminate such issues as changing educational and occupational opportunities, transformations in family life, shifting relationships between the genders, and conflict between Jewish and non-Jewish value systems. Special emphasis will be given to the ways literature can help us understand historical moments. Using close textual analysis, we approach the novels, short stories, and memoirs we read as literature and as a form of social history.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies

HIST 303 The British Isles: From Norman Invasions to Tudor Domination
McGlynn

An examination of the history of the four nations (Ireland, Scotland, Wales and England) subsumed under the title of "The British Isles." The underlying question of the course will be the extent to which the later domination of England has affected perceptions of the relationship between the four nations from 1100 to 1500. Focus will be on the Celtic countries rather than on England. We will look at the ways in which social, economic, political, legal and linguistic issues affected relations among the four nations and consider whether the emergence of England as the main power in the archipelago was "inevitable."

Prerequisite: Normally open to juniors and seniors who have taken a grade I unit in History and/or a grade II unit in a relevant area/subject matter.

HIST 305 Heirs of the Roman Empire: Byzantium, Latin Christendom, and Islam in the Middle Ages
Rausseyer
NOT OFFERED IN 2003-04. This course provides a comparative framework for studying the three great medieval societies that arose out of the Roman Empire in the era traditionally known as the "Dark Ages." The course will begin by examining the transformations of the late antique period (c. 300-600) that led to the division and eventual demise of the Roman Empire. Next it will trace the developments of the three major successor states that arose in the early medieval period (c. 600-1000): the Byzantine Empire, the Abbasid caliphate, and the Frankish kingdom. Students will examine literary as well as archaeological sources and will confront some of the most controversial debates related to the economic, political, and religious structures of late antique and early medieval society.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: N/O
Unit: 1.0

HIST 312 Seminar. The Occult in America
Knapp
This course explores the popular appeal of alternative belief systems in America from the late seventeenth through the twentieth century. From astrology to Zen, Americans from all walks of life have joined esoteric societies and practiced non-normative forms of spirituality. We will place the significance of this development within the wider scope of American social, cultural and religious history. In particular, we will examine connecting explanations for the emergence of modern occult movement, including: religious revival, historical crisis, irrationalism and anxiety. We will also ask how they have adapted themselves to indifference, skepticism and scientific rationalism. Major topics include magic, witchcraft, mesmerism, spiritualism, theosophy, mysticism and New Age.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: Spring Unit: 1.0

HIST 316 Seminar. Authority and Authenticity in Native American History
Shideley
This in-depth exploration of diversity and difference as factors which shaped the history of North America’s native peoples from the sixteenth century through the era of “Removal.” Particular attention will be paid to gender, class, ethnicity, and belief as modes of organizing power within American Indian societies east of the Mississippi River. We will consider how these elements have influenced relations with non-Indians and determined the very nature of the sources historians use to interpret the Native American past.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: Spring Unit: 1.0

HIST 317 Seminar. The Historical Construction of American Manhood, 1600-1900
Shideley
NOT OFFERED IN 2003-04. From Nat Turner to Frederick Douglass, Thomas Jefferson to Teddy Roosevelt, the history of American men is well known. But does manhood itself have a history? Drawing on autobiography, fiction, personal correspondence and visual evidence, we will explore the diverse and changing meanings attached to masculinity in America from the seventeenth through the nineteenth centuries. What forces have shaped male identities in colonial America and the United States and what impact have those identities had on men’s lives and actions? Topics include: fatherhood and family life, violence and war, male sexuality, religious belief, work, and the myth of the self-made man. Special attention will be paid to race, class, and region as sources of variation and conflict in the historical construction of American manhood.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: Fall Unit: 1.0

HIST 323 Seminar. The Vanishing American Eden, 1890-1925
Auerbach
NOT OFFERED IN 2003-04. In the late nineteenth century, cities, factories, and immigrants undermined older American conceptions of freedom and progress. An examination of turn-of-the-century responses to social change, with special focus on the discovery of the Southwest and the emergence of Pablo Indian culture as an Edenic alternative to modernization. The allure of Pablo Indians to photographers, anthropologists, artists, writers, entrepreneurs, tourists, and contemporary feminist scholars will guide our exploration into the appeal of “primitivism” in the modern era.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 324 Seminar. U.S. Foreign Relations Since 1900: Critical Issues
Hitchcock
NOT OFFERED IN 2003-04. From Nat Turner to Frederick Douglass, Thomas Jefferson to Teddy Roosevelt, the history of American men is well known. But does manhood itself have a history? Drawing on autobiography, fiction, personal correspondence and visual evidence, we will explore the diverse and changing meanings attached to masculinity in America from the seventeenth through the nineteenth centuries. What forces have shaped male identities in colonial America and the United States and what impact have those identities had on men’s lives and actions? Topics include: fatherhood and family life, violence and war, male sexuality, religious belief, work, and the myth of the self-made man. HIST 326 Seminar. American Jewish History
Auerbach
The development of American Jewish life and institutions, from European immigration to the present. Particular attention to the pressures, pleasures, and perils of acculturation. Historical and literary evidence will guide explorations into the social and political implications of what was once a religious minority status in the United States, the impact of Israel on the consciousness of American Jews, and the tension between traditional Judaism and modern feminism.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: Fall Unit: 1.0

HIST 327 Zionism and Jewish Nationalism: A Comparative Perspective
Malino
NOT OFFERED IN 2003-04. Emergence and evolution of Zionism and Jewish nationalism in the nineteenth and twentieth centuries. Poets, ideologues, charismatic leaders; immigration and diaspora. Political, social, economic and spiritual factors in modern Israel and in Ireland. Comparisons and contrasts.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 328 Seminar. Antisemitism in Historical Perspective
Malino
NOT OFFERED IN 2003-04. Historians often refer to antisemitism as the "Longest Hatred." What accounts for this obsession? Is the antisemitism of medieval Europe that of Nazi Germany? These questions will inform our examination of pre-Christian antisemitism, the evolving attitudes of Christianity and Islam, the ambiguous legacy of the Enlightenment and the impact of revolution, modernization and nationalism. Sources include Church documents, medieval accounts, nineteenth and twentieth century memoirs and contemporary films.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies Semester: N/O Unit: 1.0

HIST 330 Seminar. Medieval Europe
Rausseyer
NOT OFFERED IN 2003-04. This course will examine the revolutionary changes that occurred in all facets of life in twelfth-century Europe. The twelfth century represents one of the most important eras of European history, characterized by many historians as the period that gave birth to Europe as both idea and place. It was a time of economic growth, religious reformation, political and legal reorganization, cultural flourishing, intellectual innovation, and outward expansion. Yet the twelfth century had a dark side, too. Crusades and colonization, heresy and religious disputes, town uprisings and mob violence also marked the century. Students will study the internal changes to European soci-
HIST 332 Seminar. Europe under German Occupation, 1939-1945: Resistance, Collaboration, and Genocide
Hitchcock
NOT OFFERED IN 2003-04. Examination of responses by European civilians during the Second World War to German occupation, domination, and persecution. Topics will include: the German "vision" of Europe; the origins and execution of the Holocaust; daily life in the Jewish ghettos; the rise and effectiveness of European resistance movements, including Jewish resistance; and the nature of collaboration. Nations examined may include France, the Netherlands, Italy, Yugoslavia, Greece, Poland, and the Soviet Union.
Prerequisite: By permission of the instructor.

Unit: 1.0

HIST 334 Seminar. European Cultural History Treitel
NOT OFFERED IN 2003-04. This seminar investigates political and cultural change in Europe in the decades around 1900. It concentrates on trends in Germany and Austria, but also attends to events in France and Britain. Topics include the discovery and uses of the unconscious, changing gender norms, debates over cultural exhaustion and national decline, the connections between mass psychology and mass politics, and artistic innovation in its broad political context. Throughout, we will return to our central questions: How did culture and politics inform each other in Europe between 1880 and 1918? How did this period of cultural and political innovation shape our own world?
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies
Semester: N/O
Unit: 1.0

HIST 342 Seminar. Women, Work, and the Family in African History Kapteijn
In Africa too women held up half the sky. After a brief exploration of women's roles in precolonial Africa, we will study the transformations of women's lives and gender issues during (and as a result of) the period of colonial domination as well as after 1960. In what kinds of sources can we hear or read about African women's realities? When can we hear African women's own voices and who mediates these voices? The changing historiography about African women and the different theoretical approaches and methodologies historians and others have brought to their study will be an important focus of this course.

HIST 345 Seminar. The American South Varon
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. Topic for 2004-05: Southern Women's History. A survey of the field of Southern women's history from 1800 to World War II, with emphasis on the "Old South" (1830 to 1861). We will not only delve into the extensive primary and secondary source material on female slaves and slave owners but also engage recently published works on the experiences of Native Americans, antebellum free blacks and poor white, and immigrant communities in the region. Topics include: family life in the South; the impact of the Civil War on Southern women; the development of feminism and anti-feminism in the region; and the persistent gulf between popular images of the South and the realities of Southern women's lives.
Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.
Distribution: Historical Studies

HIST 349 Seminar. Structures of Authority in Early Modern Europe McGlynn
NOT OFFERED IN 2003-04. This course will consider various forms of and justifications for authority in Early Modern Europe. In this period of Reformation and war, authority was a crucial issue for both political and religious leaders, and we will focus on the ways in which authority was invoked through religious innovation and political turmoil. Along with questions of the authorities of church and state, however, came a broader challenge to a wide variety of less prominent forms of authority. Thus, this seminar will also consider such questions as domestic, textual, and moral authority. We will also consider medieval heresy, peasant revolt, the Reformation, the discovery of the New World, and the impact of the printing press.

HIST 359 Seminar. History of the Body Treitel
Do bodies have a history? Recent research suggests that they do. Historians have tapped a wide variety of sources — including vital statistics, paintings and photographs, hospital records, and sex manuals — to reconstruct changes in how humans have conceptualized and experienced their own bodies. We will explore this exciting new field of research, with particular attention to the intersection of European cultural history and history of medicine since 1500. Possible topics include the history of sexuality and sexuality, women and self-starvation, medical anatomy and evolving constructs of the body in sickness and health, physical culture and its relation to modern nationalism, and changing notions of beauty and fashion.

HIST 362 Seminar. The First World War: History, Culture, Memory Hitchcock
NOT OFFERED IN 2003-04. This seminar will explore the multiple meanings and broad significance of the First World War. The course will focus chiefly on the social and cultural impact of the war on Europe, and examine many of the new historical approaches to the subject that historians have developed recently. Topics may include: the origins of the war; war crimes; life in the trenches; morale; the 1917 revolutions; the economic mobilization for war; the impact of war on art and literature; gender and war; commemoration of the war; and the broad consequences of the war on Europe's later political and cultural development. Students will be required to undertake a research paper based on primary sources.

HIST 364 Seminar. Women in Islamic Society: Historical Perspectives Kapteijn
NOT OFFERED IN 2003-04. In the last decade, Muslim women scholars and writers have become major contributors to the study (and history) of women in Islamic societies. They have undertaken a critique of older (including Western feminist) scholarship and proposed new theoretical approaches and methods. This seminar will focus on this new historiography and the insights it provides into the history of
women and gender issues from the time of the Prophet to the present. Student research papers will focus on concrete case studies of women in specific Islamic societies and time periods, from North Africa and Western Europe to South Africa, Afghanistan, and China.

HIST 366 Seminar. The Maghreb: Cultural Crossroads in the Islamic West Rollman

NOT OFFERED IN 2003-04. Themes in the history of the Maghreb in its Islamic, African, and European contexts. Period of study: c. 600 CE to the present. Themes will include: the establishment of Arabo-Islamic culture in North Africa and Iberia; relations between Muslims, Christians, and Jews; expressions of popular Islam, urban culture, gender relations, and western images of the Maghreb. For the colonial and post-independence eras, the thematic focus will include aspects of state and society under colonial rule, struggles for independence, and Islamic Iberia and North Africa to 1700. Sources will include Arabic legal documents, travel accounts and recent films and literary texts.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.

HIST 371 Seminar. Chinese Frontier Experience, 1600-1990 Giersch

Much of China's vast and ethnically diverse territory was conquered after 1644. Nationalistic histories describe conquest in rosy terms in order to legitimize rule over Tibetans and other minorities. This course explores the social, military, economic and ideological realities - and legacies - of conquest. Readings from U.S. history provide a comparative perspective.

HIST 372 Seminar. The Idea of China: Defining the Modern Nation Giersch

NOT OFFERED IN 2003-04. Most Chinese (and foreigners, too) perceive the Chinese nation to be an ancient and homogeneous entity; ignoring the past century's struggles over China's identity. Why China's identity; race, patriotism, or other factors? Would minorities and Chinese emigrants (to North America and elsewhere) be included? How would the state educate its citizens to believe in their common community? What alternative visions have challenged state-inspired definitions of China? This course places the emergence of modern Chinese nationalism in historical perspective by exploring the conflicting ideas about "China" and "Chinese." We begin with the late nineteenth-century efforts to overthrow the Qing court and conclude with current fears about extreme nationalism and its potential to endanger mainland-Taiwan and Sino-U.S. relations. Readings include translated fiction and essays.

HIST 376/INAT 301 Seminar. Historical Origins of Contemporary Conflict Hitchcock

Why are civil and ethnic conflict so prevalent in the contemporary world? This seminar will discuss the historical roots of on-going conflicts. Students will work in collaboration to develop a broad explanation for contemporary conflicts, and undertake an in-depth analysis of one specific area. Regions may include: Afghanistan, Bosnia, Chechnya, Kashmir, Israel/Palestine, Northern Ireland, Rwanda and Somalia. Students may register for either HIST 376 or INAT 301. Credit will be given in the department in which the student is registered.

HIST 377 Seminar. The City in Latin America Osorio

NOT OFFERED IN 2003-04. Urbanity has long been central to Latin American cultures. This seminar examines the historical development of Latin American cities from the Roman principles governing the grid pattern imposed by the Spanish in the sixteenth century, through the development of the twentieth-century, post-modern megalopolis. The seminar's three main objectives are: (1) to provide a general overview of the historical development of cities in the context of Latin American law, society, and culture; (2) to subject to critical analysis some of the theoretical "models" (i.e. Baroque, Classical, Dependency, Modernism and so on) developed to interpret the evolution and workings of Latin American cities.

HIST 378 Seminar. Women and Social Movements in Latin America Osorio

This seminar examines the historical development of women's movements in Latin America from the nineteenth century through the 1990s. We will examine the local political and ideological events that shaped women's movements and feminism(s) in the region. Topics include women's early claims to equal education and the development of the ideologies of 'women's rights' and social motherhood around 1900; women in democracy and the search for social justice from the 1930s-1950s; women's role in revolutions and counter-revolutions from the late 1950s through the 1970s; the advent of international feminism in the context of national liberation and redemocratization after 1974, and neoliberalism and globalization.

Prerequisite: Normally open to juniors and seniors who have taken a grade II unit in History and/or a grade II unit in a relevant area/subject matter.

Directions for Election

Most 200-level courses in the Department are open to first-year students. Seminars are ordinarily limited to 15 students, non-majors as well as majors, who meet the prerequisite.

Majors in history are allowed great latitude in designing a program of study, but it is important for a program to have breadth, depth and historical perspective. To ensure breadth, the program must include: (1) at least one course (1.0 unit) in the history of Africa, Japan, China, Latin America or the Middle East; and (2) at least one course (1.0 unit) in the history of Europe, the United States, England, or Russia. To encourage depth of historical understanding, we urge majors to focus eventually upon a special field of study, such as (1) a particular geographical area, country, or culture; (2) a specific time period; (3) a particular historical approach, e.g., intellectual and cultural history, social and economic history; (4) a specific historical theme, e.g., the history of women, revolutions, colonialism. To ensure that students have a broad historical perspective, history majors entering Wellesley in the
Fall of 2000 and after must take at least one course (1.0 unit) in pre-modern history (e.g., ancient Greece and Rome, Japan before 1800, and so forth). We recommend that majors include at least one seminar in their program of two Grade III units (2.0) in the major required for the B.A. degree.

Normally, all Grade III work and at least six of a major's minimum of eight units (8.0) or seven of a major's minimum of nine units (9.0) for the class entering Wellesley in 2000 or after, must be taken at Wellesley. For history majors entering Wellesley in the Fall of 2000 and after the minimum major's requirement will be nine units (9.0). No Advanced Placement credits, and no more than one cross-listed course (1.0 unit), may be counted toward the History major. For departmental requirements and procedures related to honors theses, please consult the departmental web site or ask at the History office.

The History minor consists of a minimum of five courses (5.0 units), or six courses (6.0 units) for the class entering Wellesley in the Fall of 2000 and after, of which at least four courses (4.0 units) must be above the 100 level and at least one course (1.0 unit) at the 300 level (excluding 350). Of these five or six courses (5.0 or 6.0 units), at least three courses (3.0 units) shall represent a coherent and integrated field of interest, such as, for example, American history, Medieval and Renaissance history, or social history. Of the other courses, at least one course (1.0 unit) shall be in a different field. Normally at least four courses (4.0 units) must be taken at Wellesley, and cross-listed courses will not count toward the minor.

Teacher Certification: Students interested in obtaining certification to teach History in the Commonwealth of Massachusetts should consult Mr. Auerbach in the History Department and the Chair of the Department of Education.

International Relations

AN INTERDEPARTMENTAL MAJOR

Director: Shennan (Office of the Dean of the College and History)

Steering Committee: Murphy (Political Science), Matsusaka (History), Shennan (History), Velenciak (Economics)

Students declaring the major should choose an advisor from the list of participating faculty on the International Relations Web page at www.wellesley.edu/PoliSci/IR/index.html.

The International Relations major consists of ten units, which must include the following:

I. CORE COURSES: The IR major requires core courses in Economics, History, and Political Science. Students must take a minimum of three of the following courses; at least one core course must be taken in each department:

a. ECON 212 (Trade and Migration); ECON 213 (International Finance and Macroeconomic Policy).

b. HIST 103 (History in Global Perspective); HIST 269 (Japan, the Great Powers and East Asia, 1853-1993); HIST 295 (Strategy and Diplomacy of the Great Powers Since 1789); HIST 296 (The Cold War, 1945-1991); HIST 299 (The American Century: The United States in the World Since 1900).

c. POL3 221 (World Politics); POL3 222 (Comparative Foreign Policies).

Because these courses lay the foundation for more advanced work in the subject, all three should normally be completed by the end of the fifth semester. Students planning to study abroad should, if possible, complete these courses before leaving Wellesley. Because ECON 212 and 213 have two prerequisites (ECON 101 and ECON 102), majors are strongly encouraged to begin their study of Economics in their first year at the College.

II. LANGUAGE PROFICIENCY: The International Relations major requires a level of proficiency in a modern language beyond that required by the College's foreign language requirement. Students may indicate their attainment of this enhanced proficiency in one of three ways:

1. LANGUAGE TRACK: A student may take two foreign language courses beyond the College's foreign language requirement in the same language used to fulfill that requirement (above the intermediate level) to be counted as two units toward the major in International Relations. This requirement will usually be met by the completion of two units of language study at the third-year college level. Students who elect this option may take literature or culture courses (e.g. GER 274 Postwar German Culture) that require, at a minimum, completion of the second-year level in the language for enrollment and are taught in the foreign language.

2. NON-LANGUAGE TRACK I: A student who has fulfilled the College language requirement by virtue of being educated in a native language that is not English has the following option. She may choose, with the approval of her advisor, to use her native language to fulfill the language proficiency requirement of the major. This student will not be counting any language courses toward the ten units required for the major.

3. NON-LANGUAGE TRACK II: A student completing a second major in a language department or area studies program may choose, with the approval of her advisor, to indicate her enhanced proficiency through the completion of the second major, without counting her advanced language courses toward the ten units required for her International Relations Major.

III. ELECTIVES: Students presenting language courses as units toward the major must select five units as electives, while students fulfilling the language proficiency requirement without presenting language courses as units must select seven units as electives. The elective courses must include:

a. Two 300-level units, which must be completed at Wellesley, and only one of which may be 350, 360, or 370

b. At least one but not more than two units that focus on a specific country or countries within a region, normally a country or region where the student's second language is used. Courses that deal with the international relations of a country or region (e.g. HIST 396: Japan, the Great Powers, and East Asia) do not count towards this area studies requirement and limitation.

c. At least three units for students on the language-track or four for students on the non-language track taken at Wellesley.

Since International Relations is a social science-based major, courses in the humanities normally may not count as an elective. Exceptions are made only by petition to the program steering committee by students in their junior or senior years who can make a compelling case why a particular humanities course is applicable to the concentration she has chosen for her major.

IV. CONCENTRATION: In order to give the major a focus, students will designate, in consultation with their advisors, a concentration on a specific theme or issue within International Relations. Examples of such concentrations include international security, international political economy, international law and organization, global development, gender in world politics, human rights, international environmental studies, foreign policy analysis, and the international politics of a particular region (e.g. the European Community). The concentration may consist of a group of courses that relate to the theme and/or papers or other substantive work completed in any courses counted for the major. Normally, students will plan a concentration in their junior and senior years when preparing to undertake advanced work in International Relations.
INAT 301/HIST 376 Seminar. Historical Origins of Contemporary Conflicts
Hitchcock (History)
Why are civil war and ethnic conflict so prevalent in the contemporary world? This seminar will discuss the historical roots of ongoing conflicts. Students will work in collaboration to develop a broad explanation for contemporary conflicts, and undertake an in-depth analysis of one specific area. Regions may include: Afghanistan, Bosnia, Chechnya, Kashmir, Israel/Palestine, Northern Ireland, Rwanda and Somalia. Students may register for either INAT 301 or HIST 376. Credit will be given in the department in which the student is registered.
Prerequisite: Written application to the instructor.
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

INAT 302 Seminar. Global Inequalities
Murphy (Political Science)
Explores global patterns of income and health inequalities and their impact in the household, workplace, polity, and global system. Introduces current debates about global trends in income inequality, health equity, gender equity, and the relationship between health and economic and political inequality. Focuses on institutions of global governance (e.g., UNICEF, OECD, the World Bank, UNDP, and WHO) as sites of those debates and as actors within them. Investigates persistent patterns of global inequality since the Industrial Revolution as well as specific, key incidents such as the late-Victorian famines in China, India, Africa, and Brazil and the new international public health crises connected with globalization.

Related Courses
For Credit towards the Major
There are many courses throughout the curriculum that may be counted as electives toward the International Relations major. In addition to courses in Economics, History, and Political Science, students are encouraged to explore courses offered in Africana Studies, Anthropology, Peace and Justice Studies, Sociology, and Women's Studies. A partial listing of courses that may count towards the IR major can be found on the program Web page. If a student has a question about whether a particular course in these or other departments may count for the major, she should consult with the program director.
Note: Among courses listed under Political Science, all those with a POL2 (Comparative Politics) or POL3 (International Relations) designation may count for the IR major, although some POL2 courses may be subject to the area studies limitation described above (IIb).
International Relations majors are particularly encouraged to consider taking POL2 202 Comparative Politics as an elective because of its emphasis on the interactive effects of global forces and domestic politics. This course is not subject to the area studies limitation.

Department of Italian Studies
Professor: Jacoff, Viano, Ward (Chair)
Assistant Professor: Pausini (Resident Director of ECCO program in Bologna, 2003-04)
Visiting Assistant Professor: Pausini
Senior Lecturer: Laviosa
All courses, unless otherwise listed, are conducted in Italian. In all courses given in Italian, except seminars, some work may be required in the language laboratory.
Qualifying students are encouraged to spend their junior year in Italy on the Wellesley Bologna program. See Special Academic Programs, Study Abroad.
The Department of Italian Studies offers both a major and a minor. See Directions for Election.

ITAS 101-102 Elementary Italian
Laviosa, Pausini, Ward
These courses focus on the development of basic language skills: grammar, reading and writing, speaking and listening. Viewing of language video programs, TV programs and films, listening to traditional and modern songs, and reading of passages and short stories offer an introduction to Italy and its culture. Three periods. Each semester earns one unit of credit. However, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: None
Distribution: None
Semester: Fall and Spring
Unit: 1.0

ITAS 201-202 Intermediate Italian
Laviosa, Pausini, Ward
The aim of these courses is to develop students' fluency in spoken and written Italian. The reading of short stories, articles from Italian newspapers, and selected texts on Italian culture as well as the writing of compositions are used to promote critical and analytical skills. Listening is practiced through the viewing of Italian films, cultural videos, or TV programs. Both reading and listening activities are followed by in-class discussions. Three periods. Each semester earns one unit of credit. However, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: 101-102 (201 for 202) or permission of instructor.

**ITAS 203 Italian Women Writers**

**Ward**

NOT OFFERED IN 2003-04. Aimed at intermediate level students as well as those interested in the role of women in Italian society and culture, the course examines writings and films by and about Italian women. The course will study the role of women in the three key moments of modern Italian history: namely, the Risorgimento, fascism, and the resistance. Attention will also be paid to women's cultural and political role in Italy in the second half of the twentieth century. Authors to be studied include Sibilla Aleramo, Natalie Ginzburg, Alba De Cespedes, Luisa Passerini, Giuseppe Berti, and Anna Banti; film directors will include Lina Wertmuller and Ettore Scola.

Prerequisite: 201
Distribution: Language and Literature
Semester: Winter; offered 1.0

**ITAS 211 Introduction to Italian Cultural Studies**

**Laviosa**

**Topic for 2003-04: Women in Italy.** This course explores the works of women writers, philosophers, sociologists, educators, political activists, legislators, film directors and singers from the 1920s up to today. Feminist issues are discussed through selected literary texts, historical readings, essays on Italian legislation, film/documentary, ballads, feminist, rock and pop songs. Women's art and roles, rights and work, health and reproduction, prostitution and crime, fashion and beauty myths, careerism and (female) nationalism, and migration are presented through various media in a broad sociopolitical/historical context as well as in a cross-disciplinary cultural studies approach.

Prerequisite: 201 as a prerequisite and 202 as a corequisite or permission of instructor.
Distribution: Language and Literature
Semester: Spring; offered 1.0

**ITAS 212 Italian Women Directors: The Female Authorial Voice in Italian Cinema (in English)**

**Laviosa**

This course examines the films of five major Italian women directors across three artistic generations: Elvira Notari in the silent film era; Liliana Cavani and Lina Wertmuller from the 1960s to the 1990s; Francesca Archibugi and Roberta Torre in the 1990s. Neither fascist cinema nor neorealism fostered female talents, so it was only with the emergence of feminism and the women's movement of the 1960s and 1970s that a space for female voices in Italian cinema was created. The course will explore how women directors give form to their directorial signatures in film, focusing on their films' formal features and narrative themes in the light of their sociopolitical context.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall; offered 1.0

**ITAS 261 Italian Cinema (in English)**

**Viano**

The first half of this course aims to survey Italian cinema through an examination of films (e.g. Bicycle Thief) and directors (e.g. Fellini); it will emphasize the class settings, students are required to attend a three-hour weekly film showing.

Prerequisite: Permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Spring; offered 1.0

**ITAS 262 Religion and Spirituality in Italian Cinema (in English)**

**Viano**

NOT OFFERED IN 2003-04. Religious imagery, spiritual concerns, and depictions of the church are common elements in many Italian films. Making use of the most well-known and thought-provoking among them, the course will chart the course of religion and spirituality in Italian culture, as well as explore the films as a cinematic genre. We will watch films by directors such as Rossellini, Fellini, Bertolucci, and Caveni. The several films depicting the figure of St. Francis, spanning the period 1917-89, will give us the opportunity to examine different periods of film history, from silent to contemporary independent cinema. In addition to regular class meetings, students are required to attend a three-hour weekly film showing.

Prerequisite: Permission of instructor required.
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: N/O; offered 1.0

**ITAS 263 Dante (in English)**

**Jacoff**

The course offers students an introduction to Dante and his culture, the centrality and encyclopedic nature of Dante's Divine Comedy make it a paradigmatic work for students of the Middle Ages. Since Dante has profoundly influenced several writers of the nineteenth and twentieth centuries, knowledge of the Comedy illuminates modern literature as well. This course presumes no special background and attempts to create a context in which Dante's poetry can be carefully explored.

Prerequisite: None
Distribution: Language and Literature
Semester: Fall; offered 1.0

**ITAS 271 The Construction of Italy as a Nation**

**Ward**

The course aims, first, to give students who wish to continue their study of Italian the chance to practice and refine their skills; and second, to introduce students to one of the major themes of Italian culture: namely, the role played by Italian intellectuals in the construction of Italy as a nation. We will read how Dante, Petrarch, and Machiavelli imagined Italy as a nation before it came into existence in 1860; how the nation came to be unified; and how the experience of unification has come to represent a controversial point of reference for twentieth-century Italy.

Other figures to be studied will include Benso, Castiglione, Foscolo, Gramsci, Tomasi di Lampedusa, D'Annunzio, Visconti, Levi, Basetti, and Rossellini.

Prerequisite: 202, 203, 211 or permission of instructor.
Distribution: Language and Literature
Semester: Fall; offered 1.0

**ITAS 272 Small Books, Big Ideas. A Journey through Italian Identities**

**Parussa**

NOT OFFERED IN 2003-04. Unlike other European literatures, contemporary Italian literature lacks a major work of fiction representing the nation's cultural identity. Rather, Italian literature's most important landmarks is the small book, brief unclassifiable narratives that express the variety and complexity of Italian culture. Realistic novels or philosophical short stories, memoirs or literary essays, these works are a fine balance between a number of literary genres and, as such, are a good entranceway into the multifaceted and contradictory identity of Italy as a nation. The course will combine a survey of contemporary Italian literature with a theoretical analysis of how Italian identity has been represented in works by Moravia, Calvino, Ortese, and others.

Prerequisite: 201 or permission of instructor.
Distribution: Language and Literature
Semester: N/O; offered 1.0

**ITAS 309 Italian-Jewish Identity**

**Parussa**

NOT OFFERED IN 2003-04. In the light of events like the high-profile trial of a Nazi war criminal and the Pope's encyclical letter on the responsibilities of Christians in the Holocaust, this course aims to discuss the question of Jewish identity in contemporary Italian culture. Students will read prose and poetry, essays and articles, as well as watch films that address issues such as religious and national identity in a culturally, racially, and linguistically homogeneous country like Italy. The course will also give students an overview of the transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy.

Prerequisite: Permission of instructor.
Distribution: Language and Literature
Semester: N/O; offered 1.0

**ITAS 310 Fascism and Resistance in Italy**

**Ward**

This course examines the two fundamental political and cultural experiences of twentieth-century Italy: the twenty-year fascist regime and the resistance to it. We will study the origins of fascism in Italy's participation in World War I and its colonial ambitions; we will follow the development of fascism over the two decades of its existence and ask to what extent it received the consensus of the Italian people. We will go on to examine the various ways in which Italians resisted fascism and the role the ideals that animated antifascist thinking had in the post-war period. Authors to be studied include: Marinetti, D'Annunzio, Pascoli, Croce, Gobetti, Rossellini, Bassani, Ginzburg, Levi, and Silone.

Prerequisite: 211 or 271 or 272 or permission of instructor.
Distribution: Language and Literature

ITAL 314 The Other Half: History and Culture of the Italian South

Word

This course aims to introduce advanced level students to the rich and varied cultural and historical landscape of the Italian South, the mezzogiorno. Taking as its starting point the medieval court of Frederick II and the deep-seated repercussions its influence had on Italian cultural life, the course goes on to examine the works of southern thinkers and writers like Giordano Bruno, Tommaso Campanella, and Giambattista Vico. An added dimension will be the Neapolitan Enlightenment and the Southern question in Renaissance Italy. For the exam, we will examine the writings of great Renaissance writers like Carlo Levi, Giuseppe Tomasi di Lampedusa, Giuseppe Verga, Leonardo Sciascia and Vincenzo Consolo, who either come from southern Italy or have written about it.

