Correspondence.

All inquiries regarding admission should be addressed to Miss Ellen F. Pendleton, Dean of the College. Applications for the Calendar and for general information should also be addressed to Miss Pendleton.

As Secretary of the Teachers' Registry, Miss Mary Caswell is prepared to furnish full and confidential information in regard to the qualifications, character and experience of teachers educated at Wellesley. Former students of the College who wish situations as teachers have the aid of the Teachers' Registry.

Applications for pecuniary assistance (see p. 114) should be made by letter addressed to the Secretary of the Students' Aid Society, Wellesley, Mass.

Inquiries about graduate study and the requirements for higher degrees may be made of the Dean of the College.

WELLESLEY COLLEGE,
Wellesley, Massachusetts.

Foundation and Purpose.

WELLESLEY COLLEGE was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men.” Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed, by usage or statute, to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder, the College is undenominational, but distinctively and positively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G.
Houghton and Mr. Clement S. Houghton, as a memorial to their father. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday the singing is led by a trained choir of students under the direction of the professor of music.

The Wellesley College Christian Association, organized to promote religious life, to arouse an intelligent interest in social reforms, and to foster interest in home and foreign missions, meets weekly for prayer and religious instruction in the chapel given by the founder of the College.

The department of Biblical History affords the systematic study of the Bible required of all students.

**Admission.**

Admission to the Freshman Class.

Students are admitted either by examination (see pages 21 to 23) or by certificate (see pages 23 to 25).

*Every candidate for a degree must offer for admission to the freshman class the following subjects: English, History, Algebra, Plane Geometry, Latin, and in addition the maximum requirement in a second language (which may be either Greek, or French, or German), together with the minimum requirement in a third language or in one of the following sciences: Chemistry, Physics, Zoology.* For full details regarding requirements in these subjects see pages 25 to 35.

The subjects prescribed for admission are divided into three groups, A, B, C, as follows:—

*Group A.* Rhetoric, History, Plane Geometry, Cæsar, Vergil and Prosody, Cicero, Anabasis, Greek Grammar, Iliad, German (reading, poetry, and technical grammar of maximum requirement), and French (reading, poetry, and technical grammar of maximum requirement).

*Group B.* Chemistry, Physics and Zoology.
Group C. English Literature and Composition, Algebra, Latin Prose Composition, Greek Prose Composition, French Prose Composition and Conversation of maximum requirement, German Prose Composition and Conversation of maximum requirement, Greek, French and German minimum requirements.

Final examinations in subjects of Group A may be taken at any time during the college preparatory course. Final examinations in subjects of Group B must be taken not earlier than fifteen months before entrance in September. Final examinations in subjects of Group C must be taken not earlier than during the school year immediately preceding admission to college.

The above applies to final examinations held by principals of schools, preliminary to granting certificates, as well as to the admission examinations held by the College.

Candidates will not be admitted if conditioned in two, or heavily conditioned in one, of the following subjects: Latin, Greek, French, German, Mathematics, Chemistry, Physics, Zoology.

A candidate for admission must be at least sixteen years of age, and must present satisfactory evidence of good moral character and good health. A blank form for the certificate of health will be sent to all registered applicants for admission.

The student who has met all entrance requirements is qualified for immediate matriculation for the Baccalaureate degree in Arts. All communications concerning admission should be addressed to the Dean of Wellesley College, Wellesley, Mass.

Admission by Examination.

June Examinations.

The examinations conducted by the College Entrance Examination Board are to be substituted for those heretofore held in June by the College in Wellesley and elsewhere. Candidates for Wellesley College intending to take these examinations should notify the Dean of the College on or before May 15th. Blank forms of application for examinations will be furnished.
Candidates who wish to offer the certificate of the College Entrance Examination Board for admission to Wellesley must pass examinations in the following subjects as defined by the Board:

- **English**: a, b.
- **History**: a, or c, or d.
- **Mathematics**: a (i, ii), and Progressions, c.
- **Latin**: a, b, c, d, l, m.
- **Maximum Second Language**:
  - Greek: a, b, c, f, g; or
  - French: a, b; or
  - German: a, b.
- **Minimum Third Language or Science**:
  - French: a; or
  - German: a; or
  - Chemistry; or
  - Physics.

Information in regard to subjects, dates, and places of these examinations may be obtained by addressing the Secretary of the College Entrance Examination Board, Post Office Sub-Station 84, New York City. A two-cent stamp should be enclosed.

*Candidates who propose to enter by examination must take all examinations in June except such as, by permission, may be postponed until September.*

**September Examinations.**

Admission examinations will be held at the College in September as heretofore.

**Schedule of Examinations, September, 1903.**

Admission by Certificate.

Any school whose equipment and curriculum enable it to prepare students for the freshman class, upon complying with the regulations stated below, may receive the right to give a certificate of scholarship which shall exempt the candidate from college examinations for admission in the subjects satisfactorily covered by the certificate.

Right of Certification.

1. If a school has not the right of certification and the principal wishes to obtain this privilege, he should apply to the Dean of the College between October first and April first of any year. In response to this application a blank form will be sent, which the principal is requested to fill out and return, sending with it a catalogue or circular of the school.

During the interval between April first and October first applications for the right of certification will not be considered by the Board of Examiners.

2. The school is considered to be on probation during the first year of the first candidate. The right of certification may be withdrawn at any time from any school which fails to give complete and satisfactory preparation.
With the formation of the New England College Entrance Certificate Board all certificate privileges granted by the College will expire by limitation on January 1, 1904, and every third year thereafter.

In accordance with the By-Laws and Rules adopted by the New England College Entrance Certificate Board, any school in New England desiring a renewal of these certificate privileges must apply to the Secretary of this Board, Prof. Nathaniel F. Davis, 159 Brown Street, Providence, R. I., before May 15, 1904.

Schools outside of New England desiring a renewal of these certificate privileges must apply to the Dean of the College as heretofore. Such application may be made on or after October 1, 1903.

Certificate of Scholarship.

1. The principal of the preparatory school must present, upon a blank form furnished by the College, a certificate of scholarship for each candidate.

2. All certificates and laboratory notebooks must be forwarded in time to be received at the College by July 1st, unless special arrangements have been made with the Board of Examiners. On or before August 1st each candidate will be informed of the decision with regard to her certificate.

3. All certificates must show distinctly that the candidate has met in detail the requirements as published in the current Calendar. Whenever any variation has been allowed, the work done must be specifically stated and offered as an equivalent, to be accepted or refused. Attention is called to the division of the admission subjects into Groups A, B, C, stated on pages 20 and 21, and to the fact that final examinations in the subjects of Groups B and C must be taken within a specified time of admission.

4. All certificates must be signed by the principal of the school, and countersigned by the assistants who have instructed the candidate.

5. Supplementary certificates will not be accepted. All work completed after July 1st must be tested by examination at the College in September.

6. The candidate who has received the certificate of a prin-
Principal will not be exempt from the examinations for admission in any particular subject, unless her certificate shows that she has satisfactorily accomplished the full amount of work required in that subject. Any student whose certificate is found on July 1st to be seriously deficient, may be refused the privilege of taking examination the following September.

Requirements for Admission.

1. English.

Rhetoric.—Choice of Words, Construction of Sentences and of Paragraphs, Outlines of Themes.

Text-books recommended: Scott and Denney's Composition-Rhetoric; Herrick and Damon's Composition-Rhetoric; G. R. Carpenter's Elements of Rhetoric; A. S. Hill's Foundations of Rhetoric, and as companion book, Huber Gray Buehler's Practical Exercises in English; J. F. Genung's Outlines of Rhetoric. The first half of Genung's Practical Elements of Rhetoric will be accepted.

Composition.—The subjects for the examination in Composition will be taken from the English Literature required for the year. The form of the examination will usually be the writing of a paragraph or two on each of several topics, to be chosen by the candidate from a number set before her in the examination paper in English Literature. The treatment of these topics is designed to test the candidate's power of clear and accurate expression, and will call for only a general knowledge of the substance of the books. In place of the whole or a part of this test, the candidate may be allowed to present an exercise book, properly certified by the instructor, containing compositions or other written work done in connection with the reading of the books.

To meet the requirement in composition, the student should have practice in writing equivalent to fortnightly themes during the first two years and weekly themes during the last two years of the preparatory course. No applicant will be accepted in English whose work is notably defective in point of spelling, grammar, idiom, punctuation, or division into paragraphs.
Literature.—The Wellesley requirement is that adopted by the Commission of New England Colleges.

A. Reading.

Certain books are set for reading. The candidate is required to present evidence of a general knowledge of the subject-matter, and to answer simple questions on the lives of the authors.

The books set for this part of the examination are:

In 1903, 1904, and 1905: Shakespeare's *The Merchant of Venice* and *Julius Caesar*; the *Sir Roger de Coverley Papers*; Goldsmith's *The Vicar of Wakefield*; Coleridge's *The Ancient Mariner*; Scott's *Ivanhoe*; Carlyle's *Essay on Burns*; Tennyson's *The Princess*; Lowell's *The Vision of Sir Launfal*; George Eliot's *Silas Marner*.

In 1906, 1907, and 1908: Shakespeare's *Macbeth* and *The Merchant of Venice*; the *Sir Roger de Coverley Papers*; Irving's *Life of Goldsmith*; Coleridge's *The Ancient Mariner*; Scott's *Ivanhoe* and *The Lady of the Lake*; Tennyson's *Gareth and Lynette, Lancelot and Elaine*, and *The Passing of Arthur*; Lowell's *The Vision of Sir Launfal*; George Eliot's *Silas Marner*.

B. Study and Practice.

This part of the examination presupposes the thorough study of each of the works named below. The examination will be upon subject-matter, form, and structure.

The books set for this part of the examination are:

In 1903, 1904, and 1905: Shakespeare's *Macbeth*; Milton's *Lycidas, Comus, L'Allegro*, and *Il Penseroso*; Burke's *Speech on Conciliation with America*; Macaulay's *Essays on Milton and Addison*.

In 1906, 1907, and 1908: Shakespeare's *Julius Caesar*; Milton's *L'Allegro, Il Penseroso, Comus, and Lyciaas*;
Burke's *Speech on Conciliation with America*; Macaulay's *Essay on Milton and Life of Johnson*.

**Note.**—In the Wellesley examination it is taken for granted that candidates will have learned by heart illustrative passages from all poems read.

2. **History.**

A full year course with at least three recitations per week in one of the following subjects:—

The History of Greece to the death of Alexander, with due reference to Greek life, literature, and art.

The History of Rome, the Republic and Empire to the accession of Commodus.

English History, with due regard to social and political development.

American History, with the elements of Civil Government.

In the subject chosen, the student should acquire accurate knowledge of the history as presented in a standard text-book of not less than 300 pages, and should read such fuller authorities as may be available, in amount not less than 500 pages. Some practice in drawing maps to illustrate territorial changes, in making digests of lectures and reading, and in preparing verbal or written reports on subjects assigned for individual investigation is essential to successful work.

As an alternative to any one of the courses described above, a course in Greek and Roman History may be offered, provided the time given to the combined course is not less than one hundred and fifty recitations.

Students presenting themselves for examination are expected to bring notebooks, maps, and essays, that may serve as supplementary evidence of the character of their preparation.

3. **Mathematics.**

*Algebra.*—Factors, Common Divisors and Multiples, Ratio and Proportion, Theory of Exponents, Radicals and Equations involving Radicals, Inequalities, Quadratic Equations (including the theory), Imaginary Quantities, Binomial Theorem, Arithmetic and Geometric Progressions.
Plane Geometry.—As found in Chauvenet, or its equivalent.

Deficiency in preparation usually results from one or more of the following causes: the use of text-books which are too elementary, insufficient time spent in preparation, neglect of exercises in original demonstration in Geometry, and of reviews in both Algebra and Geometry. One and one-third years, with daily recitations, is the shortest time in which satisfactory preparation can be made in Algebra, and one year with daily recitations is the minimum in Geometry. It is strongly urged that there be constant exercise in original demonstration in Geometry, with frequent written examinations in both Algebra and Geometry, the problems proposed being drawn from other sources than the text-books.

4. Latin.

Grammar, including Prosody.
Prose Composition.

One of the standard text-books in this subject should be completed, and additional practice given in the writing of connected passages.
Cæsar, Gallic War, four books.
Cicero, seven orations, or six if the Manilian Law be one.
Vergil, Æneid, six books.

Candidates must be prepared to translate at sight Latin of average difficulty and to write in Latin connected passages based upon Cæsar and Cicero.

Equivalents are accepted, but verse is not accepted in place of prose, nor anything instead of the required translation of English into Latin.

The study of Greek is strongly recommended to candidates who plan to elect courses in Latin in college.

5. Greek.

Maximum Requirement.

Grammar. The etymology must be thoroughly mastered.
Prose Composition. At least forty written exercises based upon the Greek of Xenophon, including connected passages and accompanied by a systematic study of the main principles of syntax.
Xenophon, *Anabasis*, three books.

Homer, *Iliad*, three books; with scansion.

Candidates must be prepared to translate at sight both Attic and Homeric Greek of average difficulty, and to write in Greek a connected passage based upon Xenophon.

Particular attention should be given to the correct writing of Greek with the accents, to exercises both oral and written, and to the use of the blackboard for constant practice upon forms and constructions.

The teachers of Latin and Greek in the preparatory schools are urged to insist upon the use of good English in translation.

Ability to read at sight either easy French or German prose is of great advantage to all classical students.

*In September, 1905, and thereafter,* the preparation for the maximum requirement must cover a period of three years, with four or five recitations per week. If the preparation is made in less time, an examination in Prose Composition may be required.

**Minimum Requirement.**

This work requires at least one year, with five recitations per week. This preparation admits the student to course 14 in College, and these two courses complete the preparation for course 1 (see page 37).

6. French.

**Maximum Requirement.**

To meet the requirement in French the candidate must be prepared in the following:

(1) Grammar: a knowledge of the etymology and the essential principles of syntax, especially the use of moods and tenses.

(2) Composition: familiarity with the commoner idioms, and ability to translate connected passages of easy English into French at sight.
(3) Reading: not less than five hundred duodecimo pages of classical and contemporary prose and verse from at least four standard authors.

(4) Conversation: ability to follow a recitation conducted in French, to answer questions in that language, and to repeat some short selections from French prose and poetry.

These results can be best attained by the use of the books indicated for College Courses 1 and 2, or their equivalents (see pages 50 and 51 of present Calendar).

The preparation for the maximum requirement in French should cover a period of at least two years, five recitations per week.

In September, 1905, and thereafter, the preparation for the maximum requirement must cover a period of three years with four or five recitations per week. If the preparation is made in less time, an examination will be required.

**Minimum Requirement for 1903 and for 1904.**

As the minimum requirement a student may offer either A or B:

A. The first year of the maximum requirement, viz.:

(1) Grammar: including the conjugation of the regular and the more usual irregular verbs.

(2) Composition: translation into French of connected passages of simple English.

(3) Reading: at least two hundred duodecimo pages from at least three different authors. Not more than one half of this should be from works of fiction.

(4) Conversation: Ability to answer in French questions on simple subjects and to repeat short selections from choice French poetry. French should be the language of the class room.

B. (1) Grammar as for minimum A.

(2) The ability to read easy prose at sight.

The student should translate, with careful attention to the grammar, at least three hundred pages from such works as La
Prise de la Bastile, by Michelet; La Mare au Diable, by George Sand; La Chute, by Victor Hugo; or the prose of such authors as Souvestre, Daudet, and About. The selections should be made from at least four different authors.

Students meeting minimum requirement B may be admitted to course 16, but not to course 2 without additional preparation. The preparation for the minimum requirement in French should cover a period of at least one year, five recitations per week.

Minimum Requirement for 1905 and Thereafter.

In September, 1905, and thereafter a student may offer but one minimum requirement. The preparation for this requirement should comprise

(1) Careful drill in pronunciation.

(2) The rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the plural of nouns, the inflection of adjectives, participles, and pronouns; the simpler uses of the conditional and subjunctive, and the elementary rules in syntax; the order of words in the sentence, and application in the construction of sentences.

(3) Abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression.

(4) Writing French from dictation.

(5) The reading of 300 duodecimo pages of graduated texts from at least three different authors, with constant practice in translating into French easy variations upon the texts read (the teacher giving the English), and in reproducing from memory sentences previously read.

(6) Frequent abstracts, sometimes oral and sometimes written, of portions of the text already read.

If the time given to the preparation is less than one year with five recitations per week, an examination will be required.
7. German.

Maximum Requirement.

To meet the maximum requirement in German the candidate must have:

1. A distinct German pronunciation, which may be acquired at the outset by a course in phonetics.

2. A knowledge of the important rules of elementary grammar, which the student should be able to state in German, and to illustrate by original examples.

3. Ability to understand spoken German, an easy lecture or novel, which will be acquired if German is made the language of the class room.

4. Fluency in conversation upon simple topics, and knowledge of German idioms, which are gained by object lessons according to Pestalozzi's Anschauungs method, and by constant speaking exercises.

5. Ability to understand and recite some short specimens of choice lyric poetry.

6. Ability to translate easy German at sight.

7. Ability to translate easy English into German, to write simple compositions, and to use the German script.

These results can be obtained by the following course or its equivalents:

Grammar: Deutsche Sprachlehre, by Wenckebach.

Reading: Deutsches Lesebuch, by Wenckebach, pp. 1-126 and 167-247, studied according to the directions given in the preface. An easy story for practice in sight reading (e.g., Meissner's Aus meiner Welt), a drama (e.g., Schiller's Wilhelm Tell), and Goethe's Dichtung und Wahrheit, three books.

Poetry: Die Schönsten Deutschen Lieder, compiled by Wenckebach; the first five "Volkslieder," and numbers 2, 3, 8, 10, 14, 15, 18, 19, 20, 21, 22, 23, 26, 28, 30, 32, 33, 34, 37, 40, 42, 45, 46, 47, 50, 51, 52, 59, 60, 61, 62, 63, committed to memory.
The preparation for the maximum requirement in German should cover a period of at least two years, five recitations per week.

In September, 1905, and thereafter the preparation for the maximum requirement must cover a period of three years with four or five recitations per week. If the preparation is made in less time an examination will be required.

Minimum Requirement for 1903 and for 1904.

As the minimum requirement, a student may offer either A or B.

A. The first year of the maximum requirement, namely:

B. The ability to read easy prose at sight.

The student should translate, with attention to the grammar, at least two hundred pages of such German texts as Andersen's Bilderbuch ohne Bilder, Fouque's Undine, Chamisso's Peter Schlemihl.

The preparation for the minimum requirement in German requires at least one year, five recitations per week, and should not be crowded into a shorter time.

Equivalents will be accepted; but reading will not be taken in place of grammar, nor poetry for conversation, etc.

Minimum Requirement for 1905 and Thereafter.

In September, 1905, and thereafter a student may offer but one minimum requirement. The preparation for this requirement should comprise

(1) Careful drill upon pronunciation and use of German script.
(2) The memorizing and frequent repetition of easy colloquial sentences.
(3) Drill upon the rudiments of grammar; that is, upon the inflection of the articles, of such nouns as belong to the language of every-day life, adjectives, pronouns, weak verbs, and the more usual strong verbs; also upon the use of the more common prepositions, of the modal auxiliary, and elementary rules of syntax and word order. This drill upon the rudiments of grammar should be directed to the ends of enabling the pupil (1) to use his knowledge with facility in the formation of sentences, and (2) to state his knowledge correctly in the technical language of grammar.

(4) Abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression. These exercises should include practice in the translation into German of easy variations upon the matter read, and also in the offhand reproduction, sometimes orally and sometimes in writing, of statements of short and easy selected passages.

(5) The reading of one hundred and fifty to two hundred pages of graduated texts from a reader of easy stories and plays. If the time given to the preparation is less than one year, with five recitations per week, an examination will be required.

8. Chemistry.

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, *Document No. 8*. The preparation in Chemistry should cover at least one year, five recitations per week. Experiments should be done by the student in the laboratory to illustrate the properties of the most important elements, both metallic and non-metallic, and their compounds, and it is strongly recommended that a few of these experiments should be of a quantitative nature.

In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher, certifying that the notes are a true record of the student’s
work, and must be presented with the certificate on or before July 1st or at the time of the examination. In case the notebook is lacking or inadequate, a laboratory test will be given.

The requirement is met by the course outlined in the Report of the College Entrance Examination Board, Document No. 8. Preparation in Physics should cover at least one year, with five recitations per week. In addition to an examination, or a certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must be indexed and bear the endorsement of the teacher, certifying that the notes are a true record of the student's work, and they must be presented with the certificate on or before July 1st or at the time of the examination.

Colton's Practical Zoology, except those parts which involve the use of the compound microscope. The student must be able to recognize the animals, and to make the dissections described in that book. It is suggested that the work be done from the biological standpoint, and the use of Jordan and Kellogg's Animal Life as supplementary reading is warmly recommended.

The preparation in Zoology should cover at least one year, five recitations per week. In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher, certifying that the notes are a true record of the student's work, and must be presented on or before July 1st with the certificate or presented at the time of the examination.

Admission to Advanced Standing.

Candidates for advanced standing must fulfill the requirements for admission to the freshman class, and must also be prepared to be examined in the required studies previously pursued by the
class which they wish to join, and in a sufficient number of electives to give full standing with that class.

Such candidates, if they come from other colleges, may present certificates of college work; but it should be clearly understood that they are not thereby necessarily relieved from examinations.

Each candidate should apply for a statement of the credentials which she will need to present.

Candidates for advanced standing whose applications are filed before May 1st of the year in which they propose to enter, and whose credentials admit them to junior or higher rank, will take precedence of candidates for the freshman class in the assignment of rooms.

All correspondence should be addressed to the Dean of the College.

**Admission of Students not Candidates for a Degree.**

Opportunities for special study are offered to students who are not candidates for a degree, but are qualified to undertake college work.

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Examiners, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities of prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and acquirement are not ordinarily admitted, but if such desire admission they must expect to meet, by examination or by certificate from an accredited school, the requirements prescribed for admission to the freshman class, or a full equivalent for them, and to satisfy such additional requirements as are prescribed by the departments which they propose to enter.
All courses, graduate as well as undergraduate, are open to special students, subject to the conditions stated by the various departments; but every such student is expected to choose a primary subject to which she should devote the greater part of her time. A student who creditably completes a prescribed group of courses in two or more departments will be granted a certificate.