Prerequisite: 211 or 271 or 272 or permission of instructor.
Distribution: Language and Literature

ITAL 349 Seminar. The Function of Narrative

Word

NOT OFFERED IN 2003-04. OFFERED IN 2004-05. Beginning with Boccaccio and going on to Manzoni and Verga, the course introduces students to the major figures of the Italian narrative tradition. We then go on to study twelfth-century narrative texts, all the time seeking answers to the question of why narrative is such a fundamental human need. Why, for example, do we narrate our experience of life and the sense we have of ourselves, even in the form of diaries? Do the stories we tell faithfully reflect reality or do they create it? The course concludes with a reflection on narrative technique in cinema illustrated by films of Michelangelo Antonioni. Other authors to be studied may include: Fra Gonzaga, Calvino, Ceresa, Rasy, Pasolini, Celati, and Benni.

Prerequisite: 211 or 271 or 272 or permission of instructor.
Distribution: Language and Literature
Semester: N/O. Offered in 2004-05.

Directions for Election:

The department of Italian Studies offers both a major and a minor. The major in Italian Studies offers the opportunity to acquire fluency in the language and knowledge of the culture of Italy in a historical perspective. Students are strongly urged to begin their major in their first year. Any courses taken above the 100 level must be taken in the department. The requirement to take two courses at the 300 level may not be met by taking 350 (Research or Individual Study), 360 (Senior Thesis Research) or 370 (Senior Thesis). Students are encouraged to consult with the chair about the sequence of courses they will take. Courses given in translation count towards the major. Qualified students are encouraged to spend their junior year abroad in Italy or the Eastern Consortium program in Bologna (of which the Italian department is a participant) or on another approved program.

The Italian Studies minor requires five units above the 100 level. Courses offered in translation count towards the minor.
Department of Japanese

Professor: Morley (Chair)
Assistant Professor: Zimmerman
Lecturer: Maeno, Torii
Visiting Instructor: Birnbaum
Lecturer in Japanese Language: Hatano, Ozawa

JPN 101-102 Beginning Japanese
Torii, Ozawa, Morley
Introduction to the modern standard Japanese language. Emphasis on developing proficiency in listening, speaking, reading and writing, using basic expressions and sentence patterns. Five periods. Students will receive a total of 2.5 units of credit for the year. Each semester earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: None

Semester: N/O
Unit: 1.0

JPN 111 Gender and Popular Culture of Japan
Zimmerman
NOT OFFERED IN 2003-04. Our study of Japanese popular culture focuses on gender issues, particularly on how girls are represented in Japanese comic books, magazines, fiction, television, animation, and film. We ask why the girl sparks such intense interest in Japan and explore how she both challenges and reaffirms existing gender norms. A lightening rod for social change in Japan, even for modernity itself, representations of the girl illuminate the status of women, the changing role of the family, issues of ethnic and national identity, sexual orientation, and even Japan's relation to the outside world. Taught in English. No previous knowledge of Japan or Japanese required.
Prerequisite: Open
Distribution: Language and Literature or Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

JPN 130 Japanese Animation
Morley
What makes Japan tick? New visitors to Japan are always struck by the persistence of traditional esthetics, arts, and values in a highly industrialized society entrenched by novelty. Through animation films (English subtitles) and readings on animation we will explore this phenomenon from the inside. Focus is on the works of Tezuka Osamu, Hayao Miyazaki, and others. No Japanese language ability required.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video or Language and Literature
Semester: Spring
Unit: 1.0

JPN 155 Exploring Solitude: Japanese Writers Across the Ages
Morley
NOT OFFERED IN 2003-04. In Japanese literature solitude has been shaped into an intensely emotional response to nature and human experience. The esthetic values which many feel lie at the heart of the Japanese literary and artistic tradition: shiki (solitude), wabi (the aged or weathered), yugen (subtle mystery), shi (writing) arose from this preoccupation with solitude. What Buddhist cultural beliefs influenced the development of these values in Japan? How are they reasserted in modern fiction to recapture what is felt to be a uniquely "Japanese" atmosphere? We will be reading selections from a variety of the classics such as The Tale of Genji and the haiku poetry of Basho, as well as contemporary authors such as Banana Yoshimoto.
Prerequisite: None
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

JPN 201-202 Intermediate Japanese
Maeno, Ozawa
Continuation of 101-102. The first semester will emphasize further development of listening and speaking skills with more complex language structures as well as proficiency in reading and writing. The second semester will emphasize reading and writing skills. Five periods. Students will receive 2.5 units of credit for the year. Each semester earns 1.25 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.
Prerequisite: 101-102 (1-2) or by permission of the instructor.

Semester: Fall and Spring
Unit: 1.25

JPN 231 Selected Readings in Advanced Japanese I
Torii
Emphasis on development and refinement of language skills with the aim of achieving fluency in verbal expression and mastery of reading and writing skills. Students will be given the opportunity to select individual readings appropriate to their area of interest, as well as the opportunity to develop their reading comprehension and oral skills as a group. Popular TV drama and E-mail exchanges with students in Japan will complement the reading/writing component for the course. Meets three days a week.
Prerequisite: 201-202, or the equivalent, or with permission of the instructor.
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

JPN 232 Selected Readings in Advanced Japanese II
Maeno
This course is a continuation of 231 with an emphasis on independent reading and writing skills. Students will give oral presentations on their readings throughout the semester as well as participating in debates and directing class discussions. Meets three days a week.

JPN 251 Japanese Writers and Their Worlds (in translation)
Morley
NOT OFFERED IN 2003-04. A study of the emerging voice of the writer in Japan from the tenth through the eighteenth centuries. Texts will include the early poetic diaries of the Heian Court ladies, The Tale of Genji, the Noh plays, puppet plays and the haiku poetry of Matsuo Basho. Emphasis is on the changing world of the Japanese writer, the influence of Buddhism and Confucianism, and the role of the texts in shaping Japanese aesthetic principles. Selected films shown throughout course.

JPN 256 Japanese Film: The Restaging of a Culture
Zimmerman
NOT OFFERED IN 2003-04. From stalwart warriors to runaway lovers, we trace the complex strands of Japan's modern identity through its national cinema. Japanese directors have used film to examine and rearrange narrative and aesthetic conventions. At the same time, they have fashioned a unique language of film that counters the conventions of Hollywood. We will explore these concepts and their broader cultural context through an analysis of film clips and the use of literary and historical texts. Taught in English.

**Morley**

Shortly after 1000 AD in the imperial court of Japan, Murasaki Shikibu, a court lady of middle rank, completed what is arguably the first novel in the history of world literature, *The Tale of Genji.* Who was she? How did she come to write a novel of such surprising psychological subtlety? Who is the hero? Why is he still appealing a millennium later? Focusing on *The Genji* and Murasaki’s diary, we examine the culture of the Heian court, Buddhist beliefs, the esthetic of *mono no aware* (a beauty evocative of longing), and the literature (poetry, prose, and ladies’ diaries) of the court salons. Films, plays, animation, and modern novels modeled on *The Genji* will also be discussed in class. *No knowledge of Japanese is necessary.*

Japanese majors concentrate on Japanese language and literature and are strongly urged to begin language study in their first year. A junior year or summer of intensive language study in Japan is encouraged. The major consists of a minimum of eight units and normally includes 202, 231, 232, and five additional units: at least two must be non-language units, and a total of at least two must come from the 300 level (to be taken within the Department). Students entering with advanced language preparation may substitute alternate language units as necessary with departmental permission. JPN 101-102 may be counted toward the degree but not toward the major. Courses taken R/NR may not be counted toward the major. One course on China, Korea, or on Asian Americans may count toward the major. Students are encouraged to spend a summer or the junior year in Japan.

AN INTERDEPARTMENTAL MAJOR AND MINOR

Director: Geller (Religion)

Visiting Assistant Professor: Abend

The major in Jewish Studies is designed to acquaint students with the many facets of Jewish civilization through an interdisciplinary study of Jewish religion, history, philosophy, art, literature, social and political institutions, and cultural patterns.

For the eight-unit major in Jewish Studies, students must take courses pertaining both to the ancient and modern worlds and show proficiency in Hebrew (equivalent to at least two semesters at the second-year level). In certain cases, where students whose area of concentration necessitates another language (such as Arabic, French, Spanish, Yiddish, or Ladino), that language may be substituted for Hebrew in consultation with the student’s major advisor. In addition, students are expected to concentrate in some area or aspect of Jewish studies (such as religion, history, or Hebrew language and literature) by taking four courses above the 100 level, including at least two at the 300 level.

Majors devise their own programs in consultation with the director of the Jewish Studies program and an appropriate faculty member from the student’s area of concentration. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for Jewish Studies.

In addition to Wellesley courses, students are encouraged to take courses at Brandeis University in the Department of Near Eastern and Judaic Studies which may be applicable to the Jewish Studies major. These courses must be approved, in advance, by the corresponding department at Wellesley. See the director of Jewish Studies for further details.

A minor in Jewish Studies consists of five units from the following courses (of which at least one must be at the 300 level and no more than one at the 100 level): Anthropology 242, 247, History 202, 217, 218, 219, 245, 249, 326, 327, 328, 332, 334, 355, 367; Italian 109; Religion 104, 105, 140, 160, 202, 205, 241, 242, 243, 244, 245, 302, 303, 342; Spanish 252, 267, and 279. Units must be taken in at least two departments; in consultation with the director of the program in Jewish Studies, a student can also arrange to take courses for inclusion in the Jewish Studies minor in Brandeis University’s Department of Near Eastern and Judaic Studies.

The following courses are available in Jewish Studies:

HEBR 101-102 Intermediate Hebrew

Introduction to Hebrew with emphasis on its contemporary spoken and written form. Practice in the skills of listening and speaking as well as reading and writing, together with systematic study of Hebrew grammar. Students will master a basic vocabulary of approximately 1,000 words, and become comfortable in the use of the present, past and future tenses, as well as basic verb patterns. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None
Distribution: None
Semester: Fall, Spring

HEBR 201-202 Intermediate Hebrew

Abend

Building on the foundations of 101-102, the third semester will continue to develop skills in modern Hebrew. Students will broaden their knowledge of verb patterns, compound sentence structures and mixed tenses. Special emphasis will be placed on composition and oral reports. The fourth semester will focus on literature through reading and discussion of selected short pieces of prose and poetry. Some examples of classical, rabbinic, and liturgical Hebrew will also be analyzed. Students will be required to write short compositions inspired by their readings. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

### Latin American Studies

**AN INTERDEPARTMENTAL MAJOR**

**Director:** Reujiian-Burgy (Spanish), Wasserspring (Political Science)

**Core Faculty:** Agosín (Spanish), Elkins (Religion), Halleck (Spanish), Levitt (Sociology), Oles (Art), Osorio (History), Rose (Spanish), Wasserspring (Political Science)

**The Latin American Studies major seeks** to understand the Latin American experience through an interdisciplinary program of study. Students must submit a plan of study following the requirements listed below for approval by the directors. The Latin American Studies major requires Spanish proficiency at the level of 241 or above. A minimum of nine units (excluding Spanish 241 and 242), with a concentration of four courses in one of the following departments: 

- *Art History*
- *Political Science*
- *Sociology*
- *History*

or Spanish constitute the major. Of these nine units constituting a minimum for the major, at least two must be taken at the 300 level. It is recommended that one of these two be a seminar. Courses with an asterisk (*) require notifying the instructor that the course is to be counted for Latin American Studies. The asterisk also signifies that a research paper in the course will focus on Latin America.

The student must exhibit a degree of proficiency in the oral and written use of Spanish by successful completion of two Spanish language courses beyond the College's foreign language requirement (above the intermediate level). In some cases an oral and written proficiency exam may be substituted. In the case where the student's area of interest is better served by proficiency in another language (e.g. Portuguese), that language may be substituted in consultation with the directors.

Qualified juniors are encouraged to spend a semester or a year in Latin America. To be eligible for study in Latin America a student should normally be enrolled in SPAN 241 or higher level language or literature course the previous semester.

Major may also apply to the Five-Year Cooperative M.A. Program at Georgetown University in Latin American Studies. This program enables the student to apply upper-level Latin American Studies courses taken at Wellesley toward the master's degree at Georgetown. A summer of study at the Universidad Católica in Santiago, Chile, taken during an undergraduate summer, and a year of academic work at Georgetown are required to earn the master's degree at Georgetown in one year. Interested students should contact the directors of Latin American Studies or the Center for Work and Service.

MATH 101 Reasoning with Data: Elementary Applied Statistics
Staff
An introduction to the fundamental ideas and methods of statistics for analyzing data. Topics include descriptive statistics, basic probability, inference and hypothesis testing. Emphasis on understanding the use and misuse of statistics in a variety of fields, including medicine and both the physical and social sciences. This course is intended to be accessible to those students who have not yet had calculus.

Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have completed 116, 116C, 120, or 205, except by permission of the instructor; such students should consider taking 220 instead. Not open to students who have taken or are taking Q180, Q199 or PSYC 205.

Distribution: Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Fall, Spring
Unit: 1.0

MATH 102 Applications of Mathematics without Calculus
Sontag
This course explores several areas of mathematics which have application in the physical and social sciences, yet which require only high-school mathematics as a prerequisite. The areas covered will be chosen from systems of linear equations, linear programming, probability, game theory, and stochastic processes. Students will solve problems on topics ranging from medical testing to economics with the results demonstrating the value of mathematical reasoning. May not be counted toward the major.

Prerequisite: None
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 115 Calculus I
Staff
Introduction to differential and integral calculus for functions of one variable. The course covers techniques and applications of differentiation and integration of algebraic, trigonometric, logarithmic, and exponential functions.

Prerequisite: Open by permission of the department, based on the results of the departmental placement exam.
Distribution: Mathematical Modeling
Semester: Fall, Spring
Unit: 1.0

MATH 116 Calculus II
Staff
Integration techniques, L'Hopital's rule, improper integrals, applications of integration including volumes of solids of revolution, infinite series, power series, and Taylor series. Theoretical basis of limits and continuity, Mean Value Theorem.

Prerequisite: 115 or the equivalent
Distribution: Mathematical Modeling
Semester: Fall, Spring
Unit: 1.0
MATH 116Z Calculus II via Applications
NOT OFFERED IN 2003-04. Topics are similar to those in 116, except that differential equations are discussed at greater length, and discussion of infinite series focuses on Taylor series. This course will stress the relationship of calculus to real-world problems. To facilitate this, and to enhance conceptual understanding, topics will be presented graphically and numerically as well as algebraically.
Prerequisite: 115 or the equivalent
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

MATH 120 Calculus IIA
Staff
A variant of 116 for students who have a thorough knowledge of the techniques of differentiation and integration, and familiarity with inverse trigonometric functions and the logarithmic and exponential functions. Includes a rigorous and careful treatment of limits, sequences and series, Taylor’s theorem, approximations and numerical methods. Riemann sums, Improper integrals, L’Hospital’s rule, and applications of integration. Not open to students who have completed 115, 116, 116Z or the equivalent.
Prerequisite: Open by permission of the department to students who have completed a year of high school calculus.
(Students who have studied Taylor series should elect 205.)
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 203 Mathematical Tools for Finance
Bu
This course is intended for students who are interested in mathematics and its applications in economics and finance. The following topics will be covered: mathematical models in economics, market equilibrium, first and second order recurrences, the cobweb model, profit maximization, derivatives in economics, elements of finance, constrained optimization, Lagrangeans and the consumer, microeconomic applications, business cycles, European and American options, call and put options, Black-Scholes analysis.
Prerequisite: 116/116Z or the equivalent
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 205 Multivariable Calculus
Staff
Vectors, matrices, and determinants. Polar, cylindrical, and spherical coordinates. Curves, functions of several variables, partial and directional derivatives, gradients, Lagrange multipliers, multiple integrals, line integrals, Green’s Theorem.
Prerequisite: 116, 116Z, 120, or the equivalent. Not open to students who have completed MATH 216/PHYS 216.
Distribution: Mathematical Modeling
Semester: Fall, Spring
Unit: 1.0

MATH 206 Linear Algebra
Magid, Wilcox
Prerequisite: 205 or MATH 215/PHYS 215.
Distribution: Mathematical Modeling
Semester: Fall, Spring
Unit: 1.0

MATH 208/310 Functions of a Complex Variable
NOT OFFERED IN 2003-04. Complex numbers and the complex plane. Definitions and mapping properties of elementary complex functions. Analyticity and the Cauchy-Riemann equations. Complex-integration theory including the Cauchy-Goursat Theorem; Taylor and Laurent series; Maximum Modulus Principle; residue theory and singularities. Additional topics such as conformal mapping and Riemann surfaces as time permits. Assignments will be tailored to the level (200 or 300) for which the student is registered. Offered in alternate years.
Prerequisite: 205 is a prerequisite for 208; 302 is a prerequisite or corequisite for 310
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 210 Differential Equations
Wang
Introduction to theory and solution of ordinary differential equations, with applications to such areas as physics, ecology, and economics. Includes linear and nonlinear differential equations and equations system, existence and uniqueness theorems, and such solution methods as power series, Laplace transform, and graphical and numerical methods.
Prerequisite: 205
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 212 Differential Geometry
NOT OFFERED IN 2003-04. An introduction to the differential geometry of curves and surfaces. Topics include curvature of curves and surfaces, first and second fundamental forms, equations of Gauss and Codazzi, the fundamental theorem of surfaces, geodesics, and surfaces of constant curvature. Offered in alternate years.
Prerequisite: 205 or permission of instructor
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

MATH 214 Euclidean and Non-Euclidean Geometry
Magid
A rigorous treatment of the fundamentals of two-dimensional geometry: Euclidean, spherical, elliptic and hyperbolic. The course will present the basic classical results of plane geometry: congruence theorems, congruence theorems, classification of isometries, etc. and their analogues in the non-Euclidean settings. The course will provide a link between classical geometry and modern geometry, preparing for study in group theory, differential geometry, topology, and mathematical physics. The approach will be analytical, providing practice in proof techniques. Offered in alternate years. Majors can fulfill the major presentation requirement in this course in 2003-04.
Prerequisite: 205 or permission of instructor
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 215/PHYS 215 Mathematics for the Sciences I
Chang, Stark (Physics)
Complex numbers, linear algebra (matrices, rank, inverses, eigenvectors and eigenvalues, diagonalization), ordinary differential equations (first order, second order linear), Fourier analysis, introduction to partial differential equations. Familiarity with vectors (dot products, cross products, lines, planes) is assumed. Emphasis on applications to the sciences.
Prerequisite: MATH 116, 116Z, or 120 or the equivalent course.
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 216/PHYS 216 Mathematics for the Sciences II
Magid, Hu (Physics)
Differential and integral vector calculus (spherical and cylindrical coordinates, flux, divergence and curl, Gauss’ and Stokes’ theorems), partial differential equations, special functions, numerical methods for solving algebraic and differential equations, introduction to MATLAB, computer simulation and modeling with applications to the sciences.
Prerequisite: MATH 215/PHYS 215
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 220 Probability and Elementary Statistics
Shachat
Topics selected from the theory of sets, discrete probability for both single and multivariate random variables, probability density for a single continuous random variable, expectations, mean, standard deviation, and sampling from a normal population.
Prerequisite: 116, 116Z, or the equivalent.
Open to first-year students by permission of the instructor.
Distribution: Mathematical Modeling.
Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Spring
Unit: 1.0

MATH 223 Number Theory
Bernstein
Topics include: prime numbers and divisibility, congruences, Fermat’s Little Theorem, Euler’s phi-function, cryptography, and additional topics as time permits. Students will be expected to experiment and formulate conjectures. There will also be an emphasis on learning to write clear and coherent mathematical proofs. Majors can fulfill the major presentation requirement in this course in 2003-04.
Prerequisite: 116, 116Z, or the equivalent.
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 225 Combinatorics and Graph Theory
Bernstein, Kerr
Enumeration of selections and arrangements, basic graph theory (isomorphism, coloring, trees), generating functions, recurrence relations, Methods of proof such as mathematical induction, proof by contradiction. Other possible topics: pigeonhole principle, Ramsey theory, Hamiltonian and Eulerian circuits, and Polya’s theorem.
Prerequisite: 116, 116Z, or the equivalent.
Distribution: Mathematical Modeling
Semester: Fall, Spring
Unit: 1.0
MATH 249 Selected Topics
NOT OFFERED IN 2003-04.
Prerequisite: 116, 116Z, or the equivalent
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

MATH 251 Topics in Applied Mathematics
Magid
Topic for 2003-04: Statistics. A continuation of MATH 220. Topics will include: Multivariate continuous distributions, estimation, theory of estimation, hypothesis testing, linear regression, ANOVA, analysis of categorical data and non-parametric statistics. The course will explore both the theory and the applications of statistics. Majors can fulfill the major presentation requirement in this course in 2003-04.
Prerequisite: 220 or permission of instructor. Distribution: Mathematical Modeling. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Fall
Unit: 1.0

MATH 362 Elements of Analysis I
Wang
Metric spaces; compact, complete, and connected spaces; continuous functions; differentiation, integration, and interchange of limit operations as time permits.
Prerequisite: 205, and at least one of 206, 208, 212, 214, 223, 225.
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 303 Elements of Analysis II
Shuchat
A continuation of MATH 302. Topics chosen from the theory of Riemann integration, measure theory, Lebesgue integration, Fourier series, and calculus on manifolds. Majors can fulfill the major presentation requirement in this course in 2003-04. Offered in alternate years.
Prerequisite: 302
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 305 Modern Abstract Algebra I
Chang
Introduction to groups, rings, and fields. Equivalence relations, subgroups, normal subgroups, ideals, homomorphisms, and isomorphisms.
Prerequisite: 206
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 306 Modern Abstract Algebra II
Chang
Topics chosen from field theory and Galois theory. Using groups to study automorphisms of fields generated by the roots of a polynomial, with applications to solvability. Majors can fulfill the major presentation requirement in this course in 2003-04.
Prerequisite: 305
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 307 Topology
NOT OFFERED IN 2003-04. The topological properties of an object are those which are unchanged by bending, twisting, stretching, or shrinking. A mathematical knot is a circle embedded in three-dimensional space. Classical knot theory is the branch of topology that deals with knots and links in three-dimensional space. The central problem is determining whether two knots can be deformed to be exactly alike, via bending, twisting, stretching, or shrinking. This course provides an introduction to the theory of knots. Methods of knot tabulation, surfaces applied to knots, and knot polynomials will be covered, as well as applications to natural and physical sciences. Open problems in the field will also be discussed. Offered in alternate years.
Prerequisite: 302
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

MATH 309 Foundations of Mathematics
Sontag
An introduction to the logical foundations of modern mathematics, including set theory, cardinal and ordinal arithmetic, and the axiom of choice. Offered in alternate years.
Prerequisite: 302 or 305; or at least two from 206, 214, 223, 225.
Distribution: Mathematical Modeling
Semester: Fall
Unit: 1.0

MATH 310/208 Functions of a Complex Variable
NOT OFFERED IN 2003-04. Complex numbers and the complex plane. Definitions and mapping properties of elementary complex functions, Analyticity and the Cauchy-Riemann equations. Complex integration theory including the Cauchy-Goursat Theorem; Taylor and Laurent series; Maximum Modulus Principle; residue theory and singularities. Additional topics such as conformal mapping and Riemann surfaces as time permits. Assignments will be tailored to the level (200 or 300) for which the student is registered. Offered in alternate years.
Prerequisite: 205 is a prerequisite for 208. 302 is a prerequisite or corequisite for 310.
Distribution: Mathematical Modeling
Semester: N/O
Unit: 1.0

MATH 349 Selected Topics
Trenk
Topic for 2003-04: Graph Theory. Graph Theory has origins both in recreational mathematics problems (i.e., puzzles and games) and as a tool to solve practical problems in many areas of society. Topics include: connectivity, trees, independent sets and cliques, coloring problems, matching theory, and directed graphs. Students will be expected to experiment and formulate conjectures. Majors can fulfill the major presentation requirement in this course in 2003-04.
Prerequisite: 225 and either 305 or 302
Distribution: Mathematical Modeling
Semester: Spring
Unit: 1.0

MATH 350 Research or Individual Study
Prerequisite: Open to juniors and seniors by permission.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

MATH 360 Senior Thesis Research
Prerequisite: By permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

MATH 370 Senior Thesis
Prerequisite: 360
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election
The Mathematics Department Web page (http://www.wellesley.edu/Math/mathhome.html) has more detailed course descriptions and information for majors and minors.

Placement in Courses and Exemption Examinations
The Mathematics Department reviews elections of calculus students and places them in 115, 116, 116Z, 120, or 205 according to their previous courses and summer placement results. See the descriptions for these courses. If there is a question about placement, the student should attend the course in which she is placed and contact the Sectioning Coordinator (contact information in Sci Center 361) to discuss her placement.

No special examination is necessary for placement in an advanced course.

Students may receive course credit toward graduation through the CEEB Advanced Placement tests in mathematics. Students with scores of 4 or 5 on the AP Examination or 3 on the BC Examination receive one unit of credit (equivalent to 115) and are eligible for 116, 116Z, or 120. Those entering with scores of 4 or 5 on the BC Examination receive two units (equivalent to 115 and 116 or 115 and 120) and are eligible for 205. Students with a 4 or 5 on the AP examination in Statistics receive one unit of credit (equivalent to 101). Advanced Placement credits may not count toward the major.

Students majoring in Mathematics must complete 115 and one of 116/116Z/120 (or the equivalent) and at least seven units of 200-level and 300-level courses, including 205, 206, 302, 305, and one other 300-level course. MATH 215/PHYS 215 cannot be counted towards the mathematics major. Credit for MATH 216/PHYS 216 satisfies the requirement that a math major take 205, but does not count as one of the seven units of 200-level and 300-level courses.

Students entering with AP credits must complete eight units after entering college, MATH 216/PHYS 216 does not count as one of these eight units.

Students expecting to major in Mathematics should complete the prerequisites for 302 and 305 before the junior year. Students may wish to consult the chair of the Department of Mathematics or their current mathematics instructor in deciding when to take 302 and 305. Independent study units (MATH 350, 360, 370) may not count as the third 300-level course required for the major.

Majors are also required to present one classroom talk in either their junior or senior year, usually in one of the courses specially designated as fulfilling this requirement. ("Majors can fulfill the major presentation requirement in this course.") Usually two such courses are designated each semester. In addition, a limited number of students may be able to fulfill the presentation requirement in other courses. Students need to speak with individual instructors to find out what is possible in a given course.
Students expecting to do graduate work in mathematics should elect 302, 305, and at least four other 300-level courses, possibly including a graduate course at MIT. They are also advised to acquire a reading knowledge of one or more of the following languages: French, German, or Russian.

The Mathematics minor is recommended for students whose primary interests lie elsewhere but who wish to take a substantial amount of mathematics beyond calculus. Option I (five units) consists of: (A) 205, 206 and (B) 302 or 305 and (C) two additional units, at least one of which must be at the 200 or 300 level. Option II (five units) consists of: (A) 205, 206 and (B) three additional 200- or 300-level units. MATH 215/PHYS 215 can be counted as one of these five units. MATH 216/PHYS 216 satisfies the requirement that a math minor take 205, but does not count as one of the five units. A student who plans to add the mathematics minor to a major in another field should consult a faculty advisor in mathematics.

Students interested in teaching mathematics at the secondary-school level should consult the chair of the Department of Mathematics and the chair of the Department of Education. Students interested in taking the actuarial science examinations should consult the chair of the Department of Mathematics.

Students are encouraged to elect MIT courses that are not offered by the Wellesley College mathematics department.

The department offers the following options for earning honors in the major field: (1) completion of 302, 305, and four other 300-level courses, and two written comprehensive examinations or (2) two semesters of thesis work (360 and 370). An oral examination is required for both programs.

**Medieval/Renaissance Studies**

**AN INTERDEPARTMENTAL MAJOR**

Directors: Armstrong (Art), Elkins (Religion) – Fall

The major in Medieval/Renaissance Studies enables students to explore the richness and variety of European and Mediterranean civilization from later Greco-Roman times through the Renaissance and Reformation, as reflected in art, history, literature, music, and religion. It has a strong interdisciplinary emphasis; we encourage students to make connections between the approaches and subject matters in the different fields that make up the major. At the same time, the requirements for the major encourage special competence in at least one field.

For a Medieval/Renaissance Studies major, students must take at least eight units of coursework from the list that follows. Of these, at least four must be above the 100-level in an area of concentration — a single department, a geographical location, a topic or theme. Two units of coursework must be at the 300-level. Each year at least two 200-level courses and one seminar are offered which are especially designed to accommodate the needs and interests of majors. The Majors’ Seminars for 2003-04 are (1) ARTH 330 Seminar, Renaissance Venice and (2) ENG 315 Advanced Studies in Medieval Literature and Culture: The Eaten Word: Food and Drink in Medieval Literature and Culture. (For details, see the department entries for Art History and English.)

Majors who are contemplating postgraduate academic or professional careers in this or related fields should consult faculty advisors to plan a sequence of courses that will provide them with a sound background in the language and critical techniques essential to further work in their chosen fields. We make every effort to accommodate individual interests and needs through independent study projects (350s and senior theses) carried out under the supervision of one or more faculty members and designed to supplement, or substitute for, advanced seminar-level work.

There are numerous opportunities for study abroad for those who wish to broaden their experience and supplement their research skills through direct contact with European and Mediterranean culture. Up to three courses in accredited programs abroad may be counted toward the major. By participating in the Collegium Musicum, students can learn to perform Medieval and Renaissance music; see the departmental entry for Music.

**ME/R 245 Introduction to Medieval Literature**

NOT OFFERED IN 2003-04. An opportunity to explore a variety of narratives that remain influential and powerful. The course will look at the ways medieval writers think about the self and about the tensions (between soul and body, human and divine love, this world and the next) that are central in medieval culture. Texts to be read include Augustine’s Confessions, Boethius’ The Consolation of Philosophy, Beroiu’s Tristan, Heloise and Abelard’s Letters, and Boccaccio’s Decameron.

**ME/R 246 Monsters, Villains, and Wives**

Lynch (English)

This course will select its monsters, villains, and wives from early English, French, and Anglo-Norman literature, ranging from the giant Grendel (and his mother) in Beowulf to the arch-villain Ganelon in The Song of Roland, from Guinevere to the wife of the enigmatic Green Man in Sir Gawain and The Green Knight. We will finish by considering the survival of the magical villain in a modern-day fantasy classic like the medievalist J.R.R. Tolkien’s Hobbit, or a volume in his Lord of the Rings trilogy, and in John Gardner’s recasting of the Beowulf-story, Grendel.

Prerequisite: Open to sophomores, juniors, and seniors; also first-year students by permission of instructor.

Distribution: Language and Literature
Semester: Spring
Unit: 1.0

**ME/R 247 Arthurian Legends**

NOT OFFERED IN 2003-04. A survey of legends connected with King Arthur from the sixth century through the fifteenth, with some attention to the new interpretations in the nineteenth and twentieth centuries.

Prerequisite: Open to sophomores, juniors, and seniors; also first-year students by permission of instructor.

Distribution: Language and Literature
Semester: Spring
Unit: 1.0

**ME/R 248 Medieval Women Writers**

Jacoff (Italian)

This course explores a variety of texts by medieval women writers and the contexts in which and against which they were written. These texts raise questions about the role of the female body and about strategies of self-authorization which remain important today. The writers we will consider in depth are Marie de France, Heloise (and Abelard), selected medieval mystics, Margery Kempe, Julian of Norwich, and Christine de Pizan.

Prerequisite: None
Distribution: Language and Literature
Semester: Fall
Unit: 1.0

**ME/R 249 Imagining the Afterlife**

NOT OFFERED IN 2003-04. An exploration of medieval visions and versions of the afterlife in the classical, biblical, Jewish, Islamic, and Christian traditions. We will study material from various Scriptures, popular visions, literary texts, and the visual arts. The focus will be on the implications of ideas about life after death for understanding medieval attitudes toward the body, morality, and life itself.

Prerequisite: None. Preference given to Medieval/Renaissance majors.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

**ME/R 350 Research or Individual Study**

Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**ME/R 360 Senior Thesis Research**

Prerequisite: By permission of the directors of the Medieval/Renaissance Studies program. See Directions for Election and Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

### Middle Eastern Studies

**AN INTERDEPARTMENTAL MAJOR AND MINOR**

**Director:** Marlow (Religion)

**Advisory Committee:** Eiben (Political Science), Geller (Religion), Kapteijns (History), Malino (History and Jewish Studies)

**Instructor:** Aadhani

The major in Middle Eastern Studies is designed to acquaint students with the many facets of Middle Eastern civilization through an interdisciplinary study of the languages, literatures, histories, religions, arts, social and political institutions, and cultural patterns of the Middle East. Study of Middle Eastern communities living in diaspora may also be counted towards the major.

The major in Middle Eastern Studies requires nine (9) units. Students must demonstrate proficiency in Arabic (equivalent to at least two semesters at the second-year level). In certain cases, another Middle Eastern language (for example, Persian, Turkish, Hebrew) may be substituted for Arabic; a student whose area of concentration may render such a substitution appropriate should consult her advisor. No credit towards the major is given for the first year of language study. For students who are exempt from the language requirement, nine units are still necessary for the completion of the major.

Students are required to concentrate in some area or aspect of Middle Eastern Studies (for example, Arabic language and literature; Islam: the medieval Middle East; the modern Middle East: religion and politics in the Middle East) by taking four courses above the 100 level, including at least two at the 300 level, one of which must be a seminar. At least two courses should be taken in each of the departments of History and Religion.

Majors devise their own programs of study in consultation with an appropriate faculty member from the student’s area of concentration. Courses with an asterisk (*) also require the permission of the instructor if the course is to be counted for Middle Eastern Studies.

In addition to Wellesley courses, students are encouraged to take relevant courses at Brandeis University (in the Department of Near Eastern and Judaic Studies), and at MIT. These courses must be approved toward the major, in advance, by the corresponding department at Wellesley.

A minor in Middle Eastern Studies consists of five units, of which at least two should be at the 300 level. Units must be taken in at least two departments; only one course at the 100 level can be counted towards the minor. Second-year Arabic may be counted towards the minor.

The following courses are available in Middle Eastern Studies:

**ARAB 101-102 Elementary Arabic**

Aadhani

An introduction to the Arabic language. The course takes a comprehensive approach to language learning and emphasizes the four skills of listening, speaking, reading, and writing. Students are introduced to the principles of...
grammatically, taught how to read and write in the Arabic alphabet, and trained in the basics of everyday conversation. Through the use of a variety of written, video and audio materials, as well as other resources made available through the World Wide Web, the course emphasizes authentic materials and stresses the active participation of students in the learning process. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: None
Distribution: None
Semester: Fall and Spring  Unit: 1.0

ARAB 201-202 Intermediate Arabic
Aadnani
A continuation of ARAB 101-102. The course takes students to a deeper and more complex level in the study of the Arabic language. While continuing to emphasize the organizing principles of the language, the course also introduces students to a variety of challenging texts, including extracts from newspaper articles, as well as literary and religious materials. Students will be trained to work with longer texts and to gain the necessary communicative skills to prepare them for advanced-level Arabic. Each semester earns 1.0 unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: ARAB 101-102 or equivalent
Distribution: Language and Literature
Semester: Fall and Spring  Unit: 1.0

ARAB 210 Arabic Literature in Translation
Aadnani
NOT OFFERED IN 2003-04. Exploration of some highly influential works of literature translated from Arabic. Students will have a chance to delve into literary works composed by authors from a large geographical area, extending from Morocco to the Middle East, from the turn of the nineteenth century to the present day. Our study of modern and contemporary Arabic literature will focus on a number of recurring themes, such as cultural and national identity, colonialism, religion, gender relations, and class conflict. Authors to be discussed include Naguib Mahfouz, Abdalrahem Munif, Ahdam Mosteghanemi, Leila Abouzeid, Tahir Wattar, Mohammed Zafaraf, and Yusuf Idris.

Prerequisite: None
Distribution: Language and Literature
Semester: N/O  Unit: 1.0

MES 310 Resistance and Dissent in North Africa and the Middle East
Aadnani
An exploration of the emergence and the shaping of a culture of "resistance" in North Africa and the Middle East since the early 1980s. Topics include the rise of democratic movements, such as political parties, associations and NGOs; the role and importance of Islam to the identity of contemporary nation states in the region; the status of women and minorities in the ideologies of the movements under study; and the status and implications of dissent. Materials studied include works of fiction and non-fiction, films, speeches, song lyrics, and online publications. Taught in English.

Prerequisite: Open to students who have taken at least one course in Middle Eastern Studies, and to juniors and seniors by permission of the instructor.
Distribution: Social and Behavioral Analysis or Language and Literature
Semester: Spring  Unit: 1.0

MES 350 Research or Individual Study
Prerequisite: None
Distribution: Open to juniors and seniors only.
Semester: Fall, Spring  Unit: 1.0

MUS 100 Introduction to the Art of Listening

NOT OFFERED IN 2003-04. An introduction to the ways in which we listen to music and the role that it plays in our lives. Fundamental concepts of rhythm, melody, harmony, and timbre are illustrated by examples from many different musical cultures, including the Western European tradition, world music (especially the Americas, China, and India), popular music, rock, jazz, and music performed and/or composed by women. No previous musical training or background is assumed. Two lectures and one listening lab. May not be counted toward the major.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: None
Unit: 1.0

MUS 105 Introduction to World Music

A survey of non-western musical cultures and non-traditional fields, providing a foundation in the methodology and materials of modern ethnomusicology.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 111 Introduction to the Language of Music

Yun
Preparation in the primary elements of music theory and musicianship. Rhythm and pitch perception, reading skills, keyboard familiarity, and correct music notation. Scale and chord construction, transposition, and procedures for harmonizing simple melodies. Phrase structures and simple formal designs. May not be counted toward the major.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 122 Harmonic Concepts in Tonal Music

Brody
Beginning with a comprehensive review of musical terminology and basic materials, Music 122 explores the fundamentals of tonal harmony, voice-leading, phrasing, and form. Topics will include harmonic functions and phrase structure, cadence formation, voice-leading and figured bass, and tonal analysis. Written exercises will be complemented by regular ear-training practice. Music 122 is normally the initial corequisite for Music 199 (lessons for academic credit); Music 220 is an alternate corequisite (for students who exempt 122). Normally followed by 244.

Prerequisite: Open to all students who have completed or exempted Music 111. Students who meet this requirement are advised to take Music 122 or Music 220 in the fall semester.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 199 Performing Music
(for academic credit)

Staff
One 45-minute lesson per week. Students may take an hour-long lesson for an additional fee. A minimum of six hours of practice per week is expected. 199 may be repeated, ordinarily for a maximum of four semesters. One credit is given for a full year of study, which must begin in the first semester. Not to be counted toward the major in Music. For further information, including fees, see Performing Music: Private Instruction and Academic Credit. See also Music 99, 299, and 344. Except by special permission, no credit will be given unless both semesters are completed satisfactorily.

Prerequisite: Corequisite: A Basic Skills Placement Test is mandatory for all students wishing to enroll in 199. Open by audition to students who have been placed in Music 122 or Music 220, or who are taking Music 111 as a remedial course. 122 or 220 must normally be completed during the first semester of 199. Students who must take Music 111 as a remedial course during the first semester of 199 must also complete Music 122 during the second semester of the first year. Students pursuing jazz performance in 199 may elect 122, 220, Music 209/African 224 or Music 233/African 233 as a corequisite. Completion of an additional music course is required before credit is given for each subsequent year of 199. Students should consult the department website for details regarding the entrance audition for 199.

Semester: Fall and Spring
Unit: 1.0

MUS 200 History of Western Music I

Fontijn-Harris
The first half of a year-long comprehensive survey of Western music history. Music 200 considers significant forms and styles of earlier eras, from the liturgical and vernacular repertories of the Middle Ages to the mid-eighteenth century. The course offers a strong historical component and also encourages the development of analytical skills. As we examine compositions in many genres, we will pursue numerous avenues of inquiry, including close readings of verbal texts, evaluation of formal structures, harmonic analysis, assessment of melodic and rhythmic features, and investigation of the broader circumstances that surround and inform musical creation.

Prerequisite: 244 or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 201 History of Western Music II

Fisk
A continuation of the survey of Western music history begun in 200. Music 201 examines the pre-Classical, Classical, and Romantic periods, as well as the music of the past one hundred years. The course places special emphasis on the acquisition of analytical skills, and students are encouraged to develop and present interpretive hypotheses in written essays. Students may enroll in Music 201 without having taken Music 200.

Prerequisite: 244 or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 209/AFR 224 A History of Jazz

Pamella
This course offers a listener’s introduction to jazz, one of the greatest expressions of American artistic genius. Early jazz drew from several vibrant streams of indigenous musical art (including ragtime and blues), and subsequent stylistic phases have corresponded closely to significant developments in social history; knowledge of jazz is thus highly relevant to an understanding of American culture since 1900. Through a selection of recordings and readings, we will follow the progression of jazz styles from African roots to recent developments. A fundamental goal of the course is that students learn to listen to music critically: to discern and interpret form, texture, style, and expressive content in jazz of all periods. Students may register for either MUS 209 or AFR 224. Credit will be given in the department in which the student is registered.

Prerequisite: None. Not open to students who have taken MUS 233/AFR 233
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: Fall
Unit: 1.0

123 Music
MUS 210/AFR 210 Folk and Ritual Music of the Caribbean

Efulwuni

NOT OFFERED IN 2003-04. An appreciative evaluation, discussion, and analysis of the folk and ritual music of the Caribbean. The course will survey the musical components of a variety of Afro-Caribbean religions, including Kuminia, Rustafari, Shango, Candomble, Marumba, Umbanda, Winti, Vodou, Santeria, Lucumi, and Quimboiseur. Through recordings and documentary films, students will explore a variety of musical and cultural aesthetics. Issues surrounding the phenomenon of African retentions in the Americas will also be examined. Students may register for either MUS 210 or AFR 210. Credit will be given in the department in which the student is registered.

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

MUS 213 Twentieth-Century Techniques

Brody

Studies in the language and style of twentieth-century concert music, through analysis of shorter representative compositions by major composers. Brief exercises in composition are designed to familiarize students with a variety of structural approaches. 213 and 313 will meet together.

Prerequisite: 122, 220, or permission of the instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 214 Experiencing the Music, Dance, and Culture of Haiti

Efulwuni

NOT OFFERED IN 2003-04. Students will study the music, dance, and culture of Haiti on location by participating in lectures, discussions, and site visits in Port-au-Prince, Gonaives, Jacmel, Lascabobes, Saut d’Eau, Belladere, and Mirabelais, where the “Léocardie & Alexandre Kenfso Cultural Center” is located. While living at the Center, students will have the opportunity to work with master drummers and choreographers of Haiti’s folk and ritual traditions.

Finally, through a process of total immersion which combines work and learning, the students will explore the life and lore of Haiti’s countryside. Not offered every year. Subject to Dean’s Office approval.

Prerequisite: Open to all students by application process and permission of the instructor. Enrollment is limited to 15 students. Background in music, dance, or Caribbean studies is recommended, and knowledge of French or Creole is advantageous but not required. Application required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 0.5

MUS 216 Music of East Asia: China, Korea, and Japan

Yun

An introduction to the musical cultures of China, Korea, and Japan. While these nations share many of the same instruments, each has developed indigenous musical styles, variously shaped by cultural, religious, philosophical, and political forces. Through readings, recordings, videos, and performances by guest artists, we will explore the representative genres of each area, including Buddhist chants, Chinese folk songs and instrumental music. Peking Opera, Korean court music (akak) and folk traditions (sanjo, sunori, pansori), as well as Japanese and the theatrical genres of noh, kabuki, and bunraku (puppet theater).

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring, Summer
Unit: 1.0

MUS 220 Theory, Analysis, and Performance: Zallino

This course is appropriate for students who already have a solid background in basic theory, and also possess advanced performing skills. The principal goal of the course will be to encourage an understanding of practical analytical methods and their value to musical performance. Also included will be in-depth studies of tonal melody and rhythm and their relationship to functional harmony. All of the music studied will be taken from the standard tonal repertory. Written exercises will be complemented by regular ear-training practice. Music 220 is intended for students who have already completed Music 122, and may serve as the initial corequisite for Music 199, as well as a prerequisite for Music 244.

Prerequisite: Open to students who have completed Music 122.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 222/322 Women in Music

Fontijn-Harris

NOT OFFERED IN 2003-04. An introduction to the history of works composed by women, and to feminist music criticism and analysis. The course addresses issues surrounding women as composers, performers, and patrons as well as notions of gender, ethnicity, and sexual identity. While both levels stress socio-cultural critique and feminist theory, Music 322 also emphasizes analysis and listening skills. Students may register for either MUS 224/REL 224. Credit will be given in the department in which the student is registered.

Prerequisite: 222: open to all students; 322: 200 or 201 required.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

MUS 224/REL 224 Hildegard of Bingen

Elkins (Religion), Fontijn-Harris

This interdisciplinary seminar will focus on the music, dramatic productions, vision literature, and theology of the renowned twelfth-century abbess Hildegard of Bingen. Attention will also be given to her scientific work on medicine, the manuscript illuminations of her visions, and the productions of her music today.

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video, Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

MUS 225/325/AFR 232/332 Topics in Ethnomusicology: Africa and the Caribbean

NOT OFFERED IN 2003-04. This course will focus on the traditional, folk, and popular musics of Africa and the Caribbean. Emphasis will be placed on issues of Africanism and marginal retention in the musics of Brazil, Cuba, and Haiti. The musical repertoires of Candomble, Santeria, and Vodun, as well as the samba, rumba, and merengue, will be discussed in terms of their respective influences on the modern musics of Africa. The musical “round trip” between Africa and the Caribbean, whereby genres like the rumba spawned new forms including the juju of Nigeria, the soukous of Zaire, and the highlife of Ghana, will be closely examined.

Students may register for either MUS 225/325 or AFR 232/332. Credit will be given in the department in which the student is registered.

Prerequisite: 100, 111, 122, or permission of the instructor.
In addition, for MUS 325 or AFR 332, MUS 200 or MUS 201 is required.
Distribution: Arts, Music, Theatre, Film, Video or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

MUS 230 Opera: Its History, Music, and Drama

Fontijn

This course offers a comprehensive chronological survey of the history and evolution of opera, from 1600 to the present time. Lectures will examine historical background, the sub-genres of operatic literature (opera seria, opera buffa, music drama), and operas by representative composers (including Monteverdi, Mozart, Verdi, and Alban Berg). Major works from the operatic repertory will be considered in depth, and we will study librettos, music, relevant novels, and bibliography in order to make connections between musical structure and dramatic expression. Two class meetings, with additional sessions required for viewing operas in their entirety.

Prerequisite: None.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 233/AFR 233 Three Jazz Masters

Panetta

Edward Kennedy “Duke” Ellington (1899-1974), Miles Davis (1926-1991), and John Coltrane (1926-1967) were among the most significant figures in twentieth-century American music. All three were masterful composers, improvisers, and ensemble leaders, and their highly influential accomplishments greatly expanded the scope of African-American creativity. Through readings, historical film excerpts, and intensive listening, we will survey the careers of these artists and assess their recorded works, which combine musical innovation, social relevance, profound feeling, and substantial intellectual content. This course assumes some musical background. Students may register for either MUS 233 or AFR 233. Credit will be given in the department in which the student is registered.

Prerequisite: None. Not open to students who have taken MUS 209/AFR 224.
Distribution: Arts, Music, Theatre, Film, Video or Historical Studies
Semester: Spring
Unit: 1.0

MUS 235/335 Music in Historical/Critical Context

NOT OFFERED IN 2003-2004.

Prerequisite for 235: None. Prerequisites for 335: 201, 244.
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0
MUS 240 Opera Workshop
Matthews
This course is appropriate for singers currently enrolled in voice lessons who wish to gain expertise in dramatic musical performance—that is, the techniques that aid singing actors in the presentation of operatic repertory. All students will receive extensive musical and dramatic coaching, and will have the opportunity to perform a scene or aria in an informal presentation at the end of Winter Session. Emphasis will be placed on learning how to research a role, action appropriate to musical style, character development, and the interaction of text, music, and movement. The class meets daily, and students are expected to study and rehearse individually and with other participants outside of class hours. Not offered every year. Subject to Dean's Office approval.
Prerequisite: Music 199 in voice with permission of 199 instructor.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Winter Session
Unit: 0.5

MUS 244 Tonal Counterpoint and Harmony
Hulse, Zallman
A continuation of Music 122 or Music 220. A thorough grounding in species counterpoint, and in tonal cadence structures and their relationship to functional harmony. Written exercises in two and three voices, chorale, and keyboard-style harmony will be complemented by a keyboard lab offering practice in playing figured bass and basic harmonic progressions.
Prerequisite: Music 122 or Music 220.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 250 Research or Individual Study
Prerequisite: Open to qualified students by permission.

Unit: 1.0

MUS 250H Performing Ensembles for Credit
Music 250H is open to qualified students by permission of the individual ensemble director. One-half unit of credit is granted for a full year (two consecutive semesters) of participation in any one of the following department-sponsored ensembles — Group A: Orchestra, Choir, Collegium Musicum, Chamber Music Society; Group B: Yanvalou, Prism Jazz, Body and Soul. A maximum of two units of credit toward the degree can be accumulated through 250H. Of the 32 units required for graduation, no more than four units in performing music may be counted toward the degree; thus students taking music lessons for credit during all four years at Wellesley cannot also receive degree credit via Music 250H. No credit will be given for this course unless both semesters are completed satisfactorily.
Music 250H is graded on a credit/no basis.
Prerequisite/Corequisites: The mandatory corequisite for 250H is one academic course (one unit) taken either before 250H or during either semester of the first year of 250H. Corequisites for Group A: Music 100, 111 (or any other music course if Music 111 has been exempted). Corequisites for Group B: Any course chosen from Music 100, 105, 111, 122, 209, 210, 220, 225/325, 233.
Distribution: None
Semester: Fall and Spring
Unit: 0.5

MUS 275 Computer Music: Synthesis Techniques and Compositional Practice
Brody
An overview of the fundamental concepts, techniques, and literature of electronic and computer music. Topics include the technology of acoustic and digital musical instruments, MIDI programming, sound synthesis techniques (frequency modulation, sampling, linear synthesis, waveshaping, etc.), and the history of electronic music. Students will undertake brief compositional exercises, and learn basic programming and related technical skills.
Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 299 Performing Music (advanced, with academic credit)
Staff
A one-hour private lesson per week. Students who have completed at least one year of Music 199 are eligible for promotion to 299. A student wishing to enroll in Music 299 is expected to demonstrate accomplishment distinctly beyond that of the Music 199 student. Students are recommended for promotion by their instructors, and must have received a grade not lower than B+ in the most recent unit of 199. A minimum of ten hours of practice per week is expected.
Music 299 may be repeated without limit. One 200- or 300-level music course must be completed for each unit of credit granted for Music 299. A music course already used to fulfill the requirement for Music 199 may not be counted again for 299. One unit of credit is given for a full year of study. Not to be counted toward the major in music. For further information, including fees, see Performing Music: Private Instruction and Academic Credit. See also Music 99, 199, and 344. Except by special permission, no credit will be given for this course unless both semesters are completed satisfactorily.
Prerequisite: Music 199 and recommendation of instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall and Spring
Unit: 1.0

MUS 300 Major Seminar, Studies in History, Theory, Analysis, Special Topics
Offered in both semesters with two topics each semester; students may select any number or combination of the four topics offered each year. Open to music majors, minors, and other students with appropriate prerequisites.
Topic A: Black Composers in the Western European Tradition
Fleuring
An ethnomusicological study of the music of black composers working in the classical tradition, focusing on the compositions of Scott Joplin, William Grant Still, Clarence Cameron White, Justin Elie, Robert Nathaniel Dett, Julia Perry, and Ondine Smith. Students will explore the socio-cultural contexts that surrounded these composers, and will examine such major works as Joplin's Treemonisha, Still's Afro-American Symphony, and White's Waanga—compositions that are seldom included in contemporary concert programs.
Prerequisite: 200-201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 0.5

Topic B: Sergei Rachmaninoff: Composer and Virtuoso
Fisk
Despite its great popularity—or perhaps on account of it—the music of Rachmaninoff has received little sustained scholarly or critical attention. Indeed, many serious musicians have professed indifference, even hostility, toward its seemingly anachronistic and overtly romantic character. On the other hand, few have begrudged Rachmaninoff his extraordinary renown as a pianist. This course will consider both his development as a composer—of music that could have been composed only in the twentieth century—and his pianistic artistry, as represented in the many recordings of his performances still available today.
Prerequisite: 200-201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 0.5

Topic C: Benjamin Britten: The Voice of a Century
Zallman
Not since Purcell has anyone composed, to English texts, a corpus of operas, songs, and symphonic vocal works as impressive as Britten's, whose works whose melodies are motivated by the particular accents and rhythms of English prose and poetry. Britten's life spanned the period between the appearances of two great twentieth-century song symphonies—Mahler's Das Lied von der Erde (1907) and Shostakovich's Fourteenth Symphony (1970)—and his vocal music forges a distinctive link between these two composers, with whom he shared a fundamental lyrical, repertory to be explored will include the War Requiem and Symphony, the operas Death in Venice and The Turn of the Screw, and the "Noh" plays on biblical texts. Curlew River and The Burning Fiery Furnace. Also to be studied in particular detail are two song cycles: the Nocturne for tenor voice and chamber orchestra, and the late cycle for voice and piano, Who are these Children?
Prerequisite: 244 and 200, 201, or 313
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 0.5

Topic D: Treasures of Seicento Venice
Foujins-Harris
In such public venues as the basilica of San Marco and the opera house of San Cassiano, the great maritime republic of Venice reigned its inhabitants with splendid music-making during the seventeenth century. More intimate spaces in the city, such as the gatherings of Strozzi's Academy of the Incogniti or the Pietà orphanage, produced first-rate music on a smaller scale. This course will begin with the study and analysis of polyphral sacred works (Gabrieli's In ecclesiis, Monteverdi's Vespers, Cavalli's Missa consistente), consider Cavalli's early operatic repertory, and conclude with the cantatas of Cavalli's students, singer-composers Barbara Strozzi and Antonia Bembo.
Prerequisite: 200-201 and 244, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 0.5
MUS 308 Conducting
NOT OFFERED IN 2003-04. Techniques of score preparation, score reading, baton technique, and rehearsal methods. The course will stress the development of aural and interpretive skills through class exercises, rehearsals, demonstrations of instruments, individual tutorials, and individual projects designed according to each student's level and interests.
Prerequisite: Any one of 200, 201, 220, or 315 (which may be taken concurrently), or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: N/O
Unit: 1.0

MUS 313 Twentieth-Century Analysis and Composition
Brady
A study of compositional devices of twentieth-century music through the analysis of selected short examples from the literature. Music 213 and 313 will meet together; however, Music 313 will focus on the composition of complete pieces in addition to other regular class assignments.
Prerequisite: 122, 220, or permission of the instructor
Distribution: Arts, Music, Theatre, Film, Video
Semester: Spring
Unit: 1.0

MUS 315 Advanced Harmony
Zalbian
Follows Music 244. Study of advanced tonal techniques including mode mixture, techniques of variation and development including harmonic sequences, modulation by chromatic harmony, and prolongation. Also includes an introduction to basic Schenkerian terminology and modes of analysis.
Prerequisite: 244 plus any of the following: 313, 201
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall
Unit: 1.0

MUS 344 Performing Music: A Special Program
Triple Helix Ensemble
Intensive study of advanced interpretation and performance, as an adjunct to lessons at the 299 level with a member of the Wellesley College performance faculty. The program offers students an opportunity to perform frequently in an informal setting before fellow students and faculty, to discuss repertoire and interpretation, and to receive constructive comment. This is the only credit course in performance that can be counted toward the music major.
Corequisite: If a student has not taken 200 and 201, these courses must be completed during the first year of 344. Once this requirement has been fulfilled (either before or during the initial year of 344), students must enroll in one further unit of 200- or 300-level work for each additional year (two semester units) of 344. Permission to enroll for the first unit of 344 is granted only after the student has successfully auditioned for the department faculty upon the written recommendation of her instructor in performing music; this audition ordinarily takes place in the second semester of the sophomore or junior year. Permission to elect subsequent units is granted only to a student whose progress in 344 is judged excellent.
Distribution: Arts, Music, Theatre, Film, Video
Semester: Fall, Spring
Unit: 1.0

MUS 350 Research or Individual Study
Directed study in analysis, composition, orchestration, theory, ethnomusicology, or the history of music.
Prerequisite: Open to qualified juniors and seniors by permission
Distribution: None
Semester: Fall, Spring
Unit: 1.0

MUS 350H Research or Individual Study

MUS 360 Senior Thesis Research
Prerequisite: By permission of the department. See Directions for Election and Academic Distinctions.
Distribution: None
Semester: Fall, Spring
Unit: 1.0

MUS 370 Senior Thesis
Prerequisite: 360
Distribution: None
Semester: Fall, Spring
Unit: 1.0

Directions for Election
The music major is a program of at least ten units. The normal sequence of courses for the major is: 122 or 220, 244, and 315 (theory and harmony); 200-201 (history and analysis); and a total of twenty hours of 300-level courses (offered in four autonomous modular units per year, from which students may select any combination). Also required are three additional elected units of 200- or 300-level work. The study of composition (Music 213/313) is highly recommended for majors.

The music minor is a program of at least five units. It consists of 122 or 220, 244, 200-201 or one of these plus another history or literature course, and one additional unit of 300-level work.

Students interested in majoring or minoring in music are strongly encouraged to begin the theory sequence with Music 122 or Music 220 in the fall semester of the first year. This allows them to enroll in the spring-term offering of Music 244, which is the prerequisite for Music 200 and the courses that follow sequentially. Starting on this sequence immediately affords the option of taking a wider variety of electives in music courses in the junior and senior years, and also makes it easier for those spending the junior year abroad to complete the major comfortably. Students who plan to undertake graduate study in western music history or theory are advised that knowledge of both German and French (beyond the introductory level) is essential, and proficiency in Italian highly desirable. Also of value are studies in European history, literature, and art.

Music majors are especially encouraged to develop musicianship through the acquisition of basic keyboard skills, and through ear training, private instruction in practical music, and involvement in the Music Department's various performing organizations.

Group instruction in basic keyboard skills, including keyboard harmony, sight reading, ear training and score reading, is provided free to all students enrolled in any music course (including Music 100 with the instructor's permission and if space is available), and to Music 99 students with the written recommendation of their private instructor. Ensemble sight reading instruction on a more advanced level is also available for pianists.

The department offers a choice of three programs for Honors, all under the catalog numbers 360/370; honors students normally elect the two units in succession during the senior year. Under Program I, the honors candidate carries out independent research leading to a written thesis and an oral examination. Under Program II, honors in composition, the 360 and 370 units culminate in a composition of substance and an oral examination on the honors work.

Prerequisites for this program are Music 315 and distinguished work in Music 313. Program III, honors in performance, culminates in a recital, a lecture-demonstration, and an essay on some aspect of performance. The prerequisite for Program III is Music 344 in the junior year and evidence during that year, through public performance, of exceptional talent and accomplishment; 344 must then be continued in the senior year.

Performing Music

Instrument Collection
The Music Department owns 40 pianos (which include 28 Steinway grands, two Mason and Hamlin grands, and five Steinway uprights), a Fisk practice organ, a harp, a marimba, a jazz drum kit, and a wide assortment of modern orchestral instruments. In addition, an unusually fine collection of instruments appropriate to early music performance is available for use by students. These include a Dolmetsch clavichord, a virginal, two harpsichords, a positive organ, a fortepiano, an 1826 Clementi piano, eight violas da gamba, a Baroque violin, and an assortment of Renaissance and Baroque wind instruments.

Of particular interest is the Charles Fisk mean-tone organ (completed 1981) in Houghton Memorial Chapel, which is America's first major instrument constructed after seventeenth-century German prototypes. The chapel also houses a three-manual Aeolian-Skinner pipe organ. Galen Stone Tower contains a 32-bell carillon.

Performance Workshop (Music 344)
The performance workshop is directed by a member of the performing music faculty. It offers students an opportunity to perform frequently in an informal setting before fellow students and faculty, to discuss repertoire and interpretation, and to receive constructive comments.

Private Instruction
The Music Department offers private instruction in voice, piano, fortepiano, organ, harpsichord, harp, violin, Baroque violin, fiddle, viola, violoncello, double bass, viola da gamba, flute (Baroque and modern), oboe, clarinet, bassoon, trumpet, French horn, trombone, tuba, recorder, lute, classical guitar, saxophone, and marimba; and private jazz instruction in piano, violin, bass, saxophone, flute, percussion, and voice.
All students planning to enroll for music lessons must take the Basic Skills Placement Test. Information concerning auditions and course requirements for noncredit and credit study is given above under listings for Music 199, 299, and 344. Except for Music 344, auditions and the Basic Skills Placement Test are ordinarily given at the start of the first semester.

There is no charge for performing music to students enrolled in Music 199, 299, or 344 who: 1) have demonstrated financial need as determined by the Wellesley College Financial Aid Office; 2) are receiving financial aid from Wellesley College; and 3) are taking the normal length of lesson. All other Music 199 and 299 students are charged $884, the rate for one half-hour lesson per week throughout the year. Students who contract for performing music instruction under Music 99 are charged $884 for one half-hour lesson per week through both semesters, and may register for 45-minute or hour lessons for an additional charge. A fee of $35 per year is charged to performing music students for the use of a practice studio. The fee for the use of a practice studio for fortepiano, harpsichord, and organ is $45.

Music lessons at Wellesley involve a full-year commitment: lesson contracts are binding for the entire school year. Performing music fees are payable by September 30; no refunds will be made thereafter.

For purposes of placement, a Basic Skills Placement Test is given before classes start in the fall semester. All students registered for 111, 122, 220, or private instruction in Music 99 or 199 are required to take the examination.

Arrangements for lessons are made at the Music Department Office during Orientation of the first week of the semester. Students may begin private study in Music 99 (but not Music 199 or 299) at the start of the second semester, if space permits.

**Academic Credit and Corequisites for Music 199 and 299**

Credit for performing music at the 199 and 299 levels is granted only for study with the department’s performance faculty, not with outside instructors; the final decision for acceptance is based on the student’s audition. One unit of credit is granted for a full year (two semesters) of study in either Music 199 or 299; except by special permission, both semesters must be satisfactorily completed before credit can be counted toward the degree. Of the 32 units for graduation, a maximum of four units of performing music may be counted toward the degree. More than one course in performing music for credit can be taken simultaneously only by special permission of the department.