As the capacity of dormitories is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college dormitories.

Application for admission as a special student, with all required certificates, should be sent to the College before the first of July, if possible. All correspondence should be addressed to the Dean of the College.

Courses of Instruction.

The following Courses of Instruction are offered by the several departments. The College reserves the right to withdraw the offer of any elective study not chosen by at least six students.

‡ Archaeology 3 and 4 and Latin 15 are not usually given in the same year.
courses. Meissner’s Aus meiner Welt, Dahn’s Ein Kampf um Rom and Heyse’s L’Arrabbiata are read and translated. The aim of courses 1 and 2 is to give the student a knowledge of elementary German grammar in the German language, ability to understand with ease spoken German, to converse upon simple topics, and to translate easy German into English, and vice versa. Special attention is paid to the writing in German of the summaries of the topics read and discussed in the class, to the memorizing of choice lyric poetry, to the acquirement of a correct German pronunciation, and to the writing of the German script.

*3. Scientific German.

Open to all students who have completed one or two full courses. Freshmen four hours, all other students three hours a week for a year.

Miss Mitzlaff.

The object of this course is to give the student, through the medium of translation, such a knowledge of German as shall be useful in the study of the natural sciences.

4. Intermediate Course.

Open to all students who have completed the minimum B admission requirement in German. Freshmen four hours, all other students three hours a week for a year.

Miss Mitzlaff, Miss Stoeber.

This course is intended to fit students to enter courses 5, 6, 7. It is especially arranged for students who have no conversational knowledge of German.

5. Grammar and Composition (Intermediate Course).

Open to all students who have completed course 2 or 4, or who have met the maximum admission requirement in German. One hour a week for a year.

Miss Mitzlaff, Miss Reuther, Miss Stoeber.

Review of elementary grammar and study of more advanced grammar. Constant practice in prose composition and letter writing.

* Not offered in 1902–1903
6. Reading and Poetry.

Open to all students who have completed course 2 or 4, or who have met the maximum admission requirement in German. Freshmen two hours, all other students one hour a week for a year.

Associate Professor Müller, Miss Mitzlaff, Miss Reuther, Miss Stoeber.

Schiller's Maria Stuart, Keller's Legenden, and Heine's Harzreise, are made the basis of easy lectures and discussions in German, so that the student may become accustomed to follow an uninterrupted train of thought and learn to think connectedly in a foreign language. Some choice specimens of poetry are memorized.

7. Translation and Conversation (Intermediate Course).

Open to all students who have completed course 2 or 4, or who have met the maximum admission requirement in German. One hour a week for a year.

Associate Professor Müller, Miss Mitzlaff, Miss Reuther, Miss Stoeber.

The chapters on A History of the German Language, in Wenckebach's Lesebuch, are translated into English, and made the subject of oral discussions in German. Text read, translated, and discussed: Scheffel's Ekkehard and Trompeter von Sükkingen.

* 22. Schiller's Wallenstein and select poems.

Open to all students (except freshmen) who have completed course 2. One hour a week for a year.

Associate Professor Müller.

8. Grammar and Composition.

Open to students who have completed courses 5, 6, 7. One hour a week for a year.

Miss Mitzlaff, Miss Reuther, Miss Stoeber.

* Not offered in 1902-1903.
9. Advanced Course in German Prose.

Open to students who have completed course 8. One hour a week for a year.

Professor Wenckebach.

Subjects for discussions, for papers and lectures by the students: The political and social life of the Germans in the nineteenth century.

10. Historical Prose. Translation of selected historical works into English.

Open to all students who have completed one or two full courses. One hour a week for a year.

Miss Mitzlaff.

Open to students who have completed courses 5, 6, 7. One hour a week for a year.

Associate Professor Müller.

Lectures, discussions, short papers. Study of the principal characteristics of Goethe’s life and works up to the time of his literary co-operation with Schiller. Works read and discussed: Dichtung und Wahrheit (selections), Götz von Berlichingen, Iphigenie, Hermann und Dorothea, Poems, etc.

Open to students who have completed courses 5, 6, 7. One hour a week for a year.

Professor Wenckebach.

The course consists of lectures, recitations, and reading. The main facts of Germanic Mythology and Sagas, as found in the Edda, Grimm’s Deutsche Mythologie, Dahn’s Walhall and Raszmann’s Die Deutsche Heldensage, are treated. A knowledge of these myths and sagas furnishes a valuable basis for the understanding of the Old and Middle High German literature.

Open to students who have completed courses 8, 11, 12, and to others by permission of the department. One hour a week for a year.

Associate Professor Müller.

* Not offered in 1902–1903.

Open to students who have completed courses 8, 11, 12, and to others by permission of the department. One hour a week for a year.

Professor Wenckebach.

15. History of German Literature to 1100. History of the German Language.

Open to students who have completed courses 8, 11, 12, and to others by permission of the department. One hour a week for a year.

Professor Wenckebach.

The course consists of lectures, discussions, reading, memorizing of poetry. The aim of the lectures is to trace the parallel development of the language, literature, social conditions, and religious ideals of the times. The works read and discussed are: the *Merseburger*, *Zaubersprüche*, the *Hildebrandslied*, the *Wessobrunner Gebet*, *Muspilli*, Selections from the *Heliand*, Otfried's *Krist*, Roswitha's dramas, the *Waltharilied*, etc., according to Wenckebach's *Deutsche Literaturgeschichte* and *Musterstücke*, Scherer's *Geschichte der deutschen Literatur*, Freytag's *Bilder aus der deutschen Vergangenheit*, Könnecke's *Bilderatlas*. 
*16. History of German Literature from 1100–1624.

Open to students who have completed course 15, and to others by permission of the department. One hour a week for a year.

Professor Wenckebach.

*Open to students who have completed course 5 or 6 or 7. Three hours a week for a year.*

Associate Professor Case.

9. Descartes, Spinoza, and Leibniz; Kant and Fichte or Schopenhauer.

*Open to students who have completed course 5 or 6 or 7. Three hours a week for a year.*

Professor Calkins.

Lectures and discussions. Text study of Descartes's *Discourse on Method* and *Meditations*; Spinoza's *Ethics*; Leibniz's *New System Discourse on Metaphysics*, *Monadology*, and selections; Kant's *Critique of Pure Reason* (with omissions) and selections from his ethical works; Fichte's *Vocation of Man* or Schopenhauer's *Fourfold Root*.

10. Greek Philosophy.

*Open to students who have completed course 5 or 6 or 7. Three hours a week for a year.*

Associate Professor Case.

*Not offered in 1902–1903.*
Text study, lectures, discussions. Fragments of the pre-Socratic philosophers; Xenophon's *Memorabilia* (selections); Plato: fifteen dialogues, with critical study of eight; Aristotle: *Psychology* and selections from his other writings, with lectures on his *Metaphysics*. Lectures on post-Aristotelian philosophy.

11. Post-Kantian German Philosophy.

*Open to students who have completed course 8 or 9 or 10. Three hours a week for a year.*

Professor Calkins.

Lectures, reports of special study, discussions. Subject of the course varied from year to year. In 1902-1903: text study of Hegel: (1) *Larger Logic*, Book I, *Quality* (Stirling) and (2) *Logic of the Encyclopedia* (Wallace).

In 1902-1903 only the second semester of course 11 is offered.

* 12. The Philosophy of Religion.

*Open to students who present the equivalent of two full courses (of which one may be taken simultaneously with 12) selected from the following: 8, 9, 10, 11, 13, 16. Three hours a week for a year.*

Associate Professor Case.

NOTES.

1. The requirement in Philosophy for a degree is met by taking course 1 (first semester), followed by course 5 or 6 or 7 (second semester). Courses 5, 6, and 7 are also open as elective courses.

2. Courses 1, and 5 or 6 or 7 may often with great advantage be carried in the sophomore year. A student who wishes to take course 11, 12 or 13 as undergraduate work, can meet the prescribed conditions only by obtaining permission either

* Not offered in 1902-1903.
to take this required work in the sophomore year, or to carry 8, 9 or 10 in the junior year, simultaneously with the required work.

3. By permission, the second semester of 9 and either semester of 8, 10, 11, 13, and 15 may be taken separately.

By permission, 8, 9, or 10 may be taken simultaneously with its prerequisites: courses 1, and 5 or 6 or 7.

4. Course 14 is required of students who are taking 15 for the first time. Course 15 may be repeated by a student who has not already taken the maximum number of hours offered; it then counts as three hours per week for either semester.

X. History.

‡ 1. Political History of England to 1603.

Open to freshmen, sophomores, and juniors, and to seniors who have taken no college course in history. Freshmen four hours, all others three hours a week for the first semester.

Miss Orvis.

‡ 2. Political History of England from 1603 to the present time.

Open to sophomores, juniors, and seniors, and to freshmen who have completed course 1, or who offer English History as an admission subject. Freshmen four hours, all others three hours a week for the second semester.

Miss Orvis.

The aim of these courses is to train students in the use of historical material and in dealing with historical problems. Emphasis is placed on political, social, and industrial conditions in relation to race development.

‡ 3. History of Europe from the Roman conquest to the Peace of Utrecht.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Miss Moffett.

‡ Courses 1 and 2, or 3, are prerequisite to later elections. These courses will not both count toward a three-course major.
This course furnishes an outline of mediaeval and early modern history, and deals with the simpler political and social problems. It aims to train students in methods of historical work, and to furnish a background for detailed study of particular epochs.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Miss Orvis.

This course involves (1) an introductory discussion of the condition of France on the eve of the Revolution; (2) a detailed study of the progress of the Revolution and of the reaction against democratic tyranny culminating in Imperialism; (3) an inquiry into the influence of revolutionary ideas in the subsequent history of France, Germany, Austria, Italy, Spain, and Russia.

Open to juniors and seniors. Three hours a week for the first semester.

A study of the origin and early development of the English constitution. Stubbs is the principal authority. The class has access to the text of charters and laws.

Open to juniors and seniors. Three hours a week for the second semester.

A study of the later development of the English constitution, the rise of party and cabinet government, and the establishment of popular control.

Open to juniors and seniors. Three hours a week for a year.

Professor Kendall.

* Not offered in 1902–1903.
A study of the formation and development of the constitution of the United States, with special reference to controlling forces, such as the organization of parties, the growth of democracy, the rise of the slave power, the political effects of the development of the West.

8. The Period of the Reformation.

*Open to juniors and seniors. Three hours a week for a year.*

Miss Moffett.

A study of the intellectual, religious and social life of the 16th century, and of the institutions and movements which were its outcome.

9. History of the diplomatic relations of the States of Europe from the accession of Frederick the Great to the present day.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Miss Orvis.

This course includes (1) a review of the changes in Europe since the Treaties of Westphalia; (2) the Age of Frederick the Great; (3) the change made in European relations by the French Revolution; and (4) the Age of Bismarck.

10. American Colonial History.

*Open to juniors and seniors who have completed two full courses in history. Three hours a week for a year.*

Professor Kendall.

A study of the establishment and development of the English colonies in America, concluding with a detailed consideration of the conditions which led to a separation from the mother country.

*Open to juniors and seniors. Three hours a week for the first semester.*

Professor Kendall.

This is an introductory course in the comparative study of the origin, character, development, and aim of political institutions.