Music 122 is normally taken along with the first semester of lessons for credit; Music 220 is an alternate, and can substitute for 122 in the major/minor sequence. Students pursuing jazz performance in 199 may elect 122, 220, Music 209/Africana 224 or Music 233/Africana 233 as a corequisite. An additional music course must be elected as a corequisite for each unit of credit after the first year.

The Music Department’s 199 and 299 offerings are made possible by the Estate of Elsa Graefe Whitney, Class of 1918.

**Group Instruction**

Group instruction in classical guitar, percussion, violin consort, and recorder is available for a fee of $250 per year.

**Performing Organizations**

The following organizations, all directed by faculty members, are vital extensions of the Wellesley Music Department’s academic program:

- **The Wellesley College Choir**
- **The Wellesley College Glee Club**
- **The Wellesley College Chamber Singers**
- **The Collegium Musicum**
- **The Wellesley-Brandeis Orchestra**
- **The Chamber Music Society**
- **Prism Jazz**
- **Body and Soul**
- **Fiddleheads**
- **Yanvalou Drumming and Dance Ensemble**

**The Chamber Music Society**

The Chamber Music Society offers an opportunity for small ensembles to explore the chamber music repertoire of the last three centuries. A number of groups, which include singers and players of strings, winds, and keyboards, rehearse independently and also meet weekly with a faculty coach at no cost. Throughout the year, players present formal and informal recitals. Entrance is by audition.

**Prism Jazz**

Prism Jazz is a faculty-directed jazz ensemble of eight to ten students. Rehearsals encourage the development of fluency in jazz improvisation; previous jazz experience is not required. The ensemble performs several times each year, and presents joint concerts with ensembles from Wellesley and other area colleges. Workshops on jazz improvisation with visiting guest artists are also offered. Auditions are held at the beginning of each year.

**Body and Soul**

Body and Soul is a faculty-directed vocal jazz ensemble of six to eight singers that performs several times each academic year. The ensemble focuses on developing improvisational skills through individual and group repertoire; previous jazz experience is not required. Auditions are held at the beginning of each year.

**Fiddleheads**

This group studies and performs the fiddle tunes and styles of Scotland, Ireland, Cape Breton, Quebec, and New England. The class is taught entirely by ear, and all instruments are welcome. No prior experience playing in a traditional style is necessary.

**Yanvalou Drumming and Dance Ensemble**

Yanvalou, an ensemble that explores the traditional musics of Africa and the Caribbean, offers participants the opportunity to perform with authentic instruments, and to experience a variety of cultures through their music. In collaboration with their dance troupe, Yanvalou presents several concerts during each academic year.
Neuroscience

AN INTERDEPARTMENTAL MAJOR

Director: Beltz (Biological Sciences)
Neuroscience Advisory Committee: Berger-Swency (Biological Sciences), Duca (Physics), Goldman (Physics), Hicks (Chemistry), Hildreth (Computer Science), and Keene (Psychology).

The Departments of Biological Sciences, Chemistry, Physics, and Psychology offer an interdepartmental major in Neuroscience that provides interdisciplinary study of the nervous system and biological and chemical mechanisms underlying behavior.

A major in Neuroscience must include the following core courses: Biological Sciences 110, 111, and 213; Chemistry 105 and 205 (or 120), and 211; Psychology 205, which should be completed by the end of the junior year. Majors must elect two 200-level courses: one of the following Biological Sciences 219, 220, Chemistry 221, 222, and one of the following Psychology 214, 215, 216, 217. To be eligible for the Thesis program, students should have completed all of the above by the end of the junior year. Additionally, majors must elect two 300-level courses, at least one of which must be a laboratory course. Acceptable 300-level courses are Biological Sciences 302, 306, 315, 332; Psychology 316, 318, 319; CLSC 300. Any other 300-level courses must be specifically approved by the Director. A minimum of 6 courses (a minimum of 6.75 units) towards the major requirements must be taken at Wellesley.

Honors projects may be supervised by members of the various departments associated with the major, in accordance with the requirements of the host department. Students are advised to check with the chair of the host department early in their junior year to clarify details of the honors program.

Students wishing to attend graduate school in Neuroscience also should take Chemistry 313 and a course in Physics.

Peace and Justice Studies

A STRUCTURED INDIVIDUAL MAJOR

Co-Directors: Merry, Murphy (spring), Rosenwald (fall)
Co-Director for Experiential Education: Kazanjian

Peace and Justice Studies Advisory Board: Agosin (Spanish), Cashman (Sociology), Dr. Warren (Philosophy), Genero (Psychology), Kapcicas (History), Kazanjian (Religious and Spiritual Life), Merry (Anthropology), Murphy (Political Science), Rosenwald (English), Velenchik (Economics), Wasserspring (Political Science)

The Peace and Justice Studies program provides a program of study which integrates the many areas of intellectual inquiry relating to the historical and contemporary search for a peaceful and just society and world.

A major (eight units) in Peace and Justice Studies should be designed in consultation with the program directors. Majors must elect a concentration of at least four units above 100 level. Concentrations will normally be in one department, but may be constructed across departments. In either case, the major must demonstrate the intellectual coherence of the concentration. The major must include two 300-level courses. The major consists of:

1. Two required courses:
   PEAC 104 Introduction to the Study of Conflict, Justice, and Peace
   PEAC 259 Peace and Conflict Resolution

2. Six courses through which students are expected to develop proficiency in two areas:
   a) the social, political, historical, and cultural factors that lead to conflict, violence, and injustice.
   b) the various strategies and techniques of peacemaking and justice-seeking at the level of nation states, social groups and communities within nation states, and interpersonal and individual relationships.

Students are expected to develop expertise in a particular international, national, regional, or local conflict situation.

3. Students majoring in Peace and Justice Studies are usually expected to include an experiential education component in their course of study. This component should be discussed with the program directors and may include: Wintersession, summer or year-long internships, course-related experiential education programs, or community service projects.

PEAC 259 Peace and Conflict Resolution
Merry (Anthropology)

Topic for 2003-04: Gender, Security and Human Rights. This is a research seminar designed to provide advanced students an opportunity to hear from scholars working in the field of peace, security, and human rights and to develop their own research projects. The course will focus on questions of peacemaking and security, gender perspectives on security issues, and forms of conflict resolution. It will also explore women's human rights, trafficking, rape during armed conflicts, cultural practices in the family harmful to women, transitional justice, and approaches to reconciliation after conflict. Students are expected to do an independent research project in conjunction with the course.

Prerequisite: PEAC 104 and one course in ANTH, SOC, POL, HIST, or WOST or by permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PEAC 224/324 Grassroots Development, Conflict Resolution, and the Gandhian Legacy in India
Kazanjian (Religious and Spiritual Life), Murphy (Political Science) and Rosenwald (English)
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. This three- and a half week wintersession course in India focuses on understanding the historical development of the Gandhian philosophy of nonviolence and how Gandhian strategies have been adapted by grassroots community-based organizations to address the challenges facing India and the world today. The course involves both experiential and classroom learning. During this course we will meet with women's organizations, peace organizations, environmental action groups and community health activists in rural and urban communities in the North of India. In addition we will take part in a seminar series on intercultural and interreligious conflict resolution at the Malviya Centre for Peace Research at Banaras Hindu University. This course may be taken as either 224 or, with additional assignments, 324. Not offered every year. Subject to Dean's Office approval.
Prerequisite: Two 200-level courses in related fields. Application required.
Distribution: Social and Behavioral Analysis
Semester: N/O. Offered in 2004-05.
Unit: TBD

Department of Philosophy
Professor: Chaplin (Chair), Congleton, Menkiti, Piper*, Winkler
Associate Professor: McIntyre
Assistant Professor: McGowan, de Warren
Visiting Instructor: Einheuser

PHIL 103 Self and World: Introduction to Metaphysics and Epistemology
McGowan (Fall), McIntyre (Spring)
This course introduces basic philosophical methods and concepts by exploring a variety of approaches to some central philosophical problems. Topics covered include the existence of God, skepticism and certainty, the relation between mind and body, the compatibility of free will and causal determination, the nature of personal identity, and the notion of objectivity in science and ethics. Readings are drawn from historical and contemporary texts. Discussions and assignments encourage the development of the student's own critical perspective on the problems discussed.

PHIL 106 Introduction to Moral Philosophy
McIntyre, Staff (Fall), Piper (Spring)
A study of central issues in moral philosophy from ancient Greece to the present day. Topics include the nature of morality, conceptions of justice, views of human nature and their bearing on questions of value, and competing tests of right and wrong.

PHIL 201 Ancient Greek Philosophy
Congleton
An introduction to philosophy through study of the dialogues of Plato and the treatises of Aristotle. Emphasis will be on topics in Plato and Aristotle that are especially important today, such as the foundations of "stereotyping," whether scientific and ethical reasoning are fundamentally the same or different, whether there are rational emotions, whether women and men are or are not essentially different, and what role political rhetoric plays in a democracy.

PHIL 202/AFR 202 African Philosophy
Menkiti
Initiation into basic African philosophical concepts and principles. The first part of the course deals with a systematic interpretation of such questions as the Bantu African philosophical concept of Muntu and related beliefs, as well as Bantu ontology, metaphysics, and ethics. The second part centers on the relationship between philosophy and ideologies and its implications in Black African social, political, religious, and economic institutions. The approach will be
PHIL 203 Philosophy of Art
*de Warren*
**NOT OFFERED IN 2003-04, OFFERED IN 2004-05.** What makes an object an art object? How does art reflect on the human condition? Why is there art rather than not, expression rather than silence, a gesture rather than stillness? A philosophical approach to art is primarily interested in clarifying the problem of aesthetic value, the special activities that produce art, and the claim to truth which finds expression through artistic creation. The aim of this course is to explore these questions, among others, by examining the positions of major philosophers and twentieth-century artists.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring 2004-05
Unit: 1.0

PHIL 204 Philosophy and Literature
*Menkin*
This course considers the questions: what sort of object is the literary text and what are the ontological issues raised by acts of literary interpretation? It also examines the complex relationship between fiction and fact, and between fiction and morality. The treatment of commitment to self and others, of self-knowledge and self-identity, and of individual and social ideals will also be explored. We end the course by looking at poetry — how it has meaning despite an inbuilt element of ambiguity and how it succeeds not only in shaping, but also healing the world.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring 2004-05
Unit: 1.0

PHIL 206 Normative Ethics
*Chaplin*
Can philosophers help us to think about moral issues, such as what to do about poverty and hunger, or racism and sexism; what is the good life and how do we know that it is good? We shall look at the attempts of some contemporary philosophers to provide answers, or at least guides to finding answers, to these or similar questions. We shall compare and contrast several approaches to evaluating an action: placing major weight on its consequences, or on whether it conforms to a moral rule, or whether it is the sort of thing a virtuous person would do.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall 2004-05
Unit: 1.0

PHIL 207 Philosophy of Language
*McGowan*
This course will explore a variety of philosophical issues concerning language: the different ways in which spoken language functions and conveys information, the alleged difference between speech and action and how it relates to freedom of speech issues (e.g., pornography and hate speech), the general problem of how words get attached to their referents, and criticisms of traditional conceptions of meaning and reference.
Prerequisite: Open to first-year students who have taken one course in philosophy, and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition
Semester: Fall 2004-05
Unit: 1.0

PHIL 209 Scientific Reasoning
*Einheuser*
This is a reasoning course that emphasizes the practical importance of critical thinking. Topics covered will include the basic forms of scientific inference, the basics of probability, issues of data collection, the difference between correlation and causation, and the theoretical and practical difficulties associated with establishing causal claims. Students will also gain an appreciation of the political and ethical importance of critical thinking by evaluating cases of sexist and racist science.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement.
Distribution: Epistemology and Cognition. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Fall, Spring 2004-05
Unit: 1.0

PHIL 210 Philosophy of Business
*Congleton*
This course will consider whether business today can be said to involve characteristic notions, practices, theories and/or debates as do other professional fields such as engineering, medicine or law. Focus will be on the United States, and possibilities will be considered both in terms of their historical emergence and of their possible meanings today. Examples of views to be examined include the claim of Alan Durning and others that U.S. business has generated a "consumerist" society and the claim of Bhikhu Parekh that the relationship of U.S. business to "globalization" involves "individualism" in a way that is not required for "democracy."
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring 2004-05
Unit: 1.0

PHIL 211 Philosophy of Religion
*Winkler*
**NOT OFFERED IN 2003-04, OFFERED IN 2004-05.** A philosophical examination of the nature and significance of religious belief and religious life. Topics include the nature of faith, the role of reason in religion, the ethical import of religious belief, and tolerance and religious diversity.
Prerequisite: None
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: N/O. Offered in 2004-05.
Unit: 1.0

PHIL 213 Social and Political Philosophy
*Chaplin*
Human rights are supposed to be rights claimed by virtue of simply being human, and, as such, they are said to exist universally. However, despite the unanimous adoption of the Universal Declaration of Human Rights by the United Nations, there is now a global conversation about the importance of civil and economic rights, the right of Western society to impose its conception of human rights on other societies, and the rights of minorities. Beginning with the eighteenth century and extending into the contemporary debate, this course will discuss the nature, justification, and extent of human rights.
Prerequisite: Open to first-year students who have taken one course in philosophy, and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: Spring 2004-05
Unit: 1.0

PHIL 214 Metaethics
*Piper*
**NOT OFFERED IN 2003-04.** How do we decide which moral theory to accept? Moral philosophers try to convince us through rational argument that their theories are objectively the right ones. We will examine four such attempts — Brandt's, Nagel's, Gewirth's, and Rawls' — and evaluate their justificatory successes and failures.
Prerequisite: 108 or another course in ethical theory.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 215 Philosophy of Mind
*McIntyre*
How are thoughts and sensations related to neurological processes? Could mental states be identical to brain states? What is free will? Could we have free will if we live in a deterministic universe? After examining a variety of answers to these traditional questions in the philosophy of mind, we will expand our inquiry to include recent work in philosophy and cognitive science that examines the nature of consciousness, animal intelligence, and the role of emotion in thought and action.
Prerequisite: One course in philosophy, psychology, or cognitive science or permission of instructor.
Distribution: Epistemology and Cognition
Semester: Fall 2004-05
Unit: 1.0

PHIL 216 Logic
*Winkler (Fall), Einheuser (Spring)*
An introduction to formal logic. Students will learn a variety of formal methods — methods sensitive only to the form of the arguments, as opposed to their content — to determine whether the conclusions of the arguments follow from their premises. Discussion of the philosophical problems that arise in logic, and of the application of formal logic to problems in philosophy and other disciplines. Some consideration of issues in the philosophy of language.
Prerequisite: None
Distribution: Epistemology and Cognition
Semester: Fall, Spring 2004-05
Unit: 1.0

PHIL 217 Philosophy of Science: Traditional and Feminist Perspectives
*McGowan*
This course will survey various realism theses in the philosophy of science. Issues include: What constitutes adequate evidence? Exactly what...
PHIL 221 History of Modern Philosophy
Winiker
A study of central themes in seventeenth- and eighteenth-century philosophy, concentrating on Descartes, Hume, and Kant. More limited readings of such figures as Spinoza, Locke, Ann Conway, Leibniz, and Berkeley. Among the topics: the relationship between mind and body; the limits of reason; determinism and freedom; the bearing of science on religion.
Prerequisite: Open to first-year students in their second semester and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Historical Studies
Semester: Spring
Unit: 1.0

PHIL 224 Existentialism
de Warren
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. This course will study basic themes in existentialism by focusing on the theoretical and theatrical works of key existentialist writers such as Jean-Paul Sartre, Simone de Beauvoir, Antonin Artaud, Samuel Beckett, Albert Camus, and Eugene Ionesco. In taking the human condition as its primary question, existentialism redefines the meaning of theory as a philosophical reflection or "seeing" of the human condition, as well as the significance of theatre as a "seeing" or "manifestation" of features of the human condition that otherwise remain hidden from view. Special emphasis will be placed on the themes of boredom, death, bad faith, anxiety, suffering, freedom, and inter-subjective relationships.
Prerequisite: One philosophy course or permission of instructor.
Distribution: Epistemology and Cognition or Historical Studies
Semester: N.O. Offered in 2004-05.
Unit: 1.0

PHIL 225 Phenomenology and Hermeneutics
de Warren
NOT OFFERED IN 2003-04 or 2004-05. OFFERED IN 2005-06. Phenomenology attempts to reclaim the richness of human experience for philosophical analysis. An important movement of twentieth-century philosophy, phenomenology represents an original approach to traditional philosophical questions based on the investigation of how "lived experience" animates the various ways in which the world is meaningful for human beings. As an introduction to the phenomenological movement, including the hermeneutic turn of phenomenological philosophy, this course will focus on the work of Husserl, Heidegger, Lévinas, and Merleau-Ponty.
Prerequisite: One philosophy course or permission of instructor.
Distribution: Epistemology and Cognition
Semester: N.O. Offered in 2005-06.
Unit: 1.0

PHIL 226 Human Nature in Three Medieval Philosophers
Congleton
What is it to be a human being? This course will examine the responses of two twelfth-century writers—the Jewish thinker Moses ben Maimon (Maimonides) and the Islamic thinker Ibn Rushd (Averroes)—and a thirteenth-century Christian thinker who built on their work, Thomas Aquinas. Primary focus will be the question of whether each human being is essentially unique or simply an example of a species. Other questions will include whether the most educated people should control what texts/debates are available to the less educated, and what is involved in arguing that God is "transcendent." The course will begin with an introduction to central concepts of Plato and Aristotle used by these medieval thinkers. Also considered will be the "neo-Platonism" of Plotinus and that of Ficino, as found in his discussion of "Platonic love."
Prerequisite: Open to first-year students who have taken one course in philosophy or medieval studies and to all sophomores, juniors and seniors.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 227 Philosophy and Feminism
Congleton
This course begins by examining the philosophical foundations of the so-called "first wave" of feminism, the "liberal social contract" feminism that arose in England and the U.S. in the nineteenth century in the context of the abolitionist movement. Particular attention is given to the doctrine of "separate spheres" and the consequent "double shift" problem for women trying to combine work and family. Next is consideration of critiques of liberal feminism's narrowness of focus with regard to race, class, sexuality, and ethnicity; critiques developed in "second wave" feminism beginning in the 1960s. The final topics will be current alternatives to liberal feminism responding to these critiques.
Prerequisite: Open to first-year students in their second semester and to sophomores, juniors, and seniors without prerequisite.
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PHIL 230 Nineteenth-Century Philosophy
de Warren
NOT OFFERED IN 2003-04. OFFERED IN 2004-05. This course will study selected themes in nineteenth-century philosophy. Readings from Kant, Hegel, Marx, Kierkegaard, Schopenhauer, and Nietzsche will address central issues such as the status of reason, the irrational and the unconscious, modernization and the meaning of history, and the significance of religion and art for human existence. Other important figures of nineteenth-century thought such as Darwin, Comte, Mill, and Schleiermacher may also be addressed.
Prerequisite: One course in philosophy or permission of instructor.
Distribution: Epistemology and Cognition or Historical Studies
Semester: N.O. Offered in 2004-05.
Unit: 1.0

PHIL 232 Vedanta Ethics and Epistemology
Piper
Whereas Western ethics is dominated by the obsession with reconciling self-interest with altruism and passion with reason, the Vedanta ethics and epistemology of ancient India regards the distinction among them as the product of egocentric delusion and ignorance of the true nature of the self. Vedanta confidently prescribes specific actions and personal practices as time-tested means for achieving insight into the true nature of the self and union with ultimate metaphysical reality. We will study the basic texts in order to evaluate ourselves, our practices, and our values as products of an increasingly ubiquitous Western culture.
Prerequisite: 106, 206, or 213
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 233 Environmental Philosophy
Winiker
A study of conceptions of the natural world and our place in it, from the pre-Socratics and the Book of Genesis to the deep ecologists and ecofeminists of the present day. Readings in the history of philosophy (Aristotle, Descartes, Spinoza, Newton, Rousseau, and Hume, among others), in Emerson and Thoreau, and in contemporary nature writers and natural scientists. Discussion of ethical issues and of Third-World critics of Western environmentalism.
Prerequisite: None
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 249 Medical Ethics
Mekiti
A philosophical examination of some central problems at the interface of medicine and ethics. Exploration of the social and ethical implications of current advances in biomedical research and technology. Topics discussed will include psychosurgery, gender surgery, genetic screening, amniocentesis, and euthanasia.
Prerequisite: Open to first-year students who have taken one course in philosophy and to sophomores, juniors, and seniors without prerequisite.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PHIL 300 Seminar in Modern Philosophy
Winiker
Topic for 2003-04: Spinoza and Nietzsche. A study of two naturalistic world-views with dramatic consequences for morality. Half of the meetings will be devoted to a close reading of Spinoza's Ethics, and the other half to close readings of several works by Nietzsche, among them Beyond Good and Evil and On the Genealogy of Morals. Although the course will not be limited to themes common to the two philosophers, these themes will receive particular attention. They include the nature of truth; the moral and political consequences of naturalism (the attempt to view human beings as parts of natural world); the consequences of naturalism for religious belief; the challenge of combining determinism with calls to freedom or self-mastery; and alternatives to the belief in personal immortality.
Prerequisite: 221
Distribution: Epistemology and Cognition
Semester: Fall
Unit: 1.0
PHIL 302 Kant's Solution to Skepticism and Solipsism
McGowan
NOT OFFERED IN 2003-04
Prerequisite: Open to students who have taken two courses in philosophy.
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

PHIL 313 Seminar in Metaphysics
McGowan
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
Prerequisite: Open to students who have taken two courses in philosophy.
Distribution: Epistemology and Cognition
Semester: N/O. Offered in 2004-05.
Unit: 1.0

PHIL 314 Seminar in Theory of Knowledge
McGowan
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
Prerequisite: Open to students who have taken two courses in philosophy.
Distribution: Epistemology and Cognition
Semester: N/O. Offered in 2004-05.
Unit: 1.0

PHIL 323 Seminar, Continental Philosophy
de Warren
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
Prerequisite: Open to juniors and seniors who have taken one course in philosophy or who have equivalent preparation accepted by instructor.
Distribution: Epistemology and Cognition
Semester: N/O. Offered in 2004-05.
Unit: 1.0

PHIL 326 Philosophy of Law
Menkiti
A systematic consideration of fundamental issues in the conception and practice of law. Such recurrent themes in legal theory as the nature and function of law, the relation of law to morality, the function of rules in legal reasoning, and the connection between law and social policy are examined. We will also look at some philosophical problems that arise in connection with crime, civil rights, and "the legislation of morality."
Prerequisite: Open to juniors and seniors without prerequisite and to sophomores who have taken one course in philosophy.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

PHIL 332 Philosophy of Yoga
Piper
NOT OFFERED IN 2003-04.
Yoga, one of the six orthodox systems of Indian philosophy, includes philosophies of ethics and action, mind and spirit, knowledge, love, and the body. The word yoga means union – of individual ego and ultimate reality. We will study some classical texts and commentaries and evaluate yoga's applications to a global Westernized culture that fragments relationships, identity, bodies, minds, and spirit in zero-sum relations of competition, distrust, and mutual antagonism.
Prerequisite: 232 or equivalent
Distribution: Epistemology and Cognition or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

PHIL 340 Seminar, Contemporary Ethical Theory
McIntyre
Topic for 2003-04: Theories of Moral Motivation. What is it about us that makes us susceptible to the influence of moral considerations? We will examine theories which characterize moral motivation either as a disguised form of enlightened, long-term self-interest, as the expression of the emotional, nonrational side of our natures, or as grounded in practical reason. Readings from historical and contemporary sources.
Prerequisite: 103, 106, 201, 206, 215, 216, 217, 311, 312, or permission of the instructor.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

PHIL 345 Seminar, Advanced Topics in Philosophy of Psychology and Social Science
McIntyre
NOT OFFERED IN 2003-04.
Prerequisite: 103, 106, 201, 206, 215, 216, 217, 311, 312, or permission of the instructor.
Distribution: Epistemology and Cognition
Semester: N/O
Unit: 1.0

PHIL 349 Seminar, Speech Acts
McGowan
This seminar will survey various philosophical issues and applications of speech act theory. Particular attention will be paid to utterances that enact facts about what is permissible for others, the role of authority in this, and indirect speech acts. Recent applications of speech act theory to free speech (e.g., hate speech and pornography) will also be discussed.
Prerequisite: 207 and one other course in philosophy. Open to juniors and seniors only.

PE 121 (Fall and Spring) Physical Education Activities and Athletics Teams

Physical Education and Athletics Requirement
To complete the college degree requirement in physical education, a student must earn eight credit points. Students are strongly urged to earn the eight credit points by the end of the sophomore year. These credit points do not count as academic units toward the degree, but are required for graduation. There are no exceptions for the degree requirement in physical education and athletics.

Directions for Election

The requirement can be completed through:
1. completion of sufficient number of physical education instructional classes to earn eight credits; or
2. sufficient length of participation in Wellesley's 12 varsity athletic teams to earn eight credits; or
3. a combination of sufficient completion of instructional classes and participation on varsity athletic teams to earn eight credits, including credits earned at other colleges.

Students can receive partial credit towards the eight credit points through:
1. Independent pursuit either on or off campus (max. four points). Students must satisfactorily complete this preapproved independent study as specified in the Physical Education and Athletics Curriculum Handbook.
2. Sufficient length of participation in Wellesley's physical activity clubs (max. two points). Students must satisfactorily complete this preapproved participation as specified in the Physical Education and Athletics Curriculum Handbook.

Transfer students will be given partial credit toward the physical education requirement dependent upon year and semester of admission. Usually, students admitted in the sophomore year will be expected to complete four credit points at Wellesley. Students admitted in the junior year or as a Davis Scholar will be considered as having completed the degree requirement.

A student's choice of activity is subject to the approval of the Physical Education and Athletics Department and the College Health Services. If a student has a temporary or permanent medical restriction, she, the Physical Education and Athletics Department and the College Health Services will arrange an activity program to serve her individual needs. No student is exempt from the physical education requirement.

Students may take a specific physical education activity only once for credit. Students may continue to enroll in physical education instructional classes after the PE 121 requirement is completed provided space is available in the class.

A. Physical Education Instructional Classes
The instructional program in physical education is divided into four terms, two each semester. Some physical education activity classes are scheduled for a term (six weeks) and give two credit points toward completing the requirement. Other physical education activity classes are offered for a semester (12 weeks) and count four credit points toward completing the requirement. All classes are graded on a Credit-No Credit basis.

CR - Credit for course completed satisfactorily.
NC - No Credit for course not completed satisfactorily. Inadequate familiarity with the content of the course or excessive absence may result in an NC grade.
INC - Incomplete is assigned to a student who has completed the course with the exception of a test or assignment which was missed near the end of the course because of reasons not willfully negligent.

Activity classes scheduled for a semester (12 weeks):
Both Semesters: African Dance, Badminton, Ballet I, SCUBA, Self-defense, Yoga, Strength and Circuit Training, Tai-chi, Elem. Tennis, Squash, Stretch and Relax, Karate, Kung Fu, Racquetball, Pilates, Jazz I
First Semester Only: Classical Indian Dance, Modern Dance I, World Dance, Archery, Racquetball
Second Semester Only: Int. Ballet, Golf, Dance Theatre Workshop, Jazz II, Lifeguard Training, Continuing Yoga

Activity classes scheduled for a term (six weeks):

Activity Term
Aerobics 1, 2, 3, 4
Aquaerobics 3
Archery 4
CPR/First Aid 3, Wintersession
Dance - World 3, Wintersession
Fencing 2, 3
Golf 1, 4
Horseback Riding 1, 2, 3, 4
Sailing 1, 4
Skiing/Snowboarding 3
Strength Training 1, 2, 3, 4
Table Tennis 1, 2
Yoga Wintersession

For Credit Toward the Major

EDUC 102/WRIT 125 Education in Philosophical Perspective

Directions for Election

The Philosophy Department divides its courses and seminars into three subfields: (A) the history of philosophy; (201, 220, 221, 222, 223, 224, 225, 226, 302, 303, 311, 312, 319, 349 (when the topic is appropriate); (B) Value Theory: 106, 202, 203, 204, 206, 210, 211, 213, 214, 227, 232, 233, 249, 303, 326, 332, 340, 349 (when the topic is appropriate); (C) Metaphysics and Theory of Knowledge: 103, 202, 207, 209, 211, 215, 216, 217, 218, 232, 233, 300, 302, 304, 313, 314, 325, 327, 332, 345, 349 (when the topic is appropriate).

The major in Philosophy consists of at least nine units. Philosophy 201 and 221 are required of all majors. In order to assure that all majors are familiar with the breadth of the field, every major must take two units in each of subfields B and C. Majors are strongly encouraged to take a third unit in subfield A. Students planning graduate work in philosophy should take 216 and acquire a reading knowledge of Latin, Greek, French, or German. In order to assure that students have acquired some depth in philosophy, the department requires that each major complete at least two 300-level units; these units must be in different subfields of philosophy.

The minor in Philosophy consists of five units. No more than one of these units may be on the 100 level; 201 or 221 is required of all minors; at least one of the five units must be at the 300 level.

The department offers the following options for earning honors in the major field: (1) writing a thesis or a set of related essays; (2) a program designed particularly for students who have a general competence and who wish to improve their grasp of their major field by independent study in various sectors of the field. Option (2) involves selecting at least two related areas and one special topic for independent study. When the student is ready, she will take written examinations in her two areas and, at the end of the second term, an oral examination focusing on her special topic.

The department participates in exchange programs with Brandeis and MIT. Both schools have excellent philosophy departments, and students are encouraged to consult the respective catalogs for offerings. Since 1991, Brandeis and Wellesley have been exchanging faculty on a regular basis to enhance the curricular offerings at each institution.