Open to juniors and seniors who have completed two full courses in history. Three hours a week for the second semester.

Professor Kendall.

This course includes (1) a historical review of the development of the empire; (2) a study of the changes of colonial policy; (3) a study of colonial administration; and (4) a discussion of present colonial problems.

*13. History of Rome from the earliest times to the barbarian invasions.

Open to sophomores, juniors, and seniors who have completed courses 1 and 2, or 3, or who have offered Roman History for admission. Three hours a week for a year.

Miss Orvis.

A study of the development of Rome into a world power and its effects on her domestic institutions.

XI. Economics and Sociology.

1. Elements of Economics.

Open to sophomores, juniors, and seniors. Three hours a week for the first semester.

Miss Whittelsey.

An introductory course designed to give the student some acquaintance with economic facts and training in economic reasoning. Illustrations will be drawn from economic phenomena of American colonial history.

2. Industrial History of the United States.

Open to sophomores, juniors, and seniors who have had course 1. Three hours a week for the second semester.

Miss Whittelsey.

A study of the national development in its material and social aspect, accompanied by a critical review of our economic legislation, commercial and financial.

* Not offered in 1902–1903.

*Open to students who have completed two courses in Economics. Three hours a week for the first semester.*

Miss Balch.

A study of the development of methods of production, more especially of villeinage, gilds, the domestic system, and the introduction of machine industry.

*4. Socialism.

*Open to students who have completed courses 1 and 2. Three hours a week for the first semester.*

Miss Balch.

A study of socialist theories, "Utopian" and "Scientific," in their historical development, with some consideration of modern socialist parties, and especially of German Social Democracy.

5. Statistical study of certain economic problems in the industrial history of the United States.

*Open to students who have completed courses 1 and 2. Three hours a week for the second semester.*

Miss Whittelsey.

The course is introduced by lectures on the principles of statistical research. Each member of the class undertakes the investigation of a particular problem, and reports the results of her inquiry to the class. The graphic method of presenting statistical results is emphasized.

6. Social Economics I.

*Open to juniors and seniors who have completed two courses in Economics. Three hours a week for the first semester.*

Miss Balch.

A study of the delinquent, defective, and dependent classes, accompanied by discussion of methods of dealing with each.

* Not offered in 1902–1903.
7. Social Economics II.

Open to juniors and seniors who have completed two courses in Economics. Three hours a week for the second semester.

Miss Balch.

A discussion of methods of meeting certain normal social needs, such as housing, sanitation, education, recreation, and thrift.

8. The Modern Labor Problem.

Open to students who have completed two courses in Economics. Three hours a week for the second semester.

Miss Balch.

A study of the various remedies, proposed or tried, for the difficulties of the modern industrial situation; modifications of or substitutes for the wage system, such as profit-sharing, co-operation and socialism, trade unionism and arbitration, labor legislation, insurance and pension schemes, and "employers' welfare institutions." American experience will be emphasized.

9. An Introduction to General Sociology.

Open to juniors and seniors who have completed two courses in Economics. Three hours a week for a year.

Miss Balch.

A study of facts and theories of social development, and more especially of the growth of institutions such as the family, the state, law and property.

A reading knowledge of French and German is desirable.

Open to students who have completed courses 1 and 2 in Economics. Three hours a week for a year.

Professor Coman.

First semester: economic functions of the State, problems of revenue and expenditure; second semester: problems in municipal finance.

*Not offered in 1902–1903.
II. Business Methods and Business Law.

Open to all students. One hour a week throughout the year.

Miss Cook.

This course is intended to train the student to deal intelligently with ordinary business situations.

XII. Pure Mathematics.

1. Required course for freshmen.

Four hours a week for a year.

(a) Solid and Spherical Geometry.

Three hours, first semester.

(b) Higher Algebra.

One hour first semester; two hours second semester.

The subjects included are: Functions and Theory of Limits, Derivatives, Development of Functions in Series, Convergency of Series, Theory of Logarithms, Determinants, Theory of Equations (including Sturm’s Theorem). (Taylor’s College Algebra.)

(c) Plane Trigonometry.

Two hours, second semester.

The angular analysis, including transformations, trigonometric equations and inverse functions, is fully treated, as well as the solution of triangles and the practical use of the tables.

Associate Professor Chandler, Miss Denis, Dr. Vivian, Miss Hathaway.

2. Conic Sections and Plane Analytical Geometry.

Open to students who have completed course 1. Three hours a week for a year.

Associate Professor Chandler, Dr. Vivian.

A brief course in geometrical conics is given in connection with the usual analytical work.
3. Differential and Integral Calculus.

Open to students who have completed course 2. Three hours a week for a year.

Professor Burrell.

One hour per week during the second semester will be given to lectures on topics from analytical trigonometry of general value in analytical work.

4. Theory of Equations, with Determinants (Burnside and Panton).

Open to students who have completed course 3. Three hours a week for the first semester.

Associate Professor Chandler.

Open to students who have completed course 3. Three hours a week for the second semester.

Associate Professor Chandler.

Open to students who have completed course 2. Three hours a week for a year.

Professor Burrell.

Metrical and projective properties of plane and sheaf forms of the first and second orders; the anharmonic ratio; harmonic forms; the method of inversion; involution; collineation; the law of duality; theory of poles and polars; reciprocation; space forms and surfaces of the second degree. Given by lectures and references.

†9. Differential Equations (Johnson).

Open to students who have completed course 4. Three hours a week for the second semester.

Associate Professor Chandler.

†Withdrawn for the current year.
†10. Differential Equations (Forsyth.)

Open to students who have completed course 4. Three hours a week for a year.

Associate Professor Chandler.

Advanced course, intended primarily for graduate students.

Open to students who have completed course 3. Three hours a week for a year.

Professor Burrell.

A lecture course, introductory to the principles of modern geometry. The method of treatment is analytic.

XIII. Applied Mathematics.

1. Introduction to the Mathematical Treatment of Science.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Professor Hayes.

2. Practical Astronomy.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Professor Hayes.

Spherical co-ordinates, time, latitude, longitude, the ecliptic, parallax.

Practical work in the Whitin Observatory accompanies the theoretical treatment of each subject.

3. Thermodynamics.

Open to students who have completed course 1. Three hours a week for the first semester.

Professor Hayes.

A lecture course, mathematical in form, designed to accompany Maxwell's Theory of Heat.

†Withdrawn for the current year.

Open to students who have completed course 1. Three hours a week for the first semester.

Professor Hayes.

This course is a continuation of course 1, and is devoted to the further development of the principles of kinematics, statics, and kinetics.

5. Geodynamics.

Open to juniors and seniors properly qualified. Three hours a week for the second semester.

Professor Hayes.

Both the astronomical and geological aspects of the subject are emphasized. In general, the topics discussed are: precession, nutation; form, size, density of the earth; thermal condition of the earth, theories concerning its crust.

Open to students who have completed courses 1 and 2. Three hours a week for a year.

Professor Hayes.

The treatises of Watson, Oppolzer, and Tisserand are used for reference. Determination of a parabolic orbit.

XIV. Chemistry.

1. General Chemistry.

Open to all undergraduates. Freshmen four hours a week for a year; all other students three hours a week for a year.

Associate Professor Bragg, Miss Penny.

Course 1 is for beginners in Chemistry, and is intended to familiarize the student with the important properties of the elements—especially the non-metallic ones—and their compounds; with their modes of preparation, and with such tests as shall lead up to the study of systematic Qualitative Analysis; also to present the laws governing chemical reactions, the meaning of chemical equations, and the more recent theories adopted in the science.

All of the more simple experiments are performed by the student herself in the laboratory.

†Withdrawn for the current year.
2. Qualitative Analysis.

Open to students who have completed course 1. Three hours a week for the first semester.

Miss Jackson.

This course supplements course 1 by presenting the properties and characteristic reactions of the metallic elements. Practical methods of separating and recognizing the elements present in simple mixtures are taught, and the progress of the student is constantly tested by the examination of simple substances, the exact composition of which is unknown to the student.

Open to students who have completed course 1. Three hours a week for the second semester.

Professor Roberts, Miss Penny.

This course includes a somewhat careful study of the saturated series, dealing very briefly with the unsaturated and benzene series. Experiments are performed in the laboratory to illustrate the behavior of representative substances, and a limited number of preparations are made to familiarize the student with the more common processes of Organic Chemistry.

4. Advanced General Chemistry and Qualitative Analysis.

Open to freshmen who have met the admission requirement in Chemistry. Four hours a week for a year.

Miss Jackson.

5. Quantitative Analysis.

Open to students who have completed course 2 or 4. Three hours a week for the second semester.

Miss Jackson.

In this course a few typical processes involving both volumetric and gravimetric methods will be taught, to illustrate general principles of Quantitative Analysis.

Open to students who have completed course 1, 2 or 4, 3 or 7, and 5. Three hours a week for the second semester.

Associate Professor Bragg.

*Open to students who have completed two years' work in Chemistry. Three hours a week for a year.*

Professor Roberts, Miss Penny.

8. Theoretical Chemistry.

*Open to students who have completed course 1. Three hours a week for the first semester.*

Professor Roberts.

9. Stereo-Chemistry and Laboratory work in connection with Theoretical Chemistry.

*Open to students who have completed courses 3 or 7, and 8. Three hours a week for the second semester.*

Professor Roberts, Associate Professor Bragg.

**XV. Physics and Physical Astronomy.**

1. General Physics.

*Open to all undergraduates. Freshmen four hours, others three hours a week for a year.*

Miss Davis, Miss Langford.

This course is intended for students who are beginning Physics. It consists of lectures amply illustrated, followed by laboratory work. The object is to outline the elementary principles of Mechanics, Sound, Electricity, and Light, to train the powers of observation, and to teach proper methods of recording observations, and reasoning upon them.

3. Heat, Light, and Electricity.

*Open to students who have completed course 1 or an equivalent. Freshmen four hours, all other students three hours a week for a year.*

Miss Langford.

*Not offered in 1902–1903.*
This course presupposes an acquaintance with the general principles of Physics, and aims to be more intensive in its work. Only the best instruments of precision are used, and training is given in the handling of apparatus and in the discussion of results.

Special attention is given to the needs of those preparing to teach, and opportunity is given for student lectures with illustrative experiments.

† 4. Selected subjects in Light and Electricity, mathematically treated.

Open to seniors who have completed course 3 and also course 5 in Pure Mathematics. Three hours a week for a year.

Miss Langford.

It is possible to combine one semester of this course with one semester of course 5.

5. Advanced Laboratory Work.

Open to students who have completed course 3. Three hours a week for a year.

Professor Whiting.

The aim is to present modern theories, with evidence for them gathered from individual work and consultation of original memoirs, and to develop the power of independent thought and experiment.

Among subjects which receive a different degree of emphasis according to need are polarized light, photography of spectra, wave lengths, electric discharge through gases, electric waves, electrolytic phenomena, influence of electric field on light.

† 6. Meteorology.

Open to sophomores, juniors, and seniors. One hour a week for a year.

Professor Whiting.

† Withdrawn for the current year.

‡ An elementary course in Physics, either in college or in secondary school, is prerequisite to courses 6 and 7.
Text-books: Davis' *Meteorology*, Ward's *Practical Exercises*. The solution of inductive problems, by the use of the weather maps and records of observations, gives training in scientific reasoning. Special topics prepared and presented by students are a feature of the course.

† 7. Physical Astronomy.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Whiting, Professor Hayes.

The subject is outlined by lectures, fully illustrated by lantern slides, charts, and apparatus. One third of the course consists of work in the Whitin Observatory, and the spectroscopic laboratory, adapted to make clear the principles by which the astronomy of measurement and the modern astrophysics have been built up.

XVI. Geology and Mineralogy.

1. Geology.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

Professor Niles, Miss Fisher.

Lectures, recitations, and field work. Subjects treated: Dynamical Geology, Structural and Historical Geology.

A systematic and comprehensive study of the more important teachings of geological science.

2. Mineralogy.

*Open to sophomores, juniors, and seniors. Three hours a week for the first semester.*

Miss Fisher.

Lectures and recitations. Laboratory study of sets of specimens of the more important mineral species. Blow-pipe analysis. Crystallography. A reference collection is always available for students' use.

‡ An elementary course in Physics, either in college or in secondary school, is prerequisite to courses 6 and 7.
3. Advanced Geography.

*Open to students who have completed one year of Science.* *Three hours a week for the second semester.*

Miss Fisher, Professor Niles.

Lectures and recitations. This course comprises a comparative study of the geographic features of the continents with their natural and political divisions. It also discusses the influence which these features have upon the life, habits, prosperity, and commercial relations of peoples and nations.

†4. Structural Geology and Field Work.

*Open to students who have completed course 1. Three hours a week for a year.*

Miss Fisher.

Lectures, discussions, and field study. The aim of the course is to give a thorough knowledge of Structural Geology, with practice in applying the principles to the interpretations of the geology of selected localities.

XVII. Botany.

1. General Botany.

*Open to all undergraduates. Freshmen four hours, all other students three hours a week for a year.*

Associate Professor Cummings, Associate Professor Cooley, Dr. Ferguson.

This course includes a general study of morphology, anatomy, classification, and ecology, with demonstration of the simpler laws of physiology. Plants are studied as individuals and as members of plant societies, special emphasis being laid on the relation of structure to environment. An herbarium illustrating the principles of morphology, ecology, and classification is required. Recitations, lectures, and demonstrations, accompanied by parallel studies in the laboratory and field. This course is introductory to all other courses in Botany.

† Withdrawn for the current year.
2. Cryptogamic Botany.

_Open to students who have completed course I. Three hours a week for a year._

Associate Professor Cummings.

A study of the morphology, reproduction, and development of the lower forms of plant life.

In the autumn special attention is given to the study of mushrooms, both in field and laboratory, with reference to poisonous and edible forms. In the spring term each student makes choice of some group, as ferns, for individual study. It is intended that this course shall supplement Botany I in giving a general survey of the plant kingdom.

_Open to students who have completed course I, and to other students upon advice of the professor. Three hours a week for a year._

Associate Professor Cooley.

This course includes a consideration of the special morphology, classification, and distribution of flowering plants. The fundamental principles of plant geography are studied in connection with the orders of plants. An important part of the course deals with the economic value of plant products. This work is conducted in the laboratory, field, and greenhouse.

4. Medical Botany.

_Open to students who have completed courses IO and II. Three hours a week for a year._

Associate Professor Cooley.

Microscopical examination of the typical and important roots, rhizomes, stems, leaves, barks, and fruits of the Pharmacopæia. This course is intended to give familiarity with the botanical characters of the more common medicinal plants, thus aiding in the identification of the crude drugs derived from them and in the detection of adulterations. The active principles of such drugs, and peculiar modes of action, are also investigated.

* Not offered in 1902-1903.

*Open to students who have completed course 2. Three hours a week for a year.*

Associate Professor Cooley.

Gross anatomy, histology, and physiology of a series of plants, considered as types, proceeding from the simpler to the more complex organisms. Special attention will be given to tracing the development of organs and the evolution of forms.

7. Plant Embryology and Cytology.

*Open to students who have completed courses 10 and 11. Three hours a week for a year.*

Dr. Ferguson.

A comparative study of the development of the reproductive organs in the great groups, phyla, of plants. Also nuclear division and cell formation with special reference to the development of the gametophytes in Phanerogams. When this course is taken as a major for an advanced degree more time will be required, and a special problem will be assigned for investigation.

8. Advanced Cryptogamic Botany. Systematic study of any chosen group or groups of Cryptogams.

*Open to students who have completed course 2. Three hours a week for a year.*

Associate Professor Cummings.

*Open to students who have completed course 1. Three hours a week for a year.*

Associate Professor Cooley.

The subjects studied in this course are forest botany and silviculture; the forests of the world, their value and the uses of their products; protection of woodlands and forest regulations. The work is largely conducted out of doors.

*Not offered in 1902-1903.*
10. Comparative Histology of Plants and Microscopical Technique.

Open to students who have completed or are taking course 2. Three hours a week for the first semester.

Dr. Ferguson.

A study of the structure, development, and contents of the cell; cell multiplication and tissue formation: the structure and development of primary tissues; secondary thickening. Special attention is given to the technique of the microscope and to microchemical methods of fixing and staining.

Open to students who have taken course 10. Three hours a week for the second semester.

Dr. Ferguson.

The lectures of this course take up in detail the more important problems of plant physiology, including nutrition, the effects of stimuli upon cell activities, growth, irritability, development, and reproduction. The laboratory study consists of experimental work in plant physiology. A knowledge of the elements of Physics and Chemistry is very desirable for courses 10 and 11.

XVIII. Zoology and Physiology.

1. General Biology.

Open to freshmen and sophomores. Freshmen four hours, all other students three hours a week for a year.

Dr. Thompson, Miss Alice Wilcox, Miss Foote.

In this course emphasis is laid on the fundamental unity of plants and animals. The general principles underlying all life are studied by means of field work, laboratory work, and lectures. A study is made of a typical animal, the frog, and also of a typical plant, the bean, in order to compare the morphology and physiology of the two kingdoms. Development is studied in the life history of the frog. A brief comparative study is made of lowly plants and animals. Lectures
accompanied by systematic out-of-door work on the common birds form a considerable part of the work for the second semester.

This course is intended to train students in accuracy of observation and in methods of scientific work.

2. General Zoology.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Professor Willcox, Miss Alice Wilcox.

Comparative study of all the great groups (phyla) of animals, beginning with unicellular organisms and concluding with mammals. Also a few lectures on vertebrate embryology.

This course aims to present the outlines of animal structure and classification, and to give familiarity with the commoner forms.

Courses 1 and 2 together will meet the admission requirement in biology of the Johns Hopkins Medical School.

3. Anatomy of the Cat.

Open to students who have completed course 1 or course 2. Three hours a week for the first semester.

Miss Bowers.

This course is intended to train students in careful dissection. It is especially fitted for those who intend to study medicine. Constant reference will be made to human anatomy, and a lightening of the ordinary course in that subject in a medical school can be effected by taking this work.

Open to students who have taken or are taking course 2. Three hours a week for the second semester.

Miss Bowers.

This course, by a thorough study of the development of the chick, introduces the student to the general principles of embryology. Training is given in the mounting of embryos and in the preparation of serial sections.
5. Natural History of Animals.

*Open to students who have completed or are taking course 2.*

Three hours a week for a year.

Professor Willcox.

Collection and classification of animals; study of habits; readings in natural history; excursions to neighboring museums; microscopic mounts of minute animals.

*Open under the advice of the professor to students who have completed two full courses. Three hours a week for a year.*

Professor Willcox.

Readings and discussions of Darwin, Spencer, Wallace, Weismann, and kindred authors. One careful paper on a biological subject prepared by each student.

*Open to students who have completed course 1 or course 2.*

Three hours a week for a year.

Lectures on cellular histology and physiology. Laboratory work, including thorough training in the manipulation of the microscope and in the methods of histological preparation, as well as the study of prepared specimens. A considerable lightening of the ordinary course in histology as given in a medical school can be effected by taking this work.

*10. Animal Physiology.*

*Open to students who have completed course 1 or course 2.*

Three hours a week for a year.

Lectures and laboratory work dealing with experimental and theoretical questions in physiology, such as the structure and action of muscle, nerves, blood vessels, the heart, blood, the formation and action of digestive juices, excretion, metabolism, the special sense organs, the brain, etc. Each student arranges and uses the apparatus necessary for almost all experiments; but some of the more difficult are performed by the instructor, assisted in turn by the different members of the class.

* Not offered in 1902-1903.
Apparatus needed by students in this department. Microscopes, reagents, etc., are provided by the college. Certain dissecting instruments may be rented from the college; others must be provided by the students.

The instruction in all courses of the Zoology department, except 6, is given through practical work in the laboratory, accompanied by lectures, three appointments per week, one hour and a half each. Course 6 requires no laboratory work, and the appointments are forty-five minutes each.

Hygiene.

1. Physiology and Hygiene.

Required of freshmen. One hour a week for a year.

Miss Sherrard.

Lectures, demonstrations, and quizzes.

The subject presented is the proper care of the body, and the course is designed to give a practical knowledge of its structure and an understanding of the laws of life and health. An outline is also given of the general principles of public hygiene.

XIX. Pedagogy.

Open to juniors, seniors, and graduates. Three hours a week for a year.

Dr. McKeag.

This course attempts to base principles of education upon the data of science. It sketches rapidly the civilizing and educative influence of the arts of primitive peoples. It studies educational processes at various stages of the child's development, and considers educative material suitable at different periods of his life. This course also includes a general study of the child's growth and physique, and it presents school hygiene in detail.

Open to juniors, seniors, and graduates. Three hours a week for a year.

Dr. McKeag.

This course aims to present a general view of the great movements in education; to trace the development of its in-
stitutions, and to select characteristic features of its accepted systems. Emphasis is placed on modern educational theories. The child-study movement is considered. Detailed studies are made of certain practices and problems of the American public schools of the present time.

Note.—Course 1 is recommended to students who are specializing in the departments of science, philosophy, mathematics, or art. Course 2 is designed primarily for students who are specializing in language, literature, or history.

† 8. Philosophy and Art of Teaching.

Open, on the approval of the department, to graduates who have completed or are taking course 1 or 2. Four hours a week for the first semester.

This course attempts to present both the philosophy and the art of instruction. It considers the nature and elements of the teaching process; aims and ideals in schoolroom practices, and the basis of methodology. It examines in some detail the art of study, and briefly considers discipline and incentives.

† 9. Methods of Teaching.

Open to students who have completed course 8. Four hours a week for the second semester.

This course considers methods of teaching elementary school subjects, and discusses from a similar point of view the teaching of English and foreign languages, science and mathematics in secondary schools.

XX. Bibliography.

1. Bibliography.

Open to sophomores, juniors, and seniors. One hour a week for a year.

Miss Godfrey.

This course aims to familiarize the student with the best bibliographical works and with library methods and catalogues,
to teach the best methods of reaching the literature of a special subject, and to furnish important bibliographical lists likely to prove valuable in future study. It will prove especially helpful taken in connection with courses in English literature, philosophy, history, economics, and the history of art.

XXI. Elocution.

1. Training of the Body and Voice.

Open to sophomores, juniors, and seniors; to freshmen by special permission. Two hours a week for a year.

Miss Bennett, Mrs. Rice.

Body; poise and bearing. Voice; correct method of breathing, etc. Reading, with special reference to a good use of the voice. Recitations.