PHYS 101 Frontiers of Physics
NOT OFFERED IN 2003-04. An overview of the evolution of physics from classical to modern concepts. Emphasis will be placed on the revolutionary changes that have occurred in our view of the physical universe with the development of quantum mechanics and the theory of relativity. No laboratory. Not to be counted toward minimum major or to fulfill entrance requirement for medical school.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: Mathematical Modeling or Natural and Physical Science
Semester: N/O  Unit: 1.0

PHYS 103 The Physics of Marine Mammals with Laboratory
Ducas
An examination of the scientific and engineering principles embodied in the design of these aquatic animals. Emphasis on an interdisciplinary approach and developing modeling and problem-solving techniques. Topics include: diving and swimming (ideal gas law, fluids, forces); metabolism (energy, thermodynamics, scaling); and senses (waves, acoustics, optics). Field trip. Weekly laboratory. Not to be counted toward the minimum major or to fulfill entrance requirement for medical school.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Spring  Unit: 1.0

PHYS 104 Basic Concepts in Physics I with Laboratory
Brown (Fall), Lannert (Spring)
Mechanics, including statics, dynamics, and conservation laws. Introduction to waves. May not be taken in addition to 107.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Corequisite: Mathematics at the level of MATH 115 or higher. Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring  Unit: 1.25

PHYS 106 Basic Concepts in Physics II with Laboratory
Berg (Fall), Quivers (Spring)
Light, geometrical and physical optics, electricity, and magnetism. 106 does not normally satisfy the prerequisites for 202 or 203. May not be taken in addition to 108.
Prerequisite: 104 and Mathematics at the level of MATH 115 or higher. Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring  Unit: 1.25

PHYS 107 Introductory Physics I with Laboratory
Goldman, Lannert (Fall), Quivers (Spring)
Principles and applications of mechanics. Includes: Newton's laws, conservation laws, rotational motion, oscillatory motion, and gravitation. May not be taken in addition to 104.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Mathematics at the level of MATH 115 or higher. Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring  Unit: 1.25

PHYS 108 Introductory Physics II with Laboratory
Quivers (Fall), Stark (Spring)
Electricity and magnetism, introduction to Maxwell's equations, electromagnetic radiation, geometrical and physical optics. Basic laboratory electronics. May not be taken in addition to 106.
Prerequisite: 107 (or 104 and permission of instructor), and MATH 116 or 120. Distribution: Mathematical Modeling or Natural and Physical Science
Semester: Fall, Spring  Unit: 1.25

PHYS 115/CS 115 Robotic Design Studio (Wintersemester)
Berg, Anderson (Computer Science)
In this intensive course, students are introduced to engineering principles as they design and assemble robots out of LEGO parts, sensors, motors, and tiny computers. Fundamental robotic skills are learned in the context of studying and modifying a simple robot known as Sciborg. Then, working in small teams, students design and build their own robots for display at a Robot Exhibition. These projects tie together aspects of a surprisingly wide range of disciplines, including computer science, physics, engineering, and art. Students may register for either PHYS 115 or CS 115. Credit will be given in the department in which the student is registered. Not offered every year. Subject to Dean's Office approval.
Prerequisite: None. Distribution: Natural and Physical Science
Semester: Wintersemester  Unit: 0.5

PHYS 124 Introduction to Computer Simulation and Modeling in the Sciences
NOT OFFERED IN 2003-04. In this course we will explore the construction of computer models to simulate real-world events using the MATLAB programming language. The modeling process involves developing hypotheses, writing computer programs to simulate real events based on these hypotheses, and analyzing the results. Examples will be drawn from many scientific fields and from everyday life. We will also explore the power of computers in analyzing and synthesizing audio information of sounds, such as speech and music. No prior knowledge of computer programming is required. The course will meet weekly for two lectures and a two-hour lab.
Prerequisite: One unit in science, computer science, or mathematics. Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Distribution: Natural and Physical Sciences or Mathematical Modeling
Semester: N/O  Unit: 1.0

A major in Physics should ordinarily include:
- [Extradepartmental 216] or Math/Physics 216 in one additional requirement. 219 and 349 are strongly recommended. One unit of another laboratory science is required.

A minor in Physics (six units) should ordinarily include:
- 104 or 107, 108, 202, 203, 302 and one other unit at the 300 level (350 cannot be counted as the other 300-level unit). [Extradepartmental 216] or Math/Physics 216 is also required.

Introductory Courses

POL 100 Introduction to Political Science Staff
Politics is a struggle for power — and questions about power are at the heart of political science: How is power gained? How is it lost? How is it organized? How is it used? How is it abused? This course introduces students to the concerns and methods of political scientists and to the major subfields of the discipline: American politics, comparative politics, international relations, and political theory. The course is centered on several major books in the field, some describing important political events, such as the rise of the Nazi party in Germany and the collapse of apartheid in South Africa, and some illustrating how political scientists analyze and evaluate the world of politics. This course is strongly recommended for all further work in political science.

American Politics and Law

POL 200 American Politics
Burke, Gulati, Johnson
The institutions, processes, and values that shape American politics. The origins and evolution of the U.S. Constitution, and the institutions it created: Congress, the executive branch, the presidency, the federal court system and federalism. Analysis of "intermediary" institutions including political parties, interest groups, elections, and the media. Study of enduring debates over values in American politics, with particular attention to conflicts over civil rights and civil liberties.
Prerequisite: One unit in political science, economics, or American studies, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

POL 210 Political Participation and Influence Gulati
How do citizens express their interests, concerns, and preferences in politics? Why and how do some groups achieve political influence? Why are some issues taken up and others ignored? The roles played by public opinion polls, interest groups, political parties, PACs, elections, the mass media, protests, riots, and demonstrations in articulating citizen concerns to government. Special attention to problems of money in politics, low voter participation, and inequality of race, class, and gender. Course work includes reading, discussion, and direct political participation in an interest group or election campaign.
Prerequisite: One unit in political science.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL 212 Urban Politics
Rich
Introduction to contemporary urban politics. Study of policy-making and political leadership in the areas of public education, city bureaucracies, housing, welfare, fiscal management, and economic redevelopment. Consideration of population shifts, racial and ethnic conflicts, and the impact of federal policy on urban planning.
Prerequisite: One unit in political science, economics, or American studies.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POL 213 Washington Decision-Making Schechter
Intensive Wintersession course on American politics. Analysis of the political process based on readings and discussions of contemporary political and legal issues and interaction with members of Congress, congressional staff, executive department officials, activists in non-profit organizations, Supreme Court law clerks, political campaign professionals, and reporters. This course will meet for the first week of Wintersession in Wellesley and then will move to Washington for two weeks of briefings, seminar, and policy research.
Prerequisite: Permission of instructor required. One unit in American politics or law strongly recommended. Interested students must fill out a course application available in the POL office.
Distribution: Social and Behavioral Analysis
Semester: Wintersession
Unit: 0.5

POL 215 Courts, Law, and Politics Burke, Johnson
Fundamentals of the American legal system, including the sources of law, the nature of legal process, the role of courts and judges, and legal reasoning and advocacy. Examination of the interaction of law and politics, and the role and limits of law as an agent for social change.
Prerequisite: 200 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

POL 311 The Supreme Court in American Politics
Johnson
Analysis of major developments in constitutional interpretation, the conflict over judicial activism, and current problems facing the Supreme Court. Emphasis will be placed on
judicial review, the powers of the president and of Congress, federal-state relations, and individual rights and liberties.

Prerequisite: 215 or one other unit in American legal studies, or permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POLI 313 American Presidential Politics
Rich
Analysis of the central role of the president in American politics and the development and operation of the institutions of the modern presidency. The course will focus on sources of presidential power and limitations on the chief executive, with particular emphasis on relations with the other branches of government and the making of domestic and foreign policy.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POLI 314 Congress and the Legislative Process
Gohari
Analysis of the representative and lawmaking capabilities of the contemporary United States Congress. Examination of how candidates for Congress run for office with an emphasis on the use of the mass media and campaign finance. Exploration of how the "electoral connection" structures Congress members' roles as representatives and lawmakers; the influence of the public, political parties and interest groups in the policymaking process; the institutional arrangements of Congress; and Congress' relations with other branches of government. Discussion about how Congress is capable of making "good public policy," when it works within the constraints imposed by its internal and external environments.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POLI 315 Public Policy and Analysis
Rich
The first part of the course will examine how domestic public policy is formulated, decided, implemented, and evaluated; at both the federal and local levels. Both moral and political standards for making policy will be examined. Factors that promote or impede the development and realization of rational, effective, and responsive public policy will be reviewed. The second part of the course will be devoted to student research and presentations on selected policy topics, including public schools, public transportation, homelessness, the environment, and drug enforcement.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POLI 316 Mass Media in American Democracy
Sachs
NOT OFFERED IN 2003-04. Focus on the mass media in the American democratic process, including the effect of the news media on the information, opinions, and beliefs of the public, the electoral strategy of candidates, and the decisions of public officials. Discussion of news values, journalists' norms and behaviors, and the production of print and broadcast news. Evaluation of news sources, priorities, bias, and accessibility. Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POLI 317 Health Politics and Policy
Burke
The American system of health care is distinctive. Financing is provided through voluntary employer contributions, tax subsidies, individual payments and an array of public programs, principally Medicare and Medicaid—but despite the variety of funding sources, Americans, unlike citizens of other affluent democracies, are not guaranteed health care coverage. How did the American approach to health care develop? How is it different from that of other affluent nations? What explains the differences? What are the strengths and weaknesses of the American health care system? Issues of cost containment, technological innovation, quality of care, and disparities in health outcomes are explored.
Prerequisite: 200 or 210 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

POLI 319S Seminar, Campaigns and Elections
NOT OFFERED IN 2003-04. Exploration of the issues in campaigns and elections: Who runs and why? Do elections matter? The impact of party decline and the rise of campaign consultants, polls, advertising, and the press. Candidate strategies and what they tell us about the political process. How voters decide. The "meaning" of elections. Attention to the rules of the game (the primaries, debates, the Electoral College), recent campaign innovations (talk shows, town meetings, infomercials), third party candidacies, and prospects for political reform. Course work includes campaign participation.
Prerequisite: 200, 210 or by permission of instructor.
Enrollment limited: interested students must fill out a seminar application available in the Political Science office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

POLI 320S Seminar, Inequality and the Law
Johnson
Analysis of statutory and constitutional law regarding inequalities based on gender, race, class, sexual orientation, and disability, and the effect of this law on society. Do anti-discrimination laws reduce social inequality? To what extent have the legal rights won by groups such as African Americans, women, and disabled people been translated into social practices? Focus on the equal protection and due process clauses of the Fourteenth Amendment, statutes such as the 1964 Civil Rights Act and the Americans with Disabilities Act, and recent Supreme Court decisions. Examination of the role of law and litigation in public policies regarding affirmative action, school desegregation, employment discrimination, housing, and welfare.
Prerequisite: 215, 311, or another unit in American legal studies and permission of instructor. Enrollment limited: interested students must fill out a seminar application available in the Political Science office or on the department Web site.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

POLI 333S Seminar, Ethics and Politics
NOT OFFERED IN 2003-04. An exploration of ethical issues in politics, public policy, and the press. Critical questions include deception (is it permissible to lie?), "bedfellows" (does it matter who your friends are?), and means and ends (do some purposes justify deception, violence, or torture?) Consideration of moral justifications of policies, such as cost-benefit analysis, risk ratios, and social justice, as well as the proper role of journalists in holding public officials to an ethical standard.
Prerequisite: One 200-level unit in American politics.
Enrollment limited: interested students must fill out a seminar application available in the Political Science office or on the department Web site.
Distribution: Social and Behavioral Analysis

Among the theorists read are Hobbes, Locke, Hume, Rousseau, Burke, Wollstonecraft, Mill, Hegel, and Marx. Emphasis on the logic of each theorist's argument, including such questions as the nature of human sociability, possible -- and best -- forms of government, and the question why we should obey government and the limits to that obedience. Exploration of diverse understandings of the concepts of justice, freedom, and equality. Attention is paid to the historical context within which a political theory is written.

Prerequisite: One unit in political science, philosophy, or European history.

Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

**POL 242 Contemporary Political Theory**

Krieger

NOT OFFERED IN 2003-04. Study of several twentieth-century traditions that raise fundamental questions about the human condition, processes of historical and personal transformation, and our capacity to understand them. Exploration of contemporary political and social theories, including existentialist, postmodern variants of Marxism, postmodern theory, feminism, and liberal theory.

Prerequisite: One unit in political science, philosophy, or European history.

Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

**POL 248 Power and Politics**

Euben

An examination of the nature and functioning of power in politics, with an emphasis on the following questions: What is the nature of power and how has it been exercised in political life both past and present? Who has power and who should have it? Is power primarily wielded by political leaders and bureaucrats, or has the development of new technologies decentralized power, making each of us its instrument? Do the powerless -- for example, miners in Appalachia, Polish solidarity activists, Indian anti-colonialists -- understand and exercise power differently from those who traditionally hold it? Are power and violence inextricably intertwined or are they opposites? Readings will be drawn from several disciplines, and authors include Thucydides, bell hooks, Hannah Arendt, Marx, Nietzsche, Foucault, Kafka, Gandhi, and Vaclav Havel.

Prerequisite: One unit in political science, philosophy, or history; permission of instructor.

Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

**POL 240 American Political Thought**

Stettner

Examination of American political writing, with emphasis given to the Constitutional period, progressive era, and contemporary sources. Questions raised include origins of American institutions, including the rationale for federalism and separation of powers, the roles of president and Congress, judicial review; American interpretations of democracy, equality, freedom and justice; legitimate powers of central and local governments. Attention paid to historical context and to importance for modern political analysis.

Prerequisite: One 200-level unit in political theory, American politics, or American history, or permission of instructor.

Distribution: Historical Studies
Semester: Fall
Unit: 1.0

**POL 342S Seminar: Marxist Political Theory**

Krieger

NOT OFFERED IN 2003-04. Study of the fundamental concepts of Marxist theory, including alienation, the materialist conception of history, class formation, and class struggle. Particular attention will be paid to Marx's theory of politics. The applicability of Marxist theory to contemporary political developments will be assessed. Study of contemporary Marxist theory will emphasize issues of class, race, and gender.

Prerequisite: Enrollment limited; interested students must fill out a seminar application available in the Political Science office or on the department website.

Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

**POL 343S Seminar: Democracy and Difference**

Krieger

NOT OFFERED IN 2003-04. An examination of liberal democracy and contemporary theoretical challenges introduced by diversity and difference. Does liberal democracy, with its emphasis on individual rights, separation of powers, representative assemblies, and the principle of a limited state, remain a durable model? How does the consideration of cultural diversity and difference, understood by reference to gender, race, ethnicity, language, religion, nationality, and sexual orientation, affect our understanding of citizenship, equality, representation, recognition, and community? Study of communitarian thought, multiculturalism, and feminist critiques of democracy.

Prerequisite: One 200-level unit in political theory, or permission of instructor. Enrollment limited; interested students must fill out a seminar application available in the Political Science office or on the department website.

Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

**POL 344S Seminar: Feminist Political Theory**

Euben

An examination of feminist theory, beginning with early liberal and socialist feminisms and continuing on to radical, post-structuralist and postcolonialist feminist theories, among others. Particular attention to the complexity of theorizing about "what women are and need" in the context of a multicultural society and a postcolonial world. Consideration of feminist perspectives on rights and the law, pornography, racial and sexual differences, methodology, and non-Western cultural practices such as veiling. Authors include Wollstonecraft, Engels, Hooks, MacKinnon, Gilligan, and Butler.

Prerequisite: One 200-level unit in political theory, philosophy, or women's studies; interested students must fill out a seminar application available in the Political Science office or on the department website.

Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0
POL 346 Comparative Political Thought: Modern Western and Islamic Theories of Politics

Euben

An examination of Western and Islamic theories about the nature and dilemmas of modern politics; does modern politics require secularization or a return to the "fundamentals" of tradition, religion, and community? Is there such a thing as a distinctive Western or Islamic perspective in a world stamped by colonialism, imperialism, and now globalization? Issues include the relationship between religion and politics; cultural relativism and universalism; Islamic fundamentalist and postmodernist reactions to the crises of modern politics. Authors include Machiavelli, Muhammad Abduh, Rousseau, Ibn Khaldun, Taha Hussein, and Foucault.

Prerequisite: One 200-level unit in political theory or philosophy or permission of instructor.
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring

Unit: 1.0

Research or Individual Study

Individual or group research of an exploratory or specialized nature. Students interested in independent research should request the assistance of a faculty sponsor and plan the project, readings, conferences, and method of examination with the faculty sponsor. These courses are offered at the intermediate (250) and advanced (350) levels and for one or 0.5 unit of credit.

Directions for Election

Political Science 100 is strongly recommended for all further work in Political Science, particularly for those who are considering a major in the department. Majors are also strongly encouraged, but not required, to take QR 199.

Introduction to Social Science Data Analysis.

A major in Political Science consists of at least nine units. Courses at the 100-level may be counted toward the major, but not toward a subfield distribution requirement (see below). In the process of fulfilling their major, students are encouraged to take at least one course or seminar that focuses on the politics of a culture other than their own.

The Department of Political Science divides its courses beyond the introductory level into four subfields: American Politics and Law (POL1), Comparative Politics (POL2), International Relations (POL3), and Political Theory (POL4). In order to ensure that Political Science majors familiarize themselves with the substantive concerns and methodologies employed throughout the discipline, all majors must take one 200-level or 300-level unit in each of the four subfields offered by the department. Recommended first courses in the four subfields are: in American Politics and Law: 200; in Comparative Politics: 202; in International Relations: 221 or 222; in Political Theory: 201, 240, 241.

In addition to the subfield distribution requirement, all majors must do advanced work (300 level) in at least two of the four subfields; a minimum of one of these units must be a seminar, which normally requires a major research paper. (Courses fulfilling the seminar requirement are denoted by an "S" after the course number.) Admission to department seminars is by permission of the instructor only. Interested students must fill out a seminar application, which is available in the Political Science office prior to preregistration for each term. Majors should begin applying for seminars during their junior year in order to be certain of fulfilling this requirement. Majors are encouraged to take more than the minimum number of required 300-level courses.

Ordinarily, a minimum of five units for the major must be taken at Wellesley, as must the courses that are used to fulfill at least two of the four subfield distributions and the seminar requirement. The department does not grant transfer credit at the 300 level for either the major or for College distribution or degree requirements.

Although Wellesley College does not grant academic credit for participation in internship programs, students who take part in the Washington Summer Internship Program may arrange with a faculty member to undertake a unit of 350, Research or Individual Study, related to the internship experience. Students may receive units of College credit if they achieve a grade of 4 or 5 on the American Government and Politics or the Comparative Politics Advanced Placement Examinations. Such AP credits do not count toward the minimum number of units required for the political science major nor for the American or comparative subfield distribution requirements for the major. If a student does receive a unit of College credit for the American politics exam, she may not take Political Science 200 (American Politics). Students who are uncertain whether to receive a College AP credit in American politics or to take Political Science 200 should consult with a member of the department who specializes in American politics or law.

Majors who are interested in writing a senior honors thesis are urged to discuss their ideas and plans with either their advisor or the department chair as early as possible in their junior year. Students considering going to graduate school for a Ph.D. in political science should talk with their advisors about appropriate preparation in quantitative methods and foreign languages.

PSYC 214 Developmental Psychobiology: Brain Mechanisms and Selected Disorders

Staff

Developmental psychobiology presents a broad overview of the mature nervous system, normal nervous system development, and the psychobiological basis of behavioral development. The course also covers selected developmental abnormalities such as dyslexia, autism, and Tourette's Syndrome and considers the neurological mechanisms that may underlie these disorders.

Prerequisite: Open to sophomores, juniors, and seniors with prerequisite and to first-year students with AP credit or 101.

Distribution: Social and Behavioral Analysis

Semester: Spring

Unit: 1.0

PSYC 214R Research Methods in Cognitive Psychology

Keane

Introduction to research methods appropriate to the study of human cognition (i.e., how people take in, interpret, organize, remember, and use information in their daily lives). Individual and group projects. Laboratory. Each section typically limited to 12 students.

Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to first-year students with AP credit or 101.

Distribution: Social and Behavioral Analysis

Semester: Fall

Unit: 1.25

PSYC 215 Memory

Keane

Introduction to the study of human memory. Examines processes underlying encoding, storage, and retrieval of information. Will review theoretical models focusing on distinctions between different forms of memory including...
short-term and long-term memory, implicit and explicit memory, episodic and semantic memory. Factors contributing to forgetting and distortion of memory will also be discussed.

Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to first-year students with AP credit or 101.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

**PSYC 216 Psychology of Language**
Carpenter
Introduction to the study of the psychological processes underlying language. An evaluation of theory, methods, and current research in language abilities, including speech perception, word and sentence understanding, and language acquisition in children. Examination of the relationship between language and thought and the evolutionary and biological bases of language behavior.

Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to first-year students with AP credit or 101.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**PSYC 217 Cognition**

**NOT OFFERED IN 2003-04.**

Cognitive psychology is the study of the capabilities and limitations of the human mind when viewed as a system for processing information. An examination of basic issues and research in cognition focusing on attention, pattern recognition, memory, language, and decision-making.

Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to first-year students with AP credit or 101.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

**PSYC 218 Sensation and Perception**
Kone
A survey of the human senses from stimulus to perception. Topics include basic features in vision: color, form, orientation, and size; perception of the third dimension; illusions; attention; limits on perception; and the effects of experience and development. Relevant neurophysiological and clinical examples will be reviewed. Laboratory demonstrations.

Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to first-year students with AP credit or 101.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

**PSYC 219 Biological Psychology**
Koff
Introduction to the biological bases of behavior. Topics include structure and function of the nervous system, sensory processing, sleep, reproductive behavior, language, and mental disorders.

Prerequisite: Open to sophomores, juniors, and seniors without prerequisite and to first-year students with AP credit or 101. Not open to students who have taken PSYC 213.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**PSYC 220R Research Methods in Applied Psychology**

**NOT OFFERED IN 2003-04.**

An introduction to research methods appropriate to studying applied topics in psychology. Possible topics include the psychology of organizations, the law, or health. Group projects with some individual exercises. Laboratory. Each section typically limited to 12 students.

Prerequisite: 205 and one other 200-level psychology course.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.25

**PSYC 224 Abnormal Psychology**
Wink
An examination of major psychological disorders with special emphasis on phenomenology. Behavioral treatment of anxiety based disorders, cognitive treatment of depression, psychoanalytic therapy of personality disorders, and biochemical treatment of schizophrenia will receive special attention. Other models of psychopathology will also be discussed.

Prerequisite: One 200-level unit, excluding 205, or by permission of the instructor. Not open to students who have taken [309].
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

**PSYC 224R Research Methods in Abnormal Psychology**
Wink
An introduction to research methods appropriate to the study of abnormal psychology. Topics will include affective and personality disorders, substance abuse, and stressful life events. Individual and group projects. Laboratory. Each section typically limited to 12 students.

Prerequisite: 205 and 224
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

**PSYC 230 Psychology of Law**
Carl
Do biases affect the decisions of juries? Do guilty defendants escape punishment by faking insanity? Does the death penalty reduce crime? This course focuses on the application of psychology to legal questions such as these. Other possible topics include: jury selection, the reliability of eyewitness testimony, factors affecting the perceived innocence or guilt of defendants, the use of hypnosis and lie detector tests, blaming victims of crime, methods of interrogation, and issues surrounding testimony from children in abuse cases. This course will explore both theory and research on the psychology of law and will include case analyses.

Prerequisite: One 200-level unit, excluding 205, or by permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**PSYC 240 Social Influence**
Alpert
This course focuses on a major topic in social psychology: attitude formation and change. Techniques of social influence that we encounter in everyday life will be explored, with a particular emphasis on advertising. The findings of empirical research and theory will be used to understand persuasive messages. Topics include how emotion, gender and culture are used to maximize the effectiveness of advertisements, and how stereotypes are both perpetuated and refuted in advertising.

Prerequisite: 210
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

**PSYC 245 Cultural Psychology**
Deguchi
Examines how and why cultural factors affect social and developmental psychological processes. Individual, interpersonal, and contextual factors are considered to expand our understanding of increasingly diverse environments.

Prerequisite: Open to students who have completed a college-level course in psychology or have AP credit.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**PSYC 248 Psychology of Teaching, Learning, and Motivation**

**NOT OFFERED IN 2003-04.**
The psychology of preschool, primary, secondary, and college education. Investigation of the many contributions of psychology to both educational theory and practice. Topics include student development in the cognitive, social, and emotional realms; assessment of student variability and performance; interpretation and evaluation of standardized tests and measurements; classroom management; teaching style; tracking and ability grouping; motivation; and teacher effectiveness.

Prerequisite: One 200-level unit, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

**PSYC 299 Practicum in Psychology**

**Staff**
Participation in a structured learning experience in an approved field setting under faculty supervision. Does not count toward the minimum major in Psychology. Mandatory credit/noncredit, except by permission of instructor.

Prerequisite: Open by permission to junior and senior majors. Two units above the 100-level that are most appropriate to the field setting as determined by the faculty supervisor (excluding 205).
Distribution: None
Semester: Fall, Spring
Unit: 1.0

**PSYC 302 Health Psychology**

**Berman**
An exploration of the role of psychological factors in preventing illness and maintaining good health, in the treatment of illness, and in adjustment to ongoing illness.

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

**PSYC 303 Psychology of Gender**

**Staff**
An examination of different theoretical approaches to the study of sex and gender, the social construction and maintenance of gender, and current research on gender differences. Topics will include review of arguments about appropriate methods for studying sex and gender and its "legitimacy" as a research focus, gen-
der roles and gender socialization, potential biological bases of gender differences, and the potential for change in different sex-typical behaviors.

Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 308 Systems of Psychotherapy
Wink
This course examines theory, research, and practice in three schools of psychotherapy: psychoanalytic, cognitive-behavioral, and humanistic. Topics to be covered include underlying assumptions of normality/pathology, theories of change, methods/techniques, and relationship between therapist and client.
Prerequisite: Open to juniors and seniors who have taken two 200-level units including 224 and excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 317 Psychological Development in Adults
NOT OFFERED IN 2003-04. An exploration of the central changes which affect individuals as they move through adulthood. A primary emphasis of this course will be on the application of developmental theory to the in-depth study of individual lives. Topics include: identity formation; social roles; midlife changes; personality and cognitive changes; death and dying; the influence of culture, cohort, and biology on development. Students will conduct interviews in order to better understand the process of aging and how individuals cope with various life transitions.
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, or permission of instructor. Not open to students who have taken [209].
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 318 Seminar. Brain and Behavior: Koff
Selected topics in brain-behavior relationships. Emphasis on psychopharmacology. Topics include: behavioral mechanisms underlying action of drugs; major neurotransmitter systems; major classes of psychoactive drugs; and neurological disorders and medications.
Prerequisite: Open to juniors and seniors who have taken two 200-level units including one of the following: 219 or BSC 213, and excluding 205.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

PSYC 319 Neuropsychology
Keane
An exploration of the neural underpinnings of higher cognitive function based on evidence from individuals with brain damage. Major neuroanatomical systems will be reviewed. Topics include motor and sensory function, attention, memory, language, and hemispheric specialization.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, including either 219 or BSC 213, and excluding 205.
Distribution: Epistemology and Cognition or Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

PSYC 329 Seminar. Psychology of Adulthood and Aging
NOT OFFERED IN 2003-04. An examination of how people cope with changes in their adult lives. Particular emphasis on aging as an example of life stage. Topics include: personality and cognitive change in later life; development of wisdom and integrity; retirement and bereavement; coping with death; intergenerational transmission of values; social support and coping with change. Models of life stages in adulthood will also be discussed.
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 333 Clinical and Educational Assessment
NOT OFFERED IN 2003-04. Current approaches to the psychological appraisal of individual differences in personality, intelligence, and special abilities will be investigated through the use of cases. Tests included in the survey are: MMPI, CPI, WAIS, Rorschach, and the TAT. Special emphasis will be placed on test interpretation, report writing, and an understanding of basic psychometric concepts such as validity, reliability, and norms. Useful for students intending to pursue graduate study in clinical, personality, occupational, or school psychology.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 335 Developmental Psychology

Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 337 Seminar. The Psychology of Creativity
NOT OFFERED IN 2003-04. An exploration of the foundations of modern theory and research on creativity. An examination of methods designed to stimulate creative thought and expression. Topics include: psychodynamic, behavioristic, humanistic, and social-psychological theories of creativity; studies of creative environments; personality studies of creative individuals; methods of defining and assessing creativity; and programs designed to increase both verbal and nonverbal creativity.
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

PSYC 339 Seminar. Narrative Identity
Cheek
Narrative psychology explores the human propensity to create and use stories about significant figures and events in the process of identity formation. Topics will include an exploration of mermaids and related figures as cultural images, metaphors for personal transformation, and archetypal symbols of the collective unconscious. The Little Mermaid and La Sirene of Haitian Vodou will be examined as representations of men's fear of, and attempts to control, women's spirituality and sexuality. The personality theories of Jung and Reich provide the framework for the seminar.
Prerequisite: Open to juniors and seniors who have taken 212 and one other 200-level unit, excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

145 Psychology
PSYC 340 Organizational Psychology
Carle
An examination of key topics such as: social environment of the work place, motivation and morale, change and conflict, quality of worklife, work group dynamics, leadership, culture, and the impact of workforce demographics (gender, race, socioeconomic status). Experimental activities, cases, theory, and research.
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

PSYC 341 Seminar. Psychology of Shyness
NOT OFFERED IN 2003-04. An examination of psychological approaches to understanding shyness and the related self-conscious emotions of embarrassment and shame. Topics include: genetics of shyness, evolutionary perspectives on shyness in animals, adolescent self-consciousness, and individual and group differences in social behavior.
Prerequisite: Open to juniors and seniors who have taken at least one course numbered 207-212 and at least one course numbered 215-219, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

PSYC 342 Seminar. Psychology of Optimism and Pessimism
Norenz
An examination of the ways in which expectation influence and are influenced by thoughts, feelings, motivation, and behavior. There are a variety of psychological constructs that fall under the general rubric of optimism and pessimism, and research has shown that they relate to physical and mental health, achievement, personal relationships, and even longevity. This seminar will explore those relationships, with an emphasis on understanding both the causes and the benefits of personal and cultural optimism and pessimism.
Prerequisite: Open to juniors and seniors with 212 or 210 and one other 200-level course, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

PSYC 345 Seminar. Selected Topics in Developmental Psychology
Wagner
Topic for 2003-04: "Mind-reading" in Children. This course will trace the development of our understanding of what is going on in other people's minds - their beliefs, goals, and intentions - and how we learn to use this information to guide our own actions. Topics include infants' abilities to follow pointing and eye-gaze and to engage in imitation and understand goal-directed actions; preschoolers' knowledge of false belief, deception, and accidents; the roles that language and social interaction play in developing our knowledge of other minds; and the effects of lacking this knowledge, as may be the case for children and adults with autism. Observations at the Child Study Center (outside of class time) will be required.
Prerequisite: Open to juniors and seniors who have taken 207 and one other 200-level course, excluding 205.
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

PSYC 346 Advanced Topics in Personality
NOT OFFERED IN 2003-04. This course will consider a series of issues regarding what evolutionary theory can tell us about the human personality. Topics will include the influence of genetic factors on personality traits and social behavior, the question of whether chimpanzees have personalities, and the relative contributions of culture and biology to the process of personality development. The relationship between sociobiology and personality psychology will be discussed.
Prerequisite: Open to juniors and seniors who have taken two 200-level units including 212 and excluding 205, or permission of instructor.
Distribution: Social and Behavioral Analysis

PSYC 347 Seminar. Culture and Social Identity
Gelernter
Examines the social and developmental aspects of identity with a special focus on ethnicity. The social construction of culture, interpersonal functioning, ethnic group differences, and expectations will be explored as they relate to identity development. The course includes a field research component.
Prerequisite: Open to juniors and seniors who have taken two 200-level units excluding 205, and including 245, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

PSYC 348 Advanced Topics in Personality and Social Psychology
NOT OFFERED IN 2003-04. An exploration of the interface between personality and social psychology. Areas of research that are best understood by considering both personal dispositions and social situations will be examined. Topics include: conformity, romantic relationships, and social anxiety.
Prerequisite: Open to juniors and seniors who have taken 210 and 212, or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

PSYC 349 Seminar. Nonverbal Communication
Aker
An examination of the use of nonverbal communication in social interactions. Systematic observation of nonverbal behavior, especially facial expression, tone of voice, gestures, personal space, and body movement. Readings include scientific studies and descriptive accounts. Issues include: the communication of emotion; cultural and gender differences; the detection of deception; the impact of nonverbal cues on impression formation; nonverbal communication in specific settings (e.g., counseling, education, interpersonal relationships).
Prerequisite: Open to juniors and seniors who have taken two 200-level units, excluding 205, and including 210.
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

PSYC 350 Research or Individual Study
Prerequisite: Open by permission to juniors and seniors.
Distribution: None
Semester: Fall, Spring Unit: 1.0

PSYC 351 Internship in Psychology
Staff
Participation in a structured learning experience in an approved field setting under faculty supervision. Analytical readings and paper(s) required.
Prerequisite: Open by permission to junior and senior majors. Two units above the 100-level that are most appropriate to the field setting as determined by the faculty supervisor (excluding 205).
Distribution: None
Semester: Fall, Spring Unit: 1.0

PSYC 360 Senior Thesis Research
Prerequisite: Completion of a research methods course by the end of the junior year, and by permission of department. See Academic Distinctions.
Distribution: None
Semester: Fall, Spring Unit: 1.0

PSYC 370 Senior Thesis
Prerequisite: 360
Distribution: None
Semester: Fall, Spring Unit: 1.0

For Credit Toward the Major
CLSC 300 Topics in Cognitive and Linguistic Sciences

Directions for Election
Majors in Psychology must take at least 9.25 units, including 205, one research methods course, three additional 200-level courses (at least one course numbered 207-212 and at least one course numbered 214-219), and two 300-level courses (at least one of which must be numbered 302-349). PSYC 299 does not count as one of the nine courses for the major. At least five of the courses for the major must be taken in the department.