Open to students who have completed course 1, or an equivalent course. Two hours a week for a year.

Miss Bennett.

Voice culture; exercises for freedom of body; gesture; recitations from the best authors; reading at sight.

3. Reading of Shakespeare.

Open to students who have completed course 1 and 2, or to those who have completed or are taking English Literature 9; to others at the discretion of the instructor. Two hours a week for a year.

Miss Bennett.

Analysis of characters, reading, scenes selected for memorizing and acting.

XXII. Art.

‡1. History of Architecture. From the earliest times to the year 1000 A.D.

Open to juniors and seniors, and to sophomores by permission of the instructor. Three hours a week for a year.

Mr. Holt.

‡Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given in the same year.
2. Outline History of Greek Sculpture.
   Open to sophomores, juniors, and seniors. Three hours a week for a year.
   Dr. von Mach.

*† 3. History of Italian Painting through the Fifteenth Century.
   Open to sophomores, juniors, and seniors. Three hours a week for a year.
   In this course the development of Italian painting will be traced from the early mosaics to Botticelli and Mantegna; critical study will be given to the position and quality of the artists, as well as to the characteristics and relations of the different schools.

5. Studio Practice.
   Open to sophomores, juniors, and seniors. One hour a week for a year.
   Professor Brown, Mr. Woodbury, Miss Abbot.
   Drawing, sketching and color-work. No prerequisites.

5a. Studio Practice.
   Open by permission of the instructor to students who are taking or have completed Art 5. One hour a week for a year.
   Professor Brown, Mr. Woodbury, Miss Abbot.

5b. Studio Practice.
   Open by permission of the instructor to students who are taking or have completed Art 5a. One hour a week for a year.
   Professor Brown, Mr. Woodbury, Miss Abbot.
   Conduct of these courses same as that of 5.
   The studio courses count toward the degree after one course in the History of Art has been completed.

   Open by permission of the instructor to students who have completed a course in Art. One hour a week for a year.
   Professor Brown.

* Not offered in 1902–1903. It is intended to offer courses in the History of Italian Painting in 1903–1904.
† Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given in the same year.

Open to graduates and seniors, and by permission of the instructor, to students who have completed Art 2. Three hours a week for a year.

Dr. von Mach.

In this course one limited period of Greek sculpture will be carefully studied. Subject for 1902–1903: The Fourth Century B. C. with work in other periods for comparative purposes.

A part of the work will be carried on in the Museum of Fine Arts in Boston.

All must read in preparation "Handbook of Greek Sculpture," by Ernest A. Gardner.

Open to students (to juniors by special permission) who have completed Art 3, and to others by permission of the instructor. Three hours a week for a year.

The aim of this course is to study a given epoch in detail, and to train students for independent work. In preparation for this course an acquaintance with the outline of the history of Italian painting is required.

*†9. History of Architecture from the year 1000 to the present time.

Open to juniors and seniors, and to sophomores by permission of the instructor. Three hours a week for a year.

Mr. Holt.

The aim of this course is to give a general view of the development of styles and a thorough understanding of their essential elements, both constructive and decorative, during the period studied.

* Not offered in 1902–1903. It is intended to offer courses in the History of Italian Painting in 1903–1904.

† Withdrawn for the current year.

‡ Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given in the same year.
First semester. Introduction to the subject, and history of architecture during the Romanesque and Gothic periods, from 1000 A.D. to the Renaissance.

Second semester. Architecture from the beginning of the Renaissance to the present time.

**10.** History of Italian Painting during the Renaissance.

*Open to sophomores, juniors, and seniors. Three hours a week for a year.*

**11.** An Outline Course in the History of Art. Lecture Course.

*Open to sophomores, juniors, and seniors. One hour a week for a year.*

Professor Brown.

This course furnishes an outline of the general development of styles in architecture, sculpture, and painting from earliest times up to the present. This course is complete in itself, but it may be taken in preparation for other courses. This course is not open to students who have taken or are taking two other history courses in the Art Department.

**12.** Elementary Course.

*Open to freshmen only. Four hours a week for a year. No prerequisites.*

Professor Brown, Miss Abbot.

Designed for freshmen who enter college with the intention of specializing in Art. This course is a combination of history and practice, and will include an introductory study of the History of Architecture, Sculpture and Painting, illustrated by sketching from photographs, and by practical studio work in drawing, composition, and modeling in clay. It will be conducted by the scientific method of laboratory observation and practice. No other work may be substituted for the laboratory practice.

*Not offered in 1902–1903. It is intended to offer courses in the History of Italian Painting in 1903–1904.

†Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given in the same year.*
13. Introductory Course.

*Open to sophomores, juniors, and seniors. Three hours a week for a year. No prerequisites.*

Professor Brown.

This course furnishes an outline in more detail than Art II of the general development of styles in Architecture, Sculpture, and Painting. Its method of constant laboratory work leads directly into the methods of the more advanced courses in the department.

This course is complete in itself, but it may be taken in preparation for other courses.

This course is not open to students who have taken or are taking any other history course in the Art Department.

Students in art courses are required to use laboratory methods, examining and comparing, sketching or describing the photographs used in illustration.

Previous preparation in drawing is not required, but it is desirable that all students who intend to take courses in Art should be prepared to present specimens of any drawing that they may have done.

The art library is open to students from 9 to 5.30 daily, and from 7 to 9 in the evening.

N. B. Any student who desires to give yearly the time of one full course to studio work throughout her college course may do so by spending five years in college before taking her degree, instead of four.

**XXIII. Music.**

1. Theory.

The following courses count toward the bachelor's degree. They may be elected by students not taking instrumental or vocal music, and are subject to no separate tuition fee. In the case of students who are taking vocal or instrumental music, course 1 may be profitably followed by courses 6, 7; students who wish to make their music study general rather than technical may elect course 4.
1. Harmony.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Professor Macdougall.

This course covers notation, the study of intervals and scales, the formation and interconnection of chords, modulation, non-harmonic tones, analysis of harmony in standard works. Exercises in harmonizing basses and melodies and in ear training.

6. Counterpoint.

Open to students who have completed course 1 (or its equivalent). Three hours a week for the first semester.

Professor Macdougall.

Counterpoint in two, three, and four voices; double counterpoint; analysis of examples from standard works.

7. Musical Form.

Open to students who have completed course 6. Three hours a week for the second semester.

Professor Macdougall.

A study of the simple musical sentence and its development into the various forms of instrumental and vocal music; emphasis being laid on the larger forms (partita, suite, sonata, symphony, overture, aria, mass, oratorio, etc.); analysis of standard compositions. Opportunity for original work will be given.

4. The development of the art of Music.

Open to sophomores, juniors, and seniors. Three hours a week for a year.

Professor Macdougall.

A course in the appreciation of music, intended to develop musical perception and the ability of listening intelligently to music.

First semester: the evolution of rhythm, harmony and melody; their power and office in musical expression; the prin-
principal musical forms. Second semester: studies of the famous composers, their lives, their strongest works, their relation to the progress of musical art. Some great work will be selected for special study throughout the year. No previous knowledge is necessary. This course may follow 1 or 7, or be taken independently.

A limited number of tickets to the Boston Symphony Concerts will be given to students who are able to use them profitably.

II. Instrumental and Vocal Music.

Freshmen may take vocal or instrumental music without courses in Musical Theory. All other students who wish to take vocal or instrumental music must elect at the same time a course in Musical Theory, unless they have previously completed two full courses in the subject.

Training in instrumental or vocal music does not count toward a degree; but any student who completes the prescribed courses in Pianoforte, Organ, or Voice, as described on the following page, will receive the certificate of the Department of Music. For terms see p. 110.

Candidates for the certificate of the Department of Music may devote all their time to music, except that which is given to three academic studies, including a course in Biblical History. Candidates must meet requirements 1, 2, 3, pp. 25 to 28, must present the maximum preparation in either Latin, Greek, French, or German, and must pass an examination on the rudiments of music covering such work as is given in the first forty-eight sections of Twenty Lessons in Writing and Ear Training, published by the Hatch Music Company. The time occupied in study for a certificate depends upon the proficiency of the pupil, but in general four years are needed.

Candidates for the B.A. degree may take a course in vocal or instrumental music in connection with their regular academic work, but in this case five years are required for the completion of the courses requisite to the degree.
Special students who do not wish to become candidates for the certificate may arrange for courses combining music with academic work, but it is expected that such students will take at least two lessons per week in either instrumental or vocal music. The requirements for admission are the same as those prescribed above for candidates for the music certificate.

Those who are suitably qualified may pursue musical studies exclusively, without being otherwise connected with the College. For such students special arrangements may be made.

Certificate of the Department of Music.

Any student in the College who completes any one of the following courses of study will receive the certificate of the Department of Music:—

A. Pianoforte: two lessons a week, with periods of practice daily for six days each week.

Academic subjects: from six to eight hours a week throughout the course, including Musical Theory (courses 1, 4, 6, and 7), modern language, and Biblical History.

B. Organ: two lessons a week with daily practice, as in piano study. Academic subjects as in A.

C. Voice: two lessons a week with daily practice. Academic subjects as in A, but the modern languages pursued must include Italian, which should be taken as early as possible, that the student may have the benefit of the subject throughout the course.

Violin, Viola, Violoncello, Harp, or any orchestral instrument may be made a specialty instead of the above-mentioned principal studies.

Students intending to apply for the certificate of the Department of Music must give at least a year's notice.

As the Department is contemplating changes in its work, the conditions here laid down will not govern admission to the Department after September, 1903.
Pianoforte.

Those who make pianoforte their specialty, and wish to obtain a certificate, should upon entering be familiar with correct phrasing, staccato and legato touch, the ordinary musical signs, and their application; should show technical proficiency, and should present the following work or its equivalent: Czerny, Op. 299, three books; Loeschhorn, Op. 66, three books; Bach, Preludes; and two or three sonatas by Haydn and Mozart.

The course will be adapted to the particular needs of the student, but will be so arranged that the student upon its completion shall have a fundamental knowledge of the best works in pianoforte literature: Bach, Händel, Mozart, Haydn, Beethoven, Schubert, Schumann, Weber, Mendelssohn, and Chopin, as well as the different schools of modern writers.

Organ.

To obtain the certificate, organ pupils must begin with a good knowledge of pianoforte technique.

The course includes the most important of the Bach works, the Preludes and Fugues and Sonatas of Mendelssohn, selections from Rheinberger, Merkel, Thiele, and others of the modern German school; compositions by Guilmant, Saint-Saens, Widor, Gigout, Salome, and others of the French school; Smart, Turpin, Best, Lemare, Wolstenholme, Hollins, and others of the English school; Buck, Whiting, Whitney, Foote, Parker, and others of the American school.

Constant reference will be made to the use of the organ in church.

Instruction is given not only on the older type of organ, but also on a large electric organ embodying the latest principles of organ construction.

College Examinations.

An examination period occurs at the end of each semester. At these periods, and also during the days of the admission examina-
tions in September, examinations for the removal of conditions and deficiencies and for advanced standing may be taken.

A student who wishes to take an examination upon a course which is not a part of her approved schedule for the year, must apply to the Dean for the requisite card of admission to the examination. The last day for receiving applications for such cards is, for the September examinations, September first; for the mid-year examinations, January fifteenth; for the June examinations, June first.