The department offers eight research methods courses: 206R, 207R, 210R, 212R, 213R, 214R, 220R and 224R. In order to be eligible for Senior Thesis Research (PSYC 360), students must complete the research methods course by the end of the junior year.

A minor in Psychology consists of five units, including one course at the 300 level. Psychology 299, 350, and 351 do not count as one of the five courses for the minor. At least three of the courses for the minor must be taken in the department.

Students interested in an interdisciplinary major in neuroscience or cognitive and linguistic sciences are referred to the section of the catalog where these programs are described. They should consult with the directors of the neuroscience or cognitive and linguistic sciences programs.

Advanced placement credit: The unit given to students for advanced placement in Psychology does not count towards the minimum Psychology major or minor at Wellesley. Advanced Placement credit for statistics does not exempt students from PSYC 205.
Quantitative Reasoning Program

Director: Taylor (Economics)
Visiting Assistant Professor: Polito
Laboratory Instructor: Swingle

The ability to think clearly and critically about quantitative issues is imperative in contemporary society. Today, quantitative reasoning is required in virtually all academic fields, is used in most every profession, and is necessary for decision-making in everyday life. The Quantitative Reasoning Program is designed to ensure that Wellesley College students are proficient in the use of mathematical, logical, and statistical problem-solving tools needed in today’s increasingly quantitatively world.

The Quantitative Reasoning Program provides a number of services to the academic community. It oversees the administration of the Quantitative Reasoning Assessment (described below) and staffs QR 140, the basic skills QR course and some QR overlay courses. The Program also provides tutorial support to students and instructors of quantitative reasoning overlay courses. Finally, the Quantitative Reasoning Program provides curricular support to faculty interested in modifying existing courses or designing new ones so that these courses will satisfy the overlay component of the quantitative reasoning requirement.

The Quantitative Reasoning Requirement

All students must satisfy both components of the quantitative reasoning requirement: (1) the basic skills component and (2) the overlay course component. The basic skills component is satisfied either by passing the Quantitative Reasoning Assessment given during Orientation or by passing QR 140, the basic skills course that builds mathematical skills in the context of real-world applications. Students are required to satisfy the basic skills component in their first year so that they may enroll in the many courses for which basic quantitative skills (including algebra, geometry, basic probability and statistics, graph theory, estimation, and mathematical modeling) are a prerequisite.

The overlay component is satisfied by passing a QR overlay course. Such courses emphasize statistical analysis and interpretation of data in a specific discipline. The Committee on Curriculum and Instruction has designated specific courses in fields from across the curriculum as ones that satisfy the QR overlay requirement. These courses (listed below) may also be used to satisfy a distribution requirement.

QR 140 Introduction to Quantitative Reasoning
Polito, Taylor
In this course, students develop and apply mathematical, logical, and statistical skills to solve problems in authentic contexts. The quantitative skills emphasized include algebra, geometry, probability, statistics, estimation, and mathematical modeling. Throughout the course, these skills are used to solve real world problems, from personal finance to medical decision-making. A student passing this course satisfies the basic skills component of the Quantitative reasoning requirement. This course is required for students who do not pass the Quantitative Reasoning Assessment. Those who pass the Assessment but still want to enroll in this course must receive permission of the instructor.
Prerequisite: Permission of the instructor required for students with a score of 9.5 or above on QR Assessment.
Distribution: None
Semester: Fall, Spring Unit: 1.0

QR 180 Statistical Analysis of Education Issues
Taylor
What factors explain individual and group differences in student achievement test scores and educational attainment? Do inequities in financing public elementary and secondary schools matter in terms of student achievement and future employment? This course explores the theories and statistical methods used by social scientists and education researchers in examining these and other education issues. Analyzing data from the National Center for Education Statistics and other data sources, students evaluate issues including the importance of family and school resources, the effects of school tracking, and the returns to private versus public schools. In doing so, students learn to use a variety of statistical tools including regression analysis, and learn to use statistical software.
Prerequisites: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken or are taking MATH 101, PSYC 205 or QRS 199.
Distribution: Social and Behavioral Analysis. Fulfills the Quantitative Reasoning overlay course requirement.
Semester: Fall Unit: 1.0

QR 199 Introduction to Social Science Data Analysis
Kaufman (Economics), Swingle (laboratory), Taylor (Economics)
An introduction to the collection, analysis, interpretation, and presentation of quantitative data as used to understand society and human behavior. Using examples drawn from the fields of economics, political science, and sociology, this course focuses on basic concepts in statistics and probability, such as measures of central tendency and dispersion, hypothesis testing, and parameter estimation. The course draws on everyday applications of statistics and data analysis in an interdisciplinary context. Students must register for a laboratory section which meets an additional 70 minutes each week.
Prerequisite: Fulfillment of the basic skills component of the Quantitative Reasoning requirement. Not open to students who have taken ECON 199/PSYC 199/SOC 199. Not open to students who have taken or are taking MATH 101, PSYC 205 or QRS 180.
Distribution: Social and Behavioral Analysis. Fulfills the Quantitative Reasoning overlay course requirement. Does not satisfy the laboratory requirement.
Semester: Fall, Spring Unit: 1.0

Overlay Course Component

The following courses satisfy the overlay course component of the Quantitative Reasoning requirement. In order to register for a course on this list, a student must first satisfy the basic skills component of the Quantitative Reasoning requirement by passing either the Quantitative Reasoning Assessment or QR 140.

Note that this list is subject to change. Check individual department listings for information about when each course is offered.

147 Quantitative Reasoning
REL 104 Study of the Hebrew Bible/Old Testament
Bernet
Critical introduction to the Hebrew Bible/Old Testament, studying its role in the history and culture of ancient Israel and its relationship to ancient Near Eastern cultures. Special focus on the fundamental techniques of literary, historical, and source criticism in modern scholarship, with emphasis on the Bible's literary structure and compositional evolution.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 105 Study of the New Testament
Hobbs
The writings of the New Testament as diverse expressions of early Christianity. Close reading of the texts, with particular emphasis upon the Gospels and the letters of Paul. Treatment of the literary, theological, and historical dimensions of the Christian scriptures, as well as of methods of interpretation. The beginnings of the break between the Jewish movement and Judaism will be specially considered.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: Fall, Spring
Unit: 1.0

REL 108 Introduction to Asian Religions
Marlow
An introduction to the major religions of India, Tibet, China, and Japan with particular attention to universal questions such as how to overcome the human predicament, how to perceive ultimate reality, and what is the meaning of death and the end of the world. Materials taken from Islam, Hinduism, Buddhism, Confucianism, Taoism, and Shinto. Comparisons made, when appropriate, with Hebrew and Christian Scriptures.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

REL 140 Introduction to Jewish Civilization
Geller
NOT OFFERED IN 2003-04. A survey of the history of the Jewish community from its beginnings to the present. Exploration of the elements of change and continuity within the evolving Jewish community as it interacted with the larger Greco-Roman world, Islam, Christianity, and post-Enlightenment Europe and America. Consideration given to the central ideas and institutions of the Jewish tradition in historical perspective.
Prerequisite: None
Distribution: Historical Studies or Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 200 Theories of Religion
Marini
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

REL 202 Biblical Poetry
Bernet
A time to mourn, a time to dance: a survey of the diverse types of poetry in the Hebrew Bible/Old Testament. Psalms of divine praise, thanksgiving and appeal: lamentation, wisdom, prophetic oracle, and love songs. The poetry will be studied for its artistic beauty and as a lens on to the history and beliefs of biblical Israel.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Fall
Unit: 1.0

REL 205 The Book of Genesis
Bernet
NOT OFFERED IN 2003-04. The Book of Genesis contains the foundational biblical narratives: creation of the world, flood, growth of humanity and Israel’s ancestral accounts. The work will be approached from a literary and historical-critical point of view, with reference to relevant Ancient Near Eastern mythology.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 207 Goddesses, Queens, and Witches: Survey of the Ancient Near East
Bernet
An introduction to ancient Mesopotamia, Canaan and Anatolia, through a look at literature and material culture pertaining to women of the period and region. Topics include myths about, and prayers to, great goddesses such as Ishtar; laws of marriage and property; witches and witchcraft; the political institution of the Queen Mother; and the phenomenon of the Qadisha, the women dedicated to the cult and temple of various deities.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: Spring
Unit: 1.0

Hobbs
The world from which Christianity emerged was largely patriarchal and sexist, with a variety of attitudes towards sexual behavior and marriage. The Christian movement itself took several different approaches toward each of these issues, which found their way into the New Testament collection and thus became the foundation for a multiplicity of stances in later centuries. This variety in the documents will be examined, with special attention to their roots and their results.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Historical Studies
Semester: Fall
Unit: 1.0

REL 211 Jesus of Nazareth
Hobbs
NOT OFFERED IN 2003-04. Historical study of Jesus, first as he is presented in the Gospels, followed by interpretations of him at several subsequent stages of Christian history. In addition to the basic literary materials, examples from the visual arts and music will be considered, such as works by Michelangelo, Grunewald, J. S. Bach, Beethoven, and Rossini, as well as a film by Pasolini. The study will conclude with the modern “quest for the historical Jesus.”
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 212 Paul: The Controversies of an Apostle
Hobbs
NOT OFFERED IN 2003-04. Careful analysis of the thought of the Apostle to the Gentiles, and the significance of his work in making the transition of Christianity from a Jewish to a Gentile culture. Reconstruction of several versions of Christianity competing with Paul’s version.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy
Semester: N/O
Unit: 1.0

REL 214 Political Authority and Christians in the New Testament
Hobbs
From its beginnings, the Jesus-movement (including Jesus himself) was engaged in relations with the political authorities, often involving conflict. We will examine the variety of responses to political authority which are documented in the New Testament, each of which later became the basis for the political stances of diverse versions of Christianity.
Prerequisite: None
Distribution: Religion, Ethics, and Moral Philosophy or Historical Studies
Semester: Spring
Unit: 1.0

REL 215 Christian Spirituality
Elkins
NOT OFFERED IN 2003-04. A study of historical and contemporary texts that exemplify varieties of Christian spirituality. Historical works read include Augustine’s Confessions, Thomas à Kempis’s The Imitation of Christ, Teresa of Avila’s Autobiography, Bunyan’s The Pilgrim’s Progress, and The Way of the Pilgrim. Contemporary authors include Martin Luther King, Jr., Thomas Merton, and Kathleen Norris.

151 Religion
**Directions for Election**

In a liberal arts college, the study of religion constitutes an integral part of the humanities and social sciences. Recognizing religion as an elemental expression of human life and culture, past and present, the department offers courses in the major religious traditions of the world. These courses examine both the individual and the collective dimensions of religion and approach their subject from a variety of perspectives including historical and textual, theological, and social scientific.

The major consists of a minimum of nine units, at least two of which must be at the 300-level. It requires both a concentration in a specific field of study and adequate exposure to the diversity of the world’s religions and cultures. To ensure depth, a major must present a concentration of at least four courses in an area of study that she has chosen in consultation with and with the approval of her departmental advisor. This concentration may be defined, for example, by a particular religion, cultural-geographical area, canon, period of time, or theme. To promote breadth, a major must complete a minimum of two courses devoted to religious cultures or traditions that are distinct both from each other and from the area of concentration; again, she must gain the approval of her faculty advisor. All majors are urged to discuss their courses of study with their advisors before the end of the first semester of their junior year.

The minor consists of a minimum of five courses, including at least one seminar and no more than two 100-level courses. Three of the five courses, including a seminar, should be within an area of concentration chosen by the student in consultation with and with the approval of her departmental advisor.

In addition, it is strongly recommended that all majors and minors attend REL 399, Religion Department Colloquium, and that senior majors and minors elect it for credit. For some students, studies in the original language of religious traditions will be especially valuable. Hebrew, Arabic, and New Testament Greek are available. Religion 298 (New Testament Greek) and more advanced courses in Hebrew and Arabic can be credited toward both the major and the minor. Latin, Chinese, and Japanese are available elsewhere in the College; majors interested in pursuing language study should consult their advisors to determine the appropriateness of such work for their programs. Only the 200-level year of Hebrew or Arabic can be credited towards the department major or minor.

**RUSS 125/WRIT 125 Great Short Stories from Russia (in English)**

**Bishop**

Russian literature has given the world some of the best stories ever told, and this course surveys two centuries’ worth of them. Someone once quipped that all of twentieth-century Russian literature came out of Nikolai Gogol’s “Nose.” And so we begin with “The Nose” and other ridiculous stories by Gogol. We will go on and read some of the finest short stories of Chekhov and the Nobel Prize winner Ivan Bunin. The grotesque realism of Isaac Babel’s stories and the magical realism of Vladimir Nabokov’s also be within the scope of this course. We will conclude with the late- and post-Soviet stories of Tatiana Tolstaya and Nina Sadur. No prior knowledge of Russian language or literature is required. This course satisfies the requirements for Writing 125. Three periods.

Prerequisite: None

RUS 251 The Nineteenth-Century Russian Classics: Passion, Pain, Perfection (in English)
Hodge
An English-language survey of Russian fiction from the Age of Pushkin (1820-1830) to Tolstoy's mature work (1870s) focusing on the role of fiction in Russian history, contemporaneous critical reaction, literary movements in Russia, and echoes of Russian literary masterpieces in the other arts, especially film and music. Major works by Pushkin (Eugene Onegin, "The Queen of Spades"), Lermontov (A Hero of Our Time), Gogol (Dead Souls, "The Overcoat"), Pavlova (A Double Life), Turgenev (Fathers and Sons), Tolstoy (Anna Karenina) and Dostoevsky (Crime and Punishment) will be read. Taught in English. Two periods.

RUS 255 Seven Decades of Russian Cinema (in English)
Bishop
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
The masterpieces of Russian film from the 1920s to the 1990s will be screened, analyzed, and discussed. Students will explore the famous techniques and themes developed by legendary Russian/Soviet filmmakers, including Eisenstein, Vertov, the Vasiliev brothers, Chukhrai, Askoldov, Tarkovsky, Mikhailov-Konchalovsky, Abuladze, and Mikhailov. We will consider the role of this popular art form in its social and political contexts. Guest lecturers will comment on specific issues. Taught in English. Two periods.

RUS 272 Politically Correct: Ideology and the Nineteenth-Century Russian Novel (in English)
Hodge
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
Is there a "politically correct" set of responses for artists active under a repressive regime? We examine various Russian answers to this question through an intensive analysis of the great ideological novels at the center of Russia's historic social debates from the 1840s through the 1860s. The tension between literary Realism and political exigency will be explored in the fictional and critical works of Herzen, Turgenev, Chernyshhevskiy, Goncharov, Dobrolyubov, Dostoevsky, and Pisarev. Representative works from the nonliterary arts will supplement reading and class discussion. Taught in English. Two periods.
Prerequisite: None

Unit: 1.0

RUS 276 Fedor Dostoevsky: The Seer of Spirit (in English)
Weiner
Probably no writer has been so detached and adored, so demonized and deified, as Dostoevsky. This artist was such a visionary that he had to reinvent the novel in order to create a form suitable for his insights into the inner life and his prophecies about the outer. To this day readers are mystified, outraged, enchanted, but never unmoved, by Dostoevsky's fiction, which some have tried to brand as "novel-tragedies," "romantic realism," "polyphonic novels," and more. This course challenges students to enter the fray and explore the mysteries of Dostoevsky themselves through study of his major writings. Taught in English. Two periods.

Unit: 1.0

RUS 277 Lev Tolstoy: Russia's Ecclesiast (in English)
Partan
An odyssey through the fiction of the great Russian novelist and thinker, beginning with his early works (Seven Stanzas) and focusing on War and Peace and Anna Karenina, though the major achievements of Tolstoy's later period will also be included (A Confession, The Death of Ivan Ilyich). Lectures and discussion will examine the masterful techniques Tolstoy employs in his epic explorations of human existence, from mundane detail to life-shattering cataclysm. Important film adaptations of Tolstoy's works, including Bondarchuk's monumental War and Peace (1967), will be screened. Students are encouraged to have read the Maude translation of War and Peace (Not in Critical Edition) before the semester begins. Taught in English. Two periods.

RUS 278 The Stories and Plays of Anton Chekhov (in English)
Weiner
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
In the stories and plays of Anton Chekhov, the man's lusting for falsehood meets with the artist's uncompromising search for perfection. A century later Chekhov's beautiful prose and haunting drama live on. We will read a representative sampling of Chekhov's stories from the early farces to the mature masterpieces and examine the four great plays: The Seagull, The Three Sisters, Uncle Vanya, and The Cherry Orchard. We will also view performances of his plays on video and, if possible, live. Course counts toward the major in Theatre Studies. Taught in English. Two periods.
Prerequisite: None

RUS 282 What's Love Got to Do With It? Sex and Family in Twentieth-Century Russian Literature (in English)
Bishop
Tolstoy famously wrote, "All happy families are alike; each unhappy family is unhappy in its own way." Beginning with his controversial novella, The Kreutzer Sonata, we will discuss love and family in Russian literature, a problem which becomes particularly complicated in the twentieth century. We will explore issues of androgyny in the writings of the symbolists, the regimentation of sex in Zamyatin's anti-utopian novel We, questions of disease and sterility in Solzhenitsyn's Cancer Ward and adultery in Pasternak's Dr. Zhivago. We will revisit the eternal literary theme of generational conflict, specifically in the form of mothers and daughters in the writings of Tsvetaeva and Pasternak. We will also view and analyze films such as Bed and Sofa and Commissar. Taught in English. Two periods.
Prerequisite: None
Distribution: Language and Literature

Unit: 1.0

RUS 284 Magical Realism: Russia and Beyond (in English)
Weiner
This course examines fictions whose basic reality would be familiar if not for the introduction of a magical element that undermines commonplace notions about what constitutes reality in the first place. The magical element can be a demon, talisman, physical transformation, miraculous transition in space or time, appearance of a second plane of existence, revelation of the unreality of the primary plane of existence, etc.
Students will read Solzhenitsyn's The Psalm of Death, Bely's Petersburg, Bulgakov's The Master and Margarita, Kafka's Metamorphosis, Queneau's The Blue Flowers, Marquez's One Hundred Years of Solitude, Pynchon's The Crying of Lot 49, Sokolow's School for Poets, Murakami's Wild Sheep, China, and short stories by Borges, Cortazar, and Nabokov. Taught in English. Two periods.

RUS 286 Vladimir Nabokov (in English)
Weiner
NOT OFFERED IN 2003-04. OFFERED IN 2004-05.
An examination of the artistic legacy of the great novelist, critic, lepidopterist, and founder of the Wellesley College Russian Department. Nabokov's works have joined the canon of twentieth-century classics in both Russian and English literature. Students will explore Nabokov's language novels (Lolita, Pnin, Pale Fire) and the authorized English translations of his Russian works (The Defense, Despair, Invitation to a Beheading). Taught in English. Two periods.
Prerequisite: None
Distribution: Language and Literature

Directions for Election

Students majoring in Russian should consult the chair of the department early in their college career. For information on all facets of the Russian Department, please visit www.wellesley.edu/Russian/rusdept.html.

Students who cannot take 101 during the fall semester are strongly encouraged to take 101 during Winter Session; those interested in doing so should consult the chair early in the fall term.

Advanced courses on Russian literature and culture are given in English translation at the 200 level above 252; corresponding 300-level courses offer supplemental reading and discussion in Russian. Please refer to the descriptions for 355, 356, 372, 376, 377, 378 and 386 above.

The major in Russian Language and Literature

A student majoring in Russian must take at least eight units in the department above RUSS 102, including:
1. language courses through 302;
2. RUSS 251;
3. two 200-level courses above 251; and
4. one unit of 300-level coursework above 302 other than 350, 360, and 370.

RUSS 101 and 102 are counted toward the degree but not toward the Russian major.

Thus, a student who begins with no knowledge of Russian would typically complete the following courses to major in Russian: 101 and 102, 201 and 202, 301 and 302; 251; two 200-level literature courses above 252; and one unit from 300-level literature courses, 310, or 320.

The Minor in Russian Language

A student minoring in Russian must take at least five units in the department above RUSS 102, at least one of which must be at the 300 level.
Russian Area Studies

AN INTERDEPARTMENTAL MAJOR

Directors: Kold (Anthropology), Weiner (Russian)

Russian Area Studies majors are invited to explore Russia and the lands and peoples of the former Soviet Union through an interdisciplinary study program.

A major in Russian Area Studies consists of a minimum of eight units. Majors are normally required to take four units of the Russian language above the 100 level, including Russian 301-302. In addition to those four units of the Russian language above the 100 level, a major's program should consist of at least four units drawn from Russian literature, history, political science, anthropology, economics, and sociology. Majors are required to take at least two units of 300-level coursework, at least one of which should be outside of the Russian Department. At least three of a major's units should be outside of the Russian Department. Prospective majors are strongly encouraged to take Bread and Salt: Introduction to Russian Civilization (HIST 105) as a basic introduction to Russian Area Studies.

Majors are encouraged to take advantage of various programs of study in the former Soviet Union, including the opportunity to spend a semester or year on exchange at a university in Russia or one of the other former Soviet republics. Majors who are contemplating postgraduate academic or professional careers in Russian Area Studies are encouraged to consult with faculty advisors, who will assist them in planning an appropriate sequence of courses. For more information on the Russian Area Studies program, students may consult the Wellesley College Russian Area Studies Web pages: www.wellesley.edu/Russian/RAS/rashome.html.

The following courses are available for majors in Russian Area Studies:

RAST 212/ES 212 Lake Baikal: The Soul of Siberia
Moore (Biological Sciences) and Hodge (Russian)

NOT OFFERED IN 2003-04. OFFERED IN 2004-05. The ecological and cultural values of Lake Baikal — the oldest, deepest, and most biotically rich lake on the planet — are examined. Lectures and discussion in spring prepare students for the three-week field laboratory taught at Lake Baikal in eastern Siberia in August. Lectures address the fundamentals of aquatic ecology and the role of Lake Baikal in Russian literature, history, art, music, and the country’s environmental movement. Laboratory work is conducted primarily off-of-doors and includes introductions to the flora and fauna, field tests of student-generated hypotheses, meetings with the lake’s stakeholders, and tours of ecological and cultural sites surrounding the lake. Students may register for either RAST 212 or ES 212. Credit will be given in the department in which the student is registered. This course does not count toward the minimum major in Biological Sciences. Not offered every year. Subject to Dean’s Office approval.

Prerequisite: BISC 111, RUSS 101, and permission of the instructors. Preference will be given to students who have also taken HIST 105.

SOC 102 The Sociological Perspective: An Introduction to Sociology
McCormack
Thinking sociologically enables us to make observations and offer insights about the social world. In this course, we will become familiar with some of the major substantive topics that sociologists study, as a way of developing a critical capacity to understand how the social world works. We will analyze a variety of sociological themes as they emerge in some of the most exciting contemporary research focusing especially on the study of social problems, social inequality, and popular culture.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring
Unit: 1.0

SOC 103 Social Problems of Youth: An Introduction to Sociology
Imber
Perspectives on the creation of and response to the problems of young people. The problem of generations and relations between young and old. Perceptions of personal freedom and social responsibility with respect to public issues that directly affect youth including alcohol, tobacco, drugs, gambling, guns, and sexuality.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 109 Race and Ethnicity: An Introduction to Sociology
Srinivas
Introduction to sociology with special attention to issues of race and ethnicity. Overview of the key concepts, theoretical frameworks, and methods in the field and exploration of major questions in the sociological study of race and ethnicity. One major course goal is to heighten awareness of the social patterns, institutions, and structures that are an integral, unquestioned part of everyday life and to provide tools to analyze and criticize them. Examination of the ways in which groups in multiethnic societies around the globe come together and interact over time.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 138 Conformity and Deviance: An Introduction to Sociology
NOT OFFERED IN 2003-04. Why are some behaviors, differences, and people stigmatized and considered "deviant" while others are not? Why do some people appear to conform to social expectations and rules while others are treated as different and deviant? This course examines theoretical perspectives on deviance, which offer several kinds of answers to these questions. Focus on the creation of deviant categories and persons as an interactive process: how behaviors are labeled, how people enter deviant roles and worlds, how others respond to deviance, and how deviants cope with these responses. Descriptions of conformity and deviance as inescapably linked.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall

SOC 200 Classical Sociological Theory
Imber
Origins of modern sociology, beginning with nineteenth-century founders, Comte, Spencer, and Marx. Examination of specific sociological ideas and theories, considering such questions as: How is society possible? What are the non-contractual aspects of contract? Who commands authority and how does it change? Exploration of the canon of classical sociological theory with special emphasis on the place of women and African Americans in the history of that canon.
Prerequisite: One 100-level unit. Required of all majors.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 201 Contemporary Social Theory
Cashman
An overview of important twentieth-century social and cultural theories. Special emphasis on critical theories of modernity and postmodernity and on application of theories to empirical case studies.
Prerequisite: 200. Required of all majors.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 202/ANTH 202 Introduction to Human Rights
Cashman, Merry (Anthropology)
Human rights is one of the most powerful approaches to social justice in the contemporary world, yet it is a rapidly developing and changing system. This course offers a critical analysis of human rights as a social, cultural, and legal system. It explores the historical and philosophical origins of the contemporary human rights system and its growth and development as a global social movement over the last few decades. This includes the diversification of rights to include social, economic, and cultural rights and the collective rights of indigenous peoples. The course examines the ongoing controversy between human rights claims to universalism in contrast to assertions of cultural difference. Special topics include the rise of non-governmental human rights organizations, humanitarianism as an ideology, debates on military humanitarian interventions, the emergence of violence against women as a human rights issue, and the forms and types of justice in societies that have experienced large-scale violence. Students may register for either SOC 202 or ANTH 202. Credit will be given in the department in which the student is registered.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0
SOC 203/AFR 203 Introduction to African American Sociology
Rollins
NOT OFFERED IN 2003-04. This course is an introduction to the African American intellectual traditions within the discipline of sociology. Beginning with an examination of the contributions of the founders of these traditions (DuBois, Johnson, Frazier, Cox et al.), the course then focuses on some of the main contemporary discussions: the Black family, Afrocentric sociology, the class versus race debate, and feminist sociology. Throughout the semester, African American sociology will be discussed within the contexts of traditional Eurocentric sociology and the particular political-economic structure in which it exists. Students may register for either SOC 203 or AFR 203. Credit will be given in the department in which the student is registered.
Prerequisite: 102 or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

SOC 205/WOST 211 African American Families and Social Equality
Hertz
African American families are undergoing dramatic changes in social, political, and economic arenas: the rise of the dual-worker family, the increasing number of single mothers, the demands of family responsibilities placed on gay and lesbian families, and growing numbers of couples having children at older ages. The new economy poses real challenges for American parents as the social and economic gaps between families continue. As women dedicate a greater proportion of their time to the workplace, more children are cared for outside the home. How do children view parents’ employment? How do families function when they have only limited hours together? What does fatherhood mean in these families? Using a provocative blend of social science, novels, and memoirs, we will examine how gender, race, ethnicity, and social class shape the experience of family life in the contemporary United States. Students may register for either SOC 205 or WOST 211. Credit will be given in the department in which the student is registered.
Prerequisite: None. Not open to students who have taken WOST 111.
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

SOC 206/AFR 208 Women in the Civil Rights Movement
Rollins
An examination of the role of women in the classical Civil Rights movement. Particular attention will be paid to the interplay between the social factors of the women (e.g., their class, religiosity, race, regional background, age) and their perspectives/behavior within the movement. Essentially, women’s impact on the Civil Rights movement and the effects of the movement on the women involved are the foci of this course. Students may register for either SOC 206 or AFR 208. Credit will be given in the department in which the student is registered.
Prerequisite: None
Distribution: Historical Studies or Social and Behavioral Analysis
Semester: Fall Unit: 1.0

SOC 209 Social Inequality
NOT OFFERED IN 2003-04. Inequalities that pertain to class, race, and gender in American society. Critical examination of the “achievement ideology” – the deeply rooted and widely held belief that any person can achieve upward social mobility by putting forth sufficient effort and hard work. Social-structural factors that either aid or inhibit an individual’s capacity to occupy a given social status. Policy initiatives aimed to mitigate social inequalities. Students will have the opportunity to learn about these issues through volunteering for a social-service organization in the metropolitan Boston area.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring

SOC 211 Society and Culture in Latin America
NOT OFFERED IN 2003-04. Broad overview of Latin American cultures and societies and of the Latino experience in the U.S. Focus on the history of Latin America and the Caribbean; its political, religious, social, and cultural institutions; and on how social life in the region varies by race, class, and gender. Social and economic incorporation of Latinos in the U.S. Regional integration and the ways in which economic and political life in North and South America mutually influence one another.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0

SOC 213 Sociology of Sexuality
McGonigle
Approaches to the sociological study of sexuality, historically, and across cultures. Examination of various theoretical perspectives on sexuality; the relationship between race, class, gender, and sexuality; issues of power and sexuality, including rape, pornography, and prostitution. Development of a critical and analytic perspective on sex and sexuality.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

SOC 215 Sociology of Popular Culture
Srinivas
An examination of the expression, production, and consequences of various forms of popular culture in comparative-historical and contemporary social contexts. Analysis of the relation between social class and popular culture in history; the production, meaning, and consumption of popular culture in contemporary societies, and the global diffusion of American popular culture in the modern world-system.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

SOC 216 Sociology of Mass Media and Communications
Srinivas
Analysis of the interplay between social forces, media, and communication processes in contemporary society. Significance of historical changes from oral to written communication, development and structure of modern forms of mass media such as radio, television, and film; political economy of the mass media, rise of advertising and development of consumer culture; mass media in the formation of cultural representations of other societies and cultures, role of the media in the process of identity formation, and in the democratic process. Discussions of the rise and social implications of the Internet. Students will use computer technologies to analyze mass media.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring Unit: 1.0

SOC 218 Religion in Contemporary Society
Levitt
This course explores the relationship between society and religious institutions, beliefs, and practices. Some of the topics we will cover include whether or not modern society is becoming more secular, the place of religion in politics, religious conversion, fundamentalism, new religious movements, the globalization of religion, and religiously-motivated terrorism. These themes will be explored using classical and contemporary sociological theories and empirical data.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

SOC 221 Globalization
Levitt
McDonald’s, Starbucks, and the Gap are now common features on the street corners of Europe, South America, and Asia. Arnold Schwarzenegger enjoys unprecedented popularity in the Far East while Americans are fascinated by karaoke and Indian films. Does this globalization of production and consumption mean that people all over the globe are becoming the same? In this course, we will explore the globalization of social organization. We will examine the different ways in which economic, political, and cultural institutions are organized in the increasingly interdependent world in which we live, compare them to those in the past, and explore their consequences.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall Unit: 1.0

SOC 235 Business and Social Responsibility
NOT OFFERED IN 2003-04. Examination of large business organizations in terms of their social accountability to various stakeholders. Rise of a “new social contract” with its expectations about the financial profitability as well as the social responsibilities of modern business, including protection of the natural environment, maintenance of a diverse workforce, and specific responsibility to the communities in which companies do business. Explanations of why businesses sometimes deviate from these expectations and how they create and manage impressions of social responsibility among their stakeholders.
Prerequisite: One 100-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O Unit: 1.0
SOC 246 Immigration
NOT OFFERED IN 2003-04. Comparative, historical look at the immigrant experience. We explore theories of migration and differences between voluntary and involuntary population movements. We examine immigrants' political, economic, religious, and social integration into their host countries and their continued ties to their homelands over time. The experiences of second-generation immigrants will also be covered. Course is designed around a series of field-work exercises to be carried out in Framingham, Mass. Students will be asked to complete at least three small projects, involving data collection and analysis, on the history of immigration to the city and immigrants' social and economic incorporation.