N. B. Examinations for the removal of conditions and deficiencies being excepted, no student can be admitted to examination upon a course which is not a part of her approved schedule for the year without permission both from the head of the department concerned and the Dean of the College. No student, therefore, should enter upon preparation for such an examination until her plan has been approved by both of the above-named officers.

The College reserves the right to require the withdrawal of students whose scholarship is not satisfactory.

Degrees.

The following degrees will be conferred by the Trustees upon recommendation of the Academic Council: —

Bachelor of Arts.

Master of Arts.

Requirements for the B. A. Degree.

Every candidate for the B. A. degree must complete before graduation the equivalent of fifty-nine one-hour courses,* of which a certain number are required, the rest elective.

I. REQUIRED. Courses in the following subjects are required as specified: —

Mathematics, one full course †; Philosophy, one full course; Physiology and Hygiene, one one-hour course*; Biblical History, the equivalent of four one-hour courses; English, the equivalent of four one-hour courses; Language, one full course; Natural

* A one-hour course is a course given once a week for one year.
† A full course is a course given either three or four times a week for one year.
Sciences, two full courses. The science courses must be in different departments. If a student offers science for admission, only one full course of natural science is required in college.

Of the required subjects, Mathematics must be taken in the freshman year; Physiology and Hygiene in the freshman year; Biblical History, one hour per week in the freshman and sophomore years, two hours per week in the junior year; English, one hour per week in the freshman and junior years, and two hours per week in the sophomore year. Of the natural sciences, one must be taken before the junior year, the other may be elected at any time during the course; language may be taken in any year, but either a language or a science must be taken in the freshman year. Philosophy should ordinarily be taken before the senior year.

II. Elective. All of the fifty-nine hours not indicated in the above are elective, subject only to the restriction that the equivalent of eighteen one-hour courses must be taken in one of the following ways:

(a) Nine in each of two subjects, related or unrelated.
(b) Nine in one subject, with nine divided between two tributary subjects.
(c) Twelve in one subject, with six in a tributary subject.
(d) Twelve in one subject, with six divided between two tributary subjects.

In general, required subjects may be counted in making up these eighteen hours; but course 1 in French, course 1 in German, and course 13 in Greek may not be so counted.

Except by special permission, a student may not take fewer than ten or more than fifteen hours per week in any one year.

Requirements for the M.A. Degree.

Candidates for the degree of Master of Arts must be graduates of Wellesley College, or of some institution of satisfactory standing, and must give evidence of ability to carry on the work for the Master's degree.

The amount of work required of candidates for the M.A. degree consists of the equivalent of from nine to twelve one-hour courses chosen from the courses described in the circular of
Graduate Instruction, and in addition either a thesis or a report or reports on one or more pieces of independent work. The student should choose one major subject, and not more than one minor subject, which should be related to the major; or she may, if she prefers, do all her work in one subject.

One year is the shortest time in which a candidate can complete the work required, but it must be understood that only students of ability and maturity will be able to finish it in so short a time.

The work for the degree of Master of Arts will be tested by either examination or thesis, or both. Rules regarding examinations of resident students are fully stated in the graduate circular. Non-resident students will be examined in Wellesley during some one of the regular examination periods of the year in which the degree is to be conferred.

Thirty scholarships, as described on page 111, are open to accepted candidates for the Master's degree not residing in college buildings. Candidates residing in the college buildings will pay the full charge for board and tuition, $400 per annum. Upon receiving the Master's degree a fee of twenty-five dollars will be required of each candidate.

Graduate students who have done the entire work for the M.A. degree in non-residence are accepted as candidates for this degree only when this work has been done at some institution which does not grant the M.A. degree to women, but they may under certain conditions do a portion of the work at any approved institution, including those which grant the M.A. to women, provided that the remainder is done at Wellesley. Preparation for the degree by private study is not permitted. The diploma fee is the same for resident and for non-resident students.

Circulars containing fuller information concerning graduate work will be forwarded on application to the Dean of the College. It is very desirable that applications for admission as graduate students be received by June 1st of the year in which the student wishes to enter.
Studentships Giving Opportunity for Study Elsewhere than at Wellesley.

Schools of Classical Study.

Wellesley College is a contributor to the support of the American School of Classical Studies in Athens, and the American School of Classical Studies in Rome, founded in 1882 and 1895 respectively, by the Archaeological Institute of America.

The object of these schools is to afford opportunity for the study of classical literature, art, and antiquities, to aid in original research in these subjects, and to conduct the exploration and excavation of classical sites.

The American School of Classical Studies in Athens.

The school year extends from October 1st to June 1st.

The regulations for admission are as follows: "Bachelors of Arts of co-operating colleges, and all Bachelors of Arts who have studied at one of these colleges as candidates for a higher degree, shall be admitted to membership in the School on presenting to the Committee a certificate from the classical department of the college at which they have last studied, stating that they are competent to pursue an independent course of study at Athens under the advice of the Director. Members of the School are subject to no charge for tuition."* Further information can be had by application to Professor Chapin, who represents Wellesley upon the Managing Committee of the School.

The American School of Classical Studies in Rome.

The school year extends from the fifteenth of October to the first of July. The regulations for admission are as follows: "Graduates in arts of American Colleges and universities of good standing, and under exceptional circumstances, other persons of marked qualifications, may be admitted as students of the School on submitting to the Chairman of the Managing Committee, or to the Director of the School, satisfactory evidence that their

*A few Fellowships of $600 each are awarded on competitive examination.
previous studies have been of such a character as to fit them to profit by the opportunities that the School offers."

Further information can be had by application to Professor Hawes, who represents Wellesley upon the Managing Committee of the School.

The Marine Biological Laboratory at Wood's Holl.

Wellesley College is a contributor to the support of the Marine Biological Laboratory at Wood's Holl,—a region especially rich in forms of marine life, both vegetable and animal. This laboratory, which is open during the summer for the study of marine life, affords opportunities both to investigators and to persons needing either instruction or direction.

In the department of Botany courses are offered for the study of marine algae, types of fungi, and the higher cryptogams. There are also courses in ecology, physiology, and cytology, with opportunities for special investigation.

In Zoology regular courses of instruction are given in the anatomy of typical marine invertebrates and of the lower vertebrates. There are also courses in the embryology of fishes, in comparative physiology, and in comparative psychology, which are fitted for advanced students.

Students in either Botany or Zoology who desire to undertake original work will receive suitable direction. In addition to these opportunities there are courses of lectures on special topics, which are open to all students, and evening lectures on subjects of general biological interest.

Wellesley College holds the right to appoint annually two students who are entitled to all the advantages of the Laboratory without expense for tuition. Applications for appointment to a studentship should state the character of the work to be done,—i.e., whether botanical or zoological, whether general work, investigation under direction, or independent investigation,—and should be forwarded to Associate Professor Cummings or Professor Willcox in time to reach Wellesley before April 1st.

* A few Fellowships of $600 each are awarded on competitive examination.
The Zoological Station in Naples.

Wellesley College is a subscriber to the support of the American Women's Table at the Zoological Station in Naples, and thus has a voice in the selection of the persons who make use of it. Such persons must be capable of independent investigation in Botany, Zoology, or Physiology. Appointments are made for a longer or shorter period, as seems in each case expedient. Applications for the use of the table may be made through the President of the College.

Expenses.

The charge for board and tuition to all students living in the college buildings and taking the regular college course, without music, is $400 per year. Such students will pay $250 at the opening of the College in September. Of this amount $175 is for tuition, and $75 on account of board. At the beginning of the second semester the balance for board ($150) is due.

Students who are not lodged in the college buildings make their entire tuition payment (see below) at the time of the opening in September. These payments must be made before the student can take her place in the class room. No exception will be made to this rule without a written permission from the Treasurer.

An application fee of $10 is required from all candidates for admission, and no application is recorded until the fee is received (see page 111). This fee will be credited to the student, and a corresponding deduction made on her first payment. If the student withdraws, the fee will be returned provided notification of withdrawal is received thirty days before the beginning of the college year. A student who postpones entrance until the year following the one for which she first applied may transfer her application fee.

Checks or money orders should be made payable to Wellesley College.
Tuition.

The charge for full tuition to all students, whether living in college buildings or not, is $175 a year.

Tuition must be paid in advance, and is not subject to return or deduction.

Students who are permitted to take seven hours or less of class-room work per week, and who do not live in the college buildings, pay tuition by the course as follows: For a one-hour course, $20; a two-hour course, $40; a three-hour course, $60. Payment is due at the beginning of the year. No charge is made for tuition in courses in Biblical History.

An additional charge is made for materials in the following laboratory courses: $5 for each laboratory course in Botany, Chemistry, Physics, or Zoology, and $2.50 for the course in Mineralogy. Every student should also reckon on the expenditure of $10 to $25 annually for the purchase of books. At the time of taking the degree a diploma fee is charged. This is $5 for the B.A. degree and $25 for the M.A. degree. At the time of taking a certificate, a certificate fee of $3 is due.

Tuition and Other Charges in the Department of Music.

For instruction for the college year in Pianoforte, Organ, or Violin, two lessons per week ........................................ $100 00
One lesson per week* ........................................ 50 00
(Lessons forty-five minutes each.)
Two half-hour lessons per week ................................ 75 00
For instruction for the college year in Vocal Music, two
lessons per week ........................................ 100 00
For use of the Pianoforte, one hour daily, for the year .... 10 00
For two hours daily ........................................ 20 00
For three hours daily ........................................ 30 00
For use of the Pipe Organ in Music Hall, one hour daily,
for the year ........................................ 15 00
For two hours daily ........................................ 30 00

Tuition in music must always be paid in advance, and is not subject to return or deduction. Special arrangements may be made for lessons on instruments not mentioned above.

*Two lessons a week insure much more rapid progress, while by comparison with one weekly lesson they do not involve any material increase in the time spent in preparation.
Board.

A student vacating a room before the close of the year, or relinquishing a room reserved for her at the beginning of the year, will be charged for board at the rate of $7 a week until the vacancy has been filled by an incoming student. Therefore notice of an intention to withdraw should be given at the earliest possible moment. No deduction is made for absences during the year. Application for rooms in the college buildings should be made three years in advance of the time at which the student is expected to enter. A fee of $10 is required for recording application, and no application is recorded until the fee is received.

The application takes the date at which the application fee is received (see page 109).

Until May 1st, but not after that date, applications from former students will take precedence of those of new students in the matter of rooms. Board can be obtained in private families in the village for $6 per week and upward. Information regarding boarding places may be obtained by addressing the Registrar. A limited number of students can arrange for board at the College during the Christmas and spring vacations; the charge is $7 per week.

No student can receive a diploma until a satisfactory settlement of all her college dues has been made.

Scholarships, Etc.

A. For Graduates.

Thirty scholarships to the value of $175 per year have been established for the benefit of approved candidates for the M.A. degree. Applications for these scholarships should be addressed to the Chairman of the Committee on Graduate Instruction, Wellesley College, Wellesley, Mass.

B. For Undergraduates.

The Anna Palen Scholarship of $10,000, founded in 1902.

As its means allow, the Students' Aid Society also affords help to those who cannot from their own resources meet the entire expense of the college course. In many cases money is loaned to students without interest, in the expectation that whenever they are able they will repay the Society; assistance is often given partly in gifts and partly in loans. The funds at the disposal of the Society are wholly insufficient to meet the wants of applicants. Contributions of any amount will be gladly received, and should be sent to the Treasurer of the Society, Mrs. Pauline A. Durant, Wellesley, Mass.