SOC 259 The Sociology of International Justice
Cushman
Examination of the formal and informal strategies used by societies to achieve justice in the face of human rights violations, political crimes, and war. Focus on just war theory, war crimes tribunals, truth and reconciliation commissions, amnesties, apologies, and forgiveness as modes of justice in a variety of settings in the modern world. Analysis of the globalization of human rights and international justice through case study of the International Criminal Court. Students will participate in moot court exercises which simulate legal reasoning and formal legal procedures in international settings.

Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 290 Propaganda and Persuasion in the Twentieth Century
NOT OFFERED IN 2003-04. A comparative historical analysis of propaganda and strategies of persuasion in twentieth-century national and social movements, and in social institutions. Cases to be examined include the United States during World War I, Nazi Germany, the Soviet Union, Cold War propaganda, the former Yugoslavia, museums, mass media institutions and advertising, the anti-gun control lobby. Students will use computer technologies to prepare analyses of visual and textual media.

Enrollment limited to 25 students.

Prerequisite: None; Preference given to juniors and seniors.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 301 Methods of Social Research
Swingle
Focus on quantitative methods of data collection and analysis. Beginning with modes of data presentation, students will practice with existing data sets to describe and explain social variation in different populations. Building on this extension of basic statistics (QR 199), this course will be devoted primarily to an examination of the logic of survey analysis from the development of hypotheses and construction of a survey instrument to the analysis and reporting of results. Discussion sessions and exercises will address issues of sampling, validity, and reliability; models of causation and elaboration; data coding, cleaning, and analysis. The course will also review multiple methods of research, content analysis, triangulation, and case studies.

Prerequisite: QR 199, or permission of instructor. Required of all Sociology majors.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 306/WOST 306 Women and Work
Hertz
Aside from new technology and increasing global interdependence, the biggest force for change in the U.S. economy has been the growing diversity of the American labor force. The goal of this course is to understand the impact of gender and racial diversity on the nature of work in America. We will give special attention to four key aspects of change: (1) the dynamics of gender and race in the workplace; (2) the tensions between work/family and gender equity; (3) the struggle to integrate women into male-dominated occupations and professions; and (4) the challenges for women in leadership roles. Each student will select an occupation, which they will study in-depth. Students may register for either SOC 306 or WOST 306. Credit will be given in the department in which the student is registered.

Prerequisite: One course in ANTH, SOC, ECON, or WOST at the 100- or 200-level or permission of the instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 309 Seminar. Topics in Inequality
McCormack
Topic for 2003-04: Gender, Race, and Poverty. This seminar will explore the material and symbolic relationships between gender, race, and poverty in the contemporary United States. We will examine the following: the feminization of poverty; the everyday lives of the poor; contemporary discourses on poverty, morality, and welfare; racism, gender discrimination, and public policy; the stigma of welfare; the effects of welfare reform; and the often contradictory ways in which we imagine and value motherhood, families, and children.

Prerequisite: At least one sociology course or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 311/WOST 311 Seminar. Family and Gender Studies: The Family, the State, and Social Policy
Hertz
Analysis of problems facing the contemporary U.S. family and potential policy directions for the new millennium. Discussion of the transformation of the American family including changing economic and social roles for women and expanding varieties of family types (such as single mothers by choice and lesbian/gay families). Sexuality, teen pregnancy, reproductive issues, day care, the elderly, divorce, welfare, the impact of work on the family, equality between spouses, choices women make about children and employment, and the new American dreams will be explored. Comparisons to other contemporary societies will serve as a foil for particular analyses. Students are expected to work in groups to analyze the media's portrayal of family/gender stories and selected legal cases.

Students may register for either SOC 311 or WOST 311. Credit will be given in the department in which the student is registered.

Prerequisite: Preference will be given to students who have taken family or gender related courses in anthropology, history, psychology, political science, sociology, or women's studies.
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

SOC 314 Medical Sociology and Social Epidemiology
Imber
Definition, incidence, and treatment of health disorders. Topics include: differential availability of health care; social organization of health delivery systems; role behavior of patients, professional staff, and others; attitudes toward terminally ill and dying; movements for alternative health care.

Prerequisite: One 200-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: Spring
Unit: 1.0

SOC 316 Migration: A Research Seminar
NOT OFFERED IN 2003-04. This class uses the experience of migration to teach students how to carry out field research. Following a basic theoretical introduction to the subject, each student chooses her own research topic. The course readings will be tailored around students’ particular interests. Students will then learn how to develop research questions, identify respondents, conduct interviews, and analyze and present data. We will also learn how to write research papers and to present our work publicly.

Prerequisite: One 200-level unit or permission of instructor.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 317 Interrogating the Internet: Critical Perspectives on a New Medium
NOT OFFERED IN 2003-04. The principal aim of the course is to provide students with the tools necessary to evaluate and assess the quality and veracity of information on the Internet. What is the relation of the Internet to other forms of mass communication? What is the impact of the Internet on cognition and ways of seeing? What is the nature of social relationships on the Internet? How is the Internet used and misused in the social production of knowledge? How does the rapid expansion of information on the Internet affect the possibility of making universal truth claims? How is the Internet used as a medium of propaganda and persuasion? Students will work in the social science media lab to develop multimedia projects which critically examine Internet content.

Prerequisite: Open to all majors who have taken 215 or 216. Open to juniors and seniors only by application.
Distribution: Social and Behavioral Analysis
Semester: N/O
Unit: 1.0

SOC 321 Globalization: A Research Seminar
Levitt
This course uses the topic of globalization to teach students to carry out research. Following a basic introduction to the topic, each student will
design and carry out a research project of her own. She will learn how to define research questions, identify and carry out appropriate methodologies, use various types of data sources, collect and analyze data, and write a final report. Course readings are tailored to students’ particular question. Interview and field-work based projects are strongly encouraged.

Prerequisite: A background in social science. Not open to first-year students.

Distribution: Social and Behavioral Analysis

SOC 325 Seminar. Social Suffering and the Problem of Evil

NOT OFFERED IN 2003-04. An examination of the contribution of sociology to the understanding of the problem of evil. Focus on defining and studying evil as a social phenomenon; the social construction of evil in competitive-historical perspective; modernity theory and evil; post-modern social theory and evil; personal and institutional indifference to evil. Comparative examination of case studies of genocide, torture, and forms of personal and institutional cruelty in the twentieth century.

Prerequisite: 102, 103, 138, 201, 290. Open to juniors and seniors only; Application for admission to the seminar is required. Students without the prerequisites in sociology but with background in religion, philosophy, or history are encouraged to apply.

Distribution: Social and Behavioral Analysis

SOC 332 Sociology of Film

Seminars

How does our experience of movie going in the contemporary United States compare with the experience across space and time and what can such comparison tell us about cinema as a mass medium? In this course we will address these and other related questions with a view to understanding cinema through its experience rather than through textual analysis of the film itself. This course will adopt an evolutionary and comparative approach to the study of popular cinema and its consumption. Field assignments will involve going to the movies.

Prerequisite: One 100-level unit or permission of instructor.

Distribution: Social and Behavioral Analysis

SOC 333 Seminar. Special Topics in Popular Culture

NOT OFFERED IN 2003-04. Comparative and interdisciplinary approach to the study of “popular culture” which is cross-cultural and historical. Review of the major theoretical debates and significant empirical works that have informed the field. Particular focus on the social creation of cultural products and the production-consumption dialectic. Examination of agency and institutions involved in the construction of popular culture, the culture wars, and symbolic struggles that have shaped it, as well as attention to the consumption of such products and the expressive culture attendant to such consumption.

Prerequisite: Permission of instructor.

Distribution: Social and Behavioral Analysis

SOC 348 The Sociology of Conservatism

NOT OFFERED IN 2003-04. An examination of conservative movements and ideas in terms of class, gender, and race. Historical survey and social analysis of such major conservative movements and ideas as paleo-conservatism, neo-conservatism, and compassionate conservatism. The emergence of conservative stances among women, minorities, and media figures. The conservative critique of American life and its shaping of contemporary national discourse on morality, politics, and culture.

Sociology is the systematic and scientific study of social life, including informal and formal organization and the multiple ways that people collectively give meaning to their behavior and lives. The scope of sociology ranges from the analysis of passing encounters between individuals in the street to the investigation of broad-scale social change. Sociology brings a unique perspective to the study of institutional and collective forms of social life, including the family, mass media and popular culture, social movements, migration, the professions, and global systems and processes. Research is conducted across many cultures and historical periods in order to illuminate how social forces such as social class, gender, race, and ethnicity, age, group membership, and culture shape human experience.

A major in Sociology consists of at least nine units. The core of the major consists of four required courses (SOC 200, 201, 301 and QR 199) which emphasize basic concepts, theory, and research methods that are the foundation of the discipline, but are also useful in a range of social sciences and professions. Permission to take a required unit elsewhere for the major must be obtained from the department chair in advance. Students must take at least five additional units exploring the range of substantive topics in sociology (for example social problems, deviance, immigration, social change and development, race and ethnicity, medicine and epidemiology, mass media, and popular culture).

Choosing courses to complete the degree and the major requires careful thought and planning. Sociology majors are encouraged to explore the full range of disciplines and subjects in the liberal arts, and they should consult a faculty member to select courses each term and to plan a course of study over several years. It is recommended that students complete the sequence of theory and methods courses by the end of their junior year if they want to conduct independent research or honors projects during their senior year. If a major is anticipating being away during all or part of the junior year, the theory (SOC 200 and 201) and research methods course (SOC 301) should be taken during the sophomore year, or an alternative plan should be arranged with her advisor.

A minor in Sociology (six units) consists of any 100-level unit, Sociology 200 and four additional units, one of which must be a 300-level unit. The plan for this option should be carefully prepared; a student wishing to add the Sociology minor to the major in another field should consult a faculty advisor in Sociology.

Human Rights Concentration in Sociology and Anthropology

The departments of Sociology and Anthropology offer a Concentration in Human Rights in conjunction with a major in either department. Students electing this concentration will major in either Sociology or Anthropology and choose a major advisor within the respective departments. Students will take three specific courses in the concentration that will be counted toward the major in either department.

ANTH 202/SOC 202 Introduction to Human Rights

ANTH 260 Gender, Culture, and Human Rights

SOC 259 The Sociology of International Justice

Students interested in the Human Rights Concentration should contact Thomas Cashman, Department of Sociology or Sally Merry, Department of Anthropology. A student electing this concentration is encouraged, in consultation with her advisor, to take other courses in the college curriculum dealing with human rights, to engage in independent research (SOC or ANTH 350, 360 and 370) and to participate in internship experiences in human rights organizations in the United States and abroad.
Department of Spanish

Professor: Agosín , Gascón-Vera, Roses (Chair), Vega
Associate Professor: Ramos, Renjilian-Burgy
Assistant Professor: Hall, Halleck

Instructor: Rubio
Senior Lecturer: Hall, Syverson-Stork
Lecturer: Dater

Courses are normally conducted in Spanish; oral expression is stressed. The department reserves the right to place new students in the courses for which they seem best prepared regardless of the number of units they have offered for admission. Courses 101-102 and 201-202 are counted toward the degree but not toward the major.

Qualified juniors are encouraged to spend a semester or a year in a Spanish-speaking country, either with Wellesley’s consortium program in Córdoba, Spain, or another approved program. To be eligible for study in Córdoba for one or two semesters in Wellesley’s “Programa de Estudios Hispanicos en Córdoba” (PRESHCO), a student must be enrolled in 241 or higher-level language or literature course the previous semester.

SPAN 101-102 Elementary Spanish

Introduction to spoken and written Spanish; stress on interactive approach. Extensive and varied activities, oral presentations, cultural readings and recordings, media laboratory exercises. Three periods. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: Open to all students who do not present Spanish for admission.
Distribution: None
Semester: Fall and Spring

SPAN 201-202 Intermediate Spanish

Intensive review of all language skills and introduction to the art, literature, and cultures of Spain and Latin America. Emphasis on oral and written expression and critical analysis. Media laboratory exercises. Three periods. Each semester earns one unit of credit; however, both semesters must be completed satisfactorily to receive credit for either course.

Prerequisite: Two admission units in Spanish or 101-102.
Distribution: Language and Literature
Semester: Fall and Spring or Wintersession (202 only)

SPAN 241 Oral and Written Communication

Practice in oral and written expression at the advanced level. Through frequent presentations, film viewing, and creative essays, students will develop the ability to use idiomatic Spanish comfortably in various situations. Students will thoroughly review grammar and self-test through a series of linguistic exercises. The course also features the reading and interpreting of literature in Spanish. Two periods per week.

Prerequisite: 201-202 or four admission units or permission of instructor.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

SPAN 242 Literary Genres of Spain and Latin America

Gascón-Vera, Vega

A course to serve as a transition between language study and literary analysis; speaking and writing organized around interpretations of different genres by Hispanic authors; creative writing; oral presentations on current events relating to Spain and Latin America; a review, at the advanced level, of selected problems in Spanish structure. Two periods.

Prerequisite: Open to students presenting three admission units or permission of instructor.
Distribution: Language and Literature
Semester: Fall, Spring
Unit: 1.0

SPAN 243 Intensive Spanish Review

NOT OFFERED IN 2003-04. Review of spoken and written Spanish for native and near-native students who are already conversant in Spanish, but who have not engaged in extensive formal language study. Readings will be taken primarily from Latino writers and texts dealing with Latino experiences in the U.S. Emphasis will be placed on revision of written work and syntactical and grammatical analysis.

Prerequisite: Permission of instructor.
Distribution: Language and Literature
Semester: N/O
Unit: 1.0

SPAN 245 Ethnic Passions

Vega

A close reading and viewing of selected written and performance texts by Latino/a artists, with particular focus on the intersection of categories of race/ethnicity and sexuality; Selected artists— all writing or performing in the last two decades (Francisco X. Alarcón, Luis Alfaro, Gloria Anzaldúa, Ana Castillo, Sandra Cisneros, Juan Genizamé, Cherri Moraga, Ela Troyano and others) — will be examined in light of their role within (or rejection by) the Latino literary "canon." Topics for analysis include contemporary debates regarding the nature and construction of Latino identity; the relationship between ethnic and sexual categories; and Latino nuances within essentialist/social constructionist debates regarding gender, sexual and ethnic identities.

SPAN 248 Spain and the US: Five Hundred Years of Close Encounters

Ramos

An exploration of the historical, intellectual, creative and artistic connections between Spain and the US from Columbus’ diaries to the present. The United States and Spain, so far apart geographically, have intersected at decisive moments in history for more than five hundred years. Despite the relatively high level of familiarity each society has of the other, mutual misunderstandings have been frequent. This course explores the roots of this dissonance by looking closely at a few specific episodes in history and culture that have shaped reciprocal perceptions. The class offers readings and materials drawn from history, architecture and literature and concludes with an analysis of the role of Wellesley College in the long-running intercultural dialogue.

HIST 206 From Conquest to Revolution: The History of Latin America

Directions for Election
Students who begin with 101-102 [100] in college and who wish to major should consult the chair in the second semester of their first year.
A minimum of eight units must be presented for the Spanish major and must include 241 or 242 and at least two 300-level units, including a seminar during the senior year. The major must ordinarily include SPAN 252 (Christians, Jews and Mosques: The Spirit of Spain in Its Literature) and SPAN 251 (Freedom and Repression in Latin American Literature) as well as SPAN 300

163 Spanish
(Honor, Monarchy and Religion in the Golden Age Drama) or SPAN 302 (Cervantes).

Upon approval from the department, up to four courses per semester taken during study abroad in Spain or Latin America may be counted toward the major. The goals of a comprehensive program are: (a) oral and written linguistic proficiency, (b) ability to interpret literary texts and (c) a general understanding of the evolution of Hispanic cultures.

For students interested in an interdisciplinary approach to the study of Latin America, also available is the interdepartmental major in Latin American Studies, which allows students to choose from a list of courses in seven different departments, including Spanish. Majors devise their own programs in consultation with the directors of Latin American Studies. Students are referred to the Latin American Studies Interdepartmental Program listing for further information.

**AP:** A student may receive one unit of credit and satisfy the foreign language requirement with a grade of 4 or 5 on either or both of the AP Spanish exams. She will lose the AP credit(s) if she takes SPAN 202 or a lower-numbered course. AP credit does not count toward the major in Spanish.

**Teacher Certification:** Students interested in obtaining certification to teach Spanish in the Commonwealth of Massachusetts should consult Ms. Renjilian-Burgy and Ms. Beatty of the Department of Education.

**Theatre Studies**

**AN INTERDEPARTMENTAL MAJOR**

Program Director: Hussey

Instructor: Arciniegas, Hussey, Loewit

Visiting Instructor: Lopez, Roux

Director of Theatre: Hussey

Production Manager: Loewit

Advisory Committee: Ko (English), Masson (French), Ward (German), Genctur (Psychology), Renjilian-Burgy (Spanish), Rosenwald (English)

The Theatre Studies major is both an academic field of study and a practical application of that study. The purpose of the major is to provide students with a theoretical knowledge and appreciation of the history and literature of the theatre. Additionally, students are instructed and given "hands on" experience in production and promotion of theatrical events. The theatre is one of the oldest art forms in existence, and students learn valuable information about the way various disparate societies have evolved throughout the ages. Students are expected to work on productions, as performers and technicians. The Theatre Department actively tries to cultivate well-rounded theatre students who are knowledgeable in all areas of theatre.

Early consultation with the director is essential, because some of the relevant courses are not offered every year and careful planning is necessary. In addition to working with the director of the theatre programs, students will be encouraged to consult with other members of the faculty familiar with the interdepartmental Theatre major.

Students majoring in THST must take a minimum of nine units, including ENG 127 and THST 203. Two of the nine must be at the 300 level. At least four of the nine must come from within the THST department. The remaining five may be drawn from any related department (see list below). Developments in the theatre arts are a result of stage experiments, and because the theatre performance is an expression of theatre scholarship, it is expected that students planning a major in theatre will elect to complement formal study of theatre with practical experience in the extracurricular production program of the Wellesley College Theatre and related on-campus producing organizations. Students may also remain on campus over the summer or Wintersession to gain experience with Wellesley Summer Theatre (the professional wing of the academic department) for credit.

All students are encouraged to participate in the 250 and 350 individual study offerings in order to pursue their particular area of theatrical interest.

Students majoring in Theatre Studies may elect to take at least one resident semester of concentrated work in the discipline to supplement and enrich their work at Wellesley. They may attend the National Theatre Institute at the Eugene O'Neill Theatre Center, another institution in the Twelve College Exchange Program, or one of the many London programs offering intensive study in their discipline. Additionally, extensive courses are offered in the Drama program at MIT.

**THST 204 Introduction to Acting Arciniegas**

This course is intended for any and all levels of experience. Students are introduced to the fundamentals of contemporary stage performance, as devised by such stage theoreticians as Constantine Stanislavsky, Lee Strasbourg and Sanford Meisner. Instruction focuses on the proper methods for breaking scenes down into their component units or "beats," staging them for clarity of purpose, and performing them truthfully in the immediate present before a live audience. Students perform in every class with a rotating roster of partners, emphasizing group learning and mutual support in the pursuit of an individual acting aesthetic. Performance material is drawn from the work of contemporary playwrights researched by the students or recommended by the instructor.

**Prerequisite:** None

**Distribution:** Arts, Music, Theatre, Film, Video

**Semester:** Fall, Spring

**THST 205 Advanced Scene Study (Historic Periods) Arciniegas**

**NOT OFFERED IN 2003-04. OFFERED IN 2004-05.** This course is intended to give the advanced theatre student experience in the performance styles of other periods. Focusing on Classical, Elizabethan, Restoration and Victorian dramatic literature, students retrace the development of the Western European theatrical tradition in practical terms. Particular emphasis is placed upon developing the performance skills necessary for remaining faithful to the acting style of the period while ensuring relevance and accessibility to a contemporary audience.

**Prerequisite:** 204

**Distribution:** Arts, Music, Theatre, Film, Video

**Semester:** N/O. Offered in 2004-05

**Unit:** 1.0

**THST 206 Directing and Dramaturgy Hussey**

**Topic for 2003-04:** The New Alliance for the Next Century. This course studies the creative skills of the director in conjunction with the analytical skills of the dramaturge. Particular emphasis will be placed on the creation of a production, the effect on those that follow it, and the effect history has on interpretation of works in this century. Students will be encouraged to develop their own unique "directorial vision." Students will be expected to provide probing intellectual questions to each other while collab-
orating. Dramatic material will be drawn from a variety of world literature with emphasis placed on women playwrights. Students will be given opportunities to work with professional actors in a guest artist “lab” format. Weekly.

THST 210 Echoes of the Homeland
Hussey, Lopez, Roach
Topic for 2003-04: Oral Interpretation of Writers from Ethnic Traditions. Have you ever wondered what is lost in the process of assimilation into American culture? In this interpretation class, students are introduced to the literature of Hispanic, Celtic, and African American cultures. Through prose, poetry, and drama — stories and characters are brought to vivid life. Students will hone their interpretive skills while exploring issues of identity, immigration, and the female experience. Material will be taken from folklore, mainstream literature, and emerging writers of today.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video Semester: Fall Unit: 1.0

THST 212 Representations of Women on Stage
Lopez
OFFERED IN 2003-04. NOT OFFERED IN 2004-05. This course looks at specific examples of the representation of women on the dramatic stage during various eras in a variety of cultures, focusing primarily on what a public and popular art says and implies about women: their “nature,” their roles, their place in the society reflected. Consideration is given to the male dominance in both playwrighting and performance in historic cultures. Texts will be chosen from a broad spectrum of dramatic world literature.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video Semester: Spring Unit: 1.0

THST 220 Classic Plays and Players
Lopez
NOT OFFERED IN 2003-04, OFFERED IN 2004-05. This course, taught by playwright Melinda Lopez, surveys dramatic texts as realized in performance (including the plays of Shakespeare). Films and video recordings of live performances approximating the original production style will be utilized along with modern interpretations. Class discussion will also incorporate analysis and comparison of women and minorities who have shaped and created the theatre as actors, directors, designers, and producers. Analytical and critical writing skills are emphasized in the development of written critiques. Students will contrast and compare contemporary events with the events in dramatic texts and will incorporate that knowledge into class projects such as adaptations, research papers, or original plays. Guest artists from the theatre world occasionally visit to illuminate other perspectives.

Prerequisite: None
Distribution: Arts, Music, Theatre, Film, Video Semester: Fall, Spring Unit: 1.0

THST 221 Introduction to Playwriting
Harrington
This course will teach basic playwriting skills implemented in class exercises and at-home writing assignments. This hands-on, practical approach will require writing one short play each week. Emphasis is on experimentation, innovation, risk taking and process. A spirit of fun, innovation and creativity will dominate this workshop format. Each class meeting will incorporate reading student work aloud with commentary from the instructor and the class. Students will listen, critique and develop the vocabulary to discuss plays, structure, story and content. Each student will begin to connect her dramatic voice and intellectual passion. Not offered every year. Subject to Dean’s Office approval.

WOST 108 The Social Construction of Gender
Marshall
This course discusses the ways in which the social system and its constituent institutions create, maintain, and reproduce gender dichotomies. Gender is examined as one form of social stratification and studied in the context of identity formation, emphasizing the relationship among gender, race, ethnicity, and social class. The processes and mechanisms that institutionalize gender differences will be considered in a variety of contexts: political, economic, religious, educational, and familial. We will examine some deliberate attempts to change gender patterns.
Prerequisite: None
Distribution: Social and Behavioral Analysis
Semester: Fall
Unit: 1.0

WOST 120 Introduction to Women's Studies
Crefe, Patel, Phillips, Reverby
Introduction to the interdisciplinary field of women's studies with an emphasis on an understanding of the "common differences" that both unite and divide women. Beginning with an examination of how womanhood has been represented in myths, ads, and popular culture, the course explores how gender inequalities have been both explained and critiqued. The cultural meaning given to gender as it intersects with race, class, ethnicity, and sexuality will be studied. This course also exposes some of the critiques made by Women's Studies scholars of the traditional academic disciplines and the new intellectual terrain now being mapped. Consideration will be given to one of the central dilemmas of contemporary feminist thinking: the necessity to make gender both matter and not matter at the same time.
Prerequisite: None

Unit: 1.0

WOST 207 Nature, Culture, and Bodies
NOT OFFERED IN 2003-04. This course considers how the "nature" of bodies is constructed in key cultural sites. Because science has come to be the site of authoritative claims about nature, this course will pay particular attention to scientific and medical constructions of bodies. How do categories of race, sex, class and sexuality come to be known and lived as natural features of the human body? By what processes are some bodies made normal, or pathological? The course also considers how specific technologies—from clothing to cosmetic surgery—participate in changing how we live and understand the nature of bodies. Key topics addressed in the course include: the historical scientific construction of race, medical constructions of reproduction, the gendering and culturing of the body through fashion, and internet embodiment.

WOST 211/SOC 205 American Families and Social Equality
Hertz
American families are undergoing dramatic changes in social, political, and economic arenas: the rise of the dual-worker family, the increasing number of single mothers, the demands of family rights by gay and lesbian families, and growing numbers of couples having children at older ages. The new economy poses real challenges for American parents as the social and economic gaps between families continue. As women dedicate a greater proportion of their time to the workplace, more children are cared for outside the home. How do children view parents' employment? How do families function when they have only limited hours together? What does fatherhood mean in these families? Using a provocative blend of social science, novels, and memoirs, we will examine how gender, race, ethnicity, and social class shape the experience of family life in the contemporary United States. Students may register for either WOST 211 or SOC 205. Credit will be given in the department in which the student is registered.

WOST 216 Women and Popular Culture
Phillips
This course examines women's representation, production, and participation in U.S. popular culture from the late nineteenth century to the present. Through the use of historical studies, film, television, music, and literature, we will discuss how race, gender, ethnicity, class, and region have impacted women's encounters with popular and mass culture. We will ask why the cultural industry has viewed women as critical to the consumption and dissemination of popular culture. We will discuss popular culture's impact on challenging and/or reinforcing gender differences. Topics include women and modernity, cities and leisure, the rise of a consumer culture, women and technology, sexuality, and feminism and performance practices.

WOST 220 American Health Care History in Gender, Race, and Class Perspective
Reverby
Traditional American medical history has emphasized the march of science and the ideas of the "great doctors" in the progressive improvement in American medical care. In this course we will look beyond just medical care to the social and economic factors that have shaped the development of the priorities, institutions, and personnel in the health care system in the United States. We will ask how have gender, race, and class affected the kind of care developed, its differential delivery, and the problems and issues addressed.
Prerequisite: 108 or 120 or 222
Distribution: Historical Studies
Semester: Fall
Unit: 1.0

WOST 222 Women in Contemporary American Society
Reverby
This course examines the transformations and continuities in the lives of women in the United States since World War II. We will look critically at the so-called "happy days" of the 1950s, the cultural and political "revolutions" of the 1960s and early 1970s, and the shifts in consciousness over the last five decades. The rise and changes in feminism and the women's movement will receive special attention. Emphasis will be placed on the differing communities of women and how they have balanced the so-called "private," "public," and "civic" spheres of their lives.

WOST 235 Cross Cultural Sexuality
Patel
This course will examine and explore sexuality from cross-cultural perspectives, focusing on the production of sexuality in the context of different disciplines—literature, anthropology, history, and sociology. The course will address the intersections between sexual and socio-cultural, political, and economic discourses. How is sexuality constructed in relation to ideological, social, and political considerations? Are there sexual "norms" established, circulated, and maintained in different cultures and at different historical junctures? What, if anything, constitutes sexual otherness in different cultures? How is this negotiated in a global economy and how is it represented under variable conditions? How do different descriptions of sexual behavior interact with the discourses of identity politics and queerness as constituted in the United States?

WOST 248 Asian American Women Writers
NOT OFFERED IN 2003-04. This course surveys the historical development of Asian American women's literature. Among the questions central to our examination: How is Asian American writing positioned within the larger field of American literature (as well as within the subfields of other ethnic minority literatures)? Is there such a thing as a "canon" in Asian American literature? The first half of this course will survey the literature of Asian American women writers since the early twentieth century (including autobiography, fiction, and poetry) in their social and historical contexts. During the second half of the semester we will look at the work of contemporary writers and interrogate, for example, the commercial success of such writers as Maxine Hong Kingston and Amy Tan.
Prerequisite: None
Distribution: Language and Literature

Unit: 1.0

WOST 249 Asian American Women in Film and Video
NOT OFFERED IN 2003-04. This course will serve as an introduction to Asian American film and video and begin with the premise that there is a distinct American style of Asian "Orientalist" representation by tracing its development in...
classic Hollywood film over the last 75 years. We examine the politics of interracial romance, the phenomenon of "yellow face" drag, and the different constructions of Asian American femininity, masculinity, and sexuality. In the second half of the course, we look at the production of what has been named "Asian American cinema" in the past 15 years. Our focus is on contemporary works, drawing upon critical materials from film theory, feminist studies, Asian American studies, history, and cultural studies.

Preerequisite: One course in Women's Studies or film/visual arts or Asian American topics; or permission of instructor. Not open to students who have taken [348].

WOST 275 Passing: Transforming Identities in History and Representation

NOT OFFERED IN 2003-04. Passing from one identity to another is a social phenomenon that has existed for centuries. Forms of passing include minority, ethnic, religious, or racial community members passing into majority communities; women passing as men; gays passing as straight; people with disabilities passing as able-bodied, etc. This course explores the social and political economies that demand or facilitate different forms of passing and the conditions under which identities shift. Questions include: under what circumstances do individuals and groups pass for survival, and under what conditions do some people come back out? What are the fears and popular reactions that arise with regard to passing? How is the phenomenon of passing represented in different media? If identities become more fluid, is there less pressure to pass?

WOST 280 Gender and Writing in South Asia

Patel

Beginning with proto-nationalism (1780s) and closing with the late nation-state (1998), this course explores the ways in which gender and writing come together in South Asia. Questions include: Under what circumstances did different genres of writing evolve? How did different genres of early nationalist writing engage with masculinity or femininity? How was the home, house, or the private configured in writing around the 1900s? How was gender articulated in relation to tradition and modernity? How were "feminist" issues addressed in different genres of writing? Writers whose works might be read in this class include Sakawat Hussain, Premchand, Saadaat Hasan Manto, Ismat Chughtai, Q. Hider, Kiran Nagarkar, and Mahasweta Devi. Movies might include Bandini, Pyasa, Umrao Jan Ada, Mother India, and Fire.

WOST 306/SOC 306/ Women and Work

Hertz

Aside from new technology and increasing global interdependence, the biggest force for change in the U.S. economy has been the growing diversity of the American labor force. The goal of this course is to understand the impact of gender and racial diversity on the nature of work in America. We will give special attention to four key aspects of change: (1) the dynamics of gender and race in the workplace; (2) the tensions between work/family and gender equity; (3) the struggle to integrate women into male-dominated occupations and professions; and (4) the challenges for women in leadership roles. Each student will select an occupation, which they will study in-depth. Students may register for either WOST 306 or SOC 306. Credit will be given in the department in which the student is registered.

Preaggregate: One course in ANTH, SOC, ECON, or WOST at the 100- or 200-level or permission of the instructor.

WOST 308 The Changing Law, The New Family and The State

Citron

This course examines the legal standing of family membership. As families have become more diverse, the law becomes an arena of political challenge. These new realities -- domestic partnerships, reproductive technologies, and the rise of single mothers -- have created a contested terrain. For example, what legal formalities do same-sex partners use to mimic the legal protections automatically afforded to their married counterparts? How do committed partners dissolve a marriage-like relationship outside of divorce proceedings? Using legal cases, media portrayals, and public policy statements we will examine how U.S. states are differentially responding to new family forms.

Preaggregate: Juniors and seniors only. Preference will be given to students who have taken family or gender related courses in anthropology, history, psychology, political science, sociology, or women's studies.

WOST 311/SOC 311 Seminar. Family and Gender Studies: The Family, the State, and Social Policy

Hertz

Analysis of problems facing the contemporary U.S. family and potential policy directions for the new millennium. Discussion of the transformation of the American family including changing economic and social roles for women and expanding varieties of family types (such as single mothers by choice and lesbian/gay families). Sexuality, teen pregnancy, reproductive issues, day care, the elderly, divorce, welfare, the impact of work on the family, equality between spouses, choices women make about children and employment, and the new American dreams will be explored. Comparisons to other contemporary societies will serve as a foil for particular analyses. Students are expected to work in groups to analyze the media's portrayal of family/gender stories and selected legal cases. Students must register for either WOST 311 or SOC 311. Credit will be given in the department in which the student is registered.

Preaggregate: Preference will be given to students who have taken family or gender related courses in anthropology, history, political science, psychology, sociology, or women's studies.

WOST 312 Seminar. Feminist Inquiry

Reverb

Topic for 2003-04: "Coalitions, Institutions and Individual Identities." This seminar will consider how individuals and groups who differ by gender, class, religion, sexuality and/or race, formed coalitions to achieve social transformations. Critical moments in differing institutional structures will be examined. Questions will cover: under what conditions are coalitions formed, what holds them together, how successful have they been in transforming institutions and individual identities. Political movements and institutions to be explored include abolitionism, suffrage, trade unions, schools, civil rights, anti-racism movements, and student activism. It is recommended that students have taken courses in methods and theory before enrolling in this seminar.

WOST 313 Fieldwork in Women's Studies

Staff

This is a supervised, independent research project, resulting in a research paper, documentary, policy initiative, creative arts presentation, or
other research product approved of by the supervisor. This research project, developed in conjunction with the student's major adviser, will have a significant experiential component focusing on women's lives. Students are required to spend either the summer before their senior year or the first semester of their senior year gathering data on a topic of their choice. Topics should be part of their substantive concentration. Students may (1) work in an organization, (2) work with activists or policy makers on social change issues or social policy issues, or (3) they may design their own fieldwork experience.

Prerequisite: Open to majors and minors only.
Distribution: Social and Behavioral Analysis
Semester: Fall, Spring  Unit: 1.0

WOST 314 Seminar. Global Feminism

NOT OFFERED IN 2003-04. The course will be structured as a seminar on global feminism and its impact on women around the world and their lives. Relying on feminist scholarship about women and the state, the course will begin with a consideration of the ways in which citizenship is always gendered and constructed by race, class, and sexuality. Then the course will turn to particular issues such as: the role of women and Islam; labor "opportunities" enabled by globalization; the emergence of socially and politically conservative right-wing women's movements that empower women within rigidly patriarchal norms; the marketing of women's bodies for an international audience; and the possibility of an international feminist coalition, in particular, following up with the issues raised by the Beijing Conference for Women in 1996. This course fulfills the Capstone requirement for students enrolled in Spring 2003 only.

Prerequisite: Open to juniors and seniors only.
Distribution: Social and Behavioral Analysis
Semester: N/O  Unit: 1.0

WOST 317 Seminar. History of Sexuality: Queer Theory

Patel This seminar will introduce the concepts central to queer theory, starting with Foucault and Laqueur and discussions of sexual difference and deviance. It will examine queerness in its various manifestations and practices: butch-femme, transgendering, cross-dressing, bisexuality, and third gender. The conflicts and continuities between identity politics and queer identities will be explored in the context of racialization, class, and different-abledness and under the markers of nationhood and subalternity. Finally, what impact do the debates on the production of sexuality in different sites (African American, Native American, Latino, Asian American and non-U.S.) and historical periods have on theories of queerness?

Prerequisite: Open to juniors and seniors with any course on gender, race or sexuality.
Distribution: Epistemology and Cognition or Language and Literature
Semester: Fall  Unit: 1.0

WOST 319 Seminar. Women and Militarism Phillips This course examines women's experiences in and representations of war and militarism since 1945. The core of the course will focus on the relationship between the state's mobilization for war, social policy, and women's cultural production within these processes. We will consider how race, gender, ethnicity, and class have shaped women's representations in the military, imperialism, decolonization, citizenship, and anti-violence. Course materials will include film, literature, art, music, and autobiographies. Topics include: the relationship between the postwar ideology of domesticity and war representations of women, war and violence against women, women's strategies for peace, women's voices in foreign policy, gender and imperialism, and feminists' critique of violence.

Prerequisite: One 100- or 200-level course in women's studies.
Distribution: Social and Behavioral Analysis
Semester: Fall  Unit: 1.0

WOST 324 Seminar. History, Memory, and Women's Lives

NOT OFFERED IN 2003-04. If a woman speaks of her experiences, do we get closer to the "truth" of that experience? How can oral history provide a window into the lives of women in the past and what does it close off? Analysis of methodological and theoretical implications of studying women's lives through oral histories as a way to end the silences in other historical forms. Special attention to be paid to other genres – history, fiction, ethnographies – as a foil to explore the strengths, and limitations, of the oral history approach.

A major in Women's Studies requires nine units taken both within the department and through the cross-listed courses taught in other departments. Of these, two units must be 200-level courses (not counting 350, 350H, 360, or 370). Not more than two units can be 100-level courses.

Students are encouraged to enter the department through one of the three core units: WOST 108 (The Social Construction of Gender), WOST 120 (Introduction to Women's Studies), or WOST 222 (Women in Contemporary American Society). Majors must take one of these units as a required course. Apart from this one required unit (108, 120 or 222), majors must elect at least three other units offered within the Women's Studies department, of which one should be a seminar. Students majoring in Women's Studies must elect four of the nine units in such a way that they form a "concentration," i.e., have a focus or central theme in common. Such concentration should include relevant method and theory units in the area of concentration, and must be discussed with and approved by a Women's Studies faculty advisor.

The Capstone Experience in Women's Studies

As of the class of 2001, all majors will be required to select a capstone experience, with the guidance of their adviser, from the following three options offered in 2003-04: Students should begin to think about which option would best fit their concentration when they declare the major. They must declare their option by the end of their junior year.

Option 1: WOST 312 (Seminar) Feminist Inquiry. Each year the seminar will be a different special topic. Spring 2004 the topic is "Coalitions, Institutions and Individual Identities" taught by Professor Reverby. Spring 2005 the topic is "The Body in Feminist Theory" taught by Professor Cred.

Option 2: WOST 314 (Seminar) Global Feminism NOT OFFERED 2003-04

Option 3: WOST 315 Fieldwork in Women's Studies

Option 4: WOST 360/370 Senior Thesis

A minor in Women's Studies consists of five courses, of which one must be chosen from among 108, 120, or 222, and of which one must be a 200-level course (not 350 or 350H) offered within the department. A total of at least three courses must be taken within the Women's Studies department. Minors must devise a three-course "concentration" (see above) in consultation with a Women's Studies faculty advisor (the chair or any of the four Women's Studies faculty members). Not more than one unit can be a 100-level course.

Women's Studies AP Policy

Women's Studies does not allow students to count AP credits towards the fulfillment of the major or minor.

Directions for Election

A major in Women's Studies offers an opportunity for the interdisciplinary study of women from the perspectives of the humanities, sciences, and social sciences. Women's Studies majors seek an understanding of the new intellectual frameworks that are reshaping thought about the meaning and role of gender in human life. Majors pursue knowledge of gendered experiences in diverse cultures and across time, examining the ways in which race, social class, sexuality, and ethnicity are constitutive of that experience.
WRIT 125 01, 02, 03/ENG 120 Critical Interpretation

Brogan, Shelley, Tyler (English)

An examination of classic poetic texts in English from the Renaissance to the modern period—Shakespeare, Donne, Wordsworth, Dickinson, Yeats, Bishop, and others. A course designed to increase power and skill in critical interpretation and critical writing. This course satisfies both the Writing 125 and the English 120 requirements. Includes a third session each week.

Prerequisite: Open to all first year students but primarily recommended for prospective English majors.
Distribution: Language and Literature
Semester: Fall, Spring  Unit: 1.0

WRIT 125 04, 05/ARTH 100 Introduction to the History of Art: Ancient and Medieval Art Bedell, Rhodes (Art)

A foundation course in the history of art, part 1.

From the ancient Egyptian pyramids to the Buddhist temples of India, from the mosques of Arabia to the Gothic cathedrals of Europe, the course introduces the visual cultures of the Ancient and Medieval worlds using key monuments and issues as the focus. Students in this section of ARTH 100 will attend the same twice-weekly lectures as the other ARTH 100 students, but their assignments will be different, and they will attend two special Writing 125 conferences each week. Through writing about art, students in 100/125 will develop skills in visual and critical analysis. This course satisfies the Writing 125 requirement and counts as a unit towards a major in Art History, Architecture, or Studio Art.

Prerequisite: Open to all first year students.
Distribution: Arts, Music, Theatre, Film, Video  Semester: Fall  Unit: 1.0

WRIT 125 07/CAMS 120 Women in Film Wood (The Writing Program)

To a large extent, film is about watching, and much film is about watching women. This course provides basic instruction in film analysis, and then makes a foray into theories of cinema. How does the camera work, not only to display its characters, but also to direct the gaze upon them? What are the relationships between the visual spectacle and the progress of the film's story? Writing assignments ask students to observe, analyze, interpret, and explain. Films will include early films (Chaplin, Arzner), later films (American Beauty), films of the 40s, and something by Hitchcock. This course satisfies the Writing 125 requirement and counts as a unit towards a major in Cinema and Media Studies. Includes a third session each week.

Prerequisite: Open to all first year students.
Distribution: Arts, Music, Theatre, Film, Video  Semester: Fall  Unit: 1.0

WRIT 125 08/CLCV 120 Comedy; Old, New, and Ever Since Calcitizzi (Classical Studies)

The comic plays of Greece and Rome are the ancestors of sitcom and soap opera, stage show and screenplay. Aristophanes offers fantasy, political satire, and fierce social commentary. Menander, Plautus, and Terence all feature domestic intrigues, ridiculous dilemmas, and stock characters. We will read and view some of their plays, along with Shakespeare’s The Comedy of Errors, Goldsmith’s She Stoops to Conquer, Sheridan’s The Rivals, Oscar Wilde’s The Importance of Being Earnest, and A Funny Thing Happened on the Way to the Forum. This course satisfies the Writing 125 requirement and counts as a unit towards the major in Classical Studies. Includes a third session each week.

Prerequisite: Open to all first year students.
Distribution: Language and Literature  Semester: Fall  Unit: 1.0  WRIT 125 09, 10 The Role of Stories Schwartz (The Writing Program)

This course looks at the rich and various roles stories play. We look at the short story as a literary form, examining the techniques by which writers reveal their visions. This section is appropriate for students who have not done much writing in high school or who perhaps lack confidence in writing (but who love to read stories).

Prerequisite: None
Distribution: None  Semester: Fall  Unit: 1.0

WRIT 125 11 Crime and Punishment in America: Its Roots and Its Future Viti (The Writing Program)

In this course students will read and write about some well-known criminal law cases, including Regina v. Dudley, Faman v. Georgia (the United States Supreme Court’s decision striking down the death penalty as unconstitutional), and the Bobby Joe Lester case. We will read essays about the criminal justice system (in particular, about the death penalty as it currently exists and is applied in the United States); excerpts from the work of Helen Prjean and Norman Mailer (The Executioner’s Song); and writings of advocates for and opponents of the death penalty. Finally, we will screen and critique the films Dead Man Walking and Hurricane.

Prerequisite: None
Distribution: None  Semester: Fall  Unit: 1.0

WRIT 125 12 Watching the Supreme Court Viti (The Writing Program)

In this course, students will read and write about landmark United States Supreme Court opinions, and in doing so, locate important themes and trends in the Court’s decisions, beginning with the power of judicial review in Marbury v. Madison, and jumping ahead to more recent decisions about the Fourteenth Amendment and equal educational opportunity (Brown v. Board of Education), privacy rights (Griswold v. Connecticut, Roe v. Wade), executive privilege (U.S. v. Nixon), and federalism (Bush v. Gore).

We will also read and analyze essays and reports by journalists and legal scholars who comment on the Supreme Court, including Laurence Tribe, Bob Woodward, Nina Totenberg, Jeffrey Rosen and Jeffrey Toobin.

Prerequisite: None
Distribution: None  Semester: Fall  Unit: 1.0

WRIT 125 13 Women and Memoir: Shaping a Life Johnson (The Writing Program)

This course explores how writers select and fashion events from their own lives to provide context for their ideas. For women writers especially, this “revision” of personal experience has proved a powerful forum for addressing artistic, social, and political issues. Readings will include essays and selections from autobiographies by Virginia Woolf, Maya Angelou, Alice Walker, Maxine Hong Kingston, and Joan Didion.

Prerequisite: None
Distribution: None  Semester: Fall, Spring  Unit: 1.0

WRIT 125 14 Leaving a Trace: Women’s Lives at Crossroads Johnson (The Writing Program)

The instinct to leave a trace of a life, as Virginia Woolf notes, is the first stage in the journey from private to public voice. Yet how do writers develop the courage to write for an audience? This course focuses on young women at crucial life junctures, who often resist social pressures in order to define voice and identity on their own terms. Drawing on memoir, such as Susanna Kaysen’s Girl Interrupted, as well as journals by Anne Frank and Etty Hillesum, the course examines how social and psychological adversity shape and often strengthen self-expression.

Prerequisite: None
Distribution: None  Semester: Fall, Spring  Unit: 1.0

WRIT 125 15 The Image of Islam in Western Literature, Media, and the Arts Rollman (History)

Through critical evaluation of selected texts and images produced by European and American travelers, academics, journalists, and artists during the nineteenth and twentieth centuries, the course will explore how cultural stereotypes have had, and continue to have, a formative impact on the way Islam, Muslims, and the Middle East are understood in the West. Students will analyze the processes by which these representations and assumptions are created and perpetuated, their impact in specific historical contexts, and their relevance to broader issues of intercultural communication and understanding.

Prerequisite: None
Distribution: None  Semester: Fall, Spring  Unit: 1.0

WRIT 125 16 Mothers and Daughters in Asian-American Literature Lee (English)

The site of rebellion, resistance, identification, and desire, the mother-daughter relationship has been a crucial one in works of Asian-American literature from the 40s and 50s to the present. Through their silences and their stories, their labors and their lucanies, mothers seem to hold the key to their daughters’ selves. What can account for this overwhelmingly consistent pattern? Why are mothers so often seen as the bearers of culture and history? Why are the protagonists of so many Asian-American novels and poems daughters rather than sons? This course will explore these and other questions in
WRIT 125 20 Science in Movies: Fact or Fiction

Königer (Biology)

Who has not seen and enjoyed the characters of mad, bad, dangerous, useless or heroic scientists in movies such as Frankenstein, Jurassic Park, Outbreak, or Medicine Man? This course looks at how these and other movies can shape the way people view science and scientists and their roles in the larger society. Using films and critical material, we will analyze how the portrayal of science and scientists has changed over time and how movies can influence people's perceptions of the importance of science and the scientific process in solving current problems.

WRIT 125 21 Jane Austen, Novel and Film

Fisher (English)

Patricia Rozema's recent film, Mansfield Park, stirred controversy, while Ang Lee's Sense and Sensibility, with its screenplay by Emma Thompson, won critical awards. The contemporary interpretation of Jane Austen's fiction is rarely so lively as in film adaptation. This translation highlights both generic differences between novels and films, as aesthetic media, between Jane Austen and her critics, and between provincial England in the early nineteenth century and international filmmaking in contemporary times. Through reading and writing about several original works (Persuasion, Sense and Sensibility, Mansfield Park) and their corresponding film versions, we will explore both the affinities and disjunctions between Austen's novels and their cinematic reinterpretations.

WRIT 125 22/ENG 127 Modern European and American Drama

Rosenthal (English)

A study of late nineteenth- and twentieth-century European and American drama and dramatic theory. First, discussion of some major European dramatists and kinds of theater. Among the dramatists: Ibsen, Shaw, Brecht, Artaud, Ionesco, and Weiss. Among the kinds of theater: realistic theater, epic theater, the theater of cruelty, and the theater of the absurd. Next, discussion of diverse examples of post-1945 American drama, including such ensembles and dramatists as Maria Irene Fornés, Lorraine Hansberry, Holly Hughes, the Bread and Puppet Theater, the Living Theater, Adrienne Kennedy, Tony Kushner, and Anna Deavere Smith. Consideration of at least one Wellesley College theater production, and perhaps of some off-campus theater. This course satisfies the Writing 125 requirement and counts as a unit towards a major in English. Includes a third session each week.

WRIT 125 24/RSIS 125 Great Short Stories from Russia

Bishop (Russian)

Russian literature has given the world some of the best stories ever told, and this course surveys two centuries' worth of them. Someone once quipped that all of twentieth-century Russian literature came out of Nikolai Gogol's "Nose." And so we begin with "The Nose" and other ridiculous stories by Gogol. We will go on to read some of the finest short stories of Chekhov and the Nobel Prize winner Ivan Bunin. The grotesque realism of Isaac Babel's stories and the magical realism of Vladimir Nabokov's also lie within the scope of this course. We will conclude with the late and post-Soviet stories of Tatiana Tolstaya and Nina Sadur. No prior knowledge of Russian language or literature is required. This course satisfies the requirements for Writing 125. Includes a third session each week.

WRIT 125 03/ARTH 101 Introduction to the History of Art: Renaissance to the Present

Rhodes (Art)

A foundation course in the history of art, part 2. From Michelangelo to media culture, this course introduces the visual cultures of Europe, Africa, and the Americas, beginning with the Renaissance, using key issues and monuments as the focus of discussion. Students in this section of ARTH 101 will attend the same twice-weekly lectures as the other ARTH 101 students, but their assignments will be different, and they will attend two special Writing 125 conferences each week. Through writing about art, students in 101/125 will develop skills in visual and critical analysis. WRIT 125 04/EDUC 102 Education in Philosophical Perspective
Hawes (Education)
This course is guided by questions such as: What is education? How do our own ideas and experiences of education relate to the ideas, experiences, and knowledge of education held by others? How can we find and try out new ideas and assumptions about education? How can we be more aware of the group and cultural influences in learning? The focus will be on the perspective and processes of learning and teaching, including the educational aims and values that may apply. We will use a variety of classical and contemporary writings as starting points in our investigations. This course satisfies the Writing 125 requirement and counts as a unit towards distribution requirement and towards the Education minor. Includes a third session each week.

WRIT 125 05 The Art of Fiction
Schwartz (The Writing Program)
This course examines the basic elements of short fiction, but it might also be titled "How Writers Write." In conjunction with reading and writing about short stories, we'll study commentaries about the art of fiction by writers such as Flannery O'Connor, Henry James, and Raymond Carver. We will approach these texts as a source of inspiration and instruction for our own efforts to master the writing process. In order to better appreciate a short story writer's technical and artistic strategies, we'll occasionally try our hand at some fictional exercises. Note: This is not a fiction writing course; the fiction writing exercises are assigned in conjunction with analytical papers.

WRIT 125 06 Magic and Loss: The Contemporary Native-American Short Story
Schwartz (The Writing Program)
Over the last 25 years, some of the finest short stories in our national literature have been written by Native-American writers. These stories are informed by a sense of magic and loss, a blending of mythic traditions with the bitter realities of Native-American life. We will consider how writers such as Leslie Marmon Silko, Louise Erdrich, and Sherman Alexie incorporate, and pay homage to, the oral storytelling tradition in their highly modern short stories.

WRIT 125 12 Literature into Film
Ko (English)
This course will explore the translation of literary works into film. We will think not only about how film adaptations reflect the original literary works, but also about the ways in which films stand on their own as independent works of art. The films to be studied in relation to the literary work will likely include: Martin Scorsese's adaptation of Edith Wharton's The Age of Innocence, Baz Luhrmann's Romeo and Juliet, both Clueless and Emma (with Gwyneth Paltrow), and versions of Richard Wright's Native Son.

WRIT 125 14 Writing About the Viet Nam War
Iwanaga (The Writing Program)
Typically, the literature of war, like its movies, depicts the experiences of the soldiers who waged it, as though they are the only ones authorized to write about it. But war affects many other people besides GIs. In this course, in addition to The Things They Carried by Tim O'Brien, we will read poetry, memoirs, short stories, and novels about the Viet Nam war written by and about nurses, Vietnamese combatants and refugees, Latino and African American soldiers, and their families.

WRIT 125 15 Five American Women Fiction Writers
Fisher (Writing)
Through in-depth reading of the novels and short stories of five significant writers, this course will explore the rich ways in which twentieth-century American women from different cultural backgrounds have understood and written about women's experience. Students will critically evaluate a range of fiction by Willa Cather, Zora Neale Hurston, Flannery O'Connor, Maxine Hong Kingston, and Louise Erdrich in order to discover both the common and disparate themes of women's writing in twentieth-century America. Writing assignments on such texts as Cather's My Antonia, Kingston's The Woman Warrior, and Erdrich's Love Medicine will focus both on literary techniques and on social dynamics such as gender, race, ethnicity, class, and regional identification.

Vega (Spanish)
Beginning with the Islamic eleventh century Dove's Neck-Ring by Ibn Hazm of Cordoba, and the Christian twelfth century Art of Courly Love by Andreas Capellanus -- considered among the earliest of texts in the genre of the Western romantic love manual -- we will critically examine medieval concepts of gender, sexuality, and "love sickness," and how these elements have evolved in contemporary popular culture (self-
help manuals such as Barbara D’Angeli’s Are You the One for Me?, as well as examples from video/film and the Internet. Complementary readings include selections from Ovid, Art of Love: Diego de San Pedro, Prison-House of Love; Irving Singer, The Nature of Love; and John Boswell, Same-Sex Unions in Premodern Europe.

WRIT 125 18/GER 120 Berlin and Cinema Ward (German)
The brilliant metropolis of 1920s cultural modernity, the epicenter of Cold War conflict, the locus of division German unity after the fall of the Berlin Wall, Berlin has proven a rich site of inquiry for some of the world’s greatest filmmakers. We will view this fascinating city from the multiple and complex standpoints offered in a range of documentary and fiction films, from the experimental silent film, Symphony of a Great City to Rosellini’s Germany Year Zero to Wilder’s raucous 1947 comedy, A Foreign Affair. Wim Wenders’ Wings of Desire and films from the post-wall period will also be featured. The course emphasizes development of the requisite vocabulary to analyze film art and provides an overview of nine decades of German history. This course satisfies the Writing 125 requirement and counts as a unit toward the German Studies major. Includes a third session each week. Students enrolled in German courses, particularly 202, are encouraged to fulfill the Writing 125 requirement with this class. Knowledge of German is not required for this course.

WRIT 125 19/ENG 121 The Novels of Jane Austen Meyer (English)
Students will read a selection of the great novels of Jane Austen and use her work to learn skills for the close reading of fiction in general. We will study the details of Austen’s fictional technique. From what perspective are the novels told? How does the author reveal her attitudes toward her characters? At the same time we will consider the broader questions raised by the novels. What values motivate Austen’s fiction? How does she comment on the larger social and historical scene? What are her views on such issues as slavery or the proper role of women? This course satisfies the Writing 125 requirement and counts as a unit towards a major in English. Includes a third session each week.

Prerequisite: Open only to first-year students.

WRIT 225 Non-Fiction Writing
Writing 225 is a changing topics course that will each year take up a particular non-fiction writing genre. Davis Scholars and transfer students who have not met the writing requirement may opt to take Writing 225, as may other students who have already fulfilled the writing requirement.

Topic for 2003-04: Travel Literature: A Critical/Creative Nonfiction Advanced Writing Class

Sides (English)
As background for writing our own travel narratives, we will study the genre of literary travel writing. Readings will include: contemporary examples of travel literature; classic travel accounts of the twentieth century; Lawrence’s Sea and Sardinia; Naipaul’s An Area of Darkness (India); Wright’s Black Power: A Record of Reactions in a Land of Pathos (Ghana); two poetry collections centered on travel: Dove’s Mother Love (Sicily) and Bishop’s Questions of Travel (Brazil); and selected critical accounts of the travel genre in the West. Writing assignments include critical essays on travel literature, a critical book review of a contemporary literary book, and our own travel accounts.

Courses in Health and Society

The anthropologist Mary Douglas observed that “the human body is always treated as an image of society and . . . there can be no natural way of considering the body that does not involve at the same time a social dimension.” Similarly, how we perceive our bodies, how they are treated by the health care system, how medicine and health care shape how we see ourselves are critical questions we must all face. Courses in Health and Society includes ones that examine the workings of the human body and mind and ones that take a broad look at the relationship between health and larger cultural and societal issues. These courses encourage students to confront the ethical, social, and political issues in the creation of health and science, and they allow students to consider the broad issues that link the body to the body politic. They offer valuable perspectives to students planning careers in the health field and benefit anyone confronting health care in today’s complex world.

Although there is no departmental or interdisciplinary major in Health Studies, these courses enrich and enlarge concentrations in a variety of disciplines. They also demonstrate how different disciplines contribute to understanding a topic (health) and an institution (the health care system) that affect all our lives. Students who plan to apply for admission to medical school should consult the section on Preparation for Medical School in this catalogue.

Courses in Legal Studies

Law plays a central role in social organization, and legal and political institutions use law, doctrines, and procedures to establish collective values, mediate conflicts between individuals and groups, and resolve questions of state power. Legal materials provide a rich ground for developing reading and interpretive skills, and for promoting serious inquiry into visions of the good and the just, the dimensions and limits of private and public decision-making, and conflicts between consent and coercion. Finally, cross-cultural and historical analyses offer students opportunities to explore the ways in which legal institutions and practices help create diverse social identities and communities. Students wishing to explore a range of legal materials, analytical frameworks, and institutions are encouraged to select courses from several perspectives and disciplines.

There is no departmental or interdepartmental major in Legal Studies; however, coursework in this area can enrich and enlarge concentrations in a variety of disciplines. Students who plan to apply for admission to law school should consult the section on Preparation for Law School in this catalog.

Travel Directions

By Car

- From the West:
  Take the Massachusetts Turnpike to Exit 14 (Weston). Go south on Interstate 95 (Route 128) for 1/2 mile to Route 16, Exit 21B. Follow Route 16 West for 2.9 miles to a stoplight (five-way intersection) in the town of Wellesley; go straight on Route 135 (West). At the third traffic light, take a left into the main entrance of the College. Follow signs for admission parking.

- From the East:
  Take the Massachusetts Turnpike to Exit 16 (West Newton). Follow Route 16 West for 4.7 miles, using directions above.

- From the North:
  Take Interstate 95 South (Route 128) to Exit 21B (Route 16 West). Follow Route 16 West for 2.9 miles, using directions above.

- From the South:
  Take Interstate 95 North (Route 128) to Exit 21B (Route 16 West). Follow Route 16 West for 2.9 miles, using directions above.

By Airplane

Options from Logan International Airport:

- By car: From the airport, take the Ted Williams Tunnel to the Mass Pike (I-90) West. Then follow directions from the East.
- Take a taxi directly to Wellesley College. See Area Taxis. Allow at least an hour for the commute. The fare will be approximately $55.

Or

- Take the Logan Express bus, which picks up at all airline terminals, to Framingham. Allow at least an hour for the commute. Call 1-800-23 LOGAN for more information, 9 am – 5 pm.
- From Framingham, take a taxi to the college. See Area Taxis. Allow half an hour for the ride to Wellesley. The fare will be approximately $16.

Or

- Take the free shuttle bus to the MBTA Subway stop. Take the Blue Line Inbound four stops to Government Center. Go upstairs and change to the Green Line. Ride an Outbound subway marked "RIVERSIDE-D" to Woodland, the second to last stop on the D line. Subway fare is $1.00.
- From Woodland, take a taxi to the college. See Area Taxis. The fare will be approximately $15.
- Allow two hours for total commute.

By Train

Options from the Amtrak terminal at South Station:

- From South Station, take the Framingham/Worcester Commuter Rail to the Wellesley Square stop. The commute is approximately half an hour. One-way fare is $3.00 and is paid on the train. Exact change is not required.
- Go up the stairs and turn left onto Crest Road; follow Crest a short distance. Take a right onto Central Street. Walk five minutes to the second set of lights. Cross the street to the entrance of the College. From there, allow 20 minutes to walk to your destination on campus.

Note: The Commuter Rail runs on a schedule that can be accessed by calling 1-800-392-6100 or (617) 222-3200. Please call ahead when making travel plans; the schedule varies on weekends and holidays. You may also take the Commuter Rail to Wellesley from Back Bay Station.

If you prefer, call a taxi from the Wellesley Square Commuter Rail stop. See Area Taxis. Fare will be approximately $7.

Or

- From South Station, take the MBTA Subway (Red Line) Inbound two stops to Park Street. Go upstairs and change to the Green Line. Ride an Outbound subway marked "RIVERSIDE-D" to Woodland, the second to last stop on the D Line. Follow the above directions from Woodland.

By Bus

- From Peter Pan and Greyhound terminals at South Station, use Commuter Rail directions above.

Or

- Take a Non-Express Greyhound or Peter Pan bus to the Riverside terminal. From there, take a taxi to the College. See Area Taxis. Commute from Riverside will be about 30 minutes, except longer during rush hour. Fare will be approximately $15.

Note: Express buses DO NOT stop at Riverside.

The information contained in this Bulletin is accurate as of July 2003. However, Wellesley College reserves the right to make changes at its discretion affecting policies, fees, curricula or other matters announced in this Bulletin.

In accordance with the Student Right-to-Know and Campus Security Act (Public Law 101-542), the graduation rate for students who entered Wellesley College as first-year students in September 1996 on a full-time basis was 91%. (The period covered is equal to 150% of the normal time for graduation.)

Wellesley College admits students without regard to race, color, religion, or national origin, to all the rights, privileges, programs, and activities generally accorded or made available to students at the College. The College does not discriminate on the basis of race, color, religion, national origin or sexual orientation, in administration of its educational policies, scholarship or loan programs, athletic and other college-administered programs or in its employment policies.

Wellesley College, as an independent, undergraduate educational institution for women, does not discriminate on the basis of sex against its students in the educational programs or activities in which it operates, and does not discriminate on the basis of sex in its employment policies, in compliance with the regulations of Title IX of the Education Amendments of 1972, nor does the College discriminate on the basis of handicap in violation of Section 504 of the Rehabilitation Act of 1973.