All applications for assistance should be made by letter, addressed to the Secretary of the Students' Aid Society,
Wellesley, Mass., before the first of May preceding the college year for which the aid is needed. In two cottages a reduction of $100 is allowed on payment for board under certain conditions.

Residence.

College Hall, with three dining rooms, accommodates two hundred and sixty-one persons; Stone Hall, with four dining rooms, one hundred and seven; Wilder Hall, fifty; Freeman Cottage, forty-nine; Wood, forty-nine; Norumbega, forty-eight; Eliot, thirty-one; Simpson, twenty-two; Waban, eleven; Fiske, thirty-four. Each building contains single rooms as well as suites for two students. All the rooms are fully furnished and supplied with electric lights or student lamps.

Health and Physical Training.

The health of students is under the charge of the resident Health Officer and the College Physician. These two officers, with the Director of Physical Training and the President of the College, constitute the Board of Health, to which all matters affecting the health of students are referred. Two hospital wards, with the constant attendance of a trained nurse, are maintained in College Hall. There is also an emergency ward in an isolated building. No charge is made for the ordinary services of the Health Officer, College Physician, or resident nurse.

A course in Physiology and Hygiene, one appointment per week for a year, is required of freshmen.

The gymnasium is equipped with apparatus for Swedish educational gymnastics, and with rowing machines for the crews. The playstead furnishes an opportunity for organized sports, which are under the supervision of the Director of Physical Training. The boathouse gives shelter to barges for the class crews and to many private boats. A swimming pool has been formed by enclosing
with floats a portion of Lake Waban. Adjoining the swimming pool and boathouse is a small bath house furnished with shower baths.

Three hours per week of physical training are required of freshmen and sophomores. Each freshman receives a thorough physical examination, which includes measurements and strength tests. This examination is repeated at stated intervals until the close of the sophomore year.

The requirement in physical training made of the freshman and sophomore classes is met in the spring and fall terms by outdoor sports, under the supervision of the Director of Physical Training, and in the winter term by work in the gymnasium. The gymnastic exercises prescribed are based upon the physical examination, and vary according to the physical development of the student. These exercises are adapted to the need of the individual; therefore no student is excused from the requirement in physical training. A limited number of upper-class students is accommodated in the gymnasium. Instruction in swimming and in riding can be obtained in schools near Wellesley.

Libraries.

The Library of the College, endowed by Eben Norton Horsford, now numbers 53,345 carefully selected volumes, including collections enumerated below. The General Library is open on week-days from 7 A. M. to 9.30 P. M., and on Sundays from 9 to XI A. M. and from 2 to 6 P. M. Students have free access to the shelves. The library is fully catalogued by author and subject entries, and the most recent and useful bibliographical aids are provided; special effort is made by the librarians to train students in thorough methods of research. A practical course of instruction in Bibliography is given each year in connection with college courses in literature, art, philosophy, history, and economics.

One hundred and seventy American, English, French, and German periodicals are taken for the General Library. The list
includes the most important representatives of the branches of instruction covered by the college curriculum. About thirty-seven daily, weekly, and monthly journals are taken for the reading room.

The Gertrude Memorial Library, established by Mr. A. A. Sweet, the Missionary Library, and other collections in the General Library, furnish 4,541 volumes for Biblical study and religious reading.

The Library of American Linguistics, a special gift from Mr. Horsford, numbers 1,420 works, including the valuable collection made by Major J. W. Powell.

The following collections are located in the laboratories of the departments to which they belong:

- Art Library, 1,710 volumes.
- Library of Botany, 1,913 volumes.
- Library of Physics, Physical Astronomy, Microscopy, and Physical Geography, 2,395 volumes.
- Library of Zoology and Physiology, 1,887 volumes.
- Library of Chemistry, 1,106 volumes.

In the smaller houses, libraries of literary, historical, and religious works are accumulating through private generosity.

The Farnsworth Art Building and Art Collections.

The Farnsworth Art Building, the gift of the late Isaac D. Farnsworth, was opened in September, 1889. Besides a lecture room, galleries for collections, and studios for those engaged in drawing and painting, a special feature in the plan of the building is the arrangement of laboratories and libraries, so that the books and art material relating to particular subjects and periods can be made immediately available to general students.

The Art Collection consists of a large number of photographs, engravings, etchings, and drawings; a small collection of paintings; copies of ancient armor; a few ceramics, coins, and pieces
in bronze and iron; a small collection of casts from the antique; thirty-six pieces of pottery from an ancient cemetery on the Isthmus of Panama, the gift of Mrs. J. S. Lamson; the James Jackson Jarves collection of laces, embroideries, and vestments; a collection of Indian baskets, the gift of Mrs. Rufus S. Frost, to which additions are constantly made, and the Stetson collection of modern paintings in oil.

Thirty-eight large photographs from the Raphael cartoons in the South Kensington Museum, the gift of Mr. John C. Gray, and over five thousand other photographs have been added to the art collections during the past five years.

**Music Hall.**

The department of Music occupies Music Hall, which contains thirty-eight music rooms, and a hall for lectures and choral singing. An ample equipment of musical instruments is furnished for the use of students.

**Laboratories and Scientific Collections.**

**Botany.**

For the use of students in morphological, histological, and physiological work there are four laboratories, each of which is thoroughly equipped for its special purpose. The laboratory for advanced work has also the necessary physical and chemical apparatus, and such other appliances as are requisite to enable students to carry on independent research.

The collections illustrative of Botany include: the herbarium, containing upward of six thousand phanerogams and about six thousand and five hundred cryptogams; a generic collection mounted under glass; a collection of woods, fruits, and economic vegetable products, and a set of drugs fully illustrating the pharmacopoeia; two hundred charts by Henslow, Kny, Dodel, Tschirch, and others; a collection of Auzoux's botanical models, illustrating
the structure of both flowering and flowerless plants; Brendel's glass models of cryptogams; a collection of lantern slides.

In addition to the working collections a permanent museum is being arranged, which now numbers more than five thousand specimens.

**Chemistry.**

The department of Chemistry occupies a separate building, which contains two lecture rooms and the chemical library in addition to the rooms fitted up for laboratory work. Separate rooms are provided for work in General and Organic Chemistry, Qualitative and Quantitative Analysis, Air and Water Analysis, and Food Analysis. The building is conveniently arranged and well equipped with necessary apparatus and appliances.

**Geology and Mineralogy.**

The mineralogical specimens are arranged in three collections. One collection is exhibited in glass cases, and illustrates the variety and finer qualities of mineral specimens; also by its arrangement with labels for the groups into which it is divided, it shows the classifications of minerals, and, to some extent, their association.

Another collection is used for reference. It contains well-characterized specimens of the more common species. The specimens are labeled and arranged in drawers, and the collection is always accessible to students taking Mineralogy.

There is a third collection, which is used for teaching purposes. It comprises smaller but well-selected specimens, which are systematically arranged in small wooden trays with numbers, but without labels. During an exercise each student has one of these trays, which presents objectively the subject of the lesson.

The room containing these collections is supplied with tables equipped with appliances for testing specimens and laboratory work.

The geological collection of specimens used in teaching the
kinds of rocks, rock structures, the fossil evidences of life and their succession in past times, is so arranged in cases and labeled that it permanently illustrates these topics.

Mathematics.

The collection of mathematical models consists of a set of models of simple solids, surfaces of the second and higher orders, and circular sections of surfaces of the second order. They are executed in wood, thread, card, and plaster.

Physics.

The department of Physics occupies a convenient lecture room, provided with arrangements for sunlight and lantern projection and adequate apparatus for illustrative experiments.

Laboratories for students are equipped with instruments adapted to a wide range of work. Rooms are especially fitted for photometry, photography, spectroscopic work, and electrical measurements. A workshop is provided with lathe and tools. A steam engine and two dynamos are connected with the laboratories.

The Whitin Observatory is supplied with a twelve-inch refracting telescope with micrometer, spectroscope, and photometer attachments, a three-inch broken-transit, a concave grating spectroscope, and a collection of minor instruments and photographs.

Meteorological instruments, including thermometer shelter, thermograph, barograph, anemometer, and anemoscope are installed at the observatory.

Psychology.

The work of the laboratory is carried on in seven rooms (among which are dark-room and lecture-room) with electrical connections. The equipment includes Sanford’s chronograph and vernier chronoscope; a chronoscope with electrical connections upon the principle of the vernier; an electric motor; a pneumograph, plethysmograph, tambours, and a kymograph; an automatograph
and finger-dynamometer; Lough's electrically actuated pendulum, to which is attached the time-marker, an electric pen, used with the kymograph; Zwaardemaker's clinical and fluid-mantle olfactometers, with a large collection of smell material; a color-wheel, a campimeter, a Wheatstone stereoscope; the Hering simultaneous contrast apparatus; the apparatus of Münsterberg and of Titchener for the localization of sound; tuning-forks and sonometers; the Jastrow memory apparatus; a pressure-balance, æsthesiometers, graduated weights, etc.; and apparatus for special investigations. Students may have the use of models and plates of the brain, and of dissecting instruments.

Zoology.

There are three laboratories for the study of Zoology and Animal Physiology. They are equipped with microscopes, microtomes, incubator, and the more special pieces of apparatus for physiological work.

The Zoology Museum contains a typical collection of both vertebrates and invertebrates, and a considerable number of models by Ziegler, Blaschka, Auzoux, and Deyrolle. There are also excellent collections of the local birds and of insects.
Needs of the College.

Wellesley College, established by private benevolence, entered upon its work with a costly material equipment, but with no endowment in money.

The endowment of the library by Mr. E. N. Horsford, the later contributions of Mr. Rockefeller and others to general and special endowment, have greatly relieved the burden resting upon the College. Yet to-day the receipts from board and tuition fees form the main resource with which to meet running expenses and annual repairs, and to make those additions to apparatus and buildings which are demanded by the constant advance and expansion of college instruction throughout the country.

It must be evident that the past outlay has been amply justified by results. Notwithstanding the peculiar dependence of the College upon the number of students admitted and retained, the first twenty-seven years of its existence have been attended by a constant rise in the academic standard. From Wellesley have been graduated over two thousand young women, who have carried the fruits of their college training into the schools and households of their country, and into benevolent work at home and abroad. It is believed that the College can with full confidence appeal to the public at large for further aid.

Among the urgent needs of the College are the following:—

1. Unrestricted funds for defraying general expenses.
2. A library building.
3. A science building.
4. A gymnasium building.
5. The endowment of the presidency and professorships.
Forms of Bequest.

I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of ___ dollars, to be appropriated by the Trustees for the benefit of the College in such manner as they shall think will be most useful.

I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of ___ dollars, to be safely invested by it, and called the ___ Scholarship Fund. The interest of this fund shall be applied to aid deserving students in Wellesley College.

I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of ___ dollars, to be safely invested by it, and called the ___ Endowment Fund. The interest shall be applied to the payment of the salaries of teachers in Wellesley College, as the Trustees shall deem expedient.

Honor Scholarships.

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of three and one-half years' work, to juniors on the basis of two and one-half years' work. The standard in each case is absolute, not competitive.
